

Civil Aviation Safety Regulations 1998

Statutory Rules No. 237, 1998

made under the

Civil Aviation Act 1988

Compilation No. 99

Compilation date: 11 April 2024

Includes amendments: F2024L00297

Registered: 18 April 2024

This compilation is in 5 volumes

Volume 1: regulations 1.001–42.1105
Volume 2: regulations 45.005–92.205
Volume 3: regulations 99.005–135.465
Volume 4: regulations 137.005–175.500
Volume 5: regulations 200.005–202.900
Dictionary and Endnotes

Each volume has its own contents

Prepared by the Office of Parliamentary Counsel, Canberra

About this compilation

This compilation

This is a compilation of the *Civil Aviation Safety Regulations 1998* that shows the text of the law as amended and in force on 11 April 2024 (the *compilation date*).

The notes at the end of this compilation (the *endnotes*) include information about amending laws and the amendment history of provisions of the compiled law.

Uncommenced amendments

The effect of uncommenced amendments is not shown in the text of the compiled law. Any uncommenced amendments affecting the law are accessible on the Register (www.legislation.gov.au). The details of amendments made up to, but not commenced at, the compilation date are underlined in the endnotes. For more information on any uncommenced amendments, see the Register for the compiled law.

Application, saving and transitional provisions for provisions and amendments

If the operation of a provision or amendment of the compiled law is affected by an application, saving or transitional provision that is not included in this compilation, details are included in the endnotes.

Editorial changes

For more information about any editorial changes made in this compilation, see the endnotes.

Modifications

If the compiled law is modified by another law, the compiled law operates as modified but the modification does not amend the text of the law. Accordingly, this compilation does not show the text of the compiled law as modified. For more information on any modifications, see the Register for the compiled law.

Self-repealing provisions

If a provision of the compiled law has been repealed in accordance with a provision of the law, details are included in the endnotes.

Contents

Part 1—Preliminary	1
1.001	Name of Regulations1
1.003	Harmonisation with FARs1
1.004	Dictionary1
1.006	Status of tables of contents2
1.008	Manuals of Standards2
Part 11—Regulatory administrative procedures	3
Subpart 11.A—Preliminary	6
11.005	Purpose of Part6
11.010	What is in this Part6
11.015	Definitions for Part6
11.018	Approval of forms7
Subpart 11.B—Applications for authorisations	8
11.020	Effect of this Subpart8
11.025	Application of Part 11 to authorised persons8
11.026	Application of Part 11 to approved design organisations8
11.027	Application of Part 11 to relevant approved organisations9
11.028	Application of Part 11 to examiners, instructors and approval holders9
11.030	When application taken to be complete9
11.032	Application for authorisation after previous authorisation cancelled10
11.033	Applications by agents10
11.034	Requirements for applications made by agents11
11.035	Other things CASA can ask applicant to do—test or interview12
11.040	Other things CASA can ask applicant to do—provide more information13
11.045	Other things CASA can ask applicant to do—demonstrate a service or facility13
11.047	Other things CASA can ask applicant to do—statutory declarations to verify applications14
11.050	Material that CASA may or must take into account14
Subpart 11.BA—Granting authorisations etc	16
11.055	Grant of authorisation16
11.056	Authorisation may be granted subject to conditions18
11.060	Notice of decision18
11.065	When authorisation comes into effect19
11.067	Imposing and varying conditions after grant of authorisation19
11.068	Conditions imposed on class of authorisations20
11.070	Conditions of authorisations—change of name or address21
11.071	Conditions of authorisations—change of nationality21

11.072	Conditions of authorisations—change of business status.....	22
11.073	Conditions of authorisations—notice of death, dissolution etc.....	23
11.074	Conditions of authorisations—notice required by CASA	24
11.075	Conditions of authorisations—provision of information	24
11.077	Breach of conditions—offence.....	25
11.080	Authorisations not transferable	25
Subpart 11.C—Authorisation documents, certificates and related matters		26
11.090	Authorisation document—authorisations to which Chicago Convention, Annex 1 applies	26
11.095	Authorisation document—maintenance operation authorisations.....	26
11.100	Registration certificate (Chicago Convention, Annex 7).....	26
11.105	Certificate of Airworthiness (Chicago Convention, Annex 8).....	26
11.110	Authorisation document—other authorisations.....	26
11.115	Replacement documents.....	26
Subpart 11.D—Applications for variation, suspension and cancellation of authorisations		28
11.120	What Subpart 11.D is about	28
11.125	Application of Subparts 11.B and 11.BA to variation of authorisation.....	28
11.130	Suspension or cancellation of authorisation.....	28
11.132	Effect of suspension	29
Subpart 11.E—Time-limited authorisations		30
11.135	Purpose of Subpart	30
11.140	Continuation of authorisation until application decided.....	30
11.145	Application of Subparts 11.B and 11.BA.....	30
11.150	Conditions on new authorisation.....	31
Subpart 11.F—Exemptions from provisions of these Regulations and Civil Aviation Orders		32
Division 11.F.1—Grant of standard exemptions		32
11.155	Purpose of Division	32
11.160	What exemptions can be granted under this Division	32
11.165	Applications for exemptions	32
11.170	Consideration of applications	33
11.175	Renewal of exemptions under this Division.....	33
Division 11.F.2—Grant of exemptions in exceptional circumstances		34
11.180	Purpose of Division	34
11.185	Exemptions in exceptional circumstances.....	34

11.190	Application	34
11.195	Consideration by CASA	35
Division 11.F.3—Exemptions generally		36
11.200	Purpose of Division	36
11.205	Conditions	36
11.210	Offence: failure to comply with condition	36
11.220	Notice of grant of exemption.....	36
11.225	Publication of exemption.....	36
11.230	When exemptions cease	36
11.235	Exemptions not transferable.....	37
Subpart 11.G—Directions		38
11.240	Purpose of Subpart	38
11.245	CASA may issue directions.....	38
11.250	Period of effect of direction.....	38
11.255	Contravention of direction.....	38
Subpart 11.H—Delegation of CASA’s powers		39
11.260	Delegation	39
Subpart 11.J—Manuals of Standards—procedures		40
11.265	Purpose of Subpart	40
11.267	Application of Subpart to amendment or revocation of Manual of Standards	40
11.270	Definition— <i>MOS</i>	40
11.275	Notice of intention to issue Manuals of Standards not required in certain circumstances	40
11.280	Notice of intention to issue Manuals of Standards.....	41
11.285	Comments on draft Manuals of Standards	41
11.290	CASA to consider comments on draft Manuals of Standards	41
11.295	Failure to comply with procedures not to affect validity of Manuals of Standards.....	41
Part 13—Enforcement procedures		43
Subpart 13.K—Voluntary reporting and demerit points schemes		43
Division 13.K.1—Aviation Self Reporting Scheme		43
13.320	Definitions	43
13.325	Contraventions that are not reportable	43
13.330	Prescribed person (Act s 30DM).....	43
13.335	Establishment and purposes of scheme (Act s 30DN).....	43
13.340	Powers and functions of Executive Director	44
13.345	Manner in which reports to be made (Act s 30DN(2)(b)).....	44
13.350	Processing of reports	45
13.355	Reports relating to unlawful interference	45
13.360	Use of information contained in reports (Act s 30DN(2)(c)).....	45
13.365	Delegation by Executive Director	46

Division 13.K.2—Demerit points scheme	47
13.370	Offences to which demerit points scheme applies (Act s 30DT).....47
13.375	Classes of civil aviation authorisations47
13.380	Effect of subsequent suspension or cancellation in certain situations (Act s 30DV).....48
Part 21—Certification and airworthiness requirements for aircraft and parts	49
Subpart 21.A—General	56
21.001	Applicability.....56
21.001A	Definition for Subpart56
21.002C	Suspension or cancellation of an instrument.....56
21.002D	Show cause notices.....57
21.002E	Cancellation of certain certificates57
21.003	Reporting failures, malfunctions, and defects57
21.005	Manufacturers etc to provide aircraft flight manuals for certain aircraft.....60
21.006	Approval of aircraft flight manuals61
21.006A	Approval of changes to aircraft flight manuals61
21.007	Permissible unserviceabilities62
21.007A	Advice about major damage.....63
21.008	Meaning of <i>technical data</i>63
21.009	Approval of technical data64
21.010	References to modifications and repairs in Part.....65
21.010A	References to the national aviation authority of a recognised country65
21.010B	Definition of <i>recognised country</i>65
21.010C	References to countries with which Australia has agreements.....66
21.010D	Issue of Manual of Standards for Part 2166
Subpart 21.B—Type certificates and type acceptance certificates	67
21.011	Applicability.....67
21.013	Eligibility.....67
21.013A	Issue of type certificate.....67
21.014	Recognition of foreign certification68
21.015	Application for type certificate.....68
21.016	Special standards and other conditions on type certificates68
21.017	Designation of applicable airworthiness standards69
21.019	Changes requiring a new type certificate70
21.021	Type certificate: normal, utility, acrobatic, commuter, and transport category aircraft; manned free balloons; special classes of aircraft; aircraft engines; propellers.....71
21.024	Type certificate: primary category aircraft.....71
21.025	Issue of type certificate: restricted category aircraft72
21.026	Type certificate: intermediate category aircraft73

21.027	Type certificate: surplus aircraft of the Armed Forces	74
21.029	Type certificate for imported aircraft, aircraft engines or propellers not type certificated by national aviation authority of recognised country	76
21.029A	Type acceptance certificate for imported aircraft certificated by national aviation authority of recognised country	77
21.029B	Issue of type acceptance certificates subject to conditions	77
21.029C	Refusal to issue type acceptance certificate	78
21.031	Type design—meaning	78
21.033	Inspection and tests	80
21.035	Flight tests	81
21.037	Flight test pilot.....	82
21.039	Flight test instrument calibration and correction report	82
21.041	Type certificate—meaning	82
21.043	Location of manufacturing facilities	83
21.047	Transfer of type certificates.....	83
21.048	Licensing of type certificates	83
21.049	Availability.....	84
21.050	Instructions for continued airworthiness and manufacturer’s maintenance manuals having airworthiness limitations sections	84
21.051	Type certificates and type acceptance certificates—duration and suspension or cancellation.....	85
21.053	Statement of conformity	86
Subpart 21.C—Provisional type certificates		87
21.071	Applicability.....	87
21.073	Eligibility.....	87
21.075	Application	87
21.076	Issue of provisional type certificate.....	88
21.077	Duration.....	88
21.078	Suspension and cancellation.....	88
21.081	Requirements for issue and amendment of Class I provisional type certificates.....	89
21.083	Requirements for issue and amendment of Class II provisional type certificates.....	90
21.085	Provisional amendments to type certificates	91
Subpart 21.D—Changes to type certificates		93
21.091	Applicability	93
21.093	Classification of changes in type design	93
21.095	Approval of minor changes in type design.....	93
21.097	Eligibility for approval of major changes in type design.....	94
21.098	Issue of approval of major change in type design	94
21.099	Required design changes	94
21.101	Designation of applicable regulations	95

Subpart 21.E—Supplemental type certificates	97
21.111	Applicability97
21.113	Eligibility for supplemental type certificate97
21.113A	Issue of supplemental type certificate97
21.114	Foreign supplemental type certificates97
21.115	Entitlement to supplemental type certificate— meeting applicable airworthiness requirements98
21.117	What supplemental type certificates are taken to consist of.....98
21.118	Duration, suspension and cancellation of supplemental type certificates99
21.119	Duration, suspension and cancellation of foreign supplemental type certificates99
21.120	Transfer of supplemental type certificates100
21.120A	Licensing of supplemental type certificates100
21.120B	Variations of supplemental type certificates101
Subpart 21.F—Production under type certificate only	103
21.121	Applicability103
21.123	Production under type certificate103
21.125	Production inspection system: Materials Review Board104
21.127	Tests: aircraft105
21.128	Tests: aircraft engines105
21.129	Tests: variable pitch propellers106
21.130	Statement of conformity106
21.130A	Records to be kept by manufacturer107
Subpart 21.G—Production certificates	108
21.131	Applicability108
21.132	Definitions for Subpart 21.G108
21.132A	Approval of product design for Class II and Class III products by CASA, authorised person or relevant approved design organisation109
21.133	Eligibility109
21.134	Issue of production certificate110
21.135	Requirements for entitlement110
21.137	Location of manufacturing facilities111
21.139	Quality system111
21.143	Quality system data requirements: prime manufacturer111
21.144	Production inspection system112
21.145	Materials Review Board113
21.147	Changes in quality system113
21.149	Multiple products114
21.151	Production limitation record114
21.153	Amendment of production certificate114
21.157	Inspections and tests115
21.159	Duration115
21.161	Display115
21.163	Privileges for holders of production certificates— conduct of training in particular maintenance116

21.165	Responsibility of holder of production certificate.....	117
21.166	Records to be kept by holder of production certificate.....	117

Subpart 21.H—Certificates of airworthiness (except provisional certificates of airworthiness) and special flight permits

		119
21.171	Applicability.....	119
21.172	Definitions for Subpart.....	119
21.173	Eligibility.....	120
21.174	Applications for limited category certificates made to CASA—giving to limited category organisation.....	120
21.175	Certificates of airworthiness: classification.....	121
21.176	Issue of certain certificates of airworthiness.....	121
21.179	Transferability.....	122
21.181	Duration of certain certificates of airworthiness.....	122
21.182	Aircraft manufacturer’s data plate.....	124
21.183	Standard certificates of airworthiness.....	124
21.184	Special certificates of airworthiness for primary category aircraft.....	126
21.184A	Special certificates of airworthiness for intermediate category aircraft.....	128
21.185	Certificates of airworthiness for restricted category aircraft.....	129
21.186	Special certificates of airworthiness for light sport aircraft.....	130
21.187	Multiple-category airworthiness certification.....	131
21.189	Special certificate of airworthiness for limited category aircraft.....	132
21.190	Special certificates of airworthiness—amateur-built category aircraft accepted under an ABAA.....	133
21.191	Experimental certificates.....	134
21.192	Experimental certificates: eligibility.....	135
21.193	Experimental certificates: general.....	135
21.195	Experimental certificates: aircraft to be used for market surveys, sales demonstrations, and customer crew training.....	136
21.195A	Issue of experimental certificates.....	137
21.195B	Duration, production for inspection, suspension and cancellation of experimental certificates.....	137
21.195C	Exercise of certain powers by authorised persons and relevant approved design organisations.....	139
21.196	Special flight permits: eligibility.....	139
21.197	Special flight permits.....	139
21.199	Applications for special flight permits.....	140
21.200	Issue of special flight permits.....	140
21.201	Inspection, suspension and cancellation of special flight permits.....	141

Subpart 21.I—Provisional certificates of airworthiness

		142
21.211	Applicability.....	142
21.213	Eligibility.....	142

21.215	Application	142
21.216	Issue of provisional certificates of airworthiness	142
21.217	Duration	143
21.219	Transferability	143
21.221	Class I provisional certificates of airworthiness.....	143
21.223	Class II provisional certificates of airworthiness	144
21.225	Provisional certificates of airworthiness corresponding with provisional amendments to type certificates.....	144
Subpart 21.J—Approved design organisations		146
Division 21.J.1—General		146
21.231	What Subpart 21.J is about.....	146
21.233	Definitions for Subpart 21.J	146
21.235	Privileges for approved design organisations.....	149
21.237	Prohibition of unauthorised carrying out of design activities.....	149
21.239	Applications may be made to approved design organisation—approval activities and experimental certificates	150
Division 21.J.2—Approval as approved design organisation		151
21.241	Applying for approval	151
21.243	Granting approval.....	151
21.245	Approval certificate	153
21.247	Approval subject to conditions—general	153
21.248	Approval subject to conditions—holders of other authorisations under Part 21 and licensees	153
21.249	Cancellation, suspension and variation of approval	154
Division 21.J.3—Authorisation to carry out particular certification activity		155
21.251	Authorisation of approved design organisations to carry out certification activities	155
Division 21.J.4—Changes to approved design organisations		156
21.253	Application for approval of change to scope of approval	156
21.255	Application for approval of change to design assurance system	156
21.256	Change to design assurance system manual at direction of CASA	157
21.257	Application for approval of permanent appointment of new accountable manager or head of design	157
21.258	Permanent appointment of other key personnel— requirement to tell CASA.....	158
21.259	Change to exposition by organisation	158
21.261	Change to exposition at direction of CASA.....	158
Division 21.J.5—Obligations of approved design organisations		160
21.263	Content of exposition	160
21.265	Compliance with exposition	160
21.267	Design assurance system	161

21.269	Requirements for design assurance system— general	161
21.270	Requirements for design assurance system— holders of other authorisations under Part 21 and licensees.....	162
21.271	Compliance with design assurance system manual.....	162
21.273	Audit of approved design organisation by CASA.....	162
21.275	Inspections and observations.....	163
21.277	Record keeping and production of records to CASA	163
21.279	Directions to comply with specified procedures or instructions	164
21.281	Investigation of potentially unsafe condition	164
21.283	Requirement to provide employees and subcontractors with exposition and design assurance system manual.....	165
Subpart 21.K—Approval of materials, parts, processes and appliances		166
21.301	Applicability.....	166
21.303	Replacement and modification parts	166
21.304A	Changes to an APMA.....	169
21.305	Approval of materials, parts, processes and appliances	169
21.305A	Approval of materials, parts, processes and appliances not covered by regulation 21.305	170
21.306	Use of standard parts and materials.....	170
Subpart 21.L—Export airworthiness approvals		172
21.321	Applicability.....	172
21.323	Eligibility.....	172
21.324	Issue of export airworthiness approvals	172
21.325	Export airworthiness approvals	173
21.327	Application	174
21.329	Issue of export airworthiness approvals for Class I products	176
21.331	Issue of airworthiness approvals for Class II products	176
21.333	Issue of export airworthiness approvals for Class III products	177
21.339	Export airworthiness approval for aircraft	177
Subpart 21.M—Designs of modifications of, and repairs to, aircraft, aircraft engines, propellers and appliances		179
Division 21.M.1—Preliminary		179
21.400	Purpose of Subpart	179
21.402	Definition of <i>proposed airworthiness standards</i> for Subpart 21.M	179
21.403	Definition of <i>applicable airworthiness standards</i> for Subpart 21.M	179
Division 21.M.2—Modification/repair design approvals		181
21.405	Applications for modification/repair design approvals	181

21.410	Refusal to grant approval if design constitutes major change in type design.....	182
21.414	Determination of additional airworthiness standards—special conditions	182
21.416	Determination of non-application of airworthiness standards—application to CASA	182
21.418	Determination of non-application of airworthiness standards—application to authorised person or approved design organisation.....	183
21.420	Applicants must show compliance with applicable airworthiness standards, submit technical data and provide documents	183
21.425	Applicants to carry out necessary inspections and tests.....	184
21.430	CASA, authorised person or approved design organisation may carry out or observe certain tests	184
21.435	Grant of modification/repair design approvals—grant by CASA	185
21.436	Application to authorised person or approved design organisation—non-compliance with applicable airworthiness standards: determination of equivalent level of safety	186
21.437	Grant of modification/repair design approvals—grant by authorised person or approved design organisation	187
21.440	Form of modification/repair design approvals	188
21.445	Variation of modification/repair design approvals.....	188
Division 21.M.3—Transfer of, and obligations for holders of, modification/repair design approvals and approvals granted in accordance with alternative method		189
21.448	Approvals to which this Division applies.....	189
21.450	Transfer of modification/repair design approvals and approvals granted in accordance with alternative method	189
21.455	Record keeping and making records available to CASA	190
21.460	Instructions for continued airworthiness and flight manual supplement to be made available.....	190
Division 21.M.4—Other means of approval		191
21.465	Modifications and repairs directed by CASA	191
21.470	Foreign modification/repair designs.....	191
21.475	Part 21 Manual of Standards may prescribe alternative method of approval of modification and repair designs.....	191
Subpart 21.N—Approval of engines, propellers, materials, parts and appliances: imported		192
21.500	Approval of imported aircraft engines and propellers	192
21.500A	Approval of other imported aircraft engines and propellers	192
21.502	Approval of imported materials, parts and appliances	193

21.502A	Approval of other imported materials, parts and appliances	193
Subpart 21.O—Australian Technical Standard Order		
Authorisations		194
21.601	Applicability	194
21.603	ATSO marking and privileges	195
21.605	Application and issue	195
21.607	General rules governing holders of ATSO authorisations	196
21.609	Approval for deviation	197
21.611	Design changes	197
21.613	Record keeping requirements	198
21.615	CASA inspection	198
21.617	Issue of letters of ATSO design approval: import appliances	199
21.619	Non-compliance	199
21.621	Duration	199
Subpart 21.Q—Identification of aircraft and aeronautical products		
		201
Division 21.Q.1—Preliminary		201
21.805	Applicability of this Subpart	201
21.810	Meaning of <i>fireproof</i>	201
Division 21.Q.2—Aircraft, aircraft engines and aircraft propellers		202
21.815	Applicability of this Division	202
21.820	Manufacturer’s data plate must be attached to aircraft	202
21.825	Manufacturer’s data plate must be attached to basket of manned free balloon	202
21.830	Heater assembly of manned free balloon must carry identification mark	203
21.835	Manufacturer’s data plate must be attached to aircraft engine	203
21.840	Aircraft propellers, blades and hubs must carry identification marks	204
Division 21.Q.3—Critical parts		206
21.845	Applicability of this Division	206
21.850	Identification of critical parts	206
21.855	Removal or alteration of identification on critical parts	206
Division 21.Q.4—Aircraft parts		207
21.860	Applicability of this Division	207
21.865	Identification of parts produced under an APMA	207
21.870	Identification of parts produced under an APMA if marking is impracticable	207
21.875	Identification of other aircraft parts	208
21.880	Identification of other aircraft parts—other than by marking	208

Part 22—Airworthiness standards for sailplanes and powered sailplanes	209
22.001	Airworthiness standards209
22.002	Incidental provisions209
22.003	Changes to EASA CS-22209
22.004	Approvals under EASA CS-22.....209
Part 23—Airworthiness standards for aeroplanes in the normal, utility, acrobatic or commuter category	210
23.001	Airworthiness standards210
23.002	Incidental provisions210
23.003	Changes to Part 23 of the FARs211
23.004	Changes to EASA CS-VLA211
23.005	Changes to EASA CS-23211
23.006	Approvals under Part 23 of the FARs211
23.007	Approvals under EASA CS-VLA211
23.008	Approvals under EASA CS-23.....212
Part 25—Airworthiness standards for aeroplanes in the transport category	213
Subpart 25.A—General	214
25.001	Airworthiness standards214
25.002	Incidental provisions214
Subpart 25.B—Changes to FARs and EASA CS-25	215
25.003	Changes to Part 25 of the FARs215
25.004	Changes to EASA CS-25215
25.005	Approvals under Part 25 of the FARs215
25.006	Approvals under EASA CS-25.....215
Subpart 25.C—Airworthiness standards directed by ICAO	216
25.011	What this Subpart does.....216
25.013	Least-risk bomb location.....216
Part 26—Airworthiness standards for aircraft in the primary category or intermediate category	217
26.001	Airworthiness standards217
26.002	Incidental provisions217
Part 27—Airworthiness standards for rotorcraft in the normal category	218
27.001	Airworthiness standards218
27.002	Incidental provisions218
27.003	Changes to Part 27 of the FARs218
27.003A	Changes to EASA CS-27219
27.004	Approvals under Part 27 of the FARs219
27.005	Approvals under EASA CS-27.....219
Part 29—Airworthiness standards for rotorcraft in the transport category	220
29.001	Airworthiness standards220

29.002	Incidental provisions	220
29.003	Changes to Part 29 of the FARs	220
29.003A	Changes to EASA CS-29	221
29.004	Approvals under Part 29 of the FARs	221
29.005	Approvals under EASA CS-29.....	221
Part 31—Airworthiness standards for manned free balloons		222
31.001	Airworthiness standards	222
31.002	Incidental provisions	222
31.003	Changes to Part 31 of the FARs	223
31.004	Changes to EASA CS-31HB	223
31.005	Changes to EASA CS-31GB	223
31.006	Approvals under Part 31 of the FARs	223
31.007	Approvals under EASA CS-31HB	223
31.008	Approvals under EASA CS-31GB	223
Part 32—Airworthiness standards for engines for very light aeroplanes		225
32.001	Airworthiness standards	225
32.002	Incidental provisions	225
32.003	Changes to EASA CS-22	225
32.004	Approvals under EASA CS-22.....	225
Part 33—Airworthiness standards for aircraft engines		226
33.001	Airworthiness standards	226
33.002	Incidental provisions	226
33.003	Changes to Part 33 of the FARs	226
33.003A	Changes to EASA CS-E	227
33.004	Approvals under Part 33 of the FARs	227
33.005	Approvals under EASA CS-E	227
Part 35—Airworthiness standards for aircraft propellers		228
35.001	Airworthiness standards	228
35.002	Incidental provisions	228
35.003	Changes to Part 35 of the FARs	228
35.003A	Changes to EASA CS-P	229
35.004	Approvals under Part 35 of the FARs	229
35.005	Approvals under EASA CS-P	229
Part 39—Airworthiness directives		230
39.001A	Definitions	230
39.001	CASA may issue Australian airworthiness directives	230
39.002	Aircraft or aeronautical products covered by airworthiness directive	231
39.002A	Aircraft that become Australian aircraft—compliance with Australian airworthiness directives	231
39.002B	Compliance with foreign airworthiness directives	232
39.003	Australian aircraft covered by airworthiness directive not to be operated	232
39.004	Approvals and exclusions in relation to airworthiness directives	233

39.005	Documents or things to be sent to CASA.....	234
39.006	Request for review of operation of Australian airworthiness directive	234
39.007	Action to be taken by CASA on receiving request under regulation 39.006.....	234
Part 42—Continuing airworthiness requirements for aircraft and aeronautical products		236
Subpart 42.A—Preliminary		245
42.005	Purpose of Part	245
42.010	Applicability of Part	245
42.015	Definitions for Part.....	245
42.020	Part 42 Manual of Standards	251
Subpart 42.B—Requirements for registered operators		254
Division 42.B.1—Preliminary		254
42.025	Purpose of Subpart	254
Division 42.B.2—Continuing airworthiness requirements		255
42.030	Continuing airworthiness requirements—all aircraft	255
42.035	Condition of AOC—aircraft authorised to operate under AOCs.....	256
42.040	Aircraft authorised to operate under AOCs and large aircraft must have continuing airworthiness management organisations	256
42.045	Small aircraft not authorised to operate under AOCs may have continuing airworthiness management organisations	256
42.050	Form of continuing airworthiness management contract—all aircraft.....	257
42.055	Giving information in accordance with contract.....	257
42.060	Copy of certain provisions of contract to be given to CASA	258
42.065	Copy of variation of certain provisions of contract to be given to CASA	258
42.070	Notice of termination of contract to be given to CASA	258
42.075	Notice of contravention of Part to be given to CASA	259
42.080	Maintenance of aircraft and aeronautical products	259
Division 42.B.3—Record-keeping requirements in relation to authorisations under regulation 42.630		261
42.085	Application of Division	261
42.090	Retaining copies of authorisations	261
42.095	Keeping lists of authorised pilot licence holders and flight engineers	261

Subpart 42.C—Continuing airworthiness management— requirements for person responsible for continuing airworthiness for aircraft	262
Division 42.C.1—Preliminary	262
42.100 Purpose of Subpart	262
42.105 Meaning of <i>person responsible for continuing airworthiness</i> for aircraft.....	262
Division 42.C.2—Continuing airworthiness management tasks	263
42.110 Complying with regulations in this Division	263
42.115 Rectification of defect to aircraft before flight—all aircraft	263
42.120 Compliance with airworthiness directives—all aircraft	263
42.125 Approval of design for modifications or repairs to aircraft—all aircraft.....	264
42.130 Dealing with certain instructions for continuing airworthiness—aircraft authorised to operate under AOCs and large aircraft.....	265
42.135 Replacement of life limited aeronautical product— all aircraft	265
42.140 Approved maintenance program required—aircraft authorised to operate under AOCs and large aircraft	265
42.145 Compliance with maintenance program required— all aircraft	266
42.150 Updating approved maintenance program following change to instructions for continuing airworthiness	266
42.155 Ensuring effectiveness of approved maintenance program using approved reliability programs— certain aircraft.....	266
42.160 Ensuring effectiveness of approved maintenance program—other aircraft authorised to operate under AOCs and large aircraft.....	267
42.165 Removal of aeronautical products fitted as permitted by regulation 42.440	267
Division 42.C.3—Continuing airworthiness records—all aircraft	269
Subdivision 42.C.3.1—Continuing airworthiness records system	269
42.170 Continuing airworthiness records system.....	269
Subdivision 42.C.3.2—Information about aircraft	269
42.175 Requirement to record information	269
42.180 Information about aircraft engines and propellers	270
42.185 Information about empty weight of aircraft	270
42.190 Information about utilisation of aircraft	271
42.195 Information about compliance with airworthiness directives	272
42.200 Information about compliance with maintenance program	273
42.205 Information about modifications	275
42.210 Information about aeronautical products with life limit	276

Subdivision 42.C.3.3—Substantiating documents	277
42.215 Substantiating documents.....	277
Subdivision 42.C.3.4—Flight technical log	277
42.220 Flight technical log	277
42.225 Availability of flight technical log	278
Subdivision 42.C.3.5—Recording next maintenance due to be carried out	278
42.230 Recording details of next maintenance due to be carried out in flight technical log	278
42.235 Approval of another means of recording next maintenance due to be carried out.....	279
42.240 Recording details of next maintenance due to be carried out by approved other means	280
Subdivision 42.C.3.6—Recording utilisation information	280
42.245 Ensuring flight technical log can contain utilisation information mentioned in regulation 42.190 for each flight if another means not approved.....	280
42.250 Approval of another means of recording utilisation information mentioned in regulation 42.190 for each flight.....	280
42.255 Recording utilisation information mentioned in regulation 42.190 for each flight by approved other means.....	281
Subdivision 42.C.3.7—Retention and transfer of records	281
42.260 Retention of continuing airworthiness records.....	281
42.265 Transfer of continuing airworthiness records for aircraft	283
Division 42.C.4—Major defects—reporting and investigating	284
42.270 Reporting major defects—all aircraft.....	284
42.275 Investigating major defects—large aircraft and aircraft authorised to operate under AOC	285
42.280 Action by CASA following report of major defect.....	285
42.285 Action by certificate holder or approval holder following report of major defect	285
Subpart 42.D—Maintenance	287
Division 42.D.1—Preliminary	287
42.290 Purpose of Subpart	287
Division 42.D.2—Permissions for section 20AB of Act—aircraft	288
42.295 Who is permitted to carry out maintenance on aircraft—approved maintenance organisations.....	288
42.300 Who is permitted to carry out maintenance on aircraft—individuals not working for approved maintenance organisations	288
42.301 Who is permitted to carry out maintenance—organisations under NAA arrangement.....	290
Division 42.D.3—Permissions for section 20AB of Act— aeronautical products	291
42.305 Who is permitted to carry out maintenance on aeronautical products.....	291

42.306	Who is permitted to carry out maintenance on aeronautical products—foreign organisations approved by national aviation authority	291
Division 42.D.4—Requirements for carrying out maintenance		293
42.310	General requirements for carrying out maintenance	293
42.315	Ensuring individuals are competent to carry out maintenance.....	294
42.320	Restriction on maintenance that independent maintainers may instruct or permit supervised individuals to carry out.....	295
42.325	Maintenance involving modifications and certain repairs	295
42.330	Removal of tools etc after carrying out maintenance.....	296
Division 42.D.5—Requirements for independent inspection of critical control system maintenance		298
42.335	Meaning of <i>independent individual</i>	298
42.340	Requirement for verification and record for critical control system maintenance	298
42.345	Verification and record for critical control system maintenance.....	299
Division 42.D.6—Requirements for dealing with defects		300
Subdivision 42.D.6.1—Dealing with defects		300
42.350	Meaning of <i>qualified individual</i>	300
42.355	Recording defects	300
42.360	When qualified individual may defer rectification of defect.....	300
42.365	How rectification of defect is deferred.....	301
42.370	Record for deferral of rectification of defect.....	301
Subdivision 42.D.6.2—Reporting defects		302
42.375	Major defect reporting— <i>independent maintainer</i> carrying out maintenance on aircraft.....	302
42.380	Major defect reporting— <i>approved maintenance organisation</i> carrying out maintenance on aircraft	302
42.385	Major defect reporting— <i>approved maintenance organisation</i> carrying out maintenance on aeronautical product	302
42.390	Reporting requirements	303
Division 42.D.7—Requirements for recording maintenance for aircraft or aeronautical products		304
42.395	Recording maintenance information for aircraft	304
42.400	Making maintenance record for aeronautical products	305
42.405	Provision of maintenance record and other documents to registered operator	306
42.410	Retention of copy of maintenance record by approved maintenance organisations.....	307
Subpart 42.E—Aeronautical products		308
Division 42.E.1—Preliminary		308
42.415	Purpose of Subpart	308

Division 42.E.2—Requirements for fitting parts and using materials	309
42.420 Fitting parts other than standard parts	309
42.425 Obligations and offences for fitting parts other than standard parts	310
42.430 Fitting parts removed from aircraft—permission for paragraph 42.420(5)(c)	311
42.435 Fitting parts fabricated by approved maintenance organisations—permission for subparagraph 42.420(5)(a)(ii)	311
42.440 Fitting parts for which there is no authorised release certificate—permission for subparagraphs 42.420(5)(a)(ii) and (b)(iii)	311
42.445 Fitting standard parts	312
42.450 Fitting parts removed from same place on aircraft—permission for paragraphs 42.420(1)(a) and 42.445(1)(a)	314
42.455 Using materials	314
Division 42.E.3—Requirements for controlling unserviceable and unsalvageable parts	316
42.460 Control of unserviceable parts	316
42.465 Control of unsalvageable parts	316
Division 42.E.4—Requirements for controlling unapproved parts	318
42.470 Meaning of <i>unapproved</i> for parts	318
42.475 Control of unapproved parts	318
42.480 Reporting unapproved parts	318
42.485 Action by CASA following report of unapproved parts	319
42.490 Action required if parts not required to be kept	319
Subpart 42.F—Subpart 42.F approved maintenance organisations	320
Division 42.F.1—General	320
42.495 Purpose of Subpart	320
42.500 Definitions for Subpart	320
42.505 Regulations 11.070 to 11.075 do not apply in relation to certain matters	321
Division 42.F.2—Approval of Subpart 42.F organisations	322
42.510 Applying for approval	322
42.515 Issuing approval	322
42.520 Approval certificate	323
42.525 Privileges for Subpart 42.F organisations	323
42.530 Approval subject to conditions	323
Division 42.F.3—Changes to Subpart 42.F organisations	325
42.535 Application for approval of significant changes to Subpart 42.F organisations	325
42.540 Approval of significant changes	325
42.545 Changes to Subpart 42.F organisations that are not significant changes	325

42.550	CASA may direct Subpart 42.F organisations to change expositions	326
Division 42.F.4—Requirements and offences for Subpart 42.F organisations		327
42.555	Provision of maintenance services	327
42.560	Providing employees with exposition	327
42.565	Complying with directions	327
Subpart 42.G—Continuing airworthiness management organisations		328
Division 42.G.1—General		328
42.570	Purpose of Subpart	328
42.575	Definitions for Subpart.....	328
42.580	Regulations 11.070 to 11.075 do not apply in relation to certain matters.....	330
Division 42.G.2—Approval of continuing airworthiness management organisations		331
42.585	Applying for approval	331
42.590	Issuing approval	331
42.595	Approval certificate.....	332
42.600	Privileges for continuing airworthiness management organisations	333
42.605	Approval subject to conditions.....	333
Division 42.G.3—Changes to continuing airworthiness management organisations		334
42.610	Application for approval of significant changes to continuing airworthiness management organisations.....	334
42.615	Approval of significant changes.....	334
42.620	Changes to continuing airworthiness management organisations that are not significant changes.....	335
42.625	CASA may direct continuing airworthiness management organisations to change expositions.....	335
Division 42.G.4—Authorisation of pilot licence holders and flight engineers to provide maintenance services		336
42.630	When pilot licence holders and flight engineers may be authorised.....	336
42.635	Ceasing of authorisation if organisation ceases to be responsible for providing continuing airworthiness management services for aircraft.....	337
42.640	Directions in relation to authorisations	337
42.645	Notice of cancellation of authorisation	338
Division 42.G.5—Requirements and offences for continuing airworthiness management organisations		339
42.650	Provision of continuing airworthiness management services	339
42.655	Providing employees with exposition	339
42.660	Copies of authorisations and records.....	339
42.665	Complying with directions	340
42.670	Giving information in accordance with contract.....	340

42.675	Notice of contravention of Part to be given to CASA	340
Subpart 42.H—Maintenance certification and certificate of release to service		342
Division 42.H.1—General		342
42.680	Purpose of Subpart	342
Division 42.H.2—Maintenance certification for maintenance carried out on aircraft		343
Subdivision 42.H.2.1—Application of Division		343
42.685	Application of Division	343
Subdivision 42.H.2.2—Who must perform maintenance certification		343
42.690	Approved maintenance organisations	343
42.695	Individuals performing maintenance certification on behalf of approved maintenance organisations	343
42.700	Independent maintainers.....	344
Subdivision 42.H.2.3—Requirements for performing maintenance certification		344
42.705	Requirements to be met by individuals before performing maintenance certification	344
42.710	Requirements to be met by organisations before performing maintenance certification	345
Subdivision 42.H.2.4—Performance of maintenance certification		345
42.715	How maintenance certification is performed	345
Division 42.H.3—Certificate of release to service—aircraft		347
Subdivision 42.H.3.1—Preliminary		347
42.720	Application of Division	347
42.725	Requirement not to release aircraft without certificate of release to service	347
Subdivision 42.H.3.2—Who may issue certificate of release to service		348
42.730	Approved maintenance organisations	348
42.735	Individuals issuing certificates of release to service on behalf of approved maintenance organisations	348
42.740	Independent maintainers.....	349
Subdivision 42.H.3.3—Requirements for issuing certificate of release to service		349
42.745	Requirements to be met before certificate of release to service may be issued.....	349
42.750	Requirements to be met by approved maintenance organisations before issuing certificate of release to service.....	350
42.755	Requirements to be met by individuals before issuing certificate of release to service.....	350
Subdivision 42.H.3.4—Form, content and issue of certificate of release to service		351
42.760	Form and content of certificate of release to service.....	351

42.765	How certificate of release to service is issued.....	351
Subdivision 42.H.3.5—Record-keeping		351
42.770	Retaining copy of certificate of release to service	351
Division 42.H.4—Certificate of release to service—aeronautical products		353
Subdivision 42.H.4.1—Preliminary		353
42.775	Application of Division	353
42.780	Requirement not to release aeronautical product without certificate of release to service	353
Subdivision 42.H.4.2—Who may issue certificate of release to service		353
42.785	Approved maintenance organisations	353
42.790	Individuals issuing certificates of release to service on behalf of approved maintenance organisations	354
Subdivision 42.H.4.3—Requirements for issuing certificate of release to service		354
42.795	Requirements to be met before certificate of release to service may be issued.....	354
42.800	Requirements to be met by approved maintenance organisations before issuing certificate of release to service.....	355
42.805	Requirements to be met by individuals before issuing certificate of release to service.....	355
Subdivision 42.H.4.4—Form and issue of certificate of release to service		356
42.810	Form of certificate of release to service	356
42.815	How certificate of release to service is issued.....	356
Subdivision 42.H.4.5—Record-keeping and dealing with certificate of release to service		356
42.820	Additional record for certificate of release to service issued as in-house release document.....	356
42.825	Dealing with certificate of release to service	357
Subpart 42.I—Airworthiness reviews and airworthiness review certificates		358
Division 42.I.1—General		358
42.830	Application of Subpart	358
42.835	Purpose of Subpart	358
Division 42.I.2—Issue of airworthiness review certificates		359
42.840	Who may issue airworthiness review certificate.....	359
42.845	Requirements to be met for issue of airworthiness review certificate	359
42.850	Requirements to be met by continuing airworthiness management organisations before issuing airworthiness review certificate	359
42.855	Requirements to be met by individuals before issuing airworthiness review certificate	360
42.860	Form of airworthiness review certificate.....	360
42.865	How airworthiness review certificate is issued	360

42.870	How long airworthiness review certificate remains in force.....	360
Division 42.I.3—Extension of airworthiness review certificates		361
42.875	Who may extend airworthiness review certificate	361
42.880	Requirements to be met for extension of airworthiness review certificate.....	361
42.885	Requirements to be met by continuing airworthiness management organisations before extension of airworthiness review certificate	362
42.890	Requirements to be met by individuals before extending airworthiness review certificate.....	362
42.895	How airworthiness review certificate is extended.....	362
Division 42.I.4—Airworthiness review procedure		363
42.900	Airworthiness review procedure	363
Division 42.I.5—Administration		365
42.905	Record of findings of airworthiness review	365
42.910	Record of corrective action taken.....	365
42.915	Retaining records relating to airworthiness review certificates	365
42.920	Documents to be sent to CASA and registered operator.....	365
42.925	Notice of decision not to issue airworthiness review certificate	366
Division 42.I.6—Relationship of airworthiness review certificate to certificate of airworthiness		367
42.930	Relationship with certificate of airworthiness.....	367
Subpart 42.J—Approval of maintenance programs and variations of approved maintenance programs		368
Division 42.J.1—Preliminary		368
42.935	Purpose of Subpart	368
Division 42.J.2—Approval of maintenance programs by continuing airworthiness management organisations		369
42.940	Circumstances in which continuing airworthiness management organisations may approve proposed maintenance program	369
42.945	Requirements for approval of maintenance programs.....	369
42.950	Requirements to be met by continuing airworthiness management organisations before approving proposed maintenance programs.....	370
42.955	Requirements to be met by individuals before approving proposed maintenance programs.....	370
42.960	How approval is given.....	370
42.965	Record-keeping requirements.....	371

Table of contents

1.001	Name of Regulations
1.003	Harmonisation with FARs
1.004	Dictionary
1.006	Status of tables of contents
1.008	Manuals of Standards

1.001 Name of Regulations

These Regulations are the *Civil Aviation Safety Regulations 1998*.

1.003 Harmonisation with FARs

- (1) These Regulations contain provisions based on the FARs.
- (2) An object of these Regulations is to harmonise certain parts of Australia's aviation safety law with the FARs.
- (3) The words '*Source* FARs' below a regulation indicate that the regulation is based on the section of the FARs, as in force on 1 January 1997, stated after the words and, if the section number is followed by the word 'modified', the word indicates that the FARs section has been modified for the regulation.

Example:

21.013 Eligibility

Any person is eligible to apply to CASA for a type certificate or type acceptance certificate.

Source FARs section 21.13 modified.

The words set out below the regulation in this example indicate that the regulation is based on section 21.13 of the FARs as in force on 1 January 1997 and that the FARs section has been modified for the regulation.

- (4) If a word or expression is used in both a regulation and the FARs section on which the regulation is based, the meaning of the word or expression in the FARs section may be taken into account in interpreting the word or expression in the regulation, unless the contrary intention appears.

1.004 Dictionary

- (1) The Dictionary at the end of these Regulations consists of 2 parts.
 - (2) Part 1 contains:
 - (a) definitions of certain expressions; and
 - (b) signpost references to expressions that are explained in Part 2 or elsewhere in these Regulations.
-

Regulation 1.006

Note: A signpost reference to a definition or an explanation of an expression that is elsewhere than in the Dictionary (for example, '*ATSO authorisation*—see paragraph 21.601(2)(b)') is not included in the Dictionary unless the definition or explanation of the expression applies outside the regulation in which it occurs. Many expressions are defined for the purposes of a particular Part, Subpart or Division, and signpost references to such definitions are generally not included in the Dictionary.

- (3) Part 2 consists of numbered clauses that explain certain other expressions otherwise than by means of definitions.
- (4) Unless the contrary intention appears, the definition or explanation of an expression in these Regulations applies to each use of the expression in these Regulations.
- (5) The Dictionary is part of these Regulations.

1.006 Status of tables of contents

Tables of contents do not form part of these Regulations.

1.008 Manuals of Standards

- (1) In this regulation:

MOS has the same meaning as in Subpart 11.J.
- (2) If there is an inconsistency between a MOS and a provision of the Act or these Regulations, the provision of the Act or these Regulations prevails to the extent of the inconsistency.
- (3) To avoid doubt, a MOS may not do the following:
 - (a) create an offence or civil penalty;
 - (b) provide powers of:
 - (i) arrest or detention; or
 - (ii) entry, search or seizure;
 - (c) impose a tax;
 - (d) set an amount to be appropriated from the Consolidated Revenue Fund under an appropriation in these Regulations;
 - (e) directly amend the text of these Regulations.

Note: A MOS (Manual of Standards) is a document that supports CASR by providing detailed technical material, such as technical specifications or standards. See generally 'Incorporated Manuals' (paragraphs 52 and 53) in the Guide.

Part 11—Regulatory administrative procedures

Table of contents

Subpart 11.A—Preliminary

- 11.005 Purpose of Part
- 11.010 What is in this Part
- 11.015 Definitions for Part
- 11.018 Approval of forms

Subpart 11.B—Applications for authorisations

- 11.020 Effect of this Subpart
- 11.025 Application of Part 11 to authorised persons
- 11.026 Application of Part 11 to approved design organisations
- 11.027 Application of Part 11 to relevant approved organisations
- 11.028 Application of Part 11 to examiners, instructors and approval holders
- 11.030 When application taken to be complete
- 11.032 Application for authorisation after previous authorisation cancelled
- 11.033 Applications by agents
- 11.034 Requirements for applications made by agents
- 11.035 Other things CASA can ask applicant to do—test or interview
- 11.040 Other things CASA can ask applicant to do—provide more information
- 11.045 Other things CASA can ask applicant to do—demonstrate a service or facility
- 11.047 Other things CASA can ask applicant to do—statutory declarations to verify applications
- 11.050 Material that CASA may or must take into account

Subpart 11.BA—Granting authorisations etc

- 11.055 Grant of authorisation
- 11.056 Authorisation may be granted subject to conditions
- 11.060 Notice of decision
- 11.065 When authorisation comes into effect
- 11.067 Imposing and varying conditions after grant of authorisation
- 11.068 Conditions imposed on class of authorisations
- 11.070 Conditions of authorisations—change of name or address
- 11.071 Conditions of authorisations—change of nationality
- 11.072 Conditions of authorisations—change of business status
- 11.073 Conditions of authorisations—notice of death, dissolution etc
- 11.074 Conditions of authorisations—notice required by CASA
- 11.075 Conditions of authorisations—provision of information
- 11.077 Breach of conditions—offence
- 11.080 Authorisations not transferable

Subpart 11.C—Authorisation documents, certificates and related matters

- 11.090 Authorisation document—authorisations to which Chicago Convention, Annex 1 applies
- 11.095 Authorisation document—maintenance operation authorisations
- 11.100 Registration certificate (Chicago Convention, Annex 7)
- 11.105 Certificate of Airworthiness (Chicago Convention, Annex 8)

- 11.110 Authorisation document—other authorisations
- 11.115 Replacement documents

Subpart 11.D—Applications for variation, suspension and cancellation of authorisations

- 11.120 What Subpart 11.D is about
- 11.125 Application of Subparts 11.B and 11.BA to variation of authorisation
- 11.130 Suspension or cancellation of authorisation
- 11.132 Effect of suspension

Subpart 11.E—Time-limited authorisations

- 11.135 Purpose of Subpart
- 11.140 Continuation of authorisation until application decided
- 11.145 Application of Subparts 11.B and 11.BA
- 11.150 Conditions on new authorisation

Subpart 11.F—Exemptions from provisions of these Regulations and Civil Aviation Orders

Division 11.F.1—Grant of standard exemptions

- 11.155 Purpose of Division
- 11.160 What exemptions can be granted under this Division
- 11.165 Applications for exemptions
- 11.170 Consideration of applications
- 11.175 Renewal of exemptions under this Division

Division 11.F.2—Grant of exemptions in exceptional circumstances

- 11.180 Purpose of Division
- 11.185 Exemptions in exceptional circumstances
- 11.190 Application
- 11.195 Consideration by CASA

Division 11.F.3—Exemptions generally

- 11.200 Purpose of Division
- 11.205 Conditions
- 11.210 Offence: failure to comply with condition
- 11.220 Notice of grant of exemption
- 11.225 Publication of exemption
- 11.230 When exemptions cease
- 11.235 Exemptions not transferable

Subpart 11.G—Directions

- 11.240 Purpose of Subpart
- 11.245 CASA may issue directions
- 11.250 Period of effect of direction
- 11.255 Contravention of direction

Subpart 11.H—Delegation of CASA's powers

- 11.260 Delegation
-

Subpart 11.J—Manuals of Standards—procedures

- 11.265 Purpose of Subpart
- 11.267 Application of Subpart to amendment or revocation of Manual of Standards
- 11.270 Definition—*MOS*
- 11.275 Notice of intention to issue Manuals of Standards not required in certain circumstances
- 11.280 Notice of intention to issue Manuals of Standards
- 11.285 Comments on draft Manuals of Standards
- 11.290 CASA to consider comments on draft Manuals of Standards
- 11.295 Failure to comply with procedures not to affect validity of Manuals of Standards

Regulation 11.005

Subpart 11.A—Preliminary

11.005 Purpose of Part

This Part sets out administrative provisions for the regulation of civil aviation, including in relation to:

- (a) authorisations; and
- (b) exemptions from provisions of these Regulations and the Civil Aviation Orders; and
- (c) directions; and
- (d) delegation of CASA's powers; and
- (e) the issuing of Manuals of Standards.

11.010 What is in this Part

- (1) Subpart 11.A contains preliminary matters and definitions.
- (2) Subpart 11.B contains rules that apply to CASA in administering applications for certain authorisations granted under these Regulations.
- (3) In particular, Subpart 11.B sets out what CASA can or must do in the course of processing an application for such an authorisation, including what documents and matters CASA can or must take into account in making its decision.
- (3A) Subpart 11.BA contains rules about granting authorisations, including the duration of, and the imposition of conditions on, authorisations.
- (4) Subpart 11.C provides for the form of authorisation documents and other matters related to such documents.
- (5) Subpart 11.D is about variation, suspension or cancellation of an authorisation at the holder's request.
- (6) Subpart 11.E is about renewal of a time-limited authorisation.
- (7) Subpart 11.F is about exemptions from the provisions of these Regulations.
- (8) Subpart 11.G provides for the issue, by CASA, of temporary directions in relation to matters affecting the safety of air navigation.
- (9) Subpart 11.H deals with delegation of CASA's powers under these Regulations.
- (10) Subpart 11.J sets out the procedure for issuing or amending Manuals of Standards.

11.015 Definitions for Part

In this Part:

authorisation means:

- (a) a civil aviation authorisation other than:
 - (i) an AOC; or
 - (ii) a delegation; or
 - (iii) the appointment of an authorised person; or
 - (iv) an authorisation issued by an ASAO; or
- (b) an approval or qualification of a document or thing under these Regulations, other than a material, part, process or appliance to which regulation 21.305A applies; or
- (c) a certificate capable of being granted to a person under these Regulations.

Note: For the definition of *civil aviation authorisation*, see section 3 of the Act.

corporation means a legal person that is not an individual.

medical includes psychological and psychiatric.

officer, of a corporation, means:

- (a) in the case of a corporation that is a company (within the meaning of the *Corporations Act 2001*), a director, secretary, executive officer or employee of the corporation; or
- (b) in the case of a corporation of any other kind:
 - (i) a person exercising responsibility, in relation to the corporation, as nearly as possible the same as that of a director, secretary or executive officer of a company (within the meaning of the *Corporations Act 2001*); or
 - (ii) an employee or staff member of the corporation; or
- (c) a receiver and manager, appointed under a power contained in an instrument, of property of the corporation.

time-limited authorisation means:

- (a) an authorisation that, under another provision of these Regulations, ceases after a particular period; or
- (b) an authorisation granted by CASA for a specified period.

11.018 Approval of forms

- (1) If another provision of these Regulations provides for a document, other than an application for an authorisation, to be in an approved form, CASA may, in writing, approve a form for that document.
- (2) If, under subregulation (1), CASA has approved a form for a document, the document is not taken to have been completed unless it:
 - (a) is in the approved form; and
 - (b) includes all of the information required by the form.

Note: For the form of an application for an authorisation, see regulation 11.030.

Regulation 11.020

Subpart 11.B—Applications for authorisations

11.020 Effect of this Subpart

The requirements of this Subpart in relation to an application for a particular kind of authorisation are in addition to any requirements of the Part or Subpart that deals with the kind of authorisation.

11.025 Application of Part 11 to authorised persons

If these Regulations allow an application for an authorisation to be made to an authorised person, a reference in this Part to CASA includes, in relation to such an application, a reference to the authorised person to whom the application is made.

11.026 Application of Part 11 to approved design organisations

- (1) If these Regulations allow an application for an authorisation to be made to an approved design organisation, a reference in this Part to CASA includes a reference to the approved design organisation to which the application is made:
 - (a) in relation to such an application; and
 - (b) if the organisation grants the authorisation—in relation to the following:
 - (i) imposing conditions on, and varying conditions of, the authorisation under regulation 11.067;
 - (ii) the conditions mentioned in regulations 11.070 to 11.074;
 - (iii) imposing a requirement under regulation 11.074 or 11.075;
 - (iv) an application for variation of the authorisation under Subpart 11.D.
- (2) Subregulation (3) applies to an approved design organisation that conducts a certification activity.
- (3) The following regulations apply to the approved design organisation as if each reference in them to CASA considering the application were a reference to the organisation satisfying itself about the matter to which the certification activity relates:
 - (a) regulation 11.040 (Other things CASA can ask applicant to do—provide more information);
 - (b) regulation 11.047 (Other things CASA can ask applicant to do—statutory declarations to verify applications).
- (4) In this regulation:
certification activity: see regulation 21.233.

11.027 Application of Part 11 to relevant approved organisations

If these Regulations allow an application for an authorisation to be made to a limited category organisation:

- (a) a reference in this Subpart to CASA includes, in relation to the application, a reference to the limited category organisation to which the application is made; and
- (b) a reference in Subpart 11.BA (granting authorisations etc), other than regulation 11.068 (conditions imposed on class of authorisations), to CASA includes a reference to the limited category organisation; and
- (c) a reference in Subpart 11.D (variation, suspension and cancellation of authorisations at holder's request) to CASA includes a reference to the limited category organisation.

11.028 Application of Part 11 to examiners, instructors and approval holders

If these Regulations allow an application for an authorisation to be made to an examiner or instructor, or the holder of an approval under regulation 61.040, 141.035 or 142.040, a reference in this Part to CASA includes, in relation to such an application, a reference to the examiner, instructor or approval holder to whom the application is made.

11.030 When application taken to be complete

- (1) An application for an authorisation is not taken to have been made unless:
 - (a) it is made in the manner approved by CASA for that purpose; and
 - (aa) if CASA has approved a form for the application—it is in the approved form and includes all of the information required by the form; and
 - (ab) if the application is for an authorisation covered by subregulation 11.033(2), and is made by a person (the *agent*) on behalf of the applicant for the authorisation—it is accompanied by a declaration by the agent under subregulation 11.033(1); and
 - (b) it includes all the information required by these Regulations; and
 - (c) it is accompanied by every document required by these Regulations; and
 - (d) if a fee is payable for the application—that fee has been paid; and
 - (e) if unmanned aircraft levy is payable for the application—that levy has been paid.
- Note: It is an offence to make a false statement in, or supply a false or misleading document with, an application—see the *Criminal Code*, sections 137.1 and 137.2.
- (2) If another provision of these Regulations requires a holder of an authorisation to have an approved manual, an application for such an authorisation is not taken to have been made until the applicant gives to CASA a copy of a draft of an appropriate manual.
- (3) For paragraph (1)(aa), CASA may, in writing, approve a form for an application for an authorisation.

Regulation 11.032

11.032 Application for authorisation after previous authorisation cancelled

- (1) Subject to subregulation (2), if:
- (a) a person who applies for an authorisation at a particular time (the **current time**) has previously held an authorisation of the same kind (the **earlier authorisation**); and
 - (b) the earlier authorisation was cancelled, other than at the request of the holder;

the applicant must include with the application any available evidence to show that the applicant could properly undertake the activity authorised by the authorisation at the current time.

- (2) For an authorisation mentioned in an item in the following table, subregulation (1) applies only if the authorisation was cancelled for a reason mentioned in the item.

Item	Authorisation	Reason for cancellation
1	ATC licence or flight service licence	A reason mentioned in subregulation 65.265(1)
2	Approval as an ARFFS provider	A reason mentioned in subregulation 139.1020(1)
3	Approval as an ATS training provider	A reason mentioned in regulation 143.225
4	Approval as an ATS provider	A reason mentioned in regulation 172.315

11.033 Applications by agents

- (1) If a person (the **agent**) applies on behalf of an applicant for an authorisation covered by subregulation (2), the application must include a declaration from the agent stating that:
- (a) the agent has received from the applicant the signed declaration required by paragraph 11.034(1)(b); and
 - (b) the application has been prepared in accordance with the information provided by the applicant.

Note: Sections 136.1, 137.1 and 137.2 of the *Criminal Code* create offences for making false or misleading statements in applications and providing false or misleading information or documents.

- (2) For the purposes of subregulation (1), this subregulation covers the following authorisations:
- (a) a remote pilot licence under Division 101.F.3 authorising the holder to operate an RPA;
 - (b) an authorisation of a kind determined under subregulation (3) for the purposes of this paragraph.
- (3) For the purposes of subsection 98(5A) of the Act and paragraph (2)(b) of this regulation, CASA may, by instrument, determine kinds of authorisations.

Regulation 11.034

Note: For the application of the *Legislation Act 2003* to an instrument under this subregulation, see subsections 98(5AA) to (5D) of the *Civil Aviation Act 1988*.

- (4) A person (the **agent**) commits an offence of strict liability if:
- (a) the agent is subject to a requirement to include a declaration in an application in accordance with subregulation (1); and
 - (b) the agent fails to comply with the requirement.

Penalty: 30 penalty units.

11.034 Requirements for applications made by agents

Requirements for the applicant

- (1) If a person (the **applicant**) authorises another person (the **agent**) to make an application on the applicant's behalf for an authorisation covered by subregulation 11.033(2), the applicant must give the agent:
- (a) any information and documents required by the agent to make the application; and
 - (b) a signed declaration stating that:
 - (i) the applicant has authorised the agent to make the application on the applicant's behalf; and
 - (ii) the information provided by the applicant to the agent for the making of the application (including information in any documents so provided) is true and correct.

Note: Sections 136.1, 137.1 and 137.2 of the *Criminal Code* create offences for making false or misleading statements in applications and providing false or misleading information or documents.

- (2) A person (the **applicant**) commits an offence of strict liability if:
- (a) the applicant is subject to a requirement to give a signed declaration to an agent in accordance with subregulation (1); and
 - (b) the applicant fails to comply with the requirement.

Penalty: 30 penalty units.

Requirement to keep declarations (or copy)—agents and applicants

- (3) A person, other than CASA, who makes, or receives, a declaration under regulation 11.033 or this regulation must keep the declaration, or a copy of the declaration, at least for the following period, beginning on the day the declaration is made:
- (a) if CASA has determined a period under subregulation (4) for the purposes of this paragraph that applies to the declaration—that period; or
 - (b) otherwise—5 years.
- (4) For the purposes of subsection 98(5A) of the Act and paragraph (3)(a) of this regulation, CASA may, by instrument, determine periods of not more than 5 years:
- (a) in relation to classes of declarations; or

Regulation 11.035

(b) in relation to particular declarations.

Note: For the application of the *Legislation Act 2003* to an instrument under this subregulation, see subsections 98(5AA) to (5D) of the *Civil Aviation Act 1988*.

- (5) A person commits an offence of strict liability if:
- (a) the person is subject to a requirement under subregulation (3); and
 - (b) the person fails to comply with the requirement.

Penalty: 30 penalty units.

Requirement to produce declarations (or copy)—agents and applicants

- (6) A person (the **agent or applicant**), other than CASA, who makes, or receives, a declaration under regulation 11.033 or this regulation must produce the declaration, or a copy of the declaration, for inspection on a demand made, within the period that applies to the declaration under subregulation (3), by a person covered by subregulation (7).
- (7) For the purposes of subregulation (6), this subregulation covers the following persons:
- (a) an authorised person;
 - (b) a member or special member of the Australian Federal Police;
 - (c) a member of a police force or a police service of a State or Territory.
- (8) An agent or applicant commits an offence of strict liability if:
- (a) the agent or applicant makes, or receives, a declaration under regulation 11.033 or this regulation; and
 - (b) a person makes a demand of the agent or applicant under subregulation (6); and
 - (c) the agent or applicant fails to comply with the demand.

Penalty: 5 penalty units.

11.035 Other things CASA can ask applicant to do—test or interview

- (1) In this regulation:
- test** includes a written, oral or on-line examination and a practical assessment.
- (2) If CASA reasonably needs to interview or test an applicant who is an individual (including a member of a partnership) for the purpose of satisfying itself about a matter mentioned in subregulation 11.055(1A), CASA may by written notice ask the applicant to:
- (a) undertake a test of knowledge, skill or competence relevant to the application; or
 - (b) come to a specified CASA office at a specified time to be interviewed.
- (3) If CASA reasonably needs to interview or test an officer of an applicant that is a corporation for the purpose of satisfying itself about a matter mentioned in

Regulation 11.040

subregulation 11.055(1A), CASA may, by written notice, ask the applicant to have the officer:

- (a) undertake a test of knowledge, skill or competence relevant to the application; or
 - (b) come to a specified CASA office at a specified time to be interviewed.
- (4) The time of interview and the CASA office specified in a notice under paragraph (2)(b) or (3)(b) must be reasonable in the circumstances.
 - (5) CASA must give to the applicant a copy of the record of any test (including the testing officer's assessment of the competence of the person tested), or the record of any interview, conducted under subregulation (2) or (3).
 - (6) However, subregulation (5) does not require CASA to return marked examination papers or give copies of marked examination papers.

11.040 Other things CASA can ask applicant to do—provide more information

- (1) If CASA reasonably needs more information or another document to allow it to consider an application, CASA may by written notice ask the applicant to give to it information, or a copy of a document, specified in the request.

Example: The person or body to whom an application for a certificate of airworthiness for an aircraft is made may ask the applicant for any other information reasonably needed by it to enable it to impose any conditions on the certificate or operational limitations on the operation of the aircraft that are necessary in the interests of the safety of other airspace users or persons on the ground or water.

- (2) CASA may ask an applicant to provide evidence as to the applicant's financial standing and financial capacity if there would be likely to be an adverse effect on the safety of air navigation if the applicant were granted the authorisation applied for and either did not have the resources to carry out the functions of the authorisation or were afterwards unable to continue trading.
- (3) If CASA asks an applicant:
 - (a) to provide information or a copy of a document under subregulation (1); or
 - (b) to provide evidence under subregulation (2);CASA need not begin to consider, or may stop considering, the application until CASA receives the information, document or evidence.

11.045 Other things CASA can ask applicant to do—demonstrate a service or facility

- (1) If another provision of these Regulations says that this regulation applies in relation to a particular kind of authorisation, CASA may by written notice ask an applicant for an authorisation of that kind:
 - (a) to give a practical demonstration of its ability to provide the relevant service; or
 - (b) to demonstrate the operation of a facility or item of equipment to be used in the course of providing the service; or

Regulation 11.047

- (c) to allow CASA to inspect any relevant facility or equipment (whether or not it is operating).
- (2) If CASA asks an applicant to give a demonstration or allow an inspection under subregulation (1), CASA need not begin to consider, or may stop considering, the application until the applicant gives the demonstration or allows the inspection.

11.047 Other things CASA can ask applicant to do—statutory declarations to verify applications

- (1) CASA may ask an applicant to verify, by statutory declaration, any statement made by the applicant in an application.
- (2) If CASA asks an applicant to verify a statement under subregulation (1), CASA need not begin to consider, or may stop considering, the application until CASA receives the statutory declaration.

11.050 Material that CASA may or must take into account

- (1) In making a decision on an application, CASA may take into account:
 - (a) anything in the application or in any other document submitted, or information provided, by the applicant; and
 - (b) the record or results of any test or interview under regulation 11.035; and
 - (c) anything else in its records about the applicant; and
 - (d) the results of any demonstration or inspection under regulation 11.045.
- (2) However, if CASA proposes to take into account anything adverse to an applicant in its records, CASA must, before making a decision adverse to the applicant (including a decision to grant the application sought but to do so subject to a condition not sought by the applicant):
 - (a) tell the applicant in writing that it intends to take the material into account, and the substance of what it intends to take into account; and
 - (b) invite the applicant in writing to make, within a specified reasonable time, a written submission about the matter.
- (3) Subject to subregulation (3B), if the applicant makes such a submission within the specified time, CASA must take the submission into account.
- (3A) CASA may ask the applicant to verify, by statutory declaration, any statement made by the applicant in a submission.
- (3B) If CASA asks an applicant to verify a statement under subregulation (3A), CASA need not begin to consider, or may stop considering, the application until CASA receives the statutory declaration.
- (4) When deciding whether to grant a new authorisation to an applicant who or that held, or was otherwise connected with, an authorisation (or a right, licence or permission similar to an authorisation granted under the law of another country)

Regulation 11.050

that was cancelled otherwise than at the request of the holder, CASA must take into account:

- (a) the fact of the cancellation; and
 - (b) the reasons for the cancellation, as given by the cancelling authority at the time of the cancellation; and
 - (c) any evidence that the applicant submits about the applicant's capacity to exercise the powers or privileges or carry out the functions that would be conferred by the authorisation applied for, if it were granted.
- (5) For subregulation (4), an applicant was connected with an authorisation (including a right, licence or permission similar to an authorisation granted under the law of another country) if:
- (a) where the applicant is an individual (including a member of a partnership)—the applicant was a member or officer of the holder of the authorisation; or
 - (b) where the applicant is a corporation—an officer of the applicant was a member or officer of the holder of the authorisation.
- (6) When considering an application referred to in subregulation (4), CASA is not obliged to reconsider, or inquire into the circumstances of, the cancellation.

Subpart 11.BA—Granting authorisations etc

11.055 Grant of authorisation

- (1) This regulation applies despite any other provision of these Regulations that provides for the grant or issue of an authorisation, but subject to section 30A and paragraphs 30DY(2)(b), 30DZ(2)(b) and 30EC(2)(b) of the Act.

Note 1: Under section 30A of the Act, the Court may make an order excluding a person from a particular aviation activity for a specified period (the *exclusion period*). Under subsection 30A(4), during the exclusion period any authorisation granted to the person for the activity is of no effect and a new authorisation to undertake the activity is not to be granted to the person.

Note 2: Under section 30DY of the Act, CASA must give the holder of an authorisation a demerit suspension notice if the holder has incurred at least 12 demerit points in relation to authorisations of the same class in a 3 year period. Under paragraph 30DY(2)(b), the holder is not entitled to be granted a new authorisation of that class during the period of the suspension.

Note 3: Under section 30DZ of the Act, CASA must give the holder of an authorisation a demerit suspension notice if the holder has incurred at least 6 demerit points in relation to authorisations of the same class in a 3 year period and has previously been given a demerit suspension notice in relation to that class of authorisations. Under paragraph 30DZ(2)(b), the holder is not entitled to be granted a new authorisation of that class during the period of the suspension.

Note 4: Under section 30EC of the Act, CASA must give the holder of an authorisation a demerit cancellation notice if the holder has incurred at least 6 demerit points in relation to authorisations of the same class in a 3 year period and has twice previously been given a demerit suspension notice in relation to that class of authorisations. Under paragraph 30EC(2)(b), the holder is not entitled to be granted a new authorisation of that class for 3 years from the date of the notice.

- (1A) Subject to subregulations (1B) and (1C), if a person has applied for an authorisation in accordance with these Regulations, CASA may grant the authorisation only if:
- (a) the person meets the criteria specified in these Regulations for the grant of the authorisation; and
 - (b) any other requirements in relation to the person that are specified in these Regulations for the grant of the authorisation are met; and
 - (c) any other requirements in relation to the thing in respect of which the application is made that are specified in these Regulations for the grant of the authorisation are met; and
 - (d) these Regulations do not forbid CASA granting the authorisation in the particular case; and
 - (e) granting the authorisation would not be likely to have an adverse effect on the safety of air navigation.
- (1B) If another provision of these Regulations provides that this subregulation applies to the granting of the authorisation, CASA may grant the authorisation only if:
- (a) the requirements of paragraphs (1A)(a) to (d) are satisfied; and

- (b) granting the authorisation will preserve a level of aviation safety that is at least acceptable.
- (1C) If the authorisation is an experimental certificate, CASA may grant the authorisation only if:
- (a) the requirements of paragraphs (1A)(a) to (d) are satisfied; and
 - (b) granting the authorisation would not be likely to have an adverse effect on the safety of other airspace users or persons on the ground or water.
- (2) In paragraph (1A)(a), a reference to meeting the criteria for the grant of an authorisation includes (in the case of an applicant who is an individual):
- (a) having any qualifications required by or under these Regulations for the grant of the authorisation; and
 - (b) having any experience required by or under these Regulations for that grant; and
 - (c) having successfully completed any training required by or under these Regulations for that grant; and
 - (d) if there is a requirement as to recency or currency of the applicant's training or experience—meeting that requirement; and
 - (e) if a standard of medical fitness is required by or under these Regulations for that grant:
 - (i) having attained that standard; and
 - (ii) having been granted any medical certificate required; and
 - (f) if particular attributes of character are required by or under these Regulations for that grant—having those attributes; and
 - (g) if a standard of proficiency in an activity is required by or under these Regulations for that grant—meeting that standard of proficiency.
- (3) If these Regulations limit in any way the number of authorisations of the relevant kind that may be granted, CASA may refuse to grant the authorisation if the limit will be exceeded if the authorisation is granted.
- (4) For paragraphs (1A)(e) and (1B)(b), CASA may take into account:
- (a) the applicant's record of compliance with regulatory requirements (in Australia or elsewhere) relating to aviation safety and other transport safety; and
 - (b) the applicant's demonstrated attitude towards compliance with regulatory requirements (in Australia or elsewhere) relating to aviation safety and other transport safety; and
 - (c) the applicant's experience (if any) in aviation; and
 - (d) the applicant's knowledge of the regulatory requirements applicable to civil aviation in Australia; and
 - (e) the applicant's history, if any, of serious behavioural problems; and
 - (f) any conviction (other than a spent conviction, within the meaning of Part VIIC of the *Crimes Act 1914*) of the applicant (in Australia or elsewhere) for a transport safety offence; and
 - (g) any evidence held by CASA that the applicant has contravened:

Regulation 11.056

- (i) the Act or these Regulations; or
 - (ii) a law of another country relating to aviation safety; or
 - (iii) another law (of Australia or of another country) relating to transport safety; and
- (h) in the case of an authorisation referred to in subregulation 11.040(2), the applicant's financial standing and financial stability; and
- (i) any other matter relating to the fitness of the applicant to hold the authorisation.
- (5) For the application of paragraphs (4)(a) to (i) in relation to an applicant that is a corporation, references to the applicant include each of the officers (other than employees) of the applicant.
- (6) For the application of paragraphs (4)(a) to (i) in relation to an applicant that is a member of a partnership, references to the applicant include each of the other members of the partnership.
- (7) CASA may grant the authorisation in respect of only some of the matters sought in the application.

11.056 Authorisation may be granted subject to conditions

- (1) CASA may grant an authorisation subject to any condition that CASA is satisfied is necessary:
- (a) for an authorisation, other than an authorisation to which subregulation 11.055(1B) applies or an experimental certificate—in the interests of the safety of air navigation; or
 - (ab) for an authorisation to which subregulation 11.055(1B) applies—in the interests of preserving a level of aviation safety that is at least acceptable; or
 - (ac) for an authorisation that is an experimental certificate—in the interests of the safety of other airspace users or persons on the ground or water; or
 - (b) to ensure that, as far as practicable, the environment is protected from:
 - (i) the effects of the operation and use of aircraft; and
 - (ii) the effects associated with the operation and use of aircraft.
- Note: Other conditions applicable to authorisations are set out in these Regulations—see in particular regulations 11.070 to 11.075.
- (2) A condition imposed under this regulation must be set out in, or attached to, the authorisation.

11.060 Notice of decision

- (1) After making a decision on an application, CASA must give the applicant written notice of the decision, including:
- (a) if the decision was to grant the authorisation applied for:

Regulation 11.065

- (i) if these Regulations provide for a certificate or other document to be issued to the applicant as evidence that he or she holds the authorisation—that document; and
 - (ii) if the decision included a decision to impose a condition that was not sought by the applicant—the reasons for the decision; or
- (b) if the decision was to refuse to grant the authorisation—the reasons for the decision.

Note: Most decisions in relation to authorisations are reviewable by the Administrative Appeals Tribunal—see section 31 of the Act, regulation 201.004 and regulation 297A of CAR. Section 27A of the *Administrative Appeals Tribunal Act 1975* requires that a person affected by a reviewable decision be given notice of the existence of the right of review.

- (2) A notice or document mentioned in subregulation (1) may state the date on which the authorisation comes into effect.
- (3) The date must not be before the date of the notice or document.
- (4) A failure by CASA to comply with subparagraph (1)(a)(ii) or paragraph (1)(b) in relation to a decision does not invalidate the decision.

11.065 When authorisation comes into effect

An authorisation comes into effect:

- (a) on a day stated for that purpose in a document that is evidence of the holding of the authorisation, or in any relevant notice under subregulation 11.060(1); or
- (b) if no day is so stated—on the date of the document or notice.

Note: Some kinds of authorisation continue indefinitely unless cancelled. Others cease (unless sooner cancelled) at a time set by another provision of these Regulations. Yet others cease (unless sooner cancelled) at a time set by CASA, subject to a maximum duration.

11.067 Imposing and varying conditions after grant of authorisation

- (1) After the grant of an authorisation, CASA may, in accordance with this regulation, impose a condition on the authorisation or vary a condition of the authorisation.
- (1A) CASA may impose or vary a condition only if CASA considers that it is necessary:
 - (a) for an authorisation, other than an authorisation to which subregulation 11.055(1B) applies or an experimental certificate—in the interests of the safety of air navigation; or
 - (b) for an authorisation to which subregulation 11.055(1B) applies—in the interests of preserving a level of aviation safety that is at least acceptable; or
 - (c) for an authorisation that is an experimental certificate—in the interests of the safety of other airspace users or persons on the ground or water.

Regulation 11.068

- (2) If CASA proposes, under subregulation (1), to impose a condition on an authorisation or vary a condition of an authorisation, CASA must give written notice of the proposed condition or variation to the holder of the authorisation.
- (3) The notice must specify a reasonable period within which the holder may make a submission in relation to the proposed condition or variation.
- (4) If the holder makes a submission under subregulation (3) within the period specified in the notice, CASA must take the submission into account in determining whether it is necessary to impose or vary the condition:
 - (a) for an authorisation, other than an authorisation to which subregulation 11.055(1B) applies or an experimental certificate—in the interests of the safety of air navigation; or
 - (b) for an authorisation to which subregulation 11.055(1B) applies—in the interests of preserving a level of aviation safety that is at least acceptable; or
 - (c) for an authorisation that is an experimental certificate—in the interests of the safety of other airspace users or persons on the ground or water.
- (5) If:
 - (a) after the end of the period specified under subregulation (3); and
 - (b) having taken account of any submission made by the holder within that period;CASA is satisfied that it is necessary, for the reason mentioned in paragraph (4)(a), (b) or (c), CASA may impose or vary the condition.
- (6) CASA must give the holder of the authorisation written notice of its decision.
- (7) A condition imposed, or a variation of a condition, under this regulation takes effect on the date of the notice under subregulation (6) or at a later time specified in the notice.
- (8) This regulation does not apply to the imposition of a condition on a class of authorisations under regulation 11.068.

11.068 Conditions imposed on class of authorisations

- (1) For subsection 98(5A) of the Act, CASA may issue a legislative instrument that imposes a condition relating to a matter mentioned in that subsection on a specified class of authorisations.
- (2) The class of authorisations may include authorisations granted before the imposition of the condition.
- (3) A condition imposed by a legislative instrument issued under subregulation (1) is taken to be a condition of every authorisation of the class mentioned in the instrument.
- (4) A condition imposed by a legislative instrument issued under subregulation (1) takes effect:

Regulation 11.070

- (a) for an authorisation that takes effect before the day on which the instrument comes into force:
 - (i) when the instrument comes into force; or
 - (ii) if a later time is stated in the instrument—at that time; and
- (b) for an authorisation granted on or after the day on which the instrument comes into force:
 - (i) when the authorisation comes into effect; or
 - (ii) if a later time is stated in the instrument—at that time.

11.070 Conditions of authorisations—change of name or address

- (1) It is a condition of an authorisation that its holder must, within the period mentioned in subregulation (3), tell CASA, in writing, of a change of either of the following kinds:
 - (a) the holder changes his, her or its name;
 - (b) the holder changes any of the following addresses:
 - (i) if the holder is an individual—his or her residential address;
 - (ii) if the holder is a corporation—the address of its registered office;
 - (iii) if the holder has given CASA an address to which notices may be sent—that address;
 - (iv) any other address that was required to be stated in the application for the authorisation.
- (2) A person commits an offence if:
 - (a) the person is the holder of an authorisation; and
 - (b) a change mentioned in paragraph (1)(a) or (b) happens in relation to the person; and
 - (c) the person does not tell CASA, in writing, of the change within the period mentioned in subregulation (3).

Penalty: 50 penalty units.

- (3) The period is:
 - (a) within 14 days after the change happens; or
 - (b) if another provision of these Regulations allows, in relation to that kind of authorisation, a different period within which the person must tell CASA of the change—within that period.
- (4) An offence against subregulation (2) is an offence of strict liability.

11.071 Conditions of authorisations—change of nationality

- (1) It is a condition of an authorisation upon which is noted the nationality of its holder that the holder must, within the period mentioned in subregulation (3), tell CASA, in writing, of a change of his or her nationality.

Note: The holder's nationality is noted on a flight crew licence and aircraft maintenance engineer licence. This requirement is imposed by ICAO.

Regulation 11.072

- (2) A person commits an offence if the person:
- (a) is the holder of an authorisation on which is noted his or her nationality;
and
 - (b) changes his or her nationality; and
 - (c) does not tell CASA, in writing, of the change within the period mentioned in subregulation (3).

Penalty: 50 penalty units.

- (3) The period is:
- (a) within 14 days after the change happens; or
 - (b) if another provision of these Regulations allows, in relation to that kind of authorisation, a different period within which the person must tell CASA of the change—within that period.
- (4) An offence against subregulation (2) is an offence of strict liability.

11.072 Conditions of authorisations—change of business status

- (1) It is a condition of an authorisation used in connection with an aviation-related activity of a business that its holder must tell CASA, in writing, of a change of any of the following kinds within the period mentioned in subregulation (3):
- (a) if the holder carries on the business under a name that is registered as a trading or business name under the law of a State or Territory—the holder changes that name, ceases to use that name, or begins to use another name;
 - (b) the person changes the place at which he or she carries on the business;
 - (c) the holder ceases to be entitled to occupy the premises from which he or she carries on the business;
 - (d) the holder ceases temporarily or permanently to carry on the business;
 - (e) if the holder is an individual—the holder:
 - (i) is declared bankrupt; or
 - (ii) enters into an arrangement with his or her creditors under Part X of the *Bankruptcy Act 1966*; or
 - (iii) applies to take the benefit of any other law for the protection of debtors; or
 - (iv) becomes aware that he or she has an illness likely to render him or her unable to carry on the business for a period that is likely to exceed 3 months;
 - (f) if the holder is a member of a partnership—an event mentioned in paragraph (e) happens to any of the members;
 - (g) if the holder is a corporation:
 - (i) the holder:
 - (A) becomes a Chapter 5 body corporate (within the meaning given by section 9 of the *Corporations Act 2001*); or
 - (B) applies to take the benefit of any other law for the protection of insolvent corporations; or

- (ii) an event mentioned in paragraph (e) happens to any of the holder's key personnel.
- (2) A person commits an offence if:
- (a) the person is the holder of an authorisation; and
 - (b) the person uses the authorisation in connection with an aviation-related activity of a business; and
 - (c) a change mentioned in subregulation (1) happens in relation to the person; and
 - (d) the person does not tell CASA, in writing, of the change within the period mentioned in subregulation (3).

Penalty: 50 penalty units.

- (3) The period is:
- (a) within 14 days after the change happens; or
 - (b) if another provision of these Regulations allows, in relation to that kind of authorisation, a different period within which the person must tell CASA of the change—within that period.
- (4) An offence against subregulation (2) in relation to a change mentioned in paragraph (1)(a), (b), (c) or (d), subparagraph (1)(e)(i), (ii) or (iii) or subparagraph (1)(g)(i) is an offence of strict liability.

- (5) In this regulation:

key personnel, in relation to a corporation that holds an authorisation, means the people holding, or carrying out the duties of, any positions that the holder is required by these Regulations to have in its organisation.

11.073 Conditions of authorisations—notice of death, dissolution etc

- (1) It is a condition of an authorisation held by a member of a partnership that, if any of the members dies, another of the members must tell CASA in writing within a reasonable period after the member's death.
- (2) It is a condition of an authorisation held by a member of a partnership that, if the partnership is dissolved, a former member must tell CASA in writing within 14 days after the partnership is dissolved.
- (3) It is a condition of an authorisation held by a corporation that, if the corporation is placed in liquidation, the liquidator must tell CASA in writing within 14 days after the corporation is placed in liquidation.
- (4) A person commits an offence if:
- (a) he or she is the liquidator of a corporation that holds an authorisation; and
 - (b) he or she does not, within 14 days after the corporation is placed in liquidation, tell CASA, in writing, that the corporation has been placed in liquidation.

Penalty: 50 penalty units.

Regulation 11.074

- (5) It is a condition of an authorisation held by a corporation that, if the corporation is placed in administration, the administrator must tell CASA in writing within 14 days after the corporation is placed in administration.
- (6) A person commits an offence if:
 - (a) he or she is the administrator of a corporation that holds an authorisation; and
 - (b) he or she does not, within 14 days after the corporation is placed in administration, tell CASA, in writing, that the corporation has been placed in administration.

Penalty: 50 penalty units.

- (7) An offence against subregulation (4) or (6) is an offence of strict liability.

11.074 Conditions of authorisations—notice required by CASA

- (1) Subject to subregulation (2), CASA may, by written notice given to the holder of an authorisation, require the holder to notify CASA of the happening of an event specified in the notice within a specified period.
- (2) An event specified in the notice must be an event that CASA is satisfied might adversely affect the carrying out of the activity authorised by the authorisation.
- (3) It is a condition of the authorisation that the holder must comply with the notice.
- (4) A person commits an offence if:
 - (a) the person is the holder of an authorisation; and
 - (b) under subregulation (1), CASA requires the person to notify CASA of the happening of an event within a specified period; and
 - (c) the event happens; and
 - (d) the person does not tell CASA, in writing, of the event within the specified period.

Penalty: 50 penalty units.

- (5) Strict liability applies to paragraph (4)(d).

11.075 Conditions of authorisations—provision of information

- (1) CASA may, by written notice, require the holder of an authorisation to give CASA specified information, or a specified document, that relates to the activity, document or thing to which the authorisation relates.
- (2) It is a condition of an authorisation that its holder must comply with a notice given under subregulation (1):
 - (a) within 14 days after receiving the notice; or
 - (b) if a different period is specified in the notice—within that period.
- (3) A person commits an offence if:
 - (a) the person is the holder of an authorisation; and

Regulation 11.077

- (b) CASA requires the person, under subregulation (1), to give CASA information or a document; and
- (c) the person does not give CASA the information or document:
 - (i) within 14 days after receiving the notice; or
 - (ii) if a different period is specified in the notice—within that period.

Penalty: 50 penalty units.

- (4) Strict liability applies to paragraph (3)(c).

11.077 Breach of conditions—offence

- (1) A person commits an offence if:
 - (a) the person holds an authorisation that is subject to a condition imposed under regulation 11.056, 11.067 or 11.068; and
 - (b) the person contravenes the condition.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

11.080 Authorisations not transferable

An authorisation is not transferable, unless a provision in these Regulations provides otherwise.

- Note: For authorisations that are transferable, see the following provisions:
- (a) regulation 21.047 (type certificates);
 - (b) regulation 21.179 (certificates of airworthiness);
 - (c) regulation 21.219 (Class II provisional certificates of airworthiness);
 - (d) regulation 21.450 (modification/repair design approvals and approvals mentioned in regulation 21.475).

Regulation 11.090

Subpart 11.C—Authorisation documents, certificates and related matters

11.090 Authorisation document—authorisations to which Chicago Convention, Annex 1 applies

- (1) This regulation applies to an authorisation to which Annex 1, *Personnel Licensing*, to the Chicago Convention applies.
- (2) The authorisation must comply with Chapter 5 of that Annex.

11.095 Authorisation document—maintenance operation authorisations

- (1) This regulation applies to a maintenance operation authorisation (within the meaning given by Annex 6, *Operation of Aircraft*, to the Chicago Convention).
- (2) The authorisation must comply with paragraph 8.7.1.2 of that Annex.

11.100 Registration certificate (Chicago Convention, Annex 7)

- (1) This regulation applies to a certificate of registration for an aircraft.
- (2) The certificate must be in a form that complies with section 7.1 of Annex 7, *Aircraft Nationality and Registration Marks*, to the Chicago Convention.

11.105 Certificate of Airworthiness (Chicago Convention, Annex 8)

- (1) This regulation applies to a certificate of airworthiness for an aircraft.
- (2) The certificate must be in a form that complies with section 7 of Annex 8, *Airworthiness of Aircraft*, to the Chicago Convention.

11.110 Authorisation document—other authorisations

- (1) This regulation applies to an authorisation to which none of regulations 11.090 to 11.105 apply.
- (2) The authorisation must set out:
 - (a) what the authorisation is; and
 - (b) any conditions applicable to it; and
 - (c) when it came into effect, and, if it will cease (either under a provision of these Regulations or on a day set by CASA) if not sooner cancelled—the day when it will cease; and
 - (d) any other information CASA thinks should be included.

11.115 Replacement documents

CASA may issue a replacement authorisation document in place of one:

Regulation 11.115

- (a) that contains anything that is not, or is no longer, correct; or
- (b) from which anything has been omitted; or
- (c) that has been lost or destroyed.

Regulation 11.120

Subpart 11.D—Applications for variation, suspension and cancellation of authorisations

11.120 What Subpart 11.D is about

This Subpart provides for applications that may be made by the holder of an authorisation for:

- (a) the variation of the authorisation, including imposing, removing or varying a condition of the authorisation; or
- (b) the suspension or cancellation of the authorisation.

Note: See Part 13 in regard to suspension, variation or cancellation of an authorisation for other reasons.

11.125 Application of Subparts 11.B and 11.BA to variation of authorisation

- (1A) The holder of an authorisation may apply, in writing, for a variation of the authorisation.
- (1B) The application may be made to a person to whom the application for the authorisation could have been made.
 - (1) Subpart 11.B applies in relation to an application, to which this Subpart applies, to vary an authorisation as if each reference in Subpart 11.B to an application for an authorisation were a reference to an application to vary the authorisation.
 - (2) However, if the applicant has previously given to CASA information or a document relevant to the application, the applicant need not do so again unless the information or document has changed.
 - (3) Regulations 11.055, 11.056, 11.060 and 11.065 apply to a variation of an authorisation as if each reference in those regulations to an authorisation were a reference to a variation of an authorisation.

11.130 Suspension or cancellation of authorisation

- (1) The holder of an authorisation may apply to CASA, in writing, for the authorisation to be suspended or cancelled.

Note: In relation to the cancellation of the registration of an aircraft, see also regulation 47.131B.

- (1A) CASA must, by written notice to the holder, suspend or cancel the authorisation.
- (2) Suspension or cancellation under this Subpart has effect:
 - (a) at the time the holder specifies in the application as the time for the suspension or cancellation to have effect; or
 - (b) if the holder does not specify such a time—when the holder is given written notice by CASA of the suspension or cancellation.

- (3) Suspension of an authorisation under this Subpart ceases to have effect:
- (a) at the time, if any, that the holder specifies in the application as the time that the suspension is to cease to have effect; or
 - (b) if the holder does not specify a time for that purpose—at the time CASA directs, by written notice to the holder.

11.132 Effect of suspension

- (1) If a person's authorisation is suspended under this Subpart:
- (a) the person is taken, for the purpose of any provision of these Regulations under which the holding of the authorisation is a requirement for the grant of another authorisation, not to be the holder of the authorisation during the period of suspension; and
 - (b) the authorisation is not in force during the period of suspension.
- (2) If a time-limited authorisation is suspended under this Subpart, the period for which the authorisation was granted continues to run.

Regulation 11.135

Subpart 11.E—Time-limited authorisations

11.135 Purpose of Subpart

This Subpart sets out provisions relating to time-limited authorisations.

11.140 Continuation of authorisation until application decided

- (1) This regulation applies in relation to a time-limited authorisation (the *old authorisation*) if:
 - (a) at least:
 - (i) in the case of an authorisation held by a corporation, 90 days; or
 - (ii) in any other case, 21 days;before the time when the old authorisation would otherwise cease, its holder applies to CASA for the issue of a new time-limited authorisation that confers the same privileges, or authorises the holder to carry out the same functions or duties, as the old authorisation; and
 - (b) at the time when the old authorisation would otherwise cease, CASA has not made a decision on the application.
- (2) For subregulation (1), an applicant has applied for the new authorisation only if:
 - (a) the applicant has given to CASA the necessary application, in the form required by these Regulations; and
 - (b) the application is taken to be complete, in accordance with regulation 11.030; and
 - (c) the applicant has given to CASA any other documents required by these Regulations to be given to CASA with the application.

Note: The applicant does not need to give to CASA information or a document that CASA already has—see regulation 11.145.
- (3) In spite of any other provision of these Regulations, but subject to subregulation (4), the old authorisation continues in force until:
 - (a) CASA makes a decision on the application; and
 - (b) if the decision is to grant the new authorisation—the new authorisation comes into force.
- (4) If CASA asks for further information or a document or invites the applicant to make a submission, under a provision of Subpart 11.B as applied by regulation 11.145, and the applicant does not do so within the period specified by CASA under that provision, then, despite subregulation (3), the old authorisation is taken to cease at the end of that period.

11.145 Application of Subparts 11.B and 11.BA

- (1) Subparts 11.B and 11.BA apply to an application referred to in paragraph 11.140(1)(a).

Regulation 11.150

- (2) However, if the applicant has previously given to CASA information or a document relevant to the application, the applicant need not do so again unless the information or document has changed.
- (3) If these Regulations allow an application for an authorisation to be made to an authorised person, a reference in Subpart 11.B or 11.BA or this Subpart to CASA includes, in relation to an application mentioned in paragraph 11.140(1)(a), an authorised person to whom such an application is made.

11.150 Conditions on new authorisation

Unless another provision of these Regulations says otherwise, if CASA grants the new authorisation, CASA is not obliged:

- (a) to impose the same conditions, restrictions or limitations on the new authorisation as applied to the old one; or
- (b) to grant the new authorisation for the same duration as for the old one.

Subpart 11.F—Exemptions from provisions of these Regulations and Civil Aviation Orders

Division 11.F.1—Grant of standard exemptions

11.155 Purpose of Division

This Division provides for the granting of exemptions from particular provisions of these Regulations or the Civil Aviation Orders.

Note: Division 11.F.2 provides separately for exemptions in exceptional circumstances, such as a natural disaster.

11.160 What exemptions can be granted under this Division

- (1) For subsection 98(5A) of the Act, CASA may, by instrument, grant an exemption under this Division from compliance with:
 - (a) a provision of these Regulations; or
 - (b) a provision of a Civil Aviation Order;in relation to a matter mentioned in that subsection.
- (2) CASA may grant an exemption under this Division to a person, or to a class of persons, and may specify the class by reference to membership of a specified body or any other characteristic.
- (3) CASA may grant an exemption under this Division either on application or on its own initiative.

Note 1: For the application of the *Legislation Act 2003* to an instrument granting an exemption under this Division, see subsections 98(5AA), (5AB), (5B) and (5BA) of the Act.

Note 2: For review of a decision refusing to grant an exemption under this Division, see regulation 201.004.

11.165 Applications for exemptions

- (1) A person may apply to CASA, in accordance with this regulation, for an exemption under this Division.
- (2) The application must be in writing.
- (3) The application must set out:
 - (a) the applicant's name and address; and
 - (b) details of any relevant authorisation; and
 - (c) references to the relevant provisions of these Regulations; and
 - (d) details of any aircraft or aeronautical product, or type of aircraft or aeronautical product, or material or kind of material, or service or kind of service, to be affected by the exemption; and

- (e) if the exemption will affect a particular kind of operation, the kind of operation; and
 - (f) the reasons why the exemption is necessary; and
 - (g) details of how the applicant proposes to ensure that an acceptable level of safety will be provided when operating in accordance with the exemption; and
 - (h) the date on which the applicant requires the exemption to commence; and
 - (i) how long the applicant requires the exemption to remain in effect.
- (4) Unless CASA agrees otherwise, the applicant must give the application to CASA at least 3 months before the day on which the applicant requires the exemption to commence.

11.170 Consideration of applications

- (1) Regulations 11.035 to 11.050 apply in relation to an application under this Division.
- (2) For that application, a reference to an authorisation is taken to be a reference to an exemption.
- (3) In making its decision, CASA must regard the preservation of a level of aviation safety that is at least acceptable as paramount.

11.175 Renewal of exemptions under this Division

- (1) CASA must not grant an exemption under this Division to a person in the same or similar terms as an exemption previously granted under this Division to the person unless the person:
 - (a) applies, in accordance with regulation 11.165, for the new exemption; and
 - (b) includes with the application a statement of the additional reasons why the exemption is necessary, or the reasons why the continuation of the exemption is necessary.
- (2) Regulations 11.035 to 11.050 apply in relation to the consideration of an application mentioned in subregulation (1).
- (3) For that application, a reference to an authorisation is taken to be a reference to an exemption.
- (4) In making its decision, CASA must:
 - (a) take into account the reasons given by the applicant for the new exemption, or the continuation of the exemption, and the fact that the applicant has previously been granted a similar exemption; and
 - (b) regard the preservation of a level of aviation safety that is at least acceptable as paramount.

Regulation 11.180

Division 11.F.2—Grant of exemptions in exceptional circumstances

11.180 Purpose of Division

This Division provides for the granting of exemptions in exceptional circumstances.

11.185 Exemptions in exceptional circumstances

- (1) For subsection 98(5A) of the Act, in exceptional circumstances CASA may, by instrument, grant an exemption under this Division from compliance with:
 - (a) a provision of these Regulations; or
 - (b) a provision of a Civil Aviation Order;in relation to a matter mentioned in that subsection.

- (2) In subregulation (1):

exceptional circumstances means the circumstances of a major natural disaster, some other large-scale emergency, or an emergency to which a national emergency declaration (within the meaning of the *National Emergency Declaration Act 2020*) relates, that requires the use of air transport, or some other aviation activity, in a way that is not reasonably possible in compliance with these Regulations.

Example: Following the destruction of Darwin by Cyclone Tracy, airliners were permitted to operate when severely overloaded to allow evacuation of the city as rapidly as possible.

- (3) To avoid doubt, it is not necessary for subregulation (1) that a state of emergency or natural disaster need have been declared.
- (4) CASA may grant an exemption under this Division to a person, or to a class of persons, and may specify the class by reference to membership of a specified body or any other characteristic.
- (5) CASA may grant an exemption under this Division either on application or on its own initiative.

Note 1: For the application of the *Legislation Act 2003* to an instrument granting an exemption under this Division, see subsections 98(5AA), (5AB), (5B) and (5BA) of the Act.

Note 2: For review of a decision refusing to grant an exemption under this Division, see regulation 201.004.

11.190 Application

An application for an exemption under this Division may be made in any way that is reasonable in the circumstances.

11.195 Consideration by CASA

In considering whether to grant an exemption under this Division, CASA must regard as paramount the preservation of the highest level of aviation safety that is practicable in the circumstances.

Regulation 11.200

Division 11.F.3—Exemptions generally

11.200 Purpose of Division

This Division sets out general provisions applying to exemptions under this Subpart.

11.205 Conditions

- (1) CASA may impose, on an exemption under this Subpart, any condition necessary in the interests of the safety of air navigation.
- (2) The condition must be set out in the instrument of exemption.

11.210 Offence: failure to comply with condition

- (1) If a condition of an exemption under this Subpart imposes an obligation on a person, the person must comply with the obligation.

Penalty: 50 penalty units.

- (2) A contravention of subregulation (1) is an offence of strict liability.

11.220 Notice of grant of exemption

- (1) In the case of an exemption that was applied for, CASA must give written notice to the applicant of:
 - (a) its decision; and
 - (b) if the decision was to refuse to grant the exemption, or to impose a condition not sought by the applicant—the reasons for the decision.
- (2) In the case of an exemption that was applied for, if CASA grants the exemption applied for and sends to the applicant the instrument of exemption, subregulation (1) does not require CASA to send to the applicant a separate notice of its decision.

11.225 Publication of exemption

CASA must, as soon as practicable, publish on the Internet details (including any condition) of an exemption under this Subpart.

Note: The Internet address for CASA's website is <http://www.casa.gov.au>.

11.230 When exemptions cease

- (1) An exemption under Division 11.F.1 ceases:
 - (a) at the end of the day (no longer than 3 years after the day on which it commences) specified in the instrument of exemption as the day on which it ceases; or

Regulation 11.235

- (b) if no day is specified for that purpose in the instrument—3 years after it commences.
- (2) An exemption under Division 11.F.2 ceases:
 - (a) at the end of the day (no longer than 12 months after the day on which it commences) specified in the instrument of exemption as the day on which it ceases; or
 - (b) if no day is specified for that purpose in the instrument—12 months after it commences.
- (3) If an exemption is granted in relation to a particular aircraft, and, before the time at which the exemption would cease under subregulation (1) or (2), the aircraft ceases to be owned by the person who owned it at the time the exemption was granted, the exemption ceases at the time when the aircraft ceases to be owned by that person.

11.235 Exemptions not transferable

An exemption under this Subpart is not transferable.

Regulation 11.240

Subpart 11.G—Directions

11.240 Purpose of Subpart

This Subpart provides for the issue by CASA of directions in relation to matters affecting the safety of air navigation.

11.245 CASA may issue directions

- (1) For subsection 98(5A) of the Act, CASA may, by instrument, issue a direction about any matter affecting:
- (a) the safe navigation and operation of aircraft; or
 - (b) the maintenance of aircraft; or
 - (c) the airworthiness of, or design standards for, aircraft.

Note 1: For the application of the *Legislation Act 2003* to an instrument containing a direction under this regulation, see subsections 98(5AA), (5AB), (5B) and (5BA) of the Act.

Note 2: See also Part 39 in relation to CASA's powers to issue airworthiness directives.

- (2) However, CASA may issue such a direction:
- (a) only if CASA is satisfied that it is necessary to do so in the interests of the safety of air navigation; and
 - (b) only if the direction is not inconsistent with the Act; and
 - (c) only for the purposes of CASA's functions.

Note: CASA's functions are set out in section 9 of the Act.

11.250 Period of effect of direction

A direction under regulation 11.245 ceases to be in force:

- (a) if it specifies a day on which it ceases to be in force—on the specified day; or
- (b) if it does not specify a day for that purpose—1 year after the day it commences.

11.255 Contravention of direction

- (1) A person must not contravene a direction under regulation 11.245 that is applicable to the person.

Penalty: 50 penalty units.

- (2) A contravention of subregulation (1) is an offence of strict liability.

Subpart 11.H—Delegation of CASA's powers

11.260 Delegation

- (1) The Director may, by written instrument, delegate to an officer a power of CASA under these Regulations.
- (1A) The Director may, by written instrument, delegate to a person a power of CASA under these Regulations for, or in connection with, the performance of a function conferred on CASA under subsection 9(1) of the Act.
- (2) However, the following powers of CASA must be exercised by the Director personally:
 - (b) the power to issue a type acceptance certificate subject to a condition under subregulation 21.029B(2);
 - (c) the power to refuse to issue a type acceptance certificate under subregulation 21.029C(1);
 - (d) the power to suspend or cancel a type acceptance certificate under subregulation 21.051(4).
- (3) A delegation may be subject to conditions stated in the instrument of delegation.
- (4) A delegate is subject to any written direction of the Director in the exercise of a power, or the performance of a function, delegated under this regulation.

Regulation 11.265

Subpart 11.J—Manuals of Standards—procedures

11.265 Purpose of Subpart

This Subpart sets out the procedures for consultation before CASA issues a Manual of Standards.

Note: Manuals of Standards are documents which support these Regulations by providing detailed technical material, such as technical specifications or standards. Manuals of Standards are legislative instruments and are subject to registration and disallowance under the *Legislation Act 2003*.

11.267 Application of Subpart to amendment or revocation of Manual of Standards

The procedures in this Subpart apply to the amendment or revocation of a MOS in the same way as the procedures apply to the issue of a MOS.

11.270 Definition—*MOS*

In this Subpart:

MOS means Manual of Standards.

11.275 Notice of intention to issue Manuals of Standards not required in certain circumstances

- (1) CASA must comply with the procedures set out in this Subpart before issuing a MOS unless the Director determines, in writing, that:
 - (a) it is necessary to issue the MOS as soon as practicable in the interests of aviation safety; or
 - (b) the MOS is required to give effect to a specific undertaking given by the Minister; or
 - (c) the MOS is required to give effect to an obligation under an international treaty or an intergovernmental agreement; or
 - (d) the MOS is of a minor or machinery nature that does not substantially alter existing arrangements; or
 - (e) following the procedures would endanger aviation security or be otherwise contrary to the public interest.
- (2) If the Director makes such a determination, CASA must publish it, and a statement of the reasons for it, on the Internet within 28 days after the determination is made.

Note: The URL for CASA's web site is <http://www.casa.gov.au>.

- (3) If CASA issues a MOS on the basis of a determination under paragraph (1)(a) (an *urgent MOS*), CASA must, within 28 days after the determination is made,

Regulation 11.280

publish on the Internet a notice about the MOS giving the information set out in paragraphs 11.280(2)(a) to (d).

Note: Certain provisions of these Regulations require copies of such a notice to be given to all providers of certain services.

- (4) Regulations 11.285 and 11.290 apply in relation to an urgent MOS as if it were a draft MOS.

11.280 Notice of intention to issue Manuals of Standards

- (1) If CASA intends to issue a MOS, CASA must publish a notice of its intention to do so on the Internet.

Note 1: The URL for CASA's web site is <http://www.casa.gov.au>.

Note 2: Certain provisions of these Regulations require copies of such a notice to be given to all providers of certain services.

- (2) A notice must include the following information about the draft MOS:
 - (a) its title and a description of its contents;
 - (b) how to obtain a copy of it;
 - (c) the period during which comments on it may be lodged;
 - (d) how comments are to be made and lodged.
- (3) Subject to subregulation (4), for paragraph (2)(c), the period must be reasonable in the circumstances but not less than 28 days.
- (4) For paragraph (2)(c), the period during which comments on an amendment of a MOS that is of a minor or machinery nature may be lodged must be reasonable in the circumstances but not less than 14 days.

11.285 Comments on draft Manuals of Standards

A person may comment on a draft MOS in the way set out in the notice published under regulation 11.280 in relation to the MOS.

11.290 CASA to consider comments on draft Manuals of Standards

Before issuing a MOS, CASA:

- (a) must consider any comments it has received on the draft MOS; and
- (b) may consult with any person on issues arising out of the comments.

11.295 Failure to comply with procedures not to affect validity of Manuals of Standards

- (1) A failure to comply with the procedures in this Subpart in relation to a MOS does not affect the validity of the MOS.
- (2) However, if CASA issues a MOS (other than on the basis of a determination under paragraph 11.275(1)(a)) without complying with those procedures, CASA must, within 28 days after issuing the MOS, publish a notice of consultation in

Regulation 11.295

relation to the MOS as if it were a notice of intention published under regulation 11.280.

- (3) Regulations 11.285 and 11.290 apply in relation to such a MOS as if it were a draft MOS.

Part 13—Enforcement procedures

Note: Subparts 13.A to 13.J are reserved for future use.

Subpart 13.K—Voluntary reporting and demerit points schemes

Division 13.K.1—Aviation Self Reporting Scheme

13.320 Definitions

In this Division:

Aviation Self Reporting Scheme or *ASRS* means the voluntary reporting scheme established under subregulation 13.335(1) for reporting reportable contraventions.

Executive Director means the person for the time being holding, occupying or performing the duties of the position of Executive Director of Transport Safety Investigation referred to in section 12 of the *Transport Safety Investigation Act 2003*.

13.325 Contraventions that are not reportable

For the purposes of paragraph (d) of the definition of *reportable contravention* in section 30DL of the Act, contraventions of the following provisions of CAR are prescribed:

- (a) regulation 282;
- (b) subregulation 288(2);
- (c) regulation 298A;
- (d) regulation 298B;
- (e) regulation 298C;
- (f) regulation 301;
- (g) regulation 302;
- (h) subregulation 305(1A).

13.330 Prescribed person (Act s 30DM)

For the purposes of Division 3C (Protection from administrative action for voluntary reporting) of Part III of the Act, the Executive Director is prescribed.

13.335 Establishment and purposes of scheme (Act s 30DN)

- (1) There is established a scheme (to be known as the *Aviation Self Reporting Scheme*) for the voluntary reporting of reportable contraventions.
- (2) The scheme is to be administered by the Executive Director.

Regulation 13.340

- (3) The purposes of the scheme are:
- (a) to enable holders of civil aviation authorisations to voluntarily report reportable contraventions without administrative action being taken against them; and
 - (b) to strengthen the foundation of aviation human factors safety research; and
 - (c) to identify deficiencies and problems in the Australian aviation safety system; and
 - (d) to provide data for planning and improvements to the Australian aviation safety system.

13.340 Powers and functions of Executive Director

Without limiting the generality of the powers and functions of the Executive Director as administrator of ASRS, the Executive Director has the following powers and functions:

- (a) to process and accept reports;
- (b) to give receipts for reports;
- (c) to review information contained in reports in order to identify potential safety deficiencies and lessen the likelihood of accidents and serious incidents;
- (d) to issue information briefs or alert bulletins that the Executive Director considers are necessary in the interests of aviation safety;
- (e) to publish details of reviews made under paragraph (c).

Note: Regulation 13.360 affects the powers and functions of the Executive Director relating to information contained in reports.

13.345 Manner in which reports to be made (Act s 30DN(2)(b))

- (1) A holder of a civil aviation authorisation who has committed a reportable contravention may make a written report of the reportable contravention under ASRS.
- (2) The report must be made to the Executive Director, in a form approved by the Executive Director, not later than 10 days after the reportable contravention.
- (3) The report must include the following information:
 - (a) the name, postal address and daytime telephone number of the authorisation holder making the report;
 - (b) if applicable—the Aviation Reference Number of the authorisation holder;
 - (c) the class or classes of civil aviation authorisation held by the authorisation holder;
 - (d) the time, date, place and nature of the contravention;
 - (e) a description of the circumstances of the contravention;
 - (f) so far as is practicable, the regulations contravened by the authorisation holder.

Note 1: A copy of the approved form is available from ATSB's website (<http://www.atsb.gov.au>) or by contacting 1-800-020-505.

- Note 2: A report made by an authorisation holder under this regulation does not satisfy the reporting obligations under:
- (a) the *Transport Safety Investigation Act 2003*; or
 - (b) any other provision of these Regulations relating to the reporting of defects or service difficulties on aircraft or aeronautical products.

13.350 Processing of reports

- (1) A report purportedly made in accordance with regulation 13.345 must be accepted by the Executive Director, unless it appears on the face of the report that the contravention for which the report is made is not a reportable contravention.

Note: Under section 30DL of the Act, the following contraventions are not reportable contraventions:

 - (a) a contravention of these Regulations that is deliberate;
 - (b) a contravention of these Regulations that is fraudulent;
 - (c) a contravention of these Regulations that causes or contributes to an accident or to a serious incident (whether before or after the contravention is reported);
 - (d) a contravention of a regulation prescribed under regulation 13.325.
- (2) If the Executive Director accepts a report, the Executive Director must:
 - (a) ensure that the report is given a unique receipt number and stamped, on the front page, with the receipt number and the date when the report was made; and
 - (b) give to the holder of a civil aviation authorisation who made the report a receipt that sets out:
 - (i) the authorisation holder's name; and
 - (ii) the date the report was made; and
 - (iii) the date and nature of the contravention; and
 - (c) having regard to subregulation 13.360(2), determine what information contained in the report is to be included in the files or databases primarily kept for the purposes of ASRS; and
 - (d) return the report to the authorisation holder who made the report.
- (3) If the Executive Director does not accept a report, he or she must, subject to regulation 13.355, return the report to the authorisation holder.

13.355 Reports relating to unlawful interference

If a report relates to an act of unlawful interference (within the meaning of ICAO Document 9713, '*International Civil Aviation Vocabulary*', as in force from time to time), the Executive Director must send it to the Aviation Security Duty Officer in the Department.

13.360 Use of information contained in reports (Act s 30DN(2)(c))

- (1) The Executive Director must not keep a copy of a report made under ASRS.
 - (2) The Executive Director must ensure that, to the extent practicable, information that identifies the authorisation holder who made the report (or any person
-

Part 13 Enforcement procedures

Subpart 13.K Voluntary reporting and demerit points schemes

Division 13.K.1 Aviation Self Reporting Scheme

Regulation 13.365

referred to in the report) is not included in any file or database primarily kept for the purposes of ASRS.

- (3) Information contained in a report of a reportable contravention (other than information that is personal information within the meaning of the *Privacy Act 1988*) may be disclosed by the Executive Director without the consent of the authorisation holder who made the report but only if the information is to be used for a purpose mentioned in subregulation 13.335(3).

13.365 Delegation by Executive Director

- (1) The Executive Director may, in writing, delegate to a person engaged to perform duties in the Department (whether as an APS employee, SES employee or under any other arrangement) a power (except this power of delegation), function or duty of the Executive Director under this Division.
- (2) In exercising powers, functions and duties under a delegation, the delegate must comply with any directions of the Executive Director.

Division 13.K.2—Demerit points scheme

13.370 Offences to which demerit points scheme applies (Act s 30DT)

- (1) All offences under CAR and CASR that are specified as strict liability offences are prescribed as offences to which Division 3D (Demerit points scheme) of Part III of the Act applies.
- (2) The number of points that are incurred in relation to an offence to which that Division applies are as follows:
 - (a) if the maximum penalty for the offence is 10 penalty units or less—1 demerit point;
 - (b) if the maximum penalty for the offence is more than 10 penalty units but less than 26 penalty units—2 demerit points;
 - (c) if the maximum penalty for the offence is 26 penalty units or more—3 demerit points.

13.375 Classes of civil aviation authorisations

For the purposes of section 30DU of the Act, a civil aviation authorisation mentioned in column 2 of an item in table 13.375 belongs to the class of civil aviation authorisation mentioned in column 3 of the item.

Table 13.375 Classes of civil aviation authorisations

Column 1 Item	Column 2 Particular civil aviation authorisations	Column 3 Class of civil aviation authorisation
1	a certificate issued under section 27 of the Act	Air operator certificate
2	a certificate issued under Part 47 of CASR	Certificate of registration
3	a certificate issued under regulation 30 of CAR	Certificate of approval
4	an aircraft engineer licence	Authorisation to perform maintenance certification and issue certificate of release to service
4A	an authority mentioned in regulation 33B or 33C of CAR	Maintenance authority
5	a licence referred to in paragraph 5.08(b) of CAR	Flight radiotelephone licence
6	a licence referred to in paragraph 5.08(a) of CAR or a pilot licence	Pilot licence
7	a flight engineer licence	Flight engineer licence
8	a certificate issued under Part 6 of CAR or Part 67 of CASR	Medical certificate

Part 13 Enforcement procedures
Subpart 13.K Voluntary reporting and demerit points schemes
Division 13.K.2 Demerit points scheme

Regulation 13.380

Column 1 Item	Column 2 Particular civil aviation authorisations	Column 3 Class of civil aviation authorisation
9	a licence or authorisation issued under Part 65 of CASR	ATC licence
10	a certificate issued under Subpart 101.F of CASR	RPA certificate
11	a certificate issued under Subpart 139.B of CASR	Aerodrome certificate
12	an approval granted under Subpart 139.H of CASR	ARFFS approval
12A	an approval granted under regulation 141.035 or 142.040	Flying training authorisation
12B	a certificate issued under regulation 141.060 or 142.110	Flying training authorisation
13	an approval granted under Part 143 or 172 of CASR	ATS approval
14	an approval granted under Part 171 of CASR	Aeronautical telecommunication and radionavigation provider approval
15	a certificate or authorisation issued under Part 173 of CASR	Instrument flight procedure approval

13.380 Effect of subsequent suspension or cancellation in certain situations (Acts 30DV)

If:

- (a) a civil aviation authorisation is cancelled (the *earlier cancellation*); and
- (b) if there had been no earlier cancellation, a subsequent suspension or cancellation under Division 3D of Part III of the Act would have had effect in relation to the authorisation; and
- (c) the earlier cancellation is later set aside by the Administrative Appeals Tribunal;

the subsequent suspension or cancellation has effect, in relation to the civil aviation authorisation, on the day immediately following the day when the Administrative Appeals Tribunal set aside the earlier cancellation.

Part 21—Certification and airworthiness requirements for aircraft and parts

Table of contents

Subpart 21.A—General

- 21.001 Applicability
- 21.001A Definition for Subpart
- 21.002C Suspension or cancellation of an instrument
- 21.002D Show cause notices
- 21.002E Cancellation of certain certificates
- 21.003 Reporting failures, malfunctions, and defects
- 21.005 Manufacturers etc to provide aircraft flight manuals for certain aircraft
- 21.006 Approval of aircraft flight manuals
- 21.006A Approval of changes to aircraft flight manuals
- 21.007 Permissible unserviceabilities
- 21.007A Advice about major damage
- 21.008 Meaning of technical data
- 21.009 Approval of technical data
- 21.010 References to modifications and repairs in Part
- 21.010A References to the national aviation authority of a recognised country
- 21.010B Definition of *recognised country*
- 21.010C References to countries with which Australia has agreements
- 21.010D Issue of Manual of Standards for Part 21

Subpart 21.B—Type certificates and type acceptance certificates

- 21.011 Applicability
- 21.013 Eligibility
- 21.013A Issue of type certificate
- 21.014 Recognition of foreign certification
- 21.015 Application for type certificate
- 21.016 Special standards and other conditions on type certificates
- 21.017 Designation of applicable airworthiness standards
- 21.019 Changes requiring a new type certificate
- 21.021 Type certificate: normal, utility, acrobatic, commuter, and transport category aircraft; manned free balloons; special classes of aircraft; aircraft engines; propellers
- 21.024 Type certificate: primary category aircraft
- 21.025 Issue of type certificate: restricted category aircraft
- 21.026 Type certificate: intermediate category aircraft
- 21.027 Type certificate: surplus aircraft of the Armed Forces
- 21.029 Type certificate for imported aircraft, aircraft engines or propellers not type certificated by national aviation authority of recognised country
- 21.029A Type acceptance certificate for imported aircraft certificated by national aviation authority of recognised country
- 21.029B Issue of type acceptance certificates subject to conditions
- 21.029C Refusal to issue type acceptance certificate
- 21.031 Type design—meaning

- 21.033 Inspection and tests
- 21.035 Flight tests
- 21.037 Flight test pilot
- 21.039 Flight test instrument calibration and correction report
- 21.041 Type certificate—meaning
- 21.043 Location of manufacturing facilities
- 21.047 Transfer of type certificates
- 21.048 Licensing of type certificates
- 21.049 Availability
- 21.050 Instructions for continued airworthiness and manufacturer’s maintenance manuals having airworthiness limitations sections
- 21.051 Type certificates and type acceptance certificates—duration and suspension or cancellation
- 21.053 Statement of conformity

Subpart 21.C—Provisional type certificates

- 21.071 Applicability
- 21.073 Eligibility
- 21.075 Application
- 21.076 Issue of provisional type certificate
- 21.077 Duration
- 21.078 Suspension and cancellation
- 21.081 Requirements for issue and amendment of Class I provisional type certificates
- 21.083 Requirements for issue and amendment of Class II provisional type certificates
- 21.085 Provisional amendments to type certificates

Subpart 21.D—Changes to type certificates

- 21.091 Applicability
- 21.093 Classification of changes in type design
- 21.095 Approval of minor changes in type design
- 21.097 Eligibility for approval of major changes in type design
- 21.098 Issue of approval of major change in type design
- 21.099 Required design changes
- 21.101 Designation of applicable regulations

Subpart 21.E—Supplemental type certificates

- 21.111 Applicability
- 21.113 Eligibility for supplemental type certificate
- 21.113A Issue of supplemental type certificate
- 21.114 Foreign supplemental type certificates
- 21.115 Entitlement to supplemental type certificate—meeting applicable airworthiness requirements
- 21.117 What supplemental type certificates are taken to consist of
- 21.118 Duration, suspension and cancellation of supplemental type certificates
- 21.119 Duration, suspension and cancellation of foreign supplemental type certificates
- 21.120 Transfer of supplemental type certificates
- 21.120A Licensing of supplemental type certificates
- 21.120B Variations of supplemental type certificates

Subpart 21.F—Production under type certificate only

- 21.121 Applicability
 - 21.123 Production under type certificate
-

-
- 21.125 Production inspection system: Materials Review Board
 - 21.127 Tests: aircraft
 - 21.128 Tests: aircraft engines
 - 21.129 Tests: variable pitch propellers
 - 21.130 Statement of conformity
 - 21.130A Records to be kept by manufacturer

Subpart 21.G—Production certificates

- 21.131 Applicability
- 21.132 Definitions for Subpart 21.G
- 21.132A Approval of product design for Class II and Class III products by CASA, authorised person or relevant approved design organisation
- 21.133 Eligibility
- 21.134 Issue of production certificate
- 21.135 Requirements for entitlement
- 21.137 Location of manufacturing facilities
- 21.139 Quality system
- 21.143 Quality system data requirements: prime manufacturer
- 21.144 Production inspection system
- 21.145 Materials Review Board
- 21.147 Changes in quality system
- 21.149 Multiple products
- 21.151 Production limitation record
- 21.153 Amendment of production certificate
- 21.157 Inspections and tests
- 21.159 Duration
- 21.161 Display
- 21.163 Privileges for holders of production certificates—conduct of training in particular maintenance
- 21.165 Responsibility of holder of production certificate
- 21.166 Records to be kept by holder of production certificate

Subpart 21.H—Certificates of airworthiness (except provisional certificates of airworthiness) and special flight permits

- 21.171 Applicability
 - 21.172 Definitions for Subpart
 - 21.173 Eligibility
 - 21.174 Applications for limited category certificates made to CASA—giving to limited category organisation
 - 21.175 Certificates of airworthiness: classification
 - 21.176 Issue of certain certificates of airworthiness
 - 21.179 Transferability
 - 21.181 Duration of certain certificates of airworthiness
 - 21.182 Aircraft manufacturer’s data plate
 - 21.183 Standard certificates of airworthiness
 - 21.184 Special certificates of airworthiness for primary category aircraft
 - 21.184A Special certificates of airworthiness for intermediate category aircraft
 - 21.185 Certificates of airworthiness for restricted category aircraft
 - 21.186 Special certificates of airworthiness for light sport aircraft
 - 21.187 Multiple-category airworthiness certification
-

- 21.189 Special certificate of airworthiness for limited category aircraft
- 21.190 Special certificates of airworthiness—amateur-built category aircraft accepted under an ABAA
- 21.191 Experimental certificates
- 21.192 Experimental certificates: eligibility
- 21.193 Experimental certificates: general
- 21.195 Experimental certificates: aircraft to be used for market surveys, sales demonstrations, and customer crew training
- 21.195A Issue of experimental certificates
- 21.195B Duration, production for inspection, suspension and cancellation of experimental certificates
- 21.195C Exercise of certain powers by authorised persons and relevant approved design organisations
- 21.196 Special flight permits: eligibility
- 21.197 Special flight permits
- 21.199 Applications for special flight permits
- 21.200 Issue of special flight permits
- 21.201 Inspection, suspension and cancellation of special flight permits

Subpart 21.I—Provisional certificates of airworthiness

- 21.211 Applicability
- 21.213 Eligibility
- 21.215 Application
- 21.216 Issue of provisional certificates of airworthiness
- 21.217 Duration
- 21.219 Transferability
- 21.221 Class I provisional certificates of airworthiness
- 21.223 Class II provisional certificates of airworthiness
- 21.225 Provisional certificates of airworthiness corresponding with provisional amendments to type certificates

Subpart 21.J—Approved design organisations

Division 21.J.1—General

- 21.231 What Subpart 21.J is about
- 21.233 Definitions for Subpart 21.J
- 21.235 Privileges for approved design organisations
- 21.237 Prohibition of unauthorised carrying out of design activities
- 21.239 Applications may be made to approved design organisation—approval activities and experimental certificates

Division 21.J.2—Approval as approved design organisation

- 21.241 Applying for approval
- 21.243 Granting approval
- 21.245 Approval certificate
- 21.247 Approval subject to conditions—general
- 21.248 Approval subject to conditions—holders of other authorisations under Part 21 and licensees
- 21.249 Cancellation, suspension and variation of approval

Division 21.J.3—Authorisation to carry out particular certification activity

- 21.251 Authorisation of approved design organisations to carry out certification activities

Division 21.J.4—Changes to approved design organisations

- 21.253 Application for approval of change to scope of approval
- 21.255 Application for approval of change to design assurance system
- 21.256 Change to design assurance system manual at direction of CASA
- 21.257 Application for approval of permanent appointment of new accountable manager or head of design
- 21.258 Permanent appointment of other key personnel—requirement to tell CASA
- 21.259 Change to exposition by organisation
- 21.261 Change to exposition at direction of CASA

Division 21.J.5—Obligations of approved design organisations

- 21.263 Content of exposition
- 21.265 Compliance with exposition
- 21.267 Design assurance system
- 21.269 Requirements for design assurance system—general
- 21.270 Requirements for design assurance system—holders of other authorisations under Part 21 and licensees
- 21.271 Compliance with design assurance system manual
- 21.273 Audit of approved design organisation by CASA
- 21.275 Inspections and observations
- 21.277 Record keeping and production of records to CASA
- 21.279 Directions to comply with specified procedures or instructions
- 21.281 Investigation of potentially unsafe condition
- 21.283 Requirement to provide employees and subcontractors with exposition and design assurance system manual

Subpart 21.K—Approval of materials, parts, processes and appliances

- 21.301 Applicability
- 21.303 Replacement and modification parts
- 21.304A Changes to an APMA
- 21.305 Approval of materials, parts, processes and appliances
- 21.305A Approval of materials, parts, processes and appliances not covered by regulation 21.305
- 21.306 Use of standard parts and materials

Subpart 21.L—Export airworthiness approvals

- 21.321 Applicability
- 21.323 Eligibility
- 21.324 Issue of export airworthiness approvals
- 21.325 Export airworthiness approvals
- 21.327 Application
- 21.329 Issue of export airworthiness approvals for Class I products
- 21.331 Issue of airworthiness approvals for Class II products
- 21.333 Issue of export airworthiness approvals for Class III products
- 21.339 Export airworthiness approval for aircraft

Subpart 21.M—Designs of modifications of, and repairs to, aircraft, aircraft engines, propellers and appliances

Division 21.M.1—Preliminary

- 21.400 Purpose of Subpart
-

- 21.402 Definition of *proposed airworthiness standards* for Subpart 21.M
- 21.403 Definition of *applicable airworthiness standards* for Subpart 21.M

Division 21.M.2—Modification/repair design approvals

- 21.405 Applications for modification/repair design approvals
- 21.410 Refusal to grant approval if design constitutes major change in type design
- 21.414 Determination of additional airworthiness standards—special conditions
- 21.416 Determination of non-application of airworthiness standards—application to CASA
- 21.418 Determination of non-application of airworthiness standards—application to authorised person or approved design organisation
- 21.420 Applicants must show compliance with applicable airworthiness standards, submit technical data and provide documents
- 21.425 Applicants to carry out necessary inspections and tests
- 21.430 CASA, authorised person or approved design organisation may carry out or observe certain tests
- 21.435 Grant of modification/repair design approvals—grant by CASA
- 21.436 Application to authorised person or approved design organisation—non-compliance with applicable airworthiness standards: determination of equivalent level of safety
- 21.437 Grant of modification/repair design approvals—grant by authorised person or approved design organisation
- 21.440 Form of modification/repair design approvals
- 21.445 Variation of modification/repair design approvals

Division 21.M.3—Transfer of, and obligations for holders of, modification/repair design approvals and approvals granted in accordance with alternative method

- 21.448 Approvals to which this Division applies
- 21.450 Transfer of modification/repair design approvals and approvals granted in accordance with alternative method
- 21.455 Record keeping and making records available to CASA
- 21.460 Instructions for continued airworthiness and flight manual supplement to be made available

Division 21.M.4—Other means of approval

- 21.465 Modifications and repairs directed by CASA
- 21.470 Foreign modification/repair designs
- 21.475 Part 21 Manual of Standards may prescribe alternative method of approval of modification and repair designs

Subpart 21.N—Approval of engines, propellers, materials, parts and appliances: imported

- 21.500 Approval of imported aircraft engines and propellers
- 21.500A Approval of other imported aircraft engines and propellers
- 21.502 Approval of imported materials, parts and appliances
- 21.502A Approval of other imported materials, parts and appliances

Subpart 21.O—Australian Technical Standard Order Authorisations

- 21.601 Applicability
 - 21.603 ATSO marking and privileges
 - 21.605 Application and issue
 - 21.607 General rules governing holders of ATSO authorisations
 - 21.609 Approval for deviation
-

- 21.611 Design changes
- 21.613 Record keeping requirements
- 21.615 CASA inspection
- 21.617 Issue of letters of ATSO design approval: import appliances
- 21.619 Non-compliance
- 21.621 Duration

Subpart 21.Q—Identification of aircraft and aeronautical products

Division 21.Q.1—Preliminary

- 21.805 Applicability of this Subpart
- 21.810 Meaning of *fireproof*

Division 21.Q.2—Aircraft, aircraft engines and aircraft propellers

- 21.815 Applicability of this Division
- 21.820 Manufacturer's data plate must be attached to aircraft
- 21.825 Manufacturer's data plate must be attached to basket of manned free balloon
- 21.830 Heater assembly of manned free balloon must carry identification mark
- 21.835 Manufacturer's data plate must be attached to aircraft engine
- 21.840 Aircraft propellers, blades and hubs must carry identification marks

Division 21.Q.3—Critical parts

- 21.845 Applicability of this Division
- 21.850 Identification of critical parts
- 21.855 Removal or alteration of identification on critical parts

Division 21.Q.4—Aircraft parts

- 21.860 Applicability of this Division
- 21.865 Identification of parts produced under an APMA
- 21.870 Identification of parts produced under an APMA if marking is impracticable
- 21.875 Identification of other aircraft parts
- 21.880 Identification of other aircraft parts—other than by marking

Regulation 21.001

Subpart 21.A—General

21.001 Applicability

- (1) This Part deals with certification and airworthiness requirements, and includes:
 - (a) rules dealing with type certificates, provisional type certificates, supplemental type certificates, type acceptance certificates, production certificates, certificates of airworthiness, export airworthiness approvals and modification/repair design approvals; and
 - (b) rules governing the holders of certificates or approvals mentioned in paragraph (a); and
 - (ba) matters relating to approved design organisations; and
 - (c) rules dealing with the approval of aircraft engines, propellers and certain materials, parts, processes, and appliances.

Source FARs section 21.1 modified.

- (2) This Part does not apply to hang gliders or paragliders.

Note: The Part 103 Manual of Standards may make provision in relation to airworthiness requirements for hang gliders and paragliders (see regulation 103.030).

21.001A Definition for Subpart

In this Subpart:

instrument means an approval, authorisation, certificate or permit issued under this Part.

21.002C Suspension or cancellation of an instrument

- (1) CASA may suspend or cancel an instrument, by written notice given to its holder, if:
 - (a) CASA is reasonably satisfied that the holder has made or caused to be made:
 - (i) a fraudulent or intentionally false statement on the application for the instrument; or
 - (ii) an intentionally false entry in a record or report that is required to be kept, made, or used to show compliance with any requirement for the issue or the exercise of the privileges of the instrument; or
 - (iii) a reproduction for a fraudulent purpose of any instrument; or
 - (iv) an alteration for a fraudulent purpose of any instrument; and
 - (b) CASA has given the holder a show cause notice under regulation 21.002D in relation to the instrument; and
 - (c) CASA has taken into account any representations made by or on behalf of the holder within the period stated in the notice.
- (2) A notice must set out:

Regulation 21.002D

- (a) the grounds for the suspension or cancellation; and
 - (b) in the case of a suspension—when the suspension stops having effect.
- (3) An instrument that is suspended under this regulation has no force while it is suspended, but, if it was issued for a fixed term, the suspension period counts as part of the term.
- (4) If CASA suspends an instrument under this regulation, the holder cannot use it to meet the requirements for the issue of any other instrument during the period of suspension.

Source FARs section 21.2 modified.

21.002D Show cause notices

- (1) CASA may give the holder of an instrument a show cause notice if there are reasonable grounds for believing that there are facts or circumstances that would justify the suspension or cancellation of the instrument under regulation 21.002C.
- (2) A show cause notice must be in writing and must:
- (a) inform the holder of the facts or circumstances that, in CASA's opinion, would justify the suspension or cancellation of the instrument; and
 - (b) invite the holder to show cause, within the period stated in the notice, why the instrument should not be suspended or cancelled.
- (3) The period stated in the notice must be reasonable, having regard to all the circumstances of the case.

21.002E Cancellation of certain certificates

- (2) If CASA cancels a type certificate, provisional type certificate, type acceptance certificate or supplemental type certificate under regulation 11.130, CASA must publish a notice in the *Gazette* stating:
- (a) that the certificate is cancelled; and
 - (b) when the cancellation takes effect.
- (3) The cancellation of a certificate mentioned in subregulation (2) takes effect on the day after the notice is published in the *Gazette*, or if a later day is stated in the request for cancellation, on the later day.

21.003 Reporting failures, malfunctions, and defects

- (1) The holder of a type certificate, a supplemental type certificate, an APMA or an ATSO authorisation, or the licensee of a type certificate or supplemental type certificate, must report to CASA any failure, malfunction, or defect in any of the following that has resulted in any of the occurrences listed in subregulation (4):
- (a) an aircraft, aircraft engine or propeller, or any other part or article manufactured by it;
 - (b) a manufacturing process specified by it.

Regulation 21.003

Penalty: 25 penalty units.

- (2) The holder of a type certificate, a supplemental type certificate, an APMA, or an ATSO authorisation, or the licensee of a type certificate or supplemental type certificate, must report to CASA any defect in any aircraft, aircraft engine or propeller, or in any part, or article manufactured by it that has left its control and that could result in any of the occurrences listed in subregulation (4).

Penalty: 25 penalty units.

- (2A) The holder of an approval mentioned in subregulation (2B) must report to CASA any failure, malfunction or defect related to a modification or repair to which the approval relates that has resulted, or could result, in an occurrence mentioned in subregulation (4).

Penalty: 25 penalty units.

- (2B) For subregulation (2A), the approval is:
- (a) a modification/repair design approval; or
 - (b) an approval mentioned in regulation 21.475.
- (3) It is a defence to a prosecution under subregulation (1), (2) or (2A) that the defendant has reasonable grounds for believing that the relevant failure, malfunction or defect:
- (a) was caused by improper maintenance or use; or
 - (b) was reported to CASA under another provision of these Regulations.

Note: A defendant bears an evidential burden in relation to the matters mentioned in subregulation (3) (see subsection 13.3(3) of the *Criminal Code*).

- (4) The following occurrences must be reported as provided in subregulations (1), (2) and (2A):
- (a) fires caused by a system or equipment failure, malfunction, or defect;
 - (b) an engine exhaust system failure, malfunction, or defect which causes damage to the engine, adjacent aircraft structure, equipment, or components;
 - (c) the accumulation or circulation of toxic or noxious gases in the crew compartment or passenger cabin;
 - (d) a malfunction, failure, or defect of a propeller control system;
 - (e) a propeller or rotorcraft hub or blade structural failure;
 - (f) flammable fluid leakage in areas where an ignition source normally exists;
 - (g) a brake system failure caused by structural or material failure during operation;
 - (h) a significant aircraft primary structural defect or failure caused by any self-generating condition (for example, fatigue or corrosion);
 - (i) any abnormal vibration or buffeting caused by a structural or system malfunction, defect, or failure;
 - (j) an engine failure;

- (k) any structural or flight control system malfunction, defect, or failure which causes an interference with normal control of the aircraft or which derogates from the flying qualities;
 - (l) a complete loss of more than one electrical power generating system or hydraulic power system during a given operation of the aircraft;
 - (m) a failure or malfunction of more than one attitude, airspeed, or altitude instrument during a given operation of the aircraft.
- (6) For subregulations (1), (2) and (2A), a report must:
- (a) be given to CASA, in writing, within 3 working days after the person required to make the report becomes aware, or could reasonably be expected to have become aware, that the failure, malfunction, or defect required to be reported has occurred; and
 - (b) include as much of the following information as is available and applicable:
 - (i) the aircraft's serial number;
 - (ii) the aircraft's registration mark;
 - (iii) when the failure, malfunction, or defect is associated with an article approved under an ATSO authorisation—the article serial number and model designation, as appropriate;
 - (iv) when the failure, malfunction, or defect is associated with an aircraft engine or propeller—the aircraft engine or propeller serial number, as appropriate;
 - (v) identification of the product model;
 - (vi) identification of the part, component, or system involved (including the part number);
 - (vii) the nature of the failure, malfunction, or defect.
- (7) Whenever the investigation of an accident or service difficulty report shows that an article manufactured under an ATSO authorisation is unsafe because of a manufacturing or design defect, the manufacturer must, upon request of CASA, investigate the defect and report to CASA the results of its investigation and any action taken or proposed by the manufacturer to correct that defect.

Penalty: 25 penalty units.

- (8) If action is required to correct the defect in an article manufactured under an ATSO authorisation, the manufacturer must submit to CASA the data necessary for the issue of an appropriate airworthiness directive.

Penalty: 10 penalty units.

- (9) An offence against subregulation (7) or (8) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

Source FARs section 21.3 modified.

Regulation 21.005

21.005 Manufacturers etc to provide aircraft flight manuals for certain aircraft

- (1) This regulation applies to an aircraft only if:
- (a) the type certification basis for the aircraft did not require the provision of an aircraft flight manual; and
 - (b) the aircraft was not flown before 1 March 1979.

- (1A) If the owner of the aircraft takes delivery of the aircraft from the holder of the type certificate for the aircraft, the holder must give the owner, when the owner takes delivery, an aircraft flight manual that:
- (a) contains the information mentioned in subregulations (2) and (3); and
 - (b) complies with subregulation (3A).

Penalty: 25 penalty units.

- (1B) If the owner of the aircraft takes delivery of the aircraft from the manufacturer of the aircraft, the manufacturer must give the owner, when the owner takes delivery, an aircraft flight manual that:
- (a) contains the information mentioned in subregulations (2) and (3); and
 - (b) complies with subregulation (3A).

Penalty: 25 penalty units.

- (2) The aircraft flight manual must contain the operating limitations and information required to be furnished in an aircraft flight manual or in manual material, markings, and placards, by the applicable regulations under which the aircraft was type certificated.
- (3) The maximum ambient atmospheric temperature for which engine cooling was demonstrated must be stated in the performance information section of the flight manual, if the applicable regulations under which the aircraft was type certificated do not require ambient temperature on engine cooling operating limitations in the flight manual.

- (3A) For paragraphs (1A)(b) and (1B)(b):
- (a) the manual must have been approved for the aircraft:
 - (i) by CASA, an authorised person or an approved design organisation under regulation 21.006; or
 - (ii) if there is an agreement (however described) between CASA and the national aviation authority of a Contracting State for the acceptance of approvals of aircraft flight manuals—by the national aviation authority or a person authorised to do so by the national aviation authority; or
 - (iii) if there is an agreement (however described) between Australia and a Contracting State for the acceptance of approvals of aircraft flight manuals—by the national aviation authority of the Contracting State, or a person authorised to do so by the national aviation authority; and
 - (b) any changes to the manual made to the manual since it was approved for the aircraft must have been approved:

- (i) by CASA, an authorised person or an approved design organisation under regulation 21.006A; or
- (ii) if there is an agreement (however described) between CASA and the national aviation authority of a Contracting State for the acceptance of approvals of changes to aircraft flight manuals—by the national aviation authority or a person authorised to do so by the national aviation authority; or
- (iii) if there is an agreement (however described) between Australia and a Contracting State for the acceptance of approvals of changes to aircraft flight manuals—by the national aviation authority of the Contracting State, or a person authorised to do so by the national aviation authority.

(4) An offence against subregulation (1A) or (1B) is an offence of strict liability.

Source FARs section 21.5 modified.

21.006 Approval of aircraft flight manuals

(1) The holder of a type certificate for, or the manufacturer of, an aircraft to which regulation 21.005 applies may apply to CASA, an authorised person or a relevant approved design organisation, in writing, for approval of a flight manual for the aircraft.

Note 1: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.

Note 2: Part 11 deals with applications and decision making.

(2) Subject to regulation 11.055, CASA or the authorised person or approved design organisation must approve the manual if CASA or the authorised person or approved design organisation is satisfied that it complies with the airworthiness standards that applied to the issue of the aircraft's type certificate, type acceptance certificate or foreign type certificate.

Note: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to issue, or cancelling, suspending or varying, an approval; or
- (b) a decision imposing a condition on an approval.

21.006A Approval of changes to aircraft flight manuals

(1) Any of the following persons may apply to CASA, an authorised person or a relevant approved design organisation, in writing, for approval of a change to a flight manual for an aircraft:

- (a) the registered operator of the aircraft;
- (aa) if the aircraft is a Part 103 aircraft—the owner of the aircraft;
- (b) an applicant for any of the following:
 - (i) approval of a change in the type design for the aircraft;
 - (ii) a supplemental type certificate for the aircraft;
 - (iii) a modification/repair design approval for the aircraft;

Regulation 21.007

(iv) an approval mentioned in regulation 21.475.

Note 1: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.

Note 2: Part 11 deals with applications and decision making.

(2) Subject to regulation 11.055, CASA or the authorised person or approved design organisation must approve the change if CASA or the authorised person or approved design organisation is satisfied that the manual as changed would comply with:

- (a) if the applicant is not an applicant for an instrument mentioned in paragraph (1)(b)—the airworthiness standards that applied to the issue of the aircraft's type certificate, type acceptance certificate or foreign type certificate; or
- (b) if the applicant is an applicant for an instrument mentioned in paragraph (1)(b)—the applicable airworthiness standards for the instrument; or
- (c) if the aircraft is a non-type certificated aircraft—the airworthiness standards that applied to the issue of the aircraft's certificate of airworthiness or permit under this Part.

Note: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to issue, or cancelling, suspending or varying, an approval; or
- (b) a decision imposing a condition on an approval.

(3) In this regulation, a reference to a change to a flight manual includes a reference to a supplement to the flight manual.

21.007 Permissible unserviceabilities

(1) A person may apply to CASA, an authorised person or a relevant approved design organisation for approval of a defect in an Australian aircraft as a permissible unserviceability for the aircraft.

Note 1: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.

Note 2: See Part 11 for other matters relating to applications and decisions.

(2) Subject to regulation 11.055, CASA or the authorised person or approved design organisation must, for the purpose of these Regulations, approve the defect as a permissible unserviceability for the aircraft if satisfied that the aircraft, with the defect, meets the applicable airworthiness standards mentioned in subregulation (3).

Note: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to issue, or cancelling, suspending or varying, an approval; or
- (b) a decision imposing a condition on an approval.

(3) For subregulation (2), the applicable airworthiness standards are:

Regulation 21.007A

- (a) for an aircraft for which there is a type certificate:
 - (i) the airworthiness standards mentioned in the type certificate and any special conditions to which the type certificate is subject under regulation 21.016; or
 - (ii) if the application states that the applicant elects to comply with a later version of those standards—that version of the standards and any special conditions to which the type certificate is subject under regulation 21.016; and
 - (b) for an aircraft for which there is a type acceptance certificate:
 - (i) the airworthiness standards mentioned in the type acceptance certificate and any conditions to which the type acceptance certificate is subject under regulation 21.029B; or
 - (ii) if the application states that the applicant elects to comply with a later version of those standards—that version of the standards and any special conditions to which the type acceptance certificate is subject under regulation 21.029B; and
 - (c) for a non-type-certificated aircraft:
 - (i) the airworthiness standards that applied to the original certification (however described) of the aircraft; or
 - (ii) if the application states that the applicant elects to comply with a later version of those standards—that version of the standards.
- (4) An approval ceases to have effect at the earliest of the following times:
- (a) if a cessation day (not later than 1 year after the day the approval is given) is stated in the approval—the end of that day;
 - (b) if a maximum amount of flight time is stated in the approval—when the aircraft has been flown for that amount of flight time;
 - (c) if a maximum number of flights is stated in the approval—when the aircraft has been flown for that number of flights;
 - (d) the end of 1 year after the approval is given.

21.007A Advice about major damage

- (1) A person may ask CASA, an authorised person or a relevant approved design organisation, in writing, to assess damage to an aircraft and advise whether the damage is major damage.
- (2) CASA or the authorised person or approved design organisation must advise the person, in writing, whether, in the opinion of CASA or the authorised person or approved design organisation, the damage is major damage.

Note: Under regulation 47 of CAR, damage to an aircraft is taken not to be major damage if, under this regulation, CASA or an authorised person or approved design organisation advises a person that the damage is not major damage.

21.008 Meaning of *technical data*

In this Part:

Regulation 21.009

technical data, for the design of an aircraft, aircraft engine, propeller or appliance, or for the design of a modification of, or repair to, an aircraft, aircraft engine, propeller or appliance, means:

- (a) data that describes the design, including:
 - (i) the drawings and specifications necessary to define the configuration and design features of the aircraft, aircraft engine, propeller or appliance, or of the modification or repair, and a list of those drawings and specifications; and
 - (ii) information on dimensions, materials and processes necessary for making the aircraft, aircraft engine, propeller or appliance, or the modification or repair; and
 - (iii) the airworthiness limitations section of the instructions for the continued airworthiness of the aircraft, aircraft engine, propeller or appliance; and
 - (iv) the operating limitations and other information necessary for the safe operation of the aircraft, aircraft engine, propeller or appliance; and
 - (v) any other data necessary to determine the airworthiness of the aircraft, aircraft engine, propeller or appliance; and
- (b) engineering reports, including test plans and reports, used to show that the design complies with the applicable airworthiness standards for an instrument for the design.

21.009 Approval of technical data

- (1) This regulation applies if technical data for a design is submitted to CASA, an authorised person or a relevant approved design organisation in connection with an application for:
 - (a) a type certificate; or
 - (b) approval of a change in type design; or
 - (c) a supplemental type certificate; or
 - (ca) a variation of a supplemental type certificate; or
 - (cb) approval of the product design of a Class II or Class III product; or
 - (d) a letter of ATSO design approval; or
 - (e) an ATSO authorisation; or
 - (f) a modification/repair design approval; or
 - (g) an APMA.
- (2) Subject to regulation 11.055, CASA or the authorised person or approved design organisation must approve the technical data if CASA or the authorised person or approved design organisation is satisfied that the technical data demonstrates that the design complies with the applicable airworthiness standards for the instrument.
- (3) In this regulation:

Class II product: see regulation 21.132.

Note: For the meaning of **Class III product**, see the Dictionary.

21.010 References to modifications and repairs in Part

- (1) In this Part, a reference to a modification of, or repair to, an aircraft, aircraft engine, propeller or appliance includes a reference to a modification of, or repair to, an aeronautical product for the aircraft, aircraft engine, propeller or appliance.
- (2) Subregulation (1) applies regardless of whether, at the time of the modification or repair, the aeronautical product was fitted to the aircraft, aircraft engine, propeller or appliance.

21.010A References to the national aviation authority of a recognised country

- (1) In this Part, a reference to the national aviation authority of a recognised country includes a reference to EASA, whether or not EASA is performing a function on behalf of a recognised country.
- (2) To avoid doubt:
 - (a) a foreign type certificate issued by EASA before 1 May 2014 is, and is taken to have been from the time it was issued, a foreign type certificate issued by the NAA of a recognised country; and
 - (b) a certificate issued by EASA before 1 May 2014 that is equivalent to a supplemental type certificate that could have been issued by CASA is, and is taken to have been from the time it was issued, a foreign supplemental type certificate issued by the NAA of a recognised country; and
 - (c) a design for a modification of, or repair to, an aircraft, aircraft engine, propeller or appliance that was approved by EASA before 1 May 2014 is, and is taken to have been from the time it was approved, a design approved by the NAA of a recognised country; and
 - (d) a manufacturing approval (however described) for an aircraft engine, propeller, material, part or appliance issued by EASA before 1 May 2014 is, and is taken to have been from the time it was issued, a manufacturing approval issued by the NAA of a recognised country.
- (3) Also to avoid doubt, a foreign supplemental type certificate cancelled by EASA before 1 May 2014 is taken to have been cancelled by the NAA of a recognised country.

21.010B Definition of *recognised country*

- (1) In this Part:

recognised country means any of the following:

- (a) Canada;
- (b) France;
- (c) Germany;
- (d) Netherlands;
- (e) New Zealand;
- (f) United Kingdom;
- (g) United States of America.

Regulation 21.010C

- (2) For Subpart 21.B, a Contracting State, other than a country mentioned in subregulation (1), is a **recognised country** if there is an agreement (however described) between:
 - (a) Australia and the Contracting State; or
 - (b) CASA and the national aviation authority of the Contracting State; for CASA to issue type acceptance certificates in relation to foreign type certificates or equivalent documents issued by the national aviation authority of the Contracting State.
- (3) For Subpart 21.E, a Contracting State, other than a country mentioned in subregulation (1), is a **recognised country** if there is an agreement (however described) between:
 - (a) Australia and the Contracting State; or
 - (b) CASA and the national aviation authority of the Contracting State; for the acceptance of certificates (however described) that are equivalent to supplemental type certificates.
- (4) For Subpart 21.M, a Contracting State, other than a country mentioned in subregulation (1), is a **recognised country** if there is an agreement (however described) between:
 - (a) Australia and the Contracting State; or
 - (b) CASA and the national aviation authority of the Contracting State; for the acceptance of approvals of designs of modifications of, or repairs to, aircraft, aircraft engines, propellers or appliances.

21.010C References to countries with which Australia has agreements

- (1) In this Part, a reference to a country with which Australia has an agreement for the acceptance of aircraft includes a reference to a country with the national aviation authority of which CASA has an agreement for the acceptance of aircraft.
- (2) In this Part, a reference to a country with which Australia has an agreement for the acceptance of aircraft engines, propellers, materials, parts or appliances includes a reference to a country with the national aviation authority of which CASA has an agreement for the acceptance of aircraft engines, propellers, materials, parts or appliances.

21.010D Issue of Manual of Standards for Part 21

For subsection 98(5A) of the Act, CASA may issue a Manual of Standards for this Part prescribing matters:

- (a) required or permitted by these Regulations to be prescribed by the Part 21 Manual of Standards; or
- (b) necessary or convenient to be prescribed for carrying out or giving effect to this Part.

Note: A Manual of Standards is a legislative instrument: see subsection 98(5AA) of the Act.

Subpart 21.B—Type certificates and type acceptance certificates

Note: A type certificate or a type acceptance certificate issued under this Part for an aircraft, aircraft engine or propeller does not certify that it complies with the *Air Navigation (Aircraft Noise) Regulations 2018*, the *Air Navigation (Aircraft Engine Emissions) Regulations* or any other applicable Commonwealth legislation. Compliance with those Regulations or other applicable Commonwealth legislation may be required before the aircraft, aircraft engine or propeller may be legally operated.

21.011 Applicability

This Subpart prescribes:

- (a) requirements for the issue of:
 - (i) type certificates for aircraft, aircraft engines and propellers; and
 - (ii) type acceptance certificates for aircraft; and
- (b) rules governing the holders of those certificates; and
- (c) rules dealing with the national aviation authorities of foreign countries.

Source FARs section 21.11 modified.

21.013 Eligibility

Any person is eligible to apply to CASA for a type certificate or a type acceptance certificate.

Source FARs section 21.13 modified.

21.013A Issue of type certificate

- (1) Subject to regulation 11.055, CASA must issue a type certificate (except a type certificate mentioned in regulation 21.029) to an applicant for the certificate if the applicant:
 - (a) is eligible, under regulation 21.013, to apply for the certificate; and
 - (b) applies for the certificate in accordance with this Subpart; and
 - (c) is entitled, under this Subpart, to the certificate; and
 - (d) otherwise complies with this Part.
- (2) Subregulation (3) applies if, under regulation 21.251, CASA authorises a relevant approved design organisation to certify that the applicant meets a criterion for entitlement to a type certificate under this Subpart.
- (3) If the approved design organisation is satisfied that the applicant meets the criterion, the organisation may give CASA a certificate to that effect.
- (4) For paragraph (1)(c), if an approved design organisation gives CASA a certificate under subregulation (3) in relation to a criterion, CASA need consider only that certificate in deciding whether the applicant meets the criterion.

Regulation 21.014

- (5) For subregulation (3), regulations 21.021, 21.024, 21.025 and 21.026 apply to consideration by an approved design organisation of an application for a type certificate as if each reference to CASA in those regulations were a reference to the approved design organisation.

21.014 Recognition of foreign certification

Despite regulation 21.013A, CASA must not issue a type certificate mentioned in regulation 21.021, 21.024, or 21.025, for an aircraft manufactured in another country, if:

- (a) a type acceptance certificate may be issued for the aircraft under regulation 21.029A; or
- (b) a type certificate may be issued for the aircraft under regulation 21.029.

21.015 Application for type certificate

- (2) An application for an aircraft type certificate must be accompanied by a three-view drawing of that aircraft and available preliminary basic data.
- (3) An application for an aircraft engine type certificate must be accompanied by a description of the engine design features, the engine operating characteristics, and the proposed engine operating limitations.

Source FARs section 21.15 modified.

21.016 Special standards and other conditions on type certificates

- (1) If CASA considers that some of the airworthiness standards mentioned in these Regulations that are applicable to a particular type of aircraft, aircraft engine or propeller do not provide an adequate or appropriate safety standard for the aircraft, aircraft engine or propeller, CASA may issue a type certificate for it on condition that it complies with any special conditions that are necessary to establish a level of safety equivalent to that established under these Regulations for comparable aircraft, aircraft engines or propellers.
- (2) CASA may issue a type certificate for an aircraft, aircraft engine or propeller subject to any other conditions that are necessary in the interests of aviation safety.
- (3) A condition imposed under subregulation (2) may include operational limitations.
- (4) A special condition or other condition must be in writing, and set out in, or attached to, the type certificate.
- (5) A person must not engage in conduct that results in a breach of a special condition or other condition of a type certificate.

Penalty: 50 penalty units.

- (6) An offence against subregulation (5) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

Source FARs section 21.16 modified.

21.017 Designation of applicable airworthiness standards

- (1) An applicant for a type certificate for an aircraft mentioned in regulation 21.021 or 21.025, or an aircraft engine or propeller, must show that the aircraft, aircraft engine or propeller meets:
 - (a) the applicable requirements of this Part, and of the airworthiness standards mentioned in Parts 22, 23, 25, 27, 29, 31, 32, 33 and 35, and of the airworthiness standards prescribed by the Part 21 Manual of Standards, that are effective on the date of application for that certificate unless:
 - (i) otherwise specified by CASA; or
 - (ii) compliance with later effective amendments is elected or required under this regulation; and
 - (b) any special conditions imposed under regulation 21.016.
- (2) For special classes of aircraft (airships and other non-conventional aircraft), including the engines and propellers installed thereon, for which airworthiness standards have not been prescribed in these Regulations, the airworthiness standards are the portions of those airworthiness standards mentioned in Parts 22, 23, 25, 27, 29, 31, 32, 33 and 35, and of the airworthiness standards prescribed by the Part 21 Manual of Standards, that CASA considers to be appropriate for the aircraft and applicable to a specific type design, or such airworthiness criteria as CASA may consider provide an equivalent level of safety to those airworthiness standards.
- (3) An application for type certification of a transport category aircraft is effective for 5 years, and an application for any other type certificate is effective for 3 years, unless an applicant shows, before the application lapses, that the aircraft requires a longer period of time for design, development, and testing, and CASA approves a longer period.
- (4) If an application ceases to be effective, the applicant may:
 - (a) file a new application for a type certificate and comply with all the provisions of subregulation (1) applicable to an original application; or
 - (b) file for an extension of the original application and comply with the applicable airworthiness requirements of these Regulations that were effective on a date, to be selected by the applicant, not earlier than the date which precedes the date of issue of the type certificate by the time limit established under subregulation (3) for the original application.
- (5) If an applicant elects to comply with an amendment to these Regulations or the Part 21 Manual of Standards, or to any matter incorporated by reference in these Regulations, that is effective after the filing of the application for a type certificate, the applicant must also comply with any other amendment or incorporated matter that CASA considers is directly related to the application.

Regulation 21.019

- (6) For primary category aircraft, the airworthiness standards are the airworthiness standards mentioned in Part 26 and the airworthiness standards prescribed by the Part 21 Manual of Standards, or such other airworthiness criteria that CASA considers are appropriate to the specific design and intended use and provide a level of safety acceptable to CASA when the aircraft is operated under the conditions stated in its type certification basis.
- (7) For intermediate category aircraft, the airworthiness standards are the airworthiness standards mentioned in Part 26 and the airworthiness standards prescribed by the Part 21 Manual of Standards, or such other airworthiness criteria that CASA considers are appropriate to the specific design and intended use and provide a level of safety acceptable to CASA when the aircraft is operated under the conditions stated in its type certification basis.
- (8) If an airworthiness standard has been agreed by CASA or one of its predecessors after 30 September 1993 as a response to a design advice mentioned in section 100.3 or 100.6 of the Civil Aviation Orders, the standard continues to apply until 5 years after the date of approval of the design advice, unless the applicant elects to comply with a later standard.

Source FARs section 21.17 modified.

21.019 Changes requiring a new type certificate

- (1) A type certificate for an aircraft, aircraft engine or propeller ceases to apply to an aircraft, aircraft engine or propeller of that type if:
 - (a) a change is made in the design configuration, power, power limitations (engines), speed limitations (engines), or weight of the aircraft, aircraft engine or propeller that is so extensive that a substantially complete investigation of compliance with the requirements applicable under regulation 21.017 is necessary in the interests of aviation safety; or
 - (b) in the case of a normal, utility, acrobatic, commuter or transport category aircraft, a change is made:
 - (i) in the number of its engines or rotors; or
 - (ii) to engines or rotors using different principles of propulsion or to rotors using different principles of operation; or
 - (c) in the case of an aircraft engine—a change is made in the principle of operation; or
 - (d) in the case of propellers—a change is made in the number of blades or principle of pitch change operation.
- (2) A person who proposes to make a change mentioned in subregulation (1) may apply to CASA for a new type certificate for the aircraft, aircraft engine or propeller.

Source FARs section 21.19 modified.

21.021 Type certificate: normal, utility, acrobatic, commuter, and transport category aircraft; manned free balloons; special classes of aircraft; aircraft engines; propellers

An applicant is entitled to a type certificate for an aircraft (except an aircraft mentioned in regulation 21.027) in the normal, utility, acrobatic, commuter, or transport category, or for a manned free balloon, or for a special class of aircraft or an aircraft engine or propeller, if:

- (a) the applicant submits the type design, test reports, and computations necessary to show that the aircraft, aircraft engine or propeller to be certificated meets the applicable requirements of this Part, the airworthiness standards mentioned in these Regulations and any conditions subject to which the type certificate is to be issued; and
- (b) CASA is satisfied that the type design and the aircraft, engine or propeller meet the applicable requirements of this Part and the airworthiness standards mentioned in these Regulations, and any airworthiness provisions not complied with are compensated for by factors that provide an equivalent level of safety; and
- (c) for an aircraft—CASA is satisfied the aircraft can reasonably be expected to be safe for its intended use when it is operated under any conditions limiting its intended use.

Source FARs section 21.21 modified.

21.024 Type certificate: primary category aircraft

- (1) The applicant is entitled to a type certificate for an aircraft in the primary category if:
 - (a) the aircraft:
 - (i) is unpowered; is an aeroplane powered by a single, naturally aspirated engine with a 61 knots or less V_{S0} stall speed as defined in FARs section 23.49; or is a rotorcraft powered by a single, naturally aspirated engine with a 29.3 kgm⁻² main rotor disc loading limitation, under sea level standard day conditions; and
 - (ii) has a maximum take-off weight of not more than 1225 kg or, if the aircraft is a seaplane, a maximum take-off weight of not more than 1530 kg; and
 - (iii) has a maximum seating capacity of not more than 4 persons, including the pilot; and
 - (iv) has an unpressurised cabin; and
 - (b) the applicant has submitted to CASA:
 - (i) except as provided by subregulation (3), a statement, in a form and manner acceptable to CASA, certifying that: the applicant has completed the engineering analysis necessary to demonstrate compliance with the applicable airworthiness requirements; the applicant has conducted appropriate flight, structural, propulsion, and systems tests necessary to show that the aircraft, its components, and its equipment are reliable and function properly; the type design

Regulation 21.025

- complies with the airworthiness standards established for the aircraft under subregulation 21.017(6); and the aircraft can reasonably be expected to be safe for its intended use when it is operated under any conditions limiting its intended use; and
- (ii) the flight manual required by regulation 21.005, including any information required to be furnished by the applicable airworthiness standards; and
 - (iii) instructions for continued airworthiness in accordance with subregulation 21.050(2); and
 - (iv) a report that: summarises how compliance with each provision of the type certification basis was determined; lists the specific documents in which the type certification data information is provided; lists all necessary drawings and documents used to define the type design; and lists all the engineering reports on tests and computations the applicant must retain and make available under regulation 21.049 to substantiate compliance with the applicable airworthiness standards; and
- (c) CASA is satisfied that:
- (i) the aircraft complies with the airworthiness standards or other criteria established under subregulation 21.017(6); and
 - (ii) the aircraft can reasonably be expected to be safe for its intended use when it is operated under any conditions limiting its intended use.
- (2) An applicant may include a special inspection and preventive maintenance program, designed to be accomplished by the pilot-owner of the aircraft, as part of the aircraft's type design or supplemental type design.
- (3) For aircraft manufactured outside Australian territory in a country with which Australia has a bilateral agreement for the acceptance of these aircraft, and from which the aircraft is to be imported into Australian territory, the statement required by subparagraph (1)(b)(i) must be made by the national aviation authority of the exporting country.

Source FARs section 21.24 modified.

21.025 Issue of type certificate: restricted category aircraft

- (1) An applicant is entitled to a type certificate for an aircraft in the restricted category for one or more of the special purpose operations mentioned in subregulation (2) if:
- (a) the aircraft can reasonably be expected to be safe for its intended use when it is operated under any conditions limiting its intended use; and
 - (b) the aircraft:
 - (i) meets the airworthiness requirements of the normal, utility, acrobatic, commuter or transport category, except those requirements that CASA considers are inappropriate for the special purpose for which the aircraft is to be used; or
 - (ii) is of a type that has been manufactured in accordance with the requirements of, and accepted for use by, the Defence Force, or an

armed force of Canada, the United Kingdom or the United States of America, and has been later modified for the special purpose operation or operations.

- (2) For subregulation (1), the special purpose operations are:
- (a) agricultural operations (for example, spraying, dusting, and seeding, and livestock and feral animal control); and
 - (b) forest and wildlife conservation; and
 - (c) firefighting; and
 - (d) aerial surveying or scientific research (for example, photography, mapping, and oil and mineral exploration); and
 - (e) patrolling (for example, pipelines, power lines, and canals); and
 - (f) weather control and atmospheric research (for example, cloud seeding); and
 - (g) aerial advertising (for example, skywriting, banner towing, airborne signs and public address systems); and
 - (h) glider towing; and
 - (i) target towing; and
 - (j) target designation; and
 - (k) any other operation similar to any of these operations.

Source FARs section 21.25 modified.

21.026 Type certificate: intermediate category aircraft

- (1) The applicant is entitled to a type certificate for an aircraft in the intermediate category if:
- (a) the aircraft:
 - (i) is an aeroplane with a 61 knots or less V_{S0} stall speed as defined in FARs section 23.49; or is a rotorcraft with a 29.3 kgm⁻² main rotor disc loading limitation, under sea level standard day conditions; and
 - (ii) has a maximum take-off weight of not more than 1750 kg; and
 - (iii) has a maximum seating capacity of 4 persons, including the pilot; and
 - (iv) has an unpressurised cabin; and
 - (b) the applicant has submitted to CASA:
 - (i) except as provided by subregulation (3), a statement, in a form and manner acceptable to CASA, certifying that: the applicant has completed the engineering analysis necessary to demonstrate compliance with the applicable airworthiness requirements; the applicant has conducted appropriate flight, structural, propulsion, and systems tests necessary to show that the aircraft, its components, and its equipment are reliable and function properly; the type design complies with the airworthiness standards established for the aircraft under subregulation 21.017(7); and the aircraft can reasonably be expected to be safe for its intended use when it is operated under any conditions limiting its intended use; and

Regulation 21.027

- (ii) the flight manual required by regulation 21.005, including any information required to be furnished by the applicable airworthiness standards; and
 - (iii) instructions for continued airworthiness in accordance with subregulation 21.050(2); and
 - (iv) a report that: summarises how compliance with each provision of the type certification basis was determined; lists the specific documents in which the type certification data information is provided; lists all necessary drawings and documents used to define the type design; and lists all the engineering reports on tests and computations that the applicant must retain and make available under regulation 21.049 to substantiate compliance with the applicable airworthiness standards; and
- (c) CASA is satisfied that:
- (i) the aircraft complies with the airworthiness standards or other criteria established under subregulation 21.017(7); and
 - (ii) the aircraft can reasonably be expected to be safe for its intended use when it is operated under any conditions limiting its intended use.
- (2) An applicant may include a special inspection and preventive maintenance program, designed to be accomplished by the pilot-owner of the aircraft, as part of the aircraft's type design or supplemental type design.
- (3) For aircraft manufactured outside Australian territory in a country with which Australia has a bilateral agreement for the acceptance of these aircraft, and from which the aircraft is to be imported into Australian territory, the statement required by subparagraph (1)(b)(i) must be made by the national aviation authority of the exporting country.

Source FARs section 21.24 modified.

21.027 Type certificate: surplus aircraft of the Armed Forces

- (1) Except as provided in subregulation (2), an applicant is entitled to a type certificate for an aircraft in the normal, utility, acrobatic, commuter, or transport category that was designed and constructed in Australian territory and was accepted for operational use, and declared surplus by, the Defence Force, or an armed force of Canada, the United Kingdom or the United States of America (in this regulation called a *surplus defence aircraft*), and that is shown to comply with the applicable certification requirements in subregulation (6).
- (2) An applicant is entitled to a type certificate for a surplus defence aircraft that is a counterpart of a previously type certificated civil aircraft, if the applicant shows compliance with the regulations governing the original civil aircraft type certificate.
- (3) Aircraft engines, propellers, and their related accessories installed in surplus defence aircraft, for which a type certificate is sought under this regulation will be approved for use on those aircraft if the applicant shows that on the basis of the previous military qualifications, acceptance, and service record, the engines

Regulation 21.027

or propellers provide substantially the same level of airworthiness as would be provided if the engines or propellers met the airworthiness standards:

- (a) mentioned in Part 33 or 35; or
 - (b) prescribed by the Part 21 Manual of Standards.
- (4) CASA may relieve an applicant from strict compliance with a specific provision of the applicable requirements in subregulation (6), if CASA is satisfied that the method of compliance proposed by the applicant provides substantially the same level of airworthiness and that strict compliance with the requirements would impose a severe burden on the applicant. CASA may use experience that was satisfactory to the relevant armed force in making such a determination.
- (5) CASA may require an applicant to comply with later requirements than those in subregulations (3) and (6) if CASA is satisfied that compliance with the requirements in those subregulations would not ensure an adequate level of airworthiness for the aircraft.
- (6) Except as provided in subregulations (2), (3), (4) and (5), an applicant for a type certificate under this regulation must comply with the appropriate regulations listed in Table 21.027.

Table 21.027 Regulations that must be complied with for particular kinds of aircraft

Type of Aircraft	Date accepted for operational use by the Armed Force	Regulations that apply 1
Small reciprocating-engine powered aeroplanes	Before May 16, 1956	Civil Air Regulations Part 3, as effective May 15 1956
	After May 15, 1956	Civil Air Regulations Part 3, or FARs Part 23, or CASR Part 23
Small turbine-engine powered aeroplanes	Before Oct. 2, 1959	Civil Air Regulations Part 3, as effective Oct. 1 1959
	After Oct. 1, 1959	Civil Air Regulations Part 3, or FARs Part 23, or CASR Part 23
Commuter category aeroplanes	After Feb. 17, 1987	FARs Part 23, as effective Feb 17, 1987, or CASR Part 23
Large reciprocating-engine powered aeroplanes	Before Aug. 26, 1955	Civil Air Regulations Part 4b, as effective Aug. 25, 1955
	After Aug. 25, 1955	Civil Air Regulations Part 4b, or FARs Part 25, or CASR Part 25
Large turbine engine-powered aeroplanes	Before Oct. 2, 1959	Civil Air Regulations Part 4b, as effective Oct. 1, 1959
	After Oct. 1, 1959	Civil Air Regulations Part 4b, or FARs Part 25, or CASR 25
Rotorcraft with a maximum certificated take-off weight of:		
2,722 kg or less	Before Oct. 2, 1959	Civil Air Regulations Part 6, as effective Oct. 1, 1959

Regulation 21.029

Table 21.027 Regulations that must be complied with for particular kinds of aircraft

Type of Aircraft	Date accepted for operational use by the Armed Force	Regulations that apply 1
Over 2,722 kg	After Oct. 1, 1959	Civil Air Regulations Part 6, or FARs Part 27, or CASR Part 27
	Before Oct. 2, 1959	Civil Air Regulations Part 7, as effective Oct. 1, 1959
	After Oct. 1, 1959	Civil Air Regulations Part 7, or FARs Part 29, or CASR Part 29.

¹ Where no specific date is listed, the applicable regulations are those in effect on the date that the first aircraft of the particular model was accepted for operational use by the relevant armed force.

Source FARs section 21.27 modified.

21.029 Type certificate for imported aircraft, aircraft engines or propellers not type certificated by national aviation authority of recognised country

- (1) Subject to regulation 11.055, CASA must issue a type certificate for an aircraft, aircraft engine or propeller manufactured in a foreign country and for which a foreign type certificate issued by the national aviation authority of a recognised country is not in force, if the aircraft, aircraft engine or propeller:
 - (a) meets the applicable airworthiness requirements mentioned in regulation 21.017; or
 - (b) meets the airworthiness requirements of a Contracting State and any other requirements imposed by CASA that are necessary to provide a level of safety equivalent to that provided under these Regulations for comparable aircraft, aircraft engines or propellers.
- (2) CASA may accept a certificate given by the national aviation authority of a Contracting State to the effect that an aircraft, aircraft engine or propeller meets the State's airworthiness requirements as evidence of that fact.
- (3) An application for a type certificate under this regulation must be accompanied by:
 - (a) any relevant certificate issued by the national aviation authority of a Contracting State; and
 - (b) the relevant technical data.
- (4) CASA may inspect the aircraft, aircraft engine or propeller and carry out, or require the applicant to carry out, any tests and inspections necessary to enable CASA to decide whether or not to issue the type certificate.

Source FARs section 21.29 modified.

21.029A Type acceptance certificate for imported aircraft certificated by national aviation authority of recognised country

Subject to regulations 11.055, 21.029B and 21.029C, CASA must issue a type acceptance certificate for an aircraft manufactured in a foreign country, without making the type acceptance certificate subject to any conditions, if:

- (a) a foreign type certificate or equivalent document issued by the national aviation authority of a recognised country is in force for aircraft of that type; and
- (b) the applicant has given CASA:
 - (i) evidence that the type design has been approved by the national aviation authority of the recognised country by issue of a type certificate or equivalent document; and
 - (ii) details of any equivalent safety determinations or waivers (however described) that were made in the course of the type certification; and
 - (iii) a copy of the applicable type certificate data sheet; and
 - (iv) a copy of the flight manual that contains all the available options applicable to the type, and that was approved by the national aviation authority that issued the foreign type certificate; and
 - (v) a copy of the manufacturer's instructions for continued airworthiness of the aircraft; and
 - (vi) a copy of the parts catalogue for the aircraft; and
 - (vii) a list of all current field service documents applicable to the aircraft; and
 - (viii) an undertaking from the holder of the foreign type certificate to continue to supply to CASA service bulletins and instructions for the continuing airworthiness of aircraft of that type and any amendments of the documents mentioned in subparagraphs (iv), (v), (vi) and (vii).

21.029B Issue of type acceptance certificates subject to conditions

- (1) CASA may issue a type acceptance certificate under regulation 21.029A subject to a condition that is substantially the same as a condition imposed by the national aviation authority of a recognised country on the corresponding foreign type certificate.
- (2) Also, CASA may issue a type acceptance certificate subject to other conditions if:
 - (a) there are reasonable grounds for believing that issuing the certificate without imposing conditions or taking other measures would constitute a significant threat to aviation safety; and
 - (b) CASA has consulted the applicant, the manufacturer of the aircraft and the national aviation authority that issued the foreign type certificate about the safety issues involved; and
 - (c) CASA has considered the views of the applicant, the manufacturer and the national aviation authority before deciding whether or not to issue the type acceptance certificate subject to conditions; and

Regulation 21.029C

- (d) there are reasonable grounds for believing that imposing the conditions would substantially reduce the threat to aviation safety; and
- (e) there are no other practicable means of substantially reducing the threat to aviation safety.

- (3) A condition may include operational limitations.
- (4) A condition must be in writing, and set out in, or attached to, the type acceptance certificate.
- (5) A person must not engage in conduct that results in a breach of a condition of a type acceptance certificate.

Penalty: 50 penalty units.

- (6) An offence against subregulation (5) is an offence of strict liability.

Note: The power of CASA to issue a type acceptance certificate subject to a condition under subregulation (2) must be exercised by the Director personally: see paragraph 11.260(2)(b).

21.029C Refusal to issue type acceptance certificate

- (1) CASA may refuse to issue a type acceptance certificate for an aircraft manufactured in a foreign country if:
 - (a) there are reasonable grounds for believing that issuing the certificate would constitute a significant threat to aviation safety; and
 - (b) CASA has consulted the applicant, the manufacturer of the aircraft and the national aviation authority that issued the foreign type certificate about the safety issues involved; and
 - (c) CASA has considered the views of the applicant, the manufacturer and the national aviation authority before deciding whether to issue the type acceptance certificate; and
 - (d) there are reasonable grounds for believing that issuing the certificate subject to conditions is not a practicable means of substantially reducing the threat to aviation safety and there are no other practicable means of substantially reducing the threat.
- (2) If CASA refuses to issue a type acceptance certificate, CASA must deal with the application for the type acceptance certificate as if it were an application for a type certificate under regulation 21.029.

Note: The power of CASA to refuse to issue a type acceptance certificate must be exercised by the Director personally: see paragraph 11.260(2)(c).

21.031 Type design—meaning

- (1) The type design of an aircraft, aircraft engine or propeller (except an aircraft, aircraft engine or propeller type certificated under regulation 21.029 or 21.029A) consists of the following:

- (a) the drawings and specifications contained in technical data approved under regulation 21.009 for the aircraft, aircraft engine or propeller, and a list of those drawings and specifications;
 - (b) information on dimensions, materials, and processes necessary to define the structural strength of the aircraft, aircraft engine or propeller;
 - (c) the airworthiness limitations section of the instructions for continued airworthiness:
 - (i) as required by the airworthiness standards mentioned in Parts 22, 23, 25, 26, 27, 29, 31, 32, 33 and 35 and the airworthiness standards prescribed by the Part 21 Manual of Standards, or as otherwise required by CASA; or
 - (ii) for special classes of aircraft mentioned in subregulation 21.017(2)—as specified in the applicable airworthiness criteria;
 - (d) the operating limitations and other information necessary for the safe operation of the aircraft, aircraft engine or propeller as required by the airworthiness standards mentioned in Parts 22, 23, 25, 26, 27, 29, 31, 32, 33 and 35, and the airworthiness standards prescribed by the Part 21 Manual of Standards, and as specified in the applicable airworthiness criteria for special classes of aircraft mentioned in subregulation 21.017(2);
 - (e) for primary and intermediate category aircraft, if maintenance on the aircraft is to be carried out by the pilot-owner of the aircraft—a special inspection and preventive maintenance program designed to be accomplished by the pilot-owner;
 - (f) any other data necessary to allow, by comparison, the determination of the airworthiness of later aircraft, aircraft engines or propellers of the same type.
- (2) The type design for an aircraft, aircraft engine or propeller type certificated under regulation 21.029 consists of the following:
- (a) the drawings and specifications contained in technical data approved under regulation 21.009 for the aircraft, aircraft engine or propeller, and a list of those drawings and specifications;
 - (b) information on dimensions, materials, and processes necessary to define the structural strength of the aircraft, aircraft engine or propeller;
 - (c) the airworthiness limitations section of the instructions for continued airworthiness:
 - (i) as required by the airworthiness standards mentioned in Parts 22, 23, 25, 26, 27, 29, 31, 32, 33 and 35 and the airworthiness standards prescribed by the Part 21 Manual of Standards, or as otherwise required by CASA; or
 - (ii) for special classes of aircraft mentioned in subregulation 21.017(2)—as specified in the applicable airworthiness criteria;
 - (d) the operating limitations and other information necessary for the safe operation of the aircraft, aircraft engine or propeller as required by the airworthiness standards mentioned in Parts 22, 23, 25, 26, 27, 29, 31, 32, 33 and 35, and the airworthiness standards prescribed by the Part 21

Regulation 21.033

- Manual of Standards, and as specified in the applicable airworthiness criteria for special classes of aircraft mentioned in subregulation 21.017(2);
- (e) for primary category aircraft, if maintenance on the aircraft is to be carried out by the pilot-owner of the aircraft—a special inspection and preventive maintenance program designed to be accomplished by the pilot-owner;
 - (f) any other data necessary to allow, by comparison, the determination of the airworthiness of later aircraft, aircraft engines or propellers of the same type.
- (3) The type design for an aircraft type certificated under regulation 21.029A consists of the type design that was accepted by the national aviation authority of the recognised country that issued the foreign type certificate for the aircraft.

Source FARs section 21.31 modified.

21.033 Inspection and tests

- (1) CASA is not required to issue, under regulation 21.013A, a type certificate for an aircraft, aircraft engine or propeller unless the applicant allows CASA to make any inspection and any flight and ground test necessary to determine that the aircraft, aircraft engine or propeller complies with the applicable requirements of these Regulations. However:
- (a) no aircraft, aircraft engine, propeller, or part thereof may be presented to CASA for test unless compliance with paragraphs (2)(b), (c) and (d) has been shown for that aircraft, aircraft engine, propeller, or part thereof; and
 - (b) no change may be made to an aircraft, aircraft engine, propeller, or part thereof between the time that compliance with paragraphs (2)(b), (c) and (d) is shown for that aircraft, aircraft engine, propeller, or part thereof and the time that it is presented to CASA for test.
- (2) Each applicant must make all inspections and tests necessary to determine:
- (a) compliance with the applicable airworthiness requirements; and
 - (b) that the aircraft, aircraft engine or propeller and its materials conform to the specifications in the type design; and
 - (c) that parts of the aircraft, aircraft engine or propeller conform to the drawings in the type design; and
 - (d) that the manufacturing processes, construction and assembly conform to those specified in the type design.
- (3) For an aircraft with not more than 2 seats, a maximum take-off weight not exceeding 750 kg and a 45 knots or less V_{S0} stall speed as defined in FARs section 23.49 that is to be type certificated in the primary category or intermediate category, an authorised person may make any determination, inspection, flight test or ground test necessary to establish whether the aircraft complies with the applicable requirements of these Regulations.

Source FARs section 21.33 modified.

21.035 Flight tests

- (1) Each applicant for a type certificate mentioned in regulation 21.021 (except a type certificate issued under regulation 21.029) must make the tests listed in subregulation (2). Before making the tests the applicant must show CASA:
 - (a) compliance with the applicable structural requirements of these Regulations; and
 - (b) completion of necessary ground inspections and tests; and
 - (c) that the aircraft conforms with the type design; and
 - (d) that CASA received a flight test report from the applicant (signed, in the case of an application for a type certificate for an aircraft in the transport category, by the applicant's test pilot) containing the results of the tests.
- (2) Upon showing compliance with subregulation (1), the applicant must make all flight tests that CASA considers are necessary:
 - (a) to determine compliance with the applicable requirements of these Regulations; and
 - (b) for aircraft to be type certificated under these Regulations, except gliders and except aeroplanes of 2720 kg or less maximum certificated weight in the normal, utility, acrobatic, or commuter category—to determine whether there is reasonable assurance that the aircraft, its components, and its equipment are reliable and function properly.
- (3) Each applicant must, if practicable, make the tests prescribed in paragraph (2)(b) upon the aircraft that was used to show compliance with:
 - (a) paragraph (2)(a); and
 - (b) for rotorcraft—the rotor drive endurance tests prescribed in the applicable airworthiness standards mentioned in Parts 27 and 29 or prescribed by the Part 21 Manual of Standards.
- (4) Each applicant must show CASA for each flight test (except in a glider or a manned free balloon) that adequate provision is made for the flight test crew for emergency egress and the use of parachutes.
- (5) Except in a manned free balloon, an applicant must discontinue flight tests under this regulation until the applicant shows CASA that corrective action has been taken, whenever:
 - (a) the applicant's test pilot is unable or unwilling to make any of the required flight tests; or
 - (b) items of non-compliance with requirements are found that may make additional test data meaningless or that would make further testing unduly hazardous.
- (6) The flight tests prescribed in paragraph (2)(b) must include:
 - (a) for aircraft incorporating turbine engines of a type not previously used in a type certificated aircraft—at least 300 hours of operation with a full complement of engines that conform to a type certificate; and
 - (b) for all other aircraft—at least 150 hours of operation.

Regulation 21.037

Source FARs section 21.35 modified.

21.037 Flight test pilot

Each applicant for a type certificate mentioned in regulation 21.021 (except a type certificate issued under regulation 21.029) must provide a person holding an appropriate:

- (a) class rating; or
- (b) type rating; or
- (c) balloon class endorsement within the meaning of subregulation 5.01(1) of CAR; or
- (d) authorisation under regulation 61.140; or
- (e) authorisation under regulation 5.50 of CAR;

to make the flight tests required by this Part.

Source FARs section 21.37 modified.

21.039 Flight test instrument calibration and correction report

- (1) Each applicant for a type certificate mentioned in regulation 21.021 (except a type certificate issued under regulation 21.029) must submit a report to CASA showing the computations and tests required in connection with the calibration of instruments used for test purposes and in the correction of test results to standard atmospheric conditions.
- (2) Each applicant must allow CASA to conduct any flight tests that CASA is satisfied is necessary to check the accuracy of the report submitted under subregulation (1).

Source FARs section 21.39 modified.

21.041 Type certificate—meaning

- (1) In these Regulations, unless the contrary intention appears:

foreign type certificate, for an aircraft, aircraft engine or propeller:

- (a) means a certificate (however described) for the aircraft, aircraft engine or propeller that is issued by the national aviation authority of a foreign country and is equivalent to a type certificate; but
- (b) does not include a certificate (however described) for the aircraft, aircraft engine or propeller that is issued by the national aviation authority of a foreign country solely on the basis of a certificate (however described) for the aircraft, aircraft engine or propeller that is issued by the national aviation authority of another country and is equivalent to a type certificate.

type certificate, for an aircraft, aircraft engine or propeller, means a type certificate issued by CASA under regulation 21.013A or 21.029 certifying that the aircraft, aircraft engine or propeller meets the airworthiness standard mentioned for it in the certificate.

- (2) In these Regulations, except in this Subpart, a reference to a **type certificate**, or **foreign type certificate**, for an aircraft, aircraft engine or propeller, includes a reference to the type design, the operating limitations, the type certificate data sheet, the applicable airworthiness standards with which the certificate records compliance, and any other conditions or limitations prescribed for the aircraft, aircraft engine or propeller under these Regulations.

Source FARs section 21.41 modified.

21.043 Location of manufacturing facilities

Despite regulation 21.013A, CASA is not required to consider an application for a type certificate for an aircraft, aircraft engine or propeller (except an application under regulation 21.029) if the manufacturing facilities for the aircraft, aircraft engine or propeller are located outside Australian territory, unless the location of the manufacturer's facilities places no undue burden on CASA in administering applicable airworthiness requirements.

Source FARs section 21.43 modified.

21.047 Transfer of type certificates

- (1) The holder of a type certificate (the **transferor**) may transfer the certificate to another person (the **transferee**) by giving to the transferee:
- (a) the certificate; and
 - (b) a copy of each document that the transferor is required to keep under these Regulations in relation to the certificate.
- (2) However, the certificate may be transferred only with the written consent of the transferee.
- (3) The transferor commits an offence if the transferor does not, within 30 days after transferring the certificate, give CASA a written notice stating:
- (a) the date of the transfer; and
 - (b) the name and address of the transferee.

Penalty: 50 penalty units.

- (4) An offence against this regulation is an offence of strict liability.

Source FARs section 21.047 modified.

21.048 Licensing of type certificates

- (1) The holder of a type certificate (the **licensor**) may confer the benefits of the certificate on another person (the **licensee**) by making a licensing agreement with the licensee.
- (2) The licensor commits an offence if the licensor does not, within 30 days after making the licensing agreement, give CASA a written notice stating:
- (a) the date of the licensing agreement; and
 - (b) the name and address of the licensee; and

Regulation 21.049

(c) the benefits conferred on the licensee.

Penalty: 50 penalty units.

- (3) The licensor commits an offence if:
- (a) the licensing agreement is terminated; and
 - (b) the licensor does not, within 30 days after the termination, give CASA a written notice stating the date of the termination.

Penalty: 50 penalty units.

- (4) An offence against this regulation is an offence of strict liability.

Source FARs section 21.047 modified.

21.049 Availability

- (1) The holder of a type certificate must make the certificate, and the type design of the aircraft, aircraft engine or propeller described or identified in the certificate, available for examination by CASA upon the request of CASA.

Penalty: 5 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

Source FARs section 21.49 modified.

21.050 Instructions for continued airworthiness and manufacturer's maintenance manuals having airworthiness limitations sections

- (1) The holder of a type certificate for an aircraft for which an aircraft Maintenance Manual containing an "Airworthiness Limitations" section has been approved as part of the type design and who obtains approval of changes to any replacement time, inspection interval, or related procedure in that section of the manual must make particulars of the changes available upon request to any operator of the same type of aircraft.

Penalty: 5 penalty units.

- (2) The holder of a design approval, including either the type certificate or supplemental type certificate for an aircraft, aircraft engine, or propeller must furnish at least one set of complete Instructions for Continued Airworthiness, prepared in accordance with the applicable airworthiness standards mentioned in Parts 22, 23, 25, 27, 26, 29, 31, 32, 33 and 35, and the airworthiness standards prescribed by the Part 21 Manual of Standards, or as specified in the applicable airworthiness criteria for special classes of aircraft mentioned in subregulation 21.017(2), as applicable, to the owner of each type of aircraft, aircraft engine, or propeller upon its delivery, or upon issue of the first standard certificate of airworthiness for the affected aircraft, whichever occurs later, and thereafter, on request by a person required by these Regulations to comply with any of the terms of the instructions, give them to the person. In addition, changes

to the Instructions for Continued Airworthiness shall be made available to any person who requests the changes and who is required by these Regulations to comply with any of those instructions.

Penalty: 5 penalty units.

- (3) An offence against subregulation (1) or (2) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

Source FARs section 21.50 modified.

21.051 Type certificates and type acceptance certificates—duration and suspension or cancellation

- (1) Subject to regulation 21.019, a type certificate or type acceptance certificate remains in force until it is cancelled.
- (2) Despite subregulation (1), a type certificate or type acceptance certificate is not in force during any period of suspension.
- (3) CASA may suspend or cancel a type certificate if there are reasonable grounds for believing that the type certificate no longer provides a reliable guide that the aircraft can reasonably be expected to be safe for its intended use when operated under any conditions limiting its intended use.
- (4) CASA may suspend or cancel a type acceptance certificate if:
- (a) there are reasonable grounds for believing that not doing so would constitute a significant threat to aviation safety; and
 - (b) CASA has consulted the operator of the aircraft, the manufacturer of the aircraft and the national aviation authority that issued the foreign type certificate about the safety issues involved; and
 - (c) CASA has considered the views of the operator, the manufacturer and the national aviation authority before deciding whether to suspend or cancel the type acceptance certificate.
- (5) If CASA suspends or cancels a type certificate it must:
- (a) notify the certificate holder in writing of the suspension or cancellation; and
 - (b) publish a notice of the suspension or cancellation, in accordance with subregulation (8), in the *Gazette*.
- (6) If CASA suspends or cancels a type acceptance certificate CASA must publish a notice of the suspension or cancellation, in accordance with subregulation (8), in the *Gazette*.
- (7) A suspension or cancellation takes effect on the day after the notice is published in the *Gazette*.
- (8) A notice of suspension or cancellation under paragraph (5)(b) or subregulation (6) must set out:
- (a) the grounds for the suspension or cancellation; and

Regulation 21.053

- (b) when the suspension or cancellation takes effect; and
- (c) in the case of a suspension—when the suspension stops having effect.

Source FARs section 21.51 modified.

Note 1: The power of CASA to suspend or cancel a type acceptance certificate under subregulation (4) must be exercised by the Director personally: see paragraph 11.260(2)(d).

Note 2: See also regulations 21.002C and 21.002E in relation to suspension and cancellation of type acceptance certificates.

21.053 Statement of conformity

- (1) Each applicant must submit to CASA a statement of conformity in a manner and form acceptable to CASA for each aircraft engine and propeller presented to CASA for type certification. This statement of conformity must include a statement that the aircraft engine or propeller conforms to the type design therefor.
- (2) Each applicant must submit to CASA a statement of conformity for each aircraft or part thereof presented to CASA for tests. This statement of conformity must include a statement to the effect that the applicant has complied with subregulation 21.033(1).

Source FARs section 21.53 modified.

Subpart 21.C—Provisional type certificates

Note: A provisional type certificate issued under this Part for an aircraft, aircraft engine or propeller does not certify that it complies with the *Air Navigation (Aircraft Noise) Regulations 2018*, the *Air Navigation (Aircraft Engine Emissions) Regulations* or any other applicable Commonwealth legislation. Compliance with those Regulations or other applicable Commonwealth legislation may be required before the aircraft, aircraft engine or propeller may be legally operated.

21.071 Applicability

This Subpart prescribes:

- (a) requirements for the issue of provisional type certificates, approvals of amendments to provisional type certificates, and approvals of provisional amendments to type certificates; and
- (b) rules governing the holders of those certificates.

Source FARs section 21.71 modified.

21.073 Eligibility

- (1) A manufacturer of aircraft manufactured in Australian territory is eligible to apply for a Class I or Class II provisional type certificate for the aircraft, for approval of an amendment to a Class I or Class II provisional type certificate held by the manufacturer, and for approval of a provisional amendment to a type certificate held by the manufacturer.
- (2) Any manufacturer of aircraft manufactured in a foreign country with which Australia has an agreement for the acceptance of those aircraft for export and import is eligible to apply for a Class II provisional type certificate, for approval of amendments to Class II provisional type certificates held by the manufacturer, and for approval of provisional amendments to type certificates held by the manufacturer.
- (3) An aircraft engine manufacturer who has altered a type certificated aircraft by installing different type certificated aircraft engines manufactured by the manufacturer in Australian territory is eligible to apply for a Class I provisional type certificate for the aircraft, and for approval of amendments to Class I provisional type certificates held by the manufacturer, if the basic aircraft, before alteration, was type certificated in the normal, utility, acrobatic, commuter, primary, intermediate, restricted or transport category.

Source FARs section 21.73 modified.

21.075 Application

Applications for provisional type certificates, for approval of amendments thereto, and for approval of provisional amendments to type certificates must be submitted in writing to CASA, and must be accompanied by the pertinent information specified in this Subpart.

Regulation 21.076

Source FARs section 21.75 modified.

21.076 Issue of provisional type certificate

Subject to regulation 11.055, CASA must issue a provisional type certificate, or an approval of amendments to a provisional type certificate, or an approval of provisional amendments to a type certificate, to an applicant for the certificate or approval if the applicant:

- (a) is eligible, under regulation 21.073, to apply for the certificate or approval; and
- (b) applies for the certificate or approval in accordance with this Subpart; and
- (c) is entitled, under this Subpart, to the certificate or approval; and
- (d) otherwise complies with this Part.

21.077 Duration

- (1) Unless sooner superseded or cancelled, provisional type certificates and amendments thereto are effective for the periods specified in this regulation.
- (2) A Class I provisional type certificate is effective for 24 months after the date of issue.
- (3) A Class II provisional type certificate is effective for 12 months after the date of issue.
- (4) An amendment to a Class I or Class II provisional type certificate is effective for the duration of the amended certificate.
- (5) A provisional amendment to a type certificate is effective for 6 months after its approval or until the amendment of the type certificate is approved, whichever is first.

Source FARs section 21.77 modified.

21.078 Suspension and cancellation

- (1) CASA may suspend or cancel a provisional type certificate by written notice given to its holder if CASA considers that it is necessary to do so in the interests of aviation safety.
- (2) A notice must set out:
 - (a) the grounds for the suspension or cancellation; and
 - (b) in the case of a suspension—when the suspension stops having effect.
- (3) Despite regulation 21.077, a provisional type certificate is not effective while it is suspended but the suspension period counts as part of a period mentioned in subregulation 21.077(2) or (3).

Note: See also regulations 21.002C and 21.002E in relation to suspension and cancellation of provisional type certificates.

21.081 Requirements for issue and amendment of Class I provisional type certificates

- (1) An applicant for a type certificate or a supplemental type certificate is entitled to the issue of a Class I provisional type certificate, or an approval of an amendment of a Class I provisional type certificate, if the applicant shows compliance with this regulation and CASA is satisfied that the relevant aircraft can reasonably be expected to be safe for its intended use when operated in accordance with the requirements and limitations:
 - (a) established by the applicant under subregulation (4); and
 - (b) under Division 91.T.3.
- (2) The applicant must certify that:
 - (a) the aircraft has been designed and constructed in accordance with the airworthiness requirements applicable to the issue of the type certificate or supplemental type certificate applied for; and
 - (b) the aircraft substantially meets the applicable flight characteristic requirements for the type certificate or supplemental type certificate applied for; and
 - (c) the aircraft can be operated safely under the appropriate operating limitations specified in subregulation (1).
- (3) The applicant must submit a report to CASA showing that the aircraft had been flown in all manoeuvres necessary to show compliance with the flight requirements for the issue of the type certificate or supplemental type certificate applied for, and to establish that the aircraft can be operated safely in accordance with the limitations contained in these Regulations.
- (4) The applicant must establish all limitations required for the issue of the type certificate or supplemental type certificate applied for, including limitations on weights, speeds, flight manoeuvres, loading, and operation of controls and equipment unless, for each limitation not established, appropriate operating restrictions are established for the aircraft.
- (5) The applicant must establish an inspection and maintenance program for the continued airworthiness of the aircraft.
- (6) The applicant must show CASA that a prototype aircraft has been flown for at least 50 hours under an experimental certificate or under the auspices of the Defence Force, or an armed force of Canada, the United Kingdom or the United States of America. However, in the case of an approval of an amendment to a provisional type certificate, CASA may reduce the number of required flight hours.

Source FARs section 21.81 modified.

Regulation 21.083

21.083 Requirements for issue and amendment of Class II provisional type certificates

- (1) An applicant who manufactures an aircraft within Australian territory, and who applies for a type certificate for the aircraft in the transport category, is entitled to the issue of a Class II provisional type certificate, or an approval of an amendment to a Class II provisional type certificate, if the applicant shows compliance with this regulation and CASA is satisfied that the aircraft can reasonably be expected to be safe for its intended use when operated in accordance with the requirements and limitations:
 - (a) set out in the provisional aircraft flight manual (if any) required by subregulation (7); and
 - (b) under Division 91.T.3.
- (2) An applicant who manufactures an aircraft in a country with which Australia has an agreement for the acceptance of those aircraft for export and import, and who applies for a type certificate for the aircraft in the transport category, is entitled to the issue of a Class II provisional type certificate, or an approval of an amendment to a Class II provisional type certificate, if the national aviation authority of the country in which the aircraft was manufactured certifies that the applicant has shown compliance with this regulation and that the aircraft meets the requirements of subregulation (5) and CASA is satisfied that the aircraft can reasonably be expected to be safe for its intended use when operated in accordance with the limitations:
 - (a) in the provisional aircraft flight manual (if any) required by subregulation (7); and
 - (b) in regulation 262AO of CAR.
- (3) The applicant must hold a type certificate for at least one other aircraft in the same transport category as the subject aircraft.
- (4) The flight test program to be carried out for the purposes of the type certificate or the flight test program conducted by the authorities of the country in which the aircraft was manufactured, with respect to the issue of a type certificate for that aircraft, must be in progress.
- (5) The applicant or, in the case of a foreign manufactured aircraft, the national aviation authority of the country in which the aircraft was manufactured, must certify that:
 - (a) the aircraft has been designed and constructed in accordance with the airworthiness requirements applicable to the issue of the type certificate applied for; and
 - (b) the aircraft substantially complies with the applicable flight characteristic requirements for the type certificate applied for; and
 - (c) the aircraft can be operated safely under the appropriate operating limitations in these Regulations.
- (6) The applicant must submit a report to CASA showing that the aircraft has been flown in all manoeuvres necessary to show compliance with the flight

Regulation 21.085

requirements for the issue of the type certificate and to establish that the aircraft can be operated safely in accordance with the limitations in these Regulations.

- (7) The applicant must prepare a provisional aircraft flight manual containing all limitations required for the issue of the type certificate applied for, including limitations on weights, speeds, flight manoeuvres, loading, and operation of controls and equipment unless, for each limitation not established, appropriate operating restrictions are established for the aircraft.
- (8) The applicant must establish an inspection and maintenance program for the continued airworthiness of the aircraft.
- (9) The applicant must show CASA that a prototype aircraft has been flown for at least 100 hours. In the case of an approval of an amendment to a provisional type certificate, CASA may reduce the number of required flight hours.

Source FARs section 21.83 modified.

21.085 Provisional amendments to type certificates

- (1) An applicant who manufactures an aircraft within Australian territory, and who applies for an amendment to the type certificate for the aircraft, is entitled to a provisional amendment to the type certificate if the applicant shows compliance with this regulation and CASA is satisfied that the aircraft can reasonably be expected to be safe for its intended use when operated under the appropriate limitations contained in these Regulations.
- (2) An applicant who manufactures an aircraft in a foreign country with which Australia has an agreement for the acceptance of those aircraft for export and import, and who applies for an amendment to the type certificate for the aircraft, is entitled to a provisional amendment to the type certificate if the national aviation authority of the country in which the aircraft was manufactured certifies that the applicant has shown compliance with this regulation and that the aircraft meets the requirements mentioned in subregulation (4) and CASA is satisfied that the aircraft can reasonably be expected to be safe for its intended use when operated under the appropriate limitations contained in these Regulations.
- (3) The flight test program approved by CASA, or conducted under the agreement by the authorities of the country in which the aircraft was manufactured, with respect to the amendment of the type certificate, must be in progress.
- (4) The applicant or, in the case of foreign manufactured aircraft, the national aviation authority of the country in which the aircraft was manufactured, must certify that:
 - (a) the modification involved in the amendment to the type certificate has been designed and constructed in accordance with the airworthiness requirements applicable to the issue of the type certificate for the aircraft; and
 - (b) the aircraft incorporating the modification substantially complies with the applicable flight characteristic requirements for the type certificate; and

Regulation 21.085

- (c) the aircraft can be operated safely under the appropriate operating limitations in these Regulations.
- (5) The applicant must submit a report to CASA showing that the aircraft incorporating the modifications involved has been flown in all manoeuvres necessary to show compliance with the flight requirements applicable to those modifications and to establish that the aircraft can be operated safely in accordance with the requirements and limitations under Division 91.T.3.
- (6) The applicant must establish and publish, in a provisional aircraft flight manual or other document and on appropriate placards, all limitations required for the issue of the type certificate applied for, including weight, speed, flight manoeuvres, loading, and operation of controls and equipment, unless, for each limitation not established, appropriate operating restrictions are established for the aircraft.
- (7) The applicant must establish an inspection and maintenance program for the continued airworthiness of the aircraft.
- (8) The applicant must operate a prototype aircraft, modified in accordance with the corresponding amendment to the type certificate, for the number of hours found necessary by CASA in the particular case.

Source FARs section 21.85 modified.

Subpart 21.D—Changes to type certificates

21.091 Applicability

This Subpart deals with the approval of changes to type certificates.

Source FARs section 21.91 modified.

21.093 Classification of changes in type design

Changes in type design are classified as minor or major. A **minor change** is one that has no appreciable effect on the weight, balance, structural strength, reliability, operational characteristics, or other characteristics affecting the airworthiness of an aircraft, aircraft engine or propeller. All other changes are **major changes**.

Source FARs section 21.93 modified.

21.095 Approval of minor changes in type design

- (1) The holder of a type certificate for an aircraft, aircraft engine or propeller may apply to CASA, an authorised person or a relevant approved design organisation, in writing, for approval of a minor change in the type design of the aircraft, aircraft engine or propeller.
- (2) Subregulation (3) applies if the application is made to CASA or an authorised person.
- (3) Subject to regulation 11.055, CASA or the authorised person must grant the approval if the type design, as modified by the minor change, would meet the requirements of this Part for the type design.
- (4) Subregulation (5) applies if, under regulation 21.251, CASA authorises a relevant approved design organisation to determine whether the design would meet a requirement.
- (5) If the approved design organisation is satisfied that the design would meet the requirement, the organisation may give CASA a certificate to that effect.
- (6) For subregulation (3), if an approved design organisation gives CASA a certificate under subregulation (5), CASA need consider only that certificate in deciding whether the design would meet the requirement.
- (7) Subregulation (8) applies if the application is made to an approved design organisation.
- (8) Subject to regulation 11.055, the approved design organisation must grant the approval if the type design, as modified by the minor change, would meet:
 - (a) the requirements of this Part for the type design; and
 - (b) any requirements mentioned in the organisation's exposition.

Regulation 21.097

21.097 Eligibility for approval of major changes in type design

- (1) The holder of a type certificate for an aircraft, aircraft engine or propeller is eligible to apply to CASA, an authorised person or a relevant approved design organisation, in writing, for approval of a major change in the type design of the aircraft, aircraft engine or propeller.
- (2) An applicant is entitled to the approval if the applicant:
 - (a) submits with the application substantiating data and necessary descriptive data for inclusion in the type design; and
 - (b) complies with regulation 21.101.
- (3) Approval of a major change in the type design of an aircraft engine is limited to the specific engine configuration upon which the change is made unless the applicant identifies in the necessary descriptive data for inclusion in the type design the other configurations of the same engine type for which approval is requested and shows that the change is compatible with the other configurations.

Source FARs section 21.97 modified.

21.098 Issue of approval of major change in type design

- (1) Subject to regulation 11.055, CASA, an authorised person or an approved design organisation must approve a major change in the type design of an aircraft, aircraft engine or propeller if the applicant for the approval:
 - (a) is eligible, under subregulation 21.097(1), to apply for the approval; and
 - (b) applies for the approval in accordance with this Subpart; and
 - (c) is entitled, under this Subpart, to the approval; and
 - (d) otherwise complies with this Part.
- (2) Subregulation (3) applies if, under regulation 21.251, CASA authorises a relevant approved design organisation to determine whether the applicant meets a requirement mentioned in subregulation (1).
- (3) If the approved design organisation is satisfied that the applicant meets the requirement, the organisation may give CASA a certificate to that effect.
- (4) For subregulation (1), if an approved design organisation gives CASA a certificate under subregulation (3), CASA need consider only that certificate in deciding whether the applicant meets the requirement.

21.099 Required design changes

- (1) If an airworthiness directive is issued for an aircraft, aircraft engine or propeller, and CASA considers that design changes are necessary to correct the unsafe condition of the aircraft, aircraft engine or propeller, the holder of the type certificate for the aircraft, aircraft engine or propeller must, on CASA's request, submit appropriate design changes for approval.

Penalty: 50 penalty units.

