- (2) If an aircraft operator hands cargo to another operator for carriage on an aircraft operated by the second operator, and a statement of the kind required by regulation 92.070 was given to the first operator, the first operator may, in making a statement to the second operator of the kind required by that regulation, rely on the statement given to the first operator.

Subpart 92.C—Training

92.085 Definitions for Subpart 92.C

(1) In this Subpart:

cargo does not include carry-on baggage or checked baggage.

deemed employee means a person who, although not employed by an aircraft operator, ground handling agent, freight forwarder, screening authority or shipper of dangerous goods, performs for the operator, ground handling agent, freight forwarder, screening authority or shipper any of the following services:

- (a) accepting cargo consigned for transport on an aircraft, or supervising someone whose duties include accepting such cargo at any time after it leaves the custody of the original consignor;
- (b) acting as a member of an aircraft's flight crew or as a load planner;
- (c) acting as a member of an aircraft's cabin crew;
- (d) handling cargo consigned for transport on an aircraft at any time after it leaves the custody of the original consignor, or supervising someone whose duties include handling such cargo;
- (e) handling passengers' checked or carry-on baggage, or supervising someone whose duties include handling such baggage;
- (f) packing dangerous goods, or supervising someone whose duties include packing such goods, in the course of the goods' being consigned for carriage on an aircraft.

group A employee means:

- (a) an employee whose duties include accepting, or supervising someone whose duties include accepting, cargo known or believed to contain dangerous goods consigned for transport on an aircraft at any time after it leaves the custody of the original consignor; or
- (b) a deemed employee whose function includes those duties.

group B employee means:

- (a) an employee whose duties include accepting, or supervising someone whose duties include accepting, cargo consigned for transport on an aircraft (other than cargo known or believed to contain dangerous goods) at any time after it leaves the custody of the original consignor; or
- (b) a deemed employee whose function includes those duties.

group C employee means:

- (a) an employee who is a member of an aircraft's flight crew or a load planner;
or
- (b) a deemed employee whose function includes performing the duties of a member of an aircraft's flight crew or a load planner

group D employee means:

Regulation 92.090

- (a) an employee who is a member of an aircraft's cabin crew; or
- (b) a deemed employee whose function includes performing the duties of a member of an aircraft's cabin crew.

group E employee means:

- (a) any employee of an operator, ground handling agent, freight forwarder or screening authority who is not a group A, B, C or D employee and whose duties involve handling:
 - (i) cargo consigned for transport on an aircraft at any time after it leaves the custody of the original consignor; or
 - (ii) passengers' checked or carry-on baggage; or
- (b) a deemed employee whose function includes those duties.

group F employee means:

- (a) an employee of a shipper of goods whose duties include packing dangerous goods, or supervising someone else whose duties include packing dangerous goods, in the course of the goods being consigned for transport on an aircraft; or
- (b) a deemed employee whose function includes those duties.

load planner, in relation to dangerous goods, means a person nominated by an operator to be responsible for any 1 or more of the following:

- (a) specifying where dangerous goods may be stowed on an aircraft;
- (b) specifying the necessary segregation of the goods from other dangerous goods, other cargo, or passengers on the aircraft;
- (c) preparing information for the use of the pilot-in-command;
- (d) providing dangerous goods emergency response information for the pilot-in command.

Note: A person who performs those functions is known by many different titles: for example, *load controller*. Not all the functions are necessarily performed by the same person. Some or all of the functions may be the responsibility of the pilot-in-command or another crew member.

screening authority has the same meaning as in the *Air Navigation Act 1920*.

- (2) For the definitions of **deemed employee** and **group F employee** in subregulation (1), a person **packs** dangerous goods if he or she does any of the following in relation to the goods:
 - (a) enclosing the goods in packaging;
 - (b) marking or labelling the package or consignment;
 - (c) preparing a dangerous goods transport document for the consignment.

92.090 Extended meaning of *every 2 years* for this Subpart

For the purposes of this Subpart, if an employee completes a training course within 3 months before the second anniversary of the day on which he or she last completed, or is taken under a previous application of this regulation to have

Regulation 92.095

completed, a similar training course, he or she is taken to have completed the later course on that second anniversary.

Example: Suppose John Smith and Mary Jones each complete a course on 1 July 2003. Under the other provisions of this Subpart, each needs to complete the course again on 1 July 2005.

Suppose John completes the course again on 1 May 2005 (that is, less than 3 months before the second anniversary of the last time he did so). He is taken to have done so on 1 July 2005, and needs to complete the course again on 1 July 2007. However, Mary completes the course again on 15 March 2005 (that is, more than 3 months before the second anniversary of the last time she did so). She would need to complete the course yet again on 15 March 2007.

Suppose John completes the course again on 1 May 2007. He is taken to have done so on 1 July 2007, and needs to complete the course again on 1 July 2009. However, if Mary were to complete the course again on 15 January 2007, she would need to complete the course again on 15 March 2009.

92.095 Training—certain employees of Australian aircraft operators

- (1) This regulation applies to a group A, B, C, D or E employee in Australia of an Australian aircraft operator, and to a group C or D employee outside Australia of an Australian operator, but not to such an employee who is engaged only in 1 or more of the following:
 - (a) private operations;
 - (b) agricultural (including horticultural), forestry, or pollution-control operations;
 - (c) search and rescue operations;
 - (d) balloon operations;
 - (e) scenic or joy-flight operations;
 - (f) flying training operations.
- (2) An Australian aircraft operator must ensure that each of its employees to whom this regulation applies undertakes training in accordance with regulation 92.110:
 - (a) before the employee first performs the relevant duties; and
 - (b) every 2 years while the employee continues to have those duties.

Maximum penalty: 30 penalty units.

- (3) An offence against subregulation (2) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

92.100 Training—certain employees of Australian ground handling agents

- (1) A ground handling agent must ensure that each of its employees in Australia who is a group A, B, C or E employee undertakes training in accordance with regulation 92.110:
 - (a) before the employee first performs the relevant duties; and
 - (b) every 2 years while the employee continues to have those duties.

Maximum penalty: 30 penalty units.

Regulation 92.105

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

92.105 Training—certain employees of Australian freight forwarders

- (1) Subject to subregulation (3), a freight forwarder must ensure that each of its employees in Australia who is a group A, B or E employee undertakes training in accordance with regulation 92.110:
- (a) before the employee first performs the relevant duties; and
 - (b) every 2 years while the employee continues to have those duties.

Maximum penalty: 30 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (3) Subregulation (1) does not apply to a freight forwarder's employee who handles or accepts only cargo of the kind mentioned in paragraph 92.070(4)(c).

92.110 Required standard of training for regulations 92.095, 92.100 and 92.105

The training that an employee to whom regulation 92.095, 92.100 or 92.105 applies must undertake is a training course that meets the relevant requirements of regulation 92.135 and:

- (a) for a group A employee—is approved by CASA as being appropriate for group A employees; and
- (b) for a group B employee—is approved by CASA as being appropriate for group B employees; and
- (c) for a group C employee—is approved by CASA as being appropriate for group C employees; and
- (d) for a group D employee—is approved by CASA as being appropriate for group D employees; and
- (e) for a group E employee—is appropriate for group E employees.

Note: A training course for group E employees does not require approval by CASA.

92.115 Training—certain employees of screening authorities

- (1) This regulation applies to an employee in Australia of a screening authority if the employee's duties include handling, or supervising anyone who handles, checked baggage or carry-on baggage.
- (2) The screening authority must ensure that each of its employees to whom this regulation applies undertakes training in accordance with subregulation (4):
- (a) before the employee first performs the relevant duties; and
 - (b) every 2 years while the employee continues to have those duties.

Maximum penalty: 30 penalty units.

- (3) An offence against subregulation (2) is an offence of strict liability.

Regulation 92.120

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (4) The training that such an employee must undertake is a training course appropriate for such employees that meets the requirements of regulation 92.135.

Note: A training course for employees of screening authorities does not require approval by CASA.

92.120 Training—certain employees of shippers of dangerous goods

- (1) Subject to subregulation (2), a person who ships dangerous goods must ensure that each of its group F employees undertakes training in accordance with subregulation (4):
- (a) before the employee first performs the relevant duties; and
 - (b) every 2 years while the employee continues to have those duties.

Maximum penalty: 30 penalty units.

- (2) Subregulation (1) does not apply to an individual who consigns dangerous goods within Australian territory for his or her own private, non-commercial purposes.
- (3) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (4) The training that such an employee must undertake is a training course approved by CASA as being appropriate for group F employees and as meeting the requirements of regulation 92.135.

92.125 Training—certain employees of non-Australian operators

- (1) This regulation applies to a group A, B, C, D or E employee in Australia of an aircraft operator that is not an Australian operator.
- (2) The operator must ensure that each of its employees to whom this regulation applies undertakes training in accordance with:
- (a) the requirements of the law of the place in which the operator's aircraft are registered; or
 - (b) if there are no such requirements, or the operator's aircraft are registered in more than 1 country, the requirements of the Technical Instructions; before the employee first performs the relevant duties, and as often as that law or the Technical Instructions require while the employee continues to carry out those duties.

Maximum penalty: 30 penalty units.

- (3) The operator must ensure that the records about that training required by that law or the Technical Instructions are kept.

Maximum penalty: 30 penalty units.

- (4) An offence against subregulation (2) or (3) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

92.130 Training—Australian operators’ employees outside Australia

- (1) This regulation applies to a group A, B or E employee of an Australian operator who performs duties outside Australia.
- (2) The operator must ensure that each employee to whom this regulation applies undertakes training in accordance with:
 - (a) the requirements of the law of the place in which he or she carries out those duties; or
 - (b) if there are no such requirements, the requirements of the Technical Instructions;before the employee first performs the relevant duties, and as often as that law or the Technical Instructions require while the employee continues to carry out those duties.

Maximum penalty: 30 penalty units.

- (3) The operator must ensure that the records about that training required by that law or the Technical Instructions are kept.

Maximum penalty: 30 penalty units.

- (4) The operator must also ensure that the training is evaluated at least every second year and the evaluation process is included in the operator’s audit program.

Maximum penalty: 10 penalty units.

- (5) The operator must also ensure that if a deemed employee’s services are provided to the operator under a contract, the contract contains provisions for the necessary resources, competence, procedures and management systems, to ensure that the service to the operator is a safe one.

Maximum penalty: 10 penalty units.

- (6) An offence against subregulation (2), (3), (4) or (5) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

92.135 Requirements for training course

- (1) A dangerous goods training course that is required to be approved by CASA must include training in:
 - (a) the subject mentioned in item 20 of Table 92.135-1; and
 - (b) each of the other subjects mentioned in that table that is relevant to the employee’s duties and responsibilities in relation to the handling, carriage or consignment of cargo on an aircraft.

Note: Tables 92.135-1 and 92.135-2 follow this regulation.

- (2) A dangerous goods training course that is not required to be so approved must include training in:

Regulation 92.135

- (a) the subject mentioned in item 12 of Table 92.135-2; and
 - (b) each of the other subjects mentioned in that table that is relevant to the employee's duties and responsibilities in relation to the handling, carriage or consignment of cargo on an aircraft.
- (3) A dangerous goods training course must provide for a test of the employee's knowledge of the relevant subjects based on the training.
- (4) A dangerous goods training course must be of a standard that will enable the employee, on completing it satisfactorily, to carry out those duties and responsibilities effectively.
- (5) A dangerous goods training course must provide for the issue, to each person who successfully completes the course, of a certificate stating that he or she has done so.

Table 92.135-1 Syllabus for training courses requiring approval

Item	Subject
1	The requirements of the Act and these Regulations relating to consignment and carriage of dangerous goods
2	If the course is to be undertaken by an operator's employee or deemed employee, the purpose, contents and distribution requirements of the operator's dangerous goods manual
3	Parts 7;1.4, 7;5 and 7;6 of the Technical Instructions (<i>Cargo/passenger acceptance procedures—the kinds of cargo/passenger's baggage that are likely to be, or contain, dangerous goods</i>)
4	Methods used to identify cargo containing dangerous goods
5	The manner in which dangerous goods in each class of dangerous goods mentioned in the Technical Instructions could jeopardise the safety of an aircraft or anyone in it
6	The matters in the Foreword to the Technical Instructions
7	Part 1;2.1 of the Technical Instructions (<i>Dangerous goods forbidden for transport by air under any circumstance</i>)
8	Parts 1;1.1 and 1;1.2 of the Technical Instructions (<i>General applicability and General transport requirements</i>)
9	Part 1;2.2 of the Technical Instructions (<i>Exceptions for dangerous goods of the operator</i>)
10	Part 1;2.3 of the Technical Instructions (<i>Dangerous goods in air mail</i>)
11	Part 1;2.4 of the Technical Instructions (<i>Dangerous goods in excepted quantities</i>)
12	Part 3;4 of the Technical Instructions (<i>Dangerous goods in limited quantities</i>)
13	Part 1;3.1 of the Technical Instructions (<i>Definitions</i>)
14	Part 2 of the Technical Instructions (<i>Classification of dangerous goods</i>)
15	Parts 3;1 and 3;2, Table 3-1 and Part 3;3 of the Technical Instructions (respectively <i>General, Arrangement of the Dangerous Goods List, The Dangerous Goods List and Special Provisions</i>)
16	Part 4 of the Technical Instructions (<i>Packing instructions</i>)
17	Part 5 of the Technical Instructions (<i>Shipper's responsibilities</i>)

Regulation 92.140

Item	Subject
18	Part 7 of the Technical Instructions (<i>Operator's responsibilities</i>)
19	Part 6 of the Technical Instructions (<i>Packaging nomenclature, marking requirements and tests</i>)
20	Part 8 of the Technical Instructions (<i>Provisions concerning passengers and crew</i>)
21	Attachment 1 to the Technical Instructions (<i>Lists of proper shipping names</i>)
22	Attachment 3 to the Technical Instructions (<i>Notified variations from the Instructions</i>)

Table 92.135-2 Syllabus for training courses not requiring approval

Item	Subject
1	The requirements of the Act and these Regulations relating to consignment and carriage of dangerous goods
2	If the course is to be undertaken by an operator's employee or deemed employee, the purpose, contents and distribution requirements of the operator's dangerous goods manual
3	Parts 7;1.4, 7;5 and 7;6 of the Technical Instructions (<i>The kinds of cargo/passenger's baggage that are likely to be, or contain, dangerous goods</i>)
4	Methods used to identify cargo containing dangerous goods
5	The manner in which the dangerous goods in each class of dangerous goods mentioned in the Technical Instructions could jeopardise the safety of an aircraft or anyone in it

10	Part 5;3 of the Technical Instructions (<i>Labelling</i>)
11	Part 7;2 of the Technical Instructions (<i>Storage and loading</i>)
12	Part 8 of the Technical Instructions (<i>Provisions concerning passengers and crew</i>)
13	Attachment 3 to the Technical Instructions (<i>Notified variations from the Instructions</i>)

92.140 Who may conduct training

(1) In this regulation:

approved training course means a training course required under this Part that is required to be approved by CASA.

(2) A person must not give, or offer to give, instruction that purports to be, or to form part of, a training course that is required to be approved by CASA if the course is not approved.

Maximum penalty: 10 penalty units.

(3) A person must not give instruction that is part of an approved training course if he or she is not approved for that purpose.

Maximum penalty: 10 penalty units.

Regulation 92.145

- (4) If an approved training course is conducted by distance education methods (including correspondence, video or computer network) a person must not:
- (a) prepare material for; or
 - (b) supervise;
- the course if he or she is not approved for that purpose.

Maximum penalty: 10 penalty units.

- (5) A person must not:
- (a) give instruction that is part of a training course for group E employees, or employees of a screening authority, required under this Part; or
 - (b) prepare material for such a training course that is, or is to be, given by a distance education method (including by correspondence, video or computer network); or
 - (c) supervise such a training course that is, or is to be, given by such a method; if the person has not, within the previous 2 years, undertaken an approved training course for group A or B employees.

Maximum penalty: 5 penalty units.

- (6) For paragraph (5)(a), strict liability applies to the circumstance that a training course is required under this Part.
- (7) For this regulation, strict liability applies to the circumstance that a training course is required to be approved under this Part.

92.145 Records about training—Australian operators etc

- (1) This regulation applies to:
- (a) an Australian aircraft operator that has any group A, B, C, D or E employees in Australia; and
 - (b) an Australian aircraft operator that has any group C or D employees outside Australia; and
 - (c) a person in Australia who:
 - (i) ships dangerous goods for carriage by aircraft; and
 - (ii) has any group F employees in Australia; and
 - (d) a ground handling agent or a freight forwarder that has any group A, B, C or E employees in Australia; and
 - (e) a screening authority.
- (2) A person or organisation to whom or to which this regulation applies must maintain an up-to-date record of:
- (a) the name of each employee who has undertaken dangerous goods training in accordance with this Subpart; and
 - (b) for each such employee:
 - (i) the names of the person and the organisation providing the training and the date on which the training was undertaken; and

Regulation 92.145

- (ii) a reference (for example, by CASA approval number) to the training material used to meet the training requirements.

Maximum penalty: 30 penalty units.

- (3) A person or organisation to whom or to which this regulation applies must:
 - (a) keep a copy of any certificate issued to an employee on the completion of a course of training required by this Part; and
 - (b) give a copy of any such certificate to CASA if CASA so requests.

Maximum penalty: 30 penalty units.

- (4) A reference in this regulation to an employee includes a deemed employee only if the deemed employee:
 - (a) is self-employed; or
 - (b) is employed by an employer that is not required to keep records under this regulation.

Regulation 92.160

Subpart 92.D—Limitations on application of Subparts 92.B and 92.C

92.160 Aircraft operated by law enforcement authorities

- (1) Regulations 92.020, 92.025, 92.030 and 92.035 do not apply to the carriage of dangerous goods by an Australian aircraft, or by a person on an Australian aircraft, operated by an Australian law enforcement authority if:
 - (a) the aircraft is performing an operation solely for law enforcement purposes within Australian territory; and
 - (b) the goods are not of a kind that is forbidden for transport by air under any circumstances by the Technical Instructions; and
 - (c) the goods are in a proper condition for carriage by air and are stowed and secured safely in the aircraft, and the aircraft's pilot-in-command is told before the flight what the goods are and where they are on board the aircraft; and
 - (d) the authority has a dangerous goods manual that complies with regulation 92.055, has established safety and emergency procedures for the goods, and that manual or the authority's operations manual contains detailed instructions in relation to those procedures; and
 - (e) only persons essential to the operation are carried on the aircraft while the goods are on board the aircraft.
- (2) For subregulation (1), the Australian law enforcement authorities are the following:
 - (a) the Australian Federal Police;
 - (b) the Australian Border Force (within the meaning of the *Australian Border Force Act 2015*);
 - (c) the Department administered by the Minister administering Part 1 of Chapter 8 of the *Biosecurity Act 2015*;
 - (d) the police force or police service of a State or the Northern Territory.

Note: This regulation creates a defence to the offences created by subsections 23(2) and (2A) of the Act. A defendant charged with either of those offences bears an evidential burden in relation to the matters set out in this regulation—see subsection 13.3(3) of the *Criminal Code*.

92.165 Goods carried by external load

Regulations 92.020, 92.025, 92.030 and 92.035 do not apply to the carriage of dangerous goods by an Australian aircraft that is a rotorcraft if:

- (a) the rotorcraft is operating in Australian territory; and
- (b) the goods:
 - (i) are carried as an external load; and
 - (ii) are in a proper condition for carriage by air; and

- (iii) are segregated in accordance with the Technical Instructions, or, if they are likely to react dangerously with one another, are not carried in the same load; and
- (iv) are not of a kind that the Technical Instructions forbid the transport of by air under any circumstances; and
- (v) are packed and stowed to prevent leakage or damage during the flight; and
- (vi) are not fireworks, pyrotechnics or other explosives intended to be activated during the flight; and
- (c) only crew members and persons associated with the goods are carried on board the rotorcraft; and
- (d) the rotorcraft's pilot-in-command is told before the load is carried what the goods are and the quantity of them in the load; and
- (e) the rotorcraft is being used to conduct an external load operation in accordance with the requirements of these Regulations that apply in relation to the rotorcraft.

Note: See Part 133 in relation to requirements that apply to external load operations that are part of a medical transport operation and Part 138 in relation to requirements that apply to external load operations that involve an aerial work operation.

92.170 Cargo carried in main deck cargo compartments

- (1) In this regulation:

Class B cargo compartment and ***Class C cargo compartment*** have the same respective meanings as in ICAO Document 9481, *Emergency Response Guidance for Aircraft Incidents Involving Dangerous Goods*, as in force on 1 January 2004.

UN followed by a 4-digit number is the number assigned by the United Nations Committee of Experts on the Transport of Dangerous Goods to identify a substance or group of substances.

Note: The numbers are set out in the UN Classification, which is available as a PDF file from:

<http://www.unece.org/trans/danger/publi/unrec/English/part3.pdf>.

UN Classification means Part 3 of the *United Nations Model Regulations on the Transport of Dangerous Goods*, published by the United Nations Economic Commission for Europe, as adapted by the International Civil Aviation Organization and set out in the Technical Instructions.

- (2) Subregulations 92.020(6) and (7) and subparagraph 92.025(2)(b)(i) do not apply to the carriage of dangerous goods in the main deck cargo compartment of an aircraft if:
- (a) the aircraft:
 - (i) is operating in Australian territory; and
 - (ii) does not have an underfloor cargo compartment; and

Regulation 92.170

- (b) in the case of an aircraft engaged in passenger-carrying operations, the compartment is not a class B or class C cargo compartment; and
- (c) the cargo compartment is separated from the passenger cabin by a bulkhead or other barrier that will prevent fire and hazardous quantities of smoke or toxic gases from entering the passenger cabin or crew compartment; and
- (d) the goods meet all of the packing, labelling, marking, documentation, stowage and segregation requirements of the Technical Instructions; and
- (e) the goods do not have a subsidiary risk; and
- (f) either:
 - (i) the proper shipping name for the goods given by the UN Classification does not include the letters ‘n.o.s.’; or
 - (ii) the labelling rules set out in the UN Classification do not require the technical name of the goods to be used as well as the proper shipping name; and
- (g) the goods are of any of the following kinds:
 - (i) goods classified in Division 1.4 and compatibility group S (certain explosives);
 - (ii) aerosols that contain gases classified in Division 2.1 (flammable gases);
 - (iii) gases classified in Division 2.2 (non-flammable and non-toxic gases) (except UN 2037, UN 2073 and UN 2857);
 - (iv) flammable liquids (Class 3) in Packing Group III in combination packagings (except UN 1112, UN 2047, UN 2059, UN 2332, UN 3054 and UN 3269);
 - (v) flammable solids (Division 4.1) in Packing Group III (except UN 1309, UN 1313, UN 1314, UN 1318, UN 1324, UN 1330, UN 1338, UN 1353, UN 1869, UN 2000, UN 2213, UN 2714, UN 2715, UN 2878, UN 3089 and UN 3241);
 - (vi) oxidizing substances (Division 5.1) in Packing Group III (except UN 1458, UN 1459, UN 1467, UN 1481, UN 1482, UN 1483, UN 2427, UN 2428, UN 2429, UN 2469, UN 2726, UN 2984, UN 3210, UN 3211, UN 3213, UN 3215, UN 3216, UN 3218 and UN 3219);
 - (vii) toxic substances (Division 6.1) in Packing Group III in combination packagings (except UN 1549, UN 1550, UN 1551, UN 1556, UN 1557, UN 1593, UN 1599, UN 1655, UN 1686, UN 1690, UN 1710, UN 1812, UN 1887, UN 1888, UN 1897, UN 1935, UN 2024, UN 2025, UN 2074, UN 2077, UN 2233, UN 2501, UN 2505, UN 2515, UN 2609, UN 2655, UN 2656, UN 2674, UN 2713, UN 2747, UN 2785, UN 2788, UN 2821, UN 2831, UN 2853, UN 2854, UN 2855, UN 2856, UN 2871, UN 2874, UN 3141, UN 3144, UN 3146, UN 3286 and UN 3293);
 - (viii) infectious substances (Division 6.2);
 - (ix) diagnostic specimens (UN 3373) packed in accordance with Packing Instruction 650 of the Technical Instructions;
 - (x) radioactive material (Class 7) but only excepted packages and packages assigned category I – White only;

- (xi) corrosives (Class 8) in Packing Group III in combination packagings (except UN 1731, UN 1740, UN 1755, UN 1757, UN 1783, UN 1787, UN 1788, UN 1789, UN 1814, UN 1819, UN 1824, UN 1908, UN 2430, UN 2496, UN 2508, UN 2564, UN 2578, UN 2585, UN 2586, UN 2672, UN 2677, UN 2679, UN 2681, UN 2693, UN 2790, UN 2803, UN 2809, UN 2837, UN 2869, UN 3145, UN 3253 and UN 3320);
- (xii) dangerous goods classified in Class 9 (except UN 1931, UN 1941, UN 1990, UN 2211, UN 2590, UN 3268, UN 3314, UN 3316, UN 3363 and UN 8000);
- (xiii) dangerous goods permitted by the Technical Instructions to be carried in excepted quantities.

Note: This regulation creates a defence to the offences created by subsections 23(2) and (2A) of the Act. A defendant charged with either of those offences bears an evidential burden in relation to the matters set out in this regulation—see subsection 13.3(3) of the *Criminal Code*.