- (1A) If approval is granted for design changes mentioned in subregulation (1), the holder of the type certificate for the aircraft, aircraft engine or propeller must, on request by the operator of an affected aircraft, aircraft engine or propeller previously certificated under the type certificate, give to that operator the descriptive data covering the design changes.

Penalty: 50 penalty units.

- (2) In a case where there are no current unsafe conditions, but CASA or the holder of the type certificate is satisfied through service experience that changes in type design will contribute to the safety of the aircraft, aircraft engine or propeller, the holder of the type certificate may submit appropriate design changes for approval. Upon approval of the changes, and on request by an operator of the same type of aircraft, aircraft engine or propeller, the manufacturer must give information on the design changes to the operator.

Penalty: 5 penalty units.

- (3) An offence against subregulation (1), (1A) or (2) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

Source FARs section 21.99 modified.

21.101 Designation of applicable regulations

- (1) An applicant for approval of a change in the type design described or identified in a type certificate must comply with either:
- (a) the airworthiness standards mentioned in the type certificate; or
 - (b) the applicable airworthiness standards in effect on the date of the application, plus any other amendments that CASA is satisfied are directly related.
- (2) If CASA is satisfied that a proposed change consists of a new design or a substantially complete redesign of a component, equipment installation, or system installation, and that the airworthiness standards mentioned in the type certificate for the aircraft, aircraft engine or propeller do not provide adequate standards with respect to the proposed change, the applicant must comply with:
- (a) the applicable provisions of these Regulations, in effect on the date of the application for the change, that CASA is satisfied are necessary to provide a level of safety equivalent to that established by the airworthiness standards mentioned in the type certificate; and
 - (b) any special conditions, and amendments to those special conditions, prescribed by CASA to provide a level of safety equal to that established by the airworthiness standards mentioned in the type certificate.
- (3) Unless otherwise required by subregulation 21.019(1), an applicant for a change to a type certificate for a transport category aeroplane involving the replacement of reciprocating engines with the same number of turbopropeller powerplants must comply with the provisions of Part 25 of the FARs for the aeroplane as type certificated with reciprocating engines, and with the following:

Regulation 21.101

- (a) the certification performance requirements prescribed in sections 25.101 to 25.125 (inclusive) and 25.149, 25.1533, 25.1583, and 25.1587 of Part 25 of the FARs;
 - (b) the powerplant requirements of Part 25 of the FARs that apply to turbopropeller engine-powered aeroplanes;
 - (c) the requirements of Part 25 of the FARs for the standardisation of cockpit controls and instruments, unless CASA is satisfied that compliance with a particular detailed requirement would be impractical and would not contribute materially to standardisation;
 - (d) any other requirement of Part 25 of the FARs that applies to turbopropeller engine-powered aeroplanes that CASA is satisfied relates to the changes in engines and that is necessary to ensure a level of safety equal to that of the aeroplane certificated with reciprocating engines.
- (4) For subregulation (3), for each new limitation established with respect to weight, speed, or altitude that is significantly altered from those approved for the aeroplane with reciprocating engines, the applicant must show compliance with the requirements of Part 25 of the FARs applicable to the limitations being changed.

Source FARs section 21.101 modified.

Subpart 21.E—Supplemental type certificates

Note: A supplemental type certificate issued under this Part for an aircraft, aircraft engine or propeller does not certify that it complies with the *Air Navigation (Aircraft Noise) Regulations 2018*, the *Air Navigation (Aircraft Engine Emissions) Regulations* or any other applicable Commonwealth legislation. Compliance with those Regulations or other applicable Commonwealth legislation may be required before the aircraft, aircraft engine or propeller may be legally operated.

21.111 Applicability

This Subpart prescribes requirements for the issue of supplemental type certificates.

Source FARs section 21.111 modified.

21.113 Eligibility for supplemental type certificate

- (1) Any person is eligible to apply to CASA for a supplemental type certificate for the approval of the design of a major change to a type certificated aircraft, aircraft engine or propeller, if the change is not great enough to require an application for a new type certificate under regulation 21.019.
- (2) The holder of the type certificate for the aircraft, aircraft engine or propeller may apply for amendment of the type certificate instead of applying for a supplemental type certificate.

Source FARs section 21.113 modified.

21.113A Issue of supplemental type certificate

Subject to regulation 11.055, CASA must issue a supplemental type certificate to an applicant for the certificate if the applicant:

- (a) is eligible, under regulation 21.113, to apply for the certificate; and
- (b) applies for the certificate in accordance with this Subpart; and
- (c) is entitled, under this Subpart, to the certificate; and
- (d) otherwise complies with this Part.

21.114 Foreign supplemental type certificates

A certificate (however described) for an aircraft, aircraft engine or propeller that is issued by or for the national aviation authority of a recognised country and is equivalent to a supplemental type certificate that could have been issued by CASA (a *foreign supplemental type certificate*) is taken to have been issued by CASA for these Regulations.

Regulation 21.115

21.115 Entitlement to supplemental type certificate—meeting applicable airworthiness requirements

- (1) An applicant is entitled to a supplemental type certificate if CASA is satisfied that:
 - (a) either:
 - (i) the altered aircraft, aircraft engine or propeller complies with the applicable airworthiness requirements mentioned in subregulations 21.101(1) and (2); or
 - (ii) the altered aircraft, aircraft engine or propeller does not comply with the applicable airworthiness requirements mentioned in subregulations 21.101(1) and (2), but the non-compliance is compensated for by factors that provide an equivalent level of safety; and
 - (b) no feature or characteristic of the change in type design makes the altered aircraft, aircraft engine or propeller unsafe for its intended use.
- (2) Subregulation (3) applies if, under regulation 21.251, CASA authorises a relevant approved design organisation to determine whether the altered aircraft, aircraft engine or propeller meets:
 - (a) an applicable airworthiness requirement mentioned in subparagraph (1)(a)(i); or
 - (b) the requirement mentioned in paragraph (1)(b).
- (3) If the approved design organisation is satisfied that the altered aircraft, aircraft engine or propeller meets the requirement, the organisation may give CASA a certificate to that effect.
- (4) For subregulation (1), if an approved design organisation gives CASA a certificate under subregulation (3), CASA need consider only that certificate in deciding whether the altered aircraft, aircraft engine or propeller meets the requirement.
- (5) Regulations 21.033 (Inspection and tests) and 21.053 (Statement of conformity) apply in relation to the application, with respect to each change in the type design, as if it were an application for a type certificate under Subpart 21.B.

Source FARs section 21.115 modified.

21.117 What supplemental type certificates are taken to consist of

A supplemental type certificate is taken to consist of:

- (a) the type certificate or type acceptance certificate previously issued for the aircraft, aircraft engine or propeller; and
- (b) each change in the type design of the aircraft, aircraft engine or propeller described or identified in the supplemental type certificate.

Source FARs section 21.117 modified.

21.118 Duration, suspension and cancellation of supplemental type certificates

- (1) A supplemental type certificate for an aircraft, aircraft engine or propeller remains in force until it is cancelled or the type certificate previously issued for the aircraft, aircraft engine or propeller is cancelled, whichever happens first.
- (2) Despite subregulation (1), a supplemental type certificate for an aircraft, aircraft engine or propeller is not in force during any period of suspension or any period of suspension of the type certificate previously issued for the aircraft, aircraft engine or propeller.
- (3) CASA may suspend or cancel a supplemental type certificate by written notice given to its holder if CASA considers that it is necessary to do so in the interests of aviation safety.
- (4) If CASA suspends or cancels a supplemental type certificate it must publish a notice of the suspension or cancellation in the *Gazette*.
- (5) A suspension or cancellation takes effect on the day after the notice is published in the *Gazette*.
- (6) A notice under subregulation (3) or (4) must set out:
 - (a) the grounds for the suspension or cancellation; and
 - (b) when the suspension or cancellation takes effect; and
 - (c) in the case of a suspension—when the suspension stops having effect.

Note: See also regulations 21.002C and 21.002E in relation to suspension and cancellation of supplemental type certificates.

21.119 Duration, suspension and cancellation of foreign supplemental type certificates

- (1) A foreign supplemental type certificate for an aircraft, aircraft engine or propeller remains in force until it is cancelled by CASA or the national aviation authority of the relevant recognised country.
- (2) Despite subregulation (1), a foreign supplemental type certificate for an aircraft, aircraft engine or propeller is not in force during any period of suspension or any period of suspension of the type certificate previously issued for the aircraft, aircraft engine or propeller.
- (3) CASA may suspend or cancel a foreign supplemental type certificate if CASA considers that it is necessary to do so in the interests of aviation safety.
- (4) If CASA suspends or cancels a foreign supplemental type certificate it must publish a notice of the suspension or cancellation in the *Gazette*.
- (5) A suspension or cancellation takes effect on the day after the notice is published in the *Gazette*.
- (6) A notice must set out:
 - (a) the grounds for the suspension or cancellation; and

Regulation 21.120

- (b) when the suspension or cancellation takes effect; and
- (c) in the case of a suspension—when the suspension stops having effect.

Note: See also regulations 21.002C and 21.002E in relation to suspension and cancellation of foreign supplemental type certificates.

21.120 Transfer of supplemental type certificates

- (1) The holder of a supplemental type certificate (the *transferor*) may transfer the certificate to another person (the *transferee*) by giving to the transferee:
 - (a) the certificate; and
 - (b) a copy of each document that the transferor is required to keep under these Regulations in relation to the certificate.
- (2) However, the certificate may be transferred only with the written consent of the transferee.
- (3) The transferor commits an offence if the transferor does not, within 30 days after transferring the certificate, give CASA a written notice stating:
 - (a) the date of the transfer; and
 - (b) the name and address of the transferee.

Penalty: 50 penalty units.

- (4) An offence against this regulation is an offence of strict liability.

21.120A Licensing of supplemental type certificates

- (1) The holder of a supplemental type certificate (the *licensor*) may confer the benefits of the certificate on another person (the *licensee*) by making a licensing agreement with the licensee.
- (2) The licensor commits an offence if the licensor does not, within 30 days after making the licensing agreement, give CASA a written notice stating:
 - (a) the date of the licensing agreement; and
 - (b) the name and address of the licensee; and
 - (c) the benefits conferred on the licensee.

Penalty: 50 penalty units.

- (3) The licensor commits an offence if:
 - (a) the licensing agreement is terminated; and
 - (b) the licensor does not, within 30 days after the termination, give CASA a written notice stating the date of the termination.

Penalty: 50 penalty units.

- (4) An offence against this regulation is an offence of strict liability.

21.120B Variations of supplemental type certificates

- (1) The holder of a supplemental type certificate for an aircraft, aircraft engine or propeller may apply, in writing, for a variation of the certificate for the approval of the design of a change to the aircraft, aircraft engine or propeller.
 - (2) The application may be made to:
 - (a) CASA; or
 - (b) an authorised person; or
 - (c) a relevant approved design organisation.
 - (3) Subject to regulation 11.055, if the application is made to CASA, CASA must vary the certificate if satisfied that:
 - (a) either:
 - (i) the altered aircraft, aircraft engine or propeller complies with the applicable airworthiness requirements mentioned in subregulations 21.101(1) and (2); or
 - (ii) the altered aircraft, aircraft engine or propeller does not comply with the applicable airworthiness requirements mentioned in subregulations 21.101(1) and (2), but the non-compliance is compensated for by factors that provide an equivalent level of safety; and
 - (b) no feature or characteristic of the change makes the altered aircraft, aircraft engine or propeller unsafe for its intended use.
 - (4) Subject to regulation 11.055, if the application is made to an authorised person or approved design organisation, the authorised person or approved design organisation must vary the certificate if satisfied that:
 - (a) the altered aircraft, aircraft engine or propeller complies with the applicable airworthiness requirements mentioned in subregulations 21.101(1) and (2); and
 - (b) no feature or characteristic of the change makes the altered aircraft, aircraft engine or propeller unsafe for its intended use.
 - (5) Subregulation (6) applies if, under regulation 21.251, CASA authorises a relevant approved design organisation to determine whether an altered aircraft, aircraft engine or propeller meets:
 - (a) an applicable airworthiness requirement mentioned in subparagraph (3)(a)(i); or
 - (b) the requirement mentioned in paragraph (3)(b).
 - (6) If the approved design organisation is satisfied that the altered aircraft, aircraft engine or propeller meets the requirement, the organisation may give CASA a certificate to that effect.
 - (7) For subregulation (3), if an approved design organisation gives CASA a certificate under subregulation (6), CASA need consider only that certificate in deciding whether the altered aircraft, aircraft engine or propeller meets the requirement.
-

Regulation 21.120B

- (8) Regulations 21.033 (Inspection and tests) and 21.053 (Statement of conformity) apply in relation to the application, with respect to each change, as if:
- (a) the application were an application for a type certificate under Subpart 21.B; and
 - (b) each reference to CASA in those regulations were a reference to the person or organisation to whom the application was made.

Subpart 21.F—Production under type certificate only

21.121 Applicability

- (1) This Subpart prescribes rules for the production of an aircraft, aircraft engine or propeller under a type certificate only.
- (2) For this Subpart, a person manufactures an aircraft, aircraft engine or propeller under a type certificate only if the person is the holder, or licensee, of a type certificate, but not a production certificate, for the aircraft, aircraft engine or propeller.

Source FARs section 21.121 modified.

Note: Subpart 21.G deals with production certificates.

21.123 Production under type certificate

- (1) Each manufacturer of an aircraft, aircraft engine or propeller being manufactured under a type certificate only must:
 - (a) make each aircraft, aircraft engine or propeller available for inspection by CASA; and
 - (b) maintain at the place of manufacture the technical data and drawings necessary for CASA to determine whether the aircraft, aircraft engine or propeller and its parts conform to the type design; and
 - (c) establish and maintain an approved production inspection system that:
 - (i) meets the requirements of subregulation 21.125(2); and
 - (ii) ensures that each aircraft, aircraft engine or propeller manufactured under the type certificate more than 6 months after it was issued conforms to the type design and is in a condition for safe operation; and
 - (d) upon the establishment of the approved production inspection system—submit to CASA a manual that describes the system and the means for meeting the requirements of subregulation 21.125(2).

Penalty: 25 penalty units.

- (1A) An offence against subregulation (1) is an offence of strict liability.

Note: For **strict liability**, see section 6.1 of the *Criminal Code*.

- (2) Each manufacturer may apply to CASA for an extension of the period of 6 months mentioned in subparagraph (1)(c)(ii).
- (3) CASA may extend the period in a particular case if unusual or extenuating circumstances prevent the manufacturer from establishing an approved production inspection system within 6 months after the issue of the type certificate.

Source FARs section 21.123 modified.

Regulation 21.125

21.125 Production inspection system: Materials Review Board

- (1) Each manufacturer required to establish a production inspection system under paragraph 21.123(1)(c) must:
 - (a) establish a Materials Review Board (to include representatives from the manufacturer's inspection and engineering departments) and materials review procedures; and
 - (b) maintain complete records of Materials Review Board action for at least two years after the action was taken.

Penalty: 50 penalty units.

- (1A) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (2) The production inspection system must provide for the following:
 - (a) ensuring that incoming materials, and bought or subcontracted parts, used in the finished aircraft, aircraft engine or propeller comply with the technical data for the type design, or are suitable equivalents;
 - (b) properly identifying incoming materials, and bought or subcontracted parts, if their physical or chemical properties cannot be readily and accurately determined;
 - (c) suitable storage and adequate protection of materials subject to damage and deterioration;
 - (d) carrying out processes affecting the quality and safety of the finished aircraft, aircraft engine or propeller in accordance with acceptable industry or Australian specifications;
 - (e) inspecting parts and components during production for conformity with the technical data for the type design at points in the process where accurate determinations can be made;
 - (f) ensuring that current design drawings are readily available to manufacturing and inspection personnel, and used when necessary;
 - (g) ensuring that design changes, including material substitutions, are controlled before being incorporated in a finished aircraft, aircraft engine or propeller;
 - (h) segregating, identifying, marking and disposing of rejected materials and parts in a manner that precludes installation in the finished aircraft, aircraft engine or propeller;
 - (i) a system for processing through the Materials Review Board any materials and parts that are withheld because of departures from the technical data for the type design, and that are to be considered for installation in a finished aircraft, aircraft engine or propeller;
 - (j) a system for identifying and reinspecting materials and parts determined by the Materials Review Board to be serviceable if rework or repair is necessary;
 - (k) maintaining inspection records, identified with the finished aircraft, aircraft engine or propeller where practicable, and retaining them for at least 2 years.

Source FARs section 21.125 modified.

21.127 Tests: aircraft

- (1) Each person manufacturing aircraft under a type certificate only must establish an approved production flight test procedure and flight check-off form, and in accordance with that form, flight test each aircraft produced.

Penalty: 25 penalty units.

- (1A) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (2) Each production flight test procedure must include the following:
 - (a) an operational check of the trim, controllability, or other flight characteristics to establish that the production aircraft has the same range and degree of control as the prototype aircraft;
 - (b) an operational check of each part or system operated by the crew while in flight to establish that, during flight, instrument readings are within normal range;
 - (c) a determination that all instruments are properly marked, and that all placards and required flight manuals are installed after flight test;
 - (d) a check of the operational characteristics of the aircraft on the ground;
 - (e) a check on any other items peculiar to the aircraft being tested that can best be done during the ground or flight operation of the aircraft.

Source FARs section 21.127 modified.

21.128 Tests: aircraft engines

- (1) Each person manufacturing aircraft engines that are not rocket engines under a type certificate only must subject each engine to an acceptable test run that includes the following:
 - (a) break-in runs that include a determination of fuel and oil consumption and a determination of power characteristics at rated maximum continuous power or thrust and, if applicable, at rated take-off power or thrust;
 - (b) at least five hours of operation at rated maximum continuous power or thrust, including, for engines having a rated take-off power or thrust higher than rated maximum continuous power or thrust, 30 minutes at rated take-off power or thrust.

Penalty: 25 penalty units.

- (2) The test runs required by subregulation (1) may be made with the engine appropriately mounted and using current types of power and thrust measuring equipment.
- (3) A person manufacturing rocket engines under a type certificate only must establish a sampling technique for testing the engines.

Penalty: 25 penalty units.

Regulation 21.129

- (4) An offence against subregulation (1) or (3) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

Source FARs section 21.128 modified.

21.129 Tests: variable pitch propellers

- (1) Each person manufacturing variable pitch propellers under a type certificate only must give each propeller an acceptable functional test to determine if it operates properly throughout the normal range of operation.

Penalty: 25 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

Source FARs section 21.129 modified.

21.130 Statement of conformity

- (1) Each holder or licensee of a type certificate for a type of aircraft, aircraft engine or propeller must give CASA a statement of conformity, in a form acceptable to CASA, for each aircraft, aircraft engine or propeller manufactured under the type certificate only:

- (a) when the holder or licensee applies for the original issue of an aircraft certificate of airworthiness or an aircraft engine or propeller authorised release certificate for the aircraft, aircraft engine or propeller; or
- (b) if the holder or licensee transfers the ownership of the aircraft, aircraft engine or propeller without applying for an authorised release certificate for it—when the ownership of the aircraft, aircraft engine or propeller is transferred.

- (2) The statement of conformity must be signed by a person who holds a responsible position in the manufacturing organisation and has been authorised by the manufacturer to sign the statement, and must include:

- (a) for each aircraft, aircraft engine or propeller, a statement that it conforms to its type certificate and is in a condition for safe operation; and
- (b) for each aircraft, a statement that the aircraft has been flight checked; and
- (c) for each aircraft engine or variable pitch propeller, a statement that the engine or propeller has been subjected by the manufacturer to a final operational check.

- (3) However, in the case of an aircraft, aircraft engine or propeller manufactured for the Defence Force, or for an armed force of Canada, the United Kingdom or the United States of America, a statement of conformity is not required if the aircraft, aircraft engine or propeller has been accepted by the relevant force.

Source FARs section 21.130 modified.

21.130A Records to be kept by manufacturer

- (1) A person who manufactures an aircraft, aircraft engine or propeller under a type certificate only must keep, at the place of manufacture, the following current records for the aircraft, aircraft engine or propeller:
 - (a) a technical data file that includes the type design drawings, specifications, reports on tests prescribed by this Part, and the original type inspection report and any amendments to that report;
 - (b) the information required to prepare the statement of conformity mentioned in regulation 21.130;
 - (c) a complete inspection record, the serial number, and data covering the processes and tests to which materials and parts are subjected;
 - (d) a record of service difficulties reported to the manufacturer.

Penalty: 50 penalty units.

- (2) The records mentioned in paragraphs (1)(a) and (b) must be kept for the period in which aircraft, aircraft engines or propellers are manufactured by the person under the type certificate.

Penalty: 50 penalty units.

- (3) The records mentioned in paragraphs (1)(c) and (d) must be kept for 2 years after the aircraft, aircraft engine or propeller to which the records relate was manufactured.

Penalty: 50 penalty units.

- (4) On CASA's request, the records must be made available for examination by CASA.

Penalty: 50 penalty units.

- (5) If the manufacturer stops manufacturing aircraft, aircraft engines or propellers under the type certificate, and does not continue manufacturing under a production certificate, the manufacturer must send the records to CASA within 30 days.

Penalty: 50 penalty units.

- (6) An offence against subregulation (1), (2), (3), (4) or (5) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

Source FARs section 21.293 modified.

Regulation 21.131

Subpart 21.G—Production certificates

21.131 Applicability

This Subpart prescribes requirements for the issue of production certificates and rules governing production of Class I, Class II, Class III and unapproved Class I products by the holders of those certificates.

Source FARs section 21.131 modified.

21.132 Definitions for Subpart 21.G

For this Subpart:

Class I product includes a complete aircraft, aircraft engine or propeller for which a foreign type certificate has been issued.

Class II product includes a major component of:

- (a) a Class I product; or
- (b) an unapproved Class I product.

product design means:

- (a) for an unapproved Class I product—the design that was submitted with the application for a foreign type certificate; and
- (b) for a Class II or Class III product—the design for the product that is:
 - (i) approved under regulation 21.132A; or
 - (ii) if the product is manufactured under an agreement with a foreign manufacturer for supply to that manufacturer—approved by the national aviation authority of the relevant foreign country; or
 - (iii) approved in a supplemental type certificate or a foreign supplemental type certificate; or
 - (iv) approved in a modification/repair design approval or in an approval mentioned in regulation 21.475; or
 - (v) taken to be approved under regulation 21.465 or 21.470; or
 - (vi) covered by an approval that continues in force under regulation 202.054, 202.055 or 202.056.

unapproved Class I product means a complete aircraft, aircraft engine or propeller:

- (a) designed by or for a manufacturer that is in a foreign country; and
- (b) for which an application for a foreign type certificate has been made; and
- (c) for which no foreign type certificate has been issued.

Note: See also the definitions of ***Class I product***, ***Class II product*** and ***Class III product*** in regulation 21.321.

**21.132A Approval of product design for Class II and Class III products by
CASA, authorised person or relevant approved design organisation**

- (1) A person may apply, in writing, to CASA or an authorised person or relevant approved design organisation for approval of the design of a Class II or Class III product.
- (2) Subject to regulation 11.055, CASA or the authorised person or approved design organisation must approve the design of the product if satisfied that the design:
 - (a) consists of drawings, specifications and other information that fully describe the product; and
 - (b) includes all the information necessary to manufacture the product, including:
 - (i) information that shows the dimensions and appearance of the product; and
 - (ii) the materials used in the manufacture of the product; and
 - (iii) information about the process or processes used to manufacture the product; and
 - (iv) any methods used to test or measure the product; and
 - (v) information that shows the structural strength of the product; and
 - (c) meets the applicable airworthiness standards for the product.
- (3) For paragraph (2)(c), if the application is made to CASA, CASA may satisfy itself that the design meets the applicable airworthiness standards for the product on the basis of:
 - (a) an examination of the design; or
 - (b) the technical data for the design approved under regulation 21.009; or
 - (c) a certificate from an approved design organisation under subregulation (6).
- (4) For paragraph (2)(c), if the application is made to an authorised person or approved design organisation, the authorised person or approved design organisation may satisfy itself that the design meets the applicable airworthiness standards for the product on the basis of:
 - (a) an examination of the design; or
 - (b) the technical data for the design approved under regulation 21.009.
- (5) Subregulation (6) applies if, under regulation 21.251, CASA authorises a relevant approved design organisation to determine whether the design meets the applicable airworthiness standards for the product.
- (6) If the approved design organisation is satisfied that the design meets the airworthiness standards, the organisation may give CASA a certificate to that effect.

21.133 Eligibility

- (1) A person is eligible to apply for a production certificate for a Class I product if the person:
-

Regulation 21.134

- (a) holds a current type certificate or foreign type certificate for the product; or
 - (b) holds the right, under a licensing agreement, to the benefits of the type certificate or foreign type certificate for the product; or
 - (c) holds a supplemental type certificate or foreign supplemental type certificate for the product; or
 - (d) holds the right, under a licensing agreement, to the benefits of the supplemental type certificate or foreign supplemental type certificate for the product.
- (2) A person is also eligible to apply for a production certificate if:
- (a) the person has an agreement with a foreign manufacturer to:
 - (i) manufacture a Class I, Class II, Class III or unapproved Class I product; and
 - (ii) supply the product to the foreign manufacturer; and
 - (b) the terms of the agreement require that the person be approved to manufacture the product.
- (2A) A person is also eligible to apply for a production certificate for a Class II or Class III product if:
- (a) the product is an aircraft component of a type in respect of which a certificate of type approval is in force; and
 - (b) the person is lawfully manufacturing the component or is proposing to manufacture the component and is entitled to do so.
- (2B) A person is also eligible to apply for a production certificate to manufacture a Class II or Class III product on a one-off basis for supply to:
- (a) the holder of a certificate of approval engaged in the maintenance of an aircraft for installation in or on the aircraft; or
 - (b) the operator of an aircraft or the owner of an aircraft, aircraft engine or propeller for installation in or on the aircraft, aircraft engine or propeller.

Source FARs section 21.133 modified.

21.134 Issue of production certificate

Subject to regulation 11.055, CASA must issue a production certificate to an applicant for the certificate if the applicant:

- (a) is eligible, under regulation 21.133, to apply for the certificate; and
- (b) applies for the certificate in accordance with this Subpart; and
- (c) is entitled, under this Subpart, to the certificate; and
- (d) otherwise complies with this Part.

21.135 Requirements for entitlement

- (1) An applicant is entitled to a production certificate if CASA is satisfied that the applicant has complied with regulations 21.139 and 21.143 in relation to the Class I, Class II, Class III or unapproved class I product to be manufactured under the certificate.

- (2) CASA may inspect the applicant's organisation and manufacturing facilities to determine whether the applicant has complied with regulations 21.139 and 21.143.

Source FARs section 21.135 modified.

21.137 Location of manufacturing facilities

Despite regulation 21.134, CASA is not required to issue a production certificate if the manufacturing facilities concerned are located outside Australian territory, unless there is no undue burden on CASA in administering the applicable requirements of these Regulations.

Source FARs section 21.137 modified.

21.139 Quality system

An applicant for a production certificate must show that the applicant has established, and can maintain, a quality system so that:

- (a) each Class I product to be manufactured under the certificate will conform to the type design for the product; and
- (b) each Class II, Class III or unapproved Class I product to be manufactured under the certificate will conform to the product design for the product.

Source FARs section 21.139 modified.

21.143 Quality system data requirements: prime manufacturer

- (1) An applicant for a production certificate must submit to CASA, for approval, a manual describing the inspection and test procedures necessary to ensure that each product manufactured under the production certificate is in a condition for safe operation and conforms to:
- (a) for a Class I product—the type design; and
 - (b) for a Class II, Class III or unapproved Class I product—the product design.
- (1A) The manual mentioned in subregulation (1) must include any of the following that apply to the product:
- (a) a statement describing how responsibilities are assigned and authority is delegated in the quality system organisation, together with a chart indicating:
 - (i) the functional relationship of the quality system organisation to management and to other organisational components; and
 - (ii) the chain of authority and responsibility within the quality system organisation;
 - (b) a description of:
 - (i) the inspection procedures for raw materials, purchased items and parts and assemblies produced by manufacturers' suppliers; and
 - (ii) the methods used to ensure that parts and assemblies that cannot be completely inspected when delivered to the production certificate holder's plant are acceptable;
-

Regulation 21.144

- (c) a description of:
 - (i) the production inspection system for individual parts and complete assemblies; and
 - (ii) the methods used for the identification of any special manufacturing processes involved; and
 - (iii) the means used to control the processes; and
 - (iv) the final test procedure for the product; and
 - (v) in the case of a Class I product that is a completed aircraft, a copy of the manufacturer's production flight test procedures and check-off list;
- (d) for a product other than a Class II or Class III product referred to in subregulation 21.133(2B), an outline of the materials review system, the procedure for recording decisions of the Materials Review Board and for disposing of rejected parts;
- (e) an outline of a system for informing company inspectors of current changes in engineering drawings, specifications, and quality system procedures;
- (f) a list or chart showing the location and type of inspection stations.

Note: A Materials Review Board must be established by the holder of a production certificate: see regulation 21.145.

- (1B) CASA must approve a manual that is prepared for, and meets the requirements of, this regulation.
- (2) The holder of a production certificate must, on the request of CASA, make available to CASA information regarding all delegation of authority to suppliers to make major inspections of parts or assemblies for which the holder is responsible.

Penalty: 25 penalty units.

- (3) An offence against subregulation (2) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

Source FARs section 21.143 modified.

21.144 Production inspection system

The production inspection system mentioned in paragraph 21.143(1A)(c) must provide for the following:

- (a) properly identifying incoming materials, and bought or subcontracted parts, if their physical or chemical properties cannot be readily and accurately determined;
- (b) suitable storage and adequate protection of materials subject to damage and deterioration;
- (c) carrying out processes affecting the quality and safety of the finished Class I, Class II, Class III or unapproved Class I product in accordance with acceptable industry or Australian specifications;
- (d) inspecting parts and components, at points during the production process at which accurate determinations can be made, to determine whether:

Regulation 21.145

- (i) parts and components for a Class I product conform to the type design data for the product; or
- (ii) parts and components for a Class II, Class III or unapproved Class I product conform to the product design data for the product;
- (e) ensuring that current design drawings are readily available to manufacturing and inspection personnel, and used when necessary;
- (f) ensuring that design changes, including material substitutions, are controlled before being incorporated in:
 - (i) a finished Class I product; or
 - (ii) a Class II, Class III or unapproved Class I product;
- (g) segregating and identifying rejected materials and parts in a manner that precludes installation in the finished Class I, Class II, Class III or unapproved Class I product;
- (h) a system for processing through the Materials Review Board any materials and parts that are withheld because of departures from design data or specifications, and that are to be considered for installation in a finished Class I, Class II, Class III or unapproved Class I product;
- (i) a system for identifying and reinspecting materials and parts determined by the Materials Review Board to be serviceable if rework or repair is necessary;
- (j) maintaining inspection records, identified with the finished Class I, Class II, Class III or unapproved Class I product where practicable, and retaining them for at least 2 years.

Source FARs section 21.125 modified.

21.145 Materials Review Board

- (1) The holder of a production certificate (other than a production certificate referred to in subregulation 21.133(2B)) must:
 - (a) establish a Materials Review Board (to include representatives from the manufacturer's inspection and engineering departments) and materials review procedures; and
 - (b) maintain complete records of Materials Review Board action for at least 2 years after the action was taken.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

Source FARs section 21.125 modified.

21.147 Changes in quality system

- (1) After the issue of a production certificate, each change to the quality system is subject to review by CASA.

Regulation 21.149

- (2) The holder of a production certificate must immediately notify CASA, in writing, of any change to the quality system that may affect:
- (a) the inspection of a Class I product being manufactured under the certificate, or the conformity of such a product to its type design data, or the airworthiness of such a product; or
 - (b) the inspection of an unapproved Class I product being manufactured under the certificate, or the conformity of such a product to its product design data, or the airworthiness of such a product; or
 - (c) the inspection of a Class II or Class III product being manufactured under the certificate, or the conformity of such a product to its product design data.

Penalty: 50 penalty units.

- (3) An offence against subregulation (2) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

21.149 Multiple products

CASA may authorise more than 1 Class I, Class II, Class III or unapproved Class I product to be manufactured under 1 production certificate if the products have similar production characteristics.

Source FARs section 21.149 modified.

21.151 Production limitation record

A production certificate must include, or have attached to it, a production limitation record that sets out:

- (a) for a Class I product—the type certificate or foreign type certificate of each product authorised to be manufactured under the production certificate; and
- (b) for a Class II or Class III product (other than a Class II or Class III product referred to in subregulation 21.133(2B)) or an unapproved Class I product—the product design of each product authorised to be manufactured under the production certificate; and
- (c) for a Class II or Class III product referred to in subregulation 21.133(2B)—a description of each product authorised to be manufactured under the production certificate.

Source FARs section 21.151 modified.

21.153 Amendment of production certificate

- (1) The holder of a production certificate may apply to CASA to amend the certificate to add 1 or more of the following:
- (a) a Class I product type certificate or foreign type certificate;
 - (b) a model to a Class I product type certificate or foreign type certificate;
 - (c) an unapproved Class I product design;
 - (d) a Class II product design;

(e) a Class III product design.

- (2) CASA may amend the certificate if the applicant complies with the applicable requirements of regulations 21.139, 21.143 and 21.147.

Source FARs section 21.153 modified.

21.157 Inspections and tests

- (1) If CASA requires the holder of a production certificate to allow CASA to make any inspections and tests necessary to determine compliance with the applicable requirements of these Regulations, the holder must allow CASA to make those inspections and tests.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

Source FARs section 21.157 modified.

21.159 Duration

- (1) A production certificate ceases to be in force:
- (a) if the location of the manufacturing facility is changed; or
 - (b) if it is cancelled; or
 - (c) if a termination date is specified in the certificate—at midnight on that date.
- (2) A production certificate is not in force during any period of suspension.
- (3) CASA may suspend or cancel a production certificate by written notice given to its holder if CASA considers that it is necessary to do so in the interests of aviation safety.
- (4) A notice must set out:
- (a) the grounds for the suspension or cancellation; and
 - (b) in the case of a suspension—when the suspension stops having effect.

Source FARs section 21.159 modified.

Note: See also regulations 21.002C and 21.002E in relation to suspension and cancellation of production certificates.

21.161 Display

- (1) The holder of a production certificate must take reasonable steps to ensure that it is displayed prominently in the main office of the manufacturing facility in which the aircraft, aircraft engine or propeller to which the certificate relates is manufactured.

Penalty: 5 penalty units.

Regulation 21.163

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

Source FARs section 21.161 modified.

21.163 Privileges for holders of production certificates—conduct of training in particular maintenance

Primary category aircraft

- (1) Subregulation (2) applies to:
- (a) a person who:
 - (i) holds a production certificate for a primary category aircraft of a particular type and model; and
 - (ii) is entitled to a special certificate of airworthiness for the aircraft in the primary category under subregulation 21.184(1); and
 - (b) a person who:
 - (i) holds a production certificate for a normal, utility or acrobatic category aircraft of a particular type and model; and
 - (ii) is entitled to a special certificate of airworthiness for the aircraft in the primary category under subregulation 21.184(3).
- (2) Subject to subregulation (5), the person may:
- (a) conduct training for a person in the performance of a special inspection and preventive maintenance program included as part of the aircraft's type design under subregulation 21.024(2); and
 - (b) if the person successfully completes the training—issue a certificate of competency for that type and model of aircraft to the person.

Intermediate category aircraft

- (3) Subregulation (4) applies to a person who:
- (a) holds a production certificate for an intermediate category aircraft of a particular type and model; and
 - (b) is entitled to a special certificate of airworthiness for the aircraft in the intermediate category under subregulation 21.184A(1).
- (4) Subject to subregulation (5), a person who is eligible may:
- (a) conduct training for a person in the performance of a special inspection and preventive maintenance program included as part of the aircraft's type design under subregulation 21.026(2); and
 - (b) if the person successfully completes the training—issue a certificate of competency for that type and model of aircraft to the person.

Training to be given by licensed aircraft maintenance engineer

- (5) For subregulations (2) and (4), the training must be given by a licensed aircraft maintenance engineer:

Regulation 21.165

- (a) who holds a category B1 licence, within the meaning given by Part 3 of the Dictionary; and
- (b) if the aircraft is of a type rated aircraft type, within the meaning given by Part 3 of the Dictionary—whose licence is endorsed with the rating for that aircraft type.

Source FARs section 21.163 modified.

21.165 Responsibility of holder of production certificate

- (1) The holder of a production certificate must maintain the quality system in conformity with the manual approved under regulation 21.143 in relation to the production certificate.

Penalty: 50 penalty units.

- (2) The holder of a production certificate for a Class I product must ensure that each finished product that is:
 - (a) manufactured under the authority of the certificate; and
 - (b) submitted for airworthiness certification or approval;conforms to the type design for the product and is in a condition for safe operation.

Penalty: 50 penalty units.

- (3) The holder of a production certificate for a Class II, Class III or unapproved Class I product must ensure that each product that is:
 - (a) manufactured under the authority of the certificate; and
 - (b) submitted for approval;conforms to the product design and is in a condition for safe operation.

Penalty: 50 penalty units.

- (4) An offence against subregulation (1), (2) or (3) is an offence of strict liability.

Note: For **strict liability**, see section 6.1 of the *Criminal Code*.

Source FARs section 21.165 modified.

21.166 Records to be kept by holder of production certificate

- (1) A person who manufactures a Class I, Class II, Class III or unapproved Class I product under a production certificate must keep, at the place of manufacture, the following records for each product:
 - (a) for a Class I product, a technical data file that includes:
 - (i) the current type design drawings; and
 - (ii) the current specifications; and
 - (iii) the reports on the results of any tests required by or under this Part; and
 - (iv) the original type inspection report; and
 - (v) any amendments to that report;

Regulation 21.166

- (b) for a Class II, Class III or unapproved Class I product, the current product design and the reports on the results of any tests required by or under this Part;
- (c) any data (including any amendments) required to be submitted with the original application for the production certificate;
- (d) a record of any rebuilding or alteration performed by the person;
- (e) an inspection record;
- (f) any serial number;
- (g) any data about the processes and tests to which materials and parts used in the product are subjected;
- (h) a record of any service difficulties reported to the person.

Penalty: 50 penalty units.

- (2) The records mentioned in paragraphs (1)(a), (b), (c) and (d) must be retained for the period during which the product is manufactured by the person under the production certificate.

Penalty: 50 penalty units.

- (3) The records mentioned in paragraphs (1)(e), (f), (g) and (h) must be retained for 2 years after the manufacture of the product to which the records relate.

Penalty: 50 penalty units.

- (4) The person must allow CASA to examine the records at any reasonable time after reasonable notice is given to the person.

Penalty: 50 penalty units.

- (5) If the person stops manufacturing a product under the production certificate, and does not continue manufacturing the product at another place under another production certificate, the person must send the records retained for subregulation (3) to CASA within 30 days after manufacturing stops.

Penalty: 50 penalty units.

- (6) An offence against subregulation (1), (2), (3), (4) or (5) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

Source FARs section 21.293 modified.

Subpart 21.H—Certificates of airworthiness (except provisional certificates of airworthiness) and special flight permits

Note: A certificate of airworthiness issued under this Part for an aircraft, aircraft engine or propeller does not certify that it complies with the *Air Navigation (Aircraft Noise) Regulations 2018*, the *Air Navigation (Aircraft Engine Emissions) Regulations* or any other applicable Commonwealth legislation. Compliance with those Regulations or other applicable Commonwealth legislation may be required before the aircraft, aircraft engine or propeller may be legally operated.

21.171 Applicability

This Subpart prescribes requirements for the issue of certificates of airworthiness (except provisional certificates of airworthiness) and special flight permits.

Source FARs section 21.171 modified.

Note: Under Part 200 (Aircraft to which CASR do not apply), certain Australian aircraft are authorised to fly without a certificate of airworthiness.

21.172 Definitions for Subpart

In this Subpart:

LSA standards means:

- (a) the standards for the design, performance or continuing airworthiness of light sport aircraft issued by the American Society for Testing and Materials, as in force from time to time; or
- (b) the standards prescribed by the Part 21 Manual of Standards for the design, performance or continuing airworthiness of light sport aircraft.

Note: The standards issued by the American Society for Testing and Materials could in 2015 be viewed on the society's website (<http://www.astm.com>).

qualified manufacturer of a light sport aircraft means:

- (a) a manufacturer who, at the time the light sport aircraft was manufactured, held a current production certificate for an aircraft; or
- (b) a manufacturer who has made a written declaration that, at the time the light sport aircraft was manufactured, it had:
 - (i) contracted engineering personnel with experience in ultralight or light aircraft design to ensure compliance with LSA standards referred to in paragraph 21.186(2)(b); and
 - (ii) facilities and tools suitable for the production of the aircraft in accordance with the applicable LSA standards; and
 - (iii) competent personnel, with appropriate training, skills and experience, to perform work that affects product quality.

Regulation 21.173

21.173 Eligibility

- (1) In this regulation:
certificate of airworthiness does not include:
 - (a) an experimental certificate; or
 - (b) a provisional certificate of airworthiness.
- (2) The registered operator of an aircraft, or the owner of an aircraft that is listed with a Part 103 ASAO, is eligible to apply for a certificate of airworthiness for the aircraft.
- (3) The application must be made to:
 - (a) for an application for a limited category certificate—CASA or a limited category organisation; or
 - (b) for any other application—CASA or an authorised person.

21.174 Applications for limited category certificates made to CASA—giving to limited category organisation

- (1) This regulation applies if an application for a limited category certificate for an aircraft is made to CASA.
- (2) CASA may give the application to a limited category organisation for the purposes of the organisation deciding the application.
- (3) If there is more than one limited category organisation that may deal with the application, CASA must ask the applicant to nominate a limited category organisation for the application.
- (4) If CASA gives the application to a limited category organisation under this regulation, CASA must give the organisation anything in its records about the applicant that is relevant to the organisation making a decision on the application.
- (5) If CASA gives the application to a limited category organisation under this regulation:
 - (a) for these Regulations, the application is taken to have been made to the organisation; and
 - (b) the organisation must decide the application; and
 - (c) CASA must give the applicant written notice that the application has been given to the organisation for the purposes of the organisation deciding it.
- (6) Without limiting subregulation (5), and for the avoidance of doubt:
 - (a) CASA is taken not to have refused the application; and
 - (b) nothing in this Part authorises the limited category organisation to return the application to CASA for the purposes of CASA deciding it, but the organisation may consult with, or seek information from, CASA for the purposes of deciding the application.

21.175 Certificates of airworthiness: classification

In these Regulations:

special certificate of airworthiness means:

- (a) a certificate of airworthiness issued for:
 - (i) an aircraft type certificated in the primary, intermediate or restricted category; or
 - (ii) an aircraft in the limited category; or
 - (iii) an amateur-built aircraft accepted under an ABAA; or
 - (iv) a light sport aircraft covered by regulation 21.186; or
- (b) a provisional certificate of airworthiness; or
- (c) an experimental certificate.

standard certificate of airworthiness means a certificate of airworthiness issued for:

- (a) an aircraft type certificated in the normal, utility, acrobatic, commuter, or transport category; or
- (b) a manned free balloon; or
- (c) an aircraft in a special class of aircraft.

Source FARs section 21.175 modified.

21.176 Issue of certain certificates of airworthiness

- (1) Subject to regulation 11.055, CASA, a limited category organisation or an authorised person must issue a certificate of airworthiness to an applicant for the certificate if the applicant:
 - (a) is eligible, under regulation 21.173, to apply for the certificate; and
 - (b) applies for the certificate in accordance with this Subpart; and
 - (c) is entitled, under this Subpart, to the certificate; and
 - (d) otherwise complies with this Part.
- (3) A condition imposed on a certificate of airworthiness under regulation 11.056 may include operational limitations.
- (4) Any conditions imposed on a certificate of airworthiness under regulation 11.056, and any conditions imposed under regulation 21.016 or 21.029B that limit the use of the aircraft, must be in writing, and set out in, or attached to, the certificate of airworthiness.

Limited category certificates—assignment of permit index numbers

- (5) If CASA or a limited category organisation decides to issue a limited category certificate for an aircraft, CASA or the organisation must assign a permit index number to the aircraft in accordance with regulation 132.195.

Note: See also regulation 132.230 (Notice to CASA—certain proposed actions by limited category organisation).

Part 21 Certification and airworthiness requirements for aircraft and parts

Subpart 21.H Certificates of airworthiness (except provisional certificates of airworthiness) and special flight permits

Regulation 21.179

Limited category certificates—information to be included

- (5A) The following information must be included in a limited category certificate for an aircraft, or in an attachment to the certificate:
- (a) each special purpose operation for which the aircraft is to be operated;
 - (b) the aircraft's permit index number.
- (6) In this regulation:
- certificate of airworthiness* does not include a provisional certificate of airworthiness or an experimental certificate.

21.179 Transferability

Subject to regulation 21.219, a certificate of airworthiness is transferred with the aircraft.

Source FARs section 21.179 modified.

Note: Regulation 21.219 relates to the transferability of provisional certificates of airworthiness.

21.181 Duration of certain certificates of airworthiness

- (1) In this regulation:
- certificate of airworthiness* does not include a provisional certificate of airworthiness or an experimental certificate.
- (2) A certificate of airworthiness continues in force:
- (a) if a period is specified in the certificate—until the end of the period or until it is cancelled, whichever occurs first; or
 - (b) in any other case—until it is cancelled.
- (3) The holder of a certificate of airworthiness must, on request by CASA or an authorised person, make it available for inspection by CASA or the authorised person.
- Penalty: 5 penalty units.
- (4) A certificate of airworthiness is taken to not be in force for any period during which:
- (a) the aircraft is either not registered in Australia or not listed with a Part 103 ASAO; or
 - (b) any type certificate or type acceptance certificate for the type of aircraft concerned is not in force; or
 - (c) in the case of a certificate of airworthiness issued for a light sport aircraft covered by regulation 21.186, the aircraft is modified and the modification:
 - (i) is not authorised by the manufacturer; or
 - (ii) if the manufacturer was no longer existing at the time of the modification or could not have authorised the modification at that

Regulation 21.181

-
- time—is not authorised by an authorised person to perform the functions of the manufacturer in relation to the continuing airworthiness of the light sport aircraft; or
- (iii) does not comply with the LSA standards.
- (4A) For the purposes of subregulation (4), if the certificate of airworthiness was issued for a specified period, the period during which the certificate is taken to not be in force counts as part of the period for which the certificate was issued.
- (5) CASA or an authorised person may suspend or cancel a certificate of airworthiness for an aircraft that is being used in scheduled air transport operations, by written notice given to its holder, if:
- (a) for an aircraft to which Part 42 applies—any maintenance carried out on the aircraft is not carried out in accordance with Part 42; or
 - (aa) for an aircraft to which Part 42 does not apply—any maintenance carried out on the aircraft is not carried out in accordance with Part 4A of CAR; or
 - (b) the aircraft type ceases to be supported by the type certificate holder, the national aviation authority of the country in which the aircraft's original type certificate was issued or the national aviation authority of a Contracting State, with respect to:
 - (i) collecting and investigating information on defects; or
 - (ii) reporting defects to the national aviation authority of the country of original type certification; or
 - (iii) keeping type records; or
 - (iv) producing and maintaining manuals; or
 - (v) issuing instructions for continuing airworthiness; or
 - (c) CASA or the authorised person otherwise considers that it is necessary to do so in the interests of aviation safety.
- (6) CASA or an authorised person may suspend or cancel a certificate of airworthiness for an Australian aircraft not covered by subregulation (5), by written notice given to its holder, if:
- (a) for an aircraft to which Part 42 applies—any maintenance carried out on the aircraft is not carried out in accordance with Part 42; or
 - (aa) for an aircraft to which Part 42 does not apply—any maintenance carried out on the aircraft is not carried out in accordance with Part 4A of CAR; or
 - (b) CASA or the authorised person otherwise considers that it is necessary to do so in the interests of aviation safety.
- (7) A notice under subregulation (5) or (6) must set out:
- (a) the grounds for the suspension or cancellation; and
 - (b) in the case of a suspension—when the suspension stops having effect.
- (8) Despite anything else in this regulation, a certificate of airworthiness is not in force during any period of suspension, but, if the certificate was issued for a specified period, the period of suspension counts as part of the period for which the certificate was issued.

Part 21 Certification and airworthiness requirements for aircraft and parts

Subpart 21.H Certificates of airworthiness (except provisional certificates of airworthiness) and special flight permits

Regulation 21.182

- (9) The holder of a certificate of airworthiness that is taken to not be in force under subregulation (4), expires, or is suspended or cancelled, must, at the written request of CASA or an authorised person, surrender the certificate to CASA or the authorised person.

Penalty: 5 penalty units.

- (10) An offence against subregulation (3) or (9) is an offence of strict liability.

Note 1: For *strict liability*, see section 6.1 of the *Criminal Code*.

Source FARs section 21.181 modified.

Note 2: See also regulations 21.002C and 21.002E in relation to suspension and cancellation of certificates of airworthiness.

21.182 Aircraft manufacturer's data plate

- (1) Except as set out in subregulation (2), an applicant for a certificate of airworthiness for an aircraft must show that the aircraft is identified:
- (a) as required by Subpart 21.Q; or
 - (b) in the case of an imported aircraft:
 - (i) as required by the national aviation authority of the Contracting State in which it was certificated; or
 - (ii) in another way acceptable to CASA.
- (2) Subregulation (1) does not apply to an applicant:
- (a) if the applicant is applying for an experimental certificate for an aircraft that is not an amateur-built aircraft, a kit-built aircraft or a light sport aircraft; or
 - (b) if:
 - (i) a different certificate of airworthiness is in force for the aircraft; and
 - (ii) the applicant for the issue of that certificate complied with subregulation (1).

Source FARs section 21.182 modified.

21.183 Standard certificates of airworthiness

New aircraft manufactured under a production certificate

- (1) An applicant for a standard certificate of airworthiness for a new aircraft manufactured under a production certificate, is entitled to the certificate without further showing unless CASA or an authorised person decides that the aircraft:
- (a) does not conform to the type design; or
 - (b) has been modified or repaired otherwise than in accordance with a supplemental type certificate or an approved modification/repair design; or
 - (c) is not in a condition for safe operation.

New aircraft manufactured under type certificate only

- (2) An applicant for a standard certificate of airworthiness for a new aircraft manufactured under a type certificate only is entitled to the certificate upon presentation, by the holder or licensee of the type certificate, of the statement of conformity required by regulation 21.130, if CASA finds after inspection that the aircraft:
- (a) conforms to the type design; and
 - (b) has had any modifications or repairs carried out in accordance with a supplemental type certificate or an approved modification/repair design; and
 - (c) is in a condition for safe operation; and
 - (d) was manufactured by the holder of the type certificate for the aircraft or the licensee of that type certificate.

Imported aircraft

- (3) An applicant for a standard certificate of airworthiness for an aircraft for which a type certificate was issued under regulation 21.029, or a type acceptance certificate was issued under regulation 21.029A, is entitled to the certificate if CASA or an authorised person is satisfied that:
- (a) the aircraft conforms to the type design; and
 - (b) any modifications or repairs to the aircraft have been carried out in accordance with a supplemental type certificate or an approved modification/repair design; and
 - (c) the aircraft is in a condition for safe operation.

Other aircraft

- (4) An applicant for a standard certificate of airworthiness for aircraft not covered by subregulation (1), (2) or (3) is entitled to the certificate if:
- (a) the aircraft:
 - (i) has a type design approved under a type certificate or a supplemental type certificate; or
 - (ii) if there is no type certificate or supplemental type certificate for the aircraft—is of a type or model that has previously been issued a certificate of airworthiness in the category applied for; and
 - (b) the aircraft complies with any applicable airworthiness directives; and
 - (c) the aircraft meets the requirements mentioned in subregulation (4A); and
 - (d) CASA or an authorised person is satisfied that:
 - (i) the aircraft conforms to the type design (if any); and
 - (ii) any modifications or repairs to the aircraft have been carried out in accordance with a supplemental type certificate or an approved modification/repair design; and
 - (iii) the aircraft is in a condition for safe operation.

(4A) For paragraph (4)(c), the requirements are that:

Part 21 Certification and airworthiness requirements for aircraft and parts

Subpart 21.H Certificates of airworthiness (except provisional certificates of airworthiness) and special flight permits

Regulation 21.184

- (a) the aircraft is not an experimental aircraft for which a different certificate of airworthiness has previously been issued under this regulation; and
- (b) if Part 42 applies to the aircraft—an airworthiness review certificate is in force for the aircraft; and
- (c) if Part 42 does not apply to the aircraft, and the aircraft is of a particular type and model—a person who holds a certificate of approval that covers maintenance for that type and model of aircraft has certified, in the aircraft maintenance record for the aircraft, that the aircraft meets the requirements mentioned in subregulation 21.184(4).

Inspection

- (5) CASA or an authorised person may inspect an aircraft mentioned in subregulation (1), (3) or (4) to determine whether:
 - (a) it conforms to the type design; and
 - (b) any modifications or repairs to it have been carried out in accordance with a supplemental type certificate or an approved modification/repair design; and
 - (c) it is in a condition for safe operation.

Source FARs section 21.183 modified.

21.184 Special certificates of airworthiness for primary category aircraft

New primary category aircraft manufactured under a production certificate

- (1) An applicant for the original issue of a special certificate of airworthiness for a new aircraft in the primary category that meets the criteria of paragraph 21.024(1)(a), manufactured under a production certificate, including aircraft assembled by another person from a kit provided by the holder of the production certificate and under the supervision and quality control of that holder, is entitled to the certificate without further showing unless CASA or an authorised person decides that the aircraft:
 - (a) does not conform to the type design; or
 - (b) has been modified or repaired otherwise than in accordance with a supplemental type certificate or an approved modification/repair design; or
 - (c) is not in a condition for safe operation.

Imported aircraft

- (2) An applicant for a special certificate of airworthiness for an aircraft in the primary category for which a type certificate was issued under regulation 21.029, or a type acceptance certificate was issued under regulation 21.029A, is entitled to the certificate if CASA or an authorised person finds, after inspection, that:
 - (a) the aircraft conforms to the type design; and
 - (b) any modifications or repairs to the aircraft have been carried out in accordance with a supplemental type certificate or an approved modification/repair design; and
 - (c) the aircraft is in a condition for safe operation.

Regulation 21.184

Aircraft having a current standard certificate of airworthiness

- (3) An applicant for a special certificate of airworthiness for an aircraft in the primary category is entitled to the certificate if CASA or an authorised person is satisfied that:
- (a) the aircraft has a standard certificate of airworthiness; and
 - (b) the aircraft meets the criteria mentioned in paragraph 21.024(1)(a); and
 - (c) the applicant has applied, under regulation 21.113, for a supplemental type certificate for the approval of the design of a major change to the aircraft; and
 - (d) the applicant meets the requirements mentioned in regulation 21.113A; and
 - (e) if Part 42 applies to the aircraft and maintenance has been carried out on the aircraft since it was last operated for a flight—one of the following documents has been issued for the aircraft in relation to the maintenance:
 - (i) a certificate of release to service;
 - (ii) an equivalent document issued in accordance with an NAA arrangement mentioned in regulation 42.301; and
 - (f) if Part 42 does not apply to the aircraft—a maintenance release is in force for the aircraft.

Other aircraft

- (4) An applicant for a special certificate of airworthiness for an aircraft in the primary category that meets the criteria of paragraph 21.024(1)(a), and is not covered by subregulation (1), (2), or (3), is entitled to the certificate if CASA or an authorised person is satisfied that:
- (a) the aircraft:
 - (i) conforms to an approved primary, normal, utility, acrobatic or manned free balloon type design; or
 - (ii) complies with the requirements prescribed by the Part 21 Manual of Standards; and
 - (b) the aircraft complies with all applicable airworthiness directives; and
 - (c) if Part 42 applies to the aircraft—an airworthiness review certificate is in force for the aircraft; and
 - (ca) if Part 42 does not apply to the aircraft—the aircraft maintenance record for the aircraft records the result of a maintenance release inspection (within the meaning given by subregulation 47(6) of CAR) for the aircraft; and
 - (d) any modifications or repairs to the aircraft have been carried out in accordance with a supplemental type certificate or an approved modification/repair design; and
 - (e) the aircraft is in a condition for safe operation.

Inspection

- (5) CASA or an authorised person may inspect an aircraft mentioned in subregulation (3) or (4) to determine whether:

Part 21 Certification and airworthiness requirements for aircraft and parts

Subpart 21.H Certificates of airworthiness (except provisional certificates of airworthiness) and special flight permits

Regulation 21.184A

- (a) it conforms to the type design; and
- (b) any modifications or repairs to it have been carried out in accordance with a supplemental type certificate or an approved modification/repair design; and
- (c) it is in a condition for safe operation.

Multiple-category certification

- (6) A multiple-category certificate of airworthiness in the primary category and any other category must not be issued; a primary category aircraft may hold only one certificate of airworthiness.

Source FARs section 21.184 modified.

21.184A Special certificates of airworthiness for intermediate category aircraft

New intermediate category aircraft manufactured under a production certificate

- (1) An applicant for the original issue of a special certificate of airworthiness for a new aircraft in the intermediate category that meets the criteria of paragraph 21.026(1)(a) and was manufactured under a production certificate, is entitled to the certificate without further showing unless CASA or an authorised person decides that the aircraft:
 - (a) does not conform to the type design; or
 - (b) has been modified or repaired otherwise than in accordance with a supplemental type certificate or an approved modification/repair design; or
 - (c) is not in a condition for safe operation.

Other aircraft

- (2) An applicant for a special certificate of airworthiness for an aircraft in the intermediate category that meets the criteria of paragraph 21.026(1)(a) and is not covered by subregulation (1) is entitled to the certificate if CASA or an authorised person is satisfied that:
 - (a) the aircraft:
 - (i) conforms to an approved intermediate, normal, utility, or acrobatic type design; or
 - (ii) complies with the requirements prescribed by the Part 21 Manual of Standards; and
 - (b) the aircraft complies with all applicable airworthiness directives; and
 - (c) if Part 42 applies to the aircraft—an airworthiness review certificate is in force for the aircraft; and
 - (ca) if Part 42 does not apply to the aircraft—the aircraft maintenance record for the aircraft records the result of a maintenance release inspection (within the meaning given by subregulation 47(6) of CAR) for the aircraft; and
 - (d) any modifications or repairs to the aircraft have been carried out in accordance with a supplemental type certificate or an approved modification/repair design; and

-
- (e) the aircraft is in a condition for safe operation.

Inspection

- (3) CASA or an authorised person may inspect an aircraft mentioned in subregulation (1) or (2) to determine whether:
- (a) it conforms to the type design; and
 - (b) any modifications or repairs to it have been carried out in accordance with a supplemental type certificate or an approved modification/repair design; and
 - (c) it is in a condition for safe operation.

Multiple-category certification

- (4) A multiple-category certificate of airworthiness in the intermediate category and any other category must not be issued; an intermediate category aircraft may hold only one certificate of airworthiness.

Source FARs section 21.184 modified.

21.185 Certificates of airworthiness for restricted category aircraft

Aircraft manufactured under a production certificate or type certificate only

- (1) An applicant for the original issue of a special certificate of airworthiness for an aircraft type certificated in the restricted category, that was not previously type certificated in any other category, is entitled to the certificate if the applicant complies with the appropriate provisions of regulation 21.183.

Imported aircraft

- (2) An applicant for the original issue of a restricted category certificate of airworthiness for an imported aircraft type certificated only in the restricted category under regulation 21.029 or 21.029A is entitled to a certificate of airworthiness if CASA or an authorised person is satisfied that:
- (a) the aircraft conforms to the type design; and
 - (b) any modifications or repairs to the aircraft have been carried out in accordance with a supplemental type certificate or an approved modification/repair design; and
 - (c) the aircraft is in a condition for safe operation.

Other aircraft

- (3) An applicant for a special certificate of airworthiness for an aircraft type certificated in the restricted category, that was a surplus aircraft of the Defence Force, or of an armed force of Canada, the United Kingdom or the United States of America, or was previously certificated in another category, is entitled to the certificate if CASA or an authorised person is satisfied, after inspection, that the aircraft is in a good state of preservation and repair and is in a condition for safe operation.

Part 21 Certification and airworthiness requirements for aircraft and parts

Subpart 21.H Certificates of airworthiness (except provisional certificates of airworthiness) and special flight permits

Regulation 21.186

- (3A) Subregulation (3B) applies to an aircraft:
- (a) that is type certificated in the normal, utility, acrobatic, commuter or transport category; and
 - (b) that has been modified for 1 or more of the special purpose operations mentioned in regulation 21.025; and
 - (c) the modifications to which have been carried out in accordance with:
 - (i) an approved modification/repair design; or
 - (ii) a supplemental type certificate.
- (3B) An applicant for a special certificate of airworthiness for an aircraft to which this subregulation applies is entitled to the certificate as if the aircraft were type certificated in the restricted category if CASA or an authorised person finds, after inspection, that:
- (a) the aircraft meets the requirements of the normal utility, acrobatic, commuter or transport category except the requirements that CASA or the authorised person considers are inappropriate for the special purpose for which the aircraft is to be used; and
 - (b) the aircraft can reasonably be expected to be safe for its intended use when it is operated under any conditions limiting its intended use.

Inspection

- (4) CASA or an authorised person may inspect an aircraft mentioned in subregulation (1) or (3) to determine whether:
- (a) it conforms to the type design; and
 - (b) any modifications or repairs to it have been carried out in accordance with a supplemental type certificate or an approved modification/repair design; and
 - (c) it is in a condition for safe operation.

Source FARs section 21.185 modified.

21.186 Special certificates of airworthiness for light sport aircraft

- (1) An applicant is entitled to a special certificate of airworthiness for a light sport aircraft if:
- (a) the aircraft was manufactured by a qualified manufacturer; and
 - (b) the applicant gives CASA, or the authorised person referred to in regulation 21.176, the following:
 - (i) a statement of compliance by the manufacturer that complies with subregulation (2);
 - (ii) copies of the aircraft operating instructions, aircraft maintenance and inspection procedures, and aircraft flight training supplement, issued for the aircraft by the manufacturer;
 - (iii) in the case of a light sport aircraft manufactured outside Australia—written information showing that:
 - (A) the aircraft was manufactured in a Contracting State; and

Regulation 21.187

- (B) the aircraft is eligible for a certificate of airworthiness, or another document of similar effect, in the country of manufacture; and
 - (c) CASA or an authorised person finds, after inspection, that the aircraft is in a condition for safe operation.
- (2) A statement of compliance must be signed by the manufacturer and include at least the following:
- (a) a statement setting out the aircraft's make and model, serial number and date of manufacture;
 - (b) a statement specifying which of the LSA standards apply to the design of the aircraft, including a statement to the effect that the design of the aircraft complies with the specified standards;
 - (c) a statement specifying that:
 - (i) the manufacturer has a quality system that complies with the LSA standards; and
 - (ii) based on that system, the aircraft conforms to the manufacturer's technical data for the design of the aircraft;
 - (d) a statement to the effect that the manufacturer will make the statements, documents and information referred to in paragraph (1)(b) available to any person who asks the manufacturer for them;
 - (e) a statement to the effect that the manufacturer will monitor the continuing airworthiness of the aircraft and will issue directions or requirements that comply with the LSA standards to correct any unsafe condition;
 - (f) a statement to the effect that, in accordance with a production acceptance test procedure that complies with the LSA standards:
 - (i) the manufacturer has ground-tested and flight-tested the aircraft; and
 - (ii) the manufacturer found the aircraft's performance during ground and flight testing acceptable; and
 - (iii) the aircraft is in a condition for safe operation.

21.187 Multiple-category airworthiness certification

- (1) An applicant for a certificate of airworthiness for an aircraft in the restricted category, and in one or more other categories (except the primary or intermediate category), is entitled to the certificate, if the aircraft:
- (a) complies with the requirements for a particular category, when the aircraft is in the configuration for that category; and
 - (b) can be converted from one category to another by removing or adding equipment by simple mechanical means.
- (2) The operator of an aircraft certificated in the restricted category and in one or more other categories must have the aircraft inspected to determine airworthiness each time the aircraft is converted from the restricted category to another category for the carriage of passengers.

Penalty: 50 penalty units.

Part 21 Certification and airworthiness requirements for aircraft and parts

Subpart 21.H Certificates of airworthiness (except provisional certificates of airworthiness) and special flight permits

Regulation 21.189

(2A) An offence against subregulation (2) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (3) The inspection must be carried out by:
- (a) CASA or an authorised person; or
 - (b) a person who, under regulation 42ZE or 42ZN of CAR, can certify that the maintenance carried out on the aircraft for the purposes of its conversion was completed.
- (4) CASA or an authorised person may inspect the aircraft, and may require the applicant to make any tests reasonably necessary, to determine whether the aircraft:
- (a) complies with the requirements for a particular category, when the aircraft is in the configuration for that category; and
 - (b) can be converted from one category to another by removing or adding equipment by simple mechanical means.

Source FARs section 21.187 modified.

21.189 Special certificate of airworthiness for limited category aircraft

- (1) An applicant is entitled to a special certificate of airworthiness for an aircraft in the limited category for one or more special purpose operations mentioned in subregulation (3) if:
- (a) either:
 - (i) CASA or the limited category organisation deciding the application is satisfied that the aircraft meets the airworthiness requirements for the issue of a standard certificate of airworthiness (except any requirements that are inappropriate for the special purpose for which the aircraft is to be used); or
 - (ii) the aircraft is of a type that has been manufactured in accordance with the requirements of, and accepted for use by, an armed force, and for which the applicant can demonstrate to CASA or the limited category organisation deciding the application a satisfactory history of operation; and
 - (b) as far as can be reasonably determined, CASA or the limited category organisation is satisfied that the aircraft is in a good state of preservation and repair and is in a condition for safe operation; and
 - (c) as far as can be reasonably determined, CASA or the limited category organisation is satisfied that the aircraft can reasonably be expected to be safe when it is operated under the conditions limiting its intended use; and
 - (d) the applicant meets the requirements of subregulation (2).
- (2) The applicant must give CASA or the limited category organisation the following:
- (a) a statement, in a form and manner acceptable to CASA or the limited category organisation, setting out the purpose or purposes for which the aircraft is to be used;

Regulation 21.190

-
- (b) data (for example photographs) to identify the aircraft;
 - (c) any other information reasonably needed by CASA or the limited category organisation to enable it to impose any conditions necessary in the interests of the safety of other airspace users and persons on the ground or water.
- (3) The special purpose operations are the following:
- (a) operating historic or ex-military aircraft;
 - (aa) conducting adventure flights in historic or ex-military aircraft;
 - (ab) if the aircraft does not have a major modification—air racing;
 - (ac) glider towing;
 - (b) aerobatic flights;
 - (c) aerobatic training;
 - (d) exhibition flights;
 - (e) mock combat;
 - (f) operating replica aircraft;
 - (g) operating aircraft to carry people for parachute descents;
 - (h) any other operation in which the only use of the aircraft is to carry people taking part in a recreational activity that is intrinsically hazardous.
- (4) CASA or the limited category organisation may:
- (a) inspect the aircraft to determine whether it is in a good state of preservation and repair and is in a condition for safe operation; and
 - (b) require the applicant to carry out a flight check to enable CASA or the limited category organisation to make the determination.

Source FARs section 21.189 modified.

21.190 Special certificates of airworthiness—amateur-built category aircraft accepted under an ABAA

- (1) An applicant is entitled to a special certificate of airworthiness for an aircraft in the amateur-built aircraft category if:
- (a) CASA or an authorised person has given an ABAA for the aircraft; and
 - (b) the aircraft complies with subsections 3 and 4 of section 101.28 of the Civil Aviation Orders; and
 - (c) approval for the manufacture of the aircraft was given by CASA or an authorised person and the aircraft was manufactured in accordance with the approval; and
 - (d) CASA or an authorised person finds, after inspection, that:
 - (i) the aircraft conforms with the data on the basis of which the ABAA was given; and
 - (ii) any modifications or repairs to the aircraft have been carried out in accordance with an approved modification/repair design; and
 - (iii) the aircraft is in a condition for safe operation.
- (1A) In the case of an aircraft that is a rotorcraft, for the application of section 101.28 of the Civil Aviation Orders:

Part 21 Certification and airworthiness requirements for aircraft and parts

Subpart 21.H Certificates of airworthiness (except provisional certificates of airworthiness) and special flight permits

Regulation 21.191

- (a) a reference in that section to an aeroplane is taken to be a reference to an aircraft; and
 - (b) CASA may direct that a requirement of that section does not apply in a particular case.
- (2) CASA or an authorised person must not give an ABAA for an aircraft, except an aircraft with:
- (a) a maximum take-off weight not greater than 1500 kilograms; and
 - (b) not more than 4 seats; and
 - (c) if the aircraft is an aeroplane that is fitted with one or more type certificated engines:
 - (i) a stalling speed V_{S0} at maximum weight not exceeding 61 knots; or
 - (ii) if accurate data about the stalling speed is not available—a maximum wing loading not exceeding:
 - (A) 65 kg/m² with a flap area of less than 6 percent gross wing area; or
 - (B) 80 kg/m² with a flap area of at least 6 percent gross wing area; and
 - (d) if the aircraft is an aeroplane that is fitted with one or more non-type certificated engines:
 - (i) a stalling speed V_{S0} at maximum weight not exceeding 55 knots; or
 - (ii) if accurate data about the stalling speed is not available—a maximum wing loading not exceeding:
 - (A) 55 kg/m² with a flap area of less than 6 percent gross wing area; or
 - (B) 65 kg/m² with a flap area of at least 6 percent gross wing area.
- (3) CASA or an authorised person must not give an ABAA for an aircraft if the ABAA is applied for after 30 September 2000.

21.191 Experimental certificates

An experimental certificate may be issued for one or more of the following purposes:

- (a) research and development: for example testing new aircraft design concepts, new aircraft equipment, new aircraft installations, new aircraft operating techniques, or new uses for aircraft;
- (b) showing compliance with regulations: for example conducting flight tests and other operations to show compliance with the airworthiness regulations including flights to show compliance for issue of type and supplemental type certificates, flights to substantiate major design changes, and flights to show compliance with the function and reliability requirements of the regulations;
- (c) training the applicant's flight crew;
- (d) exhibition: for example exhibiting the aircraft's flight capabilities, performance, or unusual characteristics at air shows, motion picture, television, and similar productions, and the maintenance of exhibition

Regulation 21.192

-
- flight proficiency, including (for persons exhibiting aircraft) flying to and from such air shows and productions;
- (e) air racing: for example participating in air races, including (for participants) practising for air races and flying to and from racing events;
 - (f) market surveys: for example use of aircraft for purposes of conducting market surveys, sales demonstrations, and customer crew training only as provided in regulation 21.195;
 - (g) operating an amateur-built aircraft: that is an aircraft the major portion of which has been fabricated and assembled by a person who undertook the construction project solely for the person's own education or recreation;
 - (h) operating a kit-built aircraft: that is an aircraft in the primary category that meets the criteria of paragraph 21.024(1)(a) and that was assembled by a person from a kit manufactured by the holder of a production certificate for that kit, without the supervision and quality control of the production certificate holder under subregulation 21.184(1);
 - (i) private operations of prototype aircraft previously certificated under paragraph 21.191(a), (b) or (d);
 - (j) operating a light sport aircraft that:
 - (i) has been assembled from a kit in relation to which the applicant can give the information, statement and documents required by paragraph 21.193(e); and
 - (ii) has been assembled in accordance with the kit manufacturer's instructions for assembling the aircraft; and
 - (iii) is of the same make and model as a production aircraft covered by regulation 21.186 that has been issued with a special certificate of airworthiness;
 - (k) operating any other light sport aircraft covered by regulation 21.186 for which a special certificate of airworthiness for light sport aircraft, or another document of similar effect under a law of a Contracting State, has been issued.

Source FARs section 21.191 modified.

21.192 Experimental certificates: eligibility

An aircraft registration holder, or the owner of an aircraft that is listed with a Part 103 ASAO, is eligible to apply for an experimental certificate for one or more of the purposes mentioned in regulation 21.191.

21.193 Experimental certificates: general

An applicant for an experimental certificate is entitled to the certificate if the applicant gives CASA, an authorised person or a relevant approved design organisation the following:

- (a) a statement, in a form and manner acceptable to CASA or the authorised person, setting forth the purpose for which the aircraft is to be used;
- (b) enough data (such as photographs) to identify the aircraft;

Regulation 21.195

- (c) upon inspection of the aircraft, any information reasonably needed by CASA or the authorised person or relevant approved design organisation to enable it to impose any conditions, including operational limitations, necessary in the interests of the safety of other airspace users and persons on the ground or water;
- (d) if the experimental certificate is to be issued for a purpose mentioned in paragraph 21.191(a) (research and development) or paragraph 21.191(b) (showing compliance with the regulations):
 - (i) a description of the experimental purposes for which the certificate is sought; and
 - (ii) a statement setting out the estimated time or number of flights required for the purpose; and
 - (iii) a description of the areas over which the experiment will be conducted; and
 - (iv) except for aircraft converted from a previously certificated type without appreciable change in the external configuration—three-view drawings or three-view dimensioned photographs of the aircraft;
- (e) if the experimental certificate is to be issued for a purpose mentioned in paragraph 21.191(j) (operating certain light sport aircraft):
 - (i) written information that shows that a special certificate of airworthiness for light sport aircraft covered by regulation 21.186, or another document of similar effect under a law of a Contracting State, has been issued for a production aircraft of the same make and model; and
 - (ii) a statement of compliance, issued by the manufacturer of the kit from which the aircraft was assembled, that includes the statements and information required by subregulation 21.186(2), in so far as the statements and information relate to the manufacture of such kits; and
 - (iii) copies of the aircraft assembly and operating instructions, aircraft maintenance and inspection procedures, and aircraft flight training supplement, issued for the aircraft by the manufacturer.

Source FARs section 21.193 modified.

21.195 Experimental certificates: aircraft to be used for market surveys, sales demonstrations, and customer crew training

- (1) A manufacturer of aircraft manufactured within Australian territory is eligible to apply for an experimental certificate for an aircraft that is to be used for a purpose mentioned in paragraph 21.191(f).
- (2) A manufacturer of aircraft engines who has altered a type certificated aircraft by installing different engines, manufactured by the manufacturer within Australian territory, is eligible to apply for an experimental certificate for a purpose mentioned in paragraph 21.191(f) if the basic aircraft, before alteration, was type certificated in the normal, acrobatic, commuter, primary, intermediate or transport category.

Regulation 21.195A

-
- (3) A person who has altered the design of a type certificated aircraft is eligible to apply for an experimental certificate for the altered aircraft to be used for a purpose mentioned in paragraph 21.191(f) if the basic aircraft, before alteration, was type certificated in the normal, utility, acrobatic, primary, intermediate or transport category.
 - (4) An applicant for an experimental certificate for a purpose mentioned in paragraph 21.191(f) is entitled to the certificate if, in addition to meeting the requirements of regulation 21.193:
 - (a) the applicant has established an inspection and maintenance program for the continued airworthiness of the aircraft; and
 - (b) the aircraft has been flown for at least 50 hours, or for at least 5 hours if it is a type certificated aircraft which has been modified.

Source FARs section 21.195 modified.

21.195A Issue of experimental certificates

- (1) Subject to regulation 11.055, CASA, an authorised person or a relevant approved design organisation must issue an experimental certificate to an applicant for the certificate if the applicant:
 - (a) is eligible, under regulation 21.192, to apply for the certificate; and
 - (b) applies for the certificate in accordance with this Subpart; and
 - (c) is entitled, under this Subpart, to the certificate; and
 - (d) otherwise complies with this Part.
- (3) A condition imposed on an experimental certificate under regulation 11.056 may include operational limitations.
- (4) Any conditions imposed on an experimental certificate under regulation 11.056, must be in writing and set out in, or attached to, the experimental certificate.

21.195B Duration, production for inspection, suspension and cancellation of experimental certificates

- (1) An experimental certificate issued for the purpose of research and development, showing compliance with regulations, crew training or market surveys, continues in force:
 - (a) if a period of less than one year is specified in the certificate—until the end of the period, or until it is cancelled, whichever occurs first; or
 - (b) in any other case—until the end of the period of one year after the date on which it was issued, or until it is cancelled, whichever occurs first.
- (2) An experimental certificate issued for the purpose of exhibition, air racing, operating amateur-built, kit-built or light sport aircraft or private operations of prototype aircraft previously certificated under paragraph 21.191(a), (b) or (d), continues in force:
 - (a) if a period is specified in the certificate—until the end of the period, or until it is cancelled, whichever occurs first; or

Part 21 Certification and airworthiness requirements for aircraft and parts

Subpart 21.H Certificates of airworthiness (except provisional certificates of airworthiness) and special flight permits

Regulation 21.195B

(b) in any other case—until it is cancelled.

- (3) The holder of an experimental certificate commits an offence if:
- (a) CASA, an authorised person or a relevant approved design organisation asks the holder to make the certificate available for inspection; and
 - (b) the holder does not make the certificate available for inspection in accordance with the request.

Penalty: 50 penalty units.

- (4) An experimental certificate for an aircraft is taken to not be in force for any period during which the aircraft is either not registered in Australia or not listed with a Part 103 ASAO.
- (4A) For the purposes of subregulation (4), the period during which the certificate is taken to not be in force counts as part of the period for which the certificate was issued.
- (5) CASA or an authorised person may suspend or cancel an experimental certificate for an aircraft, by written notice given to its holder, if:
- (a) any maintenance is not carried out in accordance with regulation 42CB of CAR; or
 - (b) CASA or the authorised person otherwise considers that it is necessary to do so in the interests of the safety of other airspace users and persons on the ground or water.
- (6) A notice under subregulation (5) must set out:
- (a) the grounds for the suspension or cancellation; and
 - (b) in the case of a suspension—when the suspension stops having effect.
- (7) Despite anything else in this regulation, an experimental certificate is not in force during any period of suspension, but, if the certificate was issued for a specified period, the period of suspension counts as part of the period for which the certificate was issued.
- (8) The holder of an experimental certificate commits an offence if:
- (a) the certificate is taken to not be in force under subregulation (4), expires or is suspended or cancelled; and
 - (b) CASA, an authorised person or a relevant approved design organisation asks the holder to surrender the certificate; and
 - (c) the holder does not surrender the certificate in accordance with the request.

Penalty: 50 penalty units.

- (9) An offence against subregulation (3) or (8) is an offence of strict liability.

Note 1: For *strict liability*, see section 6.1 of the *Criminal Code*.

Source FARs section 21.181 modified.

Note 2: See also regulations 21.002C and 21.002E in relation to suspension and cancellation of experimental certificates.

21.195C Exercise of certain powers by authorised persons and relevant approved design organisations

An authorised person or a relevant approved design organisation may exercise the following powers in relation to an experimental certificate only if the person or organisation issued the certificate:

- (a) asking the holder to make the certificate available for inspection under subregulation 21.195B(3);
- (b) asking the holder to surrender the certificate under subregulation 21.195B(8).

21.196 Special flight permits: eligibility

Any person is eligible to apply for a special flight permit.

21.197 Special flight permits

- (1) A special flight permit may be issued for one or more of the following purposes for an aircraft that may not currently meet the applicable airworthiness requirements, but can reasonably be expected to be capable of safe flight for the intended purpose:
 - (a) flying the aircraft to a base where repairs, alterations, or maintenance are to be performed, or to a point of storage;
 - (b) delivering or exporting the aircraft;
 - (c) production flight testing new production aircraft;
 - (d) evacuating the aircraft from areas of impending danger;
 - (e) conducting customer demonstration flights in new production aircraft that have satisfactorily completed production flight tests;
 - (f) assisting in searching for, bringing aid to or rescuing persons in danger on a particular occasion;
 - (g) assisting in dealing with a state of emergency.
- (2) A special flight permit may authorise the operation of an aircraft at a weight in excess of its maximum take-off weight for flight beyond the normal range over water, or over land areas where adequate landing facilities or appropriate fuel is not available. The excess weight that may be authorised under this paragraph is limited to the additional fuel, fuel-carrying facilities, and navigation equipment necessary for the flight.
- (3) For subsection 20AA(1) of the Act, an aircraft with a special flight permit, except a special flight permit issued for a purpose mentioned in paragraph (1)(b), is not required to be registered.
- (4) For paragraph 20AA(3)(a) of the Act, an aircraft with a special flight permit is not required to have a certificate of airworthiness.
- (6) If CASA or an authorised person issues a special flight permit for an aircraft, CASA or the authorised person may direct that any of the following do not apply in relation to the aircraft while the permit is in force:

Part 21 Certification and airworthiness requirements for aircraft and parts

Subpart 21.H Certificates of airworthiness (except provisional certificates of airworthiness) and special flight permits

Regulation 21.199

- (a) paragraph 91.145(2)(c);
- (b) paragraph 91.145(2)(d);
- (c) Division 91.C.3.

Source FARs section 21.197 modified.

21.199 Applications for special flight permits

- (1) An applicant for a special flight permit must submit a statement to CASA or an authorised person, indicating the following:
 - (a) the purpose or purposes of the flight;
 - (b) the proposed itinerary;
 - (c) the crew required to operate the aircraft and its equipment, for example, pilot, co-pilot, navigator;
 - (d) the ways, if any, in which the aircraft does not comply with the applicable airworthiness requirements;
 - (e) any restriction the applicant considers necessary for safe operation of the aircraft;
 - (f) any other information that CASA or the authorised person reasonably needs to be able to prescribe operating limitations or other conditions in the interests of aviation safety.
- (2) CASA or an authorised person may make, or require the applicant to make, appropriate inspections or tests necessary to determine whether the aircraft can reasonably be expected to be capable of safe flight for the intended purpose or purposes.

Source FARs section 21.199 modified.

21.200 Issue of special flight permits

- (1) Subject to subregulation (1A) and regulation 11.055, CASA or an authorised person must issue a special flight permit to an applicant for the permit if the applicant:
 - (a) is eligible, under regulation 21.196, to apply for the permit; and
 - (b) applies for the permit in accordance with this Subpart; and
 - (c) otherwise complies with this Part.
- (1A) CASA or an authorised person must not issue a special flight permit for an aircraft if:
 - (a) the aircraft is covered by an airworthiness directive (within the meaning of regulation 39.002); and
 - (b) the airworthiness directive includes a statement to the effect that a special flight permit must not be issued for an aircraft covered by the airworthiness directive.
- (3) A condition imposed on a special flight permit under regulation 11.056 may include operational limitations.

Regulation 21.201

- (4) Any conditions imposed on a special flight permit under regulation 11.056, and any conditions imposed under regulation 21.016 or 21.029B that limit the use of the aircraft, must be in writing and set out in, or attached to, the special flight permit.

21.201 Inspection, suspension and cancellation of special flight permits

- (2) The holder of a special flight permit must, on the request of CASA or an authorised person, make it available for inspection by CASA or an authorised person.

Penalty: 5 penalty units.

- (2A) An offence against subregulation (2) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (3) CASA or an authorised person may suspend or cancel a special flight permit, by written notice given to its holder, if CASA or the authorised person considers that it is necessary to do so in the interests of aviation safety.

- (4) A notice under subregulation (3) must set out:

- (a) the grounds for the suspension or cancellation; and
(b) in the case of a suspension—when the suspension stops having effect.

Source FARs section 21.181 modified.

Note: See also regulations 21.002C and 21.002E in relation to suspension and cancellation of special flight permits.

Regulation 21.211

Subpart 21.I—Provisional certificates of airworthiness

Note: A provisional certificate of airworthiness issued under this Part for an aircraft, aircraft engine or propeller does not certify that it complies with the *Air Navigation (Aircraft Noise) Regulations 2018*, the Air Navigation (Aircraft Engine Emissions) Regulations or any other applicable Commonwealth legislation. Compliance with those Regulations or other applicable Commonwealth legislation may be required before the aircraft, aircraft engine or propeller may be legally operated.

21.211 Applicability

This Subpart prescribes requirements for the issue of provisional certificates of airworthiness.

Source FARs section 21.211 modified.

21.213 Eligibility

- (1) A manufacturer is eligible to apply for a Class I or Class II provisional certificate of airworthiness for aircraft manufactured by the manufacturer in Australian territory.
- (2) The holder of an Australian air transport AOC that authorises scheduled air transport operations is eligible to apply for a Class II provisional certificate of airworthiness for transport category aircraft if:
 - (a) the aircraft has a current Class II provisional type certificate or a current amendment of a Class II provisional type certificate; or
 - (b) the aircraft has a current provisional amendment to a type certificate that was preceded by a corresponding Class II provisional type certificate.
- (3) An aircraft engine manufacturer who has altered a type certificated aircraft by installing different type certificated engines, manufactured by the aircraft engine manufacturer in Australian territory, is eligible to apply for a Class I provisional certificate of airworthiness for that aircraft, if the basic aircraft, before alteration, was type certificated in the normal, utility, acrobatic, commuter, primary, intermediate or transport category.

Source FARs section 21.213 modified.

21.215 Application

Application for a provisional certificate of airworthiness may be submitted to CASA. The application must be accompanied by the pertinent information specified in these Regulations.

Source FARs section 21.215 modified.

21.216 Issue of provisional certificates of airworthiness

Subject to regulation 11.055, CASA must issue a provisional certificate of airworthiness to an applicant for the certificate if the applicant:

- (a) is eligible, under regulation 21.213, to apply for the certificate; and
- (b) applies for the certificate in accordance with this Subpart; and
- (c) is entitled, under this Subpart, to the certificate; and
- (d) otherwise complies with this Part.

21.217 Duration

- (1) Unless sooner cancelled, provisional certificates of airworthiness are effective for the duration of the corresponding provisional type certificate, amendment to a provisional type certificate, or provisional amendment to the type certificate.
- (2) Despite subregulation (1), a provisional certificate of airworthiness is not in force during any period of suspension.
- (3) CASA may suspend or cancel a provisional certificate of airworthiness, by written notice given to its holder, if CASA considers that it is necessary to do so in the interests of aviation safety.
- (4) A notice must set out:
 - (a) the grounds for the suspension or cancellation; and
 - (b) in the case of a suspension—when the suspension stops having effect.

Source FARs section 21.217 modified.

Note: See also regulations 21.002C and 21.002E in relation to suspension and cancellation of provisional certificates of airworthiness.

21.219 Transferability

A Class II provisional certificate of airworthiness may be transferred to an AOC holder eligible to apply for a certificate under subregulation 21.213(2).

Source: FARs section 21.219 modified.

21.221 Class I provisional certificates of airworthiness

- (1) Except as provided in regulation 21.225, an applicant who holds a Class I provisional type certificate for an aircraft is entitled to a Class I provisional certificate of airworthiness for the aircraft if:
 - (a) the applicant meets the eligibility requirements of regulation 21.213; and
 - (b) CASA is satisfied that the requirements of this regulation are satisfied and that there is no feature, characteristic or condition of the aircraft that would make the aircraft unsafe when operated in accordance with the requirements and limitations under subregulation 21.081(4) and Division 91.T.3.
- (2) The manufacturer must hold a provisional type certificate for the aircraft.
- (3) The manufacturer must submit a statement that the aircraft conforms to the type design corresponding to the provisional type certificate and has been found by the manufacturer to be in safe operating condition under all applicable limitations.

Regulation 21.223

- (4) The aircraft must be flown at least five hours by the manufacturer.
- (5) The aircraft must be supplied with a provisional aircraft flight manual or other document and appropriate placards containing the requirements and limitations under subregulation 21.081(4) and Division 91.T.3.

Source FARs section 21.221 modified.

21.223 Class II provisional certificates of airworthiness

- (1) Except as provided in regulation 21.225, an applicant who holds a Class II provisional type certificate for an aircraft is entitled to a Class II provisional certificate of airworthiness for the aircraft if:
 - (a) the applicant meets the eligibility requirements of regulation 21.213; and
 - (b) CASA is satisfied that the requirements of this regulation are satisfied and that there is no feature, characteristic, or condition of the aircraft that would make the aircraft unsafe when operated in accordance with the requirements and limitations under subregulation 21.083(7) and Division 91.T.3.
- (2) The applicant must show that a Class II provisional type certificate for the aircraft has been issued to the manufacturer.
- (3) The applicant must submit a statement by the manufacturer that the aircraft has been manufactured under a quality system adequate to ensure that the aircraft conforms to the type design corresponding with the provisional type certificate.
- (4) The applicant must submit a statement that the applicant has found the aircraft to be in a safe operating condition under the applicable limitations.
- (5) The aircraft must be flown at least five hours by the manufacturer.
- (6) The aircraft must be supplied with a provisional aircraft flight manual containing the requirements and limitations under subregulation 21.083(7) and Division 91.T.3.

Source FARs section 21.223 modified.

21.225 Provisional certificates of airworthiness corresponding with provisional amendments to type certificates

- (1) An applicant is entitled to a Class I or a Class II provisional certificate of airworthiness for an aircraft for which a provisional amendment to the type certificate has been issued, if:
 - (a) the applicant meets the eligibility requirements of regulation 21.213; and
 - (b) CASA is satisfied that the requirements of this regulation are satisfied and that there is no feature, characteristic, or condition of the aircraft, as modified in accordance with the provisionally amended type certificate, that would make the aircraft unsafe when operated in accordance with the applicable requirements and limitations under subregulation 21.085(6) and Division 91.T.3.

Regulation 21.225

- (2) The applicant must show that the modification was made under a quality system adequate to ensure that the modification conforms to the provisionally amended type certificate.
- (3) The applicant must submit a statement that the applicant has found the aircraft to be in a safe operating condition under the applicable limitations.
- (4) The aircraft must be flown at least five hours by the manufacturer.
- (5) The aircraft must be supplied with a provisional aircraft flight manual or other document and appropriate placards containing the requirements and limitations under subregulation 21.085(6) and Division 91.T.3.

Source FARs section 21.225 modified.

Subpart 21.J—Approved design organisations

Division 21.J.1—General

21.231 What Subpart 21.J is about

This Subpart sets out matters relating to approved design organisations including:

- (a) requirements for approval as an approved design organisation; and
- (b) the privileges and obligations of approved design organisations.

21.233 Definitions for Subpart 21.J

In this Subpart:

accountable manager, for an approved design organisation, means the individual, appointed by the organisation, who is responsible for:

- (a) ensuring that the organisation complies with its exposition and design assurance system and these Regulations; and
- (b) ensuring that the organisation is able to finance the carrying out of the design activities stated in its approval certificate; and
- (c) ensuring that the organisation has adequate resources available to enable the organisation to carry out design activities in accordance with its exposition and design assurance system.

advice activity means giving advice under regulation 21.007A.

approval activity means any of the following:

- (aa) approving an aircraft flight manual under regulation 21.006;
- (a) approving a change to an aircraft flight manual under regulation 21.006A;
- (b) approving a defect in an Australian aircraft as a permissible unserviceability under regulation 21.007;
- (c) approving technical data under regulation 21.009;
- (d) approving a minor change in a type design under regulation 21.095;
- (e) approving a major change in a type design under regulation 21.098;
- (ea) varying a supplemental type certificate under regulation 21.120B;
- (f) approving the design of a Class II or Class III product under regulation 21.132A;
- (g) approving a material, part, process or appliance under regulation 21.305A;
- (h) granting a modification/repair design approval under regulation 21.437;
- (i) approving an imported aircraft engine or propeller under regulation 21.500A;
- (j) approving an imported material, part or appliance under regulation 21.502A;

- (k) under regulation 11.067, imposing a condition on, or varying a condition of, an approval mentioned in any of paragraphs (a) to (j);
- (l) under Subpart 11.D, varying an approval mentioned in any of paragraphs (a) to (j).

approval certificate, for an approved design organisation, means the certificate issued to the organisation under regulation 21.245.

carries out a design activity: an approved design organisation **carries out a design activity** if the activity is carried out on the organisation's behalf by:

- (a) an employee of the organisation; or
- (b) a subcontractor of the organisation.

certification activity means any of the following:

- (a) certifying to CASA under subregulation 21.013A(3) that an applicant for a type certificate meets a criterion for entitlement to the certificate, other than the requirement under paragraph 21.021(b) that any airworthiness provisions not complied with are compensated for by factors that provide an equivalent level of safety;
- (b) certifying to CASA under subregulation 21.095(5) that a type design, as modified by a minor change, would meet a requirement of this Part;
- (c) certifying to CASA under subregulation 21.098(3) that an applicant meets a requirement mentioned in subregulation 21.098(1);
- (d) certifying to CASA under subregulation 21.115(3) that an altered aircraft, aircraft engine or propeller meets:
 - (i) an applicable airworthiness requirement mentioned in subparagraph 21.115(1)(a)(i); or
 - (ii) the requirement mentioned in paragraph 21.115(1)(b);
- (da) certifying to CASA under subregulation 21.120B(6) that an altered aircraft, aircraft engine or propeller meets:
 - (i) an applicable airworthiness requirement mentioned in subparagraph 21.120B(3)(a)(i); or
 - (ii) the requirement mentioned in paragraph 21.120B(3)(b);
- (e) certifying to CASA under subregulation 21.132A(6) that the design of a Class II or Class III product meets the applicable airworthiness standards for the product;
- (f) certifying to CASA under subregulation 21.303(4C) that a design for a part meets the airworthiness requirements of these Regulations applicable to the aircraft, aircraft engine or propeller on which the part is to be installed;
- (g) certifying to CASA under subregulation 21.420(5) that a design complies with the applicable airworthiness requirements for the design;
- (h) certifying to CASA under subregulation 21.605(7) that a design for an article complies with the applicable ATSO, ETSO or TSO for the article, including any deviations approved under regulation 21.609;
- (i) conducting or observing any tests or inspections for the purpose of a certification mentioned in paragraphs (a) to (h).

Regulation 21.233

design activity means any of the following:

- (a) an advice activity;
- (b) an approval activity;
- (c) a certification activity;
- (d) an experimental certificate activity.

design assurance system, for an approved design organisation, means the system described in the organisation's design assurance system manual.

design assurance system manual, for an approved design organisation, means:

- (a) the manual approved by CASA under paragraph 21.243(7)(b) in relation to the organisation; and
- (b) if a change to the manual is approved under regulation 21.253 or 21.255—the manual as changed; and
- (c) if the manual is changed under regulation 21.256—the manual as changed.

design responsibility, for an approved design organisation, means responsibility to the accountable manager for ensuring that the organisation complies with its exposition and design assurance system manual and these Regulations in carrying out design activities.

experimental certificate activity means any of the following:

- (a) issuing an experimental certificate under regulation 21.195A;
- (b) under regulation 11.067, imposing a condition on, or varying a condition of, an experimental certificate;
- (c) under Subpart 11.D, varying an experimental certificate;
- (d) asking the holder of an experimental certificate, under subregulation 21.195B(3), to make the certificate available for inspection;
- (e) asking the holder of an experimental certificate, under subregulation 21.195B(8), to surrender the certificate.

exposition, for an approved design organisation, means:

- (a) the document approved by CASA under paragraph 21.243(7)(a) in relation to the organisation; and
- (b) if a change to the document is approved under regulation 21.253 or 21.255—the document as changed; and
- (c) if the document is changed under regulation 21.259 or 21.261—the document as changed.

head of design, for an approved design organisation, means the individual, appointed by the organisation, who has design responsibility for the organisation.

subcontractor, in relation to an approved design organisation, means a person who:

- (a) is a party to a written contract with the organisation to carry out a design activity, or part of a design activity, on behalf of the organisation; and
- (b) is not an employee of the organisation.

21.235 Privileges for approved design organisations

- (1) An approved design organisation may carry out a design activity, other than a certification activity, in relation to an aircraft or aeronautical product only if the organisation is approved under regulation 21.243 to carry out the activity in relation to aircraft or aeronautical products of that kind.
- (2) An approved design organisation may carry out a certification activity in relation to an aircraft or aeronautical product and an application mentioned in subregulation 21.251(1) only if:
 - (a) the organisation is approved under regulation 21.243 to carry out the activity in relation to aircraft or aeronautical products of that kind; and
 - (b) CASA authorises the organisation under regulation 21.251 to carry out the activity in relation to the application.

21.237 Prohibition of unauthorised carrying out of design activities

- (1) A person commits an offence if:
 - (a) the person carries out a design activity; and
 - (b) the person does not meet the requirement mentioned in subregulation (2).

Penalty: 50 penalty units.

- (2) For paragraph (1)(b), the requirement is that the person is:
 - (a) an approved design organisation that is permitted to carry out the design activity under regulation 21.235; or
 - (b) if the provision under which the activity is carried out provides that an authorised person may carry out the activity—an authorised person for the provision; or
 - (c) if the provision under which the activity is carried out provides that CASA may carry out the activity—CASA.
- (3) Subregulation (1) does not apply to a person who carries out a design activity on behalf of an approved design organisation if:
 - (a) the person is:
 - (i) an employee of the organisation; or
 - (ii) a subcontractor of the organisation; and
 - (b) the organisation is permitted under regulation 21.235 to carry out the design activity; and
 - (c) the person is authorised, in writing, by the organisation to carry out the design activity on behalf of the organisation.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (3): see subsection 13.3(3) of the *Criminal Code*.

- (4) Subregulation (1) does not apply to a person who carries out a design activity on behalf of a subcontractor of an approved design organisation if:
 - (a) the person is an employee of the subcontractor; and

Regulation 21.239

- (b) the organisation is permitted under regulation 21.235 to carry out the design activity; and
- (c) the subcontractor is authorised, in writing, by the organisation to carry out the design activity on behalf of the organisation; and
- (d) the person is authorised, in writing, by the subcontractor to carry out the design activity on behalf of the subcontractor.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (4): see subsection 13.3(3) of the *Criminal Code*.

- (5) An offence against this regulation is an offence of strict liability.

21.239 Applications may be made to approved design organisation—approval activities and experimental certificates

Despite anything else in this Part, if an approved design organisation is a relevant approved design organisation in relation to an approval activity or the issue of an experimental certificate under regulation 21.195A:

- (a) an application for the approval or experimental certificate may be made to the approved design organisation; and
- (b) a reference in this Part to CASA includes a reference to the approved design organisation in relation to:
 - (i) the application for the approval or experimental certificate; and
 - (ii) if the organisation grants the approval or experimental certificate—the approval or experimental certificate.

Division 21.J.2—Approval as approved design organisation

21.241 Applying for approval

- (1) A person may apply, in writing, to CASA for approval as an approved design organisation.
- (2) The application must include:
 - (a) an outline of:
 - (i) the design activities that the applicant proposes to carry out; and
 - (ii) the aircraft or aeronautical products in relation to which the applicant proposes to carry out those design activities; and
 - (iii) the applicant's procedures for carrying out those design activities; and
 - (iv) the applicant's organisational structure; and
 - (b) the names of the applicant's accountable manager and head of design; and
 - (c) if the applicant intends to subcontract a design activity, or part of a design activity, that it proposes to carry out—a statement explaining the arrangement under which the design activity, or that part of the design activity, will be carried out by a subcontractor.
- (3) The applicant must give CASA, with the application or subsequently:
 - (a) a copy of the applicant's proposed exposition; and
 - (b) a copy of the applicant's proposed design assurance system manual.

21.243 Granting approval

- (1) If the applicant gives CASA the documents mentioned in subregulation 21.241(3), CASA must make a decision on the application.
 - (2) Subject to regulation 11.055, CASA must approve the applicant as an approved design organisation if:
 - (a) subregulation (4) does not apply to the applicant; and
 - (b) CASA is satisfied that the applicant meets the requirements mentioned in subregulation (5).
 - (3) Subject to regulation 11.055, CASA must approve the applicant as an approved design organisation if:
 - (a) subregulation (4) applies to the applicant; and
 - (b) CASA is satisfied that:
 - (i) the applicant meets the requirements mentioned in subregulation (5); and
 - (ii) CASA would not be placed under an undue burden in administering the approval.
 - (4) This subregulation applies to an applicant that:
 - (a) is not an Australian resident or a corporation registered in Australia; or
 - (b) carries on business outside Australian territory.
-

Part 21 Certification and airworthiness requirements for aircraft and parts

Subpart 21.J Approved design organisations

Division 21.J.2 Approval as approved design organisation

Regulation 21.243

- (5) For paragraph (2)(b) and subparagraph (3)(b)(i), the requirements are the following:
- (a) the applicant's proposed exposition must:
 - (i) contain the information mentioned in regulation 21.263; and
 - (ii) be consistent with the applicant's proposed design assurance system manual;
 - (b) the design assurance system described in the applicant's proposed design assurance system manual must meet the requirements mentioned in regulations 21.269 and 21.270;
 - (c) the applicant must have established and be able to maintain the design assurance system;
 - (d) the applicant:
 - (i) must have sufficient appropriately qualified and experienced personnel to carry out each design activity mentioned in the applicant's proposed exposition; and
 - (ii) must have facilities that are appropriate for carrying out each design activity mentioned in the applicant's proposed exposition; and
 - (iii) must have, or have access to, the equipment, tools and up-to-date design reference data (in electronic form or otherwise) necessary for carrying out each design activity mentioned in the applicant's proposed exposition;
 - (e) the individual named in the application as the applicant's accountable manager must:
 - (i) have the authority to carry out the responsibilities of the position; and
 - (ii) understand the responsibilities of the position; and
 - (iii) have the knowledge, qualifications and experience required by the organisation's exposition for the position;
 - (f) the individual named in the application as the applicant's head of design must have:
 - (i) knowledge, qualifications and experience that are suitable for the position; and
 - (ii) the knowledge, qualifications and experience required by the organisation's exposition for the position.
- (6) If CASA decides to approve an applicant as an approved design organisation, CASA must determine:
- (a) the design activities that the applicant is approved to carry out; and
 - (b) the aircraft and aeronautical products in relation to which the applicant is approved to carry out those design activities; and
 - (c) if the applicant is approved to grant a modification/repair design approval under regulation 21.437—whether the applicant is approved to make an equivalent level of safety determination under regulation 21.436.
- (7) If CASA approves an applicant, CASA is taken to have also approved the applicant's proposed:
- (a) exposition; and

- (b) design assurance system manual.

21.245 Approval certificate

- (1) If CASA approves an applicant as an approved design organisation, CASA must issue a certificate of approval setting out:
 - (a) the name of the organisation; and
 - (b) the matters mentioned in subregulation 21.243(6).
- (2) The certificate issued by CASA must include an approval certificate reference number determined by CASA.
- (3) CASA must issue a new approval certificate to an approved design organisation if:
 - (a) CASA approves, under regulation 21.253, a change to the scope of the organisation's approval; or
 - (b) the organisation gives CASA written notice, under regulation 21.259, that it has changed its name.

21.247 Approval subject to conditions—general

- (1) It is a condition of approval of an approved design organisation that the organisation must:
 - (a) comply with this Subpart, its exposition and its design assurance system manual; and
 - (b) ensure that its employees and subcontractors, and the personnel holding the positions mentioned in paragraph 21.263(1)(c), comply with this Subpart and the organisation's exposition and design assurance system manual; and
 - (c) ensure that its exposition is consistent with its design assurance system manual; and
 - (d) ensure that no design activity that the organisation carries out introduces an unsafe feature or characteristic into the design of the aircraft or aeronautical product to which the design activity relates; and
 - (e) ensure that the organisation's design assurance system maintains satisfactory control and supervision of each design activity that the organisation carries out; and
 - (f) comply with each direction given to it under subregulation (2).
- (2) For paragraph (1)(f), CASA may issue a direction to an approved design organisation setting out:
 - (a) information that the approved design organisation must give to CASA; and
 - (b) the times when the organisation must give that information to CASA.

21.248 Approval subject to conditions—holders of other authorisations under Part 21 and licensees

- (1) If the organisation is also the holder of another authorisation (however described) under this Part, it is a condition of the organisation's approval that the
-

Part 21 Certification and airworthiness requirements for aircraft and parts

Subpart 21.J Approved design organisations

Division 21.J.2 Approval as approved design organisation

Regulation 21.249

organisation must comply with its obligations under this Part as the holder of the other authorisation.

Examples: The following are some other authorisations under this Part:

- (a) a type certificate;
 - (b) a supplemental type certificate;
 - (c) a production certificate;
 - (d) an APMA;
 - (e) a modification/repair design approval;
 - (f) an approval mentioned in regulation 21.475;
 - (g) an ATSO authorisation.
- (2) If the organisation is also the licensee of a type certificate or supplemental type certificate, it is a condition of the organisation's approval that the organisation must comply with its obligations under this Part as the licensee of the certificate.

21.249 Cancellation, suspension and variation of approval

- (1) CASA may cancel, suspend or vary an approval, by written notice given to its holder, if the holder does not comply, or ceases to comply, with this Subpart.
- (2) A notice under subregulation (1) must state:
 - (a) the grounds for the suspension or cancellation; and
 - (b) for a suspension—when the suspension will cease to have effect; and
 - (c) for a variation—the terms of the variation.
- (3) A cancellation, suspension or variation under this regulation takes effect when the holder of the authorisation is given the notice.
- (4) If an approval is suspended under this regulation, the approval is not in force during the period of the suspension.

Division 21.J.3—Authorisation to carry out particular certification activity

21.251 Authorisation of approved design organisations to carry out certification activities

- (1) If CASA receives an application for any of the following, CASA may authorise an approved design organisation to carry out a certification activity in relation to the application:
 - (a) a type certificate;
 - (b) approval of a change to a type design;
 - (c) a supplemental type certificate;
 - (ca) a variation of a supplemental type certificate;
 - (d) approval of the design of a Class II or Class III product;
 - (e) an APMA;
 - (f) a modification/repair design approval;
 - (g) an ATSO authorisation.
- (2) However, CASA may authorise the approved design organisation to carry out the certification activity only if:
 - (a) the organisation is approved to carry out certification activities of that kind in relation to aircraft or aeronautical products of the kind to which the application relates; and
 - (b) the applicant nominates the approved design organisation to carry out the certification activity; and
 - (c) CASA is satisfied that the organisation is capable of determining accurately the matter to which the certification activity relates.
- (3) If CASA authorises the approved design organisation to carry out the certification activity, CASA must give written notice of the authorisation to the applicant and the organisation.

Division 21.J.4—Changes to approved design organisations

21.253 Application for approval of change to scope of approval

- (1) If an approved design organisation proposes to make a change to either of the following, the organisation must apply to CASA for approval of the change:
 - (a) the design activities that the organisation is approved to carry out;
 - (b) the aircraft and aeronautical products in relation to which the organisation is approved to carry out those design activities.
- (2) The application must:
 - (a) be in writing; and
 - (b) state the proposed change; and
 - (c) be accompanied by a copy of the part of the organisation's exposition and design assurance system manual affected by the proposed change, clearly identifying the proposed change.
- (3) Subject to regulation 11.055, CASA must approve the change if satisfied that the requirements mentioned in subregulation 21.243(5) will continue to be met.
- (4) If CASA approves the change, CASA is taken to have also approved the changes to the organisation's exposition and design assurance system manual covered by the application.

21.255 Application for approval of change to design assurance system

- (1) If an approved design organisation proposes to make a change to its design assurance system, the organisation must apply to CASA for approval of the change.
- (2) The application must:
 - (a) be in writing; and
 - (b) state the proposed change; and
 - (ba) be accompanied by a copy of the part of the organisation's design assurance system manual affected by the proposed change, clearly identifying the proposed change; and
 - (c) if the proposed change requires a change to the organisation's exposition—be accompanied by a copy of the part of the exposition affected by the proposed change, clearly identifying the proposed change.
- (3) Subject to regulation 11.055, CASA must approve a change to a design assurance system if satisfied that the requirements mentioned in regulations 21.269 and 21.270 will continue to be met.
- (4) If CASA approves the change, CASA is taken to have also approved:
 - (a) the change to the organisation's design assurance system manual covered by the application; and
 - (b) the change to the organisation's exposition covered by the application.

21.256 Change to design assurance system manual at direction of CASA

- (1) CASA may, if satisfied that it is necessary in the interests of the safety of air navigation, direct an approved design organisation to make a specified change to its design assurance system manual within the time specified in the direction.
- (2) The organisation commits an offence if the organisation does not, within the specified time:
 - (a) comply with the direction; and
 - (b) if the change requires a change to the organisation's exposition:
 - (i) update its exposition; and
 - (ii) give CASA a copy of the updated part of the exposition.

Penalty: 50 penalty units.

- (3) An offence against this regulation is an offence of strict liability.

21.257 Application for approval of permanent appointment of new accountable manager or head of design

- (1) If an approved design organisation wishes to appoint an individual permanently as the organisation's accountable manager or head of design, the organisation must apply to CASA for approval of the appointment.
- (2) The application must:
 - (a) be in writing; and
 - (b) state the name of the proposed appointee and the position to which he or she is to be appointed; and
 - (c) be accompanied by a copy of the part of the exposition affected by the proposed appointment, clearly identifying the changes relating to the proposed appointment.
- (3) Subject to regulation 11.055, CASA must approve the appointment if satisfied that the appointee has:
 - (a) for an appointment of an accountable manager:
 - (i) authority to carry out the responsibilities of the position; and
 - (ii) an understanding of the responsibilities of the position; and
 - (iii) the knowledge, qualifications and experience required by the organisation's exposition for the position; or
 - (b) for an appointment of a head of design:
 - (i) knowledge, qualifications and experience that are suitable for the position; and
 - (ii) the knowledge, qualifications and experience required by the organisation's exposition for the position.
- (4) If CASA approves the change, CASA is taken to have also approved the change to the organisation's exposition covered by the application.

Regulation 21.258

21.258 Permanent appointment of other key personnel—requirement to tell CASA

- (1) An approved design organisation commits an offence if:
 - (a) the organisation permanently appoints an individual to a position mentioned in subparagraph 21.263(1)(c)(iii) or (iv); and
 - (b) the organisation does not, within 7 days after the change, give CASA written notice of the change.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

21.259 Change to exposition by organisation

- (1) An approved design organisation commits an offence if:
 - (a) the organisation undergoes a change that renders its exposition inaccurate; and
 - (b) the change is not a change mentioned in regulation 21.253, 21.255, 21.256 or 21.257; and
 - (c) the organisation does not, within 30 days after undergoing the change:
 - (i) update its exposition; and
 - (ii) give CASA written notice of the change and a copy of the updated part of the exposition.

Penalty: 50 penalty units.

- (2) An approved design organisation commits an offence if:
 - (a) the organisation makes a change to its exposition; and
 - (b) the change is not a change mentioned in regulation 21.253, 21.255, 21.256, 21.257 or 21.261 or subregulation (1); and
 - (c) the organisation does not, within 30 days after making the change, give CASA a copy of the changed part of the exposition.

Penalty: 50 penalty units.

- (3) An offence against this regulation is an offence of strict liability.

21.261 Change to exposition at direction of CASA

- (1) CASA may direct an approved design organisation to change its exposition within a time specified in the direction:
 - (a) to remove particular information from the exposition; or
 - (b) to include particular information in the exposition; or
 - (c) to revise or vary the information in the exposition.
- (2) However, CASA may issue a direction under this regulation only if satisfied that it is necessary to ensure that the exposition contains the information mentioned in regulation 21.263.

Regulation 21.261

- (3) The organisation commits an offence if the organisation does not comply with the direction.

Penalty: 50 penalty units.

- (4) An offence against this regulation is an offence of strict liability.

Division 21.J.5—Obligations of approved design organisations

21.263 Content of exposition

- (1) An exposition for an approved design organisation must contain the following:
 - (a) the name of the organisation;
 - (b) a detailed description of the matters mentioned in paragraph 21.241(2)(a);
 - (c) the responsibilities of the following positions in the organisation:
 - (i) accountable manager;
 - (ii) head of design;
 - (iii) each other managerial position;
 - (iv) each position held by a person who carries out a design activity;
 - (d) the qualifications, experience and knowledge required by the organisation for each position mentioned in paragraph (c);
 - (e) the name of each individual holding a position mentioned in paragraph (c);
 - (f) a description of how the organisation will manage the responsibilities of a position mentioned in paragraph (c) for any period during which the position is vacant or the occupant of the position is unable to carry out the responsibilities of the position;
 - (g) if the organisation subcontracts a design activity, or part of a design activity, that it carries out—a description of the procedures that the organisation uses to manage the activities of the subcontractor;
 - (h) if the organisation carries out a design activity, other than a certification activity, that relies on another design activity being carried out by another approved design organisation—a description of the procedures that the organisation uses to coordinate the design activities;
 - (i) a description of the way the organisation will dispose of the documents and records mentioned in subregulation 21.277(2) if the organisation ceases to be an approved design organisation;
 - (j) a description of the organisation's process for making changes to its exposition or design assurance system manual.
- (2) The qualifications, experience and knowledge mentioned in paragraph (1)(d) must meet the requirements prescribed by the Part 21 Manual of Standards.

21.265 Compliance with exposition

- (1) An approved design organisation commits an offence if the organisation contravenes a provision of its exposition.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

21.267 Design assurance system

An approved design organisation must have a design assurance system that meets the requirements of regulations 21.269 and 21.270.

21.269 Requirements for design assurance system—general

- (1) The design assurance system must include policies and procedures for the conduct of design activities that the organisation is approved to carry out.
- (2) The design assurance system must enable the organisation to ensure that:
 - (a) each design activity that the organisation carries out is controlled and managed in a way that ensures that the aircraft or aeronautical product in relation to which the activity is carried out complies with the applicable airworthiness standards for the aircraft or aeronautical product; and
 - (b) no design activity that the organisation carries out introduces an unsafe feature or characteristic to an aircraft or aeronautical product to which the activity relates; and
 - (c) each design activity that the organisation is approved to carry out is carried out in accordance with:
 - (i) this Part; and
 - (ii) the conditions of the organisation's approval.
- (3) The design assurance system must include procedures for:
 - (a) independent monitoring of:
 - (i) the adequacy of the design assurance system to enable the organisation to ensure the matters mentioned in subregulation (2); and
 - (ii) compliance by the organisation and its subcontractors (if any) with the requirements of the design assurance system; and
 - (b) providing feedback to the organisation's head of design.
- (4) The design assurance system must also include procedures for independent checking of each design activity the organisation carries out to ensure that:
 - (a) each aircraft or aeronautical product to which the design activity relates complies with the applicable airworthiness requirements (if any) for the aircraft or aeronautical product; and
 - (b) for an approval activity—carrying out the activity would not be likely to have an adverse effect on the safety of air navigation; and
 - (c) for an experimental certificate activity—carrying out the activity would not be likely to have an adverse effect on the safety of other airspace users or persons on the ground or water.
- (5) For subregulation (4), independent checking of a design activity must:
 - (a) involve a comprehensive and systematic examination of the activity to evaluate the adequacy and accuracy of its assumptions, methodology, calculations and conclusions; and
 - (b) be carried out by an individual who has the knowledge, experience and qualifications:

Part 21 Certification and airworthiness requirements for aircraft and parts

Subpart 21.J Approved design organisations

Division 21.J.5 Obligations of approved design organisations

Regulation 21.270

- (i) required by the organisation's exposition for individuals carrying out the design activity; or
 - (ii) prescribed by the Part 21 Manual of Standards; and
 - (c) be thoroughly documented.
- (5A) The individual mentioned in paragraph (5)(b) must not be the individual who carried out the design activity for the organisation.
- (6) Subregulation (4) does not apply to an activity mentioned in paragraph (d) or (e) of the definition of *experimental certificate activity* in regulation 21.233.
- (7) Subregulation (4) does not apply in relation to a kind of design activity prescribed by the Part 21 Manual of Standards.

21.270 Requirements for design assurance system—holders of other authorisations under Part 21 and licensees

- (1) If the organisation is also the holder of another authorisation (however described) under this Part, the design assurance system must include policies and procedures to enable the organisation to comply with its obligations under this Part as the holder of the other authorisation.

Examples: The following are some other authorisations under this Part:

- (a) a type certificate;
 - (b) a supplemental type certificate;
 - (c) a production certificate;
 - (d) an APMA;
 - (e) a modification/repair design approval;
 - (f) an approval mentioned in regulation 21.475;
 - (g) an ATSO authorisation.
- (2) If the organisation is also the licensee of a type certificate or supplemental type certificate, the design assurance system must include policies and procedures to enable the organisation to comply with its obligations under this Part as the licensee of the certificate.

21.271 Compliance with design assurance system manual

- (1) An approved design organisation commits an offence if the organisation contravenes a provision of its design assurance system manual.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

21.273 Audit of approved design organisation by CASA

- (1) CASA may audit an approved design organisation to determine its compliance with the conditions of its approval.
- (2) For the audit, CASA may, by written notice given to the organisation, direct the organisation to give CASA, within a time stated in the notice:

- (a) stated information and records demonstrating that the organisation has complied with the conditions of its approval; and
 - (b) any other information and records stated in the notice that are relevant to the audit.
- (3) For the audit, CASA may, by written notice given to the organisation, direct the organisation to give CASA, at stated periods, reports on the conduct of design activities by the organisation.
- (4) The organisation commits an offence if the organisation does not comply with a direction under subregulation (2) or (3).
- Penalty: 50 penalty units.
- (5) An offence against this regulation is an offence of strict liability.

21.275 Inspections and observations

- (1) To determine whether the organisation is complying with the conditions of its approval, CASA may, by written notice given to the organisation, direct an approved design organisation to allow CASA:
- (a) to inspect the following:
 - (i) facilities at which the organisation carries out design activities;
 - (ii) equipment and tools used by the organisation in carrying out design activities;
 - (iii) aircraft and aeronautical products in relation to which the organisation carries out design activities; or
 - (b) to observe the organisation carrying out a design activity.
- (2) The organisation commits an offence if the organisation does not comply with the direction.
- Penalty: 50 penalty units.
- (3) An offence against this regulation is an offence of strict liability.

21.277 Record keeping and production of records to CASA

- (1) An approved design organisation commits an offence if the organisation does not retain the documents and records mentioned in subregulation (2) until at least 12 months after the organisation's approval ceases to be in force.
- Penalty: 50 penalty units.
- (2) For subregulation (1), the documents and records are:
- (a) for each approval or certificate issued by the organisation—the technical data, documents and records relating to the issue of the approval or certificate; and

Regulation 21.279

- (b) for each occasion on which the organisation provided advice under regulation 21.007A—the technical data, documents and records relating to the provision of the advice; and
 - (c) a list identifying, by make, model and serial number, each aircraft or aeronautical product in relation to which the organisation has carried out a design activity; and
 - (d) for each aircraft or aeronautical product in relation to which the organisation has carried out a design activity—a description of the nature of the activity.
- (3) Despite regulations 11.132, 21.002C and 21.249, if an approval is suspended under these Regulations, then, for subregulation (1), the approval is taken to remain in force during the period of suspension.
- (4) CASA may, by written notice given to the organisation, direct an approved design organisation to make the documents and records, or copies or extracts of them, available for inspection by CASA at a time and place stated in the notice.
- (5) The organisation commits an offence if the organisation does not comply with the direction.
- Penalty: 50 penalty units.
- (6) An offence against this regulation is an offence of strict liability.

21.279 Directions to comply with specified procedures or instructions

- (1) CASA may, by written notice given to the organisation, direct an approved design organisation to comply with a stated procedure or instruction in carrying out a stated design activity.
- (2) The organisation commits an offence if the organisation does not comply with the direction.
- Penalty: 50 penalty units.
- (3) An offence against this regulation is an offence of strict liability.

21.281 Investigation of potentially unsafe condition

- (1) If CASA becomes aware of a potentially unsafe condition in an aircraft or aeronautical product in relation to which an approved design organisation issued an approval or certificate, CASA may, by written notice given to the organisation, direct the organisation to give CASA stated assistance in investigating the condition.
- (2) The organisation commits an offence if the organisation does not comply with the direction.
- Penalty: 50 penalty units.
- (3) An offence against this regulation is an offence of strict liability.
-

21.283 Requirement to provide employees and subcontractors with exposition and design assurance system manual

- (1) An approved design organisation commits an offence if:
- (a) an employee or subcontractor of the organisation carries out a design activity on behalf of the organisation; and
 - (b) the organisation did not, before the employee or subcontractor began carrying out the design activity, make available to the employee or subcontractor the parts of:
 - (i) the organisation's exposition; and
 - (ii) the organisation's design assurance system manual;that relate to the carrying out of the design activity by the employee or subcontractor on behalf of the organisation.

Penalty: 50 penalty units.

- (2) An approved design organisation commits an offence if:
- (a) an employee or subcontractor of the organisation carries out a design activity on behalf of the organisation; and
 - (b) after the employee or subcontractor begins carrying out the design activity, the organisation updates, or makes a change to, a part of its exposition or design assurance system manual that relates to the carrying out of the design activity by the employee or subcontractor on behalf of the organisation; and
 - (c) the organisation does not, before the completion of the design activity, make the changed or updated part available to the employee or subcontractor.

Penalty: 50 penalty units.

- (3) An offence against this regulation is an offence of strict liability.

Regulation 21.301

Subpart 21.K—Approval of materials, parts, processes and appliances

21.301 Applicability

This Subpart prescribes requirements for the approval of certain materials, parts, processes, and appliances.

Source FARs section 21.301 modified.

21.303 Replacement and modification parts

- (1) A person commits an offence if:
- (a) the person produces a modification or replacement part for sale for installation on a type certificated aircraft, aircraft engine or propeller; and
 - (b) the part is not produced in accordance with an APMA.

Penalty: 50 penalty units.

- (1A) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (2) This regulation does not apply to the following:
- (a) parts manufactured in the course of maintenance by a maintenance organisation having approval to manufacture the parts;
 - (b) parts produced under a type certificate or production certificate;
 - (c) parts manufactured by the owner or operator of an aircraft, aircraft engine or propeller manufactured by the owner or operator, for maintaining or altering the aircraft, aircraft engine or propeller;
 - (d) parts produced under an ATSO authorisation;
 - (e) standard parts.

- (2A) Any person is eligible to apply for an APMA.

- (3) An application for an APMA may be made to CASA and must include the following:
- (a) the identity of the aircraft, aircraft engine or propeller on which the part is to be installed;
 - (b) the name and address of the manufacturing facilities at which the part is to be manufactured;
 - (c) the design of the part, which consists of:
 - (i) drawings and specifications necessary to show the configuration of the part; and
 - (ii) information on dimensions, materials, and processes necessary to define the structural strength of the part;

- (d) test reports and computations necessary to show that the design of the part meets the airworthiness requirements of these Regulations applicable to the aircraft, aircraft engine or propeller on which the part is to be installed, unless the applicant shows that the design of the part is identical to the design of a part that is covered under a type certificate. If the design of the part was obtained by a licensing agreement, evidence of that agreement must be furnished;
 - (e) subject to subregulation (3A), a copy of the system that the applicant proposes to use, if granted an APMA, to comply with the requirements of subregulation 21.303(11).
- (3A) An applicant is not required to include a copy of the system referred to in paragraph 21.303(3)(e) if the applicant has previously given CASA a copy of the same version of the system.
- (4) An applicant is entitled to an APMA for a replacement or modification part if CASA is satisfied that:
- (a) the design meets the airworthiness requirements of these Regulations that are applicable to the aircraft, aircraft engine or propeller on which the part is to be installed; and
 - (b) the applicant would, if the APMA were to be granted, be able to comply with the requirements of subregulation (11).
- (4A) For paragraph (4)(a), CASA may satisfy itself that the design meets the applicable airworthiness requirements on the basis of any of the following:
- (a) an examination of the design;
 - (b) the technical data for the design approved under regulation 21.009;
 - (c) a certificate from an approved design organisation under subregulation (4C).
- (4B) Subregulation (4C) applies if, under regulation 21.251, CASA authorises a relevant approved design organisation to determine whether the design meets the airworthiness requirements of these Regulations that are applicable to the aircraft, aircraft engine or propeller on which the part is to be installed.
- (4C) If the approved design organisation is satisfied that the design meets the airworthiness requirements of these Regulations that are applicable to the aircraft, aircraft engine or propeller, the organisation may give CASA a certificate to that effect.
- (5) An applicant for an APMA must allow CASA or a relevant approved design organisation to make any inspection or test necessary to determine compliance with the applicable regulations.
- (6) CASA is not required to consider an application unless the applicant has complied with paragraphs (8)(b), (c) and (d).
- (7) The applicant must ensure that no change is made to a part between the time compliance with paragraphs (8)(b), (c) and (d) is shown for that part and the time

Regulation 21.303

the part is presented to CASA or a relevant approved design organisation for inspection or test.

- (8) An applicant for an APMA must make all inspections and tests necessary to determine the following:
- (a) compliance with the applicable airworthiness requirements;
 - (b) that materials conform to the specifications in the design;
 - (c) that the part conforms to the drawings in the design;
 - (d) that the fabrication processes, construction, and assembly conform to those specified in the design.
- (9) Subject to regulation 11.055, CASA must issue an APMA to an applicant for the APMA if the applicant:
- (a) is eligible, under this regulation, to apply for the APMA; and
 - (b) applies for the APMA in accordance with this Subpart; and
 - (c) is entitled, under this Subpart, to the APMA; and
 - (d) otherwise complies with this Part.
- (10) CASA is not required to issue an APMA if the manufacturing facilities for the part are located outside Australian territory, unless the location of the manufacturing facilities places no undue burden on CASA in administering the applicable airworthiness requirements.
- (11) The holder of an APMA must establish and maintain a fabrication inspection system that ensures that each completed part conforms to the technical data for its design and is safe for installation on applicable type certificated aircraft, aircraft engines or propellers. The system must be documented and include procedures to ensure that:
- (a) incoming materials used in the finished part are as specified in the technical data; and
 - (b) incoming materials are properly identified if their physical and chemical properties cannot otherwise be readily and accurately determined; and
 - (c) materials subject to damage and deterioration are suitably stored and adequately protected; and
 - (d) processes affecting the quality and safety of the finished aircraft, aircraft engine or propeller are accomplished in accordance with acceptable specifications; and
 - (e) parts in process are inspected for conformity with the technical data at points in production where their conformity can be accurately assessed; and
 - (ea) if, for paragraph (e), statistical quality control procedures are used in relation to a part—a satisfactory level of quality will be maintained for the part; and
 - (f) current design drawings are readily available to manufacturing and inspection personnel, and used when necessary; and
 - (g) major changes to the basic design are adequately controlled and approved before being incorporated in the finished part; and

Regulation 21.304A

- (h) rejected materials and components are segregated and identified in such a manner as to preclude their use in the finished part; and
 - (i) inspection records are maintained, identified with the completed part, where practicable, and retained in the holder's file for a period of at least 2 years after the part has been completed.
- (12) An APMA continues in force until cancelled.
 - (13) The holder of an APMA must notify CASA in writing within 10 days from the date the manufacturing facility at which the parts are manufactured is relocated or expanded to include additional facilities at other locations.
 - (13A) The holder of an APMA must, within 2 days after the day when any change is made to the holder's fabrication inspection system that may affect the inspection, conformation to technical data or airworthiness of a part to which the APMA relates, tell CASA in writing of the change.
 - (14) The holder of an APMA must determine whether each completed part conforms to the technical data for its design and is safe for installation on type certificated aircraft, aircraft engines or propellers.
 - (15) CASA may suspend or cancel an APMA, by written notice given to its holder, if the holder does not comply, or ceases to comply, with this Subpart.
 - (16) Despite subregulation (12), an APMA is not in force during any period of suspension.
 - (17) A notice under subregulation (15) must set out:
 - (a) the grounds for the suspension or cancellation; and
 - (b) in the case of a suspension—when the suspension stops having effect.

Source FARs section 21.303 modified.

Note: See also regulations 21.002C and 21.002E in relation to suspension and cancellation of APMAs.

21.304A Changes to an APMA

- (1) The holder of an APMA may apply in writing to CASA to approve a change to any of the particulars specified in the APMA, including a condition of the APMA.
- (2) CASA may, on receiving an application made under subregulation (1), approve the change.
- (3) In deciding whether to approve the change, CASA must take into account any relevant considerations relating to the interests of the safety of air navigation.

21.305 Approval of materials, parts, processes and appliances

Whenever a material, part, process, or appliance is required to be approved under this Part, it may be approved:

- (a) under an APMA; or
-

Regulation 21.305A

- (b) under an ATSO authorisation or letter of ATSO design approval; or
- (c) in conjunction with type certification procedures for an aircraft, aircraft engine or propeller; or
- (d) under Subpart 21.N; or
- (da) in a manner prescribed by the Part 21 Manual of Standards; or
- (e) in any other manner approved by CASA.

Source FARs section 21.305 modified.

21.305A Approval of materials, parts, processes and appliances not covered by regulation 21.305

- (1) A person may apply to CASA, an authorised person or a relevant approved design organisation, in writing, for approval of any material, part, process or appliance that is not covered by regulation 21.305.
- (2) CASA, or the authorised person or relevant approved design organisation, must grant the approval if satisfied that:
 - (a) doing so would be unlikely to have an adverse effect on aviation safety; and
 - (b) the material, part, process or appliance meets the requirements prescribed by the Part 21 Manual of Standards.

21.306 Use of standard parts and materials

Standard parts

- (1) A standard part may be used in the manufacture of an aircraft, aircraft engine, propeller or appliance, or another part, if:
 - (a) the standard part is required by:
 - (i) the type design for the aircraft, aircraft engine or propeller; or
 - (ii) the approved design for the appliance or other part; and
 - (b) the standard part was supplied with a document that:
 - (i) was issued under the law of a Contracting State; and
 - (ii) contains a statement that identifies the standard part and the specification with which the standard part complies; and
 - (c) the standard part has zero time in service.
- Note:* For the definition of **standard part**, see Part 1 of the Dictionary.
- (2) For the purposes of determining whether a standard part complies with the specification identified in the document mentioned in paragraph (1)(b) for the standard part, CASA may:
 - (a) direct the person who is using, or proposing to use, the standard part to give CASA:
 - (i) any technical data for the type design for the aircraft, aircraft engine or propeller that relates to the standard part; or

- (ii) any technical data for the approved design for the appliance or other part that relates to the standard part; or
- (b) inspect the standard part to determine whether it complies with the specification.

Materials

- (3) A material may be used in the manufacture of an aircraft, aircraft engine, propeller, part or appliance if:
 - (a) the material is required by:
 - (i) the type design for the aircraft, aircraft engine or propeller; or
 - (ii) the approved design for the part or appliance; and
 - (b) the material complies with an established industry or Australian specification; and
 - (c) the material was supplied with a document that:
 - (i) was issued under the law of a Contracting State; and
 - (ii) contains a statement that identifies the material and the specification with which the material complies.
- (4) For the purposes of determining whether a material complies with the established industry or Australian specification identified in the document mentioned in paragraph (3)(c) for the material, CASA may:
 - (a) direct the person who is using, or proposing to use, the material to give CASA:
 - (i) any technical data for the type design for the aircraft, aircraft engine or propeller that relates to the material; or
 - (ii) any technical data for the approved design for the part or appliance that relates to the material; or
 - (b) inspect the material to determine whether it complies with the specification.

Directions

- (5) A direction under paragraph (2)(a) or (4)(a) must:
 - (a) be in writing; and
 - (b) specify the time within which the direction must be complied with.
- (6) If CASA gives a direction to a person under paragraph (2)(a) or (4)(a), the person must comply with the direction within the time mentioned in the direction.

Penalty: 50 penalty units.

- (7) In this regulation:

approved design, for a part or appliance, has the meaning given by subregulation 42.015(1).

- (8) An offence against subregulation (6) is an offence of strict liability.

Regulation 21.321

Subpart 21.L—Export airworthiness approvals

21.321 Applicability

- (1) This Subpart prescribes:
 - (a) requirements for the issue of export airworthiness approvals; and
 - (b) rules governing the holders of those approvals.
- (2) For these Regulations:
 - (a) a **Class I product** is a complete aircraft, aircraft engine, or propeller, that:
 - (i) has been type certificated in accordance with these Regulations and for which civil specifications or type certificate data sheets have been issued; or
 - (ii) is identical to a type certificated product specified in subparagraph (i) in all respects except as is otherwise acceptable to the national aviation authority of the importing state; and
 - (b) a **Class II product** is a major component of a Class I product (for example, wings, fuselages, empennage assemblies, landing gears, power transmissions and control surfaces), the failure of which would jeopardise the safety of a Class I product; or any part, material, or appliance, approved and manufactured under an ATSO in the “C” series; and
 - (c) a **Class III product** is any part or component which is not a Class I or Class II product and includes standard parts (for example, those designated as AN, NAS or SAE); and
 - (d) the word **overhauled** when used to describe a product means that the product has not been operated or placed in service, except for functional testing, since having been overhauled, inspected and approved for return to service in accordance with these Regulations.

Source FARs section 21.321, modified.

21.323 Eligibility

Any person may obtain an export airworthiness approval for a Class I, Class II or Class III product.

Source FARs section 21.323, modified.

21.324 Issue of export airworthiness approvals

Subject to regulation 11.055, CASA, or an authorised person, must issue an export airworthiness approval for a Class I, Class II or Class III product to an applicant for the approval if the applicant:

- (a) is eligible, under regulation 21.323, to obtain the approval; and
- (b) applies for the approval in accordance with this Subpart; and
- (c) is entitled, under this Subpart, to the approval; and
- (d) otherwise complies with this Part.

21.325 Export airworthiness approvals

Kinds of approvals

- (1) Export airworthiness approval of Class I products is issued:
 - (a) for an aircraft—in the form of an export certificate of airworthiness; or
 - (b) for an aircraft engine or propeller—in the form of an authorised release certificate.
- (2) An export certificate of airworthiness does not authorise the operation of aircraft.
- (3) Export airworthiness approval of Class II and III products is issued in the form of an authorised release certificate.

Products which may be approved

- (4) Export airworthiness approvals may be issued for the following:
 - (a) new aircraft that are assembled and that have been flight-tested, except that export airworthiness approval may be issued for any of the following without assembly or flight-test:
 - (i) a small aeroplane type certificated by reference to Part 23 and manufactured under a production certificate;
 - (ii) a glider or manned free balloon for which a type certificate of the kind mentioned in regulation 21.021 or 21.024 is issued under this Part and that is manufactured under a production certificate;
 - (iii) a normal category rotorcraft type certificated by reference to Part 27 and manufactured under a production certificate;
 - (b) used aircraft possessing a valid certificate of airworthiness, or other used Class I or Class II products that have been maintained in accordance with the applicable provisions of CAR or CASR.
- (4A) Authorised release certificates may be issued for any of the following that are manufactured and located in Australia:
 - (a) Class I products other than aircraft;
 - (b) Class II and III products.
- (5) Despite regulation 21.324, CASA is not required to issue an export airworthiness approval for used aircraft or used Class I products mentioned in paragraph (4)(b) that are located outside Australian territory, unless there is no undue burden on CASA in administering this regulation.

Export airworthiness approval exceptions

- (6) If CASA or an authorised person issues an export airworthiness approval on the basis of a written statement by the importing state as provided for in paragraph 21.327(4)(d), CASA or the authorised person must list on the export airworthiness approval, as exceptions, the requirements that are not met and the differences in configuration, if any, between the product to be exported and the related type certificated product.

Regulation 21.327

Penalty: 50 penalty units.

- (7) An offence against subregulation (6) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

Source FARs section 21.325, modified.

21.327 Application

- (1) A person may apply, in writing, to CASA or an authorised person for an export airworthiness approval for a Class I, Class II or Class III product.
- (2) A manufacturer holding a production certificate may apply orally to CASA or an authorised person for export airworthiness approval of a Class II product approved under the manufacturer's production certificate.
- (3) A separate application must be made for:
 - (a) each aircraft; and
 - (b) each engine or propeller, except that one application may be made for more than one engine or propeller, if all are of the same type and model and are to be exported to the same purchaser and country; and
 - (c) each type of Class II product, except that one application may be made for more than one type of Class II product when:
 - (i) they are separated in the application and the type and model of the related Class I product is identified; and
 - (ii) they are to be exported to the same purchaser and country.
- (4) Each application must be accompanied by a written statement from the importing country that will validate the export airworthiness approval if the product being exported is:
 - (a) an aircraft manufactured outside Australian territory; or
 - (b) an unassembled aircraft which has not been flight-tested; or
 - (c) a product that does not meet the special requirement of the importing country; or
 - (d) a product that does not meet a requirement specified in regulation 21.329, 21.331, or 21.333, as applicable, for the issue of an export airworthiness approval; or
 - (e) a product for which the importing country does not require the weight and balance report mentioned in paragraph (6)(b).
- (5) The written statement must list any requirements mentioned in paragraph (4)(d) that are not met.
- (6) Each application for export airworthiness approval of a Class I product must include the following, as applicable:
 - (a) a statement of conformity mentioned in subregulation 21.130(2) for each new product that has not been manufactured under a production certificate;
 - (b) unless the importing country does not require it, a weight and balance report in accordance with subregulations (7), (8), (9) and (10), as

- applicable, with a loading schedule when applicable, for each aircraft in accordance with section 100.7 of the Civil Aviation Orders;
- (c) a maintenance manual for each new product when such a manual is required under these Regulations;
 - (d) evidence of compliance with the applicable airworthiness directives, or a suitable notation if any airworthiness directives are not complied with;
 - (e) when temporary installations are incorporated in an aircraft for the purpose of export delivery—a general description of the installations together with a statement that the installation will be removed and the aircraft restored to the approved configuration upon completion of the delivery flight;
 - (f) historical records such as aircraft and engine log books, repair and alteration forms, for used aircraft and overhauled products;
 - (g) for products intended for overseas shipment—a description of the methods used, if any, for the preservation and packaging of such products to protect them against corrosion and damage while in transit or storage. The description must also indicate the duration of the effectiveness of such methods;
 - (h) the aircraft's flight manual required by the applicable airworthiness regulations for the particular aircraft;
 - (i) a statement as to the date when title passed or is expected to pass to a foreign purchaser;
 - (j) the data required by the special requirements of the importing country.

Weight and balance reports

- (7) A weight and balance report for transport aircraft and commuter category aeroplanes must be based on an actual weighing of the aircraft within the period of 12 months preceding the application for the export airworthiness approval for the aircraft, but after any major repairs or alteration to the aircraft.
- (8) Any changes in equipment that are made after the actual weighing of the aircraft (except changes classes as major changes) may be accounted for on a "computed" basis and the report revised accordingly.
- (9) Manufacturers of new non-transport category aeroplanes, normal category rotorcraft or gliders may include computed weight and balance data in the report, instead of the results of an actual weighing of the aircraft, if fleet weight control procedures approved by CASA have been established for the aircraft. In this case, the following statement must be included in each report: "The weight and balance data shown in this report are computed on the basis of CASA's approved procedures for establishing fleet weight averages."
- (10) A weight and balance report must include an equipment list showing weights and moment arms of all required and optional items of equipment that are included in the certificated empty weight.

Source FARs section 21.327, modified.

Regulation 21.329

21.329 Issue of export airworthiness approvals for Class I products

- (1) An applicant is entitled to an export airworthiness approval for a Class I product if the applicant shows, at the time the application is made, that the product meets the requirements of subregulations (2) to (6) (inclusive), as applicable, except as provided in subregulation (7).
- (2) New and used aircraft must meet:
 - (a) the airworthiness requirements for a standard certificate of airworthiness under regulation 21.183; or
 - (b) the airworthiness certification requirements for a special certificate of airworthiness for an aircraft in the primary, intermediate or restricted category under regulation 21.184, 21.184A or 21.185 respectively.
- (3) For a used aircraft to which Part 42 applies, an airworthiness review certificate must be in force for the aircraft.
- (3A) For a used aircraft to which Part 42 does not apply, and that is of a particular type and model, the aircraft must have undergone a maintenance release inspection (within the meaning given by subregulation 47(6) of CAR):
 - (a) within 30 days before the date the application is made for an export airworthiness approval for the aircraft; and
 - (b) that was conducted by:
 - (i) a person who holds a certificate of approval that covers maintenance for that type and model of aircraft; or
 - (ii) an approved maintenance organisation, within the meaning given by Part 3 of the Dictionary.
- (4) New engines and propellers must conform to the type design and must be in a condition for safe operation.
- (5) Used engines and propellers which are not being exported as part of a certificated aircraft must have been overhauled.
- (6) CASA or an authorised person must be satisfied that the special requirements of the importing country have been met.
- (7) A product need not meet a requirement mentioned in subregulation (2), (3), (4), (5) or (6) if the product is acceptable to the importing country and the importing country indicates that acceptability in accordance with paragraph 21.327(4)(d) and subregulation 21.327(5).

Source FARs sections 21.329 and 337, modified.

21.331 Issue of airworthiness approvals for Class II products

- (1) An applicant is entitled to an export airworthiness approval for a Class II product if that applicant shows, and CASA or an authorised person is satisfied, that the product:
 - (a) is new or has been overhauled and conforms to the technical data for the design of the product; and

Regulation 21.333

- (b) is in a condition for safe operation; and
 - (c) is identified with at least the manufacturer's name, part number, model designation (if applicable), and serial number or equivalent; and
 - (d) meets any special requirements of the importing country.
- (2) However, a product need not meet a requirement mentioned in subregulation (1) if the product is acceptable to the importing country and the importing country indicates that acceptability in accordance with paragraph 21.327(4)(d) and subregulation 21.327(5).

Source FARs section 21.331 modified.

21.333 Issue of export airworthiness approvals for Class III products

- (1) An applicant is entitled to an export airworthiness approval for a Class III product if the applicant shows, and CASA or an authorised person is satisfied, that the product:
- (a) conforms to the technical data for the design of the Class I or Class II product of which it is a part; and
 - (b) is in a condition for safe operation; and
 - (c) meets any special requirements of the importing country.
- (2) However, a product need not meet a requirement mentioned in subregulation (1) if it is acceptable to the importing country and the importing country indicates that acceptability in accordance with paragraph 21.327(4)(d) and subregulation 21.327(5).

Source FARs section 21.333 modified.

21.339 Export airworthiness approval for aircraft

An applicant is entitled to an export certificate of airworthiness authorising the export of an aircraft to 2 or more foreign countries if:

- (a) the applicant gives CASA a statement to the effect that the aircraft is to be flown to each of these countries for the purpose of sale; and
- (b) a standard certificate of airworthiness or a special certificate of airworthiness is in force for the aircraft; and
- (c) the aircraft is inspected by CASA before leaving Australian territory and is found to comply with all the applicable requirements; and
- (d) a list of the foreign countries in which it is intended to conduct sales demonstrations, together with the expected dates and duration of such demonstration, is included in the application under regulation 21.327; and
- (e) for each country listed, the applicant:
 - (i) has met that country's special requirements, except those requiring documents, information, and materials to be furnished; and
 - (ii) has the documents, information, and materials necessary to meet the special requirements of that country; and
- (f) all other requirements for the issue of an export certificate of airworthiness for a Class I product are met.

Part 21 Certification and airworthiness requirements for aircraft and parts
Subpart 21.L Export airworthiness approvals

Regulation 21.339

Source FARs section 21.33 modified.

Subpart 21.M—Designs of modifications of, and repairs to, aircraft, aircraft engines, propellers and appliances

Division 21.M.1—Preliminary

21.400 Purpose of Subpart

This Subpart:

- (a) sets out the requirements for the issue of modification/repair design approvals; and
- (b) sets out the rules governing the holders of such approvals; and
- (c) sets out circumstances in which certain designs are taken to be approved; and
- (d) provides for approvals of certain designs to be granted in accordance with the Part 21 Manual of Standards.

21.402 Definition of *proposed airworthiness standards* for Subpart 21.M

In this Subpart:

proposed airworthiness standards, for a design for which a person has applied for a modification/repair design approval, means the airworthiness standards that are stated in the application to be the proposed airworthiness standards for the design.

21.403 Definition of *applicable airworthiness standards* for Subpart 21.M

(1) In this Subpart:

applicable airworthiness standards, for the design of a modification of, or repair to, an aircraft, aircraft engine, propeller or appliance, has the meaning given in this regulation.

- (2) If, under regulation 21.414, CASA, an authorised person or a relevant approved design organisation makes a determination for the design, the *applicable airworthiness standards* for the design are the proposed airworthiness standards for the design and the additional standards mentioned in the determination.
- (3) If, under regulation 21.416, CASA makes a determination for the design, the *applicable airworthiness standards* for the design are the proposed airworthiness standards for the design other than the standards determined not to apply to the design.
- (4) If, under regulation 21.418, an authorised person or approved design organisation makes, and CASA agrees with, a determination for the design, the *applicable airworthiness standards* for the design are the proposed airworthiness standards for the design other than the standards determined not to apply to the design.

Part 21 Certification and airworthiness requirements for aircraft and parts

Subpart 21.M Designs of modifications of, and repairs to, aircraft, aircraft engines, propellers and appliances

Division 21.M.1 Preliminary

Regulation 21.403

- (5) In any other case, the *applicable airworthiness standards* for the design are the proposed airworthiness standards for the design.

Division 21.M.2—Modification/repair design approvals

21.405 Applications for modification/repair design approvals

- (1) A person may apply to CASA, an authorised person or a relevant approved design organisation, in writing, for a modification/repair design approval for the design of a modification of, or a repair to:
 - (a) an aircraft, aircraft engine, propeller or appliance; or
 - (b) 2 or more aircraft, aircraft engines, propellers or appliances of the same type.
 - (2) An application must include the following information:
 - (a) the applicant's name and contact details;
 - (b) the make, model and serial number of each aircraft, aircraft engine, propeller or appliance to which the design of the modification or repair relates;
 - (c) if the design relates to a modification of, or repair to, one or more aircraft, the registration mark of each aircraft;
 - (d) a description of the modification or repair;
 - (e) the proposed airworthiness standards for the design;
 - (f) an outline of the means for demonstrating compliance with the proposed airworthiness standards.
- Note 1: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.
- Note 2: Part 11 deals with applications and decision making.
- (3) For an application relating to the design of a modification of, or repair to, an aircraft, aircraft engine or propeller for which there is a type certificate, type acceptance certificate or foreign type certificate, the proposed airworthiness standards for the design must be:
 - (a) both:
 - (i) the airworthiness standards that applied to the issue of the certificate, or a specified later version of those standards; and
 - (ii) any other standards the applicant considers to be directly related to those standards; or
 - (b) the standards prescribed by the Part 21 Manual of Standards.
 - (4) For an application relating to the design of a modification of, or repair to, an aircraft, aircraft engine or propeller not mentioned in subregulation (3), or an appliance, the proposed airworthiness standards for the design must be:
 - (a) both:
 - (i) the airworthiness standards that applied to the original certification (however described) of the aircraft, aircraft engine, propeller or appliance, or a specified later version of those standards; and

Part 21 Certification and airworthiness requirements for aircraft and parts

Subpart 21.M Designs of modifications of, and repairs to, aircraft, aircraft engines, propellers and appliances

Division 21.M.2 Modification/repair design approvals

Regulation 21.410

- (ii) any other standards the applicant considers to be directly related to those standards; or
- (b) the standards prescribed by the Part 21 Manual of Standards.

21.410 Refusal to grant approval if design constitutes major change in type design

CASA or the authorised person or approved design organisation may refuse to grant a modification/repair design approval for the design without further consideration if CASA or the authorised person or approved design organisation is satisfied that the design would constitute a major change in a type design.

Note: A person may apply to CASA for a supplemental type certificate for the approval of the design of a major change to a type certificated aircraft, aircraft engine or propeller—see Subpart 21.E.

21.414 Determination of additional airworthiness standards—special conditions

- (1) This regulation applies if CASA or the authorised person or approved design organisation is not satisfied that the proposed airworthiness standards for the design provide an adequate safety standard for the design in a particular respect.

Example: The modification or repair has a novel or unusual design feature.

- (2) CASA or the authorised person or approved design organisation may determine additional airworthiness standards for the design.

Note: An additional airworthiness standard imposed in respect of a design is often called a 'special condition'.

- (3) The additional airworthiness standards must be appropriate to provide a level of safety for the aircraft, aircraft engine, propeller or appliance equivalent to the level of safety required by these Regulations for a comparable aircraft, aircraft engine, propeller or appliance.
- (4) CASA or the authorised person or approved design organisation must notify the applicant, in writing, of the determination.

21.416 Determination of non-application of airworthiness standards—application to CASA

- (1) This regulation applies to the design if:
 - (a) the application is made to CASA; and
 - (b) the design is for a modification of, or repair to:
 - (i) an aircraft that is type certificated in the restricted category; or
 - (ii) an aircraft mentioned in subregulation 21.185(3A); and
 - (c) CASA is satisfied that a proposed airworthiness standard for the design is inappropriate for the purpose for which the aircraft is to be used.
- (2) CASA may determine that the airworthiness standard does not apply to the design.

-
- (3) CASA must give the applicant written notice of the determination.

**21.418 Determination of non-application of airworthiness standards—
application to authorised person or approved design organisation**

- (1) This regulation applies to the design if:
- (a) the application is made to an authorised person or approved design organisation; and
 - (b) the design is for a modification of or repair to:
 - (i) an aircraft that is type certificated in the restricted category; or
 - (ii) an aircraft mentioned in subregulation 21.185(3A); and
 - (c) the authorised person or approved design organisation is satisfied that a proposed airworthiness standard for the design is inappropriate for the purpose for which the aircraft is to be used.
- (2) The authorised person or approved design organisation may determine that the airworthiness standard does not apply to the design.
- (3) The authorised person or approved design organisation must give CASA written notice of the determination.
- (4) CASA must:
- (a) decide whether or not CASA agrees with the determination; and
 - (b) give the authorised person or approved design organisation written notice of its decision.
- (5) If CASA agrees with the determination, the authorised person or approved design organisation must give the applicant written notice of the determination and of CASA's agreement with the determination.

21.420 Applicants must show compliance with applicable airworthiness standards, submit technical data and provide documents

- (1) The applicant must:
- (a) show CASA or the authorised person or approved design organisation that the design complies with the applicable airworthiness standards for the design; and
 - (b) give all of the technical data for the design to CASA or the authorised person or approved design organisation for approval under regulation 21.009; and
 - (c) give CASA or the authorised person or approved design organisation a copy of any instructions for continued airworthiness in respect of the design that are necessary to ensure that the modified aircraft, aircraft engine, propeller or appliance remains safe throughout its lifetime.
- (2) If the design is for a modification of, or repair to, an aircraft and relates to a matter that is dealt with in the flight manual for the aircraft, the applicant must also give CASA or the authorised person or approved design organisation a copy

Part 21 Certification and airworthiness requirements for aircraft and parts

Subpart 21.M Designs of modifications of, and repairs to, aircraft, aircraft engines, propellers and appliances

Division 21.M.2 Modification/repair design approvals

Regulation 21.425

of the operating instructions and limitations in respect of the design, in the form of:

- (a) an amendment to the flight manual; or
 - (b) a flight manual supplement.
- (3) For paragraph (1)(a), an applicant is taken to have shown CASA that a design complies with the applicable airworthiness requirements for the design if an approved design organisation gives CASA a certificate under subregulation (5).
- (4) Subregulation (5) applies if, under regulation 21.251, CASA authorises a relevant approved design organisation to determine whether the design complies with the applicable airworthiness requirements.
- (5) If the approved design organisation is satisfied that the design complies with the applicable airworthiness requirements, the organisation may give CASA a certificate to that effect.

21.425 Applicants to carry out necessary inspections and tests

- (1) For paragraph 21.420(1)(a), the applicant must carry out all inspections and tests necessary to show that the design complies with the applicable airworthiness standards for the design.
- (2) Before testing a prototype of a modification or repair, the applicant must:
- (a) establish the following for the prototype:
 - (i) that the materials and processes used to produce the prototype conform to the specifications for the design;
 - (ii) that all aeronautical products used in the prototype conform to the drawings in the design;
 - (iii) that the manufacturing processes, construction and assembly of the prototype conform to the manufacturing processes, construction and assembly specified in the design; and
 - (b) ensure that the accuracy of the equipment to be used for the test has been verified by a means that is traceable to:
 - (i) a standard recommended by the manufacturer of the equipment; or
 - (ii) a nationally or internationally recognised standard.

Example: For subparagraph (b)(ii), of a standard that is nationally recognised

A standard maintained by the National Measurement Institute—see <http://www.measurement.gov.au>.

21.430 CASA, authorised person or approved design organisation may carry out or observe certain tests

- (1) For the purposes of considering an application, CASA or the authorised person or approved design organisation may, by written notice given to the applicant, require the applicant to allow CASA or the authorised person or approved design organisation to:
- (a) carry out an inspection or test specified in the notice; or

- (b) observe a test specified in the notice that the applicant carries out under regulation 21.425.
- (2) The applicant must:
- (a) allow CASA or the authorised person or approved design organisation to:
 - (i) carry out an inspection or test specified in a notice under paragraph (1)(a); or
 - (ii) observe a test specified in a notice under paragraph (1)(b); and
 - (b) give CASA or the authorised person or approved design organisation written notice of when and where a test specified in a notice under paragraph (1)(b) will be carried out:
 - (i) at least 10 business days before the test; or
 - (ii) as agreed between the applicant and CASA or the authorised person or approved design organisation.
- (3) Before giving a notice under subregulation (2), the applicant must establish the matters required by subregulation 21.425(2).
- (4) The applicant must ensure that no change that would affect the validity of the test is made to the prototype of the modification or repair after the notice under subregulation (2) is given and before:
- (a) the test is carried out; or
 - (b) the aircraft, aircraft engine, propeller or appliance is tested or presented to CASA or the authorised person or approved design organisation for testing.

21.435 Grant of modification/repair design approvals—grant by CASA

- (1) This regulation applies if an application for a modification/repair design approval is made to CASA.
 - (2) Subject to regulation 11.055, CASA must grant the approval if CASA is satisfied that:
 - (a) the requirements mentioned in subregulation (4) are met; and
 - (b) the design complies with the applicable airworthiness standards for the design.
 - (2A) For paragraph (2)(b), CASA is taken to be satisfied that a design complies with the applicable airworthiness requirements for the design if an approved design organisation has given CASA a certificate to that effect under subregulation 21.420(5).
 - (3) Subject to regulation 11.055, CASA must grant the approval if CASA is satisfied that:
 - (a) the requirements mentioned in subregulation (4) are met; and
 - (b) the design does not comply with the applicable airworthiness standards for the design; but
 - (c) for each standard with which the design does not comply—the failure to comply with the standard is compensated for by factors that provide a level of safety that is equivalent to the level of safety provided by the standard.
-

Division 21.M.2 Modification/repair design approvals

Regulation 21.436

- (4) For paragraphs (2)(a) and (3)(a), the requirements are that:
- (a) the applicant has complied with regulations 21.420 and 21.425; and
 - (b) if CASA has given notice to the applicant under subregulation 21.430(1)—the applicant has complied with subregulations 21.430(2), (3) and (4); and
 - (c) the technical data submitted under regulation 21.420 for the design has been approved under regulation 21.009; and
 - (d) no feature or characteristic of the design makes the relevant aircraft, aircraft engine, propeller or appliance unsafe for its intended use.

Note: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to issue, or cancelling, suspending or varying, an approval; or
- (b) a decision imposing a condition on an approval.

21.436 Application to authorised person or approved design organisation—non-compliance with applicable airworthiness standards: determination of equivalent level of safety

- (1) This regulation applies if:
- (a) an application for a modification/repair design approval is made to an authorised person or approved design organisation; and
 - (b) the authorised person or approved design organisation is not satisfied that the design complies with the applicable airworthiness standards.
- (2) If the authorised person or approved design organisation is approved to make an equivalent level of safety determination, the authorised person or approved design organisation must:
- (a) determine whether the non-compliance is compensated for by factors that provide an equivalent level of safety; or
 - (b) apply to CASA for a determination under subregulation (6) of whether the non-compliance is compensated for by factors that provide an equivalent level of safety.
- (3) If the authorised person or approved design organisation determines that the non-compliance is compensated for by factors that provide an equivalent level of safety, the authorised person or approved design organisation must give CASA written notice of the following:
- (a) that the design does not comply with the standard;
 - (b) that the non-compliance is compensated for by factors that provide an equivalent level of safety;
 - (c) how the non-compliance is compensated for.
- (4) If CASA receives a notice under subregulation (3), CASA must:
- (a) decide whether or not CASA agrees with the determination; and
 - (b) give the authorised person or approved design organisation written notice of its decision.
- (5) If the authorised person or approved design organisation is not approved to make an equivalent level of safety determination, the authorised person or approved
-

design organisation must apply to CASA for a determination of whether the non-compliance is compensated for by factors that provide an equivalent level of safety.

- (6) If CASA receives an application under paragraph (2)(b) or subregulation (5), CASA must:
- (a) determine whether the non-compliance is compensated for by factors that provide an equivalent level of safety; and
 - (b) give the authorised person or approved design organisation written notice of CASA's determination.

21.437 Grant of modification/repair design approvals—grant by authorised person or approved design organisation

- (1) This regulation applies if an application for a modification/repair design approval is made to an authorised person or approved design organisation.
- (2) Subject to regulation 11.055, the authorised person or approved design organisation must grant the approval if the authorised person or approved design organisation is satisfied that:
- (a) the requirements mentioned in subregulation (4) are met; and
 - (b) the design complies with the applicable airworthiness standards for the design.
- (3) Subject to regulation 11.055, the authorised person or approved design organisation must grant the approval if:
- (a) the authorised person or approved design organisation is satisfied that the requirements mentioned in subregulation (4) are met; and
 - (b) the authorised person or approved design organisation is not satisfied that the design complies with the applicable airworthiness standards for the design; but
 - (c) for each standard with which the authorised person or approved design organisation is not satisfied that the design complies:
 - (i) the authorised person or approved design organisation has made, and CASA has agreed with, a determination under paragraph 21.436(2)(a) that the non-compliance is compensated for by factors that provide an equivalent level of safety; or
 - (ii) CASA has made a determination under subregulation 21.436(6) that the non-compliance is compensated for by factors that provide an equivalent level of safety.
- (4) For paragraphs (2)(a) and (3)(a), the requirements are that:
- (a) the applicant has complied with regulations 21.420 and 21.425; and
 - (b) if the authorised person or approved design organisation has given notice to the applicant under subregulation 21.430(1)—the applicant has complied with subregulations 21.430(2), (3) and (4); and
 - (c) the technical data submitted under regulation 21.420 for the design has been approved under regulation 21.009; and

Part 21 Certification and airworthiness requirements for aircraft and parts

Subpart 21.M Designs of modifications of, and repairs to, aircraft, aircraft engines, propellers and appliances

Division 21.M.2 Modification/repair design approvals

Regulation 21.440

- (d) no feature or characteristic of the design makes the relevant aircraft, aircraft engine, propeller or appliance unsafe for its intended use.

Note: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to issue, or cancelling, suspending or varying, an approval; or
(b) a decision imposing a condition on an approval.

21.440 Form of modification/repair design approvals

If CASA or an authorised person or approved design organisation grants a modification/repair design approval, the document issued to the applicant under regulation 11.060 must:

- (a) set out:
- (i) what the approval is; and
 - (ii) the name of the person to whom it is granted; and
- (b) describe or otherwise identify the modification or repair; and
- (c) specify, by reference to manufacturer, model and serial number, each aircraft, aircraft engine, propeller or appliance to which the design of the modification or repair relates.

21.445 Variation of modification/repair design approvals

- (1) Regulations 21.405 to 21.440 apply to an application for a variation of a modification/repair design approval as if:
- (a) each reference in those regulations to an approval were a reference to a variation of an approval; and
 - (b) each reference in those regulations to a design were a reference to a variation of a design.
- (2) However, the applicant is not required to give CASA or an authorised person or approved design organisation the technical data for the design or any other information that CASA or the authorised person or approved design organisation already holds unless the data or information already given:
- (a) is no longer correct; or
 - (b) no longer describes the design.

**Division 21.M.3—Transfer of, and obligations for holders of,
modification/repair design approvals and approvals
granted in accordance with alternative method**

Note: For the definition of *holder*, see the Dictionary.

21.448 Approvals to which this Division applies

This Division applies to:

- (a) modification/repair design approvals; and
- (b) approvals mentioned in regulation 21.475.

**21.450 Transfer of modification/repair design approvals and approvals granted
in accordance with alternative method**

- (1) The holder of an approval may transfer the approval to another person.
- (2) However, an approval may be transferred only with the written agreement of the transferee.
- (3) If an approval is transferred, the transferor must:
 - (a) write the transferee's name on the document mentioned in regulation 21.440 (the *approval document*); and
 - (b) give the transferee:
 - (i) the approval document; and
 - (ii) a copy of each document or record that the holder of the approval is required to keep under regulation 21.455.

Penalty: 50 penalty units.

- (4) If an approval is transferred, the transferor must, within 1 month after the transfer, notify CASA, in accordance with subregulation (5), of the transfer.

Penalty: 50 penalty units.

- (5) A notice under subregulation (4) must:
 - (a) be in writing; and
 - (b) identify the approval being transferred; and
 - (c) state the name and address of the transferee; and
 - (d) state the date of the transfer.
- (6) An offence against subregulation (3) or (4) is an offence of strict liability.

Part 21 Certification and airworthiness requirements for aircraft and parts

Subpart 21.M Designs of modifications of, and repairs to, aircraft, aircraft engines, propellers and appliances

Division 21.M.3 Transfer of, and obligations for holders of, modification/repair design approvals and approvals granted in accordance with alternative method

Regulation 21.455

21.455 Record keeping and making records available to CASA

- (1) The holder of an approval must keep documents and records about the design covered by the approval, including all technical data and test and inspection records, until:

- (a) the end of 12 months after the approval ceases to be in force, otherwise than by being suspended under these Regulations; or
(b) the holder transfers the approval to another person;

whichever occurs first.

Penalty: 50 penalty units.

- (2) CASA may, by notice in writing, require the holder to make a document or record, or a copy or extract of a document or record, available for inspection by CASA within a time specified in the notice.

- (3) The holder must comply with the notice.

Penalty: 50 penalty units.

- (4) An offence against subregulation (1) or (3) is an offence of strict liability.

21.460 Instructions for continued airworthiness and flight manual supplement to be made available

- (1) Subregulation (2) applies if the holder of an approval was required under paragraph 21.420(1)(c), or under the method in accordance with which it was granted, to provide instructions for continued airworthiness in respect of a design.

- (2) The holder must ensure that a copy of the current version of the instructions is available (electronically or otherwise) to any person who is required to comply with them.

Penalty: 50 penalty units.

- (3) Subregulation (4) applies if the holder of an approval to which this Division applies was required under subregulation 21.420(2), or under the method in accordance with which it was granted, to provide:

- (a) an amendment to the flight manual for an aircraft; or
(b) a flight manual supplement for an aircraft.

- (4) The holder must ensure that a copy of the current version of the amendment or supplement is available (electronically or otherwise) to:

- (a) for a registered aircraft—the registered operator of the aircraft; or
(b) for a Part 103 aircraft that is listed with a Part 103 ASAO—the owner of the aircraft.

- (5) An offence against subregulation (2) or (4) is an offence of strict liability.

Division 21.M.4—Other means of approval

21.465 Modifications and repairs directed by CASA

A design for a modification of, or repair to, an aircraft, aircraft engine, propeller or appliance is taken to have been approved for the purpose of these Regulations if the design is contained in:

- (a) a direction issued in writing by CASA; or
- (b) an airworthiness directive.

21.470 Foreign modification/repair designs

A design for a modification of, or repair to, an aircraft, aircraft engine, propeller or appliance is taken to have been approved for the purpose of these Regulations if the design is:

- (a) approved by the national aviation authority of a recognised country; or
- (b) for a design of a modification or repair that relates to an aircraft, aircraft engine or propeller designed in a recognised country—published or issued by the foreign type certificate holder of the aircraft, aircraft engine or propeller under a system approved by the national aviation authority of that country; or
- (c) for a design of a modification or repair that relates to an appliance designed in a recognised country—published or issued by the manufacturer of the appliance under a system approved by the national aviation authority of that country; or
- (d) accepted by CASA under an agreement (however described) regarding approvals of designs for modifications and repairs between:
 - (i) CASA and the national aviation authority of a Contracting State; or
 - (ii) Australia and a Contracting State.

21.475 Part 21 Manual of Standards may prescribe alternative method of approval of modification and repair designs

An approval of a design for the modification of, or a repair to, an aircraft, aircraft engine, propeller or appliance may be granted in accordance with a method prescribed by the Part 21 Manual of Standards.

Regulation 21.500

Subpart 21.N—Approval of engines, propellers, materials, parts and appliances: imported

21.500 Approval of imported aircraft engines and propellers

- (1) Each holder or licensee of an Australian type certificate for an aircraft engine or propeller manufactured in a recognised country, or in a foreign country with which Australia has an agreement for the acceptance of those products for export and import, must furnish with each such aircraft engine or propeller imported into Australian territory by the holder or licensee, an export airworthiness approval (however described) issued by the country of manufacture certifying that the individual aircraft engine or propeller:
 - (a) conforms to its type certificate; and
 - (b) is in a condition for safe operation; and
 - (c) has been subjected by the manufacturer to a final operational check.
- (2) If these Regulations require an imported aircraft engine or propeller to be type certificated, it is taken to be type certificated under these Regulations if:
 - (a) the aircraft engine or propeller:
 - (i) is manufactured:
 - (A) in a recognised country; or
 - (B) under a manufacturing approval (however described) issued by the national aviation authority of a recognised country; or
 - (C) in a foreign country with which Australia has an agreement for the acceptance of the aircraft engine or propeller for export and import; or
 - (ii) forms part of a type design for which a type certificate or a type acceptance certificate is in force under these Regulations, or a certificate of type approval is in force under CAR; and
 - (b) the aircraft engine or propeller conforms to a valid type certificate, is in a condition for safe operation and has been subjected to a final operational check by the manufacturer; and
 - (c) an airworthiness approval (however described), issued under the law of the foreign country, is in force certifying the matters mentioned in paragraphs (a) and (b).
- (3) CASA may inspect an aircraft engine or propeller to which this regulation applies to determine whether it complies with this regulation.

Source FARs section 21.500 modified.

21.500A Approval of other imported aircraft engines and propellers

- (1) A person may apply to CASA or a relevant approved design organisation, in writing, for approval of an imported aircraft engine, or propeller, that is not covered by regulation 21.500.

- (2) An applicant must, on request by CASA or the approved design organisation, give CASA or the approved design organisation any technical data for the design of the aircraft engine or propeller.
- (3) Subject to regulation 11.055, CASA or the approved design organisation must grant the approval.

21.502 Approval of imported materials, parts and appliances

- (1) If these Regulations, or the Civil Aviation Orders, require an imported material, part or appliance to be approved, it is taken to be approved if:
 - (a) the material, part or appliance:
 - (i) is manufactured:
 - (A) in a recognised country; or
 - (B) under a manufacturing approval (however described) issued by the national aviation authority of a recognised country; or
 - (C) in a foreign country with which Australia has an agreement for the acceptance of the material, part or appliance for export and import; or
 - (ii) forms part of a type design for which a type certificate or a type acceptance certificate is in force under these Regulations, or a certificate of type approval is in force under CAR; and
 - (b) the material, part or appliance conforms to an aeronautical specification appropriate to the proposed use, meets the requirements prescribed by the Part 21 Manual of Standards and is in a condition for safe operation; and
 - (c) an airworthiness approval (however described), issued under the law of the foreign country, is in force certifying the matters mentioned in paragraphs (a) and (b).
- (2) CASA may inspect any material part or appliance to determine whether it complies with this regulation.

Source FARs section 21.502 modified.

21.502A Approval of other imported materials, parts and appliances

- (1) A person may apply to CASA, an authorised person or a relevant approved design organisation, in writing, for approval of an imported material, part or appliance that is not covered by regulation 21.502.
- (2) An applicant must, on request by CASA or the authorised person or approved design organisation, give CASA or the authorised person or approved design organisation any technical data for the design of the material, part or appliance.
- (3) Subject to regulation 11.055, CASA or the authorised person or approved design organisation must grant the approval if satisfied that the material, part or appliance meets the requirements prescribed by the Part 21 Manual of Standards.

Regulation 21.601

Subpart 21.O—Australian Technical Standard Order Authorisations

21.601 Applicability

- (1) This Subpart prescribes:
 - (a) requirements for the issue of Australian Technical Standard Order (ATSO) authorisations; and
 - (b) rules governing the holders of ATSO authorisations; and
 - (c) requirements for the issue of a letter of ATSO design approval.
- (2) For the purpose of these Regulations:
 - (a) an **ATSO** (short for Australian Technical Standard Order) is a minimum performance standard prescribed by the Part 21 Manual of Standards for specified articles used on civil aircraft; and
 - (aa) an **ETSO** is a European Technical Standard Order issued by EASA; and
 - (ab) a **TSO** is a Technical Standard Order issued by the FAA; and
 - (b) an **ATSO authorisation** is:
 - (i) a CASA design and production approval issued to the manufacturer of an article that has been found to meet a specific ATSO, ETSO or TSO; or
 - (ii) a CASA production approval issued to the manufacturer of an article manufactured in accordance with an FAA letter of TSO design approval; and
 - (c) a **letter of ATSO design approval** is a CASA design approval for a foreign-manufactured article which has been found to meet a specific ATSO in accordance with the procedures of regulation 21.617; and
 - (ca) an **FAA letter of TSO design approval** is an FAA design approval for an article manufactured outside the United States that has been found to meet a specific TSO in accordance with the procedures of FARs section 21.617; and
 - (d) an article manufactured under an ATSO authorisation or an appliance manufactured under a letter of ATSO design approval described in regulation 21.617 is an approved article or appliance for the purpose of meeting the provisions of these Regulations that require the article to be approved; and
 - (e) an **article manufacturer** is the person who controls the design and quality of the article produced (or to be produced, in the case of an application), including the parts of them and any processes or services related to them that are procured from an outside source.
- (3) For the purpose of this Subpart, **articles** means materials, parts, processes, or appliances.

- (4) Despite subregulation 21.605(4), CASA is not required to issue an ATSO authorisation for an article if the manufacturing facilities for the article are located outside Australian territory, unless the location of the manufacturer's facilities places no undue burden on CASA in administering the applicable airworthiness requirements.

Source FARs section 21.601 modified.

21.603 ATSO marking and privileges

- (1) Except as provided in subregulation 21.617(3), a person may identify an article with an ATSO marking only if:
- (a) the person holds an ATSO authorisation; and
 - (b) the article meets applicable ATSO, ETSO or TSO performance standards.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For **strict liability**, see section 6.1 of the *Criminal Code*.

Source FARs section 21.603 modified.

21.605 Application and issue

- (1) An article manufacturer may apply to CASA for an ATSO authorisation for the article.
- (2) An application must be accompanied by the following documents:
- (a) a statement of conformance certifying that the applicant has met the requirements of this Subpart and that the article concerned meets the applicable ATSO, ETSO or TSO that is effective on the date of application for that article;
 - (b) one copy of the technical data required in the applicable ATSO, ETSO or TSO;
 - (c) a description of the applicant's quality system in the detail specified in regulations 21.143 and 21.144. In complying with this regulation, the applicant may refer to current quality system data filed with CASA as part of a previous ATSO authorisation application.
- (3) When a series of minor changes in accordance with regulation 21.611 is anticipated, the applicant must set forth in the application the basic model number of the article and the part number of the components with open brackets after it to denote that suffix change letters or numbers (or combinations of them) will be added from time to time.
- (4) Subject to regulation 11.055, CASA must issue an ATSO authorisation for the article if CASA is satisfied that:
- (a) the design of the article complies with the applicable ATSO, ETSO or TSO, including any deviations approved under regulation 21.609; and
 - (b) the applicant has established, and can maintain, a quality system to ensure that each article manufactured under the authorisation will comply with the

Regulation 21.607

applicable ATSO, ETSO or TSO, including any deviations approved under regulation 21.609.

- (5) For paragraph (4)(a), CASA may satisfy itself that the design of the article complies with the applicable ATSO, ETSO or TSO, including any deviations approved under regulation 21.609, on the basis of any of the following:
 - (a) an examination of the design;
 - (b) the technical data for the design approved under regulation 21.009;
 - (c) a certificate from an approved design organisation under subregulation (7).
- (6) Subregulation (7) applies if, under regulation 21.251, CASA authorises a relevant approved design organisation to determine whether the design of the article complies with the applicable ATSO, ETSO or TSO, including any deviations approved under regulation 21.609.
- (7) If the approved design organisation is satisfied that the design of the article complies with the applicable ATSO, ETSO or TSO, including any deviations approved under regulation 21.609, the organisation may give CASA a certificate to that effect.

Source FARs section 21.605 modified.

21.607 General rules governing holders of ATSO authorisations

- (1) An article manufacturer to whom an ATSO authorisation for the article has been issued must ensure that:
 - (a) the article is manufactured in accordance with this Part and the applicable ATSO, ETSO or TSO (including any deviations approved under subregulation 21.609(3)); and
 - (b) all tests and inspections required under these Regulations, or the applicable ATSO, ETSO or TSO, are conducted, and a quality system is established and maintained that:
 - (i) is adequate to ensure that the article meets the requirements of paragraph (a) and is in a condition for safe operation; and
 - (ii) meets the requirements prescribed by the Part 21 Manual of Standards; and
 - (c) the article is permanently and legibly marked with the following information:
 - (i) the name and address of the manufacturer;
 - (ii) the name, type, part number, or model designation of the article;
 - (iii) the serial number or the date of manufacture of the article or both;
 - (iv) unless subparagraph (v) applies, the applicable ATSO, ETSO or TSO number with the prefix 'ATSO';
 - (v) if the article was manufactured in accordance with an FAA letter of TSO design approval, the applicable TSO number with the prefix 'TSO'.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

Source FARs section 21.607 modified.

21.609 Approval for deviation

- (1) An article manufacturer who requests approval to deviate from any performance standard of an ATSO, ETSO or TSO must show that the standards from which a deviation is requested are compensated for by factors or design features providing an equivalent level of safety.
- (2) The request for approval to deviate, together with all pertinent data, must be submitted to CASA. If the article is manufactured in another country, the request for approval to deviate, together with all pertinent data, must be submitted to CASA through the national aviation authority of that country.
- (3) Subject to regulation 11.055, CASA must grant the approval.

Source FARs section 21.609 modified.

21.611 Design changes

Minor changes by the manufacturer holding an ATSO authorisation

- (1) An article manufacturer manufacturing an article under an ATSO authorisation may make minor design changes (any change other than a major change) without further approval by CASA. In this case, the changed article keeps the original model number (part numbers may be used to identify minor changes).
- (2) The manufacturer must forward to CASA any revised data that are necessary for compliance with subregulation 21.605(3).

Penalty: 25 penalty units.

- (2A) An offence against subregulation (2) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

Major changes by manufacturer holding an ATSO authorisation

- (3) Any design change by the manufacturer that is extensive enough to require a substantially complete investigation to determine compliance with an ATSO, ETSO or TSO is a **major change**. Before making such a change, the manufacturer must assign a new type or model designation to the article and apply for an ATSO authorisation under regulation 21.605.

Who may apply for approval of change

- (4) A person may apply for approval for a change to the design of an article under this Subpart only if the person:
- (a) is the manufacturer that submitted the statement of conformance for the article; or

Regulation 21.613

(b) has applied for an ATSO authorisation for the article.

Note: A person may apply to CASA, an authorised person or an approved design organisation, in writing, for a modification/repair design approval for the design of a modification of, or a repair to, an appliance: see Subpart 21.M.

Source FARs section 21.611 modified.

21.613 Record keeping requirements

Keeping the records

- (1) An article manufacturer holding an ATSO authorisation must, for each article manufactured under that authorisation, keep the following records at its factory:
 - (a) a complete and current technical data file for each type or model article, including design drawings and specifications;
 - (b) complete and current inspection records showing that all inspections and tests required to ensure compliance with this part have been properly completed and documented.

Retention of records

- (2) The manufacturer must retain the records mentioned in paragraph (1)(a) until it no longer manufactures the article.

Penalty: 50 penalty units.

- (3) If the manufacturer stops manufacturing the article, the manufacturer must send copies of the records mentioned in paragraph (1)(a) to CASA within 30 days after ceasing that manufacture.

Penalty: 50 penalty units.

- (4) The manufacturer must retain the records mentioned in paragraph (1)(b) for at least 2 years.

Penalty: 50 penalty units.

- (5) An offence against subregulation (2), (3) or (4) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

Source FARs section 21.613 modified.

21.615 CASA inspection

- (1) Upon the request of CASA, an article manufacturer manufacturing an article under an ATSO authorisation must allow CASA to:
 - (a) inspect any article manufactured under that authorisation; and
 - (b) inspect the manufacturer's quality system; and
 - (c) witness any tests; and
 - (d) inspect the manufacturing facilities; and
 - (e) inspect the technical data files on that article.

- (2) If the manufacturer does not comply with a request under subregulation (1), the ATSO authorisation is suspended until the request is complied with.

Source FARs section 21.615 modified.

21.617 Issue of letters of ATSO design approval: import appliances

- (1) A letter of ATSO design approval may be issued for an appliance that is manufactured in a foreign country with which Australia has an agreement for the acceptance of these appliances for export and import and that is to be imported into Australian territory, if:
- (a) the national aviation authority of the country in which the appliance was manufactured certifies that the appliance has been examined, tested, and found to meet the applicable ATSO approved under an ATSO authorisation, or letter of ATSO design approval, under paragraph 21.305(b) or the applicable performance standards of the country in which the appliance was manufactured and any other performance standards CASA prescribes to provide a level of safety equivalent to that provided by the ATSO approved under an ATSO authorisation, or letter of ATSO design approval, under paragraph 21.305(b); and
 - (b) the article manufacturer has submitted to CASA one copy of the technical data required in the applicable performance standard through the national aviation authority of the country in which the appliance was manufactured.
- (2) The letter of ATSO design approval will be issued by CASA and must list any deviation granted to the manufacturer under regulation 21.609.
- (3) After CASA has issued a letter of ATSO design approval and an airworthiness approval mentioned in paragraph 21.502(1)(c) has been issued, the manufacturer is authorised to identify the appliance with the ATSO marking requirements described in paragraph 21.607(c) and in the applicable ATSO. Each appliance must be accompanied by an airworthiness approval mentioned in paragraph 21.502(1)(c).

Source FARs section 21.617 modified.

21.619 Non-compliance

CASA may suspend or cancel the ATSO authorisation or letter of ATSO design approval of any article manufacturer who identifies with an ATSO marking an article not meeting the performance standards of the applicable ATSO, ETSO or TSO (including any deviations approved under subregulation 21.609(3)).

Source FARs section 21.619 modified.

Note: See also regulations 21.002C and 21.002E in relation to suspension and cancellation of ATSO authorisations or letters of ATSO design approval.

21.621 Duration

- (1) An ATSO authorisation or letter of ATSO design approval continues in force until surrendered or cancelled.

Regulation 21.621

- (2) However, an ATSO authorisation or a letter of ATSO design approval is not in force during any period of suspension.

Source FARs section 21.621 modified.

Subpart 21.Q—Identification of aircraft and aeronautical products

Division 21.Q.1—Preliminary

21.805 Applicability of this Subpart

This Subpart applies to an aircraft, aircraft engine, aircraft propeller, critical part or other aircraft part manufactured after this Subpart commences.

21.810 Meaning of *fireproof*

- (1) A reference in this Subpart to a fireproof manufacturer's data plate is a reference to a data plate that:
 - (a) is made of material that withstands the heat of a fire at least as well as a steel plate of the same size and thickness; and
 - (b) on which the details that it is required to bear are legibly marked by a fireproof method.
- (2) In this Subpart:

fireproof method of marking means marking by:

 - (a) etching, stamping or engraving; or
 - (b) another similar method of marking approved for a particular purpose.

Division 21.Q.2—Aircraft, aircraft engines and aircraft propellers

21.815 Applicability of this Division

This Division applies to an aircraft (or an aircraft engine or aircraft propeller) manufactured after this Subpart commences.

21.820 Manufacturer's data plate must be attached to aircraft

- (1) This regulation sets out the requirements for attaching a manufacturer's data plate to an aircraft to which this Division applies.
- (2) The manufacturer of an aircraft to which this Division applies must attach to it, as set out in subregulations (3) and (4), a fireproof manufacturer's data plate bearing the following information:
 - (a) the name of the manufacturer;
 - (b) the identification number of the aircraft's type certificate (if any);
 - (c) the identification number of the production certificate (if any) under which the aircraft is manufactured;
 - (d) the aircraft's model designation;
 - (e) the aircraft's serial number.

Penalty: 20 penalty units.

- (2A) An offence against subregulation (2) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (3) The data plate must be attached in a way that ensures that it is not likely to be defaced or removed during normal service, nor lost or destroyed in an accident.
- (4) The data plate must be attached:
 - (a) to a manned free balloon—to the lower section of the balloon's envelope in a place where the operator can read it when the balloon is inflated; or
 - (b) to a glider—in a visible place inside the cockpit; or
 - (c) to any other aircraft—in a place where it is clearly legible:
 - (i) on the frame of the aircraft's rearmost entrance; or
 - (ii) near, but aft of, the aircraft's rearmost entrance; or
 - (iii) on the aircraft's fuselage near its tail.

Note: For the definition of *aircraft* see section 3 of the Act. For the definitions of *identification number*, *manned free balloon*, *production certificate* and *type certificate* see the Dictionary.

21.825 Manufacturer's data plate must be attached to basket of manned free balloon

- (1) This regulation sets out an additional requirement for attaching a manufacturer's data plate to the basket of a manned free balloon to which this Division applies.

- (2) This regulation applies to the holder of the type certificate or production certificate under which such a balloon is manufactured.
- (3) The holder of the type certificate must attach to the basket of the balloon, as set out in subregulation (4), a heat-resistant metal plate on which the following information is legibly marked by a fireproof method:
 - (a) the name of the manufacturer;
 - (d) the basket's part number;
 - (e) the basket's serial number.

Penalty: 20 penalty units.

- (3A) An offence against subregulation (3) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (4) The manufacturer's data plate must be attached to the basket in a way that ensures that the plate is not likely to be defaced or removed during normal service, nor to be lost or destroyed in an accident.

Note: For the definitions of *manned free balloon*, *production certificate* and *type certificate* see the Dictionary.

21.830 Heater assembly of manned free balloon must carry identification mark

- (1) This regulation applies to a manned free balloon to which this Division applies that has a heater assembly.
- (2) The holder of the type certificate or production certificate under which the balloon is manufactured must, as set out in subregulation (3), also mark on the heater assembly, by a fireproof method, the information mentioned in subregulation (4).

Penalty: 20 penalty units.

- (2A) An offence against subregulation (2) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (3) The information must be marked in a way that ensures that it is not likely to be defaced.
- (4) The information is:
 - (a) the name of the heater's manufacturer; and
 - (b) its part number; and
 - (c) its serial number.

Note: For the definitions of *manned free balloon*, *production certificate* and *type certificate* see the Dictionary.

21.835 Manufacturer's data plate must be attached to aircraft engine

- (1) This regulation sets out the requirements for attaching a manufacturer's data plate to an aircraft engine to which this Division applies.
-

Part 21 Certification and airworthiness requirements for aircraft and parts

Subpart 21.Q Identification of aircraft and aeronautical products

Division 21.Q.2 Aircraft, aircraft engines and aircraft propellers

Regulation 21.840

- (2) This regulation applies to the holder of the type certificate or production certificate under which such an aircraft engine is manufactured.
- (3) The holder of the type certificate or production certificate must attach to the engine, as set out in subregulation (4), a fireproof manufacturer's data plate bearing the following information:
 - (a) the manufacturer's name;
 - (b) the identification number of the engine's type certificate (if any);
 - (c) the identification number of the production certificate (if any) under which the engine is manufactured;
 - (d) the engine's model designation;
 - (e) its serial number;
 - (f) if its rating is stated in its type certificate, that rating.

Penalty: 20 penalty units.

- (3A) An offence against subregulation (3) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (4) The data plate must be attached to the engine:
 - (a) in a place where somebody carrying out maintenance on the engine can read it; and
 - (b) in a way that ensures that the plate is not likely to be defaced or become detached from the engine during normal service, nor to be lost or destroyed in an accident.

Note: For the definitions of *identification number*, *production certificate* and *type certificate* see the Dictionary.

21.840 Aircraft propellers, blades and hubs must carry identification marks

- (1) This regulation sets out the requirements to mark information on, or attach a manufacturer's data plate to, an aircraft propeller, propeller blade or propeller hub to which this Division applies.
- (2) The holder of the type certificate or production certificate under which such a propeller, blade or hub is manufactured must:
 - (a) legibly mark on it by a fireproof method, as set out in subregulation (3), the information mentioned in subregulation (5); or
 - (b) attach to it, as set out in subregulation (4), a manufacturer's data plate on which that information is legibly marked by a fireproof method.

Penalty: 20 penalty units.

- (2A) An offence against subregulation (2) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (3) If information is marked on a propeller, blade or hub, it must be marked in a way that ensures that it is not likely to be defaced.

- (4) If a manufacturer's data plate is attached to a propeller, blade or hub, the plate must be attached to a non-critical surface in a way that ensures that the plate is not likely to be defaced or become detached during normal service, nor lost in an accident.
- (5) The information is:
- (a) the manufacturer's name; and
 - (b) the identification number of the type certificate (if any) of the propeller;
and
 - (c) the identification number of the production certificate (if any) under which the propeller is manufactured; and
 - (d) the model designation of the propeller, blade or hub; and
 - (e) its serial number.

Note: For the definitions of *identification number*, *production certificate* and *type certificate* see the Dictionary.

Division 21.Q.3—Critical parts

21.845 Applicability of this Division

This Division applies to a critical part manufactured on or after 1 October 2000.

21.850 Identification of critical parts

- (1) This regulation applies to a person who manufactures, in Australia, a critical part to which this Division applies.
- (2) The person must legibly and permanently mark on the part, as set out in subregulation (3), the following information:
 - (a) the part's part number;
 - (b) its serial number.

Penalty: 20 penalty units.

- (2A) An offence against subregulation (2) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (3) The information must be marked in a way that ensures that it is not likely to be defaced.

21.855 Removal or alteration of identification on critical parts

- (1) Except with CASA's written approval, a person must not engage in conduct that results in the removal or alteration of any of the information marked, in accordance with this Division, on a critical part to which this Division applies.

Penalty: 20 penalty units.

- (1A) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (2) CASA must not grant an approval under subregulation (1) if the granting of the approval would adversely affect the safety of air navigation.

Division 21.Q.4—Aircraft parts

21.860 Applicability of this Division

This Division applies to:

- (a) an aircraft part produced under an APMA, on or after 1 October 2000; and
- (b) a modification or replacement part referred to in paragraph 21.303(2)(a) or (c) and produced after 30 November 2003; and
- (c) a Class II or Class III product produced under a production certificate that is referred to in regulation 21.133(2A) or (2B).

Note: For the definition of *APMA* see the Dictionary.

21.865 Identification of parts produced under an APMA

- (1) Subregulation (2) applies to the holder of the APMA under which a part to which this Division applies is manufactured.
- (2) Subject to regulation 21.870, the holder of the APMA must legibly and permanently mark on the part, as set out in subregulation (3), the information required by subregulation (4).

Penalty: 20 penalty units.

- (2A) An offence against subregulation (2) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (3) The information must be marked in a way that ensures that it is not likely to be defaced.
- (4) The information is:
 - (a) the capital letters *APMA*; and
 - (b) the trade mark, name or symbol of the holder; and
 - (c) the part's part number; and
 - (d) the part's serial number (if any); and
 - (e) the name and model designation of each type certificated product to which the part may be fitted.

21.870 Identification of parts produced under an APMA if marking is impracticable

- (1) Subregulation (2) applies to a part to which this Division applies if CASA and the holder of the APMA under which the part is manufactured agree that it is impracticable to mark on it the information required by subregulation 21.865(4).
- (2) If this subregulation applies to a part, the holder of the APMA need not comply with regulation 21.865.

Part 21 Certification and airworthiness requirements for aircraft and parts

Subpart 21.Q Identification of aircraft and aeronautical products

Division 21.Q.4 Aircraft parts

Regulation 21.875

- (3) The holder of the APMA must include the information in the authorised release certificate supplied with the part or with each container of the parts.

Penalty: 20 penalty units.

- (3A) An offence against subregulation (3) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (4) If CASA and the holder agree that it is impracticable to provide the information mentioned in paragraph 21.865(4)(e) in the authorised release certificate that is supplied with the part, or with each container of the parts, the holder is not guilty of an offence under subregulation (3) if:

- (a) the information is included in a document that is published by the holder and available to any person who fits the part to an aircraft; and
- (b) the authorised release certificate identifies the document.

Note: For the definition of *authorised release certificate*, see the Dictionary.

21.875 Identification of other aircraft parts

- (1) Subject to regulation 21.880, the manufacturer of a part or product mentioned in paragraphs 21.860(b) or (c) must legibly and permanently mark on each of those parts or products produced, as set out in subregulation (3), the following information:

- (a) the trade mark of or name of the manufacturer;
- (b) the part number of the part or product.

Penalty: 20 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.
- (3) The information must be marked in a way that ensures that it is not likely to be defaced.

21.880 Identification of other aircraft parts—other than by marking

- (1) Subregulation (2) applies to a part or product to which regulation 21.875 applies if, because of the shape, size or nature of the part or product, it is impracticable to mark on the part or product the information required by regulation 21.875.
- (2) If this subregulation applies to a part or product, the manufacturer of the part or product need not comply with regulation 21.875.
- (3) The manufacturer of a Class II or Class III product referred to in paragraph 21.860(c) must include the information required by paragraphs 21.875(1)(a) and (b) in the authorised release certificate supplied with the product or the container of the product.

Part 22—Airworthiness standards for sailplanes and powered sailplanes

Table of contents

22.001	Airworthiness standards
22.002	Incidental provisions
22.003	Changes to EASA CS-22
22.004	Approvals under EASA CS-22

22.001 Airworthiness standards

For these Regulations, the airworthiness standards for a sailplane or powered sailplane are the airworthiness standards set out in EASA CS-22, as in force from time to time, with the changes provided under this Part.

22.002 Incidental provisions

For these Regulations, the incidental provisions of EASA CS-22, as in force from time to time, apply to the operation of the airworthiness standards in that instrument, with the changes provided under this Part.

22.003 Changes to EASA CS-22

For this Part, a reference in EASA CS-22 to the Agency is taken to be a reference to CASA.

22.004 Approvals under EASA CS-22

For the application of EASA CS-22 under this Part:

- (a) an approval (however described) mentioned in EASA CS-22 may be given by CASA; and
- (b) CASA may suspend or cancel an approval given under paragraph (a) if it is necessary in the interests of aviation safety; and
- (c) an approval (however described) given by or for EASA under EASA CS-22 is taken to have been given by CASA under these Regulations; and
- (d) for these Regulations, CASA may suspend or cancel an approval given by or for EASA under EASA CS-22, as if it had been given by CASA, if it is necessary in the interests of aviation safety.

Note: Regulation 202.060 sets out transitional arrangements in relation to approvals given under this Part as in force before 1 July 2009.

Part 23—Airworthiness standards for aeroplanes in the normal, utility, acrobatic or commuter category

Table of contents

23.001	Airworthiness standards
23.002	Incidental provisions
23.003	Changes to Part 23 of the FARs
23.004	Changes to EASA CS-VLA
23.005	Changes to EASA CS-23
23.006	Approvals under Part 23 of the FARs
23.007	Approvals under EASA CS-VLA
23.008	Approvals under EASA CS-23

23.001 Airworthiness standards

- (1) For these Regulations, subject to subregulation (2), the airworthiness standards for an aeroplane in the normal category, utility category, acrobatic category or commuter category are as follows:
 - (a) the airworthiness standards set out in Part 23 of the FARs, as in force from time to time, with the changes provided under this Part;
 - (b) the airworthiness standards set out in EASA CS-VLA, as in force from time to time, with the changes provided under this Part;
 - (c) the airworthiness standards set out in EASA CS-23, as in force from time to time, with the changes provided under this Part.
- (2) An aeroplane in the normal category, utility category, acrobatic category or commuter category meets the airworthiness standards for these Regulations if the aeroplane meets:
 - (a) the standards mentioned in paragraph (1)(a); or
 - (b) the standards mentioned in paragraph (1)(b); or
 - (c) the standards mentioned in paragraph (1)(c).

23.002 Incidental provisions

For these Regulations:

- (a) the incidental provisions of Part 23 of the FARs, as in force from time to time, apply to the operation of the airworthiness standards in that Part, with the changes provided under this Part; and
- (b) the incidental provisions of EASA CS-VLA, as in force from time to time, apply to the operation of the airworthiness standards in that instrument, with the changes provided under this Part; and
- (c) the incidental provisions of EASA CS-23, as in force from time to time, apply to the operation of the airworthiness standards in that instrument, with the changes provided under this Part.

23.003 Changes to Part 23 of the FARs

- (1) For this Part, a reference in Part 23 of the FARs to the United States is a reference to Australia or, when used in a geographical sense, to Australian territory.
- (2) For this Part, a reference in Part 23 of the FARs to the FAA or to the Administrator is a reference to CASA.

23.004 Changes to EASA CS-VLA

For this Part, a reference in EASA CS-VLA to the Agency is taken to be a reference to CASA.

23.005 Changes to EASA CS-23

For this Part, a reference in EASA CS-23 to the Agency is taken to be a reference to CASA.

23.006 Approvals under Part 23 of the FARs

For the application of Part 23 of the FARs under this Part:

- (a) an approval (however described) mentioned in Part 23 of the FARs may be given by CASA; and
- (b) CASA may suspend or cancel an approval under paragraph (a), if it is necessary in the interests of aviation safety; and
- (c) an approval (however described) given by or for the FAA or the Administrator under that Part is taken to have been given by CASA under these Regulations; and
- (d) for these Regulations, CASA may suspend or cancel an approval given by or for the FAA or the Administrator under that Part as if it had been given by CASA, if it is necessary in the interests of aviation safety.

23.007 Approvals under EASA CS-VLA

For the application of EASA CS-VLA under this Part:

- (a) an approval (however described) mentioned in EASA CS-VLA may be given by CASA; and
- (b) CASA may suspend or cancel an approval given under paragraph (a) if it is necessary in the interests of aviation safety; and
- (c) an approval (however described) given by or for EASA under EASA CS-VLA is taken to have been given by CASA under these Regulations; and
- (d) for these Regulations, CASA may suspend or cancel an approval given by or for EASA under EASA CS-VLA, as if it had been given by CASA, if it is necessary in the interests of aviation safety.

Regulation 23.008

23.008 Approvals under EASA CS-23

For the application of EASA CS-23 under this Part:

- (a) an approval (however described) mentioned in EASA CS-23 may be given by CASA; and
- (b) CASA may suspend or cancel an approval given under paragraph (a) if it is necessary in the interests of aviation safety; and
- (c) an approval (however described) given by or for EASA under EASA CS-23 is taken to have been given by CASA under these Regulations; and
- (d) for these Regulations, CASA may suspend or cancel an approval given by or for EASA under EASA CS-23, as if it had been given by CASA, if it is necessary in the interests of aviation safety.

Note: Regulation 202.070 sets out transitional arrangements in relation to approvals given under this Part as in force before 1 July 2009.

Part 25—Airworthiness standards for aeroplanes in the transport category

Table of contents

Subpart 25.A—General

- 25.001 Airworthiness standards
- 25.002 Incidental provisions

Subpart 25.B—Changes to FARs and EASA CS-25

- 25.003 Changes to Part 25 of the FARs
- 25.004 Changes to EASA CS-25
- 25.005 Approvals under Part 25 of the FARs
- 25.006 Approvals under EASA CS-25

Subpart 25.C—Airworthiness standards directed by ICAO

- 25.011 What this Subpart does
- 25.013 Least-risk bomb location

Regulation 25.001

Subpart 25.A—General

25.001 Airworthiness standards

- (1) For these Regulations, subject to subregulation (2), the airworthiness standards for an aeroplane in the transport category are as follows:
 - (a) the airworthiness standards set out in Part 25 of the FARs, as in force from time to time, with the changes provided under Subpart 25.B, together with the standards set out in Subpart 25.C;
 - (b) the airworthiness standards set out in EASA CS-25, as in force from time to time, with the changes provided under Subpart 25.B, together with the standards set out in Subpart 25.C.
- (2) An aeroplane in the transport category meets the airworthiness standards for these Regulations if the aeroplane meets:
 - (a) the standards mentioned in paragraph (1)(a); or
 - (b) the standards mentioned in paragraph (1)(b).

25.002 Incidental provisions

For these Regulations:

- (a) the incidental provisions of Part 25 of the FARs, as in force from time to time, apply to the operation of the airworthiness standards in that Part, with the changes provided under this Part; and
- (b) the incidental provisions of EASA CS-25, as in force from time to time, apply to the operation of the airworthiness standards in that instrument, with the changes provided under this Part.

Subpart 25.B—Changes to FARs and EASA CS-25

25.003 Changes to Part 25 of the FARs

- (1) For this Part, a reference in Part 25 of the FARs to the United States is a reference to Australia or, when used in a geographical sense, to Australian territory.
- (2) For this Part, a reference in Part 25 of the FARs to the FAA or to the Administrator is a reference to CASA.

25.004 Changes to EASA CS-25

For this Part, a reference in EASA CS-25 to the Agency is taken to be a reference to CASA.

25.005 Approvals under Part 25 of the FARs

For the application of Part 25 of the FARs under this Part:

- (a) an approval (however described) mentioned in Part 25 of the FARs may be given by CASA; and
- (b) CASA may suspend or cancel an approval under paragraph (a), if it is necessary in the interests of aviation safety; and
- (c) for these Regulations, an approval (however described) given by or for the FAA or the Administrator under that Part is taken to have been given by CASA; and
- (d) for these Regulations, CASA may suspend or cancel an approval given by or for the FAA or the Administrator under that Part as if it had been given by CASA, if it is necessary in the interests of aviation safety.

25.006 Approvals under EASA CS-25

For the application of EASA CS-25 under this Part:

- (a) an approval (however described) mentioned in EASA CS-25 may be given by CASA; and
- (b) CASA may suspend or cancel an approval given under paragraph (a) if it is necessary in the interests of aviation safety; and
- (c) an approval (however described) given by or for EASA under EASA CS-25 is taken to have been given by CASA under these Regulations; and
- (d) for these Regulations, CASA may suspend or cancel an approval given by or for EASA under EASA CS-25, as if it had been given by CASA, if it is necessary in the interests of aviation safety.

Note: Regulation 202.090 sets out transitional arrangements in relation to approvals given under this Part as in force before 1 July 2009.

Regulation 25.011

Subpart 25.C—Airworthiness standards directed by ICAO

25.011 What this Subpart does

This Subpart sets out airworthiness standards giving effect to the International Civil Aviation Organization’s policy of protection of an aeroplane and its occupants.

25.013 Least-risk bomb location

- (1) For this regulation, a ***least-risk bomb location*** is a location on an aeroplane where an explosive device can be placed to minimise the effects on the aeroplane if the device detonates.
- (2) A least-risk bomb location on an aeroplane must be specified in the flight manual.

Part 26—Airworthiness standards for aircraft in the primary category or intermediate category

Table of contents

26.001	Airworthiness standards
26.002	Incidental provisions

26.001 Airworthiness standards

The airworthiness standards for an aircraft in the primary category or intermediate category are so much of the airworthiness standards set out in Parts 22, 23, 27, 32, 33 and 35 as apply to an aircraft of that type.

26.002 Incidental provisions

For these Regulations, the incidental provisions of an instrument mentioned in Part 22, 23, 27, 32, 33 or 35 apply to the operation of the airworthiness standards in that instrument.

Part 27—Airworthiness standards for rotorcraft in the normal category

Table of contents

27.001	Airworthiness standards
27.002	Incidental provisions
27.003	Changes to Part 27 of the FARs
27.003A	Changes to EASA CS-27
27.004	Approvals under Part 27 of the FARs
27.005	Approvals under EASA CS-27

27.001 Airworthiness standards

- (1) For these Regulations, subject to subregulation (2), the airworthiness standards for a rotorcraft in the normal category are as follows:
 - (a) the airworthiness standards set out in Part 27 of the FARs, as in force from time to time, with the changes provided under this Part;
 - (b) the airworthiness standards set out in EASA CS-27, as in force from time to time, with the changes provided under this Part.
- (2) A rotorcraft in the normal category meets the airworthiness standards for these Regulations if the aircraft meets:
 - (a) the standards mentioned in paragraph (1)(a); or
 - (b) the standards mentioned in paragraph (1)(b).

27.002 Incidental provisions

For these Regulations:

- (a) the incidental provisions of Part 27 of the FARs, as in force from time to time, apply to the operation of the airworthiness standards in that Part, with the changes provided under this Part; and
- (b) the incidental provisions of EASA CS-27, as in force from time to time, apply to the operation of the airworthiness standards in that instrument, with the changes provided under this Part.

27.003 Changes to Part 27 of the FARs

- (1) For this Part, a reference in Part 27 of the FARs to the United States is a reference to Australia or, when used in a geographical sense, to Australian territory.
- (2) For this Part, a reference in Part 27 of the FARs to the FAA or to the Administrator is a reference to CASA.

27.003A Changes to EASA CS-27

For this Part, a reference in EASA CS-27 to the Agency is taken to be a reference to CASA.

27.004 Approvals under Part 27 of the FARs

For the application of Part 27 of the FARs under this Part:

- (a) an approval (however described) mentioned in Part 27 of the FARs may be given by CASA; and
- (b) CASA may suspend or cancel an approval under paragraph (a), if it is necessary in the interests of aviation safety; and
- (c) for these Regulations, an approval (however described) given by or for the FAA or the Administrator under that Part is taken to have been given by CASA; and
- (d) for these Regulations, CASA may suspend or cancel an approval given by or for the FAA or the Administrator under that Part as if it had been given by CASA, if it is necessary in the interests of aviation safety.

27.005 Approvals under EASA CS-27

For the application of EASA CS-27 under this Part:

- (a) an approval (however described) mentioned in EASA CS-27 may be given by CASA; and
- (b) CASA may suspend or cancel an approval given under paragraph (a) if it is necessary in the interests of aviation safety; and
- (c) an approval (however described) given by or for EASA under EASA CS-27 is taken to have been given by CASA under these Regulations; and
- (d) for these Regulations, CASA may suspend or cancel an approval given by or for EASA under EASA CS-27, as if it had been given by CASA, if it is necessary in the interests of aviation safety.

Part 29—Airworthiness standards for rotorcraft in the transport category

Table of contents

29.001	Airworthiness standards
29.002	Incidental provisions
29.003	Changes to Part 29 of the FARs
29.003A	Changes to EASA CS-29
29.004	Approvals under Part 29 of the FARs
29.005	Approvals under EASA CS-29

29.001 Airworthiness standards

- (1) For these Regulations, subject to subregulation (2), the airworthiness standards for a rotorcraft in the transport category are as follows:
 - (a) the airworthiness standards set out in Part 29 of the FARs, as in force from time to time, with the changes provided under this Part;
 - (b) the airworthiness standards set out in EASA CS-29, as in force from time to time, with the changes provided under this Part.
- (2) A rotorcraft in the transport category meets the airworthiness standards for these Regulations if the aircraft meets:
 - (a) the standards mentioned in paragraph (1)(a); or
 - (b) the standards mentioned in paragraph (1)(b).

29.002 Incidental provisions

For these Regulations:

- (a) the incidental provisions of Part 29 of the FARs, as in force from time to time, apply to the operation of the airworthiness standards in that Part, with the changes provided under this Part; and
- (b) the incidental provisions of EASA CS-29, as in force from time to time, apply to the operation of the airworthiness standards in that instrument, with the changes provided under this Part.

29.003 Changes to Part 29 of the FARs

- (1) For this Part, a reference in Part 29 of the FARs to the United States is a reference to Australia or, when used in a geographical sense, to Australian territory.
- (2) For this Part, a reference in Part 29 of the FARs to the FAA or to the Administrator is a reference to CASA.

29.003A Changes to EASA CS-29

For this Part, a reference in EASA CS-29 to the Agency is taken to be a reference to CASA.

29.004 Approvals under Part 29 of the FARs

For the application of Part 29 of the FARs under this Part:

- (a) an approval (however described) mentioned in Part 29 of the FARs may be given by CASA; and
- (b) CASA may suspend or cancel an approval under paragraph (a), if it is necessary in the interests of aviation safety; and
- (c) for these Regulations, an approval (however described) given by or for the FAA or the Administrator under that Part is taken to have been given by CASA; and
- (d) for these Regulations, CASA may suspend or cancel an approval given by or for the FAA or the Administrator under that Part as if it had been given by CASA, if it is necessary in the interests of aviation safety.

29.005 Approvals under EASA CS-29

For the application of EASA CS-29 under this Part:

- (a) an approval (however described) mentioned in EASA CS-29 may be given by CASA; and
- (b) CASA may suspend or cancel an approval given under paragraph (a) if it is necessary in the interests of aviation safety; and
- (c) an approval (however described) given by or for EASA under EASA CS-29 is taken to have been given by CASA under these Regulations; and
- (d) for these Regulations, CASA may suspend or cancel an approval given by or for EASA under EASA CS-29, as if it had been given by CASA, if it is necessary in the interests of aviation safety.

Part 31—Airworthiness standards for manned free balloons

Table of contents

31.001	Airworthiness standards
31.002	Incidental provisions
31.003	Changes to Part 31 of the FARs
31.004	Changes to EASA CS-31HB
31.005	Changes to EASA CS-31GB
31.006	Approvals under Part 31 of the FARs
31.007	Approvals under EASA CS-31HB
31.008	Approvals under EASA CS-31GB

31.001 Airworthiness standards

- (1) For these Regulations, subject to subregulation (2), the airworthiness standards for a manned free balloon are as follows:
 - (a) the airworthiness standards set out in Part 31 of the FARs, as in force from time to time, with the changes provided under this Part;
 - (b) the airworthiness standards set out in EASA CS-31HB, as in force from time to time, with the changes provided under this Part;
 - (c) the airworthiness standards set out in EASA CS-31GB, as in force from time to time, with the changes provided under this Part.
- (2) A manned free balloon meets the airworthiness standards for these Regulations if the balloon meets:
 - (a) the standards mentioned in paragraph (1)(a); or
 - (b) the standards mentioned in paragraph (1)(b); or
 - (c) the standards mentioned in paragraph (1)(c).

31.002 Incidental provisions

For these Regulations:

- (a) the incidental provisions of Part 31 of the FARs, as in force from time to time, apply to the operation of the airworthiness standards in that Part, with the changes provided under this Part; and
- (b) the incidental provisions of EASA CS-31HB, as in force from time to time, apply to the operation of the airworthiness standards in that instrument, with the changes provided under this Part; and
- (c) the incidental provisions of EASA CS-31GB, as in force from time to time, apply to the operation of the airworthiness standards in that instrument, with the changes provided under this Part.

31.003 Changes to Part 31 of the FARs

For this Part, a reference in Part 31 of the FARs to the FAA or to the Administrator is taken to be a reference to CASA.

31.004 Changes to EASA CS-31HB

For this Part, a reference in EASA CS-31HB to the Agency is taken to be a reference to CASA.

31.005 Changes to EASA CS-31GB

For this Part, a reference in EASA CS-31GB to the Agency is taken to be a reference to CASA.

31.006 Approvals under Part 31 of the FARs

For the application of Part 31 of the FARs under this Part:

- (a) an approval (however described) mentioned in Part 31 of the FARs may be given by CASA; and
- (b) CASA may suspend or cancel an approval under paragraph (a), if it is necessary in the interests of aviation safety; and
- (c) an approval (however described) given by or for the FAA or the Administrator under Part 31 of the FARs is taken to have been given by CASA under these Regulations; and
- (d) for these Regulations, CASA may suspend or cancel an approval given by or for the FAA or the Administrator under Part 31 of the FARs, as if it had been given by CASA, if it is necessary in the interests of aviation safety.

31.007 Approvals under EASA CS-31HB

For the application of EASA CS-31HB under this Part:

- (a) an approval (however described) mentioned in EASA CS-31HB may be given by CASA; and
- (b) CASA may suspend or cancel an approval given under paragraph (a) if it is necessary in the interests of aviation safety; and
- (c) an approval (however described) given by or for EASA under EASA CS-31HB is taken to have been given by CASA under these Regulations; and
- (d) for these Regulations, CASA may suspend or cancel an approval given by or for EASA under EASA CS-31HB, as if it had been given by CASA, if it is necessary in the interests of aviation safety.

31.008 Approvals under EASA CS-31GB

For the application of EASA CS-31GB under this Part:

- (a) an approval (however described) mentioned in EASA CS-31GB may be given by CASA; and

Regulation 31.008

- (b) CASA may suspend or cancel an approval given under paragraph (a) if it is necessary in the interests of aviation safety; and
- (c) an approval (however described) given by or for EASA under EASA CS-31GB is taken to have been given by CASA under these Regulations; and
- (d) for these Regulations, CASA may suspend or cancel an approval given by or for EASA under EASA CS-31GB, as if it had been given by CASA, if it is necessary in the interests of aviation safety.

Part 32—Airworthiness standards for engines for very light aeroplanes

Table of contents

32.001	Airworthiness standards
32.002	Incidental provisions
32.003	Changes to EASA CS-22
32.004	Approvals under EASA CS-22

32.001 Airworthiness standards

For these Regulations, the airworthiness standards for an aircraft engine for use in a very light aeroplane are the airworthiness standards set out in EASA CS-22, as in force from time to time, with the changes provided under this Part.

32.002 Incidental provisions

For these Regulations, the incidental provisions of EASA CS-22, as in force from time to time, apply to the operation of the airworthiness standards in that Subpart, with the changes provided under this Part.

32.003 Changes to EASA CS-22

For this Part, a reference in EASA CS-22 to the Agency is taken to be a reference to CASA.

32.004 Approvals under EASA CS-22

For the application of EASA CS-22 under this Part:

- (a) an approval (however described) mentioned in EASA CS-22 may be given by CASA; and
- (b) CASA may suspend or cancel an approval given under paragraph (a) if it is necessary in the interests of aviation safety; and
- (c) an approval (however described) given by or for EASA under EASA CS-22 is taken to have been given by CASA under these Regulations; and
- (d) for these Regulations, CASA may suspend or cancel an approval given by or for EASA under EASA CS-22, as if it had been given by CASA, if it is necessary in the interests of aviation safety.

Note: Regulation 202.140 sets out transitional arrangements in relation to approvals given under this Part as in force before 1 July 2009.

Part 33—Airworthiness standards for aircraft engines

Table of contents

33.001	Airworthiness standards
33.002	Incidental provisions
33.003	Changes to Part 33 of the FARs
33.003A	Changes to EASA CS-E
33.004	Approvals under Part 33 of the FARs
33.005	Approvals under EASA CS-E

33.001 Airworthiness standards

- (1) For these Regulations, subject to subregulation (2), the airworthiness standards for an aircraft engine, other than an aircraft engine for use in a very light aeroplane, are as follows:
 - (a) the airworthiness standards set out in Part 33 of the FARs, as in force from time to time, with the changes provided under this Part;
 - (b) the airworthiness standards set out in EASA CS-E, as in force from time to time, with the changes provided under this Part.
- (2) An aircraft engine, other than an aircraft engine for use in a very light aeroplane, meets the airworthiness standards for these Regulations if the engine meets:
 - (a) the standards mentioned in paragraph (1)(a); or
 - (b) the standards mentioned in paragraph (1)(b).

33.002 Incidental provisions

For these Regulations:

- (a) the incidental provisions of Part 33 of the FARs, as in force from time to time, apply to the operation of the airworthiness standards in that Part, with the changes provided under this Part; and
- (b) the incidental provisions of EASA CS-E, as in force from time to time, apply to the operation of the airworthiness standards in that instrument, with the changes provided under this Part.

33.003 Changes to Part 33 of the FARs

- (1) For this Part, a reference in Part 33 of the FARs to the United States is a reference to Australia or, when used in a geographical sense, to Australian territory.
- (2) For this Part, a reference in Part 33 of the FARs to the FAA or to the Administrator is a reference to CASA.

33.003A Changes to EASA CS-E

For this Part, a reference in EASA CS-E to the Agency is taken to be a reference to CASA.

33.004 Approvals under Part 33 of the FARs

For the application of Part 33 of the FARs under this Part:

- (a) an approval (however described) mentioned in Part 33 of the FARs may be given by CASA; and
- (b) CASA may suspend or cancel an approval under paragraph (a), if it is necessary in the interests of aviation safety; and
- (c) for these Regulations, an approval (however described) given by or for the FAA or the Administrator under that Part is taken to have been given by CASA; and
- (d) for these Regulations, CASA may suspend or cancel an approval given by or for the FAA or the Administrator under that Part as if it had been given by CASA, if it is necessary in the interests of aviation safety.

33.005 Approvals under EASA CS-E

For the application of EASA CS-E under this Part:

- (a) an approval (however described) mentioned in EASA CS-E may be given by CASA; and
- (b) CASA may suspend or cancel an approval given under paragraph (a) if it is necessary in the interests of aviation safety; and
- (c) an approval (however described) given by or for EASA under EASA CS-E is taken to have been given by CASA under these Regulations; and
- (d) for these Regulations, CASA may suspend or cancel an approval given by or for EASA under EASA CS-E, as if it had been given by CASA, if it is necessary in the interests of aviation safety.

Part 35—Airworthiness standards for aircraft propellers

Table of contents

35.001	Airworthiness standards
35.002	Incidental provisions
35.003	Changes to Part 35 of the FARs
35.003A	Changes to EASA CS-P
35.004	Approvals under Part 35 of the FARs
35.005	Approvals under EASA CS-P

35.001 Airworthiness standards

- (1) For these Regulations, subject to subregulation (2), the airworthiness standards for an aircraft propeller are as follows:
 - (a) the airworthiness standards set out in Part 35 of the FARs, as in force from time to time, with the changes provided under this Part;
 - (b) the airworthiness standards set out in EASA CS-P, as in force from time to time, with the changes provided under this Part.
- (2) An aircraft propeller meets the airworthiness standards for these Regulations if it meets:
 - (a) the standards mentioned in paragraph (1)(a); or
 - (b) the standards mentioned in paragraph (1)(b).

35.002 Incidental provisions

For these Regulations:

- (a) the incidental provisions of Part 35 of the FARs, as in force from time to time, apply to the operation of the airworthiness standards in that Part, with the changes provided under this Part; and
- (b) the incidental provisions of EASA CS-P, as in force from time to time, apply to the operation of the airworthiness standards in that instrument, with the changes provided under this Part.

35.003 Changes to Part 35 of the FARs

- (1) For this Part, a reference in Part 35 of the FARs to the United States is a reference to Australia or, when used in a geographical sense, to Australian territory.
- (2) For this Part, a reference in Part 35 of the FARs to the FAA or to the Administrator is a reference to CASA.

35.003A Changes to EASA CS-P

For this Part, a reference in EASA CS-P to the Agency is taken to be a reference to CASA.

35.004 Approvals under Part 35 of the FARs

For the application of Part 35 of the FARs under this Part:

- (a) an approval (however described) mentioned in Part 35 of the FARs may be given by CASA; and
- (b) CASA may suspend or cancel an approval under paragraph (a), if it is necessary in the interests of aviation safety; and
- (c) for these Regulations, an approval (however described) given by or for the FAA or the Administrator under that Part is taken to have been given by CASA; and
- (d) for these Regulations, CASA may suspend or cancel an approval given by or for the FAA or the Administrator under that Part as if it had been given by CASA, if it is necessary in the interests of aviation safety.

35.005 Approvals under EASA CS-P

For the application of EASA CS-P under this Part:

- (a) an approval (however described) mentioned in EASA CS-P may be given by CASA; and
- (b) CASA may suspend or cancel an approval given under paragraph (a) if it is necessary in the interests of aviation safety; and
- (c) an approval (however described) given by or for EASA under EASA CS-P is taken to have been given by CASA under these Regulations; and
- (d) for these Regulations, CASA may suspend or cancel an approval given by or for EASA under EASA CS-P, as if it had been given by CASA, if it is necessary in the interests of aviation safety.

Part 39—Airworthiness directives

Table of contents

39.001A	Definitions
39.001	CASA may issue Australian airworthiness directives
39.002	Aircraft or aeronautical products covered by airworthiness directive
39.002A	Aircraft that become Australian aircraft—compliance with Australian airworthiness directives
39.002B	Compliance with foreign airworthiness directives
39.003	Australian aircraft covered by airworthiness directive not to be operated
39.004	Approvals and exclusions in relation to airworthiness directives
39.005	Documents or things to be sent to CASA
39.006	Request for review of operation of Australian airworthiness directive
39.007	Action to be taken by CASA on receiving request under regulation 39.006

39.001A Definitions

In these Regulations:

airworthiness directive means:

- (a) an Australian airworthiness directive; or
- (b) for a type certificated aircraft—a foreign State of Design airworthiness directive issued on or after 1 October 2009; or
- (c) for a model of type certificated aircraft that is first registered in Australia on or after 1 October 2009—a foreign State of Design airworthiness directive issued before 1 October 2009 for that model or for an aeronautical product that is part of, or used in, that model.

Australian airworthiness directive means a document, as in force from time to time, issued by CASA under subregulation 39.001(1).

foreign State of Design airworthiness directive, for a kind of aircraft or aeronautical product for which Australia is not the State of Design, means a document, as in force from time to time, that:

- (a) is issued by the national aviation authority of the State of Design of the aircraft or aeronautical product; and
- (b) is of the same nature as an Australian airworthiness directive.

39.001 CASA may issue Australian airworthiness directives

- (1) For paragraph 98(5A)(b) of the Act, CASA may issue an Australian airworthiness directive for a kind of aircraft, or a kind of aeronautical product, if:
 - (a) an unsafe condition exists in an aircraft or aeronautical product of that kind; and
 - (b) the condition exists, or is likely to exist, or could develop, in other aircraft or aeronautical products of that kind.

- (2) The airworthiness directive must:
- (a) be in writing; and
 - (b) state the kind of aircraft or aeronautical product to which it relates; and
 - (c) require that the action set out in the instrument (being action that relates to aircraft or aeronautical products of the kind stated and is, in the opinion of CASA, necessary to correct the unsafe condition) be taken at the time, or in the circumstances, mentioned in the instrument.

39.002 Aircraft or aeronautical products covered by airworthiness directive

- (1) If an airworthiness directive has been issued for a kind of aircraft or a kind of aeronautical product, then, except for aircraft or aeronautical products excluded from the operation of the airworthiness directive under subregulation (2) or paragraph 39.004(2)(b) or (3)(b), all aircraft or aeronautical products of that kind are covered by the airworthiness directive until:
- (a) the airworthiness directive is revoked; or
 - (b) the requirements of the airworthiness directive have been complied with; or
 - (c) the requirements of a means of compliance with the airworthiness directive, approved by CASA under paragraph 39.004(2)(a) or (3)(a), have been complied with; or
 - (d) the requirements of a means of compliance with the airworthiness directive, approved by the national aviation authority that issued the airworthiness directive, have been complied with.
- (2) An aircraft, or an aeronautical product fitted to an aircraft, is excluded from the operation of an airworthiness directive mentioned in subregulation (3) if:
- (a) the aircraft is a type certificated aircraft; and
 - (b) a standard certificate of airworthiness is not in force for the aircraft; and
 - (c) the aircraft is not type certificated in the primary, intermediate or restricted category.
- (3) The airworthiness directives are:
- (a) unless the airworthiness directive is expressed to apply to the aircraft—an airworthiness directive mentioned in paragraph (a) of the definition of *airworthiness directive* in regulation 39.001A; and
 - (b) an airworthiness directive mentioned in paragraph (b) or (c) of the definition of *airworthiness directive* in regulation 39.001A.

39.002A Aircraft that become Australian aircraft—compliance with Australian airworthiness directives

- (1) This regulation applies to an aircraft of a particular model if:
- (a) on or after 1 October 2009, the aircraft becomes an Australian aircraft; and
 - (b) the aircraft is not the first aircraft of that model to become an Australian aircraft.
- (2) The requirements of an Australian airworthiness directive for the model of aircraft are taken to have been complied with in respect of the aircraft if:

Regulation 39.002B

- (a) the requirements of a foreign State of Design airworthiness directive for the model of aircraft have been complied with in respect of the aircraft; and
- (b) the requirements of the foreign State of Design airworthiness directive are equivalent to the requirements of the Australian airworthiness directive.

39.002B Compliance with foreign airworthiness directives

The requirements of an Australian airworthiness directive for an aircraft are taken to have been complied with in respect of the aircraft if:

- (a) the Australian airworthiness directive was issued before 1 October 2009; and
- (b) an equivalent foreign State of Design airworthiness directive has been issued; and
- (c) the requirements of a means of compliance with the equivalent foreign State of Design airworthiness directive, approved by the national aviation authority that issued the airworthiness directive, have been complied with in respect of the aircraft.

39.003 Australian aircraft covered by airworthiness directive not to be operated

- (1) A person must not operate an Australian aircraft, or a Part 103 aircraft, that is covered by an airworthiness directive (other than an aircraft to which subregulation (4) applies), or that is fitted with an aeronautical product covered by an airworthiness directive (other than an aircraft to which subregulation (5) applies):
 - (a) in breach of any requirement of the airworthiness directive that affects the operating limitations of the aircraft; or
 - (b) while any other requirement of the airworthiness directive has not been complied with.

Penalty: 50 penalty units.

- (2) The registered operator of an Australian aircraft that is covered by an airworthiness directive (other than an aircraft to which subregulation (4) applies), or that is fitted with an aeronautical product covered by an airworthiness directive (other than an aircraft to which subregulation (5) applies), must not permit a person to operate the aircraft:
 - (a) in breach of any requirement of the airworthiness directive that affects the operating limitations of the aircraft; or
 - (b) while any other requirement of the airworthiness directive has not been complied with.

Penalty: 50 penalty units.

- (3) An offence against subregulation (1) is an offence of strict liability.
- (4) This subregulation applies to an aircraft covered by an airworthiness directive if:

Regulation 39.004

- (a) the airworthiness directive does not contain a statement to the effect that a special flight permit must not be issued for an aircraft covered by the airworthiness directive; and
 - (b) the aircraft is authorised to operate under a special flight permit that is in force.
- (5) This subregulation applies to an aircraft that is fitted with an aeronautical product covered by an airworthiness directive if:
- (a) the airworthiness directive does not contain a statement to the effect that a special flight permit must not be issued for an aircraft fitted with an aeronautical product covered by the airworthiness directive; and
 - (b) the aircraft is authorised to operate under a special flight permit that is in force.

39.004 Approvals and exclusions in relation to airworthiness directives

- (1) A person may, in writing, ask CASA for:
- (a) an approval of a means of compliance other than that set out in an airworthiness directive; or
 - (b) an exclusion from an airworthiness directive.

Particular aircraft or aeronautical products

- (2) For paragraph 98(5A)(b) of the Act, CASA may, in writing, on its own initiative or on a written request by a person:
- (a) approve, for a particular aircraft or aeronautical product, a means of compliance with an airworthiness directive other than that set out in the airworthiness directive; or
 - (b) exclude a particular aircraft or aeronautical product from the operation of an airworthiness directive.

Kind of aircraft or aeronautical products

- (3) For paragraph 98(5A)(b) of the Act, CASA may, in writing, on its own initiative or on a written request by a person:
- (a) approve, for a particular kind of aircraft or aeronautical product, a means of compliance with an airworthiness directive other than that set out in the airworthiness directive; or
 - (b) exclude a particular kind of aircraft or aeronautical product from the operation of an airworthiness directive.

Decision making criteria

- (4) When making a decision under subregulation (2) or (3), CASA must:
- (a) regard the preservation of a level of aviation safety that is at least acceptable as paramount; and
 - (b) if a person makes a request under subregulation (1)—have regard to any reasons given in the request.

Regulation 39.005

Approval or exclusion may be subject to conditions

- (6) CASA may, in an instrument of approval or exclusion, provide that the approval or exclusion is subject to 1 or more specified conditions.

Operator must comply with conditions

- (7) An instrument of approval or exclusion applies to a particular aircraft or aeronautical product only if the operator of the aircraft, or the aircraft that the aeronautical product is part of, or used in, complies with each condition of the approval or exclusion.

39.005 Documents or things to be sent to CASA

If a foreign State of Design airworthiness directive specifies that a document or thing must be sent to an national aviation authority, a person must, to comply with the airworthiness directive, send the document or thing to CASA.

39.006 Request for review of operation of Australian airworthiness directive

A person may ask CASA in writing to review the operation of an Australian airworthiness directive on the ground that all aircraft or aeronautical products covered by the Australian airworthiness directive, or all aircraft or aeronautical products of a kind mentioned in the request (being aircraft or aeronautical products covered by the Australian airworthiness directive), need no longer be covered by the Australian airworthiness directive because:

- (a) the instructions issued by the manufacturer or manufacturers of those aircraft or aeronautical products for the carrying out of maintenance on those aircraft or aeronautical products have been amended; and
- (b) if maintenance is carried out on those aircraft or aeronautical products in accordance with those instructions as amended, the unsafe condition that the Australian airworthiness directive seeks to correct will no longer exist, or is not likely to exist, or cannot develop, in those aircraft or aeronautical products.

39.007 Action to be taken by CASA on receiving request under regulation 39.006

- (1) Within 28 days after receiving a request from a person (the *applicant*) under regulation 39.006, CASA must give to the applicant a notice setting out:
 - (a) the steps that CASA proposes to take to investigate whether the ground on which the request is made can be substantiated; and
 - (b) an estimate of the time likely to be taken by the investigation.
- (2) In carrying out the investigation, CASA must consider:
 - (a) all information provided by the applicant (whether on his or her own initiative or at the request of CASA); and
 - (b) any other information that CASA reasonably considers to be relevant to the investigation.

Regulation 39.007

- (3) If, after carrying out the investigation, CASA is satisfied that the ground for making the request has been substantiated, CASA must revoke or amend the Australian airworthiness directive (as the case requires) so that those aircraft or aeronautical products to which the request relates are not covered by the Australian airworthiness directive.
- (4) This regulation does not affect the power that, apart from this regulation, CASA has to revoke or amend an Australian airworthiness directive.

Part 42—Continuing airworthiness requirements for aircraft and aeronautical products

Table of contents

Subpart 42.A—Preliminary

- 42.005 Purpose of Part
- 42.010 Applicability of Part
- 42.015 Definitions for Part
- 42.020 Part 42 Manual of Standards

Subpart 42.B—Requirements for registered operators

Division 42.B.1—Preliminary

- 42.025 Purpose of Subpart

Division 42.B.2—Continuing airworthiness requirements

- 42.030 Continuing airworthiness requirements—all aircraft
- 42.035 Condition of AOC—aircraft authorised to operate under AOCs
- 42.040 Aircraft authorised to operate under AOCs and large aircraft must have continuing airworthiness management organisations
- 42.045 Small aircraft not authorised to operate under AOCs may have continuing airworthiness management organisations
- 42.050 Form of continuing airworthiness management contract—all aircraft
- 42.055 Giving information in accordance with contract
- 42.060 Copy of certain provisions of contract to be given to CASA
- 42.065 Copy of variation of certain provisions of contract to be given to CASA
- 42.070 Notice of termination of contract to be given to CASA
- 42.075 Notice of contravention of Part to be given to CASA
- 42.080 Maintenance of aircraft and aeronautical products

Division 42.B.3—Record-keeping requirements in relation to authorisations under regulation 42.630

- 42.085 Application of Division
- 42.090 Retaining copies of authorisations
- 42.095 Keeping lists of authorised pilot licence holders and flight engineers

Subpart 42.C—Continuing airworthiness management—requirements for person responsible for continuing airworthiness for aircraft

Division 42.C.1—Preliminary

- 42.100 Purpose of Subpart
- 42.105 Meaning of *person responsible for continuing airworthiness* for aircraft

Division 42.C.2—Continuing airworthiness management tasks

- 42.110 Complying with regulations in this Division
 - 42.115 Rectification of defect to aircraft before flight—all aircraft
-

-
- 42.120 Compliance with airworthiness directives—all aircraft
 - 42.125 Approval of design for modifications or repairs to aircraft—all aircraft
 - 42.130 Dealing with certain instructions for continuing airworthiness—aircraft authorised to operate under AOCs and large aircraft
 - 42.135 Replacement of life limited aeronautical product—all aircraft
 - 42.140 Approved maintenance program required—aircraft authorised to operate under AOCs and large aircraft
 - 42.145 Compliance with maintenance program required—all aircraft
 - 42.150 Updating approved maintenance program following change to instructions for continuing airworthiness
 - 42.155 Ensuring effectiveness of approved maintenance program using approved reliability programs—certain aircraft
 - 42.160 Ensuring effectiveness of approved maintenance program—other aircraft authorised to operate under AOCs and large aircraft
 - 42.165 Removal of aeronautical products fitted as permitted by regulation 42.440

Division 42.C.3—Continuing airworthiness records—all aircraft

Subdivision 42.C.3.1—Continuing airworthiness records system

- 42.170 Continuing airworthiness records system

Subdivision 42.C.3.2—Information about aircraft

- 42.175 Requirement to record information
- 42.180 Information about aircraft engines and propellers
- 42.185 Information about empty weight of aircraft
- 42.190 Information about utilisation of aircraft
- 42.195 Information about compliance with airworthiness directives
- 42.200 Information about compliance with maintenance program
- 42.205 Information about modifications
- 42.210 Information about aeronautical products with life limit

Subdivision 42.C.3.3—Substantiating documents

- 42.215 Substantiating documents

Subdivision 42.C.3.4—Flight technical log

- 42.220 Flight technical log
- 42.225 Availability of flight technical log

Subdivision 42.C.3.5—Recording next maintenance due to be carried out

- 42.230 Recording details of next maintenance due to be carried out in flight technical log
- 42.235 Approval of another means of recording next maintenance due to be carried out
- 42.240 Recording details of next maintenance due to be carried out by approved other means

Subdivision 42.C.3.6—Recording utilisation information

- 42.245 Ensuring flight technical log can contain utilisation information mentioned in regulation 42.190 for each flight if another means not approved
 - 42.250 Approval of another means of recording utilisation information mentioned in regulation 42.190 for each flight
 - 42.255 Recording utilisation information mentioned in regulation 42.190 for each flight by approved other means
-

Subdivision 42.C.3.7—Retention and transfer of records

- 42.260 Retention of continuing airworthiness records
- 42.265 Transfer of continuing airworthiness records for aircraft

Division 42.C.4—Major defects—reporting and investigating

- 42.270 Reporting major defects—all aircraft
- 42.275 Investigating major defects—large aircraft and aircraft authorised to operate under AOC
- 42.280 Action by CASA following report of major defect
- 42.285 Action by certificate holder or approval holder following report of major defect

Subpart 42.D—Maintenance

Division 42.D.1—Preliminary

- 42.290 Purpose of Subpart

Division 42.D.2—Permissions for section 20AB of Act—aircraft

- 42.295 Who is permitted to carry out maintenance on aircraft—approved maintenance organisations
- 42.300 Who is permitted to carry out maintenance on aircraft—individuals not working for approved maintenance organisations
- 42.301 Who is permitted to carry out maintenance—organisations under NAA arrangement

Division 42.D.3—Permissions for section 20AB of Act—aeronautical products

- 42.305 Who is permitted to carry out maintenance on aeronautical products
- 42.306 Who is permitted to carry out maintenance on aeronautical products—foreign organisations approved by national aviation authority

Division 42.D.4—Requirements for carrying out maintenance

- 42.310 General requirements for carrying out maintenance
- 42.315 Ensuring individuals are competent to carry out maintenance
- 42.320 Restriction on maintenance that independent maintainers may instruct or permit supervised individuals to carry out
- 42.325 Maintenance involving modifications and certain repairs
- 42.330 Removal of tools etc after carrying out maintenance

Division 42.D.5—Requirements for independent inspection of critical control system maintenance

- 42.335 Meaning of *independent individual*
- 42.340 Requirement for verification and record for critical control system maintenance
- 42.345 Verification and record for critical control system maintenance

Division 42.D.6—Requirements for dealing with defects

Subdivision 42.D.6.1—Dealing with defects

- 42.350 Meaning of *qualified individual*
- 42.355 Recording defects
- 42.360 When qualified individual may defer rectification of defect
- 42.365 How rectification of defect is deferred
- 42.370 Record for deferral of rectification of defect

Subdivision 42.D.6.2—Reporting defects

- 42.375 Major defect reporting—independent maintainer carrying out maintenance on aircraft
- 42.380 Major defect reporting—approved maintenance organisation carrying out maintenance on aircraft
- 42.385 Major defect reporting—approved maintenance organisation carrying out maintenance on aeronautical product
- 42.390 Reporting requirements

Division 42.D.7—Requirements for recording maintenance for aircraft or aeronautical products

- 42.395 Recording maintenance information for aircraft
- 42.400 Making maintenance record for aeronautical products
- 42.405 Provision of maintenance record and other documents to registered operator
- 42.410 Retention of copy of maintenance record by approved maintenance organisations

Subpart 42.E—Aeronautical products**Division 42.E.1—Preliminary**

- 42.415 Purpose of Subpart

Division 42.E.2—Requirements for fitting parts and using materials

- 42.420 Fitting parts other than standard parts
- 42.425 Obligations and offences for fitting parts other than standard parts
- 42.430 Fitting parts removed from aircraft—permission for paragraph 42.420(5)(c)
- 42.435 Fitting parts fabricated by approved maintenance organisations—permission for subparagraph 42.420(5)(a)(ii)
- 42.440 Fitting parts for which there is no authorised release certificate—permission for subparagraphs 42.420(5)(a)(ii) and (b)(iii)
- 42.445 Fitting standard parts
- 42.450 Fitting parts removed from same place on aircraft—permission for paragraphs 42.420(1)(a) and 42.445(1)(a)
- 42.455 Using materials

Division 42.E.3—Requirements for controlling unserviceable and unsalvageable parts

- 42.460 Control of unserviceable parts
- 42.465 Control of unsalvageable parts

Division 42.E.4—Requirements for controlling unapproved parts

- 42.470 Meaning of *unapproved for parts*
- 42.475 Control of unapproved parts
- 42.480 Reporting unapproved parts
- 42.485 Action by CASA following report of unapproved parts
- 42.490 Action required if parts not required to be kept

Subpart 42.F—Subpart 42.F approved maintenance organisations**Division 42.F.1—General**

- 42.495 Purpose of Subpart
 - 42.500 Definitions for Subpart
 - 42.505 Regulations 11.070 to 11.075 do not apply in relation to certain matters
-

Division 42.F.2—Approval of Subpart 42.F organisations

- 42.510 Applying for approval
- 42.515 Issuing approval
- 42.520 Approval certificate
- 42.525 Privileges for Subpart 42.F organisations
- 42.530 Approval subject to conditions

Division 42.F.3—Changes to Subpart 42.F organisations

- 42.535 Application for approval of significant changes to Subpart 42.F organisations
- 42.540 Approval of significant changes
- 42.545 Changes to Subpart 42.F organisations that are not significant changes
- 42.550 CASA may direct Subpart 42.F organisations to change expositions

Division 42.F.4—Requirements and offences for Subpart 42.F organisations

- 42.555 Provision of maintenance services
- 42.560 Providing employees with exposition
- 42.565 Complying with directions

Subpart 42.G—Continuing airworthiness management organisations

Division 42.G.1—General

- 42.570 Purpose of Subpart
- 42.575 Definitions for Subpart
- 42.580 Regulations 11.070 to 11.075 do not apply in relation to certain matters

Division 42.G.2—Approval of continuing airworthiness management organisations

- 42.585 Applying for approval
- 42.590 Issuing approval
- 42.595 Approval certificate
- 42.600 Privileges for continuing airworthiness management organisations
- 42.605 Approval subject to conditions

Division 42.G.3—Changes to continuing airworthiness management organisations

- 42.610 Application for approval of significant changes to continuing airworthiness management organisations
- 42.615 Approval of significant changes
- 42.620 Changes to continuing airworthiness management organisations that are not significant changes
- 42.625 CASA may direct continuing airworthiness management organisations to change expositions

Division 42.G.4—Authorisation of pilot licence holders and flight engineers to provide maintenance services

- 42.630 When pilot licence holders and flight engineers may be authorised
- 42.635 Ceasing of authorisation if organisation ceases to be responsible for providing continuing airworthiness management services for aircraft
- 42.640 Directions in relation to authorisations
- 42.645 Notice of cancellation of authorisation

Division 42.G.5—Requirements and offences for continuing airworthiness management organisations

- 42.650 Provision of continuing airworthiness management services
- 42.655 Providing employees with exposition
- 42.660 Copies of authorisations and records
- 42.665 Complying with directions
- 42.670 Giving information in accordance with contract
- 42.675 Notice of contravention of Part to be given to CASA

Subpart 42.H—Maintenance certification and certificate of release to service

Division 42.H.1—General

- 42.680 Purpose of Subpart

Division 42.H.2—Maintenance certification for maintenance carried out on aircraft

Subdivision 42.H.2.1—Application of Division

- 42.685 Application of Division

Subdivision 42.H.2.2—Who must perform maintenance certification

- 42.690 Approved maintenance organisations
- 42.695 Individuals performing maintenance certification on behalf of approved maintenance organisations
- 42.700 Independent maintainers

Subdivision 42.H.2.3—Requirements for performing maintenance certification

- 42.705 Requirements to be met by individuals before performing maintenance certification
- 42.710 Requirements to be met by organisations before performing maintenance certification

Subdivision 42.H.2.4—Performance of maintenance certification

- 42.715 How maintenance certification is performed

Division 42.H.3—Certificate of release to service—aircraft

Subdivision 42.H.3.1—Preliminary

- 42.720 Application of Division
- 42.725 Requirement not to release aircraft without certificate of release to service

Subdivision 42.H.3.2—Who may issue certificate of release to service

- 42.730 Approved maintenance organisations
- 42.735 Individuals issuing certificates of release to service on behalf of approved maintenance organisations
- 42.740 Independent maintainers

Subdivision 42.H.3.3—Requirements for issuing certificate of release to service

- 42.745 Requirements to be met before certificate of release to service may be issued
- 42.750 Requirements to be met by approved maintenance organisations before issuing certificate of release to service
- 42.755 Requirements to be met by individuals before issuing certificate of release to service

Subdivision 42.H.3.4—Form, content and issue of certificate of release to service

- 42.760 Form and content of certificate of release to service
- 42.765 How certificate of release to service is issued

Subdivision 42.H.3.5—Record-keeping

- 42.770 Retaining copy of certificate of release to service

Division 42.H.4—Certificate of release to service—aeronautical products

Subdivision 42.H.4.1—Preliminary

- 42.775 Application of Division
- 42.780 Requirement not to release aeronautical product without certificate of release to service

Subdivision 42.H.4.2—Who may issue certificate of release to service

- 42.785 Approved maintenance organisations
- 42.790 Individuals issuing certificates of release to service on behalf of approved maintenance organisations

Subdivision 42.H.4.3—Requirements for issuing certificate of release to service

- 42.795 Requirements to be met before certificate of release to service may be issued
- 42.800 Requirements to be met by approved maintenance organisations before issuing certificate of release to service
- 42.805 Requirements to be met by individuals before issuing certificate of release to service

Subdivision 42.H.4.4—Form and issue of certificate of release to service

- 42.810 Form of certificate of release to service
- 42.815 How certificate of release to service is issued

Subdivision 42.H.4.5—Record-keeping and dealing with certificate of release to service

- 42.820 Additional record for certificate of release to service issued as in-house release document
- 42.825 Dealing with certificate of release to service

Subpart 42.I—Airworthiness reviews and airworthiness review certificates

Division 42.I.1—General

- 42.830 Application of Subpart
- 42.835 Purpose of Subpart

Division 42.I.2—Issue of airworthiness review certificates

- 42.840 Who may issue airworthiness review certificate
- 42.845 Requirements to be met for issue of airworthiness review certificate
- 42.850 Requirements to be met by continuing airworthiness management organisations before issuing airworthiness review certificate
- 42.855 Requirements to be met by individuals before issuing airworthiness review certificate
- 42.860 Form of airworthiness review certificate
- 42.865 How airworthiness review certificate is issued
- 42.870 How long airworthiness review certificate remains in force

Division 42.I.3—Extension of airworthiness review certificates

- 42.875 Who may extend airworthiness review certificate
- 42.880 Requirements to be met for extension of airworthiness review certificate
- 42.885 Requirements to be met by continuing airworthiness management organisations before extension of airworthiness review certificate
- 42.890 Requirements to be met by individuals before extending airworthiness review certificate
- 42.895 How airworthiness review certificate is extended

Division 42.I.4—Airworthiness review procedure

- 42.900 Airworthiness review procedure

Division 42.I.5—Administration

- 42.905 Record of findings of airworthiness review
- 42.910 Record of corrective action taken
- 42.915 Retaining records relating to airworthiness review certificates
- 42.920 Documents to be sent to CASA and registered operator
- 42.925 Notice of decision not to issue airworthiness review certificate

Division 42.I.6—Relationship of airworthiness review certificate to certificate of airworthiness

- 42.930 Relationship with certificate of airworthiness

Subpart 42.J—Approval of maintenance programs and variations of approved maintenance programs**Division 42.J.1—Preliminary**

- 42.935 Purpose of Subpart

Division 42.J.2—Approval of maintenance programs by continuing airworthiness management organisations

- 42.940 Circumstances in which continuing airworthiness management organisations may approve proposed maintenance program
- 42.945 Requirements for approval of maintenance programs
- 42.950 Requirements to be met by continuing airworthiness management organisations before approving proposed maintenance programs
- 42.955 Requirements to be met by individuals before approving proposed maintenance programs
- 42.960 How approval is given
- 42.965 Record-keeping requirements

Division 42.J.3—Approval of maintenance programs by CASA

- 42.970 Application to CASA for approval of maintenance programs
- 42.975 Form of application
- 42.980 Approval of maintenance programs by CASA

Division 42.J.4—Approval of variations of approved maintenance programs by continuing airworthiness management organisations

- 42.985 Circumstances in which continuing airworthiness management organisations may approve proposed variations
- 42.990 Requirements to be met for approval of variations of maintenance programs

- 42.995 Requirements to be met by continuing airworthiness management organisations before approving proposed variations
- 42.1000 Requirements to be met by individuals before approving proposed variations
- 42.1005 How approval is given
- 42.1010 Record-keeping requirements

Division 42.J.5—Approval of variations of approved maintenance programs by CASA

- 42.1015 Application to CASA for approval of variations of approved maintenance programs
- 42.1020 Form of application
- 42.1025 Approval of variations by CASA

Subpart 42.K—Directions to vary approved maintenance programs

- 42.1030 Purpose of Subpart
- 42.1035 CASA may direct variations of approved maintenance programs

Subpart 42.L—Approval of reliability programs and variations of approved reliability programs

Division 42.L.1—Preliminary

- 42.1040 Purpose of Subpart

Division 42.L.2—Approval of reliability programs

- 42.1045 Application for approval of reliability programs
- 42.1050 Approval of reliability programs

Division 42.L.3—Approval of variations of approved reliability programs

- 42.1055 Application for approval of variations of approved reliability programs
- 42.1060 Approval of variations of approved reliability programs

Subpart 42.M—Requirements for pilots

- 42.1065 Purpose of Subpart
- 42.1070 Pre-flight inspection—all aircraft
- 42.1075 Recording information in flight technical log—all aircraft

Subpart 42.N—Record-keeping requirements

- 42.1080 Purpose of Subpart
- 42.1085 Requirements for making records made under Part
- 42.1090 Requirements for keeping records made under Part
- 42.1095 Change to records made under Part

Subpart 42.O—Copying or disclosing cockpit voice recording information

- 42.1100 Purpose of Subpart
- 42.1105 Authorisation of persons for paragraph 32AP(3A)(a) of Act

Subpart 42.A—Preliminary

42.005 Purpose of Part

This Part:

- (a) sets out continuing airworthiness requirements, including requirements for carrying out maintenance, for aircraft and aeronautical products to which this Part applies; and
- (b) empowers CASA to issue a Manual of Standards for this Part.

Note: See Part 21 in relation to initial airworthiness requirements for aircraft and aeronautical products, and the issue of certificates of airworthiness for aircraft.

42.010 Applicability of Part

Subject to Subpart 202.BA, this Part applies to:

- (a) a registered aircraft; and
- (b) an aeronautical product for a registered aircraft.

Note 1: For the definition of *registered*, see Part 1 of the Dictionary.

Note 2: Subpart 202.BA contains application and transitional provisions for this Part. Under regulations 202.180 and 202.181, this Part applies to the following:

- (a) a registered aircraft that is used to conduct a Part 121 operation that is a scheduled air transport operation;
- (aa) a registered aircraft that is used to conduct a Part 135 operation that is a scheduled air transport operation;
- (b) a registered aircraft for which an election under regulation 202.181 is in force;
- (c) an aeronautical product for an aircraft mentioned in paragraph (a) or (b);
- (d) a Part 145 organisation that is providing maintenance services for an aircraft or aeronautical product mentioned in paragraph (a), (b) or (c);
- (e) an independent maintainer mentioned in item 4 or 5 of table 42.300 who is carrying out maintenance on an aircraft mentioned in paragraph (a) or (b).

42.015 Definitions for Part

(1) In this Part:

accountable manager:

- (a) for a Subpart 42.F organisation—has the meaning given by subregulation 42.500(1); and
- (b) for a continuing airworthiness management organisation—has the meaning given by subregulation 42.575(1).

aircraft control system, for an aircraft, means the system of the aircraft by which the flight path, attitude or propulsive force of the aircraft is changed.

airworthiness review means a review carried out under Division 42.I.3.

airworthiness review certificate means a document that complies with regulation 42.860.

Regulation 42.015

airworthiness review employee means an individual who is authorised by a continuing airworthiness management organisation in accordance with the Part 42 Manual of Standards to do the following on behalf of the organisation:

- (a) carry out an airworthiness review for an aircraft;
- (b) issue an airworthiness review certificate.

airworthy has the meaning given by subregulation (2).

approval certificate:

- (a) for a Subpart 42.F organisation—has the meaning given by subregulation 42.500(1); and
- (b) for a continuing airworthiness management organisation—has the meaning given by subregulation 42.575(1).

approval certificate reference number means:

- (a) for a Subpart 42.F organisation—the number determined by CASA under subregulation 42.520(2); and
- (b) for a continuing airworthiness management organisation—the number determined by CASA under subregulation 42.595(2); and
- (c) for a Part 145 organisation—the number determined by CASA under subregulation 145.035(2).

approval rating means a rating for a kind of aircraft, aeronautical product or specialist maintenance specified in the Part 42 Manual of Standards.

approved design means:

- (a) for an aircraft, aircraft engine or propeller:
 - (i) the type design for the aircraft, engine or propeller; and
 - (ii) any changes to the type design made in accordance with a Part 21 approval; and
- (b) for an aeronautical product, other than an aircraft engine or propeller, that is approved in a manner mentioned in regulation 21.305 or 21.305A:
 - (i) the design specifications for the product; and
 - (ii) any changes to the design specifications made in accordance with a Part 21 approval.

approved maintenance program, for an aircraft, means a maintenance program for the aircraft that has been approved in accordance with Subpart 42.J, including any variations to the program that have been approved in accordance with Subpart 42.J.

approved reliability program, for an aircraft, means a reliability program for the aircraft that has been approved in accordance with Subpart 42.L, including any variations to the program that have been approved in accordance with Subpart 42.L.

certification authorisation number means:

- (a) for a certification authorisation issued by a Subpart 42.F organisation—the authorisation reference number allocated to the authorisation by the organisation in accordance with the Part 42 Manual of Standards; and
- (b) for a certification authorisation issued by a Part 145 organisation—the authorisation reference number allocated to the authorisation by the organisation in accordance with the Part 145 Manual of Standards.

competent, to carry out maintenance on an aircraft or aeronautical product, has the meaning given by subregulation 42.315(1).

configuration deviation list, for an aircraft, means a document that:

- (a) is prepared by the aircraft's type certificate holder or foreign type certificate holder; and
- (b) is approved by the State of Design for the aircraft; and
- (c) lists each external part of the aircraft that is permitted to be missing from the aircraft, under conditions specified in the document, at the commencement of a flight by the aircraft.

continuing airworthiness management service has the meaning given by subregulation 42.575(1).

continuing airworthiness manager, for a continuing airworthiness management organisation, has the meaning given by subregulation 42.575(1).

continuing airworthiness record, for an aircraft, has the meaning given by subregulation (3).

continuing airworthiness records system, for an aircraft, means the system required by regulation 42.170 for the aircraft.

continuing airworthiness responsibility, for a continuing airworthiness management organisation, has the meaning given by subregulation 42.575(1).

creation date has the meaning given by subregulation 42.260(2).

critical control system maintenance, for an aircraft:

- (a) means maintenance carried out on the aircraft control system for the aircraft that, if not carried out correctly, may result in a failure, malfunction or defect of the system that will endanger the safe operation of the aircraft; and
- (b) does not include optional dual flight control maintenance.

eligible to be fitted, for a part, has the meaning given by subregulation (4).

eligible to be used, for a material, has the meaning given by subregulation (5).

exposition:

- (a) for a Subpart 42.F organisation—has the meaning given by subregulation 42.500(1); and
- (b) for a continuing airworthiness management organisation—has the meaning given by subregulation 42.575(1); and

Regulation 42.015

- (c) for a Part 145 organisation—has the meaning given by subregulation 145.010(1).

independent individual, for critical control system maintenance for an aircraft, has the meaning given by regulation 42.335.

independent maintainer means an individual mentioned in item 1, 3, 4 or 5 of table 42.300.

life limit, for an aeronautical product that is fitted, or is to be fitted, to an aircraft or another aeronautical product (the **second aeronautical product**), means:

- (a) if an airworthiness directive specifies an amount of use, or an age, after which the product must not be used—that amount of use, or age; or
- (b) if paragraph (a) does not apply, and the approved design for the aircraft specifies an amount of use, or an age, after which the product must not be used—that amount of use, or age; or
- (c) if paragraphs (a) and (b) do not apply, and the approved design for the second aeronautical product specifies an amount of use, or an age, after which the product must not be used—that amount of use, or age; or
- (d) if none of paragraphs (a), (b) and (c) apply—the amount of use, or age, specified in the approved design for the product as the amount of use, or age, after which the product must not be used.

Note: Life limit may be expressed in a number of ways, including the amount of operating time, the number of operating cycles or a calendar period.

main location, for a Part 145 organisation, has the meaning given by the Part 145 Manual of Standards.

maintenance program, for an aircraft that is authorised to operate under an AOC or a large aircraft, means the approved maintenance program for the aircraft.

maintenance program approval employee, for a continuing airworthiness management organisation, means an individual who is authorised by the organisation in accordance with the Part 42 Manual of Standards:

- (a) to approve a maintenance program for an aircraft; or
- (b) to approve a variation to a maintenance program for an aircraft.

maintenance record means:

- (a) for maintenance carried out on an aircraft—a record that contains:
 - (i) the information required under regulation 42.395; and
 - (ii) the maintenance certification for the maintenance; and
- (b) for maintenance carried out on an aeronautical product—a record required to be made under regulation 42.400.

optional dual flight control maintenance means maintenance:

- (a) that involves only the connection or disconnection of optional dual flight controls without using tools; and
- (b) that does not involve the assembly, adjustment, repair, modification or replacement of any other part of the aircraft control system.

Part 21 approval means:

- (a) for a change to the type design of an aircraft, aircraft engine or propeller:
 - (i) an approval under regulation 21.095 or 21.098; or
 - (ii) an approval in a supplemental type certificate or a foreign supplemental type certificate; or
 - (iii) a modification/repair design approval; or
 - (iv) an approval taken to have been given under regulation 21.465 or 21.470; or
 - (v) an approval mentioned in regulation 21.475; or
 - (vi) an approval that continues in force under regulation 202.054, 202.055 or 202.056; and
- (b) for a change to the design of an aeronautical product other than an aircraft engine or propeller:
 - (i) a modification/repair design approval; or
 - (ii) an approval taken to have been given under regulation 21.465 or 21.470; or
 - (iii) an approval mentioned in regulation 21.475; or
 - (iv) an approval that continues in force under regulation 202.054, 202.055 or 202.056.

Note: For the definition of *modification/repair design approval*, see Part 1 of the Dictionary.

Part 90 Manual of Standards means the Manual of Standards issued by CASA under regulation 90.020.

person responsible for continuing airworthiness, for an aircraft, has the meaning given by regulation 42.105.

qualified individual, for a defect in an aircraft, has the meaning given by regulation 42.350.

quality manager, for a continuing airworthiness management organisation, has the meaning given by subregulation 42.575(1).

responsibility start date, for a person and an aircraft, means the day on which the person becomes the person responsible for continuing airworthiness for the aircraft.

responsible manager:

- (a) for a Subpart 42.F organisation—has the meaning given by subregulation 42.500(1); and
- (b) for a continuing airworthiness management organisation—has the meaning given by subregulation 42.575(1).

serviceable, in relation to an aeronautical product, has the meaning given by subregulation (6).

significant change:

- (a) for a Subpart 42.F organisation—has the meaning given by subregulation 42.500(1); and

Regulation 42.015

(b) for a continuing airworthiness management organisation—has the meaning given by subregulation 42.575(1).

unapproved, in relation to a part, has the meaning given by regulation 42.470.

unsalvageable, in relation to an aeronautical product, has the meaning given by subregulation (7).

Note: See the Dictionary for definitions of other terms used in this Part.

- (2) An aircraft is **airworthy** if it is in a state that conforms with its approved design and is in a condition for safe operation.
- (3) Each of the following is a **continuing airworthiness record** for an aircraft:
- (a) a record made under paragraph 42.130(3)(b) for the aircraft;
 - (b) a record made under Subdivision 42.C.3.2 for the aircraft;
 - (c) a document kept under regulation 42.215 for the aircraft;
 - (d) a record made under this Part in the flight technical log for the aircraft;
 - (e) a record made by a means, other than a flight technical log, approved by CASA under regulation 42.250;
 - (f) a record made under regulation 42.345 for the aircraft;
 - (g) a record made under regulation 42.370 for the aircraft;
 - (h) a maintenance record for maintenance carried out on the aircraft;
 - (i) a certificate of release to service for an aircraft in relation to maintenance carried out on the aircraft;
 - (j) a copy of the design of a modification or repair that is unique to the aircraft;
 - (k) if an aircraft maintenance record was kept for the aircraft in accordance with Division 10 of Part 4A of CAR—that aircraft maintenance record;
 - (l) a document for the aircraft:
 - (i) that is equivalent to a document mentioned in paragraphs (a) to (k); and
 - (ii) that was issued or kept under a law of a foreign country;
 - (m) a record of information for the aircraft:
 - (i) that is equivalent to a record mentioned in paragraphs (a) to (k); and
 - (ii) that was made or kept under a law of a foreign country.

Note: For paragraph (d), see the notes to regulation 42.220.

- (4) A part is **eligible to be fitted** to an aircraft or another aeronautical product if the fitting is permitted:
- (a) by the approved design for the aircraft or the other aeronautical product that the aeronautical product will be fitted to; or
 - (b) by an Australian Parts Manufacturer Approval; or
 - (c) by a Parts Manufacturer Approval issued by the FAA; or
 - (d) by a parts manufacturer approval issued by a national aviation authority to which subregulation (4A) applies.

- (4A) For paragraph (4)(d), this subregulation applies to the national aviation authority of a Contracting State if:
- (a) Australia has an agreement (however described) with the Contracting State for the acceptance of parts manufacturer approvals; or
 - (b) CASA has an agreement (however described) with the national aviation authority for the acceptance of parts manufacturer approvals.
- (5) A material is **eligible to be used** in or on an aircraft or an aeronautical product if the use is permitted:
- (a) by the approved design for the aircraft or the aeronautical product; or
 - (b) by maintenance data for maintenance to be carried out on the aircraft or aeronautical product.
- (6) An aeronautical product is **serviceable** if the product:
- (a) conforms with its approved design; and
 - (b) is fit for its intended use.
- (7) An aeronautical product is **unsalvageable** if the product:
- (a) is unserviceable; and
 - (b) cannot be made serviceable.

42.020 Part 42 Manual of Standards

Power to issue Manual of Standards

- (1) For subsection 98(5A) of the Act, CASA may issue a Manual of Standards for this Part that specifies matters affecting the maintenance or airworthiness of aircraft.

Matters—general

- (2) In particular, a Manual of Standards may specify the following matters:
- (a) for paragraph (b) of the definition of **authorised release certificate** in subclause 18(2) of Part 2 of the Dictionary, that a specified kind of document issued under a law of a specified foreign country is equivalent to a document mentioned in paragraph (a) of that definition;
 - (b) for paragraph (d) of the definition of **authorised release certificate** in subclause 18(2) of Part 2 of the Dictionary, that a specified kind of document issued under a law of a specified foreign country is equivalent to a document mentioned in paragraph (c) of that definition;
 - (c) for subparagraph (b)(ii) of the definition of **large aircraft** in clause 1 of Part 3 of the Dictionary, that a particular type and model of aeroplane is a large aircraft;
 - (d) for subparagraph (d)(ii) of the definition of **large aircraft** in clause 1 of Part 3 of the Dictionary, that a particular type and model of helicopter is a large aircraft;

Regulation 42.020

- (e) for subparagraph (b)(ii) of the definition of *small aircraft* in clause 1 of Part 3 of the Dictionary, that a particular type and model of aeroplane is a small aircraft;
- (f) for subparagraph (d)(ii) of the definition of *small aircraft* in clause 1 of Part 3 of the Dictionary, that a particular type and model of helicopter is a small aircraft;
- (g) maintenance for items 1 and 2 of table 42.300;
- (h) maintenance for item 3 of table 42.300;
- (i) maintenance for items 4 and 5 of table 42.300;
- (ia) countries for regulations 42.301 and 42.306;
- (j) requirements for a maintenance program;
- (k) requirements for a reliability program;
- (l) that a document is an aviation industry standard;
- (m) the matters mentioned in subregulation (3) for Subpart 42.F;
- (n) the matters mentioned in subregulation (4) for Subpart 42.G.

Matters for Subpart 42.F

- (3) For paragraph (2)(m), the matters are the following:
 - (a) maintenance that is specialist maintenance for a Subpart 42.F organisation;
 - (b) ratings for kinds of aircraft, aeronautical products and specialist maintenance;
 - (c) the privileges that apply to an approval rating;
 - (d) requirements for a Subpart 42.F organisation's exposition;
 - (e) requirements for a Subpart 42.F organisation, including requirements in relation to the following:
 - (i) facilities;
 - (ii) managers;
 - (iii) employees;
 - (iv) employee qualifications;
 - (v) the grant of certification authorisations;
 - (vi) equipment, tools and materials;
 - (vii) maintenance data;
 - (viii) the fabrication of parts in the course of carrying out maintenance;
 - (ix) records;
 - (x) an annual review of the organisation's compliance with this Part, the Part 42 Manual of Standards and the organisation's exposition;
 - (xi) a procedure for making changes to the organisation that are not significant changes.

Matters for Subpart 42.G

- (4) For paragraph (2)(n), the matters are the following:
 - (a) requirements for a continuing airworthiness management organisation's exposition;

- (b) requirements for a continuing airworthiness management organisation, including requirements in relation to the following:
 - (i) facilities;
 - (ii) managers;
 - (iii) employees;
 - (iv) employee qualifications;
 - (v) equipment;
 - (vi) a quality management system, including auditing;
 - (vii) writing procedures for carrying out maintenance;
 - (viii) instructions for continuing airworthiness;
 - (ix) records;
 - (x) a procedure for making changes to the organisation that are not significant changes.

Part 42 Continuing airworthiness requirements for aircraft and aeronautical products

Subpart 42.B Requirements for registered operators

Division 42.B.1 Preliminary

Regulation 42.025

Subpart 42.B—Requirements for registered operators

Division 42.B.1—Preliminary

42.025 Purpose of Subpart

This Subpart sets out:

- (a) requirements relating to the continuing airworthiness of an aircraft that apply to the registered operator of the aircraft; and
- (b) record-keeping requirements for the registered operator of an aircraft in relation to authorisations under regulation 42.630.

Division 42.B.2—Continuing airworthiness requirements

42.030 Continuing airworthiness requirements—all aircraft

- (1) The registered operator of an aircraft commits an offence if:
 - (a) the registered operator operates the aircraft for a flight, or permits it to be operated for a flight; and
 - (b) a requirement mentioned in subregulation (2) is not met for the aircraft before the flight commences.

Penalty: 50 penalty units.

- (2) The requirements are that:
 - (a) the registered operator has ensured that the requirements mentioned in Division 42.C.2 are met for the aircraft; and
 - (b) if maintenance has been carried out on the aircraft since it was last operated for a flight—one of the following documents has been issued for the aircraft in relation to the maintenance:
 - (i) a certificate of release to service;
 - (ii) an equivalent document issued in accordance with an NAA arrangement mentioned in regulation 42.301; and
 - (c) if the aircraft is a large aircraft or an aircraft operating under an AOC:
 - (i) the requirements of regulation 42.040 for the aircraft are met; and
 - (ii) an airworthiness review certificate is in force for the aircraft; and
 - (d) each item of operational or emergency equipment that is not required by the certification basis for the aircraft, but is required by or under these Regulations for the flight, is fitted to the aircraft; and
 - (e) if there is a defect in the aircraft:
 - (i) operation of the aircraft for the flight with the defect is permitted by:
 - (A) the minimum equipment list for the aircraft; or
 - (B) the configuration deviation list for the aircraft; or
 - (C) a special flight permit for the flight; or
 - (ii) the rectification of the defect is deferred in accordance with Subdivision 42.D.6.1; or
 - (iii) the defect is in an item of operational or emergency equipment that:
 - (A) is fitted to the aircraft; and
 - (B) is not required by the certification basis for the aircraft; and
 - (C) is not required by or under these Regulations for the operation of the aircraft for the flight; and
 - (f) the flight technical log for the aircraft records the details of any defect in the aircraft mentioned in subparagraph (e)(i) or (iii).

Note 1: For paragraph (b), under subregulation 42.760(2), a certificate of release to service for an aircraft in relation to maintenance carried out on the aircraft must be included in the flight technical log for the aircraft.

Regulation 42.035

Note 2: For subparagraph (c)(ii), for how long an airworthiness review certificate remains in force, see regulation 42.870.

- (3) An offence against subregulation (1) is an offence of strict liability.

42.035 Condition of AOC—aircraft authorised to operate under AOCs

For paragraph 28BA(1)(b) of the Act, it is a condition of an AOC that the requirements of regulation 42.040 are met for each aircraft that is authorised to operate under the AOC.

42.040 Aircraft authorised to operate under AOCs and large aircraft must have continuing airworthiness management organisations

Aircraft authorised to operate under Australian air transport AOC

- (1) The registered operator of an aircraft that is authorised to operate under an Australian air transport AOC must be approved by CASA under Subpart 42.G as a continuing airworthiness management organisation for the type and model of aircraft.

Aircraft authorised to operate under AOC other than Australian air transport AOC

- (2) The registered operator of an aircraft that is authorised to operate under an AOC, other than an Australian air transport AOC, must:
- be approved by CASA under Subpart 42.G as a continuing airworthiness management organisation for the type and model of aircraft; or
 - have a contract with a single continuing airworthiness management organisation for that organisation to ensure that all of the requirements mentioned in Divisions 42.C.2, 42.C.3 and 42.C.4 are met for the aircraft.

Large aircraft not authorised to operate under AOC

- (3) The registered operator of a large aircraft that is not authorised to operate under an AOC must:
- be approved by CASA under Subpart 42.G as a continuing airworthiness management organisation for the type and model of aircraft; or
 - have a contract with a single continuing airworthiness management organisation for that organisation to ensure that all of the requirements mentioned in Divisions 42.C.2, 42.C.3 and 42.C.4 are met for the aircraft.

42.045 Small aircraft not authorised to operate under AOCs may have continuing airworthiness management organisations

- (1) The registered operator of a small aircraft that is not authorised to operate under an AOC may enter into a contract with a continuing airworthiness management organisation for the organisation to ensure that 1 or more of the requirements mentioned in Divisions 42.C.2, 42.C.3 and 42.C.4 are met for the aircraft.

- (2) The registered operator must not, at any time, have a contract mentioned in subregulation (1) with more than 1 continuing airworthiness management organisation in relation to the aircraft.

42.050 Form of continuing airworthiness management contract—all aircraft

- (1) If the registered operator of an aircraft enters into a contract with a continuing airworthiness management organisation as mentioned in regulation 42.040 or 42.045, the registered operator must ensure that the contract:
- (a) is in writing; and
 - (b) includes provisions dealing with the matters mentioned in subregulation (2).

Penalty: 50 penalty units.

- (2) For paragraph (1)(b), the matters are the following:
- (a) the details of the aircraft covered by the contract, including the registration mark, type, model, and serial number for the aircraft;
 - (b) the registered operator's name and address;
 - (c) the continuing airworthiness management organisation's name, address and approval reference number;
 - (d) the matters relating to the continuing airworthiness of the aircraft for which the registered operator is responsible, including the requirements of Subpart 42.C for which the registered operator is responsible;
 - (e) the matters relating to the continuing airworthiness of the aircraft for which the continuing airworthiness management organisation is responsible, including the requirements of Subpart 42.C for which the organisation is responsible;
 - (f) that each party will give the other party information about the continuing airworthiness of the aircraft that relates to the matters mentioned in paragraphs (d) and (e);
 - (g) details of the information to be provided by each party as mentioned in paragraph (f);
 - (h) how the information mentioned in paragraph (f) will be provided by each party;
 - (i) the date of effect of the contract.
- (3) An offence against subregulation (1) is an offence of strict liability.

42.055 Giving information in accordance with contract

If:

- (a) the registered operator of an aircraft enters into a contract with a continuing airworthiness management organisation as mentioned in regulation 42.040 or 42.045; and
- (b) the registered operator has information about the continuing airworthiness of the aircraft that relates to a matter mentioned in paragraph 42.050(2)(e);

Regulation 42.060

the registered operator must give the information to the organisation in accordance with the contract.

Penalty: 50 penalty units.

Note: See regulation 42.670 for the requirement for the continuing airworthiness management organisation for an aircraft to give information to the registered operator of the aircraft.

42.060 Copy of certain provisions of contract to be given to CASA

- (1) If the registered operator of an aircraft enters into a contract with a continuing airworthiness management organisation as mentioned in regulation 42.040 or 42.045, the registered operator must give CASA a copy of the provisions of the contract dealing with the matters mentioned in subregulation 42.050(2) within 14 days after the contract has been made.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

42.065 Copy of variation of certain provisions of contract to be given to CASA

- (1) If:
- (a) the registered operator of an aircraft enters into a contract with a continuing airworthiness management organisation as mentioned in regulation 42.040 or 42.045; and
 - (b) a provision of the contract dealing with a matter mentioned in subregulation 42.050(2) is varied;

the registered operator must give CASA a copy of the varied provision within 14 days after the variation has been made.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

42.070 Notice of termination of contract to be given to CASA

- (1) If:
- (a) the registered operator of an aircraft enters into a contract with a continuing airworthiness management organisation as mentioned in regulation 42.040 or 42.045; and
 - (b) the contract is terminated;

the registered operator must give CASA written notice of the termination within 14 days after the contract is terminated.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

42.075 Notice of contravention of Part to be given to CASA

- (1) If:
- (a) the registered operator of an aircraft enters into a contract with a continuing airworthiness management organisation as mentioned in regulation 42.040 or 42.045; and
 - (b) the registered operator has reasonable grounds to believe that the organisation has contravened a provision of this Part;

the registered operator must give CASA written notice of the contravention within 7 days after the registered operator forms the belief that the contravention has occurred.

Penalty: 50 penalty units.

- (2) If the registered operator is an individual, he or she is not excused from giving a notice under subregulation (1) on the ground that the information in the notice might tend to incriminate the individual or expose the individual to a penalty.

- (3) However:

- (a) the information in the notice; or
- (b) any information, document or thing obtained as a direct or indirect consequence of giving the notice;

is not admissible in evidence against the individual in criminal proceedings other than proceedings for an offence against subsections 136.1(1) or (4), 137.1(1) or 137.2(1) of the *Criminal Code*.

Note 1: Subsections 136.1(1) and (4), 137.1(1) and 137.2(1) of the *Criminal Code* provide for offences in relation to false or misleading statements in applications and false or misleading information or documents.

Note 2: See regulation 42.675 for the equivalent requirement for a continuing airworthiness management organisation.

42.080 Maintenance of aircraft and aeronautical products

Maintenance carried out on an aircraft

- (1) The registered operator of an aircraft must ensure that maintenance carried out on the aircraft is carried out by a person who is permitted to carry out the maintenance under regulation 42.295, 42.300 or 42.301.

Penalty: 50 penalty units.

- (2) The registered operator of an aircraft must ensure that a person mentioned in item 4 or 5 of table 42.300 carries out maintenance on the aircraft at a place only if no approved maintenance organisation is able to carry out the maintenance at that place.

Penalty: 50 penalty units.

Part 42 Continuing airworthiness requirements for aircraft and aeronautical products

Subpart 42.B Requirements for registered operators

Division 42.B.2 Continuing airworthiness requirements

Regulation 42.080

Maintenance carried out on an aeronautical product

- (3) The registered operator of an aircraft must ensure that maintenance carried out on an aeronautical product for the aircraft is carried out by a person who is permitted to carry out the maintenance under regulation 42.305 or 42.306.

Penalty: 50 penalty units.

- (4) An offence against subregulation (1), (2) or (3) is an offence of strict liability.

Division 42.B.3—Record-keeping requirements in relation to authorisations under regulation 42.630

42.085 Application of Division

This Division applies to the registered operator of an aircraft if, under subregulation 42.660(1), a continuing airworthiness management organisation gives the registered operator a copy of an authorisation issued under regulation 42.630.

42.090 Retaining copies of authorisations

- (1) The registered operator must retain a copy of the authorisation for at least 2 years after the authorisation ceases to be in force.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

42.095 Keeping lists of authorised pilot licence holders and flight engineers

- (1) The registered operator must, at all times, keep a list, in accordance with subregulation (2), of the pilot licence holders and flight engineers who hold authorisations issued under regulation 42.630 to provide maintenance services for the registered operator's aircraft.

Penalty: 50 penalty units.

- (2) The list must include the following information for each pilot licence holder and flight engineer:

- (a) the name of the continuing airworthiness management organisation that issued the authorisation;
- (b) the name and licence number of the pilot licence holder or flight engineer;
- (c) the maintenance services that the pilot licence holder or flight engineer is authorised to provide;
- (d) the period for which the authorisation is valid;
- (e) the aircraft for which the authorisation is issued.

- (3) If there is a change to the information mentioned in subregulation (2), the registered operator must update the list within 28 days after the change occurs.

Penalty: 50 penalty units.

- (4) An offence against subregulation (1) or (3) is an offence of strict liability.

Subpart 42.C—Continuing airworthiness management— requirements for person responsible for continuing airworthiness for aircraft

Division 42.C.1—Preliminary

42.100 Purpose of Subpart

This Subpart sets out requirements relating to the continuing airworthiness of an aircraft that apply to the person responsible for continuing airworthiness for the aircraft.

42.105 Meaning of *person responsible for continuing airworthiness* for aircraft

- (1) If the registered operator of an aircraft has entered into a contract with a continuing airworthiness management organisation as mentioned in regulation 42.040 or 42.045, the *person responsible for continuing airworthiness* for the aircraft is:
 - (a) for a requirement of this Subpart for which, under the contract, the registered operator is responsible—the registered operator of the aircraft; and
 - (b) for a requirement of this Subpart for which, under the contract, the organisation is responsible—the organisation.

Note 1: Under regulation 42.050, a contract between the registered operator of an aircraft and a continuing airworthiness management organisation must deal with:

- (a) the matters relating to the continuing airworthiness of the aircraft for which the registered operator is responsible, including the requirements of this Subpart for which the registered operator is responsible; and
- (b) the matters relating to the continuing airworthiness of the aircraft for which the continuing airworthiness management organisation is responsible, including the requirements of this Subpart for which the organisation is responsible.

Note 2: Under subregulation 42.040(2), a contract between the registered operator of an aircraft that is authorised to operate under an AOC, other than an Australian air transport AOC, and a continuing airworthiness management organisation must provide that the organisation is to ensure that all of the requirements mentioned in Divisions 42.C.2, 42.C.3 and 42.C.4 are met for the aircraft.

Note 3: Under subregulation 42.040(3), a contract between the registered operator of a large aircraft that is not authorised to operate under an AOC and a continuing airworthiness management organisation must provide that the organisation is to ensure that all of the requirements mentioned in Divisions 42.C.2, 42.C.3 and 42.C.4 are met for the aircraft.

Note 4: Under regulation 42.045, a contract between the registered operator of a small aircraft that is not authorised to operate under an AOC may provide that the organisation is to ensure that 1 or more of the requirements mentioned in Divisions 42.C.2, 42.C.3 and 42.C.4 are met for the aircraft.

- (2) If subregulation (1) does not apply, the *person responsible for continuing airworthiness* for an aircraft is the registered operator of the aircraft.

Division 42.C.2—Continuing airworthiness management tasks

42.110 Complying with regulations in this Division

- (1) The person responsible for continuing airworthiness for an aircraft must comply with each of regulations 42.115 to 42.165 in relation to the aircraft.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) in relation to any of regulations 42.120 to 42.165 is an offence of strict liability.

42.115 Rectification of defect to aircraft before flight—all aircraft

- (1) If:
 - (a) the person responsible for continuing airworthiness for an aircraft becomes aware that there is a defect in the aircraft; and
 - (b) operation of the aircraft for a flight with the defect is not permitted by:
 - (i) the minimum equipment list for the aircraft; or
 - (ii) the configuration deviation list for the aircraft; or
 - (iii) a special flight permit for the flight; and
 - (c) rectification of the defect is not deferred in accordance with Subdivision 42.D.6.1;

the person must ensure that the defect is rectified before the aircraft is next operated for flight.

- (2) This regulation does not apply in relation to a defect in an item of operational or emergency equipment that:
 - (a) is fitted to the aircraft; and
 - (b) is not required by the certification basis for the aircraft; and
 - (c) is not required by or under these Regulations for operation of the aircraft for the flight.

Note 1: For paragraph (c), see Part 90 and the Part 90 Manual of Standards, regulation 207 of CAR and Civil Aviation Order 20.4, Civil Aviation Order 20.11 and Civil Aviation Order 20.18.

Note 2: See also Division 42.D.6 for other requirements relating to defects.

Note 3: Under regulation 42.110, failure to comply with this regulation is an offence.

42.120 Compliance with airworthiness directives—all aircraft

If:

- (a) an airworthiness directive applies to:
 - (i) an aircraft; or
 - (ii) an aeronautical product that is part of, or used in, an aircraft; and

Part 42 Continuing airworthiness requirements for aircraft and aeronautical products

Subpart 42.C Continuing airworthiness management—requirements for person responsible for continuing airworthiness for aircraft

Division 42.C.2 Continuing airworthiness management tasks

Regulation 42.125

- (b) the aircraft or aeronautical product is not excluded from the operation of the airworthiness directive under subregulation 39.002(2) or paragraph 39.004(2)(b) or(3)(b);

the person responsible for continuing airworthiness for the aircraft must ensure that the requirements mentioned in paragraph 39.002(1)(b), (c) or (d) are complied with in relation to the aircraft or aeronautical product.

Note 1: Paragraph 39.002(1)(b) refers to the requirements of an airworthiness directive, and paragraphs 39.002(1)(c) and (d) refer to the requirements of a means of compliance with the airworthiness directive approved by CASA or an national aviation authority. An airworthiness directive, and a means of compliance with the airworthiness directive approved by CASA or an national aviation authority, will specify when the action required by the airworthiness directive or means of compliance must be carried out.

Note 2: Under regulation 42.110, failure to comply with this regulation is an offence.

42.125 Approval of design for modifications or repairs to aircraft—all aircraft

- (1) The person responsible for continuing airworthiness for an aircraft must ensure that the aircraft is not modified unless:
- (a) there is a Part 21 approval for the design of the modification; and
 - (b) the modification is compatible with the configuration of the aircraft at the time the modification is made.
- (2) The person responsible for continuing airworthiness for an aircraft contravenes subregulation (1) if:
- (a) the aircraft is modified; and
 - (b) either:
 - (i) there is no Part 21 approval for the design of the modification; or
 - (ii) the modification is not compatible with the configuration of the aircraft at the time the modification is made.
- (3) The person responsible for continuing airworthiness for an aircraft must ensure that a repair that involves a change to the approved design of the aircraft is not made unless:
- (a) there is a Part 21 approval for the design of the change involved in the repair; and
 - (b) the repair is compatible with the configuration of the aircraft at the time the repair is made.
- (4) The person responsible for continuing airworthiness for an aircraft contravenes subregulation (3) if:
- (a) the aircraft is repaired; and
 - (b) the repair involves a change to the approved design for the aircraft; and
 - (c) either:
 - (i) there is no Part 21 approval for the change involved in the repair; or
 - (ii) the repair is not compatible with the configuration of the aircraft at the time the modification is made.

Note: Under regulation 42.110, failure to comply with this regulation is an offence.

42.130 Dealing with certain instructions for continuing airworthiness—aircraft authorised to operate under AOCs and large aircraft

- (1) This regulation applies to the person responsible for continuing airworthiness for an aircraft that is authorised to operate under an AOC or a large aircraft if:
- (a) an instruction for continuing airworthiness, issued by a person mentioned in subregulation (2), applies to the aircraft, or the aircraft's engine or propeller; and
 - (b) the instruction requires maintenance to be carried out on the aircraft, aircraft engine or propeller; and
 - (c) the person is not required, by another provision of these Regulations or by an airworthiness directive, to comply with the instruction.

Example: A service bulletin that is not mentioned in an airworthiness directive.

- (2) For paragraph (1)(a), the persons are the following:
- (a) the type certificate holder or foreign type certificate holder for the aircraft, aircraft engine or propeller;
 - (b) the supplemental type certificate holder or foreign supplemental type certificate holder for the aircraft, aircraft engine or propeller.
- (3) The person must, within the time specified in the instruction:
- (a) ensure that the instruction is complied with; or
 - (b) record, in writing, in the continuing airworthiness records system for the aircraft:
 - (i) information identifying the instruction; and
 - (ii) the reason for not complying with the instruction.

Note: Under regulation 42.110, failure to comply with this regulation is an offence.

42.135 Replacement of life limited aeronautical product—all aircraft

If:

- (a) an aeronautical product that has a life limit is fitted to an aircraft; and
- (b) the aircraft is to be operated for a flight; and
- (c) the product's life limit is reached before, or would be reached during, the flight;

the person responsible for continuing airworthiness for the aircraft must ensure that the product is replaced before the flight.

Note: Under regulation 42.110, failure to comply with this regulation is an offence.

42.140 Approved maintenance program required—aircraft authorised to operate under AOCs and large aircraft

The person responsible for continuing airworthiness for an aircraft that is authorised to operate under an AOC or a large aircraft must ensure that there is an approved maintenance program for the aircraft before the aircraft is operated for its first flight on or after the responsibility start date for the person and the aircraft.

Part 42 Continuing airworthiness requirements for aircraft and aeronautical products

Subpart 42.C Continuing airworthiness management—requirements for person responsible for continuing airworthiness for aircraft

Division 42.C.2 Continuing airworthiness management tasks

Regulation 42.145

Note 1: For the requirements for approval of maintenance programs, including compliance with the requirements specified in the Part 42 Manual of Standards, see Subpart 42.J.

Note 2: Under regulation 42.110, failure to comply with this regulation is an offence.

42.145 Compliance with maintenance program required—all aircraft

The person responsible for continuing airworthiness for an aircraft must ensure that maintenance is carried out on the aircraft as required by the maintenance program for the aircraft.

Note: Under regulation 42.110, failure to comply with this regulation is an offence.

42.150 Updating approved maintenance program following change to instructions for continuing airworthiness

- (1) This regulation applies to the person responsible for continuing airworthiness for an aircraft if:
 - (a) there is an approved maintenance program for the aircraft; and
 - (b) there is a change to the requirements in the instructions for continuing airworthiness for the aircraft, or an aeronautical product fitted to the aircraft, that relate to maintenance that is required by the instructions to be carried out on a regular basis; and
 - (c) as a result of the change, the program no longer complies with the requirements.
- (2) The person must, within 90 days after the occurrence of the change:
 - (a) vary the program so that it complies with the requirements; and
 - (b) either:
 - (i) approve the variation in accordance with Division 42.J.4; or
 - (ii) apply for approval of the variation in accordance with Division 42.J.5.

Note: Under regulation 42.110, failure to comply with this regulation is an offence.

42.155 Ensuring effectiveness of approved maintenance program using approved reliability programs—certain aircraft

- (1) The person responsible for continuing airworthiness for an aircraft mentioned in subregulation (2) must ensure that there is an approved reliability program for the aircraft before the aircraft is operated for its first flight on or after the responsibility start date for the person and the aircraft.
- (2) The aircraft are the following:
 - (a) a large aircraft, if the approved maintenance program for the aircraft:
 - (i) requires the carrying out of maintenance that was developed using the specification, known as ‘ATA MSG-3’, published by the Air Transport Association of America, as in force from time to time; or
 - (ii) requires condition monitoring of an aeronautical product or a system of the aircraft;

Regulation 42.160

- (b) an aircraft for which an approval under regulation 121.010 for the purposes of paragraph 121.035(1)(b) is in force;
- (ba) an aircraft for which an approval under regulation 135.020 for the purposes of subregulation 135.035(1) is in force;
- (c) an aircraft, if the instructions for continuing airworthiness for the aircraft require the use of a reliability program for the aircraft.

Note 1: The purpose of a reliability program for an aircraft is to ensure the effectiveness of the approved maintenance program for the aircraft in ensuring the continuing airworthiness of the aircraft.

Note 2: For the requirements for approval of reliability programs, including compliance with the requirements specified in the Part 42 Manual of Standards, see Subpart 42.L.

Note 3: Under regulation 42.110, failure to comply with this regulation is an offence.

42.160 Ensuring effectiveness of approved maintenance program—other aircraft authorised to operate under AOCs and large aircraft

- (1) This regulation applies to the person responsible for continuing airworthiness for:
 - (a) a large aircraft to which regulation 42.155 does not apply; or
 - (b) an aircraft:
 - (i) that is authorised to operate under an AOC; and
 - (ii) to which regulation 42.155 does not apply.
- (2) The person must, at least once every 12 months:
 - (a) analyse the effectiveness of the approved maintenance program for the aircraft in ensuring the continuing airworthiness of the aircraft; and
 - (b) record in writing:
 - (i) the results of the analysis; and
 - (ii) information that substantiates the results of the analysis.
- (3) If the results of the analysis indicate that the approved maintenance program should be varied, the person must, within 30 days after completing the analysis:
 - (a) approve the variation in accordance with Division 42.J.4; or
 - (b) apply for approval of the variation in accordance with Division 42.J.5.
- (4) The person must retain a record mentioned in paragraph (2)(b) for 2 years after the record is made.

Note: Under regulation 42.110, failure to comply with this regulation is an offence.

42.165 Removal of aeronautical products fitted as permitted by regulation 42.440

If an aeronautical product is fitted to an aircraft as permitted by regulation 42.440, the person responsible for continuing airworthiness for the aircraft must, within 36 flight hours after it is fitted:

- (a) obtain an authorised release certificate for the product; or
- (b) ensure that the product is removed from the aircraft.

Part 42 Continuing airworthiness requirements for aircraft and aeronautical products

Subpart 42.C Continuing airworthiness management—requirements for person responsible for continuing airworthiness for aircraft

Division 42.C.2 Continuing airworthiness management tasks

Regulation 42.165

Note: Under regulation 42.110, failure to comply with this regulation is an offence.

Division 42.C.3—Continuing airworthiness records—all aircraft

Subdivision 42.C.3.1—Continuing airworthiness records system

42.170 Continuing airworthiness records system

The person responsible for continuing airworthiness for an aircraft must, at all times, have a system:

- (a) that is capable of containing the continuing airworthiness records for the aircraft; and
- (b) that identifies the aircraft by:
 - (i) its make; and
 - (ii) its type and model designation; and
 - (iii) its registration mark; and
 - (iv) its serial number.

Penalty: 50 penalty units.

Note: For how long records must be retained, see regulation 42.260.

Subdivision 42.C.3.2—Information about aircraft

42.175 Requirement to record information

- (1) The person responsible for continuing airworthiness for an aircraft must comply with each of regulations 42.180 to 42.210 in relation to the aircraft.

Penalty: 50 penalty units.

- (2) If, under any of regulations 42.180 to 42.210, the person is required to ensure that information in relation to the aircraft is recorded, the person must ensure that the information is recorded in writing in the continuing airworthiness records system for the aircraft.

Penalty: 50 penalty units.

- (3) If, under any of regulations 42.180 to 42.210, the person is required to ensure that a record of information in relation to the aircraft is updated, the person must ensure that the record is updated in writing in the continuing airworthiness records system for the aircraft.

Penalty: 50 penalty units.

- (4) An offence against subregulation (1), (2) or (3) is an offence of strict liability.

Note: See regulation 42.1085 for requirements relating to records.

Regulation 42.180

42.180 Information about aircraft engines and propellers

Required information

- (1) For this regulation, the following information is the **required information** for an aircraft engine or propeller:
 - (a) its make;
 - (b) its type and model designation;
 - (c) its serial number.

Required information to be recorded before first flight

- (2) The person responsible for continuing airworthiness for an aircraft must ensure that the required information for each of the aircraft's engines and propellers is recorded before the aircraft is operated for its first flight on or after the responsibility start date for the person and the aircraft.

Required information to be recorded if engine or propeller replaced

- (3) If, on or after the responsibility start date, an aircraft engine or propeller is replaced, the person must ensure that the required information for the replacement aircraft engine or propeller is recorded before the time mentioned in subregulation (4).
- (4) The time is the end of 30 days after the day one of the following documents is issued for the aircraft in relation to the maintenance that included the replacement of the engine or propeller:
 - (a) a certificate of release to service;
 - (b) an equivalent document issued in accordance with an NAA arrangement mentioned in regulation 42.301.

42.185 Information about empty weight of aircraft

Required information

- (1) For this regulation, the following information is the **required information** for an aircraft:
 - (a) the empty weight of the aircraft, determined in accordance with the method set out in Civil Aviation Order 100.7;
 - (b) the position of the centre of gravity on the aircraft when the aircraft is in its empty weight configuration, determined in accordance with the method set out in Civil Aviation Order 100.7.

Required information to be recorded before first flight

- (2) The person responsible for continuing airworthiness for an aircraft must ensure that:
 - (a) the required information for the aircraft is recorded; and
 - (b) the record of that information is up to date;

before the aircraft is operated for its first flight on or after the responsibility start date for the person and the aircraft (the *first flight*).

Updating record of required information

- (3) If, after the aircraft is operated for its first flight, there is a change to:
- (a) the empty weight of the aircraft; or
 - (b) the position of the centre of gravity on the aircraft when the aircraft is in its empty weight configuration;

the person must ensure that the record of the required information is updated before the aircraft is next operated for flight.

Note 1: Under subregulation 42.175(1), failure to comply with this regulation is an offence.

Note 2: Under subregulations 42.175(2) and (3), information recorded or updated under this regulation must be recorded and updated in writing in the continuing airworthiness records system for the aircraft.

42.190 Information about utilisation of aircraft

Required information

- (1) For this regulation, the *required information* for an aircraft is information about the utilisation of the aircraft, or of an aeronautical product fitted to the aircraft, that:
- (a) the person responsible for continuing airworthiness for the aircraft uses in ensuring that a requirement mentioned in regulation 42.120, 42.130, 42.135 or 42.145 is met; and
 - (b) includes the total time-in-service of:
 - (i) the aircraft; and
 - (ii) each of the aircraft's engines; and
 - (iii) each of the aircraft's propellers.

Example 1: For paragraph (a), for an aircraft

The total number of landings the aircraft has carried out.

Example 2: For paragraph (a), for an aeronautical product fitted to an aircraft

For an aircraft engine, the total number of engine cycles the engine has performed.

Required information to be recorded before first flight

- (2) The person responsible for continuing airworthiness for an aircraft must ensure that:
- (a) the required information for the aircraft is recorded; and
 - (b) the record of that information is up to date;
- before the aircraft is operated for its first flight on or after the responsibility start date for the person and the aircraft.

Part 42 Continuing airworthiness requirements for aircraft and aeronautical products

Subpart 42.C Continuing airworthiness management—requirements for person responsible for continuing airworthiness for aircraft

Division 42.C.3 Continuing airworthiness records—all aircraft

Regulation 42.195

Updating record of required information

- (3) If, on or after the responsibility start date, the aircraft is operated for flight, the person must ensure that the record of the required information for the aircraft is updated before the earlier of the following:
- (a) when a requirement mentioned in regulation 42.120, 42.130, 42.135 or 42.145 is due to be met;
 - (b) the end of 3 days after the completion of the flight.

Note 1: Under subregulation 42.175(1), failure to comply with this regulation is an offence.

Note 2: Under subregulations 42.175(2) and (3), information recorded or updated under this regulation must be recorded and updated in writing in the continuing airworthiness records system for the aircraft.

42.195 Information about compliance with airworthiness directives

Required information

- (1) For this regulation, the following information is the **required information** for an airworthiness directive that applies to an aircraft, or to an aeronautical product fitted to the aircraft:
- (a) information identifying the airworthiness directive;
 - (b) if action is required to meet the requirements mentioned in paragraph 39.002(1)(b), (c) or (d) for the airworthiness directive—when the action is due, or next due, to be carried out;
 - (c) if the requirements mentioned in paragraph 39.002(1)(b), (c) or (d) have been met for the airworthiness directive in relation to the aircraft or aeronautical product:
 - (i) when the requirements were last met; and
 - (ii) if the requirements of a means of compliance with the airworthiness directive mentioned in paragraph 39.002(1)(c) or (d) have been met—information identifying that means of compliance; and
 - (iii) if the airworthiness directive applies to an aeronautical product—the part and serial number (if any) for the product.

Required information to be recorded before first flight—applicable airworthiness directives

- (2) The person responsible for continuing airworthiness for an aircraft must ensure that the information mentioned in subregulation (3) is recorded before the aircraft is operated for its first flight on or after the responsibility start date for the person and the aircraft.
- (3) The information is the required information for each airworthiness directive that, immediately before the responsibility start date, applied to the aircraft or an aeronautical product fitted to the aircraft.

Required information to be recorded—airworthiness directives that become applicable

- (4) If, on or after the responsibility start date, an airworthiness directive becomes applicable to the aircraft, or to an aeronautical product fitted to the aircraft, the person must ensure that the required information for the airworthiness directive is recorded before the earlier of the following:
- (a) when action is due to be carried out to meet the requirements mentioned in paragraph 39.002(1)(b), (c) or (d) for the airworthiness directive;
 - (b) the end of 30 days after the airworthiness directive becomes applicable to the aircraft or the aeronautical product.

Updating record of required information

- (5) If, on or after the responsibility start date, action is carried out to meet the requirements mentioned in paragraph 39.002(1)(b), (c) or (d) for an airworthiness directive that applies to the aircraft, or to an aeronautical product fitted to the aircraft, the person must comply with subregulation (6).
- (6) The person must ensure that the record of the required information for the airworthiness directive is updated before the earlier of the following:
- (a) when action is next due to be carried out to meet the requirements mentioned in paragraph 39.002(1)(b), (c) or (d) for the airworthiness directive (if applicable);
 - (b) the end of 30 days after the day the action is carried out.

Note 1: Under subregulation 42.175(1), failure to comply with this regulation is an offence.

Note 2: Under subregulations 42.175(2) and (3), information recorded or updated under this regulation must be recorded and updated in writing in the continuing airworthiness records system for the aircraft.

42.200 Information about compliance with maintenance program

Required information

- (1) For this regulation, the following information is the **required information** for maintenance that is required by the aircraft's maintenance program to be carried out on the aircraft or on an aeronautical product fitted to the aircraft:
- (a) information identifying the maintenance;
 - (b) the interval at which the maintenance is required by the aircraft's maintenance program to be carried out;
 - (c) if the maintenance relates to an aeronautical product—the part and serial number (if any) for the product;
 - (d) if the maintenance has been carried out—when the maintenance was carried out;
 - (e) when the maintenance is next due to be carried out.
- (2) However, the **required information** mentioned in subregulation (1) does not include information mentioned in subregulation 42.195(1).

Part 42 Continuing airworthiness requirements for aircraft and aeronautical products

Subpart 42.C Continuing airworthiness management—requirements for person responsible for continuing airworthiness for aircraft

Division 42.C.3 Continuing airworthiness records—all aircraft

Regulation 42.200

Required information to be recorded before first flight

- (3) The person responsible for continuing airworthiness for an aircraft must ensure that:
- (a) the required information for the maintenance is recorded; and
 - (b) the record of that information is up to date;
- before the aircraft is operated for its first flight on or after the responsibility start date for the person and the aircraft (the **first flight**).

Required information to be updated if maintenance carried out

- (4) If, after the aircraft is operated for its first flight, the maintenance is carried out on the aircraft or on the aeronautical product, the person must ensure that the record is updated before the earlier of the following:
- (a) when maintenance is next due to be carried out on the aircraft, or on an aeronautical product fitted to the aircraft, to comply with regulation 42.145;
 - (b) the end of 30 days after one of the following documents is issued for the aircraft in relation to the maintenance:
 - (i) a certificate of release to service;
 - (ii) an equivalent document issued in accordance with an NAA arrangement mentioned in regulation 42.301.

Required information to be updated if maintenance program changed

- (5) If, after the aircraft is operated for its first flight, there is a change to the aircraft's maintenance program in relation to the maintenance, the person must ensure that the record of the required information for the maintenance is updated before the earlier of the following:
- (a) when maintenance is due to be carried out on the aircraft, or on an aeronautical product fitted to the aircraft, to comply with regulation 42.145;
 - (b) the end of 30 days after the change is made.

Required information to be updated if aeronautical product fitted

- (6) If:
- (a) the maintenance relates to an aeronautical product; and
 - (b) after the aircraft is operated for its first flight, the aeronautical product is fitted to the aircraft;
- the person must ensure that the record is updated before the time mentioned in subregulation (7).
- (7) The time is the earlier of the following:
- (a) when maintenance is due to be carried out on the aircraft, or on an aeronautical product fitted to the aircraft, to comply with regulation 42.145;

-
- (b) the end of 30 days after one of the following documents is issued for the aircraft in relation to the maintenance that included the fitting of the aeronautical product:
- (i) a certificate of release to service;
 - (ii) an equivalent document issued in accordance with an NAA arrangement mentioned in regulation 42.301.

Note 1: Under subregulation 42.175(1), failure to comply with this regulation is an offence.

Note 2: Under subregulations 42.175(2) and (3), information recorded or updated under this regulation must be recorded and updated in writing in the continuing airworthiness records system for the aircraft.

42.205 Information about modifications

Required information

- (1) For this regulation, the following information is the **required information** for a modification made to an aircraft or to an aeronautical product fitted to the aircraft:
 - (a) a description of the modification;
 - (b) a reference to the design data used for the modification;
 - (c) when the modification is made;
 - (d) if the modification relates to an aeronautical product—the part and serial number (if any) for the product.

Required information to be recorded before first flight

- (2) The person responsible for continuing airworthiness for an aircraft must ensure that the information mentioned in subregulation (3) is recorded before the aircraft is operated for its first flight on or after the responsibility start date for the person and the aircraft.
- (3) The information is the required information for each modification that was made, before the responsibility start date, to the aircraft or an aeronautical product fitted to the aircraft.

Required information to be recorded for subsequent modifications

- (4) If, on or after the responsibility start date, a modification is made to the aircraft or to an aeronautical product fitted to the aircraft, the person must ensure that the required information for the modification is recorded before the time mentioned in subregulation (5).
- (5) The time is the end of 30 days after one of the following documents is issued for the aircraft in relation to the maintenance that included the modification:
 - (a) a certificate of release to service;
 - (b) an equivalent document issued in accordance with an NAA arrangement mentioned in regulation 42.301.

Regulation 42.210

42.210 Information about aeronautical products with life limit

Required information

- (1) For this regulation, the following information is the **required information** for an aeronautical product that is fitted to an aircraft and that has a life limit:
 - (a) details that identify the aeronautical product, including its part and serial number (if any);
 - (b) the life limit for the aeronautical product;
 - (c) when the aeronautical product is due to be removed from the aircraft.

Required information to be recorded before first flight

- (2) The person responsible for continuing airworthiness for an aircraft must ensure that the information mentioned in subregulation (3) is recorded before the aircraft is operated for its first flight on or after the responsibility start date for the person and the aircraft.
- (3) The information is the required information for an aeronautical product that, immediately before the responsibility start date:
 - (a) was fitted to the aircraft; and
 - (b) had a life limit.

Required information to be recorded for aeronautical products fitted on or after responsibility start date

- (4) If, on or after the responsibility start date, an aeronautical product that has a life limit is fitted to the aircraft, the person must ensure that the required information for the product is recorded before the earlier of the following:
 - (a) the time that the product reaches its life limit;
 - (b) the end of 30 days after one of the following documents is issued for the aircraft in relation to the maintenance that included the fitting of the product to the aircraft:
 - (i) a certificate of release to service;
 - (ii) an equivalent document issued in accordance with an NAA arrangement mentioned in regulation 42.301.

Required information to be recorded if life limit becomes applicable on or after responsibility start date

- (5) If, on or after the responsibility start date, a life limit becomes applicable to an aeronautical product fitted to the aircraft, the person must ensure that the required information for the product is recorded before the earlier of the following:
 - (a) the time that the product reaches its life limit;
 - (b) the end of 30 days after the life limit becomes applicable to the product.

Updating record of required information

- (6) If, on or after the responsibility start date, there is a change to the life limit for an aeronautical product fitted to the aircraft, the person must ensure that the record of the required information for the product is updated before the earlier of the following:
- (a) the time that the product reaches its life limit;
 - (b) the end of 30 days after the change is made.

Note 1: Under subregulation 42.175(1), failure to comply with this regulation is an offence.

Note 2: Under subregulations 42.175(2) and (3), information recorded or updated under this regulation must be recorded and updated in writing in the continuing airworthiness records system for the aircraft.

Subdivision 42.C.3.3—Substantiating documents

42.215 Substantiating documents

- (1) The person responsible for continuing airworthiness for an aircraft must keep documents that substantiate the information recorded under regulations 42.180, 42.185, 42.190, 42.195, 42.200, 42.205 and 42.210 for the aircraft.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For how long substantiating documents must be retained, see regulation 42.260.

Subdivision 42.C.3.4—Flight technical log

42.220 Flight technical log

- (1) The person responsible for continuing airworthiness for an aircraft must, at all times, have a log for the aircraft that:
- (a) includes details identifying the aircraft, including the type, model and registration mark for the aircraft; and
 - (b) is capable of containing the documents and information for the aircraft that, under this Part, are required to be included in the log.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note 1: Under paragraph 42.030(2)(e), before an aircraft undertakes a flight, the flight technical log for an aircraft must record the details of any item of operational or emergency equipment that is fitted to the aircraft and is unserviceable.

Note 2: Under regulation 42.230, if the person responsible for continuing airworthiness for an aircraft is not a continuing airworthiness management organisation, and CASA has not, under regulation 42.235, approved another means of recording the required information for the aircraft (within the meaning given by subregulation 42.230(2)), the person must ensure that that information is recorded and updated in the flight technical log for the aircraft.

Part 42 Continuing airworthiness requirements for aircraft and aeronautical products

Subpart 42.C Continuing airworthiness management—requirements for person responsible for continuing airworthiness for aircraft

Division 42.C.3 Continuing airworthiness records—all aircraft

Regulation 42.225

- Note 3: Under regulation 42.370, a qualified individual must enter information relating to the deferral of the rectification of a defect in an aircraft in the flight technical log for the aircraft if the defect affects the operation of the aircraft.
- Note 4: Under paragraph 42.440(g) an entry mentioned in that paragraph must be made in the flight technical log for an aircraft if a part is fitted to the aircraft as permitted by regulation 42.440.
- Note 5: Under subregulation 42.760(2), a certificate of release to service for an aircraft in relation to maintenance carried out on the aircraft must be included in the flight technical log for the aircraft.
- Note 6: Under subregulation 42.1075(1), the pilot in command of an aircraft for a flight must ensure that the information mentioned in that subregulation for the flight is recorded in the flight technical log for the aircraft.
- Note 7: Under regulation 42.245, the person responsible for continuing airworthiness for the aircraft must ensure that the aircraft's flight technical log is capable of containing the information mentioned in regulation 42.190 for each flight for the aircraft if CASA has not, under regulation 42.250, approved another means of recording the information.
- Note 8: Under subregulation 42.1075(2), the pilot in command of an aircraft for a flight must record the information mentioned in regulation 42.190 for the flight in the aircraft's flight technical log if the log is capable of containing the information.

42.225 Availability of flight technical log

- (1) The person responsible for continuing airworthiness for an aircraft must ensure that the flight technical log for the aircraft is available to a person who is the pilot in command of the aircraft while the person is the pilot in command of the aircraft.

Penalty: 50 penalty units.

- (2) The person must ensure that the flight technical log for the aircraft is available to a person who is carrying out maintenance on the aircraft while the person is carrying out the maintenance.

Penalty: 50 penalty units.

- (3) An offence against subregulation (1) or (2) is an offence of strict liability.

Subdivision 42.C.3.5—Recording next maintenance due to be carried out

42.230 Recording details of next maintenance due to be carried out in flight technical log

When this regulation applies

- (1) This regulation applies if:
- (a) the person responsible for continuing airworthiness for an aircraft is not a continuing airworthiness management organisation; and
 - (b) CASA has not, under regulation 42.235, approved another means of recording the required information for the aircraft.

Note: If the person responsible for continuing airworthiness for an aircraft is a continuing airworthiness management organisation, the person is required to record the required

information for the aircraft in the continuing airworthiness records for the aircraft—see regulation 42.200.

Required information

- (2) For this regulation, the **required information** for an aircraft at a particular time is:
- (a) information identifying the next maintenance that is due to be carried out on the aircraft in accordance with the aircraft's maintenance program; and
 - (b) when the maintenance is due to be carried out.

Information to be recorded before first flight

- (3) The person must ensure that the required information for the aircraft is recorded in the aircraft's flight technical log before the aircraft is operated for its first flight on or after the responsibility start date for the person and the aircraft (the **first flight**).

Penalty: 50 penalty units.

Updating record of required information

- (4) If, after the first flight, maintenance is carried out on the aircraft in accordance with the aircraft's maintenance program, the person must ensure that the record of the required information for the aircraft is updated in the aircraft's flight technical log before the aircraft is next operated for flight.

Penalty: 50 penalty units.

- (5) An offence against subregulation (3) or (4) is an offence of strict liability.

42.235 Approval of another means of recording next maintenance due to be carried out

- (1) If the person responsible for continuing airworthiness for an aircraft is not a continuing airworthiness management organisation, the person may apply, in writing, to CASA for approval of:
- (a) a means, other than a flight technical log, of recording the required information for the aircraft (within the meaning given by subregulation 42.230(2)) for the purpose of informing the aircraft's flight crew of the required information; and
 - (b) the time within which the required information must be recorded by the other means.
- (2) Subject to regulation 11.055, CASA must approve the means if CASA is satisfied that the means is at least as reliable a means of recording the required information for the aircraft as the use of the flight technical log.

Note 1: See Part 11 for other matters relating to applications and decisions.

Note 2: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

Part 42 Continuing airworthiness requirements for aircraft and aeronautical products

Subpart 42.C Continuing airworthiness management—requirements for person responsible for continuing airworthiness for aircraft

Division 42.C.3 Continuing airworthiness records—all aircraft

Regulation 42.240

- (a) a decision refusing to issue, or cancelling, suspending or varying, an approval; or
- (b) a decision imposing a condition on an approval.

42.240 Recording details of next maintenance due to be carried out by approved other means

(1) If:

- (a) the person responsible for continuing airworthiness for an aircraft is not a continuing airworthiness management organisation; and
- (b) CASA has, under regulation 42.235, approved:
 - (i) another means of recording the required information for the aircraft (within the meaning given by subregulation 42.230(2)); and
 - (ii) the time within which the required information must be recorded by the other means;

the person must ensure that the required information for the aircraft is recorded in accordance with the approval.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Subdivision 42.C.3.6—Recording utilisation information

42.245 Ensuring flight technical log can contain utilisation information mentioned in regulation 42.190 for each flight if another means not approved

(1) If CASA has not, under regulation 42.250, approved:

- (a) another means of recording the information mentioned in regulation 42.190 for each flight for an aircraft; and
- (b) the time within which the information must be recorded by the other means;

the person responsible for continuing airworthiness for the aircraft must ensure that the aircraft's flight technical log is capable of containing the information.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: Under subregulation 42.1075(2), the pilot in command of an aircraft for a flight must record the information mentioned in regulation 42.190 for the flight in the aircraft's flight technical log if the log is capable of containing the information.

42.250 Approval of another means of recording utilisation information mentioned in regulation 42.190 for each flight

- (1) The person responsible for continuing airworthiness for an aircraft may apply, in writing, to CASA for approval of:
- (a) a means, other than a flight technical log, for recording the information mentioned in regulation 42.190 for each flight for the aircraft; and

(b) the time within which the information must be recorded by the other means.

- (2) Subject to regulation 11.055, CASA must approve the means if CASA is satisfied that the means is at least as reliable a means of recording the information as the use of the flight technical log.

Note 1: See Part 11 for other matters relating to applications and decisions.

Note 2: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to issue, or cancelling, suspending or varying, an approval; or
- (b) a decision imposing a condition on an approval.

42.255 Recording utilisation information mentioned in regulation 42.190 for each flight by approved other means

- (1) If CASA has, under regulation 42.250, approved:
- (a) another means of recording the information mentioned in regulation 42.190 for each flight for an aircraft; and
 - (b) the time within which the information must be recorded by the other means;

the person responsible for continuing airworthiness for the aircraft must ensure that the information is recorded in accordance with the approval.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Subdivision 42.C.3.7—Retention and transfer of records

42.260 Retention of continuing airworthiness records

- (1) The person responsible for continuing airworthiness for an aircraft must retain a record or document mentioned in an item of the following table for the period:
- (a) starting on:
 - (i) if the person created the record or document, and is the person responsible for continuing airworthiness for the aircraft on the creation date for the record or document—the creation date for the record or document; or
 - (ii) if the person did not create the record or document, and is the person responsible for continuing airworthiness for the aircraft on the creation date for the record or document—the date that the person receives the record or document; or
 - (iii) if the person is not the person responsible for continuing airworthiness for the aircraft on the creation date for the record or document—the date the person receives the continuing airworthiness records for the aircraft under regulation 42.265; and
 - (b) ending on the first-occurring of the following:
 - (i) the end date (if any) mentioned in the item;

Part 42 Continuing airworthiness requirements for aircraft and aeronautical products

Subpart 42.C Continuing airworthiness management—requirements for person responsible for continuing airworthiness for aircraft

Division 42.C.3 Continuing airworthiness records—all aircraft

Regulation 42.260

- (ii) the date the person gives the records to the person who becomes the person responsible for continuing airworthiness for the aircraft under regulation 42.265.

Item	Record or document	End date
1	A document kept under regulation 42.215 for the aircraft	The date that the information substantiated by the document is superseded by other information
2	A copy of a maintenance record, that is not covered by item 1, for maintenance carried out on the aircraft	1 year after the creation date for the maintenance record
3	A copy of a document that: (a) is equivalent to a maintenance record for maintenance carried out on the aircraft; and (b) is issued under a law of a foreign country; and (c) is not covered by item 1	1 year after the creation date for the document
4	A certificate of release to service, or an equivalent document issued in accordance with an NAA arrangement mentioned in regulation 42.301, for the aircraft in relation to maintenance carried out on the aircraft	The later of the following: (a) 1 year after the date of issue of the certificate or equivalent document; (b) the date a certificate of release to service or equivalent document is next issued for the aircraft in relation to maintenance carried out on the aircraft
5	A record of information: (a) that is made in the flight technical log for an aircraft in accordance with this Part; and (b) that is not covered by item 1, 2 or 4	1 year after the creation date for the record
6	A copy of the design of a modification or repair that is unique to the aircraft	—

Penalty: 50 penalty units.

Example 1: For item 1, an authorised release certificate for an aeronautical product that is fitted to an aircraft must be kept until the date the aeronautical product is removed from the aircraft.

Example 2: For item 1, an in-house release document for an aeronautical product that is fitted to an aircraft must be kept until the date the aeronautical product is removed from the aircraft.

Example 3: For item 1, a document mentioned in paragraph 42.440(e) for an aeronautical product fitted to an aircraft as permitted by regulation 42.440 must be kept until the date the aeronautical product is removed from the aircraft.

Example 4: For item 1, a document that substantiates the empty weight of the aircraft and the centre of gravity position on the aircraft at its empty weight configuration must be kept until the date that the aircraft is next weighed and its empty weight, and its centre of gravity in its empty weight configuration, is determined.

Note: For item 5, see the notes to regulation 42.220.

(2) In this regulation:

creation date means:

- (a) for a record of information—the date the record is made; and
- (b) for a document—the date the document is created.

(3) An offence against subregulation (1) is an offence of strict liability.

42.265 Transfer of continuing airworthiness records for aircraft

(1) This regulation applies if:

- (a) a person (the *first person*) ceases to be the person responsible for continuing airworthiness for an aircraft; and
- (b) another person (the *second person*) becomes the person responsible for continuing airworthiness for the aircraft.

(2) Within 30 days after the first person ceases to be the person responsible for continuing airworthiness for the aircraft, the first person must give the continuing airworthiness records for the aircraft to the second person.

Penalty: 50 penalty units.

(3) An offence against subregulation (2) is an offence of strict liability.

Regulation 42.270

Division 42.C.4—Major defects—reporting and investigating

42.270 Reporting major defects—all aircraft

- (1) If the person responsible for continuing airworthiness for an aircraft becomes aware of a major defect in the aircraft, the person must, within 2 days after becoming aware of the defect, report the defect, in accordance with subregulation (2), to:
 - (a) CASA; and
 - (b) if the defect does not relate to a modification mentioned in paragraph (c), (d), (e) or (f)—the type certificate holder or foreign type certificate holder for the aircraft; and
 - (c) if the defect relates to a modification made to the aircraft that is covered by a supplemental type certificate for the aircraft—the supplemental type certificate holder or foreign supplemental type certificate holder for the aircraft; and
 - (d) if the defect relates to a part produced in accordance with an Australian Parts Manufacturer Approval—the holder of the Australian Parts Manufacturer Approval; and
 - (e) if the defect relates to a part produced in accordance with a Parts Manufacturer Approval issued by the FAA—the holder of the Parts Manufacturer Approval; and
 - (ea) if the defect relates to a part produced in accordance with a parts manufacturer approval issued by a national aviation authority to which subregulation (1A) applies—the holder of the approval; and
 - (f) if the defect relates to a modification made in accordance with a design covered by any of the following approvals—the holder of the approval:
 - (i) a modification/repair design approval;
 - (ii) an approval mentioned in regulation 21.475;
 - (iii) an approval that continues in force under regulation 202.054, 202.055 or 202.056.

Penalty: 50 penalty units.

- (1A) For paragraph (1)(ea), this subregulation applies to the national aviation authority of a Contracting State if:
 - (a) Australia has an agreement (however described) with the Contracting State for the acceptance of parts manufacturer approvals; or
 - (b) CASA has an agreement (however described) with the national aviation authority for the acceptance of parts manufacturer approvals.
- (2) The report must be made:
 - (a) in writing; and
 - (b) in the approved form.

Note: Under regulation 11.018, a report in the approved form is not complete unless it contains all of the information required by the form.

Regulation 42.275

- (3) It is a defence to a prosecution under subregulation (1) that relates to a failure to report a defect to the holder of an approval mentioned in subparagraph (1)(f)(iii) that the defendant:
- (a) made all reasonable efforts to identify the holder of the approval; and
 - (b) was unable to identify the holder.

Note 1: A defendant bears an evidential burden in relation to the matters mentioned in subregulation (3) (see subsection 13.3(3) of the *Criminal Code*).

Note 2: See also Division 42.D.6 for other requirements relating to defects.

42.275 Investigating major defects—large aircraft and aircraft authorised to operate under AOC

If the person responsible for continuing airworthiness for a large aircraft or an aircraft that is authorised to operate under an AOC becomes aware of a major defect in the aircraft, the person must:

- (a) investigate the cause of the defect; and
- (b) give CASA a report containing the findings of the investigation within 14 days after completing the investigation.

Penalty: 50 penalty units.

Note: See also Division 42.D.6 for other requirements relating to defects.

42.280 Action by CASA following report of major defect

- (1) If CASA receives a report about a major defect under regulation 42.270, CASA may, by notice in writing, require the person who made the report:
- (a) to give CASA further information in relation to the major defect within a period specified in the notice; or
 - (b) to keep the aircraft, or the part of the aircraft that is defective, in a state that will allow CASA to investigate the defect; or
 - (c) to give to CASA any document, aeronautical product or other thing in the possession, or under the control, of the person that relates to the defect.
- (2) The person must comply with the notice.

Penalty: 50 penalty units.

- (3) An offence against subregulation (2) is an offence of strict liability.

42.285 Action by certificate holder or approval holder following report of major defect

- (1) If a person mentioned in paragraph 42.270(1)(b), (c), (d), (e) or (f) (the **first person**) receives a report about a major defect under regulation 42.270, the first person may, by notice in writing, require the person who made the report (the **second person**) to give the first person further information in relation to the major defect.

Part 42 Continuing airworthiness requirements for aircraft and aeronautical products

Subpart 42.C Continuing airworthiness management—requirements for person responsible for continuing airworthiness for aircraft

Division 42.C.4 Major defects—reporting and investigating

Regulation 42.285

- (2) The notice must specify the period within which the further information must be provided.
- (3) The period specified in the notice must be at least 14 days from the date of the request.
- (4) The second person must comply with the notice.
Penalty: 50 penalty units.
- (5) An offence against subregulation (4) is an offence of strict liability.

Subpart 42.D—Maintenance

Division 42.D.1—Preliminary

42.290 Purpose of Subpart

This Subpart sets out:

- (a) who is permitted to carry out maintenance; and
- (b) requirements for carrying out maintenance on an aircraft or an aeronautical product; and
- (c) requirements for critical control system maintenance; and
- (d) requirements for dealing with defects; and
- (e) requirements for making and keeping records for an approved maintenance organisation or independent maintainer who carries out maintenance on an aircraft or aeronautical product.

Regulation 42.295

Division 42.D.2—Permissions for section 20AB of Act—aircraft

42.295 Who is permitted to carry out maintenance on aircraft—approved maintenance organisations

For subsection 20AB(2) of the Act, a person mentioned in column 2 of an item in the following table is permitted to carry out maintenance on an Australian aircraft:

- (a) to which this Part applies; and
- (b) that is mentioned in column 3 of the item.

Item	Person	Aircraft
1	A Part 145 organisation	An aircraft of a kind for which the Part 145 organisation is approved to provide maintenance services
2	An individual carrying out maintenance on behalf of a Part 145 organisation	An aircraft for which the Part 145 organisation is providing maintenance services
3	A Subpart 42.F organisation	A small aircraft: <ul style="list-style-type: none">(a) that is not authorised to operate under an Australian air transport AOC; and(b) that is of a kind for which the Subpart 42.F organisation is approved to provide maintenance services
4	An individual carrying out maintenance on behalf of a Subpart 42.F organisation	An aircraft for which the Subpart 42.F organisation is providing maintenance services

Note 1: The kinds of aircraft for which a Part 145 organisation is approved to provide maintenance services are determined by CASA—see regulation 145.030.

Note 2: The kinds of aircraft for which a Subpart 42.F organisation is approved to provide maintenance services are determined by CASA—see regulation 42.515.

42.300 Who is permitted to carry out maintenance on aircraft—individuals not working for approved maintenance organisations

- (1) For subsection 20AB(2) of the Act:
 - (a) an individual mentioned in column 2 of an item in table 42.300 is permitted to carry out maintenance on an Australian aircraft:
 - (i) to which this Part applies; and
 - (ii) that is mentioned in column 3 of the item; and
 - (b) the individual is permitted to carry out the maintenance subject to the conditions mentioned in column 4 of the item.
- (2) However, an individual mentioned in item 2, 3, 4 or 5 of table 42.300 is not permitted to supervise the carrying out of maintenance by another individual.

Table 42.300 Individuals, not working for approved maintenance organisations, permitted to carry out maintenance on aircraft

Item	Individual	Aircraft	Conditions
1	A licensed aircraft maintenance engineer	An aircraft: (a) that is a small aircraft; and (b) that is not authorised to operate under an AOC	The conditions are that: (a) the person's aircraft engineer licence permits him or her to perform maintenance certification for the maintenance; and (b) the maintenance is not specified in the Part 42 Manual of Standards for this item
2	An individual who is carrying out maintenance under the supervision of an individual mentioned in item 1	An aircraft for which the individual mentioned in item 1 is providing maintenance services	
3	A pilot licence holder who is carrying out maintenance other than under an authorisation issued under regulation 42.630 that is in force	An aircraft: (a) that is a small aircraft; and (b) that is not authorised to operate under an AOC; and (c) that the pilot licence holder is authorised, under Part 61, to fly	The conditions are that: (a) the maintenance is specified in the Part 42 Manual of Standards for this item; and (b) either: (i) the pilot licence holder is the registered operator of the aircraft; or (ii) the registered operator of the aircraft has given the pilot licence holder permission to carry out the maintenance
4	A pilot licence holder who is carrying out maintenance under an authorisation issued under regulation 42.630 that is in force	An aircraft: (a) that is a large aircraft, or is authorised to operate under an AOC; and (b) that the pilot licence holder is authorised, under Part 61, to fly	The conditions are that: (a) the pilot licence holder is a member of the aircraft's flight crew; and (b) the maintenance is specified in the Part 42 Manual of Standards for this item

Part 42 Continuing airworthiness requirements for aircraft and aeronautical products

Subpart 42.D Maintenance

Division 42.D.2 Permissions for section 20AB of Act—aircraft

Regulation 42.301

Item	Individual	Aircraft	Conditions
5	A flight engineer who is carrying out maintenance under an authorisation issued under regulation 42.630 that is in force	An aircraft: (a) that is a large aircraft, or is authorised to operate under an AOC; and (b) in relation to which the flight engineer is authorised, under Part 61, to perform the duties of flight engineer	The conditions are that: (a) the flight engineer is a member of the aircraft's flight crew; and (b) the maintenance is specified in the Part 42 Manual of Standards for this item
	Note 1:	For item 2, under regulation 42.320, an independent maintainer who is supervising the carrying out of maintenance by another individual must not instruct or permit the individual to carry out maintenance that the independent maintainer is not permitted to carry out.	
	Note 2:	For items 4 and 5, under subregulation 42.080(2), the registered operator of an aircraft must ensure that a person mentioned in item 4 or 5 carries out maintenance on the aircraft at a place only if no approved maintenance organisation is able to carry out the maintenance at that place	
	Note 3:	For items 4 and 5, an authorisation under regulation 42.630 must include the maintenance services that the pilot licence holder or flight engineer is authorised to provide—see paragraph 42.630(3)(c).	

42.301 Who is permitted to carry out maintenance—organisations under NAA arrangement

- (1) For subsection 20AB(2) of the Act, an organisation is permitted to carry out maintenance outside Australian territory on an Australian aircraft to which this Part applies if:
 - (a) the organisation is approved to carry out the maintenance by the national aviation authority of a foreign country under a law of that country; and
 - (b) the country is specified for this regulation in the Part 42 Manual of Standards; and
 - (c) there is an arrangement (the *NAA arrangement*) between CASA and the national aviation authority, or Australia and the foreign country, that permits the organisation to carry out the maintenance.
- (2) The permission in subregulation (1) is subject to the condition that the organisation must carry out and certify the maintenance in accordance with the NAA arrangement.

Division 42.D.3—Permissions for section 20AB of Act—aeronautical products

42.305 Who is permitted to carry out maintenance on aeronautical products

For subsection 20AB(2) of the Act, a person mentioned in column 2 of an item in the following table is permitted to carry out maintenance on:

- (a) an aeronautical product in Australian territory:
 - (i) to which this Part applies; and
 - (ii) that is of the kind mentioned in column 3 of the item; and
- (b) an aeronautical product for an Australian aircraft:
 - (i) to which this Part applies; and
 - (ii) that is of the kind mentioned in column 3 of the item.

Item	Person	Aeronautical product
1	A Part 145 organisation	An aeronautical product of a kind for which the Part 145 organisation is approved to provide maintenance services
2	An individual carrying out maintenance on behalf of a Part 145 organisation	An aeronautical product for which the Part 145 organisation is providing maintenance services
3	A Subpart 42.F organisation	An aeronautical product of a kind for which the Subpart 42.F organisation is approved to provide maintenance services
4	An individual carrying out maintenance on behalf of a Subpart 42.F organisation	An aeronautical product for which the Subpart 42.F organisation is providing maintenance services

Note 1: The kinds of aeronautical products for which a Part 145 organisation is approved to provide maintenance services are determined by CASA—see regulation 145.030.

Note 2: The kinds of aeronautical products for which a Subpart 42.F organisation is approved to provide maintenance services are determined by CASA—see regulation 42.515.

42.306 Who is permitted to carry out maintenance on aeronautical products—foreign organisations approved by national aviation authority

- (1) For subsection 20AB(2) of the Act, an organisation is permitted to carry out maintenance outside Australian territory on an aeronautical product for an Australian aircraft to which this Part applies if:
 - (a) the organisation is approved to carry out the maintenance by the national aviation authority of a foreign country under a law of that country; and
 - (b) the country is specified for this regulation in the Part 42 Manual of Standards.
- (2) The permission in subregulation (1) is subject to the condition that the organisation must carry out and certify the maintenance:

Part 42 Continuing airworthiness requirements for aircraft and aeronautical products

Subpart 42.D Maintenance

Division 42.D.3 Permissions for section 20AB of Act—aeronautical products

Regulation 42.306

- (a) if there is an arrangement (the *NAA arrangement*) between CASA and the national aviation authority that permits the organisation to carry out the maintenance—in accordance with the NAA arrangement; or
- (b) otherwise—in accordance with the law of the foreign country.

Division 42.D.4—Requirements for carrying out maintenance

42.310 General requirements for carrying out maintenance

Obligation

- (1) If an individual carries out maintenance on an aircraft or on an aeronautical product, the individual must:
 - (a) carry out the maintenance:
 - (i) in accordance with current maintenance data for the maintenance; and
 - (ii) using facilities that are appropriate for carrying out maintenance of the kind that is being carried out; and
 - (b) if tools, equipment or materials are mentioned in the maintenance data for the maintenance—use those tools, equipment or materials; and
 - (c) if using measuring or testing equipment—ensure that the accuracy of the equipment:
 - (i) is appropriate for the maintenance; and
 - (ii) has been verified, at appropriate intervals, by a means that is traceable to a standard that is nationally or internationally recognised.

Example: For subparagraph (c)(ii), of a standard that is nationally recognised

A standard maintained by the National Measurement Institute—see <http://www.measurement.gov.au>.

Offence—approved maintenance organisation

- (2) An approved maintenance organisation must ensure that an individual who carries out maintenance on its behalf complies with subregulation (1).

Penalty: 50 penalty units.

Offences—independent maintainer

- (3) An independent maintainer must comply with subregulation (1) when carrying out maintenance on an aircraft.

Penalty: 50 penalty units.

- (4) If an independent maintainer is supervising the carrying out of maintenance on an aircraft by another individual, the independent maintainer must ensure that the individual complies with subregulation (1).

Penalty: 50 penalty units.

Note: A person mentioned in item 1 of table 42.300 is the only independent maintainer who is permitted to supervise the carrying out of maintenance by another individual—see subregulation 42.300(2).

Regulation 42.315

42.315 Ensuring individuals are competent to carry out maintenance

Meaning of competent

- (1) An individual is **competent** to carry out maintenance on an aircraft or aeronautical product if he or she has the skills and knowledge to carry out the maintenance to the standard required by the maintenance data for the maintenance.

Obligation for approved maintenance organisation

- (2) An approved maintenance organisation must ensure that an individual does not carry out maintenance on an aircraft or aeronautical product on behalf of the organisation unless:
 - (a) the organisation has assessed the individual as being competent to carry out the maintenance; or
 - (b) if the organisation has not assessed the individual as being competent to carry out the maintenance—the carrying out of the maintenance by the individual is supervised by an individual that the organisation has assessed as being competent to carry out the maintenance.

Offences for breach of obligation

- (3) An approved maintenance organisation commits an offence if:
 - (a) an individual carries out maintenance on an aircraft or aeronautical product on behalf of the organisation; and
 - (b) before the maintenance is carried out, the organisation has not assessed the individual as being competent to carry out the maintenance; and
 - (c) the carrying out of the maintenance by the individual is not supervised.

Penalty: 50 penalty units.

- (4) An approved maintenance organisation commits an offence if:
 - (a) an individual carries out maintenance on an aircraft or aeronautical product on behalf of the organisation; and
 - (b) before the maintenance is carried out, the organisation has not assessed the individual as being competent to carry out the maintenance; and
 - (c) the carrying out of the maintenance by the individual is supervised; and
 - (d) before the maintenance is carried out, the organisation has not assessed the individual who supervised the carrying out of the maintenance as being competent to carry out the maintenance.

Penalty: 50 penalty units.

Obligation for certain independent maintainers

- (5) An independent maintainer mentioned in item 1 or 3 of table 42.300 must not carry out maintenance on an aircraft unless the independent maintainer is competent to carry out the maintenance.

- (6) An independent maintainer must not supervise the carrying out of maintenance on an aircraft by another individual unless the independent maintainer is competent to carry out the maintenance.

Note 1: The competence of an independent maintainer mentioned in item 4 or 5 of table 42.300 to carry out maintenance is dealt with by a continuing airworthiness management organisation—see paragraph 42.630(2)(e).

Note 2: A person mentioned in item 1 of table 42.300 is the only independent maintainer who is permitted to supervise the carrying out of maintenance by another individual—see subregulation 42.300(2).

Offences for breach of obligation

- (7) An independent maintainer mentioned in item 1 or 3 of table 42.300 commits an offence if:
- (a) he or she carries out maintenance on an aircraft; and
 - (b) he or she is not competent to carry out the maintenance.

Penalty: 50 penalty units.

- (8) An independent maintainer commits an offence if:
- (a) the independent maintainer supervises the carrying out of maintenance on an aircraft by another individual; and
 - (b) the independent maintainer is not competent to carry out the maintenance.

Penalty: 50 penalty units.

42.320 Restriction on maintenance that independent maintainers may instruct or permit supervised individuals to carry out

- (1) An independent maintainer who is supervising the carrying out of maintenance by another individual must not instruct or permit the individual to carry out maintenance that the independent maintainer is not permitted to carry out.

Penalty: 50 penalty units.

Note: A person mentioned in item 1 of table 42.300 is the only independent maintainer who is permitted to supervise the carrying out of maintenance by another individual—see subregulation 42.300(2).

- (2) An offence against subregulation (1) is an offence of strict liability.

42.325 Maintenance involving modifications and certain repairs

Obligation

- (1) This regulation applies if an individual carries out maintenance on an aircraft or aeronautical product that involves:
- (a) making a modification to the aircraft or aeronautical product; or
 - (b) a repair of the aircraft or aeronautical product that involves a change to the approved design for the aircraft or aeronautical product.

Regulation 42.330

- (2) Before a certificate of release to service is issued for the aircraft or aeronautical product in relation to the maintenance, the individual must ensure that:
- (a) there is a Part 21 approval for the design of the modification or repair; and
 - (b) the modification or repair complies with the design.

Note: For who issues a certificate of release to service for an aircraft, see Subdivision 42.H.3.2. For who issues a certificate of release to service for an aeronautical product, see Subdivision 42.H.4.2.

Offence—approved maintenance organisation

- (3) An approved maintenance organisation must ensure that an individual who carries out maintenance on its behalf complies with subregulation (2).

Penalty: 50 penalty units.

Offences—independent maintainer

- (4) An independent maintainer must comply with subregulation (2):
- (a) when carrying out maintenance on an aircraft; and
 - (b) when supervising the carrying out of maintenance on an aircraft by another individual.

Penalty: 50 penalty units.

Note: A person mentioned in item 1 of table 42.300 is the only independent maintainer who is permitted to supervise the carrying out of maintenance by another individual—see subregulation 42.300(2).

- (5) An offence against subregulation (3) or (4) is an offence of strict liability.

42.330 Removal of tools etc after carrying out maintenance

Obligation

- (1) If an individual carries out maintenance on an aircraft or aeronautical product, the individual must remove from the aircraft or aeronautical product any tools, equipment or other things extraneous to the aircraft or the aeronautical product before a certificate of release to service is issued for the aircraft or aeronautical product in relation to the maintenance.

Note: For who issues a certificate of release to service for an aircraft, see Subdivision 42.H.3.2. For who issues a certificate of release to service for an aeronautical product, see Subdivision 42.H.4.2.

Offence—approved maintenance organisation

- (2) An approved maintenance organisation must ensure that an individual who carries out maintenance on its behalf complies with subregulation (1).

Penalty: 50 penalty units.

Offences—independent maintainer

- (3) An independent maintainer must comply with subregulation (1) when carrying out maintenance on an aircraft.

Penalty: 50 penalty units.

- (4) An independent maintainer who is supervising the carrying out of maintenance on an aircraft by another individual must ensure that the individual complies with subregulation (1).

Penalty: 50 penalty units.

Note: A person mentioned in item 1 of table 42.300 is the only independent maintainer who is permitted to supervise the carrying out of maintenance by another individual—see subregulation 42.300(2).

Division 42.D.5—Requirements for independent inspection of critical control system maintenance

42.335 Meaning of *independent individual*

An *independent individual*, for critical control system maintenance carried out on an aircraft, means an individual who:

- (a) did not perform maintenance certification for the maintenance; and
- (b) if the maintenance is carried out by a Part 145 organisation—is a certifying employee of that organisation authorised to perform maintenance certification:
 - (i) for the maintenance; or
 - (ii) for similar maintenance carried out on another aircraft that has an aircraft control system of similar technology and construction; and
- (c) if the maintenance is not carried out by a Part 145 organisation—is 1 of the following:
 - (i) a licensed aircraft maintenance engineer whose aircraft engineer licence permits the individual to perform maintenance certification for the maintenance, or for similar maintenance carried out on another aircraft that has an aircraft control system of similar technology and construction;
 - (ii) a pilot licence holder who is authorised under Part 61 to fly the aircraft.

42.340 Requirement for verification and record for critical control system maintenance

Offence—approved maintenance organisation

- (1) If an individual carries out critical control system maintenance on an aircraft on behalf of an approved maintenance organisation, the organisation must ensure that an independent individual has:
 - (a) verified the matters mentioned in subregulation 42.345(1); and
 - (b) made a record, in writing, in accordance with regulation 42.345;before the organisation issues a certificate of release to service for the aircraft in relation to the maintenance.

Penalty: 50 penalty units.

Offence—independent maintainer

- (2) If an independent maintainer carries out critical control system maintenance on an aircraft, or supervises the carrying out of critical control system maintenance on an aircraft by another individual, the independent maintainer must ensure that an independent individual has:
 - (a) verified the matters mentioned in subregulation 42.345(1); and

(b) made a record, in writing, in accordance with regulation 42.345; before the independent maintainer issues a certificate of release to service for the aircraft in relation to the maintenance.

Penalty: 50 penalty units.

Note: A person mentioned in item 1 of table 42.300 is the only independent maintainer who is permitted to supervise the carrying out of maintenance by another individual—see subregulation 42.300(2).

(3) An offence against subregulation (1) or (2) is an offence of strict liability.

42.345 Verification and record for critical control system maintenance

(1) An independent individual may record the information mentioned in subregulation (3) in the continuing airworthiness records system for an aircraft in relation to critical control system maintenance carried out on the aircraft only if he or she has verified that:

- (a) the part of the aircraft control system on which the maintenance was carried out is assembled and configured in accordance with the maintenance data for the maintenance; and
- (b) the aircraft control system is functioning correctly.

(2) An independent individual commits an offence if:

- (a) he or she records the information mentioned in subregulation (3) in the continuing airworthiness records system for an aircraft in relation to critical control system maintenance carried out on the aircraft; and
- (b) the recording of the information is not permitted under subregulation (1).

Penalty: 50 penalty units.

(3) The information is the following:

- (a) that the individual has verified the matters mentioned in subregulation (1);
- (b) information identifying the critical control system maintenance to which the verification related;
- (c) the individual's name, signature and licence or certification authorisation number;
- (d) the date the verification was performed.

Division 42.D.6—Requirements for dealing with defects

Subdivision 42.D.6.1—Dealing with defects

42.350 Meaning of *qualified individual*

- (1) For a defect in an aircraft that is authorised to operate under an Australian air transport AOC or a large aircraft, *qualified individual* means a certifying employee of a Part 145 organisation who is authorised to perform maintenance certification for the maintenance that would be necessary to rectify the defect.
- (2) For a defect in an aircraft, other than an aircraft mentioned in subregulation (1), *qualified individual* means a licensed aircraft maintenance engineer whose aircraft engineer licence permits the holder to perform maintenance certification for the maintenance that would be necessary to rectify the defect.

42.355 Recording defects

If an individual:

- (a) is carrying out maintenance on an aircraft; and
- (b) is, or becomes, aware of a defect in the aircraft;

the individual must ensure that the defect is recorded in the continuing airworthiness records system for the aircraft before a certificate of release to service is issued for the aircraft in relation to the maintenance.

Penalty: 50 penalty units.

Note: For who issues a certificate of release to service for an aircraft, see Subdivision 42.H.3.2.

42.360 When *qualified individual* may defer rectification of defect

- (1) A *qualified individual* may defer the rectification of a defect in an aircraft only if the deferral is permitted by subregulation (3).
- (2) The *qualified individual* commits an offence if:
 - (a) he or she defers the rectification of the defect; and
 - (b) the deferral is not permitted by subregulation (3).

Penalty: 50 penalty units.

- (3) Deferral of the rectification of the defect is permitted only if:
 - (a) the defect does not adversely affect the airworthiness of the aircraft; or
 - (b) the operation of the aircraft for a flight with the defect is permitted by any of the following:
 - (i) the instructions for continuing airworthiness for the aircraft;
 - (ii) the minimum equipment list for the aircraft;
 - (iii) the configuration deviation list for the aircraft;

- (iv) an airworthiness directive; or
- (c) the defect is approved as a permissible unserviceability under regulation 21.007; or
- (d) the defect is in an item of operational or emergency equipment that:
 - (i) is fitted to the aircraft; and
 - (ii) is not required by the certification basis for the aircraft; and
 - (iii) is not required by or under these Regulations for the operation of the aircraft for a flight.

(4) An offence against subregulation (2) is an offence of strict liability.

42.365 How rectification of defect is deferred

To defer the rectification of a defect in an aircraft under regulation 42.360, the qualified individual must:

- (a) make a record that complies with regulation 42.370; and
- (b) sign the record; and
- (c) record, in that record:
 - (i) his or her aircraft engineer licence number or certification authorisation number; and
 - (ii) the date of the deferral.

42.370 Record for deferral of rectification of defect

- (1) A record of the deferral of the rectification of a defect must be made in:
 - (a) the flight technical log for the aircraft, if:
 - (i) the defect affects the operation of the aircraft; or
 - (ii) the deferral was permitted by subparagraph 42.360(3)(b)(ii) or (iii); or
 - (b) the continuing airworthiness records system for the aircraft, in any other case.
- (2) The record must contain:
 - (a) a description of the defect; and
 - (b) a statement of the reasons for the qualified individual's decision to defer the rectification of the defect; and
 - (c) any limitations or conditions mentioned in a document mentioned in paragraph 42.360(3)(b) in relation to the deferral of the rectification of the defect and the operation of the aircraft.
- (3) A qualified individual commits an offence if:
 - (a) he or she makes a record of the deferral of the rectification of a defect; and
 - (b) the record does not comply with this regulation.

Penalty: 50 penalty units.

(4) An offence against subregulation (3) is an offence of strict liability.

Regulation 42.375

Subdivision 42.D.6.2—Reporting defects

42.375 Major defect reporting—-independent maintainer carrying out maintenance on aircraft

If:

- (a) an independent maintainer is carrying out maintenance on an aircraft, or is supervising the carrying out of maintenance on an aircraft by another individual; and
- (b) the independent maintainer becomes aware of a major defect in the aircraft; the independent maintainer must report the defect to the person responsible for continuing airworthiness for the aircraft.

Penalty: 50 penalty units.

Note 1: See also regulations 42.110, 42.115 and 42.270 for other requirements relating to defects.

Note 2: See regulation 42.390 for the requirements for making a report.

Note 3: A person mentioned in item 1 of table 42.300 is the only independent maintainer who is permitted to supervise the carrying out of maintenance by another individual—see subregulation 42.300(2).

42.380 Major defect reporting—approved maintenance organisation carrying out maintenance on aircraft

If:

- (a) an approved maintenance organisation is carrying out maintenance on an aircraft; and
- (b) the organisation becomes aware of a major defect in the aircraft; the organisation must report the defect to the person responsible for continuing airworthiness for the aircraft.

Penalty: 50 penalty units.

Note 1: See regulation 42.390 for the requirements for making a report.

Note 2: See also regulations 42.110, 42.115 and 42.270 for other requirements relating to defects.

42.385 Major defect reporting—approved maintenance organisation carrying out maintenance on aeronautical product

If:

- (a) an approved maintenance organisation is carrying out maintenance on an aeronautical product; and
- (b) the organisation becomes aware of a major defect in the aeronautical product; the organisation must report the defect to CASA.

Penalty: 50 penalty units.

Note 1: See regulation 42.390 for the requirements for making a report.

Note 2: See also regulations 42.110, 42.115 and 42.270 for other requirements relating to defects.

42.390 Reporting requirements

A person who is required to make a report under regulation 42.375, 42.380 or 42.385 must:

- (a) make the report in the approved form; and
- (b) make the report within 2 days after the person becomes aware of the major defect to which the report relates.

Penalty: 50 penalty units.

Note 1: See also regulations 42.110, 42.115 and 42.270 for other requirements relating to defects.

Note 2: Under regulation 11.018, a report in the approved form is not complete unless it contains all of the information required by the form.

Division 42.D.7—Requirements for recording maintenance for aircraft or aeronautical products

42.395 Recording maintenance information for aircraft

Offence—approved maintenance organisation

- (1) If an individual carries out maintenance on an aircraft on behalf of an approved maintenance organisation, the organisation must ensure that the information mentioned in subregulation (3) is recorded in writing before the organisation issues a certificate of release to service for the aircraft in relation to the maintenance.

Penalty: 50 penalty units.

Offence—independent maintainer

- (2) If an independent maintainer:
- (a) carries out maintenance on an aircraft; or
 - (b) supervises the carrying out of maintenance on an aircraft by another individual;

the independent maintainer must record the information mentioned in subregulation (3) in writing before the independent maintainer issues a certificate of release to service for the aircraft in relation to the maintenance.

Penalty: 50 penalty units.

Information to be recorded

- (3) The information is the following:
- (a) the registration mark for the aircraft;
 - (b) the date on which the maintenance was completed;
 - (c) a description of the maintenance;
 - (d) information identifying the maintenance data for the maintenance;
 - (e) if the maintenance is a modification or repair involving a change to the approved design for the aircraft—information identifying the design of the modification or repair;
 - (f) if a part was fitted to the aircraft when the maintenance was carried out—a description of the part, including:
 - (i) the part number for the part; and
 - (ii) the serial number for the part (if any); and
 - (iii) if the part is not a standard part—the information mentioned in subregulation (4).
- (4) For subparagraph (3)(f)(iii), the information is:
- (a) if the fitting of the part was permitted by subparagraph 42.420(5)(a)(i) or (b)(i)—the number of the authorised release certificate mentioned in that

- subparagraph for the part, or information that enables the identification of that authorised release certificate; and
- (b) if the fitting of the part was permitted by subparagraph 42.420(5)(b)(ii)—information that enables the identification of the in-house release document mentioned in that subparagraph for the part; and
 - (c) if the fitting of the part is permitted under regulation 42.430—information identifying the aircraft from which the part was removed; and
 - (d) if the fitting of the part is permitted under regulation 42.435—a statement that the part is a product fabricated by an approved maintenance organisation; and
 - (e) if the fitting of the part is permitted under regulation 42.440—information that enables the identification of the document mentioned in paragraph 42.440(e) that accompanied the part.

- Note 1: The information required under this regulation about maintenance, and the maintenance certification for the maintenance, together constitute the maintenance record for the maintenance—see the definition of ***maintenance record*** in regulation 42.015. For maintenance certification, see regulation 42.715.
- Note 2: A person mentioned in item 1 of table 42.300 is the only independent maintainer who is permitted to supervise the carrying out of maintenance by another individual—see subregulation 42.300(2).
- Note 3: See Division 42.H.3 in relation to the issue of a certificate of release to service for an aircraft in relation to maintenance carried out on the aircraft.

42.400 Making maintenance record for aeronautical products

- (1) If an individual carries out maintenance on an aeronautical product (the ***first aeronautical product***) on behalf of an approved maintenance organisation, the organisation must ensure that the information mentioned in this regulation (the ***maintenance record***) is recorded:
 - (a) in writing; and
 - (b) before the organisation issues a certificate of release to service for the aeronautical product in relation to the maintenance.

Penalty: 50 penalty units.

- (2) The information is:
 - (a) information that identifies the first aeronautical product, including:
 - (i) the part number for the product; and
 - (ii) the serial number for the product (if any); and
 - (b) the date on which the maintenance was completed; and
 - (c) a description of the maintenance; and
 - (d) information identifying the maintenance data for the maintenance; and
 - (e) if the maintenance is a modification or repair involving a change to the approved design of the aeronautical product—information identifying the design of the modification or repair.

Regulation 42.405

- (3) If an aeronautical product (the *second aeronautical product*) was fitted to the first aeronautical product when the maintenance was carried out, the information must include a description of the second aeronautical product, including:
 - (a) the part number for the product; and
 - (b) the serial number for the product (if any); and
 - (c) if the product is not a standard part—the information mentioned in subregulation (4).
- (4) For paragraph (3)(c), the information is:
 - (a) if the fitting of the second aeronautical product was permitted by subparagraph 42.420(5)(a)(i) or (b)(i):
 - (i) the number of the authorised release certificate mentioned in that subparagraph for the product; or
 - (ii) information that enables the identification of that authorised release certificate; or
 - (b) if the fitting of the second aeronautical product was permitted by subparagraph 42.420(5)(b)(ii)—information that enables the identification of the in-house release document mentioned in that subparagraph for the product.
- (5) An offence against subregulation (1) is an offence of strict liability.

42.405 Provision of maintenance record and other documents to registered operator

Offence—approved maintenance organisation

- (1) If an individual carries out maintenance on an aircraft on behalf of an approved maintenance organisation, the organisation must comply with subregulation (2).

Penalty: 50 penalty units.

- (2) The organisation must ensure that the maintenance record for the maintenance is given to the person responsible for continuing airworthiness for the aircraft within 30 days after the organisation issues a certificate of release to service for the aircraft in relation to the maintenance.

Offence—independent maintainer

- (3) If an independent maintainer:
 - (a) carries out maintenance on an aircraft; or
 - (b) supervises the carrying out of maintenance on an aircraft by another individual;

the independent maintainer must give the maintenance record for the maintenance to the person responsible for continuing airworthiness for the aircraft within 30 days after the independent maintainer issues a certificate of release to service for the aircraft in relation to the maintenance.

Penalty: 50 penalty units.

Note: A person mentioned in item 1 of table 42.300 is the only independent maintainer who is permitted to supervise the carrying out of maintenance by another individual—see subregulation 42.300(2).

- (4) An offence against subregulation (1) or (3) is an offence of strict liability.

42.410 Retention of copy of maintenance record by approved maintenance organisations

- (1) If a maintenance record is made for maintenance carried out on an aircraft or an aeronautical product by an individual on behalf of an approved maintenance organisation, the organisation must keep a copy of the record for the period mentioned in subregulation (2).

Penalty: 50 penalty units.

- (2) The records must be kept for 2 years beginning on the date when the organisation issued the certificate of release to service for the aircraft or aeronautical product in relation to the maintenance.
- (3) An offence against subregulation (1) is an offence of strict liability.

Part 42 Continuing airworthiness requirements for aircraft and aeronautical products

Subpart 42.E Aeronautical products

Division 42.E.1 Preliminary

Regulation 42.415

Subpart 42.E—Aeronautical products

Division 42.E.1—Preliminary

42.415 Purpose of Subpart

This Subpart sets out requirements for:

- (a) fitting parts to, and using materials in, aircraft and aeronautical products;
and
- (b) the control of unserviceable and unsalvageable parts; and
- (c) the control of unapproved parts.

Division 42.E.2—Requirements for fitting parts and using materials

42.420 Fitting parts other than standard parts

- (1) If an individual is carrying out maintenance on an aircraft or aeronautical product, the individual must not fit a part that is not a standard part to the aircraft or aeronautical product unless the fitting of the part is permitted under:
 - (a) regulation 42.450; or
 - (b) subregulation (2).
- (2) For paragraph (1)(b), the part may be fitted if:
 - (a) either:
 - (i) the part is serviceable; or
 - (ii) if the part is unserviceable because of a defect in the part—the fitting of the part is permitted under subregulation (3); and
 - (b) the part is eligible to be fitted to the aircraft or the aeronautical product; and
 - (c) if the manufacturer of the part has specified a storage life for the part—the storage life for the part has not expired; and
 - (d) the fitting of the part is permitted under subregulation (5).

Note: For the definition of *eligible to be fitted*, see regulation 42.015.

- (3) For subparagraph (2)(a)(ii), the part may be fitted if:
 - (a) the operation of the aircraft for a flight with the defect is permitted by the minimum equipment list for the aircraft; and
 - (b) subregulation (4) does not apply to the part.
- (4) This regulation applies to a part if:
 - (a) before the proposed fitting of the part, the part was fitted to an aircraft; and
 - (b) the aircraft to which the part was most recently fitted was operated for a flight with the defect; and
 - (c) the operation of the aircraft for the flight with the defect was permitted by the minimum equipment list for that aircraft.
- (5) For paragraph (2)(d), the part may be fitted if:
 - (a) for a part on which maintenance has not been carried out since its manufacture, and that has not been used in an aircraft since its manufacture:
 - (i) an authorised release certificate has been issued for the part in relation to its manufacture; or
 - (ii) the fitting of the part is permitted under regulation 42.435 or 42.440; or
 - (b) for a part on which maintenance has been carried out, and that has not been used in an aircraft since the maintenance was carried out:
 - (i) an authorised release certificate has been issued for the part in relation to the maintenance; or

Regulation 42.425

- (ii) if the maintenance was in-house maintenance—an in-house release document has been issued for the part in relation to the maintenance; or
- (iii) the fitting of the part is permitted under regulation 42.440; or
- (c) the fitting of the part is permitted under regulation 42.430.

42.425 Obligations and offences for fitting parts other than standard parts

Obligation for approved maintenance organisation

- (1) An approved maintenance organisation must ensure that an individual who carries out maintenance on its behalf complies with subregulation 42.420(1).

Offence for breach of obligation

- (2) An approved maintenance organisation commits an offence if:
 - (a) an individual is carrying out maintenance on an aircraft or aeronautical product on behalf of the organisation; and
 - (b) the individual fits a part that is not a standard part to the aircraft or aeronautical product; and
 - (c) the fitting of the part is not permitted by subregulation 42.420(1).

Penalty: 50 penalty units.

Obligation for independent maintainer

- (3) An independent maintainer must:
 - (a) comply with subregulation 42.420(1) when carrying out maintenance on an aircraft; and
 - (b) if the independent maintainer is supervising the carrying out of maintenance on an aircraft by another individual—ensure that the individual complies with subregulation 42.420(1).

Note: A person mentioned in item 1 of table 42.300 is the only independent maintainer who is permitted to supervise the carrying out of maintenance by another individual—see subregulation 42.300(2).

Offences for breach of obligation

- (4) An independent maintainer commits an offence if:
 - (a) he or she is carrying out maintenance on an aircraft; and
 - (b) he or she fits a part that is not a standard part to the aircraft; and
 - (c) the fitting of the part is not permitted by subregulation 42.420(1).

Penalty: 50 penalty units.

- (5) An independent maintainer commits an offence if:
 - (a) he or she is supervising the carrying out of maintenance on an aircraft by another individual; and
 - (b) the individual fits a part that is not a standard part to the aircraft; and

(c) the fitting of the part is not permitted by subregulation 42.420(1).

Penalty: 50 penalty units.

(6) An offence against subregulation (2), (4) or (5) is an offence of strict liability.

42.430 Fitting parts removed from aircraft—permission for paragraph 42.420(5)(c)

- (1) For paragraph 42.420(5)(c), the part may be fitted if:
- (a) the part is removed from a place on an aircraft; and
 - (b) maintenance is not carried out on the part after its removal from the aircraft; and
 - (c) the part is to be fitted in a different place on the aircraft.
- (2) For paragraph 42.420(5)(c), the part may be fitted if:
- (a) the part was removed from a registered aircraft (the *first aircraft*) by a person who was, at the time the part was removed, permitted under these Regulations to carry out the maintenance that comprises removing the part from the aircraft; and
 - (b) maintenance has not been carried out on the part after its removal from the first aircraft; and
 - (c) for a part that has been stored—the storage was in accordance with the instructions (if any) issued by the manufacturer of the part in relation to storage; and
 - (d) the part is to be fitted to another aircraft (the *second aircraft*); and
 - (e) the part has not been subjected to:
 - (i) immersion; or
 - (ii) extremes of stress or temperature; and
 - (f) the person responsible for continuing airworthiness for the second aircraft agrees to the fitting of the part to the second aircraft.

Note: For paragraph (a), for the definition of *registered*, see Part 1 of the Dictionary.

42.435 Fitting parts fabricated by approved maintenance organisations—permission for subparagraph 42.420(5)(a)(ii)

For subparagraph 42.420(5)(a)(ii), the part may be fitted if:

- (a) the part has been fabricated by an approved maintenance organisation; and
- (b) the part is to be fitted to an aircraft on which the organisation is carrying out maintenance.

42.440 Fitting parts for which there is no authorised release certificate—permission for subparagraphs 42.420(5)(a)(ii) and (b)(iii)

For subparagraphs 42.420(5)(a)(ii) and (b)(iii), a part of a particular kind may be fitted to an aircraft if:

Regulation 42.445

- (a) the part is to be fitted by an individual carrying out maintenance on behalf of a Part 145 organisation; and
- (b) the aircraft is grounded at a location that is not the organisation's main location; and
- (c) the aircraft is grounded because of a defect in the aircraft that cannot be rectified without fitting a part of that kind; and
- (d) a part of that kind in respect of which there is an authorised release certificate is not available at that location; and
- (e) the part is accompanied by a document that:
 - (i) states that the part is serviceable; and
 - (ii) identifies the organisation that issued the document; and
 - (iii) includes details of the national aviation authority under whose authority the document was issued; and
- (f) the person responsible for continuing airworthiness for the aircraft agrees to the fitting of the part to the aircraft; and
- (g) an entry is made in the aircraft's flight technical log that, within 36 flight hours after it is fitted:
 - (i) the person responsible for continuing airworthiness for the aircraft must obtain an authorised release certificate for the part; or
 - (ii) the part must be removed.

Note: Under regulation 42.165, if an aeronautical product is fitted to an aircraft as permitted by this regulation, the person responsible for continuing airworthiness for the aircraft must, within 36 flight hours after it is fitted, obtain an authorised release certificate for the product or ensure that the product is removed from the aircraft.

42.445 Fitting standard parts

- (1) An individual who is carrying out maintenance on an aircraft or aeronautical product must not fit a standard part to the aircraft or aeronautical product unless the fitting of the part is permitted under:
 - (a) regulation 42.450; or
 - (b) subregulation (2).
- (2) For paragraph (1)(b), the standard part may be fitted if:
 - (a) the standard part is serviceable; and
 - (b) the standard part is accompanied by:
 - (i) information that identifies the specification with which the part complies; and
 - (ii) information that allows the part to be traced to its manufacturer; and
 - (c) the standard part is accompanied by evidence that the standard part complies with the specification; and
 - (d) the standard part is eligible to be fitted to the aircraft or the aeronautical product; and
 - (e) if the manufacturer of the standard part has specified a storage life for the part—the storage life for the part has not expired.

Obligation for approved maintenance organisation

- (3) An approved maintenance organisation must ensure that an individual who carries out maintenance on its behalf complies with subregulation (1).

Offence for breach of obligation

- (4) An approved maintenance organisation commits an offence if:
- (a) an individual is carrying out maintenance on an aircraft or aeronautical product on behalf of the organisation; and
 - (b) the individual fits a standard part to the aircraft or aeronautical product; and
 - (c) the fitting of the standard part is not permitted by subregulation (1).

Penalty: 50 penalty units.

Obligation for independent maintainer

- (5) An independent maintainer must:
- (a) comply with subregulation (1) when carrying out maintenance on an aircraft; and
 - (b) if the independent maintainer is supervising the carrying out of maintenance on an aircraft by another individual—ensure that the individual complies with subregulation (1).

Note: A person mentioned in item 1 of table 42.300 is the only independent maintainer who is permitted to supervise the carrying out of maintenance by another individual—see subregulation 42.300(2).

Offences for breach of obligation

- (6) An independent maintainer commits an offence if:
- (a) he or she is carrying out maintenance on an aircraft; and
 - (b) he or she fits a standard part to the aircraft; and
 - (c) the fitting of the standard part is not permitted by subregulation (1).

Penalty: 50 penalty units.

- (7) An independent maintainer commits an offence if:
- (a) he or she is supervising the carrying out of maintenance on an aircraft by another individual; and
 - (b) the individual fits a standard part to the aircraft; and
 - (c) the fitting of the standard part is not permitted by subregulation (1).

Penalty: 50 penalty units.

- (8) An offence against subregulation (4), (6) or (7) is an offence of strict liability.

Regulation 42.450

42.450 Fitting parts removed from same place on aircraft—permission for paragraphs 42.420(1)(a) and 42.445(1)(a)

For paragraphs 42.420(1)(a) and 42.445(1)(a), a part may be fitted to a place on an aircraft or aeronautical product if:

- (a) the part was removed from that place on the aircraft or aeronautical product; and
- (b) maintenance is not carried out on the part between the removal of the part and its fitting to the aircraft or aeronautical product.

42.455 Using materials

- (1) An individual who is carrying out maintenance must not use a material in or on an aircraft or aeronautical product unless:
 - (a) the material is accompanied by:
 - (i) information that identifies the specification with which the material complies; and
 - (ii) information that allows the material to be traced to its manufacturer; and
 - (iii) evidence that the material complies with the specification; and
 - (b) the material is eligible to be used in or on the aircraft or aeronautical product; and
 - (c) the material appears to be in a satisfactory condition; and
 - (d) if the manufacturer of the material has specified a storage life for the material—the storage life for the material has not expired.

Note: For the definition of *eligible to be used*, see regulation 42.015.

Obligation for approved maintenance organisation

- (2) An approved maintenance organisation must ensure that an individual who carries out maintenance on its behalf complies with subregulation (1).

Offence for breach of obligation

- (3) An approved maintenance organisation commits an offence if:
 - (a) an individual is carrying out maintenance on an aircraft or aeronautical product on behalf of the organisation; and
 - (b) the individual uses a material in the aircraft or aeronautical product; and
 - (c) the use of the material is not permitted by subregulation (1).

Penalty: 50 penalty units.

Obligation for independent maintainer

- (4) An independent maintainer must:
 - (a) comply with subregulation (1) when carrying out maintenance on an aircraft; and

- (b) if the independent maintainer is supervising the carrying out of maintenance on an aircraft by another individual—ensure that the individual complies with subregulation (1).

Note: A person mentioned in item 1 of table 42.300 is the only independent maintainer who is permitted to supervise the carrying out of maintenance by another individual—see subregulation 42.300(2).

Offences for breach of obligation

- (5) An independent maintainer commits an offence if:
- (a) he or she is carrying out maintenance on an aircraft; and
 - (b) he or she uses a material in the aircraft; and
 - (c) the use of the material is not permitted by subregulation (1).

Penalty: 50 penalty units.

- (6) An independent maintainer commits an offence if:
- (a) he or she is supervising the carrying out of maintenance on an aircraft by another individual; and
 - (b) the individual uses a material in the aircraft; and
 - (c) the use of the material is not permitted by subregulation (1).

Penalty: 50 penalty units.

- (7) An offence against subregulation (3), (5) or (6) is an offence of strict liability.

Regulation 42.460

Division 42.E.3—Requirements for controlling unserviceable and unsalvageable parts

42.460 Control of unserviceable parts

- (1) If an approved maintenance organisation knows that a part that is not fitted to an aircraft is unserviceable, the organisation must ensure that the steps mentioned in subregulation (3) are taken within 2 days after the organisation first knew that the part was unserviceable.

Penalty: 50 penalty units.

- (2) If an independent maintainer knows that a part that is not fitted to an aircraft is unserviceable, the independent maintainer must take the steps mentioned in subregulation (3) within 2 days after the independent maintainer first knew that the part was unserviceable.

Penalty: 50 penalty units.

- (3) The steps are:
 - (a) applying a label, or attaching a tag, to the part recording the following:
 - (i) sufficient information to identify the part, including the part's name, part number and serial number (if any);
 - (ii) that the part is unserviceable;
 - (iii) the origin of the part, including information about the aircraft or aeronautical product from which the part has been removed, if relevant and if known to the independent maintainer or organisation;
 - (iv) the reason that the part is unserviceable; and
 - (b) if the independent maintainer or organisation keeps the part—storing the part separately from serviceable aeronautical products and in a secure location.

42.465 Control of unsalvageable parts

- (1) If an approved maintenance organisation knows that a part that is not fitted to an aircraft is unsalvageable, the organisation must ensure that the steps mentioned in subregulation (3) are taken within 2 days after the organisation first knew that the part was unsalvageable.

Penalty: 50 penalty units.

- (2) If an independent maintainer knows that a part that is not fitted to an aircraft is unsalvageable, the independent maintainer must take the steps mentioned in subregulation (3) within 2 days after the independent maintainer first knew that the part was unsalvageable.

Penalty: 50 penalty units.

- (3) The steps are:
-

- (a) applying a label, or attaching a tag, to the part recording the following:
 - (i) sufficient information to identify the part, including the part's name, part number and serial number (if any);
 - (ii) that the part is unsalvageable;
 - (iii) the origin of the part, including any information about the aircraft or aeronautical product from which the part has been removed, if relevant and if known to the independent maintainer or organisation;
 - (iv) the reason that the part is unsalvageable; and
 - (b) doing 1 of the following:
 - (i) storing the part separately from serviceable aeronautical products and in a secure location;
 - (ii) if the organisation or independent maintainer is not the owner of the part—giving the part to the owner of the part;
 - (iii) mutilating the part, or arranging for the part to be mutilated, in a manner that ensures that the part cannot be used in aviation.
- (4) If the owner of a part receives the part under subparagraph (3)(b)(ii), the owner must, within 3 days of receiving the part:
- (a) store the part separately from serviceable aeronautical products and in a secure location; or
 - (b) mutilate the part, or arrange for the part to be mutilated, in a manner that ensures that the part cannot be used in aviation.

Penalty: 50 penalty units.

Division 42.E.4—Requirements for controlling unapproved parts

42.470 Meaning of *unapproved* for parts

A part is *unapproved* if:

- (a) the part is counterfeit; or
- (b) the part has not been approved in a manner mentioned in paragraph 21.305(a), (b), (c) or (e) or regulation 21.305A; or
- (c) the part:
 - (i) is not a standard part; and
 - (ii) has been produced other than under an authorisation (however described) granted by CASA or an national aviation authority; or
- (d) maintenance has been carried out on the part other than in accordance with an authorisation (however described) granted by CASA or an national aviation authority; or
- (e) the part has been modified other than in accordance with a design for which there is a Part 21 approval; or
- (f) the part:
 - (i) is unserviceable or unsalvageable; and
 - (ii) has been fraudulently represented as serviceable; or
- (g) the part is accompanied by a fraudulent document.

42.475 Control of unapproved parts

- (1) If a person becomes aware that a part is unapproved, the person must ensure that the steps mentioned in subregulation (2) are taken within 2 days after the person first became aware that the part was unapproved.

Penalty: 50 penalty units.

- (2) The steps are:
 - (a) applying a label, or attaching a tag, to the part recording the following:
 - (i) sufficient information to identify the part, including the part's name, part number and serial number (if any);
 - (ii) that the part is unapproved;
 - (iii) the origin of the part, including any information about the aircraft or aeronautical product from which the part has been removed, if relevant and if known to the person;
 - (iv) the reason that the part is unapproved; and
 - (b) storing the part, and any documents that accompanied the part, separately from serviceable aeronautical products and in a secure location; and
 - (c) making a report about the part in accordance with regulation 42.480.

42.480 Reporting unapproved parts

- (1) For paragraph 42.475(2)(c), the person must give a report about the part to:
-

- (a) CASA; and
 - (b) if the person knows that the part was fitted to an aircraft or aeronautical product—the type certificate holder or foreign type certificate holder for the aircraft or aeronautical product; and
 - (c) if the person knows that the part was fitted to an aircraft—the person responsible for continuing airworthiness for the aircraft.
- (2) The report must be made in the approved form.

Note: Under regulation 11.018, a report in the approved form is not complete unless it contains all of the information required by the form.

42.485 Action by CASA following report of unapproved parts

- (1) If CASA receives a report about a part under regulation 42.480, CASA may, by notice in writing:
- (a) require the person who made the report to give CASA further information in relation to the part within a period specified in the notice; or
 - (b) tell the person who made the report that the part does not have to be kept.
- (2) The person must comply with a notice under paragraph (1)(a).
- Penalty: 50 penalty units.
- (3) An offence against subregulation (2) is an offence of strict liability.

42.490 Action required if parts not required to be kept

- (1) If CASA has given a person a notice under paragraph 42.485(1)(b) in relation to a part, the person must, within 2 days after receiving the notice:
- (a) if the person is not the owner of the part—give the part to the owner of the part; or
 - (b) store the part, and any documents that accompanied the part, separately from serviceable aeronautical products and in a secure location; or
 - (c) mutilate the part, or arrange for the part to be mutilated, in a manner that ensures that the part cannot be used in aviation.

Penalty: 50 penalty units.

- (2) If the owner of a part receives the part under paragraph (1)(a), the owner must, within 2 days of receiving the part:
- (a) store the part separately from serviceable aeronautical products and in a secure location; or
 - (b) mutilate the part, or arrange for the part to be mutilated, in a manner that ensures that the part cannot be used in aviation.

Penalty: 50 penalty units.

Subpart 42.F—Subpart 42.F approved maintenance organisations

Division 42.F.1—General

42.495 Purpose of Subpart

This Subpart sets out matters relating to Subpart 42.F organisations, including:

- (a) requirements for approval as a Subpart 42.F organisation; and
- (b) requirements that apply to Subpart 42.F organisations.

Note: For other matters relating to Subpart 42.F organisations, see the Part 42 Manual of Standards.

42.500 Definitions for Subpart

(1) In this Subpart:

accountable manager, for a Subpart 42.F organisation, means the individual, appointed by the organisation, who is responsible for:

- (a) ensuring that the organisation complies with its exposition, each approval rating that it holds, and these Regulations; and
- (b) ensuring that the organisation is able to finance the provision of the maintenance services set out in its exposition; and
- (c) ensuring that the organisation has adequate resources available to enable the organisation to provide maintenance services in accordance with its exposition.

approval certificate means a certificate issued under regulation 42.520.

exposition, for a Subpart 42.F organisation, means the document that is approved by CASA under regulation 42.515 in relation to the organisation, including:

- (a) if a change to the document is approved by CASA under regulation 42.540—that change; and
- (b) if the document is updated and the organisation gives CASA a copy of the updated part of the document under regulation 42.545—the updated part of the document; and
- (c) if the organisation makes a change to the document in accordance with a direction given by CASA under regulation 42.550—that change.

responsible manager, for a Subpart 42.F organisation, means an individual appointed by the organisation to be responsible to the accountable manager for ensuring that the organisation complies with its exposition and these Regulations in relation to a particular matter.

significant change, in relation to a Subpart 42.F organisation, has the meaning given by subregulation (2).

Note: See regulation 42.015 and the Dictionary for definitions of other terms used in this Subpart.

- (2) A **significant change**, in relation to a Subpart 42.F organisation, means any of the following changes:
- (a) a change to the organisation's name;
 - (b) a change to the location of the organisation's maintenance facility, including the addition of a new maintenance facility;
 - (c) a change in the personnel holding:
 - (i) the position of accountable manager in the organisation; or
 - (ii) any of the positions of responsible manager in the organisation;
 - (d) a change to the maintenance services provided by the organisation, if the change would require a change to the approval ratings mentioned in the organisation's approval certificate;
 - (e) a change to the organisation's facilities, equipment, tools, materials, procedures or certifying employees that could adversely affect the organisation's ability to provide maintenance services that it is approved to provide.

42.505 Regulations 11.070 to 11.075 do not apply in relation to certain matters

Regulations 11.070 to 11.075 do not apply to:

- (a) a significant change to a Subpart 42.F organisation that is approved by CASA under regulation 42.540; or
- (b) a change to a Subpart 42.F organisation of which CASA is notified under regulation 42.545; or
- (c) a change to a Subpart 42.F organisation that is made as a consequence of a change made to the organisation's exposition in accordance with a direction given by CASA under regulation 42.550.

Regulation 42.510

Division 42.F.2—Approval of Subpart 42.F organisations

42.510 Applying for approval

- (1) A person (the *applicant*) may apply to CASA for approval as a Subpart 42.F organisation.
- (2) The application must:
 - (a) be in writing; and
 - (b) be signed by a person who is, or who proposes to be, the applicant's accountable manager.
- (3) The application must include the following:
 - (a) a copy of the applicant's proposed exposition;
 - (b) the approval rating sought by the applicant for:
 - (i) each kind of aircraft or aeronautical product for which the applicant proposes to provide maintenance services; and
 - (ii) each kind of specialist maintenance the applicant proposes to provide.

Note 1: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.

Note 2: Part 11 deals with applications and decision making.

42.515 Issuing approval

- (1) Subject to regulation 11.055, CASA must approve an applicant as a Subpart 42.F organisation if CASA is satisfied that:
 - (a) the applicant has an exposition that complies with the requirements specified in the Part 42 Manual of Standards; and
 - (b) the applicant has facilities, equipment, materials, maintenance data and tools that are suitable for:
 - (i) providing maintenance services for the kinds of aircraft or aeronautical product for which the applicant proposes to provide maintenance services; and
 - (ii) providing the specialist maintenance that the applicant proposes to provide; and
 - (c) the facilities, equipment, materials, maintenance data and tools mentioned in paragraph (b) comply with the requirements specified in the Part 42 Manual of Standards; and
 - (d) the applicant has nominated an individual for the position of accountable manager in the organisation; and
 - (e) the applicant has nominated an individual for each position of responsible manager in the organisation; and
 - (f) each individual nominated for a position mentioned in paragraph (d) or (e) is appropriately qualified to hold the position.

Note: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to issue, or cancelling, suspending or varying, an approval; or
 - (b) a decision imposing a condition on an approval.
- (2) If CASA decides to approve an applicant as a Subpart 42.F organisation, CASA must determine:
- (a) the approval rating for each kind of aircraft or aeronautical product for which the applicant is approved to provide maintenance services; and
 - (b) the approval rating for each kind of specialist maintenance that the applicant is approved to provide; and
 - (c) any limitations applying to an approval rating mentioned in paragraph (a) or (b).
- (3) In approving the applicant, CASA also approves the applicant's proposed exposition.

42.520 Approval certificate

- (1) If CASA approves an applicant as a Subpart 42.F organisation, CASA must issue a certificate setting out the matters mentioned in subregulation 42.515(2).
- (2) The certificate issued by CASA must include an approval certificate reference number determined by CASA.
- (3) If CASA approves a significant change to a Subpart 42.F organisation under regulation 42.540, CASA may issue a new approval certificate to the organisation.

42.525 Privileges for Subpart 42.F organisations

A Subpart 42.F organisation may provide maintenance services that it is approved to provide.

42.530 Approval subject to conditions

It is a condition of approval of a Subpart 42.F organisation that:

- (a) the organisation must, at all times, comply with the requirements of:
 - (i) its exposition; and
 - (ii) the approval rating for each kind of aircraft or aeronautical product for which the organisation is approved to provide maintenance services; and
 - (iii) the approval rating for each kind of specialist maintenance that the organisation is approved to provide; and
 - (iv) any limitations applying to an approval rating mentioned in subparagraph (ii) or (iii); and
 - (v) the Part 42 Manual of Standards; and
 - (vi) this Part; and

Part 42 Continuing airworthiness requirements for aircraft and aeronautical products

Subpart 42.F Subpart 42.F approved maintenance organisations

Division 42.F.2 Approval of Subpart 42.F organisations

Regulation 42.530

(b) the organisation must ensure that, at all times, its employees comply with the requirements mentioned in paragraph (a).

Note 1: The approval is also subject to the conditions set out in Part 11.

Note 2: Subpart 11.G empowers CASA to issue directions.

Division 42.F.3—Changes to Subpart 42.F organisations

42.535 Application for approval of significant changes to Subpart 42.F organisations

- (1) If a Subpart 42.F organisation proposes to make a significant change, the organisation must apply to CASA for approval of the change.
- (2) The application must:
 - (a) be in writing; and
 - (b) set out the proposed change; and
 - (c) include a copy of the part of the exposition consequentially affected by the change, showing the proposed change.
- (3) Subject to subregulation (4), the application must be made before the change is made.
- (4) If:
 - (a) the change is of the kind mentioned in paragraph 42.500(2)(c); and
 - (b) the organisation does not apply, in accordance with subregulation (2), before making the change;

the organisation must apply in accordance with subregulation (2) within 7 days after making the change.

Note 1: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.

Note 2: Part 11 deals with applications and decision making.

Note 3: Making a significant change without applying for approval in accordance with this regulation will be a breach of condition of an approval—see regulation 42.530.

42.540 Approval of significant changes

- (1) Subject to regulation 11.055, CASA must approve a significant change to a Subpart 42.F organisation if CASA is satisfied that, after making the change, the requirements mentioned in subregulation 42.515(1) will continue to be met.

Note: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to issue, or cancelling, suspending or varying, an approval; or
- (b) a decision imposing a condition on an approval.

- (2) In approving the significant change, CASA also approves the consequential changes to the applicant's exposition.

42.545 Changes to Subpart 42.F organisations that are not significant changes

- (1) A change that is not a significant change to a Subpart 42.F organisation must be made in accordance with the procedure set out in the organisation's exposition for making changes to the organisation that are not significant changes.

Regulation 42.550

- (2) If such a change is made, the organisation must, within 28 days after making the change:
 - (a) update its exposition; and
 - (b) give CASA written notice of the change and a copy of the updated part of the exposition.

42.550 CASA may direct Subpart 42.F organisations to change expositions

- (1) CASA may direct a Subpart 42.F organisation to change its exposition:
 - (a) to remove particular information from the exposition; or
 - (b) to include particular information in the exposition; or
 - (c) to revise or vary the information in the exposition.
- (2) CASA may give a direction under this regulation only if CASA is satisfied that it is necessary to do so to ensure that the exposition complies with the requirements specified in the Part 42 Manual of Standards.
- (3) A direction under this regulation must:
 - (a) be in writing; and
 - (b) specify the time within which the direction must be complied with.

Note: The Subpart 42.F organisation must comply with the direction—see regulation 42.565.

Division 42.F.4—Requirements and offences for Subpart 42.F organisations

42.555 Provision of maintenance services

- (1) If a Subpart 42.F organisation provides maintenance services, it must provide the services only in accordance with:
 - (a) its exposition; and
 - (b) the approval rating for each kind of aircraft or aeronautical product for which the organisation is approved to provide maintenance services; and
 - (c) the approval rating for each kind of specialist maintenance that the organisation is approved to provide; and
 - (d) any limitations applying to an approval rating mentioned in paragraph (b) or (c); and
 - (e) the privileges that apply to the approval rating under the Part 42 Manual of Standards.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

42.560 Providing employees with exposition

- (1) If a Subpart 42.F organisation's exposition relates to the duties of an employee of the organisation, the organisation must make the part of the organisation's exposition that relates to those duties available to the employee before the employee begins carrying out the duties.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

42.565 Complying with directions

- (1) If CASA gives a direction to a Subpart 42.F organisation under regulation 42.550, the organisation must comply with the direction within the time mentioned in the direction.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Subpart 42.G—Continuing airworthiness management organisations

Division 42.G.1—General

42.570 Purpose of Subpart

This Subpart sets out matters relating to continuing airworthiness management organisations, including:

- (a) requirements for approval as a continuing airworthiness management organisation; and
- (b) requirements that apply to continuing airworthiness management organisations.

Note: For other matters relating to a continuing airworthiness management organisation, see the Part 42 Manual of Standards.

42.575 Definitions for Subpart

(1) In this Subpart:

accountable manager, for a continuing airworthiness management organisation, means the individual, appointed by the organisation, who is responsible for:

- (a) ensuring that the organisation complies with its exposition, its approval and these Regulations; and
- (b) ensuring that the organisation is able to finance the provision of the continuing airworthiness management services set out in its exposition; and
- (c) ensuring that the organisation has adequate resources available to enable the organisation to provide continuing airworthiness management services in accordance with its exposition.

approval certificate means a certificate issued under regulation 42.595.

continuing airworthiness management service means any of the following services for an aircraft:

- (a) ensuring that the requirements mentioned in Divisions 42.C.2, 42.C.3 and 42.C.4 are met;
- (b) the issue of an airworthiness review certificate under Division 42.I.2;
- (c) the extension of an airworthiness review certificate under Division 42.I.3;
- (d) the carrying out of an airworthiness review under Division 42.I.4;
- (e) the approval of:
 - (i) a maintenance program under Division 42.J.2; or
 - (ii) a variation of a maintenance program under Division 42.J.4.

continuing airworthiness manager, for a continuing airworthiness management organisation that is required by the Part 42 Manual of Standards to have a continuing airworthiness manager, means the individual, appointed by the

organisation, who has continuing airworthiness responsibility for the organisation.

continuing airworthiness responsibility, for a continuing airworthiness management organisation, means responsibility to the accountable manager for ensuring that the organisation complies with its exposition and these Regulations in relation to providing continuing airworthiness management services.

exposition, for a continuing airworthiness management organisation, means the document that is approved by CASA under regulation 42.590 in relation to the organisation, including:

- (a) if a change to the document is approved by CASA under regulation 42.615—that change; and
- (b) if the document is updated and the organisation gives CASA a copy of the updated part of the document under regulation 42.620—the updated part of the document; and
- (c) if the organisation makes a change to the document in accordance with a direction given by CASA under regulation 42.625—that change.

quality manager, for a continuing airworthiness management organisation that is required by the Part 42 Manual of Standards to have a quality management system, means the individual, appointed by the organisation, who is responsible for the organisation's quality management system.

responsible manager, for a continuing airworthiness management organisation, means an individual appointed by the organisation to be responsible for ensuring that the organisation complies with its exposition and these Regulations in relation to a particular matter.

significant change, in relation to a continuing airworthiness management organisation, has the meaning given by subregulation (2).

Note: See regulation 42.015 and the Dictionary for definitions of other terms used in this Subpart.

- (2) A **significant change**, in relation to a continuing airworthiness management organisation, means any of the following changes:
- (a) a change to the organisation's name;
 - (b) a change to the location of the organisation's continuing airworthiness management facility, including the addition of a new facility;
 - (c) a change in the personnel holding:
 - (i) the position of accountable manager in the organisation; or
 - (ii) any of the positions of responsible manager in the organisation; or
 - (iii) the position of continuing airworthiness manager (if any) in the organisation; or
 - (iv) the position of quality manager (if any) in the organisation;
 - (d) a change to:
 - (i) the aircraft types and models for which the organisation provides continuing airworthiness management services; or

Regulation 42.580

- (ii) the kinds of continuing airworthiness management services that the organisation provides for each aircraft type and model;
- (e) a change to the organisation's facilities, equipment, procedures or personnel that could adversely affect the organisation's ability to provide the continuing airworthiness management services that it is approved to provide.

42.580 Regulations 11.070 to 11.075 do not apply in relation to certain matters

Regulations 11.070 to 11.075 do not apply to:

- (a) a significant change to a continuing airworthiness management organisation that is approved by CASA under regulation 42.615; or
- (b) a change to a continuing airworthiness management organisation of which CASA is notified under regulation 42.620; or
- (c) a change to a continuing airworthiness management organisation that is made as a consequence of a change made to the organisation's exposition in accordance with a direction given by CASA under regulation 42.625.

Division 42.G.2—Approval of continuing airworthiness management organisations

42.585 Applying for approval

- (1) A person (the *applicant*) may apply to CASA for approval as a continuing airworthiness management organisation.
- (2) The application must:
 - (a) be in writing; and
 - (b) be signed by a person who is, or who proposes to be, the applicant's accountable manager.
- (3) The application must include the following:
 - (a) a copy of the applicant's proposed exposition;
 - (b) information showing that each individual nominated for a position of accountable manager or responsible manager in the organisation has the qualifications specified for the position in the Part 42 Manual of Standards;
 - (c) if the organisation is required by the Part 42 Manual of Standards to have a continuing airworthiness manager—information showing that the individual nominated for the position of continuing airworthiness manager in the organisation has the qualifications specified for the position in the Part 42 Manual of Standards;
 - (d) if the organisation is required by the Part 42 Manual of Standards to have a quality management system—information showing that the individual nominated for the position of quality manager in the organisation has the qualifications specified for the position in the Part 42 Manual of Standards;
 - (e) the aircraft types and models for which the applicant proposes to provide continuing airworthiness management services;
 - (f) the kinds of continuing airworthiness management services that the applicant proposes to provide for each aircraft type and model.

Note 1: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.

Note 2: Part 11 deals with applications and decision making.

42.590 Issuing approval

- (1) Subject to regulation 11.055, CASA must approve an applicant as a continuing airworthiness management organisation if CASA is satisfied that:
 - (a) the applicant has an exposition that complies with the requirements specified in the Part 42 Manual of Standards; and
 - (b) the applicant has facilities, equipment, personnel and instructions for continuing airworthiness:
 - (i) that are suitable for the continuing airworthiness management services that the applicant proposes to provide; and

Regulation 42.595

- (ii) that comply with the requirements specified in the Part 42 Manual of Standards; and
- (c) the applicant has nominated an individual for the position of accountable manager in the organisation; and
- (d) the applicant has nominated an individual for each position of responsible manager in the organisation; and
- (e) if the applicant is required by the Part 42 Manual of Standards to have a continuing airworthiness manager—the applicant has nominated an individual for the position of continuing airworthiness manager in the organisation; and
- (f) if the applicant is required by the Part 42 Manual of Standards to have a quality management system:
 - (i) the applicant has a quality management system that complies with the requirements specified in the Part 42 Manual of Standards; and
 - (ii) the applicant has nominated an individual for the position of quality manager in the organisation; and
 - (iii) the individual nominated for the position of quality manager is not also nominated for the position of accountable manager, continuing airworthiness manager (if any) or responsible manager; and
- (g) each individual nominated for a position mentioned in paragraph (c), (d) or (e) or subparagraph (f)(ii) holds the qualifications specified for the position in the Part 42 Manual of Standards.

Note: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to issue, or cancelling, suspending or varying, an approval; or
 - (b) a decision imposing a condition on an approval.
- (2) If CASA decides to approve an applicant as a continuing airworthiness management organisation, CASA must determine:
- (a) the aircraft types and models for which the applicant is approved to provide continuing airworthiness management services; and
 - (b) the kinds of continuing airworthiness management services that the applicant is approved to provide for each permitted aircraft type and model; and
 - (c) any limitations applying to the approval.
- (3) In approving the applicant, CASA also approves the applicant's proposed exposition.

42.595 Approval certificate

- (1) If CASA approves an applicant as a continuing airworthiness management organisation, CASA must issue a certificate setting out the matters mentioned in subregulation 42.590(2).
- (2) The certificate issued by CASA must include an approval certificate reference number determined by CASA.

- (3) If CASA approves a significant change to a continuing airworthiness management organisation under regulation 42.615, CASA may issue a new approval certificate to the organisation.

42.600 Privileges for continuing airworthiness management organisations

A continuing airworthiness management organisation may provide continuing airworthiness management services that it is approved to provide.

42.605 Approval subject to conditions

It is a condition of approval of a continuing airworthiness management organisation that:

- (a) the organisation must, at all times, comply with the requirements of:
 - (i) its exposition; and
 - (ii) its approval, including any limitations applying to the approval; and
 - (iii) the Part 42 Manual of Standards; and
 - (iv) this Part; and
- (b) the organisation must ensure that, at all times, its employees comply with the requirements mentioned in paragraph (a).

Note 1: The approval is also subject to the conditions set out in Part 11.

Note 2: Subpart 11.G empowers CASA to issue directions.

Regulation 42.610

Division 42.G.3—Changes to continuing airworthiness management organisations

42.610 Application for approval of significant changes to continuing airworthiness management organisations

- (1) If a continuing airworthiness management organisation proposes to make a significant change, the organisation must apply to CASA for approval of the change.
- (2) The application must:
 - (a) be in writing; and
 - (b) set out the proposed change; and
 - (c) include a copy of the part of the exposition consequentially affected by the change, showing the proposed change.
- (3) Subject to subregulation (4), the application must be made before the change is made.
- (4) If:
 - (a) the change is of the kind mentioned in paragraph 42.575(2)(c); and
 - (b) the organisation does not apply, in accordance with subregulation (2), before making the change;

the organisation must apply in accordance with subregulation (2) within 7 days after making the change.

Note 1: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.

Note 2: Part 11 deals with applications and decision making.

Note 3: Making a significant change without applying for approval in accordance with this regulation will be a breach of condition of an approval—see regulation 42.605.

42.615 Approval of significant changes

- (1) Subject to regulation 11.055, CASA must approve a significant change to a continuing airworthiness management organisation if CASA is satisfied that, after making the change, the requirements mentioned in subregulation 42.590(1) will continue to be met.

Note: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to issue, or cancelling, suspending or varying, an approval; or
- (b) a decision imposing a condition on an approval.

- (2) In approving the significant change, CASA also approves the consequential changes to the applicant's exposition.

42.620 Changes to continuing airworthiness management organisations that are not significant changes

- (1) A change that is not a significant change to a continuing airworthiness management organisation must be made in accordance with the procedure set out in the organisation's exposition for making changes to the organisation that are not significant changes.
- (2) If such a change is made, the organisation must, within 28 days after making the change:
 - (a) update its exposition; and
 - (b) give CASA written notice of the change and a copy of the updated part of the exposition.

42.625 CASA may direct continuing airworthiness management organisations to change expositions

- (1) CASA may direct a continuing airworthiness management organisation to change its exposition:
 - (a) to remove particular information from the exposition; or
 - (b) to include particular information in the exposition; or
 - (c) to revise or vary the information in the exposition.
- (2) CASA may give a direction under this regulation only if CASA is satisfied that it is necessary to do so to ensure that the exposition complies with the requirements specified in the Part 42 Manual of Standards.
- (3) A direction under this regulation must:
 - (a) be in writing; and
 - (b) specify the time within which the direction must be complied with.

Note: The continuing airworthiness management organisation must comply with the direction—see regulation 42.665.

Regulation 42.630

Division 42.G.4—Authorisation of pilot licence holders and flight engineers to provide maintenance services

42.630 When pilot licence holders and flight engineers may be authorised

- (1) A continuing airworthiness management organisation may issue an authorisation to provide specified maintenance services for a large aircraft or an aircraft that is authorised to operate under an AOC to a pilot licence holder or a flight engineer if:
 - (a) for an aircraft for which the continuing airworthiness management organisation is not the registered operator—the registered operator of the aircraft asks the organisation to issue the authorisation; and
 - (b) the organisation is responsible for providing continuing airworthiness management services for the aircraft; and
 - (c) the requirements mentioned in subregulation (2) are met.
- (2) The requirements are that:
 - (a) the maintenance to be carried out by the pilot licence holder or flight engineer under the authorisation is specified in the Part 42 Manual of Standards for items 4 and 5 of table 42.300; and
 - (b) the pilot licence holder or flight engineer is at least 21; and
 - (c) the authorisation is for a type and model of aircraft:
 - (i) that the pilot licence holder is authorised, under Part 61, to fly; or
 - (ii) in relation to which the flight engineer is authorised, under Part 61, to perform the duties of flight engineer; and
 - (d) the pilot licence holder or flight engineer has a written statement from a Part 145 organisation or a maintenance training organisation to the effect that:
 - (i) the pilot licence holder or flight engineer has been trained and assessed in the maintenance mentioned in paragraph (a); and
 - (ii) the pilot licence holder or flight engineer is competent to carry out the maintenance; and
 - (e) at the time the organisation issues the authorisation, the organisation is satisfied that the pilot licence holder or flight engineer:
 - (i) is competent to carry out the maintenance mentioned in paragraph (a); and
 - (ii) has comprehensive knowledge of the requirements of Subparts 42.D, 42.E and 42.H; and
 - (iii) has comprehensive knowledge of the continuing airworthiness records system for the aircraft in relation to performing maintenance certification and issuing certificates of release to service.
- (3) The authorisation must:
 - (a) be in writing; and

Regulation 42.635

-
- (b) be signed by the responsible manager in the organisation who is responsible for ensuring that the organisation complies with its exposition and these Regulations in relation to authorisations under this regulation; and
 - (c) include the following information:
 - (i) the name of the continuing airworthiness management organisation;
 - (ii) the name and licence number of the pilot licence holder or flight engineer being authorised;
 - (iii) the maintenance services that the pilot licence holder or flight engineer is authorised to provide;
 - (iv) the date that the authorisation is issued;
 - (v) the period for which the authorisation is in force;
 - (vi) the aircraft for which the authorisation is issued;
 - (vii) the name of the registered operator of the aircraft.
 - (4) The period for which the authorisation is in force:
 - (a) must not exceed 2 years; and
 - (b) must not include a period before the date that the authorisation is issued.

42.635 Ceasing of authorisation if organisation ceases to be responsible for providing continuing airworthiness management services for aircraft

- (1) This regulation applies if:
 - (a) a continuing airworthiness management organisation has issued an authorisation under regulation 42.630 to a pilot licence holder or a flight engineer to provide maintenance services for an aircraft; and
 - (b) the organisation ceases to be responsible for providing continuing airworthiness management services for the aircraft.
- (2) The authorisation ceases to be in force at the time the organisation ceases to be responsible for providing continuing airworthiness management services for the aircraft.

42.640 Directions in relation to authorisations

- (1) If CASA is satisfied that, when an authorisation was issued under regulation 42.630, a requirement mentioned in subregulation 42.630(1) or (2) was not met, CASA may give the continuing airworthiness management organisation that issued the authorisation a direction:
 - (a) to make a change to the authorisation; or
 - (b) to cancel the authorisation.
- (2) A direction under this regulation must:
 - (a) be in writing; and
 - (b) specify the time within which the direction must be complied with.

Note: The continuing airworthiness management organisation must comply with the direction—see regulation 42.665.

Part 42 Continuing airworthiness requirements for aircraft and aeronautical products

Subpart 42.G Continuing airworthiness management organisations

Division 42.G.4 Authorisation of pilot licence holders and flight engineers to provide maintenance services

Regulation 42.645

42.645 Notice of cancellation of authorisation

- (1) If a continuing airworthiness management organisation cancels an authorisation issued under regulation 42.630, the organisation must give the holder of the authorisation notice in writing of the cancellation, including the date on which the cancellation takes effect.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Division 42.G.5—Requirements and offences for continuing airworthiness management organisations

42.650 Provision of continuing airworthiness management services

- (1) If a continuing airworthiness management organisation provides continuing airworthiness management services it must provide the services only in accordance with:
 - (a) its exposition; and
 - (b) its approval, including any limitations applying to the approval.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

42.655 Providing employees with exposition

- (1) If a continuing airworthiness management organisation's exposition relates to the duties of an employee of the organisation, the organisation must make the part of the organisation's exposition that relates to those duties available to the employee before the employee begins carrying out the duties.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

42.660 Copies of authorisations and records

- (1) If a continuing airworthiness management organisation issues an authorisation under regulation 42.630 in relation to an aircraft, the organisation must, within 14 days after issuing the authorisation, give a copy of the authorisation to the registered operator of the aircraft.

Penalty: 50 penalty units.

- (2) The continuing airworthiness management organisation must retain a copy of the authorisation for at least 2 years after the authorisation ceases to be in force.

Penalty: 50 penalty units.

- (3) The organisation must keep any record evidencing the matters mentioned in paragraph 42.630(2)(e) in relation to an authorisation under regulation 42.630 for at least 2 years after the authorisation ceases to be in force.

Penalty: 50 penalty units.

- (4) An offence against subregulation (1), (2) or (3) is an offence of strict liability.

Regulation 42.665

42.665 Complying with directions

- (1) If CASA gives a direction to a continuing airworthiness management organisation under regulation 42.625 or 42.640, the organisation must comply with the direction within the time mentioned in the direction.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

42.670 Giving information in accordance with contract

If:

- (a) a continuing airworthiness management organisation enters into a contract with the registered operator of an aircraft as mentioned in regulation 42.040 or 42.045; and
- (b) the organisation has information about the continuing airworthiness of the aircraft that relates to a matter mentioned in paragraph 42.050(2)(d);

the organisation must give the information to the registered operator in accordance with the contract.

Penalty: 50 penalty units.

Note: See regulation 42.055 for the requirement for the registered operator of an aircraft to give information to the continuing airworthiness management organisation for the aircraft.

42.675 Notice of contravention of Part to be given to CASA

- (1) If:

- (a) a continuing airworthiness management organisation enters into a contract with the registered operator of an aircraft as mentioned in regulation 42.040 or 42.045; and
- (b) the organisation has reasonable grounds to believe that the registered operator has contravened a provision of this Part;

the organisation must give CASA written notice of the contravention within 7 days after the organisation forms the belief that the contravention has occurred.

Penalty: 50 penalty units.

- (2) If the organisation is an individual, he or she is not excused from giving a notice under subregulation (1) on the ground that the information in the notice might tend to incriminate the individual or expose the individual to a penalty.

- (3) However:

- (a) the information in the notice; or
- (b) any information, document or thing obtained as a direct or indirect consequence of giving the notice;

is not admissible in evidence against the individual in criminal proceedings other than proceedings for an offence against subsections 136.1(1) or (4), 137.1(1) or 137.2(1) of the *Criminal Code*.

Regulation 42.675

- Note 1: Subsections 136.1(1) and (4), 137.1(1) and 137.2(1) of the *Criminal Code* provide for offences in relation to false or misleading statements in applications and false or misleading information or documents.
- Note 2: See regulation 42.075 for the equivalent requirement for a registered operator.

Part 42 Continuing airworthiness requirements for aircraft and aeronautical products

Subpart 42.H Maintenance certification and certificate of release to service

Division 42.H.1 General

Regulation 42.680

Subpart 42.H—Maintenance certification and certificate of release to service

Division 42.H.1—General

42.680 Purpose of Subpart

This Subpart sets out requirements for the performance of maintenance certification and the issue of certificates of release to service when maintenance has been carried out.

Division 42.H.2—Maintenance certification for maintenance carried out on aircraft

Subdivision 42.H.2.1—Application of Division

42.685 Application of Division

This Division applies if an individual carries out maintenance on an aircraft.

Subdivision 42.H.2.2—Who must perform maintenance certification

42.690 Approved maintenance organisations

- (1) If the maintenance is carried out by an individual on behalf of an approved maintenance organisation, the organisation must ensure that maintenance certification for the maintenance is performed on behalf of the organisation:
 - (a) by an individual mentioned in subregulation (2); and
 - (b) before the organisation issues a certificate of release to service for the aircraft in relation to the maintenance.

Penalty: 50 penalty units.

- (2) For paragraph (1)(a), the individual must be a certifying employee of the organisation:
 - (a) whose certification authorisation permits him or her to perform maintenance certification for the maintenance; and
 - (b) who carried out the maintenance, or supervised the carrying out of the maintenance by another individual.
- (3) An offence against subregulation (1) is an offence of strict liability.

42.695 Individuals performing maintenance certification on behalf of approved maintenance organisations

Obligation

- (1) An individual must not perform maintenance certification for the maintenance on behalf of an approved maintenance organisation unless:
 - (a) he or she is a certifying employee of the organisation whose certification authorisation permits him or her to perform maintenance certification for the maintenance; and
 - (b) he or she carried out the maintenance, or supervised the carrying out of the maintenance by another individual.

Offence for breach of obligation

- (2) An individual commits an offence if:

Regulation 42.700

- (a) he or she performs maintenance certification for the maintenance on behalf of an approved maintenance organisation; and
- (b) either:
 - (i) at the time of performing the maintenance certification, he or she is not a certifying employee of the organisation whose certification authorisation permits him or her to perform the maintenance certification; or
 - (ii) he or she did not carry out the maintenance, or supervise the carrying out of the maintenance by another individual.

Penalty: 50 penalty units.

- (3) An offence against subregulation (2) is an offence of strict liability.

42.700 Independent maintainers

- (1) If the maintenance is carried out by an independent maintainer, the independent maintainer must perform maintenance certification for the maintenance before the independent maintainer issues a certificate of release to service for the aircraft in relation to the maintenance.

Penalty: 50 penalty units.

- (2) If the maintenance is carried out by an individual mentioned in item 2 of table 42.300, the independent maintainer who supervised the carrying out of the maintenance must perform maintenance certification for the maintenance before the independent maintainer issues a certificate of release to service for the aircraft in relation to the maintenance.

Penalty: 50 penalty units.

Note: A person mentioned in item 1 of table 42.300 is the only independent maintainer who is permitted to supervise the carrying out of maintenance by another individual—see subregulation 42.300(2).

- (3) An offence against subregulation (1) or (2) is an offence of strict liability.

Subdivision 42.H.2.3—Requirements for performing maintenance certification

42.705 Requirements to be met by individuals before performing maintenance certification

Obligation

- (1) An individual must not perform maintenance certification for the maintenance unless he or she has ensured that:
 - (a) the maintenance has been carried out in accordance with:
 - (i) this Part; and
 - (ii) Part 145, if applicable; and

- (b) the information required by regulation 42.395 for the maintenance has been recorded.

Offence for breach of obligation

- (2) An individual commits an offence if:
 - (a) he or she performs maintenance certification; and
 - (b) he or she did not comply with subregulation (1) before performing the maintenance certification.

Penalty: 50 penalty units.

- (3) An offence against subregulation (2) is an offence of strict liability.

42.710 Requirements to be met by organisations before performing maintenance certification

Obligation

- (1) An approved maintenance organisation must ensure that an individual who performs maintenance certification on its behalf complies with subregulation 42.705(1).

Offence for breach of obligation

- (2) An approved maintenance organisation commits an offence if:
 - (a) an individual performs maintenance certification on its behalf; and
 - (b) the individual did not comply with subregulation 42.705(1) before performing the maintenance certification.

Penalty: 50 penalty units.

- (3) An offence against subregulation (2) is an offence of strict liability.

Subdivision 42.H.2.4—Performance of maintenance certification

42.715 How maintenance certification is performed

To perform maintenance certification for the maintenance, an individual must:

- (a) sign the record that contains the information required by regulation 42.395 for the maintenance; and
- (b) record, in that record:
 - (i) the date of the maintenance certification; and
 - (ii) if he or she carried out the maintenance on behalf of an approved maintenance organisation—his or her certification authorisation number; and
 - (iii) if he or she did not carry out the maintenance on behalf of an approved maintenance organisation—his or her aircraft engineer

Part 42 Continuing airworthiness requirements for aircraft and aeronautical products

Subpart 42.H Maintenance certification and certificate of release to service

Division 42.H.2 Maintenance certification for maintenance carried out on aircraft

Regulation 42.715

licence number, pilot licence number or flight engineer licence number.

Note: The information required under regulation 42.395 about maintenance, and the maintenance certification for the maintenance, together constitute the maintenance record for the maintenance—see the definition of *maintenance record* in regulation 42.015.

Division 42.H.3—Certificate of release to service—aircraft

Subdivision 42.H.3.1—Preliminary

42.720 Application of Division

This Division applies if an individual carries out maintenance on an aircraft.

42.725 Requirement not to release aircraft without certificate of release to service

Obligation—approved maintenance organisation

- (1) If an individual carries out maintenance on an aircraft on behalf of an approved maintenance organisation, the organisation must not release the aircraft to another person unless the organisation has issued a certificate of release to service for the aircraft in relation to the maintenance.

Offence for breach of obligation

- (2) An approved maintenance organisation commits an offence if:
 - (a) an individual carries out maintenance on an aircraft on behalf of the organisation; and
 - (b) the organisation has not issued a certificate of release to service for the aircraft in relation to the maintenance; and
 - (c) the organisation releases the aircraft to another person.

Penalty: 50 penalty units.

Obligation—independent maintainer

- (3) If an independent maintainer carries out maintenance on an aircraft, or supervises the carrying out of maintenance on an aircraft by another individual, the independent maintainer must not release the aircraft to another person unless the independent maintainer has issued a certificate of release to service for the aircraft in relation to the maintenance.

Note: A person mentioned in item 1 of table 42.300 is the only independent maintainer who is permitted to supervise the carrying out of maintenance by another individual—see subregulation 42.300(2).

Offence for breach of obligation

- (4) An independent maintainer commits an offence if:
 - (a) the independent maintainer carries out maintenance on an aircraft, or supervises the carrying out of maintenance on an aircraft by another individual; and
 - (b) the independent maintainer has not issued a certificate of release to service for the aircraft in relation to the maintenance; and

Regulation 42.730

(c) the independent maintainer releases the aircraft to another person.

Penalty: 50 penalty units.

(5) An offence against subregulation (2) or (4) is an offence of strict liability.

Subdivision 42.H.3.2—Who may issue certificate of release to service

42.730 Approved maintenance organisations

- (1) If maintenance was carried out on an aircraft on behalf of an approved maintenance organisation, the organisation may issue a certificate of release to service for the aircraft in relation to the maintenance.
- (2) If an approved maintenance organisation issues a certificate of release to service for the aircraft in relation to the maintenance, the organisation must ensure that the certificate is issued on behalf of the organisation by an individual:
 - (a) who is a certifying employee of the organisation; and
 - (b) whose certification authorisation permits him or her to issue the certificate for the aircraft in relation to the maintenance.

Penalty: 50 penalty units.

(3) An offence against subregulation (2) is an offence of strict liability.

42.735 Individuals issuing certificates of release to service on behalf of approved maintenance organisations

Obligation

- (1) An individual must not issue a certificate of release to service on behalf of an approved maintenance organisation for an aircraft in relation to maintenance carried out on the aircraft unless:
 - (a) he or she is a certifying employee of the organisation; and
 - (b) his or her certification authorisation permits him or her to issue the certificate for the aircraft in relation to the maintenance.

Offence for breach of obligation

- (2) An individual commits an offence if:
 - (a) he or she issues a certificate of release to service on behalf of an approved maintenance organisation for an aircraft in relation to maintenance carried out on the aircraft; and
 - (b) at the time of issuing the certificate:
 - (i) he or she is not a certifying employee of the organisation; or
 - (ii) he or she is a certifying employee of the organisation, but his or her certification authorisation does not permit him or her to issue the certificate for the aircraft in relation to the maintenance.

Penalty: 50 penalty units.

- (3) An offence against subregulation (2) is an offence of strict liability.

42.740 Independent maintainers

- (1) If an independent maintainer carries out maintenance on an aircraft, the independent maintainer may issue a certificate of release to service for the aircraft in relation to the maintenance.
- (2) If an individual mentioned in item 2 of table 42.300 carries out maintenance on an aircraft, the independent maintainer who supervised the carrying out of the maintenance may issue a certificate of release to service for the aircraft in relation to the maintenance.

Note: A person mentioned in item 1 of table 42.300 is the only independent maintainer who is permitted to supervise the carrying out of maintenance by another individual—see subregulation 42.300(2).

- (3) An independent maintainer commits an offence if:
- (a) the independent maintainer issues a certificate of release to service for an aircraft in relation to maintenance carried out on the aircraft; and
 - (b) the issuing of the certificate by the independent maintainer is not permitted by subregulation (1) or (2).

Penalty: 50 penalty units.

- (4) An offence against subregulation (3) is an offence of strict liability.

Subdivision 42.H.3.3—Requirements for issuing certificate of release to service

42.745 Requirements to be met before certificate of release to service may be issued

The following are the requirements for the issue of a certificate of release to service for an aircraft in relation to maintenance carried out on the aircraft:

- (a) the certificate complies with regulation 42.760;
- (b) the information entered into the certificate is correct;
- (c) maintenance certification has been performed for all of the maintenance;
- (d) if the maintenance included critical control system maintenance—the information mentioned in subregulation 42.345(3) has been recorded in the continuing airworthiness records system for the aircraft in relation to the critical control system maintenance;
- (e) in respect of the maintenance, the aircraft is airworthy;
- (f) if there is a defect in the aircraft, and the rectification of the defect has not been deferred in accordance with Subdivision 42.D.6.1:
 - (i) the certificate includes details of the defect; and
 - (ii) the person responsible for continuing airworthiness for the aircraft has been notified that:
 - (A) the certificate is to be issued; and

Regulation 42.750

- (B) there is a defect in the aircraft, and the rectification of the defect has not been deferred in accordance with Subdivision 42.D.6.1;
- (g) if maintenance requested for the aircraft (other than the rectification of a defect mentioned in paragraph (f)) has not been carried out:
 - (i) the certificate includes details of the maintenance that has not been carried out; and
 - (ii) the person responsible for continuing airworthiness for the aircraft has been notified that:
 - (A) the certificate is to be issued; and
 - (B) maintenance requested for the aircraft (other than the rectification of a defect mentioned in paragraph (f)) has not been carried out.

42.750 Requirements to be met by approved maintenance organisations before issuing certificate of release to service

Obligation

- (1) An approved maintenance organisation must ensure that an individual does not issue a certificate of release to service on its behalf for an aircraft in relation to maintenance carried out on the aircraft unless the requirements mentioned in regulation 42.745 are met.