- (3) Subregulations 92.020(6) and (7) and subparagraph 92.025(2)(b)(i) do not apply in relation to the carriage of UN 1072 (oxygen, compressed) in the main deck cargo compartment of an aircraft if the carriage is in accordance with paragraphs (2)(a) to (d).
- (4) Subregulations 92.020(6) and (7) and subparagraph 92.025(2)(b)(i) do not apply in relation to the carriage of UN 1993 (flammable liquid, n.o.s.) in the main deck cargo compartment of an aircraft if the carriage is in accordance with paragraphs (2)(a) to (d).

92.175 Goods carried by private operators

Subparts 92.B and 92.C do not apply to the carriage of dangerous goods by an aircraft operated by an operator engaged in private (non-commercial) operations if:

- (a) the aircraft is operating in Australian territory and:
 - (i) is unpressurised; and
 - (ii) has an approved passenger seat configuration of less than 10 seats; and
- (b) the goods:
 - (i) are in a proper condition for carriage by air; and
 - (ii) are identified by class in accordance with the Technical Instructions; and
 - (iii) are permitted by the Technical Instructions to be carried on a passenger or cargo aircraft; and
 - (iv) are stowed and secured on the aircraft to prevent movement and damage, and segregated in accordance with the requirements of the Technical Instructions if they are likely to react dangerously with one another; and

Regulation 92.180

- (c) the pilot-in-command of the aircraft ensures that every person on board the aircraft knows, before boarding the aircraft, that the dangerous goods are on board.

Note: This regulation creates a defence to the offences created by subsections 23(2) and (2A) of the Act. A defendant charged with either of those offences bears an evidential burden in relation to the matters set out in this regulation—see subsection 13.3(3) of the *Criminal Code*.

92.180 Goods carried for parachute operations

Regulations 92.020, 92.025, 92.030 and 92.035 do not apply to the carriage, on an aircraft, of dangerous goods classified in Division 1.4 if:

- (a) the aircraft is operating in Australian territory; and
- (b) the person carrying the goods intends to jump from the aircraft by parachute, and to use the goods during the parachute descent; and
- (c) the goods are not used until after the person jumps from the aircraft; and
- (d) the pilot-in-command of the aircraft:
 - (i) knows what the goods are; and
 - (ii) before the flight begins, briefs everybody intending to board the aircraft on what to do if any of the goods are activated during the flight; and
- (e) where the flight is being undertaken by a commercial operator—the operator establishes safety and emergency procedures for the operation and sets out those procedures in the operator’s dangerous goods manual.

Note: This regulation creates a defence to the offences created by subsections 23(2) and (2A) of the Act. A defendant charged with either of those offences bears an evidential burden in relation to the matters set out in this regulation—see subsection 13.3(3) of the *Criminal Code*.

92.185 Carriage of fuel in large containers

Regulations 92.020, 92.025, 92.030 and 92.035 do not apply to the consignment for carriage, or to the carriage, on a cargo aircraft in Australian territory of:

- (a) petrol (whether called petrol, gasoline or motor spirit) (UN 1203) of packing group II; or
 - (b) aviation turbine fuel (UN 1863) of packing group II;
- if the petrol or aviation turbine fuel:
- (c) is documented, labelled, stowed and segregated on the aircraft in accordance with the Technical Instructions; and
 - (d) is contained in 1A1 non-removable-head steel drums or 1B1 non-removable-head aluminium drums with a capacity of no more than 220 litres.

Note: This regulation creates a defence to the offences created by subsections 23(2) and (2A) of the Act. A defendant charged with either of those offences bears an evidential burden in relation to the matters set out in this regulation—see subsection 13.3(3) of the *Criminal Code*.

92.190 Goods for use in emergency services

Regulations 92.020, 92.025, 92.030 and 92.035 do not apply to the consignment for carriage, or to the carriage, of dangerous goods on an aircraft if:

- (a) the aircraft:
 - (i) is unpressurised; and
 - (ii) has an approved passenger seat configuration of less than 10 seats; and
 - (iii) is operating in Australian territory; and
 - (iv) is operating for the sole purpose of carrying people engaged in emergency services work and their essential equipment (including the goods) to a place where they intend to undertake emergency service work, or of recovering them from such a place; and
- (b) where the aircraft is a helicopter—any static electric charge that it carries is discharged before the people or their equipment are loaded or unloaded; and
- (c) the goods:
 - (i) are limited to dangerous goods of the following kinds:
 - (A) goods classified in Division 1.4 (certain explosives);
 - (B) gases classified in Division 2.1 or 2.2;
 - (C) flammable liquids (Class 3);
 - (D) goods classified in Division 4.1 (flammable solids);
 - (E) goods classified in Class 9 (miscellaneous dangerous goods);
 - (F) corrosives (Class 8); and
 - (ii) are in a proper condition for carriage by air; and
 - (iii) are not used on the aircraft; and
 - (iv) if classified in Class 3:
 - (A) are packaged in accordance with the Technical Instructions; and
 - (B) are stowed and secured on the aircraft to prevent leakage or damage during the flight; and
- (d) the aircraft's pilot-in-command is told that the goods are on board, and where they are on the aircraft, and consents to them being carried on the aircraft; and
- (e) only the aircraft's crew and persons associated with the goods are carried on board the aircraft; and
- (f) the operator establishes safety and emergency procedures for the carriage of the dangerous goods; and
- (g) where the flight is being conducted by a commercial operator—the operator has a dangerous goods manual that complies with regulation 92.055, has established safety and emergency procedures for the goods, and that manual or the operator's operations manual contains detailed instructions in relation to those procedures.

Note: This regulation creates a defence to the offences created by subsections 23(2) and (2A) of the Act. A defendant charged with either of those offences bears an evidential

Regulation 92.195

burden in relation to the matters set out in this regulation—see subsection 13.3(3) of the *Criminal Code*.

92.195 Carriage of ammunition by air security officers

- (1) Regulations 92.020, 92.025 and 92.030 do not apply to the carriage of dangerous goods by an air security officer if:
 - (a) the officer is an officer mentioned in paragraph (a) of the definition of ***air security officer***; and
 - (b) the officer is on duty in a prescribed aircraft (within the meaning of section 9 of the *Aviation Transport Security Act 2004*); and
 - (c) the dangerous goods:
 - (i) is an amount of ammunition that is reasonably required in the performance of that duty; and
 - (ii) is issued by the Australian Federal Police to the officer; and
 - (iii) is for use by the officer.
- (2) Regulations 92.020, 92.025 and 92.030 do not apply to the carriage of dangerous goods by an air security officer if:
 - (a) the officer is an officer mentioned in paragraph (b) of the definition of ***air security officer***; and
 - (b) the officer is on duty in a prescribed aircraft (within the meaning of section 9 of the *Aviation Transport Security Act 2004*); and
 - (c) the dangerous goods:
 - (i) is an amount of ammunition that is reasonably required in the performance of that duty; and
 - (ii) is issued by a responsible foreign government to the officer; and
 - (iii) is ammunition of the kind agreed to under an arrangement between the responsible foreign government and the Australian Government; and
 - (iv) is for use by the officer.
- (3) For subparagraphs (2)(c)(ii) and (iii):

responsible foreign government, in relation to an air security officer mentioned in paragraph (2)(a), means the foreign government referred to in the definition of ***air security officer*** that is a party to an arrangement with the Australian Government in relation to the officer operating.

Subpart 92.E—Information to passengers

92.200 Information in passenger terminals

- (1) The owner or operator of an airport terminal must comply with the provisions of the Technical Instructions concerning information that must be given to passengers about the carriage of dangerous goods on aircraft.

Penalty: 10 penalty units.

- (2) The information required by subregulation (1) must at least be given by means of a sufficient number of notices, prominently displayed at each of the places at an airport where tickets are issued, passengers checked in and aircraft boarding areas maintained, and at baggage collection areas.

92.205 Information with tickets

- (1) A person (other than an aircraft operator) who issues a passenger ticket must ensure that the person to whom the ticket is issued is given information about the kinds of dangerous goods that must not be transported on an aircraft.

Penalty: 10 penalty units.

- (2) The information required by subregulation (1) must at least be given by means of information with the ticket and notices, visible to persons to whom tickets are issued, in each place where tickets are issued.

Civil Aviation Safety Regulations 1998

Statutory Rules No. 237, 1998

made under the

Civil Aviation Act 1988

Compilation No. 99

Compilation date: 11 April 2024

Includes amendments: F2024L00297

Registered: 18 April 2024

This compilation is in 5 volumes

Volume 1: regulations 1.001–42.1105
Volume 2: regulations 45.005–92.205
Volume 3: regulations 99.005–135.465
Volume 4: regulations 137.005–175.500
Volume 5: regulations 200.005–202.900
Dictionary and Endnotes

Each volume has its own contents

Prepared by the Office of Parliamentary Counsel, Canberra

About this compilation

This compilation

This is a compilation of the *Civil Aviation Safety Regulations 1998* that shows the text of the law as amended and in force on 11 April 2024 (the *compilation date*).

The notes at the end of this compilation (the *endnotes*) include information about amending laws and the amendment history of provisions of the compiled law.

Uncommenced amendments

The effect of uncommenced amendments is not shown in the text of the compiled law. Any uncommenced amendments affecting the law are accessible on the Register (www.legislation.gov.au). The details of amendments made up to, but not commenced at, the compilation date are underlined in the endnotes. For more information on any uncommenced amendments, see the Register for the compiled law.

Application, saving and transitional provisions for provisions and amendments

If the operation of a provision or amendment of the compiled law is affected by an application, saving or transitional provision that is not included in this compilation, details are included in the endnotes.

Editorial changes

For more information about any editorial changes made in this compilation, see the endnotes.

Modifications

If the compiled law is modified by another law, the compiled law operates as modified but the modification does not amend the text of the law. Accordingly, this compilation does not show the text of the compiled law as modified. For more information on any modifications, see the Register for the compiled law.

Self-repealing provisions

If a provision of the compiled law has been repealed in accordance with a provision of the law, details are included in the endnotes.

99.100 DAMP organisation or DAMP contractor to provide information.....	26
99.105 DAMP record-keeping.....	27
Subpart 99.C—Drug and alcohol testing by CASA	28
Division 99.C.1—Preliminary	28
99.110 Purposes of Subpart.....	28
Subdivision 99.C.1.1—Who may be drug or alcohol tested	28
99.115 Who may be drug or alcohol tested.....	28

99.120	Body samples may only be taken if person consents	28
Subdivision 99.C.1.2—Powers of approved testers		28
99.125	Powers of approved testers	28
Subdivision 99.C.1.3—CASA to approve testing devices		29
99.130	Approved drug and alcohol testing devices	29
Division 99.C.2—Drug testing		30
Subdivision 99.C.2.1—General		30
99.135	Which body samples may be drug tested	30
99.140	How samples are taken and tested.....	30
99.145	Approved drug testing devices to be used for initial drug tests	30
99.150	Method for determining sample identifiers	30
Subdivision 99.C.2.2—Initial drug tests		30
99.155	Taking samples.....	30
99.160	Initial drug test.....	31
99.165	If initial drug test result is not positive.....	31
99.170	If initial drug test result is positive.....	31
99.175	Notices of initial drug test	32
99.180	Dealing with samples for confirmatory drug test.....	33
99.185	Transporting samples	33
Subdivision 99.C.2.3—Receipt and storage of samples by approved laboratories		34
99.190	Receipt of samples.....	34
99.195	Storage of samples.....	34
Subdivision 99.C.2.4—Conduct of drug tests by approved laboratories		35
99.200	Testing Sample A	35
99.205	Samples to be tested in accordance with National Association of Testing Authorities' accreditation.....	35
99.210	Notices of Sample A results	36
99.215	Donor may request testing of Sample B.....	37
99.220	Approved laboratory to keep Sample B	38
99.225	Notices of Sample B results	38
99.230	Test results.....	39
Subdivision 99.C.2.5—Record-keeping		39
99.235	Approved laboratory to keep records	39
Division 99.C.3—Alcohol testing		41
99.240	Which body samples may be alcohol tested.....	41
99.245	How samples are taken and tested.....	41
99.250	Approved breathalysers to be used in alcohol tests.....	41
99.255	Alcohol tests	41
99.260	Test results.....	41
99.265	Notice of alcohol test.....	42

Subpart 99.D—Evidentiary certificates and prescribed proceedings	43
Division 99.D.1—Purposes of Subpart	43
99.275 Purposes of Subpart.....	43
Division 99.D.2—Evidentiary certificates	44
99.280 Certificates by approved tester	44
99.285 Certificates by approved laboratory	45
99.290 Document taken to be a certificate unless contrary intention established.....	46
99.295 Certificate not to be admitted unless copy given	46
99.300 Person signing the certificate may be called to give evidence.....	46
99.305 Rebuttal evidence	46
99.310 CASA may ask for full certificate	47
Division 99.D.3—Prescribed proceedings	48
99.315 Prescribed proceedings.....	48
Subpart 99.E—Offences for Subpart 99.C	49
Division 99.E.1—Purposes of Subpart	49
99.320 Purposes of Subpart.....	49
Division 99.E.2—Offences	50
Subdivision 99.E.2.1—Offences relating to giving a body sample	50
99.325 Failing to carry identification whilst undertaking applicable SSAA	50
99.330 Refusing or failing to give a body sample.....	50
99.335 Continuing to perform applicable SSAA after refusing a drug or alcohol test or failing to give a body sample.....	51
99.340 Failing to stop performing an applicable SSAA	51
99.345 Failing to remain in approved tester’s presence	51
99.350 Person must not interfere with integrity of body sample.....	52
Subdivision 99.E.2.2—Offences occurring after positive test result	52
99.355 Continuing to perform applicable SSAA between having initial drug test and confirmatory drug test	52
99.360 Continuing to perform applicable SSAA after having confirmatory drug test and before result returned.....	52
99.365 Continuing to perform applicable SSAA before confirmatory alcohol test result returned.....	53
99.370 Performing applicable SSAA showing positive result for testable drug	53
99.375 Performing applicable SSAA while showing positive result for a confirmatory alcohol test.....	54
Subdivision 99.E.2.3—Offences relating to returning to SSAAs after positive test result	54
99.380 Continuing to perform applicable SSAA after having confirmatory drug test	54
99.385 Continuing to perform applicable SSAA after confirmatory alcohol test.....	55

Division 99.E.3—CASA medical review officers	57
99.390 CASA medical review officers.....	57
Subpart 99.F—Provision of information	58
Division 99.F.1—Purposes of Subpart	58
99.395 Purposes of Subpart.....	58
Division 99.F.2—Information	59
99.400 Drug or alcohol test information given or required by CASA	59
99.405 Information that must be given to CASA following drug or alcohol test.....	60
Subpart 99.G—CASA’s powers in relation to civil aviation authorisations	61
Division 99.G.1—Purposes of Subpart	61
99.410 Purposes of Subpart.....	61
99.415 When CASA may vary, suspend or cancel a civil aviation authorisation	61
99.420 When variation, suspension or cancellation takes effect.....	62
99.425 Notice	62
99.430 Effect of effluxion of time in relation to the suspension of civil aviation authorisation	62
99.435 Effect of suspension of civil aviation authorisation	62
Subpart 99.H—Approved testers and authorisations to conduct drug and alcohol tests	63
Division 99.H.1—Purposes of Subpart	63
99.440 Purposes of Subpart.....	63
Division 99.H.2—Approvals and authorisations	64
99.445 CASA may approve persons to take body samples and conduct tests	64
99.450 Persons authorised to take body samples and conduct tests	64
Division 99.H.3—Obligations on approved testers and protection from liability	66
99.455 Obligations on approved testers	66
99.460 Approved testers not liable in certain cases	66
Division 99.H.4—Powers of approved testers	67
99.465 Approved testers’ powers to access premises	67
Division 99.H.5—Identity cards	68
99.470 Identity cards	68
99.475 Return of identity card.....	68
99.480 Display and production of identity cards	68
99.485 Suspension or revocation of authorisation	69
99.490 Notices.....	69
Division 99.H.6—Notices to approved testers	70
99.495 Notice to approved testers	70

Part 101—Unmanned aircraft and rockets	71
Subpart 101.A—Preliminary	75
101.005	Applicability of this Part75
101.010	Application to rocket-powered unmanned aircraft.....75
101.020	Exemption from certain provisions of CAR.....75
101.021	Meaning of <i>RPA</i>75
101.022	Types of RPA76
101.023	Meaning of <i>model aircraft</i>76
101.024	Types of model aircraft77
101.025	Meaning of <i>populous area</i>77
101.028	Issue of Manual of Standards for Part 10177
101.029	Approvals for Part 10177
101.030	Approval of areas for operation of unmanned aircraft or rockets.....78
101.035	Requirements in this Part to give information to CASA79
Subpart 101.AB—Authorisations for sections 20AA and 20AB of the Act	80
101.046	Flying without a certificate of airworthiness.....80
101.047	Performance of duties during flight time— balloons, kites and model aircraft.....80
101.048	Performance of duties during flight time— remotely piloted aircraft80
Subpart 101.B—General prohibition on unsafe operation	81
101.050	Applicability of this Subpart81
101.055	Hazardous operation prohibited81
Subpart 101.C—Provisions applicable to unmanned aircraft generally	82
101.060	Applicability of this Subpart82
101.065	Operation in prohibited or restricted area.....82
101.066	Operation in prescribed area—requirements prescribed by the Part 101 Manual of Standards.....82
101.070	Operation in controlled airspace above 400 ft AGL83
101.072	Operation in controlled airspace—requirements prescribed by the Part 101 Manual of Standards.....83
101.073	Operation must generally be within visual line of sight83
101.075	Operation near aerodromes84
101.080	Permission for operation of unmanned aircraft near aerodrome84
101.085	Maximum operating height86
101.090	Dropping or discharging of things.....86
101.095	Weather and day limitations.....86
101.097	Autonomous aircraft—launch or release without approval prohibited.....87
101.098	Identification of certain RPA—requirements prescribed by the Part 101 Manual of Standards.....87

101.099	Foreign registered RPA and model aircraft— requirements prescribed by the Part 101 Manual of Standards	87
101.099AA	Foreign registered RPA—unmanned aircraft levy	88
101.099A	Modifications of certain RPA—requirements prescribed by the Part 101 Manual of Standards.....	88
101.099B	Test flights of certain RPA—circumstances and requirements prescribed by the Part 101 Manual of Standards	88
Subpart 101.D—Tethered balloons and kites		90
101.100	Applicability of this Subpart	90
101.105	Definitions for Subpart.....	90
101.110	Tethered balloons and kites that may be operated outside approved areas	90
101.115	Mooring-line marking	91
101.120	Operation of tethered balloon or kite under cloud	91
101.125	Tethered balloon to be lit at night	91
101.130	Rapid deflation device required	92
101.135	What to do if tethered balloon escapes.....	92
Subpart 101.E—Unmanned free balloons		93
101.140	Applicability of this Subpart	93
101.145	Kinds of unmanned free balloons.....	93
101.150	Definition for Subpart— <i>approved area</i>	94
101.155	Releasing small balloons	94
101.160	Light balloons that may be released outside approved areas	95
101.165	Release of medium and heavy balloons outside approved areas	96
101.170	Medium and heavy balloons not to be flown low	97
101.175	Medium and heavy balloons to be flown in clear sky	98
101.180	How payload must be supported—medium and heavy balloons.....	98
101.185	Equipment that must be carried—medium and heavy balloons.....	98
101.190	Lighting—medium and heavy balloons	99
101.195	Marking—unmanned free balloons generally	99
101.200	Marking by day—heavy balloons	99
101.205	Lighting by night—heavy balloons.....	100
101.210	Obligation to stay in communication with ATC— medium and heavy balloons	100
101.215	Tracking of flight—medium and heavy balloons.....	100
101.220	Flight reporting—medium and heavy balloons.....	101
101.225	Ending flight and recovery—medium and heavy balloons	102
101.230	Direction by ATC to end flight in certain circumstances	102
Subpart 101.F—Remotely piloted aircraft		104
Division 101.F.1—General		104
101.235	Application of Subpart 101.F	104

101.236	Meaning of <i>approved area</i>	104
101.237	Meaning of <i>excluded RPA</i>	104
101.238	Meaning of standard RPA operating conditions	105
Division 101.F.2—Operation of RPA generally		107
101.245	Operation near people	107
101.250	Where very small, small and medium RPA may be operated	107
101.252	Certain RPA—requirement for remote pilot licence.....	108
101.255	Large RPA—requirement for certificate	108
101.260	Maintenance of large RPA	108
101.265	Large RPA—persons permitted to carry out maintenance.....	109
101.270	Certain RPA—requirement for RPA operator’s certificate	109
101.272	Certain RPA—requirement to keep records or give information to CASA	109
101.275	Approval of operation of large RPA	109
101.280	RPA not to be operated over populous areas	110
101.285	Use of aeronautical radio.....	111
Division 101.F.3—Remote pilot licences		113
101.290	Application for remote pilot licence.....	113
101.295	Eligibility for remote pilot licence	113
101.300	Conditions on remote pilot licences	114
101.315	Notice to holder of remote pilot licence to show cause	115
101.320	Variation, suspension or cancellation of remote pilot licence	116
Division 101.F.4—Certification of RPA operators		118
101.330	Application for certification as RPA operator.....	118
101.335	Eligibility for certification as RPA operator	118
101.340	Conditions on certification	119
101.342	Functions and duties of chief remote pilot	119
101.360	Notice to certified RPA operator to show cause	120
101.365	Variation, suspension or cancellation of RPA operator’s certification	120
101.370	Compliance with RPA operator’s practices and procedures	122
Division 101.F.5—Operation of certain RPA for hire or reward		123
101.371	Application of Division 101.F.5	123
101.372	Notice of certain operations	123
101.373	Notification of changes in relation to operating very small RPA for hire or reward etc.	123
101.374	Database of notifications	124
Subpart 101.FA—Excluded RPA and micro RPA accreditation		125
Division 101.FA.1—General		125
101.374A	Application of this Subpart.....	125

Division 101.FA.2—Accreditation requirements	126
101.374B	Excluded RPA and micro RPA—requirement for accreditation or remote pilot licence126
101.374C	Excluded RPA and micro RPA—requirement to produce accreditation or remote pilot licence126
Division 101.FA.3—Grant of accreditation to operate excluded RPA and micro RPA	128
101.374D	Accreditation—application128
101.374E	Accreditation—grant128
101.374F	Accreditation—conduct of online courses and examinations.....129
101.374G	Accreditation—cessation.....129
101.374H	Notice to accreditation holder to show cause130
101.374J	Suspension or cancellation of accreditation130
Subpart 101.G—Model aircraft	132
101.375	Applicability of this Subpart132
101.380	Definitions for Subpart.....132
101.385	Visibility for operation of model aircraft132
101.390	Operating model aircraft at night132
101.395	Keeping model aircraft away from people132
101.400	Operation of model aircraft outside approved areas133
101.405	Giant model aircraft.....133
101.410	Model flying displays134
Subpart 101.H—Rockets	135
101.415	Applicability of this Subpart135
101.420	Application of State and Territory laws about rockets135
101.425	Definitions for Subpart.....135
101.430	Launching rocket in or over prohibited or restricted area135
101.435	Launching rockets into controlled airspace.....136
101.440	Launching rockets near aerodromes.....136
101.445	Getting permission for launch of rocket near aerodrome.....137
101.450	Rockets other than model rockets must be launched in approved area138
101.455	Maximum operating height of rockets138
101.460	Dropping or discharging of things from rockets138
101.465	Weather and day limitations—rockets other than model rockets139
101.470	Model rockets139
Subpart 101.I—Firework displays	140
101.475	What this Subpart does.....140
101.480	Application of State and Territory laws about fireworks.....140
101.485	Meaning of <i>operate a firework display</i>140
101.490	Certain projectiles prohibited in firework displays140
101.495	Firework displays not permitted near aerodromes140
101.500	Notice to CASA of certain firework displays141

Part 103—Sport and recreation aircraft	143
Subpart 103.A—Preliminary	144
103.005	Application of Part 103144
103.010	Other key definitions for Part 103145
103.015	Issue of Manual of Standards for Part 103145
103.020	Approvals by CASA for Part 103.....145
Subpart 103.B—Aircraft listing, certification and markings	146
103.025	Listing with a Part 103 ASAO146
103.030	Flying without a certificate of airworthiness— airworthiness standards for certain kinds of Part 103 aircraft.....146
103.035	Display of markings—aircraft other than sailplanes147
Subpart 103.C—General obligations	148
103.040	Requirements for undertaking Part 103 activities148
Subpart 103.D—Operational procedures	149
103.045	Minimum height rules—other than over populous areas or public gatherings.....149
103.050	Safety when aircraft operating on ground150
103.055	Carriage of passengers.....151
103.060	Carriage and restraint of persons.....151
103.065	Carriage of cargo152
103.070	Simulating IMC flying152
103.075	Training flight limitations etc.....153
103.080	Consumption or provision of alcohol.....154
103.085	Additional requirements in relation to Part 103 activities.....154
Subpart 103.K—Equipment	155
103.090	Requirements relating to equipment.....155
Subpart 103.M—Airworthiness requirements	156
103.100	Application of CAR Parts 4 to 4D.....156
103.105	Requirements prescribed by the Part 103 Manual of Standards.....156
103.110	Permission for section 20AB of Act.....156
103.115	Requirements for ASAO exposition.....156
103.120	Aircraft data plate—aircraft to which Part 21 does not apply157
103.125	Major defects157
Subpart 103.Z—Towing of Part 103 aircraft by other aircraft	159
103.130	Towing of Part 103 aircraft by other aircraft159
Part 105—Parachuting from aircraft	160
Subpart 105.A—Preliminary	162
105.005	Application of Part 105162
105.010	Key definitions for Part 105162
105.015	Issue of Manual of Standards for Part 105163