Offence for breach of obligation

- (2) An approved maintenance organisation commits an offence if:
 - (a) an individual issues a certificate of release to service on its behalf for an aircraft in relation to maintenance carried out on the aircraft; and
 - (b) a requirement mentioned in regulation 42.745 is not met in relation to the issuing of the certificate.

Penalty: 50 penalty units.

- (3) An offence against subregulation (2) is an offence of strict liability.

42.755 Requirements to be met by individuals before issuing certificate of release to service

Obligation

- (1) An individual must not issue a certificate of release to service for an aircraft in relation to maintenance carried out on the aircraft unless the requirements mentioned in regulation 42.745 are met.

Offence for breach of obligation

- (2) An individual commits an offence if:

- (a) he or she issues a certificate of release to service for an aircraft in relation to maintenance carried out on the aircraft; and
- (b) a requirement mentioned in regulation 42.745 is not met in relation to the issuing of the certificate.

Penalty: 50 penalty units.

- (3) An offence against subregulation (2) is an offence of strict liability.

Subdivision 42.H.3.4—Form, content and issue of certificate of release to service

42.760 Form and content of certificate of release to service

- (1) A document is a certificate of release to service for an aircraft in relation to maintenance carried out on the aircraft only if it includes the following information:
 - (a) information identifying the certificate as a certificate of release to service;
 - (b) the aircraft's registration mark;
 - (c) if the maintenance was carried out by an approved maintenance organisation—the organisation's approval certificate reference number and the certification authorisation number of the employee issuing the certificate;
 - (d) if the maintenance was not carried out by an approved maintenance organisation—the name and aircraft engineer licence number, pilot licence number or flight engineer licence number of the individual issuing the certificate.
- (2) The certificate must be included in the flight technical log for the aircraft on which the maintenance was carried out.

42.765 How certificate of release to service is issued

To issue a certificate of release to service for an aircraft in relation to maintenance carried out on the aircraft, an individual must:

- (a) sign the certificate; and
- (b) record the date and time of issue on the certificate.

Subdivision 42.H.3.5—Record-keeping

42.770 Retaining copy of certificate of release to service

- (1) If a certificate of release to service for an aircraft in relation to maintenance carried out on the aircraft is issued on behalf of an approved maintenance organisation, the organisation must ensure that a copy of the certificate is retained for 1 year beginning on the date the certificate is issued.

Penalty: 50 penalty units.

Part 42 Continuing airworthiness requirements for aircraft and aeronautical products

Subpart 42.H Maintenance certification and certificate of release to service

Division 42.H.3 Certificate of release to service—aircraft

Regulation 42.770

(2) An offence against subregulation (1) is an offence of strict liability.

Division 42.H.4—Certificate of release to service—aeronautical products

Subdivision 42.H.4.1—Preliminary

42.775 Application of Division

This Division applies if an individual carries out maintenance on an aeronautical product on behalf of an approved maintenance organisation.

Note 1: Maintenance certification is not required for maintenance carried out on aeronautical products.

Note 2: Under regulation 42.305, only approved maintenance organisations and individuals carrying out maintenance on behalf of approved maintenance organisations are permitted to carry out maintenance on aeronautical products.

42.780 Requirement not to release aeronautical product without certificate of release to service

Obligation

- (1) If an individual carries out maintenance on an aeronautical product on behalf of an approved maintenance organisation, the organisation must not release the product for use in an aircraft or another aeronautical product unless the organisation has issued a certificate of release to service for the aeronautical product in relation to the maintenance.

Offence for breach of obligation

- (2) An approved maintenance organisation commits an offence if:
 - (a) an individual carries out maintenance on an aeronautical product on behalf of the organisation; and
 - (b) the organisation has not issued a certificate of release to service for the aeronautical product in relation to the maintenance; and
 - (c) the organisation releases the product for use in an aircraft or another aeronautical product.

Penalty: 50 penalty units.

- (3) An offence against subregulation (2) is an offence of strict liability.

Subdivision 42.H.4.2—Who may issue certificate of release to service

42.785 Approved maintenance organisations

- (1) If maintenance was carried out on an aeronautical product on behalf of an approved maintenance organisation, the organisation may issue a certificate of release to service for the aeronautical product in relation to the maintenance.

Regulation 42.790

- (2) If an approved maintenance organisation issues a certificate of release to service for the product in relation to the maintenance, the organisation must ensure that the certificate is issued on behalf of the organisation by an individual:
- (a) who is a certifying employee of the organisation; and
 - (b) whose certification authorisation permits him or her to issue the certificate for the product in relation to the maintenance.

Penalty: 50 penalty units.

- (3) An offence against subregulation (2) is an offence of strict liability.

42.790 Individuals issuing certificates of release to service on behalf of approved maintenance organisations

Obligation

- (1) An individual must not issue a certificate of release to service on behalf of an approved maintenance organisation for an aeronautical product in relation to maintenance carried out on the product unless:
- (a) he or she is a certifying employee of the organisation; and
 - (b) his or her certification authorisation permits him or her to issue the certificate for the product in relation to the maintenance.

Offence for breach of obligation

- (2) An individual commits an offence if:
- (a) he or she issues a certificate of release to service on behalf of an approved maintenance organisation for an aeronautical product in relation to maintenance carried out on the product; and
 - (b) at the time of issuing the certificate:
 - (i) he or she is not a certifying employee of the organisation; or
 - (ii) he or she is a certifying employee of the organisation, but his or her certification authorisation does not permit him or her to issue the certificate for the product in relation to the maintenance.

Penalty: 50 penalty units.

- (3) An offence against subregulation (2) is an offence of strict liability.

Subdivision 42.H.4.3—Requirements for issuing certificate of release to service

42.795 Requirements to be met before certificate of release to service may be issued

The following are the requirements for the issue of a certificate of release to service for an aeronautical product in relation to maintenance carried out on the product:

- (a) the information entered into the certificate for the maintenance is correct;

- (b) the maintenance is complete;
- (c) the maintenance was carried out in accordance with:
 - (i) this Part; and
 - (ii) Part 145, if applicable;
- (d) in respect of the maintenance, the product is serviceable.

42.800 Requirements to be met by approved maintenance organisations before issuing certificate of release to service

Obligation

- (1) An approved maintenance organisation must ensure that an individual does not issue a certificate of release to service on its behalf for an aeronautical product in relation to maintenance carried out on the product unless the requirements mentioned in regulation 42.795 are met.

Offence for breach of obligation

- (2) An approved maintenance organisation commits an offence if:
 - (a) an individual issues a certificate of release to service on its behalf for an aeronautical product in relation to maintenance carried out on the product; and
 - (b) a requirement mentioned in regulation 42.795 is not met in relation to the issuing of the certificate.

Penalty: 50 penalty units.

- (3) An offence against subregulation (2) is an offence of strict liability.

42.805 Requirements to be met by individuals before issuing certificate of release to service

Obligation

- (1) An individual must not issue a certificate of release to service on behalf of an approved maintenance organisation for an aeronautical product in relation to maintenance carried out on the product unless the requirements mentioned in regulation 42.795 are met.

Offence for breach of obligation

- (2) An individual commits an offence if:
 - (a) he or she issues a certificate of release to service on behalf of an approved maintenance organisation for an aeronautical product in relation to maintenance carried out on the product; and
 - (b) a requirement mentioned in regulation 42.795 is not met in relation to the issuing of the certificate.

Penalty: 50 penalty units.

Regulation 42.810

- (3) An offence against subregulation (2) is an offence of strict liability.

Subdivision 42.H.4.4—Form and issue of certificate of release to service

42.810 Form of certificate of release to service

Maintenance that is not in-house maintenance

- (1) A document is a certificate of release to service for an aeronautical product in relation to maintenance:
- (a) that is carried out on the product; and
 - (b) that is not in-house maintenance;
- only if the document is in the approved form.

Note: Under regulation 11.018, a certificate of release to service in the approved form is not complete unless it contains all of the information required by the form.

In-house maintenance

- (2) A document is a certificate of release to service for an aeronautical product in relation to in-house maintenance carried out on the aeronautical product only if the document is:
- (a) in the approved form; or
 - (b) in the form of an in-house release document.

Note 1: Under regulation 11.018, a certificate of release to service in the approved form is not complete unless it contains all of the information required by the form.

Note 2: For the definition of *in-house release document*, see Part 1 of the Dictionary.

42.815 How certificate of release to service is issued

To issue a certificate of release to service on behalf of an approved maintenance organisation for an aeronautical product in relation to maintenance carried out on the product, an individual must:

- (a) sign the certificate; and
- (b) record the date of issue on the certificate.

Subdivision 42.H.4.5—Record-keeping and dealing with certificate of release to service

42.820 Additional record for certificate of release to service issued as in-house release document

- (1) This regulation applies if a certificate of release to service for an aeronautical product in relation to in-house maintenance carried out on the product is issued in the form of an in-house release document.
- (2) The Part 145 organisation that carried out the in-house maintenance must:

- (a) ensure that a record is made that contains the information that, if the certificate was issued in the approved form, would have been recorded on the approved form; and
- (b) retain the record until the end of 2 years after the date the organisation fits the aeronautical product to an aircraft or another aeronautical product.

Penalty: 50 penalty units.

- (3) An offence against subregulation (2) is an offence of strict liability.

Note: For the definition of *in-house release document*, see Part 1 of the Dictionary.

42.825 Dealing with certificate of release to service

- (1) If an approved maintenance organisation issues a certificate of release to service for an aeronautical product in relation to maintenance carried out on the product, the organisation must:
 - (a) give the certificate to the person to whom the product is released for use in an aircraft or another aeronautical product; and
 - (b) retain a copy of the certificate for 2 years beginning on the date the certificate is issued.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Subpart 42.I—Airworthiness reviews and airworthiness review certificates

Division 42.I.1—General

42.830 Application of Subpart

This Subpart applies to an aircraft:

- (a) that is authorised to operate under an AOC; or
- (b) that is a large aircraft.

42.835 Purpose of Subpart

This Subpart sets out:

- (a) requirements in relation to airworthiness review certificates and airworthiness reviews for aircraft operating under an AOC and large aircraft; and
- (b) the relationship between an airworthiness review certificate and a certificate of airworthiness.

Division 42.I.2—Issue of airworthiness review certificates

42.840 Who may issue airworthiness review certificate

- (1) The continuing airworthiness management organisation for an aircraft may issue an airworthiness review certificate for the aircraft.
- (2) If a continuing airworthiness management organisation issues an airworthiness review certificate for the aircraft, the organisation must ensure that the certificate is issued on behalf of the organisation by an individual:
 - (a) who is an airworthiness review employee of the organisation; and
 - (b) whose authorisation as an airworthiness review employee permits the employee to issue an airworthiness review certificate for the aircraft.

Penalty: 50 penalty units.

- (3) An offence against subregulation (2) is an offence of strict liability.

42.845 Requirements to be met for issue of airworthiness review certificate

The following are the requirements for the issue of an airworthiness review certificate for an aircraft:

- (a) the information entered into the certificate is correct;
- (b) an airworthiness review employee of the continuing airworthiness management organisation for the aircraft has carried out an airworthiness review for the aircraft in accordance with regulation 42.900;
- (c) a record of the findings of the review has been made in accordance with regulation 42.905;
- (d) any corrective action that was necessary to ensure that the requirements of subregulations 42.900(2) and (3) are met for the aircraft has been taken;
- (e) a record of action mentioned in paragraph (d) has been made in accordance with regulation 42.910;
- (f) the aircraft is airworthy.

42.850 Requirements to be met by continuing airworthiness management organisations before issuing airworthiness review certificate

Obligation

- (1) A continuing airworthiness management organisation must ensure that an individual does not issue an airworthiness review certificate on its behalf for an aircraft unless the requirements mentioned in regulation 42.845 are met.

Offence for breach of obligation

- (2) A continuing airworthiness management organisation commits an offence if:
 - (a) an individual issues an airworthiness review certificate on its behalf for an aircraft; and

Regulation 42.855

- (b) a requirement mentioned in regulation 42.845 is not met in relation to the issuing of the certificate.

Penalty: 50 penalty units.

- (3) An offence against subregulation (2) is an offence of strict liability.

42.855 Requirements to be met by individuals before issuing airworthiness review certificate

Obligation

- (1) An individual must not issue an airworthiness review certificate for an aircraft unless the requirements mentioned in regulation 42.845 are met.

Offence for breach of obligation

- (2) An individual commits an offence if:
 - (a) he or she issues an airworthiness review certificate for an aircraft; and
 - (b) a requirement mentioned in regulation 42.845 is not met in relation to the issuing of the certificate.

Penalty: 50 penalty units.

- (3) An offence against subregulation (2) is an offence of strict liability.

42.860 Form of airworthiness review certificate

A document is an airworthiness review certificate only if it is in the approved form.

Note: Under regulation 11.018, an airworthiness review certificate in the approved form is not complete unless it contains all of the information required by the form.

42.865 How airworthiness review certificate is issued

To issue an airworthiness review certificate for an aircraft, an individual must:

- (a) sign the certificate; and
- (b) record the date of issue and date of expiry on the certificate.

42.870 How long airworthiness review certificate remains in force

An airworthiness review certificate remains in force:

- (a) for 1 year beginning on the day it is issued; and
- (b) if the time for which it is in force is extended under Division 42.I.3—until the end of the time for which it is in force is extended.

Division 42.I.3—Extension of airworthiness review certificates

42.875 Who may extend airworthiness review certificate

- (1) The continuing airworthiness management organisation for an aircraft may extend the time for which an airworthiness review certificate for the aircraft is in force if the organisation:
 - (a) issued the certificate; and
 - (b) has been the continuing airworthiness management organisation for the aircraft since the date of issue of the certificate.
- (2) A continuing airworthiness management organisation commits an offence if:
 - (a) it extends the time for which an airworthiness review certificate is in force; and
 - (b) the extension is not permitted by subregulation (1).

Penalty: 50 penalty units.

- (3) If a continuing airworthiness management organisation extends the time for which an airworthiness review certificate is in force, the organisation must ensure that the time for which the certificate is in force is extended on behalf of the organisation by an individual:
 - (a) who is an airworthiness review employee of the organisation; and
 - (b) whose authorisation as an airworthiness review employee permits the employee to issue an airworthiness review certificate for the aircraft.

Penalty: 50 penalty units.

- (4) An offence against subregulation (2) or (3) is an offence of strict liability.

42.880 Requirements to be met for extension of airworthiness review certificate

- (1) This regulation sets out the requirements for extending the time for which an airworthiness review certificate for an aircraft is in force.
- (2) The time for which the certificate is in force may be extended only within the period of 90 days before the certificate is due to expire.
- (3) The time for which the certificate is in force is to be extended must be no more than 1 year starting immediately after the certificate is due to expire.
- (4) The time for which the certificate is in force may be extended no more than twice.
- (5) The aircraft must be airworthy.

Regulation 42.885

42.885 Requirements to be met by continuing airworthiness management organisations before extension of airworthiness review certificate

Obligation

- (1) A continuing airworthiness management organisation must ensure that an individual does not extend an airworthiness review certificate on its behalf for an aircraft unless the requirements mentioned in regulation 42.880 are met.

Offence for breach of obligation

- (2) A continuing airworthiness management organisation commits an offence if:
 - (a) an individual extends an airworthiness review certificate on its behalf for an aircraft; and
 - (b) a requirement mentioned in regulation 42.880 is not met in relation to the issuing of the certificate.

Penalty: 50 penalty units.

- (3) An offence against subregulation (2) is an offence of strict liability.

42.890 Requirements to be met by individuals before extending airworthiness review certificate

Obligation

- (1) An individual must not extend an airworthiness review certificate for an aircraft unless the requirements mentioned in regulation 42.880 are met.

Offence for breach of obligation

- (2) An individual commits an offence if:
 - (a) he or she extends an airworthiness review certificate for an aircraft; and
 - (b) a requirement mentioned in regulation 42.880 is not met in relation to the issuing of the certificate.

Penalty: 50 penalty units.

- (3) An offence against subregulation (2) is an offence of strict liability.

42.895 How airworthiness review certificate is extended

To extend the time for which an airworthiness review certificate is in force, an individual must:

- (a) sign the certificate; and
- (b) record on the certificate the date of the extension and the new date of expiry of the certificate.

Division 42.I.4—Airworthiness review procedure

42.900 Airworthiness review procedure

- (1) This regulation sets out the procedure for carrying out an airworthiness review for an aircraft.
- (2) An airworthiness review employee of the continuing airworthiness management organisation for the aircraft must examine the continuing airworthiness records for the aircraft to determine whether the following requirements are met:
 - (a) the details of the utilisation of the airframe, engine and propeller of the aircraft have been recorded in accordance with regulation 42.190;
 - (b) maintenance required by the maintenance program for the aircraft has been carried out in accordance with the maintenance program;
 - (c) critical control system maintenance recorded in the records has been dealt with in accordance with Division 42.D.5;
 - (d) defects in the aircraft have been rectified in accordance with regulation 42.115;
 - (e) if the rectification of defects in the aircraft have been deferred—the deferral was in accordance with Subdivision 42.D.6.1;
 - (f) the requirements mentioned in paragraph 39.002(1)(b), (c) or (d) have been complied with for each airworthiness directive:
 - (i) that applies to the aircraft or an aeronautical product fitted to the aircraft; and
 - (ii) from the operation of which the aircraft or aeronautical product is not excluded under subregulation 39.002(2) or paragraph 39.004(2)(b) or (3)(b);
 - (g) if a modification has been made to the aircraft—there is a Part 21 approval for the design of the modification;
 - (h) for each aeronautical product that is fitted to the aircraft and has a life limit, the records:
 - (i) correctly identify the aeronautical product; and
 - (ii) show that the aeronautical product has not exceeded its life limit at the time the airworthiness review is carried out;
 - (j) the following information for the aircraft is recorded in the records and is up to date:
 - (i) the empty weight of the aircraft;
 - (ii) the position of the centre of gravity on the aircraft when the aircraft is in its empty weight configuration;
 - (k) the aircraft complies with its approved design.

Note: For paragraph (j), the empty weight of the aircraft, and the position of the centre of gravity on the aircraft when the aircraft is in its empty weight configuration, must be determined in accordance with the method set out in Civil Aviation Order 100.7—see regulation 42.185.

Part 42 Continuing airworthiness requirements for aircraft and aeronautical products

Subpart 42.I Airworthiness reviews and airworthiness review certificates

Division 42.I.4 Airworthiness review procedure

Regulation 42.900

- (3) The airworthiness review employee must carry out a survey of the aircraft to determine whether the following requirements are met:
- (a) markings that are required, by or under these Regulations or by the aircraft's type certification basis, to be on the aircraft:
 - (i) are correct; and
 - (ii) are in the correct position on the aircraft;
 - (b) placards that are required, by or under these Regulations or by the aircraft's type certification basis, to be fitted to the aircraft are correctly fitted;
 - (c) the configuration of the aircraft complies with the aircraft's approved design;
 - (d) any defect in the aircraft that is apparent to the employee is recorded in the continuing airworthiness records system for the aircraft;
 - (e) the aircraft's flight manual is up to date and reflects the aircraft's configuration;
 - (f) the condition of the aircraft is consistent with the continuing airworthiness records for the aircraft.

Note 1: For paragraph (a), see Parts 45 and 90 and the Part 90 Manual of Standards.

Note 2: For paragraph (b), see Part 90 and the Part 90 Manual of Standards.

Note 3: For paragraph (e), for the definition of *flight manual*, see Part 1 of the Dictionary.

Division 42.I.5—Administration

42.905 Record of findings of airworthiness review

- (1) If an airworthiness review employee of a continuing airworthiness management organisation has carried out an airworthiness review for an aircraft, the organisation must comply with subregulation (2) before the organisation issues an airworthiness review certificate for the aircraft.

Penalty: 50 penalty units.

- (2) The organisation must ensure that the findings of the review, including whether the requirements of subregulations 42.900(2) and (3) are met for the aircraft, are recorded in writing.
- (3) An offence against subregulation (1) is an offence of strict liability.

42.910 Record of corrective action taken

- (1) If a continuing airworthiness management organisation takes corrective action to ensure that the requirements of subregulations 42.900(2) and (3) are met for an aircraft, the organisation must ensure that the action taken is recorded in writing before the organisation issues an airworthiness review certificate for the aircraft.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

42.915 Retaining records relating to airworthiness review certificates

- (1) If a continuing airworthiness management organisation issues an airworthiness review certificate for an aircraft, the organisation must retain:
 - (a) the record mentioned in subregulation 42.905(2) for the aircraft; and
 - (b) the record mentioned in subregulation 42.910(1) for the aircraft (if any);
and
 - (c) a copy of the certificate;for 3 years beginning on the date of issue of the certificate.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

42.920 Documents to be sent to CASA and registered operator

- (1) If a continuing airworthiness management organisation for an aircraft issues an airworthiness review certificate for the aircraft, the organisation must give a copy of the certificate to the following persons within 10 days after issuing the certificate:
 - (a) CASA;

Regulation 42.925

- (b) if the organisation is not the registered operator of the aircraft—the registered operator.

Penalty: 50 penalty units.

- (2) If the organisation extends the time for which the certificate is in force, the organisation must give a copy of the certificate, with the extension recorded on it, to the following persons within 10 days after extending the time for which the certificate is in force:

- (a) CASA;
- (b) if the organisation is not the registered operator of the aircraft—the registered operator.

Penalty: 50 penalty units.

- (3) An offence against subregulation (1) or (2) is an offence of strict liability.

42.925 Notice of decision not to issue airworthiness review certificate

- (1) If:

- (a) an airworthiness review employee of the continuing airworthiness management organisation for an aircraft carries out an airworthiness review for an aircraft; and
- (b) the organisation decides not to issue an airworthiness review certificate for the aircraft because a requirement mentioned in paragraph 42.845(d) or (f) is not met;

the organisation must, within 2 days after making the decision, notify the persons mentioned in subregulation (2) of the decision and the reasons for the decision.

Penalty: 50 penalty units.

- (2) The organisation must notify:

- (a) CASA; and
- (b) if the organisation is not the registered operator of the aircraft—the registered operator.

- (3) An offence against subregulation (1) is an offence of strict liability.

Division 42.I.6—Relationship of airworthiness review certificate to certificate of airworthiness

42.930 Relationship with certificate of airworthiness

- (1) If the certificate of airworthiness for an aircraft expires or is cancelled, the airworthiness review certificate for the aircraft ceases to be in force at the same time as the certificate of airworthiness expires or is cancelled.
- (1A) If the certificate of airworthiness for an aircraft is taken to not be in force under subregulation 21.181(4) for a period, the airworthiness review certificate for the aircraft is taken to not be in force for the same period.
- (1B) For the purposes of subregulation (1A), the period during which the airworthiness review certificate is taken to not be in force counts as part of the period for which the certificate was issued.
- (2) If the certificate of airworthiness for an aircraft is suspended under regulation 21.181, the airworthiness review certificate for the aircraft is suspended for the same period as the certificate of airworthiness is suspended.

Part 42 Continuing airworthiness requirements for aircraft and aeronautical products

Subpart 42.J Approval of maintenance programs and variations of approved maintenance programs

Division 42.J.1 Preliminary

Regulation 42.935

Subpart 42.J—Approval of maintenance programs and variations of approved maintenance programs

Division 42.J.1—Preliminary

42.935 Purpose of Subpart

This Subpart sets out the process and requirements for:

- (a) approval of maintenance programs; and
- (b) approval of variations of approved maintenance programs.

Division 42.J.2—Approval of maintenance programs by continuing airworthiness management organisations

42.940 Circumstances in which continuing airworthiness management organisations may approve proposed maintenance program

- (1) The continuing airworthiness management organisation for an aircraft may approve a proposed maintenance program for an aircraft if:
 - (a) the aircraft is not authorised to operate under an Australian air transport AOC; and
 - (b) the organisation's approval under Subpart 42.G permits it to approve proposed maintenance programs under this Division for that type and model of aircraft.
- (2) If a continuing airworthiness management organisation approves a proposed maintenance program for an aircraft, the organisation must ensure that the program is approved on behalf of the organisation by an individual:
 - (a) who is a maintenance program approval employee of the organisation; and
 - (b) whose authorisation as a maintenance program approval employee permits the employee to approve a maintenance program for the aircraft.

Penalty: 50 penalty units.

- (3) An offence against subregulation (2) is an offence of strict liability.

Note 1: The continuing airworthiness management organisation for an aircraft may apply to CASA for approval of a proposed maintenance program for the aircraft—see subregulation 42.970(1).

Note 2: In some circumstances, the continuing airworthiness management organisation for an aircraft must apply to CASA for approval of a proposed maintenance program for the aircraft—see subregulation 42.970(2).

42.945 Requirements for approval of maintenance programs

The following are the requirements for the approval of a proposed maintenance program for an aircraft by the continuing airworthiness management organisation for the aircraft:

- (a) the program complies with the requirements in the instructions for continuing airworthiness for the aircraft, and for aeronautical products fitted to the aircraft, that relate to maintenance that is required by the instructions to be carried out on a regular basis;
- (b) the program complies with the requirements specified in the Part 42 Manual of Standards.

Regulation 42.950

42.950 Requirements to be met by continuing airworthiness management organisations before approving proposed maintenance programs

Obligation

- (1) A continuing airworthiness management organisation must ensure that an individual does not approve a proposed maintenance program for an aircraft on its behalf unless the requirements mentioned in regulation 42.945 are met.

Offence for breach of obligation

- (2) A continuing airworthiness management organisation commits an offence if:
 - (a) an individual approves a proposed maintenance program for an aircraft on its behalf; and
 - (b) a requirement mentioned in regulation 42.945 is not met in relation to the approval.

Penalty: 50 penalty units.

- (3) An offence against subregulation (2) is an offence of strict liability.

42.955 Requirements to be met by individuals before approving proposed maintenance programs

Obligation

- (1) An individual must not approve a proposed maintenance program for an aircraft unless the requirements mentioned in regulation 42.945 are met.

Offence for breach of obligation

- (2) An individual commits an offence if:
 - (a) he or she approves a proposed maintenance program for an aircraft; and
 - (b) a requirement mentioned in regulation 42.945 is not met in relation to the approval.

Penalty: 50 penalty units.

- (3) An offence against subregulation (2) is an offence of strict liability.

42.960 How approval is given

To approve a proposed maintenance program for an aircraft, an individual must:

- (a) make a record that:
 - (i) identifies the maintenance program to which it relates; and
 - (ii) includes a statement to the effect that the maintenance program is approved; and
 - (iii) includes the name and approval certificate reference number of the continuing airworthiness management organisation for the aircraft; and

(b) sign and date the record.

42.965 Record-keeping requirements

- (1) If a continuing airworthiness management organisation approves a proposed maintenance program, the organisation must retain, for the period during which the approved maintenance program is in effect, a copy of the following documents:
- (a) the approved maintenance program;
 - (b) the record of the approval;
 - (c) any other documents that support the approval.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Division 42.J.3—Approval of maintenance programs by CASA

42.970 Application to CASA for approval of maintenance programs

- (1) The person responsible for continuing airworthiness for an aircraft may apply to CASA for approval of a proposed maintenance program for the aircraft.
- (2) The person responsible for continuing airworthiness for an aircraft must apply to CASA for approval of a proposed maintenance program for the aircraft if:
 - (a) the proposed maintenance program does not comply with the requirements in the instructions for continuing airworthiness for the aircraft, or for an aeronautical product fitted to the aircraft, that relate to maintenance that is required by the instructions to be carried out on a regular basis; or
 - (b) the person responsible for continuing airworthiness for the aircraft is a continuing airworthiness management organisation, but its approval under Subpart 42.G does not permit it to approve proposed maintenance programs under Division 42.J.2 for that type and model of aircraft; or
 - (c) the aircraft is authorised to operate under an Australian air transport AOC.

42.975 Form of application

An application to CASA for approval of a proposed maintenance program must:

- (a) be in writing; and
- (b) include a copy of the program; and
- (c) if the program does not comply with the requirements in the instructions for continuing airworthiness for the aircraft, or for an aeronautical product fitted to the aircraft, that relate to maintenance that is required by the instructions to be carried out on a regular basis—include the technical justification for the non-compliance.

42.980 Approval of maintenance programs by CASA

Subject to regulation 11.055, CASA must approve a proposed maintenance program for an aircraft if CASA is satisfied that the program:

- (a) complies with the requirements specified in the Part 42 Manual of Standards; and
- (b) adequately provides for the continuing airworthiness of the aircraft.

Note 1: See Part 11 for other matters relating to applications and decisions.

Note 2: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to issue, or cancelling, suspending or varying, an approval; or
- (b) a decision imposing a condition on an approval.

Division 42.J.4—Approval of variations of approved maintenance programs by continuing airworthiness management organisations

42.985 Circumstances in which continuing airworthiness management organisations may approve proposed variations

- (1) The continuing airworthiness management organisation for an aircraft may approve a proposed variation of the approved maintenance program for the aircraft if the organisation's approval under Subpart 42.G permits it to approve proposed variations of maintenance programs under this Division for that type and model of aircraft.
- (2) If a continuing airworthiness management organisation approves a proposed variation of an approved maintenance program for an aircraft, the organisation must ensure that the program is approved on behalf of the organisation by an individual:
 - (a) who is a maintenance program approval employee of the organisation; and
 - (b) whose authorisation as a maintenance program approval employee permits the employee to approve a maintenance program for the aircraft.

Penalty: 50 penalty units.

- (3) An offence against subregulation (2) is an offence of strict liability.

Note 1: The continuing airworthiness management organisation for an aircraft may apply to CASA for approval of a proposed variation of the approved maintenance program for the aircraft—see subregulation 42.1015(1).

Note 2: In some circumstances, a continuing airworthiness management organisation for an aircraft must apply to CASA for approval of a proposed variation of the approved maintenance program for the aircraft—see subregulation 42.1015(2).

42.990 Requirements to be met for approval of variations of maintenance programs

The following are the requirements for the approval of a variation of a proposed maintenance program for an aircraft by the continuing airworthiness management organisation for the aircraft:

- (a) the program, as varied by the proposed variation, would comply with the requirements in the instructions for continuing airworthiness for the aircraft, and for aeronautical products fitted to the aircraft, that relate to maintenance that is required by the instructions to be carried out on a regular basis;
- (b) the approved maintenance program for the aircraft, as varied by the proposed variation, would comply with the requirements specified in the Part 42 Manual of Standards.

Regulation 42.995

42.995 Requirements to be met by continuing airworthiness management organisations before approving proposed variations

Obligation

- (1) A continuing airworthiness management organisation must ensure that an individual does not approve a proposed variation to an approved maintenance program for an aircraft on its behalf unless the requirements mentioned in regulation 42.990 are met.

Offence for breach of obligation

- (2) A continuing airworthiness management organisation commits an offence if:
 - (a) an individual approves a proposed variation to an approved maintenance program for an aircraft on its behalf; and
 - (b) a requirement mentioned in regulation 42.990 is not met in relation to the approval.

Penalty: 50 penalty units.

- (3) An offence against subregulation (2) is an offence of strict liability.

42.1000 Requirements to be met by individuals before approving proposed variations

Obligation

- (1) An individual must not approve a proposed variation to an approved maintenance program for an aircraft unless the requirements mentioned in regulation 42.990 are met.

Offence for breach of obligation

- (2) An individual commits an offence if:
 - (a) he or she approves a proposed variation of an approved maintenance program for an aircraft; and
 - (b) a requirement mentioned in regulation 42.990 is not met in relation to the approval.

Penalty: 50 penalty units.

- (3) An offence against subregulation (2) is an offence of strict liability.

42.1005 How approval is given

To approve a proposed variation of an approved maintenance program for an aircraft, an individual must:

- (a) make a record that:
 - (i) identifies the maintenance program to which it relates; and
 - (ii) includes details of the variation to which it relates; and

- (iii) includes a statement to the effect that the variation is approved; and
 - (iv) includes the name and approval certificate reference number of the continuing airworthiness management organisation for the aircraft; and
- (b) sign and date the record.

42.1010 Record-keeping requirements

- (1) If a continuing airworthiness management organisation approves a proposed variation to an approved maintenance program, the organisation must retain, for the period during which the approved maintenance program is in effect, a copy of the following documents:
- (a) the approved variation;
 - (b) the record of the approval;
 - (c) any other documents that support the approval.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Division 42.J.5—Approval of variations of approved maintenance programs by CASA

42.1015 Application to CASA for approval of variations of approved maintenance programs

- (1) The person responsible for continuing airworthiness for an aircraft may apply to CASA for approval of a proposed variation of the approved maintenance program for the aircraft.
- (2) The person responsible for continuing airworthiness for an aircraft must apply to CASA for approval of a proposed variation of the approved maintenance program for the aircraft if:
 - (a) the program, as varied by the proposed variation, would not comply with the requirements in the instructions for continuing airworthiness for the aircraft, or for an aeronautical product fitted to the aircraft, that relate to maintenance that is required by the instructions to be carried out on a regular basis; or
 - (b) the person responsible for continuing airworthiness for the aircraft is a continuing airworthiness management organisation, but its approval under Subpart 42.G does not permit it to approve variations of maintenance programs under Division 42.J.4.

42.1020 Form of application

An application to CASA for approval of a proposed variation of an approved maintenance program for an aircraft must:

- (a) be in writing; and
- (b) include the following:
 - (i) a copy of the variation;
 - (ii) the technical justification for the variation.

42.1025 Approval of variations by CASA

Subject to regulation 11.055, CASA must approve a proposed variation of an approved maintenance program for an aircraft if CASA is satisfied that the program, as varied by the proposed variation:

- (a) would comply with the requirements specified in the Part 42 Manual of Standards; and
- (b) would adequately provide for the continuing airworthiness of the aircraft.

Note 1: See Part 11 for other matters relating to applications and decisions.

Note 2: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to issue, or cancelling, suspending or varying, an approval; or
- (b) a decision imposing a condition on an approval.

Subpart 42.K—Directions to vary approved maintenance programs

42.1030 Purpose of Subpart

This Subpart:

- (a) empowers CASA to give directions to vary approved maintenance programs and approved reliability programs; and
- (b) requires the person responsible for continuing airworthiness for an aircraft to comply with a direction.

42.1035 CASA may direct variations of approved maintenance programs

- (1) CASA may direct the person responsible for continuing airworthiness for an aircraft to vary the approved maintenance program for the aircraft:
 - (a) to include a particular requirement for maintenance in the program; or
 - (b) to vary a requirement for maintenance in the program.
- (2) CASA may give the direction only if CASA is satisfied that it is necessary to do so to ensure that the program will adequately provide for the continuing airworthiness of the aircraft.
- (3) A direction under this regulation must:
 - (a) be in writing; and
 - (b) specify the time within which the direction must be complied with.
- (4) The person must comply with the direction within the time specified in the direction.

Penalty: 50 penalty units.

- (5) An offence against subregulation (4) is an offence of strict liability.

Part 42 Continuing airworthiness requirements for aircraft and aeronautical products

Subpart 42.L Approval of reliability programs and variations of approved reliability programs

Division 42.L.1 Preliminary

Regulation 42.1040

Subpart 42.L—Approval of reliability programs and variations of approved reliability programs

Division 42.L.1—Preliminary

42.1040 Purpose of Subpart

This Subpart sets out the requirements for:

- (a) approval of reliability programs for aircraft to which regulation 42.155 applies; and
- (b) approval of variations of approved reliability programs.

Division 42.L.2—Approval of reliability programs

42.1045 Application for approval of reliability programs

- (1) The person responsible for continuing airworthiness for an aircraft to which regulation 42.155 applies may apply, in writing, to CASA for approval of a proposed reliability program for the aircraft.
- (2) The application must include a copy of the program.

42.1050 Approval of reliability programs

Subject to regulation 11.055, CASA must approve the program if CASA is satisfied that the program complies with the requirements specified in the Part 42 Manual of Standards.

Note 1: See Part 11 for other matters relating to applications and decisions.

Note 2: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to issue, or cancelling, suspending or varying, an approval; or
- (b) a decision imposing a condition on an approval.

Division 42.L.3—Approval of variations of approved reliability programs

42.1055 Application for approval of variations of approved reliability programs

- (1) The person responsible for continuing airworthiness for an aircraft for which there is an approved reliability program may apply, in writing, to CASA for approval of a proposed variation of the program.
- (2) The application must include a copy of the variation.

42.1060 Approval of variations of approved reliability programs

Subject to regulation 11.055, CASA must approve the variation if CASA is satisfied that the program, as varied by the proposed variation, would comply with the requirements specified in the Part 42 Manual of Standards.

Note 1: See Part 11 for other matters relating to applications and decisions.

Note 2: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to issue, or cancelling, suspending or varying, an approval; or
- (b) a decision imposing a condition on an approval.

Subpart 42.M—Requirements for pilots

42.1065 Purpose of Subpart

This Subpart sets out requirements for pilots.

42.1070 Pre-flight inspection—all aircraft

- (1) If an aircraft's flight manual requires a pre-flight inspection of the aircraft to be carried out before the aircraft is operated for a flight, the pilot in command of the aircraft must ensure that a pre-flight inspection of the aircraft is carried out before the aircraft is operated for the flight.

Penalty: 50 penalty units.

Note: For the definition of *flight manual*, see Part 1 of the Dictionary.

- (2) An offence against subregulation (1) is an offence of strict liability.

42.1075 Recording information in flight technical log—all aircraft

Defects and exceeding operating limits

- (1) The pilot in command of an aircraft for a flight (the *first flight*) must ensure that, before the aircraft is next operated for flight, the following information is recorded in the flight technical log for the aircraft:
 - (a) details of any defect of which the pilot becomes aware during the operation of the aircraft, including:
 - (i) any abnormal instrument indication; and
 - (ii) any abnormal behaviour by the aircraft;
 - (b) any instance of the exceeding of an operating limit specified in the aircraft's flight manual during the first flight.

Penalty: 50 penalty units.

Note: For paragraph (b), for the definition of *flight manual*, see Part 1 of the Dictionary.

Utilisation information mentioned in regulation 42.190

- (2) If the flight technical log for an aircraft is capable of containing the information mentioned in regulation 42.190 for each flight for the aircraft, the pilot in command of the aircraft for a flight must record that information for the flight in the log before the aircraft is next operated for flight.

Penalty: 50 penalty units.

- (3) Strict liability applies to paragraph (1)(b).
- (4) An offence against subregulation (2) is an offence of strict liability.

Regulation 42.1080

Subpart 42.N—Record-keeping requirements

42.1080 Purpose of Subpart

This Subpart sets out requirements for records made under this Part.

42.1085 Requirements for making records made under Part

- (1) If a person is required to record information under this Part, or to ensure that information is recorded, the person must ensure that the record:
 - (a) is written in a legible form in English; and
 - (b) will remain legible for the time for which the record is required, by this Part, to be kept.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

42.1090 Requirements for keeping records made under Part

- (1) If a person is required to record information under this Part, or to ensure that information is recorded, the person must ensure that the record is kept:
 - (a) in a system that allows the record to be retrieved; and
 - (b) in a manner that protects the record from being lost, damaged or accidentally altered.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

42.1095 Change to records made under Part

- (1) If a person makes a change to a record made under this Part, the person must make the change in a manner:
 - (a) that retains the original record; and
 - (b) that identifies himself or herself; and
 - (c) that includes the date the change is made.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Subpart 42.O—Copying or disclosing cockpit voice recording information

42.1100 Purpose of Subpart

This Subpart sets out the authorisation of persons for paragraph 32AP(3A)(a) of the Act.

42.1105 Authorisation of persons for paragraph 32AP(3A)(a) of Act

For paragraph 32AP(3A)(a) of the Act, the following persons are authorised:

- (a) a person who:
 - (i) is a staff member within the meaning of the *Transport Safety Investigation Act 2003*; and
 - (ii) has had training with respect to the replay and analysis of cockpit voice recordings; and
 - (iii) has been briefed on the requirements of Part IIIB of the Act;
- (b) a person who:
 - (i) is to check on behalf of an approved maintenance organisation whether equipment used to make a cockpit voice recording is functioning and reliable; and
 - (ii) has had training from the organisation with respect to the replay and analysis of cockpit voice recordings; and
 - (iii) has been briefed by the organisation on the requirements of Part IIIB of the Act.

Civil Aviation Safety Regulations 1998

Statutory Rules No. 237, 1998

made under the

Civil Aviation Act 1988

Compilation No. 99

Compilation date: 11 April 2024

Includes amendments: F2024L00297

Registered: 18 April 2024

This compilation is in 5 volumes

Volume 1: regulations 1.001–42.1105
Volume 2: regulations 45.005–92.205
Volume 3: regulations 99.005–135.465
Volume 4: regulations 137.005–175.500
Volume 5: regulations 200.005–202.900
Dictionary and Endnotes

Each volume has its own contents

Prepared by the Office of Parliamentary Counsel, Canberra

About this compilation

This compilation

This is a compilation of the *Civil Aviation Safety Regulations 1998* that shows the text of the law as amended and in force on 11 April 2024 (the *compilation date*).

The notes at the end of this compilation (the *endnotes*) include information about amending laws and the amendment history of provisions of the compiled law.

Uncommenced amendments

The effect of uncommenced amendments is not shown in the text of the compiled law. Any uncommenced amendments affecting the law are accessible on the Register (www.legislation.gov.au). The details of amendments made up to, but not commenced at, the compilation date are underlined in the endnotes. For more information on any uncommenced amendments, see the Register for the compiled law.

Application, saving and transitional provisions for provisions and amendments

If the operation of a provision or amendment of the compiled law is affected by an application, saving or transitional provision that is not included in this compilation, details are included in the endnotes.

Editorial changes

For more information about any editorial changes made in this compilation, see the endnotes.

Modifications

If the compiled law is modified by another law, the compiled law operates as modified but the modification does not amend the text of the law. Accordingly, this compilation does not show the text of the compiled law as modified. For more information on any modifications, see the Register for the compiled law.

Self-repealing provisions

If a provision of the compiled law has been repealed in accordance with a provision of the law, details are included in the endnotes.

Contents

Part 45—Display of nationality marks, registration marks and aircraft registration identification plates	1
Subpart 45.A—Preliminary	2
45.005	Application of Part 452
45.010	Key definitions for Part 452
45.015	Meaning of <i>markings</i> and <i>set of markings</i>2
45.020	References to aircraft operating for an exhibition.....2
45.025	Issue of Manual of Standards for Part 453
45.030	Registration holder to provide copies of approvals under this Part to registered operator3
Subpart 45.B—Aircraft markings	4
45.050	Requirements for aircraft markings.....4
45.055	Display of aircraft markings.....4
45.060	Designs etc. not to modify, obscure or create confusion about sets of markings5
45.065	Approval to operate with different markings—aircraft of special configuration6
45.070	Approval to operate with different or no markings—aircraft operated for an exhibition6
Subpart 45.C—Requirement to display words on certain aircraft	8
45.090	Requirements for display of words8
45.095	Display of words8
45.100	Approval to operate with different or no words—aircraft operated for an exhibition9
Subpart 45.D—Aircraft registration identification plate	11
45.120	Application of Subpart 45.D11
45.125	Plate to be attached to aircraft11
45.130	Removal or alteration of plates12
45.135	Approval of method of displaying markings.....12
45.140	Approval for attachment of plate—aircraft of special configuration12
Part 47—Registration of aircraft and related matters	14
Subpart 47.A—General	16
47.005	Applicability of Part 4716
47.010	Definitions for Part 4716
47.012	Issue of Manual of Standards for Part 4716
47.015	Requirement for aircraft to be registered17
47.020	Appointment of person to act on behalf of owners18
Subpart 47.B—The Australian Civil Aircraft Register	19
47.025	Australian Civil Aircraft Register19
47.030	Access to Australian Civil Aircraft Register.....19
47.035	Correction of Register19
47.040	Seeking information about Register19

47.045	Communicating with CASA	20
47.050	Accuracy of information in Register	20
47.055	Entries in Register etc not conclusive evidence of title to aircraft	20
Subpart 47.C—Registration of aircraft		21
Division 47.C.1—Registration of aircraft other than certain RPA		21
47.058	Application of this Division	21
47.060	Applying for registration of unregistered aircraft	21
47.065	Information required for registration—general	21
47.070	Confirmation of oral application	22
47.075	CASA may ask for further information.....	23
47.080	Registration of aircraft.....	23
47.085	Interim certificate of registration.....	24
47.090	Issue of certificate of registration	24
47.095	Period of registration	25
Division 47.C.2—Registration of medium RPA, small RPA, very small RPA and micro RPA		26
47.096	Application of this Division	26
47.096A	Registration requirements for certain RPA	26
47.097	Application for registration of certain RPA	26
47.098	Registration of certain RPA	27
47.099	Period of registration	27
47.099B	Requirement to produce certificate of registration (or copy)	28
Subpart 47.D—Registered operator		29
47.100A	Application of Subpart 47.D	29
47.100	Identity of registered operator of aircraft	29
Subpart 47.E—Transfer of ownership of aircraft		31
47.105A	Application of Subpart 47.E.....	31
47.105	Meaning of <i>former owner</i> and <i>new owner</i>	31
47.110	Transfer of ownership	31
Subpart 47.F—Administration of Australian Civil Aircraft Register		33
47.115	Notice of error in information in Register.....	33
47.130	Lapsing of registration.....	33
47.131	Suspension and cancellation of registration following a transfer of ownership	33
47.131A	Suspension and cancellation of registration if registered operator is not an eligible person.....	34
47.131B	Cancellation of registration at holder’s request— limitations	34
47.131C	Cancellation of registration—certain RPA.....	34
47.132	Cancellation of registration on other grounds	35
Subpart 47.G—Reservation, assignment and change of registration marks		36
47.139	Application of Subpart 47.G	36
47.140	Meaning of <i>aircraft</i> for Subpart 47.G	36

47.145	Reservation of registration mark	36
47.150	Assignment of registration mark	36
47.155	Marks that must not be reserved or assigned	36
47.160	Assigning reserved registration mark to unregistered aircraft.....	37
47.165	Change of registration mark	37
Subpart 47.H—Dealer’s marks		39
47.169	Application of Subpart 47.H	39
47.170	Definitions for Subpart 47.H	39
47.175	Assignment of dealer’s marks	39
47.180	What marks may be assigned to dealers.....	39
47.185	Record of dealer’s marks.....	40
47.190	How long assignment to dealer remains in effect	40
47.195	Certificate of assignment of dealer’s mark.....	40
47.205	Dealer’s plate.....	40
47.210	Use of dealer’s marks	41
47.215	Aircraft taken to be registered.....	41
47.220	Annual report to CASA on aircraft using dealer’s marks	41
47.225	Revocation of assignment of dealer’s mark etc.....	42
Part 60—Synthetic training devices		43
Subpart 60.A—Preliminary		44
60.005	Applicability.....	44
60.010	Definitions for Part 60.....	44
Subpart 60.B—Flight simulators and flight training devices		45
60.015	Definitions for Subpart 60.B	45
60.020	Qualification levels.....	45
Table 60.020-1	Flight simulator qualification levels.....	45
Table 60.020-2	Flight training device qualification levels.....	45
60.025	Application for flight simulator qualification or flight training device qualification	46
60.030	Initial evaluation and qualification.....	46
60.035	Issue of flight simulator qualification certificate or flight training device qualification certificate	47
60.040	Period of validity of flight simulator qualification or flight training device qualification	47
60.045	Recurrent evaluation of qualified flight simulator or qualified flight training device.....	47
60.050	Variation, cancellation or suspension of flight simulator qualification or flight training device qualification.....	48
60.055	Flight simulator and flight training device approvals—persons other than Part 141 operators and Part 142 operators.....	48
60.060	Quality system—operators other than Part 141 operators and Part 142 operators.....	49
60.065	Ongoing fidelity requirements.....	49
60.070	Modification of qualified flight simulator or qualified flight training devices.....	50

60.075	Change in qualification level of qualified flight simulator or qualified flight training device.....	51
60.080	Deactivation, relocation or reactivation of qualified flight simulator or qualified flight training device	51
60.085	Change of operator of qualified flight simulator or qualified flight training device	51
60.090	Evaluation teams	52
60.095	Records.....	52
Subpart 60.C—Basic instrument flight trainers		53
Part 61—Flight crew licensing		54
Subpart 61.A—Preliminary		65
Division 61.A.1—General		65
61.005	What Part 61 is about	65
61.007	Application of Part 61	66
61.010	Definitions for Part 61	66
61.015	Definition of <i>category</i> of aircraft for Part 61	78
61.020	Definition of <i>class</i> of aircraft for Part 61	78
61.025	Definition of <i>aeroplane</i> for Part 61	78
61.035	Issue of Manual of Standards for Part 61	78
61.040	Approvals by CASA for Part 61.....	79
61.045	Prescription of qualification standards for flight simulation training devices.....	79
61.047	Prescription of recognised foreign States.....	79
61.050	Prescription of multi-engine aeroplanes included in single-engine aeroplane class	80
61.055	Prescription of type ratings and variants—multi-crew aircraft.....	80
61.060	Prescription of type ratings—single-pilot aircraft.....	80
61.061	Prescription of type-rated aircraft—flight review requirements for class ratings.....	81
61.062	Prescription of types of aircraft for additional limitations on class ratings	81
61.063	Prescription of types of single engine helicopters for flight reviews	81
61.065	Conduct of unauthorised activities—holders of flight crew licences.....	81
Division 61.A.2—Flight time and other aeronautical experience		82
61.070	Flight to which Division 61.A.2 applies.....	82
61.075	Definition of <i>aeronautical experience</i> for Part 61	82
61.080	Definition of <i>flight time</i> as pilot for Part 61	82
61.085	Definition of <i>flight time</i> as co-pilot for Part 61	82
61.090	Definition of <i>flight time</i> as pilot in command for Part 61.....	83
61.095	Definition of <i>flight time</i> as pilot in command under supervision for Part 61	83
61.100	Definition of <i>flight time</i> as flight engineer for Part 61.....	83
61.105	Definition of <i>instrument flight time</i> for Part 61.....	83
61.110	Definition of <i>instrument ground time</i> for Part 61.....	84

Division 61.A.3—Performing flight crew duties without licence, rating or endorsement	85
Subdivision 61.A.3.1—Student pilots	85
61.112 Flying as a student pilot.....	85
61.113 General requirements for student pilots	86
61.114 Solo flights—medical requirements for student pilots	86
61.115 Solo flights—recent experience requirements for student pilots.....	87
61.116 Student pilots authorised to taxi aircraft.....	88
61.117 Identity checks—student pilots	88
61.118 Production of medical certificates etc. and identification—student pilots	88
Subdivision 61.A.3.2—Other circumstances in which flight crew duties may be performed without licence, rating or endorsement	89
61.119 Flying without licence—flight engineer duties	89
61.120 Operation of aircraft radio without licence	89
61.125 Conducting flight activities without rating or endorsement.....	89
61.126 Conducting flight activities without having met proficiency check or flight review.....	90
61.130 Operation of helicopter using auto flight control system without licence or rating.....	90
61.135 Authorisation to conduct flight training or flight test without holding type rating.....	90
61.140 Authorisation to test aircraft without holding type rating.....	91
61.145 Piloting glider without holding glider pilot licence.....	91
Subpart 61.B—Grant of flight crew licences, ratings and endorsements	93
Division 61.B.1—General	93
61.150 People who may grant flight crew licences, ratings and endorsements	93
61.155 Applications for flight crew licences, ratings and endorsements	94
61.160 Grant of flight crew licences	94
61.165 Grant of flight crew ratings	95
61.170 Grant of flight crew endorsements	95
61.175 How CASA issues flight crew licences, ratings and endorsements	95
61.180 How examiner, instructor or approval holder issues rating or endorsement	96
61.185 New licence document if licence, rating or endorsement cancelled	96
61.190 Licence holder to comply with limitations and requirements of Part 61	97
Division 61.B.2—Flight training and other training	98
61.195 Flight training requirements	98
61.200 Differences training requirements	99

61.205	When training must not be conducted in aircraft	99
61.210	Other approved courses of training or professional development	100
Division 61.B.3—Aeronautical knowledge examinations		101
61.215	Aeronautical knowledge examinations—general.....	101
61.220	Aeronautical knowledge examinations—air transport pilot licence	101
61.225	Aeronautical knowledge examinations—pass standards.....	101
61.230	Aeronautical knowledge examinations—knowledge deficiency reports.....	102
Division 61.B.4—Flight tests		103
61.235	Flight tests for flight crew licences and ratings—prerequisites.....	103
61.240	Consequences of taking flight test when ineligible.....	104
61.245	Conduct of flight tests for flight crew licences, ratings and endorsements	104
61.250	Pass standards for flight tests	105
Division 61.B.5—English language proficiency		106
61.255	Aviation English language proficiency assessments.....	106
61.260	Duration of English language proficiency assessments.....	106
61.265	Recreational pilot licences—general English language proficiency	106
61.270	Approval of language proficiency assessors	107
Division 61.B.6—Recognition of overseas flight crew authorisations		108
61.275	Overseas flight crew authorisations—recognition	108
61.280	Grant of flight crew licences, ratings or endorsements under bilateral agreements.....	109
Division 61.B.7—Recognition of Australian Defence Force qualifications		110
61.285	Australian Defence Force qualifications—recognition.....	110
Subpart 61.C—Certificates of validation		111
61.290	Grant of certificates of validation.....	111
61.295	Privileges of certificates of validation.....	111
61.300	Limitations on exercise of privileges of certificates of validation—medical certificate	111
61.305	Limitations on exercise of privileges of certificates of validation—recent experience, flight review and proficiency check	112
61.310	Limitations on exercise of privileges of certificates of validation—carriage of documents	112
61.315	Conduct of unauthorised activities by holders of certificates of validation	112
61.320	Certificates of validation—period of validity	113
61.325	Certificates of validation—renewal.....	113

Subpart 61.D—General obligations of flight crew licence holders	114
61.335 Identity checks.....	114
61.336 Provision of photograph	114
61.340 Production of licence documents, medical certificates and identification	114
61.345 Personal logbooks—pilots.....	115
61.350 Personal logbooks—flight engineers.....	116
61.355 Retention of personal logbooks.....	117
61.360 False entries in personal logbooks.....	118
61.365 Production of personal logbooks.....	118
Subpart 61.E—Pilot licensing—general limitations and authorisations	120
Division 61.E.1—General limitations on exercise of pilot licence privileges	120
61.375 Limitations on exercise of privileges of pilot licences—ratings	120
61.380 Limitations on exercise of privileges of pilot licences—flight activity and design feature endorsements	122
61.385 Limitations on exercise of privileges of pilot licences—general competency requirement.....	122
61.390 Limitations on exercise of privileges of pilot licences—operating requirements and limitations	123
61.395 Limitations on exercise of privileges of pilot licences—recent experience for certain passenger flight activities.....	123
61.400 Limitations on exercise of privileges of pilot licences—flight review.....	124
61.405 Limitations on exercise of privileges of pilot licences—medical requirements—recreational pilot licence holders.....	124
61.410 Limitations on exercise of privileges of pilot licences—medical certificates: private pilot licence holders	125
61.415 Limitations on exercise of privileges of pilot licences—medical certificates: commercial, multi-crew and air transport pilot licence holders.....	126
61.420 Limitations on exercise of privileges of pilot licences—carriage of documents.....	126
61.422 Limitations on exercise of privileges of pilot licences—aviation English language proficiency	127
61.425 Limitations on exercise of privileges of pilot licences—unregistered aircraft.....	127
61.427 Removal of certain pilot licence conditions about airspace	127
Division 61.E.2—General authorisations for pilot licences	129
61.430 Holders of pilot licences authorised to taxi aircraft	129
61.435 When holders of pilot licences authorised to operate aircraft radio	129

Subpart 61.G—Recreational pilot licences	130
Division 61.G.1—Privileges and grant of licences	130
61.460	Privileges of recreational pilot licences.....130
61.465	Limitations on exercise of privileges of recreational pilot licences—general130
61.470	Limitations on exercise of privileges of recreational pilot licences—endorsements131
61.475	Requirements for grant of recreational pilot licences131
61.480	Grant of recreational pilot licences in recognition of pilot certificates granted by certain organisations.....132
Division 61.G.2—Recreational pilot licence endorsements	133
61.485	Kinds of recreational pilot licence endorsements.....133
61.490	Privileges of recreational pilot licence endorsements133
61.495	Requirements for grant of recreational pilot licence endorsements.....133
61.500	Grant of endorsement in recognition of other qualifications134
Subpart 61.H—Private pilot licences	135
Division 61.H.1—General	135
61.505	Privileges of private pilot licences135
61.510	Limitations on exercise of privileges of private pilot licences—multi-crew operations.....135
61.515	Requirements for grant of private pilot licences—general135
Division 61.H.2—Aeronautical experience requirements for private pilot licences—applicants who have completed integrated training courses	137
61.520	Application of Division 61.H.2137
61.525	Aeronautical experience requirements for grant of private pilot licences—airplane category137
61.530	Aeronautical experience requirements for grant of private pilot licences—helicopter category137
61.535	Aeronautical experience requirements for grant of private pilot licences—gyroplane category138
Division 61.H.3—Aeronautical experience requirements for private pilot licences—applicants who have not completed integrated training courses	139
61.540	Application of Division 61.H.3139
61.545	Aeronautical experience requirements for grant of private pilot licences—airplane category139
61.550	Aeronautical experience requirements for grant of private pilot licences—helicopter category139
61.555	Aeronautical experience requirements for grant of private pilot licences—powered-lift aircraft category140
61.560	Aeronautical experience requirements for grant of private pilot licences—gyroplane category140

61.565	Aeronautical experience requirements for grant of private pilot licences—airship category	141
Subpart 61.I—Commercial pilot licences		142
Division 61.I.1—General		142
61.570	Privileges of commercial pilot licences.....	142
61.575	Limitations on exercise of privileges of commercial pilot licences—multi-crew operations.....	142
61.580	Requirements for grant of commercial pilot licences—general	142
Division 61.I.2—Aeronautical experience requirements for commercial pilot licences—applicants who have completed integrated training courses		144
61.585	Application of Division 61.I.2.....	144
61.590	Aeronautical experience requirements for grant of commercial pilot licences—airplane category.....	144
61.595	Aeronautical experience requirements for grant of commercial pilot licences—helicopter category	144
61.600	Aeronautical experience requirements for grant of commercial pilot licences—powered-lift aircraft category	145
Division 61.I.3—Aeronautical experience requirements for commercial pilot licences—applicants who have not completed integrated training courses		146
61.605	Application of Division 61.I.3.....	146
61.610	Aeronautical experience requirements for grant of commercial pilot licences—airplane category.....	146
61.615	Aeronautical experience requirements for grant of commercial pilot licences—helicopter category	146
61.620	Aeronautical experience requirements for grant of commercial pilot licences—powered-lift aircraft category	147
61.625	Aeronautical experience requirements for grant of commercial pilot licences—gyroplane category	148
61.630	Aeronautical experience requirements for grant of commercial pilot licences—airship category	148
Subpart 61.J—Multi-crew pilot licences		150
61.635	Privileges of multi-crew pilot licences.....	150
61.640	Limitations on exercise of privileges of multi-crew pilot licences—IFR flight: general	150
61.645	Limitations on exercise of privileges of multi-crew pilot licences—IFR flight: recent experience.....	151
61.650	Limitations on exercise of privileges of multi-crew pilot licences—instrument proficiency check	152
61.655	Requirements for grant of multi-crew pilot licences	154
61.660	Aeronautical experience requirements for grant of multi-crew pilot licences—airplane category	155
Subpart 61.K—Air transport pilot licences		156
61.665	Privileges of air transport pilot licences	156

61.670	Limitations on exercise of privileges of air transport pilot licences—helicopter IFR flight.....	156
61.675	Limitations on exercise of privileges of air transport pilot licences—single-pilot IFR flight	156
61.680	Limitations on exercise of privileges of air transport pilot licences—IFR flight: general.....	156
61.685	Limitations on exercise of privileges of air transport pilot licences—IFR flight: recent experience.....	158
61.695	Limitations on exercise of privileges of air transport pilot licences—instrument proficiency check.....	159
61.700	Requirements for grant of air transport pilot licences—general	161
61.705	Aeronautical experience requirements for grant of air transport pilot licences—airplane category	162
61.710	Aeronautical experience requirements for grant of air transport pilot licences—helicopter category.....	163
61.715	Aeronautical experience requirements for grant of air transport pilot licences—powered-lift aircraft category	163

Subpart 61.L—Aircraft ratings and endorsements for pilot licences

		165
Division 61.L.1—Preliminary		165
61.720	What Subpart 61.L is about.....	165
Division 61.L.2—Aircraft category ratings		166
61.725	Privileges of aircraft category ratings	166
61.730	Requirements for grant of aircraft category ratings	166
Division 61.L.3—Aircraft class ratings		167
61.735	Privileges of aircraft class ratings	167
61.745	Limitations on exercise of privileges of aircraft class ratings—flight review.....	167
61.747	Limitations on exercise of privileges of class ratings in certain aircraft—flight review	168
61.750	Requirements for grant of aircraft class ratings	169
Division 61.L.4—Design feature endorsements		170
61.755	Design features that require design feature endorsement.....	170
61.760	Privileges of design feature endorsements	171
61.765	Requirements for grant of design feature endorsements	171
Division 61.L.5—Pilot type ratings		172
61.770	Privileges of pilot type ratings.....	172
61.775	Limitations on exercise of privileges of pilot type ratings—flight test in flight simulator	172
61.780	Limitations on exercise of privileges of pilot type ratings—variants	173
61.785	Limitations on exercise of privileges of pilot type ratings—single-pilot operation and multi-crew operation.....	173

61.790	Limitations on exercise of privileges of pilot type ratings—IFR operation.....	173
61.795	Limitations on exercise of privileges of pilot type ratings—recent experience on aircraft models	173
61.800	Limitations on exercise of privileges of pilot type ratings—flight review.....	174
61.805	Limitations on exercise of privileges of pilot type ratings—instrument proficiency check	175
61.810	Requirements for grant of pilot type ratings	178
61.815	Person taken to meet requirements for grant of pilot type rating—multi-crew pilot licence holder	179
61.820	Person taken to meet requirements for grant of pilot type rating—new type rating.....	179
61.822	Removal of type rating condition about acting as pilot in command.....	180
Division 61.L.6—Cruise relief type ratings		181
61.825	Kinds of cruise relief type rating	181
61.830	Privileges of cruise relief type ratings	181
61.835	Limitations on exercise of privileges of cruise relief type ratings—general	181
61.840	Limitations on exercise of privileges of cruise relief type ratings—recent experience.....	182
61.845	Requirements for grant of cruise relief type ratings.....	183
61.850	Person taken to meet requirements for grant of cruise relief type rating—new type rating	184
Subpart 61.M—Instrument ratings		185
Division 61.M.1—Privileges and requirements for grant of instrument ratings		185
61.855	Privileges of instrument ratings.....	185
61.860	Limitations on exercise of privileges of instrument ratings—general	185
61.865	Limitations on exercise of privileges of instrument ratings—endorsements	186
61.870	Limitations on exercise of privileges of instrument ratings—recent experience: general	186
61.875	Limitations on exercise of privileges of instrument ratings—recent experience: single pilot.....	187
61.880	Limitations on exercise of privileges of instrument ratings—instrument proficiency check	187
61.885	Requirements for grant of instrument ratings.....	190
61.887	Removal of instrument rating conditions about acting as pilot in command under IFR	191
Division 61.M.2—Privileges and requirements for grant of instrument endorsements		192
61.890	Kinds of instrument endorsement.....	192
61.895	Privileges of instrument endorsements.....	194
61.900	Limitations on exercise of privileges of instrument endorsements	194
61.905	Requirements for grant of instrument endorsements	195

Subpart 61.N—Private instrument ratings	196
Division 61.N.1—Privileges and requirements for grant of private instrument ratings	196
61.910 Privileges of private instrument ratings.....	196
61.915 Limitations on exercise of privileges of private instrument ratings—endorsements	196
61.920 Limitations on exercise of privileges of private instrument ratings—recent experience	196
61.925 Limitations on exercise of privileges of private instrument ratings—flight review	197
61.930 Requirements for grant of private instrument ratings	198
Division 61.N.2—Privileges and requirements for grant of private instrument endorsements	200
61.935 Kinds of private instrument endorsement	200
61.940 Privileges of private instrument endorsements	203
61.942 Limitations on exercise of privileges of private instrument endorsements—visibility and cloud	204
61.945 Limitations on exercise of privileges of private instrument endorsements	204
61.950 Requirements for grant of private instrument endorsements	204
Subpart 61.O—Night VFR ratings	206
Division 61.O.1—Privileges and requirements for grant of night VFR ratings	206
61.955 Privileges of night VFR ratings.....	206
61.960 Limitations on exercise of privileges of night VFR ratings—endorsements	206
61.965 Limitations on exercise of privileges of night VFR ratings—recent experience	206
61.970 Limitations on exercise of privileges of night VFR ratings—flight review.....	206
61.975 Requirements for grant of night VFR ratings.....	207
Division 61.O.2—Privileges and requirements for grant of night VFR endorsements	209
61.980 Kinds of night VFR endorsement.....	209
61.985 Privileges of night VFR endorsements.....	210
61.990 Requirements for grant of night VFR endorsements	210
Subpart 61.P—Night vision imaging system ratings	212
Division 61.P.1—Privileges and requirements for grant of night vision imaging system ratings	212
61.995 Privileges of night vision imaging system ratings.....	212
61.1000 Limitations on exercise of privileges of night vision imaging system ratings—general	212
61.1005 Limitations on exercise of privileges of night vision imaging system ratings—endorsements	212
61.1010 Limitations on exercise of privileges of night vision imaging system ratings—recent experience	213

61.1015	Limitations on exercise of privileges of night vision imaging system ratings—night vision imaging system proficiency check	213
61.1020	Requirements for grant of night vision imaging system ratings	214
Division 61.P.2—Privileges and requirements for grant of night vision imaging system endorsements		216
61.1025	Kinds of night vision imaging system endorsement	216
61.1030	Privileges of night vision imaging system endorsements	217
61.1035	Requirements for grant of night vision imaging system endorsements	217
Subpart 61.Q—Low-level ratings		219
Division 61.Q.1—Privileges and requirements for grant of low-level ratings		219
61.1040	Privileges of low-level ratings	219
61.1045	Limitations on exercise of privileges of low-level ratings—general	219
61.1050	Limitations on exercise of privileges of low-level ratings—endorsements	219
61.1055	Limitations on exercise of privileges of low-level ratings—recent experience	219
61.1060	Limitations on exercise of privileges of low-level ratings—flight review	219
61.1070	Requirements for grant of low-level ratings	220
Division 61.Q.2—Privileges and requirements for grant of low-level endorsements		221
61.1075	Kinds of low-level endorsement	221
61.1080	Privileges of low-level endorsements	222
61.1085	Requirements for grant of low-level endorsements	222
Subpart 61.R—Aerial application ratings		224
Division 61.R.1—Privileges and requirements for grant of aerial application ratings		224
61.1090	Privileges of aerial application ratings	224
61.1100	Limitations on exercise of privileges of aerial application ratings—endorsements	224
61.1105	Limitations on exercise of privileges of aerial application ratings—recent experience	224
61.1110	Limitations on exercise of privileges of aerial application ratings—aerial application proficiency check	224
61.1115	Requirements for grant of aerial application ratings	226
Division 61.R.2—Privileges and requirements for grant of aerial application endorsements		227
61.1120	Kinds of aerial application endorsement	227
61.1125	Privileges of aerial application endorsements	230
61.1130	Limitations on exercise of privileges of aerial application endorsements—supervision	230

61.1135	Limitations on exercise of privileges of night aerial application endorsements	231
61.1140	Requirements for grant of aerial application endorsements	231
Subpart 61.S—Flight activity endorsements		233
61.1145	Kinds of flight activity endorsement	233
61.1150	Privileges of flight activity endorsements	234
61.1155	Limitations on exercise of privileges of flight activity endorsements—medical certificates	234
61.1160	Requirements for grant of flight activity endorsements	234
Subpart 61.T—Pilot instructor ratings		235
Division 61.T.1—Privileges and requirements for grant of flight instructor ratings		235
61.1165	Privileges of flight instructor ratings	235
61.1170	Limitations on exercise of privileges of flight instructor ratings—general	236
61.1175	Limitations on exercise of privileges of flight instructor ratings—endorsements	236
61.1180	Limitations on exercise of privileges of flight instructor ratings—instructor proficiency check	237
61.1185	Requirements for grant of flight instructor ratings	238
Division 61.T.2—Privileges and requirements for grant of simulator instructor ratings		241
61.1190	Privileges of simulator instructor ratings	241
61.1195	Limitations on exercise of privileges of simulator instructor ratings—general	241
61.1200	Limitations on exercise of privileges of simulator instructor ratings—endorsements	242
61.1205	Limitations on exercise of privileges of simulator instructor ratings—instructor proficiency check	242
61.1210	Requirements for grant of simulator instructor ratings	244
Division 61.T.3—Obligations of pilot instructors		245
61.1215	Obligations of pilot instructors—training	245
61.1220	Obligations of pilot instructors—flight reviews	245
61.1225	Obligations of pilot instructors—student pilots	246
61.1227	Obligations of pilot instructors—approval to operate aircraft radio	247
61.1230	Obligations of pilot instructors—records of activities conducted independently of Part 141 or 142 operator	247
Division 61.T.4—Privileges and requirements for grant of training endorsements		249
61.1235	Kinds of training endorsement	249
61.1240	Privileges of training endorsements	254
61.1245	Limitations on exercise of privileges of training endorsements—general	254
61.1246	Limitations on exercise of privileges of grade 3 training endorsements	254

61.1247	Limitations on exercise of privileges of low level training endorsements.....	255
61.1248	Limitation on exercise of privileges of helicopter grade 2 training endorsements.....	255
61.1250	Requirements for grant of training endorsements	255
Subpart 61.U—Flight examiner ratings		256
Division 61.U.1—Privileges and requirements for grant of flight examiner ratings		256
61.1255	Privileges of flight examiner ratings	256
61.1265	Limitations on exercise of privileges of flight examiner ratings—endorsements	256
61.1270	Limitations on exercise of privileges of flight examiner ratings—professional development	257
61.1275	Limitations on exercise of privileges of flight examiner ratings—recent experience	257
61.1280	Limitations on exercise of privileges of flight examiner ratings—flight reviews and subject matter proficiency checks.....	257
61.1285	Limitations on exercise of privileges of flight examiner ratings—examiner proficiency check	258
61.1290	Requirements for grant of flight examiner ratings	259
Division 61.U.2—Obligations of flight examiners		261
61.1295	Obligations of flight examiners—flight tests: strict liability offences	261
61.1300	Obligations of flight examiners—flight tests: other offences	262
61.1305	Obligations of flight examiners—proficiency checks	263
Division 61.U.3—Privileges and requirements for grant of flight examiner endorsements		265
61.1310	Kinds of flight examiner endorsement	265
61.1315	Privileges of flight examiner endorsements	268
61.1318	Limitations on exercise of privileges of flight examiner endorsements—flight tests in aircraft.....	268
61.1320	Requirements for grant of flight examiner endorsements	268
Subpart 61.V—Flight engineer licences		270
61.1325	Privileges of flight engineer licences	270
61.1330	Limitations on exercise of privileges of flight engineer licences—ratings	270
61.1335	Limitations on exercise of privileges of flight engineer licences—recent experience	270
61.1340	Limitations on exercise of privileges of flight engineer licences—flight review	271
61.1345	Limitations on exercise of privileges of flight engineer licences—current medical certificates	271
61.1350	Limitations on exercise of privileges of flight engineer licences—carriage of documents	271
61.1352	Limitations on exercise of privileges of flight engineer licences—aviation English language proficiency	272

61.1355	Certain holders of flight engineer licences authorised to operate aircraft radio.....	272
61.1360	Requirements for grant of flight engineer licences	272
Subpart 61.W—Flight engineer type ratings		274
61.1365	Privileges of flight engineer type ratings	274
61.1370	Limitations on exercise of privileges of flight engineer type ratings—general.....	274
61.1375	Limitations on exercise of privileges of flight engineer type ratings—recent experience on aircraft models	274
61.1380	Limitations on exercise of privileges of flight engineer type ratings—flight review	275
61.1385	Requirements for grant of flight engineer type ratings	275
61.1390	Person taken to meet requirements for grant of flight engineer type rating—new type rating	276
Subpart 61.X—Flight engineer instructor ratings		277
Division 61.X.1—Privileges and requirements for grant of flight engineer instructor ratings		277
61.1395	Privileges of flight engineer instructor ratings	277
61.1400	Limitations on exercise of privileges of flight engineer instructor ratings—general	277
61.1405	Limitations on exercise of privileges of flight engineer instructor ratings—endorsements	278
61.1410	Limitations on exercise of privileges of flight engineer instructor ratings—instructor proficiency check.....	278
61.1415	Requirements for grant of flight engineer instructor ratings.....	279
Division 61.X.2—Obligations of flight engineer instructors		281
61.1420	Obligations of flight engineer instructors—training	281
61.1425	Obligations of flight engineer instructors—flight review	281
61.1427	Obligations of flight engineer instructors—approval to operate aircraft radio	282
Division 61.X.3—Privileges and requirements for grant of flight engineer training endorsements		283
61.1430	Kinds of flight engineer training endorsement.....	283
61.1435	Privileges of flight engineer training endorsements.....	283
61.1440	Requirements for grant of flight engineer training endorsements	283
Subpart 61.Y—Flight engineer examiner ratings		285
Division 61.Y.1—Privileges and requirements for grant of flight engineer examiner ratings		285
61.1445	Privileges of flight engineer examiner ratings	285
61.1455	Limitations on exercise of privileges of flight engineer examiner ratings—endorsements	285
61.1460	Limitations on exercise of privileges of flight engineer examiner ratings—professional development	286

61.1465	Limitations on exercise of privileges of flight engineer examiner ratings—recent experience	286
61.1470	Limitations on exercise of privileges of flight engineer examiner ratings—examiner proficiency check.....	286
61.1475	Requirements for grant of flight engineer examiner ratings	287
Division 61.Y.2—Obligations of flight engineer examiners		289
61.1480	Obligations of flight engineer examiners—flight tests: strict liability offences.....	289
61.1485	Obligations of flight engineer examiners—flight tests: other offences	290
61.1490	Obligations of flight engineer examiners—proficiency checks.....	290
Division 61.Y.3—Privileges and requirements for grant of flight engineer examiner endorsements		292
61.1495	Kinds of flight engineer examiner endorsement	292
61.1500	Privileges of flight engineer examiner endorsements	292
61.1505	Requirements for grant of flight engineer examiner endorsements	293
Subpart 61.Z—Glider pilot licences		294
61.1510	Privileges of glider pilot licences	294
61.1515	Limitations on exercise of privileges of glider pilot licences—general	294
61.1520	Limitations on exercise of privileges of glider pilot licences—recent experience	295
61.1525	Limitations on exercise of privileges of glider pilot licences—flight review.....	295
61.1530	Limitations on exercise of privileges of glider pilot licences—medical certificates	295
61.1535	Limitations on exercise of privileges of glider pilot licences—carriage of documents.....	295
61.1540	Requirements for grant of glider pilot licences	296
Part 64—Authorisations for non-licensed personnel		297
Subpart 64.A—Preliminary		298
64.005	What Part 64 is about	298
64.010	Definitions for Part 64.....	298
64.012	Approvals by CASA for Part 64.....	299
Subpart 64.B—Transmission on aeronautical radio frequencies		300
64.015	Eligibility for aeronautical radio operator certificate	300
64.020	Obligation of assessor to ensure training is completed	301
64.025	Applying for aeronautical radio operator certificate	301
64.030	Grant of aeronautical radio operator certificate	301
64.035	Holder of aeronautical radio operator certificate may operate radio	301
64.040	Person undergoing training or assessment may operate radio	302

Subpart 64.C—Taxiing aeroplanes	303
64.045	Persons who may taxi aeroplanes—general303
64.050	Persons who may taxi aeroplanes—persons undergoing training or assessment303
64.055	Grant of certificate of competency to taxi aeroplanes of a class or covered by a type rating304
64.060	Production of certificate of competency304
Part 65—Air traffic services licensing	305
Subpart 65.A—General	307
65.005	Applicability of this Part307
65.010	Definitions for this Part307
65.015	Meaning of <i>successful completion of training</i>307
65.020	Effect of ATS provider’s failure to comply with this Part.....307
65.025	How to satisfy recency requirement.....307
65.030	How to satisfy currency requirement308
65.033	Issue of Manual of Standards308
Subpart 65.B—Authority to act in air traffic control and flight service	310
65.035	Authority to carry out air traffic control function310
65.040	Rules applicable when a person performs ATC function under supervision311
65.045	Offences—carrying out ATC function without authority.....311
65.050	Authority to carry out flight service function.....311
65.055	Rules applicable when a person performs flight service function under supervision.....312
65.060	Offences—carrying out flight service function without authority313
65.065	Authority to use ground-based radio equipment313
Subpart 65.C—Licensing	314
Division 65.C.1—Air traffic controller licensing	314
65.070	Eligibility for grant of ATC licence314
65.075	Air traffic controller ratings314
65.080	Grant of rating on ATC licence.....315
65.085	Grant of endorsement on ATC licences315
65.090	ATS provider’s obligation to provide currency and recency training and assessment.....316
65.095	Ancillary qualifications316
65.100	Conduct of practical training.....317
65.105	Conduct of examinations.....317
65.115	Periods of validity of ratings and endorsements317
65.120	Periods of validity of ATC qualifications318
Division 65.C.2—Flight service licensing	319
65.125	Eligibility for grant of flight service licence319
65.130	Flight service ratings319
65.135	Maintenance of ratings on flight service licence.....319
65.140	Endorsements on flight service licences320

65.145	Ancillary qualifications	320
65.150	Conduct of training	321
65.155	Conduct of examinations	321
65.165	Periods of validity of rating and endorsement	321
65.170	Period of validity of flight service qualification	321
Subpart 65.E—Administrative functions		323
Division 65.E.1—Grant of licences		323
65.175	Definitions for this Subpart	323
65.180	How to apply	323
65.225	Grant of licence	323
65.230	When decision must be made	323
Division 65.E.2—Ongoing proficiency and medical testing		325
65.250	Re-examination or re-assessment of licence or qualification holder	325
Division 65.E.3—Suspension and cancellation of licences		326
65.255	Provisional suspension of licence pending examination or assessment	326
65.260	Provisional suspension of licence etc during investigation	326
65.265	Show cause procedure	327
65.270	CASA’s powers in respect of licence etc	327
65.275	Choice between cancellation and suspension	327
65.280	Procedure for decision	328
65.285	Effect of suspension or provisional suspension of authorisation	329
Part 66—Continuing airworthiness—aircraft engineer licences and ratings		330
Subpart 66.A—General		332
66.005	Purpose of Part	332
66.010	Definitions for Part	332
66.015	Part 66 Manual of Standards	334
Subpart 66.B—Aircraft engineer licences		336
66.018	Aircraft engineer licences and kinds of aircraft	336
66.020	Applications for licences	336
66.025	Grant of licence	337
66.026	Grant of licence subject to exclusion	338
66.030	Recognition of foreign licences from recognised States held at time of application	339
66.035	Recognition of foreign licences from recognised States held before time of application	339
66.040	Recognition of foreign licences not from recognised States held at time of application—assessment by maintenance training organisation	340
66.045	Recognition of foreign licences not from recognised States held at time of application—assessment by CASA	341

66.050	Recognition of foreign licences not from recognised States held before time of application—assessment by maintenance training organisation	341
66.055	Recognition of foreign licences not from recognised States held before time of application—assessment by CASA.....	342
66.060	Qualifications from excluded States not recognised	343
66.065	Recognition of Defence Force aircraft authorisations held at time of application.....	343
66.070	Recognition of Defence Force aircraft authorisations held before time of application	344
66.071	Endorsement on licence of licence exclusion.....	345
66.072	Removal of exclusion from licence.....	345
Subpart 66.C—Ratings		346
66.075	Applications for ratings	346
66.080	Grant of rating	346
66.085	Determination of equivalence of certain ratings endorsed on certain licences and authorisations held at time of application	348
66.090	Determination of equivalence of certain ratings endorsed on certain licences and authorisations held before time of application.....	348
66.095	Grant of rating subject to exclusions	349
66.100	Training, assessment and experience for removal of exclusion from rating	349
66.105	Endorsement of rating on licence	350
66.110	Removal of exclusion from rating.....	350
Subpart 66.D—Conditions of licences		351
66.115	Conditions	351
66.115A	Offence not to comply with licence conditions.....	351
66.120	All licences—general	351
66.125	All licences—medically significant conditions.....	352
66.130	Category A licences.....	353
66.135	Category B1 and B2 licences—maintenance certification on behalf of Part 145 organisation	354
66.137	Category B1 and B2 licences—maintenance certification other than on behalf of Part 145 organisation	355
66.138	Category B1 and B2 licences—certificate of release to service issued on behalf of Part 145 organisation	355
66.139A	Category B1 and B2 licences—certificate of release to service issued other than on behalf of Part 145 organisation.....	356
66.140	Category C licences.....	356
Subpart 66.F—Administration		357
66.175	CASA may ask licensed aircraft maintenance engineers for information	357
66.180	Suspension of licence for failure to provide information	357

66.185	CASA must revoke suspension of licence if information provided.....	357
Part 67—Medical		358
Subpart 67.A—General		360
67.005	Applicability.....	360
67.010	Definitions for this Part.....	360
67.015	Meaning of <i>safety-relevant</i>	361
67.020	Extended meaning of <i>convicted of an offence</i>	362
Subpart 67.B—Designated aviation medical examiners and designated aviation ophthalmologists		363
67.025	Application for appointment as DAME or DAO.....	363
67.030	More information for application.....	363
67.035	Continuation of appointment until application decided.....	364
67.040	When decision must be made.....	364
67.045	Appointment of DAMEs.....	365
67.055	DAMEs—declaration about holders of position.....	365
67.060	DAMEs—conditions.....	366
67.065	Appointment of DAOs.....	366
67.075	DAOs—declaration about holders of position.....	367
67.080	DAOs—conditions.....	367
67.090	Release of information about performance of DAMEs or DAOs.....	368
67.095	DAMEs and DAOs—cancellation or surrender of appointment.....	369
67.100	DAMEs and DAOs—automatic suspension and cancellation after criminal conviction.....	369
67.105	DAMEs—automatic cancellation on ceasing to be medical practitioner.....	370
67.110	DAOs—automatic cancellation on ceasing to be medical practitioner or ophthalmologist.....	370
67.120	Revocation of declarations.....	370
67.125	Obligation to report.....	371
67.130	Surrender of certificate of appointment.....	371
67.140	Indemnification of medical reporting.....	371
Subpart 67.C—Medical certificates		373
67.145	Kinds of medical certificate.....	373
67.150	Who meets medical standard 1.....	373
67.155	Who meets medical standard 2.....	377
67.160	Who meets medical standard 3.....	381
67.165	Directions about examinations for issue of medical certificates.....	385
67.170	Evidence of identity.....	385
67.175	Medical certificates—application.....	385
67.180	Medical certificates—issue and refusal.....	386
67.185	Notice of decision to refuse medical certificate.....	388
67.190	Reconsideration of decision to refuse medical certificate.....	388
67.195	Medical certificate—conditions.....	389

67.200	Conditions applicable to certain medical certificates—correcting lenses	389
67.205	Medical certificates—period in force.....	389
67.210	Medical certificates—application for extension of period in force	391
67.215	Medical certificates—extension of period in force by CASA	391
67.220	Medical certificates—extension of period in force by DAMEs.....	392
67.225	Medical certificates—new medical certificates issued by DAMEs.....	392
67.230	CASA may require medical examination of certificate holders	393
67.235	Suspension of medical certificates—pregnancy.....	394
67.240	Medical certificates—suspension pending examination	395
67.245	Suspension of medical certificates—special arrangements for service in urgent cases.....	396
67.250	Medical certificates—effect of suspension	396
67.255	Medical certificates—cancellation if medical standard not met	396
67.260	Medical certificates—cancellation and suspension in other cases	396
Subpart 67.D—Modified Austroads medical standards		398
67.262	Definition of <i>meets the modified Austroads medical standards</i>	398
67.263	Definition of <i>modified Austroads medical standards</i> for Subpart 67.D	398
Subpart 67.E—Responsibilities of holders of medical certificates and recreational aviation medical practitioner’s certificates		400
67.265	Obligation to tell CASA of changes in medical condition—medical certificate holders	400
67.270	Offence—doing act while efficiency impaired—licence holders.....	401
67.271	Offence—doing act while efficiency impaired—student pilots.....	402
67.275	Surrender of medical certificates.....	403
Part 71—Airspace		404
Part 90—Additional airworthiness requirements		405
Subpart 90.A—General		407
90.005	Purpose of Part	407
90.007	Application of Part	407
90.008	Definitions for Part 90.....	407
90.010	Exclusions in relation to particular provisions	408
90.015	Operation of exclusions under regulation 39.004	409
90.020	Issue of Manual of Standards	410
Subpart 90.B—General provisions		411
90.100	Applicability	411

90.105	Flight crew restraints	411
90.110	Occupant restraints—small aeroplanes	412
90.115	Occupant restraints—helicopters	412
90.120	Side-facing seats	413
90.125	Cabin crew seats	413
90.130	External doors.....	414
90.135	Emergency exits	415
90.140	Cargo and baggage compartment lighting.....	415
90.145	Thermal/acoustic insulation materials.....	416
90.150	Fire extinguishing agents.....	417
Subpart 90.C—Large aeroplanes engaged in air transport operations		418
Division 90.C.1—General		418
90.200	Applicability.....	418
Division 90.C.2—Emergency exits		419
90.205	Escape devices.....	419
90.210	Location of emergency exits	419
90.215	Access to emergency exits	420
90.220	Interior emergency exit marking	420
90.225	Interior emergency lighting	421
90.230	Floor proximity emergency escape path	421
90.235	Exterior emergency exit marking	421
90.240	Exterior emergency lighting.....	422
90.245	Over-wing escape routes	422
Division 90.C.3—Fire protection		423
90.250	Cabin interiors—materials	423
90.255	Seat cushions—materials	423
90.260	Cargo compartment liners—materials.....	423
90.265	Cargo compartments for aeroplanes engaged in scheduled air transport operations	424
90.270	Toilets.....	425
90.275	Thermal/acoustic insulation materials.....	425
Division 90.C.4—Systems and equipment		427
90.280	Seats.....	427
90.285	Pitot heat indication systems	427
90.290	Landing gear aural warning systems	428
Subpart 90.D—Small aeroplanes engaged in air transport operations		429
90.400	Applicability	429
90.405	Cargo and baggage compartments	429
90.410	Emergency exits	429
90.415	Landing gear aural warning systems	430
Subpart 90.E—Helicopters engaged in scheduled air transport operations		431
90.600	Applicability	431
90.605	Emergency exits	431

Part 91—General operating and flight rules	432
Subpart 91.A—Preliminary	439
91.005	Application of Part 91—Australian aircraft in Australian territory439
91.010	Application of Part 91—Australian aircraft in foreign countries.....439
91.015	Application of Part 91—Australian aircraft over the high seas439
91.020	Application of Part 91—foreign registered aircraft439
91.025	Application of Part 91—foreign state aircraft.....440
91.030	Application of Part 91—aircraft to which Part 101, 103 or 131 applies440
91.035	Application of Part 91—certain provisions of this Part do not apply if provisions of Part 105, 121, 133, 135 or 138 apply.....441
91.040	Issue of Manual of Standards for Part 91442
91.045	Approvals by CASA for Part 91.....443
91.050	Approvals by authorised persons for Subpart 91.T443
Subpart 91.C—General	444
Division 91.C.1—General flight limitations	444
91.055	Aircraft not to be operated in manner that creates a hazard444
91.060	Unauthorised travel or placing of cargo on aircraft444
91.085	NVIS flights444
91.090	All flights—airspeed limits445
Division 91.C.2—Operational documents	446
91.095	Compliance with flight manual etc.446
Division 91.C.3—Flight related documents	447
91.100	Electronic documents447
91.105	Carriage of documents.....447
91.110	Carriage of documents for certain flights.....447
91.115	Carriage of documents—flights that begin or end outside Australian territory.....448
91.120	Journey logs—flights that begin or end outside Australian territory449
Division 91.C.4—Reporting and recording defects and incidents etc.	450
Division 91.C.5—Search and rescue services and emergency and survival equipment	451
Division 91.C.6—Miscellaneous requirements for aircraft	452
91.140	Operating an Australian aircraft outside Australia.....452
91.145	Requirements to be met before Australian aircraft may fly.....452
91.150	Operating aircraft with inoperative equipment—placarding453
91.155	Manipulating flight controls.....453
Division 91.C.7—Firearms on aircraft	455
91.160	Possessing firearm on aircraft455

91.165	Discharging firearm on aircraft	455
Division 91.C.8—Portable electronic devices		456
91.170	Operation of portable electronic devices	456
91.175	Operation of portable electronic devices by crew members	456
Division 91.C.9—Special flight operations		457
91.180	Air displays in Australian territory	457
91.185	Conducting aerobatic manoeuvres	457
91.190	Dropping things from aircraft.....	457
91.195	Picking up or setting down people or things during flight	458
91.200	Persons not to be carried in certain parts of aircraft.....	458
91.205	Flying in formation.....	459
91.210	Towing of things by aircraft.....	460
Subpart 91.D—Operational procedures		461
Division 91.D.1—Operational control		461
91.215	Authority and responsibilities of pilot in command.....	461
91.220	Actions and directions by operator or pilot in command	461
91.225	Crew members—power of arrest	462
Division 91.D.2—Flight preparation		463
91.230	Flight preparation (weather assessments) requirements	463
91.235	Flight preparation (alternate aerodromes) requirements	463
Division 91.D.3—Flight notifications and pre-flight checks		464
91.240	Flight notifications	464
91.245	Matters to be checked before take-off.....	464
Division 91.D.4—Flight rules		465
Subdivision 91.D.4.1—General		465
91.255	Air traffic services—prescribed requirements	465
91.257	Air traffic control clearances and instructions	465
91.260	Unauthorised entry into prohibited or restricted areas.....	466
91.263	Air defence identification zone flights	466
91.265	Minimum height rules—populous areas and public gatherings	467
91.267	Minimum height rules—other areas.....	468
91.270	Aircraft to be flown under VFR or IFR.....	469
Subdivision 91.D.4.2—Visual flight rules		470
91.273	VFR flights	470
91.275	Specified VFR cruising levels	470
91.277	Minimum heights—VFR flights at night	470
91.280	VFR flights—compliance with VMC criteria	471
91.283	VFR flights—aircraft not to exceed certain speeds.....	472
91.285	VFR flights—flights in class A airspace	472
Subdivision 91.D.4.3—Instrument flight rules		472
91.287	IFR flights.....	472

91.290	Specified IFR cruising levels	472
91.295	IFR flights at non-specified cruising levels— notifying Air Traffic Services	473
91.300	IFR flights at non-specified cruising levels— avoiding collisions with aircraft conducting VFR flights.....	473
91.305	Minimum heights—IFR flights	473
91.307	IFR take-off and landing minima	474
91.310	Approach ban for IFR flights	475
91.315	Taking off and landing in low visibility	475
91.320	Specified aircraft performance categories	475
Subdivision 91.D.4.4—Avoiding collisions in the air		476
91.325	Basic rule	476
91.330	Right of way rules	476
91.335	Additional right of way rules.....	477
91.340	Right of way rules for take-off and landing	479
Subdivision 91.D.4.5—Avoiding collisions on water		479
91.345	Compliance with International Regulations	479
91.350	Giving way to vessels.....	479
91.355	Giving way on water	480
Subdivision 91.D.4.6—Avoiding collisions at or in the vicinity of aerodromes		480
91.360	Meaning of <i>in the vicinity of a non-controlled aerodrome</i>	480
91.365	Taxiing or towing on movement area of aerodrome	480
91.370	Take-off or landing at non-controlled aerodrome— all aircraft	481
91.375	Operating on manoeuvring area, or in the vicinity, of non-controlled aerodrome—general requirements	483
91.380	Operating on manoeuvring area, or in the vicinity, of non-controlled aerodrome—landing and taking off into the wind	484
91.385	Operating on manoeuvring area, or in the vicinity, of non-controlled aerodrome—requirements that apply after joining the circuit pattern	484
91.390	Operating on manoeuvring area, or in the vicinity, of non-controlled aerodrome—requirements related to maintaining the same track after take-off.....	485
91.395	Straight-in approaches at non-controlled aerodromes	485
91.400	Communicating at certified, registered, military or designated non-controlled aerodromes.....	486
91.405	Aircraft in aerodrome traffic at controlled aerodromes	487
Division 91.D.5—Taking off, landing and ground operations		489
91.410	Use of aerodromes.....	489
91.415	Taxiing aircraft	489
91.420	Parked aircraft not to create hazard	490
91.425	Safety when aeroplane operating on ground	490
91.430	Safety when rotorcraft operating on ground.....	491

Division 91.D.6—Fuel requirements	492
91.455 Fuel requirements	492
91.460 Oil requirements	492
91.465 Contaminated, degraded or inappropriate fuels	492
91.470 Fire hazards	493
91.475 Fuelling aircraft—fire fighting equipment	493
91.480 Fuelling aircraft—electrical bonding	494
91.485 Equipment or electronic devices operating near aircraft	494
91.490 Fuelling turbine-engine aircraft—low-risk electronic devices	495
91.495 Only turbine-engine aircraft to be hot fuelled	496
91.500 Hot fuelling aircraft—general	496
91.505 Hot fuelling aircraft—procedures etc.	497
91.510 Fuelling aircraft—persons on aircraft, boarding or disembarking	497
91.515 Fuelling aircraft if fuel vapour detected	498

Division 91.D.7—Safety of persons on aircraft and cargo requirements	499
91.520 Crew members to be fit for duty	499
91.525 Offensive or disorderly behaviour on aircraft	500
91.530 When smoking not permitted	500
91.535 Crew safety during turbulence	501
91.540 Means of passenger communication	501
91.545 Seating for persons on aircraft.....	501
91.550 Seating for flight crew members	502
91.555 Seating for crew members other than flight crew members	502
91.560 Restraint of infants and children	503
91.565 Passengers—safety briefings and instructions	503
91.570 Passengers—safety directions by pilot in command	504
91.575 Passengers—compliance with safety directions.....	505
91.580 Passengers—compliance with safety instructions by cabin crew.....	505
91.585 Restraint and stowage of cargo	505
91.590 Restraint and stowage of carry-on baggage	506
91.595 Restraint and stowage of certain aircraft equipment	506
91.600 Carriage of cargo—general	507
91.605 Carriage of cargo—cargo compartments	507
91.610 Carriage of cargo—unoccupied seats.....	508
91.615 Carriage of cargo—loading instructions	508
91.620 Carriage of animals	508

Division 91.D.8—Instruments, indicators, equipment and systems	510
91.625 Use of radio—qualifications	510
91.630 Use of radio—broadcasts and reports	510
91.635 Communication monitoring in controlled airspace	510

91.640	Use of radio outside controlled airspaces— listening watch of radio transmissions	511
91.645	Availability of instructions for flight data and combination recorders	511
91.650	Flight recorders—preserving recordings of immediately reportable matters	512
91.655	RVSM airspace.....	512
91.660	Performance-based navigation	513
Division 91.D.9—Miscellaneous		514
Division 91.D.10—Signals, emergencies and hazards		515
91.670	Standard visual signals	515
91.675	Pilot in command to report hazards to air navigation	515
91.680	Pilot in command to report emergencies.....	516
91.685	Multi-engine aircraft—pilot in command to land at nearest suitable aerodrome if emergency occurs.....	516
91.690	Pilot in command to report contraventions relating to emergencies	516
91.695	Interception of aircraft.....	517
91.700	Aviation distress signals	517
91.705	Flight in icing conditions—adherence of frost, ice or snow	518
91.710	Flight in icing conditions—requirements for flight	518
Division 91.D.11—Causing or simulating failures etc.		519
Subdivision 91.D.11.1—Causing or simulating instrument failure etc.		519
91.715	Causing or simulating failure of flight instruments.....	519
91.720	Simulating IMC flying	519
91.725	Training flight limitations etc.....	520
Subdivision 91.D.11.2—Causing or simulating engine failure etc. for aeroplanes		521
91.730	Aeroplane flights in IMC or at night—engine not to be shut down.....	521
91.735	Single-engine aeroplane—VFR flights by day— engine not to be shut down.....	521
91.740	Single-engine aeroplane—simulating engine failure in IMC or at night	522
91.745	Multi-engine aeroplane—simulating engine failure—general.....	522
91.750	Multi-engine aeroplane—simulating engine failures in IMC or at night.....	523
Subdivision 91.D.11.3—Causing or simulating engine failure etc. for rotorcraft		525
91.755	Single-engine rotorcraft—engine not to be shut down	525
91.760	Single-engine rotorcraft—engine failure not to be simulated and autorotation of main rotor system not to be initiated in IMC	525
91.765	Single-engine rotorcraft—simulating engine failure or initiating autorotation of main rotor system at night.....	525

91.770	Multi-engine rotorcraft—engine not to be shut down at certain altitudes in IMC or at night.....	526
91.775	Multi-engine rotorcraft—simulating engine failure in IMC or at night.....	526
Division 91.D.12—Psychoactive substances		528
91.780	Passengers—alcohol.....	528
91.785	Crew—provision of alcohol.....	528
91.790	Prohibiting person affected by psychoactive substances from boarding.....	528
Subpart 91.F—Performance		529
91.795	Take-off performance.....	529
91.800	Landing performance.....	529
Subpart 91.J—Weight and balance		531
91.805	Loading of aircraft.....	531
Subpart 91.K—Equipment		532
91.810	Requirements relating to equipment.....	532
Subpart 91.P—Cabin crew		533
91.820	Cabin crew—when required.....	533
91.825	Cabin crew—number.....	533
91.830	Cabin crew—knowledge of emergency and safety equipment and procedures.....	533
Subpart 91.T—Operations under certain special certificates of airworthiness and special flight permits		535
Division 91.T.1—Preliminary		535
91.835	Aircraft with more than one certificate of airworthiness—application of Subpart 91.T.....	535
Division 91.T.2—Restricted category aircraft—operating requirements		536
91.840	Restricted category aircraft—general operating requirements.....	536
91.845	Restricted category aircraft—kinds of operations permitted.....	536
Division 91.T.3—Provisionally certificated aircraft—operating requirements		538
91.850	Provisionally certificated aircraft—operating requirements.....	538
91.855	Provisionally certificated aircraft—kinds of operations permitted.....	538
91.860	Provisionally certificated aircraft—operation for type certification or supplemental type certification.....	539
91.865	Provisionally certificated aircraft—requirements for the carriage of people.....	539
91.870	Provisionally certificated aircraft—additional requirements for operators.....	540

Division 91.T.4—Experimental aircraft—operating requirements	541
91.875 Experimental aircraft—operating requirements	541
91.880 Experimental aircraft—kinds of operations permitted.....	542
91.885 Experimental aircraft—maximum number of persons to be carried.....	542
Division 91.T.5—Primary category aircraft and intermediate category aircraft—operating requirements	543
91.890 Primary category aircraft and intermediate category aircraft—operating requirements.....	543
Division 91.T.6—Light sport aircraft—operating requirements	544
91.895 Light sport aircraft—operators	544
91.900 Light sport aircraft—pilots	544
Division 91.T.7—Special flight permits—operating requirements	546
91.905 Flights under special flight permits	546
Division 91.T.8—Miscellaneous	547
91.910 Application of Division 91.T.8.....	547
91.915 Aircraft with special certificates of airworthiness—maintenance release etc.	547
91.920 Aircraft with special certificates of airworthiness—flight tests to be conducted in certain areas.....	547
Subpart 91.Y—Minimum equipment lists	549
Division 91.Y.1—Preliminary	549
91.925 Definitions	549
91.930 Requirements for minimum equipment lists	549
Division 91.Y.2—Approval of minimum equipment lists	550
91.935 Approval of minimum equipment lists.....	550
Division 91.Y.3—Variations of minimum equipment lists	551
91.940 Approval of variations.....	551
Division 91.Y.4—Extensions of rectification intervals	552
91.945 Approval of extensions of rectification intervals	552
91.950 Effect of approval.....	553
91.955 CASA to be notified of extensions approved by a continuing airworthiness management organisation	553
Division 91.Y.5—Other	555
91.960 Operation of aircraft with multiple inoperative items not permitted in certain circumstances	555
Subpart 91.Z—Foreign aircraft	556
91.965 Foreign registered aircraft—Chicago Convention	556
91.970 Foreign registered aircraft—special flight authorisations.....	556
91.975 Foreign state aircraft—approval to fly in Australian territory	557
91.980 Foreign registered aircraft—major defect—CASA direction.....	557

91.985	Foreign registered aircraft—CASA to notify Contracting State of direction.....	558
91.990	Foreign registered aircraft—CASA may revoke direction.....	558
91.995	Foreign registered aircraft—when direction or revocation takes effect.....	558
Part 92—Consignment and carriage of dangerous goods by air		559
Subpart 92.A—General		561
92.005	Applicability.....	561
92.010	Definitions for Part 92.....	561
92.015	What are dangerous goods?.....	562
Subpart 92.B—Conditions for carriage etc of dangerous goods		563

Part 45—Display of nationality marks, registration marks and aircraft registration identification plates

Table of contents

Subpart 45.A—Preliminary

- 45.005 Application of Part 45
- 45.010 Key definitions for Part 45
- 45.015 Meaning of *markings* and *set of markings*
- 45.020 References to aircraft operating for an exhibition
- 45.025 Issue of Manual of Standards for Part 45
- 45.030 Registration holder to provide copies of approvals under this Part to registered operator

Subpart 45.B—Aircraft markings

- 45.050 Requirements for aircraft markings
- 45.055 Display of aircraft markings
- 45.060 Designs etc. not to modify, obscure or create confusion about sets of markings
- 45.065 Approval to operate with different markings—aircraft of special configuration
- 45.070 Approval to operate with different or no markings—aircraft operated for an exhibition

Subpart 45.C—Requirement to display words on certain aircraft

- 45.090 Requirements for display of words
- 45.095 Display of words
- 45.100 Approval to operate with different or no words—aircraft operated for an exhibition

Subpart 45.D—Aircraft registration identification plate

- 45.120 Application of Subpart 45.D
- 45.125 Plate to be attached to aircraft
- 45.130 Removal or alteration of plates
- 45.135 Approval of method of displaying markings
- 45.140 Approval for attachment of plate—aircraft of special configuration

Subpart 45.A—Preliminary

45.005 Application of Part 45

- (1) This Part applies in relation to the operation of an Australian aircraft required to be registered under Division 47.C.1.
- (2) However, this Part does not apply to a Part 103 aircraft (other than a sailplane).

45.010 Key definitions for Part 45

In these Regulations:

aircraft registration identification plate, for an aircraft, means a plate displaying the aircraft's markings.

Australian nationality mark means the capital letters "VH".

character means a letter, a digit or a hyphen.

exhibition means an air show or a film or television production.

45.015 Meaning of *markings* and *set of markings*

- (1) *Markings*, for an aircraft, are the Australian nationality mark and the aircraft's registration mark, in that order, connected by a hyphen.
- (2) However, if the aircraft is a registered sailplane operating in Australian territory:
 - (a) the aircraft's markings need not include the Australian nationality mark; and
 - (b) if the first letter of the aircraft's registration mark is "G"—the aircraft's markings need not include that first letter.
- (3) A *set of markings*, for an aircraft, is an instance of the aircraft's markings.

45.020 References to aircraft operating for an exhibition

In this Part, a reference to an aircraft operating for an exhibition includes a reference to the aircraft:

- (a) flying in the exhibition, or in a practice or test flight for the exhibition; or
- (b) flying between locations where the aircraft is participating in the exhibition or in the practice or test flight; or
- (c) flying between a location where the aircraft is participating in the exhibition, or in the practice or test flight, and the aircraft's base of operations.

45.025 Issue of Manual of Standards for Part 45

For subsection 38(1) of the Act, CASA may issue a Manual of Standards for this Part prescribing matters:

- (a) required or permitted by these Regulations to be prescribed by the Part 45 Manual of Standards; or
- (b) necessary or convenient to be prescribed for carrying out or giving effect to this Part.

Note: The Manual of Standards is a legislative instrument: see subsection 38(1) of the Act.

45.030 Registration holder to provide copies of approvals under this Part to registered operator

- (1) This regulation applies if:
 - (a) the registration holder of an aircraft holds an approval under this Part for the aircraft; and
 - (b) the registration holder is not the registered operator of the aircraft.
- (2) The registration holder contravenes this subregulation if:
 - (a) the aircraft is operated; and
 - (b) the registration holder has not provided a copy of the approval to the registered operator of the aircraft.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Regulation 45.050

Subpart 45.B—Aircraft markings

45.050 Requirements for aircraft markings

- (1) The Part 45 Manual of Standards may prescribe requirements relating to the display of markings on aircraft.
- (2) Without limiting subregulation (1), the Part 45 Manual of Standards may prescribe requirements relating to the following:
 - (a) when markings must be displayed;
 - (b) the number of sets of markings that must be displayed;
 - (c) the location of sets of markings on aircraft;
 - (d) the characters to be used in each set of markings, including height requirements.

45.055 Display of aircraft markings

Aircraft must comply with Part 45 Manual of Standards if operated

- (1) The registration holder and the registered operator of an aircraft each contravene this subregulation if:
 - (a) the aircraft is operated; and
 - (b) a requirement (the **prescribed requirement**) prescribed by the Part 45 Manual of Standards under regulation 45.050 applies to the aircraft; and
 - (c) the prescribed requirement is not met.

Exception—operating with dealer’s mark

- (2) Subregulation (1) does not apply if the aircraft is operating with a dealer’s mark in accordance with Subpart 47.H.

Exception—approvals

- (3) Subregulation (1) does not apply if:
 - (a) the registration holder of the aircraft holds an approval under regulation 45.065 to display markings other than in accordance with the prescribed requirement; and
 - (b) the requirements specified in the approval are complied with.
- (4) Subregulation (1) does not apply if:
 - (a) the registration holder of the aircraft holds an approval under regulation 45.070:
 - (i) to display markings other than in accordance with the prescribed requirement; or
 - (ii) to display no markings;for the purposes of an exhibition; and

- (b) the aircraft is operated for the exhibition during the period of the approval;
and
- (c) the requirements specified in the approval are complied with.

Exception—certain Commonwealth and State functions

- (5) Subregulation (1) does not apply if the aircraft is operated:
 - (a) in relation to the performance of a function of an authority of the Commonwealth, or an authority or agency of a State; and
 - (b) in circumstances in which knowledge of the operation may:
 - (i) reduce the effectiveness of the performance of the function; or
 - (ii) expose a person to the danger of physical harm or death arising from the actions of another person.

Offence

- (6) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2) to (5): see subsection 13.3(3) of the *Criminal Code*.

45.060 Designs etc. not to modify, obscure or create confusion about sets of markings

- (1) The registration holder and the registered operator of an aircraft each contravene this subregulation if:
 - (a) the aircraft is operated; and
 - (b) a design, mark or symbol on an aircraft modifies, obscures or creates confusion about a set of markings on the aircraft.
- (2) Subregulation (1) does not apply in relation to:
 - (a) a Defence Force symbol or call-sign on an aircraft operated by the Defence Force; or
 - (b) a design, mark or symbol on an aircraft approved in writing by CASA.
- (3) CASA must not grant an approval under paragraph (2)(b) if granting the approval would adversely affect the safety of air navigation.

Offence

- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

Regulation 45.065

45.065 Approval to operate with different markings—aircraft of special configuration

- (1) The registration holder of an aircraft may apply to CASA for approval to display markings on the aircraft other than in accordance with a requirement (the *prescribed requirement*) prescribed by the Part 45 Manual of Standards under regulation 45.050.
- (2) CASA must approve the application if CASA is satisfied that, because of the configuration of the aircraft, the prescribed requirement specified in the application cannot be met.
- (3) The approval must:
 - (a) be in writing; and
 - (b) specify the requirements for the display of markings on the aircraft that must be met.

45.070 Approval to operate with different or no markings—aircraft operated for an exhibition

Applications for approval to display different or no markings at an exhibition

- (1) The registration holder of an aircraft may apply to CASA for approval, for the purposes of an exhibition:
 - (a) to display markings on the aircraft other than in accordance with a requirement (the *prescribed requirement*) prescribed by the Part 45 Manual of Standards under regulation 45.050; or
 - (b) to display no markings on the aircraft.
- (2) The application for approval must include the following:
 - (a) the kind of exhibition, and the name (if any) of the exhibition;
 - (b) the dates and times during which the aircraft will be operated for the exhibition;
 - (c) the location of the exhibition, including the relevant flight paths;
 - (d) a photograph or drawing of the aircraft showing the colour of the aircraft and any marks the applicant intends the aircraft to bear while it is operated for the exhibition.

Requirements for approvals

- (3) CASA must approve the application if CASA is satisfied that:
 - (a) the aircraft will be operated for an exhibition; and
 - (b) the display of markings in accordance with the prescribed requirement would be inconsistent with the operation of the aircraft for the exhibition; and
 - (c) if the exhibition is in a foreign country—the display of markings in accordance with an approval, or the display of no markings, would not contravene a law of that country.

- (4) The approval must:
- (a) be in writing; and
 - (b) specify the requirements (if any) for the display of markings on the aircraft that must be met while the aircraft is operated for the exhibition; and
 - (c) state the period of the approval.

Markings must be displayed in cockpit and visible to crew

- (5) The registration holder and the registered operator of an aircraft each contravene this subregulation if:
- (a) the registration holder holds an approval under this regulation in relation to the aircraft and an exhibition; and
 - (b) the aircraft is operated for the exhibition; and
 - (c) the Australian nationality mark and the registration mark of the aircraft are not:
 - (i) displayed in the cockpit; and
 - (ii) clearly visible to the aircraft's crew.

Offence

- (6) A person commits an offence of strict liability if the person contravenes subregulation (5).

Penalty: 50 penalty units.

Regulation 45.090

Subpart 45.C—Requirement to display words on certain aircraft

45.090 Requirements for display of words

- (1) The Part 45 Manual of Standards may prescribe requirements relating to the display of specified words on the following kinds of aircraft:
 - (a) aircraft for which a special airworthiness certificate of the kind mentioned in regulation 21.189 is in force;
 - (b) aircraft for which a special airworthiness certificate of the kind mentioned in regulation 21.185 is in force;
 - (c) aircraft for which a provisional certificate of airworthiness is in force;
 - (d) experimental aircraft.
- (2) Without limiting subregulation (1), the Part 45 Manual of Standards may prescribe requirements relating to the following:
 - (a) the words that must be displayed;
 - (b) the location of the words;
 - (c) the manner in which the words must be displayed, including the colour and height of the letters used.

45.095 Display of words

- (1) The registration holder and the registered operator of an aircraft each contravene this subregulation if:
 - (a) the aircraft is operated; and
 - (b) a requirement (the *prescribed requirement*) prescribed by the Part 45 Manual of Standards under regulation 45.090 applies to the aircraft; and
 - (c) the prescribed requirement is not met.
- (2) Subregulation (1) does not apply if:
 - (a) the registration holder of the aircraft holds an approval under regulation 45.100 to:
 - (i) display words other than in accordance with the prescribed requirement; or
 - (ii) to display no words;for the purposes of an exhibition; and
 - (b) the aircraft is operated for the exhibition during the period of the approval; and
 - (c) any requirements specified in the approval are complied with.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

45.100 Approval to operate with different or no words—aircraft operated for an exhibition

Applications for approval to display different or no words at an exhibition

- (1) The registration holder of an aircraft may apply to CASA for approval, for the purposes of an exhibition:
 - (a) to display words on the aircraft other than in accordance with a requirement (the **prescribed requirement**) prescribed by the Part 45 Manual of Standards under regulation 45.090; or
 - (b) to display no words on the aircraft.
- (2) The application for approval must include the following:
 - (a) the kind of exhibition, and the name (if any) of the exhibition;
 - (b) the dates and times during which the aircraft will be operated for the exhibition;
 - (c) the location of the exhibition, including the relevant flight paths;
 - (d) a photograph or drawing of the aircraft showing the colour of the aircraft and any marks the applicant intends the aircraft to bear while it is operated for the exhibition.

Requirements for approvals

- (3) CASA must approve the application if CASA is satisfied that:
 - (a) the aircraft will be operated for an exhibition; and
 - (b) the display of words in accordance with the prescribed requirement would be inconsistent with the operation of the aircraft for the exhibition; and
 - (c) if the exhibition is in a foreign country—the display of words in accordance with an approval, or the display of no words, would not contravene a law of that country.
- (4) The approval must:
 - (a) be in writing; and
 - (b) specify the requirements (if any) for the display of words on the aircraft that must be met while the aircraft is operated for the exhibition; and
 - (c) state the period of the approval.

Prescribed word must be displayed and visible

- (5) The registration holder and the registered operator of an aircraft each contravene this subregulation if:
 - (a) the registration holder holds an approval under this regulation in relation to the aircraft and an exhibition; and
 - (b) the aircraft is operated for the exhibition; and

Regulation 45.100

- (c) if a specified word for the aircraft is prescribed by the Part 45 Manual of Standards under regulation 45.090—the word is not:
 - (i) displayed in the cockpit; and
 - (ii) clearly visible to the aircraft's crew.
- (6) A person commits an offence of strict liability if the person contravenes subregulation (5).

Penalty: 50 penalty units.

Subpart 45.D—Aircraft registration identification plate

45.120 Application of Subpart 45.D

This Subpart applies to an aircraft if:

- (a) the aircraft has a maximum take-off weight of more than 5 700 kg; or
- (b) the aircraft is operating outside Australian territory; or
- (c) the aircraft does not have a manufacturer's data plate attached in accordance with regulation 21.820.

45.125 Plate to be attached to aircraft

- (1) The registration holder and the registered operator of the aircraft each contravene this subregulation if:
 - (a) the aircraft is operated; and
 - (b) a requirement mentioned in subregulation (2) is not met.
- (2) The requirements are the following:
 - (a) the aircraft's markings must be displayed on the aircraft registration identification plate for the aircraft;
 - (b) the method of displaying the aircraft's markings must meet the requirements prescribed by the Part 45 Manual of Standards for the purposes of this paragraph;
 - (c) the plate must be attached to the aircraft in a way that ensures that the plate is not likely to be defaced or to become detached from the aircraft;
 - (d) the plate must be attached at the location on the aircraft prescribed by the Part 45 Manual of Standards for the purposes of this paragraph;
 - (e) the plate must be constructed of the material prescribed by the Part 45 Manual of Standards for the purposes of this paragraph.
- (3) Subregulation (1) does not apply in relation to the requirement mentioned in paragraph (2)(b) if:
 - (a) the registration holder of the aircraft holds an approval under regulation 45.135 to display the aircraft's markings using a different method; and
 - (b) the markings are displayed using that method.
- (4) Subregulation (1) does not apply in relation to the requirement mentioned in paragraph (2)(d) if:
 - (a) the registration holder of the aircraft holds an approval under regulation 45.140 to operate the aircraft with the plate attached in a different place; and
 - (b) the requirements specified in the approval are complied with.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (1).

Regulation 45.130

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (3) or (4): see subsection 13.3(3) of the *Criminal Code*.

45.130 Removal or alteration of plates

- (1) A person contravenes this subregulation if:
 - (a) the person removes the aircraft registration identification plate from an aircraft; and
 - (b) the removal is not:
 - (i) for the purpose of ensuring compliance with this Part; or
 - (ii) for the purpose of carrying out maintenance on the aircraft in accordance with these Regulations.
- (2) A person contravenes this subregulation if:
 - (a) the person alters the aircraft registration identification plate of an aircraft; and
 - (b) the alteration is not for the purpose of ensuring compliance with this Part.

Offence

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

45.135 Approval of method of displaying markings

- (1) The registration holder of an aircraft may apply to CASA for approval of a method of displaying the aircraft's markings on the aircraft registration identification plate for the aircraft.
- (2) CASA must approve the application if CASA is satisfied that the method of displaying the aircraft's markings is similar to marking by etching, stamping or engraving.
- (3) The approval must be in writing.

45.140 Approval for attachment of plate—aircraft of special configuration

- (1) The registration holder of an aircraft (other than a balloon) may apply to CASA for approval to attach the aircraft registration identification plate for the aircraft to the aircraft other than in accordance with paragraph 45.125(2)(d).
- (2) CASA must approve the application if CASA is satisfied that, because of the configuration of the aircraft, the requirements prescribed by the Part 45 Manual of Standards for the purposes of paragraph 45.125(2)(d) cannot be met.
- (3) The approval must:
 - (a) be in writing; and

- (b) specify the requirements for attaching the plate to the aircraft.

Part 47—Registration of aircraft and related matters

Table of contents

Subpart 47.A—General

- 47.005 Applicability of Part 47
- 47.010 Definitions for Part 47
- 47.012 Issue of Manual of Standards for Part 47
- 47.015 Requirement for aircraft to be registered
- 47.020 Appointment of person to act on behalf of owners

Subpart 47.B—The Australian Civil Aircraft Register

- 47.025 Australian Civil Aircraft Register
- 47.030 Access to Australian Civil Aircraft Register
- 47.035 Correction of Register
- 47.040 Seeking information about Register
- 47.045 Communicating with CASA
- 47.050 Accuracy of information in Register
- 47.055 Entries in Register etc not conclusive evidence of title to aircraft

Subpart 47.C—Registration of aircraft

Division 47.C.1—Registration of aircraft other than certain RPA

- 47.058 Application of this Division
- 47.060 Applying for registration of unregistered aircraft
- 47.065 Information required for registration—general
- 47.070 Confirmation of oral application
- 47.075 CASA may ask for further information
- 47.080 Registration of aircraft
- 47.085 Interim certificate of registration
- 47.090 Issue of certificate of registration
- 47.095 Period of registration

Division 47.C.2—Registration of medium RPA, small RPA, very small RPA and micro RPA

- 47.096 Application of this Division
- 47.096A Registration requirements for certain RPA
- 47.097 Application for registration of certain RPA
- 47.098 Registration of certain RPA
- 47.099 Period of registration
- 47.099B Requirement to produce certificate of registration (or copy)

Subpart 47.D—Registered operator

- 47.100A Application of Subpart 47.D
- 47.100 Identity of registered operator of aircraft

Subpart 47.E—Transfer of ownership of aircraft

- 47.105A Application of Subpart 47.E
- 47.105 Meaning of *former owner* and *new owner*
- 47.110 Transfer of ownership

Subpart 47.F—Administration of Australian Civil Aircraft Register

- 47.115 Notice of error in information in Register
- 47.130 Lapsing of registration
- 47.131 Suspension and cancellation of registration following a transfer of ownership
- 47.131A Suspension and cancellation of registration if registered operator is not an eligible person
- 47.131B Cancellation of registration at holder’s request—limitations
- 47.131C Cancellation of registration—certain RPA
- 47.132 Cancellation of registration on other grounds

Subpart 47.G—Reservation, assignment and change of registration marks

- 47.139 Application of Subpart 47.G
- 47.140 Meaning of *aircraft* for Subpart 47.G
- 47.145 Reservation of registration mark
- 47.150 Assignment of registration mark
- 47.155 Marks that must not be reserved or assigned
- 47.160 Assigning reserved registration mark to unregistered aircraft
- 47.165 Change of registration mark

Subpart 47.H—Dealer’s marks

- 47.169 Application of Subpart 47.H
- 47.170 Definitions for Subpart 47.H
- 47.175 Assignment of dealer’s marks
- 47.180 What marks may be assigned to dealers
- 47.185 Record of dealer’s marks
- 47.190 How long assignment to dealer remains in effect
- 47.195 Certificate of assignment of dealer’s mark
- 47.205 Dealer’s plate
- 47.210 Use of dealer’s marks
- 47.215 Aircraft taken to be registered
- 47.220 Annual report to CASA on aircraft using dealer’s marks
- 47.225 Revocation of assignment of dealer’s mark etc

Subpart 47.A—General

47.005 Applicability of Part 47

- (1) This Part sets out:
 - (a) how aircraft are registered; and
 - (b) how registration marks are assigned to aircraft.
- (2) It also sets out how dealer's marks are assigned to manufacturers, distributors and dealers of aircraft, and regulates their use.

47.010 Definitions for Part 47

In this Part:

CDCL has the same meaning as in the *International Interests in Mobile Equipment (Cape Town Convention) Rules 2014*.

eligible person means one of the following:

- (a) a resident of Australia who is:
 - (i) 18 years of age or older; and
 - (ii) an Australian citizen or the holder of a permanent visa (within the meaning of the *Migration Act 1958*);
- (b) a corporation incorporated under the *Corporations Act 2001*;
- (c) a body incorporated under a law (other than the *Corporations Act 2001*) in force in Australia;
- (d) the Commonwealth, a State or a Territory;
- (e) an agency of the Commonwealth, a State or a Territory;
- (f) a foreign corporation that is lawfully carrying on business in Australia.

IDERA has the same meaning as in the *International Interests in Mobile Equipment (Cape Town Convention) Rules 2014*.

owner, of an aircraft, includes a part-owner of the aircraft who is appointed under regulation 47.020.

Note: The owner of an aircraft who becomes its registration holder must, if he or she is not eligible to be its registered operator, appoint an eligible person as the registered operator: see regulation 47.100.

registered operator has the meaning given by regulation 47.100.

47.012 Issue of Manual of Standards for Part 47

For the purposes of subsection 98(5A) of the Act, CASA may issue a Manual of Standards for this Part prescribing matters:

- (a) required or permitted by these Regulations to be prescribed by the Part 47 Manual of Standards; or

- (b) necessary or convenient to be prescribed for carrying out or giving effect to this Part.

Note: A Manual of Standards is a legislative instrument: see subsection 98(5AA) of the Act.

47.015 Requirement for aircraft to be registered

- (1) For paragraph 20AA(1)(b) of the Act, an aircraft is required to be registered unless it is one of the following:
- (a) an aircraft that is not intended to be used as an aircraft;
 - (b) an aircraft that, under Subpart 200.B, is exempt from these Regulations;
 - (c) an unmanned free balloon;
 - (d) a permanently tethered balloon;
 - (e) a kite;
 - (f) a model aircraft;
 - (g) a parachute;
 - (h) a rocket;
 - (i) an aircraft that is prescribed by an instrument under subregulation (1B) for the purposes of this paragraph;
 - (j) an aircraft that is registered under the law of a foreign country referred to in subregulation (2);
 - (k) an aircraft that satisfies all the following conditions:
 - (i) it has been manufactured in Australia for delivery outside Australia to a foreign operator;
 - (ii) it is registered under the law of a foreign country referred to in subregulation (2);
 - (iii) it displays nationality and registration marks in accordance with the law of that country;
 - (iv) it has no certificate of airworthiness issued, or rendered valid, under the law of that country;
 - (v) it is flown within Australia only for a purpose mentioned in paragraph 21.197(1)(b) or (c);
 - (l) a Part 103 aircraft mentioned in subparagraph 103.005(4)(b)(i), (ii), (iva), (v), (vi) or (vii) that is listed with a Part 103 ASAO;
 - (m) a Part 103 aircraft mentioned in subparagraph 103.005(4)(b)(iii) or (iv);
 - (n) an RPA (other than a large RPA or an aircraft prescribed for the purposes of subregulation 47.096(2)) that is being operated only:
 - (i) for the purposes of a test flight; and
 - (ii) in circumstances applicable to the aircraft and the test flight that are prescribed by the Part 101 Manual of Standards for the purposes of subregulation 101.099B(1).

Note: For registration requirements affecting aircraft for which a special flight permit is issued, see subregulation 21.197(3).

- (1B) For the purposes of subsection 98(5A) of the Act and paragraph 47.015(1)(i) of this regulation, CASA may issue an instrument prescribing:

Regulation 47.020

- (a) classes of medium RPA, small RPA, very small RPA or micro RPA; or
- (b) particular medium RPA, small RPA, very small RPA or micro RPA.

Note 1: An instrument made under paragraph (a) is a legislative instrument: see subsection 98(5AA) of the Act.

Note 2: An instrument made under paragraph (b) is not a legislative instrument: see subsection 98(5AB) of the Act.

- (2) For paragraph (1)(j) and subparagraph (1)(k)(ii), the foreign countries are:
 - (a) the Contracting States; and
 - (b) any other foreign country with which Australia has an agreement that allows an aircraft registered under the law of that country to be operated in Australia.

Note: For the definition of *Contracting State* see section 3 of the Act.

47.020 Appointment of person to act on behalf of owners

If an aircraft is owned by more than 1 person, and is required to be registered under Division 47.C.1, the owners must, to register the aircraft, appoint one of them to act on their behalf.

Subpart 47.B—The Australian Civil Aircraft Register

47.025 Australian Civil Aircraft Register

CASA must keep a register called the Australian Civil Aircraft Register, or ensure that it is kept, in accordance with this Subpart.

Note: The Australian Civil Aircraft Register is the successor to the Aircraft Register mentioned in regulation 8 of CAR: see regulation 202.221.

47.030 Access to Australian Civil Aircraft Register

- (1) CASA must make the entries in the Australian Civil Aircraft Register about aircraft registered under Division 47.C.1 available for inspection by members of the public at reasonable times and places, and subject to reasonable conditions.
- (2) CASA may comply with subregulation (1) by making the information in those entries accessible on the internet or by another suitable electronic means.

47.035 Correction of Register

CASA must correct the information recorded in an entry in the Australian Civil Aircraft Register as soon as practicable after becoming aware that the entry is out of date or otherwise incorrect.

Note: An aircraft registration holder who finds out that anything in the Australian Civil Aircraft Register in relation to the aircraft is not correct must tell CASA about the change that should be made to the Register: see regulation 47.115.

47.040 Seeking information about Register

- (1) If CASA thinks that there may be an error in the Australian Civil Aircraft Register in relation to an aircraft, CASA may ask the aircraft registration holder, in writing, to give CASA information that may show the accuracy of the entry.

Note: Information that must be given to CASA under subregulation (1) may include a copy of a relevant document.

- (2) A request under subregulation (1) must:
 - (a) describe the information; and
 - (b) specify a period of at least 28 days, starting when the request is given to the registration holder, during which the registration holder must give CASA the information.

Note: CASA may cancel the registration of an aircraft if the registration holder fails to comply with a request for information made under subregulation (1): see regulation 47.132.

- (3) A registration holder must comply with a request made under subregulation (2).

Penalty: 10 penalty units.

Regulation 47.045

- (4) An offence under subregulation (3) is an offence of strict liability.

47.045 Communicating with CASA

- (1) A notice that, under this Part, must be given to CASA may be delivered, posted, sent by fax or sent by e-mail.

Note: The address, fax number and e-mail address for notices can be found in the advisory circular for this Part or on CASA's website: www.casa.gov.au.

- (2) CASA may refuse to accept a notice that is not legible.

47.050 Accuracy of information in Register

- (1) CASA must give, to the registration holder of an aircraft registered under Division 47.C.1, a copy of the information in the Australian Civil Aircraft Register that relates to the holder and the aircraft.
- (2) CASA must give the copy of the information within 28 days after:
- (a) the end of 3 years after the day on which:
 - (i) an aircraft is registered; or
 - (ii) if the aircraft's certificate of registration is transferred—the certificate is transferred; and
 - (b) the end of each period of 3 years after that day.
- (3) Within 28 days after the day when the registration holder is given the copy of the information, the holder must:
- (a) if necessary, correct the information on the copy about the aircraft and the holder; and
 - (b) return the copy to CASA.

Maximum penalty: 10 penalty units.

- (4) An offence against subregulation (3) is an offence of strict liability.
- (5) Information given to CASA for subregulation (3) must not be used as evidence of an offence against regulation 47.115.
- (6) This regulation is not intended to limit the operation of regulations 47.035 and 47.040.

47.055 Entries in Register etc not conclusive evidence of title to aircraft

- (1) An entry in the Australian Civil Aircraft Register in relation to an aircraft is not conclusive evidence of the existence of a legal or beneficial property interest in the aircraft.
- (2) A certificate of registration for an aircraft is not conclusive evidence of the existence of a legal or beneficial property interest in the aircraft.

Subpart 47.C—Registration of aircraft

Division 47.C.1—Registration of aircraft other than certain RPA

47.058 Application of this Division

This Division applies to aircraft other than aircraft to which Division 47.C.2 applies.

Note: Division 47.C.2 primarily deals with the registration of medium RPA, small RPA, very small RPA and micro RPA.

47.060 Applying for registration of unregistered aircraft

- (1) An application to register an unregistered aircraft may be made by the owner or a person who is acting on behalf of, and at the direction or request of, the owner.
- (2) The application must be made:
 - (a) in writing; or
 - (b) orally (by telephone or in person).

Note: An oral application must be confirmed in writing in accordance with regulation 47.070. If an oral application is not confirmed in writing in accordance with that regulation, the registration lapses: see regulation 47.130.

- (3) An application for registration made in writing must:
 - (a) be made in an approved form; and
 - (b) include the information set out in regulation 47.065; and
 - (c) be signed by the person making the application.
- (4) An application for registration made in writing must also include a declaration, signed by the person making the application:
 - (a) that the aircraft will be used as an aircraft; and
 - (b) if the aircraft has not been registered before—that the aircraft has never been registered; and
 - (c) if the aircraft has been registered before (whether in Australia or not)—that the aircraft is not, at the time of the application, registered on a foreign civil aircraft register.

47.065 Information required for registration—general

For paragraph 47.060(3)(b), and subject to regulation 47.075, the following information must be included in an application for registration of an aircraft:

- (a) the owner's name and address;
 - (aa) if the aircraft is owned by more than 1 person—the name and signature of the owner who is appointed to act on behalf of the owners; and
 - (b) if the application is made by a person on behalf of the owner—the name and address of the person making the application;

Regulation 47.070

- (c) if the owner proposes to appoint another person as the registered operator of the aircraft—the registered operator’s name and postal address, and:
 - (i) if the registered operator is an individual—his or her home address; or
 - (ii) if the registered operator is a corporation—the corporation’s registered address;
- (d) for an aircraft that has a type certificate, type acceptance certificate or provisional type certificate:
 - (i) the number of the certificate (if applicable); and
 - (ii) the production certificate number (if applicable); and
 - (iii) the manufacturer, and the country and year of manufacture, of the aircraft; and
 - (iv) the aircraft model; and
 - (v) the aircraft serial number;

Note: For paragraph (d), the aircraft’s manufacturer, model and serial number are those set out on the aircraft’s data plate.

- (e) for an aircraft to which paragraph (d) does not apply—the following:
 - (i) the aircraft manufacturer (if applicable);
 - (ii) the aircraft builder (if applicable);
 - (iii) whether the aircraft is a manned free balloon, an airship, a glider, a power-driven aeroplane, a rotorcraft or an ornithopter;
 - (iv) the country and year of manufacture of the aircraft;
 - (v) the aircraft model;
 - (vi) the aircraft serial number;
 - (vii) if the aircraft is power-driven—the number of engines and whether they are piston, turbopropeller or jet turbine engines;
 - (viii) the number of seats including seats for the crew;
 - (ix) whether the aircraft is able to be used on land, on water, or on both;
- (f) if a registration mark has been reserved for the aircraft, and the reservation has not lapsed—the registration mark;
- (g) if the aircraft has been imported:
 - (i) the name of the country from which the aircraft was imported; and
 - (ii) the aircraft’s registration mark, if any, in that country; and
 - (iii) evidence, provided by the national aviation authority of that country, that the aircraft is not on the aircraft register of that country.

Note: If the application for registration is an oral application, CASA will ask for the information mentioned in this regulation during the oral application.

47.070 Confirmation of oral application

- (1) A person who has applied orally for the registration of an aircraft must give to CASA a written confirmation of the application.
- (2) The confirmation:
 - (a) must be in an approved form; and
 - (b) must include the information required by regulation 47.065; and

- (c) must be received by CASA within 14 days after the day on which the oral application was made.

47.075 CASA may ask for further information

- (1) If CASA reasonably requires further information to enable it to consider an application for the registration of an aircraft, CASA may ask the applicant, in writing, to give CASA the information.
- (2) CASA must describe the information in the request.
- (3) CASA may refuse to consider, or cease considering, the application until the applicant complies with the request.

47.080 Registration of aircraft

- (1) CASA must register an aircraft if the application for the registration of the aircraft is made in accordance with regulation 47.060.
 - (1A) However, if:
 - (a) the aircraft has been registered before (the *old registration*); and
 - (b) the old registration was cancelled; and
 - (c) the aircraft was subject to an IDERA at the time of the cancellation;CASA must not register the aircraft unless subregulation (1B) or (1C) applies to the aircraft.
 - (1B) This subregulation applies to the aircraft if:
 - (a) the old registration was cancelled at the request of:
 - (i) the authorised party under the IDERA; or
 - (ii) if the aircraft was subject to a CDCL at the time of the cancellation—the certified designee under the CDCL; or
 - (b) CASA is satisfied, on the basis of written evidence provided by the person who has applied for the registration of the aircraft, that the authorised party under the IDERA, or the certified designee under the CDCL, as the case may be, has consented to CASA registering the aircraft.
 - (1C) This subregulation applies to the aircraft if CASA is satisfied, after reasonable enquiries, that:
 - (a) for an aircraft that was subject to a CDCL at the time of the cancellation of the old registration—the certified designee under the CDCL and the authorised party under the IDERA have both ceased to exist; or
 - (b) for an aircraft that was not subject to a CDCL at the time of the cancellation of the old registration—the authorised party under the IDERA has ceased to exist.
- (2) If CASA registers an aircraft, CASA must enter the following information about the aircraft in the Australian Civil Aircraft Register:
 - (a) the registration mark assigned to the aircraft;

Regulation 47.085

- (b) whether the aircraft is a manned free balloon, an airship, a glider, a power-driven aeroplane, a rotorcraft or an ornithopter;
- (c) its manufacturer, model and serial number;
- (d) its country and year of manufacture;
- (e) the name and address of the owner;
- (f) the name and address of the registered operator;
- (g) the day on which it was registered.

47.085 Interim certificate of registration

- (1) If CASA registers an aircraft on the basis of an oral application, CASA must:
 - (a) issue an interim certificate of registration for the aircraft; and
 - (b) tell the applicant:
 - (i) the time and date from which the interim registration is in force; and
 - (ii) a unique number that identifies the registration.

Note 1: An interim certificate includes the information set out in paragraph 47.080(2)(a) and the applicable provisions in paragraphs 47.080(2)(c) to (g).

Note 2: If the oral application is not confirmed in accordance with regulation 47.070, the registration of the aircraft lapses: see regulation 47.130.

- (2) If CASA registers an aircraft on the basis of an oral application, the aircraft registration holder must not allow the aircraft to be taken outside Australia before CASA issues the certificate of registration for the aircraft.

Maximum penalty: 50 penalty units.

Note: An interim certificate of registration is not covered by the provisions of Annex 7 to the Chicago Convention, so is only valid for flights within Australia.

- (3) An offence against subregulation (2) is an offence of strict liability.
- (4) An interim certificate of registration for an aircraft ceases to be in force on the earlier of the following:
 - (a) the day that CASA gives the certificate of registration to the aircraft's registration holder;
 - (b) 14 days after the day on which CASA registered the aircraft on the basis of an oral application.

47.090 Issue of certificate of registration

If CASA:

- (a) registers an aircraft because it has received a written application; or
- (b) receives confirmation of an oral application for the registration of an aircraft;

CASA must give a certificate of registration for the aircraft to the aircraft's owner (the **registration holder**).

Note: The certificate of registration replaces any interim certificate of registration issued under regulation 47.085.

47.095 Period of registration

The registration of an aircraft has effect unless, in accordance with these Regulations, it lapses, is suspended or is cancelled.

Regulation 47.096

Division 47.C.2—Registration of medium RPA, small RPA, very small RPA and micro RPA

47.096 Application of this Division

- (1) This Division applies to the following aircraft:
 - (a) a medium RPA;
 - (b) a small RPA;
 - (c) a very small RPA;
 - (d) a micro RPA.
- (2) However, this Division does not apply to an RPA that is prescribed by an instrument under subregulation (3) for the purposes of this subregulation.

Note: Division 47.C.1 applies to an aircraft to which this Division does not apply—see regulation 47.058.
- (3) For the purposes of subsection 98(5A) of the Act and subregulation (2) of this regulation, CASA may issue an instrument prescribing:
 - (a) classes of aircraft; or
 - (b) particular aircraft.

Note 1: An instrument made under paragraph (a) is a legislative instrument: see subsection 98(5AA) of the Act.

Note 2: An instrument made under paragraph (b) is not a legislative instrument: see subsection 98(5AB) of the Act.

47.096A Registration requirements for certain RPA

- (1) A person commits an offence of strict liability if:
 - (a) the person operates, or conducts an operation using, an aircraft that is required to be registered under this Division; and
 - (b) the aircraft is not registered under this Division.

Penalty: 50 penalty units.

- (2) A person commits an offence of strict liability if:
 - (a) the person supervises the operation by another person of an aircraft that is required to be registered under this Division; and
 - (b) the other person is under 16 years old; and
 - (c) the aircraft is not registered under this Division.

Penalty: 50 penalty units.

47.097 Application for registration of certain RPA

- (1) A person may apply to CASA to register an aircraft as an RPA.

Note: In addition to this regulation, Part 11 contains provisions relating to an application for registration under this Division.

- (2) However, an individual may apply to register an aircraft as an RPA under this Division only if the individual is at least 16 years old.

Note: The person who applies to register the aircraft will be the registration holder of the aircraft: see the definition of *registration holder* in Part 1 of the Dictionary.

Payment of unmanned aircraft levy

- (4) An application to register an aircraft as an RPA under this Division must be accompanied by the unmanned aircraft levy (if any) for the application.

Waiver or refund of unmanned aircraft levy

- (5) CASA may, on behalf of the Commonwealth, waive the payment of unmanned aircraft levy under subregulation (4), or refund levy that has been paid under that subregulation, if CASA is satisfied that there are exceptional circumstances justifying the waiver or refund.
- (6) The waiver or refund:
- (a) may be of the whole or part of the levy; and
 - (b) may be made by CASA on its own initiative, or on written application in the approved form by the applicant for the registration.

47.098 Registration of certain RPA

- (1) Subject to regulation 11.055, on an application under regulation 47.097, CASA must register an aircraft as an RPA under this Division if CASA is satisfied that the aircraft is required to be registered as provided by regulation 47.015.
- (2) If CASA registers an aircraft as an RPA under this Division, CASA must, as soon as practicable:
- (a) enter the following information about the aircraft in the Australian Civil Aircraft Register:
 - (i) the serial number on the aircraft or, if there is no serial number, the registration mark assigned by CASA to the aircraft;
 - (ii) whether the aircraft is registered as an RPA;
 - (iii) the name and address of the registration holder of the aircraft;
 - (iv) the day on which the aircraft was registered;
 - (v) the manufacturer of the aircraft;
 - (vi) the manufacturer's model (if any) of the aircraft;
 - (vii) any other information required by the approved form for the application; and
 - (b) issue a certificate of registration for the aircraft to the registration holder of the aircraft.

47.099 Period of registration

The registration of an aircraft under this Division:

- (a) begins at the time when the aircraft is registered; and

Part 47 Registration of aircraft and related matters

Subpart 47.C Registration of aircraft

Division 47.C.2 Registration of medium RPA, small RPA, very small RPA and micro RPA

Regulation 47.099B

(b) ends at the end of the period of 12 months beginning from the day when the registration begins, unless sooner cancelled.

Example: If an RPA is registered on 15 October 2022, the registration of the RPA will generally end at the end of 14 October 2023.

Note: For cancellation of a registration, see regulations 47.131C and 47.132.

47.099B Requirement to produce certificate of registration (or copy)

- (1) A person who operates, or conducts an operation of, an RPA must produce a certificate of registration, or a copy of such a certificate, in relation to the aircraft for inspection on a demand made by a person covered by subregulation (2).
- (2) For the purposes of subregulation (1), this subregulation covers the following persons:
 - (a) an authorised person;
 - (b) a member or special member of the Australian Federal Police;
 - (c) a member of a police force or a police service of a State or Territory.
- (3) A person (the *offender*) commits an offence of strict liability if:
 - (a) the offender operates, or conducts an operation of, an RPA; and
 - (b) a person makes a demand of the offender under subregulation (1); and
 - (c) the offender fails to comply with the demand.

Penalty: 5 penalty units.

- (4) A person who supervises the operation by another person of an RPA must produce a certificate of registration, or a copy of such a certificate, in relation to the aircraft for inspection on a demand made by a person covered by subregulation (2).
- (5) A person (the *supervisor*) commits an offence of strict liability if:
 - (a) the supervisor supervises the operation by another person of an RPA; and
 - (b) the other person is under 16 years old; and
 - (c) a person makes a demand of the supervisor under subregulation (4); and
 - (d) the supervisor fails to comply with the demand.

Penalty: 5 penalty units.

Subpart 47.D—Registered operator

47.100A Application of Subpart 47.D

This Subpart applies in relation to an aircraft required to be registered under Division 47.C.1.

Note: See regulation 47.058.

47.100 Identity of registered operator of aircraft

- (1) If the registration holder of an aircraft is an eligible person, the holder is the aircraft's *registered operator*.
- (2) However, the registration holder may appoint another eligible person as the registered operator.
- (3) If the registration holder is not an eligible person, the registration holder must appoint an eligible person to be the registered operator.

Note: If the registration holder of an aircraft is not an eligible person, and no eligible person is appointed as the registered operator, CASA must suspend the aircraft's registration: see regulation 47.131A.

- (4) The appointment of a registered operator has effect unless the appointment is cancelled or otherwise ceases to have effect.

Note: Regulation 202.222 provides that a reference in CAR to the holder of a certificate of registration of an aircraft is taken to be a reference to the registered operator of the aircraft. Under CAR, the holder of the certificate of registration is responsible for the maintenance and continuing airworthiness of the aircraft.

- (4A) Subject to this regulation, the appointment of a registered operator of an aircraft may be cancelled by:
 - (a) the registration holder of the aircraft; or
 - (b) the registered operator.
 - (5) If the registration holder of an aircraft:
 - (a) appoints a person as the aircraft's registered operator; or
 - (b) cancels the appointment of a person as the aircraft's registered operator;the registration holder must, within 14 days after the appointment or cancellation, give CASA a notice in an approved form, including the aircraft's registration mark, manufacturer, model and serial number.
 - (5AA) If a person cancels the appointment of the person as an aircraft's registered operator as referred to in paragraph (4A)(b), the person must, within 14 days after the cancellation, give CASA a notice in an approved form, including the aircraft's registration mark, manufacturer, model and serial number.
 - (5A) A person commits an offence of strict liability if the person fails to comply with a requirement under subregulation (5) or (5AA).
-

Regulation 47.100

Penalty: 10 penalty units.

- (5B) If CASA finds out, other than by a notice given in accordance with subregulation (5), that the appointment of the registered operator of an aircraft has ceased to have effect, CASA must, within 5 business days, inform the aircraft's registration holder in writing.
- (6) A notice of the appointment of a registered operator must also include:
- (a) the registered operator's name and postal address, and:
 - (i) if the registered operator is an individual—his or her home address; or
 - (ii) if the registered operator is a corporation—the address of the corporation's registered office; and
 - (b) the date of the appointment of the registered operator; and
 - (c) evidence that the registered operator accepts the appointment.
- (7) A notice of the cancellation of the appointment of a registered operator given under subregulation (5) or (5AA) must include the date of the cancellation.
- Note: If the appointment of the registered operator is cancelled and another registered operator is not appointed, the registration holder becomes the aircraft's registered operator. However, if the registration holder is not an eligible person, CASA must suspend the aircraft's registration: see regulation 47.131A.
- (8) If CASA receives a notice that complies with this regulation, CASA must:
- (a) amend the Australian Civil Aircraft Register to show the name and address of the new registered operator; and
 - (b) in writing, notify the registration holder and the new registered operator about the amendment of the Register.

Subpart 47.E—Transfer of ownership of aircraft

47.105A Application of Subpart 47.E

This Subpart applies in relation to an aircraft required to be registered under Division 47.C.1.

Note: See regulation 47.058.

47.105 Meaning of *former owner* and *new owner*

For this Subpart, if the ownership of an aircraft is transferred, the transferor is the *former owner* and the transferee is the *new owner*.

47.110 Transfer of ownership

- (1) In this regulation, *transfer notice* means a notice in an approved form that relates to the transfer of ownership of an aircraft and:
 - (a) shows:
 - (i) the aircraft's registration mark, manufacturer, model and serial number; and
 - (ii) the date of the transfer; and
 - (iii) the former owner's name and address; and
 - (iv) the new owner's name and address; and
 - (b) either:
 - (i) is signed by the former owner; or
 - (ii) is signed by a person acting on behalf of, and at the direction or request of, the former owner.
- (2) If a transfer notice is signed by a person acting on behalf of the former owner, it must include evidence of the person's authority to do so.
- (3) This regulation sets out how, if the ownership of an aircraft is transferred, the new owner becomes the aircraft's registration holder.
- (4) In accordance with the timetable mentioned in subregulation (4A), the former owner, or a person acting on behalf of the former owner, must:
 - (a) give CASA a transfer notice; and
 - (b) give the new owner:
 - (i) a copy of the transfer notice; and
 - (ii) the aircraft's certificate of registration.
- (4A) The documents mentioned in subregulation (4) must be given to CASA and the new owner:
 - (a) as soon as practicable after the transfer; and
 - (b) in any case, within 14 days after the transfer.

Regulation 47.110

- (5) Within 28 days after the transfer, the new owner must apply to become the registration holder.
- Note: If the aircraft's new owner does not apply to be the new registration holder within 28 days after the day of the transfer, CASA must suspend the aircraft's registration: see regulation 47.131.
- (6) An application must:
- (a) be in an approved form; and
 - (c) either:
 - (i) be signed by the new owner; or
 - (ii) if the application is made by a person on behalf of the new owner—include the name, address and signature of the person making the application.
- (7) CASA must, if it receives a transfer notice and an application that complies with subregulation (6):
- (a) amend the Australian Civil Aircraft Register to show the new owner as the registration holder; and
 - (b) give a certificate of registration to the new owner.
- Note 1: The new owner, as the registration holder, is also the registered operator of the aircraft unless the new owner appoints another person as the registered operator: see regulation 47.100.
- Note 2: If the new owner is not an eligible person, the new owner must appoint an eligible person as the registered operator: see subregulation 47.100(3).
- (8) Subregulation (7) has effect subject to subregulation (9).
- (9) CASA must not take any action under subregulation (7) in relation to an aircraft unless CASA is satisfied, on the basis of written evidence provided by the former owner, that:
- (a) in the case of an aircraft that is subject to an IDERA, and is not subject to a CDCL—the authorised party under the IDERA has consented to the action being taken; or
 - (b) in the case of an aircraft that is subject to a CDCL—the certified designee under the CDCL has consented to the action being taken.

Subpart 47.F—Administration of Australian Civil Aircraft Register

47.115 Notice of error in information in Register

If an aircraft registration holder finds out that anything in the Australian Civil Aircraft Register in relation to the aircraft is no longer correct, the holder must tell CASA in writing, within 14 days after finding out, about the change that should be made.

Maximum penalty: 10 penalty units.

47.130 Lapsing of registration

If the aircraft was registered following an oral application, the registration lapses if:

- (a) CASA does not receive a written confirmation of the application in accordance with regulation 47.070; or
- (b) within 14 days after the day the oral application was made, CASA has not received a written confirmation that includes all the information mentioned in regulation 47.065; or
- (c) CASA receives a document purporting to be a written confirmation that includes information that differs in a significant way from the corresponding information given orally to CASA.

47.131 Suspension and cancellation of registration following a transfer of ownership

- (1) This regulation applies if:
 - (a) the ownership of an aircraft registered under Division 47.C.1 is transferred; and
 - (b) the new owner does not, within 28 days after the day of the transfer, make an application that complies with subregulation 47.110(6) to be the aircraft's registration holder.
- (2) CASA must, by written notice given to the new owner, suspend the aircraft's registration.
- (3) The suspension remains in force until the first-occurring of the following:
 - (a) CASA issues a new certificate of registration to the new owner;
 - (b) CASA cancels the registration.
- (4) If the new owner does not, within 3 months after the day the aircraft's registration was suspended, make an application that complies with subregulation 47.110(6) to be the aircraft's registration holder, CASA must, by written notice given to the new owner, cancel the registration.

Regulation 47.131A

47.131A Suspension and cancellation of registration if registered operator is not an eligible person

- (1) If CASA becomes aware that the registered operator of an aircraft is not an eligible person, CASA must, by written notice given to the registration holder of the aircraft, suspend the aircraft's registration.

Note: Subregulation (1) will not apply if the registration holder of the aircraft is an eligible person: see subregulation 47.100(1).

- (2) The suspension:
- (a) takes effect on the day the notice is given to the registration holder; and
 - (b) ends at the earlier of the following times:
 - (i) when the Australian Civil Aircraft Register is amended, in accordance with subregulation 47.100(8), to show the name and address of a new registered operator;
 - (ii) when CASA cancels the registration.
- (3) If the registration holder does not, within 3 months after the day the aircraft's registration was suspended under this regulation, give a notice under subregulation 47.100(5) appointing an eligible person as the aircraft's registered operator, CASA must, by written notice given to the registration holder, cancel the registration.
- (4) The cancellation takes effect on the day the notice is given to the registration holder.

47.131B Cancellation of registration at holder's request—limitations

CASA must not cancel, under Subpart 11.D, the registration of an aircraft registered under Division 47.C.1 if:

- (a) in the case of an aircraft that is subject to an IDERA, and is not subject to a CDCL—the person who requests the cancellation is not the authorised party under the IDERA; or
- (b) in the case of an aircraft that is subject to a CDCL—the person who requests the cancellation is not the certified designee under the CDCL.

47.131C Cancellation of registration—certain RPA

- (1) CASA must, by written notice given to the registration holder of an RPA registered under Division 47.C.2, cancel the registration of the aircraft if:
- (a) CASA is satisfied that the aircraft has been modified to such an extent that, in accordance with the requirements prescribed by the Part 101 Manual of Standards for the purposes of subregulation 101.099A(1), the aircraft is no longer an aircraft to which the registration applies; or
 - (b) CASA is satisfied that the cancellation of the registration is necessary to maintain the accuracy of the Register.

Note: For review of a decision to cancel a registration, see regulation 201.004.

- (2) CASA may, by written notice given to the registration holder of an RPA registered under Division 47.C.2, cancel the registration of the RPA if another certificate of registration for the RPA is issued to another person.

47.132 Cancellation of registration on other grounds

- (1) CASA must, by written notice given to the registration holder of an aircraft, cancel the registration of the aircraft if CASA becomes aware that the aircraft:
- (a) is registered under the law of another country; or
 - (b) is no longer to be used as an aircraft; or
 - (c) has been stolen or destroyed.
- (2) CASA may, by written notice given to the registration holder of an aircraft, cancel the registration of the aircraft if the registration holder does not comply with a request under subregulation 47.040(1).
- (3) CASA must, by written notice given to the registration holder of an aircraft, cancel the registration of the aircraft if CASA is required, under the *International Interests in Mobile Equipment (Cape Town Convention) Rules 2014*, to de-register the aircraft.
- (4) A cancellation under this regulation takes effect on the day the notice is given to the registration holder.

Subpart 47.G—Reservation, assignment and change of registration marks

47.139 Application of Subpart 47.G

This Subpart applies in relation to an aircraft required to be registered under Division 47.C.1.

Note: See regulation 47.058.

47.140 Meaning of *aircraft* for Subpart 47.G

In this Subpart:

aircraft includes an aircraft that:

- (a) has not yet been built; or
- (b) is being built.

47.145 Reservation of registration mark

- (1) The owner of an aircraft may ask CASA, in writing, to reserve a particular registration mark for the aircraft, whether or not the aircraft is registered.
- (2) The request must be in an approved form and identify the aircraft.
- (3) On receiving a request, CASA must reserve the registration mark for the aircraft unless, under regulation 47.155, the mark must not be reserved for an aircraft.

Note: About registration marks generally: see Part 45.

- (4) The reservation lapses if, 12 months after the day on which the registration mark was reserved, the aircraft is not registered and using the reserved mark.
- (5) In subregulation (1), *owner* includes a person acting on behalf of, and at the direction or request of, the owner.

47.150 Assignment of registration mark

If a person applies for the registration of an aircraft, and:

- (a) CASA has not reserved a registration mark for the aircraft under regulation 47.145; or
 - (b) the reservation of a registration mark for the aircraft has lapsed;
- CASA must assign a registration mark to the aircraft before registering the aircraft.

47.155 Marks that must not be reserved or assigned

The following registration marks must not be reserved for, or assigned to, an aircraft:

- (a) the registration mark of an Australian aircraft;
- (b) a registration mark that has been reserved for an aircraft under regulation 47.145;
- (c) a mark that has been assigned to a dealer;
- (d) a mark that might be confused with any 5-letter combination used in Part II of the International Code of Signals;
- (e) a mark that might be confused with any 3-letter combination beginning with Q used in the Q Code;
- (f) a mark that might be confused with the distress signal SOS;
- (g) a mark that might be confused with an urgency or safety signal.

Examples: Of urgency or safety signals

XXX, PAN and TTT.

47.160 Assigning reserved registration mark to unregistered aircraft

If the owner of an unregistered aircraft:

- (a) reserves a registration mark for the aircraft; and
- (b) makes an application that complies with regulation 47.060 for registration of the aircraft;

CASA must, when it registers the aircraft, give the applicant a certificate of registration showing the reserved mark.

47.165 Change of registration mark

- (1) If the registration holder of a registered aircraft has reserved a registration mark (the *reserved mark*) for the aircraft:
 - (a) the holder; or
 - (b) if the registered operator has the written consent of the registration holder—the registered operator;may apply to CASA to change the aircraft's existing mark to the reserved mark.
- (2) The application must:
 - (a) be received by CASA at least 14 days before the day on which the existing mark is proposed to be changed; and
 - (b) be in an approved form and include the following:
 - (i) the aircraft's existing mark;
 - (ii) the aircraft's manufacturer, model and serial number;
 - (iii) the reserved mark;
 - (iv) the date on which the existing mark is proposed to be changed;
 - (v) if the application is made by a person on behalf of the registration holder or registered operator—the name and address of the person making the application.
- (3) If CASA approves the application, CASA must:
 - (a) as soon as practicable, notify the applicant, in writing, of the approval; and

Regulation 47.165

- (b) on the date specified in the application in accordance with subparagraph (2)(b)(iv), amend the Australian Civil Aircraft Register to show the reserved mark as the registration mark assigned to the aircraft; and
 - (c) as soon as practicable after making the amendment, give the applicant a certificate of registration showing the reserved mark.
- (4) The change of registration mark takes effect on the day the Australian Civil Aircraft Register is amended.

Subpart 47.H—Dealer's marks

47.169 Application of Subpart 47.H

This Subpart applies in relation to an aircraft required to be registered under Division 47.C.1.

Note: See regulation 47.058.

47.170 Definitions for Subpart 47.H

In this Subpart:

aircraft dealer includes a manufacturer or distributor of aircraft.

dealer's plate means a plate made by an aircraft dealer under regulation 47.205.

47.175 Assignment of dealer's marks

- (1) This regulation sets out the way in which an aircraft dealer may be assigned 1 or more marks for use on aircraft manufactured, or being distributed or dealt with, by the dealer.
- (2) An aircraft dealer may apply to be assigned a mark only if the dealer is an eligible person.
- (3) The application must be made in an approved form and must include:
 - (a) the dealer's name and address; and
 - (b) a declaration that the dealer is an eligible person; and
 - (c) evidence that the dealer is engaged in the manufacture, sales or distribution of aircraft in Australia; and
 - (d) a request for a particular number of marks and a statement explaining why the dealer needs that number of marks; and
 - (e) if the application is made by a person on behalf of the dealer—the name and address of the person making the application.
- (4) If the application complies with subregulation (3), CASA must assign to the dealer:
 - (a) the number of marks requested by the dealer; or
 - (b) if CASA thinks that the dealer has applied for more marks than is reasonably required to undertake the dealer's business—a lesser number of marks.

47.180 What marks may be assigned to dealers

A mark that is assigned to an aircraft dealer must be a mark that could be assigned to an aircraft as a registration mark.

Regulation 47.185

47.185 Record of dealer's marks

- (1) CASA must keep a record of dealer's marks that have been assigned to aircraft dealers.
- (2) The information in the record must include:
 - (a) the mark; and
 - (b) the aircraft dealer's name and address.

47.190 How long assignment to dealer remains in effect

The assignment of a dealer's mark to an aircraft dealer has effect unless CASA revokes the assignment.

Note: For revocation of the assignment of a dealer's mark: see regulation 47.225.

47.195 Certificate of assignment of dealer's mark

- (1) If CASA assigns a dealer's mark to an aircraft dealer, CASA must give to the dealer a certificate stating that the mark is assigned to the dealer.
- (2) Each such certificate must be for 1 dealer's mark only.

47.205 Dealer's plate

- (1) If CASA assigns a dealer's mark to an aircraft dealer, the dealer may make 1 dealer's plate bearing that mark.
- (2) The plate must:
 - (a) be a piece of stainless steel (or similar fireproof material) at least 100 mm by 160 mm and at least 1 mm thick; and
 - (b) be engraved with the following in sans serif capital letters:
 - (i) 'VH-' and the mark in letters at least 25 mm high;
 - (ii) 'CIVIL AVIATION SAFETY AUTHORITY' and 'DEALER'S PLATE CASR 1998' in letters at least 8 mm high;set out as shown in the following diagram, in which the letters 'ABC' represent the mark:

47.210 Use of dealer's marks

- (1) An aircraft dealer to whom a dealer's mark is assigned must use the mark only on an aircraft that:
 - (a) is not currently registered in any country; and
 - (b) was manufactured, or is being distributed or dealt with, by the dealer.

Maximum penalty: 10 penalty units.

- (2) If title to, or possession of, an unregistered aircraft on which a dealer's mark is being used passes to another person, the dealer must ensure that the plate is removed from the aircraft before the other person operates the aircraft.

Maximum penalty: 30 penalty units.

- (3) The aircraft dealer must keep records showing:
 - (a) the manufacturer, model and serial number of each aircraft on which the mark was used; and
 - (b) the periods during which it was used on that aircraft.

Maximum penalty: 10 penalty units.

- (4) The aircraft dealer must keep the records for 12 months after the end of the period during which the mark was used on an aircraft.

Maximum penalty: 10 penalty units.

- (5) An offence against subregulation (1), (2), (3) or (4) is an offence of strict liability.

47.215 Aircraft taken to be registered

An unregistered aircraft on which a dealer's mark is being used is taken to be registered during any period in which it is being operated in Australia if:

- (a) the aircraft carries the corresponding dealer's plate; and
- (b) the possession of the aircraft remains with the dealer.

Note: Flying an unregistered aircraft may be an offence: see subsection 20AA(1) of the Act.

47.220 Annual report to CASA on aircraft using dealer's marks

- (1) An aircraft dealer to whom a dealer's mark has been assigned must, within 1 month after the end of each reporting period, give CASA a report showing the manufacturer, model and serial number of each aircraft on which the mark was used during that period.

Maximum penalty: 30 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.
- (3) In subregulation (1):

Regulation 47.225

reporting period means:

- (a) the period of 12 months beginning on the day on which the mark was assigned to the dealer; or
- (b) each consecutive period of 12 months at the end of which the mark is still assigned to the dealer; or
- (c) a period of less than 12 months beginning on the day on which the mark was assigned to the dealer, or an anniversary of that day, and ending on the day on which the assignment of the mark is revoked or otherwise ceases.

47.225 Revocation of assignment of dealer's mark etc

- (1) CASA must revoke the assignment of a dealer's mark to a person if the person:
 - (b) ceases to be an aircraft dealer, or an eligible person; or
 - (c) fails to comply with this Subpart.
- (2) If CASA revokes such an assignment, it must tell the person in writing that it has done so.
- (3) The person must return the certificate of assignment of the mark to CASA within 14 days after receiving the notice of the revocation.

Maximum penalty: 10 penalty units.

- (4) An offence against subregulation (3) is an offence of strict liability.

Part 60—Synthetic training devices

Table of contents

Subpart 60.A—Preliminary

- 60.005 Applicability
- 60.010 Definitions for Part 60

Subpart 60.B—Flight simulators and flight training devices

- 60.015 Definitions for Subpart 60.B
- 60.020 Qualification levels
- 60.025 Application for flight simulator qualification or flight training device qualification
- 60.030 Initial evaluation and qualification
- 60.035 Issue of flight simulator qualification certificate or flight training device qualification certificate
- 60.040 Period of validity of flight simulator qualification or flight training device qualification
- 60.045 Recurrent evaluation of qualified flight simulator or qualified flight training device
- 60.050 Variation, cancellation or suspension of flight simulator qualification or flight training device qualification
- 60.055 Flight simulator and flight training device approvals—persons other than Part 141 operators and Part 142 operators
- 60.060 Quality system—operators other than Part 141 operators and Part 142 operators
- 60.065 Ongoing fidelity requirements
- 60.070 Modification of qualified flight simulator or qualified flight training devices
- 60.075 Change in qualification level of qualified flight simulator or qualified flight training device
- 60.080 Deactivation, relocation or reactivation of qualified flight simulator or qualified flight training device
- 60.085 Change of operator of qualified flight simulator or qualified flight training device
- 60.090 Evaluation teams
- 60.095 Records

Subpart 60.C—Basic instrument flight trainers

Subpart 60.A—Preliminary

60.005 Applicability

This Part applies to synthetic training devices that may be used by a person to gain aeronautical experience.

60.010 Definitions for Part 60

In this Part:

Manual of Standards means the document called ‘Manual of Standards (MOS) – Part 60’ published by CASA, as in force from time to time.

master QTG, for a synthetic training device, means the QTG approved for the device under this Part.

QTG (or **qualification test guide**), for a synthetic training device, means a document that:

- (a) shows that:
 - (i) the performance and handling qualities of the synthetic training device agree, within the limits set out in the Manual of Standards, with those of the aircraft to which it relates; and
 - (ii) all applicable requirements in these Regulations have been met; and
- (b) includes the following information that relates to the matters mentioned in paragraph (a):
 - (i) data relating to the performance and handling qualities of the aircraft and synthetic training device;
 - (ii) the validation tests, and all functions and subjective tests for the device.

user, of a flight simulator or flight training device, means the person who uses the simulator or device in a training, testing or checking program.

Subpart 60.B—Flight simulators and flight training devices

60.015 Definitions for Subpart 60.B

In this Subpart:

flight simulator qualification, for a flight simulator, means a qualification of the flight simulator under regulation 60.030.

flight simulator qualification certificate, means a certificate issued under regulation 60.035 for a qualified flight simulator.

flight training device qualification, for a flight training device, means a qualification of the flight training device under regulation 60.030.

flight training device qualification certificate, means a certificate issued under regulation 60.035 for a qualified flight training device.

operator, of a flight simulator or flight training device, means the person who is responsible for the maintenance and operation of the simulator or device.

qualification level, for a flight simulator or flight training device, has the meaning given by regulation 60.020.

60.020 Qualification levels

- (1) The qualification level of a flight simulator is the level mentioned in column 2 of an item in table 60.020-1 met by the simulator, determined in accordance with the standards in the Manual of Standards.

Table 60.020-1 Flight simulator qualification levels

Item	Levels
1	Level A
2	Level B
3	Level C
4	Level D

- (2) The qualification level of a flight training device is the level mentioned in column 2 of an item in table 60.020-2 met by the device, determined in accordance with the standards in the Manual of Standards.

Table 60.020-2 Flight training device qualification levels

Item	Levels
1	FAA Level 4

Regulation 60.025

Item	Levels
2	FAA Level 5
3	FAA Level 6
4	FAA Level 7
5	EASA Level 1
6	EASA Level 2
7	EASA Level 3

60.025 Application for flight simulator qualification or flight training device qualification

- (1) The operator of a flight simulator or flight training device may apply to CASA, in writing, for qualification of the simulator or device.

Note 1: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.

Note 2: Part 11 deals with applications and decision making.

- (2) An application must include:
- (a) a QTG for the simulator or device; and
 - (b) a document describing the quality system that the operator proposes to use to satisfy regulation 60.060.

Note: For further guidance see Advisory Circulars 60-1, 60-3 and 60-4.

60.030 Initial evaluation and qualification

- (1) If CASA receives an application for the qualification of a flight simulator or flight training device, CASA must conduct an evaluation (an **initial evaluation**) of the simulator or device, including consideration of:
- (a) any inspection or trial of the simulator or device; and
 - (b) the data provided in the QTG; and
 - (c) information available from any test conducted during the initial evaluation.

Note: CASA may arrange for an evaluation to be conducted by an evaluation team: see regulation 60.090.

- (2) If, after the initial evaluation, CASA is satisfied that:
- (a) the operator's quality system will be suitable for the simulator or device; and
 - (b) the simulator or device meets a qualification level;
- CASA must qualify the simulator or device at the qualification level.

Note: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to qualify, or cancelling, suspending or varying, the qualification of, a simulator or device; or
- (b) a decision imposing a condition on the qualification of a device.

- (3) CASA may qualify a simulator or device that will simulate a new type of aircraft for which fully validated aircraft data is not available at an interim qualification level that is based on partially validated aircraft data.
- (4) An interim qualification level applies for the period agreed between CASA and the operator of the simulator or device.
- (5) If CASA qualifies a simulator or device, it must at the same time approve the QTG for the simulator or device.

60.035 Issue of flight simulator qualification certificate or flight training device qualification certificate

- (1) CASA must issue a flight simulator qualification certificate to the operator of a flight simulator, or a flight training device qualification certificate to the operator of a flight training device, if CASA qualifies the simulator or device.
- (2) The certificate must include the name of the operator and:
 - (a) include information identifying the simulator or device; and
 - (b) specify the aircraft that is simulated by the simulator or device; and
 - (c) specify the qualification level for the simulator or device.

60.040 Period of validity of flight simulator qualification or flight training device qualification

- (1) A flight simulator qualification or flight training device qualification is in force for:
 - (a) 12 months from the date of issue of the flight simulator qualification certificate or flight training device qualification certificate; or
 - (b) if a shorter period is specified in the certificate—that period.
- (2) However, a qualification ceases to be in force if:
 - (a) it is cancelled by CASA under regulation 60.050; or
 - (b) there is a change of operator of the simulator or device; or
 - (c) the simulator or device is deactivated or relocated.
- (3) A qualification is not in force for the period of any suspension imposed by CASA under regulation 60.050.

60.045 Recurrent evaluation of qualified flight simulator or qualified flight training device

- (1) The operator of a qualified flight simulator or qualified flight training device may, within 60 days before the expiry of the flight simulator qualification or flight training device qualification, ask CASA, in writing, to conduct an evaluation (a *recurrent evaluation*) of the simulator or device.

Note: CASA may arrange for an evaluation to be conducted by an evaluation team: see regulation 60.090.

Regulation 60.050

- (2) Subject to subregulation (3), regulations 60.030 and 60.035 apply in respect of a recurrent evaluation in the same way as they apply to the initial evaluation.
- (3) During a recurrent evaluation, a qualified flight simulator or qualified flight training device must be assessed against:
 - (a) the qualification level at which the simulator or device was qualified at the initial qualification or accreditation of the simulator or device in Australia; or
 - (b) if CASA has changed the qualification level since the initial evaluation—the qualification level as changed.

60.050 Variation, cancellation or suspension of flight simulator qualification or flight training device qualification

- (1) CASA may, by notice in writing to the operator of a qualified flight simulator or qualified flight training device, vary, cancel or suspend the qualification of the simulator or device if:
 - (a) the simulator or device no longer meets the qualification level specified in its qualification certificate; or
 - (b) the operator has failed to comply with a requirement of this Part in relation to the simulator or device.
- (2) If an operator receives a notice of variation or cancellation under subregulation (1), the operator must return the qualification certificate to CASA within 14 days after receiving the notice.
- (3) If CASA varies a qualification, CASA must reissue the qualification certificate specifying the qualification as varied.

60.055 Flight simulator and flight training device approvals—persons other than Part 141 operators and Part 142 operators

- (1) This regulation applies to a person, other than a Part 141 operator or a Part 142 operator, who proposes to be the user of a qualified flight simulator or a qualified flight training device.
- (1AA) The person must apply to CASA, in writing, for approval to use the simulator or device.

Note 1: See Advisory Circulars 60-2 and 60-4.

Note 2: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.

Note 3: Part 11 deals with applications and decision making.

- (1A) Subject to regulation 11.055, CASA may grant the approval.

Note: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to grant, or cancelling, suspending or varying, an approval; or
- (b) a decision imposing a condition on an approval.

- (2) In considering whether to grant an approval, CASA must take into account:
-

- (a) the differences between the characteristics of the flight simulator or flight training device and the characteristics of a specific type (or a specific make, model and series) of aircraft, whether or not the user operates such an aircraft; and
 - (b) the proposed user's operating and training competencies.
- (3) CASA may also take into account any other matter that affects the way the simulator or device operates or may be used.
- (5) An approval continues in force unless the applicable flight simulator qualification or flight training device qualification ceases to be in force.
- (6) However, if CASA is satisfied that any matter that was taken into account under subregulation (2) or (3) has changed, CASA may, by notice in writing to the user, vary, suspend or cancel the approval.

60.060 Quality system—operators other than Part 141 operators and Part 142 operators

- (1) This regulation applies to the operator of a qualified flight simulator or a qualified flight training device, other than a Part 141 operator or a Part 142 operator.
- (1A) The operator must establish and maintain a quality system that ensures the correct operation and maintenance of the simulator or device.
- (2) The quality system must cover at least the following matters:
- (a) quality policy;
 - (b) management responsibility;
 - (c) document control;
 - (d) resource allocation;
 - (e) quality procedures;
 - (f) internal audit.

Note: The quality system may be structured according to the size and complexity of the operator's organisation, in accordance with the requirements set out in the following documents:

- (a) AS/NZS ISO 9001:2000 Quality Management System Requirements;
- (b) SQAP:2000 Simulator Quality Assurance Program Standard published by the FAA.

60.065 Ongoing fidelity requirements

- (1) The operator of a qualified flight simulator or qualified flight training device must, progressively during the 12 months after the issue of the applicable flight simulator qualification certificate or flight training device qualification certificate, perform:
- (a) all validation tests mentioned in the master QTG for the simulator or device; and

Regulation 60.070

- (b) all functions and subjective tests within the current (and any planned) training program (or an equivalent sample approved by CASA).
- (2) The operator must establish a configuration management system to ensure the continued integrity of the equipment and software of the simulator or device.
- (3) The operator must maintain an on-going modification program to ensure that the equipment, software and performance of the simulator or device accurately simulates the aircraft specified in the certificate.
- (4) The operator must notify each user of the simulator or device, before its use, if the simulator or device is unsuitable for any training, testing or checking sequence specified in the certificate.

60.070 Modification of qualified flight simulator or qualified flight training devices

- (1) The operator of a qualified flight simulator or qualified flight training device must notify CASA, in writing, if it proposes to modify the equipment or software of the simulator or device in a way that will change the characteristics of the simulator or device.
 - (2) If CASA receives a notice under subregulation (1), CASA may conduct an evaluation (a *special evaluation*) of the simulator or device as it is proposed to be modified.
 - (3) Subject to subregulations (4) and (5), regulations 60.030 and 60.035 apply in respect of a special evaluation in the same way as they apply to the initial evaluation.
 - (4) If CASA decides not to conduct a special evaluation:
 - (a) the operator may make the proposed modification of the simulator or device; and
 - (b) the flight simulator or flight training device qualification continues to be in force.
 - (5) During a special evaluation, a simulator or device must be assessed against:
 - (a) the qualification level at which the simulator or device was qualified at the initial qualification or accreditation of the simulator or device in Australia; or
 - (b) if CASA has changed the qualification level since the initial evaluation—the qualification level as changed.
- Note: CASA may arrange for an evaluation to be conducted by an evaluation team: see regulation 60.090.
- (6) This regulation does not apply to the modification of a device for the purpose of a change in the qualification level of the simulator or device.

60.075 Change in qualification level of qualified flight simulator or qualified flight training device

- (1) The operator of a qualified flight simulator or qualified flight training device may ask CASA, in writing, to change the qualification level of the simulator or device.

Note: For further guidance about qualification levels see the Manual of Standards.

- (2) If CASA receives a request under subregulation (1), it must conduct a special evaluation of the simulator or device, applying the standards in the Manual of Standards.

Note: CASA may arrange for an evaluation to be conducted by an evaluation team: see regulation 60.090.

- (3) If CASA changes the qualification level, it must:
 - (a) approve any resulting amendments to the master QTG of the simulator or device; and
 - (b) issue a revised flight simulator qualification certificate or flight training device qualification certificate.

60.080 Deactivation, relocation or reactivation of qualified flight simulator or qualified flight training device

- (1) The operator of a qualified flight simulator or qualified flight training device must notify CASA, in writing, if the simulator or device is deactivated.
- (2) An operator must notify CASA, in writing, before the operator reactivates or relocates a simulator or device, and CASA may then conduct a special evaluation of the simulator or device.

Note 1: A flight simulator qualification or flight training device qualification ceases to be in force if the simulator or device is deactivated or relocated: see paragraph 60.040(2)(c).

Note 2: CASA may arrange for an evaluation to be conducted by an evaluation team: see regulation 60.090.

- (3) During a special evaluation, a flight simulator or flight training device must be assessed against:
 - (a) the qualification level at which the simulator or device was qualified at the initial qualification or accreditation of the simulator or device in Australia; or
 - (b) if CASA has changed the qualification level since the initial evaluation—the qualification level as changed.

60.085 Change of operator of qualified flight simulator or qualified flight training device

- (1) The operator of a qualified flight simulator or qualified flight training device must notify CASA, in writing, of any proposed change of operator of the simulator or device.

Regulation 60.090

- (2) If there is a change of operator of a simulator or device:
 - (a) the former operator must give to the new operator the records mentioned in regulation 60.095 that apply to the simulator or device; and
 - (b) the new operator may apply to CASA, in writing, for qualification of the simulator or device.
- (3) An application under paragraph (2)(b) must be accompanied by a plan of transfer setting out in detail how the new operator will comply with the requirements of this Subpart.
- (4) If CASA is satisfied that the new operator is able to comply with the requirements of this Subpart, CASA must:
 - (a) approve the plan; and
 - (b) issue a new flight simulator qualification certificate or flight training device qualification certificate.

Note: A flight simulator qualification or flight training device qualification ceases to be in force if there is a change of operator: see paragraph 60.040(2)(b).

60.090 Evaluation teams

CASA may:

- (a) arrange for an evaluation mentioned in this Subpart to be conducted by an evaluation team; and
- (b) appoint a person to be an evaluation team leader, having regard to the skills, qualifications and experience necessary to undertake the evaluation.

Note: See Advisory Circulars 60-1 and 60-4.

60.095 Records

- (1) The operator of a qualified flight simulator or qualified flight training device must keep the following records relating to the simulator or device for at least 3 years after the simulator or device is decommissioned:
 - (a) the master QTG;
 - (b) modification records;
 - (c) quality system records.
- (2) The operator must also keep the results of each test carried out under subregulation 60.065(1) for the simulator or device for at least 3 years after the test.
- (3) If there is a change of operator of a simulator or device, the new operator must keep the records and test results relating to the simulator or device that were kept by the former operator.

Subpart 60.C—Basic instrument flight trainers

Note: This Subpart heading is reserved for future use.

Part 61—Flight crew licensing

Table of contents

Subpart 61.A—Preliminary

Division 61.A.1—General

- 61.005 What Part 61 is about
- 61.007 Application of Part 61
- 61.010 Definitions for Part 61
- 61.015 Definition of *category* of aircraft for Part 61
- 61.020 Definition of *class* of aircraft for Part 61
- 61.025 Definition of *aeroplane* for Part 61
- 61.035 Issue of Manual of Standards for Part 61
- 61.040 Approvals by CASA for Part 61
- 61.045 Prescription of qualification standards for flight simulation training devices
- 61.047 Prescription of recognised foreign States
- 61.050 Prescription of multi-engine aeroplanes included in single-engine aeroplane class
- 61.055 Prescription of type ratings and variants—multi-crew aircraft
- 61.060 Prescription of type ratings—single-pilot aircraft
- 61.061 Prescription of type-rated aircraft—flight review requirements for class ratings
- 61.062 Prescription of types of aircraft for additional limitations on class ratings
- 61.063 Prescription of types of single engine helicopters for flight reviews
- 61.065 Conduct of unauthorised activities—holders of flight crew licences

Division 61.A.2—Flight time and other aeronautical experience

- 61.070 Flight to which Division 61.A.2 applies
- 61.075 Definition of *aeronautical experience* for Part 61
- 61.080 Definition of *flight time* as pilot for Part 61
- 61.085 Definition of *flight time* as co-pilot for Part 61
- 61.090 Definition of *flight time* as pilot in command for Part 61
- 61.095 Definition of *flight time* as pilot in command under supervision for Part 61
- 61.100 Definition of *flight time* as flight engineer for Part 61
- 61.105 Definition of *instrument flight time* for Part 61
- 61.110 Definition of *instrument ground time* for Part 61

Division 61.A.3—Performing flight crew duties without licence, rating or endorsement

Subdivision 61.A.3.1—Student pilots

- 61.112 Flying as a student pilot
- 61.113 General requirements for student pilots
- 61.114 Solo flights—medical requirements for student pilots
- 61.115 Solo flights—recent experience requirements for student pilots
- 61.116 Student pilots authorised to taxi aircraft
- 61.117 Identity checks—student pilots
- 61.118 Production of medical certificates etc. and identification—student pilots

Subdivision 61.A.3.2—Other circumstances in which flight crew duties may be performed without licence, rating or endorsement

- 61.119 Flying without licence—flight engineer duties
- 61.120 Operation of aircraft radio without licence
- 61.125 Conducting flight activities without rating or endorsement
- 61.126 Conducting flight activities without having met proficiency check or flight review
- 61.130 Operation of helicopter using auto flight control system without licence or rating
- 61.135 Authorisation to conduct flight training or flight test without holding type rating
- 61.140 Authorisation to test aircraft without holding type rating
- 61.145 Piloting glider without holding glider pilot licence

Subpart 61.B—Grant of flight crew licences, ratings and endorsements**Division 61.B.1—General**

- 61.150 People who may grant flight crew licences, ratings and endorsements
- 61.155 Applications for flight crew licences, ratings and endorsements
- 61.160 Grant of flight crew licences
- 61.165 Grant of flight crew ratings
- 61.170 Grant of flight crew endorsements
- 61.175 How CASA issues flight crew licences, ratings and endorsements
- 61.180 How examiner, instructor or approval holder issues rating or endorsement
- 61.185 New licence document if licence, rating or endorsement cancelled
- 61.190 Licence holder to comply with limitations and requirements of Part 61

Division 61.B.2—Flight training and other training

- 61.195 Flight training requirements
- 61.200 Differences training requirements
- 61.205 When training must not be conducted in aircraft
- 61.210 Other approved courses of training or professional development

Division 61.B.3—Aeronautical knowledge examinations

- 61.215 Aeronautical knowledge examinations—general
- 61.220 Aeronautical knowledge examinations—air transport pilot licence
- 61.225 Aeronautical knowledge examinations—pass standards
- 61.230 Aeronautical knowledge examinations—knowledge deficiency reports

Division 61.B.4—Flight tests

- 61.235 Flight tests for flight crew licences and ratings—prerequisites
- 61.240 Consequences of taking flight test when ineligible
- 61.245 Conduct of flight tests for flight crew licences, ratings and endorsements
- 61.250 Pass standards for flight tests

Division 61.B.5—English language proficiency

- 61.255 Aviation English language proficiency assessments
- 61.260 Duration of English language proficiency assessments
- 61.265 Recreational pilot licences—general English language proficiency
- 61.270 Approval of language proficiency assessors

Division 61.B.6—Recognition of overseas flight crew authorisations

- 61.275 Overseas flight crew authorisations—recognition
- 61.280 Grant of flight crew licences, ratings or endorsements under bilateral agreements

Division 61.B.7—Recognition of Australian Defence Force qualifications

- 61.285 Australian Defence Force qualifications—recognition

Subpart 61.C—Certificates of validation

- 61.290 Grant of certificates of validation
- 61.295 Privileges of certificates of validation
- 61.300 Limitations on exercise of privileges of certificates of validation—medical certificate
- 61.305 Limitations on exercise of privileges of certificates of validation—recent experience, flight review and proficiency check
- 61.310 Limitations on exercise of privileges of certificates of validation—carriage of documents
- 61.315 Conduct of unauthorised activities by holders of certificates of validation
- 61.320 Certificates of validation—period of validity
- 61.325 Certificates of validation—renewal

Subpart 61.D—General obligations of flight crew licence holders

- 61.335 Identity checks
- 61.336 Provision of photograph
- 61.340 Production of licence documents, medical certificates and identification
- 61.345 Personal logbooks—pilots
- 61.350 Personal logbooks—flight engineers
- 61.355 Retention of personal logbooks
- 61.360 False entries in personal logbooks
- 61.365 Production of personal logbooks

Subpart 61.E—Pilot licensing—general limitations and authorisations

Division 61.E.1—General limitations on exercise of pilot licence privileges

- 61.375 Limitations on exercise of privileges of pilot licences—ratings
- 61.380 Limitations on exercise of privileges of pilot licences—flight activity and design feature endorsements
- 61.385 Limitations on exercise of privileges of pilot licences—general competency requirement
- 61.390 Limitations on exercise of privileges of pilot licences—operating requirements and limitations
- 61.395 Limitations on exercise of privileges of pilot licences—recent experience for certain passenger flight activities
- 61.400 Limitations on exercise of privileges of pilot licences—flight review
- 61.405 Limitations on exercise of privileges of pilot licences—medical requirements—recreational pilot licence holders
- 61.410 Limitations on exercise of privileges of pilot licences—medical certificates: private pilot licence holders
- 61.415 Limitations on exercise of privileges of pilot licences—medical certificates: commercial, multi-crew and air transport pilot licence holders
- 61.420 Limitations on exercise of privileges of pilot licences—carriage of documents
- 61.422 Limitations on exercise of privileges of pilot licences—aviation English language proficiency
- 61.425 Limitations on exercise of privileges of pilot licences—unregistered aircraft

61.427 Removal of certain pilot licence conditions about airspace

Division 61.E.2—General authorisations for pilot licences

61.430 Holders of pilot licences authorised to taxi aircraft
61.435 When holders of pilot licences authorised to operate aircraft radio

Subpart 61.G—Recreational pilot licences

Division 61.G.1—Privileges and grant of licences

61.460 Privileges of recreational pilot licences
61.465 Limitations on exercise of privileges of recreational pilot licences—general
61.470 Limitations on exercise of privileges of recreational pilot licences—endorsements
61.475 Requirements for grant of recreational pilot licences
61.480 Grant of recreational pilot licences in recognition of pilot certificates granted by certain organisations

Division 61.G.2—Recreational pilot licence endorsements

61.485 Kinds of recreational pilot licence endorsements
61.490 Privileges of recreational pilot licence endorsements
61.495 Requirements for grant of recreational pilot licence endorsements
61.500 Grant of endorsement in recognition of other qualifications

Subpart 61.H—Private pilot licences

Division 61.H.1—General

61.505 Privileges of private pilot licences
61.510 Limitations on exercise of privileges of private pilot licences—multi-crew operations
61.515 Requirements for grant of private pilot licences—general

Division 61.H.2—Aeronautical experience requirements for private pilot licences—applicants who have completed integrated training courses

61.520 Application of Division 61.H.2
61.525 Aeronautical experience requirements for grant of private pilot licences—airplane category
61.530 Aeronautical experience requirements for grant of private pilot licences—helicopter category
61.535 Aeronautical experience requirements for grant of private pilot licences—gyroplane category

Division 61.H.3—Aeronautical experience requirements for private pilot licences—applicants who have not completed integrated training courses

61.540 Application of Division 61.H.3
61.545 Aeronautical experience requirements for grant of private pilot licences—airplane category
61.550 Aeronautical experience requirements for grant of private pilot licences—helicopter category
61.555 Aeronautical experience requirements for grant of private pilot licences—powered-lift aircraft category
61.560 Aeronautical experience requirements for grant of private pilot licences—gyroplane category
61.565 Aeronautical experience requirements for grant of private pilot licences—airship category

Subpart 61.I—Commercial pilot licences

Division 61.I.1—General

- 61.570 Privileges of commercial pilot licences
- 61.575 Limitations on exercise of privileges of commercial pilot licences—multi-crew operations
- 61.580 Requirements for grant of commercial pilot licences—general

Division 61.I.2—Aeronautical experience requirements for commercial pilot licences—applicants who have completed integrated training courses

- 61.585 Application of Division 61.I.2
- 61.590 Aeronautical experience requirements for grant of commercial pilot licences—airplane category
- 61.595 Aeronautical experience requirements for grant of commercial pilot licences—helicopter category
- 61.600 Aeronautical experience requirements for grant of commercial pilot licences—powered-lift aircraft category

Division 61.I.3—Aeronautical experience requirements for commercial pilot licences—applicants who have not completed integrated training courses

- 61.605 Application of Division 61.I.3
- 61.610 Aeronautical experience requirements for grant of commercial pilot licences—airplane category
- 61.615 Aeronautical experience requirements for grant of commercial pilot licences—helicopter category
- 61.620 Aeronautical experience requirements for grant of commercial pilot licences—powered-lift aircraft category
- 61.625 Aeronautical experience requirements for grant of commercial pilot licences—gyroplane category
- 61.630 Aeronautical experience requirements for grant of commercial pilot licences—airship category

Subpart 61.J—Multi-crew pilot licences

- 61.635 Privileges of multi-crew pilot licences
- 61.640 Limitations on exercise of privileges of multi-crew pilot licences—IFR flight: general
- 61.645 Limitations on exercise of privileges of multi-crew pilot licences—IFR flight: recent experience
- 61.650 Limitations on exercise of privileges of multi-crew pilot licences—instrument proficiency check
- 61.655 Requirements for grant of multi-crew pilot licences
- 61.660 Aeronautical experience requirements for grant of multi-crew pilot licences—airplane category

Subpart 61.K—Air transport pilot licences

- 61.665 Privileges of air transport pilot licences
 - 61.670 Limitations on exercise of privileges of air transport pilot licences—helicopter IFR flight
 - 61.675 Limitations on exercise of privileges of air transport pilot licences—single-pilot IFR flight
 - 61.680 Limitations on exercise of privileges of air transport pilot licences—IFR flight: general
 - 61.685 Limitations on exercise of privileges of air transport pilot licences—IFR flight: recent experience
 - 61.695 Limitations on exercise of privileges of air transport pilot licences—instrument proficiency check
-

-
- 61.700 Requirements for grant of air transport pilot licences—general
 - 61.705 Aeronautical experience requirements for grant of air transport pilot licences—airplane category
 - 61.710 Aeronautical experience requirements for grant of air transport pilot licences—helicopter category
 - 61.715 Aeronautical experience requirements for grant of air transport pilot licences—powered-lift aircraft category

Subpart 61.L—Aircraft ratings and endorsements for pilot licences

Division 61.L.1—Preliminary

- 61.720 What Subpart 61.L is about

Division 61.L.2—Aircraft category ratings

- 61.725 Privileges of aircraft category ratings
- 61.730 Requirements for grant of aircraft category ratings

Division 61.L.3—Aircraft class ratings

- 61.735 Privileges of aircraft class ratings
- 61.745 Limitations on exercise of privileges of aircraft class ratings—flight review
- 61.747 Limitations on exercise of privileges of class ratings in certain aircraft—flight review
- 61.750 Requirements for grant of aircraft class ratings

Division 61.L.4—Design feature endorsements

- 61.755 Design features that require design feature endorsement
- 61.760 Privileges of design feature endorsements
- 61.765 Requirements for grant of design feature endorsements

Division 61.L.5—Pilot type ratings

- 61.770 Privileges of pilot type ratings
- 61.775 Limitations on exercise of privileges of pilot type ratings—flight test in flight simulator
- 61.780 Limitations on exercise of privileges of pilot type ratings—variants
- 61.785 Limitations on exercise of privileges of pilot type ratings—single-pilot operation and multi-crew operation
- 61.790 Limitations on exercise of privileges of pilot type ratings—IFR operation
- 61.795 Limitations on exercise of privileges of pilot type ratings—recent experience on aircraft models
- 61.800 Limitations on exercise of privileges of pilot type ratings—flight review
- 61.805 Limitations on exercise of privileges of pilot type ratings—instrument proficiency check
- 61.810 Requirements for grant of pilot type ratings
- 61.815 Person taken to meet requirements for grant of pilot type rating—multi-crew pilot licence holder
- 61.820 Person taken to meet requirements for grant of pilot type rating—new type rating
- 61.822 Removal of type rating condition about acting as pilot in command

Division 61.L.6—Cruise relief type ratings

- 61.825 Kinds of cruise relief type rating
 - 61.830 Privileges of cruise relief type ratings
 - 61.835 Limitations on exercise of privileges of cruise relief type ratings—general
 - 61.840 Limitations on exercise of privileges of cruise relief type ratings—recent experience
-

- 61.845 Requirements for grant of cruise relief type ratings
- 61.850 Person taken to meet requirements for grant of cruise relief type rating—new type rating

Subpart 61.M—Instrument ratings

Division 61.M.1—Privileges and requirements for grant of instrument ratings

- 61.855 Privileges of instrument ratings
- 61.860 Limitations on exercise of privileges of instrument ratings—general
- 61.865 Limitations on exercise of privileges of instrument ratings—endorsements
- 61.870 Limitations on exercise of privileges of instrument ratings—recent experience: general
- 61.875 Limitations on exercise of privileges of instrument ratings—recent experience: single pilot
- 61.880 Limitations on exercise of privileges of instrument ratings—instrument proficiency check
- 61.885 Requirements for grant of instrument ratings
- 61.887 Removal of instrument rating conditions about acting as pilot in command under IFR

Division 61.M.2—Privileges and requirements for grant of instrument endorsements

- 61.890 Kinds of instrument endorsement
- 61.895 Privileges of instrument endorsements
- 61.900 Limitations on exercise of privileges of instrument endorsements
- 61.905 Requirements for grant of instrument endorsements

Subpart 61.N—Private instrument ratings

Division 61.N.1—Privileges and requirements for grant of private instrument ratings

- 61.910 Privileges of private instrument ratings
- 61.915 Limitations on exercise of privileges of private instrument ratings—endorsements
- 61.920 Limitations on exercise of privileges of private instrument ratings—recent experience
- 61.925 Limitations on exercise of privileges of private instrument ratings—flight review
- 61.930 Requirements for grant of private instrument ratings

Division 61.N.2—Privileges and requirements for grant of private instrument endorsements

- 61.935 Kinds of private instrument endorsement
- 61.940 Privileges of private instrument endorsements
- 61.942 Limitations on exercise of privileges of private instrument endorsements—visibility and cloud
- 61.945 Limitations on exercise of privileges of private instrument endorsements
- 61.950 Requirements for grant of private instrument endorsements

Subpart 61.O—Night VFR ratings

Division 61.O.1—Privileges and requirements for grant of night VFR ratings

- 61.955 Privileges of night VFR ratings
- 61.960 Limitations on exercise of privileges of night VFR ratings—endorsements
- 61.965 Limitations on exercise of privileges of night VFR ratings—recent experience
- 61.970 Limitations on exercise of privileges of night VFR ratings—flight review
- 61.975 Requirements for grant of night VFR ratings

Division 61.O.2—Privileges and requirements for grant of night VFR endorsements

- 61.980 Kinds of night VFR endorsement
- 61.985 Privileges of night VFR endorsements
- 61.990 Requirements for grant of night VFR endorsements

Subpart 61.P—Night vision imaging system ratings**Division 61.P.1—Privileges and requirements for grant of night vision imaging system ratings**

- 61.995 Privileges of night vision imaging system ratings
- 61.1000 Limitations on exercise of privileges of night vision imaging system ratings—general
- 61.1005 Limitations on exercise of privileges of night vision imaging system ratings—endorsements
- 61.1010 Limitations on exercise of privileges of night vision imaging system ratings—recent experience
- 61.1015 Limitations on exercise of privileges of night vision imaging system ratings—night vision imaging system proficiency check
- 61.1020 Requirements for grant of night vision imaging system ratings

Division 61.P.2—Privileges and requirements for grant of night vision imaging system endorsements

- 61.1025 Kinds of night vision imaging system endorsement
- 61.1030 Privileges of night vision imaging system endorsements
- 61.1035 Requirements for grant of night vision imaging system endorsements

Subpart 61.Q—Low-level ratings**Division 61.Q.1—Privileges and requirements for grant of low-level ratings**

- 61.1040 Privileges of low-level ratings
- 61.1045 Limitations on exercise of privileges of low-level ratings—general
- 61.1050 Limitations on exercise of privileges of low-level ratings—endorsements
- 61.1055 Limitations on exercise of privileges of low-level ratings—recent experience
- 61.1060 Limitations on exercise of privileges of low-level ratings—flight review
- 61.1070 Requirements for grant of low-level ratings

Division 61.Q.2—Privileges and requirements for grant of low-level endorsements

- 61.1075 Kinds of low-level endorsement
- 61.1080 Privileges of low-level endorsements
- 61.1085 Requirements for grant of low-level endorsements

Subpart 61.R—Aerial application ratings**Division 61.R.1—Privileges and requirements for grant of aerial application ratings**

- 61.1090 Privileges of aerial application ratings
- 61.1100 Limitations on exercise of privileges of aerial application ratings—endorsements
- 61.1105 Limitations on exercise of privileges of aerial application ratings—recent experience
- 61.1110 Limitations on exercise of privileges of aerial application ratings—aerial application proficiency check
- 61.1115 Requirements for grant of aerial application ratings

Division 61.R.2—Privileges and requirements for grant of aerial application endorsements

- 61.1120 Kinds of aerial application endorsement
- 61.1125 Privileges of aerial application endorsements
- 61.1130 Limitations on exercise of privileges of aerial application endorsements—supervision
- 61.1135 Limitations on exercise of privileges of night aerial application endorsements
- 61.1140 Requirements for grant of aerial application endorsements

Subpart 61.S—Flight activity endorsements

- 61.1145 Kinds of flight activity endorsement
- 61.1150 Privileges of flight activity endorsements
- 61.1155 Limitations on exercise of privileges of flight activity endorsements—medical certificates
- 61.1160 Requirements for grant of flight activity endorsements

Subpart 61.T—Pilot instructor ratings

Division 61.T.1—Privileges and requirements for grant of flight instructor ratings

- 61.1165 Privileges of flight instructor ratings
- 61.1170 Limitations on exercise of privileges of flight instructor ratings—general
- 61.1175 Limitations on exercise of privileges of flight instructor ratings—endorsements
- 61.1180 Limitations on exercise of privileges of flight instructor ratings—instructor proficiency check
- 61.1185 Requirements for grant of flight instructor ratings

Division 61.T.2—Privileges and requirements for grant of simulator instructor ratings

- 61.1190 Privileges of simulator instructor ratings
- 61.1195 Limitations on exercise of privileges of simulator instructor ratings—general
- 61.1200 Limitations on exercise of privileges of simulator instructor ratings—endorsements
- 61.1205 Limitations on exercise of privileges of simulator instructor ratings—instructor proficiency check
- 61.1210 Requirements for grant of simulator instructor ratings

Division 61.T.3—Obligations of pilot instructors

- 61.1215 Obligations of pilot instructors—training
- 61.1220 Obligations of pilot instructors—flight reviews
- 61.1225 Obligations of pilot instructors—student pilots
- 61.1227 Obligations of pilot instructors—approval to operate aircraft radio
- 61.1230 Obligations of pilot instructors—records of activities conducted independently of Part 141 or 142 operator

Division 61.T.4—Privileges and requirements for grant of training endorsements

- 61.1235 Kinds of training endorsement
- 61.1240 Privileges of training endorsements
- 61.1245 Limitations on exercise of privileges of training endorsements—general
- 61.1246 Limitations on exercise of privileges of grade 3 training endorsements
- 61.1247 Limitations on exercise of privileges of low level training endorsements
- 61.1248 Limitation on exercise of privileges of helicopter grade 2 training endorsements
- 61.1250 Requirements for grant of training endorsements

Subpart 61.U—Flight examiner ratings**Division 61.U.1—Privileges and requirements for grant of flight examiner ratings**

- 61.1255 Privileges of flight examiner ratings
- 61.1265 Limitations on exercise of privileges of flight examiner ratings—endorsements
- 61.1270 Limitations on exercise of privileges of flight examiner ratings—professional development
- 61.1275 Limitations on exercise of privileges of flight examiner ratings—recent experience
- 61.1280 Limitations on exercise of privileges of flight examiner ratings—flight reviews and subject matter proficiency checks
- 61.1285 Limitations on exercise of privileges of flight examiner ratings—examiner proficiency check
- 61.1290 Requirements for grant of flight examiner ratings

Division 61.U.2—Obligations of flight examiners

- 61.1295 Obligations of flight examiners—flight tests: strict liability offences
- 61.1300 Obligations of flight examiners—flight tests: other offences
- 61.1305 Obligations of flight examiners—proficiency checks

Division 61.U.3—Privileges and requirements for grant of flight examiner endorsements

- 61.1310 Kinds of flight examiner endorsement
- 61.1315 Privileges of flight examiner endorsements
- 61.1318 Limitations on exercise of privileges of flight examiner endorsements—flight tests in aircraft
- 61.1320 Requirements for grant of flight examiner endorsements

Subpart 61.V—Flight engineer licences

- 61.1325 Privileges of flight engineer licences
- 61.1330 Limitations on exercise of privileges of flight engineer licences—ratings
- 61.1335 Limitations on exercise of privileges of flight engineer licences—recent experience
- 61.1340 Limitations on exercise of privileges of flight engineer licences—flight review
- 61.1345 Limitations on exercise of privileges of flight engineer licences—current medical certificates
- 61.1350 Limitations on exercise of privileges of flight engineer licences—carriage of documents
- 61.1352 Limitations on exercise of privileges of flight engineer licences—aviation English language proficiency
- 61.1355 Certain holders of flight engineer licences authorised to operate aircraft radio
- 61.1360 Requirements for grant of flight engineer licences

Subpart 61.W—Flight engineer type ratings

- 61.1365 Privileges of flight engineer type ratings
- 61.1370 Limitations on exercise of privileges of flight engineer type ratings—general
- 61.1375 Limitations on exercise of privileges of flight engineer type ratings—recent experience on aircraft models
- 61.1380 Limitations on exercise of privileges of flight engineer type ratings—flight review
- 61.1385 Requirements for grant of flight engineer type ratings
- 61.1390 Person taken to meet requirements for grant of flight engineer type rating—new type rating

Subpart 61.X—Flight engineer instructor ratings**Division 61.X.1—Privileges and requirements for grant of flight engineer instructor ratings**

- 61.1395 Privileges of flight engineer instructor ratings
-

- 61.1400 Limitations on exercise of privileges of flight engineer instructor ratings—general
- 61.1405 Limitations on exercise of privileges of flight engineer instructor ratings—endorsements
- 61.1410 Limitations on exercise of privileges of flight engineer instructor ratings—instructor proficiency check
- 61.1415 Requirements for grant of flight engineer instructor ratings

Division 61.X.2—Obligations of flight engineer instructors

- 61.1420 Obligations of flight engineer instructors—training
- 61.1425 Obligations of flight engineer instructors—flight review
- 61.1427 Obligations of flight engineer instructors—approval to operate aircraft radio

Division 61.X.3—Privileges and requirements for grant of flight engineer training endorsements

- 61.1430 Kinds of flight engineer training endorsement
- 61.1435 Privileges of flight engineer training endorsements
- 61.1440 Requirements for grant of flight engineer training endorsements

Subpart 61.Y—Flight engineer examiner ratings

Division 61.Y.1—Privileges and requirements for grant of flight engineer examiner ratings

- 61.1445 Privileges of flight engineer examiner ratings
- 61.1455 Limitations on exercise of privileges of flight engineer examiner ratings—endorsements
- 61.1460 Limitations on exercise of privileges of flight engineer examiner ratings—professional development
- 61.1465 Limitations on exercise of privileges of flight engineer examiner ratings—recent experience
- 61.1470 Limitations on exercise of privileges of flight engineer examiner ratings—examiner proficiency check
- 61.1475 Requirements for grant of flight engineer examiner ratings

Division 61.Y.2—Obligations of flight engineer examiners

- 61.1480 Obligations of flight engineer examiners—flight tests: strict liability offences
- 61.1485 Obligations of flight engineer examiners—flight tests: other offences
- 61.1490 Obligations of flight engineer examiners—proficiency checks

Division 61.Y.3—Privileges and requirements for grant of flight engineer examiner endorsements

- 61.1495 Kinds of flight engineer examiner endorsement
- 61.1500 Privileges of flight engineer examiner endorsements
- 61.1505 Requirements for grant of flight engineer examiner endorsements

Subpart 61.Z—Glider pilot licences

- 61.1510 Privileges of glider pilot licences
- 61.1515 Limitations on exercise of privileges of glider pilot licences—general
- 61.1520 Limitations on exercise of privileges of glider pilot licences—recent experience
- 61.1525 Limitations on exercise of privileges of glider pilot licences—flight review
- 61.1530 Limitations on exercise of privileges of glider pilot licences—medical certificates
- 61.1535 Limitations on exercise of privileges of glider pilot licences—carriage of documents
- 61.1540 Requirements for grant of glider pilot licences

Subpart 61.A—Preliminary

Division 61.A.1—General

61.005 What Part 61 is about

- (1) This Part sets out the licensing scheme for pilots and flight engineers of registered aircraft.
- (2) Subpart 61.A sets out:
 - (a) preliminary matters; and
 - (b) when a flight crew licence, rating or endorsement is not required.
- (3) Subpart 61.B sets out:
 - (a) the general requirements for the grant of a flight crew licence, rating or endorsement; and
 - (b) the requirements for the grant of a flight crew licence, rating or endorsement in recognition of an overseas or military qualification.

Note: A reference to a flight crew licence includes a glider pilot licence: see the definition of *flight crew licence* in regulation 61.010.
- (4) Subpart 61.C sets out rules relating to a certificate of validation of an overseas qualification, including:
 - (a) requirements for the grant of a certificate of validation; and
 - (b) the effect of a certificate of validation.
- (5) Subpart 61.D sets out obligations that apply to all holders of flight crew licences, ratings and endorsements.
- (6) Subpart 61.E:
 - (a) sets out limitations that apply to the exercise of the privileges of all pilot licences; and
 - (b) provides for the authorisations to taxi an aircraft and to operate an aircraft radio.

Note: A reference to a pilot licence does not include a glider pilot licence: see the definition of *pilot licence* in regulation 61.010.
- (7) Subparts 61.G to 61.K make particular provision for each kind of pilot licence, including:
 - (a) the privileges of the licence; and
 - (b) limitations on the exercise of the privileges; and
 - (c) the requirements for the grant of the licence.
- (8) Subparts 61.L to 61.U provide for ratings and endorsements on pilot licences, setting out:
 - (a) the privileges of each rating or endorsement; and

Part 61 Flight crew licensing

Subpart 61.A Preliminary

Division 61.A.1 General

Regulation 61.007

- (b) limitations on the exercise of the privileges of the rating or endorsement;
and
 - (c) the requirements for the grant of the rating or endorsement; and
 - (d) for the flight instructor, simulator instructor and flight examiner ratings—
obligations that apply to the holder of the rating.
- (9) Subparts 61.V to 61.Y provide for flight engineer licences, and ratings and endorsements on flight engineer licences.
- (10) Subpart 61.Z makes particular provision for glider pilot licences.

61.007 Application of Part 61

- (1) This Part applies to flight in a registered aircraft of any of the following categories:
- (a) aeroplane;
 - (b) helicopter;
 - (c) powered-lift aircraft;
 - (d) gyroplane;
 - (e) airship.
- (2) The Part applies also to flight in a glider that is a registered sailplane.

61.010 Definitions for Part 61

In this Part:

aerial application endorsement means an endorsement mentioned in column 1 of table 61.1120.

aerial application operation means a flight that is carried out by an aircraft to apply application material.

aerial application proficiency check means an assessment, against the standards mentioned in the Part 61 Manual of Standards, of a pilot's competency to exercise the privileges of an aerial application rating.

aeronautical experience: see regulation 61.075.

aeronautical knowledge examination, for a flight crew licence, rating or endorsement, means an examination set under regulation 61.215 for the grant of the licence, rating or endorsement.

aeroplane: see regulation 61.025.

approved course of professional development, for a provision of this Part, means a course of professional development for which the provider holds an approval under regulation 61.040 for the provision.

approved course of training, for a provision of this Part, means a course of training:

- (a) for which the provider holds an approval under regulation 61.040 for the provision; or
- (b) that a Part 141 or 142 operator is authorised to conduct; or
- (c) that a person holds an approval under regulation 141.035 or 142.040 to conduct.

approved flight simulation training device: a flight simulation training device is an **approved flight simulation training device** for a purpose if:

- (a) a Part 141 operator's operations manual, or a Part 142 operator's exposition, states that the device may be used for the purpose; or
- (b) the operator of the device holds an approval under regulation 60.055 or 61.040 to use the device for the purpose; or
- (c) the device is:
 - (i) qualified (however described) by the national aviation authority of a recognised foreign State; and
 - (ii) approved for the purpose by the national aviation authority.

approved flight simulator: a flight simulator is an **approved flight simulator** for a purpose if:

- (a) a Part 141 operator's operations manual, or a Part 142 operator's exposition, states that the simulator may be used for the purpose; or
- (b) the operator of the simulator holds an approval under regulation 60.055 to use the simulator for the purpose; or
- (c) the simulator is:
 - (i) qualified (however described) by the national aviation authority of a recognised foreign State; and
 - (ii) approved for the purpose by the national aviation authority.

associated: an aircraft category rating is **associated** with a pilot licence if:

- (a) for an application for the pilot licence—the application includes an application for the rating; or
- (b) in any other case—the rating was granted on the basis of the applicant having met the requirements for the grant of the pilot licence with the rating.

Note: An aircraft category rating has effect only for the pilot licence with which it is associated: see regulation 61.725.

aviation English language proficiency assessment means an aviation English language proficiency assessment conducted under regulation 61.255.

aviation English language proficiency assessor means the holder of an approval under regulation 61.270 to conduct an aviation English language proficiency assessment.

azimuth guidance operation means an instrument approach operation using azimuth bearings for lateral navigation guidance.

Regulation 61.010

basic instrument flight training means flight training in the units of competency for instrument flight mentioned in the Part 61 Manual of Standards for the grant of a private pilot licence or commercial pilot licence.

category of aircraft: see regulation 61.015.

category specific: a rating or endorsement is **category specific** if the rating or endorsement applies only to an aircraft category that is specified on the rating or endorsement.

Certificate IV in Training and Assessment means a Certificate IV in Training and Assessment issued by a registered training organisation under the Australian Qualifications Framework.

Note: See www.aqf.edu.au/.

certificate of validation means a certificate of validation granted under Subpart 61.C.

circling approach means an extension of an instrument approach operation that includes a visual circling manoeuvre to position an aircraft for a landing.

class of aircraft: see regulation 61.020.

conduct, as a verb, means:

- (a) in relation to a flight operation—to occupy a flight control seat in an aircraft while the operation takes place; or
- (b) in relation to a simulated flight operation—to occupy a flight control seat in a flight simulation training device while the simulated operation takes place; or
- (c) in relation to an operation of a tethered helicopter—to occupy a flight control seat in the tethered helicopter while the operation takes place.

course deviation indicator operation means an instrument approach operation using a course deviation indicator for lateral navigation guidance.

cross-country flight means a flight along a pre-planned route during which the pilot uses geometry, topography or radio navigation aids to determine the aircraft's position and course.

cross-country flight time means flight time accrued during a cross-country flight.

cruise relief type rating means:

- (a) a cruise relief co-pilot type rating; or
- (b) a cruise relief flight engineer type rating.

current:

- (a) for an aviation English language proficiency assessment—see regulation 61.260; and
- (b) for a recreational aviation medical practitioner's certificate held by:
 - (i) a student pilot—see subregulation 61.114(6); and

- (ii) a recreational pilot licence holder—see subregulation 61.405(3); and
- (c) for a certificate of validation or medical certificate—means a certificate that is in force.

differences training, for a variant, means the training mentioned in regulation 61.200 for the variant.

dual cross-country flight time means cross-country flight time that is conducted in dual flight.

dual flight means flight conducted while receiving training from a pilot instructor occupying a flight control seat in an aircraft that is fitted with fully functional dual controls.

dual flight check means an in-flight assessment by a flight instructor of the competency of a student pilot to conduct a solo training flight.

dual instrument flight time means instrument flight time that is conducted in dual flight.

dual instrument ground time means instrument ground time that is conducted in dual simulated flight.

dual instrument time means:

- (a) dual instrument flight time; or
- (b) dual instrument ground time.

dual simulated flight means simulated flight conducted while receiving training from a pilot instructor occupying a flight control seat in a flight simulation training device that is fitted with fully functional dual controls.

duration, of a flight, means:

- (a) for a flight in an aeroplane or gyroplane—the time from the moment the aircraft begins moving, whether or not under its own power, in preparation for flight until the moment it comes to rest at the end of the flight; or
- (b) for a flight in a helicopter or powered-lift aircraft—the time from the moment the aircraft's rotor blades start turning until the moment the rotor blades stop turning after the aircraft comes to rest at the end of the flight; or
- (c) for a flight in an airship—the time from the moment the airship is released from its mooring until the moment it is tethered at the end of the flight; or
- (d) for a flight in a glider—the time from the moment the glider first begins moving in preparation for flight, whether being towed or not, until the moment it comes to rest at the end of the flight.

endorsement means a flight crew endorsement.

equivalent, for an overseas flight crew licence, rating or endorsement: an overseas flight crew licence, rating or endorsement (however described) is **equivalent** to a flight crew licence, rating or endorsement granted under this Part (an **Australian authorisation**) if it allows the holder to conduct substantially the same activities as the Australian authorisation.

Regulation 61.010

examiner means:

- (a) a flight examiner; or
- (b) a flight engineer examiner.

examiner rating means:

- (a) a flight examiner rating; or
- (b) a flight engineer examiner rating.

flight means flight in:

- (a) an aeroplane; or
- (b) a helicopter; or
- (c) an airship; or
- (d) a glider, other than a hang glider, powered hang glider, paraglider or powered paraglider; or
- (e) a gyroplane; or
- (f) a powered-lift aircraft.

flight activity endorsement means an endorsement mentioned in column 1 of table 61.1145.

flight crew endorsement means an endorsement granted under this Part on a flight crew licence.

flight crew licence means:

- (a) a pilot licence; or
- (b) a flight engineer licence; or
- (c) a glider pilot licence.

flight crew rating means a rating granted under this Part on a flight crew licence.

flight engineer examiner means the holder of a flight engineer examiner rating.

flight engineer examiner endorsement means an endorsement mentioned in column 1 of table 61.1495.

flight engineer flight test endorsement means an endorsement mentioned in column 1 of Part 1 of table 61.1495.

flight engineer instructor means the holder of a flight engineer instructor rating.

flight engineer training endorsement means an endorsement mentioned in column 1 of table 61.1430.

flight examiner means the holder of a flight examiner rating.

flight examiner endorsement means an endorsement mentioned in column 1 of table 61.1310.

flight instructor means the holder of a flight instructor rating.

flight review means an assessment of the competency of a flight crew member to perform:

- (a) for the holder of a pilot licence or flight engineer licence—an activity authorised by a flight crew rating that the crew member holds; or
- (b) for the holder of a glider pilot licence—an activity authorised by the licence.

flight simulation training device means:

- (a) a qualified flight simulator; or
- (b) a qualified flight training device; or
- (c) a synthetic trainer that is approved under Civil Aviation Order 45.0; or
- (d) a device that meets the qualification standards prescribed by a legislative instrument under regulation 61.045; or
- (e) a device that is qualified (however described) by the national aviation authority of a recognised foreign State.

flight test, for a flight crew licence, rating or endorsement, means a test conducted under regulation 61.245 for the licence, rating or endorsement.

flight test endorsement means an endorsement mentioned in column 1 of Part 1 of table 61.1310.

flight time as:

- (a) a pilot: see regulation 61.080; and
- (b) a co-pilot: see regulation 61.085; and
- (c) a pilot in command: see regulation 61.090; and
- (d) a pilot in command under supervision: see regulation 61.095; and
- (e) a flight engineer: see regulation 61.100.

flight training, for a flight crew licence, rating or endorsement, means the training mentioned in regulation 61.195 for the licence, rating or endorsement.

glider activity means:

- (a) operating a Part 103 aircraft that is a glider; or
- (b) providing training in operating a Part 103 aircraft that is a glider.

glider organisation means a sport aviation body that administers glider activities.

initial flight training means dual flight conducted for training in the units of competency mentioned in the Part 61 Manual of Standards for the grant of a recreational pilot licence.

instructor means:

- (a) a flight instructor; or
- (b) a simulator instructor; or
- (c) a flight engineer instructor.

Regulation 61.010

instructor proficiency check means an assessment, against the standards mentioned in the Part 61 Manual of Standards, of an instructor's competency to conduct flight training.

instructor rating means:

- (a) a flight instructor rating; or
- (b) a simulator instructor rating; or
- (c) a flight engineer instructor rating.

instrument endorsement means an endorsement mentioned in column 1 of table 61.890.

instrument flight time: see regulation 61.105.

instrument ground time: see regulation 61.110.

instrument proficiency check means an assessment, against the standards mentioned in the Part 61 Manual of Standards, of a pilot's competency to pilot an aircraft under the IFR.

instrument time means:

- (a) instrument flight time; or
- (b) instrument ground time.

knowledge deficiency report means a report prepared, and given to a person, under regulation 61.230.

licence means a flight crew licence.

licence document: see regulation 61.175.

low-level endorsement means an endorsement mentioned in column 1 of table 61.1075.

low-level operation means an operation below 500 ft AGL, other than the following:

- (a) climbing from take-off;
- (b) descending for the purpose of landing;
- (c) an aerial application operation.

maximum certificated passenger seating capacity, for an aircraft, means the maximum passenger seating capacity stated in the aircraft's type certificate, foreign type certificate, supplemental type certificate or foreign supplemental type certificate.

maximum certificated take-off weight, for an aircraft, means the maximum take-off weight stated in the aircraft's type certificate, foreign type certificate, supplemental type certificate or foreign supplemental type certificate.

medical exemption means:

- (a) for the conduct of a solo flight by a student pilot—an approval under regulation 61.040 to conduct the solo flight without holding a current medical certificate or recreational aviation medical practitioner’s certificate; and
- (b) for the exercise of the privileges of a flight crew licence or rating—an approval under regulation 61.040 to exercise the privileges of the licence or rating without holding a current medical certificate or recreational aviation medical practitioner’s certificate.

medical practitioner means a person entitled to practise as a medical practitioner under a law of a State or Territory.

multi-crew, in relation to an aircraft, means that the aircraft is certificated for operation by a crew of at least 2 pilots.

multi-crew operation means an operation that requires at least 2 pilots in:

- (a) a multi-crew aircraft; or
- (b) an aircraft that is equipped, and required by these Regulations, to be operated by a crew of at least 2 pilots.

multi-crew pilot licence training course means a course of training for the grant of a multi-crew pilot licence conducted by a Part 142 operator.

multi-crew type rating means a pilot type rating authorising its holder to pilot an aircraft of the type covered by the rating in a multi-crew operation.

multi-engine aeroplane means an aeroplane that has 2 or more engines, other than:

- (a) a multi-engine centre-line thrust aeroplane; or
- (b) an aeroplane that is prescribed by a legislative instrument under regulation 61.050 as an aeroplane that is included in the single-engine aeroplane class.

multi-engine centre-line thrust aeroplane means an aeroplane with 2 or more engines that:

- (a) has the thrust line along the longitudinal axis of the aeroplane; and
- (b) has no asymmetric handling effect about the normal axis in the event of an engine failure.

night VFR endorsement means an endorsement mentioned in column 1 of table 61.980.

night vision goggles means a self-contained binocular night vision enhancement device that:

- (a) is helmet-mounted or otherwise worn by a person; and
- (b) can detect and amplify light in both the visual and near infra-red bands of the electromagnetic spectrum.

night vision imaging system endorsement means an endorsement mentioned in column 1 of table 61.1025.

Regulation 61.010

night vision imaging system proficiency check means an assessment, against the standards mentioned in the Part 61 Manual of Standards, of a pilot's competency to pilot a helicopter using a night vision imaging system.

operational endorsement means any of the following endorsements:

- (a) an aerial application endorsement;
- (b) a flight activity endorsement;
- (c) a flight examiner endorsement;
- (d) an instrument endorsement;
- (e) a low-level endorsement;
- (f) a night VFR endorsement;
- (g) a night vision imaging system endorsement;
- (h) a private instrument endorsement;
- (i) a training endorsement;
- (j) a flight engineer examiner endorsement;
- (k) a flight engineer training endorsement.

operational rating means any of the following ratings:

- (a) an aerial application rating;
- (b) an examiner rating;
- (c) an instructor rating;
- (d) an instrument rating;
- (e) a low-level rating;
- (f) a night VFR rating;
- (g) a night vision imaging system rating;
- (h) a private instrument rating.

operator proficiency check means an assessment conducted by an operator in accordance with its training and checking responsibilities under these Regulations of whether a person has the aeronautical skills and knowledge required by the operator.

overseas endorsement means an authorisation (however described) granted by the national aviation authority of a Contracting State, in accordance with Annex 1 to the Chicago Convention, that is equivalent to a flight crew endorsement.

overseas flight crew licence means an authorisation (however described) granted by the national aviation authority of a Contracting State, in accordance with Annex 1 to the Chicago Convention, that is equivalent to a flight crew licence.

overseas medical certificate means a medical certificate (however described) granted by the national aviation authority of a Contracting State, in accordance with Annex 1 to the Chicago Convention, that is equivalent to a medical certificate.

overseas rating means an authorisation (however described) granted by the national aviation authority of a Contracting State, in accordance with Annex 1 to the Chicago Convention, that is equivalent to a flight crew rating.

pilot, used as a noun, means a person authorised under this Part to manipulate the flight controls of an aircraft during flight.

pilot, used as a verb, means:

- (a) to manipulate the flight controls of an aircraft during flight; or
- (b) to occupy a flight control seat in an aircraft during flight.

pilot in command under supervision means a pilot, other than a student pilot, who performs the duties and functions of the pilot in command of an aircraft under the supervision of a pilot who is authorised by the operator of the aircraft to conduct the supervision.

pilot instructor means:

- (a) a flight instructor; or
- (b) a simulator instructor.

pilot licence means any of the following licences:

- (a) an air transport pilot licence;
- (b) a commercial pilot licence;
- (c) a multi-crew pilot licence;
- (d) a private pilot licence;
- (e) a recreational pilot licence.

private instrument endorsement means an endorsement mentioned in column 1 of table 61.935.

privilege, in relation to a flight crew licence, rating or endorsement, means an activity that the holder of the licence, rating or endorsement is authorised, under this Part, to conduct.

published lowest safe altitude has the meaning given by subregulation 178(7) of CAR.

rating means a flight crew rating.

recent photograph, at a particular time, means a photograph taken within 6 months before that time.

recognised aeroplane means an aeroplane:

- (a) that is on the register of aircraft kept by a Contracting State; or
- (b) that is a State aircraft.

recognised foreign State means any of the following:

- (a) Canada;
- (b) Hong Kong;
- (c) New Zealand;

Regulation 61.010

- (d) United States of America;
- (e) the following EASA member States:
 - (i) Belgium;
 - (ii) Czech Republic;
 - (iii) Denmark;
 - (iv) Finland;
 - (v) France;
 - (vi) Germany;
 - (vii) Ireland;
 - (viii) Italy;
 - (ix) Netherlands;
 - (x) Norway;
 - (xi) Portugal;
 - (xii) Spain;
 - (xiii) Sweden;
 - (xiv) Switzerland;
 - (xv) United Kingdom;
- (f) any other foreign country prescribed by a legislative instrument under regulation 61.047.

recognised gyroplane means a gyroplane:

- (a) that is on the register of aircraft kept by a Contracting State; or
- (b) that is a State aircraft.

recognised helicopter means a helicopter:

- (a) that is on the register of aircraft kept by a Contracting State; or
- (b) that is a State aircraft.

recognised powered-lift aircraft means a powered-lift aircraft:

- (a) that is on the register of aircraft kept by a Contracting State; or
- (b) that is a State aircraft.

recreational aircraft means a single-engine aircraft that:

- (a) is certificated for single-pilot operation; and
- (b) has a maximum certificated take-off weight of less than 1 500 kg; and
- (c) is not rocket-powered or turbine-powered.

recreational aviation medical practitioner's certificate means a certificate from a medical practitioner to the effect that the holder meets the modified Austroads medical standards.

recreational pilot licence endorsement means an endorsement mentioned in regulation 61.485.

simulated flight engineer time means time spent in a flight simulation training device during which a flight engineer is performing the duties of a flight engineer.

simulated flight time means time spent in a flight simulation training device during which a pilot is performing the duties of a pilot.

simulated IMC means flight in an aircraft or flight simulation training device during which the pilot is prevented from viewing the external horizon.

simulator instructor means the holder of a simulator instructor rating.

single-pilot operation means an operation in an aircraft, other than a multi-crew operation.

single-pilot type rating means a pilot type rating authorising its holder to pilot an aircraft of the type covered by the rating in a single-pilot operation.

solo, in relation to a flight of an aircraft, means a flight in which the pilot is the sole occupant of the aircraft.

standard instrument departure means a departure under the IFR in accordance with an instrument departure procedure.

successfully participating: a person is ***successfully participating*** in an operator's training and checking system for an operation if:

- (a) the person is employed by the operator; and
- (b) the operator's training and checking system covers the operation; and
- (c) the person has met the requirements under the system for entry into the system; and
- (d) the person is permitted under the system to be assigned by the operator for duty for the operation.

tethered flight time means the duration of a flight in a tethered helicopter.

tethered helicopter means a helicopter tethered to a base that allows hovering but not free flight.

training endorsement means an endorsement mentioned in column 1 of table 61.1235.

training provider, for a person undertaking flight training, means:

- (a) the Part 141 or 142 operator conducting the training; or
- (b) the person conducting the training who holds an approval under regulation 141.035 or 142.040 to conduct the training.

type rating means:

- (a) a pilot type rating; or
- (b) a flight engineer type rating; or
- (c) a cruise relief type rating.

type specific: a rating or endorsement is ***type specific*** if the rating or endorsement applies only to an aircraft type that is specified on the rating or endorsement.

Regulation 61.015

variant, in relation to an aircraft model (the *first model*), means another aircraft model that CASA has prescribed by a legislative instrument under regulation 61.055 as a variant of the first model.

61.015 Definition of *category* of aircraft for Part 61

Each of the following is a *category* of aircraft:

- (a) aeroplane;
- (b) helicopter;
- (c) powered-lift aircraft;
- (d) gyroplane;
- (e) airship.

61.020 Definition of *class* of aircraft for Part 61

(1) Each of the following is a *class* of aircraft:

- (a) single-engine aeroplane;
- (b) multi-engine aeroplane;
- (c) single-engine helicopter;
- (ca) powered-lift aircraft;
- (d) single-engine gyroplane;
- (e) airship.

(2) For this Part, the single-engine aeroplane class includes:

- (a) multi-engine centre-line thrust aeroplanes; and
- (b) multi-engine aeroplanes that are prescribed by a legislative instrument under regulation 61.050 (Prescription of multi-engine aeroplanes included in single-engine aeroplane class).

61.025 Definition of *aeroplane* for Part 61

Aeroplane means an aeroplane that has flight controls providing control of the aeroplane in 3 axes and includes a touring motor glider being operated under Part 91.

61.035 Issue of Manual of Standards for Part 61

(1) For paragraph 98(5A)(a) of the Act, CASA may issue a Manual of Standards for this Part that sets out matters relating to flight crew licences.

(2) In particular, the Manual of Standards may set out standards for the following:

- (a) approvals under regulation 61.040;
- (b) aeronautical and other knowledge required by this Part for the grant of a licence, rating or endorsement;
- (c) flight training;
- (d) other training and development requirements;
- (e) flight tests;

- (f) aviation and general English language proficiency;
- (g) general operating competencies for:
 - (i) aircraft of a particular class or type; and
 - (ii) activities authorised by operational ratings and endorsements;
- (h) competency in the use of an airborne collision avoidance system;
- (i) flight reviews;
- (k) instrument proficiency checks;
- (l) night vision imaging system proficiency checks;
- (m) aerial application proficiency checks;
- (n) instructor proficiency checks;
- (o) competencies for glider pilot licences.

61.040 Approvals by CASA for Part 61

- (1) If a provision of this Part refers to a person or organisation holding an approval under this regulation, the person or organisation may apply to CASA for the approval.
- (2) Subject to regulation 11.055, CASA must grant the approval if the following requirements are met:
 - (a) if the approval relates to a course or program:
 - (i) the course or program covers all the units of competency mentioned in the Part 61 Manual of Standards for the course or program; and
 - (ii) the course or program meets the standards (if any) mentioned in the Part 61 Manual of Standards for the course or program;
 - (b) if the approval relates to any other thing for which there are standards in the Part 61 Manual of Standards—the thing meets the standards;
 - (c) for any other approval—the applicant meets the requirements (if any) for the approval mentioned in the provision.
- (3) Subregulation 11.055(1B) applies to the granting of an approval mentioned in paragraph 61.1515(1)(b) (Limitations on exercise of privileges of glider pilot licences—general).

61.045 Prescription of qualification standards for flight simulation training devices

For paragraph 98(5A)(a) of the Act, CASA may, by legislative instrument, prescribe qualification standards for flight simulation training devices.

61.047 Prescription of recognised foreign States

For paragraph 98(5A)(a) of the Act, CASA may, by legislative instrument, prescribe foreign countries as recognised foreign States.

Regulation 61.050

61.050 Prescription of multi-engine aeroplanes included in single-engine aeroplane class

For paragraph 98(5A)(a) of the Act, CASA may, by legislative instrument, prescribe aeroplanes that are included in the single-engine aeroplane class.

61.055 Prescription of type ratings and variants—multi-crew aircraft

- (1) For paragraph 98(5A)(a) of the Act, CASA may, by legislative instrument, prescribe, for multi-crew aircraft:
 - (a) the type ratings that may be granted for multi-crew operation; and
 - (b) the aircraft models that are variants of each other; and
 - (c) in relation to each variant—the variants for which differences training is required; and
 - (d) the type ratings for which the flight review or instrument proficiency check requirements may be met by completion of a single flight review; and
 - (e) the type ratings for which the instrument proficiency check requirements may be met by completion of a single instrument proficiency check.
- (2) For paragraph 98(5A)(a) of the Act, if 2 or more aircraft models are variants of each other, CASA may, by legislative instrument, prescribe that the models are no longer variants of each other only if satisfied that:
 - (a) the complexity of one of the models' systems; or
 - (b) a difference in their performance or handling characteristics;requires the provision of additional flight training to enable a person to pilot an aircraft of that model safely.

61.060 Prescription of type ratings—single-pilot aircraft

- (1) For paragraph 98(5A)(a) of the Act, CASA may, by legislative instrument, prescribe:
 - (a) for a type of aircraft that is certificated for single-pilot operation—whether a single-pilot type rating is required; and
 - (b) for aircraft for which single-pilot type ratings are required:
 - (i) the type ratings that may be granted for single-pilot operation; and
 - (ii) the aircraft models that are variants of each other; and
 - (iii) in relation to each variant—the variants for which differences training is required; and
 - (c) the type ratings for which the flight review or instrument proficiency check requirements may be met by completion of a single flight review; and
 - (d) the type ratings for which the instrument proficiency check requirements may be met by completion of a single instrument proficiency check.
- (2) However, CASA may prescribe that a single-pilot type rating is required for an aircraft only if satisfied that:
 - (a) the complexity of the aircraft's systems; or
 - (b) its performance or handling characteristics;

requires the provision of additional flight training to enable a person to pilot an aircraft of that type safely.

61.061 Prescription of type-rated aircraft—flight review requirements for class ratings

For paragraph 98(5A)(a) of the Act, CASA may, by instrument, prescribe types of aircraft in which the conduct of a flight review or instrument proficiency check for a pilot type rating meets the flight review requirements for a class rating.

61.062 Prescription of types of aircraft for additional limitations on class ratings

For paragraph 98(5A)(a) of the Act, CASA may, by instrument, prescribe types of aircraft in which the privileges of a class rating may not be exercised unless the holder of the rating has completed flight training and a flight review in an aircraft of the type.

61.063 Prescription of types of single engine helicopters for flight reviews

For paragraph 98(5A)(a) of the Act, CASA may, by instrument, prescribe types of single-engine helicopters that may be used to conduct flight reviews for other types of single-engine helicopters.

61.065 Conduct of unauthorised activities—holders of flight crew licences

- (1) The holder of a flight crew licence commits an offence if:
 - (a) the holder conducts an activity mentioned in this Part while:
 - (i) piloting a registered aircraft; or
 - (ii) acting as flight engineer of a registered aircraft; or
 - (iii) acting as an instructor or examiner; and
 - (b) the holder is not authorised under this Part to conduct the activity.

Penalty: 50 penalty units.

- (2) An offence against this regulation, other than an offence for a contravention of regulation 61.385 (Limitations on exercise of privileges of pilot licences—general competency requirement), is an offence of strict liability.

Note: See also subsection 20AB(1) of the Act for an offence of performing any duty that is essential to the operation of an Australian aircraft during flight time without holding a relevant civil aviation authorisation or being otherwise authorised by or under these Regulations to perform the duty.

Division 61.A.2—Flight time and other aeronautical experience

61.070 Flight to which Division 61.A.2 applies

For this Division:

flight means flight in:

- (a) an aeroplane; or
- (b) a helicopter, other than a tethered helicopter; or
- (c) an airship; or
- (d) a glider, other than a hang glider, powered hang glider, paraglider or powered paraglider; or
- (e) a gyroplane; or
- (f) a powered-lift aircraft.

61.075 Definition of *aeronautical experience* for Part 61

A person's *aeronautical experience* is as follows:

- (a) for a pilot—the total of:
 - (i) the person's flight time as a pilot; and
 - (ii) the person's simulated flight time; and
 - (iii) the person's tethered flight time;
- (b) for a flight engineer—the total of:
 - (i) the person's flight time as a flight engineer; and
 - (ii) the person's simulated flight engineer time.

61.080 Definition of *flight time* as pilot for Part 61

A person's *flight time* as a pilot is:

- (a) the duration of the following flights:
 - (i) a solo flight by the person;
 - (ii) a flight in which the person receives flight training;
 - (iii) if the person is a flight instructor—a flight during which the person exercises the privileges of his or her flight instructor rating;
 - (iv) if the person is a flight examiner—a flight during which the person exercises the privileges of his or her flight examiner rating; and
- (b) the person's flight time as pilot in command; and
- (c) the person's flight time as pilot in command under supervision; and
- (d) the person's flight time as a co-pilot.

61.085 Definition of *flight time* as co-pilot for Part 61

A person's *flight time* as a co-pilot is any period, during flight in an aircraft that, under these Regulations, must be flown with a flight crew of at least 2 pilots, in

which the person is performing co-pilot duties other than as pilot in command under supervision.

Note: A co-pilot is a pilot on board an aircraft in a piloting capacity other than the pilot in command or a pilot who is on board the aircraft for the sole purpose of receiving flight training; see the definition of *co-pilot* in Part 1 of the Dictionary.

61.090 Definition of *flight time* as pilot in command for Part 61

A person's *flight time* as pilot in command of an aircraft is the duration of a flight for which the person is the pilot in command of the aircraft.

61.095 Definition of *flight time* as pilot in command under supervision for Part 61

- (1) A person's *flight time* as pilot in command under supervision is the duration of a flight if:
 - (a) the person holds a pilot licence; and
 - (b) the person performs all the duties of the pilot in command for the flight; and
 - (c) subregulation (2) or (3) applies to the flight.
- (2) For paragraph (1)(c), this subregulation applies to the flight if:
 - (a) the flight is conducted by an operator that has training and checking responsibilities; and
 - (b) the pilot in command of the flight is authorised by the operator or the operator's Part 142 operator to conduct the supervision of the person.
- (3) For paragraph (1)(c), this subregulation applies to the flight if:
 - (a) the person is supervised by a flight instructor or flight examiner; and
 - (b) the person is not receiving flight training.

61.100 Definition of *flight time* as flight engineer for Part 61

A person's *flight time* as a flight engineer is:

- (a) if the person is a flight engineer—the duration of a flight during which the person performs the duties of a flight engineer; and
- (b) if the person is a flight engineer instructor—the duration of a flight during which the person exercises the privileges of his or her flight engineer instructor rating; and
- (c) if the person is a flight engineer examiner—the duration of a flight during which the person exercises the privileges of his or her flight engineer examiner rating; and
- (d) if the person is the holder of a cruise relief flight engineer type rating—any time spent performing the duties of a flight engineer during flight.

61.105 Definition of *instrument flight time* for Part 61

- (1) A person's *instrument flight time* is:
-

Part 61 Flight crew licensing

Subpart 61.A Preliminary

Division 61.A.2 Flight time and other aeronautical experience

Regulation 61.110

- (a) for the holder of an authorisation mentioned in subregulation (2) other than a flight instructor or flight examiner—any time spent piloting an aircraft solely by reference to instruments and without external visual reference points in IMC or simulated IMC; and
 - (b) for a person who does not hold an authorisation mentioned in subregulation (2)—any dual instrument flight time; and
 - (c) for a flight instructor—any time spent conducting training mentioned in regulation 61.1165, or a flight review, during dual instrument flight time in IMC; and
 - (d) for a flight examiner—any time spent conducting a flight test or proficiency check during instrument flight time in IMC.
- (2) For paragraph (1)(a), the authorisations are as follows:
- (a) an instrument rating;
 - (b) a private instrument rating;
 - (c) for flight in an aeroplane or powered-lift aircraft—an air transport pilot licence;
 - (d) for flight in an aeroplane—a multi-crew pilot licence.

61.110 Definition of *instrument ground time* for Part 61

A person's *instrument ground time* is:

- (a) for the holder of an authorisation mentioned in subregulation 61.105(2) other than a simulator instructor or flight examiner—any time spent conducting simulated flight in a flight simulation training device solely by reference to instruments and without simulated external visual reference points; and
- (b) for a person who does not hold an authorisation mentioned in subregulation 61.105(2)—any dual instrument ground time.

Division 61.A.3—Performing flight crew duties without licence, rating or endorsement

Subdivision 61.A.3.1—Student pilots

61.112 Flying as a student pilot

- (1) Subject to regulations 61.113 to 61.115, a person who does not hold a pilot licence is authorised to pilot an aircraft if:
 - (a) the pilot in command of the aircraft is a flight instructor and the flight is for the purpose of the person receiving flight training; or
 - (b) the flight is for a flight test for a pilot licence, or a rating or endorsement on a pilot licence, for the person; or
 - (c) the flight is:
 - (i) approved by, and conducted under the supervision of, a flight instructor authorised by a Part 141 or 142 operator to conduct the supervision; and
 - (ii) conducted under the VFR; and
 - (iii) conducted in accordance with the flight instructor's approval.
- (2) Subject to regulations 61.113 to 61.115, the holder of a recreational pilot licence is authorised to pilot a recreational aircraft under the VFR at night, or a non-recreational aircraft, if:
 - (a) the pilot in command of the aircraft is a flight instructor and the flight is for the purpose of receiving flight training; or
 - (b) the flight is for a flight test for another pilot licence or a rating or endorsement on a pilot licence; or
 - (c) the flight is:
 - (i) approved by, and conducted under the supervision of, a flight instructor authorised by a Part 141 or 142 operator to conduct the supervision; and
 - (ii) conducted under the VFR; and
 - (iii) conducted in accordance with the flight instructor's approval.
- (3) For subparagraphs (1)(c)(i) and (2)(c)(i), a flight is conducted under the supervision of a flight instructor if the instructor:
 - (a) provides guidance to the person in relation to the flight; and
 - (b) during the flight:
 - (i) is on board the aircraft; or
 - (ii) is at the aerodrome from which the flight began; or
 - (iii) is flying within 15 nautical miles of the aerodrome reference point for the aerodrome from which the flight began; and
 - (c) can be contacted during the flight by radio or other electronic means.

Part 61 Flight crew licensing

Subpart 61.A Preliminary

Division 61.A.3 Performing flight crew duties without licence, rating or endorsement

Regulation 61.113

- (4) For regulations 61.405 to 61.415 (which are about medical requirements), piloting an aircraft in accordance with subregulation (3) does not constitute the exercise of the privileges of a pilot licence.

Note: A person authorised to pilot an aircraft by this regulation is a *student pilot*: see Part 1 of the Dictionary.

61.113 General requirements for student pilots

- (1) A student pilot is authorised to conduct a solo flight in an aircraft only if the student pilot:
- (a) has an ARN; and
 - (b) is at least 15.
- (2) A student pilot is not authorised to pilot an aircraft carrying passengers.
- (3) A student pilot is authorised to pilot an aircraft on a solo flight in another Contracting State's airspace only if the student pilot has the permission (however described) of the Contracting State.
- (4) A student pilot is not authorised to pilot an aircraft other than a registered aircraft.

61.114 Solo flights—medical requirements for student pilots

- (1) Subregulation (2) applies to:
- (a) the conduct of a solo flight in an aircraft other than a recreational aircraft; or
 - (b) the conduct of a solo flight in a recreational aircraft under the VFR at night.
- (2) A student pilot is authorised to conduct the flight only if:
- (a) the student pilot:
 - (i) holds a class 1 or 2 medical certificate; and
 - (ii) carries the medical certificate on the flight; or
 - (b) the student pilot:
 - (i) holds a medical exemption for the flight; and
 - (ii) carries a copy of the exemption on the flight.
- (3) Subregulation (4) applies to the conduct of a solo flight in a recreational aircraft by day, other than by the holder of a recreational pilot licence.
- (4) A student pilot is authorised to conduct the flight only if:
- (a) the student pilot:
 - (i) holds a class 1 or 2 medical certificate; and
 - (ii) carries the medical certificate on the flight; or
 - (b) the student pilot:
 - (i) holds a current recreational aviation medical practitioner's certificate; and
 - (ii) meets the requirements mentioned in subregulation (5); or

- (c) the student pilot:
 - (i) holds a medical exemption for the flight; and
 - (ii) carries a copy of the exemption on the flight.
- (5) For subparagraph (4)(b)(ii), the requirements are as follows:
 - (a) the student pilot must have:
 - (i) given CASA a copy of his or her recreational aviation medical practitioner's certificate; and
 - (ii) received from CASA a written acknowledgement of the receipt of the copy;
 - (b) the student pilot must carry both of the following on the flight:
 - (i) a copy of the certificate;
 - (ii) a copy of the acknowledgement mentioned in subparagraph (a)(ii);
 - (c) the student pilot must comply with any limitations or conditions stated on the certificate;
 - (d) the student pilot must meet the modified Austroads medical standards.

Note: For when a person meets the modified Austroads medical standards, see regulation 67.262.

- (6) In this regulation:

current: a recreational aviation medical practitioner's certificate for a student pilot is **current** for the shortest of the following periods:

- (a) the period beginning on the day the certificate is signed by the medical practitioner and ending 24 months after that day;
- (b) if, when the student pilot conducts a solo flight the student pilot is at least 65—the period beginning on the day the certificate is signed by the medical practitioner and ending 12 months after that day;
- (c) if the certificate states the period for which it applies—the period beginning on the day the certificate is signed by the medical practitioner and ending at the end of the stated period.

61.115 Solo flights—recent experience requirements for student pilots

- (1) A student pilot is authorised to conduct a solo flight in an aircraft only if:
 - (a) the student pilot has, within the previous 30 days and in the same type of aircraft, successfully completed a dual flight check; and
 - (b) as a result of the flight, his or her solo flight time since he or she last successfully completed a dual flight check would not exceed 3 hours.
- (2) However, paragraph (1)(b) does not apply to the student pilot if the student pilot is enrolled in an integrated training course.
- (3) In addition, paragraph (1)(b) does not apply to a student pilot in relation to the conduct of a solo flight in an aircraft if the pilot is undergoing training, conducted by a Part 141 operator, for the grant under Part 61 of a private pilot licence, or commercial pilot licence, with a rating for that category of aircraft, and:

Part 61 Flight crew licensing

Subpart 61.A Preliminary

Division 61.A.3 Performing flight crew duties without licence, rating or endorsement

Regulation 61.116

- (a) the pilot holds a recreational pilot licence with such a rating; or
- (b) the Part 141 operator certifies, in writing, that the operator is satisfied that:
 - (i) the student pilot is competent to safely conduct a solo flight in an aircraft of the same category; and
 - (ii) the student pilot has met the competency standards for the grant, under Part 61, of a recreational pilot licence with a rating for that category of aircraft.

61.116 Student pilots authorised to taxi aircraft

A student pilot is authorised to taxi an aircraft if the student pilot is approved to taxi the aircraft by a flight instructor.

Note: See regulation 91.415 for an offence relating to taxiing aircraft without being authorised to do so.

61.117 Identity checks—student pilots

- (1) CASA may, by written notice given to a student pilot, require the student pilot to provide evidence of his or her identity in accordance with paragraph 6.57(1)(a) of the *Aviation Transport Security Regulations 2005*.
- (2) The student pilot commits an offence if:
 - (a) CASA has not told the student pilot, in writing, that he or she has complied with the requirement; and
 - (b) the student pilots an aircraft.

Penalty: 50 penalty units.

- (3) An offence against this regulation is an offence of strict liability.

61.118 Production of medical certificates etc. and identification—student pilots

- (1) CASA may direct a student pilot to produce any or all of the following documents for inspection by CASA:
 - (a) unless the student pilot holds a medical exemption to conduct a solo flight—the student pilot’s medical certificate or recreational aviation medical practitioner’s certificate;
 - (b) a document that includes a photograph of the student pilot showing the student’s full face and his or her head and shoulders:
 - (i) that was issued within the previous 10 years by the government, or a government authority, of:
 - (A) the Commonwealth or a State or Territory; or
 - (B) a foreign country, or a state or province (however described) of a foreign country; and
 - (ii) that has not expired or been cancelled.
- (2) The student pilot commits an offence if:

- (a) CASA directs the student pilot to produce a document under subregulation (1); and
- (b) the student pilot does not produce the document before the earlier of the following:
 - (i) when the student pilot next conducts a solo flight;
 - (ii) within 7 days after the direction is given.

Penalty: 50 penalty units.

- (3) An offence against this regulation is an offence of strict liability.

Subdivision 61.A.3.2—Other circumstances in which flight crew duties may be performed without licence, rating or endorsement

61.119 Flying without licence—flight engineer duties

A person who does not hold a flight engineer licence is authorised to perform the duties of a flight engineer in a registered aircraft while:

- (a) receiving flight training from a flight engineer instructor; or
- (b) taking a flight test for a flight engineer licence or a flight crew rating or endorsement on a flight engineer licence.

61.120 Operation of aircraft radio without licence

A person who does not hold a flight crew licence, or who holds a recreational pilot licence but does not hold a flight radio endorsement, is authorised to transmit on an aviation safety radio frequency if:

- (a) the transmission is made while receiving training for a flight crew licence or flight radio endorsement; and
- (b) the transmission is approved by an instructor; and
- (c) the transmission is for the purpose of:
 - (i) safely conducting a flight that is approved by a flight instructor; or
 - (ii) receiving training in the use of an aircraft radio.

Note 1: A person is prohibited from transmitting on an aviation safety radio frequency unless the person is authorised or qualified to do so: see regulation 91.625.

Note 2: For the definition of *aviation safety radio frequency*, see the Dictionary.

61.125 Conducting flight activities without rating or endorsement

- (1) A person who holds a pilot licence, but does not hold a rating or endorsement for the conduct of an activity for which a rating or endorsement is required under this Part, is authorised to conduct the activity if:
 - (a) the activity is conducted while:
 - (i) receiving flight training for the rating or endorsement; or
 - (ii) taking a flight test for the rating or endorsement; or
 - (iii) meeting the aeronautical experience requirements for the rating or endorsement; and

Part 61 Flight crew licensing

Subpart 61.A Preliminary

Division 61.A.3 Performing flight crew duties without licence, rating or endorsement

Regulation 61.126

- (b) the activity is approved by, and conducted under the supervision of, a flight instructor.
- (2) A person who holds a flight engineer licence, but does not hold a rating or endorsement for the conduct of an activity for which a rating or endorsement is required under this Part, is authorised to conduct the activity if:
 - (a) the activity is conducted while:
 - (i) receiving flight training for the rating or endorsement; or
 - (ii) taking a flight test for the rating or endorsement; or
 - (iii) meeting the aeronautical experience requirements for the rating or endorsement; and
 - (b) the activity is approved by, and conducted under the supervision of, a flight engineer instructor.

61.126 Conducting flight activities without having met proficiency check or flight review

- (1) A person who holds a flight crew licence, but has not met the proficiency check requirements for the conduct of an activity for which a proficiency check is required under this Part, is authorised to conduct the activity while the person undertakes the proficiency check.
- (2) A person who holds a flight crew licence, but has not met the flight review requirements for the conduct of an activity for which a flight review is required under this Part, is authorised to conduct the activity while the person undertakes the flight review.

61.130 Operation of helicopter using auto flight control system without licence or rating

- (1) This regulation applies to a person who, apart from this regulation, would not be authorised under this Part to pilot a helicopter.
- (2) The person is authorised to pilot the helicopter using the helicopter's auto flight control system if:
 - (a) the person is approved to do so by the helicopter's:
 - (i) operator; and
 - (ii) pilot in command; and
 - (b) the person does so under the supervision of the pilot in command.

61.135 Authorisation to conduct flight training or flight test without holding type rating

- (1) An instructor may apply to CASA, in writing, for authorisation to conduct training for the grant of a pilot type rating or flight engineer type rating in an aircraft for which the instructor does not hold the rating.

- (2) An examiner may apply to CASA, in writing, for authorisation to conduct a flight test required for the grant of a pilot type rating or flight engineer type rating for an aircraft for which the examiner does not hold:
 - (a) the pilot type rating or flight engineer type rating; or
 - (b) a training endorsement; or
 - (c) a flight test endorsement.
- (3) Subject to regulation 11.055, CASA must grant the authorisation.
- (4) Subject to regulations 141.050 and 142.050, if CASA grants the authorisation, the person is authorised to conduct the training or flight test in accordance with the authorisation.

61.140 Authorisation to test aircraft without holding type rating

- (1) The holder of a flight crew licence may apply to CASA, in writing, for authorisation to act as a flight crew member of an aircraft for which the person does not hold a pilot type rating or flight engineer type rating during a flight conducted for the purpose of:
 - (a) testing the aircraft; or
 - (b) conducting an experiment in relation to the aircraft.
- (2) Subject to regulation 11.055, CASA must grant the authorisation.
- (3) If CASA grants the authorisation, the person is authorised to act as a flight crew member during the flight in accordance with the authorisation.

61.145 Piloting glider without holding glider pilot licence

- (1) A person is authorised to pilot a glider without holding a glider pilot licence if the person:
 - (a) holds an authorisation, granted by a glider organisation, that permits the holder to pilot a glider as pilot in command; and
 - (b) operates the glider in accordance with the organisation's operations manual or exposition (whichever is applicable).
- (2) A person (a *student pilot*) is authorised to pilot a glider without holding a glider pilot licence if:
 - (a) the pilot in command of the glider holds an authorisation from a glider organisation that permits the holder to conduct training and assessment in a glider; and
 - (b) the flight is for the purpose of training, or assessing the competency of, the student pilot to pilot a glider; and
 - (c) the student pilot meets the requirements (if any) set out in the glider organisation's operations manual or exposition (whichever is applicable) for a student pilot conducting a flight.
- (3) A person (a *student pilot*) is authorised to pilot a glider without holding a glider pilot licence if:

Part 61 Flight crew licensing

Subpart 61.A Preliminary

Division 61.A.3 Performing flight crew duties without licence, rating or endorsement

Regulation 61.145

- (a) the flight is:
 - (i) approved by, and conducted under the supervision of, a pilot who holds an authorisation from a glider organisation that permits the holder to conduct training and assessment in a glider (the *glider instructor*); and
 - (ii) conducted under the VFR; and
 - (iii) conducted in accordance with the glider instructor's approval; and
- (b) the student pilot meets the requirements (if any) set out in the glider organisation's operations manual or exposition (whichever is applicable) for a student pilot conducting a flight.

Subpart 61.B—Grant of flight crew licences, ratings and endorsements

Division 61.B.1—General

61.150 People who may grant flight crew licences, ratings and endorsements

- (1) CASA may grant any flight crew licence, rating or endorsement.
- (2) Subject to subregulation (8) and regulation 61.1265, a flight examiner may grant the following:
 - (a) a rating on a pilot licence, other than:
 - (i) an aircraft category rating; or
 - (ii) a flight examiner rating; or
 - (iii) a cruise relief flight engineer type rating;
 - (b) an endorsement on a pilot licence, other than a flight test endorsement.
- (3) Subject to subregulation (8) and regulations 61.1175 and 61.1200, a pilot instructor may grant an endorsement on a pilot licence, other than:
 - (a) a flight examiner endorsement; or
 - (b) a training endorsement mentioned in Part 1 or 2 of table 61.1235; or
 - (c) an endorsement for which a flight test is required under this Part.
- (4) Subject to subregulation (8) and regulation 61.1455, a flight engineer examiner may grant the following:
 - (a) a rating on a flight engineer licence, other than a flight engineer examiner rating;
 - (b) an endorsement on a flight engineer licence, other than a flight engineer flight test endorsement;
 - (c) a cruise relief flight engineer type rating.
- (5) Subject to subregulation (8) and regulation 61.1405, a flight engineer instructor may grant a flight engineer training endorsement.
- (6) Subject to subregulation (8) and the limitations (if any) of the person's approval, the holder of an approval under regulation 141.035 or 142.040 (an **approval holder**) may grant a flight crew endorsement for which the holder is approved to conduct flight training.
- (7) Subject to subregulation (8) and the limitations (if any) of the person's approval, the holder of an approval under regulation 61.040 (also an **approval holder**) may grant the following:
 - (a) a flight crew rating, other than an examiner rating;
 - (b) a flight crew endorsement, other than a flight test endorsement or a flight engineer flight test endorsement.

Part 61 Flight crew licensing

Subpart 61.B Grant of flight crew licences, ratings and endorsements

Division 61.B.1 General

Regulation 61.155

- (8) An examiner, instructor or approval holder cannot grant a flight crew rating or endorsement to a person if the person is taken to meet the requirements for the rating or endorsement under:
- (a) regulation 61.275 (Overseas flight crew authorisations—recognition); or
 - (b) regulation 61.285 (Australian Defence Force qualifications—recognition).

Note: A flight crew licence, rating or endorsement granted under a bilateral agreement may only be granted by CASA: see regulation 61.280.

61.155 Applications for flight crew licences, ratings and endorsements

- (1) An application for a flight crew licence, rating or endorsement must be made to a person who may grant the licence, rating or endorsement.

Note: See Subpart 11.B, in particular, regulation 11.030, about applications for authorisations.

- (2) The application must:
- (a) be in writing; and
 - (b) if the application is for a pilot licence—include an application for an aircraft category rating.
- (2A) Subregulation (2B) applies if the application is for a flight crew licence and the applicant has not:
- (a) applied to CASA for another flight crew licence in the previous 10 years and submitted with the application a photograph of the applicant; or
 - (b) given to CASA, within the previous 10 years, a photograph of the applicant in response to a direction or request in writing by CASA to the applicant.
- (2B) The applicant must also submit to CASA a recent photograph of the applicant, showing the applicant's full face and his or her head and shoulders.
- (3) If the requirements for the grant of a flight crew licence, rating or endorsement (the *second authorisation*) include a requirement that the applicant hold, or be eligible for, another flight crew licence, rating or endorsement (the *first authorisation*), a person may:
- (a) apply for the first and second authorisations at the same time; or
 - (b) apply for the second authorisation at any time after applying for the first authorisation, whether or not the first authorisation has been granted before the person applies for the second authorisation.

61.160 Grant of flight crew licences

Subject to regulation 11.055, CASA must grant a flight crew licence to an applicant for the licence if:

- (a) the application complies with regulation 61.155; and
- (b) the applicant:
 - (i) meets the requirements mentioned in this Part for the grant of the licence; and

- (ii) for a flight crew licence other than a recreational pilot licence—has a current aviation English language proficiency assessment; and
- (iii) for a recreational pilot licence—meets the general English language proficiency requirements mentioned in regulation 61.265.

Note: Despite anything in these Regulations, CASA is not to issue a flight crew licence to an applicant unless certain requirements are met: see regulation 6.57 of the *Aviation Transport Security Regulations 2005*.

61.165 Grant of flight crew ratings

Subject to regulation 11.055, CASA, or an examiner or an approval holder within the meaning of regulation 61.150, must grant a flight crew rating to an applicant for the rating if:

- (a) the application complies with regulation 61.155; and
- (b) for an application to an examiner or approval holder—the examiner or approval holder may, under regulation 61.150, grant the rating; and
- (c) the applicant meets the requirements mentioned in this Part for the grant of the rating.

61.170 Grant of flight crew endorsements

Subject to regulation 11.055, CASA, or an examiner, instructor or an approval holder within the meaning of regulation 61.150, must grant a flight crew endorsement to an applicant for the endorsement if:

- (a) the application complies with regulation 61.155; and
- (b) for an application to an examiner, instructor or approval holder—the examiner, instructor or approval holder may, under regulation 61.150, grant the endorsement; and
- (c) the applicant meets the requirements mentioned in this Part for the grant of the endorsement.

61.175 How CASA issues flight crew licences, ratings and endorsements

- (1) Subregulation (2) applies if:
 - (a) CASA grants a flight crew licence to a person under regulation 61.160; and
 - (b) the person does not already hold a flight crew licence.
 - (2) For subregulation (1), CASA must issue to the person a document (the *licence document*) indicating that the person is authorised to exercise the privileges of:
 - (a) the flight crew licence; and
 - (b) if, at the same time, CASA also grants a flight crew rating or endorsement to the person under regulation 61.165 or 61.170—the rating or endorsement.
 - (3) Subregulation (4) applies if:
 - (a) CASA grants a flight crew licence (the *new licence*) to a person under regulation 61.160; and
 - (b) the person already holds a flight crew licence (the *existing licence*).
-

Part 61 Flight crew licensing

Subpart 61.B Grant of flight crew licences, ratings and endorsements

Division 61.B.1 General

Regulation 61.180

- (4) For subregulation (3), CASA must issue to the person a new licence document indicating that the person is authorised to exercise the privileges of:
 - (a) the new licence; and
 - (b) the existing licence; and
 - (c) any flight crew ratings and endorsements that the person already holds or that CASA grants at the same time as the new licence.
- (5) Subregulation (6) applies if:
 - (a) CASA grants a flight crew rating or endorsement to a person under regulation 61.165 or 61.170, other than a rating or endorsement granted at the same time as a flight crew licence; and
 - (b) the person already holds a flight crew licence.
- (6) For subregulation (5), CASA must endorse the person's licence document to the effect that the person is authorised to exercise the privileges of the rating or endorsement.

61.180 How examiner, instructor or approval holder issues rating or endorsement

- (1) If an examiner or approval holder grants a flight crew rating to a person under regulation 61.165, the examiner or approval holder must:
 - (a) endorse the person's licence document to the effect that the person is authorised to exercise the privileges of the rating; and
 - (b) give CASA a written notice that the person has met the requirements mentioned in this Part for the grant of the rating.
- (2) If an examiner, instructor or approval holder grants a flight crew endorsement to a person under regulation 61.170, the examiner, instructor or approval holder must:
 - (a) endorse the person's licence document to the effect that the person is authorised to exercise the privileges of the endorsement; and
 - (b) give CASA a written notice that the person has met the requirements mentioned in this Part for the grant of the endorsement.
- (3) An examiner, instructor or approval holder commits an offence if he or she contravenes subregulation (1) or (2).

Penalty: 50 penalty units.
- (4) If CASA is satisfied that the rating or endorsement was issued in error, CASA must cancel the rating or endorsement.
- (5) An offence against this regulation is an offence of strict liability.

61.185 New licence document if licence, rating or endorsement cancelled

- (1) This regulation applies if:

Regulation 61.190

- (a) a flight crew licence, rating or endorsement is cancelled under Part 16 of CAR or Subpart 11.D; and
 - (b) the holder of the licence, rating or endorsement holds a licence that is not cancelled (the *continuing licence*).
- (2) CASA must issue to the holder a new licence document indicating that the holder is authorised to exercise the privileges of:
- (a) the continuing licence; and
 - (b) any ratings or endorsements that the holder continues to hold.

61.190 Licence holder to comply with limitations and requirements of Part 61

It is a condition of a flight crew licence, rating or endorsement that the holder must comply with:

- (a) the limitations on the exercise of the privileges of the licence, rating or endorsement set out in this Part; and
- (b) the requirements set out in this Part that apply to the holder.

Division 61.B.2—Flight training and other training

61.195 Flight training requirements

- (1) Subregulation (2) applies to flight training for:
 - (a) a flight crew licence; or
 - (b) a flight crew rating; or
 - (c) a flight crew endorsement, other than a design feature endorsement or a flight activity endorsement.

Note: For training, other than flight training, see regulation 61.210.
- (2) For subregulation (1), a requirement in this Part for an applicant for a flight crew licence, rating or endorsement to have completed flight training for the licence, rating or endorsement is met only if:
 - (a) the applicant has received training in all the units of competency mentioned in the Part 61 Manual of Standards for the licence, rating or endorsement; and
 - (b) the training is conducted by:
 - (i) an instructor for a Part 141 or 142 operator that is authorised to conduct flight training for the licence, rating or endorsement; or
 - (ii) the holder of an approval under regulation 141.035 or 142.040 to conduct the training; and
 - (c) the applicant has been assessed as competent in each unit of competency by the instructor or approval holder; and
 - (d) for flight training for the grant of an aircraft class rating or type rating—the training is conducted in accordance with regulation 61.205; and
 - (e) the applicant's training provider has given the applicant a course completion certificate indicating that the requirements of paragraphs (a) and (c) have been met.
- (3) Subregulation (4) applies to flight training for a design feature endorsement or a flight activity endorsement.
- (4) For subregulation (3), a requirement in this Part for an applicant for a flight crew endorsement to have completed flight training for the endorsement is met only if:
 - (a) the applicant has received training in all the units of competency mentioned in the Part 61 Manual of Standards for the endorsement; and
 - (b) the training is conducted by:
 - (i) an instructor; or
 - (ii) the holder of an approval under regulation 61.040 to conduct the training; and
 - (c) the applicant has been assessed as competent in each unit of competency by the instructor or approval holder.

- (5) For paragraphs (2)(c) and (4)(c), the assessment must be conducted against the standards mentioned in the Part 61 Manual of Standards for the licence, rating or endorsement.

61.200 Differences training requirements

A requirement in this Part for the holder of a type rating to have completed differences training for a variant of the aircraft type covered by the rating is met only if:

- (a) the holder has received training in all the units of competency mentioned in the Part 61 Manual of Standards for the rating that are necessary to ensure that the holder is able to exercise the privileges of the rating as safely as the holder would have been able to, had the holder undertaken the flight training for the rating in the variant; and
- (b) the training is conducted by:
 - (i) an instructor for a Part 141 or 142 operator that is authorised to conduct differences training for the variant; or
 - (ii) the holder of an approval under regulation 141.035 or 142.040 to conduct the training; and
- (c) the holder has been assessed by the instructor or approval holder as competent to exercise the privileges of the rating as safely as the holder would have been able to, had the holder undertaken the flight training for the rating in the variant; and
- (d) the training is conducted in accordance with regulation 61.205; and
- (e) the applicant's training provider has given the applicant a course completion certificate indicating that the requirements of paragraphs (a) and (c) have been met.

61.205 When training must not be conducted in aircraft

- (1) For paragraphs 61.195(2)(d), 61.200(d) and 61.747(3)(c), the training must not be conducted in an aircraft with a maximum certificated passenger seating capacity of more than 9 if:
- (a) there is an approved flight simulator for the training available in Australia; or
 - (b) for a rating that applies only to an aircraft with a maximum certificated passenger seating capacity of more than 19 or a maximum certificated take-off weight of more than 8 618 kg—there is an approved flight simulator for the training available outside Australia.
- (2) In this regulation:
- available**, for training, means able to be used for the training.

Part 61 Flight crew licensing

Subpart 61.B Grant of flight crew licences, ratings and endorsements

Division 61.B.2 Flight training and other training

Regulation 61.210

61.210 Other approved courses of training or professional development

- (1) A requirement in this Part for a student pilot or an applicant for a flight crew licence, rating or endorsement to have completed an approved course of training or professional development is met only if:
 - (a) for a course that is approved under regulation 61.040—the student or applicant:
 - (i) has received training in all the units of competency mentioned in the Part 61 Manual of Standards for the course; and
 - (ii) has been assessed as competent by the person conducting the course against the standards mentioned in the Part 61 Manual of Standards for the course; or
 - (b) for a course that is conducted by a Part 141 or 142 operator—the student or applicant:
 - (i) has received training in all the units of competency mentioned in the course's syllabus; and
 - (ii) has been assessed by a person mentioned in subregulation (2) as competent against the standards mentioned in the course's syllabus.
- (2) For subparagraph (1)(b)(ii), the persons are as follows:
 - (a) the head of operations of the Part 141 or 142 operator that conducted the training;
 - (b) an instructor who is authorised by the head of operations to conduct the assessment;
 - (c) the holder of an approval under regulation 141.035 or 142.040 to conduct the training.

Division 61.B.3—Aeronautical knowledge examinations

61.215 Aeronautical knowledge examinations—general

- (1) CASA may set aeronautical knowledge examinations for the grant of a flight crew licence, rating or endorsement in accordance with the aeronautical knowledge standards mentioned in the Part 61 Manual of Standards for the licence, rating or endorsement.
- (2) A Part 141 or 142 operator may set aeronautical knowledge examinations for the grant of:
 - (a) a recreational pilot licence; or
 - (b) a flight crew rating other than an instrument rating; or
 - (c) a flight crew endorsement.
- (3) However, a Part 141 or 142 operator may set an aeronautical knowledge examination only if:
 - (a) the examination is set in accordance with the aeronautical knowledge standards mentioned in the Part 61 Manual of Standards for the licence, rating or endorsement; and
 - (b) the operator holds an approval under regulation 61.040 for the examination.
- (4) The examinations may be conducted at the times and places, and in accordance with arrangements, decided by the body setting the examination.

61.220 Aeronautical knowledge examinations—air transport pilot licence

To be eligible to sit the aeronautical knowledge examination for an air transport pilot licence with a particular aircraft category rating, an applicant must:

- (a) hold a commercial pilot licence with that rating; or
- (b) have passed the aeronautical knowledge examination for a commercial pilot licence with that rating; or
- (c) hold an approval under regulation 61.040 to sit the examination.

61.225 Aeronautical knowledge examinations—pass standards

- (1) A requirement in this Part for a person to have passed an aeronautical examination for a flight crew licence, rating or endorsement is met if the person meets the standards mentioned in the Part 61 Manual of Standards for the examination.
- (2) However, a person is taken to have passed an aeronautical knowledge examination only if the person passes all parts of the examination within a period of 2 years.
- (3) If on 3 occasions a person attempts, but fails to pass, an aeronautical knowledge examination, or a part of an examination, the person is not permitted to attempt

Part 61 Flight crew licensing

Subpart 61.B Grant of flight crew licences, ratings and endorsements

Division 61.B.3 Aeronautical knowledge examinations

Regulation 61.230

the examination or part again within 3 months beginning on the day the person attempts the examination or part for the third time.

- (4) If on 4 occasions a person attempts, but fails to pass, an aeronautical knowledge examination, or a part of an examination, the person is not permitted to attempt the examination or part again until CASA is satisfied that the person has completed appropriate training.

61.230 Aeronautical knowledge examinations—knowledge deficiency reports

- (1) This regulation applies if a candidate for an aeronautical knowledge examination:
- (a) passes the examination with a score of less than 100%; or
 - (b) fails the examination with a score of at least 51%.
- (2) The body that conducts the examination must:
- (a) prepare a report about the competency standards in which the candidate's knowledge is deficient; and
 - (b) give a copy of the report to the candidate; and
 - (c) if the examination was not conducted by the candidate's training provider—give a copy of the report to the candidate's training provider.

Division 61.B.4—Flight tests

61.235 Flight tests for flight crew licences and ratings—prerequisites

Flight crew licence prerequisites

- (1) Subregulation (2) applies to an applicant for a flight crew licence, other than an applicant who is eligible for the licence under subregulation 61.275(1) (Overseas flight crew authorisations—recognition).
- (2) For subregulation (1), the applicant is eligible to take a flight test for the licence only if:
 - (a) the applicant:
 - (i) is at least the minimum age to hold the licence; and
 - (ii) has passed the aeronautical knowledge examination for the licence; and
 - (iii) has met the flight training requirements for the grant of the licence; and
 - (iv) has met the aeronautical experience requirements for the grant of the licence; and
 - (v) for a flight crew licence other than a recreational pilot licence—has a current aviation English language proficiency assessment; and
 - (vi) for a recreational pilot licence—meets the general English language proficiency requirements mentioned in regulation 61.265; and
 - (aa) for a flight crew licence other than an air transport pilot licence—a person mentioned in subregulation (5), (6) or (7) has certified in writing that the applicant has met the requirements mentioned in paragraph (a); and
 - (b) for a flight crew licence other than an air transport pilot licence, if the applicant passed the aeronautical knowledge examination for the licence with a score of less than 100%:
 - (i) the applicant’s training provider has given the examiner who is to conduct the applicant’s flight test a copy of the applicant’s knowledge deficiency report; and
 - (ii) the applicant satisfies the examiner that the applicant has sufficient knowledge in any competency standard mentioned in the knowledge deficiency report to safely exercise the privileges of the licence; and
 - (c) if the flight test is to be conducted in an aircraft:
 - (i) the applicant holds a current medical certificate of the class required for the exercise of the privileges of the licence; or
 - (ii) if the test is for a recreational pilot licence—the applicant holds a current recreational aviation medical practitioner’s certificate; or
 - (iii) the applicant holds a medical exemption for the exercise of the privileges of the licence.

Part 61 Flight crew licensing

Subpart 61.B Grant of flight crew licences, ratings and endorsements

Division 61.B.4 Flight tests

Regulation 61.240

Flight crew rating prerequisites

- (3) Subregulation (4) applies to an applicant for a flight crew rating, other than an applicant who is eligible for the rating under subregulation 61.275(2) or (3).
- (4) For subregulation (3), the applicant is eligible to take a flight test for the rating only if:
 - (a) a person mentioned in subregulation (5), (6) or (7) has certified in writing that the applicant:
 - (i) if the application is for an operational rating—has passed the aeronautical knowledge examination for the rating; and
 - (ii) has met the flight training requirements for the grant of the rating; and
 - (iii) has met the aeronautical experience requirements for the rating; and
 - (b) if the test is to be conducted in an aircraft:
 - (i) the applicant holds a current class 1 or 2 medical certificate or recreational aviation medical practitioner's certificate; or
 - (ii) the applicant holds a medical exemption for the exercise of the privileges of the licence.
- (5) For paragraphs (2)(aa) and (4)(a), if the applicant's training provider is a Part 141 operator, the person is:
 - (a) the operator's head of operations; or
 - (b) a person named in the operator's operations manual as responsible for the flight training to which the flight test relates.
- (6) For paragraphs (2)(aa) and (4)(a), if the applicant's training provider is a Part 142 operator, the person is:
 - (a) the operator's head of operations; or
 - (b) a person named in the operator's exposition as responsible for the flight training to which the flight test relates.
- (7) For paragraphs (2)(aa) and (4)(a), if the applicant's training provider is the holder of an approval under regulation 141.035 or 142.040 to conduct the training, the person is the approval holder.

61.240 Consequences of taking flight test when ineligible

An applicant for a flight crew licence or rating is taken not to have passed a flight test if, when the applicant took the flight test, the applicant was not eligible under regulation 61.235 to take the flight test.

61.245 Conduct of flight tests for flight crew licences, ratings and endorsements

- (1) The flight test for a flight crew licence, rating or endorsement must be conducted in:
 - (a) an aircraft or an approved flight simulator for the purpose; and
 - (b) if the flight test is for a rating or endorsement that is limited to a particular category, class or type of aircraft:

- (i) an aircraft of that category, class or type; or
 - (ii) an approved flight simulator for that category, class or type of aircraft that is appropriate for the flight test.
- (2) However, the flight test for an aircraft class rating or type rating must not be conducted in an aircraft with a maximum certificated passenger seating capacity of more than 9 if:
- (a) there is an approved flight simulator for the flight test available in Australia; or
 - (b) for a rating that applies only to an aircraft with a maximum certificated passenger seating capacity of more than 19 or a maximum certificated take-off weight of more than 8 618 kg—there is an approved flight simulator for the flight test available outside Australia.
- (3) The flight test must be conducted by an examiner or the holder of an approval under regulation 61.040 to conduct the flight test (the **Part 61 approval holder**) who is nominated by the applicant’s training provider.
- (4) However, at any time before the test begins, CASA may, by written notice to the training provider and, if the training provider has nominated an examiner or Part 61 approval holder to conduct the flight test, the examiner or Part 61 approval holder:
- (a) nominate a different examiner or Part 61 approval holder to conduct the flight test; or
 - (b) require that CASA will conduct the flight test.
- (5) In this regulation:

available, for a flight test, means able to be used for the flight test.

61.250 Pass standards for flight tests

An applicant for a flight crew licence, rating or endorsement passes the flight test for the licence, rating or endorsement if the examiner assesses the applicant’s performance in the flight test as meeting the competency standards mentioned in the Part 61 Manual of Standards for the flight test.

Division 61.B.5—English language proficiency

61.255 Aviation English language proficiency assessments

- (1) A person may apply, in writing, to CASA or an examiner for an assessment of the person's aviation English language proficiency.
- (2) The applicant passes the assessment if CASA or the examiner is satisfied that the applicant meets the ICAO level 6 aviation English language proficiency standards mentioned in the Part 61 Manual of Standards.
- (3) If CASA or the examiner is not satisfied that the applicant meets the ICAO level 6 aviation English language proficiency standards mentioned in the Part 61 Manual of Standards, CASA or the examiner must refer the application to an aviation English language proficiency assessor.
- (4) The applicant passes the assessment if the assessor is satisfied that the applicant meets the ICAO level 4, 5 or 6 aviation English language proficiency standards mentioned in the Part 61 Manual of Standards.

61.260 Duration of English language proficiency assessments

A person's aviation English language proficiency assessment is **current** as follows:

- (a) if the person was assessed as meeting the ICAO level 6 aviation English language proficiency standards—indefinitely;
- (b) if the person was assessed as meeting the ICAO level 5 aviation English language proficiency standards—for 6 years beginning on the day the assessment is conducted;
- (c) if the person was assessed as meeting the ICAO level 4 aviation English language proficiency standards—for 3 years beginning on the day the assessment is conducted.

61.265 Recreational pilot licences—general English language proficiency

- (1) For subparagraph 61.160(b)(iii), an applicant for a recreational pilot licence must:
 - (a) have been assessed by CASA or an examiner as meeting the general English language proficiency standard mentioned in the Part 61 Manual of Standards; or
 - (b) satisfy a person mentioned in subregulation (2) that the applicant:
 - (i) has successfully completed one of the general English language proficiency tests mentioned in the Part 61 Manual of Standards; and
 - (ii) has sufficient general English language proficiency to safely exercise the privileges of the licence.
 - (2) For paragraph (1)(b), the persons are as follows:
 - (a) the head of operations of a Part 141 or 142 operator;
-

- (b) an instructor who is authorised by the head of operations to assess the applicant's English language proficiency.

61.270 Approval of language proficiency assessors

- (1) A person may apply to CASA, in writing, for approval to conduct aviation English language proficiency assessments.
- (2) Subject to regulation 11.055, CASA must grant the approval if CASA is satisfied that the person has successfully completed an approved course of training in assessment of aviation English language.

Division 61.B.6—Recognition of overseas flight crew authorisations

61.275 Overseas flight crew authorisations—recognition

- (1) Despite anything else in this Part, the holder of an overseas flight crew licence (the **applicant**) is taken to meet the requirements under this Part for the grant of a flight crew licence (an **Australian licence**) with an aircraft category rating if:
- (a) CASA is satisfied that the overseas flight crew licence and any ratings on that licence are at least equivalent to the Australian licence with that aircraft category rating; and
 - (b) the applicant is at least the minimum age for the grant of the Australian licence; and
 - (c) the applicant holds an authorisation to operate an aircraft radio granted by the national aviation authority of a Contracting State; and
 - (d) either:
 - (i) the applicant's overseas licence states that the applicant meets the ICAO level 4, 5 or 6 aviation English language proficiency standards; or
 - (ii) the applicant has a current aviation English language proficiency assessment; and
 - (e) for an application for a commercial pilot licence:
 - (i) a person mentioned in subregulation (5) certifies in writing that the applicant is competent in each unit of competency mentioned in the Part 61 Manual of Standards for the Australian licence; and
 - (ii) the applicant passes the flight test mentioned in the Part 61 Manual of Standards for the Australian licence; and
 - (ea) for an application for a multi-crew pilot licence or air transport pilot licence—the applicant passes the flight test mentioned in the Part 61 Manual of Standards for the Australian licence; and
 - (f) the applicant has passed the overseas conversion aeronautical knowledge examination mentioned in the Part 61 Manual of Standards for the Australian licence and aircraft category rating.

Note: Despite anything in these Regulations, CASA is not to issue a flight crew licence to an applicant unless certain requirements are met: see regulation 6.57 of the *Aviation Transport Security Regulations 2005*.

- (2) Despite anything else in this Part, the holder of an overseas flight crew licence (the **applicant**) is taken to meet the requirements under this Part for the grant of an aircraft class rating, pilot type rating or flight engineer type rating (an **Australian rating**) if:
- (a) the applicant holds, or has held, an overseas rating; and
 - (b) CASA is satisfied that the overseas rating is at least equivalent to the Australian rating.

- (3) Despite anything else in this Part, the holder of an overseas flight crew licence (the **applicant**) is taken to meet the requirements under this Part for the grant of an operational rating (an **Australian rating**) if:
- (a) the applicant holds, or has held, an overseas rating; and
 - (b) CASA is satisfied that the overseas rating is at least equivalent to the Australian rating; and
 - (c) a person mentioned in subregulation (5) certifies in writing that the applicant is competent in each unit of competency mentioned in the Part 61 Manual of Standards for the Australian rating; and
 - (d) the applicant passes the aeronautical knowledge examination for the Australian rating; and
 - (e) CASA is satisfied that the applicant has completed the aeronautical experience required for the grant of the Australian rating; and
 - (f) the applicant passes the flight test mentioned in the Part 61 Manual of Standards for the Australian rating.
- (4) Despite anything else in this Part, the holder of an overseas flight crew licence (the **applicant**) is taken to meet the requirements under this Part for the grant of a flight crew endorsement (an **Australian endorsement**) if:
- (a) the applicant holds, or has held, an overseas endorsement; and
 - (b) CASA is satisfied that the overseas endorsement is at least equivalent to the Australian endorsement; and
 - (c) if the requirements for the grant of the endorsement include passing a flight test—the applicant passes the flight test.
- (5) For subparagraph (1)(e)(i) and paragraph (3)(c), the persons are as follows:
- (a) the head of operations of a Part 141 or 142 operator that is authorised to conduct flight training for the Australian licence or rating;
 - (b) a person named in the Part 141 operator's operations manual, or the Part 142 operator's exposition, as responsible for flight training for the licence or rating.

61.280 Grant of flight crew licences, ratings or endorsements under bilateral agreements

CASA may grant a flight crew licence, rating or endorsement to the holder of an overseas flight crew licence in accordance with a bilateral agreement between Australia and the Contracting State whose licensing authority granted the overseas licence.

Note: The holder of a commercial pilot licence or an airline transport pilot licence granted by the Civil Aviation Authority of New Zealand is eligible for an equivalent Australian licence and equivalent ratings and other endorsements: see the *Trans-Tasman Mutual Recognition Act 1997*.

Division 61.B.7—Recognition of Australian Defence Force qualifications

61.285 Australian Defence Force qualifications—recognition

Despite anything else in this Part, a member or former member of the Australian Defence Force is taken to meet the requirements under this Part for the grant of a flight crew licence, rating or endorsement, other than an examiner rating, if the member:

- (a) holds, or has held, a flight crew qualification granted by the Australian Defence Force that CASA is satisfied is at least equivalent to the licence, rating or endorsement; and
- (b) for a flight crew licence:
 - (i) is at least the minimum age for the grant of the licence; and
 - (ii) has a current aviation English language proficiency assessment; and
- (c) meets the aeronautical experience requirements for the licence, rating or endorsement; and
- (f) for an air transport pilot licence:
 - (i) passes the Australian Defence Force conversion aeronautical knowledge examination for the air transport pilot licence mentioned in the Part 61 Manual of Standards; and
 - (ii) completes an approved course of training in multi-crew cooperation; and
 - (iii) passes the flight test mentioned in the Part 61 Manual of Standards for the air transport pilot licence; and
- (g) for an instrument rating—passes:
 - (i) the aeronautical knowledge examination for the rating; and
 - (ii) the flight test mentioned in the Part 61 Manual of Standards for the rating; and
- (h) for an instructor rating—passes the flight test mentioned in the Part 61 Manual of Standards for the rating.

Subpart 61.C—Certificates of validation

61.290 Grant of certificates of validation

- (1) The holder of an overseas flight crew licence may apply to CASA for the grant of a certificate of validation of the licence and any overseas rating or endorsement attached to the licence.
- (2) Subject to regulation 11.055, CASA must grant the certificate of validation if:
 - (a) the applicant is authorised (however described) to exercise the privileges of the overseas flight crew licence and any rating or endorsement attached to the licence; and
 - (b) the applicant has passed any examination or flight test that CASA has, under subregulation (4), determined is required for the applicant.
- (3) For paragraph (2)(a), if the overseas flight crew licence is equivalent to a commercial pilot licence, multi-crew pilot licence or air transport pilot licence, CASA must verify with the issuing authority for the licence that the licence holder is authorised (however described) to exercise the privileges of the licence and any rating or endorsement attached to the licence.
- (4) For paragraph (2)(b), if it is necessary for an applicant to pass an examination or flight test to satisfy CASA that the applicant can safely exercise the privileges of the certificate of validation, CASA may determine that the examination or flight test is required for the applicant.

61.295 Privileges of certificates of validation

Subject to regulations 61.300 and 61.305, the holder of a certificate of validation of an overseas flight crew licence, rating or endorsement that is equivalent to an Australian flight crew licence, rating or endorsement is authorised to conduct any activity that the holder of the equivalent Australian flight crew licence, rating or endorsement is authorised to conduct.

61.300 Limitations on exercise of privileges of certificates of validation—medical certificate

- (1) The holder of a certificate of validation of an overseas flight crew licence is authorised to conduct an activity mentioned in regulation 61.295 only if the holder also holds an overseas medical certificate mentioned in subregulation (2).
- (2) For subregulation (1), the medical certificate must be of at least the class required for the exercise of the privileges of the overseas flight crew licence by the Contracting State whose national aviation authority granted the licence to the holder.

Regulation 61.305

61.305 Limitations on exercise of privileges of certificates of validation—recent experience, flight review and proficiency check

- (1) The holder of a certificate of validation for an overseas flight crew licence that is equivalent to an Australian pilot licence is authorised to pilot an aircraft only if the holder has complied with the recent experience requirements mentioned in regulation 61.395 for the exercise of the privileges of the Australian pilot licence.
- (2) The holder of a certificate of validation for an overseas rating that is equivalent to an Australian rating is authorised to pilot an aircraft only if the holder has complied with the recent experience requirements mentioned in this Part for the exercise of the privileges of the Australian rating.

61.310 Limitations on exercise of privileges of certificates of validation—carriage of documents

The holder of a certificate of validation is authorised to exercise the privileges of the certificate on a flight only if the holder carries the following documents on the flight:

- (a) his or her certificate of validation;
- (b) his or her overseas flight crew licence;
- (c) his or her overseas medical certificate;
- (d) a document that:
 - (i) includes a photograph of the holder showing the holder's full face and his or her head and shoulders; and
 - (ii) was issued within the previous 10 years by the government, or a government authority, of any of the following:
 - (A) the Commonwealth or a State or Territory;
 - (B) a foreign country, or a state or province (however described) of a foreign country; and
 - (iii) has not expired or been cancelled.

61.315 Conduct of unauthorised activities by holders of certificates of validation

- (1) The holder of a certificate of validation commits an offence if:
 - (a) the holder conducts an activity while:
 - (i) piloting an aircraft; or
 - (ii) acting as flight engineer of an aircraft; or
 - (iii) operating a flight simulation training device; and
 - (b) the holder is not authorised under this Part to conduct the activity.

Penalty: 50 penalty units.

- (2) An offence against this regulation, other than an offence relating to a contravention of regulation 61.385 (Limitations on exercise of privileges of pilot licences—general competency requirement), is an offence of strict liability.

Note: See also subsection 20AB(1) of the Act for an offence of performing any duty that is essential to the operation of an Australian aircraft during flight time without holding a

Regulation 61.320

relevant civil aviation authorisation or being otherwise authorised by or under these Regulations to perform the duty.

- (3) It is a condition of a certificate of validation that the holder must comply with:
 - (a) the limitations on the exercise of the privileges of the certificate of validation set out in this Subpart; and
 - (b) the requirements set out in this Part that apply to the holder.

61.320 Certificates of validation—period of validity

- (1) A certificate of validation must:
 - (a) not be granted for a period of more than one year; and
 - (b) state the date on which it expires.
- (2) However, a certificate of validation ends on the earliest of the following events:
 - (a) the end of the day stated in the certificate as the date on which it expires;
 - (b) when the holder ceases to be authorised (however described) to exercise the privileges of the overseas flight crew licence, or any rating or endorsement on the licence, to which the certificate relates;
 - (c) when the holder's overseas medical certificate expires.

61.325 Certificates of validation—renewal

- (1) CASA may renew a certificate of validation only if:
 - (a) the person has passed the aeronautical knowledge examination for a flight crew licence under this Part that is equivalent to the overseas flight crew licence to which the certificate relates; or
 - (b) CASA is satisfied that exceptional circumstances justify the renewal.

- (2) In this regulation:

renew, a certificate of validation, includes grant a new certificate of validation to the holder of:

- (a) a current certificate of validation; or
 - (b) a certificate of validation that has expired within the previous 3 months;
- in respect of the same overseas flight crew licence, rating or endorsement.

Subpart 61.D—General obligations of flight crew licence holders

61.335 Identity checks

- (1) CASA may, by written notice given to the holder of a flight crew licence or certificate of validation, require the holder to provide evidence of his or her identity in accordance with paragraph 6.57(1)(a) of the *Aviation Transport Security Regulations 2005*.
- (2) The holder commits an offence if:
 - (a) CASA has not told the holder, in writing, that he or she has complied with the requirement; and
 - (b) the holder exercises the privileges of the licence or certificate.

Penalty: 50 penalty units.
- (3) For subregulation (2), CASA is taken to have told the holder that he or she has complied with the requirement if CASA issues a new licence document or certificate of validation to the holder after giving the holder the notice.
- (4) An offence against this regulation is an offence of strict liability.

61.336 Provision of photograph

- (1) CASA may, by written notice given to the holder of a flight crew licence or certificate of validation, require the holder to give CASA, within 30 days of receiving the notice, a photograph of the holder:
 - (a) showing the holder's full face and his or her head and shoulders; and
 - (b) taken not earlier than 6 months before the date of the notice.
- (2) The holder commits an offence if the holder:
 - (a) has not complied with the requirement; and
 - (b) exercises the privileges of the licence or certificate of validation.

Penalty: 50 penalty units.
- (3) An offence against this regulation is an offence of strict liability.

61.340 Production of licence documents, medical certificates and identification

- (1) CASA may direct the holder of a flight crew licence to produce any or all of the following documents for inspection by CASA:
 - (a) the holder's licence document;
 - (b) unless the holder also holds a medical exemption for the exercise of the privileges of the licence—the holder's medical certificate or recreational aviation medical practitioner's certificate;

Regulation 61.345

- (c) a document that includes a photograph of the holder showing the holder's full face and his or her head and shoulders:
 - (i) that was issued within the previous 10 years by the government, or a government authority, of:
 - (A) the Commonwealth or a State or Territory; or
 - (B) a foreign country, or a state or province (however described) of a foreign country; and
 - (ii) that has not expired or been cancelled.
- (2) CASA may direct the holder of a certificate of validation to produce any or all of the following documents for inspection by CASA:
 - (a) the holder's certificate of validation;
 - (b) the holder's overseas medical certificate;
 - (c) the holder's overseas flight crew licence;
 - (d) a document that includes a photograph of the holder showing the holder's full face and his or her head and shoulders:
 - (i) that was issued within the previous 10 years by the government, or a government authority, of:
 - (A) the Commonwealth or a State or Territory; or
 - (B) a foreign country, or a state or province (however described) of a foreign country; and
 - (ii) that has not expired or been cancelled.
- (3) The holder of a flight crew licence or certificate of validation commits an offence if:
 - (a) CASA directs the holder to produce a document under subregulation (1) or (2); and
 - (b) the holder does not produce the document within the period mentioned in subregulation (4).

Penalty: 50 penalty units.

- (4) For paragraph (3)(b), the period is as follows:
 - (a) if, when the direction was given, the holder was exercising, had just finished exercising, or was about to exercise, the privileges of the licence or certificate of validation—immediately;
 - (b) in any other case—7 days after the day the direction is given.
- (5) An offence against this regulation is an offence of strict liability.

61.345 Personal logbooks—pilots

- (1) A person who holds a pilot licence, or a certificate of validation of an overseas flight crew licence that is equivalent to a pilot licence, commits an offence if the person does not keep a personal logbook in accordance with this regulation.

Penalty: 50 penalty units.

Regulation 61.350

- (2) The person must record his or her full name and date of birth in the person's logbook.
- (3) The person must, as soon as practicable after completing each flight, record the following information in the person's logbook for the flight:
 - (a) the date the flight began;
 - (b) the type of aircraft;
 - (c) whether it was a single-engine or multi-engine aircraft;
 - (d) the aircraft's nationality and registration marks;
 - (e) the take-off and landing points for the flight, and for each segment of the flight;
 - (f) the flight time (if any) flown in each of the following capacities:
 - (i) pilot in command;
 - (ii) co-pilot;
 - (iii) pilot in command under supervision;
 - (iv) pilot receiving flight training;
 - (g) if the person is a flight instructor—any flight time spent exercising the privileges of his or her flight instructor rating;
 - (h) if the person is a flight examiner—any flight time spent exercising the privileges of his or her flight examiner rating;
 - (i) whether the flight was by day or night, or both;
 - (j) any instrument flight time;
 - (k) whether the person conducted an instrument approach operation and, if so, the type of instrument approach procedure.
- (4) The person must, as soon as practicable after completing each simulated flight in a flight simulation training device, record the following information in the person's logbook for the simulated flight:
 - (a) the date the simulated flight began;
 - (b) the type of aircraft represented by the device;
 - (c) the simulated flight time (if any) performed in each of the following capacities:
 - (i) pilot in command;
 - (ii) co-pilot;
 - (iii) pilot in command under supervision;
 - (iv) pilot receiving flight training;
 - (d) if the person is a flight instructor or simulator instructor—any time spent exercising the privileges of his or her instructor rating;
 - (e) whether the flight was conducted in simulated day or night conditions, or both;
 - (f) a description of the simulated flight activity.

61.350 Personal logbooks—flight engineers

- (1) A person who holds a flight engineer licence, or a certificate of validation of an overseas flight crew licence that is equivalent to a flight engineer licence,
-

Regulation 61.355

commits an offence if the person does not keep a personal logbook in accordance with this regulation.

Penalty: 50 penalty units.

- (2) The person must record his or her full name and date of birth in the person's logbook.
- (3) The person must, as soon as practicable after completing each flight, record the following information in the person's logbook for the flight:
 - (a) the date the flight began;
 - (b) the type of aircraft;
 - (c) the aircraft's nationality and registration marks;
 - (d) the name of the pilot in command;
 - (e) the take-off and landing points for the flight;
 - (f) whether the holder was operating under training or supervision, or was conducting training or supervision;
 - (g) the amount of flight time for which the holder performed the duties of a flight engineer;
 - (h) if the person is a flight engineer instructor—any flight time spent exercising the privileges of his or her flight engineer instructor rating.
- (4) The person must, as soon as practicable after completing each simulated flight in a flight simulation training device, record the following information in his or her personal logbook for the simulated flight:
 - (a) the date the simulated flight began;
 - (b) the type of aircraft represented by the device;
 - (c) if a person acted as pilot in command for the simulated flight—that person's name;
 - (d) a description of the activities conducted during the simulated flight;
 - (e) whether the holder was operating under training or supervision, or was conducting training or supervision;
 - (f) the amount of time for which the holder performed the duties of flight engineer;
 - (g) if the person is a flight engineer instructor—any flight time spent exercising the privileges of his or her flight engineer instructor rating.

61.355 Retention of personal logbooks

- (1) A person commits an offence if:
 - (a) the person is required to keep a personal logbook under regulation 61.345 or 61.350; and
 - (b) the person does not retain the logbook for 7 years after the day the last entry is made in it.

Penalty: 50 penalty units.

- (2) A person commits an offence if:
-

Regulation 61.360

- (a) the person is required to keep a personal logbook under regulation 61.345 or 61.350; and
- (b) the person does not ensure that each entry in the logbook is retained unaltered throughout the period mentioned in subregulation (1).

Penalty: 50 penalty units.

- (3) An offence against this regulation is an offence of strict liability.

61.360 False entries in personal logbooks

- (1) The holder of a flight crew licence or certificate of validation commits an offence if:

- (a) the holder makes an entry in his or her personal logbook; and
- (b) the entry is false or misleading.

Penalty: 50 penalty units.

- (2) Paragraph (1)(b) does not apply if the entry is not false or misleading in a material particular.

Note: A defendant bears an evidential burden in relation to the matter mentioned in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

- (3) CASA may give the holder of a flight crew licence or certificate of validation a written direction to correct an entry in his or her personal logbook in accordance with the direction.
- (4) The holder commits an offence if the holder does not comply with the direction within 14 days after the day the direction is given to the person.

Penalty: 50 penalty units.

- (5) An offence against this regulation is an offence of strict liability.

61.365 Production of personal logbooks

- (1) CASA may direct the holder of a flight crew licence or certificate of validation to produce the holder's personal logbook for inspection by CASA.

- (2) The holder of a flight crew licence or certificate of validation commits an offence if:

- (a) CASA directs the holder to produce his or her personal logbook under subregulation (1); and
- (b) the holder does not produce an up to date version of the personal logbook within 7 days after the day the direction is given.

Penalty: 50 penalty units.

- (3) If the holder's personal logbook is kept in electronic form, a requirement to produce the logbook is met if:

- (a) the holder produces a printed copy of the logbook; and

Regulation 61.365

- (b) each page is certified by the holder as a true copy of the logbook records set out on the page.
- (4) An offence against this regulation is an offence of strict liability.

Part 61 Flight crew licensing

Subpart 61.E Pilot licensing—general limitations and authorisations

Division 61.E.1 General limitations on exercise of pilot licence privileges

Regulation 61.375

Subpart 61.E—Pilot licensing—general limitations and authorisations

Note: Subpart 61.E does not apply to glider pilot licences: see the definition of *pilot licence* in regulation 61.010. Subpart 61.Z deals with glider pilot licences.

Division 61.E.1—General limitations on exercise of pilot licence privileges

61.375 Limitations on exercise of privileges of pilot licences—ratings

- (1) This regulation applies to the holder of a pilot licence.
- (2) The holder is authorised to exercise the privileges of the licence in an aircraft of a particular category only if the holder also holds, as the associated aircraft category rating for the licence, the aircraft category rating for that category of aircraft.

Note: An aircraft category rating has effect only in conjunction with the licence for which it is granted. It does not authorise the exercise, in the aircraft category covered by the rating, of the privileges of any other licence held by the holder of the rating: see the definition of *associated* in regulation 61.010.

- (3) The holder is authorised to exercise the privileges of the licence in an aircraft, other than an aircraft mentioned in subregulation (5), only if the holder also holds an appropriate aircraft class rating for the aircraft.
- (4) For subregulation (3), either of the following is an appropriate aircraft class rating for an aeroplane in the single-engine aeroplane class:
 - (a) the single-engine aeroplane class rating;
 - (b) the multi-engine aeroplane class rating.
- (5) The holder is authorised to exercise the privileges of the licence in:
 - (a) a multi-crew aircraft; or
 - (b) an aircraft:
 - (i) that is certificated for single-pilot operation; and
 - (ii) for which a single-pilot type rating is required by a legislative instrument under regulation 61.060;only if the holder also holds the appropriate pilot type rating for the aircraft type.
- (6) However, the holder is not required to hold the pilot type rating for the aircraft if:
 - (a) the person is acting as a cruise relief co-pilot for the aircraft; and
 - (b) the person holds a cruise relief co-pilot type rating for the aircraft type.
- (7) The holder is authorised to conduct an activity mentioned in column 1 of an item in table 61.375 in the exercise of the privileges of the licence only if the holder also holds the rating mentioned in column 2 of the item.
- (8) However:

Regulation 61.375

- (a) the holder of a multi-crew pilot licence with an aeroplane category rating is authorised, without holding an instrument rating, to pilot an aeroplane in a multi-crew operation:
 - (i) under the IFR; or
 - (ii) at night under the VFR; and
- (b) the holder of an air transport pilot licence with an aeroplane category rating is authorised, without holding an instrument rating, to pilot an aeroplane:
 - (i) under the IFR; or
 - (ii) at night under the VFR; and
- (c) the holder of an air transport pilot licence with a powered-lift category rating is authorised, without holding an instrument rating, to pilot a powered-lift aircraft:
 - (i) under the IFR; or
 - (ii) at night under the VFR.

Table 61.375 Activities for which ratings are required

Item	Column 1 Activity	Column 2 Rating
1	An operation under the IFR, other than an operation mentioned in item 2	Instrument rating
2	A private operation under the IFR	Either: (a) instrument rating; or (b) private instrument rating
3	An operation at night under the VFR	Either: (a) night VFR rating; or (b) instrument rating
4	An operation at night using a night vision imaging system	Night vision imaging system rating
5	A low-level operation	Either: (a) low-level rating; or (b) aerial application rating
6	An aerial application operation below 500 ft AGL	Aerial application rating
7	An activity mentioned in paragraph 61.1165(a), (c), (d), (e) or (f) in an aircraft An activity mentioned in paragraph 61.1165(g), (h) or (i)	Flight instructor rating
8	An activity mentioned in paragraph 61.1190(a), (c), (d), (e) or (f) in a flight simulation training device An activity mentioned in paragraph 61.1165(b), (j) or (k) or 61.1190(b), (g) or (h)	Either: (a) flight instructor rating; or (b) simulator instructor rating

Part 61 Flight crew licensing

Subpart 61.E Pilot licensing—general limitations and authorisations

Division 61.E.1 General limitations on exercise of pilot licence privileges

Regulation 61.380

Table 61.375 Activities for which ratings are required

Item	Column 1 Activity	Column 2 Rating
9	An activity mentioned in regulation 61.1255	Flight examiner rating

61.380 Limitations on exercise of privileges of pilot licences—flight activity and design feature endorsements

- (1) The holder of a pilot licence is authorised to conduct a flight activity mentioned in column 2 of an item in table 61.1145 only if the holder also holds the endorsement mentioned in column 1 of the item.
- (2) The holder of a pilot licence is authorised to exercise the privileges of the licence in an aircraft that has a design feature mentioned in regulation 61.755 for the aircraft only if the holder also holds the design feature endorsement for the design feature.

61.385 Limitations on exercise of privileges of pilot licences—general competency requirement

- (1) The holder of a pilot licence is authorised to exercise the privileges of the licence in an aircraft only if the holder is competent in operating the aircraft to the standards mentioned in the Part 61 Manual of Standards for the class or type to which the aircraft belongs, including in all of the following areas:
 - (a) operating the aircraft’s navigation and operating systems;
 - (b) conducting all normal, abnormal and emergency flight procedures for the aircraft;
 - (c) applying operating limitations;
 - (d) weight and balance requirements;
 - (e) applying aircraft performance data, including take-off and landing performance data, for the aircraft.
 - (1A) Subregulation (1B) applies if the holder of a pilot licence also holds an operational rating or endorsement.
 - (1B) The holder is authorised to exercise the privileges of his or her pilot licence in an activity in an aircraft under the rating or endorsement only if the holder is competent in operating the aircraft in the activity to the standards mentioned in the Part 61 Manual of Standards (if any) for:
 - (a) the class or type to which the aircraft belongs; and
 - (b) the activity.
 - (2) The holder of a pilot licence is authorised to exercise the privileges of the licence in an aircraft that has an operative airborne collision avoidance system only if the holder is competent in the use of an airborne collision avoidance system to the standards mentioned in the Part 61 Manual of Standards.
-

61.390 Limitations on exercise of privileges of pilot licences—operating requirements and limitations

- (1) The holder of a pilot licence is not authorised to conduct an activity in the exercise of the privileges of the licence in an aircraft if:
 - (a) engaging in the activity is a prescribed purpose for subsection 27(9) of the Act; and
 - (b) the operator of the aircraft does not hold an AOC that authorises the conduct of the activity.
- (2) The holder of a pilot licence is not authorised to conduct an activity in the exercise of the privileges of the licence if the conduct of the activity would be an offence against the Act or another provision of these Regulations.

61.395 Limitations on exercise of privileges of pilot licences—recent experience for certain passenger flight activities

- (1) The holder of a pilot licence is authorised to pilot, during take-off or landing, an aircraft of a particular category carrying a passenger by day only if the holder has, within the previous 90 days, in an aircraft of that category or an approved flight simulator for the purpose, conducted, by day or night:
 - (a) at least 3 take-offs; and
 - (b) at least 3 landings;while controlling the aircraft or flight simulator.
- (2) The holder of a pilot licence is authorised to pilot, during take-off or landing, an aircraft of a particular category carrying a passenger at night only if the holder has, within the previous 90 days, in an aircraft of that category or an approved flight simulator for the purpose, conducted, at night:
 - (a) at least 3 take-offs; and
 - (b) at least 3 landings;while controlling the aircraft or flight simulator.
- (3) For paragraphs (1)(a) and (2)(a), each take-off must be followed by a climb to at least 500 ft AGL.
- (4) The holder is taken to meet the requirements of subregulation (1) if:
 - (a) within the previous 90 days, in an aircraft of that category or an approved flight simulator for the purpose, the holder has:
 - (i) successfully completed a relevant check or review; or
 - (ii) passed a flight test for a pilot licence or a rating on a pilot licence; that includes at least one take-off and at least one landing; or
 - (b) both:
 - (i) the holder is successfully participating in an operator's training and checking system for an operation in an aircraft of that category; and
 - (ii) the operator holds an approval under regulation 61.040 for the system for this subregulation and operations in aircraft of that category.

Part 61 Flight crew licensing

Subpart 61.E Pilot licensing—general limitations and authorisations

Division 61.E.1 General limitations on exercise of pilot licence privileges

Regulation 61.400

- (5) Also, the holder is taken to meet the requirements of subregulation (2) if:
- (a) within the previous 90 days, in an aircraft of that category or an approved flight simulator for the purpose, the holder has:
 - (i) successfully completed a relevant check or review; or
 - (ii) passed a flight test for a pilot licence or a rating on a pilot licence; that includes at least one take-off, and at least one landing, at night; or
 - (b) both:
 - (i) the holder is successfully participating in an operator's training and checking system for an operation at night in an aircraft of that category; and
 - (ii) the operator holds an approval under regulation 61.040 for the system for this subregulation and operations in aircraft of that category.
- (6) In this regulation:

relevant check or review means any of the following:

- (a) an instrument proficiency check;
- (b) a night vision imaging system proficiency check;
- (c) an instructor proficiency check;
- (d) an operator proficiency check;
- (e) a flight review.

61.400 Limitations on exercise of privileges of pilot licences—flight review

- (1) For this Part, successful completion of a flight review for a rating on a pilot licence requires demonstration, to a person mentioned in subregulation (2), that the holder of the rating is competent in each unit of competency mentioned in the Part 61 Manual of Standards for the rating.
- (2) For subregulation (1), the persons are as follows:
- (a) CASA;
 - (b) the holder of an approval under regulation 61.040 for this regulation;
 - (c) a pilot instructor who is authorised to conduct a flight review for the rating.
- (3) The flight review must be conducted in:
- (a) an aircraft that can be flown under the rating; or
 - (b) an approved flight simulator for the flight review.

61.405 Limitations on exercise of privileges of pilot licences—medical requirements—recreational pilot licence holders

- (1) The holder of a recreational pilot licence is authorised to exercise the privileges of the licence only if:
- (a) the holder also holds a current class 1 or 2 medical certificate; or
 - (b) the holder:
 - (i) also holds a current recreational aviation medical practitioner's certificate; and

- (ii) meets the requirements mentioned in subregulation (2); or
- (c) the holder also holds a medical exemption for the exercise of the privileges of the licence.

(2) For subparagraph (1)(b)(ii), the requirements are as follows:

- (a) the holder must have:
 - (i) given CASA a copy of the holder's recreational aviation medical practitioner's certificate; and
 - (ii) received from CASA a written acknowledgement of the receipt of the copy;
- (b) while exercising the privileges of the licence in an aircraft, the holder must carry both of the following on the aircraft:
 - (i) the certificate;
 - (ii) the acknowledgement mentioned in subparagraph (a)(ii);
- (c) the holder must comply with any limitations or conditions stated on the certificate;
- (d) the holder must meet the modified Austroads medical standards.

Note: For when a person meets the modified Austroads medical standards, see regulation 67.262.

(3) In this regulation:

current: a recreational aviation medical practitioner's certificate for the holder of a recreational pilot licence is **current** for the shortest of the following periods:

- (a) the period beginning on the day the certificate was signed by the medical practitioner and ending 24 months after that day;
- (b) if, when the holder exercises the privileges of the licence, the holder is at least 65—the period beginning on the day the certificate was signed by the medical practitioner and ending 12 months after that day;
- (c) if the certificate states the period for which it applies—the period beginning on the day the certificate was signed by the medical practitioner and ending at the end of the stated period.

Note: A licence holder must not exercise the privileges of his or her licence during any period of temporary medical unfitness that could render the holder unable to exercise those privileges safely: see regulation 67.270.

61.410 Limitations on exercise of privileges of pilot licences—medical certificates: private pilot licence holders

- (1) The holder of a private pilot licence is authorised to exercise the privileges of the licence only if the holder also holds:
 - (a) a current class 1 or 2 medical certificate; or
 - (b) a medical exemption for the exercise of the privileges of the licence.
- (2) However, subject to subregulation (3), the holder of a private pilot licence is authorised to exercise the privileges of the licence in a recreational aircraft if:
 - (a) the holder:

Part 61 Flight crew licensing

Subpart 61.E Pilot licensing—general limitations and authorisations

Division 61.E.1 General limitations on exercise of pilot licence privileges

Regulation 61.415

- (i) also holds a current recreational aviation medical practitioner’s certificate; and
 - (ii) meets the requirements mentioned in subregulation 61.405(2); and
 - (b) the flight is conducted by day under the VFR.
- (3) Regulation 61.465 applies to the holder as if each reference in that regulation to a recreational pilot licence included a reference to a private pilot licence.

Note: A licence holder must not exercise the privileges of his or her licence during any period of temporary medical unfitness that could render the holder unable to exercise those privileges safely: see regulation 67.270.

61.415 Limitations on exercise of privileges of pilot licences—medical certificates: commercial, multi-crew and air transport pilot licence holders

- (1) The holder of a commercial pilot licence, multi-crew pilot licence or air transport pilot licence is authorised to exercise the privileges of the licence only if the holder also holds:
- (a) a current class 1 medical certificate; or
 - (b) a medical exemption for the exercise of the privileges of the licence.
- (2) However, the holder of a commercial pilot licence or air transport pilot licence is authorised to exercise the privileges of the licence in an activity that would be authorised by a private pilot licence if the holder also holds a current class 2 medical certificate.
- (3) Also, the holder of a commercial pilot licence or air transport pilot licence is authorised to exercise the privileges of the licence in an activity that would be authorised by a recreational pilot licence if the holder:
- (a) also holds a current recreational aviation medical practitioner’s certificate; and
 - (b) meets the requirements mentioned in subregulation 61.405(2).

Note: A licence holder must not exercise the privileges of his or her licence during any period of temporary medical unfitness that could render the holder unable to exercise those privileges safely: see regulation 67.270.

61.420 Limitations on exercise of privileges of pilot licences—carriage of documents

The holder of a pilot licence is authorised to exercise the privileges of the licence on a flight only if the holder carries the following documents on the flight:

- (a) his or her licence document;
- (b) if the holder holds a current class 1 or 2 medical certificate—the medical certificate;
- (c) if the holder holds a recreational aviation medical practitioner’s certificate:
 - (i) the medical practitioner’s certificate; and
 - (ii) the acknowledgement of receipt mentioned in paragraph 61.405(2)(a);

- (ca) if the holder holds a medical exemption for the flight—a copy of the medical exemption;
- (d) a document that includes a photograph of the holder showing the holder's full face and his or her head and shoulders:
 - (i) that was issued within the previous 10 years by the government, or a government authority, of:
 - (A) the Commonwealth or a State or Territory; or
 - (B) a foreign country, or a state or province (however described) of a foreign country; and
 - (ii) that has not expired or been cancelled.

61.422 Limitations on exercise of privileges of pilot licences—aviation English language proficiency

- (1) The holder of a pilot licence other than a recreational pilot licence is authorised to exercise the privileges of the licence only if the holder has a current aviation English language proficiency assessment.
- (2) Subregulation (3) applies to the holder of a pilot licence that was granted on the basis of regulation 202.272 if the licence was granted in recognition of an old authorisation (within the meaning of regulation 202.261) that was granted on or before 4 March 2008.
- (3) Subregulation (1) does not apply to the holder in relation to the exercise of the privileges of his or her licence in Australian Territory.

61.425 Limitations on exercise of privileges of pilot licences—unregistered aircraft

The holder of a pilot licence is authorised to pilot an aircraft only if the aircraft is registered.

61.427 Removal of certain pilot licence conditions about airspace

- (1) Subregulation (2) applies to a pilot licence granted on the basis of regulation 202.272 or 202.274 if the licence is subject to the condition that operations are limited to:
 - (a) flight within 25 nautical miles of the departure aerodrome; or
 - (b) flight within a flight training area; or
 - (c) flight direct between the departure aerodrome and a flight training area.
- (2) CASA must remove the condition if:
 - (a) the licence holder applies to CASA for the removal of the condition; and
 - (b) the licence holder meets the requirements under this Part for the grant of a private pilot licence or a commercial pilot licence.
- (3) Subregulation (4) applies to a pilot licence granted on the basis of regulation 202.272 or 202.274 if the licence is subject to the condition that operations as pilot in command are limited to uncontrolled airspace and any

Part 61 Flight crew licensing

Subpart 61.E Pilot licensing—general limitations and authorisations

Division 61.E.1 General limitations on exercise of pilot licence privileges

Regulation 61.427

other class of airspace endorsed in the licence holder's personal log book by an instructor before 1 September 2014.

- (4) CASA must remove the condition if:
- (a) the licence holder applies to CASA for the removal of the condition; and
 - (b) the licence holder meets the requirements under this Part for the grant of any of the following:
 - (i) a controlled airspace endorsement;
 - (ii) a private pilot licence;
 - (iii) a commercial pilot licence.

Division 61.E.2—General authorisations for pilot licences

61.430 Holders of pilot licences authorised to taxi aircraft

- (1) A person is authorised to taxi an aircraft of a particular class or type if the person holds:
 - (a) a pilot licence; and
 - (b) the category rating for the category to which aircraft of that class or type belong; and
 - (c) the class rating or type rating for aircraft of that class or type.
- (2) For regulations 61.405 to 61.415, taxiing an aircraft does not constitute the exercise of the privileges of a licence.

Note: See regulation 91.415 for an offence relating to taxiing aircraft without being authorised to do so.

61.435 When holders of pilot licences authorised to operate aircraft radio

- (1) A person is authorised to transmit on an aviation safety radio frequency if the person:
 - (a) holds a private pilot licence, commercial pilot licence, multi-crew pilot licence or air transport pilot licence; or
 - (b) holds a recreational pilot licence with a flight radio endorsement.
- (3) For regulations 61.405 to 61.415, transmitting on an aviation safety radio frequency does not constitute the exercise of the privileges of a licence.

Note 1: A person is prohibited from transmitting on an aviation safety radio frequency unless the person is authorised or qualified to do so: see regulation 91.625.

Note 2: For the definition of *aviation safety radio frequency*, see the Dictionary.

Subpart 61.G—Recreational pilot licences

Division 61.G.1—Privileges and grant of licences

61.460 Privileges of recreational pilot licences

Subject to Subpart 61.E and regulations 61.465 and 61.470, the holder of a recreational pilot licence is authorised to pilot a single-engine aircraft as pilot in command or co-pilot if:

- (a) the aircraft is certificated for single-pilot operation; and
- (b) the aircraft has a maximum certificated take-off weight of not more than 1 500 kg; and
- (c) the aircraft is not rocket-powered or turbine-powered; and
- (d) the flight is conducted by day under the VFR; and
- (e) either:
 - (i) the aircraft is engaged in a private operation; or
 - (ii) the holder is receiving flight training.

Note 1: Subpart 61.E sets out certain limitations that apply to all pilot licences, and ratings and endorsements on pilot licences.

Note 2: The holder of a recreational pilot licence is also authorised to taxi an aircraft in certain circumstances: see regulation 61.430.

Note 3: The holder of a recreational pilot licence is also authorised to transmit on an aviation safety radio frequency if the holder also holds a flight radio endorsement: see regulation 61.435.

61.465 Limitations on exercise of privileges of recreational pilot licences— general

- (1) The holder of a recreational pilot licence is authorised to pilot an aircraft in a Contracting State's airspace only if the holder has the permission (however described) of the Contracting State to do so.
- (2) The holder of a recreational pilot licence is authorised to pilot an aircraft carrying more than one passenger only if the holder:
 - (a) also holds a current class 1 or 2 medical certificate; or
 - (b) is accompanied by another pilot who:
 - (i) holds a current class 1 or 2 medical certificate; and
 - (ii) occupies a flight control seat in the aircraft; and
 - (iii) is authorised to pilot the aircraft.
- (3) The holder of a recreational pilot licence is authorised to pilot an aircraft above 10 000 ft above mean sea level only if the holder:
 - (a) also holds a current class 1 or 2 medical certificate; or
 - (b) is accompanied by another pilot who:
 - (i) holds a current class 1 or 2 medical certificate; and

- (ii) occupies a flight control seat in the aircraft; and
- (iii) is authorised to pilot the aircraft.

61.470 Limitations on exercise of privileges of recreational pilot licences—endorsements

- (1) The holder of a recreational pilot licence is authorised to pilot an aircraft outside the following areas only if the holder also holds a recreational navigation endorsement:
 - (a) the area within 25 nautical miles of the departure aerodrome;
 - (b) a flight training area;
 - (c) the area that is a direct route between the departure aerodrome and a flight training area.
- (2) The holder of a recreational pilot licence is authorised to pilot an aircraft in controlled airspace only if the holder also holds a controlled airspace endorsement.
- (3) The holder of a recreational pilot licence is authorised to pilot an aircraft at a controlled aerodrome only if the holder also holds a controlled aerodrome endorsement.

61.475 Requirements for grant of recreational pilot licences

- (1) An applicant for a recreational pilot licence must be at least 16.
- (2) Subject to regulation 61.480, the applicant must also have:
 - (a) passed the aeronautical knowledge examination for a recreational pilot licence and the associated aircraft category rating; and
 - (b) completed flight training for a recreational pilot licence and the associated aircraft category rating; and
 - (c) passed the flight test mentioned in the Part 61 Manual of Standards for a recreational pilot licence and the associated aircraft category rating; and
 - (d) completed at least 25 hours of flight time as pilot of an aircraft of the category for which the associated aircraft category rating is sought, including:
 - (i) at least 20 hours of dual flight; and
 - (ii) at least 5 hours of solo flight time.

Note 1: For paragraph (a), for the conduct of aeronautical knowledge examinations, see Division 61.B.3.

Note 2: For paragraph (b), for the requirements for flight training, see Division 61.B.2.

Note 3: For paragraph (c), for the conduct of flight tests, see Division 61.B.4.

Note 4: For paragraph (d), for the determination of a person's flight time and other aeronautical experience, see Division 61.A.2.

- (3) Despite paragraph 61.245(1)(a), the flight test must be conducted in an aircraft.

Regulation 61.480

- (4) The applicant is taken to meet the requirements of subregulation (2) if the applicant holds a private pilot licence, commercial pilot licence or air transport pilot licence.

61.480 Grant of recreational pilot licences in recognition of pilot certificates granted by certain organisations

- (1) This regulation applies to an applicant for a recreational pilot licence if:
- (a) the applicant holds a pilot certificate, granted by a sport aviation body that administers activities involving aircraft of a particular category; and
 - (b) the certificate permits the holder to act as the pilot in command of an aircraft of that category.
- (2) For subregulation 61.475(2), the applicant is taken to have passed:
- (a) the aeronautical knowledge examination; and
 - (b) the flight test;
- for the licence and the associated aircraft category rating.
- (3) The applicant is also taken to have met the requirements for the grant of:
- (a) the aircraft category rating for each category of aircraft in which the person is permitted by the certificate to act as pilot in command; and
 - (b) the aircraft class rating for each class of aircraft in which the person is permitted by the certificate to act as pilot in command; and
 - (c) the design feature endorsement for each design feature of an aircraft in which the applicant is permitted by the certificate to act as pilot in command.

Note: The holder of an aircraft class rating must successfully complete a flight review for the rating to be authorised to exercise the privileges of the rating, and is not taken to have met the flight review requirement on the basis of being taken to have met the requirements for the grant of the rating under subregulation (3): see subregulation 61.745(4).

Division 61.G.2—Recreational pilot licence endorsements

61.485 Kinds of recreational pilot licence endorsements

The following are recreational pilot licence endorsements:

- (a) a controlled aerodrome endorsement;
- (b) a controlled airspace endorsement;
- (c) a flight radio endorsement;
- (d) a recreational navigation endorsement.

61.490 Privileges of recreational pilot licence endorsements

- (1) Subject to Subpart 61.E, the holder of a recreational pilot licence with a controlled aerodrome endorsement is authorised to pilot an aircraft, as pilot in command, at a controlled aerodrome.
- (2) Subject to Subpart 61.E, the holder of a recreational pilot licence with a controlled airspace endorsement is authorised to pilot an aircraft, as pilot in command, in controlled airspace.
- (3) Subject to Subpart 61.E, the holder of a recreational pilot licence with a flight radio endorsement is authorised to operate an aircraft radio on the ground or in flight to transmit on an aviation safety radio frequency.
- (4) Subject to Subpart 61.E, the holder of a recreational pilot licence with a recreational navigation endorsement is authorised to pilot an aircraft, as pilot in command, on a cross-country flight.

Note: Subpart 61.E sets out certain limitations that apply to all pilot licences, and ratings and endorsements on pilot licences.

61.495 Requirements for grant of recreational pilot licence endorsements

- (1) This regulation applies to a person other than a person who is eligible to be granted a recreational pilot licence endorsement under regulation 61.500.
- (2) An applicant for a recreational pilot licence endorsement must:
 - (a) have passed the aeronautical knowledge examination for the endorsement;
and
 - (b) have completed flight training for the endorsement; and
 - (c) if the endorsement is a recreational navigation endorsement—have completed, in addition to the flight time mentioned in paragraph 61.475(2)(d), at least 5 hours of solo cross-country flight time;
and
 - (d) if the endorsement is a flight radio endorsement—have a current aviation English language proficiency assessment.

Note 1: For paragraph (a), for the conduct of aeronautical knowledge examinations, see Division 61.B.3.

Regulation 61.500

Note 2: For paragraph (b), for the requirements for flight training, see Division 61.B.2.

- (3) The cross-country flight time required by paragraph (2)(c) must include a flight of at least 100 nautical miles, during which a full-stop landing is made at each of 2 landing areas, other than the one from which the flight began.

61.500 Grant of endorsement in recognition of other qualifications

- (1) An applicant for a recreational pilot licence endorsement is eligible to be granted the endorsement if the applicant:
 - (a) holds a recreational pilot licence; and
 - (b) holds another flight crew licence that authorises the exercise of the privileges of the endorsement.
- (2) An applicant for a controlled aerodrome endorsement is eligible to be granted the endorsement if:
 - (a) regulation 61.480 applies to the applicant; and
 - (b) the applicant holds an approval from the sport aviation body to pilot an aircraft at a controlled aerodrome.
- (3) An applicant for a controlled airspace endorsement is eligible to be granted the endorsement if:
 - (a) regulation 61.480 applies to the applicant; and
 - (b) the applicant holds an approval from the sport aviation body to pilot an aircraft in controlled airspace.
- (4) An applicant for a flight radio endorsement is eligible to be granted the endorsement if:
 - (a) regulation 61.480 applies to the applicant; and
 - (b) the applicant holds an approval from the sport aviation body to operate an aircraft radio; and
 - (c) the applicant has a current aviation English language proficiency assessment.
- (5) An applicant for a recreational navigation endorsement is eligible to be granted the endorsement if:
 - (a) regulation 61.480 applies to the applicant; and
 - (b) the applicant holds a cross-country navigation approval from the sport aviation body; and
 - (c) the applicant has completed at least 5 hours of solo cross-country flight time that complies with subregulation 61.495(3).

Subpart 61.H—Private pilot licences

Division 61.H.1—General

61.505 Privileges of private pilot licences

Subject to Subpart 61.E and regulation 61.510, the holder of a private pilot licence is authorised to pilot an aircraft as pilot in command or co-pilot if:

- (a) the aircraft is engaged in a private operation; or
- (b) the holder is receiving flight training.

Note 1: Subpart 61.E sets out certain limitations that apply to all pilot licences, and ratings and endorsements on pilot licences.

Note 2: The holder of a private pilot licence is also authorised to taxi an aircraft in certain circumstances: see regulation 61.430.

Note 3: The holder of a private pilot licence is also authorised to transmit on an aviation safety radio frequency: see regulation 61.435.

61.510 Limitations on exercise of privileges of private pilot licences—multi-crew operations

- (1) On and after 1 September 2015, the holder of a private pilot licence is authorised to exercise the privileges of the licence in a multi-crew operation only if the holder has completed an approved course of training in multi-crew cooperation.
- (2) The holder of a private pilot licence that was granted on the basis of regulation 202.272 is taken to meet the requirement mentioned in subregulation (1) if, before 1 September 2015, the holder conducted a multi-crew operation.

61.515 Requirements for grant of private pilot licences—general

- (1) An applicant for a private pilot licence must be at least 17.
- (2) The applicant must also have:
 - (a) passed the aeronautical knowledge examination for the private pilot licence and the associated aircraft category rating; and
 - (b) completed flight training for the private pilot licence and the associated aircraft category rating; and
 - (c) passed the flight test mentioned in the Part 61 Manual of Standards for the private pilot licence and the associated aircraft category rating; and
 - (d) met the aeronautical experience requirements mentioned in Division 61.H.2 or 61.H.3.

Note 1: For paragraph (a), for the conduct of aeronautical knowledge examinations, see Division 61.B.3.

Note 2: For paragraph (b), for the requirements for flight training, see Division 61.B.2.

Note 3: For paragraph (c), for the conduct of flight tests, see Division 61.B.4.

Part 61 Flight crew licensing

Subpart 61.H Private pilot licences

Division 61.H.1 General

Regulation 61.515

Note 4: For paragraph (d), for the determination of a person's flight time and other aeronautical experience, see Division 61.A.2.

- (3) Despite paragraph 61.245(1)(a), the flight test must be conducted in an aircraft.
- (4) An applicant who meets the requirements for the grant of a commercial pilot licence is taken to meet the requirements for the grant of a private pilot licence.

Division 61.H.2—Aeronautical experience requirements for private pilot licences—applicants who have completed integrated training courses

61.520 Application of Division 61.H.2

This Division applies to an applicant for a private pilot licence who has completed an integrated training course for the licence and the associated aircraft category rating.

61.525 Aeronautical experience requirements for grant of private pilot licences—aeroplane category

- (1) An applicant for a private pilot licence with the aeroplane category rating must have at least 35 hours of aeronautical experience that includes:
 - (a) at least 30 hours of flight time as a pilot; and
 - (b) at least 20 hours of flight time as pilot of an aeroplane; and
 - (c) at least 10 hours of solo flight time in an aeroplane; and
 - (d) at least 5 hours of solo cross-country flight time in an aeroplane; and
 - (e) at least 2 hours of dual instrument time; and
 - (f) at least one hour of dual instrument flight time in an aeroplane.
- (2) Any of the required aeronautical experience that is not completed as flight time as a pilot must be completed as simulated flight time in an approved flight simulation training device for the purpose.
- (3) The cross-country flight time required by paragraph (1)(d) must include a flight of at least 150 nautical miles during which a full-stop landing is made at each of 2 aerodromes not within the flight training area for the aerodrome from which the flight began.
- (4) The flight time in an aeroplane required by subregulation (1) must be completed in a registered or recognised aeroplane.

61.530 Aeronautical experience requirements for grant of private pilot licences—helicopter category

- (1) An applicant for a private pilot licence with the helicopter category rating must have at least 35 hours of aeronautical experience that includes:
 - (a) at least 30 hours of flight time as pilot of a helicopter; and
 - (b) at least 10 hours of solo flight time in a helicopter; and
 - (c) at least 5 hours of solo cross-country flight time in a helicopter; and
 - (d) at least 2 hours of dual instrument time; and
 - (e) at least one hour of dual instrument flight time in a helicopter.
- (2) Any of the required aeronautical experience that is not completed as flight time as a pilot must be completed as:

Part 61 Flight crew licensing

Subpart 61.H Private pilot licences

Division 61.H.2 Aeronautical experience requirements for private pilot licences—applicants who have completed integrated training courses

Regulation 61.535

- (a) simulated flight time in an approved flight simulation training device for the purpose; or
 - (b) tethered flight time.
- (3) The cross-country flight time required by paragraph (1)(c) must include a flight of at least 100 nautical miles during which a landing is made at each of 2 landing areas, other than the one from which the flight began.
- (4) The flight time in a helicopter required by subregulation (1) must be completed in a registered or recognised helicopter.

61.535 Aeronautical experience requirements for grant of private pilot licences—gyroplane category

- (1) An applicant for a private pilot licence with the gyroplane category rating must have at least 35 hours of aeronautical experience that includes:
- (a) at least 30 hours of flight time as a pilot; and
 - (b) at least 20 hours of flight time as pilot of a gyroplane; and
 - (c) at least 10 hours of solo flight time in a powered aircraft; and
 - (d) at least 5 hours of solo flight time in a gyroplane; and
 - (e) at least 5 hours of solo cross-country flight time in a powered aircraft.
- (2) Any of the required aeronautical experience that is not completed as flight time as a pilot must be completed as simulated flight time in an approved flight simulation training device for the purpose.
- (3) The cross-country flight time required by paragraph (1)(e) must include a flight of at least 100 nautical miles during which a full-stop landing is made at each of 2 landing areas, other than the one from which the flight began.
- (4) The flight time in a gyroplane required by subregulation (1) must be completed in a registered or recognised gyroplane.

Division 61.H.3—Aeronautical experience requirements for private pilot licences—applicants who have not completed integrated training courses

61.540 Application of Division 61.H.3

This Division applies to an applicant for a private pilot licence who has not completed an integrated training course for the licence and the associated aircraft category rating.

61.545 Aeronautical experience requirements for grant of private pilot licences—airplane category

- (1) An applicant for a private pilot licence with the airplane category rating must have at least 40 hours of aeronautical experience that includes:
 - (a) at least 35 hours of flight time as a pilot; and
 - (b) at least 20 hours of flight time as pilot of an airplane; and
 - (c) at least 10 hours of solo flight time in an airplane; and
 - (d) at least 5 hours of solo cross-country flight time in an airplane; and
 - (e) at least 2 hours of dual instrument time; and
 - (f) at least one hour of dual instrument flight time in an airplane.
- (2) Any of the required aeronautical experience that is not completed as flight time as a pilot must be completed as simulated flight time in an approved flight simulation training device for the purpose.
- (3) The cross-country flight time required by paragraph (1)(d) must include a flight of at least 150 nautical miles during which a full-stop landing is made at each of 2 aerodromes not within the flight training area for the aerodrome from which the flight began.

61.550 Aeronautical experience requirements for grant of private pilot licences—helicopter category

- (1) An applicant for a private pilot licence with the helicopter category rating must have at least 40 hours of aeronautical experience that includes:
 - (a) at least 35 hours of flight time as a pilot; and
 - (b) at least 30 hours of flight time as pilot of a helicopter; and
 - (c) at least 10 hours of solo flight time in a helicopter; and
 - (d) at least 5 hours of solo cross-country flight time in a helicopter.
- (2) Any of the required aeronautical experience that is not completed as flight time as a pilot must be completed as:
 - (a) simulated flight time in an approved flight simulation training device for the purpose; or
 - (b) tethered flight time.

Part 61 Flight crew licensing

Subpart 61.H Private pilot licences

Division 61.H.3 Aeronautical experience requirements for private pilot licences—applicants who have not completed integrated training courses

Regulation 61.555

- (3) The cross-country flight time required by paragraph (1)(d) must include a flight of at least 100 nautical miles during which a landing is made at each of 2 landing areas, other than the one from which the flight began.

61.555 Aeronautical experience requirements for grant of private pilot licences—powered-lift aircraft category

- (1) An applicant for a private pilot licence with the powered-lift aircraft category rating must have at least 40 hours of aeronautical experience that includes:
- (a) at least 35 hours of flight time as a pilot; and
 - (b) at least 30 hours of flight time as pilot of a powered-lift aircraft or helicopter; and
 - (c) at least 20 hours of flight time as pilot of a powered-lift aircraft; and
 - (d) at least 10 hours of solo flight time in a powered-lift aircraft; and
 - (e) at least 5 hours of solo cross-country flight time in a powered-lift aircraft; and
 - (f) at least 2 hours of dual instrument time; and
 - (g) at least one hour of dual instrument flight time in a powered-lift aircraft.
- (2) Any of the required aeronautical experience that is not completed as flight time as a pilot must be completed as:
- (a) simulated flight time in an approved flight simulation training device for the purpose; or
 - (b) tethered flight time.
- (3) The cross-country flight time required by paragraph (1)(e) must include a flight of at least 150 nautical miles during which a full-stop landing is made at each of 2 landing areas, other than the one from which the flight began.

61.560 Aeronautical experience requirements for grant of private pilot licences—gyroplane category

- (1) An applicant for a private pilot licence with the gyroplane category rating must have at least 40 hours of aeronautical experience that includes:
- (a) at least 35 hours of flight time as a pilot; and
 - (b) at least 20 hours of flight time as pilot of a gyroplane; and
 - (c) at least 10 hours of solo flight time in a powered aircraft; and
 - (d) at least 5 hours of solo flight time in a gyroplane; and
 - (e) at least 5 hours of solo cross-country flight time in a powered aircraft.
- (2) Any of the required aeronautical experience that is not completed as flight time as a pilot must be completed as simulated flight time in an approved flight simulation training device for the purpose.
- (3) The cross-country flight time required by paragraph (1)(e) must include a flight of at least 100 nautical miles during which a full-stop landing is made at each of 2 landing areas, other than the one from which the flight began.

61.565 Aeronautical experience requirements for grant of private pilot licences—airship category

- (1) An applicant for a private pilot licence with the airship category rating must have completed at least 25 hours of flight time as pilot of an airship that includes:
 - (a) at least 3 hours of cross-country flight time; and
 - (b) at least 3 hours of dual instrument flight time; and
 - (c) at least 5 hours of flight time as pilot in command under supervision.
- (2) The cross-country flight time required by paragraph (1)(a) must include a flight of at least 25 nautical miles.
- (3) The applicant must have completed, at an aerodrome:
 - (a) at least 5 take-offs; and
 - (b) at least 5 full-stop landings.
- (4) For paragraph (3)(b), each landing must involve a flight in traffic patterns at the aerodrome.

Subpart 61.I—Commercial pilot licences

Division 61.I.1—General

61.570 Privileges of commercial pilot licences

Subject to Subpart 61.E and regulation 61.575, the holder of a commercial pilot licence is authorised:

- (a) to pilot, as pilot in command, any aircraft in any operation, other than:
 - (i) a multi-crew aircraft in an air transport operation; or
 - (ii) if the holder has less than 750 hours of flight time as a pilot of an aeroplane—an aeroplane certificated for single-pilot operation with a maximum certificated take-off weight of more than 5,700 kg in an air transport operation; or
 - (iii) if the holder has less than 750 hours of flight time as a pilot of a rotorcraft—a rotorcraft with a maximum certificated take-off weight of more than 3,175 kg in an air transport operation; and
- (b) to pilot, as co-pilot, any aircraft in any operation.

Note 1: Subpart 61.E sets out certain limitations that apply to all pilot licences, and ratings and endorsements on pilot licences.

Note 2: The holder of a commercial pilot licence is also authorised to taxi an aircraft in certain circumstances: see regulation 61.430.

Note 3: The holder of a commercial pilot licence is also authorised to transmit on an aviation safety radio frequency: see regulation 61.435.

61.575 Limitations on exercise of privileges of commercial pilot licences—multi-crew operations

- (1) On and after 1 September 2015, the holder of a commercial pilot licence is authorised to exercise the privileges of the licence in a multi-crew operation only if the holder has completed an approved course of training in multi-crew cooperation.
- (2) The holder of a commercial pilot licence that was granted on the basis of regulation 202.272 is taken to meet the requirement mentioned in subregulation (1) if, before 1 September 2015, the holder conducted a multi-crew operation.

61.580 Requirements for grant of commercial pilot licences—general

- (1) An applicant for a commercial pilot licence must be at least 18.
- (2) The applicant must also have:
 - (a) passed the aeronautical knowledge examination for the commercial pilot licence and the associated aircraft category rating; and

- (b) completed flight training for the commercial pilot licence and the associated aircraft category rating; and
- (c) passed the flight test mentioned in the Part 61 Manual of Standards for the commercial pilot licence and the associated aircraft category rating; and
- (d) met the aeronautical experience requirements mentioned in Division 61.I.2 or 61.I.3.

- Note 1: For paragraph (a), for the conduct of aeronautical knowledge examinations, see Division 61.B.3.
- Note 2: For paragraph (b), for the requirements for flight training, see Division 61.B.2.
- Note 3: For paragraph (c), for the conduct of flight tests, see Division 61.B.4.
- Note 4: For paragraph (d), for the determination of a person's flight time and other aeronautical experience, see Division 61.A.2.

- (3) Despite paragraph 61.245(1)(a), the flight test must be conducted in an aircraft.
- (4) The applicant is taken to meet the requirements of paragraph (2)(b) if the applicant holds an air transport pilot licence with the associated aircraft category rating.

Part 61 Flight crew licensing

Subpart 61.I Commercial pilot licences

Division 61.I.2 Aeronautical experience requirements for commercial pilot licences—applicants who have completed integrated training courses

Regulation 61.585

Division 61.I.2—Aeronautical experience requirements for commercial pilot licences—applicants who have completed integrated training courses

61.585 Application of Division 61.I.2

This Division applies to an applicant for a commercial pilot licence who has completed an integrated training course for the licence and the associated aircraft category rating.

61.590 Aeronautical experience requirements for grant of commercial pilot licences—airplane category

- (1) An applicant for a commercial pilot licence with the airplane category rating must have at least 150 hours of aeronautical experience that includes:
 - (a) at least 140 hours of flight time as pilot of an airplane; and
 - (b) at least 70 hours of flight time as pilot in command of an airplane; and
 - (c) at least 20 hours of cross-country flight time as pilot in command of an airplane; and
 - (d) at least 10 hours of instrument time; and
 - (e) at least 5 hours of instrument flight time in an airplane.
- (2) Any of the required aeronautical experience that is not completed as flight time as a pilot must be completed as simulated flight time in an approved flight simulation training device for the purpose.
- (3) The cross-country flight time required by paragraph (1)(c) must include a flight of at least 300 nautical miles during which a full-stop landing is made at each of 2 aerodromes not within the flight training area for the aerodrome from which the flight began.
- (4) The flight time in an airplane required by subregulation (1) must be completed in a registered or recognised airplane.

61.595 Aeronautical experience requirements for grant of commercial pilot licences—helicopter category

- (1) An applicant for a commercial pilot licence with the helicopter category rating must have at least 100 hours of aeronautical experience that includes:
 - (a) at least 90 hours of flight time as pilot of a helicopter; and
 - (b) at least 35 hours of flight time as pilot in command of a helicopter; and
 - (c) at least 10 hours of cross-country flight time as pilot in command of a helicopter; and
 - (d) at least 10 hours of instrument time; and
 - (e) at least 5 hours of instrument flight time in a helicopter.

Regulation 61.600

- (2) Any of the required aeronautical experience that is not completed as flight time as a pilot must be completed as:
 - (a) simulated flight time in an approved flight simulation training device for the purpose; or
 - (b) tethered flight time.
- (3) However, no more than 5 hours of the required aeronautical experience may be completed as tethered flight time.
- (4) The cross-country flight time required by paragraph (1)(c) must include a flight of at least 150 nautical miles during which a landing is made at each of 2 landing areas, other than the one from which the flight began.
- (5) The flight time in a helicopter required by subregulation (1) must be completed in a registered or recognised helicopter.

61.600 Aeronautical experience requirements for grant of commercial pilot licences—powered-lift aircraft category

- (1) An applicant for a commercial pilot licence with the powered-lift aircraft category rating must have at least 150 hours of aeronautical experience that includes:
 - (a) at least 140 hours of flight time as pilot of a powered-lift aircraft; and
 - (b) at least 50 hours of flight time as pilot in command of a powered-lift aircraft; and
 - (c) at least 10 hours of cross-country flight time as pilot in command of a powered-lift aircraft; and
 - (d) at least 10 hours of instrument time; and
 - (e) at least 5 hours of instrument flight time in a powered-lift aircraft.
- (2) Any of the required aeronautical experience that is not completed as flight time as a pilot must be completed as:
 - (a) simulated flight time in an approved flight simulation training device for the purpose; or
 - (b) tethered flight time.
- (3) However, no more than 5 hours of the required aeronautical experience may be completed as tethered flight time.
- (4) The cross-country flight time required by paragraph (1)(c) must include a flight of at least 300 nautical miles during which a full-stop landing is made at each of 2 landing areas, other than the one from which the flight began.
- (5) The flight time in a powered-lift aircraft required by subregulation (1) must be completed in a registered or recognised powered-lift aircraft.

Part 61 Flight crew licensing

Subpart 61.I Commercial pilot licences

Division 61.I.3 Aeronautical experience requirements for commercial pilot licences—applicants who have not completed integrated training courses

Regulation 61.605

Division 61.I.3—Aeronautical experience requirements for commercial pilot licences—applicants who have not completed integrated training courses

61.605 Application of Division 61.I.3

This Division applies to an applicant for a commercial pilot licence who has not completed an integrated training course for the licence and the associated aircraft category rating.

61.610 Aeronautical experience requirements for grant of commercial pilot licences—airplane category

- (1) An applicant for a commercial pilot licence with the airplane category rating must have at least 200 hours of aeronautical experience that includes:
 - (a) at least 190 hours of flight time as a pilot; and
 - (b) at least the following hours of flight time as pilot in command of an airplane:
 - (i) for an applicant holding a commercial pilot licence, or an air transport pilot licence, with the helicopter rating—60 hours;
 - (ii) for an applicant holding a private pilot licence with the helicopter rating—80 hours;
 - (iii) for any other applicant—100 hours; and
 - (c) at least 20 hours of cross-country flight time as pilot in command of an airplane; and
 - (d) at least 10 hours of instrument time; and
 - (e) at least 5 hours of instrument flight time in an airplane.
- (2) Any of the required aeronautical experience that is not completed as flight time as a pilot must be completed as simulated flight time in an approved flight simulation training device for the purpose.
- (3) The cross-country flight time required by paragraph (1)(c) must include a flight of at least 300 nautical miles during which a full-stop landing is made at each of 2 aerodromes not within the flight training area for the aerodrome from which the flight began.

61.615 Aeronautical experience requirements for grant of commercial pilot licences—helicopter category

- (1) An applicant for a commercial pilot licence with the helicopter category rating must meet the aeronautical experience requirements under subregulation (1A) or (1B).
 - (1A) An applicant meets the aeronautical experience requirements under this subregulation if the applicant has at least 150 hours of aeronautical experience that includes:

Regulation 61.620

- (a) at least 140 hours of flight time as a pilot; and
 - (b) at least 70 hours of flight time as pilot of a helicopter; and
 - (c) at least 35 hours of flight time as pilot in command of a helicopter; and
 - (d) at least 10 hours of cross-country flight time as pilot in command of a helicopter.
- (1B) An applicant meets the aeronautical experience requirements under this subregulation if:
- (a) the applicant has at least 105 hours of aeronautical experience that includes:
 - (i) at least 105 hours of flight time as pilot of a helicopter; and
 - (ii) at least 35 hours of flight time as pilot in command of a helicopter; and
 - (iii) at least 10 hours of cross-country flight time as pilot in command of a helicopter; and
 - (b) the applicant has completed training in accordance with the requirements specified in the Part 61 Manual of Standards for the purposes of this paragraph.
- (2) Any of the required aeronautical experience that is not completed as flight time as a pilot must be completed as:
- (a) simulated flight time in an approved flight simulation training device for the purpose; or
 - (b) tethered flight time.
- (3) However, no more than 5 hours of the required aeronautical experience may be completed as tethered flight time.
- (4) The cross-country flight time required by paragraph (1A)(d) and subparagraph (1B)(a)(iii) must include a flight of at least 150 nautical miles during which a landing is made at each of 2 landing areas, other than the one from which the flight began.

61.620 Aeronautical experience requirements for grant of commercial pilot licences—powered-lift aircraft category

- (1) An applicant for a commercial pilot licence with the powered-lift aircraft category rating must have at least 200 hours of aeronautical experience that includes:
- (a) at least 190 hours of flight time as a pilot; and
 - (b) at least 50 hours of flight time as pilot in command of a powered-lift aircraft; and
 - (c) at least 10 hours of cross-country flight time as pilot in command of a powered-lift aircraft; and
 - (d) at least 10 hours of instrument time; and
 - (e) at least 5 hours of instrument flight time in a powered-lift aircraft.

Part 61 Flight crew licensing

Subpart 61.I Commercial pilot licences

Division 61.I.3 Aeronautical experience requirements for commercial pilot licences—applicants who have not completed integrated training courses

Regulation 61.625

- (2) Any of the required aeronautical experience that is not completed as flight time as a pilot must be completed as:
 - (a) simulated flight time in an approved flight simulation training device for the purpose; or
 - (b) tethered flight time.
- (3) However, no more than 5 hours of the required aeronautical experience may be completed as tethered flight time.
- (4) The cross-country flight time required by paragraph (1)(c) must include a flight of at least 300 nautical miles during which a full-stop landing is made at each of 2 landing areas, other than the one from which the flight began.

61.625 Aeronautical experience requirements for grant of commercial pilot licences—gyroplane category

- (1) An applicant for a commercial pilot licence with the gyroplane category rating must have completed at least 150 hours of aeronautical experience that includes:
 - (a) at least 75 hours of flight time as pilot of a gyroplane; and
 - (b) at least 35 hours of flight time as pilot in command of a gyroplane; and
 - (c) at least 20 hours of dual flight in a gyroplane; and
 - (d) at least 20 hours of cross-country flight time as pilot in command of a powered aircraft; and
 - (e) at least 10 hours of cross-country flight time as pilot in command of a gyroplane; and
 - (f) at least 10 hours of dual instrument time in an aircraft or approved flight simulation training device for the purpose.
- (2) The cross-country flight time required by paragraph (1)(e) must include a flight of at least 150 nautical miles during which a full-stop landing is made at each of 2 landing areas, other than the one from which the flight began.

61.630 Aeronautical experience requirements for grant of commercial pilot licences—airship category

- (1) An applicant for a commercial pilot licence with the airship category rating must have at least 200 hours of aeronautical experience that includes:
 - (a) at least 180 hours of flight time as a pilot; and
 - (b) at least 50 hours of flight time as pilot of an airship; and
 - (c) at least 30 hours of flight time as pilot in command, or pilot in command under supervision, of an airship; and
 - (d) at least 10 hours of cross-country flight time as pilot in command, or pilot in command under supervision, of an airship; and
 - (e) at least 10 hours of flight time at night as pilot in command, or pilot in command under supervision, of an airship; and
 - (f) at least 40 hours of instrument time; and
 - (g) at least 20 hours of instrument flight time; and

Regulation 61.630

- (h) at least 10 hours of instrument flight time in an airship.
- (2) Any of the required aeronautical experience that is not completed as flight time as a pilot must be completed as simulated flight time in an approved flight simulation training device for the purpose.

Subpart 61.J—Multi-crew pilot licences

61.635 Privileges of multi-crew pilot licences

Subject to Subpart 61.E and regulations 61.640 to 61.650, the holder of a multi-crew pilot licence is authorised to pilot an aeroplane as co-pilot for an operator that has a training and checking system that is in accordance with the requirements of Part 119 or 138.

- Note 1: Subpart 61.E sets out certain limitations that apply to all pilot licences, and ratings and endorsements on pilot licences.
- Note 2: The holder of a multi-crew pilot licence is also authorised to taxi an aircraft in certain circumstances: see regulation 61.430.
- Note 3: The holder of a multi-crew pilot licence is also authorised to transmit on an aviation safety radio frequency: see regulation 61.435.

61.640 Limitations on exercise of privileges of multi-crew pilot licences—IFR flight: general

- (1) The holder of a multi-crew pilot licence is authorised to conduct a circling approach under the IFR on a flight only if:
- (a) the holder passed the flight test for the licence within the previous 12 months, and the flight test included a circling approach; or
 - (b) the holder's most recent instrument proficiency check included a circling approach; or
 - (c) both:
 - (i) the holder is successfully participating in an operator's training and checking system for an operation that includes circling approaches under the IFR; and
 - (ii) the operator holds an approval under regulation 61.040 for the system for this subregulation.
- (1A) The holder of a multi-crew pilot licence is authorised to conduct a 3D instrument approach operation only if:
- (a) the holder passed the flight test for the licence within the previous 12 months, and the flight test included a 3D instrument approach operation; or
 - (b) either:
 - (i) in a case in which the holder's most recent instrument proficiency check included a 3D instrument approach operation—during the check the holder demonstrated, to a person mentioned in subregulation (4), the holder's competence in the conduct of a 3D instrument approach operation; or
 - (ii) in any other case—the holder has, within the previous 15 months, demonstrated, to a person mentioned in subregulation (4), the holder's competence in the conduct of a 3D instrument approach operation; or
 - (c) both:

Regulation 61.645

- (i) the holder is successfully participating in an operator's training and checking system for an operation that includes 3D instrument approaches; and
 - (ii) the operator holds an approval under regulation 61.040 for the system for this subregulation.
- (2) For paragraphs (1)(b) and (1A)(b), an instrument proficiency check includes an operator proficiency check:
 - (a) that covers IFR operations; and
 - (b) that is conducted by a flight examiner who holds an instrument rating flight test endorsement.
- (3) The holder of a multi-crew pilot licence is authorised to conduct an instrument approach operation in an aircraft using a procedure of a particular kind only if the holder has:
 - (a) completed training in the conduct of instrument approach operations using the procedure; and
 - (b) demonstrated, to a person mentioned in subregulation (4), his or her competence in the conduct of instrument approach operations using the procedure.
- (4) For paragraphs (1A)(b) and (3)(b), the persons are as follows:
 - (a) CASA;
 - (b) an examiner who is authorised under this Part to conduct an instrument approach operation using the same procedure;
 - (c) a person who holds an approval under regulation 61.040 to assess the holder's competence.

61.645 Limitations on exercise of privileges of multi-crew pilot licences—IFR flight: recent experience

- (1) Subject to subregulation (1A), this regulation applies to the holder of a multi-crew pilot licence.
- (1A) This regulation does not apply to the holder if:
 - (a) the holder has successfully completed an operator proficiency check that covers IFR operations within the previous 3 months; or
 - (b) both:
 - (i) the holder is successfully participating in an operator's training and checking system for an IFR operation; and
 - (ii) the operator holds an approval under regulation 61.040 for the system for this subregulation.
- (2) The holder is authorised to pilot an aircraft under the IFR only if the holder has conducted at least 3 instrument approach operations within the previous 90 days in an aircraft or an approved flight simulation training device for the purpose.
- (3) The holder is authorised to pilot an aircraft of a particular category under the IFR only if the holder has conducted at least one instrument approach operation

Regulation 61.650

within the previous 90 days in an aircraft of the same category or an approved flight simulation training device for the purpose.

- (4) The holder is authorised to conduct a 2D instrument approach operation only if the holder has conducted a 2D instrument approach operation within the previous 90 days in an aircraft or an approved flight simulation training device for the purpose.
- (5) The holder is authorised to conduct a 3D instrument approach operation only if the holder has conducted a 3D instrument approach operation within the previous 90 days in an aircraft or an approved flight simulation training device for the purpose.
- (6) The holder is authorised to conduct an azimuth guidance operation only if the holder has conducted an azimuth guidance operation within the previous 90 days in an aircraft or an approved flight simulation training device for the purpose.
- (7) The holder is authorised to conduct a course deviation indicator operation only if the holder has conducted a course deviation indicator operation within the previous 90 days in an aircraft or an approved flight simulation training device for the purpose.

Note: Azimuth guidance operations and course deviation indicator operations are instrument approach operations: see the definitions of those terms in regulation 61.010.

61.650 Limitations on exercise of privileges of multi-crew pilot licences— instrument proficiency check

- (1) The holder of a multi-crew pilot licence is authorised to exercise the privileges of the licence under the IFR only if the holder has a valid instrument proficiency check for the aeroplane category.
- (2) However, the holder is authorised to exercise the privileges of the licence under the IFR in a multi-engine aeroplane only if the holder has a valid instrument proficiency check for multi-engine aeroplanes.
- (3) Subject to subregulations (4) and (4B), for subregulations (1) and (2), the holder is taken to have a valid instrument proficiency check for the aeroplane category, or for multi-engine aeroplanes, during the following periods:
 - (a) if the holder passes the flight test for the multi-crew pilot licence in a relevant aeroplane—the period from when the holder passes the flight test to the end of the 12th month after the month in which the holder passes the flight test;
 - (b) if the holder successfully completes an operator proficiency check that covers IFR operations in the relevant aeroplane, and that is conducted by a flight examiner who holds an instrument rating flight test endorsement—the period from when the holder successfully completes the check to the end of the 12th month after the month in which the holder successfully completes the check;
 - (c) if:

Regulation 61.650

- (i) the holder is successfully participating in an operator's training and checking system for an IFR operation in the relevant aeroplane; and
 - (ii) the operator holds an approval under regulation 61.040 for the system for this subregulation and operations in the relevant aeroplane;
- the period during which the holder is successfully participating in the system;
- (d) if the holder successfully completes an instrument proficiency check for the relevant aeroplane—the period from when the holder successfully completes the check to the end of the 12th month after the month in which the holder successfully completes the check;
 - (e) if:
 - (i) the holder is taken to have a valid instrument proficiency check under any of paragraphs (a) to (d) for the relevant aeroplane (the **existing check**); and
 - (ii) within 3 months before the validity of the existing check expires, the holder successfully completes an instrument proficiency check for the relevant aeroplane;the period from when the validity of the existing check expires to the end of the 12th month after the validity of the existing check expires.
- (4) If, at any time, the holder attempts, but does not successfully complete, an instrument proficiency check mentioned in subregulation (4A) (the **failed check**), the holder is no longer taken to have a valid instrument proficiency check for:
- (a) the aeroplane category; or
 - (b) multi-engine aeroplanes.
- (4A) For subregulation (4), the failed check may be any of the following:
- (a) an instrument proficiency check for the aeroplane category;
 - (b) an instrument proficiency check for multi-engine aeroplanes;
 - (c) an instrument proficiency check for a type of aeroplane.
- (4B) If the holder is taken to have a valid instrument proficiency check for the relevant aeroplane only because of the holder's participation in an operator's training and checking system, the check is taken to be valid only for operations conducted by the operator.
- (5) For paragraphs (3)(d) and (e), the holder successfully completes an instrument proficiency check for the relevant aeroplane if:
- (a) CASA or a flight examiner:
 - (i) assesses the holder's competency to conduct operations under the IFR in a relevant aeroplane as meeting the standards mentioned in the Part 61 Manual of Standards for an instrument proficiency check in the relevant aeroplane; and
 - (ii) endorses the holder's licence document to the effect that the holder has completed the instrument proficiency check; and
 - (iii) includes in the endorsement the matters mentioned in subregulation (8); or

Regulation 61.655

- (b) a person mentioned in subregulation (7) assesses the holder as competent to conduct operations under the IFR in a relevant aeroplane, and CASA or a flight examiner:
 - (i) conducts an oral assessment of the holder's knowledge of IFR operation procedures to the standards mentioned in the Part 61 Manual of Standards for an instrument proficiency check; and
 - (ii) endorses the holder's licence document to the effect that the holder has completed the instrument proficiency check; and
 - (iii) includes in the endorsement the matters mentioned in subregulation (8).
- (6) For paragraphs (3)(d) and (e), the instrument proficiency check must be conducted in a relevant aeroplane or an approved flight simulation training device for the proficiency check.
- (7) For paragraph (5)(b), the person is the holder of an approval under regulation 61.040 to conduct the proficiency check.
- (8) For subparagraphs (5)(a)(iii) and (b)(iii), the matters are:
 - (a) the date on which the instrument proficiency check is conducted; and
 - (b) whether the instrument proficiency check is for the aeroplane category or multi-engine aeroplanes.
- (9) In this regulation:

relevant aeroplane, for an instrument proficiency check, means:

 - (a) if the instrument proficiency check is for the aeroplane category—a single-engine or multi-engine aeroplane; or
 - (b) if the instrument proficiency check is for multi-engine aeroplanes—a multi-engine aeroplane.

61.655 Requirements for grant of multi-crew pilot licences

- (1) An applicant for a multi-crew pilot licence must be at least 18.
- (2) The applicant must also:
 - (a) have passed the aeronautical knowledge examination for the multi-crew pilot licence and the aeroplane category rating; and
 - (b) have completed a multi-crew pilot licence training course; and
 - (c) have passed the flight test mentioned in the Part 61 Manual of Standards for the multi-crew pilot licence; and
 - (d) have met the aeronautical experience requirements mentioned in regulation 61.660; and
 - (e) hold a pilot type rating for a multi-crew aeroplane.

Note 1: For paragraph (a), for the conduct of aeronautical knowledge examinations, see Division 61.B.3.

Note 2: For paragraph (c), for the conduct of flight tests, see Division 61.B.4.

Regulation 61.660

Note 3: For paragraph (d), for the determination of a person's flight time and other aeronautical experience, see Division 61.A.2.

- (3) For paragraph (2)(c), the flight test must be conducted under the IFR in:
 - (a) a multi-engine turbine-powered aeroplane for which a pilot type rating is prescribed by a legislative instrument under regulation 61.055; or
 - (b) an approved flight simulator for the flight test.

61.660 Aeronautical experience requirements for grant of multi-crew pilot licences—airplane category

- (1) An applicant for a multi-crew pilot licence with the airplane category rating must have at least 240 hours of aeronautical experience that includes:
 - (a) at least 40 hours of flight time as pilot of an airplane; and
 - (b) at least 10 hours of solo flight time in an airplane; and
 - (c) at least 5 hours of cross-country flight time as pilot in command of an airplane.
- (2) Any of the required aeronautical experience that is not completed as flight time as a pilot must be completed as simulated flight time in an approved flight simulation training device for the purpose.
- (3) The cross-country flight time required by paragraph (1)(c) must include a flight of at least 150 nautical miles during which a full-stop landing is made at each of 2 aerodromes not within the flight training area for the aerodrome from which the flight began.
- (4) The applicant must have completed at least 12 take-offs, and at least 12 landings, in an airplane of the type used for the applicant's flight test.
- (5) The applicant is taken to meet the requirements of subregulation (4) if:
 - (a) the applicant holds an approval under regulation 61.040 for a number of take-offs and landings that is less than 12 but not less than 6; and
 - (b) the applicant has completed at least that number of take-offs, and at least that number of landings, in an airplane of the type used for the applicant's flight test.
- (6) CASA may grant an approval mentioned in paragraph (5)(a) only if:
 - (a) the lower number does not adversely affect the acquisition of the required skill by the applicant; and
 - (b) the Part 142 operator conducting the training course mentioned in paragraph 61.655(2)(b) has made arrangements to ensure that corrective action can be taken if in-training or post-training evaluation indicates a need for corrective action.
- (7) The flight time in an airplane required by subregulation (1) must be completed in a registered or recognised airplane.

Subpart 61.K—Air transport pilot licences

61.665 Privileges of air transport pilot licences

Subject to Subpart 61.E and regulations 61.670 to 61.695, the holder of an air transport pilot licence is authorised to pilot an aeroplane, helicopter or powered-lift aircraft as pilot in command or co-pilot.

Note 1: Subpart 61.E sets out certain limitations that apply to all pilot licences, and ratings and endorsements on pilot licences.

Note 2: The holder of an air transport pilot licence is also authorised to taxi an aircraft in certain circumstances: see regulation 61.430.

Note 3: The holder of an air transport pilot licence is also authorised to transmit on an aviation safety radio frequency: see regulation 61.435.

61.670 Limitations on exercise of privileges of air transport pilot licences—helicopter IFR flight

The holder of an air transport pilot licence is authorised to pilot a helicopter under the IFR only if the holder also holds an instrument rating.

61.675 Limitations on exercise of privileges of air transport pilot licences—single-pilot IFR flight

The holder of an air transport pilot licence is authorised to pilot an aircraft in a single-pilot operation under the IFR only if the holder has:

- (a) passed the flight test for an instrument rating in a single-pilot aircraft; or
- (b) completed an instrument proficiency check in a single-pilot aircraft.

61.680 Limitations on exercise of privileges of air transport pilot licences—IFR flight: general

- (1) The holder of an air transport pilot licence is authorised to conduct an instrument approach operation of a particular kind as pilot in command of an aircraft only if the aircraft is equipped for that kind of approach.
- (2) The holder of an air transport pilot licence is authorised to conduct a circling approach under the IFR on a flight only if:
 - (a) the holder passed the flight test for the licence within the previous 12 months, and the flight test included a circling approach; or
 - (b) the holder's most recent instrument proficiency check included a circling approach; or
 - (c) both:
 - (i) the holder is successfully participating in an operator's training and checking system for an operation that includes circling approaches under the IFR; and

- (ii) the operator holds an approval under regulation 61.040 for the system for this subregulation.
- (2A) The holder of an air transport pilot licence is authorised to conduct a 3D instrument approach operation only if:
- (a) the holder passed the flight test for the licence within the previous 12 months, and the flight test included a 3D instrument approach operation; or
 - (b) either:
 - (i) in a case in which the holder's most recent instrument proficiency check included a 3D instrument approach operation—during the check the holder demonstrated, to a person mentioned in subregulation (5), the holder's competence in the conduct of a 3D instrument approach operation; or
 - (ii) in any other case—the holder has, within the previous 15 months, demonstrated, to a person mentioned in subregulation (5), the holder's competence in the conduct of a 3D instrument approach operation; or
 - (c) both:
 - (i) the holder is successfully participating in an operator's training and checking system for an operation that includes 3D instrument approaches; and
 - (ii) the operator holds an approval under regulation 61.040 for the system for this subregulation.
- (3) For paragraphs (2)(b) and (2A)(b), an instrument proficiency check includes an operator proficiency check:
- (a) that covers IFR operations; and
 - (b) that is conducted by a flight examiner who holds an instrument rating flight test endorsement.
- (4) The holder of an air transport pilot licence is authorised to conduct an instrument approach operation in an aircraft using a procedure of a particular kind only if the holder has:
- (a) completed training in the conduct of instrument approach operations using the procedure; and
 - (b) demonstrated, to a person mentioned in subregulation (5), his or her competence in the conduct of instrument approach operations using the procedure.
- (5) For paragraphs (2A)(b) and (4)(b), the persons are as follows:
- (a) CASA;
 - (b) an examiner who is authorised under this Part to conduct an instrument approach operation using the same procedure;
 - (c) a person who holds an approval under regulation 61.040 to assess the holder's competence.

Regulation 61.685

61.685 Limitations on exercise of privileges of air transport pilot licences—IFR flight: recent experience

- (1) Subject to subregulation (1A), this regulation applies to the holder of an air transport pilot licence.
- (1A) This regulation does not apply to the holder if:
 - (a) the holder has successfully completed an operator proficiency check that covers IFR operations within the previous 3 months; or
 - (b) both:
 - (i) the holder is successfully participating in an operator's training and checking system for an IFR operation; and
 - (ii) the operator holds an approval under this regulation for the system for this subregulation.
- (2) The holder is authorised to pilot an aircraft under the IFR only if the holder has conducted at least 3 instrument approach operations within the previous 90 days in an aircraft or an approved flight simulation training device for the purpose.
- (3) The holder is authorised to pilot an aircraft of a particular category under the IFR only if the holder has conducted at least one instrument approach operation within the previous 90 days in an aircraft of the same category or an approved flight simulation training device for the purpose.
- (4) The holder is authorised to conduct a 2D instrument approach operation only if the holder has conducted a 2D instrument approach operation within the previous 90 days in an aircraft or an approved flight simulation training device for the purpose.
- (5) The holder is authorised to conduct a 3D instrument approach operation only if the holder has conducted a 3D instrument approach operation within the previous 90 days in an aircraft or an approved flight simulation training device for the purpose.
- (6) The holder is authorised to conduct an azimuth guidance operation only if the holder has conducted an azimuth guidance operation within the previous 90 days in an aircraft or an approved flight simulation training device for the purpose.
- (7) The holder is authorised to conduct a course deviation indicator operation only if the holder has conducted a course deviation indicator operation within the previous 90 days in an aircraft or an approved flight simulation training device for the purpose.

Note: Azimuth guidance operations and course deviation indicator operations are instrument approach operations: see the definitions of those terms in regulation 61.010.

**61.695 Limitations on exercise of privileges of air transport pilot licences—
instrument proficiency check**

- (1) The holder of an air transport pilot licence is authorised to exercise the privileges of the licence under the IFR in an aircraft of a particular category only if the holder has a valid instrument proficiency check for the aircraft category.
- (2) However:
 - (a) the holder is authorised to exercise the privileges of the licence in a multi-engine aeroplane only if the holder has a valid instrument proficiency check for multi-engine aeroplanes; and
 - (b) the holder is authorised to exercise the privileges of the licence in a multi-engine helicopter only if the holder has a valid instrument proficiency check for multi-engine helicopters.
- (3) Subject to subregulations (4) and (4B), for subregulations (1) and (2), the holder is taken to have a valid instrument proficiency check for the aircraft category, or for multi-engine aeroplanes or helicopters, during the following periods:
 - (a) if the holder passes the flight test for the air transport pilot licence in a relevant aircraft—the period from when the holder passes the flight test to the end of the 12th month after the month in which the holder passes the flight test;
 - (b) if the holder successfully completes an operator proficiency check that covers IFR operations in the relevant aircraft, and that is conducted by a flight examiner who holds an instrument rating flight test endorsement—the period from when the holder successfully completes the check to the end of the 12th month after the month in which the holder successfully completes the check;
 - (c) if:
 - (i) the holder is successfully participating in an operator’s training and checking system for an IFR operation in the relevant aircraft; and
 - (ii) the operator holds an approval under regulation 61.040 for the system for this subregulation and operations in the relevant aircraft;the period during which the holder is successfully participating in the system;
 - (d) if the holder successfully completes an instrument proficiency check for the relevant aircraft—the period from when the holder successfully completes the check to the end of the 12th month after the month in which the holder successfully completes the check;
 - (e) if:
 - (i) the holder is taken to have a valid instrument proficiency check under any of paragraphs (a) to (d) for the relevant aircraft (the **existing check**); and
 - (ii) within 3 months before the validity of the existing check expires, the holder successfully completes an instrument proficiency check for the relevant aircraft;

Regulation 61.695

the period from when the validity of the existing check expires to the end of the 12th month after the validity of the existing check expires.

- (4) If, at any time, the holder attempts, but does not successfully complete, an instrument proficiency check mentioned in subregulation (4A) (the *failed check*), the holder is no longer taken to have a valid instrument proficiency check for:
- (a) the aircraft category in which the holder attempted the failed check; or
 - (b) multi-engine aircraft of the category in which the holder attempted the failed check.
- (4A) For subregulation (4), the failed check may be any of the following:
- (a) an instrument proficiency check for an aircraft category;
 - (b) an instrument proficiency check for multi-engine aeroplanes or helicopters;
 - (c) an instrument proficiency check for an aircraft type.
- (4B) If the holder is taken to have a valid instrument proficiency check for the relevant aircraft only because of the holder's participation in an operator's training and checking system, the check is taken to be valid only for operations conducted by the operator.
- (5) For paragraphs (3)(d) and (e), the holder successfully completes an instrument proficiency check for the relevant aircraft if:
- (a) CASA or a flight examiner:
 - (i) assesses the holder's competency to conduct operations under the IFR in a relevant aircraft as meeting the standards mentioned in the Part 61 Manual of Standards for an instrument proficiency check in the relevant aircraft; and
 - (ii) endorses the holder's licence document to the effect that the holder has completed the instrument proficiency check; and
 - (iii) includes in the endorsement the matters mentioned in subregulation (8); or
 - (b) a person mentioned in subregulation (7) assesses the holder as competent to conduct operations under the IFR in a relevant aircraft, and CASA or a flight examiner:
 - (i) conducts an oral assessment of the holder's knowledge of IFR operation procedures to the standards mentioned in the Part 61 Manual of Standards for an instrument proficiency check; and
 - (ii) endorses the holder's licence document to the effect that the holder has completed the instrument proficiency check; and
 - (iii) includes in the endorsement the matters mentioned in subregulation (8).
- (6) For paragraphs (3)(d) and (e), the instrument proficiency check must be conducted in a relevant aircraft or an approved flight simulation training device for the proficiency check.
- (7) For paragraph (5)(b), the person is the holder of an approval under regulation 61.040 to conduct the proficiency check.

- (8) For subparagraphs (5)(a)(iii) and (b)(iii), the matters are:
- (a) the date on which the instrument proficiency check is conducted; and
 - (b) the aircraft to which the instrument proficiency check relates.
- (9) In this regulation:
- relevant aircraft**, for an instrument proficiency check, means:
- (a) if the instrument proficiency check is for an aircraft category—a single-engine or multi-engine aircraft of that category; or
 - (b) if the instrument proficiency check is for multi-engine aeroplanes—a multi-engine aeroplane; or
 - (c) if the instrument proficiency check is for multi-engine helicopters—a multi-engine helicopter.

61.700 Requirements for grant of air transport pilot licences—general

- (1) An applicant for an air transport pilot licence must be at least 21.
- (2) The applicant must also hold a commercial pilot licence or multi-crew pilot licence with the same aircraft category rating.
- (3) The applicant must also have:
- (a) passed the aeronautical knowledge examination for the air transport pilot licence and the associated aircraft category rating; and
 - (b) completed flight training for the air transport pilot licence and the associated aircraft category rating; and
 - (c) passed the flight test mentioned in the Part 61 Manual of Standards for the air transport pilot licence and the associated aircraft category rating; and
 - (d) met the aeronautical experience requirements of this Subpart; and
 - (e) completed an approved course of training in multi-crew cooperation.
- Note 1: For paragraph (a), for the conduct of aeronautical knowledge examinations, see Division 61.B.3.
- Note 2: For paragraph (b), for the requirements for flight training, see Division 61.B.2.
- Note 3: For paragraph (c), for the conduct of flight tests, see Division 61.B.4.
- Note 4: For paragraph (d), for the determination of a person's flight time and other aeronautical experience, see Division 61.A.2.
- (4) An applicant for an air transport pilot licence with the aeroplane category rating is taken to meet the requirements of paragraph (3)(a) if the applicant holds a multi-crew pilot licence.
- (5) For paragraph (3)(c), the flight test for the air transport pilot licence with the aeroplane category rating must be conducted under the IFR in:
- (a) a multi-engine turbine-powered aeroplane that is configured for flight, and operated, with a co-pilot; or
 - (b) an approved flight simulator for the flight test.

Regulation 61.705

- (6) For paragraph (3)(c), the flight test for the air transport pilot licence with the helicopter category rating must be conducted in:
 - (a) a turbine-powered helicopter that is:
 - (i) certificated for night VFR operations; and
 - (ii) configured for flight, and operated, with a co-pilot; or
 - (b) an approved flight simulator for the flight test.
- (7) For paragraph (3)(c), the flight test for the air transport pilot licence with the powered-lift aircraft category rating must be conducted in:
 - (a) a powered-lift aircraft operated and configured for flight with a co-pilot and equipped for IFR flight; or
 - (b) an approved flight simulator for the flight test.

61.705 Aeronautical experience requirements for grant of air transport pilot licences—airplane category

- (1) An applicant for an air transport pilot licence with the airplane category rating must have at least 1 500 hours of aeronautical experience that includes:
 - (a) at least 1 400 hours of flight time as a pilot; and
 - (b) at least 750 hours of flight time as pilot of an airplane; and
 - (c) either:
 - (i) at least 500 hours of flight time in an airplane as pilot in command under supervision; or
 - (ii) at least 250 hours of flight time in an airplane as pilot in command or pilot in command under supervision, of which at least 70 hours must be as pilot in command; and
 - (d) at least 200 hours of cross-country flight time in an airplane; and
 - (e) at least 100 hours of cross-country flight time as pilot in command, or pilot in command under supervision, of an airplane; and
 - (f) at least 100 hours of flight time at night as pilot of an airplane, other than dual flight; and
 - (g) at least 75 hours of instrument time; and
 - (h) at least 45 hours of instrument flight time in an airplane.
- (2) Any of the required aeronautical experience that is not completed as flight time as a pilot must be completed as simulated flight time in an approved flight simulation training device for the purpose.
- (3) However, no more than 25 hours may be completed in a flight simulation training device that is not a flight simulator.
- (4) The flight time in an airplane required by subregulation (1) must be completed in a registered or recognised airplane.

61.710 Aeronautical experience requirements for grant of air transport pilot licences—helicopter category

- (1) An applicant for an air transport pilot licence with the helicopter category rating must have at least 1 000 hours of aeronautical experience that includes:
 - (a) at least 900 hours of flight time as a pilot; and
 - (b) at least 750 hours of flight time as pilot of a helicopter; and
 - (c) at least 250 hours of flight time as pilot in command, or pilot in command under supervision, of a helicopter; and
 - (d) at least 70 hours of flight time as pilot in command of a helicopter; and
 - (e) at least 200 hours of cross-country flight time in a helicopter; and
 - (f) at least 100 hours of cross-country flight time as pilot in command, or pilot in command under supervision, of a helicopter; and
 - (g) at least 50 hours of flight time at night as pilot of a helicopter; and
 - (h) at least 30 hours of instrument time; and
 - (i) at least 20 hours of instrument flight time in a helicopter.
- (2) Any of the required aeronautical experience that is not completed as flight time as a pilot must be completed as:
 - (a) simulated flight time in an approved flight simulation training device for the purpose; or
 - (b) tethered flight time.
- (3) However:
 - (a) no more than 25 hours of the required aeronautical experience may be completed in a flight simulation training device that is not a flight simulator; and
 - (b) no more than 5 hours of the required aeronautical experience may be completed as tethered flight time.
- (4) The flight time in a helicopter required by subregulation (1) must be completed in a registered or recognised helicopter.

61.715 Aeronautical experience requirements for grant of air transport pilot licences—powered-lift aircraft category

- (1) An applicant for an air transport pilot licence with the powered-lift aircraft category rating must have at least 1 500 hours of aeronautical experience that includes:
 - (a) at least 1 400 hours of flight time as a pilot; and
 - (b) at least 750 hours of flight time as pilot of a powered-lift aircraft; and
 - (c) at least 250 hours of flight time as pilot in command, or pilot in command under supervision, of a powered-lift aircraft; and
 - (d) at least 70 hours of flight time as pilot in command of a powered-lift aircraft; and
 - (e) at least 100 hours of cross-country flight time in a powered-lift aircraft; and

Regulation 61.715

- (f) at least 50 hours of cross-country flight time as pilot in command, or pilot in command under supervision, of a powered-lift aircraft; and
 - (g) at least 25 hours of flight time at night as pilot of a powered-lift aircraft; and
 - (h) at least 75 hours of instrument time; and
 - (i) at least 45 hours of instrument flight time in a powered-lift aircraft.
- (2) Any of the required aeronautical experience that is not completed as flight time as a pilot must be completed as:
- (a) simulated flight time in an approved flight simulation training device for the purpose; or
 - (b) tethered flight time.
- (3) However:
- (a) no more than 25 hours may be completed in a flight simulation training device that is not a flight simulator; and
 - (b) no more than 5 hours may be completed as tethered flight time.
- (4) The flight time in a powered-lift aircraft required by subregulation (1) must be completed in a registered or recognised powered-lift aircraft.

Subpart 61.L—Aircraft ratings and endorsements for pilot licences

Division 61.L.1—Preliminary

61.720 What Subpart 61.L is about

Subpart 61.L provides for ratings and endorsements that are required to authorise the holder of a pilot licence to exercise the privileges of the licence in an aircraft of a particular category, class or type.

Note 1: For the aircraft categories, see regulation 61.015.

Note 2: For the aircraft classes, see regulation 61.020.

Note 3: A design feature endorsement is required for the exercise of the privileges of a pilot licence in an aircraft that has the design feature to which the design endorsement relates: see regulation 61.760.

Note 4: A pilot type rating is required for the exercise of the privileges of a pilot licence in a multi-crew aircraft or an aircraft for which a single-pilot type rating is required by a legislative instrument under regulation 61.060: see subregulation 61.375(3). The type ratings that may be granted are set out in legislative instruments under regulations 61.055 (multi-crew aircraft) and 61.060 (single-pilot aircraft).

Note 5: However, the holder of a pilot licence may conduct some activities in an aircraft of a particular type without holding a pilot type rating if he or she holds a cruise relief type rating for the type of aircraft: see subregulation 61.375(6). The cruise relief type ratings that may be granted are those set out in a legislative instrument under regulation 61.055.

Note 6: For ratings and endorsements to conduct particular operations in an aircraft, see Subparts 61.M to 61.U.

Division 61.L.2—Aircraft category ratings

61.725 Privileges of aircraft category ratings

Subject to Subpart 61.E, the holder of an aircraft category rating is authorised to exercise the privileges of the pilot licence with which the category rating is associated in an aircraft of that category.

Note 1: Subpart 61.E sets out certain limitations that apply to all pilot licences, and ratings and endorsements on pilot licences.

Note 2: An aircraft category rating has effect only in conjunction with the pilot licence for which it is granted. It does not authorise the exercise, in the aircraft category covered by the rating, of the privileges of any other pilot licence held by the holder of the rating: see the definition of *associated* in regulation 61.010.

61.730 Requirements for grant of aircraft category ratings

- (1) An applicant for an aircraft category rating must be an applicant for, or the holder of, a pilot licence.

Note: Subregulation (1) is satisfied if the applicant holds a certificate of validation of an overseas flight crew licence that is equivalent to a pilot licence: see item 36 of Part 2 of the Dictionary.

- (2) If the application for the aircraft category rating is made at the same time as an application for a pilot licence, the applicant meets the requirements for the grant of the category rating if the applicant meets the requirements for the grant of the pilot licence with the aircraft category rating.
- (3) An applicant for an aircraft category rating for an existing pilot licence must meet the requirements for the grant of the pilot licence with the aircraft category rating.

Division 61.L.3—Aircraft class ratings

61.735 Privileges of aircraft class ratings

Subject to Subpart 61.E and regulations 61.740 and 61.745, the holder of an aircraft class rating is authorised to exercise the privileges of the holder's pilot licence in an aircraft of that class, other than an aircraft that:

- (a) is certificated for multi-crew operation; or
- (b) is of a type for which a single-pilot type rating is required by a legislative instrument under regulation 61.060 (Prescription of type ratings—single-pilot aircraft).

Note: Subpart 61.E sets out certain limitations that apply to all pilot licences, and ratings and endorsements on pilot licences.

61.745 Limitations on exercise of privileges of aircraft class ratings—flight review

- (1) The holder of an aircraft class rating is authorised to exercise the privileges of the rating only if the holder has a valid flight review for the rating.
- (1A) For subregulation (1), the holder has a valid flight review for the rating during the period beginning when the holder successfully completes a flight review for the rating in accordance with subregulation (2) and ending:
 - (a) at the end of the 24th month after the month in which the holder completes the review; or
 - (b) if:
 - (i) the holder already has a valid flight review for the rating (the *previous flight review*) when the holder successfully completes the flight review; and
 - (ii) the validity of the previous flight review is due to expire within 3 months after the holder successfully completes the flight review; at the end of the 24th month after the validity of the previous flight review expires.
- (2) The flight review must be conducted in:
 - (a) an aircraft of the class covered by the rating; or
 - (b) an approved flight simulator for the flight review.
- (3) For subregulation (1A), the holder is taken to have successfully completed a flight review for the rating if the holder:
 - (a) passes the flight test for the rating; or
 - (b) passes the flight test for an operational rating in an aircraft of the class covered by the aircraft class rating; or
 - (c) completes flight training for a design feature endorsement in an aircraft of the class covered by the aircraft class rating; or

Part 61 Flight crew licensing

Subpart 61.L Aircraft ratings and endorsements for pilot licences

Division 61.L.3 Aircraft class ratings

Regulation 61.747

- (d) successfully completes a flight review for a pilot type rating in an aircraft of a type prescribed in an instrument under regulation 61.061 for the class rating; or
 - (e) successfully completes:
 - (i) an operator proficiency check that covers operations in the class; or
 - (ii) a proficiency check mentioned in subregulation (3A) in an aircraft of the class or an approved flight simulation training device for the purpose.
- (3A) For subparagraph (3)(e)(ii), the proficiency checks are as follows:
- (a) an instrument proficiency check;
 - (b) a night vision imaging system proficiency check;
 - (c) an aerial application proficiency check;
 - (d) an instructor proficiency check;
 - (e) an examiner proficiency check.
- (3B) For subregulation (1), the holder is taken to have a valid flight review for the rating if:
- (a) the holder is successfully participating in an operator's training and checking system for an operation in an aircraft of the class covered by the rating; and
 - (b) the operator holds an approval under regulation 61.040 for the system for this subregulation and operations in aircraft of that class.
- (4) However, paragraph (3)(a) does not apply if the holder was taken to have met the requirements for the grant of the rating under subregulation 61.480(3).

Note: For general rules in relation to flight reviews, see regulation 61.400.

61.747 Limitations on exercise of privileges of class ratings in certain aircraft—flight review

- (1) The holder of an aircraft class rating is authorised to exercise the privileges of the rating in an aircraft of a type mentioned in subregulation (2) only if the holder has:
 - (a) completed the flight training mentioned in subregulation (3) for the aircraft type; and
 - (b) successfully completed a flight review in:
 - (i) an aircraft of the type; or
 - (ii) an approved flight simulator for the flight review.
- (2) For subregulation (1), the aircraft types are prescribed in an instrument under regulation 61.062.
- (3) For paragraph (1)(a), the holder completes flight training for the aircraft type only if:
 - (a) the holder has received training in all the units of competency mentioned in the Part 61 Manual of Standards for the class rating that are relevant for the aircraft type; and

- (b) the training is conducted by:
 - (i) an instructor for a Part 141 or 142 operator that is authorised to conduct flight training for the aircraft type; or
 - (ii) the holder of an approval under regulation 141.035 or 142.040 to conduct the training; and
 - (c) the training is conducted in accordance with regulation 61.205; and
 - (d) the instructor is satisfied that the holder meets the competency standards mentioned in the Part 61 Manual of Standards for the class rating that are relevant for the aircraft type.
- (4) The holder of an aircraft class rating that was granted on the basis of regulation 202.272 is taken to meet the requirements mentioned in subregulation (1) for a type of aircraft if, immediately before 1 September 2014, the holder held an aircraft endorsement that was in force for the type of aircraft.
- (5) The holder of an aircraft class rating is also taken to meet the requirements mentioned in subregulation (1) for a type of aircraft if, before the aircraft type was prescribed in an instrument made for the purposes of regulation 61.062, the holder conducted one or more operations in aircraft of that type as pilot in command.

61.750 Requirements for grant of aircraft class ratings

- (1) An applicant for an aircraft class rating must hold:
- (a) a pilot licence; and
 - (b) the aircraft category rating for the aircraft category to which aircraft of that class belong.

Note: Subregulation (1) is satisfied, in relation to a required licence or rating, if the applicant holds a certificate of validation of an overseas flight crew licence, rating or endorsement that is equivalent to the required licence or rating: see item 36 of Part 2 of the Dictionary.

- (2) However, an applicant for a multi-engine aeroplane class rating must hold a private pilot licence, commercial pilot licence, multi-crew pilot licence or air transport pilot licence.
- (3) The applicant must also have:
- (a) completed flight training for the rating; and
 - (b) passed the flight test mentioned in the Part 61 Manual of Standards for the aircraft class rating in an aircraft of the class covered by the rating.

Note 1: For paragraph (a), for the requirements for flight training, see Division 61.B.2.

Note 2: For paragraph (b), for the conduct of flight tests, see Division 61.B.4.

Division 61.L.4—Design feature endorsements

61.755 Design features that require design feature endorsement

Aeroplanes

- (2) The following design features on an aeroplane require a design feature endorsement:
- (a) tailwheel undercarriage;
 - (b) retractable undercarriage;
 - (c) manual propeller pitch control (piston engine);
 - (d) gas turbine engine;
 - (e) multi-engine centre-line thrust;
 - (f) pressurisation system;
 - (g) floatplane;
 - (h) floating hull;
 - (i) ski landing gear.

Helicopters

- (3) The following design features on a helicopter require a design feature endorsement:
- (a) float alighting gear;
 - (b) retractable undercarriage;
 - (c) gas turbine engine.

Powered-lift aircraft

- (3A) The following design features on a powered-lift aircraft require a design feature endorsement:
- (a) retractable undercarriage;
 - (b) pressurisation system;
 - (c) gas turbine engine.

Gyroplanes

- (4) The following design features on a gyroplane require a design feature endorsement:
- (a) retractable undercarriage;
 - (b) pressurisation system;
 - (c) gas turbine engine.

Airships

- (5) The following design features on an airship require a design feature endorsement:

- (a) pressurisation system;
- (b) gas turbine engine.

61.760 Privileges of design feature endorsements

Subject to Subpart 61.E, the holder of a design feature endorsement is authorised to exercise the privileges of his or her pilot licence in an aircraft that:

- (a) has that design feature; and
- (b) is:
 - (i) of a class for which the holder holds an aircraft class rating; or
 - (ii) of a type for which the holder holds an aircraft type rating.

Note: Subpart 61.E sets out certain limitations that apply to all pilot licences, and ratings and endorsements on pilot licences.

61.765 Requirements for grant of design feature endorsements

- (1) An applicant for a design feature endorsement must:
 - (a) hold an aircraft class rating that covers an aircraft with the design feature; and
 - (b) either:
 - (i) have passed the flight test for the class rating in an aircraft with the design feature; or
 - (ii) have completed flight training for the endorsement.

Note 1: For paragraph (a), paragraph (a) is satisfied if the applicant holds a certificate of validation of an overseas flight crew licence, rating or endorsement that is equivalent to the rating: see item 36 of Part 2 of the Dictionary.

Note 2: For subparagraph (b)(i), for the conduct of flight tests, see Division 61.B.4.

Note 3: For subparagraph (b)(ii), for the requirements for flight training, see Division 61.B.2.

- (2) A pilot who holds a type rating for an aircraft that has a design feature mentioned for the aircraft in regulation 61.755 is taken to meet the requirements of subregulation (1) for that design feature.

Note: Subregulation (2) is satisfied if the applicant holds a certificate of validation of an overseas flight crew licence, rating or endorsement that is equivalent to the rating: see item 36 of Part 2 of the Dictionary.

Division 61.L.5—Pilot type ratings

61.770 Privileges of pilot type ratings

Subject to Subpart 61.E and regulations 61.775 to 61.805, the holder of a pilot licence and a pilot type rating is authorised to exercise the privileges of the licence in an aircraft of the type covered by the rating.

Note 1: Subpart 61.E sets out certain limitations that apply to all pilot licences, and ratings and endorsements on pilot licences.

Note 2: The aircraft types for which pilot type ratings may be granted are set out in legislative instruments under regulations 61.055 (multi-crew aircraft) and 61.060 (single-pilot aircraft).

61.775 Limitations on exercise of privileges of pilot type ratings—flight test in flight simulator

- (1) This regulation applies to the holder of a pilot type rating for a type rated aircraft that is a multi-engine turbine-powered aircraft if the holder passed the flight test for the rating in a flight simulator.
- (2) The holder is authorised to exercise the privileges of the rating as pilot in command only if the holder has at least 25 hours of flight time as pilot of an aircraft covered by the rating.
- (3) The holder is taken to meet the requirements of subregulation (2) if the holder has:
 - (a) for a type rating for a turbojet-powered aeroplane:
 - (i) at least 1 000 hours of flight time as pilot of a turbojet-powered aeroplane; or
 - (ii) at least 2 000 hours of flight time, including at least 500 hours of flight time as pilot of a turbojet-powered aeroplane; or
 - (b) for a type rating for a turboprop-powered aeroplane:
 - (i) at least 1 000 hours of flight time as pilot of a turboprop-powered aeroplane; or
 - (ii) at least 2 000 hours of flight time, including at least 500 hours of flight time as pilot of a turboprop-powered aeroplane; or
 - (c) for a type rating for a turbine-powered helicopter:
 - (i) at least 1 000 hours of flight time as pilot of a turbine-powered helicopter; or
 - (ii) at least 2 000 hours of flight time, including at least 500 hours of flight time as pilot of a turbine-powered helicopter; or
 - (d) for a type rating for a powered-lift aircraft:
 - (i) at least 1 000 hours of flight time as pilot of a multi-engine turbine-powered helicopter or powered-lift aircraft; or

- (ii) at least 2 000 hours of flight time, including at least 500 hours of flight time as pilot of a multi-engine turbine-powered helicopter or powered-lift aircraft.

61.780 Limitations on exercise of privileges of pilot type ratings—variants

- (1) This regulation applies if:
 - (a) the holder of a pilot type rating passed the flight test for the rating in:
 - (i) an aircraft model covered by the rating (the *first variant*); or
 - (ii) an approved flight simulator for the first variant; and
 - (b) differences training is required by a legislative instrument under regulation 61.055 or 61.060 for another aircraft model covered by the rating (the *second variant*).
- (2) The holder is authorised to exercise the privileges of the rating in an aircraft of the second variant only if the holder has completed the differences training for the second variant.

61.785 Limitations on exercise of privileges of pilot type ratings—single-pilot operation and multi-crew operation

- (1) On and after 1 September 2015, the holder of a single-pilot type rating is authorised to exercise the privileges of the rating in a multi-crew operation only if:
 - (a) the holder also holds a multi-crew type rating; or
 - (b) the holder has completed an approved course of training in multi-crew cooperation.
- (2) The holder of a multi-crew type rating is authorised to exercise the privileges of the rating only in a multi-crew operation.

61.790 Limitations on exercise of privileges of pilot type ratings—IFR operation

The holder of a pilot type rating is authorised to pilot an aircraft under the IFR only if:

- (a) the flight test for the rating is conducted under the IFR; or
- (b) the holder has completed an instrument proficiency check in an aircraft covered by the rating.

61.795 Limitations on exercise of privileges of pilot type ratings—recent experience on aircraft models

The holder of a pilot type rating is authorised to exercise the privileges of the rating in an aircraft model covered by the rating only if:

- (a) within the previous 24 months, the holder has:
 - (i) exercised the privileges of the rating in the aircraft model; or
 - (ii) passed the flight test for the rating in the aircraft model; or
 - (iii) successfully completed a flight review in the aircraft model; or

Part 61 Flight crew licensing

Subpart 61.L Aircraft ratings and endorsements for pilot licences

Division 61.L.5 Pilot type ratings

Regulation 61.800

- (iv) if differences training is required by an instrument under regulation 61.055 or 61.060 for the aircraft model—completed the differences training; or
- (b) both:
 - (i) the holder is successfully participating in an operator’s training and checking system for an operation in the aircraft model; and
 - (ii) the operator holds an approval under regulation 61.040 for the system for this regulation and operations in that aircraft model.

61.800 Limitations on exercise of privileges of pilot type ratings—flight review

- (1) The holder of a pilot type rating is authorised to exercise the privileges of the rating as the pilot in command of an aircraft only if the holder has a valid flight review for the rating.
- (2) For subregulation (1), the holder has a valid flight review for the rating during the period beginning when the holder successfully completes a flight review for the rating in accordance with subregulation (3) and ending:
 - (a) at the end of the 24th month after the month in which the holder completes the review; or
 - (b) if:
 - (i) the holder already has a valid flight review for the rating (the *previous flight review*) when the holder successfully completes the flight review; and
 - (ii) the validity of the previous flight review is due to expire within 3 months after the holder successfully complete the flight review; at the end of the 24th month after the validity of the previous flight review expires.
- (3) For subregulation (2), the flight review must be conducted in:
 - (a) if the aircraft covered by the rating is a type of single-engine helicopter prescribed by an instrument under regulation 61.063:
 - (i) a helicopter of the type covered by the rating; or
 - (ii) an approved flight simulator for that type of helicopter; or
 - (iii) a type of single-engine helicopter prescribed by the instrument as equivalent to the type covered by the rating; or
 - (iv) an approved flight simulator for that type of helicopter; or
 - (b) in any other case:
 - (i) an aircraft of the type covered by the rating; or
 - (ii) an approved flight simulator for that type of aircraft.
- (4) For subregulation (2), the holder is taken to have successfully completed a flight review for the rating if the holder:
 - (a) passes the flight test for the rating; or
 - (b) passes the flight test for an operational rating in an aircraft of the class covered by the type rating; or

- (c) completes flight training for a design feature endorsement in an aircraft of the class covered by the type rating; or
- (d) successfully completes:
 - (i) an operator proficiency check that covers operations in the type; or
 - (ii) a proficiency check mentioned in subregulation (5) in an aircraft of the type or an approved flight simulation training device for the purpose.
- (5) For subparagraph (4)(d)(ii), the proficiency checks are as follows:
 - (a) an instrument proficiency check;
 - (b) a night vision imaging system proficiency check;
 - (c) an aerial application proficiency check;
 - (d) an instructor proficiency check;
 - (e) an examiner proficiency check.
- (6) For subregulation (1), the holder is taken to have a valid flight review for the rating if:
 - (a) the holder is successfully participating in an operator's training and checking system for an operation in an aircraft of the type covered by the rating; and
 - (b) the operator holds an approval under regulation 61.040 for the system for this subregulation and operations in aircraft of that type.

Note: For general rules in relation to flight reviews, see regulation 61.400.

61.805 Limitations on exercise of privileges of pilot type ratings—instrument proficiency check

- (1) The holder of a pilot type rating is authorised to exercise the privileges of the rating under the IFR only if the holder has a valid instrument proficiency check for the aircraft type covered by the rating.
- (2) Subject to subregulations (4) and (4B), for subregulation (1), the holder is taken to have a valid instrument proficiency check for an aircraft type, other than a single-pilot turbojet aeroplane type, during the following periods:
 - (a) if the holder passes the flight test for an instrument rating, private IFR rating, multi-crew pilot licence or air transport pilot licence in an aircraft of that type—the period from when the holder passes the flight test to the end of the 24th month after the month in which the holder passes the flight test;
 - (aa) if the holder passes the flight test for the pilot type rating in an aircraft under the IFR—the period from when the holder passes the flight test to the end of the 24th month after the month in which the holder passes the flight test;
 - (b) if:
 - (i) the holder passes the flight test for an instrument endorsement in an aircraft of that type; and
 - (ii) the flight test is conducted more than 6 months after the holder passes the flight test for the rating;

Part 61 Flight crew licensing

Subpart 61.L Aircraft ratings and endorsements for pilot licences

Division 61.L.5 Pilot type ratings

Regulation 61.805

the period from when the holder passes the flight test for the endorsement to the end of the 24th month after the month in which the holder passes the flight test for the endorsement;

- (c) if the holder successfully completes an operator proficiency check that covers IFR operations in an aircraft of that type, and that is conducted by a flight examiner who holds an instrument rating flight test endorsement—the period from when the holder successfully completes the check to the end of the 24th month after the month in which the holder successfully completes the check;

- (d) if:

- (i) the holder is successfully participating in an operator's training and checking system for an IFR operation in an aircraft of that type; and
(ii) the operator holds an approval under regulation 61.040 for the system for this subregulation and operations in aircraft of that type;

the period during which the holder is successfully participating in the system;

- (e) if the holder successfully completes an instrument proficiency check for the aircraft type—the period from when the holder successfully completes the check to the end of the 24th month after the month in which the holder successfully completes the check;

- (f) if:

- (i) the holder is taken to have a valid instrument proficiency check under any of paragraphs (a) to (e) for the aircraft type (the *existing check*); and
(ii) within 3 months before the validity of the existing check expires, the holder successfully completes an instrument proficiency check for the aircraft type;

the period from when the validity of the existing check expires to the end of the 24th month after the validity of the existing check expires.

- (3) Subject to subregulations (4) and (4B), for subregulation (1), the holder is taken to have a valid instrument proficiency check for a single-pilot turbojet aeroplane type during the following periods:

- (a) if the holder passes the flight test for the instrument rating or private IFR rating that is conducted as a single-pilot operation in an aircraft of that type—the period from when the holder passes the flight test to the end of the 12th month after the month in which the holder passes the flight test;

- (b) if:

- (i) the holder passes the flight test for an instrument endorsement in an aircraft of that type; and
(ii) the flight test is conducted more than 6 months after the holder passes the flight test for the rating;

the period from when the holder passes the flight test for the endorsement to the end of the 12th month after the month in which the holder passes the flight test for the endorsement;

- (c) if the holder successfully completes an operator proficiency check that covers IFR operations in an aircraft of that type, and that is conducted by a

flight examiner who holds an instrument rating flight test endorsement—the period from when the holder successfully completes the check to the end of the 12th month after the month in which the holder successfully completes the check;

- (d) if:
 - (i) the holder is successfully participating in an operator’s training and checking system for an IFR operation in an aircraft of that type; and
 - (ii) the operator holds an approval under regulation 61.040 for the system for this subregulation and operations in aircraft of that type;the period during which the holder is successfully participating in the system;
- (e) if the holder successfully completes an instrument proficiency check for the aircraft type—the period from when the holder successfully completes the check to the end of the 12th month after the month in which the holder successfully completes the check;
- (f) if:
 - (i) the holder is taken to have a valid instrument proficiency check under any of paragraphs (a) to (e) for the aircraft type (the **existing check**); and
 - (ii) within 3 months before the validity of the existing check expires, the holder successfully completes an instrument proficiency check for the aircraft type;the period from when the validity of the existing check expires to the end of the 12th month after the validity of the existing check expires.

(4) If, at any time, the holder attempts, but does not successfully complete, an instrument proficiency check mentioned in subregulation (4A) (the **failed check**), the holder is no longer taken to have a valid instrument proficiency check for a type of aircraft belonging to the aircraft category in which the holder attempted the failed check.

(4A) For subregulation (4), the failed check may be any of the following:

- (a) an instrument proficiency check for an aircraft category;
- (b) an instrument proficiency check for multi-engine aeroplanes or helicopters;
- (c) an instrument proficiency check for an aircraft type.

(4B) If the holder is taken to have a valid instrument proficiency check for the aircraft type only because of the holder’s participation in an operator’s training and checking system, the check is taken to be valid only for operations conducted by the operator.

(5) For paragraphs (2)(e) and (f) and (3)(e) and (f), the holder successfully completes an instrument proficiency check for the relevant aircraft if:

- (a) CASA or a flight examiner:
 - (i) assesses the holder’s competency to conduct operations under the IFR in a relevant aircraft as meeting the standards mentioned in the Part 61 Manual of Standards for an instrument proficiency check in the relevant aircraft; and

Part 61 Flight crew licensing

Subpart 61.L Aircraft ratings and endorsements for pilot licences

Division 61.L.5 Pilot type ratings

Regulation 61.810

- (ii) endorses the holder's licence document to the effect that the holder has completed the instrument proficiency check; and
 - (iii) includes in the endorsement the matters mentioned in subregulation (8); or
- (b) a person mentioned in subregulation (7) assesses the holder as competent to conduct operations under the IFR in a relevant aircraft, and CASA or a flight examiner:
 - (i) conducts an oral assessment of the holder's knowledge of IFR operation procedures to the standards mentioned in the Part 61 Manual of Standards for an instrument proficiency check; and
 - (ii) endorses the holder's licence document to the effect that the holder has completed the instrument proficiency check; and
 - (iii) includes in the endorsement the matters mentioned in subregulation (8).
- (6) For paragraphs (2)(e) and (f) and (3)(e) and (f), the instrument proficiency check must be conducted in a relevant aircraft or an approved flight simulation training device for the proficiency check.
- (7) For paragraph (5)(b), the person is the holder of an approval under regulation 61.040 to conduct the proficiency check.
- (8) For subparagraphs (5)(a)(iii) and (b)(iii), the matters are:
 - (a) the date on which the instrument proficiency check is conducted; and
 - (b) the aircraft type to which the instrument proficiency check relates.

61.810 Requirements for grant of pilot type ratings

- (1) This regulation applies to an applicant for a pilot type rating if the applicant is not taken to meet the requirements for the grant of the rating under regulation 61.815 or 61.820.
- (2) The applicant must hold:
 - (a) a pilot licence; and
 - (b) an aircraft category rating for the category of aircraft that includes aircraft of the type covered by the pilot type rating.

Note: Subregulation (2) is satisfied, in relation to a licence or rating, if the applicant holds a certificate of validation of an overseas flight crew licence, rating or endorsement that is equivalent to the licence or rating: see item 36 of Part 2 of the Dictionary.

- (3) The applicant must also have:
 - (a) completed an approved course of training for the rating that includes:
 - (i) theory and technical training; and
 - (ii) flight training in accordance with the approved course, consisting of:
 - (A) dual flight in an aircraft of the type covered by the rating; or
 - (B) dual simulated flight in an approved flight simulator for the training; and

- (b) passed an examination, conducted by the operator or organisation that conducted the training mentioned in paragraph (a), testing the applicant's aeronautical knowledge against the standards mentioned in the Part 61 Manual of Standards for the rating; and
- (c) passed the flight test mentioned in the Part 61 Manual of Standards for the rating.

Note 1: For paragraph (a), for the requirements for an approved course of training, see Division 61.B.2.

Note 2: For paragraph (c), for the conduct of flight tests, see Division 61.B.4.

- (4) For paragraph (3)(a), the approved course of training must be conducted by:
 - (a) a Part 141 or 142 operator that is authorised under Part 141 or 142 to conduct the course; or
 - (b) the holder of an approval under regulation 141.035 or 142.040 to conduct the training.

61.815 Person taken to meet requirements for grant of pilot type rating—multi-crew pilot licence holder

A person is taken to meet the requirements for the grant of a pilot type rating for a type of aircraft if:

- (a) the person meets the requirements for the grant of a multi-crew pilot licence; and
- (b) the flight test for the multi-crew pilot licence is conducted in:
 - (i) an aircraft of that type; or
 - (ii) an approved flight simulator for the flight test.

61.820 Person taken to meet requirements for grant of pilot type rating—new type rating

- (1) A person is taken to meet the requirements for the grant of a pilot type rating (the *new type rating*) if:
 - (a) the person holds a pilot type rating (the *old type rating*) covering 2 or more aircraft models that were, in accordance with a legislative instrument under regulation 61.055 or 61.060 (the *old legislative instrument*), variants of each other; and
 - (b) as a result of a change to the legislative instrument, or the making of a new legislative instrument:
 - (i) the models are no longer variants of each other; and
 - (ii) one or more of the models is covered by the new type rating; and
 - (c) one of the following applies:
 - (i) the person passed the flight test for the old type rating in:
 - (A) an aircraft model that is covered by the new type rating; or
 - (B) an approved flight simulator for an aircraft model covered by the new type rating;

Part 61 Flight crew licensing

Subpart 61.L Aircraft ratings and endorsements for pilot licences

Division 61.L.5 Pilot type ratings

Regulation 61.822

- (ii) differences training was not required by the old legislative instrument for the person to exercise the privileges of the old type rating in an aircraft covered by the new type rating;
 - (iii) both:
 - (A) differences training was required by the old legislative instrument for the person to exercise the privileges of the old type rating in an aircraft covered by the new type rating; and
 - (B) the person has completed the differences training.
- (2) A person is taken to meet the requirements for the grant of a single-pilot type rating for a type of aircraft if:
- (a) a single-pilot type rating is required for that type of aircraft; and
 - (b) a single-pilot type rating was not previously required for that type of aircraft; and
 - (c) the person holds a class rating for the class that includes that type of aircraft; and
 - (d) the person has piloted an aircraft of that type; and
 - (e) a person who may grant the rating is satisfied that the person is competent to pilot an aircraft of that type.

61.822 Removal of type rating condition about acting as pilot in command

- (1) This regulation applies to the holder of a type rating granted on the basis of regulation 202.272 or 202.274 if the rating is subject to the condition that the holder must not act as pilot in command of the relevant aircraft type.
- (2) CASA must remove the condition if:
 - (a) the holder applies to CASA for the removal of the condition; and
 - (b) the holder meets the requirements under this Part for the grant of the type rating.

Division 61.L.6—Cruise relief type ratings

61.825 Kinds of cruise relief type rating

The kinds of cruise relief type rating are set out in column 1 of table 61.825.

Table 61.825 Cruise relief type ratings

Item	Column 1 Rating	Column 2 Activities authorised
1	Cruise relief co-pilot rating (type specific)	Act as co-pilot of an aircraft of the specified type
2	Cruise relief flight engineer rating (type specific)	Act as flight engineer of an aircraft of the specified type

61.830 Privileges of cruise relief type ratings

Subject to Subpart 61.E and regulations 61.835 and 61.840, the holder of a rating mentioned in an item in column 1 of table 61.825 is authorised to undertake the activity mentioned in column 2 of the item.

Note 1: Subpart 61.E sets out certain limitations that apply to all pilot licences, and ratings and endorsements on pilot licences.

Note 2: The types for which cruise relief type ratings may be granted are set out in legislative instruments made under regulations 61.055 (multi-crew aircraft) and 61.060 (single-pilot aircraft).

61.835 Limitations on exercise of privileges of cruise relief type ratings—general

- (1) The holder of a cruise relief co-pilot type rating is authorised to act as co-pilot of an aircraft:
 - (a) only if the aircraft is operated by an operator that:
 - (i) has a training and checking system; and
 - (ii) holds an approval under regulation 61.040 for the system for this subregulation; and
 - (b) only while the aircraft is at flight level 200 or above.
- (2) The holder of a cruise relief flight engineer type rating is authorised to act as flight engineer of an aircraft only while the aircraft is at flight level 200 or above.
- (3) Subregulation (4) applies if:
 - (a) the holder of a cruise relief type rating passed the flight test for the rating in:
 - (i) an aircraft model covered by the rating (the *first variant*); or
 - (ii) an approved flight simulator for the first variant; and

Part 61 Flight crew licensing

Subpart 61.L Aircraft ratings and endorsements for pilot licences

Division 61.L.6 Cruise relief type ratings

Regulation 61.840

- (b) differences training is required by a legislative instrument under regulation 61.055 for another aircraft model covered by the rating (the *second variant*).
- (4) The holder is authorised to exercise the privileges of the rating in the second variant only if the holder has completed the differences training for the second variant.

61.840 Limitations on exercise of privileges of cruise relief type ratings—recent experience

- (1) The holder of a cruise relief co-pilot type rating is authorised to act as co-pilot of an aircraft of a particular type only if:
 - (a) the holder is successfully participating in an operator’s training and checking system for an operation in an aircraft of that type; and
 - (b) the operator holds an approval under regulation 61.040 for the system for this subregulation and operations in aircraft of that type; and
 - (b) the holder has, within the previous 90 days:
 - (i) completed at least 2 hours of simulated flight time as co-pilot in an approved flight simulation training device; or
 - (ii) passed the flight test for the grant of the rating; or
 - (iii) exercised the privileges of the rating in an aircraft.
- (2) The holder of a cruise relief flight engineer type rating is authorised to act as a cruise relief flight engineer of an aircraft of a particular type only if:
 - (a) the holder has acted as a cruise relief flight engineer of an aircraft of that type, or in an approved flight simulator for the purpose, for a period of at least one hour in the previous 90 days; or
 - (b) the holder has successfully completed an operator proficiency check in an aircraft of that type or an approved flight simulator for the purpose in the previous 90 days; or
 - (c) both:
 - (i) the holder is successfully participating in an operator’s training and checking system for an operation in an aircraft of that type; and
 - (ii) the operator holds an approval under regulation 61.040 for the system for this subregulation and operations in aircraft of that type; or
 - (d) the holder is acting as a cruise relief flight engineer under the supervision of a flight engineer instructor.
- (3) Subregulation (4) applies if:
 - (a) the holder of a cruise relief type rating passed the flight test for the rating in:
 - (i) an aircraft model covered by the rating (the *first variant*); or
 - (ii) an approved flight simulator for the first variant; and
 - (b) differences training is required by a legislative instrument under regulation 61.055 for another aircraft model covered by the rating (the *second variant*).