Subpart 105.C—General	164
Division 105.C.1—General flight limitations	164
105.020	Parachutists must not create hazards164
105.025	Persons must not create hazards to aircraft operated to facilitate parachute descents164
Division 105.C.2—Operational documents	165
Division 105.C.3—Flight related documents	166
Division 105.C.4—Reporting and recording defects, incidents etc.	167
105.045	Reserve parachutes and emergency parachutes— reporting of major defects by maintainers.....167
105.050	Reserve parachutes—reporting of major defects by parachutists167
Division 105.C.5—Search and rescue services and emergency and survival equipment	169
105.055	Reserve parachute and emergency parachute equipment requirements169
105.060	Defective reserve parachutes and defective emergency parachutes170
Division 105.C.6—Miscellaneous requirements	171
105.065	Requirements for undertaking parachuting activities.....171
105.070	Additional obligations applying to parachute operators171
105.075	Permission to undertake parachute descent.....172
105.080	General requirements for aircraft used for parachute descents172
105.085	Requirements for aircraft used for descents by trainee parachutists and tandem parachutists173
105.090	Dropping things over populous areas174
105.095	Dropping things other than over populous areas.....174
Subpart 105.D—Operational requirements	176
105.100	Additional requirements in relation to parachuting activities.....176
105.105	Restraint of persons other than flight crew members176
105.110	Persons other than flight crew members— compliance with safety directions177
105.115	Restrictions on aircraft occupants for descents by trainee parachutists and tandem parachutists178
Subpart 105.G—Personnel fatigue management	179
105.120	Management of fatigue in relation to persons exercising certain parachute descent duties.....179
Subpart 105.J—Weight and balance	180
105.125	Loading of aircraft used for parachute descents.....180

Subpart 105.K—Instruments, indicators, equipment and systems	181
105.130 Requirements relating to radio equipment and oxygen equipment	181
Subpart 105.N—Flight crew	182
105.135 Pilot requirements for parachute descents—Part 103 aircraft	182
105.140 Pilot requirements for parachute descents—aeroplanes	182
105.145 Pilot requirements for parachute descents—helicopters	182
105.150 Pilot requirements for parachute descents—powered-lift aircraft.....	183
105.155 Pilot requirements for parachute descents—manned free balloons.....	183
Part 115—Commercial sport and recreational aviation operations	185
Part 117—Representations and surveys	186
117.005 What this Part is about.....	186
117.010 Misrepresentations about holding certain civil aviation authorisations.....	186
117.015 Safety-related surveys or questionnaires—holders of certain civil aviation authorisations	186
117.020 Owner or registered operator to provide information about aircraft.....	187
117.025 Owner or registered operator to provide traffic reports.....	188
117.030 Protection of information	188
Part 119—Australian air transport operators—certification and management	190
Subpart 119.A—General	192
119.005 What Part 119 is about	192
119.010 Definition of <i>Australian air transport operation</i>	192
119.015 Definitions of <i>Australian air transport AOC</i> and <i>Australian air transport operator</i>	193
119.020 Definition of <i>significant change</i>	193
119.025 Approvals by CASA for Part 119.....	194
119.030 Prescribed purpose—Australian air transport operations	194
119.035 Prescribed position—safety manager	194
119.036 Required position—head of training and checking	194
119.040 Required material for reference library	195
119.045 Issue of Manual of Standards for Part 119	195
119.050 Australian air transport AOC required	195
119.055 Compliance with Australian air transport AOCs	195
119.060 Compliance with conditions of Australian air transport AOCs.....	196

Subpart 119.B—Australian air transport AOCs	197
119.065	Application197
119.070	Conditions for issue.....197
119.075	Approval of exposition.....200
119.080	Conditions of an Australian air transport AOC.....200
Subpart 119.C—Changes relating to Australian air transport operators	202
119.085	Changes of name etc.....202
119.090	Application for approval of significant changes202
119.095	Approval of significant changes.....203
119.100	Changes must be made in accordance with process in exposition203
119.105	CASA directions relating to exposition or key personnel203
Subpart 119.D—Organisation and personnel	205
119.110	Organisation and personnel.....205
119.115	When key personnel cannot carry out responsibilities.....205
119.120	Familiarisation training for key personnel205
119.125	Chief executive officer—experience205
119.130	Chief executive officer—responsibilities and accountabilities.....206
119.135	Head of flying operations—qualifications and experience.....207
119.140	Head of flying operations—responsibilities.....208
119.145	Head of training and checking—qualifications and experience.....208
119.150	Head of training and checking—responsibilities209
119.155	Safety manager—experience.....210
119.160	Safety manager—responsibilities.....210
119.165	Key personnel—additional qualification and experience requirements.....210
Subpart 119.E—Training and checking for operational safety-critical personnel	212
119.170	Training and checking system.....212
119.175	Program for training and assessment in human factors principles and non-technical skills213
119.180	Training in human factors principles and non-technical skills for flight crew etc.214
119.185	Training in human factors principles and non-technical skills for other operational safety-critical personnel214
Subpart 119.F—Safety management	216
119.190	Safety management system requirements216
119.195	Flight data analysis program requirements216

Subpart 119.G—Personnel fatigue management	218
Subpart 119.H—Expositions for Australian air transport operators	219
119.205	Content of exposition219
119.210	Compliance with exposition by operator.....220
119.215	Providing personnel with exposition.....220
119.220	Compliance with exposition by personnel221
Subpart 119.J—Records and documents	222
119.225	Personnel training and checking records—making records222
119.230	Personnel training and checking records—availability of records223
119.235	Copies of flight crew licences and medical certificates223
119.240	Retention periods for personnel records.....224
119.245	Retention periods for flight-related documents.....225
119.250	Retention periods for other flight-related records225
Subpart 119.K—Miscellaneous offences	227
119.255	Dealings in relation to cancelled, suspended, varied, pending or refused civil aviation authorisations.....227
119.260	Maximum period for use of foreign registered aircraft in Australian territory.....229
Part 121—Australian air transport operations—larger aeroplanes	230
Subpart 121.A—Preliminary	235
121.005	Application of Part 121235
121.010	Approvals by CASA for Part 121.....235
121.015	Issue of Manual of Standards for Part 121235
Subpart 121.C—General	236
Division 121.C.1—General flight limitations	236
121.020	Permitted categories of aeroplanes.....236
121.025	Aeroplane to be flown under the IFR.....236
121.030	Flights further than the 60 minute distance236
121.035	Flights further than the threshold distance238
121.040	Flight distance limitation over water.....239
121.045	Simulation of emergency or abnormal situations, or IMC239
121.050	Ferrying an aeroplane with one engine inoperative240
Division 121.C.2—Operational documents	241
121.055	Compliance with flight manual241
121.060	Operator to have minimum equipment list for certain flights241
121.065	Duty statement to be available to crew241
121.070	Availability of checklists.....241

Division 121.C.3—Flight related documents	243
121.075	Electronic documents243
121.080	Availability of parts of exposition.....243
121.085	Carriage of documents.....243
121.090	Accessibility of documents244
121.095	Carriage of documents—flights that begin or end outside Australian territory.....244
121.100	Keeping and updating documents etc.....244
121.105	Journey logs.....245
121.110	Passenger lists.....246
121.115	Flight preparation forms for flights that begin or end outside Australian territory.....247
Division 121.C.4—Reporting and recording defects and incidents etc.	248
121.120	Procedures for reporting and recording defects etc.....248
121.125	Procedures for reporting and recording incidents248
Division 121.C.5—Search and rescue services and emergency and survival equipment	249
121.130	Information about search and rescue services249
121.135	Information about emergency and survival equipment249
Division 121.C.6—Miscellaneous requirements	250
121.140	Crew activities necessary for safe operation250
121.145	Competence of ground support personnel.....250
121.150	Duty statement to be available to ground support personnel250
121.155	Cockpit authorisation and briefing251
Subpart 121.D—Operational procedures	252
Division 121.D.1—Operational control	252
121.160	Operational control.....252
Division 121.D.2—Flight preparation	253
121.165	General flight preparation requirements.....253
121.170	Flight preparation (Part 121 alternate aerodromes) requirements253
Division 121.D.3—Flight planning	254
121.175	Operational flight plans254
121.180	Availability of flight planning information255
Division 121.D.4—Flight rules	256
121.185	Take-off and landing minima for aerodromes.....256
121.190	Establishing lowest safe altitudes etc.256
121.195	Exposition requirements for low-visibility operations256
121.200	Stabilised approach requirements.....257
Division 121.D.5—Aerodromes	258
121.205	Aerodrome requirements.....258
121.210	Procedures to determine information about aerodromes259
121.215	Procedures for safety at aerodromes259

121.220	Taking off from and landing on narrow runways.....	260
Division 121.D.6—Fuel requirements		261
121.225	Fuel procedures	261
121.230	Oil requirements	261
121.235	Fuel requirements	261
121.240	Fuelling safety procedures.....	261
Division 121.D.7—Passenger transport and medical transport		263
121.245	Application of Division 121.D.7	263
121.250	Carriage of restricted persons.....	263
121.255	Carry-on baggage	263
121.260	Aisles to remain unobstructed	263
121.265	Stowage of passenger service equipment etc.	264
121.270	Passengers in emergency exit row seats.....	264
121.275	Carriage of passengers with reduced mobility	265
121.280	Safety briefing cards.....	265
121.285	Safety briefings, instructions and demonstrations.....	266
121.290	Additional safety briefing for passengers in emergency exit rows.....	266
121.295	Safety briefing in the event of an emergency.....	266
Division 121.D.8—Instruments, indicators, equipment and systems		267
121.300	Airborne weather radar equipment.....	267
121.305	Head-up displays, enhanced vision systems and synthetic vision systems	267
121.310	Crew protective breathing equipment	267
121.315	Hand-held fire extinguishers	267
121.320	Procedures relating to first-aid kits	267
121.325	Procedures relating to universal precaution kits.....	268
121.330	Procedures relating to emergency medical kits.....	268
121.335	Life-saving equipment for life rafts.....	268
121.340	Survival equipment procedures	269
Division 121.D.9—Miscellaneous		270
121.345	Procedures relating to ice	270
121.350	Procedures relating to portable electronic devices	270
121.355	Procedures relating to carriage of animals	270
121.360	Polar operations	270
121.365	Cosmic radiation.....	271
121.370	Exceeding cosmic radiation limits	271
121.375	Obstruction of emergency exits.....	271
121.380	Assignment of cabin crew seats	272
121.385	CASA approvals relating to take-offs and landings.....	273
Subpart 121.F—Performance		274
121.390	Performance data.....	274
121.395	Take-off performance	274
121.420	Landing performance	275
121.425	Computerised performance data systems not fitted to aeroplanes.....	275
121.430	Procedures relating to inoperative engines.....	276

Subpart 121.J—Weight and balance	277
121.435	Loading of aeroplane.....277
121.440	Procedures for loading aeroplane etc.277
121.445	Pilot in command must have information about aeroplane’s weight and balance.....278
121.450	Computerised weight and balance systems not fitted to aeroplanes278
121.455	Weight and balance documents.....278
Subpart 121.K—Equipment	280
121.460	Requirements relating to equipment.....280
Subpart 121.N—Flight crew	281
Division 121.N.1—General	281
121.470	Additional application of this Subpart.....281
121.475	Composition, number, qualifications and training281
121.480	Experience282
121.485	Competence283
121.490	Assignment to duty as pilot in command283
121.495	Pilot in command.....283
121.500	Co-pilots284
121.505	Cruise relief co-pilots284
121.510	Use of approved flight simulators for training or checking.....284
121.515	Knowledge of route and aerodromes.....286
Division 121.N.2—Operation of aeroplanes of different type ratings	287
121.520	Application of Division 121.N.2287
121.525	Assignment of flight crew to aeroplanes of different type ratings287
121.530	Credit for checks, qualifications, training and experience.....287
Division 121.N.3—Relief	289
121.535	Relief of pilot in command.....289
Division 121.N.4—Recent experience	290
121.540	Pilot in command and co-pilot—recent experience requirements290
121.545	Cruise relief co-pilot—recent experience requirements291
121.550	Flight engineers—recent experience requirements291
Division 121.N.5—Non-recurrent training and checking etc.	293
121.555	Meeting initial training requirements293
121.560	Meeting conversion training requirements293
121.565	Command training requirements293
Division 121.N.6—Recurrent training and checking	295
121.570	Recurrent training and checking requirements.....295
121.575	Holding valid Part 121 proficiency check.....295
121.580	Part 121 proficiency check296
121.585	Holding valid line check.....297
121.590	Line check requirements297

121.595	Holding valid refresher check	298
121.600	Refresher training and checking requirements	298
121.605	Holding valid annual emergency and safety equipment check	299
121.610	Annual emergency and safety equipment training and checking requirements	300
121.615	Holding valid 3 yearly emergency and safety equipment check	300
121.620	The 3 yearly emergency and safety equipment training and checking requirements	301
Subpart 121.P—Cabin crew		302
Division 121.P.1—Preliminary		302
121.625	Application of Subpart 121.P	302
121.630	When cabin crew are required	302
Division 121.P.2—General		303
121.635	Number of cabin crew	303
121.640	Qualifications, experience and training	304
121.645	Competence	305
121.650	Minimum age	305
121.655	English proficiency	306
121.660	Assignment to duty as senior cabin crew member	306
121.665	Training and checking for senior cabin crew member	306
121.670	Operating with a reduced number of cabin crew	307
121.675	Second senior cabin crew member	307
121.680	Training facilities and devices	307
Division 121.P.3—Operation of aeroplanes of different aeroplane types		309
121.685	Application of Division 121.P.3	309
121.690	Content of exposition in relation to aeroplane types	309
121.695	Maximum number of aeroplane types	309
121.700	Assignment to different aeroplane types	309
Division 121.P.4—Recent experience		310
121.705	Recent experience requirements—6 months before flight	310
Division 121.P.5—Non-recurrent training and checking		311
121.710	Meeting initial training requirements	311
121.715	Meeting conversion training requirements	311
121.720	Meeting differences training requirements	312
Division 121.P.6—Recurrent training and checking		313
121.725	Annual training and holding valid annual training check	313
121.730	Holding valid line check	313
121.735	Three yearly training and holding valid 3 yearly training check	314
Division 121.P.7—When cabin crew are carried but not required		316
121.740	Competence	316

121.745	Minimum age	316
121.750	Annual emergency and safety equipment check	316
Subpart 121.V—Emergency evacuation procedures		318
121.755	Emergency evacuation procedures	318
Subpart 121.Z—Certain single-engine aeroplanes		319
121.760	Application of Part 135 to certain operations.....	319
121.765	At least 2 pilots required for certain IFR flights	319
121.770	Trend monitoring systems required for certain VFR flights by day	319
121.775	Terrain awareness and warning system.....	320
121.780	Aircraft not to be flown under the VFR at night	320
Part 129—Foreign air transport operators—certification and operating requirements		321
Subpart 129.A—Foreign air transport operations—general		322
129.005	What Part 129 is about	322
129.020	Approvals by CASA for Part 129.....	322
129.025	Prescribed purpose—foreign air transport operations	322
129.030	Foreign air transport operations—foreign air transport AOC required	322
129.035	Foreign air transport operations—compliance with foreign air transport AOCs	322
129.040	Foreign air transport operations—compliance with conditions of foreign air transport AOCs.....	323
Subpart 129.B—Foreign air transport AOCs		324
129.045	Foreign air transport AOC—information and documents that may be required.....	324
129.050	Foreign air transport AOC—manner of giving CASA information etc.....	324
129.055	Foreign air transport AOC—conditions for issue	324
129.060	Foreign air transport AOC—conditions	325
129.065	Foreign air transport AOC—requirement to give notice of certain events.....	326
Subpart 129.C—Foreign air transport operations—operating requirements		327
129.070	Foreign air transport operations—compliance with certain Part 91 provisions	327
129.075	Foreign air transport operations—compliance with Annex 6	327
129.080	Foreign air transport operations—common language for crew	327
129.085	Foreign air transport operations—flights to be in accordance with IFR or approval	328
129.090	Foreign air transport operations—flight crew licences	328
129.095	Foreign air transport operations—air displays	328
129.100	Foreign air transport operations—low-visibility operations	329

129.105	Foreign air transport operations—flying in formation	329
129.110	Foreign air transport operations—simulated IMC prohibited.....	329
129.115	Foreign air transport operations—simulated emergency and abnormal procedures prohibited.....	329
129.120	Foreign air transport operations—aerobatic manoeuvres prohibited	330
129.125	Foreign air transport operations—maximum period for use of Australian aircraft in Australian territory	330
Subpart 129.M—Foreign air transport operations—airworthiness		331
129.200	Foreign air transport operations—certificates of airworthiness	331
129.205	Foreign air transport operations—continuing airworthiness	331
Subpart 129.N—Foreign air transport operations—flight crew		332
129.250	Foreign air transport operations—flight crew experience for aircraft covered by overseas rating.....	332
129.255	Foreign air transport operations—co-pilot	333
Part 131—Balloons and hot air airships		334
Subpart 131.A—Preliminary		338
131.005	Application of Part 131	338
131.010	Definition of <i>balloon transport operation</i>	338
131.015	Definitions of <i>balloon transport AOC</i> and <i>balloon transport operator</i>	338
131.020	Definition of <i>specialised balloon operation</i>	338
131.025	Definition of <i>Part 131 recreational activity</i>	339
131.030	Definition of <i>significant change</i>	339
131.035	Approvals by CASA for Part 131.....	340
131.040	Prescribed purpose—balloon transport operations.....	340
131.045	Prescribed position—safety manager	340
131.050	Required material—reference library	340
131.055	Issue of Manual of Standards for Part 131	341
Subpart 131.B—Operator certification and management		342
Division 131.B.1—Requirement for certification for balloon transport operations		342
131.060	Balloon transport AOC required to conduct balloon transport operations	342
131.065	Compliance with balloon transport AOC.....	342
131.070	Compliance with conditions of balloon transport AOC.....	342
Division 131.B.2—Balloon transport AOCs		343
131.075	Application for balloon transport AOC.....	343
131.080	Conditions for issue of balloon transport AOC.....	343
131.085	Approval of exposition	345
131.090	Conditions of balloon transport AOCs.....	345

Division 131.B.3—Changes relating to balloon transport operators	347
131.095 Changes of name etc.....	347
131.100 Application for approval of significant changes	347
131.105 Approval of significant changes	348
131.110 Changes must be made in accordance with process in exposition	348
131.115 CASA directions relating to exposition or key personnel	348
Division 131.B.4—Organisation and personnel	350
131.120 Organisation and personnel	350
131.125 Key personnel cannot carry out responsibilities.....	350
131.130 Familiarisation training for key personnel	350
131.135 Chief executive officer—experience	350
131.140 Chief executive officer—responsibilities and accountabilities.....	351
131.145 Head of flying operations—qualifications and experience.....	352
131.150 Head of flying operations—responsibilities.....	352
131.155 Head of training and checking—qualifications and experience.....	353
131.160 Head of training and checking—responsibilities	353
131.165 Safety manager—experience.....	353
131.170 Safety manager—responsibilities.....	353
131.175 Key personnel—additional qualification and experience requirements.....	353
Division 131.B.5—Systems	355
131.180 Safety management system requirements	355
131.185 Training and checking system.....	355
131.190 Fatigue management system	355
Division 131.B.6—Expositions for balloon transport operators	356
131.195 Content of exposition	356
131.200 Compliance with exposition by operator.....	357
131.205 Providing personnel with exposition.....	357
131.210 Compliance with exposition by personnel	357
Division 131.B.7—Records and documents	359
131.215 Personnel training and checking records—making records	359
131.220 Personnel training and checking records—availability of records	359
131.225 Copies of balloon flight crew licences and medical certificates	360
131.230 Retention periods for personnel records.....	360
Division 131.B.8—Miscellaneous offences	362
131.235 Dealings in relation to cancelled, suspended, varied, pending or refused civil aviation authorisations.....	362
131.240 Maximum period for use of foreign registered Part 131 aircraft in Australian territory	363

Subpart 131.C—General	365
Division 131.C.1—General flight limitations	365
131.245 Pilots must be authorised.....	365
131.250 Simulation of emergency or abnormal situations.....	365
Division 131.C.2—Operational documents	366
131.255 Compliance with flight manual	366
131.260 Availability of checklists.....	366
Division 131.C.3—Flight related documents	367
131.265 Electronic documents	367
131.270 Availability of parts of exposition.....	367
131.275 Carriage of documents.....	367
131.280 Keeping documents with a person on the ground during flight.....	367
Division 131.C.4—Reporting and recording information	368
131.285 Reporting and recording information	368
Division 131.C.5—Search and rescue services and emergency and survival equipment	369
131.290 Information about search and rescue services.....	369
131.295 Information about emergency and survival equipment	369
Division 131.C.6—Miscellaneous requirements	370
131.300 Competence of ground support personnel.....	370
131.305 Flights over populous areas, public gatherings and other areas.....	370
131.310 Dropping things from aircraft.....	370
131.315 Flights at night.....	371
131.320 Use of supplemental oxygen equipment etc.....	371
131.325 Specialised balloon operations	372
131.330 Additional requirements for specialised balloon operations	372
Subpart 131.D—Operational procedures	373
Division 131.D.1—Operational control	373
Division 131.D.2—Flight preparation	374
131.340 Flight preparation requirements	374
Division 131.D.3—Flight notifications and pre-flight checks	375
131.345 Balloon flight notification requirements	375
131.350 Matters to be checked before take-off.....	375
Division 131.D.4—Flight rules	376
Subdivision 131.D.4.1—General	376
131.353 Air traffic services—prescribed requirements	376
131.354 Use of radio—broadcasts and reports	376
131.355 Additional right of way rules.....	376
131.360 Operations at non-controlled aerodromes	377
131.365 Flights over water.....	377
Subdivision 131.D.4.2—Visual flight rules	377
131.367 VFR flights.....	377

Division 131.D.5—Taking off, landing and ground operations	379
131.370	Procedures for safety during ground operations.....379
131.375	Operation of Part 131 aircraft while tethered.....379
Division 131.D.6—Fuel requirements	380
131.380	Fuel and ballast procedures380
131.385	Fuel and ballast requirements.....380
Division 131.D.7—Safety of persons on aircraft and cargo requirements	381
131.390	Smoking not permitted during flight or within 15 metres of Part 131 aircraft.....381
131.395	Certain Part 131 aircraft to have signage about smoking381
131.400	Carriage of infants381
131.405	Carriage of persons requiring assistance382
131.410	Passengers—safety briefings and instructions382
131.415	Safety briefing in the event of an emergency.....382
131.420	Passengers—compliance with safety directions.....382
131.425	Restraint of cargo383
131.430	Procedures relating to carriage of animals383
Division 131.D.8—Miscellaneous	384
131.435	Training flight limitations384
131.440	Test flights.....384
Subpart 131.F—Performance	385
131.445	Loading weights385
131.450	Loading procedures385
131.455	Carriage of passengers.....386
Subpart 131.K—Equipment	387
131.460	Requirements relating to equipment.....387
Subpart 131.M—Continuing airworthiness	388
Subpart 131.N—Flight crew	389
131.565	Qualifications and training for pilots.....389
Subpart 131.P—Other operational safety-critical personnel	390
Division 131.P.1—Ground support personnel	390
131.570	Qualifications and training for ground support personnel390
Division 131.P.2—Other operational support personnel	391
Subpart 131.R—Part 131 recreational activities	392
131.580	Part 131 recreational activities must be authorised392
131.585	Procedures for carrying hang gliders.....392
Subpart 131.S—Balloon flight crew licensing	393
Subpart 131.Z—Tethered gas balloons	394
131.685	Approval required to operate.....394
131.690	Compliance with Part 131 Manual of Standards.....394
131.695	Operation under cloud.....394

131.700	Operation at night.....	394
131.705	Rapid deflation device required	395
131.710	What to do if balloon escapes.....	395
Part 132—Limited category aircraft		396
Subpart 132.A—Preliminary		398
132.005	What Part 132 is about	398
132.010	Key definitions for Part 132	398
132.015	Definition of <i>adventure flight</i> for limited category aircraft	399
132.020	Definition of <i>major</i> for modifications and repairs for limited category aircraft.....	399
132.025	Definition of <i>safety-critical aeronautical product</i> for limited category aircraft.....	400
132.030	Approval of modifications and repairs for limited category aircraft.....	400
132.035	Approvals by CASA or administering authority for Part 132.....	400
132.040	Issue of Manual of Standards for Part 132	401
132.045	Relationship of Part 132 to other requirements for operating limited category aircraft	401
Subpart 132.B—Flying limited category aircraft—general requirements		403
132.050	General operational requirements	403
132.055	Authorised operations for limited category aircraft	404
132.060	Maximum number of persons to be carried.....	405
132.065	Passenger briefing for flights other than adventure flights.....	405
132.070	Content of safety briefing for flights other than adventure flights	406
132.075	Flights over populous areas.....	406
132.085	Flights in foreign country’s airspace	408
Subpart 132.C—Flying limited category aircraft—adventure flights		409
Division 132.C.1—Adventure flights—general requirements		409
132.090	Adventure flight procedures required.....	409
132.095	Limited category certificate must include adventure flights as special purpose operation.....	409
132.100	When adventure flights prohibited—aircraft airframe life and life-limited safety-critical aeronautical products.....	409
132.105	When adventure flights prohibited—major modifications or repairs	410
132.110	When adventure flights prohibited—certain aircraft that are not ex-armed forces or historic aircraft	410
132.115	When adventure flights prohibited—aircraft with special flight permit.....	411
132.120	Requirements for pilot in command of adventure flights.....	411
132.125	Unbroken round trips only	411

132.130	Sightseeing flights prohibited.....	411
132.135	Clothes and equipment supplied by operator	411
132.140	Passengers who cannot understand safety briefing to be accompanied on adventure flights	412
Division 132.C.2—Adventure flights—passenger safety briefings		413
132.145	Requirement for passenger safety briefing when booking.....	413
132.150	Content of passenger safety briefing when booking	413
132.155	Requirement for passenger safety briefing before boarding aircraft	414
132.160	Acknowledgement by passengers who are at least 18 and who can understand passenger safety briefing	415
132.165	Acknowledgement for passengers under 18 or who cannot understand passenger safety briefing.....	415
132.170	Retention of acknowledgements	416
Subpart 132.D—Limited category aircraft—certification and airworthiness requirements		417
Division 132.D.1—Certification and airworthiness—general		417
132.175	Advice about modifications, repairs, damage, defects and life-limited aeronautical products.....	417
132.180	Requirements for giving approvals, certificates and advice—individuals	417
132.185	Authorisations to give approvals, certificates and advice for limited category aircraft	418
132.190	Requirements for giving approvals, certificates and advice—limited category organisations	419
Division 132.D.2—Certification and airworthiness—permit index numbers		420
132.195	Assignment of permit index numbers—general.....	420
132.200	Assignment of new permit index numbers on initiative of administering authority	420
132.205	Assignment of new permit index numbers at CASA direction	420
132.210	Assignment of new permit index numbers on application by registered operator	421
132.215	When assignment of new permit index number takes effect.....	421
132.220	Notice to operator if new permit index number assigned	421
Division 132.D.3—Certification and airworthiness—notice to CASA of certain matters		422
132.225	Notice to CASA—permit index numbers assigned by limited category organisation for aircraft.....	422
132.230	Notice to CASA—certain proposed actions by limited category organisation	422
132.235	Notice to CASA—safety of aircraft	423

Subpart 132.M—Limited category aircraft—airworthiness and maintenance	424
Part 133—Australian air transport operations—rotorcraft	425
Subpart 133.A—Preliminary	429
133.005 Application of Part 133	429
133.010 Definition of <i>suitable forced landing area</i> for rotorcraft flights.....	429
133.015 Approvals by CASA for Part 133.....	430
133.020 Issue of Manual of Standards for Part 133	430
Subpart 133.C—General	431
Division 133.C.1—General flight limitations	431
133.025 Permitted categories of rotorcraft.....	431
Division 133.C.2—Operational documents	432
133.030 Compliance with flight manual	432
133.035 Operator to have minimum equipment list for certain flights.....	432
133.040 Availability of checklists.....	432
Division 133.C.3—Flight related documents	434
133.045 Electronic documents	434
133.050 Availability of parts of exposition.....	434
133.055 Carriage of documents.....	434
133.060 Availability or carriage of documents for certain flights.....	435
133.065 Carriage of documents—flights that begin or end outside Australian territory.....	436
133.070 Keeping and updating documents etc.....	437
133.075 Journey logs.....	437
133.080 Passenger lists.....	438
133.085 Flight preparation forms for flights that begin or end outside Australian territory	439
Division 133.C.4—Reporting and recording defects and incidents etc.	441
133.090 Procedures for reporting and recording defects etc.....	441
133.095 Procedures for reporting and recording incidents	441
Division 133.C.5—Search and rescue services and emergency and survival equipment	442
133.100 Information about search and rescue services	442
133.105 Information about emergency and survival equipment	442
Division 133.C.6—Miscellaneous requirements	443
133.110 Crew activities necessary for safe operation	443
133.115 Competence of ground support personnel.....	443
133.120 Crew station authorisation and briefing	444
Subpart 133.D—Operational procedures	445
Division 133.D.1—Operational control	445
133.125 Operational control.....	445

Division 133.D.2—Flight preparation	446
133.130 Flight preparation requirements	446
Division 133.D.3—Flight planning	447
133.135 Operational flight plans	447
133.140 Availability of flight planning information	448
Division 133.D.4—Flight rules	450
133.145 Take-off and landing minima	450
133.150 Flights to or from foreign countries that do not use ICAO procedures.....	451
133.155 Authorised instrument approach procedures not in the AIP.....	451
133.160 Exposition requirements for low-visibility operations	451
133.165 IFR flights without destination alternate aerodromes	452
133.167 Minimum height rules for medical transport operations	453
Division 133.D.5—Aerodromes	454
133.170 Procedures to determine information about aerodromes	454
133.175 Procedures for safety at aerodromes	454
Division 133.D.6—Fuel requirements	456
133.180 Fuel procedures	456
133.185 Oil requirements	456
133.190 Fuel requirements	456
133.195 Fuelling safety procedures.....	456
Division 133.D.7—Passenger transport and medical transport	458
133.200 Application of Division 133.D.7	458
133.205 Simulation of emergency or abnormal situations.....	458
133.210 Carriage of restricted persons.....	458
133.215 Carry-on baggage	458
133.220 Obstruction of emergency exits.....	459
133.225 Passengers in seats adjacent to emergency exits	459
133.230 Carriage of passengers with reduced mobility	460
133.235 Safety briefing cards.....	460
133.240 Safety briefings, instructions and demonstrations.....	461
133.245 Safety briefing in the event of an emergency.....	461
Division 133.D.8—Instruments, indicators, equipment and systems	463
133.250 Airborne weather radar equipment.....	463
133.255 Head-up displays, enhanced vision systems and synthetic vision systems	463
133.260 Survival equipment procedures	464
133.265 NVIS flights	464
133.270 Securing moveable equipment	464
Division 133.D.9—Miscellaneous	466
133.275 Procedures relating to ice	466
133.280 Procedures relating to portable electronic devices.....	466

133.285	Procedures relating to carriage of animals	466
133.290	Polar operations	466
133.295	External load operations involving winching a person	467
Subpart 133.F—Performance		468
133.305	Take-off performance	468
133.310	Landing performance	468
133.315	Flight in a performance class.....	469
133.320	Rotorcraft permitted to fly in performance class 1 or 2, or performance class 2 with exposure.....	469
133.325	Flight in performance class 2 with exposure.....	470
133.330	Flight in performance class 1 for certain rotorcraft.....	470
133.335	Flight in performance class 1 or 2, or performance class 2 with exposure for certain rotorcraft.....	470
133.340	Flight in performance class 3 over populous areas	471
Subpart 133.J—Weight and balance		472
133.345	Loading of rotorcraft	472
133.350	Procedures for loading rotorcraft etc.....	472
133.355	Weight and balance documents.....	472
Subpart 133.K—Equipment		474
133.360	Requirements relating to equipment.....	474
Subpart 133.N—Flight crew		475
Division 133.N.1—General		475
133.370	Composition, number, qualifications and training	475
133.375	Competence	476
133.377	Training and checking to be conducted by certain persons.....	476
133.380	Assignment to duty of pilot in command	477
133.385	Pilot in command.....	477
133.390	Co-pilot.....	478
133.395	Pilot in command in non-command pilot’s seat	478
133.400	Knowledge of route and aerodromes.....	479
Division 133.N.2—Flight crew training—miscellaneous		480
Division 133.N.3—Operation of rotorcraft of different types		481
133.410	Application of Division 133.N.3	481
133.415	Assignment of flight crew to different multi-engine rotorcraft	481
Division 133.N.4—Recent experience		482
133.420	Recent experience requirements—90 days before flight	482
Subpart 133.P—Crew other than flight crew		484
Division 133.P.1—Cabin crew		484
133.425	Number, qualifications, experience and training.....	484
133.430	Competence	484
133.435	Minimum age	484
133.440	English proficiency.....	485

133.445	Assignment to duty as senior cabin crew member	485
133.450	Training and checking requirements for senior cabin crew member	485
Division 133.P.2—Air crew		486
133.455	Training and checking	486
133.460	Competence	486
133.465	English proficiency.....	486
Division 133.P.3—Medical transport specialists		487
133.470	Training and checking	487
133.475	Competence	487
Part 135—Australian air transport operations—smaller aeroplanes		488
Subpart 135.A—Preliminary		492
135.005	Application of Part 135	492
135.010	Compliance with Part 121 provisions	492
135.015	Definition of <i>suitable forced landing area</i> for aeroplane flights	492
135.020	Approvals by CASA for Part 135.....	493
135.025	Issue of Manual of Standards for Part 135	493

Part 99—Drug and alcohol management plans and testing

Table of contents

99.005 Purposes of Part

Subpart 99.A—General

99.010 Definitions for Part 99

99.015 SSAAs to which this Part applies

99.020 Substantial compliance with requirements of Part required

Subpart 99.B—Drug and alcohol management plans

Division 99.B.1—Purposes of Subpart

99.025 Purposes of Subpart

Division 99.B.2—Persons required to have a DAMP

99.030 Who must develop and maintain a DAMP

99.035 DAMP must be implemented

99.040 DAMP must be made available to SSAA employees

Division 99.B.3—Content and implementation of DAMP

Subdivision 99.B.3.1—Content of DAMP

99.045 Content of DAMP

Subdivision 99.B.3.2—Drug and alcohol testing program

99.050 Requirements for drug and alcohol testing

99.055 Requirements relating to DAMP medical review officer

99.060 Requirements relating to use of testing devices

Subdivision 99.B.3.3—Drug and alcohol response program

99.065 Requirements relating to SSAA employees ceasing SSAAs

99.070 Requirements relating to returning to SSAAs

99.075 Requirements relating to intervention programs

Subdivision 99.B.3.4—Implementing a DAMP

99.080 Implementing a DAMP

Division 99.B.4—Review and audit of DAMP

99.085 Review of DAMP by DAMP organisation

99.090 Audit of DAMP organisation by CASA

99.095 CASA may direct changes to DAMP

Division 99.B.5—Provision of Information

99.100 DAMP organisation or DAMP contractor to provide information

99.105 DAMP record-keeping

Subpart 99.C—Drug and alcohol testing by CASA

Division 99.C.1—Preliminary

99.110 Purposes of Subpart

Subdivision 99.C.1.1—Who may be drug or alcohol tested

99.115 Who may be drug or alcohol tested

99.120 Body samples may only be taken if person consents

Subdivision 99.C.1.2—Powers of approved testers

99.125 Powers of approved testers

Subdivision 99.C.1.3—CASA to approve testing devices

99.130 Approved drug and alcohol testing devices

Division 99.C.2—Drug testing

Subdivision 99.C.2.1—General

99.135 Which body samples may be drug tested

99.140 How samples are taken and tested

99.145 Approved drug testing devices to be used for initial drug tests

99.150 Method for determining sample identifiers

Subdivision 99.C.2.2—Initial drug tests

99.155 Taking samples

99.160 Initial drug test

99.165 If initial drug test result is not positive

99.170 If initial drug test result is positive

99.175 Notices of initial drug test

99.180 Dealing with samples for confirmatory drug test

99.185 Transporting samples

Subdivision 99.C.2.3—Receipt and storage of samples by approved laboratories

99.190 Receipt of samples

99.195 Storage of samples

Subdivision 99.C.2.4—Conduct of drug tests by approved laboratories

99.200 Testing Sample A

99.205 Samples to be tested in accordance with National Association of Testing Authorities' accreditation

99.210 Notices of Sample A results

99.215 Donor may request testing of Sample B

99.220 Approved laboratory to keep Sample B

99.225 Notices of Sample B results

99.230 Test results

Subdivision 99.C.2.5—Record-keeping

99.235 Approved laboratory to keep records

Division 99.C.3—Alcohol testing

- 99.240 Which body samples may be alcohol tested
- 99.245 How samples are taken and tested
- 99.250 Approved breathalysers to be used in alcohol tests
- 99.255 Alcohol tests
- 99.260 Test results
- 99.265 Notice of alcohol test

Subpart 99.D—Evidentiary certificates and prescribed proceedings

Division 99.D.1—Purposes of Subpart

- 99.275 Purposes of Subpart

Division 99.D.2—Evidentiary certificates

- 99.280 Certificates by approved tester
- 99.285 Certificates by approved laboratory
- 99.290 Document taken to be a certificate unless contrary intention established
- 99.295 Certificate not to be admitted unless copy given
- 99.300 Person signing the certificate may be called to give evidence
- 99.305 Rebuttal evidence
- 99.310 CASA may ask for full certificate

Division 99.D.3—Prescribed proceedings

- 99.315 Prescribed proceedings

Subpart 99.E—Offences for Subpart 99.C

Division 99.E.1—Purposes of Subpart

- 99.320 Purposes of Subpart

Division 99.E.2—Offences

Subdivision 99.E.2.1—Offences relating to giving a body sample

- 99.325 Failing to carry identification whilst undertaking applicable SSAA
- 99.330 Refusing or failing to give a body sample
- 99.335 Continuing to perform applicable SSAA after refusing a drug or alcohol test or failing to give a body sample
- 99.340 Failing to stop performing an applicable SSAA
- 99.345 Failing to remain in approved tester’s presence
- 99.350 Person must not interfere with integrity of body sample

Subdivision 99.E.2.2—Offences occurring after positive test result

- 99.355 Continuing to perform applicable SSAA between having initial drug test and confirmatory drug test
 - 99.360 Continuing to perform applicable SSAA after having confirmatory drug test and before result returned
 - 99.365 Continuing to perform applicable SSAA before confirmatory alcohol test result returned
 - 99.370 Performing applicable SSAA showing positive result for testable drug
 - 99.375 Performing applicable SSAA while showing positive result for a confirmatory alcohol test
-

Subdivision 99.E.2.3—Offences relating to returning to SSAAs after positive test result

- 99.380 Continuing to perform applicable SSAA after having confirmatory drug test
- 99.385 Continuing to perform applicable SSAA after confirmatory alcohol test

Division 99.E.3—CASA medical review officers

- 99.390 CASA medical review officers

Subpart 99.F—Provision of information

Division 99.F.1—Purposes of Subpart

- 99.395 Purposes of Subpart

Division 99.F.2—Information

- 99.400 Drug or alcohol test information given or required by CASA
- 99.405 Information that must be given to CASA following drug or alcohol test

Subpart 99.G—CASA’s powers in relation to civil aviation authorisations

Division 99.G.1—Purposes of Subpart

- 99.410 Purposes of Subpart
- 99.415 When CASA may vary, suspend or cancel a civil aviation authorisation
- 99.420 When variation, suspension or cancellation takes effect
- 99.425 Notice
- 99.430 Effect of effluxion of time in relation to the suspension of civil aviation authorisation
- 99.435 Effect of suspension of civil aviation authorisation

Subpart 99.H—Approved testers and authorisations to conduct drug and alcohol tests

Division 99.H.1—Purposes of Subpart

- 99.440 Purposes of Subpart

Division 99.H.2—Approvals and authorisations

- 99.445 CASA may approve persons to take body samples and conduct tests
- 99.450 Persons authorised to take body samples and conduct tests

Division 99.H.3—Obligations on approved testers and protection from liability

- 99.455 Obligations on approved testers
- 99.460 Approved testers not liable in certain cases

Division 99.H.4—Powers of approved testers

- 99.465 Approved testers’ powers to access premises

Division 99.H.5—Identity cards

- 99.470 Identity cards
 - 99.475 Return of identity card
 - 99.480 Display and production of identity cards
 - 99.485 Suspension or revocation of authorisation
 - 99.490 Notices
-

Division 99.H.6—Notices to approved testers

99.495 Notice to approved testers

Regulation 99.005

99.005 Purposes of Part

- (1) This Part provides for:
- (a) the development, implementation and enforcement of drug and alcohol management plans covering persons who perform, or are available to perform, an applicable SSAA; and
 - (b) drug and alcohol tests for persons who perform, or are available to perform, an applicable SSAA, including the following:
 - (i) the approval of testers to conduct drug and alcohol tests;
 - (ii) the approval of devices for use in conducting drug and alcohol tests;
 - (iii) identity cards for approved testers;
 - (iv) the conduct of drug and alcohol testing;
 - (v) the variation, suspension and cancelling of civil aviation authorisations and authorisations of approved testers; and
 - (c) offences relating to drug and alcohol management plans and drug and alcohol testing.

Note 1: Under this Part, a SSAA employee may be drug or alcohol tested by his or her DAMP organisation or by CASA under Subpart 99.C.

Note 2: Under Subpart 99.C, CASA may also test persons who are performing or available to perform an applicable SSAA and who are not covered by a DAMP organisation.

- (2) Unless otherwise stated, this Part is made for the purposes of Part IV of the Act, particularly sections 34, 35 and 36.

Subpart 99.A—General

99.010 Definitions for Part 99

(1) In this Part:

accident means an occurrence that arises out of a person performing or being available to perform an applicable SSAA if either or both of the following applies:

- (a) the occurrence results in the death of, or serious harm to, a person;
- (b) the occurrence results in serious damage to an aircraft or property.

aerodrome testing area means:

- (a) any surface in a certified aerodrome over which an aircraft is able to be moved while in contact with the surface of the aerodrome, including any parking areas; and
- (b) any part of the surface of a certified aerodrome:
 - (i) that is not covered by paragraph (a); and
 - (ii) that does not have a building on it; and
 - (iii) from which access to a surface mentioned in paragraph (a) may be had; and
- (c) a building located on a certified aerodrome that is used:
 - (i) for maintenance of an aircraft or an aeronautical product; or
 - (ii) for the manufacture of aircraft or aeronautical products; or
 - (iii) by an air traffic service provider to control air traffic; or
 - (iv) by the holder of an AOC for flying training; or
 - (v) by a Part 141 operator conducting flying training in an aircraft; and
- (d) any part of an aircraft, aerobridge or other moveable structure in a certified aerodrome.

airport security guard has the meaning given in section 9 of the *Aviation Transport Security Act 2004*.

allocated number, in relation to an approved tester, means the number allocated to the tester under subregulation 99.445(5).

applicable SSAA means a safety-sensitive aviation activity to which this Part applies under regulation 99.015.

appropriately qualified alcohol and other drug professional means a person who:

- (a) materially works as a provider of clinical drug and alcohol treatment services; and
- (b) holds a bachelor degree, or postgraduate degree, in at least 1 of the following fields:
 - (i) health sciences;

Regulation 99.010

- (ii) medical science;
- (iii) social sciences;
- (iv) behavioural sciences.

approved breathalyser means a breathalyser approved by CASA under paragraph 99.130(a) for alcohol testing.

approved drug testing device means a device approved by CASA under paragraph 99.130(b) for testing for testable drugs.

approved laboratory means a person authorised under subregulation 99.450(3) to conduct confirmatory drug tests for Subpart 99.C.

approved person, in relation to an approved laboratory, means a person who is authorised under the laboratory's National Association of Testing Authorities accreditation to declare the results of drug tests conducted by that laboratory.

approved tester means a person who is authorised to:

- (a) take body samples for drug or alcohol tests under subregulation 99.450(1); and
- (b) conduct initial drug tests or alcohol tests under subregulation 99.450(2).

ASIC has the meaning given in the *Aviation Transport Security Regulations 2005*.

CASA medical review officer means a medical practitioner who for drug and alcohol testing under Subpart 99.C, and for Subparts 99.E and 99.H has:

- (a) been appointed by CASA under subregulation 99.390(1) for the purposes of Subpart 99.C; and
- (b) training and competence in the field of interpreting drug and alcohol test results; and
- (c) knowledge of substance use disorders; and
- (d) knowledge of the contents of this Part.

commencement date means the date on which this Part commences.

comprehensive assessment, in relation to a person's drug or alcohol use, means an examination of the person's physiological and psychosocial indicators carried out:

- (a) by a psychiatrist; or
- (b) by a medical practitioner who is a Fellow of the Australasian Chapter of Addiction Medicine; or
- (c) jointly by:
 - (i) a person entitled to practice as a medical practitioner under a law of a State or Territory; and
 - (ii) an appropriately qualified drug and alcohol professional.

confirmatory alcohol test means an alcohol test given in respect of an initial alcohol test to determine the presence and level of alcohol in a body sample.

Note: See paragraph (b) of the definition of drug or alcohol test in subsection 33(1) of the Act.

confirmatory drug test means a drug test given in respect of an initial drug test to determine the presence and level of a testable drug in a body sample.

Note: See paragraph (b) of the definition of drug or alcohol test in subsection 33(1) of the Act.

DAMP or **drug and alcohol management plan** means a drug and alcohol management plan that complies, or purports to comply, with the requirements of regulation 99.045.

DAMP contact officer, in relation to a DAMP organisation, means a person appointed by the DAMP organisation to liaise with CASA in relation to the organisation's responsibilities under this Part.

DAMP contractor means a person, or the employee of a person, who is:

- (a) a party to an ongoing written or ongoing oral contract with a DAMP organisation; or
- (b) a DAMP subcontractor to an ongoing written or ongoing oral contract with a DAMP organisation.

DAMP medical review officer means a medical practitioner who for drug or alcohol testing under a DAMP has:

- (a) competence in the field of interpreting drug and alcohol test results; and
- (b) knowledge of substance use disorders; and
- (c) knowledge of the contents of this Part.

DAMP organisation means a person that is required to have a DAMP under subregulation 99.030(1).

DAMP reporting period, for a DAMP organisation, means the period of 6 months immediately before each:

- (a) 1 March; and
- (b) 1 September.

DAMP subcontractor, means a person who is a party to:

- (a) an ongoing written or oral contract with a DAMP contractor within the meaning of paragraph (a) of the definition of **DAMP contractor**; or
- (b) an ongoing written or oral contract with another DAMP subcontractor (under a previous application of this definition).

DAMP supervisor, in relation to a DAMP organisation, means a person who:

- (a) has had relevant training to form an opinion as to whether a person may be adversely affected by a testable drug or under the influence of alcohol; and
- (b) is authorised by the organisation to do so for the purposes of paragraph 99.050(2)(c).

donor means a person who is asked to give, or has given, a body sample to an approved tester.

Regulation 99.010

drug and alcohol education program, for a DAMP organisation, means a program that includes the following components:

- (a) for SSAA employees—awareness of:
 - (i) the organisation’s policy on drug and alcohol use; and
 - (ii) drug and alcohol testing in the workplace; and
 - (iii) support and assistance services for people who engage in problematic use of drugs and alcohol; and
 - (iv) information about the potential risks to aviation safety from problematic use of drugs and alcohol;
- (b) for DAMP supervisors—education and training to manage people who engage in problematic use of drugs or alcohol.

drug or alcohol intervention program, in relation to a person who has a drug or alcohol problem, means a program that includes any of the following measures for that problem:

- (a) assessment;
- (b) treatment, including any of the following:
 - (i) education;
 - (ii) counselling;
 - (iii) consultation with health care professionals;
 - (iv) pharmacotherapy;
 - (v) residential or non-residential treatment programs;
- (c) monitoring and follow-up action.

employee, in relation to a DAMP organisation, includes a DAMP contractor of the DAMP organisation.

foreign operator means:

- (a) the holder of a foreign aircraft AOC; or
- (b) the operator of an aircraft operating in Australia in accordance with a permission granted by CASA under section 26 of the Act; or
- (c) the operator of an aircraft operating under a permission granted under section 27A of the Act; or
- (d) the holder of a New Zealand AOC with ANZA privileges; or
- (e) the operator of an aircraft that is operating in Australia in accordance with section 14 of the *Air Navigation Act 1920*.

initial alcohol test means an alcohol test to determine the presence of alcohol in a body sample.

Note: See paragraph (a) of the definition of drug or alcohol test in subsection 33(1) of the Act.

initial drug test means a drug test to determine the presence of a testable drug in a body sample.

Note: See paragraph (a) of the definition of drug or alcohol test in subsection 33(1) of the Act.

nominated drug or alcohol intervention program, in relation to a person who has undergone a comprehensive assessment, means a drug or alcohol intervention program considered suitable for the person by:

- (a) if the person is an employee of a DAMP organisation—a DAMP medical review officer; or
- (b) in any other case—a CASA medical review officer.

passport means an Australian passport within the meaning of the *Australian Passports Act 2005*, or a passport issued by the Government of a country other than Australia.

permitted level means:

- (a) for a testable drug—a level of the drug specified in subregulation (2A) for the purposes of this paragraph; and
- (b) for alcohol—a level of alcohol of less than 0.02 grams of alcohol in 210 litres of breath.

positive result means the following:

- (a) for an initial drug test—a test result within the meaning of paragraph (a) of the definition of positive test result in subsection 33(1) of the Act;
- (b) for a confirmatory drug test—a test result within the meaning of paragraph (b) of the definition of positive test result in subsection 33(1) of the Act;
- (c) for an initial alcohol test—a test result within the meaning of paragraph (a) of the definition of positive test result in subsection 33(1) of the Act;
- (d) for a confirmatory alcohol test—a test result within the meaning of paragraph (b) of the definition of positive test result in subsection 33(1) of the Act.

regular SSAA employee means a SSAA employee who is reasonably likely to perform an applicable SSAA at least 2 or more times every 90 days.

relevant Standard means:

- (a) AS 3547, *Breath alcohol testing devices for personal use*; and
- (b) NMI R 126, *Pattern Approval Specifications for Evidential Breath Analysers*; and
- (c) AS 4760, *Procedures for specimen collection and the detection and quantitation of drugs in oral fluid*; and
- (d) AS/NZS 4308, *Procedures for specimen collection and the detection and quantitation of drugs of abuse in urine*.

sample identifier means a number allocated to a body sample using the method specified in a legislative instrument made by CASA under regulation 99.150.

screening officer has the meaning given in the *Aviation Transport Security Act 2004*.