- (4) The holder is authorised to exercise the privileges of the rating in the second variant only if:
- (a) within the previous 24 months, the holder has:
 - (i) exercised the privileges of the rating in the second variant; or
 - (ii) completed the differences training for the second variant; or
 - (iii) completed a recurrent training course for the second variant; or
 - (b) both:
 - (i) the holder is successfully participating in an operator's training and checking system for an operation in the second variant; and
 - (ii) the operator holds an approval under regulation 61.040 for the system for this subregulation and operations in the second variant.

61.845 Requirements for grant of cruise relief type ratings

- (1) This regulation applies to an applicant for a cruise relief type rating for an aircraft of a particular type if the applicant is not taken to meet the requirements for the grant of the rating under regulation 61.850.
- (2) The applicant must hold:
- (a) a commercial pilot licence, multi-crew pilot licence or air transport pilot licence; and
 - (b) the aircraft category rating for the aircraft category that includes aircraft of that type; and
 - (c) for a cruise relief flight engineer type rating for an aircraft type:
 - (i) the cruise relief co-pilot type rating for the aircraft type; or
 - (ii) the pilot type rating for the aircraft type.

Note: Subregulation (2) is satisfied, in relation to a required licence or rating, if the applicant holds a certificate of validation of an overseas flight crew licence, rating or endorsement that is equivalent to the required licence or rating: see item 36 of Part 2 of the Dictionary.

- (3) The applicant must also have:
- (a) completed an approved course of training for the rating that includes:
 - (i) at least one hour of flight training consisting of:
 - (A) dual flight in an aircraft of that type; or
 - (B) dual simulated flight in an approved flight simulator for the training; and
 - (ii) theory and technical training; and
 - (b) passed the flight test mentioned in the Part 61 Manual of Standards for the rating.

Note 1: For the requirements for an approved course of training, see Division 61.B.2.

Note 2: For the conduct of flight tests, see Division 61.B.4.

- (3A) If the applicant applies on or after 1 September 2015, the applicant must also have completed an approved course of training in multi-crew cooperation.

Part 61 Flight crew licensing

Subpart 61.L Aircraft ratings and endorsements for pilot licences

Division 61.L.6 Cruise relief type ratings

Regulation 61.850

- (4) For paragraph (3)(a) and subregulation (3A), the approved course of training must be conducted by:
- (a) a Part 142 operator that is authorised under Part 142 to conduct the course; or
 - (b) the holder of an approval under regulation 142.040 to conduct the training.

**61.850 Person taken to meet requirements for grant of cruise relief type rating—
new type rating**

A person is taken to meet the requirements for the grant of a cruise relief type rating (the *new type rating*) if:

- (a) the person holds a cruise relief type rating (the *old type rating*) covering 2 or more aircraft models that were, in accordance with a legislative instrument under regulation 61.055 (the *old legislative instrument*), variants of each other; and
- (b) as a result of a change to the legislative instrument, or the making of a new legislative instrument:
 - (i) the models are no longer variants of each other; and
 - (ii) one or more of the models is covered by the new type rating; and
- (c) one of the following applies:
 - (i) the person passed the flight test for the old type rating in:
 - (A) an aircraft model that is covered by the new type rating; or
 - (B) an approved flight simulator for an aircraft model covered by the new type rating;
 - (ii) differences training was not required by the old legislative instrument for the person to exercise the privileges of the old type rating in an aircraft covered by the new type rating;
 - (iii) both:
 - (A) differences training was required by the old legislative instrument for the person to exercise the privileges of the old type rating in an aircraft covered by the new type rating; and
 - (B) the person has completed the differences training.

Subpart 61.M—Instrument ratings

Division 61.M.1—Privileges and requirements for grant of instrument ratings

61.855 Privileges of instrument ratings

Subject to Subpart 61.E and regulations 61.860 to 61.880, the holder of an instrument rating is authorised to pilot an aircraft:

- (a) under the IFR; or
- (b) at night under the VFR.

Note: Subpart 61.E sets out certain limitations that apply to all pilot licences, and ratings and endorsements on pilot licences.

61.860 Limitations on exercise of privileges of instrument ratings—general

- (1) The holder of an instrument rating is authorised to conduct an instrument approach operation of a particular kind as pilot in command of an aircraft only if the aircraft is equipped for that kind of operation.
- (2) The holder of an instrument rating is authorised to pilot an aircraft in a single-pilot operation under the IFR only if the holder has:
 - (a) passed the flight test for the rating in a single-pilot aircraft; or
 - (b) completed an instrument proficiency check in a single-pilot aircraft.
- (3) The holder of an instrument rating is authorised to conduct a circling approach under the IFR on a flight only if:
 - (a) the holder passed the flight test for the rating within the previous 12 months, and the flight test included a circling approach; or
 - (b) the holder's most recent instrument proficiency check included a circling approach; or
 - (c) both:
 - (i) the holder is successfully participating in an operator's training and checking system for an operation that includes circling approaches; and
 - (ii) the operator holds an approval under regulation 61.040 for the system for this subregulation.
- (4) For paragraph (3)(b), an instrument proficiency check includes an operator proficiency check:
 - (a) that covers IFR operations; and
 - (b) that is conducted by a flight examiner who holds an instrument rating flight test endorsement.

Part 61 Flight crew licensing

Subpart 61.M Instrument ratings

Division 61.M.1 Privileges and requirements for grant of instrument ratings

Regulation 61.865

- (5) The holder of an instrument rating is authorised to conduct an instrument approach operation in an aircraft using a procedure of a particular kind only if the holder has:
 - (a) completed training in the conduct of instrument approach operations using the procedure; and
 - (b) demonstrated, to a person mentioned in subregulation (6), his or her competence in the conduct of instrument approach operations using the procedure.
- (6) For paragraph (5)(b), the persons are as follows:
 - (a) CASA;
 - (b) an examiner who is authorised to conduct an instrument approach operation using the same procedure;
 - (c) a person who holds an approval under regulation 61.040 to assess the holder's competence.

61.865 Limitations on exercise of privileges of instrument ratings—endorsements

- (1) The holder of an instrument rating is authorised to pilot an aircraft mentioned in column 2 of an item in Part 1 of table 61.890 under the IFR, or at night under the VFR, only if the holder also holds the endorsement mentioned in column 1 of the item.
- (2) The holder of an instrument rating is authorised to conduct an instrument approach operation mentioned in column 2 of an item in Part 2 of table 61.890 only if the holder also holds the endorsement mentioned in column 1 of the item.

61.870 Limitations on exercise of privileges of instrument ratings—recent experience: general

- (1) This regulation applies to the holder of an instrument rating subject to subregulation (1A).
- (1A) This regulation does not apply to the holder if:
 - (a) the holder has successfully completed an operator proficiency check that covers IFR operations within the previous 3 months; or
 - (b) both:
 - (i) the holder is successfully participating in an operator's training and checking system for an IFR operation; and
 - (ii) the operator holds an approval under regulation 61.040 for the system for this subregulation.
- (2) The holder is authorised to pilot an aircraft under the IFR only if the holder has conducted at least 3 instrument approach operations within the previous 90 days in an aircraft or an approved flight simulation training device for the purpose.
- (3) The holder is authorised to pilot an aircraft of a particular category under the IFR only if the holder has conducted at least one instrument approach operation

within the previous 90 days in an aircraft of the same category or an approved flight simulation training device for the purpose.

- (4) The holder is authorised to conduct a 2D instrument approach operation only if the holder has conducted a 2D instrument approach operation within the previous 90 days in an aircraft or an approved flight simulation training device for the purpose.
- (5) The holder is authorised to conduct a 3D instrument approach operation only if the holder has conducted a 3D instrument approach operation within the previous 90 days in an aircraft or an approved flight simulation training device for the purpose.
- (6) The holder is authorised to conduct an azimuth guidance operation only if the holder has conducted an azimuth guidance operation within the previous 90 days in an aircraft or an approved flight simulation training device for the purpose.
- (7) The holder is authorised to conduct a course deviation indicator operation only if the holder has conducted a course deviation indicator operation within the previous 90 days in an aircraft or an approved flight simulation training device for the purpose.

Note: Azimuth guidance operations and course deviation indicator operations are instrument approach operations: see the definitions of those terms in regulation 61.010.

61.875 Limitations on exercise of privileges of instrument ratings—recent experience: single pilot

- (1) The holder of an instrument rating is authorised to pilot an aircraft under the IFR in a single-pilot operation only if the holder has conducted a flight or simulated flight under the IFR in a single-pilot operation within the previous 6 months.
- (2) For subregulation (1), the flight or simulated flight must:
 - (a) have a duration of at least one hour; and
 - (b) include at least one instrument approach or simulated instrument approach.

61.880 Limitations on exercise of privileges of instrument ratings—instrument proficiency check

- (1) The holder of an instrument rating is authorised to exercise the privileges of the rating in an aircraft of a particular category only if the holder has a valid instrument proficiency check for the aircraft category.
- (2) However:
 - (a) the holder is authorised to exercise the privileges of the rating in a multi-engine aeroplane only if the holder has a valid instrument proficiency check for multi-engine aeroplanes; and
 - (b) the holder is authorised to exercise the privileges of the rating in a multi-engine helicopter only if the holder has a valid instrument proficiency check for multi-engine helicopters.

Regulation 61.880

- (3) Subject to subregulations (4) and (4B), for subregulations (1) and (2), the holder is taken to have a valid instrument proficiency check for the aircraft category, or for multi-engine aeroplanes or helicopters, during the following periods:
- (a) if the holder passes the flight test for the instrument rating in a relevant aircraft—the period from when the holder passes the flight test to the end of the 12th month after the month in which the holder passes the flight test;
 - (b) if:
 - (i) the holder passes the flight test for an instrument endorsement in a relevant aircraft; and
 - (ii) the flight test is conducted more than 6 months after the holder passes the flight test for the rating;the period from when the holder passes the flight test for the endorsement to the end of the 12th month after the month in which the holder passes the flight test for the endorsement;
 - (c) if the holder successfully completes an operator proficiency check that covers IFR operations in the relevant aircraft, and that is conducted by a flight examiner who holds an instrument rating flight test endorsement—the period from when the holder successfully completes the check to the end of the 12th month after the month in which the holder successfully completes the check;
 - (d) if:
 - (i) the holder is successfully participating in an operator’s training and checking system for an IFR operation in the relevant aircraft; and
 - (ii) the operator holds an approval under regulation 61.040 for the system for this subregulation and operations in the relevant aircraft;the period during which the holder is successfully participating in the system;
 - (e) if the holder successfully completes an instrument proficiency check for the relevant aircraft—the period from when the holder successfully completes the check to the end of the 12th month after the month in which the holder successfully completes the check;
 - (f) if:
 - (i) the holder is taken to have a valid instrument proficiency check under any of paragraphs (a) to (e) for the relevant aircraft (the **existing check**); and
 - (ii) within 3 months before the validity of the existing check expires, the holder successfully completes an instrument proficiency check for the relevant aircraft;the period from when the validity of the existing check expires to the end of the 12th month after the validity of the existing check expires.
- (4) If, at any time, the holder attempts, but does not successfully complete, an instrument proficiency check mentioned in subregulation (4A) (the **failed check**), the holder is no longer taken to have a valid instrument proficiency check for:
- (a) the aircraft category in which the holder attempted the failed check; or

- (b) multi-engine aircraft of the category in which the holder attempted the failed check.
- (4A) For subregulation (4), the failed check may be any of the following:
- (a) an instrument proficiency check for an aircraft category;
 - (b) an instrument proficiency check for multi-engine aeroplanes or helicopters;
 - (c) an instrument proficiency check for an aircraft type.
- (4B) If the holder is taken to have a valid instrument proficiency check for the relevant aircraft only because of the holder's participation in an operator's training and checking system, the check is taken to be valid only for operations conducted by the operator.
- (5) For paragraphs (3)(e) and (f), the holder successfully completes an instrument proficiency check for the relevant aircraft if:
- (a) CASA or a flight examiner:
 - (i) assesses the holder's competency to conduct operations under the IFR in a relevant aircraft as meeting the standards mentioned in the Part 61 Manual of Standards for an instrument proficiency check in the relevant aircraft; and
 - (ii) endorses the holder's licence document to the effect that the holder has completed the instrument proficiency check; and
 - (iii) includes in the endorsement the matters mentioned in subregulation (8); or
 - (b) a person mentioned in subregulation (7) assesses the holder as competent to conduct operations under the IFR in a relevant aircraft, and CASA or a flight examiner:
 - (i) conducts an oral assessment of the holder's knowledge of IFR operation procedures to the standards mentioned in the Part 61 Manual of Standards for an instrument proficiency check; and
 - (ii) endorses the holder's licence document to the effect that the holder has completed the instrument proficiency check; and
 - (iii) includes in the endorsement the matters mentioned in subregulation (8).
- (6) For paragraphs (3)(e) and (f), the instrument proficiency check must be conducted in a relevant aircraft or an approved flight simulation training device for the proficiency check.
- (7) For paragraph (5)(b), the person is the holder of an approval under regulation 61.040 to conduct the proficiency check.
- (8) For subparagraphs (5)(a)(iii) and (b)(iii), the matters are:
- (a) the date on which the instrument proficiency check is conducted; and
 - (b) the aircraft to which the instrument proficiency check relates.
- (9) In this regulation:
- relevant aircraft***, for an instrument proficiency check, means:

Part 61 Flight crew licensing

Subpart 61.M Instrument ratings

Division 61.M.1 Privileges and requirements for grant of instrument ratings

Regulation 61.885

- (a) if the instrument proficiency check is for an aircraft category—a single-engine or multi-engine aircraft of that category; or
- (b) if the instrument proficiency check is for multi-engine aeroplanes—a multi-engine aeroplane; or
- (c) if the instrument proficiency check is for multi-engine helicopters—a multi-engine helicopter.

61.885 Requirements for grant of instrument ratings

- (1) An applicant for an instrument rating must:
 - (a) hold a private pilot licence, commercial pilot licence or air transport pilot licence; and
 - (b) meet the requirements for the grant of:
 - (i) at least one instrument endorsement mentioned in column 1 of an item in Part 1 of table 61.890; and
 - (ii) at least one instrument endorsement mentioned in column 1 of an item in Part 2 of table 61.890.

Note 1: Paragraph (a) is satisfied if the applicant holds a certificate of validation of an overseas flight crew licence that is equivalent to a private pilot licence, commercial pilot licence or air transport pilot licence: see item 36 of Part 2 of the Dictionary.

Note 2: An application for a pilot licence mentioned in paragraph (a) and an instrument rating may be made at the same time: see subregulation 61.155(2).

- (2) The applicant must also have:
 - (a) passed the aeronautical knowledge examination for the instrument rating; and
 - (b) completed flight training for the instrument rating; and
 - (c) passed the flight test mentioned in the Part 61 Manual of Standards for the instrument rating and the aircraft category rating associated with the applicant's pilot licence; and
 - (d) met the aeronautical experience requirements mentioned in subregulation (5).

Note 1: For paragraph (a), for the conduct of aeronautical knowledge examinations, see Division 61.B.3.

Note 2: For paragraph (b), for the requirements for flight training, see Division 61.B.2.

Note 3: For paragraph (c), for the conduct of flight tests, see Division 61.B.4.

Note 4: For paragraph (d), for the determination of a person's flight time and other aeronautical experience, see Division 61.A.2.

- (3) For paragraph (2)(b), the flight training must have been conducted in an aircraft of the same category as the aircraft in which, or the aircraft represented by the flight simulation training device in which, the flight test is conducted.
- (4) For paragraph (2)(c), the flight test must be conducted in an aircraft unless the applicant has previously held:
 - (a) an instrument rating; or

- (b) an overseas rating that CASA is satisfied is equivalent to an instrument rating; or
 - (c) a qualification issued by the Australian Defence Force that CASA is satisfied is equivalent to an instrument rating.
- (5) For paragraph (2)(d), the applicant must have aeronautical experience that includes:
- (a) at least 50 hours of cross-country flight time as pilot in command; and
 - (b) at least 40 hours of instrument time, including:
 - (i) at least 10 hours of dual instrument time; and
 - (ii) either:
 - (A) if subregulation (6) applies—at least 10 hours of instrument flight time; or
 - (B) in any other case—at least 20 hours of instrument flight time.
- (6) This subregulation applies if any instrument ground time relied on by an applicant for paragraph (5)(b) is:
- (a) completed in an approved flight simulator for the purpose; and
 - (b) supervised by a pilot instructor who holds an instrument rating training endorsement.
- (7) For subregulation (5), the cross-country flight time and instrument flight time must have been conducted in an aircraft of the same category as the aircraft in which, or the aircraft represented by the flight simulation training device in which, the flight test is conducted.

61.887 Removal of instrument rating conditions about acting as pilot in command under IFR

- (1) This regulation applies to the holder of an instrument rating granted on the basis of regulation 202.272 or 202.274 if the rating is subject to the condition that the holder is not authorised to act as pilot in command under the IFR.
- (2) CASA must remove the condition, to the extent that it relates to a particular aircraft category or class, if:
- (a) the holder applies to CASA for the removal of the condition; and
 - (b) the holder meets the requirements under this Part for the grant of:
 - (i) an instrument rating; and
 - (ii) an instrument endorsement that would authorise the holder to pilot an aircraft of that category or class under the IFR.

Regulation 61.890

Division 61.M.2—Privileges and requirements for grant of instrument endorsements

61.890 Kinds of instrument endorsement

The kinds of instrument endorsement are set out in column 1 of table 61.890.

Table 61.890 Instrument endorsements			
Item	Column 1 Endorsement	Column 2 Activities authorised	Column 3 Requirements
<i>Part 1—Aircraft category/class endorsements</i>			
1	Single-engine aeroplane instrument endorsement	Pilot an aeroplane of the single-engine aeroplane class under the IFR or at night under the VFR	Single-engine aeroplane class rating or type rating for a type of single-engine aeroplane At least 10 hours of dual instrument time in an aeroplane or an approved flight simulation training device for the purpose At least 5 hours of aeronautical experience at night as pilot of an aeroplane or an approved flight simulation training device for the purpose, including at least one hour of dual flight and one hour of solo night circuits
2	Multi-engine aeroplane instrument endorsement	Pilot an aeroplane under the IFR or at night under the VFR	Multi-engine aeroplane class rating or type rating for a type of multi-engine aeroplane At least 10 hours of dual instrument time in a multi-engine aeroplane or an approved flight simulation training device for the purpose At least 5 hours of aeronautical experience at night as pilot of an aeroplane or an approved flight simulation training device for the purpose, including at least one hour of dual flight and one hour of solo night circuits
3	Single-engine helicopter instrument endorsement	Pilot a single-engine helicopter under the IFR or at night under the VFR	Single-engine helicopter class rating or type rating for a type of single-engine helicopter At least 10 hours of dual instrument time in a helicopter or an approved flight simulation training device for the purpose At least 5 hours of aeronautical experience at night as pilot of a helicopter or an approved flight simulation training device for the purpose, including at least 3 hours of dual flight and one hour of solo night circuits

Table 61.890 Instrument endorsements

Item	Column 1 Endorsement	Column 2 Activities authorised	Column 3 Requirements
4	Multi-engine helicopter instrument endorsement	Pilot a helicopter under the IFR or at night under the VFR	Type rating for a type of multi-engine helicopter At least 10 hours of dual instrument time in a multi-engine helicopter or an approved flight simulation training device for the purpose At least 5 hours of aeronautical experience at night as pilot of a helicopter or an approved flight simulation training device for the purpose, including at least 3 hours of dual flight and one hour of solo night circuits
5	Powered-lift aircraft instrument endorsement	Pilot a powered-lift aircraft under the IFR or at night under the VFR	Type rating for a type of powered-lift aircraft At least 10 hours of dual instrument time in a powered-lift aircraft or an approved flight simulation training device for the purpose At least 5 hours of aeronautical experience at night as pilot of a helicopter or powered-lift aircraft or an approved flight simulation training device for the purpose, including at least 3 hours of dual flight and one hour of solo night circuits
6	Gyroplane instrument endorsement	Pilot a gyroplane under the IFR or at night under the VFR	Gyroplane aircraft class rating or type rating for a type of gyroplane At least 10 hours of dual instrument flight time in a gyroplane At least 5 hours of aeronautical experience at night as pilot of a helicopter or gyroplane or an approved flight simulation training device for the purpose, including at least 3 hours of dual flight and one hour of solo night circuits
7	Airship instrument endorsement	Pilot an airship under the IFR or at night under the VFR	Airship class rating or type rating for a type of airship At least 10 hours of dual instrument time in an airship or an approved flight simulation training device for the purpose At least 5 hours of aeronautical experience at night as pilot of an airship or an approved flight simulation training device for the purpose, including at least 3 hours of dual flight and one hour of solo night circuits
<i>Part 2—Instrument approach endorsements</i>			
8	IAP 2D instrument endorsement	Conduct a 2D instrument approach operation	

Part 61 Flight crew licensing

Subpart 61.M Instrument ratings

Division 61.M.2 Privileges and requirements for grant of instrument endorsements

Regulation 61.895

Table 61.890 Instrument endorsements

Item	Column 1 Endorsement	Column 2 Activities authorised	Column 3 Requirements
9	IAP 3D instrument endorsement	Conduct a 3D instrument approach operation	IAP 2D instrument endorsement

61.895 Privileges of instrument endorsements

Subject to Subpart 61.E, Division 61.M.1 and regulation 61.900, the holder of an endorsement mentioned in column 1 of an item in table 61.890 is authorised to conduct the activity mentioned in column 2 of the item.

Note: Subpart 61.E sets out certain limitations that apply to all pilot licences, and ratings and endorsements on pilot licences.

61.900 Limitations on exercise of privileges of instrument endorsements

- (1) The holder of an endorsement mentioned in column 1 of an item in Part 2 of table 61.890 is authorised to conduct an instrument approach operation in IMC using a navigation system of a particular kind only if the holder has previously conducted:
 - (a) an instrument approach operation; or
 - (b) a simulated instrument approach operation in a flight simulation training device;using a navigation system of that kind.
- (2) The holder of an IAP 3D instrument endorsement is authorised to conduct a 3D instrument approach operation only if:
 - (a) the holder passed the flight test for the endorsement within the previous 12 months; or
 - (b) either:
 - (i) in a case in which the holder's most recent instrument proficiency check included a 3D instrument approach operation—during the check the holder demonstrated, to a person mentioned in subregulation (4), the holder's competence in the conduct of a 3D instrument approach operation; or
 - (ii) in any other case—the holder has, within the previous 15 months, demonstrated, to a person mentioned in subregulation (4), the holder's competence in the conduct of a 3D instrument approach operation; or
 - (c) both:
 - (i) the holder is successfully participating in an operator's training and checking system for an operation that includes 3D instrument approaches; and
 - (ii) the operator holds an approval under regulation 61.040 for the system for this subregulation.

- (3) For paragraph (2)(b), an instrument proficiency check includes an operator proficiency check:
- (a) that covers IFR operations; and
 - (b) that is conducted by a flight examiner who holds an instrument rating flight test endorsement.
- (4) For paragraph (2)(b), the persons are as follows:
- (a) CASA;
 - (b) an examiner who is authorised under this Part to conduct an instrument approach operation using the same procedure;
 - (c) a person who holds an approval under regulation 61.040 to assess the holder's competence.

61.905 Requirements for grant of instrument endorsements

- (1) An applicant for an endorsement mentioned in column 1 of an item in table 61.890 must hold:
- (a) an instrument rating; and
 - (b) the rating or endorsement (if any) mentioned in column 3 of the item.

Note: Subregulation (1) is satisfied, in relation to a required licence, rating or endorsement, if the applicant holds a certificate of validation of an overseas flight crew licence, rating or endorsement that is equivalent to the required licence, rating or endorsement: see item 36 of Part 2 of the Dictionary.

- (2) The applicant must also have:
- (a) completed flight training for the endorsement; and
 - (b) met the aeronautical experience requirements (if any) mentioned in column 3 of the item; and
 - (c) passed the flight test mentioned in the Part 61 Manual of Standards for the endorsement.

Note 1: For paragraph (a), for the requirements for flight training, see Division 61.B.2.

Note 2: For paragraph (b), for the determination of a person's flight time and other aeronautical experience, see Division 61.A.2.

Note 3: For paragraph (c), for the conduct of flight tests, see Division 61.B.4.

Subpart 61.N—Private instrument ratings

Division 61.N.1—Privileges and requirements for grant of private instrument ratings

61.910 Privileges of private instrument ratings

- (1) Subject to Subpart 61.E and regulations 61.915 to 61.925, the holder of a private instrument rating is authorised to pilot an aircraft mentioned in subregulation (2) under the IFR in a private operation in Australian territory.
- (2) For subregulation (1), the aircraft:
 - (a) must be certificated for single-pilot operation; and
 - (b) must have a maximum certificated take-off weight of not more than 5 700 kg.

61.915 Limitations on exercise of privileges of private instrument ratings—endorsements

- (1) The holder of a private instrument rating is authorised to pilot an aircraft mentioned in column 2 of an item in Part 1 of table 61.935 under the IFR only if the holder also holds the endorsement mentioned in column 1 of the item.
- (2) The holder of a private instrument rating is authorised to conduct an activity mentioned in column 2 of an item in Part 2, 3, 4 or 5 of table 61.935 only if the holder also holds the endorsement mentioned in column 1 of the item.
- (3) The holder of a private instrument rating is authorised to pilot an aircraft at night under the IFR only if the holder also holds a night private instrument endorsement.

61.920 Limitations on exercise of privileges of private instrument ratings—recent experience

- (1) The holder of a private instrument rating is authorised to conduct an instrument approach as pilot in command of an aircraft in IMC only if the holder has conducted an instrument approach of the same kind:
 - (a) within the previous 6 months; and
 - (b) in an aircraft of the same category or an approved flight simulation training device for the purpose.
- (2) The holder of a private instrument rating is authorised to pilot an aircraft under the IFR as pilot in command only if the holder has piloted an aircraft under the IFR within the previous 6 months.

61.925 Limitations on exercise of privileges of private instrument ratings—flight review

- (1) The holder of a private instrument rating is authorised to pilot an aircraft of a particular category, other than a multi-engine aeroplane or multi-engine helicopter, under the IFR only if the holder:
 - (a) has successfully completed a flight review for the rating in an aircraft of the same category or an approved flight simulator for the flight review within the previous 24 months; or
 - (b) has passed a flight test for the rating in an aircraft of the same category or an approved flight simulator for the flight test within the previous 24 months; or
 - (c) has passed a flight test for the grant of a private instrument endorsement in an aircraft of the same category or an approved flight simulator for the flight test:
 - (i) within the previous 24 months; but
 - (ii) more than 6 months after passing the flight test for the rating; or
 - (d) has successfully completed an instrument proficiency check in an aircraft of the same category within the previous 24 months.

 - (2) The holder of a private instrument rating is authorised to pilot a multi-engine aeroplane under the IFR only if the holder:
 - (a) has successfully completed a flight review for the rating in a multi-engine aeroplane or an approved flight simulator for the flight review within the previous 24 months; or
 - (b) has passed a flight test for the rating in a multi-engine aeroplane or an approved flight simulator for the flight test within the previous 24 months; or
 - (c) has passed a flight test for the grant of a private instrument endorsement in a multi-engine aeroplane or an approved flight simulator for the flight test:
 - (i) within the previous 24 months; but
 - (ii) more than 6 months after passing the flight test for the rating; or
 - (d) has successfully completed an instrument proficiency check in a multi-engine aeroplane within the previous 24 months.

 - (3) The holder of a private instrument rating is authorised to pilot a multi-engine helicopter under the IFR only if the holder:
 - (a) has successfully completed a flight review for the rating in a multi-engine helicopter or an approved flight simulator for the flight review within the previous 24 months; or
 - (b) has passed a flight test for the rating in a multi-engine helicopter or an approved flight simulator for the flight test within the previous 24 months; or
 - (c) has passed a flight test for the grant of a private instrument endorsement in a multi-engine helicopter or an approved flight simulator for the flight test:
 - (i) within the previous 24 months; but
 - (ii) more than 6 months after passing the flight test for the rating; or
-

Part 61 Flight crew licensing

Subpart 61.N Private instrument ratings

Division 61.N.1 Privileges and requirements for grant of private instrument ratings

Regulation 61.930

- (d) has successfully completed an instrument proficiency check in a multi-engine helicopter within the previous 24 months.

Note: For general rules in relation to flight reviews, see regulation 61.400.

61.930 Requirements for grant of private instrument ratings

- (1) An applicant for a private instrument rating must:
- (a) hold a private pilot licence or commercial pilot licence; and
 - (b) meet the requirements for the grant of at least:
 - (i) one endorsement mentioned in column 1 of an item in Part 1 of table 61.935; and
 - (ii) one endorsement mentioned in column 1 of an item in Part 2 of table 61.935.

Note: Paragraph (a) is satisfied if the applicant holds a certificate of validation of an overseas flight crew licence that is equivalent to a private pilot licence, commercial pilot licence or air transport pilot licence: see item 36 of Part 2 of the Dictionary.

- (2) The applicant must also have:
- (a) passed:
 - (i) the aeronautical knowledge examination for the instrument rating; or
 - (ii) a private instrument rating aeronautical knowledge examination set and conducted by:
 - (A) CASA; or
 - (B) a Part 141 or 142 operator that is authorised to conduct training for the grant of an instrument rating; and
 - (b) completed flight training for the private instrument rating; and
 - (c) passed the flight test mentioned in the Part 61 Manual of Standards for the private instrument rating; and
 - (d) completed at least 20 hours of instrument time, including at least 10 hours of dual instrument flight time.

Note 1: For subparagraph (a)(i), for the conduct of aeronautical knowledge examinations, see Division 61.B.3.

Note 2: For paragraph (b), for the requirements for flight training, see Division 61.B.2.

Note 3: For paragraph (c), for the conduct of flight tests, see Division 61.B.4.

Note 4: For paragraph (d), for the determination of a person's flight time and other aeronautical experience, see Division 61.A.2.

- (3) The aeronautical experience required by paragraph (2)(d) must have been completed:
- (a) while receiving instrument training conducted by a flight instructor who holds an instrument rating training endorsement; or
 - (b) while receiving training for a private pilot licence, commercial pilot licence or air transport pilot licence or a night VFR rating; or
 - (c) as a member of the Australian Defence Force.

- (4) The holder of an instrument rating is taken to meet the requirements for the grant of a private instrument rating.

Part 61 Flight crew licensing

Subpart 61.N Private instrument ratings

Division 61.N.2 Privileges and requirements for grant of private instrument endorsements

Regulation 61.935

Division 61.N.2—Privileges and requirements for grant of private instrument endorsements

61.935 Kinds of private instrument endorsement

The kinds of private instrument endorsement are set out in column 1 of table 61.935.

Table 61.935 Private instrument endorsements

Item	Column 1 Endorsement	Column 2 Activities authorised	Column 3 Requirements
<i>Part 1—Aircraft category/class endorsements</i>			
1	Single-engine aeroplane private instrument endorsement	Pilot an aeroplane of the single-engine aeroplane class under the IFR	Single-engine aeroplane class rating At least 10 hours of dual instrument flight time in an aeroplane
2	Multi-engine aeroplane private instrument endorsement	Pilot an aeroplane under the IFR	Multi-engine aeroplane class rating At least 10 hours of dual instrument flight time in a multi-engine aeroplane
3	Single-engine helicopter private instrument endorsement	Pilot a single-engine helicopter under the IFR	Single-engine helicopter class rating At least 10 hours of dual instrument flight time in a helicopter
4	Multi-engine helicopter private instrument endorsement	Pilot a helicopter under the IFR	Multi-engine helicopter class rating or multi-engine helicopter type rating At least 10 hours of dual instrument flight time in a multi-engine helicopter
5	Powered-lift aircraft private instrument endorsement	Pilot a powered-lift aircraft under the IFR	Powered-lift aircraft category rating At least 10 hours of dual instrument flight time in a powered-lift aircraft
6	Gyroplane private instrument endorsement	Pilot a gyroplane under the IFR	Gyroplane category rating At least 10 hours of dual instrument flight time in a gyroplane

Table 61.935 Private instrument endorsements

Item	Column 1 Endorsement	Column 2 Activities authorised	Column 3 Requirements
7	Airship private instrument endorsement	Pilot an airship under the IFR	Airship category rating At least 10 hours of dual instrument flight time in an airship
<i>Part 2—Navigation endorsements</i>			
8	Navigation – NDB private instrument endorsement	Conduct en-route navigation, including holding, under the IFR using a non-directional beacon navigation system	
9	Navigation – VOR/LLZ private instrument endorsement	Conduct en-route navigation, including holding, under the IFR using a VHF omni-range/localiser navigation system	
10	Navigation – GNSS private instrument endorsement	Conduct en-route navigation, including holding, under the IFR using a global navigation satellite system	
<i>Part 3—Departure endorsements</i>			
11	Departure – single-engine aircraft private instrument endorsement	Conduct a take-off and departure, other than a standard instrument departure, under the IFR in a single-engine aircraft	Any of the following: (a) single-engine aeroplane private instrument endorsement; (b) single-engine helicopter private instrument endorsement; (c) gyroplane private instrument endorsement
12	Departure – multi-engine aeroplane private instrument endorsement	Conduct a take-off and departure, other than a standard instrument departure, under the IFR in a multi-engine aeroplane	Multi-engine aeroplane private instrument endorsement
13	Departure – multi-engine helicopter private instrument endorsement	Conduct a take-off and departure, other than a standard instrument departure, under the IFR in a multi-engine helicopter	Multi-engine helicopter private instrument endorsement
14	Departure – powered-lift aircraft private instrument endorsement	Conduct a take-off and departure, other than a standard instrument departure, under the IFR in a powered-lift aircraft	Powered-lift aircraft private instrument endorsement

Part 61 Flight crew licensing

Subpart 61.N Private instrument ratings

Division 61.N.2 Privileges and requirements for grant of private instrument endorsements

Regulation 61.935

Table 61.935 Private instrument endorsements

Item	Column 1 Endorsement	Column 2 Activities authorised	Column 3 Requirements
15	Departure – airship private instrument endorsement	Conduct a take-off and departure, other than a standard instrument departure, under the IFR in an airship	Airship private instrument endorsement
16	Standard instrument departure private instrument endorsement	Conduct a take-off and departure, including a standard instrument departure, under the IFR	Any of the endorsements mentioned in items 11 to 15
<i>Part 4—Approach/arrival endorsements</i>			
17	STAR private instrument endorsement	Conduct an arrival under the IFR using a procedure published in the AIP and a navigation system for which the pilot holds an endorsement mentioned in column 1 of an item in Part 2 of this table	
18	Approach – NDB private instrument endorsement	Conduct an instrument approach operation under the IFR using a non-directional beacon navigation system	
19	Approach – VOR/LLZ private instrument endorsement	Conduct an instrument approach operation under the IFR using a VHF omni-range/localiser navigation system	
20	Approach – DME or GNSS arrival procedure private instrument endorsement	Conduct an instrument approach operation under the IFR using distance measuring equipment or a global navigation satellite system	
21	Approach – RNP APCH-2D private instrument endorsement	Conduct a required navigational performance instrument approach operation without vertical guidance using: (a) a global navigation satellite system; or (b) another kind of area navigation-based system	Navigation – GNSS private instrument endorsement
22	Approach – RNP APCH-3D private instrument endorsement	Conduct a required navigational performance instrument approach operation using barometric-aided vertical guidance	Navigation – GNSS private instrument endorsement Approach – RNP APCH-2D private instrument endorsement

Table 61.935 Private instrument endorsements

Item	Column 1 Endorsement	Column 2 Activities authorised	Column 3 Requirements
23	Approach – ILS private instrument endorsement	Conduct an instrument approach operation, using: (a) an instrument landing system; or (b) a microwave landing system; or (c) a global navigation satellite system with ground-based augmentation	
<i>Part 5—Approach/arrival endorsements—category specific</i>			
24	Approach and landing – multi-engine aeroplane private instrument endorsement	Conduct an instrument approach operation under the IFR in a multi-engine aeroplane using a navigation system for which the pilot holds an instrument approach endorsement	Multi-engine aeroplane private instrument endorsement Any of the endorsements mentioned in items 18 to 23
25	Approach and landing – multi-engine helicopter private instrument endorsement	Conduct an instrument approach operation under the IFR in a multi-engine helicopter using a navigation system for which the pilot holds an instrument approach endorsement	Multi-engine helicopter private instrument endorsement Any of the endorsements mentioned in items 18 to 23
<i>Part 6—Night endorsement</i>			
26	Night private instrument endorsement (category specific)	Pilot an aircraft of the specified category under the IFR at night	At least 10 hours of aeronautical experience at night in an aircraft or an approved flight simulation training device for the purpose, including at least: (a) 3 hours of dual cross-country flight time at night; and (b) 5 hours of flight time at night in an aircraft of the same category; and (c) 1 hour of solo night circuits

61.940 Privileges of private instrument endorsements

- (1) Subject to Subpart 61.E, Division 61.N.1 and regulations 61.942 and 61.945, the holder of an endorsement mentioned in column 1 of an item in table 61.935 is authorised to conduct the activity mentioned in column 2 of the item.

Part 61 Flight crew licensing

Subpart 61.N Private instrument ratings

Division 61.N.2 Privileges and requirements for grant of private instrument endorsements

Regulation 61.942

Note: Subpart 61.E sets out certain limitations that apply to all pilot licences, and ratings and endorsements on pilot licences.

- (2) For each endorsement mentioned in column 1 of an item in Part 3 of table 61.935, the privileges include conducting, under the IFR, a climb to the published lowest safe altitude for the first route segment of the flight.

Note: For the definition of *published lowest safe altitude*, see regulation 61.010.

61.942 Limitations on exercise of privileges of private instrument endorsements—visibility and cloud

The holder of an endorsement mentioned in column 1 of an item in Part 1, 2 or 6 of table 61.935 is authorised to conduct the activity authorised in column 2 of the item below the published lowest safe altitude only if:

- (a) visibility is at least 5 000 m; and
- (b) the aircraft is clear of cloud.

61.945 Limitations on exercise of privileges of private instrument endorsements

- (1) The holder of an endorsement mentioned in column 1 of an item in Part 2 of table 61.935 is authorised to conduct an instrument approach operation in IMC using a navigation system of a particular kind only if the holder has previously conducted:
- (a) an instrument approach operation in an aircraft; or
 - (b) a simulated instrument approach operation in a flight simulation training device;
- using a navigation system of that kind.
- (2) The holder of an endorsement mentioned in column 1 of an item in Part 4 of table 61.935 is authorised to conduct an instrument approach operation under the IFR in a multi-engine aeroplane only if the holder also holds an approach and landing – multi-engine aeroplane private instrument endorsement.
- (3) The holder of an endorsement mentioned in column 1 of an item in Part 4 of table 61.935 is authorised to conduct an instrument approach operation under the IFR in a multi-engine helicopter only if the holder also holds an approach and landing – multi-engine helicopter private instrument endorsement.

61.950 Requirements for grant of private instrument endorsements

- (1) An applicant for an endorsement mentioned in column 1 of an item in table 61.935 must hold:
- (a) a private instrument rating; and
 - (b) each rating or endorsement (if any) mentioned in column 3 of the item.

Note: Subregulation (1) is satisfied, in relation to a required rating or endorsement, if the applicant holds a certificate of validation of an overseas flight crew licence, rating or endorsement that is equivalent to the required rating or endorsement: see item 36 of Part 2 of the Dictionary.

- (2) The applicant must also have:
- (a) completed flight training for the endorsement; and
 - (b) met the aeronautical experience requirements (if any) mentioned in column 3 of the item; and
 - (c) passed the flight test mentioned in the Part 61 Manual of Standards for the endorsement.

Note 1: For paragraph (a), for the requirements for flight training, see Division 61.B.2.

Note 2: For paragraph (b), for the determination of a person's flight time and other aeronautical experience, see Division 61.A.2.

Note 3: For paragraph (c), for the conduct of flight tests, see Division 61.B.4.

- (3) A person who holds a private instrument rating and an instrument endorsement is taken to meet the requirements for the grant of the private instrument endorsement (if any) that is equivalent to the instrument endorsement.

Subpart 61.O—Night VFR ratings

Division 61.O.1—Privileges and requirements for grant of night VFR ratings

61.955 Privileges of night VFR ratings

Subject to Subpart 61.E and regulations 61.960 to 61.970, the holder of a pilot licence and a night VFR rating is authorised to pilot an aircraft at night under the VFR other than in:

- (a) an operation using a night vision imaging system; or
- (b) a night aerial application operation below 500 ft AGL.

Note: Subpart 61.E sets out certain limitations that apply to all pilot licences, and ratings and endorsements on pilot licences.

61.960 Limitations on exercise of privileges of night VFR ratings—endorsements

The holder of a night VFR rating is authorised to conduct an activity mentioned in column 2 of an item in table 61.980 only if the holder also holds the endorsement mentioned in column 1 of the item.

61.965 Limitations on exercise of privileges of night VFR ratings—recent experience

The holder of a night VFR rating is authorised to exercise the privileges of the rating in an aircraft of a particular category only if the holder has, within the previous 6 months:

- (a) conducted:
 - (i) at least one night take-off; and
 - (ii) at least one night landing;in an aircraft of that category while controlling the aircraft; or
- (b) been assessed as competent to conduct a flight at night in an aircraft of that category by a flight instructor who holds a night VFR training endorsement.

Note: See also regulation 61.395 for recent experience requirements for certain flight activities involving the carriage of passengers.

61.970 Limitations on exercise of privileges of night VFR ratings—flight review

- (1) The holder of a night VFR rating is authorised to pilot an aircraft of a particular category, other than a multi-engine aeroplane, at night under the VFR only if:
 - (a) the holder has successfully completed a flight review for the rating in an aircraft of the same category or an approved flight simulator for the flight review within the previous 24 months; or

Regulation 61.975

- (b) the holder has passed a flight test for the rating in an aircraft of the same category or an approved flight simulator for the flight test within the previous 24 months; or
 - (c) the holder has passed a flight test for the grant of a night VFR endorsement in an aircraft of the same category or an approved flight simulator for the flight test:
 - (i) within the previous 24 months; but
 - (ii) more than 6 months after passing the flight test for the rating; or
 - (d) the holder has successfully completed an operator proficiency check that covers night VFR operations in an aircraft of the same category within the previous 24 months; or
 - (e) both:
 - (i) the holder has, within the previous 24 months, successfully participated in an operator's training and checking system for an operation at night in an aircraft of the same category; and
 - (ii) the operator holds an approval under regulation 61.040 for the system for this subregulation and operations in aircraft of that category.
- (2) The holder of a night VFR rating is authorised to pilot a multi-engine aeroplane at night under the VFR only if:
- (a) the holder has successfully completed a flight review for the rating in a multi-engine aeroplane or an approved flight simulator for the flight review within the previous 24 months; or
 - (b) the holder has passed a flight test for the rating in a multi-engine aeroplane or an approved flight simulator for the flight test within the previous 24 months; or
 - (c) the holder has passed a flight test for the grant of a night VFR endorsement in a multi-engine aeroplane or an approved flight simulator for the flight test:
 - (i) within the previous 24 months; but
 - (ii) more than 6 months after passing the flight test for the rating; or
 - (d) the holder has successfully completed an operator proficiency check that covers night VFR operations in a multi-engine aeroplane within the previous 24 months; or
 - (e) both:
 - (i) the holder has, within the previous 24 months, successfully participated in an operator's training and checking system for an operation at night in a multi-engine aeroplane; and
 - (ii) the operator holds an approval under regulation 61.040 for the system for this subregulation.

Note: For general rules in relation to flight reviews, see regulation 61.400.

61.975 Requirements for grant of night VFR ratings

- (1) An applicant for a night VFR rating must:

Part 61 Flight crew licensing

Subpart 61.O Night VFR ratings

Division 61.O.1 Privileges and requirements for grant of night VFR ratings

Regulation 61.975

- (a) hold a private pilot licence, commercial pilot licence or air transport pilot licence; and
- (b) meet the requirements for the grant of at least one endorsement mentioned in column 1 of an item in table 61.980.

Note: Paragraph (a) is satisfied if the applicant holds a certificate of validation of an overseas flight crew licence that is equivalent to a private pilot licence, commercial pilot licence or air transport pilot licence: see item 36 of Part 2 of the Dictionary.

(2) The applicant must also have:

- (a) as a pilot, at least 10 hours of aeronautical experience at night in an aircraft or an approved flight simulation training device for the purpose, including at least 5 hours of dual cross-country flight time at night under the VFR in an aircraft; and
- (b) passed the flight test mentioned in the Part 61 Manual of Standards for the night VFR rating.

Note 1: For paragraph (a), for the determination of a person's flight time and other aeronautical experience, see Division 61.A.2.

Note 2: For paragraph (b), for the conduct of flight tests, see Division 61.B.4.

- (3) The dual cross-country flight time required by paragraph (2)(a) must comprise at least 2 flights, each of which must include at least one landing at an aerodrome, other than the aerodrome from which the flight began, that is remote from extensive ground lighting.

Division 61.O.2—Privileges and requirements for grant of night VFR endorsements

61.980 Kinds of night VFR endorsement

The kinds of night VFR endorsement are set out in column 1 of table 61.980.

Table 61.980 Night VFR endorsements

Item	Column 1 Endorsement	Column 2 Activities authorised	Column 3 Requirements
1	Single-engine aeroplane night VFR endorsement	Pilot an aeroplane of the single-engine aeroplane class at night under the VFR	At least 5 hours of aeronautical experience at night as pilot of an aeroplane or an approved flight simulation training device for the purpose, including at least one hour of dual flight and one hour of solo night circuits At least 3 hours of dual instrument time
2	Multi-engine aeroplane night VFR endorsement	Pilot an aeroplane at night under the VFR	At least 5 hours of aeronautical experience at night as pilot of a multi-engine aeroplane or an approved flight simulation training device for the purpose, including at least one hour of dual flight and one hour of solo night circuits At least 3 hours of dual instrument time
3	Helicopter night VFR endorsement	Pilot a helicopter at night under the VFR	At least 5 hours of aeronautical experience at night as pilot of a helicopter or an approved flight simulation training device for the purpose, including at least 3 hours of dual flight and one hour of solo night circuits At least 3 hours of dual instrument time in a helicopter or approved flight simulation training device for the purpose

Part 61 Flight crew licensing

Subpart 61.O Night VFR ratings

Division 61.O.2 Privileges and requirements for grant of night VFR endorsements

Regulation 61.985

Table 61.980 Night VFR endorsements

Item	Column 1 Endorsement	Column 2 Activities authorised	Column 3 Requirements
4	Powered-lift aircraft night VFR endorsement	Pilot a powered-lift aircraft at night under the VFR	At least 5 hours of aeronautical experience at night as pilot of a helicopter or powered-lift aircraft or an approved flight simulation training device for the purpose, including at least 3 hours of dual flight and one hour of solo night circuits At least 3 hours of dual instrument time
5	Gyroplane night VFR endorsement	Pilot a gyroplane at night under the VFR	At least 5 hours of aeronautical experience at night as pilot of a helicopter or gyroplane or an approved flight simulation training device for the purpose, including at least 3 hours of dual flight and one hour of solo night circuits At least 3 hours of dual instrument time
6	Airship night VFR endorsement	Pilot an airship at night under the VFR	At least 5 hours of aeronautical experience at night as pilot of an airship or an approved flight simulation training device for the purpose, including at least 3 hours of dual flight and one hour of solo night circuits

61.985 Privileges of night VFR endorsements

Subject to Subpart 61.E and Division 61.O.1, the holder of an endorsement mentioned in column 1 of an item in table 61.980 is authorised to conduct the activity mentioned in column 2 of the item.

Note: Subpart 61.E sets out certain limitations that apply to all pilot licences, and ratings and endorsements on pilot licences.

61.990 Requirements for grant of night VFR endorsements

- (1) An applicant for an endorsement mentioned in column 1 of an item in table 61.980 must hold a night VFR rating.

Note: Subregulation (1) is satisfied, in relation to a required licence, rating or endorsement, if the applicant holds a certificate of validation of an overseas flight crew licence, rating or endorsement that is equivalent to the required licence, rating or endorsement: see item 36 of Part 2 of the Dictionary.

- (2) The applicant must also have:
- (a) completed flight training for the endorsement; and
 - (b) met the aeronautical experience requirements mentioned in column 3 of the item; and
 - (c) passed the flight test mentioned in the Part 61 Manual of Standards for the endorsement.

Note 1: For paragraph (a), for the requirements for flight training, see Division 61.B.2.

Note 2: For paragraph (b), for the determination of a person's flight time and other aeronautical experience, see Division 61.A.2.

Subpart 61.P—Night vision imaging system ratings

Division 61.P.1—Privileges and requirements for grant of night vision imaging system ratings

61.995 Privileges of night vision imaging system ratings

Subject to Subpart 61.E and regulations 61.1000 to 61.1015, the holder of a pilot licence and a night vision imaging system rating is authorised to pilot a helicopter using night vision goggles.

Note: Subpart 61.E sets out certain limitations that apply to all pilot licences, and ratings and endorsements on pilot licences.

61.1000 Limitations on exercise of privileges of night vision imaging system ratings—general

- (1) The holder of a night vision imaging system rating is authorised to pilot a helicopter using night vision goggles only if the holder:
 - (a) has successfully completed an operator proficiency check that covers operations at night using night vision goggles in a helicopter of the same type; or
 - (b) has a valid night vision imaging system proficiency check under regulation 61.1015 conducted in:
 - (i) a helicopter of the same type; or
 - (ii) an approved flight simulation training device for the purpose of the proficiency check and the type of helicopter; or
 - (c) has passed the flight test for the night vision imaging system rating in a helicopter of the same type; or
 - (d) has been assessed, by a flight instructor who holds a night vision imaging system training endorsement, as competent to pilot a helicopter of the same type using night vision goggles during a dual flight with the instructor in such a helicopter.
- (2) The holder of a night vision imaging system rating is authorised to pilot a helicopter using night vision goggles only if the helicopter is equipped for operations using night vision goggles.

61.1005 Limitations on exercise of privileges of night vision imaging system ratings—endorsements

The holder of a night vision imaging system rating is authorised to conduct an activity mentioned in column 2 of an item in table 61.1025 only if the holder also holds the endorsement mentioned in column 1 of the item.

61.1010 Limitations on exercise of privileges of night vision imaging system ratings—recent experience

The holder of a night vision imaging system rating is authorised to pilot a helicopter using night vision goggles only if:

- (a) the holder has:
 - (i) completed at least 3 hours of flight time at night under the VFR using night vision goggles within the previous 6 months; and
 - (ii) conducted at least 3 take-offs and at least 3 landings at night using night vision goggles within the previous 6 months; or
- (b) the holder has, within the previous 6 months, become authorised to pilot any type of helicopter using night vision goggles under subregulation 61.1000(1); or
- (d) both:
 - (i) the holder is successfully participating in an operator's training and checking system for an operation at night using night vision goggles; and
 - (ii) the operator holds an approval under regulation 61.040 for the system for this subregulation.

61.1015 Limitations on exercise of privileges of night vision imaging system ratings—night vision imaging system proficiency check

- (1) The holder of a night vision imaging system rating is authorised to exercise the privileges of the rating only if the holder has a valid night vision imaging system proficiency check.
- (2) For subregulation (1), the holder is taken to have a valid night vision imaging system proficiency check during the following periods:
 - (a) the period from when the holder passes the flight test for the rating to the end of the 12th month after the month in which the holder passes the flight test;
 - (b) if:
 - (i) the holder passes the flight test for a night vision imaging system endorsement; and
 - (ii) the flight test is conducted more than 6 months after the holder passes the flight test for the rating;the period from when the holder passes the flight test for the endorsement to the end of the 12th month after the month in which the holder passes the flight test for the endorsement;
 - (c) if the holder successfully completes an operator proficiency check that covers operations under the rating and that is conducted by a flight examiner who holds an night vision imaging system rating flight test endorsement—the period from when the holder successfully completes the check to the end of the 12th month after the month in which the holder successfully completes the check;
 - (d) if:

Part 61 Flight crew licensing

Subpart 61.P Night vision imaging system ratings

Division 61.P.1 Privileges and requirements for grant of night vision imaging system ratings

Regulation 61.1020

- (i) the holder is successfully participating in an operator's training and checking system for an operation under the rating; and
- (ii) the operator holds an approval under regulation 61.040 for the system for this subregulation;
the period during which the holder is successfully participating in the system;
- (e) if the holder successfully completes a night vision imaging system proficiency check—the period from when the holder successfully completes the check to the end of the 12th month after the month in which the holder successfully completes the check;
- (f) if:
 - (i) the holder is taken to have a valid night vision imaging system proficiency check under any of paragraphs (a) to (e) (the *existing check*); and
 - (ii) within 3 months before the validity of the existing check expires, the holder successfully completes a night vision imaging system proficiency check;
the period from when the validity of the existing check expires to the end of the 12th month after the validity of the existing check expires.
- (3) However, if, at any time, the holder attempts, but does not successfully complete, a night vision imaging system proficiency check, the holder is no longer taken to have a valid night vision imaging system proficiency check.
- (4) For paragraphs (2)(e) and (f), the holder successfully completes a night vision imaging system proficiency check if:
 - (a) the night vision imaging system proficiency check is conducted in a helicopter or an approved flight simulation training device for the proficiency check; and
 - (b) a person mentioned in subregulation (5) assesses the holder's competency to pilot a helicopter using a night vision imaging system as meeting the standards mentioned in the Part 61 Manual of Standards for each night vision imaging system endorsement that the holder holds; and
 - (c) the person endorses the holder's licence document to the effect that the holder has completed the night vision imaging system proficiency check on the date stated.
- (5) For paragraph (4)(b), the persons are as follows:
 - (a) CASA;
 - (b) a flight examiner;
 - (c) the holder of an approval under regulation 61.040 to conduct the proficiency check.

61.1020 Requirements for grant of night vision imaging system ratings

An applicant for a night vision imaging system rating must:

- (a) hold a commercial pilot licence or air transport pilot licence; and

- (b) meet the requirements for the grant of at least one night vision imaging system endorsement.

Note: Paragraph (a) is satisfied if the applicant holds a certificate of validation of an overseas flight crew licence that is equivalent to a commercial pilot licence or air transport pilot licence: see item 36 of Part 2 of the Dictionary.

Part 61 Flight crew licensing

Subpart 61.P Night vision imaging system ratings

Division 61.P.2 Privileges and requirements for grant of night vision imaging system endorsements

Regulation 61.1025

Division 61.P.2—Privileges and requirements for grant of night vision imaging system endorsements

61.1025 Kinds of night vision imaging system endorsement

The kinds of night vision imaging system endorsement are set out in column 1 of table 61.1025.

Table 61.1025 Night vision imaging system endorsements

Item	Column 1 Endorsement	Column 2 Activities authorised	Column 3 Requirements
1	Grade 1 night vision imaging system endorsement	Pilot a helicopter using night vision goggles	Helicopter category rating Single-engine helicopter instrument endorsement or multi-engine helicopter instrument endorsement At least 250 hours of flight time in a helicopter At least 5 hours of dual flight using night vision goggles in a helicopter At least 20 hours of aeronautical experience at night as pilot of a helicopter or an approved flight simulation training device for the purpose, without using night vision goggles, of which at least 10 hours must be completed as flight time At least 20 hours of instrument time including 5 hours of dual instrument flight time in a helicopter

Table 61.1025 Night vision imaging system endorsements

Item	Column 1 Endorsement	Column 2 Activities authorised	Column 3 Requirements
2	Grade 2 night vision imaging system endorsement	Pilot a helicopter using night vision goggles, other than during an IFR flight	Helicopter category rating Helicopter night VFR endorsement At least 250 hours of flight time in a helicopter At least 5 hours of dual flight using night vision goggles in a helicopter At least 20 hours of aeronautical experience at night as pilot of a helicopter or an approved flight simulation training device for the purpose, without using night vision goggles, of which at least 10 hours must be completed as flight time At least 20 hours of instrument time including 5 hours of dual instrument flight time in a helicopter

61.1030 Privileges of night vision imaging system endorsements

Subject to Subpart 61.E and Division 61.P.1, the holder of an endorsement mentioned in column 1 of an item in table 61.1025 is authorised to conduct the activity mentioned in column 2 of the item.

Note: Subpart 61.E sets out certain limitations that apply to all pilot licences, and ratings and endorsements on pilot licences.

61.1035 Requirements for grant of night vision imaging system endorsements

(1) An applicant for an endorsement mentioned in column 1 of an item in table 61.1025 must hold:

- (a) a night vision imaging system rating; and
- (b) each rating or endorsement mentioned in column 3 of the item.

Note: Subregulation (1) is satisfied, in relation to a required rating or endorsement, if the applicant holds a certificate of validation of an overseas flight crew licence, rating or endorsement that is equivalent to the required rating or endorsement: see item 36 of Part 2 of the Dictionary.

(2) The applicant must also have:

- (a) completed flight training for the endorsement, including the training (if any) mentioned in column 3 of the item, in accordance with subregulation (3); and
- (b) met the aeronautical experience requirements mentioned in column 3 of the item; and

Part 61 Flight crew licensing

Subpart 61.P Night vision imaging system ratings

Division 61.P.2 Privileges and requirements for grant of night vision imaging system endorsements

Regulation 61.1035

- (c) passed the flight test mentioned in the Part 61 Manual of Standards for the endorsement; and
- (d) before starting the 5 hours of dual flight using night vision goggles mentioned in column 3 of the item—complied with subregulation (4).

Note 1: For paragraph (a), for the requirements for flight training, see Division 61.B.2.

Note 2: For paragraph (b), for the determination of a person's flight time and other aeronautical experience, see Division 61.A.2.

Note 3: For paragraph (c), for the conduct of flight tests, see Division 61.B.4.

- (3) For paragraph (2)(a), the flight training must be conducted by a Part 141 or 142 operator.
- (4) For paragraph (2)(d), the applicant must:
 - (a) hold:
 - (i) a commercial pilot licence or air transport pilot licence; and
 - (ii) each rating or endorsement mentioned in column 3 of the item; and
 - (iii) the class or type rating that covers the helicopter in which the training is to take place; and
 - (iv) each flight activity endorsement that covers an activity (if any) that is to be covered by the training; and
 - (b) have completed:
 - (i) the 250 hours of flight time mentioned in column 3 of the item; and
 - (ii) at least 10 hours of the flight time at night mentioned in column 3 of the item.

Subpart 61.Q—Low-level ratings

Division 61.Q.1—Privileges and requirements for grant of low-level ratings

61.1040 Privileges of low-level ratings

Subject to Subpart 61.E and regulations 61.1045 to 61.1060, the holder of a pilot licence with a low-level rating is authorised to conduct low-level operations.

Note: Subpart 61.E sets out certain limitations that apply to all pilot licences, and ratings and endorsements on pilot licences.

61.1045 Limitations on exercise of privileges of low-level ratings—general

The holder of a low-level rating is authorised to conduct a low-level operation in an area only if, before conducting the operation, the holder conducts a risk assessment of the area.

61.1050 Limitations on exercise of privileges of low-level ratings—endorsements

The holder of a low-level rating is authorised to conduct an activity mentioned in column 2 of an item in table 61.1075 in the exercise of the privileges of the rating only if the holder also holds the endorsement mentioned in column 1 of the item.

61.1055 Limitations on exercise of privileges of low-level ratings—recent experience

- (1) The holder of a low-level rating is authorised to exercise the privileges of the rating only if the holder has, within the previous 6 months:
 - (a) completed at least 2 hours of low-level operations; or
 - (b) been assessed as competent to conduct low-level operations by a flight instructor who holds a low-level training endorsement.
- (2) The holder is taken to meet the requirements of subregulation (1) if the holder:
 - (a) has successfully completed an operator proficiency check in low-level operations within the previous 6 months; or
 - (b) has successfully completed a flight review for the rating within the previous 6 months.

61.1060 Limitations on exercise of privileges of low-level ratings—flight review

- (1) The holder of a low-level rating is authorised to exercise the privileges of the rating only if the holder has, within the previous 12 months, successfully completed a flight review for the rating.
 - (2) The holder is taken to meet the requirements of subregulation (1) if:
-

Part 61 Flight crew licensing

Subpart 61.Q Low-level ratings

Division 61.Q.1 Privileges and requirements for grant of low-level ratings

Regulation 61.1070

- (a) the holder has passed a flight test for the rating within the previous 12 months; or
- (b) the holder has passed a flight test for the grant of a low-level endorsement:
 - (i) within the previous 12 months; but
 - (ii) more than 6 months after passing the flight test for the rating; or
- (c) the holder has successfully completed an aerial application proficiency check under regulation 61.1110 within the previous 12 months; or
- (d) the holder has successfully completed an operator proficiency check that covers:
 - (i) operations under the rating; or
 - (ii) operations under the aerial application rating;within the previous 12 months; or
- (e) both:
 - (i) the holder is successfully participating in an operator's training and checking system for an operation under the rating; and
 - (ii) the operator holds an approval under regulation 61.040 for the system for this subregulation.

Note: For general rules in relation to flight reviews, see regulation 61.400.

61.1070 Requirements for grant of low-level ratings

- (1) An applicant for a low-level rating must:
 - (a) hold a private pilot licence, commercial pilot licence or air transport pilot licence; and
 - (b) meet the requirements for the grant of at least one endorsement mentioned in Part 1 of table 61.1075; and
 - (c) have passed the flight test mentioned in the Part 61 Manual of Standards for the low-level rating.

Note 1: For paragraph (a), paragraph (a) is satisfied if the applicant holds a certificate of validation of an overseas flight crew licence that is equivalent to a private pilot licence, commercial pilot licence or air transport pilot licence: see item 36 of Part 2 of the Dictionary.

Note 2: For paragraph (b), for the conduct of flight tests, see Division 61.B.4.

- (2) Despite paragraph 61.245(1)(a), the flight test must be conducted in an aircraft.
- (3) The holder of an aerial application rating is taken to meet the requirements for the grant of, and to have applied for, a low-level rating.

Division 61.Q.2—Privileges and requirements for grant of low-level endorsements

61.1075 Kinds of low-level endorsement

The kinds of low-level endorsement are set out in column 1 of table 61.1075.

Table 61.1075 Low-level endorsements

Item	Column 1 Endorsement	Column 2 Activities authorised	Column 3 Requirements
<i>Part 1—General</i>			
1	Aeroplane low-level endorsement	Conduct a low-level operation in an aeroplane, other than an operation mentioned in Part 2 of this table	Aeroplane category rating At least 5 hours of dual flight in an aeroplane while receiving training in low-level operations
2	Helicopter low-level endorsement	Conduct a low-level operation in a helicopter, other than an operation mentioned in Part 2 of this table	Helicopter category rating At least 5 hours of dual flight in a helicopter while receiving training in low-level operations
3	Powered-lift aircraft low-level endorsement	Conduct a low-level operation in a powered-lift aircraft, other than an operation mentioned in Part 2 of this table	Powered-lift aircraft category rating At least 5 hours of dual flight in a powered-lift aircraft while receiving training in low-level operations
4	Gyroplane low-level endorsement	Conduct a low-level operation in a gyroplane, other than an operation mentioned in Part 2 of this table	Gyroplane category rating At least 5 hours of dual flight in a gyroplane while receiving training in low-level operations
<i>Part 2—Specific low-level activities</i>			
5	Aerial mustering – aeroplane endorsement	Conduct an aerial mustering operation in an aeroplane	Aeroplane category rating Aeroplane low-level endorsement At least 5 hours of dual flight while receiving training in aerial mustering in an aeroplane
6	Aerial mustering – helicopter endorsement	Conduct an aerial mustering operation in a helicopter	Helicopter category rating Helicopter low-level endorsement At least 5 hours of dual flight while receiving training in aerial mustering in a helicopter

Part 61 Flight crew licensing

Subpart 61.Q Low-level ratings

Division 61.Q.2 Privileges and requirements for grant of low-level endorsements

Regulation 61.1080

Table 61.1075 Low-level endorsements

Item	Column 1 Endorsement	Column 2 Activities authorised	Column 3 Requirements
7	Aerial mustering – gyroplane endorsement	Conduct an aerial mustering operation in a gyroplane	Gyroplane category rating At least 5 hours of dual flight while receiving training in aerial mustering in a gyroplane
8	Sling operations endorsement	Conduct a sling load operation in a helicopter	Private pilot licence, commercial pilot licence or air transport pilot licence with helicopter category rating
9	Winch and rappelling operations endorsement	Conduct a winch or rappelling operation in a helicopter	Commercial pilot licence or air transport pilot licence with helicopter category rating

61.1080 Privileges of low-level endorsements

Subject to Subpart 61.E and Division 61.Q.1, the holder of an endorsement mentioned in column 1 of an item in table 61.1075 is authorised to conduct the activity mentioned in column 2 of the item.

Note: Subpart 61.E sets out certain limitations that apply to all pilot licences, and ratings and endorsements on pilot licences.

61.1085 Requirements for grant of low-level endorsements

- (1) An applicant for an endorsement mentioned in column 1 of an item of table 61.1075 must hold:
 - (a) a low-level rating; and
 - (b) each licence, rating or endorsement (if any) mentioned in column 3 of the item.

Note: Subregulation (1) is satisfied, in relation to a required rating or endorsement, if the applicant holds a certificate of validation of an overseas flight crew licence, rating or endorsement that is equivalent to the required rating or endorsement: see item 36 of Part 2 of the Dictionary.

- (2) The applicant must also have:
 - (a) completed flight training for the endorsement; and
 - (b) met the aeronautical experience requirements (if any) mentioned in column 3 of the item; and
 - (c) passed the flight test mentioned in the Part 61 Manual of Standards for the endorsement.

Note 1: For paragraph (a), for the requirements for flight training, see Division 61.B.2.

Note 2: For paragraph (b), for the determination of a person's flight time and other aeronautical experience, see Division 61.A.2.

Regulation 61.1085

- (3) For paragraph (2)(b), any aeronautical experience relied on for the grant of an endorsement mentioned in column 1 of an item in Part 1 of table 61.1075 cannot be counted towards the requirements for the grant of an endorsement mentioned in column 1 of an item in Part 2 of that table.
- (4) A person who holds a low-level rating and an aerial application endorsement for an aircraft category is taken to meet the requirements for the grant of the endorsement mentioned in column 1 of an item in Part 1 of table 61.1075 for that aircraft category.

Subpart 61.R—Aerial application ratings

Division 61.R.1—Privileges and requirements for grant of aerial application ratings

61.1090 Privileges of aerial application ratings

Subject to Subpart 61.E and regulations 61.1100 to 61.1110, the holder of a pilot licence with an aerial application rating is authorised to conduct aerial application operations below 500 ft AGL.

Note: Subpart 61.E sets out certain limitations that apply to all pilot licences, and ratings and endorsements on pilot licences.

61.1100 Limitations on exercise of privileges of aerial application ratings—endorsements

The holder of an aerial application rating is authorised to conduct an activity mentioned in column 2 of an item in table 61.1120 in the exercise of the privileges of the rating only if the holder also holds the endorsement mentioned in column 1 of the item.

61.1105 Limitations on exercise of privileges of aerial application ratings—recent experience

- (1) The holder of an aerial application rating is authorised to exercise the privileges of the rating only if the holder has, within the previous 12 months, completed at least 50 hours of aerial application operations below 500 ft AGL.
- (2) The holder is taken to meet the requirements of subregulation (1) if the holder:
 - (a) has successfully completed an operator proficiency check in aerial application operations below 500 ft AGL within the 12 months before the month in which the exercise of the privileges occurs; or
 - (b) has successfully completed an aerial application proficiency check within the previous 12 months.

61.1110 Limitations on exercise of privileges of aerial application ratings—aerial application proficiency check

- (1) The holder of an aerial application rating is authorised to exercise the privileges of the rating only if the holder has a valid aerial application proficiency check.
- (2) For subregulation (1), the holder is taken to have a valid aerial application proficiency check during the following periods:
 - (a) the period from when the holder passes the flight test for the rating to the end of the 12th month after the month in which the holder passes the flight test;
 - (b) if:

- (i) the holder passes the flight test for an aerial application endorsement;
and
 - (ii) the flight test is conducted more than 6 months after the holder passes the flight test for the rating;
the period from when the holder passes the flight test for the endorsement to the end of the 12th month after the month in which the holder passes the flight test for the endorsement;
 - (c) if the holder successfully completes an operator proficiency check that covers operations under the rating, and that is conducted by a flight examiner who holds an aerial application rating flight test endorsement—the period from when the holder successfully completes the check to the end of the 12th month after the month in which the holder successfully completes the check;
 - (d) if the holder successfully completes an aerial application proficiency check—the period from when the holder successfully completes the check to the end of the 12th month after the month in which the holder successfully completes the check;
 - (e) if:
 - (i) the holder is taken to have a valid aerial application proficiency check under any of paragraphs (a) to (d) (the *existing check*); and
 - (ii) within 3 months before the validity of the existing check expires, the holder successfully completes an aerial application proficiency check;
the period from when the validity of the existing check expires to the end of the 12th month after the validity of the existing check expires.
- (3) However, if, at any time, the holder attempts, but does not successfully complete, an aerial application proficiency check, the holder is no longer taken to have a valid aerial application proficiency check.
- (4) For paragraphs (2)(d) and (e), the holder successfully completes an aerial application proficiency check if:
- (a) the aerial application proficiency check is conducted in an aircraft; and
 - (b) a person mentioned in subregulation (5) assesses the holder's competency to conduct aerial application operations below 500 ft AGL as meeting the standards mentioned in the Part 61 Manual of Standards for an aerial application proficiency check; and
 - (c) the person endorses the holder's licence document to the effect that the holder has completed the aerial application proficiency check on the date stated.
- (5) For paragraph (4)(b), the persons are as follows:
- (a) CASA;
 - (b) a flight examiner;
 - (c) the holder of an approval under regulation 61.040 to conduct the proficiency check.

Part 61 Flight crew licensing

Subpart 61.R Aerial application ratings

Division 61.R.1 Privileges and requirements for grant of aerial application ratings

Regulation 61.1115

61.1115 Requirements for grant of aerial application ratings

- (1) An applicant for an aerial application rating must:
 - (a) hold a commercial pilot licence or air transport pilot licence; and
 - (b) meet the requirements for the grant of at least one endorsement mentioned in Part 1 or 2 of table 61.1120; and
 - (c) have passed the flight test mentioned in the Part 61 Manual of Standards for the aerial application rating.

Note 1: For paragraph (a), paragraph (a) is satisfied if the applicant holds a certificate of validation of an overseas flight crew licence that is equivalent to a private pilot licence, commercial pilot licence or air transport pilot licence: see item 36 of Part 2 of the Dictionary.

Note 2: For paragraph (c), for the conduct of flight tests, see Division 61.B.4.

- (2) Despite paragraph 61.245(1)(a), the flight test must be conducted in an aircraft.

Division 61.R.2—Privileges and requirements for grant of aerial application endorsements

61.1120 Kinds of aerial application endorsement

The kinds of aerial application endorsement are set out in column 1 of table 61.1120.

Table 61.1120 Aerial application endorsements

Item	Column 1 Endorsement	Column 2 Activities authorised	Column 3 Requirements
<i>Part 1—Day aerial application endorsements</i>			
1	Aeroplane aerial application endorsement	Pilot an aeroplane conducting an aerial application operation, other than a firefighting operation, below 500 ft AGL by day Pilot an aeroplane conducting a low-level operation	Aeroplane category rating At least 200 hours of flight time as pilot of an aeroplane At least 5 hours of dual flight in an aeroplane while receiving training in low-level operations At least 25 hours of dual flight in an aeroplane while receiving training in aerial application operations At least 5 hours of solo flight in an aeroplane while receiving training in aerial application operations
2	Helicopter aerial application endorsement	Pilot a helicopter conducting an aerial application operation, other than a firefighting operation, below 500 ft AGL by day Pilot a helicopter conducting a low-level operation	Helicopter category rating At least 200 hours of flight time as pilot of a helicopter At least 5 hours of dual flight in a helicopter while receiving training in low-level operations At least 10 hours of dual flight in a helicopter while receiving training in aerial application operations

Part 61 Flight crew licensing

Subpart 61.R Aerial application ratings

Division 61.R.2 Privileges and requirements for grant of aerial application endorsements

Regulation 61.1120

Table 61.1120 Aerial application endorsements

Item	Column 1 Endorsement	Column 2 Activities authorised	Column 3 Requirements
3	Gyroplane aerial application endorsement	Pilot a gyroplane conducting an aerial application operation, other than a firefighting operation, below 500 ft AGL by day Pilot a gyroplane conducting a low-level operation	Gyroplane category rating At least 200 hours of flight time as pilot of a gyroplane At least 5 hours of dual flight in a gyroplane while receiving training in low-level operations At least 25 hours of dual flight in a gyroplane while receiving training in aerial application operations At least 5 hours of solo flight in a gyroplane while receiving training in aerial application operations

Part 2—Firefighting endorsements

4	Aeroplane firefighting endorsement	Pilot an aeroplane conducting a firefighting operation below 500 ft AGL Pilot an aeroplane conducting a low-level operation	Aeroplane category rating At least 200 hours of flight time as pilot of an aeroplane At least 5 hours of dual flight in an aeroplane while receiving training in low-level operations At least 5 hours of dual flight in an aeroplane while receiving training in firefighting operations
5	Helicopter firefighting endorsement	Pilot a helicopter conducting a firefighting operation below 500 ft AGL Pilot a helicopter conducting a low-level operation	Helicopter category rating At least 200 hours of flight time as pilot of a helicopter At least 5 hours of dual flight in a helicopter while receiving training in low-level operations At least 5 hours of dual flight in a helicopter while receiving training in firefighting operations

Table 61.1120 Aerial application endorsements

Item	Column 1 Endorsement	Column 2 Activities authorised	Column 3 Requirements
<i>Part 3—Night aerial application endorsements</i>			
6	Night aeroplane aerial application endorsement	Pilot an aeroplane conducting an aerial application operation below 500 ft AGL under the VFR at night Pilot an aeroplane under the VFR during a night circuit Pilot an aeroplane under the VFR at night on a flight between the aerodrome at which the flight begins or ends and the area in which the aerial application operation is to take place	Aeroplane aerial application endorsement At least 750 hours of flight time as pilot in command of an aeroplane conducting aerial application operations below 500 ft AGL At least 3 hours of instrument flight time At least 2 hours of solo night circuits At least 2 hours of dual flight while receiving training in night aerial application operations At least 3 hours of solo flight while receiving training in night aerial application operations
7	Night helicopter aerial application endorsement	Pilot a helicopter conducting an aerial application operation below 500 ft AGL under the VFR at night Pilot a helicopter under the VFR during a night circuit Pilot a helicopter under the VFR at night on a flight between the aerodrome at which the flight begins or ends and the area in which the aerial application operation is to take place	Helicopter aerial application endorsement At least 750 hours of flight time as pilot in command of a helicopter conducting aerial application operations below 500 ft AGL At least 3 hours of instrument flight time At least 2 hours of solo night circuits At least 2 hours of dual flight while receiving training in night aerial application operations At least 3 hours of solo flight while receiving training in night aerial application operations
8	Night gyroplane aerial application endorsement	Pilot a gyroplane conducting an aerial application operation below 500 ft AGL under the VFR at night Pilot a gyroplane under the VFR during a night circuit	Gyroplane aerial application endorsement At least 750 hours of flight time as pilot in command of a gyroplane conducting aerial application operations below 500 ft AGL At least 3 hours of instrument flight time At least 2 hours of solo night circuits

Part 61 Flight crew licensing

Subpart 61.R Aerial application ratings

Division 61.R.2 Privileges and requirements for grant of aerial application endorsements

Regulation 61.1125

Table 61.1120 Aerial application endorsements

Item	Column 1 Endorsement	Column 2 Activities authorised	Column 3 Requirements
		Pilot a gyroplane under the VFR at night on a flight between the aerodrome at which the flight begins or ends and the area in which the aerial application operation is to take place	At least 2 hours of dual flight while receiving training in night aerial application operations At least 3 hours of solo flight while training in night aerial application operations

61.1125 Privileges of aerial application endorsements

Subject to Subpart 61.E, Division 61.R.1 and regulations 61.1130 and 61.1135, the holder of an endorsement mentioned in column 1 of an item in table 61.1120 is authorised to conduct each activity mentioned in column 2 of the item.

Note: Subpart 61.E sets out certain limitations that apply to all pilot licences, and ratings and endorsements on pilot licences.

61.1130 Limitations on exercise of privileges of aerial application endorsements—supervision

- (1) The holder of an endorsement mentioned in column 1 of an item in Part 1 or 3 of table 61.1120 is authorised to exercise the privileges of the endorsement in an operation only if:
 - (a) the holder has previously conducted at least 110 hours of aerial application operations below 500 ft AGL; or
 - (b) the operation is conducted in accordance with subregulation (2) under the supervision of:
 - (i) the head of flying operations of the operator of the aircraft in which the operation is conducted; or
 - (ii) a flight examiner who holds an aerial application rating flight test endorsement; or
 - (iii) the holder of an approval under regulation 61.040 to supervise the operation.
 - (2) For paragraph (1)(b), the supervision must be:
 - (a) for a helicopter aerial application endorsement:
 - (i) for the first 10 hours—direct supervision; and
 - (ii) for the next 100 hours—direct and indirect supervision, at least 10 hours of which must be direct supervision; and
 - (b) for any other endorsement:
 - (i) for the first 10 hours—direct supervision; and
 - (ii) for the next 100 hours—direct or indirect supervision.
 - (3) In this regulation:
-

direct supervision, of a pilot conducting a flight, means doing the following:

- (a) performing the tasks involved in indirect supervision of the pilot;
- (b) being present and able to monitor and assess the safety of the flight and communicate directly with the pilot;
- (c) selecting and planning the area in which the flight is conducted;
- (d) authorising the pilot to conduct the flight;
- (e) providing direction to ensure the safety of the flight.

indirect supervision, of a pilot conducting a flight, means doing the following:

- (a) conducting frequent surveillance of the performance of the pilot;
- (b) periodically reviewing the performance of the pilot in the planning and conduct of the flight;
- (c) providing feedback on the performance of the pilot;
- (d) knowing the pilot's area of operations;
- (e) acting as a mentor to the pilot.

61.1135 Limitations on exercise of privileges of night aerial application endorsements

The holder of a night aerial application endorsement is authorised to exercise the privileges of the endorsement in an aircraft of a type covered by the endorsement only if, within the previous 45 days:

- (a) the holder has conducted a night aerial application operation below 500 ft AGL that includes a take-off and landing at night; or
- (b) the holder has, in an aircraft of the same type or an approved simulated training device for the purpose:
 - (i) completed a flight of at least 1 hour's duration that commenced no later than 20 minutes before night; and
 - (ii) practised the necessary manoeuvres involved in the operation in an unladen aircraft at night or in the simulated training device; and
 - (iii) conducted at least 3 take-offs and 3 landings at night.

61.1140 Requirements for grant of aerial application endorsements

- (1) An applicant for an aerial application endorsement mentioned in column 1 of an item of table 61.1120 must hold:
 - (a) an aerial application rating; and
 - (b) the rating or endorsement mentioned in column 3 of the item.

Note: Subregulation (1) is satisfied, in relation to a required rating or endorsement, if the applicant holds a certificate of validation of an overseas flight crew licence, rating or endorsement that is equivalent to the required rating or endorsement: see item 36 of Part 2 of the Dictionary.

- (2) The applicant must also have:
 - (a) completed flight training for the endorsement; and
 - (b) met the aeronautical experience requirements mentioned in column 3 of the item; and

Part 61 Flight crew licensing

Subpart 61.R Aerial application ratings

Division 61.R.2 Privileges and requirements for grant of aerial application endorsements

Regulation 61.1140

- (c) passed the flight test mentioned in the Part 61 Manual of Standards for the endorsement; and
- (d) for an endorsement mentioned in column 1 of an item in Part 1 or 2 of table 61.1120:
 - (i) met the requirements for the grant of the low-level endorsement for an aircraft of the relevant category; and
 - (ii) passed the aeronautical knowledge examination for the endorsement.

Note 1: For paragraph (a), for the requirements for flight training, see Division 61.B.2.

Note 2: For paragraph (b), for the determination of a person's flight time and other aeronautical experience, see Division 61.A.2.

Note 3: For paragraph (c), for the conduct of flight tests, see Division 61.B.4.

Note 4: For subparagraph (d)(ii), for the conduct of aeronautical knowledge examinations, see Division 61.B.3.

Subpart 61.S—Flight activity endorsements

61.1145 Kinds of flight activity endorsement

The kinds of flight activity endorsement are set out in column 1 of table 61.1145.

Table 61.1145 Flight activity endorsements

Item	Column 1 Endorsement	Column 2 Activities authorised	Column 3 Requirements
1	Aerobatics flight activity endorsement	Conduct aerobatic manoeuvres in an aeroplane above 3 000 ft AGL	Aeroplane category rating Spinning flight activity endorsement
2	Aerobatics (1 500) flight activity endorsement	Conduct aerobatic manoeuvres in an aeroplane above 1 500 ft AGL	Aeroplane category rating Aerobatics flight activity endorsement
3	Aerobatics (1 000) flight activity endorsement	Conduct aerobatic manoeuvres in an aeroplane above 1 000 ft AGL	Aeroplane category rating Aerobatics (1 500) flight activity endorsement
4	Aerobatics (500) flight activity endorsement	Conduct aerobatic manoeuvres in an aeroplane above 500 ft AGL	Aeroplane category rating Aerobatics (1 000) flight activity endorsement
5	Aerobatics (unlimited) flight activity endorsement	Conduct aerobatic manoeuvres in an aeroplane at any height	Aeroplane category rating Aerobatics (500) flight activity endorsement
6	Formation flying (aeroplane) flight activity endorsement	Conduct formation flying in an aeroplane	Aeroplane category rating
7	Formation aerobatics flight activity endorsement	Conduct aerobatic manoeuvres in an aeroplane while flying in formation	Aeroplane category rating Aerobatics flight activity endorsement Formation flying (aeroplane) flight activity endorsement
8	Spinning flight activity endorsement	Conduct intentional upright spinning manoeuvres above 3 000 ft AGL	Aeroplane category rating
9	Formation flying (helicopter) flight activity endorsement	Conduct formation flying in a helicopter	Helicopter category rating

Regulation 61.1150

61.1150 Privileges of flight activity endorsements

Subject to Subpart 61.E and regulation 61.1155, the holder of an endorsement mentioned in column 1 of an item in table 61.1145 is authorised to conduct the activity mentioned in column 2 of the item.

Note: Subpart 61.E sets out certain limitations that apply to all pilot licences, and ratings and endorsements on pilot licences.

61.1155 Limitations on exercise of privileges of flight activity endorsements— medical certificates

- (1) This regulation applies to the holder of any of the following endorsements:
 - (a) an aerobatics flight activity endorsement;
 - (b) an aerobatics (1 500) flight activity endorsement;
 - (ba) an aerobatics (1 000) flight activity endorsement;
 - (c) an aerobatics (500) flight activity endorsement;
 - (d) an aerobatics (unlimited) flight activity endorsement;
 - (e) a formation aerobatics flight activity endorsement;
 - (f) a spinning flight activity endorsement.
- (2) The holder is authorised to conduct an aerobatic or spinning manoeuvre only if the holder:
 - (a) holds a current class 1 or 2 medical certificate; or
 - (b) is accompanied by another pilot who:
 - (i) holds a current class 1 or 2 medical certificate; and
 - (ii) occupies a flight control seat in the aircraft; and
 - (iii) is authorised, under this Part, to conduct the manoeuvre.

61.1160 Requirements for grant of flight activity endorsements

An applicant for an endorsement mentioned in column 1 of an item in table 61.1145 must:

- (a) hold each rating or endorsement (if any) mentioned in column 3 of the item; and
- (b) have completed flight training for the endorsement.

Note 1: For paragraph (a), paragraph (a) is satisfied, in relation to a required licence, rating or endorsement, if the applicant holds a certificate of validation of an overseas flight crew licence, rating or endorsement that is equivalent to the licence, rating or endorsement: see item 36 of Part 2 of the Dictionary.

Note 2: For paragraph (b), for the requirements for flight training, see Division 61.B.2.

Subpart 61.T—Pilot instructor ratings

Division 61.T.1—Privileges and requirements for grant of flight instructor ratings

61.1165 Privileges of flight instructor ratings

Subject to Subpart 61.E and regulations 61.1170 to 61.1180, a flight instructor is authorised:

- (a) to conduct flight training for:
 - (i) pilot licences; and
 - (ii) ratings on pilot licences, other than:
 - (A) cruise relief flight engineer type ratings; and
 - (B) flight examiner ratings; and
 - (iii) endorsements on pilot licences, other than flight examiner endorsements; and
- (b) to grant endorsements to holders of pilot licences, other than:
 - (i) flight examiner endorsements; and
 - (ii) training endorsements mentioned in Part 1 or 2 of table 61.1235; and
 - (iii) endorsements for which a flight test is required; and
- (c) to conduct training in multi-crew cooperation; and
- (d) to conduct differences training for variants of type ratings; and
- (e) to conduct training to meet the general competency requirement in regulation 61.385; and
- (f) to conduct flight reviews required by this Part for ratings on pilot licences, other than:
 - (i) flight examiner ratings; and
 - (ii) cruise relief flight engineer type ratings; and
- (g) under Subdivision 61.A.3.1 (Student pilots), to approve a person to pilot an aircraft, including for a solo flight; and
- (h) to conduct dual flight checks for a student pilot; and
- (i) to approve a person mentioned in regulation 61.125 (Conducting flight activities without rating or endorsement) to pilot an aircraft for the purpose of receiving flight training; and
- (j) to approve a person mentioned in regulation 61.120 to transmit on an aviation safety radio frequency; and
- (k) to assess the standard of knowledge of an applicant for a pilot licence, or a rating on a pilot licence, in any items mentioned in the applicant's knowledge deficiency report.

Note: Subpart 61.E sets out certain limitations that apply to all pilot licences, and ratings and endorsements on pilot licences.

Regulation 61.1170

61.1170 Limitations on exercise of privileges of flight instructor ratings—general

- (1) The holder of a flight instructor rating is authorised to exercise the privileges of the rating in an aircraft of a particular category only if the holder has:
 - (a) completed the aeronautical experience; and
 - (b) passed the flight test;required under regulation 61.1185 for the grant of the rating in an aircraft of that category.
- (2) The holder of a flight instructor rating is authorised to exercise the privileges of the rating in a flight simulation training device that represents an aircraft of a particular category only if the holder has:
 - (a) completed the aeronautical experience; and
 - (b) passed the flight test;required under regulation 61.1185 for the grant of the rating in an aircraft of that category.
- (3) A flight instructor is authorised to conduct flight training for a pilot licence, a rating on a pilot licence or an endorsement on an operational rating only if the instructor is engaged to conduct the flight training by a Part 141 or 142 operator that is authorised to conduct flight training for the licence, rating or endorsement.
- (5) A flight instructor is authorised to conduct flight training in an aircraft only if the instructor holds a medical certificate.

61.1175 Limitations on exercise of privileges of flight instructor ratings—endorsements

- (1) A flight instructor is authorised to conduct flight training mentioned in column 2 of an item in table 61.1235 only if the instructor also holds the endorsement mentioned in column 1 of the item.
- (2) A flight instructor is authorised to conduct differences training for a variant of an aircraft type only if the instructor also holds the type rating training endorsement for the aircraft type.
- (3) A flight instructor is authorised to conduct training to meet the general competency requirement in regulation 61.385 for a kind of aircraft only if the instructor also holds a training endorsement that authorises the instructor to conduct flight training in the aircraft.
- (4) A flight instructor is authorised to grant an endorsement, other than a recreational pilot licence endorsement, only if the instructor also holds a training endorsement required to provide flight training for the endorsement.
- (4A) A flight instructor is authorised to grant a recreational pilot licence endorsement only if the instructor also holds a grade 1 or 2 training endorsement.
- (5) A flight instructor is authorised to approve a student pilot to conduct a solo flight in an aircraft of a particular category only if the instructor also holds:

- (a) for the student pilot's first solo flight in an aircraft of that category—a grade 1 or 2 training endorsement for that aircraft category; or
 - (b) in any other case—a grade 1, 2 or 3 training endorsement for that aircraft category.
- (6) A flight instructor is authorised to conduct a flight review for a rating on a pilot licence only if the instructor also holds:
- (a) a grade 1 training endorsement; or
 - (b) a grade 2 training endorsement; or
 - (c) the training endorsement required to conduct flight training for the rating.
- (7) A flight instructor is authorised to make an assessment of a knowledge deficiency report for an applicant for a flight crew licence or rating only if the instructor also holds a grade 2 training endorsement.

**61.1180 Limitations on exercise of privileges of flight instructor ratings—
instructor proficiency check**

- (1) The holder of a flight instructor rating is authorised to exercise the privileges of the rating only if the holder has a valid instructor proficiency check.
- (2) For subregulation (1), the holder is taken to have a valid instructor proficiency check during the following periods:
- (a) the period from when the holder passes the flight test for the rating to the end of the 12th month after the month in which the holder passes the flight test;
 - (b) if:
 - (i) the holder passes the flight test for a training endorsement; and
 - (ii) the flight test is conducted more than 6 months after the holder passes the flight test for the rating;the period from when the holder passes the flight test for the endorsement to the end of the 24th month after the month in which the holder passes the flight test for the endorsement;
 - (c) if the holder successfully completes an operator proficiency check that covers operations under the rating and that is conducted by a flight examiner who holds a flight instructor rating flight test endorsement—the period from when the holder successfully completes the check to the end of the 24th month after the month in which the holder successfully completes the check;
 - (d) if:
 - (i) the holder is successfully participating in an operator's training and checking system for an operation under the rating; and
 - (ii) the operator holds an approval under regulation 61.040 for the system for this subregulation;the period during which the holder is successfully participating in the system;

Part 61 Flight crew licensing

Subpart 61.T Pilot instructor ratings

Division 61.T.1 Privileges and requirements for grant of flight instructor ratings

Regulation 61.1185

- (e) if the holder successfully completes an instructor proficiency check—the period from when the holder successfully completes the check to the end of the 24th month after the month in which the holder successfully completes the check;
- (f) if:
 - (i) the holder is taken to have a valid instructor proficiency check under any of paragraphs (a) to (e) (the *existing check*); and
 - (ii) within 3 months before the validity of the existing check expires, the holder successfully completes an instructor proficiency check; the period from when the validity of the existing check expires to the end of the 24th month after the validity of the existing check expires.
- (3) However, if, at any time, the holder attempts, but does not successfully complete, an instructor proficiency check, the holder is no longer taken to have a valid instructor proficiency check.
- (4) For paragraphs (2)(e) and (f), the holder successfully completes an instructor proficiency check if:
 - (a) the instructor proficiency check is conducted in an aircraft or an approved flight simulation training device for the proficiency check; and
 - (b) a person mentioned in subregulation (5) assesses the holder's competency to conduct flight training as meeting the standards mentioned in the Part 61 Manual of Standards for a flight instructor rating; and
 - (c) the person endorses the holder's licence document to the effect that the holder has completed the instructor proficiency check on the date stated.
- (5) For paragraph (4)(b), the persons are as follows:
 - (a) CASA;
 - (b) a flight examiner;
 - (c) the holder of an approval under regulation 61.040 to conduct the proficiency check.

61.1185 Requirements for grant of flight instructor ratings

- (1) An applicant for a flight instructor rating must:
 - (a) hold a private pilot licence, commercial pilot licence or air transport pilot licence; and
 - (b) meet the requirements for the grant of at least one training endorsement.

Note: Paragraph (a) is satisfied if the applicant holds a certificate of validation of an overseas flight crew licence that is equivalent to a private pilot licence, commercial pilot licence or air transport pilot licence: see item 36 of Part 2 of the Dictionary.
- (2) The applicant must also have:
 - (a) passed the aeronautical knowledge examination for the flight instructor rating; and
 - (b) completed flight training for the rating; and
 - (c) passed the flight test mentioned in the Part 61 Manual of Standards for the flight instructor rating; and

- (d) met the following aeronautical experience requirements in an aircraft of the same category as the aircraft used for the flight test:
 - (i) if the aircraft used for the flight test is a helicopter:
 - (A) at least 250 hours flight time as a pilot; and
 - (B) at least 100 hours flight time as pilot in command;
 - (ii) in any other case:
 - (A) at least 200 hours flight time as a pilot; and
 - (B) at least 100 hours flight time as pilot in command.

Note 1: For paragraph (a), for the conduct of aeronautical knowledge examinations, see Division 61.B.3.

Note 2: For paragraph (b), for the requirements for flight training, see Division 61.B.2.

Note 3: For paragraph (c), for the conduct of flight tests, see Division 61.B.4.

Note 4: For paragraph (d), for the determination of a person's flight time and other aeronautical experience, see Division 61.A.2.

- (3) The applicant is taken to meet the requirements mentioned in paragraphs (2)(c) and (d) if the applicant:
 - (a) holds:
 - (i) a commercial pilot licence with a helicopter category rating; and
 - (ii) a low-level rating and a helicopter low-level endorsement; and
 - (iii) one of the following combinations:
 - (A) a night VFR rating and a helicopter night VFR endorsement;
 - (B) an instrument rating and a single-engine helicopter instrument endorsement;
 - (C) an instrument rating and a multi-engine helicopter instrument endorsement; and
 - (b) completed his or her flight training for the licence in an integrated training course; and
 - (c) has passed the flight test mentioned in the Part 61 Manual of Standards for the flight instructor rating in a helicopter.
- (3A) The applicant is taken to meet the requirements mentioned in subparagraph (2)(d)(ii) if the applicant has:
 - (a) completed an integrated training course for the grant of a commercial pilot licence with the aircraft category rating for the same category of aircraft as used for the flight test for the applicant's flight instructor rating; and
 - (b) met the requirements for the grant of the licence with that aircraft category rating.
- (4) The applicant must also:
 - (a) have completed an approved course of training in principles and methods of instruction; or
 - (b) hold a Certificate IV in Training and Assessment; or
 - (c) hold a tertiary qualification in teaching.

Part 61 Flight crew licensing

Subpart 61.T Pilot instructor ratings

Division 61.T.1 Privileges and requirements for grant of flight instructor ratings

Regulation 61.1185

- (5) An applicant to whom subregulation (3) or (3A) does not apply must meet the aeronautical experience requirements mentioned in paragraph (2)(d) before starting the flight training mentioned in paragraph (2)(b).

Division 61.T.2—Privileges and requirements for grant of simulator instructor ratings

61.1190 Privileges of simulator instructor ratings

Subject to Subpart 61.E and regulations 61.1195 to 61.1205, a simulator instructor is authorised:

- (a) to conduct flight training in a flight simulation training device or tethered helicopter for the grant of:
 - (i) pilot licences; and
 - (ii) ratings on pilot licences, other than:
 - (A) cruise relief flight engineer type ratings; and
 - (B) flight examiner ratings; and
 - (iii) endorsements on pilot licences, other than flight examiner endorsements; and
- (b) to grant endorsements to holders of pilot licences, other than:
 - (i) flight examiner endorsements; and
 - (ii) training endorsements mentioned in Part 1 or 2 of table 61.1235; and
 - (iii) recreational pilot licence endorsements; and
 - (iv) endorsements for which a flight test is required; and
- (c) to conduct training in multi-crew cooperation; and
- (d) to conduct differences training for variants of type ratings; and
- (e) to conduct training to meet the general competency requirement in regulation 61.385; and
- (f) to conduct flight reviews required by this Part for ratings on pilot licences, other than:
 - (i) flight examiner ratings; and
 - (ii) cruise relief flight engineer type ratings; and
- (g) to approve a person mentioned in regulation 61.120 to transmit on an aviation safety radio frequency; and
- (h) to assess the standard of knowledge of an applicant for a pilot licence, or a rating on a pilot licence, in any items listed in the applicant's knowledge deficiency report.

Note: Subpart 61.E sets out certain limitations that apply to all pilot licences, and ratings and endorsements on pilot licences.

61.1195 Limitations on exercise of privileges of simulator instructor ratings—general

- (1) The holder of a simulator instructor rating is authorised to exercise the privileges of the rating in a flight simulation training device that represents an aircraft of a particular category only if the instructor has passed the flight test required under regulation 61.1210 for the rating in a flight simulation training device that represents an aircraft of that category.

Part 61 Flight crew licensing

Subpart 61.T Pilot instructor ratings

Division 61.T.2 Privileges and requirements for grant of simulator instructor ratings

Regulation 61.1200

- (2) A simulator instructor is authorised to conduct flight training for a pilot licence, a rating on a pilot licence or an endorsement on an operational rating only if the instructor is engaged to conduct the flight training by a Part 141 or 142 operator that is authorised to conduct the flight training.
- (3) A simulator instructor is authorised to conduct flight training for the grant of an endorsement mentioned in column 1 of an item in Part 2 or 3 of table 61.1235 only if the instructor has conducted at least 50 hours of flight training in the activity covered by the endorsement.

61.1200 Limitations on exercise of privileges of simulator instructor ratings—endorsements

- (1) A simulator instructor is authorised to conduct flight training mentioned in column 2 of an item in table 61.1235 only if the instructor also holds the endorsement mentioned in column 1 of the item.
- (2) A simulator instructor is authorised to conduct differences training for a variant of an aircraft type only if the instructor also holds the type rating training endorsement for the aircraft type.
- (3) A simulator instructor is authorised to conduct training to meet the general competency requirement in regulation 61.385 for a kind of aircraft only if the instructor also holds a training endorsement that authorises the instructor to conduct flight training in the aircraft.
- (4) A simulator instructor is authorised to grant an endorsement only if the instructor also holds the training endorsement required to provide flight training for the endorsement.
- (5) A simulator instructor is authorised to conduct a flight review for a rating on a pilot licence only if the instructor also holds:
 - (a) a grade 1 training endorsement; or
 - (b) a grade 2 training endorsement; or
 - (c) the training endorsement required to provide flight training for the rating.
- (6) A simulator instructor is authorised to make an assessment of a knowledge deficiency report for an applicant for a flight crew licence or rating only if the instructor also holds a grade 2 training endorsement.

**61.1205 Limitations on exercise of privileges of simulator instructor ratings—
instructor proficiency check**

- (1) The holder of a simulator instructor rating is authorised to exercise the privileges of the rating only if the holder has a valid instructor proficiency check.
- (2) For subregulation (1), the holder is taken to have a valid instructor proficiency check during the following periods:

- (a) the period from when the holder passes the flight test for the rating to the end of the 12th month after the month in which the holder passes the flight test;
 - (b) if:
 - (i) the holder passes the flight test for a training endorsement; and
 - (ii) the flight test is conducted more than 6 months after the holder passes the flight test for the rating;the period from when the holder passes the flight test for the endorsement to the end of the 24th month after the month in which the holder passes the flight test for the endorsement;
 - (c) if the holder successfully completes an operator proficiency check that covers operations under the rating and that is conducted by a flight examiner who holds a pilot instructor rating flight test endorsement—the period from when the holder successfully completes the check to the end of the 24th month after the month in which the holder successfully completes the check;
 - (d) if:
 - (i) the holder is successfully participating in an operator’s training and checking system for an operation under the rating; and
 - (ii) the operator holds an approval under regulation 61.040 for the system for this subregulation;the period during which the holder is successfully participating in the system;
 - (e) if the holder successfully completes an instructor proficiency check—the period from when the holder successfully completes the check to the end of the 24th month after the month in which the holder successfully completes the check;
 - (f) if:
 - (i) the holder is taken to have a valid instructor proficiency check under any of paragraphs (a) to (e) (the *existing check*); and
 - (ii) within 3 months before the validity of the existing check expires, the holder successfully completes an instructor proficiency check;the period from when the validity of the existing check expires to the end of the 24th month after the validity of the existing check expires.
- (3) However, if, at any time, the holder attempts, but does not successfully complete, an instructor proficiency check, the holder is no longer taken to have a valid instructor proficiency check.
- (4) For paragraphs (2)(e) and (f), the holder successfully completes an instructor proficiency check if:
- (a) the instructor proficiency check is conducted in an approved flight simulation training device for the proficiency check; and
 - (b) a person mentioned in subregulation (5) assesses the holder’s competency to conduct flight training as meeting the standards mentioned in the Part 61 Manual of Standards for a simulator instructor rating; and

Part 61 Flight crew licensing

Subpart 61.T Pilot instructor ratings

Division 61.T.2 Privileges and requirements for grant of simulator instructor ratings

Regulation 61.1210

(c) the person endorses the holder's licence document to the effect that the holder has completed the instructor proficiency check on the date stated.

(5) For paragraph (4)(b), the persons are as follows:

- (a) CASA;
- (b) a flight examiner;
- (c) the holder of an approval under regulation 61.040 to conduct the proficiency check.

61.1210 Requirements for grant of simulator instructor ratings

(1) An applicant for a simulator instructor rating must:

- (a) hold a commercial pilot licence or air transport pilot licence; and
- (b) meet the requirements for the grant of at least one training endorsement.

Note: Paragraph (a) is satisfied if the applicant holds a certificate of validation of an overseas flight crew licence that is equivalent to a commercial pilot licence or air transport pilot licence: see item 36 of Part 2 of the Dictionary.

(2) The applicant must also have:

- (a) passed the aeronautical knowledge examination for the simulator instructor rating; and
- (b) completed flight training for the rating; and
- (c) passed the flight test mentioned in the Part 61 Manual of Standards for the simulator instructor rating.

Note 1: For paragraph (a), for the conduct of aeronautical knowledge examinations, see Division 61.B.3.

Note 2: For paragraph (b), for the requirements for flight training, see Division 61.B.2.

Note 3: For paragraph (c), for the conduct of flight tests, see Division 61.B.4.

(3) The applicant must also:

- (a) have completed an approved course of training in principles and methods of instruction; or
- (b) hold a Certificate IV in Training and Assessment; or
- (c) hold a tertiary qualification in teaching.

(4) Despite paragraph 61.245(1)(a), the flight test must be conducted in an approved flight simulation training device for the flight test.

Division 61.T.3—Obligations of pilot instructors

61.1215 Obligations of pilot instructors—training

- (1) A pilot instructor commits an offence if:
 - (a) the instructor conducts:
 - (i) flight training for an aircraft class rating, pilot type rating or cruise relief co-pilot type rating; or
 - (ii) differences training;
in an aircraft; and
 - (b) regulation 61.205 prohibits the conduct of the training in the aircraft.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

61.1220 Obligations of pilot instructors—flight reviews

- (1) A pilot instructor commits an offence if:
 - (a) the instructor conducts a flight review for the holder of a pilot licence; and
 - (b) the holder successfully completes the flight review; and
 - (c) the instructor does not, within 14 days after the day the flight review is successfully completed:
 - (i) endorse the holder's licence document in accordance with subregulation (2); and
 - (ii) give CASA a written notice that complies with subregulation (3).

Penalty: 50 penalty units.

- (2) For subparagraph (1)(c)(i), the following details must be endorsed on the licence document:
 - (a) a statement to the effect that the holder has successfully completed the flight review;
 - (b) the date on which the flight review was successfully completed;
 - (c) the rating for which the flight review was conducted.
- (3) For subparagraph (1)(c)(ii), the notice must state the following:
 - (a) the holder's name and ARN;
 - (b) that the holder has successfully completed the flight review;
 - (c) the date on which the flight review was successfully completed;
 - (d) the rating for which the flight review was conducted;
 - (e) if the flight review was conducted in an aircraft—the aircraft's nationality and registration marks;
 - (f) if the flight review was conducted in a flight simulator—the identifying number for the flight simulator stated on its flight simulator qualification certificate.

Regulation 61.1225

- (4) An offence against this regulation is an offence of strict liability.

61.1225 Obligations of pilot instructors—student pilots

- (1) A flight instructor commits an offence if:
- (a) the instructor approves a person to pilot an aircraft as a student pilot; and
 - (b) the approval is to pilot the aircraft in a way that is not authorised by the following provisions:
 - (i) paragraph 61.112(1)(c) or (2)(c) (Flying as a student pilot);
 - (ii) regulation 61.113 (General requirements for student pilots);
 - (iii) regulation 61.114 (Solo flights—medical certificate requirements for student pilots);
 - (iv) regulation 61.115 (Solo flights—recent experience requirements for student pilots).

Penalty: 50 penalty units.

- (2) A flight instructor commits an offence if:
- (a) the instructor approves a person (the *student*) to conduct a solo flight as a student pilot; and
 - (b) the instructor is not satisfied that the student:
 - (i) has been briefed appropriately for the flight; and
 - (ii) is capable of conducting the flight safely; and
 - (iii) meets the requirement mentioned in subregulation (3).

Penalty: 50 penalty units.

- (3) For subparagraph (2)(b)(iii), the requirement is that:
- (a) the student has been assessed by CASA or an examiner as meeting the general English language proficiency standard mentioned in the Part 61 Manual of Standards; or
 - (b) the student has completed an approved course of training in English language proficiency.
- (4) A flight instructor commits an offence if:
- (a) the instructor approves a person (the *student*) to conduct a solo flight of a kind mentioned in subregulation (5) as a student pilot for the first time; and
 - (b) the instructor is not satisfied that the student:
 - (i) has completed the training specified by the authorising Part 141 or 142 operator for the conduct of a solo flight of that kind by a student pilot; and
 - (ii) has been assessed by the Part 141 or 142 operator as competent to conduct the solo flight; and
 - (c) for a cross-country flight or night flight—the student has not completed at least 2 hours of dual instrument time, 1 hour of which is conducted during dual instrument flight time.

Penalty: 50 penalty units.

- (5) For subregulation (4), the kinds of solo flight are as follows:
- (a) a circuit training flight;
 - (b) a flight between an aerodrome and the flight training area for the aerodrome;
 - (c) a cross-country flight;
 - (d) a night flight.
- (6) An offence against subregulation (1) is an offence of strict liability.
- (7) In this regulation:

authorising Part 141 or 142 operator, in relation to an instructor approving a solo flight, means the Part 141 or 142 operator who authorised the instructor to approve the solo flight.

61.1227 Obligations of pilot instructors—approval to operate aircraft radio

- (1) A pilot instructor commits an offence if:
- (a) the instructor approves a person who does not hold a flight crew licence, or who holds a recreational pilot licence but does not hold a flight radio endorsement, (the *student*) to transmit on an aviation safety radio frequency; and
 - (b) the student does not meet the requirement mentioned in subregulation (2).

Penalty: 50 penalty units.

- (2) For paragraph (1)(b), the requirement is that:
- (a) the student has been assessed by CASA or an examiner as meeting the general English language proficiency standard mentioned in the Part 61 Manual of Standards; or
 - (b) the student has completed an approved course of training in English language proficiency.
- (3) An offence against this regulation is an offence of strict liability.

61.1230 Obligations of pilot instructors—records of activities conducted independently of Part 141 or 142 operator

- (1) A pilot instructor commits an offence if:
- (a) the instructor conducts a flight review or a session of flight training for a flight crew endorsement, other than an endorsement on an operational rating; and
 - (b) the training is not conducted on behalf of a Part 141 or 142 operator; and
 - (c) a record of the training is not made within 7 days after the session.

Penalty: 50 penalty units.

- (2) A pilot instructor commits an offence if the instructor does not retain a record made under subregulation (1) for at least 7 years after the day the record is made.

Part 61 Flight crew licensing
Subpart 61.T Pilot instructor ratings
Division 61.T.3 Obligations of pilot instructors

Regulation 61.1230

Penalty: 50 penalty units.

- (3) An offence against this regulation is an offence of strict liability.

Division 61.T.4—Privileges and requirements for grant of training endorsements

61.1235 Kinds of training endorsement

The kinds of training endorsement are set out in column 1 of table 61.1235.

Table 61.1235 Training endorsements			
Item	Column 1 Endorsement	Column 2 Activities authorised	Column 3 Requirements
<i>Part 1—Training for licences and aircraft ratings</i>			
1	Grade 1 training endorsement (category specific)	Activities authorised by a grade 2 training endorsement Supervise holders of grade 2 and grade 3 training endorsements in the conduct of flight training in an aircraft of the specified category	Commercial pilot licence or air transport pilot licence with the specified aircraft category rating Grade 2 training endorsement At least 500 hours of flight time conducting initial flight training in an aircraft of the specified category
2	Grade 2 training endorsement (category specific)	Activities authorised by grade 3 training endorsement Approve a student pilot to conduct a solo flight in an aircraft of the specified category Conduct flight training for an aircraft class rating for aircraft of the specified category Assess a knowledge deficiency report for the grant of a pilot licence or rating	Commercial pilot licence or air transport pilot licence with the specified aircraft category rating Grade 3 training endorsement At least 200 hours of flight time conducting initial flight training in an aircraft of the specified category

Part 61 Flight crew licensing

Subpart 61.T Pilot instructor ratings

Division 61.T.4 Privileges and requirements for grant of training endorsements

Regulation 61.1235

Table 61.1235 Training endorsements

Item	Column 1 Endorsement	Column 2 Activities authorised	Column 3 Requirements
3	Grade 3 training endorsement (category specific, other than aeroplanes)	Conduct flight training for the specified aircraft category rating Conduct flight training for a recreational pilot licence, private pilot licence or commercial pilot licence, other than basic instrument flight training Conduct flight training for a recreational pilot licence endorsement Approve a student pilot to conduct a solo flight in an aircraft of the specified category, other than the student's first solo flight in an aircraft of that category Conduct flight training for a single-engine aircraft class rating for aircraft of the specified category	Commercial pilot licence or air transport pilot licence with the specified aircraft category rating
3A	Grade 3 training endorsement (aeroplane)	Conduct flight training for the aeroplane category rating Conduct flight training for a recreational pilot licence, private pilot licence or commercial pilot licence, other than basic instrument flight training Conduct flight training for a recreational pilot licence endorsement Approve a student pilot to conduct a solo flight in an aeroplane, other than the student's first solo flight in an aeroplane Conduct flight training for a single-engine aeroplane class rating	Commercial pilot licence or air transport pilot licence with the aeroplane category rating Spinning flight activity endorsement
4	Multi-crew pilot training endorsement	Conduct flight training for a multi-crew pilot licence or air transport pilot licence Conduct training in multi-crew cooperation	Commercial pilot licence and instrument rating, or air transport pilot licence At least 100 hours of aeronautical experience in multi-crew operations

Table 61.1235 Training endorsements

Item	Column 1 Endorsement	Column 2 Activities authorised	Column 3 Requirements
5	Type rating training endorsement (type specific)	Conduct flight training for the pilot type rating or cruise relief co-pilot type rating for aircraft of the specified type Conduct differences training for variants of the specified aircraft type	Commercial pilot licence or air transport pilot licence Pilot type rating for the specified aircraft type
6	Class rating training endorsement (class specific)	Conduct flight training for the aircraft class rating for the specified class	Commercial pilot licence or air transport pilot licence Aircraft class rating for the specified class At least 50 hours of aeronautical experience as pilot of an aircraft of the specified class
7	Design feature training endorsement	Conduct flight training for any design feature endorsement that the holder holds	Private pilot licence, commercial pilot licence or air transport pilot licence
<i>Part 2—Training for operational ratings</i>			
8	Instrument rating training endorsement (category specific)	Conduct flight training for an instrument rating, private instrument rating, instrument endorsement or private instrument endorsement in an aircraft of the specified category Conduct basic instrument flight training for an aircraft of the specified category	Commercial pilot licence or air transport pilot licence
9	Night VFR rating training endorsement (category specific)	Conduct flight training for a night VFR rating or night VFR endorsement in an aircraft of the specified category Conduct basic instrument flight training for an aircraft of the specified category	Commercial pilot licence or air transport pilot licence At least 20 hours of aeronautical experience at night as pilot of an aircraft
10	Night vision imaging system rating training endorsement	Conduct flight training for a night vision imaging system rating or night vision imaging system endorsement	Commercial pilot licence or air transport pilot licence Night vision imaging system rating At least 50 hours experience using a night vision imaging system

Part 61 Flight crew licensing

Regulation 61.1235

Table 61.1235 Training endorsements

Item	Column 1 Endorsement	Column 2 Activities authorised	Column 3 Requirements
11	Low-level rating training endorsement (category specific)	Conduct flight training for a low-level rating in an aircraft of the specified category Conduct flight training for a low-level endorsement, except an endorsement mentioned in item 8 or 9 of table 61.1075, for the specified aircraft category	Commercial pilot licence or air transport pilot licence Low-level rating
12	Aerial application rating (day) training endorsement (category specific)	Conduct flight training for an aerial application rating in an aircraft of the specified category Conduct flight training for an aerial application endorsement mentioned in Part 1 or 2 of table 61.1120 for the specified aircraft category	Commercial pilot licence or air transport pilot licence Aerial application rating Aerial application endorsement for the specified aircraft category At least 100 hours of aeronautical experience in aerial application operations below 500 ft AGL
13	Aerial application rating (night) training endorsement (category specific)	Conduct flight training for an aerial application rating in an aircraft of the specified category Conduct flight training for an aerial application endorsement mentioned in Part 3 of table 61.1120 for the specified aircraft category	Commercial pilot licence or air transport pilot licence Aerial application rating Night aerial application endorsement for the specified aircraft category
14	Instructor rating training endorsement (category specific)	Conduct flight training for a flight instructor rating, simulator instructor rating or training endorsement in an aircraft of the specified category	Commercial pilot licence or air transport pilot licence
15	Multi-engine aeroplane class rating instructor training endorsement	Conduct flight training for a class rating (multi-engine aeroplane) training endorsement	Commercial pilot licence or air transport pilot licence with aeroplane category rating Grade 1 training endorsement (aeroplane) or type rating training endorsement for a type of multi-engine aeroplane

Table 61.1235 Training endorsements

Item	Column 1 Endorsement	Column 2 Activities authorised	Column 3 Requirements
<i>Part 3—Training for flight activity and low-level endorsements</i>			
16	Sling operations training endorsement	Conduct flight training for a sling operations endorsement	Commercial pilot licence or air transport pilot licence with helicopter category rating Low-level rating Sling operations endorsement
17	Winch and rappelling operations training endorsement	Conduct flight training for a winch and rappelling operations endorsement	Commercial pilot licence or air transport pilot licence with helicopter category rating Low-level rating Winch and rappelling operations endorsement
18	Spinning training endorsement	Conduct flight training for a spinning flight activity endorsement	Private pilot licence, commercial pilot licence or air transport pilot licence Spinning flight activity endorsement
19	Aerobatics training endorsement	Conduct flight training for any of the following endorsements: (a) aerobatics flight activity endorsement; (b) aerobatics (1 500) flight activity endorsement; (ba) aerobatics (1 000) flight activity endorsement; (c) aerobatics (500) flight activity endorsement; (d) aerobatics (unlimited) flight activity endorsement; (e) formation aerobatics flight activity endorsement	Private pilot licence, commercial pilot licence or air transport pilot licence Spinning flight activity endorsement Aerobatics flight activity endorsement
20	Formation (aeroplane) training endorsement	Conduct flight training for a formation flying (aeroplane) flight activity endorsement	Private pilot licence, commercial pilot licence or air transport pilot licence with aeroplane category rating Formation flying (aeroplane) flight activity endorsement
21	Formation (helicopter) training endorsement	Conduct flight training for a formation flying (helicopter) flight activity endorsement	Private pilot licence, commercial pilot licence or air transport pilot licence with helicopter category rating Formation flying (helicopter) flight activity endorsement

Part 61 Flight crew licensing

Subpart 61.T Pilot instructor ratings

Division 61.T.4 Privileges and requirements for grant of training endorsements

Regulation 61.1240

Table 61.1235 Training endorsements

Item	Column 1 Endorsement	Column 2 Activities authorised	Column 3 Requirements
22	Formation aerobatics training endorsement	Conduct flight training for a formation aerobatics flight activity endorsement	Private pilot licence, commercial pilot licence or air transport pilot licence with aeroplane category rating Formation aerobatics flight activity endorsement

61.1240 Privileges of training endorsements

- (1) Subject to Subpart 61.E, Divisions 61.T.1 and 61.T.2 and regulations 61.1245 to 61.1247, the holder of an endorsement mentioned in column 1 of an item in table 61.1235 is authorised to:
 - (a) conduct the activities mentioned in column 2 of the item; and
 - (b) grant an endorsement mentioned in column 2 of the item that does not require a flight test.

Note: Subpart 61.E sets out certain limitations that apply to all pilot licences, and ratings and endorsements on pilot licences.

- (2) However, the holder of a grade 3 training endorsement is not authorised to grant a recreational pilot licence endorsement.

61.1245 Limitations on exercise of privileges of training endorsements—general

- (1) The holder of an endorsement mentioned in column 1 of an item in table 61.1235 is authorised to conduct an activity mentioned in column 2 of the item in an aircraft only if the holder is authorised to exercise the privileges of each licence, rating or endorsement mentioned in column 3 of the item in the aircraft.
- (2) The holder of an endorsement mentioned in column 1 of an item in table 61.1235 is authorised to conduct an activity mentioned in column 2 of the item in a flight simulation training device only if the holder holds each licence, rating or endorsement mentioned in column 3 of the item.

61.1246 Limitations on exercise of privileges of grade 3 training endorsements

- (1) The holder of a grade 3 training endorsement is authorised to conduct an activity mentioned in column 2 of item 3 or 3A in table 61.1235 only if the holder is acting under the supervision of the holder of a grade 1 training endorsement.
- (2) The holder of a grade 3 training endorsement is authorised to pilot an aircraft in the exercise of the privileges of the endorsement only by day under the VFR.
- (3) The holder of a grade 3 training endorsement (helicopter) is authorised to conduct flight training involving a simulated engine failure only if the holder has completed at least 100 hours of flight training under the endorsement.

61.1247 Limitations on exercise of privileges of low level training endorsements

The holder of a low-level training endorsement is authorised to conduct flight training for a low-level endorsement only if the holder:

- (a) holds the low-level endorsement; and
- (b) has at least 5 hours aeronautical experience conducting the activity authorised by the low-level endorsement.

61.1248 Limitation on exercise of privileges of helicopter grade 2 training endorsements

The holder of a grade 2 training endorsement (helicopter) that is granted on the basis of regulation 202.272 is authorised to conduct the activities mentioned in column 2 of item 2 of table 61.1235 only if the holder meets the requirements mentioned in column 3 of the item.

61.1250 Requirements for grant of training endorsements

- (1) An applicant for an endorsement mentioned in an item in table 61.1235 must hold:
 - (a) an instructor rating; and
 - (b) each other licence, rating or endorsement (if any) mentioned in column 3 of the item.

Note: Subregulation (1) is satisfied, in relation to a required licence, rating or endorsement, if the applicant holds a certificate of validation of an overseas flight crew licence, rating or endorsement that is equivalent to the required licence, rating or endorsement: see item 36 of Part 2 of the Dictionary.

- (2) The applicant must also have:
 - (a) met the aeronautical experience requirements (if any) mentioned in column 3 of the item; and
 - (b) completed flight training for the endorsement; and
 - (c) passed the flight test mentioned in the Part 61 Manual of Standards for the endorsement; and
 - (d) for an applicant for a multi-crew pilot training endorsement—completed an approved course of training in multi-crew co-operation.

Note 1: For paragraph (a), for the determination of a person's flight time and other aeronautical experience, see Division 61.A.2.

Note 2: For paragraph (b), for the requirements for flight training, see Division 61.B.2.

Note 3: For paragraph (c), for the conduct of flight tests, see Division 61.B.4.

- (3) Despite paragraph 61.245(1)(a), the flight test (if any) may be conducted in an approved flight simulation training device for the flight test.

Subpart 61.U—Flight examiner ratings

Division 61.U.1—Privileges and requirements for grant of flight examiner ratings

61.1255 Privileges of flight examiner ratings

Subject to Subpart 61.E and regulations 61.1265 to 61.1285, a flight examiner is authorised:

- (a) to conduct flight tests for the grant of:
 - (i) pilot licences; and
 - (ii) ratings on pilot licences, other than cruise relief flight engineer type ratings; and
 - (iii) endorsements on pilot licences; and
- (b) to grant to holders of pilot licences:
 - (i) ratings, other than:
 - (A) flight examiner ratings; and
 - (B) cruise relief flight engineer type ratings; and
 - (ii) endorsements, other than flight test endorsements; and
- (c) to conduct the following proficiency checks for holders of pilot licences:
 - (i) instrument proficiency checks;
 - (ii) night vision imaging system proficiency checks;
 - (iii) aerial application proficiency checks;
 - (iv) instructor proficiency checks;
 - (v) operator proficiency checks; and
- (d) to conduct assessments of English language proficiency.

Note: Subpart 61.E sets out certain limitations that apply to all pilot licences, and ratings and endorsements on pilot licences.

61.1265 Limitations on exercise of privileges of flight examiner ratings—endorsements

- (1) A flight examiner is authorised to conduct a flight test, or grant a rating or endorsement, mentioned in column 2 of an item in Part 1 of table 61.1310 only if the examiner also holds the endorsement mentioned in column 1 of the item.
- (2) A flight examiner is authorised to conduct a flight test for a rating or endorsement, or grant a rating or endorsement on a pilot licence, only if the examiner:
 - (a) also holds a rating or endorsement of the same kind; or
 - (b) holds an approval under regulation 61.040 to conduct the flight test.
- (3) A flight examiner is authorised to conduct an instrument proficiency check only if the examiner also holds an instrument rating flight test endorsement.

- (4) A flight examiner is authorised to conduct a night vision imaging system proficiency check only if the examiner also holds a night vision imaging system rating flight test endorsement.
- (5) A flight examiner is authorised to conduct an aerial application proficiency check only if the examiner also holds an aerial application rating flight test endorsement.
- (6) A flight examiner is authorised to conduct an instructor proficiency check only if the examiner also holds a flight instructor rating flight test endorsement.
- (7) A flight examiner is authorised to conduct an activity mentioned in column 2 of item 12 of table 61.1310 only if the examiner also holds an English language assessment endorsement.

61.1270 Limitations on exercise of privileges of flight examiner ratings—professional development

A flight examiner is authorised to exercise the privileges of his or her flight examiner rating only if the examiner has, during the previous 24 months, successfully completed:

- (a) a professional development program conducted by CASA; or
- (b) an approved course of professional development conducted by the holder of an approval under regulation 61.040 to conduct the course.

61.1275 Limitations on exercise of privileges of flight examiner ratings—recent experience

- (1) A flight examiner is authorised to conduct a flight test for a pilot licence only if, when the flight test is conducted, the examiner meets the recent experience requirements mentioned in this Part for the exercise of the privileges of the licence.
- (2) A flight examiner is authorised to conduct a flight test for a rating on a pilot licence only if, when the flight test is conducted, the examiner meets the recent experience requirements mentioned in this Part for the exercise of the privileges of the rating.
- (3) A flight examiner is authorised to conduct a flight test for an endorsement on a pilot licence only if, when the flight test is conducted, the examiner meets the recent experience requirements mentioned in this Part for the exercise of the privileges of the rating to which the endorsement relates.

61.1280 Limitations on exercise of privileges of flight examiner ratings—flight reviews and subject matter proficiency checks

- (1) A flight examiner is authorised to conduct a flight test for a pilot licence only if, when the flight test is conducted, the examiner:
 - (a) for a multi-crew pilot licence—has a valid instrument proficiency check, under regulation 61.650, for the aeroplane category; or

Part 61 Flight crew licensing

Subpart 61.U Flight examiner ratings

Division 61.U.1 Privileges and requirements for grant of flight examiner ratings

Regulation 61.1285

- (b) for an air transport pilot licence—has a valid instrument proficiency check, under regulation 61.695, for the category of aircraft in which the flight test is conducted.
- (2) A flight examiner is authorised to conduct a flight test for a rating on a pilot licence only if, when the flight test is conducted, the examiner:
 - (a) for an instrument rating—has a valid instrument proficiency check, under regulation 61.880, for the category of aircraft in which the flight test is conducted; or
 - (b) for a night vision imaging system rating—has a valid night vision imaging system proficiency check under regulation 61.1015; or
 - (c) for an aerial application rating—has a valid aerial application proficiency check under regulation 61.1110; or
 - (d) for an instructor rating—has a valid instructor proficiency check under regulation 61.1180; or
 - (e) for any other rating—meets the flight review requirements for the rating.
- (3) A flight examiner is authorised to conduct a flight test for an endorsement on a pilot licence only if, when the flight test is conducted, the examiner:
 - (a) for an instrument endorsement—has a valid instrument proficiency check, under regulation 61.880, for the category of aircraft in which the flight test is to be conducted; or
 - (b) for a night vision imaging system endorsement—has a valid night vision imaging system proficiency check under regulation 61.1015; or
 - (c) for an aerial application endorsement—has a valid aerial application proficiency check under regulation 61.1110; or
 - (d) for a training endorsement—has a valid instructor proficiency check under regulation 61.1180; or
 - (e) for any other endorsement—meets the flight review requirements for the rating to which the endorsement relates.

**61.1285 Limitations on exercise of privileges of flight examiner ratings—
examiner proficiency check**

- (1) The holder of a flight examiner rating is authorised to exercise the privileges of the rating only if the holder has a valid examiner proficiency check.
- (2) For subregulation (1), the holder is taken to have a valid examiner proficiency check during the following periods:
 - (a) the period from when the holder passes the flight test for the rating to the end of the 24th month after the month in which the holder passes the flight test;
 - (b) if:
 - (i) the holder passes the flight test for a flight examiner endorsement; and
 - (ii) the flight test is conducted more than 6 months after the holder passes the flight test for the rating;

the period from when the holder passes the flight test for the endorsement to the end of the 24th month after the month in which the holder passes the flight test for the endorsement;

- (c) if the holder successfully completes an examiner proficiency check—the period from when the holder successfully completes the check to the end of the 24th month after the month in which the holder successfully completes the check;
- (d) if:
 - (i) the holder is taken to have a valid examiner proficiency check under any of paragraphs (a) to (c) (the *existing check*); and
 - (ii) within 3 months before the validity of the existing check expires, the holder successfully completes an examiner proficiency check;the period from when the validity of the existing check expires to the end of the 24th month after the validity of the existing check expires.

- (3) However, if, at any time, the holder attempts, but does not successfully complete, an examiner proficiency check, the holder is no longer taken to have a valid examiner proficiency check.
- (4) For paragraphs (2)(c) and (d), the holder successfully completes an examiner proficiency check if:
 - (a) the examiner proficiency check is conducted in an aircraft or an approved flight simulation training device for the proficiency check; and
 - (b) a person mentioned in subregulation (5) assesses the holder's competency to conduct flight testing as meeting the standards mentioned in the Part 61 Manual of Standards for a flight examiner rating; and
 - (c) the person endorses the holder's licence document to the effect that the holder has completed the examiner proficiency check on the date stated.
- (5) For paragraph (4)(b), the persons are as follows:
 - (a) CASA;
 - (b) the holder of an approval under regulation 61.040 to conduct the proficiency check.

61.1290 Requirements for grant of flight examiner ratings

- (1) An applicant for a flight examiner rating must:
 - (a) hold a commercial pilot licence or air transport pilot licence; and
 - (b) meet the requirements for the grant of at least one flight test endorsement.

Note: Paragraph (a) is satisfied if the applicant holds a certificate of validation of an overseas flight crew licence that is equivalent to a commercial pilot licence or air transport pilot licence: see item 36 of Part 2 of the Dictionary.
- (2) The applicant must also have:
 - (a) completed a course of training for the rating that:
 - (i) is conducted by CASA or the holder of an approval under regulation 61.040 to conduct the course; and

Part 61 Flight crew licensing

Subpart 61.U Flight examiner ratings

Division 61.U.1 Privileges and requirements for grant of flight examiner ratings

Regulation 61.1290

- (ii) includes the content mentioned in the Part 61 Manual of Standards for the course; and
- (b) passed the flight test mentioned in the Part 61 Manual of Standards for the flight examiner rating; and
- (c) successfully completed an interview conducted by CASA.

Note: For paragraph (b), for the conduct of flight tests, see Division 61.B.4.

- (3) For paragraph (2)(c), an applicant successfully completes an interview if the applicant satisfies CASA that he or she has the necessary skills and experience to be granted a flight examiner rating.

Division 61.U.2—Obligations of flight examiners

61.1295 Obligations of flight examiners—flight tests: strict liability offences

- (1) A flight examiner commits an offence if the examiner:
- (a) conducts a flight test for an applicant for a pilot licence or a rating or endorsement on a pilot licence; and
 - (b) is not nominated to conduct the flight test:
 - (i) by the applicant’s training provider under subregulation 61.245(3); or
 - (ii) by CASA under subregulation 61.245(4).

Penalty: 50 penalty units.

- (3) A flight examiner commits an offence if the examiner:
- (a) conducts a flight test for a pilot licence or a rating or endorsement on a pilot licence; and
 - (b) does not:
 - (i) conduct the flight test in accordance with the standards mentioned in the Part 61 Manual of Standards; and
 - (ii) assess the applicant for the licence, rating or endorsement against the competency standards mentioned in the Part 61 Manual of Standards for the flight test.

Penalty: 50 penalty units.

- (4) A flight examiner commits an offence if the examiner:
- (a) conducts a flight test for a pilot licence or a rating or endorsement on a pilot licence; and
 - (b) does not:
 - (i) at the completion of the flight test, advise the applicant and the Part 141 or 142 operator responsible for the applicant’s training of the result of the flight test, including the reasons for any failure in an element of the flight test; and
 - (ii) within 14 days after the day of the completion of the flight test:
 - (A) complete a report, in an approved form, setting out the result of the flight test; and
 - (B) give a completed copy of the report to the applicant, the Part 141 or 142 operator and CASA.

Penalty: 50 penalty units.

- (5) A flight examiner commits an offence if the examiner:
- (a) conducts a flight test for a pilot licence or a rating or endorsement on a pilot licence; and
 - (b) has not notified CASA of the examiner’s intention to conduct the flight test at least 24 hours before conducting the flight test.

Regulation 61.1300

Penalty: 50 penalty units.

- (6) An offence against this regulation is an offence of strict liability.

61.1300 Obligations of flight examiners—flight tests: other offences

- (1) A flight examiner commits an offence if:
- (a) the examiner conducts a flight test for a pilot licence; and
 - (b) when the test begins, the examiner is not satisfied that the applicant:
 - (i) is at least the minimum age to hold the licence; and
 - (ii) has passed the aeronautical knowledge examination for the licence; and
 - (iii) has met the flight training requirements for the grant of the licence; and
 - (iv) has met the aeronautical experience requirements for the licence.

Penalty: 50 penalty units.

- (2) A flight examiner commits an offence if:
- (a) the examiner conducts a flight test for any of the following licences:
 - (i) a private pilot licence;
 - (ii) a commercial pilot licence;
 - (iii) a multi-crew pilot licence;
 - (iv) an air transport pilot licence; and
 - (b) when the test begins, the examiner is not satisfied that the applicant has a current aviation English language proficiency assessment.

Penalty: 50 penalty units.

- (3) A flight examiner commits an offence if:
- (a) the examiner conducts a flight test for a pilot licence in an aircraft; and
 - (b) when the test begins, the examiner is not satisfied that:
 - (i) if the test is for a licence other than a recreational pilot licence—the applicant holds:
 - (A) a current medical certificate of the class required for the exercise of the privileges of the licence; or
 - (B) a medical exemption to exercise the privileges of the licence; or
 - (ii) if the test is for a recreational pilot licence—the applicant holds:
 - (A) a current class 1 or 2 medical certificate or recreational aviation medical practitioner's certificate; or
 - (B) a medical exemption for the exercise of the privileges of the licence.

Penalty: 50 penalty units.

- (4) A flight examiner commits an offence if:

Regulation 61.1305

- (a) the examiner conducts a flight test for a rating or endorsement on a pilot licence; and
- (b) when the test begins, the examiner is not satisfied that the applicant:
 - (i) has passed the aeronautical knowledge examination for the rating or endorsement; and
 - (ii) has met the flight training requirements for the grant of the rating or endorsement; and
 - (iii) has met the aeronautical experience requirements for the rating or endorsement.

Penalty: 50 penalty units.

- (5) A flight examiner commits an offence if:
 - (a) the examiner conducts a flight test for a rating or endorsement on a pilot licence in an aircraft; and
 - (b) when the test begins, the examiner is not satisfied that the applicant holds:
 - (i) a current class 1 or 2 medical certificate or recreational aviation medical practitioner's certificate; or
 - (ii) a medical exemption for the exercise of the privileges of the rating.

Penalty: 50 penalty units.

61.1305 Obligations of flight examiners—proficiency checks

- (1) A flight examiner commits an offence if:
 - (a) the examiner conducts a relevant proficiency check for the holder of a pilot licence; and
 - (b) the holder successfully completes the proficiency check; and
 - (c) the examiner does not, within 14 days after the day the holder successfully completes the proficiency check:
 - (i) endorse the holder's licence document in accordance with subregulation (2); and
 - (ii) give CASA a written notice that complies with subregulation (3).

Penalty: 50 penalty units.

- (2) For subparagraph (1)(c)(i), the following details must be endorsed on the licence document:
 - (a) a statement to the effect that the holder has successfully completed the proficiency check;
 - (b) the date on which the proficiency check was successfully completed;
 - (c) the rating for which the proficiency check was conducted; and
 - (d) if the proficiency check related to a category, class or type of aircraft—the category, class or type.
- (3) For subparagraph (1)(c)(ii), the notice must state the following:
 - (a) the holder's name and ARN;
 - (b) that the holder has successfully completed the proficiency check;

Regulation 61.1305

- (c) the date on which the proficiency check was successfully completed;
 - (d) the rating for which the proficiency check was conducted;
 - (e) if the proficiency check related to a category, class or type of aircraft—the category, class or type;
 - (f) if the proficiency check was conducted in an aircraft—the aircraft’s nationality and registration marks;
 - (g) if the proficiency check was conducted in a flight simulator—the identifying number for the flight simulator stated on its flight simulator qualification certificate.
- (3A) A flight examiner commits an offence if:
- (a) the examiner conducts a relevant proficiency check; and
 - (b) the examiner has not notified CASA of the examiner’s intention to conduct the proficiency check at least 24 hours before conducting the proficiency check; and
 - (c) the examiner does not hold, under regulation 61.040, an approval to conduct the proficiency check without notifying CASA of his or her intention to conduct the proficiency check.

Penalty: 50 penalty units.

- (4) An offence against this regulation is an offence of strict liability.
- (5) In this regulation:

relevant proficiency check means any of the following:

- (a) an aerial application proficiency check;
- (b) an instructor proficiency check;
- (c) an instrument proficiency check;
- (d) a night vision imaging system proficiency check.

Division 61.U.3—Privileges and requirements for grant of flight examiner endorsements

61.1310 Kinds of flight examiner endorsement

The kinds of flight examiner endorsement are set out in column 1 of table 61.1310.

Table 61.1310 Flight examiner endorsements

Item	Column 1 Endorsement	Column 2 Activities authorised	Column 3 Requirements
<i>Part 1—Flight test endorsements</i>			
1	Private pilot licence flight test endorsement (category specific)	Conduct a flight test for any of the following authorisations in an aircraft of the specified category: (a) recreational pilot licence; (b) private pilot licence; (c) the specified aircraft category rating on a recreational pilot licence or private pilot licence; (d) single-engine aeroplane class rating; (e) single-engine helicopter class rating; (f) single-engine gyroplane class rating; (g) airship class rating	Grade 1 training endorsement
2	Commercial pilot licence flight test endorsement (category specific)	Conduct a flight test for an authorisation mentioned in column 2 of item 1 Conduct a flight test for any of the following authorisations in an aircraft of the specified category: (a) commercial pilot licence; (b) the specified aircraft category rating on a commercial pilot licence	Grade 1 training endorsement

Part 61 Flight crew licensing

Subpart 61.U Flight examiner ratings

Division 61.U.3 Privileges and requirements for grant of flight examiner endorsements

Regulation 61.1310

Table 61.1310 Flight examiner endorsements

Item	Column 1 Endorsement	Column 2 Activities authorised	Column 3 Requirements
3	Air transport pilot licence flight test endorsement (category specific)	Conduct a flight test for any of the following authorisations in an aircraft of the specified category: (a) multi-crew pilot licence; (b) air transport pilot licence; (c) the specified aircraft category rating on an air transport pilot licence; (d) if the aeroplane category is specified—multi-engine aeroplane class ratings; (e) instrument rating	Air transport pilot licence with the specified aircraft category rating Instrument rating flight test endorsement
4	Multi-engine aeroplane class rating flight test endorsement	Conduct a flight test for a multi-engine aeroplane class rating	Multi-engine aeroplane training endorsement
5	Type rating flight test endorsement (type specific)	Conduct a flight test for either of the following ratings in an aircraft of the specified type: (a) pilot type rating; (b) cruise relief co-pilot type rating	Type rating training endorsement for the specified aircraft type
6	Instrument rating flight test endorsement (category specific)	Conduct a flight test in an aircraft of the specified category for any of the following: (a) instrument rating; (b) private instrument rating; (c) instrument endorsement; (d) private instrument endorsement Conduct an instrument proficiency check in an aircraft of the specified category	Instrument rating training endorsement for the specified aircraft category
7	Night VFR rating flight test endorsement (category specific)	Conduct a flight test for a night VFR rating or night VFR endorsement in an aircraft of the specified category	Night VFR rating training endorsement for the specified aircraft category

Table 61.1310 Flight examiner endorsements

Item	Column 1 Endorsement	Column 2 Activities authorised	Column 3 Requirements
8	Night vision imaging system rating flight test endorsement	Conduct a flight test for a night vision imaging system rating or night vision imaging system endorsement Conduct a night vision imaging system proficiency check	Night vision imaging system training endorsement
9	Low-level rating flight test endorsement (category specific)	Conduct a flight test for a low-level rating or low-level endorsement in an aircraft of the specified category	Low-level training endorsement for the specified aircraft category
10	Aerial application rating flight test endorsement (category specific)	Conduct a flight test for any of the following in an aircraft of the specified category: (a) aerial application rating; (b) aerial application endorsement; (c) low-level rating; (d) low-level endorsement Conduct an aerial application proficiency check in an aircraft of the specified category	Aerial application (day) training endorsement for the specified aircraft category
11	Flight instructor rating flight test endorsement (category specific)	Conduct a flight test for any of the following in an aircraft of the specified category: (a) flight instructor rating; (b) simulator instructor rating; (c) training endorsement Conduct an instructor proficiency check in an aircraft of the specified category	Grade 1 training endorsement for the specified aircraft category
<i>Part 2—Other flight examiner endorsements</i>			
12	English language assessment endorsement	Conduct a level 6 aviation English language proficiency assessment Conduct a general English language proficiency assessment	Any of the following endorsements: (a) private pilot licence flight test endorsement; (b) commercial pilot licence flight test endorsement; (c) pilot type rating flight test endorsement

Part 61 Flight crew licensing

Subpart 61.U Flight examiner ratings

Division 61.U.3 Privileges and requirements for grant of flight examiner endorsements

Regulation 61.1315

61.1315 Privileges of flight examiner endorsements

Subject to Subpart 61.E and Division 61.U.1, the holder of an endorsement mentioned in column 1 of an item in table 61.1310 is authorised to conduct each activity mentioned in column 2 of the item.

Note: Subpart 61.E sets out certain limitations that apply to all pilot licences, and ratings and endorsements on pilot licences.

61.1318 Limitations on exercise of privileges of flight examiner endorsements—flight tests in aircraft

The holder of a flight test endorsement is authorised to conduct a flight test under the endorsement in an aircraft only if the flight test for the examiner's flight test endorsement was conducted in an aircraft.

61.1320 Requirements for grant of flight examiner endorsements

- (1) An applicant for an endorsement mentioned in column 1 of an item in table 61.1310 must hold:

- (a) a flight examiner rating; and
- (b) the licences and endorsements mentioned in column 3 of the item.

Note: Subregulation (1) is satisfied, in relation to a required licence, rating or endorsement, if the applicant holds a certificate of validation of an overseas flight crew licence, rating or endorsement that is equivalent to the required licence, rating or endorsement: see item 36 of Part 2 of the Dictionary.

- (2) An applicant for an endorsement mentioned in column 1 of an item in Part 1 of table 61.1310 must also have:

- (a) completed a course of training for the endorsement that:
 - (i) is conducted by CASA or the holder of an approval under regulation 61.040 to conduct the course; and
 - (ii) includes the content mentioned in the Part 61 Manual of Standards for the course; and
- (b) passed the flight test mentioned in the Part 61 Manual of Standards for the grant of the endorsement.

Note: For paragraph (b), for the conduct of flight tests, see Division 61.B.4.

- (3) An applicant for an English language assessment endorsement must also have:

- (a) completed training in the assessment of aviation English language proficiency to the ICAO standards conducted by CASA or the holder of an approval under regulation 61.040 to conduct the training; and
- (b) been assessed by CASA or the approval holder as competent to assess aviation English language proficiency to the ICAO standards; and
- (c) successfully completed an interview conducted by CASA or the holder of an approval under regulation 61.040 to conduct the interview.

- (4) For paragraph (3)(c), an applicant successfully completes an interview if the applicant satisfies CASA or the approval holder that he or she understands the standards for assessment of aviation English language proficiency.

Subpart 61.V—Flight engineer licences

61.1325 Privileges of flight engineer licences

Subject to regulations 61.1330 to 61.1352, the holder of a flight engineer licence is authorised to act as flight engineer of an aircraft certificated to be operated with a minimum flight crew that includes a flight engineer.

61.1330 Limitations on exercise of privileges of flight engineer licences—ratings

- (1) The holder of a flight engineer licence is authorised to exercise the privileges of the licence in an aircraft of a particular type only if the holder also holds the flight engineer type rating for the aircraft.
- (2) The holder of a flight engineer licence is authorised to conduct an activity mentioned in regulation 61.1395 (Privileges of flight engineer instructor ratings) only if the holder also holds a flight engineer instructor rating.
- (3) The holder of a flight engineer licence is authorised to conduct an activity mentioned in regulation 61.1445 (Privileges of flight engineer examiner ratings) only if the holder also holds a flight engineer examiner rating.

Note: In certain circumstances, a person may act as flight engineer of an aircraft of a particular type if he or she holds a pilot licence and a cruise relief flight engineer type rating for that type of aircraft: see regulation 61.830.

61.1335 Limitations on exercise of privileges of flight engineer licences—recent experience

- (1) The holder of a flight engineer licence is authorised to act as the flight engineer of an aircraft of a particular type only if the holder has, within the previous 90 days:
 - (a) performed the duties of a flight engineer by day or night during at least 3 take-offs and at least 3 landings in an aircraft of that type or an approved flight simulation training device for the purpose; or
 - (b) as a member of the flight crew of an aircraft, observed a flight engineer perform the duties of a flight engineer by day or night during at least 3 take-offs and at least 3 landings in an aircraft of that type or an approved flight simulation training device for the purpose.
- (2) For paragraphs (1)(a) and (b), each take-off must be followed by a climb to at least 500 ft AGL.
- (3) The holder is taken to meet the requirements of subregulation (1) if:
 - (a) within the previous 90 days, in an aircraft of that type or an approved flight simulator for the purpose, the holder has:
 - (i) successfully completed an instructor proficiency check, operator proficiency check or flight review; or

- (ii) passed a flight test for a flight engineer licence or a rating on a flight engineer licence; or
- (b) both:
 - (i) the holder is successfully participating in an operator's training and checking system for an operation in an aircraft of that type; and
 - (ii) the operator holds an approval under regulation 61.040 for the system for this subregulation and operations in aircraft of that type.

61.1340 Limitations on exercise of privileges of flight engineer licences—flight review

- (1) For this Part, successful completion of a flight review for a rating on a flight engineer licence requires demonstration, to a person mentioned in subregulation (2), that the holder of the rating is competent in each unit of competency mentioned in the Part 61 Manual of Standards for the rating.
- (2) For subregulation (1), the persons are as follows:
 - (a) CASA;
 - (b) the holder of an approval under regulation 61.040 for this regulation;
 - (c) a flight engineer instructor who holds a training endorsement that authorises the person to conduct flight training for the rating.
- (3) The flight review must be conducted in an aircraft or approved flight simulator for the flight review.

61.1345 Limitations on exercise of privileges of flight engineer licences—current medical certificates

The holder of a flight engineer licence is authorised to exercise the privileges of the licence only if the holder also holds:

- (a) a class 1 or 2 medical certificate; or
- (b) a medical exemption for the exercise of the privileges of the licence.

Note: A licence holder must not exercise the privileges of his or her licence and rating during any period of temporary medical unfitness that could render the holder unable to exercise those privileges safely: see regulation 67.270.

61.1350 Limitations on exercise of privileges of flight engineer licences—carriage of documents

The holder of a flight engineer licence is authorised to exercise the privileges of the licence on a flight only if the holder carries the following documents on the flight:

- (a) his or her licence document;
- (b) unless the holder holds a medical exemption for the exercise of the privileges of the licence—his or her medical certificate;
- (ba) if the holder holds a medical exemption for the exercise of the privileges of the licence—a copy of the exemption;

Regulation 61.1352

- (c) a document that includes a photograph of the holder showing the holder's full face and his or her head and shoulders:
 - (i) that was issued within the previous 10 years by the government, or a government authority, of:
 - (A) the Commonwealth or a State or Territory; or
 - (B) a foreign country, or a state or province (however described) of a foreign country; and
 - (ii) that has not expired or been cancelled.

61.1352 Limitations on exercise of privileges of flight engineer licences—aviation English language proficiency

- (1) The holder of a flight engineer licence is authorised to exercise the privileges of the licence only if the holder has a current aviation English language proficiency assessment.
- (2) Subregulation (3) applies to the holder of a flight engineer licence that was granted on the basis of regulation 202.272 if the licence was granted in recognition of an old authorisation (within the meaning of regulation 202.261) that was granted on or before 4 March 2008.
- (3) Subregulation (1) does not apply to the holder in relation to the exercise of the privileges of his or her licence in Australian Territory.

61.1355 Certain holders of flight engineer licences authorised to operate aircraft radio

- (1) A person is authorised to transmit on an aviation safety radio frequency if the person holds a flight engineer licence.
- (2) For regulation 61.1345, transmitting on an aviation safety radio frequency does not constitute the exercise of the privileges of a licence.

Note 1: A person is prohibited from transmitting on an aviation safety radio frequency unless the person is authorised or qualified to do so: see regulation 91.625.

Note 2: For the definition of *aviation safety radio frequency*, see the Dictionary.

61.1360 Requirements for grant of flight engineer licences

- (1) An applicant for a flight engineer licence must be at least 18.
- (2) The applicant must meet the requirements for the grant of at least one flight engineer type rating.
- (3) The applicant must also have:
 - (a) passed the aeronautical knowledge examination for the flight engineer licence; and
 - (b) completed flight training for the flight engineer licence; and
 - (d) passed the flight test mentioned in the Part 61 Manual of Standards for the flight engineer licence; and

Regulation 61.1360

(e) at least 100 hours of aeronautical experience performing the duties of a flight engineer under the direct supervision of a flight engineer instructor.

- Note 1: For paragraph (a), for the conduct of aeronautical knowledge examinations, see Division 61.B.3.
- Note 2: For paragraph (b), for the requirements for flight training, see Division 61.B.2.
- Note 3: For paragraph (d), for the conduct of flight tests, see Division 61.B.4.
- Note 4: For paragraph (e), for the determination of a person's flight time and other aeronautical experience, see Division 61.A.2.

- (3A) If the applicant applies on or after 1 September 2015, the applicant must also have completed an approved course of training in multi-crew cooperation.
- (4) For paragraph (3)(e), up to 50 hours of the aeronautical experience may be completed as simulated flight engineer time.
- (5) The applicant is taken to meet the requirements of paragraph (3)(e) if:
- (a) the applicant holds:
 - (i) a commercial pilot licence with the aeroplane category rating; and
 - (ii) a pilot type rating for an aeroplane that is certificated for multi-crew operation; and
 - (b) the applicant has completed at least 50 hours of flight training performing the duties of a flight engineer under the direct supervision of a flight engineer instructor.

Subpart 61.W—Flight engineer type ratings

61.1365 Privileges of flight engineer type ratings

Subject to Subpart 61.V and regulations 61.1370 to 61.1380, the holder of a flight engineer type rating is authorised to act as the flight engineer of an aircraft covered by the rating.

Note 1: Subpart 61.V sets out certain limitations that apply to all flight engineer licences, and ratings and endorsements on flight engineer licences.

Note 2: The types for which flight engineer type ratings may be granted are set out in legislative instruments under regulations 61.055 (multi-crew aircraft) and 61.060 (single-pilot aircraft).

61.1370 Limitations on exercise of privileges of flight engineer type ratings—general

- (1) This regulation applies if:
 - (a) the holder of a flight engineer type rating passed the flight test for the rating in:
 - (i) an aircraft model covered by the rating (the *first variant*); or
 - (ii) a flight simulator that represents the first variant; and
 - (b) differences training is required by a legislative instrument under regulation 61.055 for another aircraft model covered by the rating (the *second variant*).
- (2) The holder is authorised to exercise the privileges of the rating in the second variant only if the holder has completed the differences training for the second variant.

61.1375 Limitations on exercise of privileges of flight engineer type ratings—recent experience on aircraft models

The holder of a flight engineer type rating is authorised to exercise the privileges of the rating in an aircraft model covered by the rating only if:

- (a) within the previous 24 months, the holder has:
 - (i) exercised the privileges of the rating in the aircraft model; or
 - (ii) passed the flight test for the rating in the aircraft model; or
 - (iii) successfully completed a flight review in the aircraft model; or
 - (iv) if differences training is required by an instrument under regulation 61.055 or 61.060 for the aircraft model—completed the differences training; or
- (b) both:
 - (i) the holder is successfully participating in an operator's training and checking system for an operation in the aircraft model; and

- (ii) the operator holds an approval under regulation 61.040 for the system for this regulation and operations in aircraft of that model.

**61.1380 Limitations on exercise of privileges of flight engineer type ratings—
flight review**

- (1) The holder of a flight engineer type rating is authorised to exercise the privileges of the rating only if the holder has, within the previous 24 months, successfully completed a flight review for the rating in accordance with subregulation (2).
- (2) For subregulation (1), the flight review must be conducted in:
 - (a) an aircraft of the type covered by the rating; or
 - (b) an approved flight simulator for the flight review.
- (3) The holder is taken to meet the requirements of subregulation (1) if the holder:
 - (a) has passed a flight test for the rating within the previous 24 months; or
 - (b) has successfully completed an operator proficiency check that covers operations in aircraft of the type covered by the rating within the previous 24 months; or
 - (c) both:
 - (i) the holder is successfully participating in an operator's training and checking system for an operation in an aircraft of the type covered by the rating; and
 - (ii) the operator holds an approval under regulation 61.040 for the system for this subregulation and operations in aircraft of that type.

Note: For general rules in relation to flight reviews, see regulation 61.1340.

61.1385 Requirements for grant of flight engineer type ratings

- (1) This regulation applies to an applicant for a flight engineer type rating if the applicant is not taken to meet the requirements for the grant of the rating under regulation 61.1390.
- (2) The applicant must hold a flight engineer licence.

Note: Subregulation (2) is satisfied if the applicant holds a certificate of validation of an overseas flight crew licence that is equivalent to a flight engineer licence: see item 36 of Part 2 of the Dictionary.

- (3) The applicant must also have:
 - (a) completed an approved course of training for the rating, that includes:
 - (i) theory and technical training; and
 - (ii) flight training in accordance with the approved course, consisting of:
 - (A) dual flight in an aircraft of the type covered by the rating; or
 - (B) dual simulated flight in an approved flight simulator for the training; and
 - (b) passed an examination, conducted by the Part 141 or 142 operator that conducted the training mentioned in paragraph (a), testing the applicant's

Regulation 61.1390

knowledge against the standards mentioned in the Part 61 Manual of Standards for the rating; and

- (c) passed the flight test mentioned in the Part 61 Manual of Standards for the rating.

Note 1: For paragraph (a), for the requirements for an approved course of training, see Division 61.B.2.

Note 2: For paragraph (c), for the conduct of flight tests, see Division 61.B.4.

- (4) For paragraph (3)(a), the approved course of training must be conducted by:
 - (a) a Part 141 or 142 operator that is authorised to conduct the training; or
 - (b) the holder of an approval under regulation 141.035 or 142.040 to conduct the training.

61.1390 Person taken to meet requirements for grant of flight engineer type rating—new type rating

A person is taken to meet the requirements for the grant of a flight engineer type rating (the *new type rating*) if:

- (a) the person holds a flight engineer type rating (the *old type rating*) covering 2 or more aircraft models that were, in accordance with a legislative instrument under regulation 61.055 (the *old legislative instrument*), variants of each other; and
- (b) as a result of a change to the legislative instrument, or the making of a new legislative instrument:
 - (i) the models are no longer variants of each other; and
 - (ii) one or more of the models is covered by the new type rating; and
- (c) one of the following applies:
 - (i) the person passed the flight test for the old type rating in:
 - (A) an aircraft model that is covered by the new type rating; or
 - (B) a flight simulator that represents an aircraft model covered by the new type rating;
 - (ii) differences training was not required by the old legislative instrument for the person to exercise the privileges of the old type rating in an aircraft covered by the new type rating;
 - (iii) both:
 - (A) differences training was required by the old legislative instrument for the person to exercise the privileges of the old type rating in an aircraft covered by the new type rating; and
 - (B) the person has completed the differences training.

Subpart 61.X—Flight engineer instructor ratings

Division 61.X.1—Privileges and requirements for grant of flight engineer instructor ratings

61.1395 Privileges of flight engineer instructor ratings

Subject to Subpart 61.V and regulations 61.1400 to 61.1410, a flight engineer instructor is authorised:

- (a) to conduct flight training for:
 - (i) flight engineer licences; and
 - (ii) ratings on flight engineer licences, other than flight engineer examiner ratings; and
 - (iii) endorsements on flight engineer licences, other than flight engineer flight test endorsements; and
 - (iv) cruise relief flight engineer type ratings; and
- (b) to grant flight engineer training endorsements; and
- (c) to conduct training in multi-crew cooperation; and
- (d) to conduct flight reviews required by this Part for flight engineer ratings, other than flight engineer examiner ratings; and
- (e) to approve a person who does not hold a flight engineer licence, or who holds a licence but does not hold a required rating or endorsement, to act as flight engineer of an aircraft for the purpose of flight training; and
- (f) to approve a person who does not hold a flight crew licence to transmit on an aviation safety radio frequency; and
- (g) to assess the standard of knowledge of an applicant for flight engineer licence in any items mentioned in the applicant's knowledge deficiency report.

Note: Subpart 61.V sets out certain limitations that apply to all flight engineer licences, and ratings and endorsements on flight engineer licences.

61.1400 Limitations on exercise of privileges of flight engineer instructor ratings—general

- (1) The holder of a flight engineer instructor rating is authorised to exercise the privileges of the rating in an aircraft of a particular type only if the instructor also holds a flight engineer type rating for that type of aircraft.
- (2) A flight engineer instructor is authorised to conduct flight training for a flight engineer licence or a rating on a flight engineer licence only if the instructor is engaged to conduct the flight training by a Part 141 or 142 operator that is authorised to conduct the flight training.

Regulation 61.1405

61.1405 Limitations on exercise of privileges of flight engineer instructor ratings—endorsements

- (1) A flight engineer instructor is authorised to conduct an activity mentioned in column 2 of an item in table 61.1430 only if the instructor also holds the flight engineer training endorsement mentioned in column 1 of the item.
- (2) A flight engineer instructor is authorised to grant an endorsement only if the instructor also holds a training endorsement required to conduct flight training for the endorsement.
- (3) A flight engineer instructor is authorised to make an assessment of a knowledge deficiency report for an applicant for a licence only if the instructor also holds a flight engineer training endorsement that authorises the instructor to provide flight training for the licence.

61.1410 Limitations on exercise of privileges of flight engineer instructor ratings—instructor proficiency check

- (1) The holder of a flight engineer instructor rating is authorised to exercise the privileges of the rating only if the holder has a valid instructor proficiency check.
- (2) For subregulation (1), the holder is taken to have a valid instructor proficiency check during the following periods:
 - (a) the period from when the holder passes the flight test for the rating to the end of the 24th month after the month in which the holder passes the flight test;
 - (b) if:
 - (i) the holder passes the flight test for a training endorsement; and
 - (ii) the flight test is conducted more than 6 months after the holder passes the flight test for the rating;the period from when the holder passes the flight test for the endorsement to the end of the 24th month after the month in which the holder passes the flight test for the endorsement;
 - (c) if the holder successfully completes an operator proficiency check that covers operations under the rating, and that is conducted by a flight engineer examiner who holds a flight engineer instructor rating flight test endorsement—the period from when the holder successfully completes the check to the end of the 24th month after the month in which the holder successfully completes the check;
 - (d) if:
 - (i) the holder is successfully participating in an operator's training and checking system for an operation under the rating; and
 - (ii) the operator holds an approval under regulation 61.040 for the system for this subregulation;the period during which the holder is successfully participating in the system;

Regulation 61.1415

- (e) if the holder successfully completes an instructor proficiency check—the period from when the holder successfully completes the check to the end of the 24th month after the month in which the holder successfully completes the check;
- (f) if:
 - (i) the holder is taken to have a valid instructor proficiency check under any of paragraphs (a) to (e) (the *existing check*); and
 - (ii) within 3 months before the validity of the existing check expires, the holder successfully completes an instructor proficiency check;
the period from when the validity of the existing check expires to the end of the 24th month after the validity of the existing check expires.
- (3) However, if, at any time, the holder attempts, but does not successfully complete, an instructor proficiency check, the holder is no longer taken to have a valid instructor proficiency check.
- (4) For paragraphs (2)(e) and (f), the holder successfully completes an instructor proficiency check if:
 - (a) the instructor proficiency check is conducted in an aircraft or an approved flight simulation training device for the proficiency check; and
 - (b) a person mentioned in subregulation (5) assesses the holder's competency to conduct flight training as meeting the standards mentioned in the Part 61 Manual of Standards for a flight engineer instructor rating; and
 - (c) the person endorses the holder's licence document to the effect that the holder has completed the instructor proficiency check on the date stated.
- (5) For paragraph (4)(b), the persons are as follows:
 - (a) CASA;
 - (b) a flight engineer examiner;
 - (c) the holder of an approval under regulation 61.040 to conduct the proficiency check.

61.1415 Requirements for grant of flight engineer instructor ratings

- (1) An applicant for a flight engineer instructor rating must:
 - (a) hold a flight engineer licence; and
 - (b) meet the requirements for the grant of at least one flight engineer training endorsement.

Note: Paragraph (a) is satisfied if the applicant holds a certificate of validation of an overseas flight crew licence that is equivalent to a flight engineer licence: see item 36 of Part 2 of the Dictionary.

- (2) The applicant must also have:
 - (a) passed an examination on the knowledge standards mentioned in the Part 61 Manual of Standards for the flight engineer instructor rating; and
 - (b) completed flight training for the rating; and
 - (c) passed the flight test mentioned in the Part 61 Manual of Standards for the flight engineer instructor rating.

Part 61 Flight crew licensing

Subpart 61.X Flight engineer instructor ratings

Division 61.X.1 Privileges and requirements for grant of flight engineer instructor ratings

Regulation 61.1415

Note 1: For paragraph (a), for the conduct of aeronautical knowledge examinations, see Division 61.B.3.

Note 2: For paragraph (b), for the requirements for flight training, see Division 61.B.2.

Note 3: For paragraph (c), for the conduct of flight tests, see Division 61.B.4.

- (3) The applicant must also:
- (a) have completed an approved course of training in principles and methods of instruction; or
 - (b) hold a Certificate IV in Training and Assessment; or
 - (c) hold a tertiary qualification in teaching.

Division 61.X.2—Obligations of flight engineer instructors

61.1420 Obligations of flight engineer instructors—training

- (1) A flight engineer instructor commits an offence if:
 - (a) the instructor conducts:
 - (i) flight training for a flight engineer type rating or a cruise relief flight engineer type rating; or
 - (ii) differences training;
in an aircraft; and
 - (b) regulation 61.205 prohibits the conduct of the training in the aircraft.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

61.1425 Obligations of flight engineer instructors—flight review

- (1) A flight engineer instructor commits an offence if:
 - (a) the instructor conducts a flight review for the holder of a flight engineer licence or a cruise relief flight engineer type rating; and
 - (b) the holder successfully completes the flight review; and
 - (c) the instructor does not, within 14 days after the day the flight review is successfully completed:
 - (i) endorse the holder's licence document in accordance with subregulation (2); and
 - (ii) give CASA a written notice that complies with subregulation (3).

Penalty: 50 penalty units.

- (2) For subparagraph (1)(c)(i), the following details must be endorsed on the licence document:
 - (a) a statement to the effect that the holder has successfully completed the flight review;
 - (b) the date on which the flight review was successfully completed;
 - (c) the rating for which the flight review was conducted.
- (3) For subparagraph (1)(c)(ii), the notice must state the following:
 - (a) the holder's name and ARN;
 - (b) that the holder has successfully completed the flight review;
 - (c) the date on which the flight review was successfully completed;
 - (d) the rating for which the flight review was conducted.
- (4) An offence against this regulation is an offence of strict liability.

Regulation 61.1427

61.1427 Obligations of flight engineer instructors—approval to operate aircraft radio

- (1) A flight engineer instructor commits an offence if:
- (a) the instructor approves a person who does not hold a flight crew licence (the *student*) to transmit on an aviation safety radio frequency; and
 - (b) the student is not qualified for approval.

Penalty: 50 penalty units.

- (2) For paragraph (1)(b), a student is qualified for approval only if:
- (a) the student has been assessed by CASA or an examiner as meeting the general English language proficiency standard mentioned in the Part 61 Manual of Standards; or
 - (b) the student has completed an approved course of training in English language proficiency.

Division 61.X.3—Privileges and requirements for grant of flight engineer training endorsements

61.1430 Kinds of flight engineer training endorsement

The kinds of flight engineer training endorsement are set out in column 1 of table 61.1430.

Table 61.1430 Flight engineer training endorsements

Item	Column 1 Endorsement	Column 2 Activities authorised	Column 3 Requirements
1	Flight engineer type rating training endorsement (type specific)	Conduct flight training for a flight engineer licence Conduct flight training for a flight engineer type rating for the specified aircraft type Conduct flight training for a cruise relief flight engineer type rating on a pilot licence for the specified aircraft type	At least 200 hours of flight time as a flight engineer At least 100 hours of flight time as flight engineer of an aircraft of the specified type
2	Flight engineer instructor rating training endorsement	Conduct flight training for a flight engineer instructor rating	At least 500 hours conducting flight training for the grant of a flight engineer licence or a rating on a flight engineer licence At least 200 hours conducting training for the grant of a flight engineer type rating

61.1435 Privileges of flight engineer training endorsements

Subject to Subpart 61.V and Division 61.X.1, the holder of an endorsement mentioned in column 1 of an item in table 61.1430 is authorised to conduct the activities mentioned in column 2 of the item.

Note: Subpart 61.V sets out certain limitations that apply to all flight engineer licences, and ratings and endorsements on flight engineer licences.

61.1440 Requirements for grant of flight engineer training endorsements

- (1) An applicant for an endorsement mentioned in column 1 of an item in table 61.1430 must hold a flight engineer instructor rating.

Note: Subregulation (1) is satisfied, in relation to a required rating, if the applicant holds a certificate of validation of a foreign licence, rating or endorsement that is equivalent to the rating: see item 36 of Part 2 of the Dictionary.

- (2) The applicant must also have:

Part 61 Flight crew licensing

Subpart 61.X Flight engineer instructor ratings

Division 61.X.3 Privileges and requirements for grant of flight engineer training endorsements

Regulation 61.1440

- (a) met the aeronautical experience requirements mentioned in column 3 of the item; and
- (b) completed flight training for the endorsement; and
- (c) passed the flight test mentioned in the Part 61 Manual of Standards for the endorsement.

Note 1: For paragraph (a), for the determination of a person's flight time and other aeronautical experience, see Division 61.A.2.

Note 2: For paragraph (b), for the requirements for flight training, see Division 61.B.2.

Note 3: For paragraph (c), for the conduct of flight tests, see Division 61.B.4.

- (3) An applicant for a flight engineer type rating training endorsement for a specified aircraft type must also hold the flight engineer type rating for the aircraft type.

Note: Subregulation (3) is satisfied, in relation to a required rating, if the applicant holds a certificate of validation of a foreign licence, rating or endorsement that is equivalent to the rating: see item 36 of Part 2 of the Dictionary.

Subpart 61.Y—Flight engineer examiner ratings

Division 61.Y.1—Privileges and requirements for grant of flight engineer examiner ratings

61.1445 Privileges of flight engineer examiner ratings

Subject to Subpart 61.V and regulations 61.1455 to 61.1470, a flight engineer examiner is authorised:

- (a) to conduct flight tests for the grant of:
 - (i) flight engineer licences; and
 - (ii) ratings or endorsements on flight engineer licences; and
 - (iii) cruise relief flight engineer type ratings; and
- (b) to grant to holders of flight engineer licences:
 - (i) ratings, other than flight engineer examiner ratings; and
 - (ii) endorsements, other than flight engineer examiner rating flight test endorsements; and
- (c) to grant cruise relief flight engineer type ratings; and
- (d) to conduct instructor proficiency checks for holders of flight engineer instructor ratings; and
- (e) to conduct training and checking of holders of flight engineer licences for AOC holders; and
- (f) to conduct flight training for flight engineer examiner ratings and flight engineer flight test endorsements; and
- (g) to conduct assessments of aviation English language proficiency.

Note: Subpart 61.V sets out certain limitations that apply to all flight engineer licences, and ratings and endorsements on flight engineer licences.

61.1455 Limitations on exercise of privileges of flight engineer examiner ratings—endorsements

- (1) A flight engineer examiner is authorised to conduct a flight test, or grant a rating or endorsement, mentioned in column 2 of an item in Part 1 of table 61.1495 only if the examiner also holds the flight engineer flight test endorsement mentioned in column 1 of the item.
- (2) A flight engineer examiner is authorised to conduct a flight test for a rating or endorsement only if the examiner:
 - (a) also holds a rating or endorsement of the same kind; or
 - (b) holds an approval under regulation 61.040 to conduct the flight test.
- (3) A flight engineer examiner is authorised to conduct an instructor proficiency check only if the examiner also holds a flight engineer instructor rating flight test endorsement.

Part 61 Flight crew licensing

Subpart 61.Y Flight engineer examiner ratings

Division 61.Y.1 Privileges and requirements for grant of flight engineer examiner ratings

Regulation 61.1460

- (4) A flight engineer examiner is authorised to conduct flight training for a flight engineer examiner rating or flight engineer flight test endorsement only if the examiner also holds a flight engineer examiner rating flight test endorsement.
- (5) A flight engineer examiner is authorised to conduct an activity mentioned in column 2 of item 4 of table 61.1495 only if the examiner also holds an English language assessment endorsement.

61.1460 Limitations on exercise of privileges of flight engineer examiner ratings—professional development

A flight engineer examiner is authorised to exercise the privileges of his or her flight engineer examiner rating only if the examiner has, during the previous 24 months, successfully completed:

- (a) a professional development program conducted by CASA including the content mentioned in the Part 61 Manual of Standards for the program; or
- (b) an approved course of professional development conducted by the holder of an approval under regulation 61.040 to conduct the course.

61.1465 Limitations on exercise of privileges of flight engineer examiner ratings—recent experience

A flight engineer examiner is authorised to conduct a flight test in an aircraft of a particular type, or a flight simulation training device that represents an aircraft of a particular type only if the examiner meets the recent experience requirements mentioned in this Part for the exercise of the privileges of a flight engineer licence in an aircraft of that type.

61.1470 Limitations on exercise of privileges of flight engineer examiner ratings—examiner proficiency check

- (1) The holder of a flight engineer examiner rating is authorised to exercise the privileges of the rating only if the holder has a valid examiner proficiency check.
- (2) For subregulation (1), the holder is taken to have a valid examiner proficiency check during the following periods:
 - (a) the period from when the holder passes the flight test for the rating to the end of the 24th month after the month in which the holder passes the flight test;
 - (b) if:
 - (i) the holder passes the flight test for a flight engineer examiner endorsement; and
 - (ii) the flight test is conducted more than 6 months after the holder passes the flight test for the rating;the period from when the holder passes the flight test for the endorsement to the end of the 24th month after the month in which the holder passes the flight test for the endorsement;

Regulation 61.1475

- (c) if the holder successfully completes an examiner proficiency check—the period from when the holder successfully completes the check to the end of the 24th month after the month in which the holder successfully completes the check;
- (d) if:
 - (i) the holder is taken to have a valid examiner proficiency check under any of paragraphs (a) to (c) (the *existing check*); and
 - (ii) within 3 months before the validity of the existing check expires, the holder successfully completes another examiner proficiency check; the period from when the validity of the existing check expires to the end of the 24th month after the validity of the existing check expires.
- (3) However, if, at any time, the holder attempts, but does not successfully complete, an examiner proficiency check, the holder is no longer taken to have a valid examiner proficiency check.
- (4) For paragraphs (2)(c) and (d), the holder successfully completes an examiner proficiency check if:
 - (a) the examiner proficiency check is conducted in an aircraft or an approved flight simulation training device for the proficiency check; and
 - (b) a person mentioned in subregulation (5) assesses the holder's competency to conduct flight testing as meeting the standards mentioned in the Part 61 Manual of Standards for a flight engineer examiner rating; and
 - (c) the person endorses the holder's licence document to the effect that the holder has completed the examiner proficiency check on the date stated.
- (5) For paragraph (4)(b), the persons are as follows:
 - (a) CASA;
 - (b) the holder of an approval under regulation 61.040 to conduct the proficiency check.

61.1475 Requirements for grant of flight engineer examiner ratings

- (1) An applicant for a flight engineer examiner rating must:
 - (a) hold:
 - (i) a flight engineer licence; and
 - (ii) a flight engineer instructor rating; and
 - (b) meet the requirements for the grant of at least one flight engineer flight test endorsement.

Note: Paragraph (a) is satisfied, in relation to a required licence or rating, if the applicant holds a certificate of validation of a foreign licence, rating or endorsement that is equivalent to the required licence or rating: see item 36 of Part 2 of the Dictionary.

- (2) The applicant must also have:
 - (a) completed a course of training for the rating that:
 - (i) is conducted by CASA or the holder of an approval under regulation 61.040 to conduct the course; and

Part 61 Flight crew licensing

Subpart 61.Y Flight engineer examiner ratings

Division 61.Y.1 Privileges and requirements for grant of flight engineer examiner ratings

Regulation 61.1475

- (ii) includes the content mentioned in the Part 61 Manual of Standards for the course; and
- (b) passed the flight test mentioned in the Part 61 Manual of Standards for the flight engineer examiner rating; and
- (c) successfully completed an interview conducted by CASA.

Note: For paragraph (b), for the conduct of flight tests, see Division 61.B.4.

- (3) For paragraph (2)(c), an applicant successfully completes an interview if he or she satisfies CASA that he or she has the necessary skills and experience to be granted a flight engineer examiner rating.

Division 61.Y.2—Obligations of flight engineer examiners

61.1480 Obligations of flight engineer examiners—flight tests: strict liability offences

- (1) A flight engineer examiner commits an offence if the examiner:
- (a) conducts a flight test for a flight engineer licence, a rating on a flight engineer licence or a cruise relief flight engineer type rating; and
 - (b) is not nominated to conduct the flight test:
 - (i) by the applicant's training provider under subregulation 61.245(3); or
 - (ii) by CASA under subregulation 61.245(4).

Penalty: 50 penalty units.

- (2) A flight engineer examiner commits an offence if the examiner:
- (a) conducts a flight test for a flight engineer licence; and
 - (b) is the person who provided the certification under paragraph 61.235(2)(aa) (Flight tests for flight crew licences and ratings—prerequisites) for the person taking the flight test.

Penalty: 50 penalty units.

- (3) A flight engineer examiner commits an offence if the examiner:
- (a) conducts a flight test for a flight engineer licence, a rating on a flight engineer licence or a cruise relief flight engineer type rating; and
 - (b) does not:
 - (i) conduct the flight test in accordance with the standards mentioned in the Part 61 Manual of Standards; and
 - (ii) assess the applicant for the licence or rating against the competency standards mentioned in the Part 61 Manual of Standards for the flight test.

Penalty: 50 penalty units.

- (4) A flight engineer examiner commits an offence if the examiner:
- (a) conducts a flight test for a flight engineer licence, a rating on a flight engineer licence or a cruise relief flight engineer type rating; and
 - (b) does not:
 - (i) at the completion of the flight test, advise the applicant and the Part 141 or 142 operator responsible for the applicant's training of the result of the flight test, including the reasons for any failure in an element of the flight test; and
 - (ii) within 14 days after the day the flight test is successfully completed:
 - (A) complete a report, in an approved form, setting out the result of the flight test; and
 - (B) give a completed copy of the report to the applicant, the Part 141 or 142 operator and CASA.

Regulation 61.1485

Penalty: 50 penalty units.

- (5) A flight engineer examiner commits an offence if the examiner:
- (a) conducts a flight test for a flight engineer licence, a rating on a flight engineer licence or a cruise relief flight engineer type rating; and
 - (b) has not notified CASA of the examiner's intention to conduct the flight test at least 24 hours before conducting the flight test.

Penalty: 50 penalty units.

- (6) An offence against this regulation is an offence of strict liability.

61.1485 Obligations of flight engineer examiners—flight tests: other offences

- (1) A flight engineer examiner commits an offence if:
- (a) the examiner conducts a flight test for a flight engineer licence; and
 - (b) when the test begins, the examiner is not satisfied that the applicant:
 - (i) is at least the minimum age to hold the licence; and
 - (ii) has passed the aeronautical knowledge examination for the licence; and
 - (iii) has met the flight training requirements for the grant of the licence; and
 - (iv) has met the aeronautical experience requirements for the licence; and
 - (v) has a current aviation English language proficiency assessment.

Penalty: 50 penalty units.

- (2) A flight engineer examiner commits an offence if:
- (a) the examiner conducts a flight test for a rating on a flight engineer licence or a cruise relief flight engineer type rating; and
 - (b) when the test begins, the examiner is not satisfied that the applicant:
 - (i) has passed the aeronautical knowledge examination for the rating; and
 - (ii) has met the flight training requirements for the grant of the rating; and
 - (iii) has met the aeronautical experience requirements for the rating.

Penalty: 50 penalty units.

61.1490 Obligations of flight engineer examiners—proficiency checks

- (1) A flight engineer examiner commits an offence if:
- (a) the examiner conducts an instructor proficiency check for the holder of a flight engineer licence; and
 - (b) the holder successfully completes the proficiency check; and
 - (c) the examiner does not, within 14 days after the day the holder successfully completes the proficiency check:
 - (i) endorse the holder's licence document in accordance with subregulation (2); and
 - (ii) give CASA a written notice that complies with subregulation (3).

Penalty: 50 penalty units.

- (2) For subparagraph (1)(c)(i), the following details must be endorsed on the licence document:
 - (a) a statement to the effect that the holder has successfully completed the proficiency check;
 - (b) the date on which the proficiency check was successfully completed.
- (3) For subparagraph (1)(c)(ii), the notice must state the following:
 - (a) the holder's name and ARN;
 - (b) that the holder has successfully completed the proficiency check;
 - (c) the date on which the proficiency check was successfully completed;
 - (d) if the proficiency check was conducted in an aircraft—the aircraft's nationality and registration marks;
 - (e) if the proficiency check was conducted in a flight simulator—the identifying number for the flight simulator stated on its flight simulator qualification certificate.
- (3A) A flight engineer examiner commits an offence if:
 - (a) the examiner conducts an instructor proficiency check; and
 - (b) the examiner has not notified CASA of the examiner's intention to conduct the proficiency check at least 24 hours before conducting the proficiency check; and
 - (c) the examiner does not hold, under regulation 61.040, an approval to conduct the proficiency check without notifying CASA of his or her intention to conduct the proficiency check.

Penalty: 50 penalty units.

- (4) An offence against this regulation is an offence of strict liability.

Part 61 Flight crew licensing

Subpart 61.Y Flight engineer examiner ratings

Division 61.Y.3 Privileges and requirements for grant of flight engineer examiner endorsements

Regulation 61.1495

Division 61.Y.3—Privileges and requirements for grant of flight engineer examiner endorsements

61.1495 Kinds of flight engineer examiner endorsement

The kinds of flight engineer examiner endorsement are set out in column 1 of table 61.1495.

Table 61.1495 Flight engineer examiner endorsements

Item	Column 1 Endorsement	Column 2 Activities authorised	Column 3 Requirements
<i>Part 1—Flight engineer flight test endorsements</i>			
1	Flight engineer type rating flight test endorsement (type specific)	Conduct flight test for a flight engineer licence Conduct flight test for the specified flight engineer type rating Conduct flight test for the cruise relief flight engineer type rating for the specified aircraft type	Flight engineer type rating training endorsement
2	Flight engineer instructor rating flight test endorsement	Conduct flight test for a flight engineer instructor rating or flight engineer training endorsement	Flight engineer instructor rating training endorsement
3	Flight engineer examiner rating flight test endorsement	Conduct flight test for a flight engineer examiner rating or flight engineer flight test endorsement	
<i>Part 2—Other flight engineer examiner endorsements</i>			
4	English language assessment endorsement (flight engineer)	Conduct a level 6 aviation English language proficiency assessment Conduct a general English language proficiency assessment	

61.1500 Privileges of flight engineer examiner endorsements

Subject to Subpart 61.V and Division 61.Y.1, the holder of an endorsement mentioned in column 1 of an item in table 61.1495 is authorised to conduct the activities mentioned in column 2 of the item.

Note: Subpart 61.V sets out certain limitations that apply to all flight engineer licences, and ratings and endorsements on flight engineer licences.

61.1505 Requirements for grant of flight engineer examiner endorsements

- (1) An applicant for an endorsement mentioned in column 1 of an item in table 61.1495 must hold:
 - (a) a flight engineer examiner rating; and
 - (b) the endorsement (if any) mentioned in column 3 of the item.

Note: Paragraph (a) is satisfied, in relation to a required rating or endorsement, if the applicant holds a certificate of validation of a foreign licence, rating or endorsement that is equivalent to the required rating or endorsement: see item 36 of Part 2 of the Dictionary.

- (2) An applicant for an endorsement mentioned in column 1 of an item in Part 1 of table 61.1495 must also have:
 - (a) completed a course of training for the endorsement that:
 - (i) is conducted by CASA or the holder of an approval under regulation 61.040 to conduct the course; and
 - (ii) includes the content mentioned in the Part 61 Manual of Standards for the course; and
 - (b) passed the flight test mentioned in the Part 61 Manual of Standards for the endorsement.

Note: For paragraph (b), for the conduct of flight tests, see Division 61.B.4.

- (3) An applicant for an English language assessment endorsement must also have:
 - (a) completed training in the assessment of aviation English language proficiency to the ICAO standards conducted by CASA or the holder of an approval under regulation 61.040 to conduct the training; and
 - (b) been assessed by CASA or the approval holder as competent to assess aviation English language proficiency to the ICAO standards; and
 - (c) successfully completed an interview conducted by CASA or the holder of an approval under regulation 61.040 to conduct the interview.
- (4) For paragraph (3)(c), an applicant successfully completes an interview if the applicant satisfies CASA or the approval holder that he or she understands the standards for assessment of aviation English language proficiency.

Subpart 61.Z—Glider pilot licences

Note: Subpart 61.E does not apply to glider pilot licences: see the definition of *pilot licence* in regulation 61.010.

61.1510 Privileges of glider pilot licences

Subject to regulations 61.1515 to 61.1535, the holder of a glider pilot licence is authorised:

- (a) to pilot a glider as pilot in command; and
- (b) to transmit on an aviation safety radio frequency.

Note 1: A person is prohibited from transmitting on an aviation safety radio frequency unless the person is authorised or qualified to do so: see regulation 91.625.

Note 2: For the definition of *aviation safety radio frequency*, see the Dictionary.

61.1515 Limitations on exercise of privileges of glider pilot licences—general

- (1) The holder of a glider pilot licence is authorised to conduct an activity in the exercise of the privileges of the licence only if the activity is conducted in accordance with:
 - (a) the operations manual or exposition (whichever is applicable) of a glider organisation; or
 - (b) an approval, held by the holder, under regulation 61.040 for this paragraph.
- (2) The holder of a glider pilot licence is authorised to act as pilot in command of a glider of a particular kind only if the holder:
 - (a) has received training in the operation of gliders of that kind; and
 - (b) has been assessed as competent to operate a glider of that kind.
- (3) The holder of a glider pilot licence is authorised to act as pilot in command of a glider in a flight that begins with a launch using a particular method only if the holder:
 - (a) has received training in the launching method; and
 - (b) has been assessed as competent to pilot a glider using the launching method.
- (4) For subregulations (2) and (3), the training and assessment must be conducted by:
 - (a) a person authorised by a glider organisation to conduct training and assessment in a glider; or
 - (b) the holder of an approval under regulation 61.040 to conduct the training and assessment.

61.1520 Limitations on exercise of privileges of glider pilot licences—recent experience

The holder of a glider pilot licence is authorised to act as pilot in command of a glider carrying a passenger only if the holder meets the recent experience requirements mentioned in the operations manual or exposition (whichever is applicable) of the glider organisation that granted the certificate mentioned in subregulation 61.1540(2) to the holder.

61.1525 Limitations on exercise of privileges of glider pilot licences—flight review

- (1) The holder of a glider pilot licence is authorised to exercise the privileges of the licence only if the holder has, within the previous 24 months, successfully completed a flight review for the licence.
- (2) The holder is taken to meet the requirements of subregulation (1) if the holder was granted the licence within the previous 24 months.
- (3) For subregulation (1), successful completion of a flight review requires:
 - (a) demonstration, to the holder of an approval under regulation 61.040 to conduct the flight review, that the holder is competent in each unit of competency mentioned in the Part 61 Manual of Standards for the licence; or
 - (b) successful completion of the flight review requirements of a glider organisation.

61.1530 Limitations on exercise of privileges of glider pilot licences—medical certificates

The holder of a glider pilot licence is authorised to pilot a glider as pilot in command only if the holder also holds:

- (a) a class 1 or 2 medical certificate; or
- (b) a medical exemption for the exercise of the privileges of the licence.

Note: A licence holder must not exercise the privileges conferred by his or her licence and rating during any period of temporary medical unfitness that could render the holder unable to exercise those privileges safely: see regulation 67.270.

61.1535 Limitations on exercise of privileges of glider pilot licences—carriage of documents

The holder of a glider pilot licence is authorised to exercise the privileges of the licence on a flight only if the holder carries the following documents on the flight:

- (a) his or her licence document;
 - (b) unless the holder holds a medical exemption for the exercise of the privileges of the licence—his or her medical certificate;
 - (ba) if the holder holds a medical exemption for the exercise of the privileges of the licence—a copy of the exemption;
-

Regulation 61.1540

- (c) a document that includes a photograph of the holder showing the holder's full face and his or her head and shoulders:
 - (i) that was issued within the previous 10 years by the government, or a government authority, of:
 - (A) the Commonwealth or a State or Territory; or
 - (B) a foreign country, or a state or province (however described) of a foreign country; and
 - (ii) that has not expired or been cancelled.

61.1540 Requirements for grant of glider pilot licences

- (1) An applicant for a glider pilot licence must be at least 16.
- (2) The applicant must hold a pilot certificate that:
 - (a) is granted by a glider organisation; and
 - (b) is granted on the basis of the applicant meeting competency standards that are at least equivalent to the competency standards for the glider pilot licence mentioned in the Part 61 Manual of Standards; and
 - (c) permits the holder to pilot a glider, as pilot in command.
- (3) The applicant must also have aeronautical experience that includes:
 - (a) at least 6 hours of flight time in a glider; and
 - (b) at least 2 hours of solo flight time in a glider; and
 - (c) at least 20 launches, and at least 20 landings, as pilot of a glider.

Note: For the determination of a person's flight time and other aeronautical experience, see Division 61.A.2.

Part 64—Authorisations for non-licensed personnel

Table of contents

Subpart 64.A—Preliminary

- 64.005 What Part 64 is about
- 64.010 Definitions for Part 64
- 64.012 Approvals by CASA for Part 64

Subpart 64.B—Transmission on aeronautical radio frequencies

- 64.015 Eligibility for aeronautical radio operator certificate
- 64.020 Obligation of assessor to ensure training is completed
- 64.025 Applying for aeronautical radio operator certificate
- 64.030 Grant of aeronautical radio operator certificate
- 64.035 Holder of aeronautical radio operator certificate may operate radio
- 64.040 Person undergoing training or assessment may operate radio

Subpart 64.C—Taxiing aeroplanes

- 64.045 Persons who may taxi aeroplanes—general
- 64.050 Persons who may taxi aeroplanes—persons undergoing training or assessment
- 64.055 Grant of certificate of competency to taxi aeroplanes of a class or covered by a type rating
- 64.060 Production of certificate of competency

Subpart 64.A—Preliminary

64.005 What Part 64 is about

This Part sets out requirements that persons other than holders of flight crew licences must satisfy to:

- (a) transmit on an aviation safety radio frequency; or
- (b) taxi an aeroplane.

Note 1: A person is prohibited from transmitting on an aviation safety radio frequency unless the person is authorised or qualified to do so: see regulation 91.625.

Note 1A: Under Part 61:

- (a) holders of flight crew licences are authorised to transmit on an aviation safety radio frequency, or to taxi an aeroplane, in certain circumstances; and
- (b) people receiving training for a flight crew licence are authorised to transmit on an aviation safety radio frequency in certain circumstances.

Note 1B: For the definition of *aviation safety radio frequency*, see the Dictionary.

Note 2: A person is prohibited from taxiing an aircraft unless the person is qualified to do so: see regulation 91.415.

64.010 Definitions for Part 64

In this Part:

aeronautical radio operator certificate means a certificate granted under regulation 64.030.

certificate of competency means a certificate granted under regulation 64.055.

class : each of the following is a *class* of aeroplane:

- (a) single-engine aeroplane;
- (b) multi-engine aeroplane.

equivalent : a foreign qualification is *equivalent* to an authorisation granted under this Part or Part 61 (an *Australian authorisation*) if it allows the holder to conduct substantially the same activities as the activities authorised by the Australian authorisation.

foreign qualification means a qualification issued under the law of a Contracting State.

taxiing , for an aeroplane, means manoeuvring on the surface of an aerodrome under the aeroplane's own power except when taking off or landing.

type rating : see regulation 61.010.

64.012 Approvals by CASA for Part 64

- (1) If a provision of this Part refers to a person holding an approval under this regulation, the person may apply to CASA for the approval.
- (2) Subject to regulation 11.055, CASA must grant the approval.
- (3) Subregulation 11.055(1B) applies to the granting of an approval under this regulation.

Subpart 64.B—Transmission on aeronautical radio frequencies

64.015 Eligibility for aeronautical radio operator certificate

Person trained and assessed against Part 61 Manual of Standards

- (1) A person is eligible for the grant of an aeronautical radio operator certificate if the person:
 - (a) is at least 17; and
 - (b) has received the training mentioned in subregulation (2) from a person or body mentioned in subregulation (3); and
 - (c) has been assessed by a person mentioned in subregulation (4) as meeting the competency standards specified in the Part 61 Manual of Standards for the operation of an aeronautical radio; and
 - (d) has a current aviation English language proficiency assessment.
- (2) For paragraph (1)(b), the training is training in the operation of an aeronautical radio to the standards specified in the Part 61 Manual of Standards for the operation of an aeronautical radio.
- (3) For paragraph (1)(b), the persons and bodies are the following:
 - (a) a pilot instructor who holds a training endorsement that authorises the instructor to conduct flight training for a pilot licence or flight crew rating;
 - (b) a registered training organisation whose scope of registration covers the training mentioned in subregulation (2);
 - (c) the holder of an approval under regulation 64.012 for this paragraph.
- (4) For paragraph (1)(c), the persons are the following:
 - (a) CASA;
 - (b) a flight examiner;
 - (c) a pilot instructor who holds a training endorsement that authorises the instructor to conduct flight training for a pilot licence or flight crew rating;
 - (d) the holder of an approval under regulation 64.012 for this paragraph.

Holder of equivalent foreign qualification

- (5) A person is eligible for the grant of an aeronautical radio operator certificate if:
 - (a) the person is at least 17; and
 - (b) the person holds a foreign qualification that is equivalent to:
 - (i) a private pilot licence, commercial pilot licence, multi-crew pilot licence, air transport pilot licence or flight engineer licence; or
 - (ii) a recreational pilot licence with a flight radio endorsement; or
 - (iii) an aeronautical radio operator certificate; and
 - (c) either:

- (i) the qualification includes a statement to the effect that the person meets an ICAO English language proficiency standard equivalent to the ICAO level 4, 5 or 6 aviation English language proficiency standard specified in the Part 61 Manual of Standards; or
- (ii) the person has a current aviation English language proficiency assessment.

64.020 Obligation of assessor to ensure training is completed

- (1) This regulation applies to a flight examiner, pilot instructor or approval holder (the *assessor*) who conducts an assessment of a person for paragraph 64.015(1)(c).
- (2) The assessor commits an offence if the assessor is not satisfied, before conducting the assessment, that the person has completed the training mentioned in subregulation 64.015(2).

Penalty: 50 penalty units.

64.025 Applying for aeronautical radio operator certificate

- (1) A person may apply, in writing, to CASA for the grant of an aeronautical radio operator certificate.
- (2) If the applicant is relying on the training and assessment mentioned in subregulation 64.015(1), the application must be accompanied by evidence of the applicant's aviation English language proficiency assessment.
- (3) If the applicant is relying on a foreign qualification, the application must be accompanied by:
 - (a) a certified true copy of the qualification; and
 - (b) unless the qualification includes a statement to the effect that the person meets the ICAO level 4, 5 or 6 aviation English language proficiency standard—evidence of the applicant's ICAO English language proficiency assessment.

64.030 Grant of aeronautical radio operator certificate

Subject to regulation 11.055, CASA must grant the certificate if satisfied that the applicant is eligible for the grant of the certificate.

64.035 Holder of aeronautical radio operator certificate may operate radio

- (1) The holder of an aeronautical radio operator certificate is authorised to transmit on an aviation safety radio frequency.
- (2) However, the holder is authorised to make the transmission only if the holder has a current aviation English language proficiency assessment.

Regulation 64.040

- (3) Subregulation (2) does not apply to the holder of a certificate that was granted on the basis of regulation 202.304.

64.040 Person undergoing training or assessment may operate radio

A person who does not hold an aeronautical radio operator certificate is authorised to transmit on an aviation safety radio frequency if the transmission is made:

- (a) for the purpose of receiving training or assessment in the use of an aeronautical radio; and
- (b) under the direct supervision of a person mentioned in subregulation 64.015(3) or (4).

Subpart 64.C—Taxiing aeroplanes

64.045 Persons who may taxi aeroplanes—general

- (1) A person is authorised to taxi an aeroplane of a particular class, or covered by a particular type rating, at an aerodrome if:
 - (a) the person is at least 17; and
 - (b) the person holds a certificate of competency to taxi an aeroplane of the class, or covered by the type rating, that was issued in the previous 5 years; and
 - (c) the person has received instruction from a person mentioned in subregulation (2) on the layout and operating procedures of the aerodrome; and
 - (d) the person:
 - (i) is the operator of the aeroplane; or
 - (ii) has permission to taxi the aeroplane from the operator of the aeroplane; or
 - (iii) has permission to taxi the aeroplane from a person permitted by these Regulations, and engaged by the operator of the aeroplane or the operator's continuing airworthiness management organisation, to carry out maintenance on the aeroplane; and
 - (e) for an aerodrome mentioned in subregulation (3)—the person holds an aeronautical radio operator certificate.
- (2) For paragraph (1)(c), the persons are the following:
 - (a) the operator of the aerodrome;
 - (b) the operator of the aeroplane;
 - (c) any other person (including the holder of a flight crew licence) with knowledge of the layout and operating procedures of the aerodrome.
- (3) For paragraph (1)(e), the aerodromes are the following:
 - (a) a controlled aerodrome;
 - (b) a certified aerodrome;
 - (d) a military aerodrome;
 - (e) an aerodrome prescribed as a designated non-controlled aerodrome by the Part 91 Manual of Standards for the purposes of subparagraph 91.400(1)(a)(iv).

64.050 Persons who may taxi aeroplanes—persons undergoing training or assessment

- (1) A person is authorised to taxi an aeroplane of a particular class, or covered by a particular type rating, at an aerodrome if the person:
 - (a) is receiving training in taxiing aeroplanes of the class or covered by the type rating; or

Regulation 64.055

- (b) is being assessed against the competency standards specified in the Part 61 Manual of Standards for taxiing aeroplanes of the class or covered by the type rating.
- (2) However, the person is authorised to taxi the aeroplane only under the direct supervision of a person who is authorised under regulation 64.045 or Part 61 to taxi the aeroplane at the aerodrome.

64.055 Grant of certificate of competency to taxi aeroplanes of a class or covered by a type rating

- (1) A person may apply, in writing, to a person mentioned in subregulation (4) (a *granting body*) for the grant of a certificate of competency for taxiing aeroplanes of a particular class, or covered by a particular type rating.
- (2) Subject to regulation 11.055, the granting body must grant the certificate if satisfied that the applicant meets the competency standards specified in the Part 61 Manual of Standards for taxiing aeroplanes of the class, or covered by the type rating.
- (3) The certificate of competency must:
 - (a) state the following:
 - (i) each class or type rating for which the person meets the competency standards;
 - (ii) the date on which it is issued; and
 - (b) be signed by the granting body.
- (4) For subregulation (1), the persons are the following:
 - (a) CASA;
 - (b) a flight examiner;
 - (c) a pilot instructor who is authorised under Part 61 to conduct flight training for aeroplanes of the class, or covered by the type rating;
 - (d) the holder of an approval under regulation 64.012 for this paragraph.

64.060 Production of certificate of competency

- (1) CASA may direct a person who holds a certificate of competency to produce the certificate for inspection by CASA.
- (2) The person commits an offence if the person does not comply with the direction within 7 days after the day the direction is given.

Penalty: 50 penalty units.

- (3) An offence against this regulation is an offence of strict liability.

Part 65—Air traffic services licensing

Table of contents

Subpart 65.A—General

- 65.005 Applicability of this Part
- 65.010 Definitions for this Part
- 65.015 Meaning of *successful completion of training*
- 65.020 Effect of ATS provider's failure to comply with this Part
- 65.025 How to satisfy recency requirement
- 65.030 How to satisfy currency requirement
- 65.033 Issue of Manual of Standards

Subpart 65.B—Authority to act in air traffic control and flight service

- 65.035 Authority to carry out air traffic control function
- 65.040 Rules applicable when a person performs ATC function under supervision
- 65.045 Offences—carrying out ATC function without authority
- 65.050 Authority to carry out flight service function
- 65.055 Rules applicable when a person performs flight service function under supervision
- 65.060 Offences—carrying out flight service function without authority
- 65.065 Authority to use ground-based radio equipment

Subpart 65.C—Licensing

Division 65.C.1—Air traffic controller licensing

- 65.070 Eligibility for grant of ATC licence
- 65.075 Air traffic controller ratings
- 65.080 Grant of rating on ATC licence
- 65.085 Grant of endorsement on ATC licences
- 65.090 ATS provider's obligation to provide currency and recency training and assessment
- 65.095 Ancillary qualifications
- 65.100 Conduct of practical training
- 65.105 Conduct of examinations
- 65.115 Periods of validity of ratings and endorsements
- 65.120 Periods of validity of ATC qualifications

Division 65.C.2—Flight service licensing

- 65.125 Eligibility for grant of flight service licence
- 65.130 Flight service ratings
- 65.135 Maintenance of ratings on flight service licence
- 65.140 Endorsements on flight service licences
- 65.145 Ancillary qualifications
- 65.150 Conduct of training
- 65.155 Conduct of examinations
- 65.165 Periods of validity of rating and endorsement
- 65.170 Period of validity of flight service qualification

Subpart 65.E—Administrative functions

Division 65.E.1—Grant of licences

- 65.175 Definitions for this Subpart
- 65.180 How to apply
- 65.225 Grant of licence
- 65.230 When decision must be made

Division 65.E.2—Ongoing proficiency and medical testing

- 65.250 Re-examination or re-assessment of licence or qualification holder

Division 65.E.3—Suspension and cancellation of licences

- 65.255 Provisional suspension of licence pending examination or assessment
- 65.260 Provisional suspension of licence etc during investigation
- 65.265 Show cause procedure
- 65.270 CASA's powers in respect of licence etc
- 65.275 Choice between cancellation and suspension
- 65.280 Procedure for decision
- 65.285 Effect of suspension or provisional suspension of authorisation

Subpart 65.A—General

65.005 Applicability of this Part

- (1) This Part applies to the performance of functions in connection with providing air traffic services (within the meaning of Annex 11 to the Chicago Convention) in Australian territory.
- (2) However, this Part does not apply to a person who is providing an air traffic service in the course of his or her duties for the Defence Force.

65.010 Definitions for this Part

In this Part:

currency requirement means the requirement referred to in regulation 65.030.

Manual of Standards means the document called ‘Manual of Standards (MOS) – Part 65’ issued by CASA under regulation 65.033, as in force from time to time.

recency requirement means the requirement referred to in regulation 65.025.

Note: **Air traffic control function** means a function described in a paragraph of subregulation 65.075(2); **flight service function** means the function described in subregulation 65.130(2)—see the Dictionary.

65.015 Meaning of *successful completion of training*

For this Part, a person has successfully completed training for a licence, rating, endorsement or qualification only if:

- (a) he or she has passed (to the standard required by the Manual of Standards) any examination required by that Manual; and
- (b) he or she has successfully completed (to the standard required by that Manual) any practical performance assessment so required.

65.020 Effect of ATS provider’s failure to comply with this Part

A failure by an ATS provider to comply with a requirement of or under this Part is not an offence but may be taken into account in deciding whether or not the provider’s certificate should be suspended or revoked.

65.025 How to satisfy recency requirement

- (1) The holder of an ATC licence or a flight service licence satisfies the **recency requirement** in relation to an endorsement at a particular time if he or she has performed the duties required by the relevant function at the aerodrome or in relation to the airspace to which the endorsement relates, for at least 5 hours within the previous 21 days.

Regulation 65.030

- (2) If an ATS provider specifies in its operations manual that 2 or more endorsements are of like type for this regulation, a licence holder who performed the duties of any of those endorsements for a total of at least 5 hours within the previous 21 days also satisfies the recency requirement.
- (3) A licence holder who does not satisfy the recency requirement at a particular time in relation to an endorsement is taken to satisfy that requirement at a later time after:
 - (a) he or she:
 - (i) has carried out the relevant function at that aerodrome, or in relation to that airspace, under supervision for at least 1 normal working day for each month that has passed since he or she last performed the function at that aerodrome or in relation to that airspace; or
 - (ii) has undergone any retraining required by the relevant ATS provider's operations manual; and
 - (b) he or she has been assessed by the ATS provider as competent in performing the function at that aerodrome or in relation to that airspace.

65.030 How to satisfy currency requirement

- (1) The holder of an ATC licence or a flight service licence satisfies the **currency requirement** in relation to an endorsement at a particular time if:
 - (a) within the previous 12 months, he or she has passed, to the standard required by the Manual of Standards, an examination in the subject-matter specific to the endorsement; and
 - (b) within the previous 6 months, his or her performance of the relevant function at the aerodrome, or in relation to the airspace, to which the endorsement relates, has been assessed as satisfactory.
- (2) The holder of an ATC licence or a flight service licence satisfies the **currency requirement** in relation to a rating at a particular time if, within the previous 12 months, he or she has passed, to the standard required by the Manual of Standards, an examination in the subject-matter specific to the rating.
- (3) The examination and assessment must be carried out in accordance with any relevant requirements and standards in the Manual of Standards.

65.033 Issue of Manual of Standards

- (1) CASA may issue a Manual of Standards for this Part that provides for the following matters:
 - (a) the form and classification of a licence, rating, endorsement or qualification that is granted for this Part (an **ATS authorisation**);
 - (b) the requirements for, and standards to be met by, an applicant for, and the holder of, an ATS authorisation;
 - (c) the requirements and standards for training, tests and examinations for ATS authorisations;

Regulation 65.033

- (d) the duration of an ATS authorisation and the procedure for the renewal of an ATS authorisation;
- (e) any matter required or permitted by these Regulations to be provided for by the Manual of Standards;
- (f) any matter necessary or convenient to be provided for the effective operation of this Part.

Note: A Manual of Standards is a legislative instrument—see subsections 98(5A) and (5B) of the Act. It must be registered in accordance with the *Legislation Act 2003* and must be tabled in both Houses of the Parliament within 6 sitting days after its making.

- (2) CASA must give a copy of a notice about a Manual of Standards for this Part (being a notice referred to in subregulation 11.275(3) or regulation 11.280) to each ATS provider.

Note: Subpart 11.J (including regulations 11.275 and 11.280) sets out procedures for the issue, amendment and revocation of a MOS.

Subpart 65.B—Authority to act in air traffic control and flight service

65.035 Authority to carry out air traffic control function

- (1) A person may carry out an air traffic control function in Australian territory if, at the time the person carries out the function:
 - (a) he or she holds an ATC licence with a rating for the function and an endorsement for the place where, or the airspace in relation to which, he or she carries it out; and
 - (b) the licence, rating and endorsement are in force; and
 - (c) he or she:
 - (i) satisfies the recency and currency requirements in relation to the endorsement; and
 - (ii) satisfies the currency requirement in relation to the rating; and
 - (d) he or she holds a Class 3 medical certificate.
- (2) A person to whom subregulation (3) applies may carry out an air traffic control function in Australian territory under the supervision of a person who meets the requirements of subregulation (1).
- (3) This subregulation applies to each of the following persons:
 - (a) a person who CASA has authorised in writing to carry out the relevant function;
 - (b) a person who:
 - (ia) holds a Class 3 medical certificate; and
 - (i) holds an ATC licence with a rating for the function and an endorsement for the place where, or the airspace in relation to which, he or she carries it out; but
 - (ii) at the relevant time, in relation to the rating or endorsement, does not satisfy the recency or currency requirement;
 - (c) a person who:
 - (i) holds an ATC licence; and
 - (ia) holds a Class 3 medical certificate; and
 - (ii) carries out the function in the course of training for a rating or endorsement (whether or not the person holds a rating or endorsement at the time);
 - (d) a person (other than a person who held an ATC licence that has been cancelled) who:
 - (i) has completed an approved course of training in the theory of air traffic control; and
 - (ia) holds a Class 3 medical certificate; and
 - (ii) carries out the function in the course of undergoing practical training for an ATC licence.

65.040 Rules applicable when a person performs ATC function under supervision

- (1) If a person to whom subregulation 65.035(3) applies (the *trainee*) is carrying out an air traffic control function under the supervision of a person who meets the requirements of subregulation 65.035(1) (the *supervisor*), this regulation applies.
- (2) The trainee must comply with the supervisor's directions.

Penalty: 25 penalty units.

- (3) Any failure by the supervisor to supervise the trainee adequately is not an offence, but may be taken into account in considering whether the supervisor's ATC licence should be suspended or cancelled.

65.045 Offences—carrying out ATC function without authority

- (1) A person who is not authorised to do so by subregulation 65.035(1) or (2) must not carry out an air traffic control function in Australian territory.

Penalty: 25 penalty units.

- (2) A person to whom subregulation 65.035(3) applies must not carry out an air traffic control function in Australian territory if the person is not acting under the supervision of a person who meets the requirements of subregulation 65.035(1).

Penalty: 25 penalty units.

- (3) Strict liability applies to the following physical elements:
 - (a) in subregulation (1)—that the person is not authorised by subregulation 65.035(1) or (2);
 - (b) in subregulation (2)—that the person under whose supervision the air traffic control function is carried out is a person who meets the requirements of subregulation 65.035(1).

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (4) It is a defence to a charge of contravening subregulation (1) or (2) that the relevant action was, in the circumstances, reasonable in the interests of the safety of air navigation.

Note: A defendant bears an evidential burden in relation to the matter mentioned in subregulation (4).

65.050 Authority to carry out flight service function

- (1) A person may carry out a flight service function in Australian territory if, at the time he or she carries out the function:
 - (a) he or she holds a flight service licence with a rating for the function and an endorsement for the place where, or the airspace in relation to which, he or she carries it out; and
 - (b) the licence, rating and endorsement are in force; and

Regulation 65.055

- (c) he or she:
 - (i) satisfies the recency and currency requirements in relation to the endorsement; and
 - (ii) satisfies the currency requirement in relation to the rating; and
 - (d) he or she holds a Class 3 medical certificate.
- (2) A person to whom subregulation (3) applies may carry out a flight service function in Australian territory under the supervision of a person who meets the requirements of subregulation (1).
- (3) This subregulation applies to each of the following persons:
- (a) a person who CASA has authorised in writing to carry out the function;
 - (b) a person who:
 - (ia) holds a Class 3 medical certificate; and
 - (i) holds a flight service licence with a rating for the function and an endorsement for the place where, or the airspace in relation to which, he or she carries it out; but
 - (ii) at the relevant time, in relation to the rating or endorsement, does not satisfy the recency or currency requirement;
 - (c) a person who:
 - (i) holds a flight service licence; and
 - (ia) holds a Class 3 medical certificate; and
 - (ii) carries out the function in the course of training for a rating or endorsement (whether or not the person holds a rating or endorsement at the time);
 - (d) a person (other than a person who held a flight service licence that has been cancelled) who:
 - (i) has completed an approved course of training in the theory of flight service; and
 - (ia) holds a Class 3 medical certificate; and
 - (ii) carries out the function in the course of undergoing practical training for a flight service licence.

65.055 Rules applicable when a person performs flight service function under supervision

- (1) If a person to whom subregulation 65.050(3) applies (the *trainee*) is carrying out a flight service function under the supervision of a person who meets the requirements of subregulation 65.050(1) (the *supervisor*), this regulation applies.
- (2) The trainee must comply with the supervisor's directions.

Penalty: 25 penalty units.

- (3) Any failure by the supervisor to supervise the trainee adequately is not an offence, but may be taken into account in considering whether the supervisor's flight service licence should be suspended or cancelled.

65.060 Offences—carrying out flight service function without authority

- (1) A person who is not authorised to do so by subregulation 65.050(1) or (2) must not carry out a flight service function in Australian territory.

Penalty: 25 penalty units.

- (2) A person to whom subregulation 65.050(3) applies must not carry out a flight service function in Australian territory if the person is not acting under the supervision of a person who meets the requirements of subregulation 65.050(1).

Penalty: 25 penalty units.

- (3) Strict liability applies to the following physical elements:
- (a) in subregulation (1)—that the person is not authorised by subregulation 65.050(1) or (2);
 - (b) in subregulation (2)—that the person under whose supervision the flight service function is carried out is a person who meets the requirements of subregulation 65.050(1).

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

65.065 Authority to use ground-based radio equipment

- (1) A person to whom subregulation (2) applies is authorised to transmit on an aviation safety radio frequency if the transmission is made:
- (a) for the purpose of performing an air traffic control function or a flight service function; and
 - (b) using a radiocommunication system that is not installed in or carried on an aircraft.
- (2) This subregulation applies to the following:
- (a) a person who may, under regulation 65.035, carry out an air traffic control function or, under regulation 65.050, carry out a flight service function in Australian territory;
 - (b) a person who is engaged by an ATS provider (whether or not as an employee), and who is acting in the course of his or her duties.
- (3) For paragraph (2)(b), *ATS provider* means an ATS provider, within the meaning given by regulation 172.015, that is approved to provide a flight information service.

Note 1: A person is prohibited from transmitting on an aviation safety radio frequency unless the person is authorised or qualified to do so: see regulation 91.625.

Note 2: For the definition of *aviation safety radio frequency*, see the Dictionary.

Subpart 65.C—Licensing

Note: In addition to the provisions of this Subpart, Part 11 contains provisions relating to an application for a rating or endorsement on an ATC licence or flight service licence.

Division 65.C.1—Air traffic controller licensing

65.070 Eligibility for grant of ATC licence

- (1) A person is eligible to be granted an ATC licence if he or she:
 - (a) has turned 18; and
 - (b) holds a Class 3 medical certificate; and
 - (c) has successfully completed the training (including any examination or assessment) specified in the Manual of Standards for the licence, a rating and an endorsement; and
 - (e) speaks English clearly, and understands spoken English, to a standard that allows clear spoken two-way communication in the course of performing an air traffic control function.
- (3) A statement by an ATS provider, given in accordance with procedures set out in its operations manual, that a person meets the requirements in paragraph (1)(e) is, in the absence of contrary evidence, sufficient evidence of that fact.

65.075 Air traffic controller ratings

- (1) The air traffic controller ratings for Australia are the following:
 - (a) aerodrome control rating;
 - (b) approach control rating;
 - (c) approach radar control rating;
 - (d) area control rating;
 - (e) area radar control rating.
- Note: The air traffic controller ratings are specified in section 4.4 of Annex 1, *Personnel Licensing*, to the Chicago Convention. Not all the ratings specified there are in use in Australia.
- (2) The function of an ATC licence holder who holds a particular rating is as follows:
 - (a) if the rating is an *aerodrome control rating*—to provide, or supervise the provision of, aerodrome control service (including traffic information, flight information and alerting services) for the aerodrome for which the licence holder holds an endorsement;
 - (b) if the rating is an *approach control rating*—to provide, or supervise the provision of, approach control service (including traffic information, flight information and alerting services) for the airspace for which the licence holder holds an endorsement;
 - (c) if the rating is an *approach radar control rating*—to provide, or supervise the provision of, approach control service (including traffic information,

flight information and alerting services) with the use of radar or another surveillance system for the airspace for which the licence holder holds an endorsement;

- (d) if the rating is an *area control rating*—to provide, or supervise the provision of, area control service (including traffic information, flight information and alerting services) for the airspace for which the licence holder holds an endorsement;
- (e) if the rating is an *area radar control rating*—to provide, or supervise the provision of, area control service (including traffic information, flight information and alerting services) with the use of radar or another surveillance system for the airspace for which the licence holder holds an endorsement.

65.080 Grant of rating on ATC licence

- (1A) A person may apply to CASA, in writing, for an air traffic controller rating.

Note: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.

- (1) Subject to regulation 11.055, CASA must grant a rating to an applicant who:
- (a) is eligible to be granted an ATC licence; and
 - (b) successfully completes the training required by the Manual of Standards for the grant of the rating.

Note: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to grant, or cancelling, suspending or varying, a rating; or
 - (b) a decision imposing a condition on a rating.
- (2) An ATS provider must set up and maintain a program to ensure that its employees who hold ATC licences maintain ratings appropriate to their duties.
- (3) That program must be in accordance with any standards and requirements set out in the Manual of Standards.
- (4) The provider must include details of the program, including necessary training and tests of competency, in its operations manual.

65.085 Grant of endorsement on ATC licences

- (1) An endorsement certifies that an ATC licence holder is competent to perform a particular air traffic control function at a particular aerodrome, or in relation to particular airspace.

- (1A) A person may apply to CASA, in writing, for an endorsement on an ATC licence.

Note: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.

Regulation 65.090

(2) Subject to regulation 11.055, CASA must grant an endorsement to an applicant who:

- (a) is eligible to be granted an ATC licence with a rating; and
- (b) successfully completes the training required by the Manual of Standards for the grant of the endorsement.

Note: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to grant, or cancelling, suspending or varying, an endorsement; or
- (b) a decision imposing a condition on an endorsement.

(3) An ATS provider must set up and maintain a program to ensure that its employees who hold ATC licences maintain endorsements appropriate to their duties.

(4) That program must be in accordance with any standards and requirements set out in the Manual of Standards.

(5) The provider must include details of the program, including necessary training and tests of competency, in its operations manual.

65.090 ATS provider's obligation to provide currency and recency training and assessment

(1) An ATS provider must set up and maintain, in accordance with the Manual of Standards, programs for:

- (a) continuing assessment of its employees' competency for the purposes of ensuring that they continue to satisfy the currency requirements in relation to ratings and endorsements; and
- (b) familiarisation, retraining and assessment of any of its employees who at any time do not satisfy the currency or recency requirement in relation to an endorsement.

(2) The provider must include details of the program, including necessary training and tests of competency, in its operations manual.

65.095 Ancillary qualifications

(1) An ATC qualification certifies that the holder is competent to perform a particular ancillary function.

(2) The functions include the following:

- (a) classroom instructor;
- (b) on-the-job instructor;
- (c) workplace assessor.

(3) Within the limits set out in the Manual of Standards, an ATS provider may define, for the provider's organisation, the responsibilities of the holder of an ATC qualification mentioned in paragraph (2)(a), (b) or (c).

- (4) Subregulation (3) does not prevent an ATS provider defining an ancillary function for use within its own organisation.
- (5) An ATS provider must set up and maintain a program to grant ATC qualifications to, and administer ATC qualifications held by, its employees.
- (6) The provider must include details of the program, including necessary training and tests of competency, in its operations manual.
- (7) The program must be in accordance with the standards and requirements set out in the Manual of Standards.

65.100 Conduct of practical training

An ATS provider must ensure that practical training carried out by it, or on its behalf, for the award of an ATC licence, rating, endorsement or ATC qualification, is carried out in accordance with:

- (a) the standards and requirements set out in the Manual of Standards; and
- (b) the provider's operations manual.

65.105 Conduct of examinations

An ATS provider must ensure that an examination or assessment carried out by it, or on its behalf, for the award of an ATC licence, rating, endorsement or ATC qualification, is carried out in accordance with:

- (a) the standards and requirements set out in the Manual of Standards; and
- (b) the provider's operations manual.

65.115 Periods of validity of ratings and endorsements

- (1) Unless sooner cancelled, a rating on an ATC licence is valid for 12 months or until the licence is cancelled.
- (2) Unless sooner cancelled, an endorsement on an ATC licence remains valid:
 - (a) for the period (no longer than 6 months) specified for an endorsement in the operations manual of the ATS provider that granted it; or
 - (b) if the licence is cancelled before that time—until the licence is cancelled; or
 - (c) if the rating with which the endorsement is connected is cancelled before that time—until the rating is cancelled; or
 - (d) until the licence holder ceases to be employed by that ATS provider.
- (3) For paragraph (2)(c), an endorsement is connected with a rating if the endorsement authorises the performance, at a particular aerodrome or in relation to particular airspace, of the function of a holder of the rating.

Note: For the function of the holder of each kind of rating, see subregulation 65.075(2).

Regulation 65.120

65.120 Periods of validity of ATC qualifications

- (1) Unless sooner cancelled, an ATC qualification remains valid:
 - (a) for the period specified by the ATS provider or ATS training provider that granted it; or
 - (b) if any ATC licence, rating or endorsement on which it is dependent, is cancelled before that time—until the licence, rating or endorsement is cancelled; or
 - (c) until the holder ceases to be employed by that ATS provider or ATS training provider.
- (2) For paragraph (1)(b), an ATC qualification is dependent on a particular licence, rating or endorsement if the ATS provider or ATS training provider that grants the qualification so specifies.
- (3) A qualification is not in force during any period of suspension, but is not taken to be suspended by the suspension of any licence, rating or endorsement held by the holder of the qualification.

Division 65.C.2—Flight service licensing

65.125 Eligibility for grant of flight service licence

- (1) A person is eligible to be granted a flight service licence with a traffic information service rating if he or she:
 - (a) has turned 18; and
 - (b) holds a Class 3 medical certificate; and
 - (c) has successfully completed the training (including any examination or assessment) specified in the Manual of Standards for the licence, the rating and an endorsement; and
 - (e) speaks English clearly, and understands spoken English, to a standard that allows clear spoken two-way communication in the course of performing a flight service function.
- (3) A statement by an ATS provider, given in accordance with procedures set out in its operations manual, that a person meets the requirements in paragraph (1)(e) is, in the absence of contrary evidence, sufficient evidence of that fact.

65.130 Flight service ratings

- (1A) A person may apply to CASA, in writing, for a traffic information service rating.

Note 1: The traffic information service rating is the only flight service rating for Australia.

Note 2: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.

- (1) Subject to regulation 11.055, CASA must grant a rating to an applicant who:
 - (a) is eligible to be granted a flight service licence with a traffic information service rating; and
 - (b) successfully completes the training required by the Manual of Standards for the grant of the rating.

Note: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to grant, or cancelling, suspending or varying, a rating; or
- (b) a decision imposing a condition on a rating.

- (2) The function of a flight service licence holder holding a traffic information service rating is to provide, or supervise the provision of, a traffic and flight information and alerting service for the flight information area for which the licence is endorsed.

65.135 Maintenance of ratings on flight service licence

- (1) An ATS provider must set up and maintain a program to ensure that its employees who hold flight service licences hold traffic information service ratings.

Regulation 65.140

- (2) The provider must include details of that program, including necessary training and tests of competency, in its operations manual.
- (3) That program must be in accordance with the standards and requirements set out in the Manual of Standards.

65.140 Endorsements on flight service licences

- (1AA) A person may apply to CASA, in writing, for an endorsement on a flight service licence.

Note: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.

- (1A) Subject to regulation 11.055, CASA must grant an endorsement to an applicant who:
- (a) is eligible to be granted a flight service licence with a traffic information service rating; and
 - (b) successfully completes the training required by the Manual of Standards for the grant of the endorsement.

Note: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to grant, or cancelling, suspending or varying, an endorsement; or
 - (b) a decision imposing a condition on an endorsement.
- (1) An endorsement on a flight service licence certifies that the licence holder is competent to perform a flight service function in relation to an aerodrome or particular airspace.
 - (2) An ATS provider must set up and maintain a program to grant and administer endorsements on flight service licences held by its employees.
 - (3) The provider must include details of the program, including necessary training and tests of competency, in its operations manual.
 - (4) The program must be in accordance with the standards and requirements set out in the Manual of Standards.

65.145 Ancillary qualifications

- (1) A flight service qualification certifies that the holder is competent to perform a particular ancillary function.
- (2) The functions are the following:
 - (a) classroom instructor;
 - (b) on-the-job instructor;
 - (c) workplace assessor.

- (3) Within the limits set by the Manual of Standards, an ATS provider may define, for the provider's organisation, the responsibilities of the holder of a flight service qualification mentioned in paragraph (2)(a), (b) or (c).
- (4) Subregulation (1) does not prevent an ATS provider defining an ancillary function for use within its own organisation.
- (5) An ATS provider must set up and maintain a program to grant flight service qualifications to, and administer flight service qualifications held by, its employees.
- (6) The provider must include details of the program, including necessary training and tests of competency, in its operations manual.
- (7) The program must be in accordance with the standards and requirements set out in the Manual of Standards.

65.150 Conduct of training

An ATS provider must ensure that training carried out by it, or on its behalf, for the award of a flight service licence, rating, endorsement or flight service qualification, is carried out in accordance with:

- (a) the standards and requirements set out in the Manual of Standards; and
- (b) the provider's operations manual.

65.155 Conduct of examinations

An ATS provider must ensure that an examination carried out by it, or on its behalf, for the award of a flight service licence, rating, endorsement or flight service qualification, is carried out in accordance with:

- (a) the standards and requirements set out in the Manual of Standards; and
- (b) the provider's operations manual.

65.165 Periods of validity of rating and endorsement

- (1) Unless sooner cancelled, a rating on a flight service licence is valid for 12 months or until the licence is cancelled or ceases to be valid.
- (2) Unless sooner cancelled, an endorsement on a flight service licence remains valid:
 - (a) for the period (no longer than 6 months) specified for an endorsement in the operations manual of the ATS provider that granted it; or
 - (b) if the licence is cancelled before that time—until the licence is cancelled; or
 - (c) until the licence holder ceases to be employed by that ATS provider.

65.170 Period of validity of flight service qualification

- (1) Unless sooner cancelled, a flight service qualification remains valid:

Regulation 65.170

- (a) for the period specified by the ATS provider or ATS training provider that granted it; or
 - (b) if a flight service licence, rating or endorsement on which it is dependent is cancelled before that time—until the licence, rating or endorsement is cancelled; or
 - (c) until the holder ceases to be employed by that ATS provider or ATS training provider.
- (2) For paragraph (1)(b), a flight service qualification is dependent on a flight service licence, rating or endorsement if the ATS provider or ATS training provider that granted the qualification so specifies.
- (3) A qualification is not in force during any period of suspension, but is not taken to be suspended by the suspension of any licence, rating or endorsement held by the holder of the qualification.

Subpart 65.E—Administrative functions

Division 65.E.1—Grant of licences

Note: In addition to the provisions of this Division, Part 11 contains provisions relating to an application for an ATC licence or a flight service licence.

65.175 Definitions for this Subpart

In this Subpart:

licence means an ATC licence or a flight service licence.

qualification means an ATC qualification or a flight service qualification.

65.180 How to apply

- (1) A person may apply to CASA, in writing, for the grant of a licence.

Note: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.

- (3) The application must give details of the applicant's training, qualifications and experience, so far as relevant.
- (4) The application must be accompanied by:
- (a) a copy of any document that shows that the applicant has completed that training, holds that qualification or has that experience; and
 - (b) evidence that the applicant holds a Class 3 medical certificate; and
 - (c) evidence of the kind mentioned in subregulation 65.070(3) or 65.125(3), as the case requires.

65.225 Grant of licence

Subject to regulation 11.055, if a person has applied for the grant of a licence under this Part, CASA must grant the licence.

Note: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to issue, or cancelling, suspending or varying, a licence; or
- (b) a decision imposing a condition on a licence.

See also section 31 of the Act.

65.230 When decision must be made

- (1) If CASA does not make a decision about an application within 21 days after receiving it, CASA is taken to have refused the application.
- (2) However, if CASA makes a request under regulation 11.035 or 11.040, the time between when CASA makes the request, and when the applicant undertakes the

Regulation 65.230

test, or comes in for interview, or gives CASA the information or copy requested, does not count towards the 21 days.

- (3) Also, if CASA asks an applicant to make a statutory declaration under regulation 11.047 or subregulation 11.050(3A), the time between when CASA asks the applicant to do so and when the applicant gives CASA the statutory declaration does not count towards the 21 days.
- (4) Also, if CASA invites an applicant to make a written submission under subregulation 11.050(2), the time between when CASA gives the invitation and when the applicant makes the written submission does not count towards the 21 days.

Division 65.E.2—Ongoing proficiency and medical testing

65.250 Re-examination or re-assessment of licence or qualification holder

(1) If:

- (a) there is evidence that the holder of a licence or a qualification is not adequately performing his or her duties (whether because of lack of proficiency, injury, illness or for any other reason); and
- (b) it is necessary, in the interests of the safety of air navigation, to require the holder to demonstrate his or her proficiency or fitness to perform those duties;

CASA may, at a reasonable time and on reasonable notice, direct the holder to undertake:

- (c) an appropriate examination or performance assessment; or
- (d) a medical assessment by a designated aviation medical examiner.

(2) In paragraph (1)(d):

medical includes psychological and psychiatric.

Division 65.E.3—Suspension and cancellation of licences

65.255 Provisional suspension of licence pending examination or assessment

- (1) If under regulation 65.250 CASA directs the holder of a licence or qualification to undergo an examination, performance assessment or medical assessment, CASA may provisionally suspend the licence or a rating or endorsement on it, or the qualification, by notice in writing to the holder.
- (2) The provisional suspension has effect from the time the notice is served on the holder.
- (3) As soon as practicable after the examination or assessment, CASA must either:
 - (a) give the holder a notice under regulation 65.265 to show cause why the licence, rating, endorsement or qualification should not be cancelled or further suspended; or
 - (b) revoke the provisional suspension and tell the holder in writing that it has done so.
- (4) CASA may revoke the provisional suspension at any time by notice in writing.
- (5) If CASA gives the holder a show cause notice, the provisional suspension remains in effect (unless sooner revoked) until CASA decides, or is taken to have decided, whether or not to cancel the licence, rating, endorsement or qualification, or to further suspend it.
- (6) However, if the holder does not comply with the direction within the time allowed by the notice to do so (or any extension of that time allowed by CASA), the licence, rating, endorsement or qualification remains suspended until the holder does so.

65.260 Provisional suspension of licence etc during investigation

- (1) If there is evidence that the holder of a licence:
 - (a) may have contravened a provision of the Act or these Regulations; or
 - (b) may not meet a requirement of, or under, these Regulations in relation to getting or keeping the licence, rating, endorsement or qualification; or
 - (c) may have failed in his or her duty in a way that might adversely affect the safe navigation or operation of an aircraft;CASA may provisionally suspend the holder's licence, or a rating, endorsement or qualification, by notice in writing to the holder.
- (2) CASA may revoke the provisional suspension at any time by notice in writing.
- (3) The provisional suspension has effect from the time notice under subregulation (1) is served on the holder, and remains in effect (unless sooner revoked) until:

- (a) if CASA gives to the holder a show cause notice—CASA decides, or is taken to have decided, whether or not to cancel the licence, rating, endorsement or qualification, or to further suspend it; or
- (b) the end of 7 days after the time the notice under subregulation (1) is served on the holder.

65.265 Show cause procedure

- (1) If there is evidence that the holder of a licence:
 - (a) may have contravened a provision of the Act or these Regulations; or
 - (b) may not meet a requirement of, or under, these Regulations in relation to getting or keeping the licence, rating, endorsement or qualification; or
 - (c) may have failed in his or her duty in a way that might adversely affect the safe navigation or operation of an aircraft;CASA may give to the holder a notice in accordance with this regulation (a *show cause notice*).
- (2) Also, CASA may give to the holder of a licence a show cause notice if:
 - (a) under regulation 65.250, CASA has directed the holder to undertake an examination or a performance assessment or medical assessment; and
 - (b) the holder has not done so within the time allowed by the direction (or any extension of that time allowed by CASA).
- (3) The notice must be in writing.
- (4) The notice must set out the facts and circumstances that appear to justify cancellation or suspension of the licence, rating, endorsement or qualification.
- (5) The notice must invite the holder to show cause in writing, within a reasonable period stated in the notice, why the licence, rating, endorsement or qualification should not be cancelled or further suspended.

65.270 CASA's powers in respect of licence etc

CASA may cancel or suspend a licence, rating, endorsement or qualification if the holder:

- (a) has contravened a provision of the Act or these Regulations; or
- (b) does not meet a requirement of, or under, these Regulations in relation to getting or keeping the licence, rating, endorsement or qualification; or
- (c) has failed in his or her duty in a way that adversely affects the safe navigation or operation of an aircraft.

65.275 Choice between cancellation and suspension

- (1) This regulation sets out how CASA decides whether to cancel a person's licence, rating, endorsement or qualification, or suspend it.

Regulation 65.280

- (2) If the person has contravened a provision of the Act or these Regulations, or has failed in his or her duty in a way that adversely affects the safe navigation or operation of an aircraft:
 - (a) where CASA is satisfied that the contravention or failure is not likely to recur, CASA may do either or both of the following:
 - (i) suspend the person's licence, rating, endorsement or qualification for an appropriate period;
 - (ii) direct the person to receive appropriate counselling or training; and
 - (b) where CASA is not satisfied as mentioned in paragraph (a), CASA may:
 - (i) if the contravention or failure is sufficiently serious, or has occurred before—cancel the licence, rating, endorsement or qualification; or
 - (ii) take either or both of the courses mentioned in paragraph (a).
- (3) If the person does not meet a requirement of, or under, these Regulations in relation to getting or keeping the licence, rating, endorsement or qualification, but there is a reasonable prospect that he or she will be able to do so within a reasonable time, CASA may suspend the licence, rating, endorsement or qualification:
 - (a) until the happening of a specified event; or
 - (b) until the holder successfully completes specified training; or
 - (c) for a specified period within which the holder is likely to become able to meet the requirement.
- (4) If the person does not meet a requirement of, or under, these Regulations in relation to getting or keeping the licence, rating, endorsement or qualification and there is no reasonable prospect that he or she will be able to do so within a reasonable time, CASA must cancel the licence, rating, endorsement or qualification.

65.280 Procedure for decision

- (1) When considering whether to cancel or suspend a licence, rating, endorsement or qualification, CASA must take into account any submission that the holder makes within the time allowed by the relevant show cause notice.
- (2) CASA must tell the holder in writing of its decision.
- (3) If CASA has not decided whether or not to cancel or further suspend the licence, rating, endorsement or qualification within 30 days after the end of the period allowed for submissions by the show cause notice, CASA is taken to have decided, at the end of that 30-day period, neither to cancel nor further suspend the licence, rating, endorsement or qualification.
- (4) If the licence, rating, endorsement or qualification is provisionally suspended, and CASA decides, or is taken under subregulation (3) to have decided, neither to cancel nor further suspend it, the provisional suspension ceases to have effect when CASA makes, or is taken to have made, that decision.

65.285 Effect of suspension or provisional suspension of authorisation

If CASA suspends, or provisionally suspends, a person's licence, rating or endorsement under this Division:

- (a) the person is taken not to be the holder of the licence, rating or endorsement; and
- (b) the licence, rating or endorsement is not in force during the period of suspension.

Part 66—Continuing airworthiness—aircraft engineer licences and ratings

Table of contents

Subpart 66.A—General

- 66.005 Purpose of Part
- 66.010 Definitions for Part
- 66.015 Part 66 Manual of Standards

Subpart 66.B—Aircraft engineer licences

- 66.018 Aircraft engineer licences and kinds of aircraft
- 66.020 Applications for licences
- 66.025 Grant of licence
- 66.026 Grant of licence subject to exclusion
- 66.030 Recognition of foreign licences from recognised States held at time of application
- 66.035 Recognition of foreign licences from recognised States held before time of application
- 66.040 Recognition of foreign licences not from recognised States held at time of application—assessment by maintenance training organisation
- 66.045 Recognition of foreign licences not from recognised States held at time of application—assessment by CASA
- 66.050 Recognition of foreign licences not from recognised States held before time of application—assessment by maintenance training organisation
- 66.055 Recognition of foreign licences not from recognised States held before time of application—assessment by CASA
- 66.060 Qualifications from excluded States not recognised
- 66.065 Recognition of Defence Force aircraft authorisations held at time of application
- 66.070 Recognition of Defence Force aircraft authorisations held before time of application
- 66.071 Endorsement on licence of licence exclusion
- 66.072 Removal of exclusion from licence

Subpart 66.C—Ratings

- 66.075 Applications for ratings
- 66.080 Grant of rating
- 66.085 Determination of equivalence of certain ratings endorsed on certain licences and authorisations held at time of application
- 66.090 Determination of equivalence of certain ratings endorsed on certain licences and authorisations held before time of application
- 66.095 Grant of rating subject to exclusions
- 66.100 Training, assessment and experience for removal of exclusion from rating
- 66.105 Endorsement of rating on licence
- 66.110 Removal of exclusion from rating

Subpart 66.D—Conditions of licences

- 66.115 Conditions
- 66.115A Offence not to comply with licence conditions
- 66.120 All licences—general
- 66.125 All licences—medically significant conditions

- 66.130 Category A licences
- 66.135 Category B1 and B2 licences—maintenance certification on behalf of Part 145 organisation
- 66.137 Category B1 and B2 licences—maintenance certification other than on behalf of Part 145 organisation
- 66.138 Category B1 and B2 licences—certificate of release to service issued on behalf of Part 145 organisation
- 66.139A Category B1 and B2 licences—certificate of release to service issued other than on behalf of Part 145 organisation
- 66.140 Category C licences

Subpart 66.F—Administration

- 66.175 CASA may ask licensed aircraft maintenance engineers for information
- 66.180 Suspension of licence for failure to provide information
- 66.185 CASA must revoke suspension of licence if information provided

Subpart 66.A—General

66.005 Purpose of Part

This Part:

- (a) deals with aircraft engineer licences and ratings for:
 - (i) the performance of maintenance certification for maintenance carried out on aircraft; and
 - (ii) issuing certificates of release to service for aircraft in relation to maintenance carried out on aircraft; and
- (b) empowers CASA to issue a Manual of Standards for this Part.

Note: Under regulations 42.695, 42.735 and 42.790, a person performing maintenance certification or issuing a certificate of release to service on behalf of an approved maintenance organisation must hold a certification authorisation from the organisation that permits the person to perform the maintenance certification or issue the certificate of release to service.

66.010 Definitions for Part

In this Part:

additional practical experience, for an applicant for an aircraft engineer licence or a rating to be endorsed on a licence, means practical experience in carrying out maintenance on operating aircraft:

- (a) that the applicant carries out under the supervision of a person who holds:
 - (i) the same aircraft engineer licence as the licence applied for; or
 - (ii) the same rating as the rating applied for; and
- (b) that the applicant carries out on the kind of aircraft for:
 - (i) the licence applied for; or
 - (ii) the licence on which the rating applied for is to be endorsed.

aircraft type means:

- (a) a particular type, or type and model, of large aircraft with a particular type of aircraft engine; or
- (b) a large aircraft with a particular type of aircraft engine; or
- (c) a small aircraft with a particular type of aircraft engine.

Note: For paragraph (b), aircraft mentioned in this paragraph are known as “non-rated aircraft”.

Example 1: For paragraph (a), Airbus A310(GE CF6)

Example 2: For paragraph (a), Boeing 747-400 (RR RB211)

Example 3: For paragraph (b), non-rated aircraft (PWC PT6)

Example 4: For paragraph (b), non-rated aircraft (Honeywell TPE331)

Example 5: For paragraph (c), small aircraft (PWC PT6)

Example 6: For paragraph (c), small aircraft (Honeywell TPE331)

category A licence holder means an individual who holds a category A licence that is in force.

category B1 licence holder means an individual who holds a category B1 licence that is in force.

category B2 licence holder means an individual who holds a category B2 licence that is in force.

category C licence holder means an individual who holds a category C licence that is in force.

Defence Force aircraft means aircraft mentioned in paragraph (a) of the definition of *state aircraft* in section 3 of the Act.

Defence Force aircraft authorisation means an authorisation to perform, in relation to Defence Force aircraft, a function that is of the same nature as:

- (a) the function of performing maintenance certification; or
- (b) the function of issuing a certificate of release to service.

Defence Force aircraft rating means an authorisation that:

- (a) is of the same nature as a rating; and
- (b) relates to Defence Force aircraft.

foreign rating means an authorisation that:

- (a) is of the same nature as a rating; and
- (b) is:
 - (i) granted under a national aviation law of a foreign country, other than a foreign country that is an excluded State; or
 - (ii) issued by a foreign company, other than a foreign company incorporated or formed in an excluded State.

medical practitioner has the meaning given by subregulation 67.010(1).

practical experience in carrying out maintenance on operating aircraft includes:

- (a) simulated maintenance experience using maintenance simulation technology; and
- (b) practical maintenance experience on representative aeronautical products during maintenance training.

requalification requirement, for an aircraft engineer licence, has the meaning given by the Part 66 Manual of Standards.

safety-relevant, in relation to a medically significant condition, has the meaning given by regulation 67.015.

specialist medical practitioner has the meaning given by subregulation 67.010(1).

Note: See the Dictionary for definitions of other terms used in this Part.

Regulation 66.015

66.015 Part 66 Manual of Standards

- (1) For subsection 98(5A) of the Act, CASA may issue a Manual of Standards for this Part prescribing matters:
 - (a) required or permitted by these Regulations to be prescribed by the Part 66 Manual of Standards; or
 - (b) necessary or convenient to be prescribed for carrying out or giving effect to this Part.
- (2) Without limiting subregulation (1), the Part 66 Manual of Standards may specify the following matters:
 - (a) that a specified foreign country is an excluded State;
 - (b) that a specified foreign country is a recognised State;
 - (c) the privileges that a licensed aircraft maintenance engineer may exercise;
 - (d) the privileges that a licensed aircraft maintenance engineer whose licence is endorsed with a rating may exercise;
 - (e) that a specified aircraft type is a type rated aircraft type for an aircraft engineer licence;
 - (f) the training and experience requirements for the grant of an aircraft engineer licence;
 - (g) the required subject modules for an aircraft engineer licence;
 - (h) a list of levels of knowledge for the required subject modules;
 - (i) the required level of knowledge for each subject module, or each part of a subject module;
 - (j) the required units of competency for an aircraft engineer licence;
 - (ja) the required aircraft type training, subject modules and units of competency for a rating on an aircraft engineer licence;
 - (k) the basic knowledge examination standard for category training;
 - (l) that a specified aircraft system is designated as 1 of the following:
 - (i) avionic;
 - (ii) electrical;
 - (iii) mechanical;
 - (iv) powerplant;
 - (v) structural;
 - (m) that a specified condition or limitation applies to:
 - (i) the performance of maintenance certification by a licensed aircraft maintenance engineer in relation to maintenance carried out on a particular aircraft system; or
 - (ii) the issue of a certificate of release to service by a licensed aircraft maintenance engineer for an aircraft in relation to maintenance carried out on a particular aircraft system;
 - (n) for aircraft type training:
 - (i) the required theoretical elements for an aircraft engineer licence; and
 - (ii) the required training level for each theoretical element; and
 - (iii) requirements for practical elements; and

- (iv) standards for assessments for theoretical elements; and
- (v) standards for assessments for practical elements;
- (o) that a specified aircraft type, aircraft system or subset of an aircraft system is one for which a Part 145 organisation may provide training and assessment;
- (p) that a specified aircraft type is one for which a Part 145 organisation may arrange for the manufacturer of the aircraft or the aircraft engine to provide training and assessment;
- (q) requalification requirements for an aircraft engineer licence;
- (r) the aircraft systems or subsets of aircraft systems that may be excluded from the scope of:
 - (i) a category A, B1 or B2 licence; or
 - (ii) a rating for a type rated aircraft type;
- (s) the required subject modules and units of competency for each aircraft system or subset of an aircraft system specified for subparagraph (r)(i);
- (t) the required aircraft type training for each aircraft system or subset of an aircraft system specified for subparagraph (r)(ii).

Note 1: For paragraphs (g), (h) and (i), see also section 147.A.200 of the Part 147 Manual of Standards (requirements for the conduct of maintenance training courses).

Note 2: For paragraph (n), see also section 147.A.300 of the Part 147 Manual of Standards (requirements for maintenance training course plans).

Regulation 66.018

Subpart 66.B—Aircraft engineer licences

66.018 Aircraft engineer licences and kinds of aircraft

An aircraft engineer licence specified in column 1 of an item in the following table may be granted in relation to the kind of aircraft specified in column 2 of the item.

Aircraft engineer licences and kinds of aircraft		
Item	Licence	Kind of aircraft
1	Subcategory A1	Turbine-engined fixed-wing aeroplane
2	Subcategory A2	Piston-engined fixed-wing aeroplane
3	Subcategory A3	Turbine-engined helicopter
4	Subcategory A4	Piston-engined helicopter
5	Subcategory B1.1	Turbine-engined fixed-wing aeroplane
6	Subcategory B1.2	Piston-engined fixed-wing aeroplane
7	Subcategory B1.3	Turbine-engined helicopter
8	Subcategory B1.4	Piston-engined helicopter
9	Category B2	An aircraft mentioned in another item of this table
10	Category C	Large aircraft

66.020 Applications for licences

- (1) A person may apply to CASA for an aircraft engineer licence.
- (2) The application must:
 - (a) be in writing; and
 - (b) specify the aircraft engineer licence being applied for; and
 - (ba) specify whether the application is for a licence that would be subject to the exclusion of an aircraft system or a subset of an aircraft system; and
 - (c) if the applicant does not hold an aircraft engineer licence at the time of making the application—be accompanied by evidence of the applicant's identity; and
 - (d) be accompanied by copies of documents evidencing the qualifications and experience relevant to the licence being applied for, including any relevant foreign licence or Defence Force aircraft authorisation that the applicant holds; and
 - (e) if, at the time of making the application, the applicant has a medically significant condition that is safety-relevant:
 - (i) specify the condition; and
 - (ii) be accompanied by a report from a medical practitioner that describes the condition.

Regulation 66.025

- Note 1: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.
- Note 2: Part 11 deals with applications and decision making.

66.025 Grant of licence

- (1) Subject to regulation 11.055, CASA must grant an aircraft engineer licence to an applicant if:
 - (a) the applicant is not a licensed aircraft maintenance engineer at the time of making the application; and
 - (b) CASA is satisfied that the applicant meets the requirements mentioned in subregulation (3).
- (2) Subject to regulation 11.055, CASA must grant an aircraft engineer licence to an applicant if:
 - (a) the applicant is a licensed aircraft maintenance engineer at the time of making the application; and
 - (b) CASA is satisfied that the applicant meets the requirements mentioned in paragraphs (3)(d) and (e).
- (3) The requirements are that:
 - (a) the applicant is at least 18 at the time of making the application; and
 - (b) the applicant can read, write and converse in English to a level that is sufficient to enable the applicant to safely exercise the privileges mentioned in the Part 66 Manual of Standards for the licence applied for; and
 - (c) the applicant understands the applicant's role, as a licensed aircraft maintenance engineer, in airworthiness management; and
 - (d) if, at the time of making the application, the applicant had a medically significant condition that was safety-relevant—the applicant can safely exercise at least 1 of the privileges mentioned in the Part 66 Manual of Standards for the licence applied for; and
 - (e) the applicant:
 - (i) meets the requirements of sections 66.A.25 and 66.A.30 of the Part 66 Manual of Standards for the licence applied for; or
 - (ii) is taken, under regulation 66.030, 66.035, 66.040, 66.045, 66.050, 66.055, 66.065 or 66.070, to meet those requirements.

Note 1: For paragraph (d), CASA may grant a licence in respect of only some of the matters sought in the application—see subregulation 11.055(7).

Note 2: For paragraph (d), CASA may grant a licence subject to any condition that CASA is satisfied is necessary in the interests of the safety of air navigation—see regulation 11.056.

- (4) If:
 - (a) CASA receives a report from a maintenance training organisation under section 147.A.139 of the Part 147 Manual of Standards; and

Regulation 66.026

- (b) the report includes a statement that the applicant can read, write and converse as required by paragraph (3)(b);

CASA need consider only that report in making its decision about the requirement mentioned in paragraph (3)(b).

(5) If:

- (a) CASA receives a report from a maintenance training organisation under section 147.A.139 of the Part 147 Manual of Standards; and

- (b) the report includes a statement that the applicant has the understanding required by paragraph (3)(c);

CASA need consider only that report in making its decision about the requirement mentioned in paragraph (3)(c).

Note 1: For review of decisions about licences, see section 31 of the Act.

Note 2: For the privileges that a licensed aircraft maintenance engineer may exercise, see the Part 66 Manual of Standards.

66.026 Grant of licence subject to exclusion

Not meeting requirements for excluded system

- (1) Subject to regulation 11.055, CASA must grant an aircraft engineer licence to an applicant subject to the exclusion of an aircraft system or a subset of an aircraft system if:
 - (a) the licence applied for is a category B1 or B2 licence; and
 - (b) either:
 - (i) CASA is satisfied that the applicant meets the requirements mentioned in paragraphs 66.025(3)(a) to (c); or
 - (ii) the applicant is a licensed aircraft maintenance engineer at the time of making the application; and
 - (c) CASA is satisfied that the applicant meets the requirement mentioned in paragraph 66.025(3)(d); and
 - (d) the aircraft system or subset is specified in the Part 66 Manual of Standards as a system or subset that may be excluded from the scope of a category B1 or B2 licence; and
 - (e) the applicant meets the requirements of sections 66.A.25 and 66.A.30 of the Part 66 Manual of Standards for the licence applied for, except the requirements specified in the Part 66 Manual of Standards for the aircraft system or subset.

Partially equivalent foreign licence or Defence Force aircraft authorisation

- (2) Subject to regulation 11.055, CASA must grant an aircraft engineer licence to an applicant subject to the exclusion of an aircraft system or a subset of an aircraft system if:
 - (a) either:
 - (i) CASA is satisfied that the applicant meets the requirements mentioned in paragraphs 66.025(3)(a) to (c); or

- (ii) the applicant is a licensed aircraft maintenance engineer at the time of making the application; and
- (b) CASA is satisfied that the applicant meets the requirement mentioned in paragraph 66.025(3)(d); and
- (c) regulation 66.030, 66.035, 66.040, 66.045, 66.050, 66.055, 66.065 or 66.070 applies to the applicant; and
- (d) the applicant is taken, under that regulation, to meet the requirements of sections 66.A.25 and 66.A.30 of the Part 66 Manual of Standards for the licence applied for, except the requirements specified in the Part 66 Manual of Standards for the aircraft system or subset.

66.030 Recognition of foreign licences from recognised States held at time of application

- (1) This regulation applies to an applicant for an aircraft engineer licence if:
 - (a) at the time of making the application for the licence, the applicant holds a foreign licence, that is in force, issued by:
 - (i) a recognised State; or
 - (ii) a foreign company incorporated or formed in a recognised State; and
 - (b) the applicant exercised privileges under the foreign licence or under a foreign rating endorsed on the foreign licence; and
 - (c) CASA determines, in writing, that at least 1 of the privileges exercised was equivalent to a privilege mentioned in the Part 66 Manual of Standards for the licence applied for; and
 - (d) in the 2 years immediately before the time of making the application, the applicant has:
 - (i) exercised the privileges for at least 6 months; or
 - (ii) gained at least 6 months additional practical experience; or
 - (iii) for an applicant for a category C licence who does not hold, and is not applying for, a category B1 or B2 licence—gained experience that CASA determines, in writing, is relevant to the privileges mentioned in the Part 66 Manual of Standards for the licence applied for.
- (2) The applicant is taken to meet the requirements of sections 66.A.25 and 66.A.30 of the Part 66 Manual of Standards for the licence applied for to the extent mentioned in the determination under paragraph (1)(c).

66.035 Recognition of foreign licences from recognised States held before time of application

- (1) This regulation applies to an applicant for an aircraft engineer licence if:
 - (a) before the time of making the application for the licence, the applicant held a foreign licence issued by:
 - (i) a recognised State; or
 - (ii) a foreign company incorporated or formed in a recognised State; and
 - (b) the applicant does not hold the foreign licence at the time of making the application; and
-

Regulation 66.040

- (c) the applicant exercised privileges under the foreign licence or under a foreign rating endorsed on the foreign licence; and
 - (d) CASA determines, in writing, that at least 1 of the privileges exercised was equivalent to a privilege mentioned in the Part 66 Manual of Standards for the licence applied for; and
 - (e) in the 2 years immediately before the time of making the application, the applicant has:
 - (i) exercised the privileges for at least 6 months; or
 - (ii) gained at least 6 months additional practical experience; or
 - (iii) for an applicant for a category C licence who does not hold, and is not applying for, a category B1 or B2 licence—gained experience that CASA determines, in writing, is relevant to the privileges mentioned in the Part 66 Manual of Standards for the licence applied for; and
 - (f) CASA is satisfied that the licence that the applicant held was not cancelled or revoked for a reason involving a matter mentioned in subregulation 11.055(4).
- (2) The applicant is taken to meet the requirements of sections 66.A.25 and 66.A.30 of the Part 66 Manual of Standards for the licence applied for to the extent mentioned in the determination under paragraph (1)(d).

66.040 Recognition of foreign licences not from recognised States held at time of application—assessment by maintenance training organisation

- (1) This regulation applies to an applicant for an aircraft engineer licence if:
- (a) at the time of making the application for the licence, the applicant holds a foreign licence, that is in force, issued by:
 - (i) a foreign country that is not a recognised State; or
 - (ii) a foreign company incorporated or formed in a foreign country that is not a recognised State; and
 - (b) the foreign licence has been assessed by a maintenance training organisation that is:
 - (i) approved to assess foreign licences issued by the foreign country or by a foreign company incorporated or formed in the foreign country; and
 - (ii) approved to provide category training for the licence applied for; and
 - (c) the maintenance training organisation has given CASA the outcome of the assessment in a report under section 147.A.139 of the Part 147 Manual of Standards; and
 - (d) the applicant exercised privileges under the foreign licence or under a foreign rating endorsed on the foreign licence; and
 - (e) CASA determines, in writing, that at least 1 of the privileges exercised was equivalent to a privilege mentioned in the Part 66 Manual of Standards for the licence applied for; and
 - (f) in the 2 years immediately before the time of making the application, the applicant has:

- (i) exercised the privileges for at least 6 months; or
 - (ii) gained at least 6 months additional practical experience.
- (2) The applicant is taken to meet the requirements of sections 66.A.25 and 66.A.30 of the Part 66 Manual of Standards for the licence applied for to the extent mentioned in the determination.

66.045 Recognition of foreign licences not from recognised States held at time of application—assessment by CASA

- (1) This regulation applies to an applicant for an aircraft engineer licence if:
- (a) at the time of making the application for the licence, the applicant holds a foreign licence, that is in force, issued by:
 - (i) a foreign country that is not a recognised State; or
 - (ii) a foreign company incorporated or formed in a foreign country that is not a recognised State; and
 - (b) there is no maintenance training organisation that is approved to assess foreign licences issued by the foreign country or by a foreign company incorporated or formed in the foreign country; and
 - (c) CASA has assessed the foreign licence; and
 - (d) the applicant exercised privileges under the foreign licence or under a foreign rating endorsed on the foreign licence; and
 - (e) CASA determines, in writing, that at least 1 of the privileges exercised was equivalent to a privilege mentioned in the Part 66 Manual of Standards for the licence applied for; and
 - (f) in the 2 years immediately before the time of making the application, the applicant has:
 - (i) exercised the privileges for at least 6 months; or
 - (ii) gained at least 6 months additional practical experience; or
 - (iii) for an applicant for a category C licence who does not hold, and is not applying for, a category B1 or B2 licence—gained experience that CASA determines, in writing, is relevant to the privileges mentioned in the Part 66 Manual of Standards for the licence applied for.
- (2) The applicant is taken to meet the requirements of sections 66.A.25 and 66.A.30 of the Part 66 Manual of Standards for the licence applied for to the extent mentioned in the determination under paragraph (1)(e).

66.050 Recognition of foreign licences not from recognised States held before time of application—assessment by maintenance training organisation

- (1) This regulation applies to an applicant for an aircraft engineer licence if:
- (a) before the time of making the application for the licence, the applicant held a foreign licence issued by:
 - (i) a foreign country that is not a recognised State; or

Regulation 66.055

- (ii) a foreign company incorporated or formed in a foreign country that is not a recognised State; and
 - (b) the applicant does not hold the foreign licence at the time of making the application; and
 - (c) the foreign licence has been assessed by a maintenance training organisation that is:
 - (i) approved to assess foreign licences issued by the foreign country or by a foreign company incorporated or formed in the foreign country; and
 - (ii) approved to provide category training for the licence applied for; and
 - (d) the maintenance training organisation has given CASA the outcome of the assessment in a report under section 147.A.139 of the Part 147 Manual of Standards; and
 - (e) the applicant exercised privileges under the foreign licence or under a foreign rating endorsed on the foreign licence; and
 - (f) CASA determines, in writing, that at least 1 of the privileges exercised was equivalent to a privilege mentioned in the Part 66 Manual of Standards for the licence applied for; and
 - (g) in the 2 years immediately before the time of making the application, the applicant has:
 - (i) exercised the privileges for at least 6 months; or
 - (ii) gained at least 6 months additional practical experience; and
 - (h) CASA is satisfied that the foreign licence that the applicant held was not cancelled or revoked for a reason involving a matter mentioned in subregulation 11.055(4).
- (2) The applicant is taken to meet the requirements of sections 66.A.25 and 66.A.30 of the Part 66 Manual of Standards for the licence applied for to the extent mentioned in the determination.

66.055 Recognition of foreign licences not from recognised States held before time of application—assessment by CASA

- (1) This regulation applies to an applicant for an aircraft engineer licence if:
- (a) before the time of making the application for the licence, the applicant held a foreign licence issued by:
 - (i) a foreign country that is not a recognised State; or
 - (ii) a foreign company incorporated or formed in a foreign country that is not a recognised State; and
 - (b) the applicant does not hold the foreign licence at the time of making the application; and
 - (c) there is no maintenance training organisation that is approved to assess foreign licences issued by the foreign country or by a foreign company incorporated or formed in the foreign country; and
 - (d) CASA has assessed the foreign licence; and

- (e) the applicant exercised privileges under the foreign licence or under a foreign rating endorsed on the foreign licence; and
 - (f) CASA determines, in writing, that at least 1 of the privileges exercised was equivalent to a privilege mentioned in the Part 66 Manual of Standards for the licence applied for; and
 - (g) in the 2 years immediately before the time of making the application, the applicant has:
 - (i) exercised the privileges for at least 6 months; or
 - (ii) gained at least 6 months additional practical experience; or
 - (iii) for an applicant for a category C licence who does not hold, and is not applying for, a category B1 or B2 licence—gained experience that CASA determines, in writing, is relevant to the privileges mentioned in the Part 66 Manual of Standards for the licence applied for; and
 - (h) CASA is satisfied that the foreign licence that the applicant held was not cancelled or revoked for a reason involving a matter mentioned in subregulation 11.055(4).
- (2) The applicant is taken to meet the requirements of sections 66.A.25 and 66.A.30 of the Part 66 Manual of Standards for the licence applied for to the extent mentioned in the determination under paragraph (1)(f).

66.060 Qualifications from excluded States not recognised

- (1) This regulation applies to an applicant for an aircraft engineer licence if the applicant holds:
- (a) a licence issued by a foreign country that is an excluded State; or
 - (b) an authorisation issued by a foreign company incorporated or formed in a foreign country that is an excluded State.
- (2) The applicant is not, only because of holding the licence or authorisation, or a rating endorsed on the licence or authorisation, taken to meet any of the requirements of sections 66.A.25 and 66.A.30 of the Part 66 Manual of Standards for the aircraft engineer licence applied for.

Note: In assessing a person, a maintenance training organisation must not give credit to the person for holding a licence (however described) that was issued to the person by an excluded State—see regulation 147.075.

66.065 Recognition of Defence Force aircraft authorisations held at time of application

- (1) This regulation applies to an applicant for an aircraft engineer licence if:
- (a) at the time of making the application for the licence, the applicant holds a Defence Force aircraft authorisation that is in force; and
 - (b) the applicant exercised privileges under the authorisation or under a Defence Force aircraft rating endorsed on the authorisation; and
 - (c) a maintenance training organisation that is approved to provide category training for the licence applied for has:
 - (i) assessed the Defence Force aircraft authorisation; and

Regulation 66.070

- (ii) given CASA the outcome of the assessment in a report under section 147.A.139 of the Part 147 Manual of Standards; and
 - (d) CASA determines, in writing, that at least 1 of the privileges exercised was equivalent to a privilege mentioned in the Part 66 Manual of Standards for the licence applied for; and
 - (e) in the 2 years immediately before the time of making the application, the applicant has:
 - (i) exercised the privileges for at least 6 months; or
 - (ii) gained at least 6 months additional practical experience.
- (2) The applicant is taken to meet the requirements of sections 66.A.25 and 66.A.30 of the Part 66 Manual of Standards for the licence applied for to the extent mentioned in the determination.

66.070 Recognition of Defence Force aircraft authorisations held before time of application

- (1) This regulation applies to an applicant for an aircraft engineer licence if:
- (a) before the time of making the application for the licence, the applicant held a Defence Force aircraft authorisation; and
 - (b) the applicant does not hold the authorisation at the time of making the application; and
 - (c) the applicant exercised privileges under the authorisation or under a Defence Force aircraft rating endorsed on the authorisation; and
 - (d) a maintenance training organisation that is approved to provide category training for the licence applied for has:
 - (i) assessed the Defence Force aircraft authorisation; and
 - (ii) given CASA the outcome of the assessment in a report under section 147.A.139 of the Part 147 Manual of Standards; and
 - (e) CASA determines, in writing, that at least 1 of the privileges exercised was equivalent to a privilege mentioned in the Part 66 Manual of Standards for the licence applied for; and
 - (f) in the 2 years immediately before the time of making the application, the applicant has:
 - (i) exercised the privileges for at least 6 months; or
 - (ii) gained at least 6 months additional practical experience; and
 - (g) CASA is satisfied that the authorisation that the applicant held was not cancelled or revoked for a reason involving a matter mentioned in subregulation 11.055(4).
- (2) The applicant is taken to meet the requirements of sections 66.A.25 and 66.A.30 of the Part 66 Manual of Standards for the licence applied for to the extent mentioned in the determination.

66.071 Endorsement on licence of licence exclusion

If CASA grants an aircraft engineer licence that is subject to an exclusion imposed under regulation 66.026, CASA must endorse on the licence that the licence is subject to the exclusion.

66.072 Removal of exclusion from licence

- (1) The holder of an aircraft engineer licence that is subject to the exclusion of an aircraft system or a subset of an aircraft system may apply to CASA for removal of the exclusion.
- (2) Subject to regulation 11.055, CASA must remove the exclusion if CASA is satisfied, on the basis of evidence mentioned in subregulation (3), that the holder has successfully completed the training necessary for the removal of the exclusion.
- (3) For subregulation (2), CASA must receive evidence from a maintenance training organisation that the holder has successfully completed the training and assessment that is required for the aircraft system or subset under section 66.A.25 of the Part 66 Manual of Standards.
- (4) If CASA removes the exclusion from the licence, CASA must:
 - (a) amend the licence document to remove the endorsement that the licence is subject to the exclusion; and
 - (b) for each rating on the licence that is subject to the exclusion of the aircraft system or subset—endorse on the licence that the rating is subject to the exclusion.

Regulation 66.075

Subpart 66.C—Ratings

66.075 Applications for ratings

- (1) A person may apply to CASA for a rating for an aircraft type.
- (2) A person may apply for a rating only if, at the time of making the application, the person is applying for, or holds, the aircraft engineer licence for which the aircraft type is specified in the Part 66 Manual of Standards (the *relevant licence*).
- (3) The application must:
 - (a) be in writing; and
 - (b) specify the rating being applied for; and
 - (ba) for a rating for a type rated aircraft type—specify whether the application is for a rating that is subject to the exclusion of an aircraft system or a subset of an aircraft system; and
 - (bb) specify whether the application is for a rating in relation to a partially equivalent foreign licence or Defence Force aircraft authorisation; and
 - (c) be accompanied by copies of documents evidencing the qualifications and experience relevant to the rating applied for.
- (4) Also, the application must comply with subregulation (5) if, at the time of making the application:
 - (a) the applicant has a medically significant condition that is safety-relevant; and
 - (b) the condition was not specified in the applicant’s application for the relevant licence.
- (5) For subregulation (4), the application must:
 - (a) specify the condition; and
 - (b) be accompanied by a report from a medical practitioner that describes the condition.

Note 1: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.

Note 2: Part 11 deals with applications and decision making.

66.080 Grant of rating

- (1) Subject to regulation 11.055, CASA must grant to an applicant a rating on an aircraft engineer licence if CASA is satisfied that:
 - (a) the applicant meets the requirements specified in the Part 66 Manual of Standards for the rating applied for; and

Regulation 66.080

- (b) if subregulation 66.075(4) applies to the applicant—the applicant can safely exercise at least one of the privileges specified in the Part 66 Manual of Standards for the rating applied for; and
 - (c) if the application is for a rating that requires aircraft type training—the applicant meets the requirements mentioned in subregulation (2), (3) or (4).
- (1A) If the applicant holds a licence that is, or is applying for a licence that will be, subject to the exclusion of an aircraft system or a subset of an aircraft system, CASA must not grant the rating unless it is subject to the exclusion of the aircraft system or subset.

Successful completion of aircraft type training and assessment

- (2) The requirements are that:
- (a) at the time of making the application, the applicant has evidence of the successful completion of the aircraft type training, or an element of the aircraft type training, for the rating; and
 - (b) within the 5 years immediately before the time of making the application, the applicant has successfully completed:
 - (i) the theoretical elements of the aircraft type training for the rating; and
 - (ii) the assessment for the training; and
 - (c) within the 3 years immediately before the time of making the application, the applicant has successfully completed:
 - (i) the practical elements of the aircraft type training for the rating; and
 - (ii) the assessment for the training.

Training, assessment and experience provided by Part 145 organisations

- (3) The requirements are that:
- (a) at the time of making the application, the applicant has a notice in relation to the rating, issued under paragraph 145.A.37(d) of the Part 145 Manual of Standards by a Part 145 organisation; and
 - (b) within the 5 years immediately before the time of making the application, the applicant has successfully completed:
 - (i) the theoretical elements of the aircraft type training for the rating; and
 - (ii) the assessment for the training; and
 - (c) within the 3 years immediately before the time of making the application, the applicant has successfully completed:
 - (i) the practical elements of the aircraft type training for the rating; and
 - (ii) the assessment for the training.

Fully or partially equivalent foreign or Defence Force rating

- (4) The requirements are that, at the time of making the application, the applicant holds, or has held:
- (a) a foreign licence that is endorsed with a foreign rating that CASA determines, under regulation 66.085 or 66.090, is fully or partially equivalent to the rating applied for; or

Regulation 66.085

- (b) a Defence Force aircraft authorisation that is endorsed with a Defence Force aircraft rating that CASA determines, under regulation 66.085 or 66.090, is fully or partially equivalent to the rating applied for.

Note: For review of decisions about ratings, see section 31 of the Act.

66.085 Determination of equivalence of certain ratings endorsed on certain licences and authorisations held at time of application

If:

- (a) at the time of making an application for a rating for an aircraft type, an applicant holds:
 - (i) a foreign licence that is endorsed with a foreign rating that relates to the aircraft type; or
 - (ii) a Defence Force aircraft authorisation that is endorsed with a Defence Force aircraft rating that relates to the aircraft type; and
- (b) in the 2 years immediately before making the application, the applicant:
 - (i) exercised privileges under the licence or authorisation for at least 6 months; or
 - (ii) gained at least 6 months additional practical experience;

CASA must determine, in writing, whether the rating endorsed on the licence or authorisation is fully or partially equivalent to the rating applied for.

66.090 Determination of equivalence of certain ratings endorsed on certain licences and authorisations held before time of application

If:

- (a) before making an application for a rating for an aircraft type, an applicant held:
 - (i) a foreign licence that was endorsed with a foreign rating that relates to the aircraft type; or
 - (ii) a Defence Force aircraft authorisation that was endorsed with a Defence Force aircraft rating that relates to the aircraft type; and
- (b) the applicant does not hold the licence or authorisation at the time of making the application; and
- (c) in the 2 years immediately before making the application, the applicant:
 - (i) exercised privileges under the licence or authorisation for at least 6 months; or
 - (ii) gained at least 6 months additional practical experience; and
- (d) CASA is satisfied that the licence or authorisation was not cancelled or revoked for a reason involving a matter mentioned in subregulation 11.055(4);

CASA must determine, in writing, whether the rating endorsed on the licence or authorisation is fully or partially equivalent to the rating applied for.

66.095 Grant of rating subject to exclusions

Not meeting requirements for excluded system

- (1) Subject to regulation 11.055, CASA must grant a rating to an applicant subject to the exclusion of an aircraft system or a subset of an aircraft system if:
 - (a) the applicant holds, or is an applicant for, a category B1 or B2 licence that is, or will be, subject to the exclusion of the aircraft system or subset; and
 - (b) CASA is satisfied that the applicant meets the requirement mentioned in paragraph 66.080(1)(a); and
 - (c) CASA is satisfied that the applicant meets the requirements mentioned in subregulation 66.080(2) or (3), except the requirements for the aircraft system or subset.
- (2) Subject to regulation 11.055, CASA must grant a rating to an applicant subject to the exclusion of an aircraft system or a subset of an aircraft system if:
 - (a) the applicant holds, or is an applicant for, a category B1 or B2 licence other than a licence that is, or will be, subject to the exclusion of the aircraft system or subset; and
 - (b) the application specifies that the rating is to be subject to the exclusion; and
 - (c) CASA is satisfied that the applicant meets the requirement mentioned in paragraph 66.080(1)(a); and
 - (d) CASA is satisfied that the applicant meets the requirements mentioned in subregulation 66.080(2) or (3), except the requirements for the aircraft system or subset.

Partially equivalent foreign licence or Defence Force aircraft authorisation

- (3) Subregulation (4) applies if CASA has determined, under regulation 66.085 or 66.090, that:
 - (a) a foreign rating endorsed on a foreign licence that the applicant holds or has held; or
 - (b) a Defence Force aircraft rating endorsed on a Defence Force aircraft authorisation that the applicant holds or has held;is partially equivalent to the rating applied for because the foreign rating or Defence Force aircraft rating does not cover an aircraft system or a subset of an aircraft system.
- (4) Subject to regulation 11.055, CASA must grant the rating subject to the exclusion of the aircraft system or subset.

66.100 Training, assessment and experience for removal of exclusion from rating

If CASA grants a rating subject to an exclusion under regulation 66.095, CASA must decide:

- (a) whether the training and assessment that is necessary for the removal of the exclusion:

Regulation 66.105

- (i) is of a kind that must be provided by a maintenance training organisation; or
 - (ii) is of a kind that may be provided either by a Part 145 organisation or a maintenance training organisation; and
- (b) whether any practical experience is necessary for the removal of the exclusion.

66.105 Endorsement of rating on licence

If CASA grants a rating, CASA must endorse on the applicant's licence:

- (a) the rating; and
- (b) if the rating is granted subject to an exclusion imposed under regulation 66.095—the exclusion.

66.110 Removal of exclusion from rating

- (1) The holder of a rating that is subject to the exclusion of an aircraft system or a subset of an aircraft system may apply to CASA for removal of the exclusion.
- (2) Subject to regulation 11.055, CASA must remove the exclusion if:
 - (a) CASA is satisfied, on the basis of evidence received from a maintenance training organisation or a Part 145 organisation, that the holder has:
 - (i) successfully completed the aircraft type training for the aircraft type required by the Part 66 Manual of Standards for the aircraft system or subset; and
 - (ii) obtained any practical experience that, under regulation 66.100, is necessary to remove the exclusion; and
 - (b) the holder's licence is not subject to the exclusion of the aircraft system or subset.

Subpart 66.D—Conditions of licences

Note 1: For CASA's power to impose conditions, see regulations 11.056, 11.067 and 11.068.

Note 2: For other conditions that apply to licences, see regulations 11.070 to 11.075.

66.115 Conditions

It is a condition of an aircraft engineer licence that the holder of the licence must not contravene a provision of this Subpart.

66.115A Offence not to comply with licence conditions

- (1) A licensed aircraft maintenance engineer commits an offence of strict liability if he or she contravenes a provision of this Subpart (other than regulation 66.125).

Penalty: 50 penalty units.

- (2) A licensed aircraft maintenance engineer commits an offence if:
- (a) at a particular time, he or she exercises a privilege mentioned in the Part 66 Manual of Standards for his or her aircraft engineer licence or for a rating endorsed on the licence; and
 - (b) at that time:
 - (i) he or she knows that he or she has a medically significant condition; and
 - (ii) the condition is safety-relevant; and
 - (iii) the condition was not specified in an application made by the licensed aircraft maintenance engineer for an aircraft engineer licence or a rating that he or she holds; and
 - (iv) the exercise of the privilege is not permitted by subregulation (3).

Penalty: 50 penalty units.

- (3) The exercise of a privilege is permitted if:
- (a) at least 30 days have elapsed since the day the licensed aircraft maintenance engineer first knew that he or she had the condition; and
 - (b) the licensed aircraft maintenance engineer has obtained a certificate from a medical practitioner or specialist medical practitioner to the effect that his or her ability to exercise the privilege is no longer reduced by the condition.

66.120 All licences—general

Compliance with privileges and conditions or limitations

- (1) A licensed aircraft maintenance engineer may perform maintenance certification or issue a certificate of release to service only if he or she does so in accordance with:

Regulation 66.125

- (a) the privileges mentioned in the Part 66 Manual of Standards for his or her aircraft engineer licence or for any ratings endorsed on the licence; and
- (b) a condition or limitation that applies to the performance of the maintenance certification or the issue of the certificate of release to service under the Part 66 Manual of Standards.

Requirement for recent qualification or experience

- (2) A licensed aircraft maintenance engineer may perform maintenance certification or issue a certificate of release to service at a particular time only if, in the 2 years immediately before that time:
 - (a) he or she was granted his or her aircraft engineer licence; or
 - (b) he or she has had at least 6 months experience of exercising the privileges mentioned in the Part 66 Manual of Standards for the licence or for a rating endorsed on the licence; or
 - (c) he or she has met a requalification requirement for the licence.
- (3) For subregulation (2), the holder of an aircraft engineer licence *exercises the privileges* of the licence if:
 - (a) for a category A, B1 or B2 licence—the holder performs maintenance certifications or issues certificates of release to service under the licence; and
 - (b) for a category C licence—the holder issues certificates of release to service under the licence.
- (4) For subregulation (2), a licensed aircraft maintenance engineer is taken to have had at least 6 months experience of exercising the privileges mentioned in the Part 66 Manual of Standards for a licence or for a rating endorsed on a licence if:
 - (a) he or she holds another aircraft engineer licence; and
 - (b) that licence is a category A, B1 or B2 licence; and
 - (c) he or she has had at least 6 months experience of exercising the privileges mentioned in the Part 66 Manual of Standards for that licence or a rating endorsed on that licence.

66.125 All licences—medically significant conditions

- (1) This regulation applies to a licensed aircraft maintenance engineer if:
 - (a) the licensed aircraft maintenance engineer knows that he or she has a medically significant condition; and
 - (b) the condition is safety-relevant; and
 - (c) the condition was not specified in an application made by the licensed aircraft maintenance engineer for an aircraft engineer licence or a rating that he or she holds.
- (2) The licensed aircraft maintenance engineer must not exercise a privilege mentioned in the Part 66 Manual of Standards for his or her aircraft engineer licence or for a rating endorsed on the licence unless the licensed aircraft maintenance engineer:

- (a) has had the condition for more than 30 days beginning on the day that he or she first knew that he or she had the condition (the **30 day period**); and
 - (b) has obtained a certificate from a medical practitioner or specialist medical practitioner to the effect that his or her ability to exercise the privilege is no longer reduced by the condition.
- (3) If the licensed aircraft maintenance engineer has had the condition for more than the 30 day period and cannot obtain a certificate mentioned in paragraph (2)(b), he or she must give CASA a written notice including the following information:
- (a) that he or she has the condition;
 - (b) when he or she first knew that he or she had the condition;
 - (c) that he or she cannot obtain the certificate.

66.130 Category A licences

- (1) A category A licence holder may perform maintenance certification for maintenance carried out on an aircraft of a particular aircraft type only if:
- (a) the maintenance:
 - (i) is line maintenance; and
 - (ii) is mentioned in Appendix II to the Part 145 Manual of Standards; and
 - (b) he or she carried out the maintenance; and
 - (c) he or she:
 - (i) performs the maintenance certification on behalf of a Part 145 organisation; and
 - (ii) has completed training and assessment from the organisation in performing maintenance certification for that line maintenance carried out on aircraft of that aircraft type; and
 - (iii) has a certification authorisation from the organisation to perform maintenance certification for that line maintenance carried out on aircraft of that aircraft type.
- (2) A category A licence holder may issue a certificate of release to service for an aircraft of a particular type rated aircraft type in relation to maintenance carried out on the aircraft only if:
- (a) the maintenance:
 - (i) is line maintenance; and
 - (ii) is mentioned in Appendix II to the Part 145 Manual of Standards; and
 - (b) he or she:
 - (i) issues the certificate on behalf of a Part 145 organisation; and
 - (ii) has completed training and assessment from the organisation in issuing a certificate of release to service for an aircraft of that aircraft type in relation to that line maintenance; and
 - (iii) has a certification authorisation from the organisation to issue a certificate of release to service for an aircraft of that aircraft type in relation to that line maintenance.

Regulation 66.135

- (3) A reference in subregulation (1) or (2) to maintenance does not include supervision of maintenance.

66.135 Category B1 and B2 licences—maintenance certification on behalf of Part 145 organisation

- (1) A category B1 or B2 licence holder may perform maintenance certification on behalf of a Part 145 organisation for maintenance that was carried out on an aircraft of a particular type rated aircraft type only if subregulation (3), (4), (5) or (6) applies.
- (2) However, the holder must not perform maintenance certification on behalf of a Part 145 organisation for maintenance carried out on an aircraft system, or a subset of an aircraft system, that is excluded from the holder's licence under regulation 66.026.
- (2A) A category B1 or B2 licence holder may perform maintenance certification on behalf of a Part 145 organisation for maintenance that was carried out on an aircraft that is not of a type rated aircraft type only if the holder holds a licence that authorises that kind of maintenance.

Rating not subject to exclusion

- (3) For subregulation (1), this subregulation applies if:
- (a) the holder's licence is endorsed with a rating for the aircraft type; and
 - (b) the rating is not subject to the exclusion of an aircraft system or a subset of an aircraft system.

Rating subject to exclusion that does not apply

- (4) For subregulation (1), this subregulation applies if:
- (a) the holder's licence is endorsed with a rating for the aircraft type; and
 - (b) the rating is subject to the exclusion of an aircraft system or a subset of an aircraft system; and
 - (c) the maintenance is not carried out on an aircraft system or subset that is excluded from the rating under regulation 66.095.

Rating subject to exclusion—certification authorisation

- (5) For subregulation (1), this subregulation applies if:
- (a) the holder's licence is endorsed with a rating for the aircraft type; and
 - (b) the maintenance is carried out on an aircraft system or a subset of an aircraft system that is excluded from the rating under regulation 66.095 (**the *excluded system***); and
 - (c) the holder has a certification authorisation from the organisation in relation to the aircraft type and the excluded system, granted in accordance with paragraph 145.A.37(b) of the Part 145 Manual of Standards.

No rating—certification authorisation

- (6) For subregulation (1), this subregulation applies if:
- (a) the holder's licence is not endorsed with a rating for the aircraft type; and
 - (b) the holder has a certification authorisation from the organisation in relation to the aircraft type, granted in accordance with paragraph 145.A.37(b) or
 - (c) of the Part 145 Manual of Standards.

66.137 Category B1 and B2 licences—maintenance certification other than on behalf of Part 145 organisation

Type rated aircraft type

- (1) A category B1 or B2 licence holder may perform maintenance certification other than on behalf of a Part 145 organisation for maintenance that was carried out on an aircraft of a particular type rated aircraft type only if:
- (a) if carrying out of the maintenance requires the holder to hold a particular licence with a particular rating—the holder's licence is endorsed with the rating for the aircraft type; and
 - (b) the maintenance is not carried out on an aircraft system or a subset of an aircraft system that is:
 - (i) excluded from the licence under regulation 66.026; or
 - (ii) excluded from the rating under regulation 66.095.

Aircraft not of a type rated aircraft type

- (2) A category B1 or B2 licence holder may perform maintenance certification other than on behalf of a Part 145 organisation for maintenance that was carried out on an aircraft that is not of a type rated aircraft type only if:
- (a) the holder holds a licence for the kind of aircraft on which the maintenance was carried out; and
 - (b) if carrying out the maintenance requires the holder to hold a particular rating—the holder's licence is endorsed with that rating.

66.138 Category B1 and B2 licences—certificate of release to service issued on behalf of Part 145 organisation

Type rated aircraft type

- (1) A category B1 or B2 licence holder may issue a certificate of release to service on behalf of a Part 145 organisation for an aircraft of a particular type rated aircraft type in relation to maintenance carried out on the aircraft only if:
- (a) if carrying out of the maintenance requires the holder to hold a particular rating—either:
 - (i) the holder's licence is endorsed with the rating for the aircraft type; or
 - (ii) the holder has a certification authorisation from the organisation in relation to the aircraft type, granted in accordance with the Part 145 Manual of Standards; and

Regulation 66.139A

- (b) the holder has a certification authorisation from the organisation to issue a certificate of release to service for an aircraft of that aircraft type, granted under section 145.A.35 of the Part 145 Manual of Standards.

Aircraft not of a type rated aircraft type

- (2) A category B1 or B2 licence holder may issue a certificate of release to service on behalf of a Part 145 organisation for an aircraft that is not of a type rated aircraft type in relation to maintenance carried out on the aircraft only if the holder holds a licence for that kind of aircraft.

66.139A Category B1 and B2 licences—certificate of release to service issued other than on behalf of Part 145 organisation

Type rated aircraft type

- (1) A category B1 or B2 licence holder may issue a certificate of release to service, other than on behalf of a Part 145 organisation, for an aircraft of a particular type rated aircraft type in relation to maintenance carried out on the aircraft only if the holder's licence is endorsed with the rating for the aircraft type.

Aircraft not of a type rated aircraft type

- (2) A category B1 or B2 licence holder may issue a certificate of release to service, other than on behalf of a Part 145 organisation, for an aircraft that is not of a type rated aircraft type in relation to maintenance carried out on the aircraft only if the holder holds a licence for that kind of aircraft.

66.140 Category C licences

- (1) A category C licence holder may issue a certificate of release to service for an aircraft in relation to maintenance carried out on the aircraft only if:
 - (a) he or she issues the certificate on behalf of a Part 145 organisation; and
 - (b) the maintenance is base maintenance.
- (2) A category C licence holder may issue a certificate of release to service for an aircraft of a particular type rated aircraft type in relation to maintenance carried out on the aircraft type only if:
 - (a) the holder's licence is endorsed with the rating for the aircraft type; and
 - (b) the holder has a certification authorisation, from a Part 145 organisation, that:
 - (i) authorises the holder to issue a certificate of release to service for an aircraft of that aircraft type on behalf of the organisation; and
 - (ii) is granted under section 145.A.35 of the Part 145 Manual of Standards.

Subpart 66.F—Administration

66.175 CASA may ask licensed aircraft maintenance engineers for information

- (1) CASA may ask a licensed aircraft maintenance engineer to give CASA information specified in the request about himself or herself, his or her aircraft engineer licence and any ratings endorsed on the licence.
- (2) A request under subregulation (1) must:
 - (a) be in writing; and
 - (b) specify the date by which the licensed aircraft maintenance engineer must give CASA the information; and
 - (c) include a statement of the effect of regulation 66.180.
- (3) If a licensed aircraft maintenance engineer gives CASA information in accordance with a request under subregulation (1), CASA must, within 28 days after receiving the information, give the licensed aircraft maintenance engineer written notice in accordance with subregulation (4).
- (4) The notice must include a statement to the effect that CASA has confirmed the information or updated its records about the licensed aircraft maintenance engineer, the aircraft engineer licence and any ratings endorsed on the licence.

66.180 Suspension of licence for failure to provide information

If a licensed aircraft maintenance engineer does not comply with a request under subregulation 66.175(1) by the date specified in the request, his or her aircraft engineer licence is suspended on the day after the date specified in the request.

66.185 CASA must revoke suspension of licence if information provided

- (1) This regulation applies if:
 - (a) an aircraft engineer licence is suspended by regulation 66.180; and
 - (b) on or after the day that the licence is suspended, the holder of the licence gives CASA information in accordance with the request under subregulation 66.175(1).
- (2) CASA must, by notice in writing to the holder, revoke the suspension of the licence.
- (3) The notice must include the date on which the revocation takes effect.

Part 67—Medical

Table of contents

Subpart 67.A—General

- 67.005 Applicability
- 67.010 Definitions for this Part
- 67.015 Meaning of *safety-relevant*
- 67.020 Extended meaning of *convicted of an offence*

Subpart 67.B—Designated aviation medical examiners and designated aviation ophthalmologists

- 67.025 Application for appointment as DAME or DAO
- 67.030 More information for application
- 67.035 Continuation of appointment until application decided
- 67.040 When decision must be made
- 67.045 Appointment of DAMEs
- 67.055 DAMEs—declaration about holders of position
- 67.060 DAMEs—conditions
- 67.065 Appointment of DAOs
- 67.075 DAOs—declaration about holders of position
- 67.080 DAOs—conditions
- 67.090 Release of information about performance of DAMEs or DAOs
- 67.095 DAMEs and DAOs—cancellation or surrender of appointment
- 67.100 DAMEs and DAOs—automatic suspension and cancellation after criminal conviction
- 67.105 DAMEs—automatic cancellation on ceasing to be medical practitioner
- 67.110 DAOs—automatic cancellation on ceasing to be medical practitioner or ophthalmologist
- 67.120 Revocation of declarations
- 67.125 Obligation to report
- 67.130 Surrender of certificate of appointment
- 67.140 Indemnification of medical reporting

Subpart 67.C—Medical certificates

- 67.145 Kinds of medical certificate
- 67.150 Who meets medical standard 1
- 67.155 Who meets medical standard 2
- 67.160 Who meets medical standard 3
- 67.165 Directions about examinations for issue of medical certificates
- 67.170 Evidence of identity
- 67.175 Medical certificates—application
- 67.180 Medical certificates—issue and refusal
- 67.185 Notice of decision to refuse medical certificate
- 67.190 Reconsideration of decision to refuse medical certificate
- 67.195 Medical certificate—conditions
- 67.200 Conditions applicable to certain medical certificates—correcting lenses
- 67.205 Medical certificates—period in force
- 67.210 Medical certificates—application for extension of period in force

-
- 67.215 Medical certificates—extension of period in force by CASA
 - 67.220 Medical certificates—extension of period in force by DAMEs
 - 67.225 Medical certificates—new medical certificates issued by DAMEs
 - 67.230 CASA may require medical examination of certificate holders
 - 67.235 Suspension of medical certificates—pregnancy
 - 67.240 Medical certificates—suspension pending examination
 - 67.245 Suspension of medical certificates—special arrangements for service in urgent cases
 - 67.250 Medical certificates—effect of suspension
 - 67.255 Medical certificates—cancellation if medical standard not met
 - 67.260 Medical certificates—cancellation and suspension in other cases

Subpart 67.D—Modified Austroads medical standards

- 67.262 Definition of *meets the modified Austroads medical standards*
- 67.263 Definition of *modified Austroads medical standards* for Subpart 67.D

Subpart 67.E—Responsibilities of holders of medical certificates and recreational aviation medical practitioner’s certificates

- 67.265 Obligation to tell CASA of changes in medical condition—medical certificate holders
- 67.270 Offence—doing act while efficiency impaired—licence holders
- 67.271 Offence—doing act while efficiency impaired—student pilots
- 67.275 Surrender of medical certificates

Subpart 67.A—General

67.005 Applicability

This Part:

- (a) provides for the appointment of appropriately qualified persons as DAMEs or DAOs and for the cancellation of such appointments; and
- (b) sets out procedures under which CASA may make declarations that particular persons, or persons who hold or perform the duties of certain positions or offices, are to be taken to be DAMEs or DAOs; and
- (c) sets out the medical standards for the issue of medical certificates; and
- (d) provides for the issue and administrative control of medical certificates; and
- (e) sets out when a person meets the modified Austroads medical standards; and
- (f) provides for offences in relation to holders of:
 - (i) medical certificates; and
 - (ii) recreational aviation medical practitioner's certificates.

67.010 Definitions for this Part

(1) In this Part:

clinical psychologist means a person who:

- (a) is registered or licensed as a clinical psychologist under a law of a State or Territory of Australia; or
- (b) in the case of a psychologist practising as a clinical psychologist in a country other than Australia—has other qualifications in clinical psychology acceptable to CASA.

Designated Aviation Medical Examiner's Handbook means the document called 'Designated Aviation Medical Examiner's Handbook' published by CASA, as in force from time to time.

Note: The Designated Aviation Medical Examiner's Handbook is available from CASA's website at:
<http://www.casa.gov.au/manuals/htm/dame/dame.htm>.

Human Services Department means the Department administered by the Minister administering the *Human Services (Medicare) Act 1973*.

medically significant condition includes:

- (a) any of the following (no matter how minor):
 - (i) any illness or injury;
 - (ii) any bodily infirmity, defect or incapacity;
 - (iii) any mental infirmity, defect or incapacity;

Regulation 67.015

- (iv) any sequela of an illness, injury, infirmity, defect or incapacity mentioned in subparagraph (i), (ii) or (iii); and
- (b) any abnormal psychological state; and
- (c) drug addiction and drug dependence; and
- (d) for a woman—pregnancy and the physiological and psychological consequences of pregnancy or of termination of pregnancy.

medical practitioner means a person entitled to practise as a medical practitioner under a law of a State or Territory or under a law of a Contracting State.

medical standard 1 means the standard set out in table 67.150.

medical standard 2 means the standard set out in table 67.155.

medical standard 3 means the standard set out in table 67.160.

relevant examination means an examination or test of, or in relation to, a person for the purpose of finding out whether the person meets the relevant medical standard for the issue to him or her of a medical certificate.

relevant medical standard means:

- (a) for a class 1 medical certificate—medical standard 1; and
- (b) for a class 2 medical certificate—medical standard 2; and
- (c) for a class 3 medical certificate—medical standard 3.

specialist medical practitioner means a medical practitioner who has:

- (a) postgraduate qualifications in a recognised medical specialty entitling him or her to be recognised as a specialist medical practitioner by the Human Services Department or by the public hospital service or public health service of a State or Territory of Australia; or
- (b) in the case of a medical practitioner practising in a country other than Australia—other postgraduate qualifications in the specialty acceptable to CASA.

specialist psychiatrist means a medical practitioner who has:

- (a) postgraduate qualifications in psychiatry entitling him or her to be recognised as a specialist psychiatrist by the Human Services Department or by the public hospital service or public health service of a State or Territory of Australia; or
- (b) in the case of a psychiatrist practising in a country other than Australia—other postgraduate qualifications in psychiatry acceptable to CASA.

- (2) In this Part, a mention of a medically significant condition (other than pregnancy, a consequence of pregnancy or the termination of a pregnancy) includes both such a condition that is congenital and one that is the result of injury or illness.

67.015 Meaning of *safety-relevant*

For the purposes of this Part, a medically significant condition is **safety-relevant** if it reduces, or is likely to reduce, the ability of someone who has it to exercise a

Regulation 67.020

privilege conferred or to be conferred, or perform a duty imposed or to be imposed, by a licence that he or she holds or has applied for.

67.020 Extended meaning of *convicted of an offence*

- (1) In this Part, *convicted of an offence* has, in addition to its ordinary meaning, the meaning set out in subregulation (2).
- (2) For this Part, a person is taken to have been *convicted of an offence* if:
 - (a) he or she is found guilty of the offence but is discharged without a conviction being recorded; or
 - (b) with his or her consent, the offence is taken into account in sentencing him or her for another offence.

Subpart 67.B—Designated aviation medical examiners and designated aviation ophthalmologists

67.025 Application for appointment as DAME or DAO

- (1) A medical practitioner may apply to CASA for appointment as a DAME or DAO for the purposes of this Part.

Note 1: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.

Note 2: Part 11 deals with applications and decision making.

- (2) An application must be in writing and must be accompanied by copies of the following documents:
- (a) the certificate of the applicant's registration as a medical practitioner in the State or Territory of Australia, or the Contracting State, in which he or she proposes to function as a DAME or DAO;
 - (b) if the applicant is applying for appointment as a DAME—either:
 - (i) a certificate as to his or her successful completion of a course in aviation medicine approved by CASA; or
 - (ii) documents that are evidence of his or her demonstrated competence in aviation medicine;
 - (c) if the applicant is applying for appointment as a DAO—documents that are evidence that:
 - (i) he or she is a Fellow of the Royal Australian College of Ophthalmologists or has postgraduate qualifications in ophthalmology entitling him or her to be recognised as an ophthalmologist by the Human Services Department or by the public hospital service or public health service of a State or Territory of Australia; or
 - (ii) if the applicant is practising in a country other than Australia—he or she has postgraduate qualifications in ophthalmology that are acceptable to CASA.

Note: The documents 'Conditions of Appointment for DAMEs' and 'Conditions of Appointment for DAOs' (part of the application form for an appointment as a DAME or DAO) are available from CASA's website at:

<http://www.casa.gov.au/manuals/regulate/dame/form755.pdf>.

67.030 More information for application

- (2) If CASA gives a notice under regulation 11.040 to an applicant for appointment as a DAME or DAO, the notice must include a statement to the effect that the application will be taken to be withdrawn if the information or document is not given to CASA within 1 month or any further time allowed by CASA under paragraph (3)(b).

Regulation 67.035

- (3) The applicant must give to CASA the information or document:
 - (a) within 1 month after the date of the notice; or
 - (b) if the applicant asks CASA for an extension of time before the end of the month and CASA extends the time within which the applicant must give the information or document—before the end of the extended period.
- (4) If the applicant does not comply with subregulation (3), the application is taken to be withdrawn by the applicant.
- (5) If an applicant for appointment as a DAME or DAO is designated in a Contracting State as a medical examiner for subclause 1.2.2.4 of Annex 1, *Personnel Licensing*, to the Chicago Convention, CASA need not consider the application unless the applicant authorises the authority of the Contracting State that designated the applicant under that subclause to disclose to CASA information and documents about the applicant's performance and competence as a medical examiner.

67.035 Continuation of appointment until application decided

- (1) This regulation applies in relation to an appointment of a DAME or DAO that is granted by CASA for a specified period (the *old appointment*) if:
 - (a) at least 1 month before the time when the old appointment would, but for this regulation cease, its holder applies to CASA under this Subpart for a new appointment that authorises the holder to exercise the same powers or perform the same functions as the old appointment; and
 - (b) at the time when the old appointment would, but for this regulation cease, CASA has not made a decision on the application.
- (2) Despite anything else in these Regulations, but subject to subregulations (3) and (4), the old appointment continues in force until CASA makes a decision on the application.
- (3) If CASA asks for information or a document under regulation 11.040 and the holder does not provide the information or document within the period mentioned in paragraph 67.030(3)(a) or any further period allowed by CASA under paragraph 67.030(3)(b), the old appointment is taken to cease at the end of that period.
- (4) If subregulation 67.030(5) applies to the holder and the holder has not authorised the authority of the Contracting State concerned to disclose to CASA information and documents about the holder's performance and competence as a medical examiner within 1 month after the date of the application, the old appointment is taken to cease at the end of that period.

67.040 When decision must be made

- (1) Subject to this regulation, if CASA does not make a decision about an application for appointment as a DAME or DAO within 3 months after receiving it, CASA is taken to have refused the application.

Regulation 67.045

- (2) If CASA asks for information or a document under regulation 11.040, the time between when CASA asks for the information or document, and when the applicant gives CASA the information or document, does not count towards the period.
- (3) If subregulation 67.030(5) applies to the applicant, any time between when the applicant submits the application to CASA and when the applicant authorises the authority of the Contracting State concerned to disclose to CASA information and documents about the applicant's performance and competence as a medical examiner, does not count towards the period.

67.045 Appointment of DAMEs

- (1) Subject to regulation 11.055, if a medical practitioner has applied for appointment as a DAME in accordance with this Subpart, CASA must appoint the practitioner as a DAME if:
 - (a) the practitioner is registered in the State or Territory of Australia, or registered or licensed in the Contracting State, in which he or she proposes to function as a DAME; and
 - (b) either he or she:
 - (i) has received training acceptable to CASA in aviation medicine; or
 - (ii) has demonstrated competence in aviation medicine.

Note 1: The courses of training generally acceptable are set out in the *Designated Aviation Medical Examiner's Handbook*, available from CASA's website at <http://www.casa.gov.au>.

Note 2: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to appoint, or cancelling, suspending or varying, the appointment of, a person as a DAME; or
- (b) a decision imposing a condition on an appointment.

67.055 DAMEs—declaration about holders of position

- (1) CASA may declare, in writing, that the person holding or occupying a particular office or position from time to time, or performing the duties of a particular office or position from time to time, is, subject to subregulation (3), taken to be a DAME.
- (2) CASA may also declare, in writing, that a medical practitioner specified in the declaration is, for the purposes of doing a particular act or thing specified in the declaration, taken to be a DAME.
- (3) A declaration under subregulation (1) has no effect in relation to a person occupying or performing the duties of an office or position if the person is not a medical practitioner.
- (4) Subject to subregulation (5), a declaration under subregulation (1) remains in force:
 - (a) unless it is revoked; or

Regulation 67.060

- (b) if a period (which must not be less than 4 weeks) is specified in the declaration—until the end of that period unless it is sooner revoked.
- (5) A declaration under subregulation (1) is not in force while it is suspended.

67.060 DAMEs—conditions

- (1) The appointment of a DAME is subject to the following conditions:
 - (a) that he or she complies with any requirement of the Designated Aviation Medical Examiner’s Handbook that is applicable to him or her;
 - (b) that he or she observes the Code of Ethics of the Australian Medical Association, as that Code is in effect from time to time;
 - (c) that he or she undertakes continuing training in aviation medicine according to a course or system specified, or referred to, on the CASA website or otherwise approved by CASA;
 - (d) that, if he or she is convicted of an offence punishable by imprisonment for 12 months or longer (whether or not such a sentence is actually imposed), he or she tells CASA of the conviction in writing as soon as practicable.

Note: For the extended meaning of *convicted of an offence*, see regulation 67.020.

- (2) A declaration under subregulation 67.055(1) is subject to the conditions that a person occupying, or performing the duties of, the office or position to which the declaration relates:
 - (a) observes, while he or she is acting as a DAME, the Code of Ethics of the Australian Medical Association, as that Code is in effect from time to time; and
 - (b) if he or she is convicted of an offence punishable by imprisonment for 12 months or longer (whether or not such a sentence is actually imposed), tells CASA of the conviction in writing as soon as practicable.
- (3) A declaration under subregulation 67.055(2) is subject to the condition that the person specified in the declaration observes, while he or she is acting as a DAME, the Code of Ethics of the Australian Medical Association, as that Code is in effect from time to time.

67.065 Appointment of DAOs

- (1) Subject to regulation 11.055, if a medical practitioner has applied for appointment as a DAO in accordance with this Subpart, CASA must appoint the practitioner as a DAO if the practitioner has the qualifications mentioned in subregulation (4).

Note: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to appoint, or cancelling, suspending or varying, the appointment of, a person as a DAO; or
- (b) a decision imposing a condition on an appointment.

- (4) The qualifications are:

- (a) in the case of a practitioner who is an ophthalmologist practising in Australia—being a Fellow of the Royal Australian College of Ophthalmologists or otherwise having postgraduate qualifications in ophthalmology entitling him or her to be recognised as an ophthalmologist by the Human Services Department or by the public hospital service or public health service of a State or Territory of Australia; and
- (b) in the case of a practitioner who is an ophthalmologist practising in a country other than Australia—having postgraduate qualifications in ophthalmology that are acceptable to CASA.

67.075 DAOs—declaration about holders of position

- (1) CASA may declare, in writing, that the person holding or occupying a particular office or position from time to time, or performing the duties of a particular office or position from time to time, is, subject to subregulation (3), taken to be a DAO.
- (2) CASA may also declare, in writing, that a qualified person specified in the declaration is, for the purposes of doing a particular act or thing specified in the declaration, taken to be a DAO.
- (3) A declaration under subregulation (1) has no effect in relation to a person occupying, or performing the duties of, an office or position if:
 - (a) the person is not a Fellow of the Royal Australian College of Ophthalmologists, or does not have postgraduate qualifications in ophthalmology entitling him or her to be recognised as an ophthalmologist by the Human Services Department or by the public hospital service or public health service of a State or Territory of Australia; or
 - (b) in the case of an ophthalmologist practising in a country other than Australia—the person does not have postgraduate qualifications in ophthalmology that are acceptable to CASA.
- (4) Subject to subregulation (5), a declaration under subregulation (1) remains in force:
 - (a) unless it is revoked; or
 - (b) if a period (which must not be less than 4 weeks) is specified in the declaration—until the end of that period unless it is sooner revoked.
- (5) A declaration under subregulation (1) is not in force while it is suspended.
- (6) In this regulation:

qualified person means a person who is a medical practitioner having the qualifications referred to in paragraph 67.065(4)(a) or (b).

67.080 DAOs—conditions

- (1) The appointment of a DAO is subject to the following conditions:
 - (a) that he or she observes the Code of Ethics of the Australian Medical Association, as that Code is in effect from time to time;

Regulation 67.090

- (b) that he or she undertakes continuing training in ophthalmology according to courses or systems acceptable to CASA;
- (c) that, if he or she is convicted of an offence punishable by imprisonment for 12 months or longer (whether or not such a sentence is actually imposed), he or she tells CASA of the conviction in writing as soon as practicable.

Note: For the extended meaning of *convicted of an offence*, see regulation 67.020.

- (2) A DAO who is a Fellow of the Royal Australian College of Ophthalmologists, and undertakes continuing education in ophthalmology according to the requirements of the College, is taken to satisfy the requirement in paragraph (1)(b) as to continuing training in ophthalmology.
- (3) A declaration under subregulation 67.075(1) is subject to the conditions that a person occupying, or performing the duties of, the office or position to which the declaration relates:
 - (a) observes, while he or she is acting as a DAO, the Code of Ethics of the Australian Medical Association, as that Code is in effect from time to time; and
 - (b) if he or she is convicted of an offence punishable by imprisonment for 12 months or longer (whether or not such a sentence is actually imposed), tells CASA of the conviction in writing as soon as practicable.

Note: For the extended meaning of *convicted of an offence*, see regulation 67.020.

- (4) A declaration under subregulation 67.075(2) is subject to the condition that the person specified in the declaration observes, while he or she is acting as a DAO, the Code of Ethics of the Australian Medical Association, as that Code is in effect from time to time.

67.090 Release of information about performance of DAMEs or DAOs

- (1) CASA may disclose, to an authority referred to in subregulation (3), information about the performance and competence as a medical examiner of a person who:
 - (a) is a DAME or a DAO; or
 - (b) is performing or has performed the duties of a position referred to in a declaration under subregulation 67.055(1) or 67.075(1).
- (2) Despite subregulation (1), CASA may only disclose to the authority the information if CASA has taken all reasonable steps to ensure that that authority has given appropriate undertakings:
 - (a) for protecting the confidentiality of the information; and
 - (b) for ensuring that it is used only for the purpose of assessing the performance and competence of the person as a medical examiner.
- (3) The authority is the authority of a Contracting State that designates medical examiners for that State for subclause 1.2.2.4 of Annex 1, *Personnel Licensing*, to the Chicago Convention, being an authority:
 - (a) that has designated the person for that subclause; or
 - (b) to which the person has applied to be so designated.

Regulation 67.095

Note: Medical practitioners who apply to CASA for appointment as DAMEs or DAOs and persons occupying, or performing the duties of, an office or position to which a declaration under subregulation 67.055(1) or 67.075(1) relates are notified by CASA about the effect of regulation 67.090.

67.095 DAMEs and DAOs—cancellation or surrender of appointment

- (1) CASA may cancel a person's appointment as a DAME or DAO if there are reasonable grounds for believing that the person:
 - (a) has contravened a condition to which his or her appointment is subject; or
 - (b) has contravened regulation 67.125 or subregulation 67.170(1); or
 - (c) does not meet, or does not continue to meet, a requirement of, or imposed under, this Subpart for getting or holding the appointment.
- (2) Before cancelling the appointment of a person as a DAME or DAO under subregulation (1), CASA:
 - (a) must give to the person a show cause notice that:
 - (i) sets out the matters that might constitute grounds for cancellation; and
 - (ii) invites the person, within a reasonable time stated in the notice, to make representations explaining why his or her appointment should not be cancelled; and
 - (b) must take into account any written representations that the person makes within the period stated in the notice.
- (3) If CASA cancels the appointment of a person as a DAME or DAO under subregulation (1), CASA must give the person written notice of the cancellation, setting out the grounds for the cancellation.

Note: A decision by CASA to cancel a DAME's or DAO's appointment is reviewable by the Administrative Appeals Tribunal—see regulation 67.141.

67.100 DAMEs and DAOs—automatic suspension and cancellation after criminal conviction

- (1) This regulation applies to a person appointed as a DAME or DAO who is convicted of an offence punishable by imprisonment for 12 months or longer (whether or not such a sentence is actually imposed).

Note 1: For the extended meaning of *convicted of an offence*, see regulation 67.020.

Note 2: This regulation operates subject to the provisions of Part VIIC of the *Crimes Act 1914*.
- (2) The person's appointment is taken to be suspended at the time of the conviction.
- (3) The person's appointment is taken to be cancelled:
 - (a) if he or she appeals against the conviction and the appeal is dismissed—at the time the appeal is dismissed; or
 - (b) if he or she does not appeal against the conviction—on the last day for lodging such an appeal.

Regulation 67.105

67.105 DAMEs—automatic cancellation on ceasing to be medical practitioner

- (1) Subject to subregulation (2), this regulation applies to a person appointed as a DAME who ceases to be a medical practitioner.
- (2) This regulation does not apply to a person who is registered or licensed as a medical practitioner in a country other than Australia, and registered as a medical practitioner in a State or Territory of Australia, if he or she ceases to be registered or licensed as a medical practitioner in the other country.
- (3) The person's appointment is taken to be cancelled at the time he or she ceases to be registered or licensed as a medical practitioner.

67.110 DAOs—automatic cancellation on ceasing to be medical practitioner or ophthalmologist

- (1) Subject to subregulation (2), this regulation applies to a person appointed as a DAO who ceases to be a medical practitioner or specialist ophthalmologist.
- (2) This regulation does not apply to a person who is registered or licensed as a medical practitioner in a country other than Australia and registered as a medical practitioner in a State or Territory of Australia if he or she ceases to be registered or licensed as a medical practitioner in the other country.
- (3) The person's appointment is taken to be cancelled:
 - (a) at the time he or she ceases to be a specialist ophthalmologist; or
 - (b) if he or she ceases to be registered or licensed as a medical practitioner—at the time he or she so ceases.

67.120 Revocation of declarations

- (1) CASA may revoke a declaration made under subregulation 67.055(1) or 67.075(2) in respect of a particular office or position by written notice to the body or organisation of which the office or position forms part if there are reasonable grounds for believing that:
 - (a) a fact or circumstance exists that, had it existed and been known to CASA at the time the declaration was made, is likely to have resulted in the declaration not being made; or
 - (b) continuing the particular office or position to be declared would be likely to have an adverse effect on the safety of air navigation.
- (2) Before revoking a declaration made under subregulation 67.055(1) or 67.075(2) in respect of a particular office or position, CASA must give to the body or organisation of which the office forms part:
 - (a) written notice of the matters that might constitute grounds for the revocation of the declaration; and
 - (b) a reasonable opportunity to make representations explaining why the declaration should not be revoked.

- (3) Despite anything else in this Part, CASA must revoke a declaration made under subregulation 67.055(1) or 67.075(1) if the organisation or body of which the office or position specified in it forms part asks CASA in writing to revoke the declaration.

67.125 Obligation to report

If the holder of a medical certificate tells a DAME or DAO about a medical condition that is safety-relevant, the DAME or DAO must inform CASA of the condition within 5 working days.

67.130 Surrender of certificate of appointment

- (1) CASA may require, by written notice, a DAME or DAO to surrender any certificate or replacement certificate issued to the person under regulation 11.060 within a reasonable time specified in the notice.
- (2) The DAME or DAO must comply with the requirement.
Penalty: 5 penalty units.
- (3) A person who fails to comply with subregulation (2) is guilty of an offence in respect of each day during which the person refuses or fails to comply with the requirement, including the day of any conviction for such an offence.
- (4) A person must not destroy, mutilate or deface a certificate that he or she is required to surrender to CASA under subregulation (1) with intent to evade the obligation to comply with the requirement.
Penalty: 10 penalty units.

67.140 Indemnification of medical reporting

- (1) In this regulation:

indemnified act means any of the following acts:

- (a) advising CASA that a person does not meet a relevant medical standard;
- (b) expressing to CASA, whether in writing or otherwise, an opinion that a person whom the practitioner has examined or treated may not be competent or medically fit to undertake a duty or exercise a privilege under a licence that the person holds or has applied for, because of:
 - (i) illness or bodily or mental infirmity, defect or incapacity suffered by the person; or
 - (ii) the effect on the person of treatment for any illness, infirmity, defect or incapacity;
- (c) stating to CASA, whether in writing or otherwise:
 - (i) the nature of a person's illness, infirmity, defect or incapacity; or
 - (ii) the effect on a person of treatment for any illness, infirmity, defect or incapacity.

Regulation 67.140

- (2) A DAME or DAO is not subject to any civil or criminal liability for doing an indemnified act in good faith in the course of carrying out his or her functions under this Part.
- (3) A person to whom, or an organisation to which, subregulation (4) applies is not subject to any civil or criminal liability for doing an indemnified act in good faith in the course of answering any question put to the person or organisation by CASA:
 - (a) that concerns a person who has applied for, or holds, a medical certificate; and
 - (b) that is relevant to any action CASA may take under this Part.
- (4) This subregulation applies to:
 - (a) a medical practitioner; and
 - (b) a specialist psychiatrist or clinical psychologist; and
 - (c) a person, organisation, body or authority referred to in paragraph 67.180(6)(b), (c), (d) or (e) or 67.225(6)(b), (c), (d) or (e); and
 - (d) a person, organisation, body or authority acting on behalf of a person, organisation, body or authority referred to in paragraph (c).

Subpart 67.C—Medical certificates

67.145 Kinds of medical certificate

There are 3 classes of medical certificate, as follows:

- (a) class 1 medical certificate;
- (b) class 2 medical certificate;
- (c) class 3 medical certificate.

67.150 Who meets medical standard 1

- (1) Subject to subregulations (2) to (7), a person who satisfies the criteria in table 67.150 meets medical standard 1.
- (2) A person may use contact lenses to meet the criterion in item 1.35 of table 67.150 if the lenses are monofocal and not tinted, and are well tolerated.
- (3) A person whose visual acuity in either eye is worse than 6/60 must provide a full ophthalmic report to CASA.
- (4) A person who has undergone surgery affecting the refractive status of either eye is taken not to meet the criterion in item 1.35 of table 67.150 until he or she is free of safety-relevant sequelae of the surgery.
- (5) A person who requires both near correction and distant correction to meet the criteria in items 1.35 and 1.36 of table 67.150 must demonstrate that 1 pair of spectacles is sufficient to meet both requirements for correction.
- (6) A person must demonstrate that he or she meets the criterion in item 1.39 of table 67.150 by:
 - (a) in daylight, or artificial light of similar luminosity, readily identifying a series of pseudo-isochromatic plates of the Ishihara 24-plate type, making no more than 2 errors; or
 - (b) for somebody who makes more than 2 errors in a test mentioned in paragraph (a), readily identifying aviation coloured lights displayed by means of a Farnsworth colour-perception lantern, making:
 - (i) no errors on 1 run of 9 pairs of lights; or
 - (ii) no more than 2 errors on a sequence of 2 runs of 9 pairs of lights; or
 - (c) for somebody who does not satisfy paragraph (a) or (b), correctly identifying all relevant coloured lights in a test, determined by CASA, that simulates an operational situation.
- (7) If a change is made to a criterion in an item of table 67.150, a person who held a class 1 medical certificate and satisfied the criterion immediately before the change, but fails to satisfy the criterion as changed, is taken to satisfy the criterion for 2 years after the day when the change is made.

Regulation 67.150

Table 67.150 Criteria for medical standard 1

Item	Criterion
<i>Abnormalities, disabilities and functional capacity</i>	
1.1	Has no safety-relevant condition of any of the following kinds that produces any degree of functional incapacity or a risk of incapacitation: (a) an abnormality; (b) a disability or disease (active or latent); (c) an injury; (d) a sequela of an accident or a surgical operation
1.2	Has no physical conditions or limitations that are safety-relevant
1.3	Is not using any over-the-counter or prescribed medication or drug (including medication or a drug used to treat a disease or medical disorder) that causes the person to experience any side effects likely to affect the person to an extent that is safety-relevant
<i>Mental fitness</i>	
1.4	Has no established medical history or clinical diagnosis of any of the following conditions, to an extent that is safety-relevant: (a) psychosis; (b) significant personality disorder; (c) significant mental abnormality or neurosis
1.5	Does not engage in any problematic use of substances (within the meaning given by section 1.1 of Annex 1, <i>Personnel Licensing</i> , to the Chicago Convention)
1.6	If there is any personal history of problematic use of a substance (within the meaning given by section 1.1 of Annex 1, <i>Personnel Licensing</i> , to the Chicago Convention): (a) the person's abstinence from problematic use of the substance is certified by an appropriate specialist medical practitioner; and (b) the person is not suffering from any safety-relevant sequelae resulting from the person's use of the substance; and (c) the person provides evidence that the person is undertaking, or has successfully completed, an appropriate course of therapy
Note:	In Annex 1, <i>Personnel Licensing</i> , to the Chicago Convention, 'Problematic use of substances' is defined as follows: 'The use of one or more psychoactive substances by aviation personnel in a way that: a) constitutes a direct hazard to the user or endangers the lives, health or welfare of others; and/or b) causes or worsens an occupational, social, mental or physical problem or disorder.' 'Psychoactive substances' is there defined as 'Alcohol, opioids, cannabinoids, sedatives and hypnotics, cocaine, other psychostimulants, hallucinogens, and volatile solvents, whereas coffee and tobacco are excluded.'

Regulation 67.150

Item	Criterion
<i>Nervous system</i>	
1.7	Has no established medical history or clinical diagnosis of: (a) a safety-relevant disease of the nervous system; or (b) epilepsy; or (c) a disturbance of consciousness for which there is no satisfactory medical explanation and which may recur
1.8	Is not suffering from safety-relevant effects of a head injury or neurosurgical procedure
<i>Cardiovascular system</i>	
1.9	Has no safety-relevant heart abnormality
1.10	Systolic and diastolic blood pressures are within limits specified by CASA from time to time in the Designated Aviation Medical Examiner's Handbook (even if approved drugs are used to maintain the blood pressure within those limits)
1.11	Has no significant functional or structural abnormality of the circulatory tree
<i>Respiratory system</i>	
1.12	Is not suffering from a safety-relevant condition of the respiratory system
1.13	Has full and free respiratory function without the use of drugs (other than drugs approved by CASA for this item) that act on the respiratory organs
<i>Alimentary system and metabolic disorders</i>	
1.14	Is not suffering from any safety-relevant defect of the digestive system or its adnexae, nor from any safety-relevant effect of disease or trauma of, or an operation on, the digestive system or its adnexae
1.15	Is not suffering from any safety-relevant metabolic, nutritional or endocrine disorders
1.16	If suffering from diabetes mellitus—the diabetes is satisfactorily controlled without the use of any anti-diabetic drug
<i>Reticulo-endothelial system</i>	
1.17	Is not suffering from an enlargement of the spleen that causes a significant displacement below the costal margin
1.18	Is not suffering from a safety-relevant condition of any of the following kinds: (a) localised or generalised enlargement of the lymphatic nodes; (b) a disease of the blood; (c) an immune deficiency disorder
<i>Genito-urinary system</i>	
1.19	Is not suffering from any safety-relevant disease of the genito-urinary system
1.20	Has no safety-relevant sequelae of disease or surgical procedures on the kidneys or urinary tract
1.21	Kidneys and urinary tract are free of significant obstructions
1.22	If there is any personal history of syphilis—provides evidence that adequate treatment has been completed and that there are no safety-relevant sequelae of the infection
<i>Gynaecological and obstetrical</i>	
1.23	Does not suffer from safety-relevant menstrual disturbances

Regulation 67.150

Item	Criterion
1.24	If pregnant—the pregnancy is not likely to interfere with the safe exercise of privileges, or performance of duties, under the licence held or applied for Note: See regulation 67.235 regarding the periods during which a pregnant woman must not exercise the privileges of a licence.
<i>Skeletal system</i>	
1.25	Is not suffering from safety-relevant active disease of the bones, joints, muscles or tendons
1.26	Is not suffering from safety-relevant functional sequelae of medically significant conditions of the bones, joints, muscles or tendons
<i>Ear, nose and throat</i>	
1.27	Is not suffering from: (a) active pathological processes of the internal ear or of the middle ear; or (b) permanent obstructions of the Eustachian tubes; or (c) permanent disturbances of the vestibular apparatus
1.28	Has no safety-relevant condition of the buccal cavity or the upper respiratory tract
<i>Hearing requirements</i>	
1.29	Is not suffering from any safety-relevant hearing defect
1.30	If suffering from a hearing loss (measured in a quiet room using a properly calibrated, compensated audiometer) in either ear of more than: (a) 35 dB at any of the frequencies of 500 Hz, 1 000 Hz or 2 000 Hz; or (b) 50 dB at 3 000 Hz— passes a speech discrimination test, or an operational check, carried out by an approved person in an aircraft of similar ambient noise level to that in which the person being tested is or will be operationally involved
<i>Visual requirements</i>	
1.31	Eyes and their adnexae function normally
1.32	Is not suffering from any safety-relevant pathological condition (either acute or chronic), nor any sequelae of surgery or trauma
1.33	Has normal fields of vision
1.34	Has normal binocular vision
1.35	Has a distant visual acuity of 6/9 or better in each eye separately and 6/6 or better binocular (with or without correcting lenses)
1.36	Can read (with or without correcting lenses) an N5 chart (or its equivalent) binocularly at a distance that he or she selects (in the range of 30 to 50 centimetres), and can read an N14 chart binocularly (with or without correcting lenses) at a distance of 1 metre Note: A person who needs correcting lenses to meet this criterion must have the appropriate lenses available while carrying out duties under a relevant licence—see regulation 67.200.
1.37	Has a near point of accommodation no further away than 30 centimetres (with or without correcting lenses)

Regulation 67.155

Item	Criterion
1.38	If using contact lenses to meet the visual standards set out in items 1.31 to 1.37: (a) is able to wear those lenses for twice the projected length of flight time or duty time for the person without deterioration in visual acuity or discomfort; and (b) if the lenses are of the hard or gas-permeable variety, demonstrates the ability, immediately after removing the lenses, to read at least 6/9 with spectacles binocularly
<i>Colour perception</i>	
1.39	Can readily distinguish the colours that need to be distinguished for the safe exercise of privileges, or performance of duties, under the relevant licence Note: For how to demonstrate this, see subregulation 67.150(6).

67.155 Who meets medical standard 2

- (1) Subject to subregulations (2) to (7), a person who satisfies the criteria in table 67.155 meets medical standard 2.
- (2) A person may use contact lenses to meet the criterion in item 2.35 of table 67.155 if the lenses are monofocal and not tinted, and are well tolerated.
- (3) A person whose visual acuity in either eye is worse than 6/60 must provide a full ophthalmic report to CASA.
- (4) A person who has undergone surgery affecting the refractive status of either eye is taken not to meet the criterion in item 2.35 of table 67.155 until he or she is free of safety-relevant sequelae of the surgery.
- (5) A person who requires both near correction and distant correction to meet the criteria in items 2.35 and 2.36 of table 67.155 must demonstrate that 1 pair of spectacles is sufficient to meet both requirements for correction.
- (6) A person must demonstrate that he or she meets the criterion in item 2.39 of table 67.155 by:
 - (a) in daylight, or artificial light of similar luminosity, readily identifying a series of pseudo-isochromatic plates of the Ishihara 24-plate type, making no more than 2 errors; or
 - (b) for somebody who makes more than 2 errors in a test mentioned in paragraph (a), readily identifying aviation coloured lights displayed by means of a Farnsworth colour-perception lantern, making:
 - (i) no errors on 1 run of 9 pairs of lights; or
 - (ii) no more than 2 errors on a sequence of 2 runs of 9 pairs of lights; or
 - (c) for somebody who does not satisfy paragraph (a) or (b), correctly identifying all relevant coloured lights in a test, determined by CASA, that simulates an operational situation.
- (7) If a change is made to a criterion in an item of table 67.155, a person who held a class 2 medical certificate and satisfied the criterion immediately before the change, but fails to satisfy the criterion as changed, is taken to satisfy the criterion for 2 years after the day when the change is made.

Regulation 67.155

Table 67.155 Criteria for medical standard 2

Item	Criterion
<i>Abnormalities, disabilities and functional capacity</i>	
2.1	Has no safety-relevant condition of any of the following kinds that produces any degree of functional incapacity or a risk of incapacitation: (a) an abnormality; (b) a disability or disease (active or latent); (c) an injury; (d) a sequela of an accident or a surgical operation
2.2	Has no physical conditions or limitations that are safety-relevant
2.3	Is not using any over-the-counter or prescribed medication or drug (including medication or a drug used to treat a disease or medical disorder) that causes the person to experience any side effects likely to affect the person to an extent that is safety-relevant
<i>Mental fitness</i>	
2.4	Has no established medical history or clinical diagnosis of any of the following conditions, to an extent that is safety-relevant: (a) psychosis; (b) significant personality disorder; (c) significant mental abnormality or neurosis
2.5	Does not engage in any problematic use of substances (within the meaning given by section 1.1 of Annex 1, <i>Personnel Licensing</i> , to the Chicago Convention)
2.6	If there is any personal history of problematic use of a substance (within the meaning given by section 1.1 of Annex 1, <i>Personnel Licensing</i> , to the Chicago Convention): (a) the person's abstinence from problematic use of the substance is certified by an appropriate specialist medical practitioner; and (b) the person is not suffering from any safety-relevant sequelae resulting from the person's use of the substance; and (c) the person provides evidence that the person is undertaking, or has successfully completed, an appropriate course of therapy
Note:	In Annex 1, <i>Personnel Licensing</i> , to the Chicago Convention, 'Problematic use of substances' is defined as follows: 'The use of one or more psychoactive substances by aviation personnel in a way that: a) constitutes a direct hazard to the user or endangers the lives, health or welfare of others; and/or b) causes or worsens an occupational, social, mental or physical problem or disorder.' 'Psychoactive substances' is there defined as 'Alcohol, opioids, cannabinoids, sedatives and hypnotics, cocaine, other psychostimulants, hallucinogens, and volatile solvents, whereas coffee and tobacco are excluded.'

Regulation 67.155

Item	Criterion
<i>Nervous system</i>	
2.7	Has no established medical history or clinical diagnosis of: (a) a safety-relevant disease of the nervous system; or (b) epilepsy; or (c) a disturbance of consciousness for which there is no satisfactory medical explanation and which may recur
2.8	Is not suffering from safety-relevant effects of a head injury or neurosurgical procedure
<i>Cardiovascular system</i>	
2.9	Has no safety-relevant heart abnormality
2.10	Systolic and diastolic blood pressures are within limits specified by CASA from time to time in the Designated Aviation Medical Examiner's Handbook (even if approved drugs are used to maintain the blood pressure within those limits)
2.11	Has no significant functional or structural abnormality of the circulatory tree
<i>Respiratory system</i>	
2.12	Is not suffering from a safety-relevant condition of the respiratory system
<i>Alimentary system and metabolic disorders</i>	
2.13	Is not suffering from a safety-relevant defect of the digestive system or its adnexae, nor from any safety-relevant effect of disease or trauma of, or an operation on, the digestive system or its adnexae
2.14	Is not suffering from safety-relevant metabolic, nutritional or endocrine disorders
2.15	If suffering from diabetes mellitus: (a) the condition is satisfactorily controlled without the use of any anti-diabetic drug; or (b) if an oral anti-diabetic drug is used to control the condition: (i) the condition is under on-going medical supervision and control; and (ii) the oral drug is approved by CASA
<i>Reticulo-endothelial system</i>	
2.16	Is not suffering from an enlargement of the spleen that causes a significant displacement below the costal margin
2.17	Is not suffering from a safety-relevant condition of any of the following kinds: (a) localised or generalised enlargement of the lymphatic nodes; (b) a disease of the blood; (c) an immune deficiency disorder
<i>Genito-urinary system</i>	
2.18	Is not suffering from any safety relevant disease of the genitor-urinary system
2.19	Has no safety-relevant sequelae of disease or surgical procedures on the kidneys or urinary tract
2.20	Kidneys and urinary tract are free of significant obstructions
2.21	If there is any personal history of syphilis—provides evidence that adequate treatment has been completed and that there are no safety-relevant sequelae of the infection

Regulation 67.155

Item	Criterion
<i>Gynaecological and obstetrical</i>	
2.22	Does not suffer from safety-relevant menstrual disturbances
2.23	If pregnant—the pregnancy is not likely to interfere with the safe exercise of privileges, or performance of duties, under the licence held or applied for Note: See regulation 67.235 regarding the periods during which a pregnant woman must not exercise the privileges of a licence.
<i>Skeletal system</i>	
2.24	Is not suffering from safety-relevant active disease of the bones, joints, muscles or tendons
2.25	Is not suffering from safety-relevant functional sequelae of medically significant conditions of the bones, joints, muscles or tendons
<i>Ear, nose and throat</i>	
2.26	Is not suffering from: (a) active pathological processes of the internal ear or of the middle ear; or (b) permanent obstructions of the Eustachian tubes; or (c) permanent disturbances of the vestibular apparatus
2.27	Has no safety-relevant condition of the buccal cavity or the upper respiratory tract
<i>Hearing</i>	
2.28	Is not suffering from any safety-relevant hearing defect
2.29	With or without a hearing aid, is able to hear with both ears an average conversational voice in a quiet room while at a distance of 2 metres from the examiner, and looking away from the examiner
2.30	For somebody who fails to meet the standard in item 2.29, passes an operational check by an approved person in an aircraft having a similar ambient noise level to that in which the person is or will be operationally involved
<i>Visual requirements</i>	
2.31	Eyes and their adnexae function normally
2.32	Is not suffering from any safety-relevant pathological condition (either acute or chronic), nor any sequelae of surgery or trauma
2.33	Has normal fields of vision
2.34	Has normal binocular vision
2.35	Has a distant visual acuity of 6/12 or better in each eye separately and 6/9 or better binocular (with or without correcting lenses)
2.36	Can read (with or without correcting lenses) an N5 chart (or its equivalent) binocularly at a distance that he or she selects (in the range of 30 to 50 centimetres), and can read an N14 chart binocularly (with or without correcting lenses) at a distance of 1 metre Note: A person who needs correcting lenses to meet this criterion must have the appropriate lenses available while carrying out duties under a relevant licence—see regulation 67.200.
2.37	Has a near point of accommodation no further away than 30 centimetres (with or without correcting lenses)

Regulation 67.160

Item	Criterion
2.38	If using contact lenses to meet the visual standards set out in items 2.31 to 2.37: (a) is able to wear those lenses for twice the projected length of flight time or duty time for the person without deterioration in visual acuity or discomfort; and (b) if the lenses are of the hard or gas-permeable variety, demonstrates the ability, immediately after removing the lenses, to read at least 6/9 with spectacles binocularly
<i>Colour perception</i>	
2.39	Can readily distinguish the colours that need to be distinguished for the safe exercise of privileges, or performance of duties, under the relevant licence Note: For how to demonstrate this, see subregulation 67.155(6).

67.160 Who meets medical standard 3

- (1) Subject to subregulations (2) to (7), a person who satisfies the criteria in table 67.160 meets medical standard 3.
- (2) A person may use contact lenses to meet the criterion in item 3.33 of table 67.160 if the lenses are monofocal and not tinted, and are well tolerated.
- (3) A person whose visual acuity in either eye is worse than 6/60 must provide a full ophthalmic report to CASA.
- (4) A person who has undergone surgery affecting the refractive status of either eye is taken not to meet the criterion in item 3.33 of table 67.160 until he or she is free of safety-relevant sequelae of the surgery.
- (5) A person who requires both near correction and distant correction to meet the criteria in items 3.33 and 3.34 of table 67.160 must demonstrate that 1 pair of spectacles is sufficient to meet both requirements for correction.
- (6) If a person applies for a class 3 medical certificate, the person must demonstrate that he or she meets the criterion in item 3.37 of table 67.160 by, in daylight, or artificial light of similar luminosity, readily identifying a series of pseudo-isochromatic plates of the Ishihara 24-plate type, making no more than 2 errors.
- (7) If a change is made to a criterion in an item of table 67.160, a person who held a class 3 medical certificate and satisfied the criterion immediately before the change, but fails to satisfy the criterion as changed, is taken to satisfy the criterion for 2 years after the day when the change is made.

Regulation 67.160

Table 67.160 Criteria for medical standard 3

Item	Criterion
<i>Abnormalities, disabilities and functional capacity</i>	
3.1	Has no safety-relevant condition of any of the following kinds that produces any degree of functional incapacity, or risk of incapacitation: (a) an abnormality; (b) a disability or disease (active or latent); (c) an injury; (d) a sequela of an accident or a surgical operation
3.2	Has no physical conditions or limitations that are safety-relevant
3.3	Is not using any over-the-counter or prescribed medication or drug (including medication or a drug used to treat a disease or medical disorder) that causes the person to experience any side effects likely to affect the person to an extent that is safety-relevant
<i>Mental fitness</i>	
3.4	Has no established medical history or clinical diagnosis of any of the following conditions, to an extent that is safety-relevant: (a) psychosis; (b) significant personality disorder; (c) significant mental abnormality or neurosis
3.5	Does not engage in any problematic use of substances (within the meaning given by section 1.1 of Annex 1, <i>Personnel Licensing</i> , to the Chicago Convention)
3.6	If there is any personal history of problematic use of a substance (within the meaning given by section 1.1 of Annex 1, <i>Personnel Licensing</i> , to the Chicago Convention): (a) the person's abstinence from problematic use of the substance is certified by an appropriate specialist medical practitioner; and (b) the person is not suffering from any safety-relevant sequelae resulting from the person's use of the substance; and (c) the person provides evidence that the person is undertaking, or has successfully completed, an appropriate course of therapy
Note:	In Annex 1, <i>Personnel Licensing</i> , to the Chicago Convention, 'Problematic use of substances' is defined as follows: 'The use of one or more psychoactive substances by aviation personnel in a way that: a) constitutes a direct hazard to the user or endangers the lives, health or welfare of others; and/or b) causes or worsens an occupational, social, mental or physical problem or disorder.' 'Psychoactive substances' is there defined as 'Alcohol, opioids, cannabinoids, sedatives and hypnotics, cocaine, other psychostimulants, hallucinogens, and volatile solvents, whereas coffee and tobacco are excluded.'

Regulation 67.160

Item	Criterion
<i>Nervous system</i>	
3.7	Has no established medical history or clinical diagnosis of: (a) a safety-relevant disease of the nervous system; or (b) epilepsy; or (c) a disturbance of consciousness for which there is no satisfactory medical explanation and which may recur
3.8	Is not suffering from safety-relevant effects of a head injury or neurosurgical procedure
<i>Cardiovascular system</i>	
3.9	Has no safety-relevant heart abnormality
3.10	Systolic and diastolic blood pressures are within limits specified by CASA from time to time in the Designated Aviation Medical Examiner's Handbook (even if approved drugs are used to maintain the blood pressure within those limits)
3.11	Has no significant functional or structural abnormality of the circulatory tree
<i>Respiratory system</i>	
3.12	Is not suffering from a safety-relevant condition of the respiratory system
<i>Alimentary system and metabolic disorders</i>	
3.13	Is not suffering from a safety-relevant defect of the digestive system or its adnexae, nor from any safety-relevant effect of disease or trauma of, or an operation on, the digestive system or its adnexae
3.14	Is not suffering from safety-relevant metabolic, nutritional or endocrine disorders
3.15	If suffering from diabetes mellitus: (a) the condition is satisfactorily controlled without the use of any anti-diabetic drug; or (b) if an oral anti-diabetic drug is used to control the condition: (i) the condition is under on-going medical supervision and control; and (ii) the oral drug is approved by CASA
<i>Reticulo-endothelial system</i>	
3.16	Is not suffering from a safety-relevant condition of any of the following kinds: (a) localised or generalised enlargement of the lymphatic nodes; (b) a disease of the blood; (c) an immune deficiency disorder
<i>Genito-urinary system</i>	
3.17	Is not suffering from any safety relevant disease of the genito-urinary system
3.18	Has no sequelae of disease or surgical procedures on the kidneys or urinary tract
3.19	Kidneys and urinary tract are free of significant obstructions
3.20	If there is any personal history of syphilis—provides evidence that adequate treatment has been completed and that there are no safety-relevant sequelae of the infection
<i>Gynaecological and obstetrical</i>	
3.21	Does not suffer from safety-relevant menstrual disturbances

Regulation 67.160

Item	Criterion
3.22	If pregnant—the pregnancy is not likely to interfere with the safe exercise of privileges, or performance of duties, under the licence held or applied for Note: See regulation 67.235 regarding the periods during which a pregnant woman must not exercise the privileges of a licence.
<i>Skeletal system</i>	
3.23	Is not suffering from safety-relevant active disease of the bones, joints, muscles or tendons
3.24	Is not suffering from safety-relevant functional sequelae of medically significant conditions of the bones, joints, muscles or tendons
<i>Ear, nose and throat</i>	
3.25	Is not suffering from: (a) active pathological processes of the internal ear or of the middle ear; or (b) permanent disturbances of the vestibular apparatus
3.26	Has no safety-relevant condition of the buccal cavity or the upper respiratory tract
<i>Hearing requirements</i>	
3.27	Is not suffering from any safety-relevant hearing defect
3.28	If suffering from a hearing loss (measured in a quiet room using a properly calibrated, compensated audiometer) in either ear of more than: (a) 35 dB at any of the frequencies of 500 Hz, 1 000 Hz or 2 000 Hz; or (b) 50 dB at 3 000 Hz— passes a speech discrimination test, or an operational check, carried out by an approved person
<i>Visual requirements</i>	
3.29	Eyes and their adnexae function normally
3.30	Is not suffering from any safety-relevant pathological condition (either acute or chronic), nor any sequelae of surgery or trauma
3.31	Has normal binocular vision
3.32	Has normal fields of vision
3.33	Has a distant visual acuity of 6/9 or better in each eye separately and 6/6 or better binocular (with or without correcting lenses)
3.34	Can read (with or without correcting lenses) an N5 chart (or its equivalent) binocularly at a distance that he or she selects (in the range of 30 to 50 centimetres), and can read an N14 chart binocularly (with or without correcting lenses) at a distance of 1 metre Note: A person who needs correcting lenses to meet this criterion must have the appropriate lenses available while carrying out duties under a relevant licence—see regulation 67.200.
3.35	Has a near point of accommodation no further away than 30 centimetres (with or without correcting lenses)
3.36	If using contact lenses to meet the visual standards set out in items 3.29 to 3.35: (a) is able to wear those lenses for twice the projected length of duty time for the person without deterioration in visual acuity or discomfort; and (b) if the lenses are of the hard or gas-permeable variety, demonstrates the ability, immediately after removing the lenses, to read at least 6/9 with spectacles binocularly

Regulation 67.165

Item	Criterion
<i>Colour perception</i>	
3.37	Can readily distinguish the colours that need to be distinguished for the safe exercise of privileges, or performance of duties, under the relevant licence
Note: For how to demonstrate this, see subregulation 67.160(6).	

67.165 Directions about examinations for issue of medical certificates

- (1) If CASA has reason to believe that an applicant for the issue of a medical certificate has a condition (including a condition other than a medical condition) that may, if he or she is issued the medical certificate, endanger the safety of air navigation, CASA may direct the applicant to do either or both of the following:
 - (a) submit to an examination carried out by a medical practitioner, specialist psychiatrist, clinical psychologist, audiologist, optometrist, orthoptist, orthotist, occupational therapist, specialist prosthetist or a practitioner of another kind specified in the direction;
 - (b) submit to an examination or test by a person (not necessarily a medical practitioner) expert in the safe performance of the particular activity in respect of which the medical certificate is sought.
- (2) For paragraph (1)(a), CASA may nominate a particular practitioner, of a kind mentioned or referred to in that paragraph, who is to carry out the examination.
- (3) For paragraph (1)(b), CASA may nominate a particular person who is expert in the safe performance of the activity concerned to carry out the examination.

67.170 Evidence of identity

- (1) If a person submits to a relevant examination by a DAME or DAO, the DAME or DAO must ask the person to produce evidence of his or her identity before finishing the examination.
- (2) The evidence must include a photograph of the person.

Example: The identification might take the form of a passport or any of the following that includes a photograph: a driver's licence, a workplace identification document, a student's identity card.
- (3) However, subregulation (1) does not require the DAME or DAO to ask the person to produce the evidence if the DAME or DAO knows or reasonably believes the person is who the person claims to be.
- (4) If the DAME or DAO has asked the person to produce evidence of his or her identity under subregulation (1), the DAME or DAO may refuse to carry out, or finish, the examination until the person produces the evidence.

67.175 Medical certificates—application

A person may apply to CASA for the issue of a medical certificate.

Regulation 67.180

- Note 1: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.
- Note 2: Part 11 deals with applications and decision making.

67.180 Medical certificates—issue and refusal

- (1) Subject to subregulation (7) and regulation 11.055, on receiving an application under regulation 67.175, CASA must issue a medical certificate to the applicant if the applicant meets the requirements of subregulation (2).
- (2) For subregulation (1), the requirements are:
 - (a) the applicant has undergone any relevant examinations that, in the opinion of CASA, are necessary in the particular case; and
 - (b) each relevant examination has been carried out by an examiner to whom subregulation (4) applies; and
 - (c) for each relevant examination, the applicant answers every question asked by the examiner that the examiner considers necessary to help CASA to decide whether the applicant meets the relevant medical standard; and
 - (d) subject to subregulation (5), the applicant authorises the disclosure to CASA and the examiner of any information or documents about the applicant:
 - (i) that are held by a person, organisation, body or authority mentioned in subregulation (6); and
 - (ii) that may help CASA to decide whether the applicant meets the relevant medical standard; and
 - (e) either:
 - (i) the applicant meets the relevant medical standard; or
 - (ii) if the applicant does not meet that medical standard—the extent to which he or she does not meet the standard is not likely to endanger the safety of air navigation; and
 - (f) if, in addition to any relevant examinations that the applicant has undergone under paragraph (a), CASA has directed the applicant to undergo an examination under subregulation 67.165(1):
 - (i) the applicant has undergone that examination; and
 - (ii) having taken into account the result of the examination, CASA is satisfied that issuing a medical certificate to the applicant would not endanger the safety of air navigation.

Note 1: The routine examinations that an applicant for the issue of a medical certificate must undergo to establish whether he or she meets the relevant medical standard for the certificate are those set out in the Designated Aviation Medical Examiner's Handbook.

Note 2: Part VIIC of the *Crimes Act 1914* operates to prevent any requirement to disclose a spent conviction. For details, see that Part.

Note 3: A false statement in relation to the issue of a certificate is an offence punishable by imprisonment for 12 months—see the *Criminal Code*, section 137.1.

Regulation 67.180

Note 4: A person may not meet any of the medical standards if the person has a history of 'problematic use of substances'—see items 1.5 and 1.6 of table 67.150, items 2.5 and 2.6 of table 67.155 and items 3.5 and 3.6 of table 67.160.

Note 5: For the period for which a medical certificate remains in force, see regulation 67.205.

(3) This subregulation applies to an applicant:

- (a) whose medical certificate (the *old certificate*) has expired; and
- (b) who:
 - (i) applies to CASA for the issue of a new medical certificate within 3 months after the old certificate expired; and
 - (ii) in the opinion of CASA, is not required to undergo any relevant examinations for the issue of the new certificate.

Note: If a medical certificate is issued to an applicant referred to in subregulation (3), the medical certificate remains in force for the period (which must not be longer than 2 months) set out in the certificate—see subregulation 67.205(4).

(4) This subregulation applies to the following persons:

- (a) a DAME;
- (b) a DAO;
- (c) a specialist medical practitioner, or any other medical practitioner, who CASA has directed may carry out medical examinations for the purposes of subregulation (2);
- (d) if CASA has directed that the applicant be assessed by a specialist psychiatrist or clinical psychologist—the psychiatrist or psychologist who carried out the assessment;
- (e) if CASA has directed that the applicant be assessed by an audiologist, optometrist, orthoptist, orthotist, occupational therapist, specialist prosthetist, or similar practitioner—the practitioner who carried out the assessment;
- (f) if CASA has directed that the applicant be assessed by a person (not necessarily a medical practitioner) expert in the safe performance of the particular activity in respect of which the medical certificate is sought—the person who carried out the assessment.

(5) An authorisation under paragraph (2)(d) does not require a person, organisation, body or authority to disclose:

- (a) information or a document that was collected for use as evidence in a legal proceeding, and has not been tendered or admitted as evidence in a court; or
- (b) information or a document that could not, because of Part 3.10 of the *Evidence Act 1995*, be given in evidence in a proceeding to which that Part applies.

Note: Part 3.10 of the *Evidence Act 1995* is about: client legal privilege; religious confessions; self-incrimination in other proceedings; and evidence excluded in the public interest. For details, see that Act.

(6) For paragraph (2)(d), the persons, organisations, bodies or authorities are as follows:

Regulation 67.185

- (a) a medical practitioner;
 - (b) any other person or organisation (including a hospital) that has made a physical, psychological or psychiatric examination of the applicant;
 - (c) any other person or organisation (including a hospital) that has treated the applicant for a medically significant condition;
 - (d) an employer (including a former employer) of the applicant;
 - (e) any other person, organisation, body or authority (including a police force or police service and, subject to Part VIIC of the *Crimes Act 1914*, a court) that holds information or a document of the kind referred to in paragraph (2)(d).
- (7) CASA must not issue a medical certificate to an applicant if it is satisfied that the applicant:
- (a) has knowingly or recklessly made a false or misleading statement in relation to the application for the medical certificate; or
 - (b) does not satisfy the requirements of this regulation; or
 - (c) has not, in the course of undergoing a relevant examination for the medical certificate, complied with a request made under subregulation 67.170(1).
- (8) A medical certificate issued to an applicant who does not meet the relevant medical standard for the issue of the certificate, or to whom subparagraph (2)(f)(ii) applies, must bear a note of that fact.
- (9) The fact that an applicant who does not meet the relevant medical standard in all respects has previously been issued with a medical certificate under subparagraph (2)(e)(ii) or (f)(ii) does not automatically entitle him or her to the issue of a further such medical certificate.

67.185 Notice of decision to refuse medical certificate

- (1) If:
- (a) CASA refuses to issue a medical certificate to a person; and
 - (b) the reasons for the refusal included that the person failed to meet the relevant medical standard;
- the notice given to the person under regulation 11.060 must state the respects in which the person did not meet the standard.
- (2) Failure to comply with subregulation (1) in relation to a decision does not affect the validity of the decision.

67.190 Reconsideration of decision to refuse medical certificate

- (1) A person to whom CASA has refused to issue a medical certificate, or to whom CASA has issued a medical certificate subject to a condition not sought by the person, may apply to CASA in writing for reconsideration of the decision.
- (2) The application must be made within 21 days after the day when the person is told by CASA, in writing, that it:
- (a) has refused to issue a medical certificate to the person; or

Regulation 67.195

- (b) has issued a medical certificate subject to a condition not sought by the person.
- (3) The reconsideration of an application submitted to CASA must not be carried out solely by the CASA officer who made the decision being reconsidered.

Note: A refusal to issue a medical certificate is reviewable by the Administrative Appeals Tribunal—see the Act, section 31 and regulation 201.004.

67.195 Medical certificate—conditions

- (2) Without limiting regulations 11.056 and 11.067, CASA may issue a medical certificate subject to a condition that the period during which the certificate remains in force may be extended only by CASA.

67.200 Conditions applicable to certain medical certificates—correcting lenses

- (1) In addition to any other condition imposed by or under this Part or Part 11, a medical certificate issued to a person who needs correcting lenses to satisfy the requirements of item 1.36 of table 67.150, item 2.36 of table 67.155 or item 3.34 of table 67.160 is subject to the conditions set out in subregulations (2) and (4).
- (2) The person must have those correcting lenses available for use while exercising the privileges of a licence for which the certificate is required.
- (3) If the person is the holder of, or an applicant for, a licence for which he or she is required to meet medical standard 1 or 2, the correcting lenses may be a pair of spectacles or a combination of contact lenses and a pair of spectacles.
- (4) A person to whom subregulation (3) applies must have within reach, while he or she is performing duties essential to the operation of an Australian aircraft during flight time, a spare pair of spectacles for each pair of correcting lenses that he or she requires to meet the relevant medical standard.
- (5) The holder of a medical certificate that is subject to a condition set out in subregulation (2) or (4) must not contravene the condition.

Penalty: 50 penalty units.

- (6) An offence against subregulation (5) is an offence of strict liability.

67.205 Medical certificates—period in force

- (1) In this regulation:

appropriate day means:

- (a) for a medical certificate issued to a person who:

- (i) has never held a medical certificate, or a person who has previously held a medical certificate that has expired; and
- (ii) has undergone any relevant examinations required for the purpose of the issue of the certificate;

the day when the last relevant examination is completed; and

Regulation 67.205

- (b) for a new medical certificate issued to a person:
- (i) who holds a medical certificate that is in force (the *current certificate*); and
 - (ii) who has undergone any relevant examinations required for the purpose of the issue of the new certificate; and
 - (iii) whose last relevant examination is completed more than 28 days before his or her current certificate is due to expire;
- the day when the examination is completed; and

- (c) for a new medical certificate issued to a person:
- (i) who holds a medical certificate that is in force (the *current certificate*); and
 - (ii) who has undergone any relevant examinations required for the purpose of the issue of the new certificate; and
 - (iii) whose last relevant examination is completed 28 or fewer days before his or her current certificate is due to expire;
- the day when the current certificate is due to expire.

Example 1: A person who has never held a medical certificate has an examination for the issue of a medical certificate on 1 January 2003. The appropriate day for the certificate is 1 January 2003.

Example 2: A person who holds a medical certificate that is due to expire on 1 January 2004 has an examination for a new certificate on 1 November 2003. The appropriate day for the new certificate is 1 November 2003.

Example 3: A person who holds a medical certificate that is due to expire on 1 January 2004 has an examination for a new certificate on 20 December 2003. The appropriate day for the new certificate is 1 January 2004.

Example 4: A person who held a medical certificate that expired on 1 January 2003 has an examination for a new certificate on 1 March 2003. The appropriate day for the new certificate is 1 March 2003.

- (2) A medical certificate comes into force:
- (a) if the holder has undergone any relevant examinations required for the purpose of the issue of the certificate and complies with the relevant medical standard in all respects—on the certificate's appropriate day; or
 - (b) in any other case—on the day when the certificate is issued.
- (3) Subject to subregulation (6) and regulations 67.215 and 67.220, a medical certificate issued by CASA to a person who has undergone any relevant examinations required for the purpose of the issue of the certificate remains in force for the period set out in the certificate, being a period of not more than:
- (a) in the case of a class 1 medical certificate—1 year after the day when the certificate comes into force; and
 - (b) in the case of a class 2 medical certificate:
 - (i) if the person is less than 40 years old when the certificate is issued to him or her—4 years after the day when the certificate comes into force; or

Regulation 67.210

- (ii) if the person is 40 years old or older when the certificate is issued to him or her—2 years after the day when the certificate comes into force; and
 - (c) in the case of a class 3 medical certificate—2 years after the day when the certificate comes into force.
- (4) Subject to subregulation (6) and regulations 67.215 and 67.220, a medical certificate issued by CASA to a person who has not been required to undergo any relevant examinations for the purpose of the issue of the certificate remains in force for the period (which must not be longer than 2 months) set out in the certificate.
- (5) Subject to subregulation (6), a medical certificate issued by a DAME remains in force for the period (which must not be longer than 2 months) set out in the certificate.
- (6) If a new medical certificate is issued to a person who holds a current medical certificate, and the new certificate comes into force before the current certificate is due to expire, the current certificate ceases to be in force at the last moment of the day before the day when the new certificate comes into force.

67.210 Medical certificates—application for extension of period in force

- (1) The holder of a current medical certificate issued by CASA may apply for an extension of the period during which the medical certificate remains in force.
- (2) The application may be made to:
 - (a) CASA; or
 - (b) if the certificate is not subject to a condition to the effect that the period during which the certificate remains in force may be extended only by CASA—a DAME.

67.215 Medical certificates—extension of period in force by CASA

- (1) If, on receiving an application under regulation 67.210 for an extension of the period during which a current medical certificate remains in force, CASA is satisfied that extending the period will not adversely affect the safety of air navigation, CASA may extend the period by:
 - (a) entering the period of the extension on the certificate; or
 - (b) giving to the holder of the certificate a written notice setting out the period of the extension.
- (2) An extension by CASA of the period during which the certificate remains in force must not be for longer than 1 year after the day when the certificate would expire if the period had not been extended.

Regulation 67.220

67.220 Medical certificates—extension of period in force by DAMEs

- (1) A DAME must, on receiving an application under regulation 67.210 for an extension of the period during which a current medical certificate remains in force:
 - (a) deal with the application in accordance with the Designated Aviation Medical Examiner's Handbook; and
 - (b) extend the period only if the DAME is satisfied that this will not adversely affect the safety of air navigation.
- (2) If the DAME extends the period during which a medical certificate remains in force, the DAME must:
 - (a) enter the period of the extension on the certificate; or
 - (b) give to the holder of the certificate a written notice setting out the period of the extension.
- (3) A medical certificate may be extended by a DAME only once.
- (4) An extension by a DAME of the period during which the certificate remains in force must not be for longer than 2 months after the day when the certificate would expire if the period had not been extended.

67.225 Medical certificates—new medical certificates issued by DAMEs

- (1) A person whose medical certificate has expired may apply to a DAME for the issue of a medical certificate under this regulation if the medical certificate:
 - (a) was issued by CASA; and
 - (b) was not subject to a condition that the period during which the certificate remains in force may be extended only by CASA.
- (2) An application must be made within 3 months after the medical certificate has expired.
- (3) On receiving an application under subregulation (1), a DAME must:
 - (a) deal with it in accordance with the Designated Aviation Medical Examiner's Handbook; and
 - (b) subject to this regulation, issue a new medical certificate to the applicant only if satisfied that:
 - (i) the applicant has, subject to subregulation (5), authorised the disclosure of his or her medical information and documents to the DAME, being information and documents held by any of the persons, organisations, bodies or authorities mentioned in subregulation (6); and
 - (ii) issuing the medical certificate to the applicant will not adversely affect the safety of air navigation.

Note: If a medical certificate is issued to a person by a DAME, the medical certificate remains in force for the period (which must not be longer than 2 months) set out in the certificate—see subregulation 67.205(5).

Regulation 67.230

- (4) The DAME must not issue a medical certificate to the applicant if the DAME is satisfied that the applicant:
- (a) has knowingly or recklessly made a false or misleading statement in relation to the application for the medical certificate; or
 - (b) does not satisfy the requirements of this regulation; or
 - (c) has not, in the course of undergoing a relevant examination for the medical certificate, complied with a request made under subregulation 67.170(1).
- (5) An authorisation under subparagraph (3)(b)(i) does not require a person, organisation, body or authority to disclose:
- (a) information or a document that was collected for use as evidence in a legal proceeding, and has not been tendered or admitted as evidence in a court; or
 - (b) information or a document that could not, because of Part 3.10 of the *Evidence Act 1995*, be given in evidence in a proceeding to which that Part applies.
- Note: Part 3.10 of the *Evidence Act 1995* is about: client legal privilege; religious confessions; self-incrimination in other proceedings; and evidence excluded in the public interest. For details, see that Act.
- (6) For subparagraph (3)(b)(i), the persons, organisations, bodies or authorities are as follows:
- (a) a medical practitioner;
 - (b) any other person or organisation (including a hospital) that has made a physical, psychological or psychiatric examination of the applicant;
 - (c) any other person or organisation (including a hospital) that has treated the applicant for a medically significant condition;
 - (d) an employer (including a former employer) of the applicant;
 - (e) any other person, organisation, body or authority (including a police force or police service and, subject to Part VIIC of the *Crimes Act 1914*, a court) that holds information or a document of the kind referred to in subparagraph (3)(b)(i).

67.230 CASA may require medical examination of certificate holders

- (1) If it is necessary, in the interests of the safety of air navigation, for the holder of a medical certificate to demonstrate:
- (a) that he or she continues to meet the relevant medical standard; or
 - (b) that holding the certificate does not adversely affect the safety of air navigation;

CASA may direct the holder to do any 1 or more of the following:

- (c) submit to an examination carried out by a medical practitioner, specialist psychiatrist, clinical psychologist, audiologist, optometrist, orthoptist, orthotist, occupational therapist, specialist prosthetist or a practitioner of another kind specified in the direction;

Regulation 67.235

- (d) submit to an examination or test by a person (not necessarily a medical practitioner) expert in the safe performance of the particular activity to which the medical certificate relates;
 - (e) authorise the disclosure to CASA of any information or document about the holder, held by a person, organisation, body or authority referred to in subregulation (4), that may help CASA to decide whether:
 - (i) the holder continues to meet that medical standard; or
 - (ii) the holder's holding the certificate may adversely affect the safety of air navigation.
- (2) For paragraph (1)(c), CASA may nominate a particular practitioner, of a kind mentioned or referred to in that paragraph, who is to carry out the examination.
- (3) For paragraph (1)(d), CASA may nominate a particular person who is expert in the performance of the activity concerned to carry out the examination.
- (4) For paragraph (1)(e), the persons, organisations, bodies and authorities are as follows:
- (a) a medical practitioner, specialist psychiatrist, clinical psychologist, audiologist, optometrist, orthoptist, orthotist, occupational therapist, specialist prosthetist or similar practitioner who has examined or treated the holder;
 - (b) any other person or organisation (including a hospital) that has made a physical, psychological or psychiatric examination of the holder;
 - (c) any other person or organisation (including a hospital) that has treated the holder for a medically significant condition;
 - (d) an employer (including a former employer) of the holder;
 - (e) any other person, organisation, body or authority (including a police force or police service and, subject to Part VIIC of the *Crimes Act 1914*, a court) that holds information or a document relevant to deciding whether the person's holding the certificate may adversely affect the safety of air navigation.

67.235 Suspension of medical certificates—pregnancy

- (1) A medical certificate held by a pregnant woman who holds, or is an applicant for, a licence is taken to be suspended:
- (a) during the period beginning immediately after the end of the 30th week of gestation and ending when a DAME certifies that she is fully recovered following delivery or the termination of the pregnancy; or
 - (b) if in a particular case CASA directs in writing that a different period should apply—during the period so directed by CASA; or
 - (c) if, before the start of the period mentioned in paragraph (a), the pregnancy ends in miscarriage or premature labour, or is terminated by medical intervention—from the time of the miscarriage, premature labour or intervention until a DAME certifies that the woman is fully recovered.

Note: This regulation does not preclude a pilot who is pregnant from undertaking or receiving instruction in a flight simulator at any stage of the pilot's pregnancy.

Regulation 67.240

- (2) Despite subregulation (1), a pregnant woman who holds an ATC licence may continue to exercise the privileges of the licence until the end of the 38th week of gestation if:
- (a) the medical practitioner who is attending the woman certifies her continued medical fitness to do so each week beginning at the 31st week of gestation; and
 - (b) a DAME certifies the woman's continuing fitness to do so each week beginning at the 31st week of gestation; and
 - (c) another person who holds an ATC licence, and is medically fit and able to take over responsibility for the function, is on duty and available at the times when she does so.

67.240 Medical certificates—suspension pending examination

- (1) If CASA directs the holder of a medical certificate to submit to an examination under regulation 67.230, or to authorise the disclosure of information to CASA under that regulation, CASA may, in writing, suspend the medical certificate.
- (2) If CASA suspends a medical certificate, CASA must give the holder of the certificate written notice of the suspension and of the reasons for the suspension.
- (3) A suspension of a medical certificate takes effect when the holder of the certificate is told of the suspension, either orally or in writing.
- (4) If:
- (a) CASA suspends a medical certificate; and
 - (b) the holder of the certificate submits to an examination or test directed by CASA, or authorises the disclosure of information to CASA; and
 - (c) the examination, test or information shows that:
 - (i) the holder meets the relevant medical standard; and
 - (ii) the continued holding of the certificate by the holder will not adversely affect the safety of air navigation;

CASA must:

- (d) end the suspension; and
 - (e) tell the holder in writing that the suspension has ended.
- (5) If:
- (a) CASA suspends a medical certificate; and
 - (b) the holder of the certificate submits to an examination or test directed by CASA, or authorises the disclosure of information to CASA; and
 - (c) the examination, test or information shows either or both of the following:
 - (i) the holder fails to meet the relevant medical standard;
 - (ii) the continued holding of the certificate by the holder will adversely affect the safety of air navigation;

CASA must tell the holder in writing the respect in which the holder does not meet the medical standard.

Regulation 67.245

67.245 Suspension of medical certificates—special arrangements for service in urgent cases

- (1) If there is reason to believe in a particular case that:
 - (a) the holding of a medical certificate by a person may seriously and adversely affect the safety of air navigation; and
 - (b) it is necessary, in the interests of the safety of air navigation, to suspend the certificate immediately; and
 - (c) the person is likely to attempt to evade service on him or her of the notice of suspension;CASA may give the notice to the person in any way by which it is likely to be quickly brought to the person's attention.
- (2) In particular, if no other method of giving the notice is practicable in the circumstances, the notice may be given by fixing it in a prominent position to an aircraft that the person is likely to fly.
- (3) A notice that is fixed to an aircraft is taken to have been given to the person at the time it is fixed to the aircraft.

67.250 Medical certificates—effect of suspension

If CASA suspends a medical certificate, its holder is taken not to be the holder of a medical certificate during the period of the suspension.

67.255 Medical certificates—cancellation if medical standard not met

- (1) If, after undergoing an examination for the purposes of regulation 67.180 or under regulation 67.230, the holder of a medical certificate fails to meet the relevant medical standard for the certificate (or, in the case of a person who did not, at the time the certificate was issued, meet the standard in all respects, fails to meet the standard in an additional respect), CASA must:
 - (a) by written notice given to the holder, cancel the certificate; and
 - (b) if CASA is satisfied that the holding of a medical certificate by the holder will not adversely affect the safety of air navigation—issue to the holder a medical certificate that is subject to any conditions that are necessary in the interests of the safety of air navigation.
- (2) CASA must include in the notice the reasons for the holder's failure to meet the relevant medical standard.

67.260 Medical certificates—cancellation and suspension in other cases

- (1) CASA may, by written notice given to the holder of a medical certificate, cancel the certificate, or suspend it for a specified period, if there are reasonable grounds for believing that the holder:
 - (a) has contravened a condition to which the certificate is subject; or
 - (b) has contravened subregulation 67.265(3) or (4); or
 - (c) has failed to comply with a direction under regulation 67.230.

Regulation 67.260

- (2) A notice must set out the grounds for the cancellation or suspension.
- (3) Before cancelling or suspending a medical certificate, CASA must:
 - (a) give a show cause notice to the holder of the certificate of the facts and circumstances that, in the opinion of CASA, justify consideration being given to the cancellation or suspension of the certificate; and
 - (b) allow the holder to show cause (within the time CASA sets out in that notice, being a period of not less than 14 days after the notice was given), why the certificate should not be cancelled or suspended.

Subpart 67.D—Modified Austroads medical standards

67.262 Definition of *meets the modified Austroads medical standards*

Unconditional licence under the private vehicle driver standards

- (1) A person ***meets the modified Austroads medical standards*** if the person is fit to hold an unconditional licence under the modified Austroads medical standards.

Conditional licence under the private vehicle driver standards

- (2) Also, a person ***meets the modified Austroads medical standards*** if all of the following apply to the person:
 - (a) the person is fit to hold a conditional licence under the modified Austroads medical standards;
 - (b) under the standards, the only reason that the person is not fit to hold an unconditional licence is because the person's uncorrected visual acuity does not meet the standard for the issue of an unconditional licence;
 - (c) the person's visual acuity is corrected by lenses to at least 6/12 in one eye and at least 6/18 in the other eye.

67.263 Definition of *modified Austroads medical standards* for Subpart 67.D

- (1) In this Subpart:

modified Austroads medical standards means the private vehicle driver standards in the Austroads medical standards modified to provide that a person with a medical history or condition mentioned in subregulation (2) does not meet the standards.

- (2) For subregulation (1), the medical histories and conditions are the following:
 - (a) subject to subregulation (3)—a history of cancer within the 5-year period before the day the privileges of the licence are exercised;
 - (b) a history of ECG changes, with or without symptoms;
 - (c) subject to subregulation (4)—a history of heart failure;
 - (d) inability to hear a conversational speaking voice at a distance of 2 metres, whether unaided or with the assistance of a medically prescribed hearing aid;
 - (e) any musculoskeletal disability, disorder or disease of the bones, joints, muscles or tendons that would limit or restrict the normal manipulation of aircraft controls, or would require physical modifications to the aircraft to enable appropriate manipulation of the controls;
 - (f) a history of transient ischaemic attack or stroke;
 - (g) a history of multiple sclerosis, cerebral palsy or Parkinson's disease;
 - (h) a history of one or more of the following in relation to a head injury:
 - (i) loss of consciousness;

- (ii) post-traumatic amnesia;
 - (iii) abnormal findings on head CT or MRI investigation;
 - (iv) a history of renal colic or calculi;
 - (v) active vertigo or a history of benign paroxysmal positional vertigo.
- (3) For paragraph (2)(a), a history of cancer for a person does not include a history of basal cell skin cancers if:
- (a) each basal cell skin cancer has been treated by excision with no metastasised sequelae; and
 - (b) since at least the last occurrence of a basal cell skin cancer, the person has been under active and continuous case management by a medical practitioner who is a specialist oncology physician or surgeon (the ***treating practitioner***); and
 - (c) the person is assessed for the issue of a recreational aviation medical practitioner's certificate by the treating practitioner or, if the treating practitioner is not available, by another medical practitioner with knowledge of the person's basal cell skin cancer history.
- (4) For paragraph (2)(c), a history of heart failure for a person does not include a history in which the person meets all of the following requirements:
- (a) the person has not had an episode of heart failure for at least the previous 3 years;
 - (b) since at least the last episode of heart failure, the person has been under active and continuous case management by a medical practitioner who is a specialist cardiovascular physician or surgeon (the ***treating practitioner***);
 - (c) the person is assessed for the issue of a recreational aviation medical practitioner's certificate by the treating practitioner or, if the treating practitioner is not available, by another medical practitioner with knowledge of the person's history of heart failure.
- (5) In this regulation:

Austroads medical standards means the medical standards set out in the publication *Assessing fitness to drive for commercial and private vehicle drivers*, published by Austroads in March 2012, or any later version, as in force from time to time.

Note: The text of the standards could in 2013 be viewed on Austroads' website (www.austroads.com.au/assessing-fitness-to-drive/).

Subpart 67.E—Responsibilities of holders of medical certificates and recreational aviation medical practitioner's certificates

67.265 Obligation to tell CASA of changes in medical condition—medical certificate holders

- (1) This regulation applies in relation to the following licences:
 - (a) a flight crew licence;
 - (b) a balloon flight crew licence within the meaning of subregulation 5.01(1) of CAR;
 - (c) an ATC licence.
- (2) In this regulation, a reference to a **DAME** includes, in relation to a medically significant condition that affects a person's vision, a DAO.
- (3) If:
 - (a) the holder of a class 1 medical certificate and a licence:
 - (i) knows that he or she has a medically significant condition; and
 - (ii) is reckless as to whether the condition has been disclosed to CASA; and
 - (b) the condition continues for longer than 7 days; and
 - (c) the condition has the result that his or her ability to do an act authorised by the licence is impaired;he or she must tell CASA or a DAME about the condition as soon as practicable after the end of the 7 days.

Penalty: 50 penalty units.
- (4) If:
 - (a) the holder of a class 2 or class 3 medical certificate and a licence:
 - (i) knows that he or she has a medically significant condition; and
 - (ii) is reckless as to whether the condition has been disclosed to CASA; and
 - (b) the condition continues for longer than 30 days; and
 - (c) the condition has the result that his or her ability to do an act authorised by the licence is impaired;he or she must tell CASA or a DAME about the condition as soon as practicable after the end of the 30 days.

Penalty: 50 penalty units.
- (5) If the holder of a medical certificate and a licence:
 - (a) knows that he or she has a medically significant condition; and
 - (b) is reckless as to whether the condition has been disclosed to CASA; and

Regulation 67.270

- (c) the condition has the result that his or her ability to do an act authorised by the licence is impaired;

he or she must not do the act until a DAME certifies that the holder can safely do such acts.

Penalty: 50 penalty units.

Note: If the holder of a medical certificate tells a DAME about a medically significant condition, and the condition is safety-relevant, the DAME must tell CASA in writing of that fact within 5 working days—see regulation 67.125.

- (6) It is a defence to a prosecution under subregulation (5) that, in the circumstances, the relevant act was a reasonable measure to save life (including the holder's own life) or avoid damage to property.

67.270 Offence—doing act while efficiency impaired—licence holders

- (1) This regulation applies in relation to the following licences:
- (a) a flight crew licence;
 - (b) a balloon flight crew licence within the meaning of subregulation 5.01(1) of CAR;
 - (c) an ATC licence.
- (2) The holder commits an offence if:
- (a) the holder does an act authorised by the licence; and
 - (b) at the time of doing the act:
 - (i) the holder knows that he or she has a medically significant condition; and
 - (ii) the condition has the result that the holder's ability to do the act is impaired.

Penalty: 50 penalty units.

Class 1 medical certificates

- (3) The holder commits an offence if:
- (a) the holder does an act authorised by the licence; and
 - (b) the holder knows that he or she has had a condition mentioned in paragraph (2)(b); and
 - (c) the holder's normal ability to do the act is not fully restored within 7 days after the holder first becomes aware that he or she had the condition; and
 - (d) the holder is authorised to do the act only if the holder also holds a class 1 medical certificate; and
 - (e) the holder has not been given a certificate by a DAME to the effect that the holder's normal ability to do the act is no longer impaired.

Penalty: 50 penalty units.

Part 67 Medical

Subpart 67.E Responsibilities of holders of medical certificates and recreational aviation medical practitioner's certificates

Regulation 67.271

Class 2 and 3 medical certificates

- (4) The holder commits an offence if:
- (a) the holder does an act authorised by the licence; and
 - (b) the holder knows that he or she has had a condition mentioned in paragraph (2)(b); and
 - (c) the holder's normal ability to do the act is not fully restored within 30 days after the holder first becomes aware that he or she had the condition; and
 - (d) the holder is authorised to do the act only if the holder also holds a class 1, 2 or 3 medical certificate; and
 - (e) the holder has not been given a certificate by a DAME to the effect that the holder's normal ability to do the act is no longer impaired.

Penalty: 50 penalty units.

Recreational aviation medical practitioner's certificates

- (5) The holder commits an offence if:
- (a) the holder does an act authorised by the licence; and
 - (b) the holder knows that he or she has had a condition mentioned in paragraph (2)(b); and
 - (c) the holder's normal ability to do the act is not fully restored within 30 days after the holder first becomes aware that he or she had the condition; and
 - (d) the holder is authorised to do the act only if the holder also holds a class 1, 2 or 3 medical certificate or a recreational aviation medical practitioner's certificate; and
 - (e) the holder does not meet the requirement in subregulation (6).

Penalty: 50 penalty units.

- (6) For paragraph (5)(e), the requirement is that:
- (a) the holder has been given a certificate by a DAME to the effect that the holder's normal ability to do the act is no longer impaired; or
 - (b) if the holder held a recreational aviation medical practitioner's certificate at the time the holder had the condition—the holder is:
 - (i) assessed by a medical practitioner as meeting the modified Austroads medical standards after having the condition; and
 - (ii) given a certificate by the medical practitioner to that effect.

Note: For when a person meets the modified Austroads medical standards, see regulation 67.262.

67.271 Offence—doing act while efficiency impaired—student pilots

- (1) A student pilot commits an offence if:
- (a) the student pilot conducts a solo flight or takes a flight test; and
 - (b) at the time of the solo flight or flight test:
 - (i) the student pilot knows that he or she has a medically significant condition; and

Regulation 67.275

-
- (ii) the condition has the result that the student pilot's ability to conduct the solo flight or take the flight test is impaired.

Penalty: 50 penalty units.

- (2) A student pilot commits an offence if:
- (a) the student pilot conducts a solo flight or undertakes a flight test; and
 - (b) the student pilot knows that he or she has had a condition mentioned in paragraph (1)(b); and
 - (c) the student pilot's normal ability to conduct the solo flight or undertake the flight test is not fully restored within 30 days after the student pilot first becomes aware that he or she had the condition; and
 - (d) the student pilot does not meet the requirement in subregulation (3).

Penalty: 50 penalty units.

- (3) For paragraph (2)(d), the requirement is that:
- (a) the student pilot has been given a certificate by a DAME to the effect that the student pilot's ability to conduct a solo flight or undertake a flight test is no longer impaired; or
 - (b) if the student pilot held a recreational aviation medical practitioner's certificate at the time the student had the condition—the student pilot is:
 - (i) assessed by a medical practitioner as meeting the modified Austroads medical standards after having the condition; and
 - (ii) given a certificate by the medical practitioner to that effect.

Note: For when a person meets the modified Austroads medical standards, see regulation 67.262.

67.275 Surrender of medical certificates

- (1) CASA may require, by written notice, the holder of a medical certificate to surrender the certificate to CASA within a reasonable time specified in the notice.
- (2) The person must comply with the requirement.

Penalty: 5 penalty units.

- (3) A person who contravenes subregulation (2) is guilty of an offence in respect of each day during which the person refuses or fails to comply with the requirement, including the day of any conviction for such an offence.
- (4) The person must not destroy, mutilate or deface the certificate with intent to evade the obligation to comply with the requirement.

Penalty: 10 penalty units.

90.290 Landing gear aural warning systems

Subpart 90.D—Small aeroplanes engaged in air transport operations

90.400 Applicability

90.405 Cargo and baggage compartments

90.410 Emergency exits

90.415 Landing gear aural warning systems

Subpart 90.E—Helicopters engaged in scheduled air transport operations

90.600 Applicability

90.605 Emergency exits

Subpart 90.A—General

90.005 Purpose of Part

This Part sets out airworthiness requirements for an aircraft that are in addition to:

- (a) the type certification basis for the aircraft; and
- (b) any requirements for the issue of a certificate of airworthiness for the aircraft under Part 21.

Note: For the definition of *type certification basis*, see the Dictionary.

90.007 Application of Part

- (1) If a provision of this Part imposes a more stringent requirement (however described) in relation to an aircraft than a comparable requirement under any other provision of these Regulations, the more stringent requirement prevails.
- (2) Despite subregulation (1), this Part is not intended to limit any other provision of these Regulations that permits an aircraft to be operated with a defect or an inoperative instrument, indicator, item of equipment or system.

90.008 Definitions for Part 90

- (1) In this Part:

Class C cargo or baggage compartment has the same meaning as in FARs section 25.857, as in force from time to time.

Class D cargo or baggage compartment has the same meaning as in FARs section 25.857, as in force on 16 June 1986.

Class E cargo compartment has the same meaning as in FARs section 25.857, as in force from time to time.

emergency exit means an external door, hatch or window on an aircraft intended for use by passengers or crew in an emergency.

large aeroplane means an aeroplane with a maximum take-off weight of more than 5 700 kg.

non-transport category aeroplane means an aeroplane of a type that was originally certificated in a category other than the transport category.

operating has the meaning given by subregulation (2).

originally certificated has the meaning given by subregulation (3).

Part 90 Manual of Standards means the Manual of Standards issued by CASA under regulation 90.020.

Regulation 90.010

side-facing seat, for an aircraft, means a seat that faces more than 18° from the aircraft's longitudinal axis.

small aeroplane means an aeroplane with a maximum take-off weight of 5 700 kg or less.

transport category aeroplane means an aeroplane of a type that was originally certificated in the transport category.

- (2) For this Part, an aircraft is **operating** from the moment at which the aircraft first moves (whether or not under its own power) for the purpose of taking off for a flight until the moment at which it comes to rest for the purpose of disembarking any persons or cargo on board after:
 - (a) it lands; or
 - (b) the flight is aborted.
- (3) For this Part, an aircraft of a particular type is **originally certificated** as follows:
 - (a) if the aircraft's State of Design is Australia—when CASA first issues a type certificate in respect of an aircraft of that type;
 - (b) if the aircraft's State of Design is a foreign country—when the national aviation authority of the State of Design first issues a foreign type certificate in respect of an aircraft of that type.

90.010 Exclusions in relation to particular provisions

- (1) The registered operator of an aircraft may apply in writing to CASA for exclusion of the aircraft, or an aeronautical product that is part of, or used in, the aircraft, from the operation of a provision of this Part.
- (2) On receiving an application, CASA may, in writing, exclude the aircraft or aeronautical product from the operation of the provision.
- (3) In making a decision under subregulation (2), CASA must:
 - (a) regard as paramount the preservation of a level of aviation safety that is at least acceptable; and
 - (b) have regard to any reasons given in the application.
- (4) However, CASA may exclude an aircraft or aeronautical product under subregulation (2) only if CASA is satisfied that it is not practicable for the aircraft or aeronautical product to meet the requirements of the provision.
- (5) CASA may, in an instrument of exclusion under subregulation (2), provide that the exclusion is subject to 1 or more conditions.
- (6) An instrument of exclusion under subregulation (2) applies to a particular aircraft or aeronautical product only while the registered operator of the aircraft, or the aircraft that the aeronautical product is part of, or used in, complies with each condition of the exclusion.

Note: See regulation 201.004 for review of an exclusion decision.

90.015 Operation of exclusions under regulation 39.004

- (1) This regulation applies if, before 1 December 2010, CASA has, under regulation 39.004, excluded (the *exclusion*):
 - (a) a particular aircraft or aeronautical product; or
 - (b) a particular kind of aircraft or aeronautical product;
 from the operation of an airworthiness directive, or a requirement of an airworthiness directive, mentioned in column 2 of an item in table 90.015 (the *item*).
- (2) Subject to subregulation (3), the provision mentioned in column 3 of the item does not apply to an aircraft or aeronautical product that, immediately before 1 December 2010, was subject to the exclusion.
- (3) Subregulation (2) applies to a particular aircraft or aeronautical product only while the registered operator of the aircraft, or the aircraft that the aeronautical product is part of, or used in, continues to comply with each condition of the exclusion.

Note: On 1 December 2010, the airworthiness directives mentioned in table 90.015 were cancelled.

Table 90.015 Provisions covered by exclusions relating to each airworthiness directive

Item	Airworthiness Directive	Provision
1	AD/General/4 Amdt 4, requirement 1(a)	Regulation 90.130
2	AD/General/4 Amdt 4, requirement 2(a)	Regulation 90.205
3	AD/General/4 Amdt 4, requirements 2(b)(1) and (2)	Regulation 90.220
4	AD/General/4 Amdt 4, requirement 2(b)(3)	Regulation 90.225
5	AD/General/4 Amdt 4, requirement 2(c)	Regulation 90.220
6	AD/General/4 Amdt 4, requirement 2(d)	Regulation 90.225
7	AD/General/4 Amdt 4, requirement 2(e)	Regulation 90.215
8	AD/General/4 Amdt 4, requirement 2(f)	Regulation 90.235
9	AD/General/4 Amdt 4, requirement 2(g)	Regulation 90.240
10	AD/General/4 Amdt 4, requirement 2(h)	Regulation 90.245
11	AD/General/4 Amdt 4, requirement 2(k)	Regulation 90.210
12	AD/General/4 Amdt 4, requirement 3	Regulation 90.410
13	AD/General/4 Amdt 4, requirement 3(e)	Regulation 90.220
14	AD/General/4 Amdt 4, requirement 3(f)	Regulation 90.215
15	AD/General/4 Amdt 4, requirement 4	Regulation 90.605
16	AD/General/4 Amdt 4, requirement 5(b)	Regulation 90.135
17	AD/General/4 Amdt 4, requirement 5(c)	Regulation 90.135
18	AD/General/33 Amdt 1	Regulation 90.140
19	AD/General/48 Amdt 3	Regulation 90.270

Regulation 90.020

Item	Airworthiness Directive	Provision
20	AD/General/57 Amdt 1	Regulation 90.285
21	AD/General/60 Amdt 1	Regulation 90.105
22	AD/General/61 Amdt 2	Regulation 90.125
23	AD/General/63 Amdt 1	Regulation 90.255
24	AD/General/64 Amdt 2	Regulation 90.120
25	AD/General/66 Amdt 1	Regulation 90.230
26	AD/General/67 Amdt 3	Regulation 90.110
27	AD/General/68 Amdt 4	Regulation 90.250
28	AD/General/70 Amdt 1	Regulation 90.260
29	AD/General/71 Amdt 1	Regulation 90.115
30	AD/General/73	Regulation 90.215
31	AD/General/74 Amdt 1	Regulation 90.105
32	AD/General/76 Amdt 2	Regulation 90.265
33	AD/General/84 Amdt 2	Regulation 90.145
34	AD/General/84 Amdt 2	Regulation 90.275
35	AD/General/85	Regulation 90.280

90.020 Issue of Manual of Standards

- (1) For the purposes of subsection 98(5A) of the Act, CASA may issue a Manual of Standards for this Part prescribing matters:
 - (a) required or permitted by these Regulations to be prescribed by the Part 90 Manual of Standards; or
 - (b) necessary or convenient to be prescribed for carrying out or giving effect to this Part.
- (2) In particular, the Part 90 Manual of Standards may set out matters relating to the airworthiness of, or design standards for, aircraft, including standards for the following:
 - (a) cabin crew seats and related equipment;
 - (b) escape devices;
 - (c) access to emergency exits;
 - (d) interior and exterior emergency exit marking;
 - (e) interior and exterior emergency lighting;
 - (f) floor proximity emergency escape paths;
 - (g) over-wing escape routes;
 - (h) materials used in the interior of cabins;
 - (i) symbols identifying emergency exits;
 - (j) landing gear aural warning systems and associated devices.

Note: Subpart 11.J sets out procedures for the issue, amendment and revocation of a Manual of Standards.

Subpart 90.B—General provisions

90.100 Applicability

This Subpart applies to aircraft other than the following:

- (a) balloons;
- (b) airships;
- (c) sailplanes;
- (d) powered sailplanes;
- (e) an aircraft for which any of the following is in force:
 - (i) a special certificate of airworthiness mentioned in regulation 21.186, 21.189 or 21.190;
 - (ii) an experimental certificate;
 - (iii) a special flight permit;
 - (iv) a provisional certificate of airworthiness.

90.105 Flight crew restraints

- (1) The registered operator of an aircraft to which this Subpart applies commits an offence if:
 - (a) the registered operator:
 - (i) operates the aircraft; or
 - (ii) permits a person to operate the aircraft; and
 - (b) a requirement in this regulation is not met while the aircraft is operating.

Penalty: 50 penalty units.

- (2) For a large aeroplane that was originally certificated on or after 1 January 1958, each seat in the flight crew compartment must be fitted with an approved safety harness that meets the requirements in subregulations (4) and (6).
- (3) For any other aircraft, each seat that is:
 - (a) a flight crew seat; or
 - (b) a seat in the front row of seats in the aircraft's cockpit;must be fitted with an approved safety harness that meets the requirements in subregulations (5) and (6).
- (4) For subregulation (2), the safety harness must consist of:
 - (a) an approved symmetrical type harness; or
 - (b) a single shoulder strap harness that was approved and installed before 6 March 1980; or
 - (c) for an aircraft of a type prescribed by the Part 90 Manual of Standards—a single shoulder strap harness.

Regulation 90.110

- (5) For subregulation (3), the safety harness must consist of a lap belt and at least 1 shoulder strap.
 - (6) For subregulations (2) and (3), the safety harness must:
 - (a) allow any flight crew member who is occupying the seat and has the harness correctly fastened to perform his or her functions; and
 - (b) when not in use, be able to be secured so it does not:
 - (i) prevent the proper operation of the aircraft; or
 - (ii) hinder a person in the aircraft if he or she must leave the aircraft in an emergency.
- Source* FARs sections 91.205, 91.521 and 121.311 modified.
- (7) An offence against subregulation (1) is an offence of strict liability.

90.110 Occupant restraints—small aeroplanes

- (1) This regulation applies to a small aeroplane that:
 - (a) is an aircraft to which this Subpart applies; and
 - (b) was manufactured on or after 13 December 1986;other than a multi-engine aeroplane that has 10 or more passenger seats.
- (2) The registered operator of the aeroplane commits an offence if:
 - (a) the registered operator:
 - (i) operates the aeroplane; or
 - (ii) permits a person to operate the aeroplane; and
 - (b) a requirement in subregulation (3) is not met while the aeroplane is operating.

Penalty: 50 penalty units.

- (3) A seat (other than a side-facing seat) in the aeroplane that does not have an approved seat belt and shoulder harness:
 - (a) must not be used during take-off or landing; and
 - (b) must carry a placard to that effect.

Source FARs section 91.205 modified.

- (4) An offence against subregulation (2) is an offence of strict liability.

90.115 Occupant restraints—helicopters

- (1) This regulation applies to a helicopter that:
 - (a) is an aircraft to which this Subpart applies; and
 - (b) was manufactured on or after 17 September 1992.
- (2) The registered operator of the helicopter commits an offence if:
 - (a) the registered operator:
 - (i) operates the helicopter; or
 - (ii) permits a person to operate the helicopter; and

Regulation 90.120

(b) a requirement in this regulation is not met while the helicopter is operating.

Penalty: 50 penalty units.

- (3) A seat in the helicopter that does not have an approved seat belt and shoulder harness:
- (a) must not be used during take-off or landing; and
 - (b) must carry a placard to that effect.
- (4) There must be a means to secure each seat belt and harness when it is not in use so that it does not:
- (a) prevent the proper operation of the helicopter; or
 - (b) hinder a person in the helicopter if he or she must leave the helicopter in an emergency.

Source FARs section 91.205 modified.

- (5) An offence against subregulation (2) is an offence of strict liability.

90.120 Side-facing seats

- (1) The registered operator of an aircraft to which this Subpart applies commits an offence if:
- (a) the registered operator:
 - (i) operates the aircraft; or
 - (ii) permits a person to operate the aircraft; and
 - (b) a requirement in this regulation is not met while the aircraft is operating.

Penalty: 50 penalty units.

- (2) In the aircraft, a side-facing seat that is to be used during take-off or landing must be fitted with:
- (a) an approved lap belt and an energy-absorbing rest that would support the arms, shoulders, head and spine of the occupant during an emergency landing; or
 - (b) an approved safety harness that would prevent the occupant's head being injured by striking an object during an emergency landing.

Source FARs section 121.311 modified.

- (2A) A side-facing seat in the aircraft that is not fitted with an approved lap belt or an approved safety harness as mentioned in subregulation (2):
- (a) must not be used during take-off or landing; and
 - (b) must carry a placard to that effect.
- (3) An offence against subregulation (1) is an offence of strict liability.

90.125 Cabin crew seats

- (1) The registered operator of an aircraft to which this Subpart applies commits an offence if:

Regulation 90.130

- (a) the registered operator:
 - (i) operates the aircraft; or
 - (ii) permits a person to operate the aircraft; and
- (b) while the aircraft is operating, a cabin crew seat or any related equipment does not meet the standard set out in the Part 90 Manual of Standards.

Penalty: 50 penalty units.

Source FARs sections 91.521 and 121.311 modified.

- (2) An offence against subregulation (1) is an offence of strict liability.

90.130 External doors

- (1A) This regulation does not apply in relation to an external door that is only used for cargo.

- (1) The registered operator of an aircraft to which this Subpart applies commits an offence if:
 - (a) the registered operator:
 - (i) operates the aircraft; or
 - (ii) permits a person to operate the aircraft; and
 - (b) a requirement in this regulation is not met while the aircraft is operating.

Penalty: 50 penalty units.

- (2) An external door in the aircraft must be of a kind that can be opened from both inside and outside the aircraft, unless:
 - (a) the aircraft is an unpressurised small aeroplane; and
 - (b) in the aircraft's type design the door can be opened from the inside only.
- (3) The information mentioned in subregulation (4) must be clearly marked:
 - (a) on the inside of each external door; and
 - (b) if an external door can be opened from the outside—on the outside of the external door.
- (4) For subregulation (3), the information is:
 - (a) the location of the handle; and
 - (b) the operating instructions for the handle; and
 - (c) the position of the handle when the door is properly locked, or another way of showing when the door is properly locked.
- (5) In a large aeroplane or a pressurised small aeroplane, the design of an external door that, in use, initially opens outwards must allow for the locking mechanism to be visible from inside the aircraft to check whether the locking pins or latches are fully engaged.
- (6) An external door must also meet the requirements in this Part for an emergency exit.

(7) An offence against subregulation (1) is an offence of strict liability.

90.135 Emergency exits

(1) The registered operator of an aircraft to which this Subpart applies commits an offence if:

- (a) the registered operator:
 - (i) operates the aircraft; or
 - (ii) permits a person to operate the aircraft; and
- (b) a requirement in this regulation is not met while the aircraft is operating.

Penalty: 50 penalty units.

(2) Subject to paragraph (6)(b), each passenger and crew member in the aircraft must have access to at least 1 emergency exit that meets the requirements prescribed by the Part 90 Manual of Standards.

(3) The location of each emergency exit must be marked so that each seated passenger can see the location of the exit nearest to the passenger.

(4) Each passenger compartment in the aircraft must have a sign showing the way to any emergency exit that is not located in the passenger compartment.

(5) Instructions showing how to open the emergency exit must be clearly marked on:

- (a) the inside of each emergency exit; and
- (b) if an emergency exit can be opened from the outside—on the outside of the emergency exit.

(6) If an aircraft has 7 or more seats, including crew seats:

- (a) each emergency exit sign and the instructions for operating each emergency exit must be self-illuminated or provided with lighting so that, if the cabin is in darkness and the cabin lighting is not operating, the sign and instructions can be read by a person attempting to open the emergency exit; and
- (b) subject to regulation 90.215, access to an emergency exit must not be blocked by a seat back, stretcher or other item of equipment fitted to the aircraft unless:
 - (i) the seat back, stretcher or other item of equipment can easily be moved out of the way; and
 - (ii) instructions for moving the seat back, stretcher or other item of equipment are clearly marked on or near the seat, stretcher or item of equipment.

(7) An offence against subregulation (1) is an offence of strict liability.

90.140 Cargo and baggage compartment lighting

(1) The registered operator of an aircraft to which this Subpart applies commits an offence if:

Regulation 90.145

- (a) the registered operator:
 - (i) operates the aircraft; or
 - (ii) permits a person to operate the aircraft; and
- (b) a requirement in subregulation (2) is not met while the aircraft is operating.

Penalty: 50 penalty units.

- (2) If the aircraft has lighting within a cargo or baggage compartment, the lamps:
 - (a) must be protected against the possibility of accidental damage; and
 - (b) must be designed so that any baggage placed adjacent to the lamp is not subjected to excessive heat.
- (3) An offence against subregulation (1) is an offence of strict liability.

90.145 Thermal/acoustic insulation materials

- (1) This regulation applies to a large transport category aeroplane.
- (2) However, this regulation does not apply to an aeroplane of a particular type if a certificate of airworthiness was issued in respect of at least 1 aeroplane of that type before 1 January 1958.
- (3) The registered operator of an aeroplane to which this regulation applies commits an offence if:
 - (a) the registered operator:
 - (i) operates the aeroplane; or
 - (ii) permits a person to operate the aeroplane; and
 - (b) a requirement in this regulation is not met while the aeroplane is operating.

Penalty: 50 penalty units.

- (4) If:
 - (a) the aeroplane was manufactured before 2 September 2005; and
 - (b) thermal/acoustic insulation materials have been installed in the fuselage as replacements on or after 2 September 2005; and
 - (c) the materials are:
 - (i) of a blanket construction; or
 - (ii) installed around air ducting;the materials must meet the flame propagation standards of FARs paragraph 25.856(a), as in force on 2 September 2003.
- (5) If the aeroplane was manufactured on or after 2 September 2005, any thermal/acoustic insulation materials installed in the fuselage must meet the flame propagation standards of FARs paragraph 25.856(a), as in force on 2 September 2003.

Source FARs section 121.312 modified.

- (6) An offence against subregulation (3) is an offence of strict liability.

90.150 Fire extinguishing agents

- (1) The registered operator of an aircraft to which this Subpart applies commits an offence if:
- (a) the registered operator:
 - (i) operates the aircraft; or
 - (ii) permits a person to operate the aircraft; and
 - (b) a fire extinguisher fitted to or carried on the aircraft contains a fire extinguishing agent of a kind prescribed by the Part 90 Manual of Standards.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Part 90 Additional airworthiness requirements

Subpart 90.C Large aeroplanes engaged in air transport operations

Division 90.C.1 General

Regulation 90.200

Subpart 90.C—Large aeroplanes engaged in air transport operations

Division 90.C.1—General

90.200 Applicability

This Subpart applies to large aeroplanes engaged in air transport operations.

Division 90.C.2—Emergency exits

90.205 Escape devices

- (1) The registered operator of a passenger-carrying aeroplane to which this Subpart applies commits an offence if:
 - (a) the registered operator:
 - (i) operates the aeroplane; or
 - (ii) permits a person to operate the aeroplane; and
 - (b) a requirement in this regulation is not met while the aeroplane is operating.

Penalty: 50 penalty units.

- (2) If:
 - (a) the aeroplane has an emergency exit; and
 - (b) the exit:
 - (i) is higher than 1.83 m above the ground when the aeroplane's landing gear is extended; and
 - (ii) is not positioned over the wing;

the aeroplane must be fitted with an escape device to help passengers and members of the crew reach the ground from the aeroplane's cabin in an emergency.
- (3) The escape device must meet the standard for escape devices set out in the Part 90 Manual of Standards.
- (4) However, subregulation (2) does not apply to the rear window emergency exit of a DC-3 aeroplane that is being operated with 35 occupants or fewer.

Source FARs section 121.310 modified.
- (5) An offence against subregulation (1) is an offence of strict liability.

90.210 Location of emergency exits

- (1) This regulation applies to a passenger-carrying aeroplane that:
 - (a) is an aeroplane to which this Subpart applies; and
 - (b) is required under its type certification basis to have 2 or more emergency exits on each side of the fuselage.

Note: For the definition of **type certification basis**, see the Dictionary.

- (2) However, this regulation does not apply to an aeroplane that:
 - (a) was in operation before 16 October 1987; and
 - (b) had an emergency exit configuration installed and approved before 16 October 1987.
- (3) The registered operator of an aeroplane to which this regulation applies commits an offence if:

Regulation 90.215

- (a) the registered operator:
 - (i) operates the aeroplane; or
 - (ii) permits a person to operate the aeroplane; and
- (b) the requirement in subregulation (4) is not met while the aeroplane is operating.

Penalty: 50 penalty units.

- (4) The distance between any 2 adjacent emergency exits that lead from the same deck in the aeroplane must be no more than 18.3 m.
- (5) For subregulation (4), the distance between 2 adjacent emergency exits is measured between the closest edges of the 2 doors, parallel to the aeroplane's longitudinal axis.

Source FARs section 121.310 modified.

- (6) An offence against subregulation (3) is an offence of strict liability.

90.215 Access to emergency exits

- (1) The registered operator of a passenger-carrying aeroplane to which this Subpart applies commits an offence if:
 - (a) the registered operator:
 - (i) operates the aeroplane; or
 - (ii) permits a person to operate the aeroplane; and
 - (b) while the aeroplane is operating, a passageway leading to, or an area providing access to, an emergency exit does not meet the standard for access to emergency exits set out in the Part 90 Manual of Standards.

Penalty: 50 penalty units.

Source FARs section 121.310 modified.

- (2) An offence against subregulation (1) is an offence of strict liability.

90.220 Interior emergency exit marking

- (1) The registered operator of a passenger-carrying aeroplane to which this Subpart applies commits an offence if:
 - (a) the registered operator:
 - (i) operates the aeroplane; or
 - (ii) permits a person to operate the aeroplane; and
 - (b) while the aeroplane is operating, the identification marking for an emergency exit on the aeroplane, or a location sign or instruction for opening such an emergency exit, does not meet the standard for interior emergency exit marking set out in the Part 90 Manual of Standards.

Penalty: 50 penalty units.

Source FARs section 121.310 modified.

- (2) An offence against subregulation (1) is an offence of strict liability.

90.225 Interior emergency lighting

- (1) The registered operator of a passenger-carrying transport category aeroplane to which this Subpart applies commits an offence if:
- (a) the registered operator:
 - (i) operates the aeroplane; or
 - (ii) permits a person to operate the aeroplane; and
 - (b) while the aeroplane is operating, the interior emergency lighting system of the aeroplane does not meet the standard for interior emergency lighting set out in the Part 90 Manual of Standards.

Penalty: 50 penalty units.

Source FARs section 121.310 modified.

- (2) An offence against subregulation (1) is an offence of strict liability.

90.230 Floor proximity emergency escape path

- (1) This regulation applies to a passenger-carrying transport category aeroplane that:
- (a) is an aeroplane to which this Subpart applies; and
 - (b) was originally certificated on or after 1 January 1958; and
 - (c) has 20 or more passenger seats.
- (2) The registered operator of an aeroplane to which this regulation applies commits an offence if:
- (a) the registered operator:
 - (i) operates the aeroplane; or
 - (ii) permits a person to operate the aeroplane; and
 - (b) while the aeroplane is operating, the aeroplane does not have a floor proximity emergency escape path that meets the standard for floor proximity emergency escape paths set out in the Part 90 Manual of Standards.

Penalty: 50 penalty units.

Source FARs section 121.310 modified.

- (3) An offence against subregulation (2) is an offence of strict liability.

90.235 Exterior emergency exit marking

- (1) The registered operator of a passenger-carrying aeroplane to which this Subpart applies commits an offence if:
- (a) the registered operator:
 - (i) operates the aeroplane; or
 - (ii) permits a person to operate the aeroplane; and

Regulation 90.240

- (b) while the aeroplane is operating, the outside of an emergency exit on the aeroplane is not marked so that it meets the standard for exterior emergency exit marking set out in the Part 90 Manual of Standards.

Penalty: 50 penalty units.

Source FARs section 121.310 modified.

- (2) An offence against subregulation (1) is an offence of strict liability.

90.240 Exterior emergency lighting

- (1) The registered operator of a passenger-carrying transport category aeroplane to which this Subpart applies commits an offence if:
 - (a) the registered operator:
 - (i) operates the aeroplane; or
 - (ii) permits a person to operate the aeroplane; and
 - (b) while the aeroplane is operating, an over-wing exit on the aeroplane, or an escape device fitted to the aeroplane for regulation 90.205, is not fitted with an exterior emergency lighting system that meets the standard for exterior emergency lighting set out in the Part 90 Manual of Standards.

Penalty: 50 penalty units.

Source FARs section 121.310 modified.

- (2) An offence against subregulation (1) is an offence of strict liability.

90.245 Over-wing escape routes

- (1) The registered operator of a passenger-carrying aeroplane to which this Subpart applies commits an offence if:
 - (a) the registered operator:
 - (i) operates the aeroplane; or
 - (ii) permits a person to operate the aeroplane; and
 - (b) while the aeroplane is operating, an over-wing emergency exit on the aeroplane does not have an over-wing escape route that meets the standard for over-wing escape routes set out in the Part 90 Manual of Standards.

Penalty: 50 penalty units.

Source FARs section 121.310 modified.

- (2) An offence against subregulation (1) is an offence of strict liability.

Division 90.C.3—Fire protection

90.250 Cabin interiors—materials

- (1) This regulation applies to a transport category aeroplane that:
 - (a) is an aeroplane to which this Subpart applies; and
 - (b) has 20 or more passenger seats.
- (2) The registered operator of the aeroplane commits an offence if:
 - (a) the registered operator:
 - (i) operates the aeroplane; or
 - (ii) permits a person to operate the aeroplane; and
 - (b) while the aeroplane is operating, the materials used in the interior of the cabin of the aeroplane do not meet the standard for cabin interiors set out in the Part 90 Manual of Standards.

Penalty: 50 penalty units.

Source FARs section 121.312 modified.

- (3) Subregulation (2) does not apply to a material used for a passenger seat cushion in an aeroplane to which regulation 90.255 applies.
- (4) An offence against subregulation (2) is an offence of strict liability.

90.255 Seat cushions—materials

- (1) This regulation applies to a transport category aeroplane that:
 - (a) is an aeroplane to which this Subpart applies; and
 - (b) has 31 or more passenger seats; and
 - (c) was originally certificated on or after 1 January 1958.
- (2) The registered operator of the aeroplane commits an offence if:
 - (a) the registered operator:
 - (i) operates the aeroplane; or
 - (ii) permits a person to operate the aeroplane; and
 - (b) while the aeroplane is operating, a seat cushion, other than a flight crew seat cushion, in the aeroplane does not comply with FARs paragraph 25.853(c), as in force on 26 November 1984.

Penalty: 50 penalty units.

Source FARs section 121.312 modified.

- (3) An offence against subregulation (2) is an offence of strict liability.

90.260 Cargo compartment liners—materials

- (1) This regulation applies to a transport category aeroplane that:
-

Regulation 90.265

- (a) is an aeroplane to which this Subpart applies; and
 - (b) was originally certificated on or after 1 January 1958.
- (2) The registered operator of the aeroplane commits an offence if:
- (a) the registered operator:
 - (i) operates the aeroplane; or
 - (ii) permits a person to operate the aeroplane; and
 - (b) a requirement in subregulation (3) is not met while the aeroplane is operating.

Penalty: 50 penalty units.

- (3) If the aeroplane has a Class C cargo or baggage compartment, or a Class D cargo or baggage compartment, larger than 5.66 m³, the ceiling and wall liner panels of the compartment must be:
- (a) constructed of glass fibre reinforced resin; or
 - (b) constructed of 1 or more materials that meet:
 - (i) the flame penetration test requirements of FARs Part 25, Appendix F, Part III, as in force on 16 June 1986; or
 - (ii) another approved test; or
 - (c) an aluminium liner installation approved before 20 March 1989.

Source FARs section 121.314 modified.

- (4) An offence against subregulation (2) is an offence of strict liability.

90.265 Cargo compartments for aeroplanes engaged in scheduled air transport operations

- (1) This regulation applies to a transport category aeroplane that:
- (a) is an aeroplane to which this Subpart applies; and
 - (b) was originally certificated on or after 1 January 1958; and
 - (c) is engaged in scheduled air transport operations.
- (2) The registered operator of the aeroplane commits an offence if:
- (a) the registered operator:
 - (i) operates the aeroplane; or
 - (ii) permits a person to operate the aeroplane; and
 - (b) a requirement in subregulation (3) is not met while the aeroplane is operating.

Penalty: 50 penalty units.

- (3) If the aeroplane has a Class D cargo or baggage compartment, the compartment must meet:
- (a) for a passenger-carrying aeroplane—the standards for a Class C cargo or baggage compartment set out in FARs paragraph 25.857(c) and section 25.858; or

- (b) for any other aeroplane—the standards for a Class E cargo compartment set out in FARs paragraph 25.857(e).

Source FARs section 121.314 modified.

- (4) An offence against subregulation (2) is an offence of strict liability.

90.270 Toilets

- (1) The registered operator of a passenger-carrying aeroplane to which this Subpart applies commits an offence if:
- (a) the registered operator:
 - (i) operates the aeroplane; or
 - (ii) permits a person to operate the aeroplane; and
 - (b) a requirement in this regulation is not met while the aeroplane is operating.

Penalty: 50 penalty units.

- (2) Both sides of the door of each toilet in the aeroplane must have, installed above the door knob or near the door, a placard showing:
- (a) the words ‘NO SMOKING IN TOILET’ or ‘NO SMOKING’; or
 - (b) a symbol with the same meaning.
- (2A) Each waste receptacle in each toilet in an aeroplane must have installed, on or near the waste receptacle, a placard showing:
- (a) the words ‘NO CIGARETTE DISPOSAL’; or
 - (b) a symbol with the same meaning.
- (3) Each toilet in an aeroplane that has 20 or more passenger seats must be fitted with:
- (a) a smoke detector that gives a warning signal that can be seen or heard by a flight crew member or cabin crew member; and
 - (b) 1 or more fire extinguishers that will, in the event of a fire in a waste receptacle in the toilet, discharge into the receptacle.

Source FARs section 121.308 modified.

- (4) An offence against subregulation (1) is an offence of strict liability.

90.275 Thermal/acoustic insulation materials

- (1) This regulation applies to a transport category aeroplane that:
- (a) is an aeroplane to which this Subpart applies; and
 - (b) was manufactured on or after 2 September 2009; and
 - (c) has 20 or more passenger seats; and
 - (d) is engaged in scheduled air transport operations.
- (2) However, this regulation does not apply to an aeroplane of a particular type if a certificate of airworthiness was issued in respect of at least 1 aeroplane of that type before 1 January 1958.

Part 90 Additional airworthiness requirements

Subpart 90.C Large aeroplanes engaged in air transport operations

Division 90.C.3 Fire protection

Regulation 90.275

- (3) The registered operator of an aeroplane to which this regulation applies commits an offence if:
- (a) the registered operator:
 - (i) operates the aeroplane; or
 - (ii) permits a person to operate the aeroplane; and
 - (b) while the aeroplane is operating, any thermal/acoustic insulation materials installed in the lower half of the aeroplane's fuselage do not meet the flame penetration resistance standards of FARs paragraph 25.856(b), as in force on 2 September 2003.

Penalty: 50 penalty units.

Source FARs section 121.312 modified.

- (4) An offence against subregulation (3) is an offence of strict liability.

Division 90.C.4—Systems and equipment

90.280 Seats

- (1) This regulation applies to a transport category aeroplane that:
 - (a) is an aeroplane to which this Subpart applies; and
 - (b) was originally certificated on or after 1 January 1958; and
 - (c) is manufactured on or after 27 October 2009; and
 - (d) is engaged in scheduled air transport operations.
- (2) The registered operator of the aeroplane commits an offence if:
 - (a) the registered operator:
 - (i) operates the aeroplane; or
 - (ii) permits a person to operate the aeroplane; and
 - (b) while the aeroplane is operating, a seat for a passenger or cabin crew member does not meet the standards of FARs section 25.562, as in force on 16 June 1988.

Penalty: 50 penalty units.

Source FARs section 121.311 modified.

- (3) An offence against subregulation (2) is an offence of strict liability.

90.285 Pitot heat indication systems

- (1) This regulation applies to a turbine-powered transport category aeroplane that:
 - (a) is an aeroplane to which this Subpart applies; and
 - (b) has a flight instrument pitot heating system; and
 - (c) is engaged in scheduled air transport operations.
- (2) The registered operator of the aeroplane commits an offence if:
 - (a) the registered operator:
 - (i) operates the aeroplane; or
 - (ii) permits a person to operate the aeroplane; and
 - (b) a requirement in this regulation is not met while the aeroplane is operating.

Penalty: 50 penalty units.

- (3) The aeroplane must have an indication system to indicate to the flight crew if the flight instrument pitot heating system is not operating.
- (4) The indication system must comply with the following requirements:
 - (a) the indication system must incorporate an amber light that is in clear view of a flight crew member;
 - (b) the indication system must be designed to alert the flight crew if either of the following conditions exists:
 - (i) the flight instrument pitot heating system is switched off;

Part 90 Additional airworthiness requirements

Subpart 90.C Large aeroplanes engaged in air transport operations

Division 90.C.4 Systems and equipment

Regulation 90.290

- (ii) the flight instrument pitot heating system is switched on and any pitot tube heating element is inoperative.

Source FARs section 121.342 modified.

- (5) An offence against subregulation (2) is an offence of strict liability.

90.290 Landing gear aural warning systems

- (1) The registered operator of an aeroplane to which this Subpart applies, other than an aeroplane that complies with FARs section 25.729 as in force on 6 January 1992, commits an offence if:
 - (a) the registered operator:
 - (i) operates the aeroplane; or
 - (ii) permits a person to operate the aeroplane; and
 - (b) while the aeroplane is operating, the aeroplane does not have a landing gear aural warning system and associated devices that meet the standard for landing gear aural warning systems and associated devices set out in the Part 90 Manual of Standards.

Penalty: 50 penalty units.

Source FARs section 121.289 modified.

- (2) An offence against subregulation (1) is an offence of strict liability.

Subpart 90.D—Small aeroplanes engaged in air transport operations

90.400 Applicability

This Subpart applies to small aeroplanes engaged in air transport operations.

90.405 Cargo and baggage compartments

- (1) The registered operator of an aeroplane that has 10 or more passenger seats and to which this Subpart applies commits an offence if:
 - (a) the registered operator:
 - (i) operates the aeroplane; or
 - (ii) permits a person to operate the aeroplane; and
 - (b) a requirement in this regulation is not met while the aeroplane is operating.

Penalty: 50 penalty units.

- (2) Each compartment for cargo, baggage or both (*goods*) in the aeroplane must:
 - (a) display a placard showing the maximum load for which the compartment has been designed; and
 - (b) have a means to prevent goods creating a hazard by shifting, or by damaging the aeroplane; and
 - (c) have a means to restrain goods to protect the aeroplane's occupants from injury in the event of the aeroplane being subjected to a forward inertial load of up to 9 g when the compartment is carrying the maximum weight of goods.
- (3) If goods are in the passenger compartment of the aeroplane, the compartment must have a means to prevent the passengers being injured by the goods during the emergency landing conditions mentioned in the aeroplane's type certification basis.

Source FARs Part 135 Appendix A modified.

- (4) An offence against subregulation (1) is an offence of strict liability.

90.410 Emergency exits

- (1) This regulation applies to an aeroplane that:
 - (a) is an aeroplane to which this Subpart applies; and
 - (b) has 10 or more passenger seats; and
 - (c) is engaged in scheduled air transport operations.
- (2) The registered operator of the aeroplane commits an offence if:
 - (a) the registered operator:
 - (i) operates the aeroplane; or

Regulation 90.415

- (ii) permits a person to operate the aeroplane; and
- (b) while the aeroplane is operating, the aeroplane's emergency exits do not meet the standard for emergency exits set out in the Part 90 Manual of Standards.

Penalty: 50 penalty units.

Source FARs Part 135 Appendix A modified.

- (3) An offence against subregulation (2) is an offence of strict liability.

90.415 Landing gear aural warning systems

- (1) This regulation applies to an aeroplane that:
 - (a) is an aeroplane to which this Subpart applies; and
 - (b) has 10 or more passenger seats; and
 - (c) has wing flaps and retractable landing gear; and
 - (d) is not an amphibian.
- (2) The registered operator of the aeroplane commits an offence if:
 - (a) the registered operator:
 - (i) operates the aeroplane; or
 - (ii) permits a person to operate the aeroplane; and
 - (b) while the aeroplane is operating, the aeroplane does not have a landing gear aural warning system and associated devices that meet the standard for landing gear aural warning systems and associated devices set out in the Part 90 Manual of Standards.

Penalty: 50 penalty units.

Source FARs Part 135 Appendix A modified.

- (3) An offence against subregulation (2) is an offence of strict liability.