Regulation 99.010

serious incident means an occurrence that arises out of a person performing or being available to perform an applicable SSAA if either or both of the following applies:

- (a) the occurrence gives rise to a danger of death or serious harm to a person;
- (b) the occurrence gives rise to a danger of serious damage to an aircraft or property.

SSAA means a safety-sensitive aviation activity.

SSAA employee, in relation to a DAMP organisation, means an employee of the DAMP organisation who performs or is available to perform an applicable SSAA.

substantial compliance, in relation to a drug or alcohol test, has the meaning given in subregulation 99.020(2).

suitable test conditions has the meaning given by subregulation (3).

Note 1: A number of other expressions used in this Part have the meanings given in the Act. For example:

- aeronautical product
- AOC
- body sample
- civil aviation authorisation
- drug or alcohol test
- foreign aircraft AOC
- New Zealand AOC with ANZA privileges
- positive test result
- safety-sensitive aviation activities
- testable drug.

Note 2: **Testable drugs** are specified in a legislative instrument made by the Minister under subsection 33(2) of the Act.

References to Standards and reports

(2) In this Part:

AS followed by a number is a reference to the Australian Standard so numbered or identified, as in force or existing from time to time, published by Standards Australia.

AS/NZS followed by a number is a reference to the Australian/New Zealand Standard so numbered or identified, as in force or existing from time to time, published jointly by Standards Australia and Standards New Zealand.

NMI R followed by a number is a reference to the document with that designation and number, as in force from time to time, published by the National Measurement Institute established under the *National Measurement Act 1960*.

Permitted level

(2A) For paragraph (a) of the definition of **permitted level**, the permitted level for each testable drug is specified in the following table.

Testable Drug	Concentration - ng/mL
Δ 9-tetrahydrocannabinol	10
6-Acetyl morphine	10
Amphetamine	25
Benzoylcegonine	25
Cocaine	25
Codeine	25
Ecgonine methyl ester	25
Methylamphetamine	25
Methylenedioxyamphetamine	25
Methylenedioxymethylamphetamine	25
Morphine	25

Suitable test conditions

- (3) ***Suitable test conditions*** means conditions that exist after an accident or serious incident if:
- (a) testing can be conducted within:
 - (i) for drug testing—32 hours after the accident or incident occurred; and
 - (ii) for alcohol testing—8 hours after the accident or incident occurred; and
 - (b) it is practicable to conduct a test.

99.015 SSAAs to which this Part applies

- (1) This Part applies to the SSAAs specified in this regulation.
- (2) The specified SSAAs are:
- (a) any activity undertaken by a person, other than as a passenger, in an aerodrome testing area; and
 - (b) calculation of the position of freight, baggage, passengers and fuel on aircraft; and
 - (c) the manufacture or maintenance of any of the following:
 - (i) aircraft;
 - (ii) aeronautical products;
 - (iii) aviation radionavigation products;
 - (iv) aviation telecommunication products;
 - (v) reserve parachutes or emergency parachutes; and
 - (d) the certification of maintenance of a kind mentioned in paragraph (c); and
 - (da) the issuing of a certificate of release to service for an aircraft or aeronautical product in relation to maintenance carried out on the aircraft or aeronautical product; and

Regulation 99.020

- (e) the fuelling and maintenance of vehicles that will be used to fuel aircraft on aerodrome testing areas; and
 - (f) activities undertaken by an airport security guard or a screening officer in the course of the person's duties as a guard or officer; and
 - (g) activities undertaken by a member of the crew of an aircraft in the course of the person's duties as a crew member; and
 - (h) the loading and unloading of trolleys containing baggage for loading onto aircraft and the driving of such trolleys; and
 - (i) activities undertaken by a holder of an ATC licence in the course of the person's duties as a controller; and
 - (j) activities undertaken by the supervisor of a holder of an ATC licence in the course of the person's duties as such a supervisor; and
 - (k) providing flight information and search and rescue alert services:
 - (i) to a pilot or operator of an aircraft immediately before the flight of the aircraft; or
 - (ii) to a pilot or operator of an aircraft, during the flight of the aircraft; or
 - (iii) as an intermediary for communications between a pilot or operator of the aircraft, and an air traffic controller; and
 - (l) providing aviation fire fighting services; and
 - (m) undertaking parachute descents; and
 - (n) supervising parachute descents.
- (3) This Part applies to the safety-sensitive aviation activities specified in paragraphs (2)(b) to (n) even if those activities do not occur in an aerodrome testing area.

99.020 Substantial compliance with requirements of Part required

- (1) A reference in this Part, other than in Subpart 99.B, to a test result for a drug or alcohol test is a reference to a test result that resulted from strict or substantial compliance with the requirements of this Part, including the following:
- (a) requirements relating to the taking of a body sample for the test;
 - (b) requirements relating to the dealing with the body sample by the approved tester who took the sample;
 - (c) requirements relating to the storage of the body sample (if applicable);
 - (d) requirements relating to the conduct of the drug or alcohol test;
 - (e) requirements relating to the giving of notice in respect of a positive result;
 - (f) a requirement that a person must not interfere with the integrity of a body sample.
- (2) For subregulation (1), there is taken to be **substantial compliance** with the requirements of this Part in relation to a drug or alcohol test that results in a test result if there is no reasonable doubt as to the accuracy of the test result even though one or more of the requirements of this Part may not have been strictly complied with in relation to that drug or alcohol test.

Example: If an approved tester fails to initial a specimen tube containing a part of a body sample that is to be the subject of a confirmatory drug test, the test result is likely to be one that

Regulation 99.020

resulted from substantial compliance with the requirements of this Part as there will be no reasonable doubt as to the accuracy of the test result. However, if a person interferes with the integrity of a body sample, the test result for that sample is unlikely to be one that resulted from substantial compliance with the requirements of this Part as there will be a reasonable doubt as to the accuracy of the test result.

- (3) In this regulation, the ***requirements of this Part*** include the following:
- (a) the requirements of any legislative instruments made under this Part;
 - (b) a relevant Standard.

Part 99 Drug and alcohol management plans and testing

Subpart 99.B Drug and alcohol management plans

Division 99.B.1 Purposes of Subpart

Regulation 99.025

Subpart 99.B—Drug and alcohol management plans

Division 99.B.1—Purposes of Subpart

99.025 Purposes of Subpart

This Subpart provides for the following:

- (a) the persons required to have a DAMP;
- (b) the matters required to be included in a DAMP;
- (c) the implementation of a DAMP;
- (d) requirements associated with a DAMP;
- (e) offences relating to a DAMP.

Division 99.B.2—Persons required to have a DAMP

99.030 Who must develop and maintain a DAMP

- (1) An organisation must develop a DAMP that complies with regulation 99.045 if:
 - (a) the organisation:
 - (i) has an employee; or
 - (ii) has a contractor (including the employee of, or a subcontractor for, the contractor);who performs or is available to perform a SSAA; and
 - (b) the organisation is listed in subregulation (2).

Penalty: 50 penalty units.

- (2) For paragraph (1)(b), the organisations are as follows:
 - (a) an AOC holder;
 - (b) a person issued with a production certificate under regulation 21.134;
 - (c) the holder of an aerodrome certificate;
 - (d) a person approved as an ARFFS under Division 139.H.5;
 - (e) an ATS training provider within the meaning of Part 143;
 - (f) an ATS provider within the meaning of Part 172;
 - (g) the provider of any of the following services within the meaning of Part 171:
 - (i) a telecommunication service;
 - (ii) a radionavigation service;
 - (i) the holder of a certificate of approval within the meaning of subregulation 2(1) of CAR;
 - (j) a Part 145 organisation;
 - (k) a Part 141 operator conducting flying training in aircraft;
 - (l) a screening authority within the meaning of the *Aviation Transport Security Regulations 2005*.

- (3) The DAMP must be developed within the time required for implementation of a DAMP under subregulation 99.035(2).

Penalty: 50 penalty units.

- (4) A person who, under subregulation (1), is required to develop a DAMP must continue to have a DAMP that complies with regulation 99.045 for the period the person has SSAA employees performing an applicable SSAA or available to perform an applicable SSAA.

Penalty: 50 penalty units.

- (5) An offence against subregulation (1), (3) or (4) is an offence of strict liability.

Regulation 99.035

99.035 DAMP must be implemented

- (1) A person who is required to develop a DAMP must implement a DAMP by:
 - (a) giving effect to regulation 99.080; and
 - (b) making the DAMP available to the person's SSAA employees as required by this Subpart.

Timeframe and implementation

- (2) The DAMP must be implemented:
 - (a) if the person:
 - (i) is a DAMP organisation on the commencement date; or
 - (ii) becomes a DAMP organisation within the period of 6 months after the commencement date (the *transition period*);
by the end of the transition period; or
 - (b) if the person becomes a DAMP organisation after the end of the transition period—immediately upon becoming a DAMP organisation.

99.040 DAMP must be made available to SSAA employees

- (1) Subject to subregulation (2), a DAMP organisation must ensure that its DAMP is made available to each of its SSAA employees before the employee begins to perform or becomes available to perform an applicable SSAA.

Penalty: 50 penalty units.

- (2) If a person is a SSAA employee of a DAMP organisation on the day the organisation implements its DAMP, the organisation must make the DAMP available to the employee by the end of the day the employee next performs or is available to perform an applicable SSAA for the DAMP organisation.

Penalty: 50 penalty units.

- (3) An offence against subregulation (1) or (2) is an offence of strict liability.

Division 99.B.3—Content and implementation of DAMP

Subdivision 99.B.3.1—Content of DAMP

99.045 Content of DAMP

A DAMP organisation's DAMP must:

- (a) apply to all SSAA employees of the organisation, and state each category of the organisation's SSAA employees covered by the DAMP; and
- (b) include the following:
 - (i) a drug and alcohol education program;
 - (ii) a drug and alcohol testing program, that meets the requirements specified in regulations 99.050, 99.055 and 99.060;
 - (iii) a drug and alcohol response program that meets the requirements specified in regulations 99.065, 99.070 and 99.075;and set out details of those programs; and
- (c) identify, and provide the contact details for, each person in the DAMP organisation who has any of the following roles:
 - (i) DAMP contact officer;
 - (ii) DAMP supervisor; and
- (d) be implemented as required by regulation 99.080 and set out the details of those requirements.

Note: A drug and alcohol education program includes the matters set out in the definition of drug and alcohol education program in subregulation 99.010(1).

Subdivision 99.B.3.2—Drug and alcohol testing program

99.050 Requirements for drug and alcohol testing

- (1) For subparagraph 99.045(b)(ii), the DAMP must meet the following requirements:
 - (a) that any testing done under the organisation's DAMP will be conducted as follows:
 - (i) for breath alcohol testing—using a device that meets the Standard mentioned in paragraph (a) of the definition of relevant Standard, or a device that meets the Standard mentioned in paragraph (b) of that definition;
 - (ii) for oral fluid testing—in accordance with the Standard mentioned in paragraph (c) of the definition of relevant Standard;
 - (iii) for urine testing—in accordance with the Standard mentioned in paragraph (d) of the definition of relevant Standard;
 - (b) that drug and alcohol testing of SSAA employees under the DAMP will be conducted in the circumstances set out in subregulation (2).
- (2) For paragraph (1)(b), the circumstances in which drug and alcohol testing will be conducted on SSAA employees are as follows:

Regulation 99.055

- (a) when a person first joins the DAMP organisation, if the person will be working as a regular SSAA employee, or when an employee whose role in the organisation is to change to that of a regular SSAA employee on or after the commencement date, unless:
 - (i) the employee has been drug and alcohol tested; and
 - (ii) the tests were conducted less than 90 days before the employee is required to begin performing or being available to perform an applicable SSAA; and
 - (iii) each of the test results was not a positive result;
- (b) after an accident or serious incident involving a SSAA employee that occurs while he or she is performing, or available to perform, an applicable SSAA, if suitable test conditions exist;
- (c) if a DAMP supervisor has reasonable grounds to believe that a SSAA employee may be adversely affected by a testable drug or by alcohol while performing, or available to perform, an applicable SSAA;
- (d) if a SSAA employee is returning to work after a period during which the employee was not permitted, under paragraph 99.065(1)(c), (d) or (e), to perform or be available to perform an applicable SSAA because of testable drug use.

Drug test results under DAMP

- (3) A positive result for a confirmatory drug test conducted on a body sample under a drug and alcohol testing program mentioned in subparagraph 99.045(b)(ii), is taken not to be a positive result for the sample if a DAMP medical review officer has determined that the test result for the sample could be the result of legitimate therapeutic treatment or some other innocuous source.

99.055 Requirements relating to DAMP medical review officer

For subparagraph 99.045(b)(ii), the DAMP must include the requirement that the DAMP organisation must consult a DAMP medical review officer:

- (a) if a drug test conducted under the DAMP returns a confirmatory drug test result for a SSAA employee of the organisation that is a positive result—to determine if the presence and level of a testable drug detected by the test could be the result of legitimate therapeutic treatment or some other innocuous source; and
- (b) to review medical information concerning a person's failure to give a body sample for drug or alcohol testing because of a medical condition; and
- (c) to determine if the employee is fit to resume performing or being available to perform a SSAA.

99.060 Requirements relating to use of testing devices

For subparagraph 99.045(b)(ii), the DAMP must include the requirement that any devices used in drug or alcohol testing done under the DAMP must be used in a way that is not inconsistent with the instructions of the manufacturer of those devices.

Subdivision 99.B.3.3—Drug and alcohol response program

99.065 Requirements relating to SSAA employees ceasing SSAAs

- (1) For subparagraph 99.045(b)(iii), the DAMP must include the requirement that the DAMP organisation must not permit an employee to perform, or be available to perform, an applicable SSAA in any of the following circumstances:
 - (a) if the organisation is aware that a positive result for an initial drug test has been recorded for the employee and the employee has not, in respect of that test result, recorded a test result for a confirmatory drug test that is not a positive result;
 - (b) if the organisation is aware that a positive result for an initial alcohol test has been recorded for the employee and the employee has not, in respect of that test result, recorded a test result for a confirmatory alcohol test that is not a positive result;
 - (c) if the organisation is aware that:
 - (i) a positive result for a confirmatory drug test or a confirmatory alcohol test conducted under a drug and alcohol testing program mentioned in subparagraph 99.045(b)(ii) has been recorded for the employee; and
 - (ii) a DAMP medical review officer has not determined that the result recorded could be as a result of legitimate therapeutic treatment or some other innocuous source;
 - (d) if the organisation is aware that:
 - (i) a positive result for a confirmatory drug test or a confirmatory alcohol test conducted under Subpart 99.C has been recorded for the employee; and
 - (ii) a CASA medical review officer has not determined that the result recorded could be as a result of legitimate therapeutic treatment or some other innocuous source;
 - (e) if the organisation is aware that a SSAA employee after having been required to take a drug or alcohol test:
 - (i) refused to take the test; or
 - (ii) interfered with the integrity of the test.
- (2) For subparagraph 99.045(b)(iii), a DAMP must include the requirement that the DAMP organisation must not permit a SSAA employee to perform or be available to perform an applicable SSAA in the following circumstances:
 - (a) if a DAMP supervisor suspects the employee's faculties may be impaired due to the person being under the influence of a testable drug or of alcohol;
 - (b) if an accident or serious incident has occurred involving the employee while he or she is performing or available to perform an applicable SSAA and either of the following apply:
 - (i) for the period that suitable test conditions exist for conducting drug or alcohol tests on the employee—a test has not been conducted;
 - (ii) if tests have been conducted under suitable test conditions—the DAMP organisation has not been notified of the test results.

Regulation 99.070

99.070 Requirements relating to returning to SSAAs

- (1) For subparagraph 99.045(b)(iii), the DAMP must include the requirement that if:
 - (a) the DAMP organisation has not permitted a SSAA employee to perform, or be available to perform, an applicable SSAA; and
 - (b) the non-performance is a result of a circumstance mentioned in paragraph 99.065(1)(c), (d) or (e) (a *suspension event*),the organisation must only permit the employee to again begin performing or being available to perform an applicable SSAA if the circumstances set out in subregulation (2) apply.
- (2) For subregulation (1), the circumstances that must apply are as follows:
 - (a) the employee has undergone a comprehensive assessment for drug or alcohol use;
 - (b) if the comprehensive assessment recommended the employee commence a drug or alcohol intervention program—the employee has begun participating in a nominated drug or alcohol intervention program;
 - (c) the employee is considered fit to resume performing, or being available to perform, an applicable SSAA by:
 - (i) a DAMP medical review officer; and
 - (ii) the employee's treating clinician, if any;
 - (d) if the suspension event related to a drug test—at the time the employee was considered fit under paragraph (c), the employee receives a confirmatory drug test and records, for the test, a result that:
 - (i) was not a positive result; and
 - (ii) a DAMP medical review officer is satisfied indicates the absence of testable drug use.

99.075 Requirements relating to intervention programs

- (1) Subject to subregulation (2), for subparagraph 99.045(b)(iii) the DAMP must include the requirement that a DAMP organisation must permit a SSAA employee of the organisation time to attend a nominated drug or alcohol intervention program, if:
 - (a) a DAMP medical review officer has advised the DAMP organisation that the employee should attend the program; and
 - (b) the employee is returning to work after a period during which the employee was not permitted, under regulation 99.340 or 99.345, to perform or be available to perform an applicable SSAA because of testable drug use or alcohol use.
- (2) A reference to a SSAA employee in the requirement under subregulation (1) is a reference to a SSAA employee that the DAMP organisation intends to allow to continue to perform or be available to perform a SSAA.

Subdivision 99.B.3.4—Implementing a DAMP

99.080 Implementing a DAMP

- (1) For paragraph 99.045(d), the DAMP organisation, in implementing its DAMP, must ensure the following:
 - (a) that the organisation's SSAA employees and DAMP supervisors attend the organisation's drug and alcohol education program:
 - (i) for persons who begin work for the organisation after the commencement date—before commencing duties as a SSAA employee or DAMP supervisor; or
 - (ii) for persons working for the organisation as SSAA employees or DAMP supervisors on or before the commencement date—within 6 months of the commencement date; or
 - (iii) for persons working for the organisation as SSAA employees or DAMP supervisors who, after the commencement date, have attended the program—within 30 months of the person's last attendance at the program;
 - (b) that each SSAA employee of the DAMP organisation is informed that he or she must not perform, or be available to perform, an applicable SSAA if aware that he or she is adversely affected by a testable drug or by alcohol, until the employee is no longer adversely affected;
 - (c) that each SSAA employee of the DAMP organisation is subject to drug and alcohol testing under the DAMP while performing, or available to perform, a SSAA of the DAMP organisation.
- (2) The DAMP organisation must also do the following:
 - (a) encourage each of the organisation's SSAA employees to disclose if he or she has consumed a level of alcohol, or is taking any drug, that may affect his or her ability to carry out an applicable SSAA;
 - (b) inform each SSAA employee of the organisation that drug and alcohol testing under this Subpart will require a person who is to be tested to provide a body sample;
 - (c) record the policy and procedures of the organisation's DAMP using a controlled document protocol.

Division 99.B.4—Review and audit of DAMP

99.085 Review of DAMP by DAMP organisation

- (1) A DAMP organisation must review its DAMP to ensure compliance with the requirements of this Subpart:
 - (a) every 5 years, beginning on the date on which the DAMP was developed; and
 - (b) at any other time CASA directs.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

99.090 Audit of DAMP organisation by CASA

- (1) CASA may audit the operation of a DAMP organisation to ensure appropriate development, implementation and enforcement of a DAMP.
- (2) For the audit, CASA may require the DAMP organisation to provide to CASA:
 - (a) information and records, as specified by CASA, demonstrating that the organisation has:
 - (i) developed a DAMP; and
 - (ii) implemented the DAMP; and
 - (b) a copy of the DAMP that is being implemented; and
 - (c) any other information and records specified by CASA that are relevant to the audit.
- (3) The DAMP organisation must comply with the requirement.

Penalty: 50 penalty units.

- (4) An offence against subregulation (3) is an offence of strict liability.

99.095 CASA may direct changes to DAMP

- (1) CASA may at any time, for the purpose of ensuring compliance by a DAMP organisation with the requirements of regulation 99.045, direct the organisation to do any of the following:
 - (a) make a change specified by CASA to a provision in the organisation's DAMP;
 - (b) prepare a new DAMP that complies with the requirements of this Subpart;
 - (c) submit any proposed changes to the organisation's DAMP or submit a newly prepared DAMP, as the case may be, to CASA.
- (2) The DAMP organisation must comply with the direction.

Penalty: 50 penalty units.

(3) An offence against subregulation (2) is an offence of strict liability.

Division 99.B.5—Provision of Information

99.100 DAMP organisation or DAMP contractor to provide information

Information to be provided to CASA

- (1) A DAMP organisation that has implemented a DAMP must provide the following information to CASA in respect of each DAMP reporting period, or part of a reporting period, during which the DAMP was implemented:
 - (a) the number of the organisation's employees who performed an applicable SSAA at least 2 or more times in the 90 days preceding the end of the reporting period;
 - (b) the number of the organisation's SSAA employees who attended a drug and alcohol education program during the period, including the number of employees who attended such a program:
 - (i) for the first time; and
 - (ii) for a second or subsequent time;
 - (c) the number and type of drug or alcohol tests undergone by SSAA employees under the DAMP during the period;
 - (d) the results of the tests, including the number of positive test results that a DAMP medical review officer has determined could be as a result of legitimate therapeutic treatment or some other innocuous source;
 - (e) the date and time that the tests under the DAMP were conducted;
 - (f) the role that each SSAA employee tested was undertaking at the time of being tested;
 - (g) the applicable SSAA that each SSAA employee tested was performing or available to perform at the time that he or she was tested;
 - (h) if testing was conducted following an accident or serious incident—information about the date, time and location of:
 - (i) the accident or serious incident; and
 - (ii) the testing conducted following the accident or serious incident;
 - (i) follow-up action taken by the organisation under the DAMP in respect of SSAA employees:
 - (i) who were drug or alcohol tested under this Subpart; and
 - (ii) whose test results were positive results;
 - (j) follow-up action taken by the organisation under the DAMP in respect of any SSAA employees:
 - (i) who were tested under Subpart 99.C; and
 - (ii) whose test results were positive results;
 - (k) follow-up action taken by the organisation under the DAMP in respect of any SSAA employees who refused to take a drug or alcohol test, or interfered with the integrity of a drug or alcohol test, under this Subpart or Subpart 99.C;
 - (l) the number of SSAA employees referred to a nominated drug or alcohol intervention program;

Regulation 99.105

- (m) any other information relating to the implementation of a DAMP, or a drug or alcohol test under this Part, that CASA requests of the organisation in writing.

Penalty: 50 penalty units.

- (2) The information must be given in writing within 21 days after the end of the reporting period to which it relates.
- (3) The information must not include any information, other than that listed in subregulation (1), in respect of a SSAA employee that might identify the employee.

Penalty: 50 penalty units.

- (4) A DAMP organisation that has implemented a DAMP must provide the name and contact details of the organisation's current DAMP contact officer to CASA.

Penalty: 50 penalty units.

Information to approved testers

- (5) If a DAMP organisation or a DAMP contractor is required to provide information by an approved tester in the circumstances specified in paragraph 99.125(2)(b), the organisation or contractor must comply with the requirement within 1 hour of being given notification by the tester of the requirement.

Penalty: 50 penalty units.

- (6) An offence against subregulation (1), (3), (4) or (5) is an offence of strict liability.

99.105 DAMP record-keeping

- (1) A DAMP organisation must keep the records used to provide information to CASA under regulation 99.100 for 5 years from the date the information was provided to CASA.

Penalty: 50 penalty units.

- (2) The records must be kept in a secure location.

Penalty: 50 penalty units.

- (3) Within 6 months after the end of the 5 year period, the organisation must destroy or delete:
- (i) the records; or
 - (ii) the parts of the records that relate to the results of drug or alcohol testing.

- (4) An offence against subregulation (1) or (2) is an offence of strict liability.

Subpart 99.C—Drug and alcohol testing by CASA

Division 99.C.1—Preliminary

99.110 Purposes of Subpart

- (1) This Subpart provides for drug and alcohol testing by CASA.
- (2) The Subpart sets out the following matters:
 - (a) who may be tested (Subdivision 99.C.1.1);
 - (b) certain powers of approved testers (Subdivision 99.C.1.2);
 - (c) approved drug testing devices and breathalysers (Subdivision 99.C.1.3);
 - (d) the conduct of initial drug tests and confirmatory drug tests (Division 99.C.2);
 - (e) the conduct of initial alcohol tests and confirmatory alcohol tests (Division 99.C.3).

Subdivision 99.C.1.1—Who may be drug or alcohol tested

99.115 Who may be drug or alcohol tested

- (1) An approved tester may require a body sample for the purposes of a drug or alcohol test under this Subpart from a person who is performing or available to perform an applicable SSAA.
- (2) However, an approved tester must not, for drug or alcohol testing under this Subpart, require a body sample from a passenger.

99.120 Body samples may only be taken if person consents

An approved tester is not authorised to use force to take a body sample from a person.