Subpart 90.E—Helicopters engaged in scheduled air transport operations

90.600 Applicability

This Subpart applies to helicopters engaged in scheduled air transport operations.

90.605 Emergency exits

- (1) The registered operator of a helicopter to which this Subpart applies commits an offence if:
 - (a) the registered operator:
 - (i) operates the helicopter; or
 - (ii) permits a person to operate the helicopter; and
 - (b) a requirement in this regulation is not met while the helicopter is operating.

Penalty: 50 penalty units.

- (2) Each emergency exit must be marked so that its location can be seen from a distance equal to the width of the cabin.
- (3) There must be a sign on or near each exit that:
 - (a) shows the location of the exit handle; and
 - (b) gives the operating instructions for the handle; and
 - (c) can be read by a person attempting to open the exit.
- (4) The light for each emergency exit sign must:
 - (a) operate independently of the helicopter's main lighting system; and
 - (b) be able to be switched on manually; and
 - (c) remain illuminated when the helicopter makes an emergency landing, regardless of whether the light switches on automatically or must be switched on manually.
- (5) The outside of the fuselage must be marked to show:
 - (a) each emergency exit; and
 - (b) if an exit can be opened from outside—the means by which it can be opened.
- (6) An offence against subregulation (1) is an offence of strict liability.

Part 91—General operating and flight rules

Table of contents

Subpart 91.A—Preliminary

- 91.005 Application of Part 91—Australian aircraft in Australian territory
- 91.010 Application of Part 91—Australian aircraft in foreign countries
- 91.015 Application of Part 91—Australian aircraft over the high seas
- 91.020 Application of Part 91—foreign registered aircraft
- 91.025 Application of Part 91—foreign state aircraft
- 91.030 Application of Part 91—aircraft to which Part 101, 103 or 131 applies
- 91.035 Application of Part 91—certain provisions of this Part do not apply if provisions of Part 105, 121, 133, 135 or 138 apply
- 91.040 Issue of Manual of Standards for Part 91
- 91.045 Approvals by CASA for Part 91
- 91.050 Approvals by authorised persons for Subpart 91.T

Subpart 91.C—General

Division 91.C.1—General flight limitations

- 91.055 Aircraft not to be operated in manner that creates a hazard
- 91.060 Unauthorised travel or placing of cargo on aircraft
- 91.085 NVIS flights
- 91.090 All flights—airspeed limits

Division 91.C.2—Operational documents

- 91.095 Compliance with flight manual etc.

Division 91.C.3—Flight related documents

- 91.100 Electronic documents
- 91.105 Carriage of documents
- 91.110 Carriage of documents for certain flights
- 91.115 Carriage of documents—flights that begin or end outside Australian territory
- 91.120 Journey logs—flights that begin or end outside Australian territory

Division 91.C.4—Reporting and recording defects and incidents etc.

Division 91.C.5—Search and rescue services and emergency and survival equipment

Division 91.C.6—Miscellaneous requirements for aircraft

- 91.140 Operating an Australian aircraft outside Australia
- 91.145 Requirements to be met before Australian aircraft may fly
- 91.150 Operating aircraft with inoperative equipment—placarding
- 91.155 Manipulating flight controls

Division 91.C.7—Firearms on aircraft

- 91.160 Possessing firearm on aircraft
-

91.165 Discharging firearm on aircraft

Division 91.C.8—Portable electronic devices

91.170 Operation of portable electronic devices
91.175 Operation of portable electronic devices by crew members

Division 91.C.9—Special flight operations

91.180 Air displays in Australian territory
91.185 Conducting aerobatic manoeuvres
91.190 Dropping things from aircraft
91.195 Picking up or setting down people or things during flight
91.200 Persons not to be carried in certain parts of aircraft
91.205 Flying in formation
91.210 Towing of things by aircraft

Subpart 91.D—Operational procedures

Division 91.D.1—Operational control

91.215 Authority and responsibilities of pilot in command
91.220 Actions and directions by operator or pilot in command
91.225 Crew members—power of arrest

Division 91.D.2—Flight preparation

91.230 Flight preparation (weather assessments) requirements
91.235 Flight preparation (alternate aerodromes) requirements

Division 91.D.3—Flight notifications and pre-flight checks

91.240 Flight notifications
91.245 Matters to be checked before take-off

Division 91.D.4—Flight rules

Subdivision 91.D.4.1—General

91.255 Air traffic services—prescribed requirements
91.257 Air traffic control clearances and instructions
91.260 Unauthorised entry into prohibited or restricted areas
91.263 Air defence identification zone flights
91.265 Minimum height rules—populous areas and public gatherings
91.267 Minimum height rules—other areas
91.270 Aircraft to be flown under VFR or IFR

Subdivision 91.D.4.2—Visual flight rules

91.273 VFR flights
91.275 Specified VFR cruising levels
91.277 Minimum heights—VFR flights at night
91.280 VFR flights—compliance with VMC criteria
91.283 VFR flights—aircraft not to exceed certain speeds
91.285 VFR flights—flights in class A airspace

Subdivision 91.D.4.3—Instrument flight rules

- 91.287 IFR flights
- 91.290 Specified IFR cruising levels
- 91.295 IFR flights at non-specified cruising levels—notifying Air Traffic Services
- 91.300 IFR flights at non-specified cruising levels—avoiding collisions with aircraft conducting VFR flights
- 91.305 Minimum heights—IFR flights
- 91.307 IFR take-off and landing minima
- 91.310 Approach ban for IFR flights
- 91.315 Taking off and landing in low visibility
- 91.320 Specified aircraft performance categories

Subdivision 91.D.4.4—Avoiding collisions in the air

- 91.325 Basic rule
- 91.330 Right of way rules
- 91.335 Additional right of way rules
- 91.340 Right of way rules for take-off and landing

Subdivision 91.D.4.5—Avoiding collisions on water

- 91.345 Compliance with International Regulations
- 91.350 Giving way to vessels
- 91.355 Giving way on water

Subdivision 91.D.4.6—Avoiding collisions at or in the vicinity of aerodromes

- 91.360 Meaning of *in the vicinity of a non-controlled aerodrome*
- 91.365 Taxiing or towing on movement area of aerodrome
- 91.370 Take-off or landing at non-controlled aerodrome—all aircraft
- 91.375 Operating on manoeuvring area, or in the vicinity, of non-controlled aerodrome—general requirements
- 91.380 Operating on manoeuvring area, or in the vicinity, of non-controlled aerodrome—landing and taking off into the wind
- 91.385 Operating on manoeuvring area, or in the vicinity, of non-controlled aerodrome—requirements that apply after joining the circuit pattern
- 91.390 Operating on manoeuvring area, or in the vicinity, of non-controlled aerodrome—requirements related to maintaining the same track after take-off
- 91.395 Straight-in approaches at non-controlled aerodromes
- 91.400 Communicating at certified, registered, military or designated non-controlled aerodromes
- 91.405 Aircraft in aerodrome traffic at controlled aerodromes

Division 91.D.5—Taking off, landing and ground operations

- 91.410 Use of aerodromes
- 91.415 Taxiing aircraft
- 91.420 Parked aircraft not to create hazard
- 91.425 Safety when aeroplane operating on ground
- 91.430 Safety when rotorcraft operating on ground

Division 91.D.6—Fuel requirements

- 91.455 Fuel requirements
- 91.460 Oil requirements

-
- 91.465 Contaminated, degraded or inappropriate fuels
 - 91.470 Fire hazards
 - 91.475 Fuelling aircraft—fire fighting equipment
 - 91.480 Fuelling aircraft—electrical bonding
 - 91.485 Equipment or electronic devices operating near aircraft
 - 91.490 Fuelling turbine-engine aircraft—low-risk electronic devices
 - 91.495 Only turbine-engine aircraft to be hot fuelled
 - 91.500 Hot fuelling aircraft—general
 - 91.505 Hot fuelling aircraft—procedures etc.
 - 91.510 Fuelling aircraft—persons on aircraft, boarding or disembarking
 - 91.515 Fuelling aircraft if fuel vapour detected

Division 91.D.7—Safety of persons on aircraft and cargo requirements

- 91.520 Crew members to be fit for duty
- 91.525 Offensive or disorderly behaviour on aircraft
- 91.530 When smoking not permitted
- 91.535 Crew safety during turbulence
- 91.540 Means of passenger communication
- 91.545 Seating for persons on aircraft
- 91.550 Seating for flight crew members
- 91.555 Seating for crew members other than flight crew members
- 91.560 Restraint of infants and children
- 91.565 Passengers—safety briefings and instructions
- 91.570 Passengers—safety directions by pilot in command
- 91.575 Passengers—compliance with safety directions
- 91.580 Passengers—compliance with safety instructions by cabin crew
- 91.585 Restraint and stowage of cargo
- 91.590 Restraint and stowage of carry-on baggage
- 91.595 Restraint and stowage of certain aircraft equipment
- 91.600 Carriage of cargo—general
- 91.605 Carriage of cargo—cargo compartments
- 91.610 Carriage of cargo—unoccupied seats
- 91.615 Carriage of cargo—loading instructions
- 91.620 Carriage of animals

Division 91.D.8—Instruments, indicators, equipment and systems

- 91.625 Use of radio—qualifications
- 91.630 Use of radio—broadcasts and reports
- 91.635 Communication monitoring in controlled airspaces
- 91.640 Use of radio outside controlled airspaces—listening watch of radio transmissions
- 91.645 Availability of instructions for flight data and combination recorders
- 91.650 Flight recorders—preserving recordings of immediately reportable matters
- 91.655 RVSM airspace
- 91.660 Performance-based navigation

Division 91.D.9—Miscellaneous**Division 91.D.10—Signals, emergencies and hazards**

- 91.670 Standard visual signals
 - 91.675 Pilot in command to report hazards to air navigation
-

- 91.680 Pilot in command to report emergencies
- 91.685 Multi-engine aircraft—pilot in command to land at nearest suitable aerodrome if emergency occurs
- 91.690 Pilot in command to report contraventions relating to emergencies
- 91.695 Interception of aircraft
- 91.700 Aviation distress signals
- 91.705 Flight in icing conditions—adherence of frost, ice or snow
- 91.710 Flight in icing conditions—requirements for flight

Division 91.D.11—Causing or simulating failures etc.

Subdivision 91.D.11.1—Causing or simulating instrument failure etc.

- 91.715 Causing or simulating failure of flight instruments
- 91.720 Simulating IMC flying
- 91.725 Training flight limitations etc.

Subdivision 91.D.11.2—Causing or simulating engine failure etc. for aeroplanes

- 91.730 Aeroplane flights in IMC or at night—engine not to be shut down
- 91.735 Single-engine aeroplane—VFR flights by day—engine not to be shut down
- 91.740 Single-engine aeroplane—simulating engine failure in IMC or at night
- 91.745 Multi-engine aeroplane—simulating engine failure—general
- 91.750 Multi-engine aeroplane—simulating engine failures in IMC or at night

Subdivision 91.D.11.3—Causing or simulating engine failure etc. for rotorcraft

- 91.755 Single-engine rotorcraft—engine not to be shut down
- 91.760 Single-engine rotorcraft—engine failure not to be simulated and autorotation of main rotor system not to be initiated in IMC
- 91.765 Single-engine rotorcraft—simulating engine failure or initiating autorotation of main rotor system at night
- 91.770 Multi-engine rotorcraft—engine not to be shut down at certain altitudes in IMC or at night
- 91.775 Multi-engine rotorcraft—simulating engine failure in IMC or at night

Division 91.D.12—Psychoactive substances

- 91.780 Passengers—alcohol
- 91.785 Crew—provision of alcohol
- 91.790 Prohibiting person affected by psychoactive substances from boarding

Subpart 91.F—Performance

- 91.795 Take-off performance
- 91.800 Landing performance

Subpart 91.J—Weight and balance

- 91.805 Loading of aircraft

Subpart 91.K—Equipment

- 91.810 Requirements relating to equipment

Subpart 91.P—Cabin crew

- 91.820 Cabin crew—when required
-

-
- 91.825 Cabin crew—number
91.830 Cabin crew—knowledge of emergency and safety equipment and procedures

Subpart 91.T—Operations under certain special certificates of airworthiness and special flight permits

Division 91.T.1—Preliminary

- 91.835 Aircraft with more than one certificate of airworthiness—application of Subpart 91.T

Division 91.T.2—Restricted category aircraft—operating requirements

- 91.840 Restricted category aircraft—general operating requirements
91.845 Restricted category aircraft—kinds of operations permitted

Division 91.T.3—Provisionally certificated aircraft—operating requirements

- 91.850 Provisionally certificated aircraft—operating requirements
91.855 Provisionally certificated aircraft—kinds of operations permitted
91.860 Provisionally certificated aircraft—operation for type certification or supplemental type certification
91.865 Provisionally certificated aircraft—requirements for the carriage of people
91.870 Provisionally certificated aircraft—additional requirements for operators

Division 91.T.4—Experimental aircraft—operating requirements

- 91.875 Experimental aircraft—operating requirements
91.880 Experimental aircraft—kinds of operations permitted
91.885 Experimental aircraft—maximum number of persons to be carried

Division 91.T.5—Primary category aircraft and intermediate category aircraft—operating requirements

- 91.890 Primary category aircraft and intermediate category aircraft—operating requirements

Division 91.T.6—Light sport aircraft—operating requirements

- 91.895 Light sport aircraft—operators
91.900 Light sport aircraft—pilots

Division 91.T.7—Special flight permits—operating requirements

91.965 Foreign registered aircraft—Chicago Convention

91.970 Foreign registered aircraft—special flight authorisations

91.975 Foreign state aircraft—approval to fly in Australian territory

91.980 Foreign registered aircraft—major defect—CASA direction

91.985 Foreign registered aircraft—CASA to notify Contracting State of direction

91.990 Foreign registered aircraft—CASA may revoke direction

91.995 Foreign registered aircraft—when direction or revocation takes effect

Subpart 91.A—Preliminary

91.005 Application of Part 91—Australian aircraft in Australian territory

This Part applies in relation to the operation of an Australian aircraft in Australian territory.

91.010 Application of Part 91—Australian aircraft in foreign countries

- (1) This Part applies in relation to the operation of an Australian aircraft in a foreign country.
- (2) However, if a law of the foreign country applies to the operation of the aircraft in that country, the law of the foreign country prevails to the extent of any inconsistency.
- (3) For the purposes of subregulation (2), a provision of a law of a foreign country is taken not to be inconsistent with a provision of this Part to the extent that the provisions are capable of operating concurrently.

91.015 Application of Part 91—Australian aircraft over the high seas

- (1) This Part applies in relation to the operation of an Australian aircraft over the high seas.
- (2) Annex 2 of the Chicago Convention also applies in relation to the operation of Australian aircraft over the high seas.
- (3) However, a provision of Annex 2 of the Chicago Convention prevails to the extent of any inconsistency with a provision mentioned in subregulation (1).
- (4) For the purposes of subregulation (3), a provision of Annex 2 of the Chicago Convention is taken not to be inconsistent with a provision mentioned in subregulation (1) to the extent that the provisions are capable of operating concurrently.

91.020 Application of Part 91—foreign registered aircraft

- (1) This Part (other than Division 91.C.3 and Subparts 91.P and 91.T) applies in relation to the operation of a foreign registered aircraft in Australian territory.
- (2) However, this Part does not apply in relation to:
 - (a) a foreign registered aircraft that is operated in Australian territory under a foreign air transport AOC; or
 - (b) a foreign registered aircraft that is operated in Australian territory under a New Zealand AOC with ANZA privileges that is in force for Australia.

Regulation 91.025

91.025 Application of Part 91—foreign state aircraft

A provision of this Part applies in relation to the operation of a state aircraft of a foreign country in Australian territory if the provision is expressed to so apply.

91.030 Application of Part 91—aircraft to which Part 101, 103 or 131 applies

Part 101

- (1) This Part does not apply in relation to the operation of an aircraft if any provision of Part 101 applies to the operation.

Part 103

- (2) The following provisions of this Part do not apply to the operation of a Part 103 aircraft:
- (a) regulation 91.105;
 - (b) regulations 91.110 and 91.115;
 - (c) regulation 91.145;
 - (d) regulation 91.190;
 - (e) regulation 91.267;
 - (h) regulations 91.425 and 91.430;
 - (i) regulations 91.545 and 91.550;
 - (j) regulation 91.560;
 - (k) regulations 91.570 and 91.575;
 - (l) regulation 91.585;
 - (m) regulations 91.590 to 91.615;
 - (o) regulations 91.720 and 91.725;
 - (p) regulations 91.780 and 91.785;
 - (q) Subpart 91.K;
 - (r) regulation 91.915.

- (2A) If Part 103 does not apply to the operation of a touring motor glider because of the operation of subregulation 103.005(2A), then, despite subregulation (2) of this regulation, the provisions mentioned in subregulation (2) of this regulation apply to the operation of the touring motor glider.

Part 131

- (3) The following provisions of this Part do not apply to the operation of a Part 131 aircraft:
- (a) Division 91.C.3;
 - (b) regulation 91.190;
 - (c) Divisions 91.D.2 and 91.D.3;
 - (d) regulation 91.255;
 - (da) regulation 91.265;
 - (db) regulation 91.267;

Regulation 91.035

- (dc) Subdivisions 91.D.4.2 and 91.D.4.3;
- (e) regulation 91.335;
- (f) regulation 91.355;
- (g) Subdivision 91.D.4.6 (other than regulation 91.360);
- (i) regulation 91.455;
- (j) regulation 91.480;
- (k) regulation 91.510;
- (l) regulation 91.515;
- (m) Division 91.D.7 (other than regulations 91.520, 91.525, 91.600 and 91.620);
- (ma) regulation 91.630;
- (mb) regulation 91.725;
- (n) Subpart 91.F;
- (o) Subpart 91.J;
- (p) Subpart 91.K;
- (q) Subpart 91.P.

91.035 Application of Part 91—certain provisions of this Part do not apply if provisions of Part 105, 121, 133, 135 or 138 apply

- (1) A provision of Part 91 listed in column 1 of an item in the following table does not apply to an operation of an aircraft if a provision of Part 105, 121, 133, 135 or 138 listed in column 2 of that item applies to the operation.

Provisions of this Part that do not apply if provisions of Part 105, 121, 133, 135 or 138 apply

(2) Subregulation (1) has effect despite any other provision of this Part.

91.040 Issue of Manual of Standards for Part 91

For the purposes of subsection 98(5A) of the Act, CASA may issue a Manual of Standards for this Part prescribing matters:

- (a) required or permitted by these Regulations to be prescribed by the Part 91 Manual of Standards; or
- (b) necessary or convenient to be prescribed for carrying out or giving effect to this Part.

Regulation 91.045

Note: A Manual of Standards is a legislative instrument: see subsection 98(5AA) of the Act.

91.045 Approvals by CASA for Part 91

- (1) If a provision of this Part, or of the Part 91 Manual of Standards, refers to a person holding an approval under this regulation, a person may apply to CASA, in writing, for the approval.
- (2) Subject to regulation 11.055, the approval must be granted.
- (3) Subregulation 11.055(1B) applies to the granting of an approval under this regulation.
- (4) For the purposes of regulations 91.200, 91.320, 91.510, 91.600, 91.655 and 91.745, the operator of an aircraft is taken to hold an approval under this regulation for an activity if the activity is authorised under:
 - (a) the operator's AOC or another civil aviation authorisation held by the operator; or
 - (b) if the operator is required under these Regulations to have an exposition or operations manual—the exposition or operations manual.
- (5) For the purposes of regulations 91.860, 91.865, 91.870, 91.875, 91.885 and 91.920, the operator of an aircraft is taken to hold an approval under this regulation for an activity if the activity is authorised under another civil aviation authorisation held by the operator.

91.050 Approvals by authorised persons for Subpart 91.T

- (1) If a provision of Subpart 91.T refers to a person holding an approval under this regulation, a person may apply to an authorised person, in writing, for the approval.
- (2) Subject to regulation 11.055, the approval must be granted.
- (3) Subregulation 11.055(1B) applies to the granting of an approval under this regulation.

Subpart 91.C—General

Division 91.C.1—General flight limitations

91.055 Aircraft not to be operated in manner that creates a hazard

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if the aircraft is operated in a manner that creates a hazard to another aircraft, a person or property.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.060 Unauthorised travel or placing of cargo on aircraft

- (1) A person contravenes this subregulation if the person:
 - (a) travels on an aircraft for a flight; and
 - (b) at the time of the travel, does not have the consent of the operator of the aircraft, or the pilot in command of the aircraft for the flight, to travel on the aircraft.
- (2) A person contravenes this subregulation if the person:
 - (a) places cargo on an aircraft for a flight; and
 - (b) at the time of placing the cargo on the aircraft, does not have the consent of the operator of the aircraft, or the pilot in command of the aircraft for the flight, to place cargo on the aircraft.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

91.085 NVIS flights

- (1) The Part 91 Manual of Standards may prescribe requirements relating to the conduct of an NVIS flight.
- (2) The pilot in command of an aircraft for an NVIS flight contravenes this subregulation if a requirement mentioned in subregulation (1) is not met for the flight.

Note: This regulation does not apply to the operation of an aircraft if regulation 133.265 or 138.350 applies to the operation: see regulation 91.035.

- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

91.090 All flights—airspeed limits

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if, during the flight, the aircraft is not flown in accordance with the airspeed limits for the flight prescribed by the Part 91 Manual of Standards.
- (2) A person commits an offence if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Regulation 91.095

Division 91.C.2—Operational documents

Note: This Division does not apply to the operation of an aircraft if regulation 133.030 or 138.210 applies to the operation: see regulation 91.035.

91.095 Compliance with flight manual etc.

- (1) This regulation applies in relation to the operation of an aircraft during the following period:
 - (a) from the earlier of:
 - (i) the time the aircraft's doors are closed before take-off; and
 - (ii) the time the flight begins;
 - (b) to the later of:
 - (i) the time the aircraft's doors are opened after landing; and
 - (ii) the time the flight ends.
- (2) The pilot in command of the aircraft contravenes this subregulation if the pilot in command does not comply with either or both of the following:
 - (a) the aircraft flight manual instructions for the aircraft;
 - (b) any conditions specified in the aircraft's certificate of airworthiness or special flight permit.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Division 91.C.3—Flight related documents

Note: This Division does not apply to the operation of an aircraft if Division 121.C.3, 133.C.3 or 135.C.3 applies to the operation: see regulation 91.035.

91.100 Electronic documents

To avoid doubt, if a document is required to be carried on a flight of an aircraft under this Division, that requirement is taken to be satisfied if an electronic copy of the document is carried on the flight.

Note: Electronic copies may not satisfy the requirements of the law of a foreign country for flights that begin or end at an aerodrome outside Australian territory.

91.105 Carriage of documents

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if, when the aircraft begins the flight, a document mentioned in subregulation (2) is not carried on the aircraft.
- (2) The documents are as follows:
 - (a) for each flight crew member:
 - (i) the member's medical certificate; and
 - (ii) the member's flight crew licence or certificate of validation;
 - (b) for each flight crew member, either:
 - (i) a photographic identification document issued by a Commonwealth, State or Territory authority or agency; or
 - (ii) the member's passport;
 - (c) the aircraft flight manual instructions for the aircraft;
 - (d) if the aircraft is fitted with computerised navigation equipment—the operating instructions for the equipment;
 - (e) any minimum equipment list for the aircraft.
- (3) Subregulation (1) does not apply if:
 - (a) aerobatic manoeuvres will be conducted during the flight; and
 - (b) carriage of the documents on the aircraft would present a risk to the safety of the aircraft or persons on board the aircraft.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 25 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (3): see subsection 13.3(3) of the *Criminal Code*.

91.110 Carriage of documents for certain flights

- (1) This regulation applies in relation to a flight of an aircraft other than:
-

Regulation 91.115

- (a) a VFR flight conducted by day and within 50 nautical miles of the aircraft's point of departure; or
 - (b) a flight conducted:
 - (i) within the flying training area for an aerodrome; and
 - (ii) if the flying training area for the aerodrome is not adjacent to the aerodrome—along the flight path between the flying training area and the aerodrome.
- (2) The pilot in command of an aircraft for a flight contravenes this subregulation if, when the flight begins, a document mentioned in subregulation (3) is not carried on the aircraft.
- (3) The documents are as follows:
- (a) the authorised aeronautical information for the flight;
 - (b) the flight technical log or maintenance release for the aircraft.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 25 penalty units.

91.115 Carriage of documents—flights that begin or end outside Australian territory

- (1) This regulation applies in relation to a flight of an aircraft that begins or ends at an aerodrome outside Australian territory.
- (2) The pilot in command of an aircraft for a flight contravenes this subregulation if, when the flight begins, a document mentioned in subregulation (3) is not carried on the aircraft.
- (3) The documents are as follows:
- (a) the aircraft's certificate of airworthiness;
 - (b) the aircraft's certificate of registration;
 - (c) the journey log for the flight mentioned in regulation 91.120;
 - (d) a list including the name, place of embarkation and place of destination of each passenger on the aircraft;
 - (e) if the aircraft is carrying cargo (other than passenger baggage)—a manifest and detailed declaration of the cargo;
 - (f) if the aircraft has a radio station licence that is an apparatus licence or a class licence—a copy of the licence;
 - (g) if the operator or pilot in command of the aircraft holds an approval under regulation 91.045 or holds another civil aviation authorisation that is relevant to the flight—a copy of the approval or authorisation.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 25 penalty units.

91.120 Journey logs—flights that begin or end outside Australian territory

- (1) This regulation applies to a flight of an aircraft that begins or ends at an aerodrome outside Australian territory.
- (2) The operator and the pilot in command of an aircraft for a flight each contravene this subregulation if:
 - (a) the Part 91 Manual of Standards prescribes requirements relating to maintaining a journey log for the flight; and
 - (b) the requirements are not met for the flight.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 25 penalty units.

Part 91 General operating and flight rules

Subpart 91.C General

Division 91.C.4 Reporting and recording defects and incidents etc.

Division 91.C.4—Reporting and recording defects and incidents etc.

Note: This Division is reserved for future use.

Division 91.C.5—Search and rescue services and emergency and survival equipment

Note: This Division is reserved for future use.

Regulation 91.140

Division 91.C.6—Miscellaneous requirements for aircraft

91.140 Operating an Australian aircraft outside Australia

- (1) The operator and the pilot in command of an Australian aircraft for a flight in a foreign country each contravene this subregulation if:
 - (a) a requirement of a law of the foreign country applies in relation to the flight; and
 - (b) the aircraft is operated in a way that does not comply with the requirement.
- (2) The operator and the pilot in command of an Australian aircraft for a flight over the high seas each contravene this subregulation if:
 - (a) a requirement of Annex 2 of the Chicago Convention applies in relation to the flight; and
 - (b) the aircraft is operated in a way that does not comply with the requirement.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

91.145 Requirements to be met before Australian aircraft may fly

- (1) The pilot in command of an Australian aircraft for a flight contravenes this subregulation if:
 - (a) a requirement in subregulation (2) is not met; and
 - (b) the flight begins.
- (2) The requirements are the following:
 - (a) if the aircraft is required to be registered—the aircraft must be registered;
 - (b) the aircraft must have a certificate of airworthiness or special flight permit;
 - (c) the aircraft must meet the requirements prescribed by the Part 45 Manual of Standards (display of nationality marks, registration marks and aircraft registration identification plates);
 - (d) if Part 42 does not apply to the aircraft:
 - (i) a maintenance release, or other document approved for use under these Regulations as an alternative to a maintenance release, must be in force for the aircraft; and
 - (ii) the flight must comply with any condition that is set out or referred to in the maintenance release or other document approved for use as an alternative to the maintenance release;
 - (e) each flight crew member required under these Regulations for the flight must be on board the aircraft.

Note: CASA or an authorised person may direct that these requirements do not apply to an aircraft with a special flight permit: see regulation 21.197.

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.150 Operating aircraft with inoperative equipment—placarding

- (1) The operator and the pilot in command of an aircraft for a flight each contravene this subregulation if:
- (a) the aircraft begins the flight with inoperative equipment; and
 - (b) the equipment:
 - (i) is required to be fitted to, or carried on, the aircraft by the certification basis for the aircraft or by or under these Regulations; and
 - (ii) is accessible, and likely to be used, by a person during the flight; and
 - (iii) is not placarded as inoperative.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.155 Manipulating flight controls

- (1) A person contravenes this subregulation if, during a flight of an aircraft:
- (a) the person manipulates the flight controls of the aircraft; and
 - (b) any of the following apply:
 - (i) for an Australian aircraft other than a Part 103 aircraft or a Part 131 aircraft—the person is not authorised to pilot the aircraft under Part 61;
 - (ii) for a foreign registered aircraft—the person is not qualified to pilot the aircraft under the law of the aircraft's State of registry or the State of the operator;
 - (iii) for a Part 103 aircraft—the person is not authorised to pilot the aircraft by a Part 103 ASAO;
 - (iv) for a Part 131 aircraft—the person is not authorised to pilot the aircraft by a Part 131 pilot authorisation.
- (2) The pilot in command of an aircraft for a flight contravenes this subregulation if, during the flight:
- (a) the pilot in command permits a person to manipulate the flight controls of the aircraft; and
 - (b) any of the following apply:
 - (i) for an Australian aircraft other than a Part 103 aircraft or a Part 131 aircraft—the person is not authorised to pilot the aircraft under Part 61;
 - (ii) for a foreign registered aircraft—the person is not qualified to pilot the aircraft under the law of the aircraft's State of registry or the State of the operator;

Part 91 General operating and flight rules

Subpart 91.C General

Division 91.C.6 Miscellaneous requirements for aircraft

Regulation 91.155

- (iii) for a Part 103 aircraft—the person is not authorised to pilot the aircraft by a Part 103 ASAO;
 - (iv) for a Part 131 aircraft—the person is not authorised to pilot the aircraft by a Part 131 pilot authorisation.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

Division 91.C.7—Firearms on aircraft

91.160 Possessing firearm on aircraft

- (1) A person contravenes this subregulation if the person:
 - (a) carries or otherwise possesses a firearm on an aircraft; and
 - (b) the aircraft is not a prescribed aircraft within the meaning of the *Aviation Transport Security Act 2004*; and
 - (c) neither the operator nor the pilot in command of the aircraft has consented to the person carrying or otherwise possessing the firearm on the aircraft.
- (2) Subregulation (1) does not apply if the person is authorised (however described) under another provision of these Regulations or another law of the Commonwealth to carry or otherwise possess the firearm on the aircraft.

Note 1: For other provisions of these Regulations that deal with firearms and aircraft, see Part 138.

Note 2: For other laws of the Commonwealth that deal with firearms and aircraft, see:

- (a) Division 3 of Part 4 of the *Aviation Transport Security Act 2004*; and
- (b) section 23 of the *Crimes (Aviation) Act 1991*.

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

91.165 Discharging firearm on aircraft

- (1) A person contravenes this subregulation if the person discharges a firearm while on an aircraft.
- (2) Subregulation (1) does not apply if the person is authorised (however described) under another provision of these Regulations or another law of the Commonwealth to discharge the firearm on the aircraft.

Note 1: For other provisions of these Regulations that deal with firearms and aircraft, see Part 138.

Note 2: For other laws of the Commonwealth that deal with firearms and aircraft, see:

- (a) Division 3 of Part 4 of the *Aviation Transport Security Act 2004*; and
- (b) section 23 of the *Crimes (Aviation) Act 1991*.

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

Division 91.C.8—Portable electronic devices

91.170 Operation of portable electronic devices

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if:
 - (a) the pilot in command permits a person to operate a portable electronic device during the flight; and
 - (b) the pilot in command does not determine that the operation of the device during the flight will not affect the safety of the aircraft.
- (2) A person on an aircraft for a flight contravenes this subregulation if:
 - (a) during the flight, the person operates a portable electronic device; and
 - (b) the person has been directed by the pilot in command, or instructed by a cabin crew member, not to operate the portable electronic device during the flight.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

91.175 Operation of portable electronic devices by crew members

- (1) A crew member for a flight of an aircraft contravenes this subregulation if:
 - (a) the crew member operates a portable electronic device at a time during the flight; and
 - (b) operating the device at that time is likely to distract the crew member from performing the crew member's duties for the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 91.C.9—Special flight operations

91.180 Air displays in Australian territory

- (1) A person contravenes this subregulation if:
 - (a) the person conducts an air display in Australian territory; and
 - (b) the person does not hold an approval under regulation 91.045 to conduct the air display.
- (2) The operator and pilot in command of an aircraft for a flight each contravene this subregulation if:
 - (a) the flight is in an air display in Australian territory; and
 - (b) the person conducting the air display does not hold an approval under regulation 91.045 to conduct the air display.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

91.185 Conducting aerobatic manoeuvres

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if, during the flight, the pilot in command conducts aerobatic manoeuvres in IMC.

Note: For the requirement for a pilot to hold flight activity endorsements to conduct aerobatic manoeuvres, see regulation 61.380 and table 61.1145.

- (2) The pilot in command of an aircraft for a flight contravenes this subregulation if, during the flight:
 - (a) the pilot in command conducts aerobatic manoeuvres:
 - (i) over a populous area; or
 - (ii) at an air display; or
 - (iii) at night; and
 - (b) the pilot in command does not hold an approval under regulation 91.045 to conduct the aerobatic manoeuvres:
 - (i) for a flight over a populous area—over the populous area; or
 - (ii) for a flight at an air display—at the air display; or
 - (iii) for a flight at night—at night.

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

91.190 Dropping things from aircraft

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if, during the flight, a thing is dropped from the aircraft.

Part 91 General operating and flight rules

Subpart 91.C General

Division 91.C.9 Special flight operations

Regulation 91.195

Note: This regulation does not apply to the operation of an aircraft if regulation 138.425 applies to the operation: see regulation 91.035.

- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.195 Picking up or setting down people or things during flight

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if:
- (a) a person or thing is picked up or set down by the aircraft during the flight; and
 - (b) the requirement mentioned in subregulation (2) is not met.

Note: This regulation does not apply to the operation of an aircraft if regulation 138.410 applies to the operation: see regulation 91.035.

- (2) The requirement is that:
- (a) the pilot in command must hold an approval under regulation 91.045 for the person or thing to be picked up or set down during the flight; or
 - (b) another provision of these Regulations must permit the person or thing to be picked up or set down during the flight.

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.200 Persons not to be carried in certain parts of aircraft

- (1) The operator and the pilot in command of an aircraft for a flight each contravene this subregulation if:
- (a) during the flight, a person is carried on or in:
 - (i) a part of the aircraft that is not designed to carry crew members or passengers; or
 - (ii) a thing attached to the aircraft; and
 - (b) neither the operator nor the pilot in command of the aircraft holds an approval under regulation 91.045 to carry the person on or in that part of the aircraft or that thing during the flight.

Note: This regulation does not apply to the operation of an aircraft if regulation 138.410 applies to the operation: see regulation 91.035.

- (2) Subregulation (1) does not apply to the temporary carriage of a crew member in a part of the aircraft that is not designed to accommodate crew members or passengers if:
- (a) the carriage of the crew member in that part of the aircraft is for the purpose of doing anything for the safety of the aircraft or any person or cargo carried in it; or
 - (b) both:

- (i) goods or stores are carried in that part of the aircraft; and
- (ii) there is a proper means of access for crew members to the goods or stores.

- (2A) Subregulation (1) does not apply if:
- (a) the aircraft is being operated to facilitate a parachute descent; and
 - (b) the requirements prescribed by the Part 105 Manual of Standards are met.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2) or (2A): see subsection 13.3(3) of the *Criminal Code*.

91.205 Flying in formation

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if, during the flight:
- (a) the aircraft is flying in formation; and
 - (b) the pilot in command has not pre-arranged with each pilot in command of the other aircraft making up the formation to fly as part of the formation.

Note: For the requirement for a pilot to hold flight activity endorsements to fly in formation, see regulation 61.380 and table 61.1145.

- (1A) Subregulation (1) does not apply if the requirements prescribed by the Part 91 Manual of Standards for the purposes of this subregulation are met in relation to the flight.
- (2) The pilot in command of an aircraft for a flight contravenes this subregulation if, during the flight:
- (a) the aircraft is flown in formation at night; and
 - (b) the pilot in command does not hold an approval under regulation 91.045 to fly in formation at night.
- (3) The pilot in command of an aircraft for a flight contravenes this subregulation if, during the flight:
- (a) the aircraft is flown in formation in IMC; and
 - (b) the pilot in command does not hold an approval under regulation 91.045 to fly in formation in IMC.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1), (2) or (3).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (1A): see subsection 13.3(3) of the *Criminal Code*.

Regulation 91.210

91.210 Towing of things by aircraft

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if, during the flight:
 - (a) a thing is towed by the aircraft; and
 - (b) the requirement mentioned in subregulation (2) is not met.
- (2) The requirement is that:
 - (a) the pilot in command must hold an approval under regulation 91.045 to tow the thing during the flight; or
 - (b) another provision of these Regulations must permit the thing to be towed by the aircraft during the flight.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Subpart 91.D—Operational procedures

Division 91.D.1—Operational control

91.215 Authority and responsibilities of pilot in command

- (1) This regulation applies in relation to the operation of an aircraft during the following period:
 - (a) from the earlier of:
 - (i) the time the aircraft's doors are closed before take-off; and
 - (ii) the time the flight begins;
 - (b) to the later of:
 - (i) the time the aircraft's doors are opened after landing; and
 - (ii) the time the flight ends.
- (2) The pilot in command of the aircraft:
 - (a) has final authority over:
 - (i) the aircraft; and
 - (ii) the maintenance of discipline by all persons on the aircraft; and
 - (b) must ensure:
 - (i) the safety of persons on the aircraft; and
 - (ii) the safety of cargo on the aircraft; and
 - (iii) the safe operation of the aircraft during the flight.

91.220 Actions and directions by operator or pilot in command

- (1) The operator or pilot in command of an aircraft for a flight may do a thing mentioned in subregulation (2) if the operator or pilot in command believes it is necessary for the safety of:
 - (a) the aircraft; or
 - (b) a person on the aircraft; or
 - (c) a person or property on the ground or water.
- (2) The things are as follows:
 - (a) direct a person to do something while the person is on the aircraft;
 - (b) direct a person not to do something, or to limit the doing of something, while the person is on the aircraft;
 - (c) direct a person to leave the aircraft before the flight begins;
 - (d) with such assistance and by the use of such force as is reasonable and necessary:
 - (i) remove a person or a thing from the aircraft before the flight begins; or
 - (ii) restrain a person for the duration of the flight or part of the flight; or

Part 91 General operating and flight rules

Subpart 91.D Operational procedures

Division 91.D.1 Operational control

Regulation 91.225

- (iii) seize a thing on the aircraft for the duration of the flight or part of the flight; or
- (iv) place a person on the aircraft in custody; or
- (v) detain a person or a thing, until the person or thing can be released into the control of an appropriate authority.

Note: Under regulation 91.225, crew members of an aircraft have a limited power of arrest.

- (3) A person on an aircraft contravenes this subregulation if:
 - (a) the operator or pilot in command of the aircraft gives the person a direction mentioned in paragraph (2)(a), (b) or (c); and
 - (b) the person does not comply with the direction.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (3).

Penalty: 50 penalty units.

91.225 Crew members—power of arrest

- (1) A crew member of an aircraft for a flight may, without warrant, arrest a person on the aircraft if:
 - (a) the crew member believes, on reasonable grounds, that the person is committing, is attempting to commit, is about to commit, has committed or has attempted to commit, an offence against the Act or these Regulations in relation to the aircraft; and
 - (b) the purpose of the arrest is to ensure the safety of the aircraft or of its passengers, crew or cargo or otherwise for the purposes of the Act or these Regulations; and
 - (c) if the crew member is not the pilot in command of the aircraft—the pilot in command has authorised the crew member to arrest the person without warrant.
- (2) The pilot in command of the aircraft must ensure that, as soon as practicable after the end of the flight, a person arrested under subregulation (1) is delivered into the custody of:
 - (a) if the flight ends in Australia—a constable; or
 - (b) if the flight ends in a foreign country—a person in that country who is equivalent to a constable.

Note: See also sections 3ZC (use of force in making arrest) and 3ZD (persons to be informed of grounds of arrest) of the *Crimes Act 1914*.

Division 91.D.2—Flight preparation

91.230 Flight preparation (weather assessments) requirements

- (1) The Part 91 Manual of Standards may prescribe requirements relating to flight preparation and weather assessments (the *flight preparation (weather assessments) requirements*).
- (2) The pilot in command of an aircraft for a flight contravenes this subregulation if a flight preparation (weather assessments) requirement is not met for the flight.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

91.235 Flight preparation (alternate aerodromes) requirements

- (1) The Part 91 Manual of Standards may prescribe requirements relating to flight preparation and alternate aerodromes (the *flight preparation (alternate aerodromes) requirements*).
- (2) The pilot in command of an aircraft for a flight contravenes this subregulation if a flight preparation (alternate aerodromes) requirement is not met for the flight.

Note: This regulation does not apply to the operation of an aircraft if regulation 121.170 applies to the operation: see regulation 91.035.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Division 91.D.3—Flight notifications and pre-flight checks

91.240 Flight notifications

- (1) The Part 91 Manual of Standards may prescribe requirements (the *flight notification requirements*) relating to flight notifications.
- (2) The pilot in command of an aircraft for a flight contravenes this subregulation if a flight notification requirement is not met for the flight.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

91.245 Matters to be checked before take-off

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if, when the aircraft takes off for the flight, a check prescribed by the Part 91 Manual of Standards has not been carried out.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 91.D.4—Flight rules

Subdivision 91.D.4.1—General

91.255 Air traffic services—prescribed requirements

- (1) The Part 91 Manual of Standards may prescribe requirements in relation to the use by an aircraft of:
 - (a) a class of airspace or a portion of a class of airspace; or
 - (b) a controlled aerodrome; or
 - (c) a control area; or
 - (d) a control zone; or
 - (e) a prohibited area; or
 - (f) a restricted area; or
 - (g) a danger area.
- (2) The pilot in command of an aircraft for a flight contravenes this subregulation if a requirement mentioned in subregulation (1) is not met for the flight.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

91.257 Air traffic control clearances and instructions

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if, during the flight:
 - (a) air traffic control gives the pilot in command an air traffic control clearance or air traffic control instructions; and
 - (b) the pilot in command does not comply with the clearance or instructions.
- (2) Subregulation (1) does not apply if:
 - (a) it is not practicable to seek authorisation for the non-compliance before it occurs; and
 - (b) the non-compliance is necessary for the safety of the aircraft or the persons on the aircraft; and
 - (c) the pilot in command informs air traffic control about the non-compliance as soon as practicable after the pilot in command is unable to comply with the clearance or instructions.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

Regulation 91.260

91.260 Unauthorised entry into prohibited or restricted areas

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if, during the flight:
 - (a) the aircraft:
 - (i) is in a prohibited area; or
 - (ii) is in a restricted area in contravention of a condition relating to the declaration of the area as a restricted area under regulation 7 of the *Airspace Regulations 2007*; and
 - (b) the pilot in command does not comply with subregulation (2) as soon as the pilot becomes aware that the aircraft is in the prohibited area or restricted area.
- (2) The pilot must:
 - (a) if the aircraft is fitted with, or carries, a means for the pilot in command to communicate with Air Traffic Services during the flight—inform Air Traffic Services, or the controlling authority (specified in the authorised aeronautical information for the flight) for the prohibited or restricted area, that the aircraft is in the area; and
 - (b) for an aircraft (other than a Part 131 aircraft)—fly the aircraft out of the area; and
 - (c) for a Part 131 aircraft:
 - (i) fly the aircraft out of the area; or
 - (ii) if it is not possible to fly the aircraft out of the area—land the aircraft and inform the authority controlling the area as soon as is practicable.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.263 Air defence identification zone flights

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if:
 - (a) during the flight the aircraft enters an air defence identification zone published in the authorised aeronautical information for the flight; and
 - (b) a procedure published in the authorised aeronautical information for the flight for that zone is not complied with for the flight.
- (2) Subregulation (1) does not apply in relation to a Part 131 aircraft if the pilot in command of the aircraft lands the aircraft and informs the authority controlling the area as soon as is practicable after entering the air defence identification zone.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Regulation 91.265

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

91.265 Minimum height rules—populous areas and public gatherings

- (1) This regulation applies if an aircraft is flown over a populous area or a public gathering.

Note: This regulation does not apply to certain medical transport operations in a rotorcraft and certain aerial work operations: see regulations 133.167 and 138.275.
- (2) The pilot in command of an aeroplane for a flight contravenes this subregulation if, during the flight:
 - (a) the aeroplane is flown below 1,000 ft above the highest feature or obstacle within a horizontal radius of 600 m of the point on the ground or water immediately below the aeroplane; and
 - (b) none of the circumstances mentioned in subregulation (4) applies.
- (3) The pilot in command of a rotorcraft for a flight contravenes this subregulation if, during the flight:
 - (a) the rotorcraft is flown below 1,000 ft above the highest feature or obstacle within a horizontal radius of 300 m of the point on the ground or water immediately below the rotorcraft; and
 - (b) none of the circumstances mentioned in subregulation (4) applies.
- (4) The circumstances are the following:
 - (a) the aircraft is taking off or landing in circumstances prescribed by the Part 91 Manual of Standards;
 - (b) the aircraft is engaged in a missed approach;
 - (c) the aircraft:
 - (i) is not carrying passengers; and
 - (ii) is engaged in a practice emergency procedure at an aerodrome;
 - (d) the aircraft is performing training circuits at an aerodrome;
 - (e) the pilot in command holds an approval for the purposes of regulation 91.180 (air displays in Australian territory);
 - (f) for a rotorcraft—the rotorcraft is hovering, air transiting, air taxiing or ground taxiing at an aerodrome;
 - (g) for a rotorcraft, seaplane or amphibian—the aircraft is flying within an access lane:
 - (i) that is for use by aircraft taking off from, or landing at, a particular place; and
 - (ii) details of which are published in the authorised aeronautical information for the flight;
 - (h) for a single-engine seaplane or a single-engine amphibian:
 - (i) the aeroplane is operating over water and within safe gliding distance of open water suitable for a forced landing; and

Regulation 91.267

- (ii) the aeroplane is not flown below 1,000 ft above the highest feature or obstacle within a horizontal radius of 300 m of the point on the water immediately below the aeroplane;
 - (i) the aircraft is engaged in a procedure to determine the suitability of an aerodrome for a landing.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (2) or (3).

Penalty: 50 penalty units.

91.267 Minimum height rules—other areas

- (1) This regulation applies if an aircraft is flown other than over a populous area or a public gathering.

Note: This regulation does not apply to certain medical transport operations in a rotorcraft and certain aerial work operations: see regulations 133.167 and 138.275.

- (2) The pilot in command of an aircraft for a flight contravenes this subregulation if, during the flight:
- (a) the aircraft is flown below 500 ft above the highest feature or obstacle within a horizontal radius of 300 m of the point on the ground or water immediately below the aircraft; and
 - (b) none of the circumstances mentioned in subregulation (3) applies.
- (3) The circumstances are the following:
- (a) the aircraft is taking off or landing in circumstances prescribed by the Part 91 Manual of Standards;
 - (b) the aircraft is engaged in a missed approach;
 - (c) the aircraft:
 - (i) is not carrying passengers; and
 - (ii) is engaged in a practice emergency procedure at an aerodrome;
 - (d) the aircraft:
 - (i) is not carrying passengers; and
 - (ii) is engaged in a practice forced landing procedure with the consent of the person or authority having control over the land or water above which the procedure is carried out;
 - (e) the aircraft:
 - (i) is being operated by a Part 141 operator to conduct low-flying flight training or by a Part 142 operator to conduct a low-flying activity; and
 - (ii) is being flown over an area that, with the consent of the person or authority with control of the area, has been determined by the operator to be a suitable flight training area for the training and has been surveyed by the pilot in command for obstacles before the flight; and
 - (iii) is not carrying passengers;
 - (f) the aircraft is performing training circuits at an aerodrome;

Regulation 91.270

- (g) the pilot holds an approval for the purposes of regulation 91.180 (air displays in Australian territory);
- (h) all of the following apply:
 - (i) the pilot in command of the aircraft is authorised under Part 61, or holds an approval under regulation 91.045, to fly the aircraft below the height mentioned in paragraph (2)(a);
 - (ii) the pilot in command of the aircraft conducts a risk assessment of the area to be flown over;
 - (iii) the point on the ground or water vertically below the aircraft is not within 150 m of a person, vessel, vehicle or structure or of livestock;
- (i) for a rotorcraft—the rotorcraft is hovering, air transiting, air taxiing or ground taxiing at an aerodrome;
- (j) for a rotorcraft, seaplane or amphibian—the aircraft is flying within an access lane:
 - (i) that is for use by aircraft taking off from, or landing at, a particular place; and
 - (ii) details of which are published in the authorised aeronautical information for the flight;
- (k) the aircraft is engaged in a procedure to determine the suitability of an aerodrome for a landing.

- (4) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

91.270 Aircraft to be flown under VFR or IFR

- (1) The pilot in command of an aircraft for a flight, other than a Part 103 aircraft or a Part 131 aircraft, contravenes this subregulation if, at any time during the flight, the aircraft is not flown under the VFR or IFR.
- (2) The pilot in command of a Part 103 aircraft for a flight contravenes this subregulation if any part of the flight takes place other than by day and under the VFR.
- (3) The pilot in command of a Part 131 aircraft for a flight contravenes this subregulation if any part of the flight takes place other than under the VFR.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1), (2) or (3).

Penalty: 50 penalty units.

Regulation 91.273

Subdivision 91.D.4.2—Visual flight rules

91.273 VFR flights

- (1) The Part 91 Manual of Standards may prescribe requirements relating to the operation of an aircraft for a VFR flight.
- (2) The pilot in command of an aircraft for a VFR flight contravenes this subregulation if a requirement mentioned in subregulation (1) is not met for the flight.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

91.275 Specified VFR cruising levels

- (1) The pilot in command of an aircraft for a VFR flight contravenes this subregulation if, during the flight on a track, the aircraft is flown at a cruising level that is not a specified VFR cruising level for the track.
- (2) Subregulation (1) does not apply if the aircraft is in uncontrolled airspace and any of the following apply:
 - (a) the aircraft is below 3,000 ft above mean sea level;
 - (b) the aircraft is at or above 3,000 ft above mean sea level but below 1,500 ft AGL;
 - (c) it is not practicable for the pilot in command to fly the aircraft at a specified VFR cruising level for the track;
 - (d) the aircraft is a glider in soaring flight.
- (3) Subregulation (1) does not apply if:
 - (a) the aircraft is in controlled airspace; and
 - (b) air traffic control has given the pilot in command an air traffic control instruction, or an air traffic control clearance, to fly the aircraft other than at a specified VFR cruising level for the track.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2) or (3): see subsection 13.3(3) of the *Criminal Code*.

91.277 Minimum heights—VFR flights at night

- (1) The pilot in command of an aircraft for a VFR flight at night contravenes this subregulation if, during the flight:
 - (a) the aircraft is flown along a route or route segment at a height lower than the minimum height mentioned in subregulation (2); and

(b) none of the circumstances mentioned in subregulation (3) applies.

Note: This regulation does not apply to certain medical transport operations in a rotorcraft and certain aerial work operations: see regulations 133.167 and 138.275.

- (2) The minimum height is the lowest height of the following for the route or route segment:
- (a) the published lowest safe altitude for the route or route segment (if any);
 - (b) the minimum sector altitude published in the authorised aeronautical information for the flight (if any);
 - (c) the lowest safe altitude for the route or route segment;
 - (d) 1,000 ft above the highest obstacle on the ground or water within 10 nautical miles ahead of, and to either side of, the aircraft at that point on the route or route segment;
 - (e) the lowest altitude for the route or route segment calculated in accordance with a method prescribed by the Part 91 Manual of Standards for the purposes of this paragraph.
- (3) The circumstances are the following:
- (a) the aircraft is taking off or landing;
 - (b) the aircraft is within 3 nautical miles of the aerodrome from which the aircraft has taken off, or at which the aircraft will land;
 - (c) the aircraft is being flown in accordance with an air traffic control clearance.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.280 VFR flights—compliance with VMC criteria

- (1) The pilot in command of an aircraft for a VFR flight contravenes this subregulation if, during the flight, the aircraft is not flown in accordance with a requirement of the VMC criteria for the aircraft and the airspace in which the flight is conducted.
- (2) Subregulation (1) does not apply to a flight of an aircraft if:
- (a) air traffic control has authorised the pilot in command of the aircraft to conduct the flight under the special VFR; and
 - (b) the pilot in command complies with the special VFR.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

Regulation 91.283

91.283 VFR flights—aircraft not to exceed certain speeds

- (1) The pilot in command of an aircraft for a VFR flight contravenes this subregulation if, during the flight, the aircraft is flown at a transonic or supersonic speed.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.285 VFR flights—flights in class A airspace

- (1) The pilot in command of an aircraft for a VFR flight contravenes this subregulation if, during the flight:
 - (a) the aircraft is flown in class A airspace; and
 - (b) the pilot in command does not hold an approval under regulation 91.045 to conduct a VFR flight in class A airspace.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Subdivision 91.D.4.3—Instrument flight rules

91.287 IFR flights

- (1) The Part 91 Manual of Standards may prescribe requirements relating to the operation of an aircraft for an IFR flight.
- (2) The pilot in command of an aircraft for an IFR flight contravenes this subregulation if a requirement mentioned in subregulation (1) is not met for the flight.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

91.290 Specified IFR cruising levels

- (1) The pilot in command of an aircraft for an IFR flight contravenes this subregulation if, during the flight on a track, the aircraft is flown at a cruising level that is not a specified IFR cruising level for the track.
- (2) Subregulation (1) does not apply if:
 - (a) the aircraft is in uncontrolled airspace; and
 - (b) it is not practicable for the pilot in command to fly the aircraft at a specified IFR cruising level for the track.

- (3) Subregulation (1) does not apply if air traffic control has:
- (a) given the pilot in command an air traffic control instruction to fly the aircraft at the cruising level; or
 - (b) given the pilot in command an air traffic control clearance to fly the aircraft at the cruising level.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2) or (3): see subsection 13.3(3) of the *Criminal Code*.

91.295 IFR flights at non-specified cruising levels—notifying Air Traffic Services

- (1) The pilot in command of an aircraft for an IFR flight contravenes this subregulation if, during the flight on a track:
- (a) the aircraft is flown at a cruising level that is not a specified IFR cruising level for the track; and
 - (b) before the aircraft is flown at that cruising level, the pilot in command does not notify Air Traffic Services of the cruising level.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.300 IFR flights at non-specified cruising levels—avoiding collisions with aircraft conducting VFR flights

- (1) The pilot in command of an aircraft for an IFR flight contravenes this subregulation if, during the flight on a track:
- (a) the aircraft is flown at a cruising level that is not a specified IFR cruising level for the track; and
 - (b) there is a risk of collision between the aircraft and another aircraft that:
 - (i) is conducting a VFR flight on a track; and
 - (ii) is flying at a specified VFR cruising level for the track; and
 - (c) the pilot in command does not give way to the other aircraft.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.305 Minimum heights—IFR flights

- (1) The pilot in command of an aircraft for an IFR flight contravenes this subregulation if, during the flight:
-

Part 91 General operating and flight rules

Subpart 91.D Operational procedures

Division 91.D.4 Flight rules

Regulation 91.307

- (a) the aircraft is flown along a route or route segment at a height lower than the minimum height mentioned in subregulation (2); and
- (b) none of the circumstances mentioned in subregulation (3) applies.

Note: This regulation does not apply to certain medical transport operations in a rotorcraft and certain aerial work operations: see regulations 133.167 and 138.275.

- (2) The minimum height is the lowest of the following for the route or route segment:
 - (a) the published lowest safe altitude for the route or route segment (if any);
 - (b) the minimum sector altitude published in the authorised aeronautical information for the flight (if any);
 - (c) the lowest safe altitude for the route or route segment.
- (3) The circumstances are the following:
 - (a) the aircraft is taking off or landing;
 - (b) the aircraft is being flown in accordance with:
 - (i) requirements relating to visual approach or departure procedures published in the authorised aeronautical information for the flight; or
 - (ii) an authorised instrument departure procedure or an authorised instrument approach procedure; or
 - (iii) an air traffic control clearance;
 - (c) the aircraft is being flown in VMC by day.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.307 IFR take-off and landing minima

- (1) The Part 91 Manual of Standards may prescribe the following:
 - (a) requirements (the *take-off minima requirements*) relating to take-off minima for an aerodrome;
 - (b) requirements (the *landing minima requirements*) relating to landing minima for an aerodrome.
- (2) The operator and the pilot in command of an aircraft for an IFR flight each contravene this subregulation if:
 - (a) the aircraft conducts a take-off at an aerodrome; and
 - (b) a take-off minima requirement for the aerodrome is not met for the flight.
- (3) The operator and the pilot in command of an aircraft for an IFR flight each contravene this subregulation if:
 - (a) the aircraft conducts a landing at an aerodrome; and
 - (b) a landing minima requirement for the aerodrome is not met for the flight.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (2) or (3).

Penalty: 50 penalty units.

91.310 Approach ban for IFR flights

- (1) The Part 91 Manual of Standards may prescribe circumstances in which an aircraft flown under the IFR must not make an approach to land at an aerodrome.
- (2) The operator and the pilot in command of an aircraft for an IFR flight each contravene this subregulation if:
 - (a) the aircraft makes an approach to land at an aerodrome; and
 - (b) the approach to land is made in circumstances mentioned in subregulation (1).
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

91.315 Taking off and landing in low visibility

- (1) The operator and the pilot in command of an aircraft for a flight each contravene this subregulation if:
 - (a) the aircraft conducts a low-visibility operation at an aerodrome; and
 - (b) when the operation begins:
 - (i) if the operator is required under these Regulations to have an exposition or an operations manual—the operator does not hold an approval under regulation 91.045 to conduct the low-visibility operation; or
 - (ii) if subparagraph (i) does not apply—the pilot in command does not hold an approval under regulation 91.045 to conduct the low-visibility operation.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.320 Specified aircraft performance categories

- (1) The operator of an aircraft contravenes this subregulation if, while the aircraft is operating at an aerodrome:
 - (a) the aircraft does not operate in the specified aircraft performance category for the aircraft at the aerodrome; and
 - (b) the operator:
 - (i) does not hold an approval under regulation 91.045 for the aircraft to operate in a lower aircraft performance category for the aircraft at the aerodrome; or

Regulation 91.325

- (ii) holds an approval under regulation 91.045 for the aircraft to operate in a lower aircraft performance category for the aircraft at the aerodrome but does not comply with subregulation (3) of this regulation.
- (2) The operator of an aircraft contravenes this subregulation if:
 - (a) the operator holds an approval under regulation 91.045 for the aircraft to operate in a lower aircraft performance category for the aircraft at the aerodrome; and
 - (b) the aircraft does not operate in that lower aircraft performance category.
- (3) The operator must give details to the flight crew of:
 - (a) the approval; and
 - (b) the conditions (if any) imposed by CASA on the approval.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

Subdivision 91.D.4.4—Avoiding collisions in the air

91.325 Basic rule

A flight crew member must, during a flight, maintain vigilance, so far as weather conditions permit, to see and avoid other aircraft.

91.330 Right of way rules

- (1) The pilot in command of an aircraft contravenes this subregulation if, during a flight:
 - (a) there is a risk of collision between the aircraft and another aircraft; and
 - (b) a circumstance mentioned in column 1 of an item in the following table exists; and
 - (c) the pilot in command contravenes the right of way rule mentioned in column 2 of that item.

Right of way rules		
Item	Column 1	Column 2
	Circumstance	Right of way rule
1	An aircraft is in an emergency and compelled to land	Any other aircraft must give way to the aircraft that is compelled to land
2	An aircraft is landing	Any other aircraft (whether in flight or operating on the ground or water) must give way to the aircraft that is landing
3	Two heavier-than-air aircraft are conducting an approach to land at an aerodrome	The following rules apply: <ul style="list-style-type: none">(a) the higher aircraft must give way to the lower aircraft;(b) however, if the higher aircraft is in the final stages of an

Regulation 91.335

Right of way rules

Item	Column 1	Column 2
	Circumstance	Right of way rule
		approach to land, the lower aircraft must not take advantage of the higher aircraft's need to comply with paragraph (a) to cut in front of the higher aircraft; (c) despite paragraphs (a) and (b), a power-driven heavier-than-air aircraft must give way to an unpowered glider
4	An aircraft is overtaking another aircraft	The aircraft that is overtaking must give way to the aircraft being overtaken
5	Aircraft mentioned in column 2 are in the same vicinity	An aircraft mentioned in the following list must give way to an aircraft listed above it in the list: (a) a balloon; (b) a person descending by parachute; (c) an unpowered glider; (d) an airship; (e) an aircraft that is towing something (including another aircraft); (f) a power-driven aircraft
6	Two aircraft are on converging headings at approximately the same altitude	The aircraft that has the other aircraft on its right must give way to the other aircraft

(2) Subregulation (1) does not apply if it is necessary, in order to avoid a collision with an aircraft, not to comply with the right of way rule.

(3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

91.335 Additional right of way rules

Aircraft with right of way to maintain heading and speed

(1) The pilot in command of an aircraft for a flight contravenes this subregulation if, during the flight:

- (a) there is a risk of collision with another aircraft; and
- (b) the aircraft has right of way over the other aircraft (in accordance with regulation 91.330); and
- (c) the aircraft's heading and speed is not maintained until there is no longer a risk of collision.

Regulation 91.335

Overtaking aircraft to keep clear and to right

- (2) The pilot in command of an aircraft contravenes this subregulation if, when the aircraft is overtaking another aircraft (whether in the course of climbing, descending or in level flight), the pilot does not:
- (a) keep the aircraft out of the way of the other aircraft, even if the other aircraft alters course while being overtaken; and
 - (b) fly the aircraft so that it passes to the right of the other aircraft and remains on the right until clear of the other aircraft.

Aircraft approaching head on to alter heading to right

- (3) The pilot in command of an aircraft for a flight contravenes this subregulation if, during the flight:
- (a) the aircraft and another aircraft are approaching in the air head on or approximately so; and
 - (b) there is a risk of collision; and
 - (c) the aircraft's heading is not altered to the right.

Aircraft giving way not to create collision risk

- (4) The pilot in command of an aircraft for a flight contravenes this subregulation if, during the flight:
- (a) the aircraft is required to give way to another aircraft:
 - (i) by a right of way rule in regulation 91.330; or
 - (ii) by an additional right of way rule in subregulation (1), (2) or (3) of this regulation; or
 - (iii) by an additional right of way rule in regulation 91.340; and
 - (b) the aircraft is flown so that it passes ahead of the other aircraft, or directly over or under it, so closely that there is a risk of collision.

Exceptions

- (5) Subregulation (1), (2), (3) or (4) does not apply if it is necessary, in order to avoid a collision with an aircraft, to not comply with the subregulation.
- (5A) Paragraph (2)(b) does not apply if:
- (a) the aircraft is a glider engaged in ridge or hill soaring; and
 - (b) the pilot flies the aircraft so that it passes between the ridge or hill and the other aircraft.
- (6) Subregulation (4) does not apply if, as a result of a command of the aircraft's airborne collision avoidance system, the pilot was manoeuvring the aircraft to the extent necessary to ensure the safety of the aircraft.

Offence

- (7) A person commits an offence of strict liability if the person contravenes subregulation (1), (2), (3) or (4).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (5), (5A) or (6): see subsection 13.3(3) of the *Criminal Code*.

91.340 Right of way rules for take-off and landing

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if, during take-off or landing, the aircraft is flown in a manner that creates a risk of collision with:
 - (a) another aircraft; or
 - (b) a person, vessel, vehicle or structure.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Subdivision 91.D.4.5—Avoiding collisions on water

91.345 Compliance with International Regulations

- (1) This regulation applies in relation to a requirement of the International Regulations to the extent that the requirement is not inconsistent with a requirement of regulation 91.355.
- (2) The pilot in command of an aircraft for a flight contravenes this subregulation if, during the flight:
 - (a) the aircraft is operating on water; and
 - (b) the aircraft is not operated in accordance with the International Regulations.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

91.350 Giving way to vessels

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if:
 - (a) the aircraft is in level flight, or is manoeuvring near the surface of water; and
 - (b) the aircraft does not, as far as possible:
 - (i) keep clear of a vessel; or
 - (ii) avoid impeding the navigation of a vessel.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Regulation 91.355

91.355 Giving way on water

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if, during the flight:
 - (a) the aircraft is on water; and
 - (b) a requirement mentioned in subregulation (2) is not met.
- (2) The requirements are the following:
 - (a) the aircraft must give way to, and keep well clear of, an aircraft or vessel converging on its right;
 - (b) the aircraft must alter its heading to the right, and keep well clear, of an aircraft or vessel that is approaching head-on or approximately head-on;
 - (c) the aircraft, if overtaking a vessel or another aircraft, must:
 - (i) give way to the vessel or aircraft being overtaken; and
 - (ii) alter its heading to keep well clear of the vessel or aircraft being overtaken.
- (3) Subregulation (1) does not apply if it is necessary, to avoid a collision with an aircraft or vessel, to not comply with the requirement.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (3): see subsection 13.3(3) of the *Criminal Code*.

Subdivision 91.D.4.6—Avoiding collisions at or in the vicinity of aerodromes

91.360 Meaning of *in the vicinity of a non-controlled aerodrome*

- (1) An aircraft is *in the vicinity of a non-controlled aerodrome* if it is:
 - (a) in uncontrolled airspace; and
 - (b) within 10 nautical miles of the aerodrome; and
 - (c) at a height above the aerodrome that could result in conflict with operations at the aerodrome.
- (2) For the purposes of paragraph (1)(b), if an aerodrome reference point for the aerodrome is published in the authorised aeronautical information for the flight, the distance must be measured from that point.

91.365 Taxiing or towing on movement area of aerodrome

- (1) A person contravenes this subregulation if:
 - (a) the person is taxiing or towing an aircraft on the movement area of an aerodrome; and
 - (b) a requirement mentioned in subregulation (2) is not met.

Regulation 91.370

- (2) The requirements are the following:
 - (a) the aircraft and any tow vehicle must give way, in accordance with subregulation (3), to an aircraft that is landing or on its final approach to land;
 - (b) the aircraft and any tow vehicle must give way, in accordance with subregulation (3), to an aircraft that is taking off or preparing for take-off;
 - (c) the aircraft and any tow vehicle must keep well clear of an aircraft it is overtaking;
 - (d) the aircraft and any tow vehicle must give way to an aircraft on the right if both aircraft are on a converging course;
 - (e) the aircraft and any tow vehicle must stop, or alter course to the right, so as to remain clear of an aircraft approaching head on or approximately so.
- (3) For the purposes of paragraph (2)(a) or (2)(b):
 - (a) for a runway that has a marked runway hold position for the aircraft—the aircraft giving way and any tow vehicle must hold at that position; and
 - (b) for a runway that does not have a marked runway hold position—the aircraft giving way and any tow vehicle must not encroach upon a graded runway strip.
- (4) Subregulation (1) does not apply if it is necessary, to avoid a collision with an aircraft and any tow vehicle, to not comply with the requirement.
- (5) Subregulation (1) does not apply if the aircraft and any tow vehicle are being operated in accordance with an air traffic control clearance or air traffic control instructions.
- (6) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (4) or (5): see subsection 13.3(3) of the *Criminal Code*.

91.370 Take-off or landing at non-controlled aerodrome—all aircraft

- (1) This regulation applies to an aircraft (the ***subject aircraft***) at a non-controlled aerodrome at which a take-off or landing of the aircraft can only occur from or to a runway.

Rules for take-off

- (2) The pilot in command of the subject aircraft (other than a glider being towed by a glider tug) for a flight contravenes this subregulation if:
 - (a) the subject aircraft commences to take-off from a runway; and
 - (b) before taking off, a requirement mentioned in subregulation (3) is not met.
- (3) The requirements are the following:

Regulation 91.370

- (a) if another aircraft is taking off before the subject aircraft from the same runway:
 - (i) the other aircraft must have crossed the upwind end of the runway; or
 - (ii) the other aircraft must have commenced a turn; or
 - (iii) the runway must be longer than 1,800 m and the other aircraft must have become airborne and be at least 1,800 m beyond the proposed point of lift-off of the subject aircraft; or
 - (iv) the other aircraft and the subject aircraft must both have a maximum take-off weight below 2,000 kg, and the other aircraft must be airborne and at least 600 m beyond the proposed point of lift-off of the subject aircraft;
- (b) if another aircraft is landing on the same runway before the subject aircraft—the other aircraft must have vacated the runway;
- (c) if another aircraft is landing before the subject aircraft and is using a crossing runway—the other aircraft must have crossed, or must have stopped short of, the runway the subject aircraft is taking off from.

Rules for landing

- (4) The pilot in command of the subject aircraft (other than a glider) for a flight contravenes this subregulation if:
 - (a) the subject aircraft continues an approach to land at an aerodrome beyond the threshold of the runway; and
 - (b) before landing, a requirement mentioned in subregulation (5) is not met.

Note: Regulation 91.055 prohibits an aircraft (including a glider) being operated in a manner that creates a hazard to another aircraft, a person or property.

- (5) The requirements are the following:
 - (a) if another aircraft is taking off using the same runway before the subject aircraft:
 - (i) the other aircraft must be airborne and must have commenced a turn; or
 - (ii) the other aircraft must be beyond the point on the runway at which the subject aircraft could be expected to complete its landing roll, and there must be sufficient distance for the subject aircraft to manoeuvre safely in the event of a missed approach;
 - (b) if another aircraft is landing on the same runway before the subject aircraft—the other aircraft must have vacated the runway or must be taxiing away from the runway;
 - (c) if another aircraft is landing before the subject aircraft and is using a crossing runway—the other aircraft must have crossed, or must have stopped short of, the runway the subject aircraft is landing on.

Application of rules where gliders or glider tugs operate

- (6) At an aerodrome where gliders or glider tugs operate to a common circuit pattern from a parallel strip outside the runway strip:

- (a) subregulations (2) and (4) apply to an aircraft taking off or landing, respectively, on either the runway or the parallel strip as if the runway and the strip were a single runway; but
- (b) aircraft taxiing or stationary on either the runway or the parallel strip are taken not to affect operations on the other.

Exception

- (7) Subregulation (2) or (4) does not apply if:
 - (a) the aircraft is taking off or landing at an aerodrome where gliders or glider tugs operate to a contra-circuit pattern on both a runway and a parallel strip outside the runway strip; and
 - (b) simultaneous operations on the runway and the parallel strip are permitted.

Offence

- (8) A person commits an offence of strict liability if the person contravenes subregulation (2) or (4).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (7): see subsection 13.3(3) of the *Criminal Code*.

91.375 Operating on manoeuvring area, or in the vicinity, of non-controlled aerodrome—general requirements

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if:
 - (a) the aircraft is operated on the manoeuvring area of, or in the vicinity of, a non-controlled aerodrome; and
 - (b) a requirement mentioned in subregulation (2) is not met.
- (2) The requirements are the following:
 - (a) the pilot must keep a lookout for other aircraft that are being operated on the manoeuvring area, or in the vicinity, of the aerodrome to avoid a collision;
 - (b) the pilot must ensure that the aircraft does not cause a danger to other aircraft on the manoeuvring area, or in the vicinity, of the aerodrome;
 - (c) if the pilot is flying the aircraft in the vicinity of the aerodrome—the pilot must join, or avoid, the circuit pattern for the aerodrome;
 - (d) if the aircraft is an aeroplane—the pilot must not:
 - (i) take-off from a part of the aerodrome that is outside the aerodrome landing area; or
 - (ii) land the aircraft on a part of the aerodrome that is outside the aerodrome landing area.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Regulation 91.380

91.380 Operating on manoeuvring area, or in the vicinity, of non-controlled aerodrome—landing and taking off into the wind

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if:
 - (a) the aircraft is operated on the manoeuvring area of, or in the vicinity of, a non-controlled aerodrome; and
 - (b) the pilot does not, to the extent practicable, land and take off into the wind.
- (2) Subregulation (1) does not apply if:
 - (a) the aircraft flight manual instructions for the aircraft allow the aircraft to land or take off downwind or crosswind; and
 - (b) the pilot is satisfied that traffic conditions at the aerodrome enable such a landing or take-off to be carried out safely.
- (3) A person commits an offence if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

91.385 Operating on manoeuvring area, or in the vicinity, of non-controlled aerodrome—requirements that apply after joining the circuit pattern

- (1) The pilot in command of an aircraft (other than a rotorcraft) for a flight contravenes this subregulation if:
 - (a) the aircraft is operated on the manoeuvring area of, or in the vicinity of, a non-controlled aerodrome; and
 - (b) after joining the circuit pattern for a landing or while flying in the circuit pattern after take-off, the pilot does not:
 - (i) comply with instructions in the authorised aeronautical information for the flight to the effect that all turns be made in a particular direction; or
 - (ii) if there are no relevant instructions in the authorised aeronautical information for the flight—make all turns to the left.
- (2) Subregulation (1) does not apply to the pilot in command of an aircraft if:
 - (a) the aircraft is a seaplane or amphibian and the pilot in command contravenes the subregulation only to the extent necessary:
 - (i) to avoid an obstacle; or
 - (ii) to avoid undue noise over a populous area without compromising the aircraft's safety; or
 - (iii) for a single-engine seaplane or amphibian—to enable the aircraft to land on water if its engine fails; or
 - (b) the aircraft is a glider (other than a glider with an engine operating) and the pilot in command contravenes the subregulation only to the extent necessary to enable the aircraft to land safely.

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

91.390 Operating on manoeuvring area, or in the vicinity, of non-controlled aerodrome—requirements related to maintaining the same track after take-off

- (1) The pilot in command of an aircraft (other than a rotorcraft, a glider or a powered parachute) for a flight contravenes this subregulation if:
- (a) the aircraft is operated on the manoeuvring area of, or in the vicinity of, a non-controlled aerodrome; and
 - (b) the pilot does not, after take-off, maintain the same track from the take-off until the aircraft is 500 ft AGL.
- (2) Subregulation (1) does not apply to the pilot in command of a seaplane or amphibian if the pilot in command contravenes the subregulation only to the extent necessary:
- (a) to avoid an obstacle; or
 - (b) to avoid undue noise over a populated area without compromising the aircraft's safety; or
 - (c) for a single engine seaplane or amphibian—to enable the aircraft to land on water if its engine fails.
- (3) Subregulation (1) does not apply to the pilot in command of an aircraft if a change to the track is necessary to avoid the terrain.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2) or (3): see subsection 13.3(3) of the *Criminal Code*.

91.395 Straight-in approaches at non-controlled aerodromes

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if:
- (a) the aircraft approaches a non-controlled aerodrome to land using a straight-in approach; and
 - (b) a requirement mentioned in subregulation (2) is not met.
- (2) The requirements are the following:
- (a) before starting the approach, the pilot in command must determine:
 - (i) the wind direction at the aerodrome; and
 - (ii) the runways in use at the aerodrome;

Regulation 91.400

- (b) the aircraft must give way to any other aircraft flying in the circuit pattern for the aerodrome;
 - (c) for an approach other than an approach covered by subregulation (2A)—all manoeuvring must be carried out, to establish the aircraft on the final approach, at least 3 nautical miles from the threshold of the runway intended to be used for the landing.
- (2A) An approach is covered by this subregulation if:
- (a) the approach is carried out in IMC using an instrument approach procedure; or
 - (b) the approach is by a Part 103 aircraft prescribed by the Part 103 Manual of Standards for the purposes of this paragraph.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.400 Communicating at certified, registered, military or designated non-controlled aerodromes

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if:
- (a) the aircraft is operated on the manoeuvring area of, or in the vicinity of:
 - (i) a certified aerodrome; or
 - (ii) a registered aerodrome; or
 - (iii) a military aerodrome; or
 - (iv) an aerodrome prescribed as a designated non-controlled aerodrome by the Part 91 Manual of Standards for this subparagraph; and
 - (b) the aerodrome is a non-controlled aerodrome; and
 - (c) if the aircraft is not carrying an operative radio—the requirement in subregulation (2) is not met.
- (2) The requirement is that either subregulation (3) or (4) is satisfied.
- (3) This subregulation is satisfied if:
- (a) the flight is conducted during the day in VMC; and
 - (b) the flight is conducted in company with another aircraft; and
 - (c) the other aircraft is carrying an operative radio; and
 - (d) the pilot in command of the other aircraft is:
 - (i) if the aircraft is an Australian aircraft—authorised to operate the radio under Part 61; or
 - (ii) if the aircraft is a foreign registered aircraft—authorised to operate the radio under the law of the aircraft's State of registry or the State of the operator; or
 - (iii) if the aircraft is a Part 103 aircraft—authorised to operate the radio by a Part 103 ASAO.
- (4) This subregulation is satisfied if:
-

- (a) either:
 - (i) the radio becomes inoperative during the flight; or
 - (ii) the purpose of the flight is to take the radio to a place where it can be repaired; and
 - (b) if the aircraft is flying in the vicinity of the aerodrome—each of the following is switched on:
 - (i) the aircraft's landing lights (if any);
 - (ii) the aircraft's anti-collision lights (if any);
 - (iii) the aircraft's secondary surveillance radar transponder (if any); and
 - (c) if the aircraft is arriving at the aerodrome—the aircraft joins the circuit pattern for the aerodrome on the cross-wind or down-wind leg of the circuit pattern.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.405 Aircraft in aerodrome traffic at controlled aerodromes

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if:
- (a) the aircraft is part of aerodrome traffic at a controlled aerodrome; and
 - (b) a requirement mentioned in subregulation (2) is not met.
- (2) The requirements are the following:
- (a) a continuous watch for instructions given visually by Air Traffic Services for the aerodrome using standard visual signals must be maintained;
 - (b) if a continuous listening watch on the frequency specified in the authorised aeronautical information for the flight for communications with Air Traffic Services for the aerodrome can be maintained—the continuous listening watch must be maintained;
 - (c) authorisation to conduct a manoeuvre preparatory to, or associated with, taxiing, landing or take-off must be obtained from Air Traffic Services for the aerodrome before the manoeuvre is conducted.
- (3) The pilot in command of an aircraft (other than a Part 131 aircraft) for a flight contravenes this subregulation if:
- (a) the aircraft is part of aerodrome traffic at a controlled aerodrome; and
 - (b) a requirement mentioned in subregulation (4) is not met.
- (4) The requirements are the following:
- (a) if the aircraft takes off from the aerodrome and a change to the aircraft's track is not necessary to avoid the terrain—the aircraft must maintain the same track from the take-off until the aircraft is 500 ft AGL;
 - (b) if the aircraft joins the circuit pattern for the aerodrome for a landing—the aircraft must, after joining the circuit pattern, make all turns in the direction of the circuit pattern;

Part 91 General operating and flight rules

Subpart 91.D Operational procedures

Division 91.D.4 Flight rules

Regulation 91.405

- (c) if the aircraft takes off from the aerodrome—the aircraft must, after taking off, make all turns in the direction of the circuit pattern while the pilot is flying in the circuit pattern for the aerodrome.
- (5) Subregulation (3) does not apply if:
 - (a) Air Traffic Services for the aerodrome instructed or permitted the pilot to engage in the conduct that would otherwise result in the contravention of that subregulation; or
 - (b) the aircraft is being flown in accordance with an authorised instrument departure procedure or an authorised instrument approach procedure.
- (6) A person commits an offence of strict liability if the person contravenes subregulation (1) or (3).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (5): see subsection 13.3(3) of the *Criminal Code*.

Division 91.D.5—Taking off, landing and ground operations

91.410 Use of aerodromes

(1) The operator and the pilot in command of an aircraft for a flight each contravene this subregulation if:

- (a) the aircraft takes off from, or lands at, a place; and
- (b) the place does not meet the requirement in subregulation (2).

Note: This regulation does not apply to the operation of an aircraft if regulation 121.205 applies to the operation: see regulation 91.035.

(2) The requirement is that:

- (a) the place is one of the following:
 - (i) a certified aerodrome;
 - (ii) a registered aerodrome;
 - (iii) an aerodrome for which an arrangement under section 20 of the Act is in force;
 - (iv) a place that is suitable for the landing and taking-off of aircraft; and
- (b) the aircraft can land at, or take off from, the place safely having regard to all the circumstances of the proposed landing or take-off (including the prevailing weather conditions).

(3) For the purposes of the definition of *aerodrome* in the Act, a place mentioned in subparagraph (2)(a)(iv) is authorised to be used as an aerodrome.

(4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.415 Taxiing aircraft

(1) A person contravenes this subregulation if:

- (a) the person taxis an aircraft; and
- (b) any of the following apply:
 - (i) for an aeroplane that is an Australian aircraft other than a Part 103 aircraft—the person is not authorised under Part 61 or 64 to taxi the aeroplane;
 - (ii) for a rotorcraft that is an Australian aircraft other than a Part 103 aircraft—the person is not authorised under Part 61 to taxi the rotorcraft;
 - (iii) for an aeroplane that is a foreign registered aircraft—the person is not qualified to taxi the aeroplane under the law of the aeroplane's State of registry or the State of the operator, nor authorised under Part 64;
 - (iv) for a rotorcraft that is a foreign registered aircraft—the person is not qualified to pilot the rotorcraft under the law of the rotorcraft's State of registry or the State of the operator;

Regulation 91.420

(v) for a Part 103 aircraft—the person is not authorised by a Part 103 ASAO to taxi the aircraft.

- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.420 Parked aircraft not to create hazard

- (1) A person contravenes this subregulation if the person parks an aircraft in a place where the aircraft is a hazard to the movement of other aircraft.

- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 25 penalty units.

91.425 Safety when aeroplane operating on ground

- (1) A person contravenes this subregulation if:

- (a) the person starts the engine of an aeroplane, or causes the engine to be started, while the aeroplane is on the ground; and
- (b) a requirement mentioned in subregulation (2) is not met.

- (2) The requirements are the following:

- (a) the person who starts the engine or causes the engine to be started must be:
 - (i) if the aeroplane is an Australian aircraft—a person authorised to pilot the aeroplane under Part 61 or a person authorised to taxi the aeroplane under Part 64; or
 - (ii) if the aeroplane is a foreign registered aircraft—a person qualified to pilot or taxi the aeroplane under the law of the aeroplane's State of registry or the State of the operator; or
 - (iii) a person of a kind prescribed by the Part 91 Manual of Standards; and
- (b) if subparagraph (a)(iii) applies—the aeroplane must be secured from moving.

- (3) Subregulation (1) does not apply if:

- (a) the person starting the engine of the aeroplane is hand-starting the propeller of the aeroplane; and
- (b) assistance is not readily available; and
- (c) adequate provision is made to prevent the aeroplane moving forward; and
- (d) no person is on board the aircraft.

- (4) A person contravenes this subregulation if:

- (a) the person operates an aeroplane on the ground, or causes an aeroplane to be operated on the ground; and

- (b) the person permits another person to board the aeroplane or to remain on the aeroplane while a pilot seat of the aeroplane is not occupied by a person who is competent to apply the brakes and control the engine.
- (5) For the purposes of paragraph (4)(b), a person is **competent to apply the brakes and control the engine** of an aeroplane if:
- (a) the person has been given instructions on how, and assessed as competent, to apply the brakes and control the engine (including how to shut the engine down) by another person; or
 - (b) the person is authorised under Part 61 or Part 64 to taxi the aeroplane; or
 - (c) if the aeroplane is a foreign registered aircraft—the person is qualified to pilot or taxi the aeroplane under the law of the aeroplane’s State of registry or the State of the operator.
- (6) A person commits an offence of strict liability if the person contravenes subregulation (1) or (4).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (3): see subsection 13.3(3) of the *Criminal Code*.

91.430 Safety when rotorcraft operating on ground

- (1) A person contravenes this subregulation if:
- (a) the person operates a rotorcraft on the ground; and
 - (b) the rotorcraft is being operated other than for maintenance or maintenance training; and
 - (c) a requirement mentioned in subregulation (2) is not met.
- (2) The requirements are the following:
- (a) that the person is:
 - (i) if the rotorcraft is an Australian aircraft—authorised under Part 61 to pilot the rotorcraft; or
 - (ii) if the rotorcraft is a foreign registered aircraft—authorised to pilot the rotorcraft by the rotorcraft’s State of registry; or
 - (iii) a person of a kind prescribed by the Part 91 Manual of Standards; and
 - (b) if subparagraph (a)(iii) applies—the rotorcraft must be secured from moving.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 91.D.6—Fuel requirements

91.455 Fuel requirements

- (1) The Part 91 Manual of Standards may prescribe requirements relating to fuel for aircraft, including (but not limited to) the following:
 - (a) matters that must be considered when determining whether an aircraft has sufficient fuel to complete a flight safely;
 - (b) the amounts of fuel that must be carried on board an aircraft for a flight;
 - (c) procedures for monitoring amounts of fuel during a flight;
 - (d) procedures to be followed if fuel reaches specified amounts during a flight.
- (2) The pilot in command of an aircraft for a flight contravenes this subregulation if a requirement mentioned in subregulation (1) is not met for the flight.

Note: This regulation does not apply to the operation of an aircraft if Division 121.D.6, 133.D.6 or 135.D.6 applies to the operation: see regulation 91.035.

- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

91.460 Oil requirements

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if, when the flight begins, the aircraft is not carrying sufficient oil to complete the flight safely.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.465 Contaminated, degraded or inappropriate fuels

- (1) The operator and pilot in command of an aircraft for a flight each contravene this subregulation if, before the flight begins, the operator or pilot in command does not ensure that the aircraft has been fuelled with fuel that is not contaminated, degraded or inappropriate.
- (2) A person contravenes this subregulation if:
 - (a) the person supplies fuel for fuelling an aircraft (other than a Part 131 aircraft); and
 - (b) the fuel is contaminated, degraded or inappropriate fuel for the aircraft.
- (3) A person contravenes this subregulation if:
 - (a) the person fuels an aircraft; and
 - (b) the fuel is contaminated, degraded or inappropriate fuel for the aircraft.

- (4) A person commits an offence if the person contravenes subregulation (1), (2) or (3).

Penalty: 50 penalty units.

91.470 Fire hazards

- (1) A person contravenes this subregulation if:
- (a) an aircraft is being fuelled; and
 - (b) the person creates a fire hazard within 15 m of the aircraft or the equipment used to fuel the aircraft.

- (2) A person contravenes this subregulation if:
- (a) a fire hazard exists within 15 m of an aircraft or the aircraft's fuelling equipment; and
 - (b) the person fuels the aircraft.

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

91.475 Fuelling aircraft—fire fighting equipment

- (1) A person who fuels an aircraft contravenes this subregulation if a requirement mentioned in subregulation (2) is not met.

- (2) The requirements are the following:
- (a) at all times during the fuelling, at least the number of fire extinguishers mentioned in subregulation (2A):
 - (i) must be on the fuelling equipment or positioned at a distance of not less than 6 m and not more than 15 m from the fuelling point; and
 - (ii) must be readily available for use by the person;
 - (b) each fire extinguisher:
 - (i) must be of a type and capacity suitable for extinguishing fuel and electrical fires; and
 - (ii) for a fuelling operation in Australian territory—must comply with Australian/New Zealand Standard AS/NZS 1841, as in force from time to time.

- (2A) For the purposes of paragraph (2)(a) the number of fire extinguishers is:
- (a) for an aircraft other than a Part 131 aircraft—2; and
 - (b) for a Part 131 aircraft—one.

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Regulation 91.480

91.480 Fuelling aircraft—electrical bonding

- (1) A person contravenes this subregulation if:
 - (a) the person is fuelling an aircraft; and
 - (b) the aircraft and the equipment used to fuel the aircraft are not electrically bonded.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.485 Equipment or electronic devices operating near aircraft

Operation of equipment or electronic device near aircraft during fuelling

- (1) A person contravenes this subregulation if:
 - (a) an aircraft is being fuelled; and
 - (b) the person operates equipment or an electronic device within 15 m of a critical fuelling point for the aircraft.

Fuelling aircraft while equipment or electronic device is operated near aircraft

- (2) A person contravenes this subregulation if:
 - (a) equipment or an electronic device is being operated within 15 m of a critical fuelling point for the fuelling of an aircraft; and
 - (b) the person fuels the aircraft.

Exceptions

- (3) Subregulations (1) and (2) do not apply if:
 - (a) the equipment or electronic device being operated:
 - (i) is part of the aircraft or the aircraft's fuelling equipment; or
 - (ii) is designed for use during fuelling operations; or
 - (iii) performs an aircraft servicing function and is safe for use within 15 m of a critical fuelling point for the fuelling of the aircraft; or
 - (iv) complies with an industry standard about the safe use of equipment or electronic devices within 15 m of a critical fuelling point for the fuelling of the aircraft; or
 - (b) the equipment being operated is an auxiliary power unit of the aircraft and the following requirements are met:
 - (i) the operation of the auxiliary power unit starts before the person begins fuelling the aircraft;
 - (ii) the aircraft flight manual instructions for the aircraft permit the auxiliary power unit to be operated during fuelling; or
 - (c) the electronic device being operated:

- (i) is hazardous to the process of fuelling the aircraft only because it is designed to produce radio emissions (within the meaning of the *Radiocommunications Act 1992*); and
- (ii) is operated at least 6 m from each critical fuelling point for the fuelling of the aircraft; or
- (d) for a turbine-engine aircraft—the electronic device being operated is a low-risk electronic device and is operated in accordance with regulation 91.490.

Offence

- (4) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (3): see subsection 13.3(3) of the *Criminal Code*.

91.490 Fuelling turbine-engine aircraft—low-risk electronic devices

Use of device inside cabin of aircraft

- (1) A person on a turbine-engine aircraft for a flight contravenes this subregulation if:
- (a) the person operates a low-risk electronic device inside the cabin of the aircraft while the aircraft is being fuelled; and
 - (b) the pilot in command of the aircraft has not given the person permission to operate the device while the aircraft is being fuelled.
- (2) The pilot in command of a turbine-engine aircraft for a flight contravenes this subregulation if:
- (a) the pilot in command gives permission to a person to operate a low-risk electronic device inside the cabin of the aircraft while the aircraft is being fuelled; and
 - (b) the requirement mentioned in subregulation (3) is not met.
- (3) The requirement is that, during fuelling, each cabin door within 3 m of a critical fuelling point for the fuelling of the aircraft must be closed.

Use of device outside cabin of aircraft

- (4) A person contravenes this subregulation if:
- (a) the person operates a low-risk electronic device outside the cabin of a turbine-engine aircraft while the aircraft is being fuelled; and
 - (b) a requirement mentioned in subregulation (5) is not met.
- (5) The requirements are the following:
- (a) the device must be operated at a distance of greater than 3 m from each critical fuelling point for the fuelling of the aircraft;

Regulation 91.495

- (b) the device may also be operated at a distance of 3 m or less from a critical fuelling point for the fuelling of the aircraft if the person operating the device:
 - (i) is employed or engaged by the operator of the aircraft; and
 - (ii) has successfully completed training and has been assessed by the operator as competent to comply with the requirements of this Division in relation to operating the device in those areas and to avoid the risks associated with being distracted when operating the device.
- (6) A person commits an offence if the person contravenes subregulation (1), (2) or (4).

Penalty: 50 penalty units.

91.495 Only turbine-engine aircraft to be hot fuelled

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if:
 - (a) the aircraft is hot fuelled for the flight; and
 - (b) the aircraft is not a turbine-engine aircraft.

Note: This regulation does not apply to the operation of an aircraft if regulation 138.300 applies to the operation: see regulation 91.035.

- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.500 Hot fuelling aircraft—general

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if:
 - (a) the aircraft is hot fuelled for the flight; and
 - (b) a requirement mentioned in subregulation (2) is not met.

Note: This regulation does not apply to the operation of an aircraft if regulation 138.300 applies to the operation: see regulation 91.035.

- (2) The requirements are that, at the time of the hot fuelling:
 - (a) it must be safe to hot fuel; and
 - (b) if the aircraft is a turbine-engine propeller-driven aeroplane:
 - (i) an aeroplane propeller must not be within 2.5 m of the fuelling point used for the hot fuelling; and
 - (ii) a person using the fuelling point must be separated from the propeller by a part of the aeroplane's structure (such as a wing) and must not be able to move directly into the propeller's arc from the fuelling point; and
 - (c) doors on the fuelling side of the aircraft must be closed; and
 - (d) at least one door on the non-fuelling side of the aircraft must be open; and
 - (e) a system of fuelling must not be used that allows fuel to be exposed to the atmosphere; and

- (f) there must be a means available to the person fuelling the aircraft to quickly cut off the fuel supply at its point of entry into the aircraft's fuel tank; and
 - (g) the person in charge of the aircraft, or the person at the aircraft's controls, must maintain communication with the person fuelling the aircraft by means of:
 - (i) an electronic communication system; or
 - (ii) visual contact and an agreed system of signals.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.505 Hot fuelling aircraft—procedures etc.

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if:
- (a) the aircraft is hot fuelled for the flight; and
 - (b) the following are not set out in the aircraft flight manual instructions for the aircraft:
 - (i) procedures for the hot fuelling of the aircraft;
 - (ii) the circumstances in which the aircraft can be hot fuelled;
 - (iii) the procedures to be followed if an emergency occurs during hot fuelling.

Note: This regulation does not apply to the operation of an aircraft if regulation 138.300 applies to the operation: see regulation 91.035.

- (2) The pilot in command of an aircraft for a flight contravenes this subregulation if:
- (a) a requirement of a procedure mentioned in subparagraph (1)(b)(i) or (iii) is not met in relation to the fuelling of the aircraft for the flight; or
 - (b) the aircraft is fuelled in a circumstance that is not mentioned in subparagraph (1)(b)(ii).
- (3) The pilot in command of an aircraft for a flight contravenes this subregulation if:
- (a) the aircraft is hot fuelled; and
 - (b) before the hot fuelling begins, a person who is directly involved with the hot fuelling has not been briefed about compliance with the procedures and circumstances mentioned in paragraph (1)(b).

- (4) A person commits an offence of strict liability if the person contravenes subregulation (1), (2), or (3).

Penalty: 50 penalty units.

91.510 Fuelling aircraft—persons on aircraft, boarding or disembarking

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if:
- (a) the aircraft is being fuelled for the flight with a highly volatile fuel; and

Part 91 General operating and flight rules

Subpart 91.D Operational procedures

Division 91.D.6 Fuel requirements

Regulation 91.515

- (b) the fuelling begins or continues when a person who is not a crew member of the aircraft is:
 - (i) on the aircraft; or
 - (ii) boarding the aircraft; or
 - (iii) disembarking from the aircraft.

- (2) The pilot in command of an aircraft for a flight contravenes this subregulation if:
 - (a) the aircraft is being fuelled with fuel other than a highly volatile fuel; and
 - (b) the fuelling begins or continues when a person who is not a crew member of the aircraft is:
 - (i) on the aircraft; or
 - (ii) boarding the aircraft; or
 - (iii) disembarking from the aircraft; and
 - (c) neither the operator of the aircraft nor the pilot in command holds an approval under regulation 91.045 to fuel the aircraft in those circumstances.

Note: This regulation does not apply to the operation of an aircraft if regulation 121.240, 133.195, 135.220 or 138.302 applies to the operation: see regulation 91.035.

- (2A) Subregulation (1) or (2) does not apply in relation to the replacement of fuel cylinders on a Part 131 aircraft.

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2A): see subsection 13.3(3) of the *Criminal Code*.

91.515 Fuelling aircraft if fuel vapour detected

- (1) The operator and the pilot in command of an aircraft for a flight each contravene this subregulation if:
 - (a) the aircraft is being fuelled for the flight; and
 - (b) a person who is not a crew member of the aircraft is:
 - (i) on the aircraft; or
 - (ii) boarding the aircraft; or
 - (iii) disembarking from the aircraft; and
 - (c) fuel vapour is detected in the aircraft; and
 - (d) the aircraft continues to be fuelled.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 91.D.7—Safety of persons on aircraft and cargo requirements

91.520 Crew members to be fit for duty

- (1) A crew member of an aircraft for a flight contravenes this subregulation if:
 - (a) the crew member is, or is likely to be, unfit to perform a duty:
 - (i) that is a required duty for the crew member to perform during the flight; and
 - (ii) that is related to the safety of the aircraft or of the persons on the aircraft or cargo on the aircraft; and
 - (b) the crew member begins to carry out the crew member's duties for the flight.
- (2) A crew member of an aircraft for a flight contravenes this subregulation if:
 - (a) the crew member carries out a duty for the flight; and
 - (b) either:
 - (i) the crew member consumes alcohol at any time during the period of 8 hours ending when the flight begins; or
 - (ii) if a test of a body sample of the crew member to determine the level of alcohol in the sample was taken at the time of carrying out the duty—the test would reveal that the permitted level for alcohol (within the meaning of Part 99) is exceeded.
- (3) A crew member of an aircraft for a flight contravenes this subregulation if the crew member consumes alcohol while on board the aircraft.
- (4) The operator of an aircraft for a flight contravenes this subregulation if:
 - (a) the operator believes on reasonable grounds that a crew member is unfit to perform a duty on the flight; and
 - (b) the duty relates to the safety of the aircraft or of the persons on the aircraft or cargo on the aircraft; and
 - (c) the operator assigns the crew member to duty for the flight.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (1), (2) or (3).

Penalty: 50 penalty units.
- (6) A person commits an offence if the person contravenes subregulation (4).

Penalty: 50 penalty units.
- (7) Strict liability applies to paragraphs (4)(b) and (c).
- (8) Without limiting subregulation (1) or (4), a crew member is taken to be, or is taken to be likely to be, unfit to perform a duty if:

Regulation 91.525

- (a) the crew member is fatigued to the extent that the crew member's ability to safely perform the duty is reduced or likely to be reduced; or
- (b) the crew member's ability to safely perform the duty is impaired, or likely to be impaired, because the crew member has consumed, used or absorbed a psychoactive substance.

91.525 Offensive or disorderly behaviour on aircraft

- (1) A person on an aircraft for a flight contravenes this subregulation if:
 - (a) the person behaves in an offensive or disorderly manner; and
 - (b) as a result of that behaviour, the safety of the aircraft or persons on the aircraft is endangered.
- (2) The operator or a crew member of an aircraft for a flight may refuse to allow a person to board the aircraft if there are reasonable grounds to believe that the person is likely to behave in an offensive or disorderly manner that is likely to endanger the safety of the aircraft or persons on the aircraft.
- (3) Without limiting subregulation (1) or (2), a person is taken to behave in an offensive or disorderly manner if the person:
 - (a) assaults, intimidates or threatens another person (whether the assault, intimidation or threat is verbal or physical, and whether or not a weapon or object is used); or
 - (b) intentionally damages or destroys property.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.530 When smoking not permitted

- (1) A person on an aircraft (other than a Part 103 aircraft) for a flight contravenes this subregulation if the person smokes:
 - (a) during take-off or landing; or
 - (b) during a period when the pilot in command has directed the person not to smoke.

Note: Section 37 of the *Air Navigation Regulation 2016* prohibits smoking anywhere on an aircraft if the aircraft is engaged in certain operations.

- (2) A person on an aircraft (other than a Part 103 aircraft) for a flight contravenes this subregulation if the person smokes in the aircraft's toilet.
- (3) For the purposes of paragraph (1)(b), the pilot in command is taken to have directed a person on an aircraft not to smoke if:
 - (a) a permanent "no smoking" sign is displayed in the aircraft's cabin; or
 - (b) the pilot has switched on an illuminated "no smoking" sign in the aircraft's cabin.

- (3A) A person on a Part 103 aircraft for a flight contravenes this subregulation if the person smokes on the aircraft.
- (4) For the purposes of this regulation, smoking is taken to include the use of electronic cigarettes.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (1), (2) or (3A).

Penalty: 50 penalty units.

91.535 Crew safety during turbulence

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if:
- (a) a crew member (other than a flight crew member) is carried on the flight; and
 - (b) before the flight begins, the pilot in command has not implemented procedures for:
 - (i) the protection of such crew members during turbulence or during a period when turbulence is expected; or
 - (ii) the limiting or ceasing of crew member duties during turbulence or during a period when turbulence is expected.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.540 Means of passenger communication

- (1) The operator and pilot in command of an aircraft for a flight each contravene this subregulation if:
- (a) due to the design or configuration of the aircraft, the pilot in command is unable to see all seats (and berths) on the aircraft from the pilot in command's pilot seat; and
 - (b) before the aircraft begins the flight, the aircraft is not fitted with a means to communicate with all passengers during all phases of the flight (including emergencies).
- (2) A person commits an offence if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.545 Seating for persons on aircraft

- (1) The operator and pilot in command of an aircraft for a flight each contravene this subregulation if:
- (a) a person is assigned a seat (or a berth) on the aircraft for the flight; and
 - (b) the seat or berth is not fitted with a seatbelt or shoulder harness; and
 - (c) the aircraft begins the flight.

Regulation 91.550

- (2) Subregulation (1) does not apply if circumstances prescribed by the Part 91 Manual of Standards apply in relation to the carriage of the person for the flight.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

91.550 Seating for flight crew members

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if, during the flight, a requirement mentioned in subregulation (2) is not met.
- (2) The requirements are the following:
 - (a) the flight must be conducted by at least one pilot who:
 - (i) for an Australian aircraft—holds a pilot licence and is permitted under regulation 61.385 to conduct the flight; or
 - (ii) for a foreign aircraft—is qualified to pilot the aircraft under the law of the aircraft's State of registry or the State of the operator;
 - (b) at all times during the flight, such a pilot must occupy a pilot seat, with the seatbelt securely fastened;
 - (c) during take-off, landing or any other period that the pilot in command directs, each flight crew member required for the flight must occupy the flight crew member's crew station with the seatbelt and shoulder harness securely fastened;
 - (d) when occupying a crew station on the flight deck other than a flight crew member's crew station, the flight crew member must keep the flight crew member's seatbelt securely fastened.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.555 Seating for crew members other than flight crew members

- (1) A crew member (other than a flight crew member) for a flight of an aircraft contravenes this subregulation if, during take-off, landing or any other period that the pilot in command directs, the crew member is not:
 - (a) occupying the crew member's crew station; and
 - (b) wearing, securely fastened, the seatbelts and shoulder harnesses provided at that station.

Note: This regulation does not apply to the operation of an aircraft if regulation 138.375 applies to the operation: see regulation 91.035.

- (2) Subregulation (1) does not apply if:
 - (a) a direction is given by the pilot in command during turbulence; and

Regulation 91.560

- (b) the crew member occupies a seat other than the crew member's crew station; and
 - (c) the crew member is wearing, securely fastened, the seatbelts and shoulder harnesses provided at that seat.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

91.560 Restraint of infants and children

- (1) A passenger on an aircraft for a flight contravenes this subregulation if, during the flight:
- (a) a direction is given to passengers under regulation 91.570 to fasten seatbelts or shoulder harnesses (as the case requires); and
 - (b) the passenger is responsible for an infant or child carried on the flight; and
 - (c) the passenger does not ensure that the infant or child is restrained in accordance with the requirements prescribed by the Part 91 Manual of Standards for the purposes of this paragraph.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.565 Passengers—safety briefings and instructions

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if:
- (a) a passenger is not given a safety briefing and instructions in accordance with the requirements prescribed by the Part 91 Manual of Standards for the purposes of this paragraph; and
 - (b) the aircraft takes off for the flight.

Note: This regulation does not apply to the operation of an aircraft if regulation 121.285, 133.240 or 135.280 applies to the operation: see regulation 91.035.

- (2) Subregulation (1) does not apply if:
- (a) the passenger has been previously carried on the aircraft; and
 - (b) the passenger has previously been given a safety briefing and instructions in accordance with this regulation; and
 - (c) in the circumstances it is not reasonably necessary to give the same safety briefing and instructions.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Part 91 General operating and flight rules

Subpart 91.D Operational procedures

Division 91.D.7 Safety of persons on aircraft and cargo requirements

Regulation 91.570

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

91.570 Passengers—safety directions by pilot in command

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if, before doing a thing mentioned in subregulation (2), a passenger is not directed to do the following:
- (a) to fasten the passenger's seatbelt or shoulder harness;
 - (b) if the seat back of the seat (or berth) in which the passenger is sitting is adjustable—to ensure that the seat back is in an upright position or other position permitted by the aircraft flight manual instructions for the aircraft while the aircraft is doing a thing mentioned in subregulation (2);
 - (c) if there are attachments to or for the seat (including a tray table or footrest)—to stow the attachments or to position them as permitted by the aircraft flight manual instructions for the aircraft while the aircraft is doing a thing mentioned in subregulation (2).

Note: This regulation does not apply to the operation of an aircraft if regulation 105.105 applies to the operation: see regulation 91.035.

- (2) The things are the following:
- (a) taxiing;
 - (b) taking off;
 - (c) landing.
- (3) The pilot in command of an aircraft for a flight contravenes this subregulation if:
- (a) the pilot in command has reason to believe it is necessary, for the safety of passengers, that a passenger's seatbelt or shoulder harness is fastened; and
 - (b) the pilot in command does not direct the passenger to fasten the passenger's seatbelt or shoulder harness.
- (4) For subregulations (1) and (3), a direction that seatbelts or shoulder harnesses are to be fastened may be given by the operation of an illuminated sign.
- (5) A direction mentioned in paragraph (1)(a) does not apply to a person occupying a seat (or berth) on an aircraft if:
- (a) the person's health may suffer a detriment by being restrained by a seatbelt; and
 - (b) the pilot in command agrees that the person is otherwise safely restrained.
- (6) A direction mentioned in paragraph (1)(b) does not apply to a person occupying a seat (or berth) on an aircraft if:
- (a) the person is ill or incapacitated; and
 - (b) the pilot in command agrees to the passenger not adjusting their seat (or berth); and
 - (c) the person is otherwise safely restrained and will not affect the safety of other passengers.

- (7) A person commits an offence of strict liability if the person contravenes subregulation (1) or (3).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulations (5) and (6): see subsection 13.3(3) of the *Criminal Code*.

91.575 Passengers—compliance with safety directions

- (1) A passenger on an aircraft for a flight contravenes this subregulation if, during the flight:
- (a) a direction mentioned in regulation 91.570 is given to the passenger; and
 - (b) the person does not comply with the direction.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.580 Passengers—compliance with safety instructions by cabin crew

- (1) A cabin crew member of an aircraft may, during a flight, give an instruction to a passenger:
- (a) relating to the safety of the aircraft; or
 - (b) relating to the safety of a person on the aircraft.
- (2) A passenger on the aircraft contravenes this subregulation if:
- (a) a cabin crew member gives a passenger an instruction under subregulation (1); and
 - (b) the passenger does not comply with the instruction.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

91.585 Restraint and stowage of cargo

- (1) This regulation does not apply in relation to the following kinds of cargo on an aircraft:
- (a) an assistance animal carried in a passenger cabin;
 - (b) carry-on baggage;
 - (c) equipment that is required or permitted under these Regulations to be carried on the aircraft without being restrained or stowed;
 - (d) cargo to be dropped from the aircraft during a dropping operation.
- (2) The operator and the pilot in command of an aircraft for a flight each contravene this subregulation if cargo carried on the flight is not:

Regulation 91.590

- (a) restrained using equipment that is approved under regulation 21.305 or 21.305A; or
 - (b) securely stowed in a place designed and approved for that purpose under Part 21; or
 - (c) for equipment of a foreign registered aircraft operating in Australian territory—restrained or stowed in accordance with any requirements under the law of the aircraft’s State of registry or the State of the operator.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

91.590 Restraint and stowage of carry-on baggage

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if:
- (a) either:
 - (i) the aircraft is taking off or landing; or
 - (ii) the pilot in command has directed that carry-on baggage be securely stowed; and
 - (b) an item of carry-on baggage is not:
 - (i) securely stowed in a place designed and approved under Part 21 (or in the case of a foreign aircraft, under the law of the aircraft’s State of registry or the State of the operator) for that purpose; or
 - (ii) otherwise safely restrained.

Note: This regulation does not apply to the operation of an aircraft if regulation 121.265 applies to the operation: see regulation 91.035.

- (2) A person commits an offence if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.595 Restraint and stowage of certain aircraft equipment

- (1) The operator and pilot in command of an aircraft for a flight each contravene this subregulation if:
- (a) either:
 - (i) the aircraft is taking off or landing; or
 - (ii) the pilot in command has directed that passenger service equipment or galley equipment be restrained or securely stowed; and
 - (b) the passenger service equipment or galley equipment is not restrained or securely stowed in a place intended for the purpose.

Note: This regulation does not apply to the operation of an aircraft if regulation 121.265 applies to the operation: see regulation 91.035.

- (2) A person commits an offence if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.600 Carriage of cargo—general

- (1) The operator and the pilot in command of an aircraft for a flight each contravene this subregulation if a requirement mentioned in subregulation (2) is not met for the flight.
- (2) The requirements are the following:
 - (a) cargo must not be carried in a place where the cargo may damage, obstruct or cause the failure of:
 - (i) a control, electrical wiring or a pipeline of the aircraft; or
 - (ii) any other equipment that is essential to the safe operation of the aircraft;
 - (b) cargo must not be carried in a place where the weight of the cargo exceeds the load limitations for the floor structure or any other load bearing components of that place, as set out:
 - (i) in the aircraft flight manual instructions for the aircraft; or
 - (ii) on a placard on the aircraft;
 - (c) cargo (other than passenger service equipment or galley equipment in an aisle on a temporary basis while in use) must not obstruct an aisle;
 - (d) either:
 - (i) cargo must not obstruct, or restrict access to, an emergency exit; or
 - (ii) the operator or the pilot in command must hold an approval from CASA under regulation 91.045 for cargo to be carried in a manner that obstructs, or restricts access to, the emergency exit.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.605 Carriage of cargo—cargo compartments

- (1) The operator and the pilot in command of an aircraft for a flight each contravene this subregulation if:
 - (a) more than one flight crew member is required for the flight; and
 - (b) cargo is carried in a cargo compartment; and
 - (c) the design of the cargo compartment is such that if a fire were to occur during the flight, a crew member would need to enter the compartment to extinguish the fire; and
 - (d) the cargo is not loaded in a manner to allow a crew member to reach, at any time during the flight, all parts of the compartment with the contents of a hand-held fire extinguisher.
- (2) A flight crew member is **required** for a flight if the flight crew member is one of the number of flight crew members required for the flight by:
 - (a) the aircraft flight manual instructions for the aircraft; or
 - (b) if a greater number is required by these Regulations—these Regulations.

Part 91 General operating and flight rules

Subpart 91.D Operational procedures

Division 91.D.7 Safety of persons on aircraft and cargo requirements

Regulation 91.610

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.610 Carriage of cargo—unoccupied seats

- (1) The operator and the pilot in command of an aircraft for a flight each contravene this subregulation if:

- (a) cargo is carried on an unoccupied seat in the aircraft; and
(b) a requirement mentioned in subregulation (2) is not met.

- (2) The requirements are the following:

- (a) the cargo must not weigh more than:
(i) 77 kg; or
(ii) if the seat manufacturer permits a greater weight for the seat—that weight;
(b) the cargo, and the means of restraint of the cargo, must not interfere with the safe operation of the aircraft.

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.615 Carriage of cargo—loading instructions

- (1) This regulation applies in relation to cargo other than cargo that:

- (a) is carry-on baggage that weighs less than 9 kg and is stowed under a seat or in a place designed for that purpose; or
(b) is carried on an unoccupied seat in accordance with regulation 91.610.

- (2) The operator and the pilot in command of an aircraft for a flight each contravene this subregulation if, during the flight, cargo is not carried in the aircraft in a place that has a placard bearing the instructions for the carriage of the cargo in that place.

- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

91.620 Carriage of animals

- (1) A person contravenes this subregulation if:

- (a) the person brings an animal onto an aircraft for a flight; and
(b) the person does not have permission from the pilot in command of the aircraft to do so.

- (2) The pilot in command of an aircraft for a flight contravenes this subregulation if:

Regulation 91.620

- (a) the pilot in command of the aircraft gives permission for a person to bring an animal onto the aircraft for the flight; and
 - (b) the pilot in command does not take reasonable steps to ensure that carriage of the animal does not have an adverse effect on the safety of air navigation.
- (3) The operator or the pilot in command of an aircraft for a flight may refuse to carry an assistance animal (within the meaning of the *Disability Discrimination Act 1992*) in the aircraft for the flight if the operator or pilot in command reasonably believes that the carriage of the animal for the flight may have an adverse effect on the safety of air navigation.
- (4) Subregulation (3) has effect despite anything in the *Disability Discrimination Act 1992*.
- (5) The Part 91 Manual of Standards may prescribe requirements relating to the carriage of animals on an aircraft for a flight.
- (6) The pilot in command of an aircraft for a flight contravenes this subregulation if:
- (a) the pilot in command is subject to a requirement mentioned in subregulation (5); and
 - (b) the requirement is not met for the flight.
- (7) The operator of an aircraft for a flight contravenes this subregulation if:
- (a) the operator is subject to a requirement mentioned in subregulation (5); and
 - (b) the requirement is not met for the flight.
- (8) A person commits an offence of strict liability if the person contravenes subregulation (1), (2), (6) or (7).

Penalty: 50 penalty units.

Division 91.D.8—Instruments, indicators, equipment and systems

91.625 Use of radio—qualifications

- (1) A person contravenes this subregulation if:
 - (a) the person transmits on a radio frequency published in the AIP or NOTAMs that is:
 - (i) used by Air Traffic Services; or
 - (ii) used for communications at a certified aerodrome, a registered aerodrome, a military aerodrome or an aerodrome prescribed as a designated non-controlled aerodrome by the Part 91 Manual of Standards for the purposes of subparagraph 91.400(1)(a)(iv); or
 - (iii) used in aeronautical emergencies; or
 - (iv) of a kind prescribed by the Part 91 Manual of Standards for this subparagraph; and
 - (b) the person is not authorised or qualified to do so:
 - (i) for an Australian aircraft (other than a Part 103 aircraft or a Part 131 aircraft)—under Part 61, 64 or 65; or
 - (ii) for a foreign registered aircraft—under the law of the aircraft’s State of registry or the State of the operator; or
 - (iii) for a Part 103 aircraft—by a Part 103 ASAO; or
 - (iv) for a Part 131 aircraft—by a Part 131 pilot authorisation.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.630 Use of radio—broadcasts and reports

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if:
 - (a) the aircraft is fitted with, or carries, a radio; and
 - (b) during the flight, the pilot in command does not make a broadcast or a report relating to the flight that is prescribed by the Part 91 Manual of Standards for this paragraph.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.635 Communication monitoring in controlled airspaces

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if:
 - (a) during the flight, the aircraft is flown in controlled airspace; and

(b) the pilot in command does not continuously monitor the primary communications medium used by air traffic control while flying in that airspace.

(2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.640 Use of radio outside controlled airspaces—listening watch of radio transmissions

(1) The pilot in command of an aircraft for a flight contravenes this subregulation if:

- (a) the aircraft is fitted with, or carries, a radio; and
- (b) the aircraft is flown by a pilot who is qualified, eligible or authorised to use the radio:
 - (i) for an Australian aircraft (other than a Part 103 aircraft or a Part 131 aircraft)—under Part 61 or 64; or
 - (ii) for a foreign registered aircraft—under a law of the aircraft’s State of registry or the State of the operator; or
 - (iii) for a Part 103 aircraft—by a Part 103 ASAO; or
 - (iv) for a Part 131 aircraft—by a Part 131 pilot authorisation; and
- (c) the aircraft is outside controlled airspace; and
- (d) radio transmissions are not continuously monitored by:
 - (i) the pilot in command of the aircraft for the flight; or
 - (ii) another pilot who occupies a pilot seat during the flight.

(2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.645 Availability of instructions for flight data and combination recorders

(1) The operator of an aircraft for a flight contravenes this subregulation if, when the aircraft begins the flight:

- (a) the aircraft is required to be fitted with a flight data recorder or combination recorder by these Regulations; and
- (b) the operator does not have the instructions for the recorder available for immediate provision to the Australian Transport Safety Bureau.

(2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Regulation 91.650

91.650 Flight recorders—preserving recordings of immediately reportable matters

- (1) The operator of an aircraft for a flight contravenes this subregulation if:
 - (a) the aircraft is fitted with an operative flight data recorder, operative cockpit voice recorder or operative combination recorder; and
 - (b) an immediately reportable matter occurs in relation to the aircraft; and
 - (c) the requirement mentioned in subregulation (2) is not met.
- (2) The requirement is that recordings from the flight data recorder, cockpit voice recorder and combination recorder related to the occurrence of the matter, and the recorders, are preserved:
 - (a) if the Australian Transport Safety Bureau notifies the operator, within 72 hours of the matter being reported to the Australian Transport Safety Bureau under section 18 of the *Transport Safety Investigation Act 2003*:
 - (i) that the operator is not required to preserve the recordings and recorders—until the time of that notification; or
 - (ii) that the operator is required to preserve the recordings and recorders for a certain period—until the end of that period; or
 - (iii) that the operator is required to preserve the recordings for a certain period but is not required to preserve the recorders—until the end of that period for the recordings, and until the time of that notification for the recorders; or
 - (b) in any other case—until 72 hours after the matter is reported to the Australian Transport Safety Bureau under section 18 of the *Transport Safety Investigation Act 2003*.
- (3) Subregulation (1) does not apply if:
 - (a) the recordings or recorders are not preserved; and
 - (b) the operator took reasonable steps in the circumstances to preserve the recordings or recorders.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (3): see subsection 13.3(3) of the *Criminal Code*.

91.655 RVSM airspace

- (1) The operator and the pilot in command of an aircraft for a flight each contravene this subregulation if:
 - (a) the aircraft is flown in RVSM airspace; and
 - (b) the requirement mentioned in subregulation (2) is not met.
- (2) The requirement is that either or both of the following apply:
 - (a) the operator of the aircraft holds:

- (i) for an Australian aircraft—an approval under regulation 91.045; or
 - (ii) for a foreign aircraft—an approval by the national aviation authority of the aircraft's State of registry or of the State of the operator;
- for the aircraft to be flown in RVSM airspace;
- (b) the pilot in command has been given an air traffic control clearance or an air traffic control instruction for the aircraft to be flown in the RVSM airspace.
- (3) The pilot in command of an aircraft for a flight contravenes this subregulation if:
- (a) the aircraft is in RVSM airspace; and
 - (b) the aircraft becomes unable to operate with RVSM separation; and
 - (c) the pilot in command does not inform air traffic control as soon as practicable after the aircraft becomes unable to operate with RVSM separation.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).
- Penalty: 50 penalty units.
- (5) A person commits an offence if the person contravenes subregulation (3).
- Penalty: 50 penalty units.

91.660 Performance-based navigation

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if:
- (a) the flight, or any part of the flight, is conducted using a navigation specification prescribed by the Part 91 Manual of Standards for the purposes of this paragraph; and
 - (b) neither the operator of the aircraft for the flight nor the pilot in command holds:
 - (i) for an Australian aircraft—an approval under regulation 91.045; or
 - (ii) for a foreign registered aircraft—an approval by the national aviation authority of the aircraft's State of registry or of the State of the operator;to use that navigation specification during the flight or part of the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).
- Penalty: 50 penalty units.

Part 91 General operating and flight rules

Subpart 91.D Operational procedures

Division 91.D.9 Miscellaneous

Division 91.D.9—Miscellaneous

Note: This Division is reserved for future use.

Division 91.D.10—Signals, emergencies and hazards

91.670 Standard visual signals

- (1) A person contravenes this subregulation if:
 - (a) the person displays a signal to an aircraft other than a glider for the purposes of marshalling the aircraft; and
 - (b) the signal is not a standard visual signal.
- (2) A person contravenes this subregulation if:
 - (a) the person displays a standard visual signal to an aircraft; and
 - (b) the safety of the aircraft, or of any person or property, is likely to be endangered as a result of the display of the signal.
- (3) The pilot in command of an aircraft for a flight contravenes this subregulation if:
 - (a) a standard visual signal is displayed to the aircraft during the flight; and
 - (b) the pilot in command does not comply with the signal.
- (4) Subregulation (3) does not apply if the pilot in command reasonably believes that compliance with the signal is likely to endanger the safety of the aircraft or of any person or property.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (1), (2) or (3).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (4): see subsection 13.3(3) of the *Criminal Code*.

91.675 Pilot in command to report hazards to air navigation

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if:
 - (a) the pilot in command becomes aware that a hazard to air navigation exists; and
 - (b) information about the hazard is not published in the authorised aeronautical information for the flight; and
 - (c) the pilot in command does not, as soon as circumstances permit, report the hazard to:
 - (i) Air Traffic Services; and
 - (ii) if the hazard is on an aerodrome—the operator of the aerodrome.
 - (2) Subregulation (1) does not apply if:
 - (a) the pilot believes that the hazard has previously been reported as required by subregulation (1); and
 - (b) the belief is reasonable in the circumstances.
 - (3) A person commits an offence of strict liability if the person contravenes subregulation (1).
-

Regulation 91.680

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

91.680 Pilot in command to report emergencies

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if, during the flight:
 - (a) an emergency occurs that threatens the safety of the aircraft or the persons on the aircraft; and
 - (b) the aircraft is fitted with, or carries, a means for the pilot in command to communicate with Air Traffic Services; and
 - (c) it is practicable to inform Air Traffic Services of the emergency; and
 - (d) the pilot does not inform Air Traffic Services, at the time that it is practicable to do so, of:
 - (i) the emergency; and
 - (ii) if the aircraft is carrying dangerous goods—the nature and state of the goods.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.685 Multi-engine aircraft—pilot in command to land at nearest suitable aerodrome if emergency occurs

- (1) The pilot in command of a multi-engine aircraft for a flight contravenes this subregulation if, during the flight:
 - (a) an emergency occurs that threatens the safety of the aircraft or the persons on the aircraft; and
 - (b) the pilot does not land at the aerodrome that is, in the circumstances, the nearest suitable aerodrome for the aircraft to land at.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.690 Pilot in command to report contraventions relating to emergencies

- (1) The operator and the pilot in command of an aircraft for a flight each contravene this subregulation if:
 - (a) during the flight, an emergency occurs that threatens the safety of the aircraft or the persons on the aircraft; and
 - (b) the emergency requires the pilot flying the aircraft to take action that involves a contravention of a provision of these Regulations; and

Regulation 91.695

- (c) neither the operator nor the pilot in command give CASA written notice, in the approved form, of the contravention and the circumstances of the contravention, within 2 business days after the day the emergency occurs.
- (2) The pilot in command is not excused from giving notice under subregulation (1) on the ground that the giving of the notice, or the information in the notice, might tend to incriminate the pilot in command or expose the pilot in command to a penalty.
- (3) The following are not admissible in evidence against the pilot in command in criminal proceedings other than proceedings for an offence against subsection 136.1(1) or (4), 137.1(1) or 137.2(1) of the *Criminal Code*:
 - (a) the information in the notice;
 - (b) any information, document or thing obtained as a direct or indirect consequence of giving the notice.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.695 Interception of aircraft

- (1) The Part 91 Manual of Standards may prescribe requirements to be met if an aircraft is intercepted by another aircraft during a flight.
- (2) The pilot in command of an aircraft for a flight contravenes this subregulation if:
 - (a) the aircraft is intercepted by another aircraft during the flight; and
 - (b) a requirement mentioned in subregulation (1) is not met for the flight.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

91.700 Aviation distress signals

- (1) A person on an aircraft for a flight contravenes this subregulation if:
 - (a) the person has made an aviation distress signal; and
 - (b) the reason for making the signal no longer exists; and
 - (c) the state of the aircraft's radio and the location of the aircraft are such that the signal is able to be cancelled; and
 - (d) the person does not cancel the signal as soon as circumstances permit.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 25 penalty units.

Regulation 91.705

91.705 Flight in icing conditions—adherence of frost, ice or snow

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if, when the aircraft begins the flight, frost, ice or snow is adhering to any of the aircraft's wings, flaps, control surfaces, rotors, propellers, horizontal stabilisers or vertical stabilisers.
- (2) The pilot in command of an aircraft for a flight contravenes this subregulation if, when the aircraft begins a flight:
 - (a) the aircraft has frost, ice or snow adhering to the top of the aircraft's fuselage; and
 - (b) either:
 - (i) the aircraft has rear-mounted engines; or
 - (ii) the adherence of the frost, ice or snow to the top of the aircraft's fuselage is a hazard to the safe operation of the aircraft for the flight.
- (3) Subregulation (1) or (2) does not apply if the take-off for the flight is conducted in accordance with the aircraft flight manual instructions for the aircraft that relate to taking off under the conditions mentioned in that subregulation.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (3): see subsection 13.3(3) of the *Criminal Code*.

91.710 Flight in icing conditions—requirements for flight

- (1) This regulation applies to a flight of an aircraft if:
 - (a) when the flight begins, icing conditions are known or suspected for the flight path along which the aircraft will be flown; or
 - (b) both:
 - (i) during the flight, the aircraft flies into icing conditions; and
 - (ii) the pilot in command does not, as soon as practicable, change the aircraft's flight path to try and avoid the icing conditions.
- (2) The pilot in command of an aircraft for a flight contravenes this subregulation if, when the flight began, the aircraft was not type certificated as complying with the airworthiness standards relating to flight in icing conditions.
- (3) A person commits an offence if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Division 91.D.11—Causing or simulating failures etc.

Subdivision 91.D.11.1—Causing or simulating instrument failure etc.

91.715 Causing or simulating failure of flight instruments

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if, during the flight:
 - (a) the failure of an instrument of any of the following kinds is caused or simulated:
 - (i) an attitude indicator;
 - (ii) a gyrocompass or an equivalent instrument;
 - (iii) an airspeed indicator;
 - (iv) an altimeter; and
 - (b) a requirement mentioned in subregulation (2) is not met.
- (2) The requirements are the following:
 - (a) the flight must be conducted for the purpose of pilot training, checking or testing;
 - (b) only crew members that are required for the training, checking or testing are carried on the flight;
 - (c) a person who is authorised to pilot the aircraft under Part 61, by a Part 103 ASAO or by a Part 131 pilot authorisation (or in the case of a foreign aircraft, under the law of the aircraft's State of registry or the State of the operator):
 - (i) must occupy a pilot seat fitted with a fully functioning set of flight controls; and
 - (ii) if the flight is in IMC or at night—must have a clear view of an operative instrument of the same kind as the instrument subjected to failure or simulated failure.
- (3) Subregulation (1) does not apply if the pilot in command is carrying out:
 - (a) a maintenance test flight; or
 - (b) a procedure to diagnose or isolate a failure of an instrument or system.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (3): see subsection 13.3(3) of the *Criminal Code*.

91.720 Simulating IMC flying

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if:
 - (a) during the flight, IMC are simulated; and
-

Regulation 91.725

(b) a requirement mentioned in subregulation (2) is not met.

(2) The requirements are the following:

(a) a pilot (the **safety pilot**) must:

- (i) occupy a pilot seat fitted with fully functioning flight controls; and
- (ii) have adequate vision forward and to each side of the aircraft;

(b) a pilot (the **second pilot**) flying the aircraft under simulated IMC must occupy a pilot seat fitted with fully functioning flight controls;

(c) the safety pilot must be authorised or qualified to pilot the aircraft:

- (i) for an Australian aircraft—under Part 61; or
- (ii) for a foreign registered aircraft—under the law of the aircraft’s State of registry or the State of the operator.

Note: If the flight manual for an aircraft requires that it be flown by 2 pilots, Part 61 requires both pilots to have a type rating for the aircraft.

(3) A person commits an offence if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.725 Training flight limitations etc.

(1) In this regulation:

permitted person, in relation to an aircraft, means:

- (a) a crew member of the aircraft; or
- (b) a person authorised by the operator of the aircraft to conduct an audit of the operation involved, or to supervise it; or
- (c) an authorised officer carrying out an examination, inspection or test of the work of the aircraft’s crew under these Regulations.

(2) The pilot in command of an aircraft for a flight contravenes this subregulation if, during the flight:

- (a) a person other than a permitted person is carried on the aircraft; and
- (b) the pilot in command permits any of the following:
 - (i) flight training for a flight crew member who does not hold a class rating or type rating for the aircraft;
 - (ii) the simulation (other than verbally) of an emergency or abnormal situation that may affect the handling characteristics of the aircraft;
 - (iii) training below 500 ft AGL (other than training for take-off and landing);
 - (iv) training mentioned in Part 61 for a low-level rating, an aerial application rating, an aerobatic endorsement or a spinning endorsement, or training for an equivalent qualification under a law of a foreign country.

(3) The pilot in command of an aircraft for a flight contravenes this subregulation if, during the flight:

- (a) a person other than the following is carried on the aircraft:

- (i) a permitted person;
 - (ii) a member of the aircraft's maintenance personnel who is required, as part of the member's duties, to be on the aircraft; and
 - (b) the pilot in command permits a test of the aircraft, or any of its instruments, indicators, items of equipment or systems (other than a test of the aircraft during the course of checks associated with the normal operation of the aircraft).
- (4) The pilot in command of an aircraft for a flight contravenes this subregulation if:
- (a) for a flight for which the activity mentioned in subparagraph (2)(b)(i) is permitted—more than 4 permitted persons, including the pilot, are on the aircraft; or
 - (b) for a flight for which the activity mentioned in subparagraph (2)(b)(ii) or (iv) is permitted—more than 3 permitted persons, including the pilot, are on the aircraft.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (2), (3) or (4).

Penalty: 50 penalty units.

Subdivision 91.D.11.2—Causing or simulating engine failure etc. for aeroplanes

91.730 Aeroplane flights in IMC or at night—engine not to be shut down

- (1) The pilot in command of an aeroplane for a flight contravenes this subregulation if:
- (a) the flight is in IMC or at night; and
 - (b) an engine of the aeroplane is shut down during the flight.
- (2) A person commits an offence if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.735 Single-engine aeroplane—VFR flights by day—engine not to be shut down

- (1) The pilot in command of a single-engine aeroplane for a flight contravenes this subregulation if:
- (a) the flight is a VFR flight by day; and
 - (b) the engine of the aeroplane is shut down during the flight; and
 - (c) a requirement mentioned in subregulation (2) is not met.
- (2) The requirements are the following:
- (a) the flight must be conducted for the purpose of pilot training, checking or testing;
 - (b) only flight crew members are carried on the flight;

Regulation 91.740

- (c) the pilot in command must hold a flight instructor rating, flight examiner rating or other authorisation under these Regulations that authorises the activity of shutting down an engine;
 - (d) while the engine is shut down, the aeroplane must remain within gliding distance of a safe forced landing area.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.740 Single-engine aeroplane—simulating engine failure in IMC or at night

- (1) The pilot in command of a single-engine aeroplane for a flight contravenes this subregulation if:
- (a) the flight is:
 - (i) in IMC; or
 - (ii) at night; and
 - (b) a failure of the aeroplane's engine is simulated during the flight; and
 - (c) a requirement mentioned in subregulation (2) is not met.
- (2) The requirements are the following:
- (a) the flight must be conducted for the purpose of pilot training, checking or testing;
 - (b) only flight crew members are carried on the flight;
 - (c) the pilot in command must hold a flight instructor rating, flight examiner rating or other authorisation under these Regulations that authorises the activity of simulating an engine failure;
 - (d) for a simulation at night:
 - (i) the simulation must commence above 1,000 ft AGL; and
 - (ii) while the engine failure is being simulated, the aeroplane must remain within gliding distance of a lighted runway available for landing;
 - (e) for a simulation in IMC:
 - (i) the simulation must commence above the lowest safe altitude for the route or route segment of the flight; and
 - (ii) VMC conditions must exist below that altitude.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.745 Multi-engine aeroplane—simulating engine failure—general

- (1) The pilot in command of a multi-engine aeroplane for a flight contravenes this subregulation if, during the flight:
- (a) an engine failure is simulated; and
 - (b) the requirement mentioned in subregulation (2) is not met.

- (2) The requirement is that one of the following must apply to the aeroplane:
- (a) the aeroplane must be type certificated to carry not more than 9 passengers, or must have a maximum take-off weight of not more than 8,618 kg;
 - (b) for an aeroplane that is type certificated to carry more than 9 passengers but not more than 19 passengers:
 - (i) there must be no flight simulator for the type of aeroplane in Australia; or
 - (ii) if subparagraph (i) does not apply—the operator must hold an approval from CASA under regulation 91.045 to simulate the failure of the engine;
 - (c) for an aircraft that is type certificated to carry more than 19 passengers:
 - (i) there must be no flight simulator for the type of aeroplane in Australia; and
 - (ii) there must be no flight simulator approved by a recognised national aviation authority in a foreign country for the type of aeroplane; and
 - (iii) if subparagraphs (i) and (ii) do not apply—the operator must hold an approval from CASA under regulation 91.045 to simulate the failure of the engine;
 - (d) the aeroplane must be conducting a flight of the following kind in accordance with the requirements in Subpart 91.T for the kind of flight:
 - (i) a test flight of an aircraft for which a provisional certificate of airworthiness is in force;
 - (ii) if a special flight permit allows the aeroplane to simulate a failure of the engine—a flight under the special flight permit;
 - (iii) if an experimental certificate allows the aeroplane to simulate a failure of the engine—a flight under the experimental certificate.
- (3) An application for an approval mentioned in subparagraph (2)(b)(ii) or (2)(c)(iii) must include a safety risk management plan.
- (4) A person commits an offence if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.750 Multi-engine aeroplane—simulating engine failures in IMC or at night

- (1) The pilot in command of a multi-engine aeroplane for a flight contravenes this subregulation if:
- (a) the flight is:
 - (i) in IMC; or
 - (ii) at night; and
 - (b) a failure of one of the aeroplane's engines is simulated during the flight; and
 - (c) a requirement mentioned in subregulation (2) is not met.
- (2) The requirements are the following:

Regulation 91.750

- (a) the pilot in command must hold a flight instructor rating, flight examiner rating or other authorisation under these Regulations that authorises the activity of simulating an engine failure;
 - (b) the flight must be conducted for the purpose of pilot training, checking or testing;
 - (c) only flight crew members are carried on the flight;
 - (d) the pilot in command must brief the pilot under instruction before the simulation and must supervise the simulation;
 - (e) for an aeroplane flown in IMC that is not conducting an approach to land mentioned in paragraph (f)—the aeroplane must be at or above the minimum height mentioned in subregulation 91.305(2);
 - (f) for an aeroplane conducting an asymmetric instrument approach and missed approach:
 - (i) the simulation must be initiated above the initial approach altitude; and
 - (ii) the flight must be conducted with visual reference to the terrain when below a height of 1,000 ft above the relevant minima according to the aeronautical chart in use for the approach;
 - (g) for an aeroplane flown at night in VMC—the aeroplane must be flown:
 - (i) if the aeroplane is not conducting an approach to land or within the circling area of an aerodrome—above the minimum height mentioned in subregulation 91.305(2) or 91.277(2) (as the case requires); or
 - (ii) if the aeroplane is conducting an approach to land and is not within the circling area of an aerodrome—in accordance with an authorised instrument approach procedure; or
 - (iii) within the circling area of an aerodrome (as determined in accordance with the method specified in the authorised aeronautical information for the flight for determining the circling area for the aerodrome);
 - (h) for an aeroplane flown at night in VMC—the simulation must be initiated at or above circuit height and not below 1,000 ft AGL;
 - (i) the simulation must be carried out in accordance with procedures specified in:
 - (i) the aircraft flight manual instructions for the aeroplane (if any); or
 - (ii) if procedures are not specified in the aircraft flight manual instructions for the aeroplane, and the operator of the aeroplane is required to have an exposition by these Regulations—the exposition; or
 - (iii) if procedures are not specified in the aircraft flight manual instructions for the aeroplane, and the operator of the aeroplane is not required to have an exposition by these Regulations—the operator's operations manual.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Subdivision 91.D.11.3—Causing or simulating engine failure etc. for rotorcraft

91.755 Single-engine rotorcraft—engine not to be shut down

- (1) The pilot in command of a single-engine rotorcraft for a flight contravenes this subregulation if, during the flight, the engine is shut down.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.760 Single-engine rotorcraft—engine failure not to be simulated and autorotation of main rotor system not to be initiated in IMC

- (1) The pilot in command of a single-engine rotorcraft for a flight in IMC contravenes this subregulation if:
 - (a) a failure of the rotorcraft's engine is simulated during the flight; or
 - (b) an autorotation of the rotorcraft's main rotor system is initiated.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.765 Single-engine rotorcraft—simulating engine failure or initiating autorotation of main rotor system at night

- (1) The pilot in command of a single-engine rotorcraft for a flight contravenes this subregulation if:
 - (a) the flight is at night; and
 - (b) during the flight, a failure of the rotorcraft's engine is simulated or an autorotation of the rotorcraft's main rotor system is initiated; and
 - (c) the rotorcraft is not:
 - (i) taxiing or hovering below the hover height for the surface specified in the aircraft flight manual instructions for the rotorcraft; or
 - (ii) at a height at or above 1,000 ft AGL; and
 - (d) a requirement mentioned in subregulation (2) is not met.
- (2) The requirements are the following:
 - (a) the pilot in command must hold a flight instructor rating, flight examiner rating or other authorisation under these Regulations that authorises the activity of simulating an engine failure or initiating an autorotation of the main rotor system (as the case requires);
 - (b) the flight must be carried out for the purpose of pilot training, checking or testing;
 - (c) only flight crew members are carried on the flight;

Regulation 91.770

- (d) the pilot in command must brief the pilot under instruction before the simulation or autorotation and must supervise the simulation or autorotation;
 - (e) the simulation or autorotation must be carried out in VMC; and
 - (f) power termination of the autorotation must be initiated so that full power is available before the rotorcraft goes below 100 ft AGL;
 - (g) the autorotation must be terminated using a power recovery termination or a baulked approach and climb out;
 - (h) the simulation or autorotation must be conducted at an aerodrome with omnidirectional runway lighting.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.770 Multi-engine rotorcraft—engine not to be shut down at certain altitudes in IMC or at night

- (1) The pilot in command of a multi-engine rotorcraft for a flight contravenes this subregulation if:
- (a) the flight is:
 - (i) in IMC; or
 - (ii) at night; and
 - (b) an engine of the rotorcraft is shut down during the flight; and
 - (c) the rotorcraft is not at or above the lowest safe altitude for a route or route segment for the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.775 Multi-engine rotorcraft—simulating engine failure in IMC or at night

- (1) The pilot in command of a multi-engine rotorcraft for a flight contravenes this subregulation if:
- (a) the flight is:
 - (i) in IMC; or
 - (ii) at night; and
 - (b) a failure of one of the rotorcraft's engines is simulated during the flight; and
 - (c) a requirement mentioned in subregulation (2) is not met.
- (2) The requirements are the following:
- (a) the pilot in command must hold a flight instructor rating, flight examiner rating or other authorisation under these Regulations that authorises the activity of simulating an engine failure in a multi-engine rotorcraft;

- (b) the flight must be for the purpose of pilot training, checking or testing;
 - (c) only flight crew members are carried on the flight;
 - (d) the pilot in command must brief the pilot under instruction before the simulation and must supervise the simulation;
 - (e) for a rotorcraft flown in IMC—the rotorcraft must be established at or above the lowest safe altitude for a route or route segment for the flight;
 - (f) for a rotorcraft flown at night in VMC:
 - (i) the rotorcraft must be flown within the circling area of an aerodrome (as determined in accordance with the method specified in the authorised aeronautical information for the flight determining the circling area for the aerodrome); and
 - (ii) in the climb during take-off, the simulation must be initiated before the take-off decision point, or above 500 ft AGL; and
 - (iii) after the climb during take-off, the simulation must be initiated at or above 1,000 ft AGL;
 - (g) the simulation must be carried out in accordance with:
 - (i) procedures specified in the aircraft flight manual instructions for the rotorcraft (if any); or
 - (ii) if procedures are not specified in the aircraft flight manual instructions for the rotorcraft, and the operator of the rotorcraft is required by these Regulations to have an exposition—the exposition; or
 - (iii) if procedures are not specified in the aircraft flight manual instructions for the rotorcraft, and the operator of the rotorcraft is not required by these Regulations to have an exposition—the operator's operations manual.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 91.D.12—Psychoactive substances

91.780 Passengers—alcohol

- (1) A passenger on an aircraft for a flight contravenes this subregulation if:
 - (a) the passenger consumes alcohol; and
 - (b) either:
 - (i) a crew member has not provided the alcohol to the passenger; or
 - (ii) if there is no crew member other than the pilot in command on the aircraft—the pilot in command has not permitted the passenger to consume the alcohol.

- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.785 Crew—provision of alcohol

- (1) A crew member of an aircraft for a flight contravenes this subregulation if:
 - (a) the crew member provides alcohol to a passenger on the aircraft; and
 - (b) there are reasonable grounds to believe the passenger is affected by one or more psychoactive substances to an extent that the passenger's behaviour may present a hazard to the aircraft or to a person on the aircraft.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.790 Prohibiting person affected by psychoactive substances from boarding

The operator, or a crew member, of an aircraft for a flight may prohibit a person from boarding the aircraft if there are reasonable grounds to believe that the person is affected by a psychoactive substance to an extent that may present a hazard to the aircraft or to a person on the aircraft.

Subpart 91.F—Performance

Note: This Subpart does not apply to the operation of an aircraft if Subpart 121.F, 133.F, 135.F or 138.F applies to the operation: see regulation 91.035.

91.795 Take-off performance

- (1) The Part 91 Manual of Standards may prescribe requirements relating to take-off performance for a flight of an aircraft.
- (2) Without limiting subregulation (1), the Part 91 Manual of Standards may prescribe requirements that relate to one or more of the following:
 - (a) the aircraft's configuration;
 - (b) the operation of any equipment for the flight;
 - (c) characteristics of the aerodrome at which the aircraft takes off;
 - (d) characteristics of the route flown by the aircraft;
 - (e) characteristics of the aerodrome at which the aircraft lands.
- (3) The pilot in command of an aircraft for a flight contravenes this subregulation if:
 - (a) the pilot is subject to a requirement mentioned in subregulation (1) for the flight; and
 - (b) the requirement is not met for the flight.
- (4) The operator of an aircraft for a flight contravenes this subregulation if:
 - (a) the operator is subject to a requirement mentioned in subregulation (1) for the flight; and
 - (b) the requirement is not met for the flight.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (3) or (4).

Penalty: 50 penalty units.

91.800 Landing performance

- (1) The Part 91 Manual of Standards may prescribe requirements relating to landing performance for a flight of an aircraft.
- (2) Without limiting subregulation (1), the Part 91 Manual of Standards may prescribe requirements relating to one or more of the following:
 - (a) the aircraft's configuration;
 - (b) the operation of any equipment for the flight;
 - (c) characteristics of the aerodrome at which the aircraft lands;
 - (d) safety factor percentages to be applied.
- (3) The pilot in command of an aircraft for a flight contravenes this subregulation if:
 - (a) the pilot is subject to a requirement mentioned in subregulation (1) for the flight; and

Regulation 91.800

- (b) the requirement is not met for the flight.
- (4) The operator of an aircraft for a flight contravenes this subregulation if:
 - (a) the operator is subject to a requirement mentioned in subregulation (1) for the flight; and
 - (b) the requirement is not met for the flight.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (3) or (4).

Penalty: 50 penalty units.

Subpart 91.J—Weight and balance

Note: This Subpart does not apply to the operation of an aircraft if Subpart 121.J, 133.J, 135.J or 138.J applies to the operation: see regulation 91.035.

91.805 Loading of aircraft

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if, when the flight begins the aircraft is loaded in a way that contravenes the aircraft's weight and balance limits.
- (2) The pilot in command of an aircraft for a flight contravenes this subregulation if, during the flight, the aircraft ceases to be operated in accordance with the aircraft's weight and balance limits.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

Regulation 91.810

Subpart 91.K—Equipment

Note: This Subpart does not apply to the operation of an aircraft if Subpart 121.K, 133.K or 135.K applies to the operation: see regulation 91.035.

91.810 Requirements relating to equipment

- (1) The Part 91 Manual of Standards may prescribe requirements relating to:
 - (a) the fitment and non-fitment of equipment to an aircraft; and
 - (b) the carrying of equipment on an aircraft; and
 - (c) equipment that is fitted to, or carried on, an aircraft.
- (2) A person contravenes this subregulation if:
 - (a) the person is subject to a requirement mentioned in subregulation (1); and
 - (b) the requirement is not met.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Subpart 91.P—Cabin crew

Note: This Subpart does not apply to the operation of an aircraft if Subpart 121.P, 133.P or 135.P applies to the operation: see regulation 91.035.

91.820 Cabin crew—when required

- (1) Subject to subregulations (2) and (3), a cabin crew member must be carried on a flight of an aircraft if 20 or more passengers are carried on the flight.
- (2) Subregulation (1) does not apply if the flight involves a parachuting activity to which Part 105 applies.
- (3) Subregulation (1) does not apply if:
 - (a) the flight crew for the flight includes at least 2 pilots; and
 - (b) no more than 22 passengers are carried on the flight; and
 - (c) no more than 19 of the passengers are adults or children.

91.825 Cabin crew—number

- (1) The operator and the pilot in command of an aircraft for a flight each contravene this subregulation if:
 - (a) under regulation 91.820, a cabin crew member must be carried on the flight; and
 - (b) when the aircraft begins the flight, the number of cabin crew members for the flight is not at least equal to the sum of one cabin crew member for each 50, or part of 50, passengers carried on the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.830 Cabin crew—knowledge of emergency and safety equipment and procedures

- (1) This regulation applies in relation to a flight of an aircraft if, under regulation 91.820, a cabin crew member must be carried on the flight.
- (2) The operator, a cabin crew member, and the pilot in command, of an aircraft for a flight each contravene this subregulation if:
 - (a) the cabin crew member is not competent to:
 - (i) operate and use emergency and safety equipment on the aircraft that is relevant to the cabin crew member's duties; and
 - (ii) implement emergency evacuation procedures for the aircraft; and
 - (b) the cabin crew member begins to carry out cabin crew member duties for the flight.

Regulation 91.830

- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Subpart 91.T—Operations under certain special certificates of airworthiness and special flight permits

Division 91.T.1—Preliminary

91.835 Aircraft with more than one certificate of airworthiness—application of Subpart 91.T

If a certificate of airworthiness in more than one category has been issued for an aircraft, this Subpart applies in relation to the operation of the aircraft only for the category in relation to which the aircraft is being operated.

Division 91.T.2—Restricted category aircraft—operating requirements

91.840 Restricted category aircraft—general operating requirements

- (1) The operator and the pilot in command of an aircraft for a flight each contravene this subregulation if:
 - (a) a special certificate of airworthiness in the restricted category has been issued for the aircraft; and
 - (b) the aircraft begins a flight; and
 - (c) a requirement mentioned in subregulation (2) is not met for the flight.
- (2) The requirements are as follows:
 - (a) the certificate of airworthiness must be in force;
 - (b) if the certificate of airworthiness is granted subject to a condition or requirement—the condition or requirement must be complied with;
 - (c) the flight must not be an air transport operation;
 - (d) the flight must be an operation of a kind mentioned in regulation 91.845;
 - (e) a person may only be carried on the flight who is:
 - (i) a crew member; or
 - (ii) if the flight is a special purpose operation—a person who is needed to accomplish a work activity directly associated with the special purpose operation for which the certificate of airworthiness was issued; or
 - (iii) a person carried as part of an operation mentioned in paragraph 91.845(1)(j).
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.845 Restricted category aircraft—kinds of operations permitted

- (1) For the purposes of paragraph 91.840(2)(d), the kinds of operation are as follows:
 - (a) a special purpose operation for which the special certificate of airworthiness for the aircraft was issued;
 - (b) participation in an air display;
 - (c) taking the aircraft to or from a place where a demonstration or display of the aircraft is to take place;
 - (d) practice in flying the aircraft for participation in an air display;
 - (e) taking the aircraft to a place where maintenance on the aircraft is to be done;
 - (f) taking the aircraft from a place where maintenance on the aircraft has been done;

- (g) testing the aircraft after maintenance;
 - (h) flying training (other than for the issue of a pilot licence);
 - (i) pilot proficiency training or practice in flying the aircraft;
 - (j) carrying out a demonstration or test of the aircraft for sale;
 - (k) delivering the aircraft to a person under a contract of sale.
- (2) For the purposes of paragraph (1)(a), a reference to a special purpose operation for which the special certificate of airworthiness for the aircraft was issued includes a reference to the following:
- (a) training in the special purpose operation;
 - (b) taking the aircraft to a place where the special purpose operation is to start;
 - (c) taking the aircraft from a place where the special purpose operation has ended;
 - (d) any other operation necessary to accomplish the special purpose operation.

Division 91.T.3—Provisionally certificated aircraft—operating requirements

91.850 Provisionally certificated aircraft—operating requirements

- (1) The operator and the pilot in command of an aircraft for a flight each contravene this subregulation if:
 - (a) a provisional certificate of airworthiness has been issued for the aircraft; and
 - (b) the aircraft begins a flight; and
 - (c) a requirement mentioned in subregulation (2) is not met for the flight.
- (2) The requirements are as follows:
 - (a) the certificate of airworthiness must be in force;
 - (b) if the certificate of airworthiness is granted subject to a condition or requirement—the condition or requirement for the flight must be complied with;
 - (c) the flight must not be an air transport operation or a balloon transport operation;
 - (d) the flight must be an operation of a kind mentioned in regulation 91.855;
 - (e) if the aircraft is being flown to obtain type certification or supplemental type certification for the aircraft—the requirements in regulation 91.860 are met;
 - (f) if paragraph (e) does not apply to the flight—the aircraft must be flown within the limitations stated in the aircraft flight manual instructions for the aircraft;
 - (g) the requirements for the carriage of people mentioned in regulation 91.865 must be complied with;
 - (h) the pilot must comply with the procedures mentioned in subregulation 91.870(1).
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.855 Provisionally certificated aircraft—kinds of operations permitted

For the purposes of paragraph 91.850(2)(d), the kinds of operation are as follows:

- (a) an operation that is required to obtain type certification or supplemental type certification for the aircraft;
- (b) training flight crew members, including by means of simulated air transport operations;
- (c) a demonstration flight by the aircraft's manufacturer for prospective purchasers;

- (d) an operation by the aircraft's manufacturer for the purpose of conducting a market survey;
- (e) an operation conducted for the purpose of flight checking of instruments, accessories, and items of equipment that do not affect the airworthiness of the aircraft;
- (f) service testing of the aircraft.

91.860 Provisionally certificated aircraft—operation for type certification or supplemental type certification

- (1) For the purposes of paragraph 91.850(2)(e), the requirements are as follows:
 - (a) if the aircraft's provisional certificate of airworthiness is subject to a condition limiting the area within which the aircraft may be flown—the flight must not take place outside, or partly outside, that area unless the holder of the provisional certificate of airworthiness for the aircraft holds an approval under regulation 91.045 or 91.050 for the purposes of this paragraph;
 - (b) if the flight is over a populous area—the holder of the provisional certificate of airworthiness for the aircraft must hold an approval under regulation 91.045 or 91.050 for the purposes of this paragraph;
 - (c) either:
 - (i) the flight must take place by day and under the VFR; or
 - (ii) the holder of the provisional certificate of airworthiness for the aircraft must hold an approval under regulation 91.045 or 91.050 for the purposes of this subparagraph.
- (2) It is a requirement for a grant of an approval mentioned in paragraphs (1)(a) and (b) that CASA or an authorised person is satisfied that the aircraft:
 - (a) is controllable throughout its normal range of speeds and throughout all of the manoeuvres to be executed; and
 - (b) has no hazardous operating characteristics or design features.

91.865 Provisionally certificated aircraft—requirements for the carriage of people

- (1) For the purposes of paragraph 91.850(2)(g), the requirements for the carriage of people are as follows:
 - (a) each person carried on the aircraft must be notified before boarding the aircraft that only a provisional certificate of airworthiness has been issued for the aircraft;
 - (b) a person must not be carried on the aircraft unless subregulation (2) applies to the person.
- (2) This subregulation applies to a person if:
 - (a) the person has a function in the aircraft's operations; or
 - (b) both of the following apply:
 - (i) carriage of the person is authorised by the manufacturer;

Part 91 General operating and flight rules

Subpart 91.T Operations under certain special certificates of airworthiness and special flight permits

Division 91.T.3 Provisionally certificated aircraft—operating requirements

Regulation 91.870

- (ii) the holder of the provisional certificate of airworthiness for the aircraft holds an approval under regulation 91.045 or 91.050 for the carriage of the person.

91.870 Provisionally certificated aircraft—additional requirements for operators

- (1) The operator of an aircraft for which a provisional certificate of airworthiness is in force must hold an approval under regulation 91.045 or 91.050 for procedures for use by flight crew and personnel who carry out a ground support duty in both:
 - (a) operating the aircraft in accordance with this Division; and
 - (b) landing at and taking off from an aerodrome if take-off or approach over a populous area is necessary.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 91.T.4—Experimental aircraft—operating requirements

91.875 Experimental aircraft—operating requirements

- (1) The operator and the pilot in command of an aircraft for a flight each contravene this subregulation if:
 - (a) an experimental certificate has been issued for the aircraft; and
 - (b) the aircraft begins a flight; and
 - (c) a requirement mentioned in subregulation (2) is not met for the flight.
- (2) The requirements are as follows:
 - (a) the experimental certificate must be in force;
 - (b) if the experimental certificate is granted subject to a condition or requirement—the condition or requirement must be complied with;
 - (c) the flight must not be an air transport operation or a balloon transport operation;
 - (d) the flight must be either:
 - (i) for a purpose mentioned in regulation 21.191 for which the experimental certificate for the aircraft was issued; or
 - (ii) an operation of a kind mentioned in regulation 91.880;
 - (e) either:
 - (i) the flight must take place by day and under the VFR; or
 - (ii) the holder of the experimental certificate must hold an approval under regulation 91.045 or 91.050 for the purposes of this subparagraph;
 - (f) if the flight is over a populous area—the holder of the experimental certificate must hold an approval under regulation 91.045 or 91.050 for the purposes of this paragraph;
 - (g) if the flight is over a public gathering—the holder of the experimental certificate must hold an approval under regulation 91.045 or 91.050 for the purposes of this paragraph;
 - (h) if the aircraft's experimental certificate is subject to a condition limiting the area within which the aircraft may be flown—the flight must take place within that area;
 - (i) if the aircraft is carrying a passenger:
 - (i) the total number of persons on board the aircraft for the flight must not be more than the number of persons allowed under regulation 91.885; and
 - (ii) each passenger must be notified before boarding the aircraft that the design, manufacture and airworthiness of the aircraft are not required to meet any standards recognised by CASA; and
 - (iii) a placard that complies with the requirements prescribed by the Part 91 Manual of Standards must be displayed inside the aircraft;
 - (j) if the aircraft is carrying a person who is not a crew member whose presence is essential to the operation of the aircraft—it has been shown that the aircraft:

Part 91 General operating and flight rules

Subpart 91.T Operations under certain special certificates of airworthiness and special flight permits

Division 91.T.4 Experimental aircraft—operating requirements

Regulation 91.880

- (i) is controllable throughout its normal range of speeds and throughout all the manoeuvres to be executed; and
 - (ii) has no hazardous operating characteristics or design features.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.880 Experimental aircraft—kinds of operations permitted

For the purposes of subparagraph 91.875(2)(d)(ii), the kinds of operation are as follows:

- (a) taking the aircraft to a place where maintenance on the aircraft is to be done;
- (b) taking the aircraft from a place where maintenance on the aircraft has been done;
- (c) testing the aircraft after maintenance;
- (d) flying training (other than for the issue of a pilot licence);
- (e) practice in flying the aircraft;
- (f) carrying out a demonstration or test of the aircraft for sale;
- (g) delivering the aircraft to a person under a contract of sale;
- (h) for an amateur-built aircraft or a kit-built aircraft—flying training given to the aircraft's owner.

91.885 Experimental aircraft—maximum number of persons to be carried

For the purposes of subparagraph 91.875(2)(i)(i), the number of persons allowed on board the aircraft is:

- (a) if the holder of the experimental certificate for the aircraft holds an approval under regulation 91.045—the number specified in the approval;
or
- (b) if paragraph (a) does not apply and the aircraft is a Part 103 aircraft—2; or
- (c) in any other case—the lesser of the following:
 - (i) the number of persons the aircraft was designed to carry;
 - (ii) 6.

Division 91.T.5—Primary category aircraft and intermediate category aircraft—operating requirements

91.890 Primary category aircraft and intermediate category aircraft—operating requirements

- (1) The operator and the pilot in command of an aircraft for a flight each contravene this subregulation if:
 - (a) the aircraft is a primary category aircraft or an intermediate category aircraft; and
 - (b) the aircraft begins the flight; and
 - (c) a requirement mentioned in subregulation (2) is not met for the flight.
- (2) The requirements are as follows:
 - (a) if the aircraft is an intermediate category aircraft—a special certificate of airworthiness in the intermediate category must be in force for the aircraft;
 - (b) if the aircraft is a primary category aircraft—a special certificate of airworthiness in the primary category must be in force for the aircraft;
 - (c) the flight must not be an air transport operation.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 91.T.6—Light sport aircraft—operating requirements

91.895 Light sport aircraft—operators

- (1) The operator of an aircraft for a flight contravenes this subregulation if:
 - (a) a special certificate of airworthiness for light sport aircraft has been issued for the aircraft; and
 - (b) the certificate of airworthiness is not in force for the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

91.900 Light sport aircraft—pilots

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if:
 - (a) a special certificate of airworthiness for light sport aircraft has been issued for the aircraft; and
 - (b) the aircraft begins the flight; and
 - (c) a requirement mentioned in subregulation (2) is not met for the flight.
- (2) The requirements are as follows:
 - (a) the certificate of airworthiness must be in force;
 - (b) the aircraft is operated for the flight:
 - (i) under Part 91 or Part 103; or
 - (ii) for flying training;
 - (c) a placard that complies with the requirements prescribed by the Part 91 Manual of Standards must be displayed inside the aircraft;
 - (d) each person who boards the aircraft must be notified of the contents of the placard mentioned in paragraph (c);
 - (e) the aircraft operating instructions issued for the aircraft (including instructions for necessary equipment in the aircraft manufacturer's equipment list for the aircraft) must be complied with;
 - (f) any safety direction or requirement issued by the aircraft's manufacturer must be complied with.
- (3) Paragraph (2)(e) or (f) does not apply if the operation of the aircraft in contravention of the instruction, direction or requirement has been approved by the aircraft's manufacturer.
- (4) For subregulations (2) and (3), if the manufacturer of the aircraft:
 - (a) no longer exists; or
 - (b) can no longer provide instructions for the continuing airworthiness of the aircraft;

references to the *manufacturer* of the aircraft include references to an authorised person appointed by CASA to perform the functions of the manufacturer in relation to the continuing airworthiness of the aircraft.

- (5) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (3): see subsection 13.3(3) of the *Criminal Code*.

Regulation 91.905

Division 91.T.7—Special flight permits—operating requirements

91.905 Flights under special flight permits

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if:
 - (a) a special flight permit is in force for the aircraft; and
 - (b) the aircraft begins the flight; and
 - (c) the flight is not authorised by the permit.
- (2) The pilot in command of an aircraft for a flight contravenes this subregulation if:
 - (a) a special flight permit is in force for the aircraft; and
 - (b) the aircraft begins the flight; and
 - (c) a condition imposed on the special flight permit is not complied with.
- (3) The operator and the pilot in command of an aircraft for a flight each contravene this subregulation if:
 - (a) a special flight permit is in force for the aircraft; and
 - (b) the aircraft begins the flight; and
 - (c) if the only person on the aircraft during the flight is the pilot in command—a copy of the flight permit is not carried on the aircraft; and
 - (d) if a person in addition to the pilot in command is carried on the aircraft during the flight—a requirement mentioned in subregulation (4) is not met.
- (4) The requirements are:
 - (a) a copy of the special flight permit must be displayed in the aircraft in a place where the person will see the permit; and
 - (b) before boarding the aircraft, the operator or the pilot in command must tell the person:
 - (i) that the aircraft is operated under a special flight permit; and
 - (ii) the reasons for the issue of the permit; and
 - (iii) what the permit authorises.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (1), (2) or (3).

Penalty: 50 penalty units.

Division 91.T.8—Miscellaneous

91.910 Application of Division 91.T.8

This Division applies to the operation of an aircraft for which a special certificate of airworthiness is in force.

91.915 Aircraft with special certificates of airworthiness—maintenance release etc.

- (1) This regulation does not apply to an aircraft for which a special flight permit is in force.
- (2) The operator and the pilot in command of an aircraft for a flight each contravene this subregulation if:
 - (a) the aircraft begins the flight; and
 - (b) a maintenance release or a certificate of release to service is not in force for the aircraft.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

91.920 Aircraft with special certificates of airworthiness—flight tests to be conducted in certain areas

- (1) The pilot in command of an aircraft contravenes this subregulation if:
 - (a) the pilot flight tests the aircraft; and
 - (b) the flight test is not conducted over:
 - (i) open water; or
 - (ii) a sparsely populated area; or
 - (iii) an unpopulated area; or
 - (iv) for an amateur-built aircraft—over an area for which the holder of the certificate of airworthiness holds an approval under regulation 91.045 or 91.050 for the purposes of this subparagraph.
- (2) The pilot in command of an aircraft contravenes this subregulation if:
 - (a) the pilot flight tests the aircraft; and
 - (b) the flight test is not conducted:
 - (i) in an area where, in the event of a loss of control of the aircraft, there would be minimal risk to other air traffic; or
 - (ii) for an amateur-built aircraft—in an area for which the holder of the certificate of airworthiness holds an approval under regulation 91.045 or 91.050 for the purposes of this subparagraph.

Part 91 General operating and flight rules

Subpart 91.T Operations under certain special certificates of airworthiness and special flight permits

Division 91.T.8 Miscellaneous

Regulation 91.920

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

Subpart 91.Y—Minimum equipment lists

Division 91.Y.1—Preliminary

91.925 Definitions

In these Regulations:

master minimum equipment list or **MMEL**, for a type of aircraft, means the document:

- (a) that includes a list of items in the aircraft that may (subject to any conditions or limitations specified in the document) be inoperative for a flight of the aircraft; and
- (b) prepared by the holder of the type certificate for the aircraft; and
- (c) approved by the national aviation authority that issued the type certificate for the aircraft.

minimum equipment list or **MEL**, for an aircraft, means a document:

- (a) that includes a list of items in the aircraft that may (subject to any conditions or limitations specified in the document) be inoperative for a flight of the aircraft; and
- (b) prepared by the operator of the aircraft; and
- (c) approved under regulation 91.935; and
- (d) that complies with the requirements mentioned in regulation 91.930; and includes any variation to the document approved under regulation 91.940.

rectification interval, for an item in an MEL that may become inoperative, means the period within which the item must be rectified after the discovery that the item is inoperative.

91.930 Requirements for minimum equipment lists

- (1) The Part 91 Manual of Standards may prescribe requirements relating to MELs for aircraft.
- (2) Without limiting subregulation (1), the Part 91 Manual of Standards may prescribe requirements relating to the following:
 - (a) the contents of MELs;
 - (b) the calculation and specification of rectification intervals for items in an MEL;
 - (c) conditions and limitations that may or must be included in an MEL.

Division 91.Y.2—Approval of minimum equipment lists

91.935 Approval of minimum equipment lists

- (1) The operator of an aircraft may apply, in writing, for the approval of an MEL for the aircraft.
- (2) The application may be made to:
 - (a) CASA; or
 - (b) a continuing airworthiness management organisation that is permitted, in accordance with Part 42, to approve the MEL; or
 - (c) if the aircraft is not operated for either Part 121 operations or operations to which Part 133 or 135 applies—an authorised person.
- (3) The application must include the proposed MEL.
- (4) If an application for the approval of an MEL is made under subregulation (1), CASA, the continuing airworthiness management organisation or the authorised person (as the case may be) may approve the MEL if satisfied that the MEL:
 - (a) complies with the requirements mentioned in regulation 91.930; and
 - (b) will enable the operator to operate the aircraft safely.

Note: Not all aircraft are required to have an MEL. Other provisions of these Regulations require certain aircraft to have an MEL. This regulation sets out how an MEL for an aircraft must be approved.

Division 91.Y.3—Variations of minimum equipment lists

91.940 Approval of variations

- (1) The operator of an aircraft may apply, in writing, for an approval of a variation of an MEL for the aircraft.
- (2) The application may be made to:
 - (a) CASA; or
 - (b) a continuing airworthiness management organisation that is permitted, in accordance with Part 42, to approve a variation of the MEL; or
 - (c) if the aircraft is not operated for either Part 121 operations or operations to which Part 133 or 135 applies—an authorised person.
- (3) The application must include the proposed variation of the MEL.
- (4) If an application for the approval of a variation of an MEL is made under subregulation (1), CASA, the continuing airworthiness management organisation or the authorised person (as the case may be) may approve the variation if satisfied that the MEL as proposed to be varied:
 - (a) complies with the requirements mentioned in regulation 91.930; and
 - (b) will enable the operator to operate the aircraft safely.

Division 91.Y.4—Extensions of rectification intervals

91.945 Approval of extensions of rectification intervals

Approval of extension on application

- (1) The operator of an aircraft may apply, in writing, for the approval of an extension of the rectification interval for an item specified in an MEL for the aircraft.
- (2) An application under subregulation (1) may be made to:
 - (a) if the operator is not a continuing airworthiness management organisation, and there is a continuing airworthiness management organisation for the aircraft that is permitted, in accordance with Part 42, to approve the extension—the continuing airworthiness management organisation; or
 - (b) in any case—CASA.
- (3) If an application for the approval of an extension of a rectification interval is made under subregulation (1), CASA or the continuing airworthiness management organisation (as the case may be) may, subject to subregulation (5), approve the extension.

Approval of extension without application—continuing airworthiness management organisation is the operator

- (4) A continuing airworthiness management organisation for an aircraft may, subject to subregulation (5), approve an extension of the rectification interval for an item specified in an MEL for the aircraft, if:
 - (a) the continuing airworthiness management organisation is the operator of the aircraft; and
 - (b) the continuing airworthiness management organisation is permitted, in accordance with Part 42, to approve the extension.

Requirements for approval of extension

- (5) An extension of the rectification interval (the **original rectification interval**) for an item specified in an MEL for an aircraft must not be approved under subregulation (3) or (4) unless:
 - (a) the item is inoperative; and
 - (b) the original rectification interval is a rectification interval of a kind prescribed by the Part 91 Manual of Standards for the purposes of this paragraph; and
 - (c) the operator is unable to rectify the item before the end of the original rectification interval because of circumstances beyond the operator's control; and
 - (d) the original rectification interval has not previously been extended in accordance with this regulation during the same continuous period throughout which the item has been inoperative; and

- (e) the MMEL for the aircraft type does not prohibit an extension of the rectification interval for the item; and
- (f) if a provision of these Regulations (other than this Subpart) permits the aircraft to operate with the item inoperative for a maximum period—the extended rectification interval for the item will not exceed that period; and
- (g) the extended rectification interval will not exceed the period prescribed by the Part 91 Manual of Standards for the purposes of this paragraph.

Matters to be set out in approval

- (6) An approval of an extension under subregulation (3) or (4) must:
 - (a) be in writing; and
 - (b) set out the following:
 - (i) details of the inoperative item;
 - (ii) a statement to the effect that the operation of the aircraft with the inoperative item is permitted in accordance with this regulation;
 - (iii) the day on which the extended rectification interval starts (being a day not earlier than the day the notice is given);
 - (iv) the day on which the extended rectification interval ends; and
 - (c) for an approval by a continuing airworthiness management organisation—also include the following:
 - (i) the name and approval certificate reference number of the continuing airworthiness management organisation;
 - (ii) the name and signature of the individual who approved the extension on behalf of the continuing airworthiness management organisation.

91.950 Effect of approval

- (1) If an extension of the rectification interval for an item specified in an MEL for an aircraft is approved under subregulation 91.945(3) or (4), the operation of the aircraft with the inoperative item during the extended rectification interval is taken, for the purposes of these Regulations, to be permitted by the MEL.
- (2) If Part 42 does not apply to the aircraft, subregulation (1) applies to the operation of the aircraft only if a copy of the approval of the extension is kept with the maintenance release for the aircraft throughout the period of the extension.

91.955 CASA to be notified of extensions approved by a continuing airworthiness management organisation

- (1) This regulation applies if an extension of the rectification interval for an item specified in an MEL for an aircraft is approved under subregulation 91.945(3) or (4) by a continuing airworthiness management organisation.
- (2) The operator of the aircraft must notify CASA, in writing, of the following within 10 days of the start of the extended rectification interval:
 - (a) the aircraft's registration mark;
 - (b) details of the inoperative item;

Regulation 91.955

- (c) the original rectification interval (as referred to in subregulation 91.945(5)) for the item;
 - (d) the extended rectification interval;
 - (e) the day the extended rectification interval took effect;
 - (f) the reason why the item could not be rectified before the end of the original rectification interval.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 20 penalty units.

Division 91.Y.5—Other

91.960 Operation of aircraft with multiple inoperative items not permitted in certain circumstances

- (1) This regulation applies if:
 - (a) an aircraft begins a flight with more than one inoperative item, in accordance with an MEL for the aircraft; and
 - (b) the number and kinds of inoperative items for the flight, or the relationship between the items:
 - (i) reduces the level of safety of the operation of the aircraft; or
 - (ii) increases the flight crew's workload;
to the extent that it is unsafe for the flight to be conducted.
- (2) For the purposes of these Regulations, the operation of the aircraft for the flight with the inoperative items is not permitted by the MEL for the aircraft.

Subpart 91.Z—Foreign aircraft

91.965 Foreign registered aircraft—Chicago Convention

- (1) The operator and the pilot in command of a foreign registered aircraft each contravene this subregulation if:
 - (a) the aircraft is flown in Australian territory; and
 - (b) the aircraft does not comply with a requirement of the Chicago Convention relating to:
 - (i) the nationality mark and registration mark of the aircraft; or
 - (ii) the aircraft's certificate of airworthiness; or
 - (iii) the number and description of, and the holding of, licences and ratings by the crew members of the aircraft; or
 - (iv) the documents to be carried by the aircraft; or
 - (v) the flight and manoeuvre of the aircraft; or
 - (vi) radio equipment carried by, or fitted to, the aircraft.

- (2) Subparagraph (1)(b)(ii) does not apply if a special flight authorisation has been granted and is in force.

Note: The requirements of the Chicago Convention about certificates of airworthiness relate to aircraft with a standard certificate of airworthiness. Foreign aircraft with the equivalent of a special certificate of airworthiness or a special flight permit require a special flight authorisation to be flown in Australian territory: see regulation 91.970.

- (3) Subparagraphs (1)(b)(iv), (v) and (vi) do not apply in relation to a requirement of the Chicago Convention to the extent that the requirement is inconsistent with a requirement under another provision of this Part.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note 1: A defendant bears an evidential burden in relation to the matters in subregulation (2) or (3): see subsection 13.3(3) of the *Criminal Code*.

Note 2: See also sections 25, 26 and 27A of the Act for conditions that may be imposed by CASA on the operation of foreign registered aircraft in Australian territory.

91.970 Foreign registered aircraft—special flight authorisations

- (1) A person may apply to CASA for a special flight authorisation in respect of a foreign registered aircraft to fly the aircraft in Australian territory without the certificate of airworthiness required by subparagraph 91.965(1)(b)(ii).
- (2) Subject to regulation 11.055, CASA must grant the authorisation.
- (3) The pilot in command of a foreign registered aircraft contravenes this subregulation if:

Regulation 91.975

- (a) the aircraft is flown in Australian territory; and
 - (b) a special flight authorisation is in force in respect of the aircraft; and
 - (c) the pilot in command fails to comply with a condition of the special flight authorisation for the flight.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (3).

Penalty: 50 penalty units.

91.975 Foreign state aircraft—approval to fly in Australian territory

- (1) The operator and the pilot in command of a state aircraft of a foreign country for a flight each contravene this subregulation if:
- (a) the aircraft is flown in Australian territory; and
 - (b) the operator does not hold an approval under regulation 91.045 for the flight.
- (2) The pilot in command of a state aircraft of a foreign country for a flight contravenes this subregulation if:
- (a) the aircraft is flown in Australian territory; and
 - (b) the pilot in command fails to comply with a condition of the approval held by the operator under regulation 91.045 for the flight.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

91.980 Foreign registered aircraft—major defect—CASA direction

- (1) If CASA is satisfied that a foreign registered aircraft in Australian territory has a major defect, CASA may issue a written direction to a person imposing conditions on the operation of the aircraft that:
- (a) for an aircraft registered in a Contracting State—are requested by the national aviation authority of the State; or
 - (b) CASA is satisfied are necessary for the safety of air navigation.
- (2) A person contravenes this subregulation if the person contravenes a direction issued under subregulation (1).
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Regulation 91.985

91.985 Foreign registered aircraft—CASA to notify Contracting State of direction

If CASA issues a direction under regulation 91.980 in relation to an aircraft that is registered in a Contracting State, CASA must give the national aviation authority of the State:

- (a) notice in writing of the action taken by CASA, together with a copy of the direction; and
- (b) a report, in writing, of the defect.

91.990 Foreign registered aircraft—CASA may revoke direction

Revocation following notification by Contracting State

- (1) CASA may revoke, in writing, a direction issued under regulation 91.980 in relation to an aircraft registered in a Contracting State, if the national aviation authority of the State tells CASA, in writing, that it:
 - (a) has revoked any suspension of the certificate of airworthiness of the aircraft that the authority had imposed; or
 - (b) considers that the defect giving rise to the direction is not of such a nature as to prevent the aircraft from fulfilling the minimum safety requirements adopted by the Contracting State under the Chicago Convention; or
 - (c) considers that, in the circumstances of the case, the aircraft should be permitted to fly, with no persons on the aircraft other than crew members, to a place where the defect can be repaired.
- (2) However, CASA must not revoke the direction if it is satisfied that doing so would adversely affect the safety of air navigation.

Revocation if CASA satisfied direction no longer necessary

- (3) CASA may revoke, in writing, a direction issued under regulation 91.980 if CASA is satisfied that the direction is no longer necessary for the safety of air navigation.

91.995 Foreign registered aircraft—when direction or revocation takes effect

- (1) A direction issued under regulation 91.980 does not have effect in relation to a person until it has been served:
 - (a) on the person; or
 - (b) by affixing the direction to the aircraft to which it relates.
- (2) Revocation of a direction under regulation 91.990 has effect when:
 - (a) it is served on the person on whom the direction was served; or
 - (b) if the direction was affixed to the aircraft to which the direction relates—CASA affixes the revocation to the aircraft.

Note: For service of documents on a person, see section 28A of the *Acts Interpretation Act 1901*.

Part 92—Consignment and carriage of dangerous goods by air

Table of contents

Subpart 92.A—General

- 92.005 Applicability
- 92.010 Definitions for Part 92
- 92.015 What are dangerous goods?

Subpart 92.B—Conditions for carriage etc of dangerous goods

- 92.020 Compliance with Technical Instructions generally
- 92.025 Compliance with Technical Instructions—operators
- 92.030 Compliance with Technical Instructions—passengers and crew
- 92.035 Compliance with Technical Instructions—persons who consign dangerous goods
- 92.040 Commercial Australian aircraft operators—conditions for carriage of dangerous goods—dangerous goods manual
- 92.045 Dangerous goods manual—Australian aircraft operators
- 92.050 Commercial foreign aircraft operators—conditions to which carriage of dangerous goods is subject
- 92.055 Dangerous goods manual—requirements applicable to all operators
- 92.065 Commercial operators—reporting of dangerous goods incidents
- 92.070 Dangerous goods statement (Act s 23A)
- 92.075 Dangerous goods statement in reliance on statement already made

Subpart 92.C—Training

- 92.085 Definitions for Subpart 92.C
- 92.090 Extended meaning of *every 2 years* for this Subpart
- 92.095 Training—certain employees of Australian aircraft operators
- 92.100 Training—certain employees of Australian ground handling agents
- 92.105 Training—certain employees of Australian freight forwarders
- 92.110 Required standard of training for regulations 92.095, 92.100 and 92.105
- 92.115 Training—certain employees of screening authorities
- 92.120 Training—certain employees of shippers of dangerous goods
- 92.125 Training—certain employees of non-Australian operators
- 92.130 Training—Australian operators' employees outside Australia
- 92.135 Requirements for training course
- 92.140 Who may conduct training
- 92.145 Records about training—Australian operators etc

Subpart 92.D—Limitations on application of Subparts 92.B and 92.C

- 92.160 Aircraft operated by law enforcement authorities
 - 92.165 Goods carried by external load
 - 92.170 Cargo carried in main deck cargo compartments
 - 92.175 Goods carried by private operators
 - 92.180 Goods carried for parachute operations
 - 92.185 Carriage of fuel in large containers
-

Part 92 Consignment and carriage of dangerous goods by air

- 92.190 Goods for use in emergency services
- 92.195 Carriage of ammunition by air security officers

Subpart 92.E—Information to passengers

- 92.200 Information in passenger terminals
- 92.205 Information with tickets

Subpart 92.A—General

92.005 Applicability

- (1) This Part applies in relation to the operation of:
 - (a) all Australian aircraft; and
 - (b) all foreign aircraft (other than state aircraft) operating in Australian territory.
- (2) This Part sets out:
 - (a) for section 23 of the Act—the conditions under which an aircraft may carry dangerous goods and a person may carry dangerous goods, or consign dangerous goods for carriage, on an aircraft; and
 - (b) for section 23A of the Act—the requirements for the statement to be made in respect of cargo consigned for carriage on an aircraft; and
 - (c) for section 23B of the Act—the requirements for training of persons involved in handling cargo carried or consigned for carriage on an aircraft.

92.010 Definitions for Part 92

- (1) In this Part:

accept, used in relation to a package or consignment, has the same meaning as in the Technical Instructions.

Australian aircraft operator means an operator of an Australian aircraft.

commercial operator means an operator engaging in commercial air transport operations or commercial aerial work operations.

dangerous goods accident means an event involving dangerous goods that occurs in the course of the goods being carried, or consigned for carriage, on an aircraft and results in:

- (a) a fatal or serious injury to a person; or
- (b) serious damage to the aircraft or any cargo carried on the aircraft.

dangerous goods incident means an event (other than a dangerous goods accident) involving dangerous goods that occurs in the course of the goods being carried, or consigned for carriage, on an aircraft and that:

- (a) results in:
 - (i) the escape of smoke or flames from the container or package in which the goods are contained; or
 - (ii) breakage of the container or package in which the goods are contained; or
 - (iii) any escape of the goods or part of them from the container or package in which they are contained; or

Regulation 92.015

- (iv) leakage of fluid or radiation from the container or package in which the goods are contained; or
- (b) seriously jeopardises, or is likely to seriously jeopardise, the aircraft or its occupants.

dangerous goods manual means a manual kept by an operator in accordance with regulation 92.045 or 92.050.

freight forwarder means a person who offers the service of arranging the transport of cargo by air.

ground handling agent means a person who performs, on behalf of an operator, the service of accepting, handling, loading, unloading, transferring or otherwise processing cargo, passengers or baggage.

shipment means shipment by air.

shipper of dangerous goods means a person who consigns dangerous goods for carriage on an aircraft.

Technical Instructions means, at a particular time, the edition that is valid at that time of the document entitled *Technical Instructions for the Safe Transport of Dangerous Goods by Air*, issued by the International Civil Aviation Organization.

Note 1: Each edition of the Technical Instructions states in its Introduction the dates between which it is valid. The edition for 2003–2004 of the Technical Instructions is valid from 1 March 2003 to 31 December 2004 or until the next edition becomes valid. The Technical Instructions are available (as a printed document only) from the ICAO's Document Sales Unit at:

ICAO, Document Sales Unit
999 University Street, Montreal, Quebec H3C 5H7
Canada
Telephone: (514) 954-8022
Fax: (514) 954-6769
E-mail: sales_unit@icao.int

Note 2: General industry practice is to follow the IATA Dangerous Goods Regulations, which are issued more frequently than the Technical Instructions. The requirements of the IATA Regulations are either the same as, or more stringent than, the requirements of the Technical Instructions. If that is so, compliance with the IATA Regulations will automatically result in compliance with the Technical Instructions.

- (2) An expression used in both this Part and the Technical Instructions has, unless the contrary intention appears, the same meaning in this Part as in the Technical Instructions.

92.015 What are dangerous goods?

For the purposes of subparagraph (b)(ii) of the definition of **dangerous goods** in subsection 23(3) of the Act, the things specified in the Dangerous Goods List contained in the Technical Instructions are declared to be dangerous goods.

Note: Explosives are dangerous goods whether or not they are mentioned in the Dangerous Goods List—see the Act, subsection 23(3).

Subpart 92.B—Conditions for carriage etc of dangerous goods

Note: Subpart 92.D sets out certain exemptions from requirements of this Subpart.

92.020 Compliance with Technical Instructions generally

- (1) This regulation makes provision, for the purposes of subsections 23(1), (2) and (2A) of the Act, about the carriage, and consignment for carriage, of dangerous goods on an aircraft.

Note: Under subsections 23(1), (2) and (2A) of the Act, an aircraft must not carry dangerous goods except in accordance with these Regulations.

- (2) Dangerous goods of a kind that, under the Technical Instructions, are forbidden for transport by air must not be consigned for carriage on an aircraft.

Note: For details of where to obtain copies of the Technical Instructions, see the note following the definition of *Technical Instructions* in regulation 92.010.

- (3) Dangerous goods of a kind that, under the Technical Instructions, are forbidden for transport by air must not be carried on an aircraft.
- (4) Dangerous goods of a kind that, under the Technical Instructions, are forbidden for transport by air on a passenger aircraft must not be consigned for carriage on a passenger aircraft.
- (5) Dangerous goods of a kind that, under the Technical Instructions, are forbidden for transport by air on a passenger aircraft must not be carried on a passenger aircraft.
- (6) Dangerous goods of a kind that, under the Technical Instructions, may be carried by air only in particular circumstances must not be consigned for carriage by air except in those circumstances.
- (7) Dangerous goods of a kind that, under the Technical Instructions, may be carried by air only in particular circumstances must not be carried by air except in those circumstances.

92.025 Compliance with Technical Instructions—operators

- (1) This regulation makes provision, for the purposes of subsections 23(1), (2) and (2A) of the Act, about the carriage of dangerous goods on an aircraft.

Note: Under subsections 23(1), (2) and (2A) of the Act, an aircraft must not carry dangerous goods except in accordance with these Regulations.

- (2) It is a condition of the carriage of dangerous goods on an aircraft that the operator of the aircraft complies with:
 - (a) the requirements (if any) of the Technical Instructions limiting the quantity of such goods that may be carried on the aircraft; or

Regulation 92.030

- (b) the requirements of those Instructions concerning the following matters:
- (i) the loading of the goods;
 - (ii) the separation of the goods from passengers, animals or other cargo on board the aircraft;
 - (iii) the replacement of lost, damaged or detached labels;
 - (iv) the labelling of unit load devices (such as containers or pallets) that contain the goods;
 - (v) segregation of the goods from other dangerous goods;
 - (vi) acceptance procedures for the goods;
 - (vii) dealing with undeliverable consignments;
 - (viii) dealing with damaged packages;
 - (ix) inspection of the aircraft or the goods;
 - (x) decontamination of the aircraft;
 - (xi) giving information to the aircraft's crew;
 - (xii) action to be taken by the crew in an emergency;
 - (xiii) giving information to an emergency service such as a fire service or police service;
 - (xiv) documentation;
 - (xv) providing notices and information.

Note: This regulation creates a defence to the offences created by subsections 23(2) and (2A) of the Act. A defendant charged with either of those offences bears an evidential burden in relation to the matters set out in this regulation—see subsection 13.3(3) of the *Criminal Code*.

92.030 Compliance with Technical Instructions—passengers and crew

- (1) This regulation makes provision, for the purposes of subsections 23(1), (2) and (2A) of the Act, about the carriage of dangerous goods on an aircraft by a person, whether a passenger or a member of the aircraft's crew.

Note: Under subsections 23(1), (2) and (2A) of the Act, dangerous goods must not be carried on an aircraft except in accordance with these Regulations.

- (2) Subject to subregulation (3), it is a condition of the carriage of dangerous goods on an aircraft by a person that the person complies with the requirements (if any) of the Technical Instructions:
- (a) concerning the type of dangerous goods that a person may carry on board an aircraft; or
 - (b) as to whether the dangerous goods may be carried in the person's carry-on baggage or in checked baggage; or
 - (c) limiting the quantity of such goods that may be carried on the aircraft, or in checked or carry-on baggage; or
 - (d) requiring the aircraft operator's approval before the goods are carried.

Note: The relevant provisions of the Technical Instructions are set out at the end of this regulation.

- (3) A person who is a passenger is taken not to contravene the condition in subregulation (2) if the person carries dangerous goods in contravention of that

condition, or carries such goods in a way that would, but for this subregulation, contravene that condition, if:

- (a) the person carries the goods, or carries the goods in that way, in reliance on a statement, made by the operator or an employee of the operator, to the effect that the carriage of the goods, or the carriage of goods in that way, is permissible or does not contravene the Technical Instructions; and
- (b) it is reasonable for the person to rely on that statement.

Note 1: This regulation creates a defence to the offences created by subsections 23(2) and (2A) of the Act. A defendant charged with either of those offences bears an evidential burden in relation to the matters set out in this regulation—see subsection 13.3(3) of the *Criminal Code*.

Note 2: Section 1.1 of the Technical Instructions, regarding dangerous goods carried by passengers or crew, is as follows:

1.1 DANGEROUS GOODS CARRIED BY PASSENGERS OR CREW

1.1.1 Except as otherwise provided in 1.1.2 below, dangerous goods must not be carried by passengers or crew members, either as or in carry-on baggage or checked baggage or on their person. Security type equipment such as attaché cases, cash boxes, cash bags, etc. incorporating dangerous goods, for example lithium batteries or pyrotechnic material, are totally forbidden; see entry in Table 3-1.

1.1.2 The provisions of these Instructions do not apply to the following when carried by passengers or crew members or in baggage, transported by the operator, that has been separated from its owner during transit (e.g. lost baggage or improperly routed baggage):

- a) when in retail packagings, alcoholic beverages containing more than 24 per cent but not more than 70 per cent alcohol by volume, in receptacles not exceeding 5 L, with a total net quantity per person of 5 L for such beverages;
Note.—Alcoholic beverages containing not more than 24 per cent alcohol by volume are not subject to any restrictions.
- b) non-radioactive medicinal or toilet articles (including aerosols). Also aerosols in Division 2.2, with no subsidiary risk, for sporting or home use in checked baggage only. The total net quantity of all such articles carried by each person must not exceed 2 kg or 2 L and the net quantity of each single article must not exceed 0.5 kg or 0.5 L. The term “medicinal or toilet articles (including aerosols)” is intended to include such items as hair sprays, perfumes, colognes and medicines containing alcohols;
- c) with the approval of the operator (s), small gaseous oxygen or air cylinders required for medical use;
- d) small carbon dioxide gas cylinders worn for the operation of mechanical limbs, also spare cylinders of a similar size if required to ensure an adequate supply for the duration of the journey;
- e) with the approval of the operator (s), as checked baggage only, securely boxed cartridges for sporting purposes, in Division 1.4S, in quantities not exceeding 5 kg gross mass per person for that person’s own use, excluding ammunition with explosive or incendiary projectiles. Allowances for more than one person must not be combined into one or more packages;
- f) dry ice in quantities not exceeding 2 kg per person, when used to pack perishables not subject to these Instructions, provided the package permits the release of carbon dioxide gas:
 - in carry-on baggage; or
 - with the approval of the operator (s), in checked baggage;
- g) safety matches or a lighter intended for use by an individual when carried on the person. However, lighters containing unabsorbed liquid fuel (other than liquefied gas), lighter fuel and lighter refills are not permitted on one’s person or in checked or carry-on baggage;

Regulation 92.030

Note.—“*Strike anywhere*” matches are forbidden for air transport.

- h) radioisotopic cardiac pacemakers or other devices, including those powered by lithium batteries, implanted into a person, or radio-pharmaceuticals contained within the body of a person as the result of medical treatment;
 - i) with the approval of the operator (s), wheelchairs or other battery-powered mobility aids with non-spillable batteries (see Packing Instruction 806 and Special Provision A67), as checked baggage provided the battery terminals are protected from short circuits and the battery is securely attached to the wheelchair or mobility aid;
 - j) with the approval of the operator (s), wheelchairs or other battery-powered mobility aids with spillable batteries as checked baggage, provided that the wheelchair or mobility aid can be loaded, stowed, secured and unloaded always in an upright position and that the battery is disconnected, the battery terminals are protected from short circuits and the battery is securely attached to the wheelchair or mobility aid. If the wheelchair or mobility aid cannot be loaded, stowed, secured and unloaded always in an upright position, the battery must be removed and the wheelchair or mobility aid may then be carried as checked baggage without restriction. The removed battery must be carried in strong, rigid packagings as follows:
 - these packagings must be leaktight, impervious to battery fluid and be protected against upset by securing to pallets or by securing them in cargo compartments using appropriate means of securement (other than by bracing with freight or baggage) such as by use of restraining straps, brackets or holders;
 - batteries must be protected against short circuits, secured upright in these packagings and surrounded by compatible absorbent material sufficient to absorb their total liquid contents; and
 - these packagings must be marked “Battery, wet, with wheelchair” or “Battery, wet, with mobility aid” and be labelled with a “Corrosive” label (Figure 5-21) and with a package orientation label (Figure 5-25).
- The pilot-in-command must be informed of the location of a wheelchair or mobility aid with an installed battery or the location of a packed battery.
- It is recommended that passengers make advance arrangements with each operator; also unless batteries are non-spillable they should be fitted, where feasible, with spill-resistant vent caps;
- k) hair curlers containing hydrocarbon gas, no more than one per person, provided that the safety cover is securely fitted over the heating element. Gas refills for such curlers must not be carried;
 - l) with the approval of the operator (s), as carry-on baggage only, a mercurial barometer or mercurial thermometer carried by a representative of a government weather bureau or similar official agency. The barometer or thermometer must be packed in a strong outer packaging, having a sealed inner liner or a bag of strong leak-proof and puncture-resistant material impervious to mercury, which will prevent the escape of mercury from the package irrespective of its position. The pilot-in-command must be informed of the barometer or thermometer;
 - m) with the approval of the operator (s), no more than two small carbon dioxide cylinders of carbon dioxide or another suitable gas in Division 2.2 per person fitted into a self-inflating life-jacket for inflation purposes, plus no more than two spare cartridges;
 - n) with the approval of the operator (s), heat producing articles (i.e. battery-operated equipment such as underwater torches and soldering equipment which, if accidentally activated, will generate extreme heat and can cause fire) may be carried in carry-on baggage only. The heat producing component, or the energy source, must be removed so as to prevent unintentional functioning during transport;
 - o) one small medical or clinical thermometer which contains mercury, for personal use, when in its protective case;
 - p) with the approval of the operator (s), one avalanche rescue backpack per person equipped with a pyrotechnic trigger mechanism containing not more than 200 mg net of Division 1.4S and not more than 250 mg of compressed gas in Division 2.2. The backpack must be packed in such a manner that it cannot be accidentally

activated. The airbags within the backpack must be fitted with pressure relief valves; and

- q) consumer electronic devices (watches, calculating machines, cameras, cellular phones, laptop computers, camcorders, etc.) containing lithium or lithium ion cells or batteries when carried by passengers or crew for personal use. Spare batteries must be individually protected so as to prevent short circuits and carried in carry-on baggage only. In addition, each spare battery must not exceed the following quantities:

for lithium metal or lithium alloy batteries, a lithium content of not more than 2 grams; or

for lithium ion batteries, an aggregate equivalent lithium content of not more than 8 grams.

Lithium ion batteries with an aggregate equivalent lithium content of more than 8 grams but not more than 25 grams may be carried in carry-on baggage if they are individually protected so as to prevent short circuits and are limited to two spare batteries per person.

92.035 Compliance with Technical Instructions—persons who consign dangerous goods

- (1) This regulation makes provision, for the purposes of subsections 23(1), (2) and (2A) of the Act, about the consignment for carriage of dangerous goods on an aircraft.

Note: Under subsections 23(1), (2) and (2A) of the Act, dangerous goods must not be consigned for carriage on an aircraft except in accordance with these Regulations.

- (2) It is a condition of the consignment for carriage of dangerous goods on an aircraft that the consignor of the goods complies with the requirements of the Technical Instructions:

- (a) concerning the classification of the goods; and
- (b) limiting the quantity of such goods that may be carried in the one consignment; and
- (c) concerning:
 - (i) the packing of the goods; and
 - (ii) the marking of the goods; and
 - (iii) the labelling of the goods; and
 - (iv) segregation of the goods from other dangerous goods; and
 - (v) the documentation for the goods; and
 - (vi) the provision of information about the goods; and
 - (vii) empty packaging.

Note: This regulation creates a defence to the offences created by subsections 23(2) and (2A) of the Act. A defendant charged with either of those offences bears an evidential burden in relation to the matters set out in this regulation—see subsection 13.3(3) of the *Criminal Code*.

92.040 Commercial Australian aircraft operators—conditions for carriage of dangerous goods—dangerous goods manual

- (1) This regulation sets out, for the purposes of subsections 23(1), (2) and (2A) of the Act, a condition of the carriage of dangerous goods on an aircraft.

Regulation 92.045

Note: Under subsections 23(1), (2) and (2A) of the Act, dangerous goods must not be carried on an aircraft except in accordance with these Regulations.

- (2) A commercial Australian aircraft operator may carry dangerous goods (other than dangerous goods to which subregulation (3) applies) on an Australian aircraft operated by the operator, or permit such goods to be carried on such an aircraft, only if the operator:
- (a) has a dangerous goods manual in accordance with regulation 92.045; and
 - (b) complies with regulation 92.055.

Note: This regulation creates a defence to the offences created by subsections 23(2) and (2A) of the Act. A defendant charged with either of those offences bears an evidential burden in relation to the matters set out in this regulation—see subsection 13.3(3) of the *Criminal Code*.

- (3) This subregulation applies to:
- (a) dangerous goods required to be carried on board the aircraft by a law in force in Australia (including the Civil Aviation Orders); and
 - (b) dangerous goods carried on board the aircraft for use or sale on the aircraft during a flight;
- but does not apply to any of the following kinds of dangerous goods:
- (c) goods of the operator intended as replacements for dangerous goods referred to in paragraph (a) or (b); or
 - (d) the operator's goods, of a kind referred to in paragraph (a) or (b), that have been removed for replacement;
 - (e) dangerous goods permitted, under these Regulations, to be carried in passengers' checked baggage or carry-on baggage;
 - (f) goods intended to be used to provide, during flight:
 - (i) medical aid to a patient; or
 - (ii) veterinary aid or a humane killer for an animal; or
 - (iii) aid in connection with search and rescue operations;
 - (g) goods for dropping in connection with forestry, horticultural, or pollution-control activities.

92.045 Dangerous goods manual—Australian aircraft operators

- (1) An Australian aircraft operator's dangerous goods manual must:
- (a) set out the procedures and instructions for the handling and carriage of dangerous goods on the operator's aircraft; or
 - (b) specify where those procedures and instructions can be found.
- (2) The operator must have, and must use, an appropriate amendment system to keep all the copies of the manual up-to-date.

92.050 Commercial foreign aircraft operators—conditions to which carriage of dangerous goods is subject

- (1) This regulation sets out, for the purposes of subsections 23(1), (2) and (2A) of the Act, a condition of the carriage of dangerous goods on an aircraft.

Regulation 92.055

Note: Under subsections 23(1), (2) and (2A) of the Act, dangerous goods must not be carried on an aircraft except in accordance with these Regulations.

- (2) A commercial foreign aircraft operator may carry dangerous goods (other than goods required to be carried on board the aircraft by the law of the Contracting State in which the aircraft is registered, or goods carried on board the aircraft for use or sale during flight) on a foreign aircraft operated by the operator, or permit such goods to be carried on such an aircraft, only if the operator:
- (a) has a dangerous goods manual in accordance with:
 - (i) the Technical Instructions; or
 - (ii) if the law of the Contracting State in which the aircraft is registered imposes requirements about a dangerous goods manual—that law; and
 - (b) complies with regulation 92.055.

Note: This regulation creates a defence to the offences created by subsections 23(2) and (2A) of the Act. A defendant charged with either of those offences bears an evidential burden in relation to the matters set out in this regulation—see subsection 13.3(3) of the *Criminal Code*.

92.055 Dangerous goods manual—requirements applicable to all operators

- (1) An operator's dangerous goods manual may be incorporated in the operator's operations manual or any other manual maintained by the operator that deals with the handling or carriage of cargo.
- (2) Subregulations (3), (4) and (5) set out, for the purposes of subsections 23(1), (2) and (2A) of the Act, conditions of the carriage of dangerous goods on an aircraft.

Note: Under subsections 23(1), (2) and (2A) of the Act, dangerous goods must not be carried on an aircraft except in accordance with these Regulations.

- (3) An operator must make a copy of its dangerous goods manual available, in a readily accessible place:
- (a) in the case of an Australian operator—to each of the operator's employees whose duties and responsibilities are related to the handling or carriage of cargo; or
 - (b) in any other case—to:
 - (i) any of the operator's employees in Australia whose duties and responsibilities are related to the handling or carriage of cargo; and
 - (ii) any employees of its ground handling agent in Australia whose duties and responsibilities are related to the handling or carriage of cargo.
- (4) An operator must take all reasonable steps to ensure that the handling and carriage of dangerous goods is in accordance with the procedures and instructions in, or referred to in, its dangerous goods manual.
- (5) An operator must take all reasonable steps to ensure that each of the operator's employees is made aware of the contents of the operator's dangerous goods manual so far as it is applicable and relevant to the employee's duties before the employee first performs those duties.

Regulation 92.065

92.065 Commercial operators—reporting of dangerous goods incidents

- (1) Subregulation (2) sets out, for the purposes of subsections 23(1), (2) and (2A) of the Act, a condition of the carriage of dangerous goods on an aircraft.

Note: Under subsections 23(1), (2) and (2A) of the Act, dangerous goods must not be carried on an aircraft except in accordance with these Regulations.

- (2) Subject to subregulation (3), the carriage of dangerous goods by an aircraft operated by a commercial operator is subject to the condition that, if a dangerous goods incident occurs, the operator must report the incident to CASA in writing within 2 working days after the incident occurs.

Note: An accident or serious incident involving dangerous goods carried on an aircraft must also be reported to the Australian Transport Safety Bureau under section 19BA of the *Air Navigation Act 1920*.

- (3) Subregulation (2) does not require an operator to report a dangerous goods incident involving dangerous goods that have not been accepted by the operator for carriage by air.

92.070 Dangerous goods statement (Act s 23A)

- (1) A person who, in the circumstances specified in subregulation (3), consigns cargo for carriage on board an aircraft (including a freight forwarder that does so in the course of business as a freight forwarder) must make and sign a written statement that:

- (a) is to the effect that the cargo does not contain dangerous goods; or
- (b) describes the contents of the cargo.

Note: Consigning cargo without making the required statement is an offence—see the Act, subsection 23A(2). Knowingly making a false or misleading statement is also an offence—see the *Criminal Code*, section 137.1.

- (2) The reference in subregulation (1) to consigning cargo for carriage on board an aircraft includes consigning cargo in circumstances such that there is a possibility that the cargo may, during its journey, be carried on an aircraft.
- (3) For subsection 23A(1) of the Act and subregulation (1), all circumstances other than those mentioned in subregulation (4) are specified.
- (4) The circumstances in which subregulation (1) does not apply are the following:
- (a) the cargo was consigned from a place outside Australia;
 - (b) the cargo is checked baggage that is to be carried on the same aircraft as the person who checked the baggage;
 - (c) the cargo is:
 - (i) a postal article (within the meaning of the *Australian Postal Corporation Act 1989*) that is in the course of carriage by air; or
 - (ii) a document being sent between service centres of a document exchange service (within the meaning given by that Act);and:
 - (iii) weighs no more than 500 grams; and
-

- (iv) is no more than 20 millimetres thick; and
 - (v) is no longer than 360 millimetres; and
 - (vi) is no wider than 260 millimetres;
 - (d) the cargo is dangerous goods that have been marked and documented in accordance with this Part.
- (5) Subregulation (6) sets out, for the purposes of subsections 23(1), (2) and (2A) of the Act, a condition of the carriage of dangerous goods on an aircraft.

Note: Under subsections 23(1), (2) and (2A) of the Act, an aircraft must not carry dangerous goods except in accordance with these Regulations.

- (6) Except in the circumstances mentioned in subregulation (4), the operator of an aircraft must not allow an item of cargo to be placed on board the aircraft unless the operator has been given a statement about the item in accordance with subregulation (1).

92.075 Dangerous goods statement in reliance on statement already made

- (1) If, in the course of cargo being consigned for carriage on an aircraft, a person delivers the cargo to the Australian Postal Corporation or a freight forwarder and gives to the Corporation or the forwarder a signed written statement that acknowledges that the cargo will or may be carried by air, and:
- (a) is to the effect that the cargo does not contain dangerous goods; or
 - (b) describes the contents of the cargo;
- the Corporation or the forwarder may, in making a statement to the operator of the kind required by regulation 92.070, rely on the person's statement.