Subdivision 99.C.1.2—Powers of approved testers

99.125 Powers of approved testers

- (1) In addition to any other powers set out in this Part, an approved tester has the powers specified in subregulation (2) in respect of taking a body sample from a donor for the following purposes:
 - (a) conducting an initial drug test;
 - (b) conducting an initial alcohol test or a confirmatory alcohol test (an *alcohol test*).
- (2) For subregulation (1), the powers are the following:
 - (a) the approved tester may require the donor to:

- (i) produce identification of the kind mentioned in subregulation (3) to the tester; and
- (ii) inform the tester of the donor's date of birth, address and telephone number;
- (b) the tester may require from the donor's employer the donor's name, date of birth, address and telephone number if:
 - (i) on being required to produce identification, the donor is unable to produce identification of a kind set out in subregulation (3) to the tester; and
 - (ii) the donor's employer is a DAMP organisation or a DAMP contractor;
- (c) the tester may require the donor to give a body sample for the drug or alcohol test;
- (d) the tester may require the donor to stop performing, or stop being available to perform, an applicable SSAA, for the time it takes to take a body sample for testing and to conduct an initial drug test or alcohol test on the sample;
- (e) the tester may require the donor to remain in the tester's presence for the time it takes to take a body sample and conduct an initial drug test or alcohol test on the sample.

Note: An approved tester may also ask for a body sample for a confirmatory drug test—see regulation 99.170.

- (3) For subregulation (2), the kinds of identification are:
 - (a) identification that:
 - (i) contains a photograph of the donor and sets out the donor's name, date of birth and address; and
 - (ii) was issued by a Commonwealth, State, Territory or local government body; or
 - (b) identification that is issued by a DAMP organisation that contains a photograph of the donor and the donor's name; or
 - (c) an ASIC; or
 - (d) a passport.

Subdivision 99.C.1.3—CASA to approve testing devices

99.130 Approved drug and alcohol testing devices

For drug and alcohol testing under this Subpart, CASA may by legislative instrument approve the following:

- (a) breathalysers for use in alcohol testing;
- (b) drug testing devices for use in initial drug testing.

Note: All approved breathalysers may be used for an initial alcohol test. Only some approved breathalysers may be used for a confirmatory alcohol test—see regulation 99.250.

Division 99.C.2—Drug testing

Subdivision 99.C.2.1—General

99.135 Which body samples may be drug tested

An approved tester may only take a sample of a person's oral fluid for drug testing under this Subpart.

99.140 How samples are taken and tested

An approved tester must take and prepare a body sample for drug testing in accordance with the procedures set out in a legislative instrument made by CASA for the purposes of this regulation.

99.145 Approved drug testing devices to be used for initial drug tests

- (1) If an approved tester is conducting an initial drug test under this Subpart, the tester must use an approved drug testing device to do the test.
- (2) The approved tester must ensure that the device is stored, tested, maintained and operated in accordance with the legislative instrument made by CASA for the purposes of this subregulation.

99.150 Method for determining sample identifiers

CASA must by legislative instrument specify a method for determining sample identifiers that are to be allocated to body samples that approved testers take under this Subpart and send for confirmatory drug tests.

Subdivision 99.C.2.2—Initial drug tests

99.155 Taking samples

- (1) For the purposes of obtaining a body sample for drug testing, an approved tester may require a donor to do any or all of the following:
 - (a) swallow or otherwise remove substances from his or her mouth;
 - (b) demonstrate to the tester that the donor's mouth is free from foreign substances;
 - (c) in the tester's presence, rehydrate by drinking up to 300 ml of water within 15 minutes of being required to do so by the tester.
- (2) If the approved tester has required the donor to drink water, the tester:
 - (a) must not take the body sample sooner than the period of 10 minutes after the donor finishes drinking; and
 - (b) must take the body sample as soon as practicable after the end of the period referred to in paragraph (a).

- (3) For the purposes of obtaining the body sample, the approved tester may require the donor to:
- (a) abstain from smoking, eating, drinking or chewing for 10 minutes prior to the taking of sample; and
 - (b) remain in the tester's presence for that period.

99.160 Initial drug test

As soon as practicable after the approved tester has taken a body sample from a donor for a drug test, the tester must conduct an initial drug test on the sample.

99.165 If initial drug test result is not positive

If the result of an initial drug test is not a positive result, the approved tester must, as soon as practicable after the result is returned:

- (a) discard the body sample, or deal with the body sample in such a way that the sample cannot be identified as being given by the donor of it; and
- (b) tell the donor the approved tester's name and allocated number, if requested by the donor.

99.170 If initial drug test result is positive

Further body sample may be taken

- (1) If the result of an initial drug test is a positive result, the approved tester may take a further body sample from the donor for a confirmatory drug test.
- (2) The further body sample, if any, must be taken as soon as practicable after the initial body sample was taken.
- (3) The approved tester may send either the initial body sample or the further body sample for a confirmatory drug test.
- (4) The approved tester must:
 - (a) inform the donor which body sample will be used for the confirmatory drug test; and
 - (b) discard the body sample that is not being used.

Notice to be given

- (5) If the result of an initial drug test is a positive result, the approved tester must, as soon as practicable:
 - (a) give the donor a notice that includes the information specified in subregulation 99.175(1) in respect of the test; and
 - (b) give the approved laboratory to whom the body sample will be sent for a confirmatory drug test a notice that includes the information specified in subregulation 99.175(3); and
 - (c) give CASA a notice that includes the information given to:
 - (i) the donor under the notice given under paragraph (a); and

Regulation 99.175

(ii) the laboratory under paragraph (b).

- (6) The notice to the approved laboratory under paragraph (5)(b) must accompany the body sample to the laboratory.

99.175 Notices of initial drug test

Notice to donor

- (1) The notice given to the donor under paragraph 99.170(5)(a) must contain the following:
- (a) the donor's name, date of birth, gender, residential address and telephone number, and an indication of whether those details were provided by the donor or the donor's DAMP organisation (if any) or a DAMP contractor;
 - (b) the date and time that the donor was asked by the approved tester to stop performing or being available to perform SSAAs for the purposes of giving a body sample for a drug test;
 - (c) the applicable SSAA that the donor was performing or available to perform at the time the donor was tested;
 - (d) the date, time and location of the place that an initial drug test was conducted on the donor's body sample;
 - (e) the test result for the initial drug test;
 - (f) the initials of the tester and his or her allocated number;
 - (g) the details of any photographic identification provided by the donor;
 - (h) the make, model and serial number of the approved drug testing device used to conduct the initial drug test;
 - (i) the sample identifier allocated to the body sample taken for a confirmatory drug test by the approved tester (see paragraph 99.180(1)(a));
 - (j) a certification by the tester about whether the body sample has been taken and tested in accordance with the requirements of the Regulations and any applicable legislative instrument made by CASA under regulation 99.140;
 - (k) a certification by the tester about whether the device has been stored, tested, maintained and operated in accordance with the legislative instrument made by CASA under subregulation 99.145(2).

Note: Subregulation 99.180(7) may also require the notice to contain certain things.

Notice to approved laboratory

- (3) For paragraph 99.170(5)(b), the notice must contain the following:
- (a) the sample identifier allocated to the body sample by the approved tester;
 - (b) the date time that the body sample was given;
 - (c) the results of the initial drug test;
 - (d) the list of testable drugs that the tester wants the approved laboratory to test for in the confirmatory drug test;
 - (e) the name of the approved tester.

99.180 Dealing with samples for confirmatory drug test

- (1) If the result of an initial drug test is a positive result, as soon as practicable after the result is known, the approved tester must:
 - (a) allocate to the body sample a sample identifier; and
 - (b) divide the body sample into approximately equal lots to be known as Sample A and Sample B; and
 - (c) place Sample A and Sample B into separate specimen tubes; and
 - (d) place both tubes into a single container.
- (2) In allocating the sample identifier under paragraph (1)(a), the approved tester must use the method specified in a legislative instrument made by CASA under regulation 99.150.
- (3) The amount of body sample in Sample A and Sample B must be sufficient for a confirmatory drug test to be conducted.
- (4) Immediately before the body sample is placed in them, the tubes must:
 - (a) be in the packages provided by the manufacturer; and
 - (b) not have been used for any purpose; and
 - (c) be in such a condition that they do not affect the quality of the body sample taken.
- (5) As soon as practicable after placing Sample A and Sample B into separate specimen tubes, the approved tester must:
 - (a) securely seal each tube with tamper-evident seals; and
 - (b) label each tube with the following information:
 - (i) the tester's initials;
 - (ii) the sample identifier for the body sample;
 - (iii) information about whether the tube contains Sample A or Sample B.
- (6) The approved tester must ask the donor to:
 - (a) witness the tester's actions under this regulation in respect of the body sample; and
 - (b) initial the tamper-evident seals on the tubes; and
 - (c) sign the notice given to the donor under regulation 99.175.
- (7) If the donor refuses a request made by the approved tester under subregulation (6), the tester must, in the notice given under paragraph 99.170(5)(a), set out that fact.

99.185 Transporting samples

- (1) As soon as practicable after placing a body sample into specimen tubes, the approved tester must cause the tubes to be sent to an approved laboratory for confirmatory drug testing.

Regulation 99.190

- (2) The approved tester must send the specimen tubes in a way that results in the tubes arriving at the approved laboratory as soon as practicable after the tester places the body sample into the tubes.

Note: Under subregulation 99.170(6), a notice from the approved tester must accompany the samples to the approved laboratory.

- (3) The specimen tubes must be stored prior to transport and transported in such a way that the integrity of the body sample is preserved.

Subdivision 99.C.2.3—Receipt and storage of samples by approved laboratories

99.190 Receipt of samples

- (1) If an approved laboratory receives a body sample divided into Sample A and Sample B for a confirmatory drug test, the laboratory must, as soon as practicable after receiving the specimen tubes:
- (a) inspect each tube for damage; and
 - (b) check that the seals on the tubes are intact.
- (2) If a seal on a specimen tube is not intact, or a specimen tube is damaged in such a way that the integrity of the body sample may have been compromised, the laboratory must:
- (a) not test the part of the body sample contained in the tube; and
 - (b) discard the contents of the tube.
- (3) If the laboratory discards the contents of both of the specimen tubes, as soon as practicable after the day the laboratory received the tubes, the laboratory must send to CASA a dated, written notice that includes the following information:
- (a) the date and time of receipt of the body sample at the laboratory;
 - (b) the sample identifier for the body sample;
 - (c) a statement about why both tubes were discarded.
- (4) As soon as practicable after CASA receives the notice from the laboratory, CASA must give a written notice to the donor that includes the following:
- (a) the sample identifier for the body sample;
 - (b) a statement:
 - (i) that neither Sample A nor Sample B could be tested because the integrity of the body samples had been compromised; and
 - (ii) that both Sample A and Sample B were discarded by the laboratory.

99.195 Storage of samples

If neither Sample A nor Sample B is discarded

- (1) Subregulations (2), (3) and (4) apply if:
- (a) an approved laboratory receives a body sample for a confirmatory drug test that is divided into Sample A and Sample B; and

- (b) neither Sample A nor Sample B is discarded under subregulation 99.190(2) or (3).
- (2) Sample A and Sample B must be stored in a secured refrigeration unit until Sample A is tested.
- (3) If the test result for the confirmatory drug test on Sample A is a positive result, Sample B must be:
 - (a) stored in a secure freezer; and
 - (b) kept for 100 days from the date of the positive result and then discarded.
- (4) If the test result for Sample A is not a positive result, Sample B must be discarded.

If one of the specimen tubes is discarded

- (5) If:
 - (a) an approved laboratory receives a body sample for a confirmatory drug test that is divided into Sample A and Sample B; and
 - (b) either Sample A or Sample B is discarded under subregulation 99.190(2);then the remaining specimen tube must be stored in a secured refrigeration unit until it is tested.

Subdivision 99.C.2.4—Conduct of drug tests by approved laboratories

99.200 Testing Sample A

- (1) An approved laboratory must test Sample A of a body sample it receives for confirmatory drug testing if the laboratory is satisfied that Sample A retains its integrity.
- (2) If the integrity of Sample A of a body sample may have been compromised, or the Sample A is for some reason unavailable for confirmatory drug testing, the approved laboratory must deal with Sample B of the body sample as if it were Sample A.
- (3) These Regulations apply to the Sample B accordingly.
- (4) If Sample B of the body sample is to be dealt with as if it were Sample A, Sample B is to be known as Sample A from the time that Sample B, under this regulation, is required to be dealt with as Sample A.

99.205 Samples to be tested in accordance with National Association of Testing Authorities' accreditation

An approved laboratory must test body samples received under this Subpart in accordance with the laboratory's accreditation by the National Association of Testing Authorities.

Regulation 99.210

99.210 Notices of Sample A results

Laboratory to CASA

- (1) As soon as practicable after a confirmatory test is conducted on Sample A of a body sample by an approved laboratory, the laboratory must send to CASA a dated, written notice that includes the following:
 - (a) the date and time of receipt of the body sample at the laboratory;
 - (b) the sample identifier for the body sample;
 - (c) a statement as to whether the tamper-evident seals on the specimen tubes containing the body sample were intact on receipt by the laboratory;
 - (d) the list of testable drugs that the approved tester of the initial drug test asked to be tested;
 - (e) the date and time that Sample A was tested;
 - (f) the method used for the testing;
 - (g) the target concentrations of the testing;
 - (h) the result of the test;
 - (i) a statement about whether the body sample has been tested in accordance with these Regulations, and any conditions attached to the laboratory's National Association of Testing Authorities accreditation;
 - (j) the name of the person who declared the results of the test.
- (2) The notice must be signed by the laboratory's approved person.

CASA to donor—oral notice

- (3) As soon as practicable after CASA receives the notice from the laboratory, CASA must give oral notice to the donor of the body sample of the confirmatory test result on Sample A.

CASA to donor—written notice

- (4) As soon as practicable after CASA gives the oral notice, CASA must give a written notice to the donor that includes the following:
 - (a) the sample identifier for Sample A and Sample B;
 - (b) the list of testable drugs that were tested for;
 - (c) a statement as to whether the tamper-evident seals on the specimen tubes containing the body sample were intact on receipt by the approved laboratory that tested them;
 - (d) the date and time that Sample A was tested;
 - (e) the method used for the testing;
 - (f) the target concentrations of the testing;
 - (g) the result of the test;
 - (h) a statement about whether the body sample has been tested in accordance with these Regulations and any conditions attached to the laboratory's National Association of Testing Authorities accreditation;
 - (i) if the result of the test is a positive result:

- (i) information about the donor's rights to have Sample B tested; and
- (ii) information about how the donor gets Sample B tested and the costs associated with that testing.

99.215 Donor may request testing of Sample B

- (1) If the test result for Sample A of a body sample is a positive result, the donor of the body sample may apply to CASA to either:
 - (a) have conducted on Sample B of the body sample a further confirmatory drug test by the approved laboratory (the ***original laboratory***) that tested Sample A; or
 - (b) have Sample B transferred to another approved laboratory (the ***second laboratory***) for a further confirmatory drug test.

Note: If the integrity of either Sample A or Sample B of a body sample has been compromised, the compromised specimen tube will have been discarded. There will not be a Sample B to be tested because, under regulation 99.200, Sample B will become known as Sample A.

- (2) The application must be made within 90 days of the date of the written notice of the test result for the confirmatory drug test on Sample A being given to the donor.
- (3) The donor is liable to pay the costs of testing Sample B and any transportation costs associated with transporting Sample B to the second laboratory (if any).

Original laboratory to test Sample B

- (4) If the original laboratory is advised by CASA to test Sample B, it must do so.

Second laboratory to test Sample B

- (5) If the original laboratory is notified by CASA to transport Sample B to a specified second laboratory for testing, the original laboratory must package and transport Sample B as provided for in regulation 99.185 as if the original laboratory were the approved tester for the body sample.
- (6) The original laboratory must send the specimen tube in a way that results in the tube arriving at the approved laboratory as soon as practicable.
- (7) The specimen tubes must be stored prior to transport and transported in such a way that the integrity of the body sample is preserved.
- (8) CASA must notify the second laboratory of the matters specified in subregulation 99.175(3) in respect of Sample B.
- (9) On receipt of Sample B, the second laboratory must:
 - (a) test the sample in accordance with the notice; and
 - (b) deal with the sample as if it were the original laboratory and these Regulations apply to that second laboratory accordingly.

Regulation 99.220

99.220 Approved laboratory to keep Sample B

- (1) This regulation applies if:
 - (a) an approved laboratory receives a body sample for a confirmatory drug test that is divided into Sample A and Sample B; and
 - (b) the test result for the confirmatory drug test on Sample A is a positive result; and
 - (c) there is a Sample B remaining after Sample A is tested.
- (2) The approved laboratory must keep Sample B for the 100-day period specified in paragraph 99.195(3)(b), unless the donor:
 - (a) applies to CASA to have a confirmatory drug test conducted on Sample B; and
 - (b) applies within 90 days of the date of the written notice of the test result for the confirmatory drug test on Sample A being given to the donor.
- (3) If the donor does not apply to CASA within the 90-day period mentioned in subregulation (2), the approved laboratory must discard Sample B at the end of the 100-day period specified in paragraph 99.195(3)(b).

99.225 Notices of Sample B results

- (1) If a confirmatory drug test is conducted on Sample B of a body sample, the notices specified in subregulation 99.210(1) and (3) must be given in respect of that test.
- (2) The notices must be given in the form and within the timeframes required by regulation 99.210.
- (3) The written notice to the donor must contain the following:
 - (a) the sample identifier for Sample A and Sample B;
 - (b) a statement that Sample B was tested;
 - (c) a statement as to whether the tamper-evident seals on the specimen tubes containing the body sample were intact on receipt by the approved laboratory that tested them;
 - (d) the list of testable drugs that were tested for;
 - (e) the date and time that Sample B was tested;
 - (f) the method used for the testing;
 - (g) the target concentrations of the testing;
 - (h) the result of the test;
 - (i) a statement about whether the sample has been tested in accordance with these Regulations and any conditions attached to the laboratory's National Association of Testing Authorities accreditation.

99.230 Test results

- (1) If a confirmatory drug test is conducted on Sample A of a body sample and the result is not a positive result, then the test result for the body sample is taken not to be a positive result.
- (2) Subject to subregulations (4) and (5), if a confirmatory drug test is conducted on Sample A of a body sample and the result is a positive result, then the test result for the body sample is taken to be a positive result.
- (3) Subject to subregulation (5), if:
 - (a) a confirmatory drug test is conducted on Sample A of a body sample and the result is a positive result; and
 - (b) the donor applies to CASA to have a confirmatory drug test conducted on Sample B of a body sample before the expiry of the period mentioned in subregulation 99.215(2); and
 - (c) the result of the test on Sample B is a positive result;then the test result for the body sample is taken to be a positive result.
- (4) If:
 - (a) a confirmatory drug test is conducted on Sample A of a body sample and the result is a positive result; and
 - (b) the donor applies to CASA to have a confirmatory drug test conducted on Sample B of the sample before the expiry of the period mentioned in subregulation 99.215(2); and
 - (c) the result of the test on Sample B is not a positive result, or Sample B is not available to be tested;then, despite the positive result for Sample A, the test result for the body sample is taken not to be a positive result.

Note: Under regulation 99.200, Sample B may have been dealt with as if it were Sample A. In that case, there will not be a Sample B to test.
- (5) A positive result for a confirmatory drug test on either Sample A or Sample B of a body sample is taken not to be a positive result for the sample if a CASA medical review officer has determined that the test result for the sample could be the result of legitimate therapeutic treatment or some other innocuous source.

Subdivision 99.C.2.5—Record-keeping

99.235 Approved laboratory to keep records

- (1) An approved laboratory must keep a copy of a notice sent under regulation 99.210 for 7 years from the date the notice was sent.

Penalty: 50 penalty units.
- (2) The laboratory must keep the copy in a secure location.

Penalty: 50 penalty units.

Part 99 Drug and alcohol management plans and testing

Subpart 99.C Drug and alcohol testing by CASA

Division 99.C.2 Drug testing

Regulation 99.235

- (3) During the 7-year period, the laboratory must provide a copy of the notice to CASA if required to.

Penalty: 50 penalty units.

- (4) An offence against subregulation (1), (2) or (3) is an offence of strict liability.
- (5) Subject to any requirement in any other Commonwealth, State or Territory law, the copy must be destroyed at the end of the 7-year period.

Division 99.C.3—Alcohol testing

99.240 Which body samples may be alcohol tested

An approved tester conducting an alcohol test under this Subpart may only take a sample of a person's breath for testing.

99.245 How samples are taken and tested

An approved tester must take body samples for alcohol testing in accordance with the procedures set out in a legislative instrument made by CASA for the purposes of this regulation.

99.250 Approved breathalysers to be used in alcohol tests

- (1) If an approved tester is conducting an initial alcohol test under this Subpart, the tester must only use an approved breathalyser to conduct the test.
- (2) If the approved tester is conducting a confirmatory alcohol test under this Subpart, the tester must only use a breathalyser that:
 - (a) is an approved breathalyser; and
 - (b) meets the requirements of NMI R 126, *Pattern Approval Specifications for Evidential Breath Analysers*.
- (3) The approved tester must ensure that the breathalyser is stored, tested, maintained and operated in accordance with a legislative instrument made for the purposes of this subregulation.

99.255 Alcohol tests

- (1) To conduct an initial alcohol test, an approved tester must take a breath sample.
- (3) If the result of the initial alcohol test is a positive result, the approved tester must take a further breath sample from the donor for a confirmatory alcohol test.
- (4) The further sample must be taken as soon as practicable, but not sooner than 15 minutes, after the initial alcohol test sample was taken.
- (5) After the result of the confirmatory alcohol test is available, the approved tester must give the donor a notice that includes the information specified in subregulation 99.265(1).

99.260 Test results

- (1) If an initial alcohol test is conducted on a body sample and the result is not a positive result, then the test result for the body sample is taken not to be a positive result.
- (2) If:

Regulation 99.265

- (a) an initial alcohol test is conducted on a body sample and the result is a positive result; and
 - (b) a confirmatory alcohol test in respect of the initial alcohol test is conducted on a body sample; and
 - (c) the result of the confirmatory alcohol test is a positive result;
- then the test result for the body sample is taken to be a positive result.
- (3) If:
- (a) an initial alcohol test is conducted on a body sample and the result is a positive result; and
 - (b) a confirmatory alcohol test is conducted on the body sample and the result of the test is not a positive result;
- then, despite the positive result for the initial alcohol test, the result for the body sample is taken not to be a positive result.

99.265 Notice of alcohol test

- (1) The notice given to the donor under subregulation 99.255(5) must contain the following:
- (a) the donor's name, date of birth, gender, residential address and telephone number, and an indication of whether those details were provided by the donor or the donor's DAMP organisation (if any);
 - (b) the date and time that the donor was asked by the approved tester to stop performing or being available to perform SSAAs for the purposes of giving a body sample for an alcohol test;
 - (c) the date, time and location of the place that the donor's body sample was taken and tested;
 - (d) the test result;
 - (e) the applicable SSAA that the donor was performing or available to perform at the time the donor was tested;
 - (f) the make, model and serial number of the approved breathalyser used to conduct the testing of the body sample;
 - (g) the details of any photographic identification provided by the donor;
 - (h) a certification by the approved tester about whether the body sample has been taken and tested in accordance with the requirements of the Regulations and any applicable legislative instrument made under regulation 99.245;
 - (i) a certification by the tester about whether the breathalyser has been stored, tested, maintained and operated in accordance with the legislative instrument made under subregulation 99.250(3);
 - (j) the initials of the tester and his or her allocated number.
- (2) The approved tester must ask the donor to sign the notice at the time the approved tester gives the notice to the donor.

Subpart 99.D—Evidentiary certificates and prescribed proceedings

Division 99.D.1—Purposes of Subpart

99.275 Purposes of Subpart

This Subpart provides for the following:

- (a) evidentiary certificates (Division 99.D.2);
- (b) prescribed proceedings for paragraph 36(4)(d) of the Act (Division 99.D.3).

Division 99.D.2—Evidentiary certificates

99.280 Certificates by approved tester

Matters relating to samples for initial drug tests

- (1) A certificate that under subsection 36(4) of the Act is admissible in proceedings concerning an initial drug test must:
 - (a) be signed by an approved tester; and
 - (b) be in respect of a body sample taken by the tester for an initial drug test; and
 - (c) be in respect of a body sample that the tester conducted an initial drug test on; and
 - (d) state one or more of the matters set out in subregulation (3).
- (2) Subject to regulation 99.305, if subregulation (1) is complied with, then the certificate is admissible as evidence of the matters stated in the certificate in any proceedings under the Act, these Regulations or the *Criminal Code*.

Note: Regulation 99.315 prescribes proceedings under the *Criminal Code* for the purposes of paragraph 36(4)(d) of the Act.

- (3) For paragraph (1)(d), the matters are as follows:
 - (a) the approved tester's allocated number;
 - (b) that the tester who signed the certificate was an approved tester at the time the body sample was taken;
 - (c) when the body sample was taken;
 - (d) from whom the body sample was taken;
 - (e) the applicable SSAA that the donor was performing or available to perform at the time the body sample was taken;
 - (f) the make, model and serial number of the approved drug testing device used to conduct the test on the body sample;
 - (g) a description of the method of sampling;
 - (h) whether the test conducted on the body sample was an initial drug test;
 - (i) the result of the test conducted;
 - (j) the sample identifier, if any, for the body sample.

Matters relating to alcohol tests

- (4) A certificate that under subsection 36(4) of the Act is admissible in proceedings concerning an alcohol test under Subpart 99.C must:
 - (a) be signed by an approved tester; and
 - (b) be in respect of a body sample taken by the tester for an alcohol test; and
 - (c) state one or more of the matters set out in subregulation (6).

- (5) Subject to regulation 99.305, if subregulation (4) is complied with, then the certificate is admissible as evidence of the matters stated in the certificate in any proceedings under the Act, these Regulations or the *Criminal Code*.

Note: Regulation 99.315 prescribes proceedings under the *Criminal Code* for the purposes of paragraph 36(4)(d) of the Act.

- (6) For paragraph (4)(c), the matters are as follows:
- (a) the approved tester's allocated number;
 - (b) that the tester who signed the certificate was an approved tester at the time the body sample was taken;
 - (c) when the body sample was taken;
 - (d) from whom the body sample was taken;
 - (e) the applicable SSAA that the donor was performing or available to perform at the time the body sample was taken;
 - (f) the make, model and serial number of the approved breathalyser used to take the body sample and conduct the test;
 - (g) a description of the method of sampling;
 - (h) the alcohol test conducted on the body sample;
 - (i) the result of the test conducted.

99.285 Certificates by approved laboratory

- (1) A certificate that under subsection 36(4) of the Act is admissible in proceedings concerning a confirmatory drug test must:
- (a) be signed by an approved laboratory; and
 - (b) be in respect of a body sample on which a confirmatory drug test was conducted by the laboratory; and
 - (c) state one or more of the matters set out in subregulation (3).

- (2) Subject to regulation 99.305, if subregulation (1) is complied with, then the certificate is admissible as evidence of the matters stated in the certificate in any proceedings under the Act, these Regulations or the *Criminal Code*.

Note: Regulation 99.315 prescribes proceedings under the *Criminal Code* for the purposes of paragraph 36(4)(d) of the Act.

- (3) For paragraph (1)(c), the matters are as follows:
- (a) the sample identifier for the body sample;
 - (b) that the person who signed the certificate was an approved laboratory or the laboratory's approved person at the time the certificate was signed;
 - (c) when the body sample was received;
 - (d) what, if any, labels or other means of identifying the body sample accompanied the body sample when it was received;
 - (e) what container or containers the body sample was contained in when it was received;
 - (f) the state of the seals on the container or containers when the body sample was received;
 - (g) the state of the container or containers when the body sample was received;
-

Regulation 99.290

- (h) when the body sample was tested;
- (i) a description of the way in which the body sample was stored by the laboratory;
- (j) a description of the method of testing;
- (k) the testable drugs tested for;
- (l) the result of the test conducted.

99.290 Document taken to be a certificate unless contrary intention established

For the purposes of this Subpart, a document purporting to be a certificate referred to in regulation 99.280 or 99.285 is, unless the contrary intention is established, taken to be such a certificate and to have been duly given.

99.295 Certificate not to be admitted unless copy given

A certificate must not be admitted in evidence under regulation 99.280 or 99.285 in any proceedings under the Act, these Regulations or the *Criminal Code* unless:

- (a) the person charged with the offence; or
- (b) a barrister or solicitor who has appears for the person in those proceedings; has, at least 14 days before the certificate is sought to be so admitted, been given a copy of the certificate together with reasonable notice of the intention to produce the certificate as evidence in the proceedings.

99.300 Person signing the certificate may be called to give evidence

- (1) Subject to subregulation (2), if, under regulation 99.280 or 99.285, a certificate is admitted in evidence in proceedings, the person charged with the offence may require the person who signed the certificate to be called as a witness for the prosecution and cross-examined as if he or she had given evidence of the matters stated in the certificate.
- (2) Subregulation (1) does not entitle the person charged to require the person who signed the certificate to be called as a witness for the prosecution unless:
 - (a) the prosecutor has been given at least 4 days notice of the person's intention to require the person who signed the certificate to be so called; or
 - (b) the Court, by order, grants the person's application to require the calling of the witness.

99.305 Rebuttal evidence

- (1) Any evidence given in support, or in rebuttal, of a matter stated in a certificate given under regulation 99.280 or 99.285 must be considered on its merits, and the credibility and probative value of such evidence must be neither increased nor diminished because of this Subpart.
- (2) The evidential burden in rebutting a matter stated in a certificate given under regulation 99.280 or 99.285 is on the balance of probabilities.

99.310 CASA may ask for full certificate

- (1) CASA may, by notice in writing, ask:
 - (a) an approved tester to provide a certificate, under subregulation 99.280(1) or (4); or
 - (b) an approved laboratory to provide a certificate, under regulation 99.285; that contains all of the matters listed in the particular provision.
- (2) The approved tester or approved laboratory must comply with the notice within 7 days of receiving it.

Penalty: 50 penalty units.

- (3) An offence against subregulation (2) is an offence of strict liability.

Division 99.D.3—Prescribed proceedings

99.315 Prescribed proceedings

For paragraph 36(4)(d) of the Act, proceedings under the *Criminal Code* are prescribed.

Subpart 99.E—Offences for Subpart 99.C

Division 99.E.1—Purposes of Subpart

99.320 Purposes of Subpart

This Subpart provides for the following:

- (a) offences relating to Subpart 99.C (Division 99.E.2);
- (b) CASA medical review officers (Division 99.E.3).

Division 99.E.2—Offences

Subdivision 99.E.2.1—Offences relating to giving a body sample

99.325 Failing to carry identification whilst undertaking applicable SSAA

- (1) If:
- (a) a person is performing or available to perform an applicable SSAA; and
 - (b) as part of the process of taking a body sample for a drug or alcohol test under Subpart 99.C, an approved tester requires the person to produce identification of a kind set out in subregulation (2);
- the person must either:
- (c) immediately produce to the tester the identification; or
 - (d) produce to the tester the identification within 1 hour after being required to do so.

Penalty: 10 penalty units.

- (2) For subregulation (1), the kinds of identification are as follows:
- (a) identification that:
 - (i) contains a photograph of the person and sets out the person's name, date of birth and address; and
 - (ii) was issued by a Commonwealth, State, Territory or local government body;
 - (b) identification that is issued by a DAMP organisation that contains a photograph of the person and the person's name;
 - (c) an ASIC;
 - (d) a passport.
- (3) An offence against subregulation (1) is an offence of strict liability.

99.330 Refusing or failing to give a body sample

- (1) A person must not refuse or fail to give a body sample to an approved tester for a drug or alcohol test under Subpart 99.C if:
- (a) the person is performing or available to perform an applicable SSAA; and
 - (b) at the time the person is performing or available to perform the applicable SSAA, the person is required to give a body sample for a drug or alcohol test by the approved tester; and
 - (c) the approved tester, in requiring and taking or seeking to take the body sample, complies with the requirements of this Part or any legislative instrument made under this Part.

Penalty: 50 penalty units.

- (2) It is a defence to subregulation (1) if a person failed to give a body sample because the person had a medical condition that rendered the person unable to give the body sample.
- (3) An offence against subregulation (1) is an offence of strict liability.

99.335 Continuing to perform applicable SSAA after refusing a drug or alcohol test or failing to give a body sample

- (1) This regulation applies if:
 - (a) a person is performing or available to perform an applicable SSAA; and
 - (b) the person is required by an approved tester to provide a body sample for a drug or alcohol test under Subpart 99.C; and
 - (c) the person:
 - (i) refuses to provide a body sample to be tested; or
 - (ii) fails to provide a body sample to be tested.
- (2) The person must not again perform or be available to perform an applicable SSAA until the person is drug or alcohol tested under this Part.

Penalty: 50 penalty units.

Note 1: If the person receives a confirmatory drug test and the result is a positive result, the person may be liable to an offence if the person contravenes regulation 99.380.

Note 2: It is an offence for the person to contravene regulation 99.345 or 99.380 in respect of the drug test.

- (3) An offence against subregulation (2) is an offence of strict liability.

99.340 Failing to stop performing an applicable SSAA

- (1) If an approved tester requires a person to stop performing or being available to perform an applicable SSAA for the time it takes for the tester to take a body sample from the person and conduct a drug or alcohol test under Subpart 99.C on the body sample, the person must comply with the requirement.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

99.345 Failing to remain in approved tester's presence

- (1) If an approved tester requires a person to remain in the tester's presence for the time it takes for the tester to take a body sample from the person and conduct a drug or alcohol test under Subpart 99.C on the body sample, the person must comply with the requirement.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Regulation 99.350

99.350 Person must not interfere with integrity of body sample

- (1) If a person is giving, or has given, a body sample for a drug or alcohol test under this Part, a person must not interfere with the integrity of that sample.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Subdivision 99.E.2.2—Offences occurring after positive test result

99.355 Continuing to perform applicable SSAA between having initial drug test and confirmatory drug test

- (1) This regulation applies if:
- (a) a person is performing or available to perform an applicable SSAA; and
 - (b) the person receives an initial drug test; and
 - (c) the result of the initial drug test is a positive result; and
 - (d) the person's body sample in respect of the initial drug test is being subjected to confirmatory drug testing by an approved laboratory.
- (2) The person must not again perform or become available to perform an applicable SSAA until the person has received a confirmatory drug test in respect of the initial drug test.

Penalty: 50 penalty units

Note: Regulation 99.360 provides an offence for performing or being available to perform an applicable SSAA after a confirmatory drug test has been given and before the results of that confirmatory drug test are returned.

- (3) An offence against subregulation (2) is an offence of strict liability.
- (4) It is not an offence against subregulation (2) for a person to perform or become available to perform an applicable SSAA if the person's body sample cannot be subjected to confirmatory drug testing by an approved laboratory.

99.360 Continuing to perform applicable SSAA after having confirmatory drug test and before result returned

- (1) This regulation applies if:
- (a) a person is performing or available to perform an applicable SSAA; and
 - (b) the person receives an initial drug test; and
 - (c) the result of the initial drug test is a positive result; and
 - (d) the person receives a confirmatory drug test in respect of the initial drug test; and
 - (e) the test result for the confirmatory drug test has not been returned to the person.

Regulation 99.365

- (2) The person must not again perform or be available to perform an applicable SSAA until the result of the confirmatory drug test has been returned to the person.

Penalty: 50 penalty units.

Note: If the returned test result is a positive result, then the person may be liable to an offence if the person contravenes regulation 99.380.

- (3) An offence against subregulation (2) is an offence of strict liability.
- (4) It is not an offence against subregulation (2) for a person to perform or become available to perform an applicable SSAA if a test result for the confirmatory drug test cannot be returned to the person because it was not possible to conduct the confirmatory drug test.

99.365 Continuing to perform applicable SSAA before confirmatory alcohol test result returned

- (1) This regulation applies if:
- (a) a person is performing or available to perform an applicable SSAA; and
 - (b) the person receives an initial alcohol test; and
 - (c) the initial alcohol test result is a positive result.
- (2) The person must not again perform or be available to perform an applicable SSAA until the person has:
- (a) received a confirmatory alcohol test in respect of the initial alcohol test; and
 - (b) the test result for the confirmatory alcohol test has been returned to the person.

Penalty: 50 penalty units

Note: If the returned test result is a positive result, then the person may be liable to an offence if the person contravenes regulation 99.385.

- (3) An offence against subregulation (2) is an offence of strict liability.

99.370 Performing applicable SSAA showing positive result for testable drug

- (1) A person must not perform or be available to perform an applicable SSAA if:
- (a) while the person is performing or available to perform an applicable SSAA, the person gives a body sample for an initial drug test under Subpart 99.C; and
 - (b) a confirmatory drug test in respect of the initial drug test is conducted on Sample A of the person's body sample; and
 - (c) the result of the confirmatory drug test on Sample A is a positive result.

Penalty: 50 penalty units.

Note: Regulation 99.230 deals with how you determine the results of confirmatory drug tests.

Regulation 99.375

- (2) It is a defence to subregulation (1) if Sample B of the person's body sample is tested within the period specified in subregulation 99.215(2) and returns a result that is not positive.
- (3) Subregulation (1) applies to create an offence in respect only of the applicable SSAA that the person was performing or available to perform at the time that the body sample for the initial drug test was taken.
- (4) An offence against subregulation (1) is an offence of strict liability.

99.375 Performing applicable SSAA while showing positive result for a confirmatory alcohol test

- (1) A person must not perform or be available to perform an applicable SSAA if:
 - (a) while the person is performing or available to perform an applicable SSAA, the person gives a body sample for an initial alcohol test under Subpart 99.C; and
 - (b) the person gives a body sample for a confirmatory alcohol test in respect of the initial alcohol test; and
 - (c) the result of the confirmatory alcohol test is a positive result.

Penalty: 50 penalty units.

Note: Regulation 99.260 deals with how you determine the results of alcohol tests.

- (2) Subregulation (1) applies to create an offence in respect only of the applicable SSAA that the person was performing or available to perform at the time that the body sample for the initial alcohol test was taken.
- (3) An offence against subregulation (1) is an offence of strict liability.

Subdivision 99.E.2.3—Offences relating to returning to SSAAs after positive test result

99.380 Continuing to perform applicable SSAA after having confirmatory drug test

- (1) This regulation applies if:
 - (a) a person is performing or available to perform an applicable SSAA; and
 - (b) the person receives an initial drug test; and
 - (c) the initial drug test result is a positive result; and
 - (d) the person receives a confirmatory drug test in respect of the initial drug test; and
 - (e) the test result for the confirmatory drug test is a positive result.
- (2) The person must not again perform or be available to perform an applicable SSAA until all of the following have occurred:
 - (a) the person has undergone a comprehensive assessment;

Regulation 99.385

- (b) if the comprehensive assessment recommended the person commence a drug or alcohol intervention program—the person has begun participating in a nominated drug or alcohol intervention program;
- (c) the person is considered fit to resume performing, or being available to perform, an applicable SSAA by:
 - (i) if the person is an employee of a DAMP and the DAMP was notified of the test result for the confirmatory drug test by CASA—a DAMP medical review officer; or
 - (ii) in any other case—a CASA medical review officer;
- (d) the person is considered fit to resume performing, or being available to perform, an applicable SSAA by the person’s treating clinician, if any;
- (e) at the time the person was considered fit under paragraphs (c) and (d), the person receives a confirmatory drug test and records, for the test, a result that was not a positive result.

Penalty: 50 penalty units.

Note: Regulation 99.230 deals with test results for body samples that are drug tested.

- (3) An offence against subregulation (2) is an offence of strict liability.

99.385 Continuing to perform applicable SSAA after confirmatory alcohol test

- (1) This regulation applies if:
 - (a) a person was performing or available to perform an applicable SSAA; and
 - (b) the person has had an initial alcohol test; and
 - (c) the test result for the initial alcohol test was a positive result; and
 - (d) the person has had a confirmatory alcohol test in respect of the initial alcohol test; and
 - (e) the test result for the confirmatory alcohol test was again a positive result.
- (2) The person must not again perform or become available to perform an applicable SSAA until all of the following have occurred:
 - (a) the person has undergone a comprehensive assessment;
 - (b) if the comprehensive assessment recommended the person commence a drug or alcohol intervention program—the person has begun participating in a nominated drug or alcohol intervention program;
 - (c) the person is considered fit to resume performing, or being available to perform, an applicable SSAA by:
 - (i) if the person is an employee of a DAMP and the DAMP was notified of the test result for the confirmatory alcohol test by CASA—a DAMP medical review officer; or
 - (ii) in any other case—a CASA medical review officer;
 - (d) the person is considered fit to resume performing, or being available to perform, an applicable SSAA by the person’s treating clinician, if any.

Penalty: 50 penalty units.

Note: Regulation 99.260 deals with test results for body samples that are alcohol tested.

Part 99 Drug and alcohol management plans and testing

Subpart 99.E Offences for Subpart 99.C

Division 99.E.2 Offences

Regulation 99.385

- (3) An offence against subregulation (2) is an offence of strict liability.

Division 99.E.3—CASA medical review officers

99.390 CASA medical review officers

- (1) CASA may, in writing, appoint a person entitled to practice as a medical practitioner under a law of a State or Territory to be a CASA medical review officer for the purposes of Subpart 99.C.
- (2) A CASA medical review officer must review:
 - (a) a positive result for a drug or alcohol test; and
 - (b) medical information concerning a person's failure to give a body sample for drug or alcohol testing because of a medical condition;before the result or failure is referred for action for an offence under this Subpart, or for other action under the Act or these Regulations.
- (3) CASA must take into account the results of a review carried out by a CASA medical review officer under subregulation (2) before it makes a decision to refer a positive result for action for an offence under this Subpart or for other action under the Act or these Regulations.

Part 99 Drug and alcohol management plans and testing

Subpart 99.F Provision of information

Division 99.F.1 Purposes of Subpart

Regulation 99.395

Subpart 99.F—Provision of information

Division 99.F.1—Purposes of Subpart

99.395 Purposes of Subpart

This Subpart provides for the exchange of information about drug and alcohol tests between CASA and DAMP organisations, and CASA and foreign operators.

Division 99.F.2—Information

99.400 Drug or alcohol test information given or required by CASA

- (1) If:
- (a) a drug or alcohol test is conducted on a person under Subpart 99.C; and
 - (b) the person is a SSAA employee of a DAMP organisation or an employee of a foreign operator; and
 - (c) the result of the test is a positive result;

CASA may notify the organisation or foreign operator of the matters set out in a notice given to the person under Subpart 99.C.

If CASA notifies a DAMP organisation

- (2) If CASA notifies a DAMP organisation under subregulation (1) of the results of the test, CASA may require the organisation, by notice in writing, to provide CASA with the information set out in subregulation (3) in respect of the employee.
- (2A) If, under subregulation (2), CASA requires a DAMP organisation to provide CASA with information, the DAMP organisation must, in writing, provide CASA with that information.

Penalty: 50 penalty units.

- (3) CASA may require:
- (a) information about what, if any, action was taken by the DAMP organisation under its DAMP in respect of the employee and the test result; and
 - (b) information about when, after the result of the test became known, the employee again performed or became available to perform a SSAA; and
 - (c) if the employee ceases to be a SSAA employee of the organisation—information about whether the employee so ceased:
 - (i) before the employee had completed attending a nominated drug or alcohol intervention program; or
 - (ii) before the employee had been approved by the organisation to again perform or be available to perform a SSAA.

If CASA notifies foreign operator

- (4) If CASA notifies the foreign operator under subregulation (1) of the results of the test, CASA may require the operator, by notice in writing, to provide CASA with the information relating to the test result specified in the notice.
- (5) If, under subregulation (4), CASA requires a foreign operator to provide CASA with information, the operator must, in writing, provide CASA with that information.

Regulation 99.405

Penalty: 50 penalty units.

- (6) An offence against subregulation (2A) or (5) is an offence of strict liability.

99.405 Information that must be given to CASA following drug or alcohol test

- (1) This regulation applies if:
- (a) CASA notifies a DAMP organisation of a person's test results in accordance with subregulation 99.400(1); and
 - (b) the person is a SSAA employee of the DAMP; and
 - (c) the person ceases to be a SSAA employee of the DAMP organisation for any reason; and
 - (d) the cessation occurs after the test and before the employee:
 - (i) resumes performing or being available to perform an applicable SSAA with the organisation; or
 - (ii) satisfactorily completes a nominated drug or alcohol intervention program.
- (2) The DAMP organisation must, in writing, provide CASA with the information set out in subregulation (3) in respect of the employee.

Penalty: 50 penalty units.

- (3) The information is the following:
- (a) the employee's name and address;
 - (b) the employee's ARN, if any;
 - (c) the date the employee ceased to work for the DAMP organisation.
- (4) An offence against subregulation (2) is an offence of strict liability.

Subpart 99.G—CASA's powers in relation to civil aviation authorisations

Division 99.G.1—Purposes of Subpart

99.410 Purposes of Subpart

This Subpart provides for CASA to vary, suspend or cancel a person's civil aviation authorisation in certain circumstances.

Note: CAR 269 allows CASA to vary, suspend or cancel a licence, certificate or authority, but under that regulation CASA must give the holder of the licence, certificate or authority notice and allow the holder an opportunity to show cause why the licence, certificate or authority should not be varied, suspended or cancelled.

99.415 When CASA may vary, suspend or cancel a civil aviation authorisation

- (1) CASA may, in writing, vary, suspend or cancel a person's civil aviation authorisation in the interests of aviation safety in the following circumstances:
 - (a) if:
 - (i) the person gives a body sample for drug or alcohol testing under Subpart 99.C; and
 - (ii) a confirmatory alcohol test or confirmatory drug test is conducted on the sample; and
 - (iii) the test result is a positive result;
 - (b) if a person refuses to give a body sample for drug or alcohol testing under Subpart 99.C.
- (2) If CASA determines that a person has contravened the requirements of a regulation in Division 99.E.2 (other than subregulation 99.325(1)), CASA may, in writing, vary, suspend or cancel the person's civil aviation authorisation in the interests of aviation safety.
- (3) If:
 - (a) CASA determines that a person has contravened the requirements of a regulation in Subpart 99.B or 99.F; and
 - (b) the person holds a civil aviation authorisation;CASA may, in writing, vary, suspend or cancel the person's civil aviation authorisation in the interests of aviation safety.
- (4) Before making a decision to vary, suspend or cancel a person's civil aviation authorisation under subregulation (3), CASA must:
 - (a) give the person a notice setting out the reasons why CASA is considering making the decision; and
 - (b) allow the person to show cause, within such reasonable time as CASA specifies in the notice, why CASA should not make the decision.

Note: See section 31 of the Act for review of a decision under this regulation.

Regulation 99.420

99.420 When variation, suspension or cancellation takes effect

A variation, suspension or cancellation of a civil aviation authorisation under regulation 99.415 takes effect from the date and time (if any) specified in the variation, suspension or cancellation.

99.425 Notice

- (1) If CASA varies, suspends or cancels a person's civil aviation authorisation under regulation 99.415, CASA must, as soon as practicable after the variation, suspension or cancellation, give the person a notice of the variation, suspension or cancellation that contains the following information:
 - (a) whether the person's authorisation is varied, suspended or cancelled;
 - (b) the authorisation that is so varied, suspended or cancelled;
 - (c) the reason for the variation, suspension or cancellation;
 - (d) the time (if any) and date that the variation, suspension or cancellation takes effect.
- (2) If the notice given under subregulation (1) is not a written notice, CASA must, within 48 hours after giving the notice under that subregulation, give the person a written notice of the matters specified in that subregulation.

99.430 Effect of effluxion of time in relation to the suspension of civil aviation authorisation

- (1) If a civil aviation authorisation is suspended under this Subpart, the authorisation has no force or effect for the duration of the suspension, but the period of currency of the authorisation continues to run.
- (2) If the period for which the authorisation is suspended is a period expiring after the expiration of the current period of the authorisation, the holder of the authorisation is not eligible for renewal of the authorisation until the period of suspension has expired.

99.435 Effect of suspension of civil aviation authorisation

If CASA suspends a civil aviation authorisation under this Subpart, its holder is taken not to be the holder of the authorisation during the period of the suspension.

Subpart 99.H—Approved testers and authorisations to conduct drug and alcohol tests

Division 99.H.1—Purposes of Subpart

99.440 Purposes of Subpart

This Subpart provides for the following:

- (a) approvals and authorisations of persons to take body samples and conduct drug and alcohol tests (Division 99.H.2);
- (b) obligations on approved testers, and protection of approved testers from liability in certain cases (Division 99.H.3);
- (c) powers of approved testers (Division 99.H.4);
- (d) identity cards for approved testers (Division 99.H.5);
- (e) notices for approved testers (Division 99.H.6).

Division 99.H.2—Approvals and authorisations

99.445 CASA may approve persons to take body samples and conduct tests

- (1) A person may apply to CASA, in writing, for approval to take body samples for the purposes of Part IV of the Act.
 - (1A) Subject to regulation 11.055, CASA must grant the approval.
 - (2) A person may apply to CASA, in writing, for approval to conduct alcohol tests and initial drug tests for the purposes of Part IV of the Act.
 - (2A) Subject to regulation 11.055, CASA must grant the approval.
 - (2B) A person may apply to CASA, in writing, for approval to conduct confirmatory drug tests for the purposes of Part IV of the Act.
 - (3) Subject to regulation 11.055, CASA must grant the approval if the National Association of Testing Authorities accredits the person:
 - (a) to AS 4760, *Procedures for specimen collection and the detection and quantitation of drugs in oral fluid*; or
 - (b) another Standard that is declared by CASA in a legislative instrument made for the purposes of this paragraph.

Note 1: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.

Note 2: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:
 - (a) a decision refusing to issue, or cancelling, suspending or varying, an approval; or
 - (b) a decision imposing a condition on an approval.
- (5) If CASA approves a person under subregulation (1) or (2), CASA must allocate to the person a unique identifying number (an **allocated number**) for the purposes of this Subpart.
- (6) The allocation must be in accordance with a method approved by CASA for the purposes of this subregulation.
- (7) The allocated number may include a numeral, letter or other character.

99.450 Persons authorised to take body samples and conduct tests

- (1) For subsection 36(2) of the Act, a person is authorised to take body samples for drug or alcohol tests under Subpart 99.C if the person is approved by CASA to do so under subregulation 99.445(1).
- (2) For subsection 36(3) of the Act, a person is authorised to conduct alcohol tests or initial drug tests under Subpart 99.C if the person is approved by CASA to do that under subregulation 99.445(2).

- (3) For subsection 36(3) of the Act, a person is authorised to conduct confirmatory drug tests under Subpart 99.C if the person is approved by CASA to do that under subregulation 99.445(3).

Division 99.H.3—Obligations on approved testers and protection from liability

99.455 Obligations on approved testers

- (1) An approved tester who wants to take a body sample from a donor must comply with the requirements of this Part in requiring, taking and dealing with the body sample.
- (2) Before taking a body sample from a donor, an approved tester must give the donor notice, in relation to any information about the donor that is collected by the tester, that meets the requirements of Information Privacy Principle 2 of the *Privacy Act 1988*.
- (3) The tester must ensure that he or she does not delay the donor for longer than is necessary to take the body sample and to conduct the test.

99.460 Approved testers not liable in certain cases

An approved tester is not liable to an action, suit or proceeding for or in relation to an act done or omitted to be done, in good faith in the performance or exercise, or the purported performance or exercise, of a function or power conferred by this Part.

Division 99.H.4—Powers of approved testers

99.465 Approved testers' powers to access premises

- (1) Subject to any aviation security requirements, an approved tester must, at all reasonable times, have access to any place to which access is necessary for the purposes of carrying out any of the approved tester's powers and functions under this Part.
- (2) A person must not prevent, or hinder, access by an approved tester to any place to which access is necessary for the purposes of carrying out any of the approved tester's powers or functions under this Part.

Penalty: 50 penalty units.

- (3) An offence against subregulation (2) is an offence of strict liability.
- (4) An approved tester must produce his or her identity card for inspection if asked to do so by the occupier or person in charge, or apparently in charge, of the place to which the tester seeks access.
- (5) If an approved tester:
 - (a) is acting as an approved tester; and
 - (b) seeks or is allowed access to a place specified in subregulation (1); and
 - (c) fails to produce his or her identity card for inspection when asked to do so;the tester is not authorised to access the place under that subregulation and, if access has been given to the tester, the tester must leave the place.

Regulation 99.470

Division 99.H.5—Identity cards

99.470 Identity cards

- (1) CASA must issue an approved tester with an identity card for the purposes of this Part.
- (2) The identity card is valid for the period that the person has been approved under regulation 99.445, or until that approval is suspended or revoked.
- (3) The card must:
 - (a) contain a recent photograph of the person; and
 - (b) specify whether the person is authorised to take body samples for drug or alcohol tests, or both; and
 - (c) specify that the person is authorised to conduct alcohol tests or initial drug tests, or both; and
 - (d) state the person's allocated number; and
 - (e) state the period for which the person is authorised to be an approved tester.

99.475 Return of identity card

- (1) If:
 - (a) a person has been issued with an identity card; and
 - (b) either:
 - (i) the person ceases to be an approved tester; or
 - (ii) the person's approval under regulation 99.445 is suspended;the person must return the card to CASA within 7 days of the person ceasing to be an approved tester, or of the person's approval being suspended, as the case may be.

Penalty: 10 penalty unit.

- (2) An offence against subregulation (1) is an offence of strict liability.

99.480 Display and production of identity cards

- (1) If an approved tester is performing functions or exercising powers under this Part, the tester must:
 - (a) wear his or her identity card so that it can be readily seen; and
 - (b) upon request, show his or her identity card to a person from whom the approved tester intends to take a body sample for a drug or alcohol test.
- (2) A donor who has been required by an approved tester to give a body sample for a drug or alcohol test may refuse to give the body sample if:
 - (a) the donor requests the tester to show the donor the tester's identity card; and
 - (b) the tester does not show the donor the card.

99.485 Suspension or revocation of authorisation

- (1) This regulation applies if an approved tester:
 - (a) breaches a condition of the tester's approval given under regulation 99.445;
or
 - (b) does not comply with the requirements of this Part in performing functions or exercising powers under this Part.
- (2) CASA may do any or all of the following in respect of the breach:
 - (a) impose a further condition of approval;
 - (b) suspend the approved tester's authorisation under regulation 99.450;
 - (c) revoke the tester's authorisation under regulation 99.450.
- (3) If:
 - (a) CASA takes an action mentioned in paragraph (2)(a) or (b) because of a breach of a condition (the **first breach**); and
 - (b) CASA later becomes satisfied that the approved tester is not complying with a condition of the approval under regulation 99.445;CASA may revoke the tester's authorisation even if the period for fulfilling any condition, or the period of any suspension for the first breach, has not ended.

99.490 Notices

- (1) If CASA imposes on an approved tester a further condition of approval under paragraph 99.485(2)(a), CASA must give the tester notice in writing of the imposition of the condition, the terms of the condition and the date from which the condition takes effect.
- (2) If CASA suspends the approved tester's authorisation under paragraph 99.485(2)(b), CASA must give the tester notice in writing of the suspension, the date that the suspension takes effect and the period of the suspension.
- (3) If CASA revokes the approved tester's authorisation under paragraph 99.485(2)(c), CASA must give the tester notice in writing of the revocation and the date from which the revocation takes effect.
- (4) The date under this regulation must not be a date before the day the notice is given.
- (5) A notice under this regulation must also include a statement setting out the reason that the condition was imposed or that the authorisation was suspended or revoked, as the case may be.

Part 99 Drug and alcohol management plans and testing

Subpart 99.H Approved testers and authorisations to conduct drug and alcohol tests

Division 99.H.6 Notices to approved testers

Regulation 99.495

Division 99.H.6—Notices to approved testers

99.495 Notice to approved testers

If a provision of these Regulations requires CASA to give a notice to an approved tester, the requirement is met if CASA gives that notice to the person who, as CASA's delegate, approved the tester as an approved tester.

Part 101—Unmanned aircraft and rockets

Table of contents

Subpart 101.A—Preliminary

- 101.005 Applicability of this Part
- 101.010 Application to rocket-powered unmanned aircraft
- 101.020 Exemption from certain provisions of CAR
- 101.021 Meaning of *RPA*
- 101.022 Types of RPA
- 101.023 Meaning of *model aircraft*
- 101.024 Types of model aircraft
- 101.025 Meaning of *populous area*
- 101.028 Issue of Manual of Standards for Part 101
- 101.029 Approvals for Part 101
- 101.030 Approval of areas for operation of unmanned aircraft or rockets
- 101.035 Requirements in this Part to give information to CASA

Subpart 101.AB—Authorisations for sections 20AA and 20AB of the Act

- 101.046 Flying without a certificate of airworthiness
- 101.047 Performance of duties during flight time—balloons, kites and model aircraft
- 101.048 Performance of duties during flight time—remotely piloted aircraft

Subpart 101.B—General prohibition on unsafe operation

- 101.050 Applicability of this Subpart
- 101.055 Hazardous operation prohibited

Subpart 101.C—Provisions applicable to unmanned aircraft generally

- 101.060 Applicability of this Subpart
- 101.065 Operation in prohibited or restricted area
- 101.066 Operation in prescribed area—requirements prescribed by the Part 101 Manual of Standards
- 101.070 Operation in controlled airspace above 400 ft AGL
- 101.072 Operation in controlled airspace—requirements prescribed by the Part 101 Manual of Standards
- 101.073 Operation must generally be within visual line of sight
- 101.075 Operation near aerodromes
- 101.080 Permission for operation of unmanned aircraft near aerodrome
- 101.085 Maximum operating height
- 101.090 Dropping or discharging of things
- 101.095 Weather and day limitations
- 101.097 Autonomous aircraft—launch or release without approval prohibited
- 101.098 Identification of certain RPA—requirements prescribed by the Part 101 Manual of Standards
- 101.099 Foreign registered RPA and model aircraft—requirements prescribed by the Part 101 Manual of Standards
- 101.099AA Foreign registered RPA—unmanned aircraft levy
- 101.099A Modifications of certain RPA—requirements prescribed by the Part 101 Manual of Standards

101.099B Test flights of certain RPA—circumstances and requirements prescribed by the Part 101 Manual of Standards

Subpart 101.D—Tethered balloons and kites

- 101.100 Applicability of this Subpart
- 101.105 Definitions for Subpart
- 101.110 Tethered balloons and kites that may be operated outside approved areas
- 101.115 Mooring-line marking
- 101.120 Operation of tethered balloon or kite under cloud
- 101.125 Tethered balloon to be lit at night
- 101.130 Rapid deflation device required
- 101.135 What to do if tethered balloon escapes

Subpart 101.E—Unmanned free balloons

- 101.140 Applicability of this Subpart
- 101.145 Kinds of unmanned free balloons
- 101.150 Definition for Subpart—*approved area*
- 101.155 Releasing small balloons
- 101.160 Light balloons that may be released outside approved areas
- 101.165 Release of medium and heavy balloons outside approved areas
- 101.170 Medium and heavy balloons not to be flown low
- 101.175 Medium and heavy balloons to be flown in clear sky
- 101.180 How payload must be supported—medium and heavy balloons
- 101.185 Equipment that must be carried—medium and heavy balloons
- 101.190 Lighting—medium and heavy balloons
- 101.195 Marking—unmanned free balloons generally
- 101.200 Marking by day—heavy balloons
- 101.205 Lighting by night—heavy balloons
- 101.210 Obligation to stay in communication with ATC—medium and heavy balloons
- 101.215 Tracking of flight—medium and heavy balloons
- 101.220 Flight reporting—medium and heavy balloons
- 101.225 Ending flight and recovery—medium and heavy balloons
- 101.230 Direction by ATC to end flight in certain circumstances

Subpart 101.F—Remotely piloted aircraft

Division 101.F.1—General

- 101.235 Application of Subpart 101.F
- 101.236 Meaning of *approved area*
- 101.237 Meaning of *excluded RPA*
- 101.238 Meaning of standard RPA operating conditions

Division 101.F.2—Operation of RPA generally

- 101.245 Operation near people
 - 101.250 Where very small, small and medium RPA may be operated
 - 101.252 Certain RPA—requirement for remote pilot licence
 - 101.255 Large RPA—requirement for certificate
 - 101.260 Maintenance of large RPA
 - 101.265 Large RPA—persons permitted to carry out maintenance
 - 101.270 Certain RPA—requirement for RPA operator's certificate
-

-
- 101.272 Certain RPA—requirement to keep records or give information to CASA
 - 101.275 Approval of operation of large RPA
 - 101.280 RPA not to be operated over populous areas
 - 101.285 Use of aeronautical radio

Division 101.F.3—Remote pilot licences

- 101.290 Application for remote pilot licence
- 101.295 Eligibility for remote pilot licence
- 101.300 Conditions on remote pilot licences
- 101.315 Notice to holder of remote pilot licence to show cause
- 101.320 Variation, suspension or cancellation of remote pilot licence

Division 101.F.4—Certification of RPA operators

- 101.330 Application for certification as RPA operator
- 101.335 Eligibility for certification as RPA operator
- 101.340 Conditions on certification
- 101.342 Functions and duties of chief remote pilot
- 101.360 Notice to certified RPA operator to show cause
- 101.365 Variation, suspension or cancellation of RPA operator’s certification
- 101.370 Compliance with RPA operator’s practices and procedures

Division 101.F.5—Operation of certain RPA for hire or reward

- 101.371 Application of Division 101.F.5
- 101.372 Notice of certain operations
- 101.373 Notification of changes in relation to operating very small RPA for hire or reward etc.
- 101.374 Database of notifications

Subpart 101.FA—Excluded RPA and micro RPA accreditation**Division 101.FA.1—General**

- 101.374A Application of this Subpart

Division 101.FA.2—Accreditation requirements

- 101.374B Excluded RPA and micro RPA—requirement for accreditation or remote pilot licence
- 101.374C Excluded RPA and micro RPA—requirement to produce accreditation or remote pilot licence

Division 101.FA.3—Grant of accreditation to operate excluded RPA and micro RPA

- 101.374D Accreditation—application
- 101.374E Accreditation—grant
- 101.374F Accreditation—conduct of online courses and examinations
- 101.374G Accreditation—cessation
- 101.374H Notice to accreditation holder to show cause
- 101.374J Suspension or cancellation of accreditation

Subpart 101.G—Model aircraft

- 101.375 Applicability of this Subpart
 - 101.380 Definitions for Subpart
 - 101.385 Visibility for operation of model aircraft
-

- 101.390 Operating model aircraft at night
- 101.395 Keeping model aircraft away from people
- 101.400 Operation of model aircraft outside approved areas
- 101.405 Giant model aircraft
- 101.410 Model flying displays

Subpart 101.H—Rockets

- 101.415 Applicability of this Subpart
- 101.420 Application of State and Territory laws about rockets
- 101.425 Definitions for Subpart
- 101.430 Launching rocket in or over prohibited or restricted area
- 101.435 Launching rockets into controlled airspace
- 101.440 Launching rockets near aerodromes
- 101.445 Getting permission for launch of rocket near aerodrome
- 101.450 Rockets other than model rockets must be launched in approved area
- 101.455 Maximum operating height of rockets
- 101.460 Dropping or discharging of things from rockets
- 101.465 Weather and day limitations—rockets other than model rockets
- 101.470 Model rockets

Subpart 101.I—Firework displays

- 101.475 What this Subpart does
- 101.480 Application of State and Territory laws about fireworks
- 101.485 Meaning of *operate a firework display*
- 101.490 Certain projectiles prohibited in firework displays
- 101.495 Firework displays not permitted near aerodromes
- 101.500 Notice to CASA of certain firework displays

Subpart 101.A—Preliminary

101.005 Applicability of this Part

- (1) This Part sets out the requirements for the operation of unmanned aircraft (including model aircraft), and (to the extent that the operation of rockets and fireworks affects or may affect the safety of air navigation) the operation of rockets and the use of certain fireworks.
- (2) Nothing in this Part applies to the operation of a manned balloon or a hot air balloon.
- (3) Subparts 101.C to 101.I do not apply to the operation of:
 - (a) a control-line model aircraft (that is, a model aircraft that is constrained to fly in a circle, and is controlled in attitude and altitude, by means of inextensible wires attached to a handle held by the person operating the model); or
 - (b) a model aircraft indoors; or
 - (c) an unmanned airship indoors; or
 - (d) a small balloon within 100 metres of a structure and not above the top of the structure; or
 - (e) an unmanned tethered balloon that remains below 400 feet AGL; or
 - (f) a firework rocket not capable of rising more than 400 feet AGL.

Note: Subpart 101.B applies to the operation of all unmanned aircraft (including model aircraft) and rockets, including firework rockets.

- (4) For paragraph (3)(c), a flight does not take place indoors if the building in which it takes place has the roof, or 1 or more walls, removed.

101.010 Application to rocket-powered unmanned aircraft

This Part applies to a rocket-powered unmanned aircraft, and to the operation of such an aircraft, unless the contrary intention appears.

101.020 Exemption from certain provisions of CAR

Parts 4, 4A, 4B, 4C, 5, 9, 10 and 14 of CAR do not apply to an aircraft to which this Part applies, nor to a micro RPA.

101.021 Meaning of *RPA*

An *RPA* is a remotely piloted aircraft, other than the following:

- (a) a balloon;
- (b) a kite;
- (c) a model aircraft.

Regulation 101.022

101.022 Types of RPA

The defined terms listed in the following table have the meaning indicated in the table.

Types of RPA		
Item	The term ...	means ...
1	<i>micro RPA</i>	an RPA with a gross weight of not more than 250 g.
2	<i>very small RPA</i>	an RPA with a gross weight of more than 250 g, but not more than 2 kg.
3	<i>small RPA</i>	an RPA with a gross weight of more than 2 kg, but not more than 25 kg.
4	<i>medium RPA</i>	(a) an RPA with a gross weight of more than 25 kg, but not more than 150 kg; or (b) a remotely piloted airship with an envelope capacity of not more than 100 m ³ .
5	<i>large RPA</i>	(a) a remotely piloted aeroplane with a gross weight of more than 150 kg; or (b) a remotely piloted powered parachute with a gross weight of more than 150 kg; or (c) a remotely piloted rotorcraft with a gross weight of more than 150 kg; or (d) a remotely piloted powered-lift aircraft with a gross weight of more than 150 kg; or (e) a remotely piloted airship with an envelope capacity of more than 100 m ³ .

Note: For the meaning of *excluded RPA*, see regulation 101.237.

101.023 Meaning of *model aircraft*

- (1) A *model aircraft* is an aircraft (other than a balloon or a kite) that does not carry a person:
- (a) if the aircraft:
 - (i) is being operated for the purpose of sport or recreation; and
 - (ii) has a gross weight of not more than 150 kg; or
 - (b) if the aircraft has a gross weight of not more than 7 kg, and is being operated in connection with the educational, training or research purposes of:
 - (i) a school in relation to which there is an approved authority under the *Australian Education Act 2013*; or
 - (ii) a higher education provider within the meaning of the *Higher Education Support Act 2003*.

Regulation 101.024

- (2) However, paragraph (1)(b) does not apply in relation to education, training or research conducted by or on behalf of an entity other than a school or higher education provider mentioned in subparagraph (1)(b)(i) or (ii).

Note: A model aircraft is not an RPA (see the definition of **RPA** in regulation 101.021).

101.024 Types of model aircraft

The defined term listed in the following table has the meaning indicated in the table.

Types of model aircraft		
Item	The term ...	means ...
1	<i>giant model aircraft</i>	a model aircraft that has a take-off weight (excluding fuel) of more than 25 kilograms.

101.025 Meaning of *populous area*

For this Part, an area is a ***populous area*** in relation to the operation of an unmanned aircraft if the area has a sufficient density of population for some aspect of the operation, or some event that might happen during the operation (in particular, a fault in, or failure of, the aircraft) to pose an unreasonable risk to the life, safety or property of somebody who is in the area but is not connected with the operation.

101.028 Issue of Manual of Standards for Part 101

For subsection 98(5A) of the Act, CASA may issue a Manual of Standards for this Part prescribing matters:

- (a) required or permitted by these Regulations to be prescribed by the Part 101 Manual of Standards; or
- (b) necessary or convenient to be prescribed for carrying out or giving effect to this Part.

101.029 Approvals for Part 101

- (1) If a provision in this Part refers to a person holding an approval under this regulation, the person may apply to CASA for the approval.
- (2) Subject to regulation 11.055, CASA must grant the approval if:
 - (a) for an approval relating to a training course:
 - (i) the course covers the units of competency (if any) prescribed by the Part 101 Manual of Standards for the course; and
 - (ii) the course meets the standards (if any) prescribed by the Part 101 Manual of Standards for the course; or

Regulation 101.030

- (b) for an approval relating to any other thing for which requirements are prescribed by the Part 101 Manual of Standards—the prescribed requirements are met.

101.030 Approval of areas for operation of unmanned aircraft or rockets

- (1) A person may apply to CASA for the approval of an area as an area for the operation of:
 - (a) unmanned aircraft generally, or a particular class of unmanned aircraft; or
 - (b) rockets.
- (2) For paragraph (1)(a), the classes of unmanned aircraft are the following:
 - (a) tethered balloons and kites;
 - (b) unmanned free balloons;
 - (c) RPA;
 - (d) model aircraft.
- (3) In considering whether to approve an area for any of those purposes, CASA must take into account the likely effect on the safety of air navigation of the operation of unmanned aircraft in, or the launching of rockets in or over, the area.
- (4) An approval has effect from the time written notice of it is given to the applicant, or a later day or day and time stated in the approval.
- (5) An approval may be expressed to have effect for a particular period (including a period of less than 1 day), or indefinitely.
- (6) CASA may impose conditions on the approval in the interests of the safety of air navigation.
- (7) If CASA approves an area under subregulation (1), it must publish details of the approval (including any condition) in NOTAM or on an aeronautical chart.
- (8) CASA may revoke the approval of an area, or change the conditions that apply to such an approval, in the interests of the safety of air navigation, but must publish details of any revocation or change in NOTAM or on an aeronautical chart.
- (9) CASA must also give written notice of the revocation or change:
 - (a) to the person who applied for the approval of the area; or
 - (b) if that person applied for that approval as an officer of an organisation concerned with unmanned aircraft or rockets, and no longer holds that office—to the person who now holds the office.
- (10) In the case of an approval of an area as an area for the operation of model aircraft:
 - (a) subregulation (7) does not apply; and
 - (b) subregulation (8) does not require the publication of any details of a revocation or change in NOTAM or on an aeronautical chart.

101.035 Requirements in this Part to give information to CASA

- (1) If a provision of this Part requires a person to give information to CASA about the operation, launching or release of an unmanned aircraft or rocket, then, unless the provision says otherwise, the person may do so by giving the information to:
 - (a) if the person is an approved aviation administration organisation—the Australian NOTAM Office; or
 - (b) an appropriate approved aviation administration organisation.
- (2) However, subregulation (1) does not apply in relation to the release of small balloons, or in relation to a firework display.
- (3) The information need not be given in writing unless:
 - (a) CASA or the authority to which it is given asks for it to be given in writing in the particular case; or
 - (b) another provision of these Regulations requires it to be given in writing.
- (4) If a person gives the information to an authority mentioned in paragraph (1)(a) or (b), then, subject to subregulation (6), the person is taken, for all purposes, to have complied with the requirement to give the information.
- (5) If in a particular case CASA or the authority to which the information is given reasonably requires extra information about the operation, launching or release, CASA or the authority may ask the person for the extra information.
- (6) If CASA or an authority asks for more information under subregulation (5), the person is not taken to have complied with the requirement mentioned in subregulation (1) to give the information until the person gives to CASA or the authority the extra information.
- (7) If a day is not a working day for the office of CASA or an authority to which notice of an event is given or an application made, that day does not count for the purpose of working out how many working days' notice of the event has been given, or how many working days before an event the application has been made.
- (8) In subregulation (7):

working day, in relation to an office of CASA or an authority, means a day on which that office is open for business.

Subpart 101.AB—Authorisations for sections 20AA and 20AB of the Act

101.046 Flying without a certificate of airworthiness

For the purposes of paragraph 20AA(3)(b) of the Act, a flight of an RPA (other than a large RPA) is authorised without a certificate of airworthiness.

Note: For requirements in relation to large RPA, see regulation 101.255.

101.047 Performance of duties during flight time—balloons, kites and model aircraft

- (1) This regulation applies to an Australian aircraft that is an unmanned aircraft if it is:
 - (a) a balloon; or
 - (b) a kite; or
 - (c) a model aircraft.
- (2) For the purposes of paragraph 20AB(1)(b) of the Act, a person performing a duty that is essential to the operation of the aircraft during flight time is authorised to do so without a civil aviation authorisation mentioned in paragraph 20AB(1)(a) of the Act.

101.048 Performance of duties during flight time—remotely piloted aircraft

- (1) For the purposes of paragraph 20AB(1)(b) of the Act, a person performing a duty that is essential to the operation of an RPA during flight time is authorised to do so without a civil aviation authorisation mentioned in paragraph 20AB(1)(a) of the Act.

Operating excluded RPA and micro RPA

- (2) Subregulation (1) applies to a person operating an RPA only if:
 - (a) the RPA is an excluded RPA or a micro RPA; and
 - (b) the operation is of a kind mentioned in subregulation 101.374B(4) (which covers supervised operation by a person under the age of 16).

Note: These Regulations allow a person to operate an RPA other than an excluded RPA or micro RPA only if the person holds a remote pilot licence. A person is allowed to operate an excluded RPA or micro RPA if the person is accredited or holds a remote pilot licence, or in the circumstance mentioned in paragraph (2)(b) of this regulation. See regulation 101.252 and subregulations 101.374B(1) and (4).

Subpart 101.B—General prohibition on unsafe operation

101.050 Applicability of this Subpart

This Subpart applies to the operation of all unmanned aircraft and rockets that are not aircraft, whether or not any of Subparts C to I applies.

101.055 Hazardous operation prohibited

- (1) A person must not operate an unmanned aircraft in a way that creates a hazard to another aircraft, another person, or property.

Penalty: 50 penalty units.

- (2) A person must not launch a rocket that is not an aircraft in a way that creates a hazard to an aircraft.

Penalty: 50 penalty units.

- (3) A person must not launch a rocket that:

- (a) is not an aircraft; and
- (b) is not a high power rocket within the meaning of the *Space (Launches and Returns) Act 2018*; and
- (c) is not a space object or part of a space object within the meaning of that Act;

in a way that creates a hazard to another person or to property.

Penalty: 50 penalty units.

Note: Hazards from high power rockets and space objects are regulated under the *Space (Launches and Returns) Act 2018*.

- (3A) An offence against subregulation (1), (2) or (3) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (4) It is not a defence to a charge of contravening subregulation (1), (2) or (3) that the relevant unmanned aircraft was being operated, or the relevant rocket was launched, in a way that complied with the operations manual of an approved aviation administration organisation.

- (5) In subregulations (2) and (3):

rocket includes a firework rocket.

Subpart 101.C—Provisions applicable to unmanned aircraft generally

101.060 Applicability of this Subpart

This Subpart applies to the operation of unmanned aircraft of all kinds, except operation mentioned in subregulation 101.005(3).

Note: Rockets that are not aircraft are dealt with separately in Subpart 101.H.

101.065 Operation in prohibited or restricted area

- (1) A person may operate an unmanned aircraft in or over a prohibited area, or in or over a restricted area, only with the permission of, and in accordance with any conditions imposed by, the authority controlling the area.

Penalty: 25 penalty units.

Note: Details of prohibited and restricted areas are published in the AIP or NOTAMS.

- (1A) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (2) In subregulation (1):

authority controlling the area means:

- (a) in the case of a prohibited area—the Secretary of the Department administered by the Minister administering section 1 of the *Defence Act 1903*; and
- (b) in the case of a restricted area—the authority mentioned in AIP (as issued from time to time) as the controlling authority for the area.

- (3) For subregulation (1):

- (a) the authority controlling the area must give a written statement of any condition so imposed to the person who applied for the permission; and
- (b) unless the authority gives the statement to the person, the person is not bound by the condition.

101.066 Operation in prescribed area—requirements prescribed by the Part 101 Manual of Standards

- (1) The Part 101 Manual of Standards may prescribe requirements relating to the operation of unmanned aircraft in an area prescribed by the Part 101 Manual of Standards.
- (2) A person commits an offence of strict liability if:
- (a) the person operates an unmanned aircraft in an area prescribed under subregulation (1); and

- (b) the person is subject to a requirement under subregulation (1) in relation to the operation; and
- (c) the person does not comply with the requirement.

Penalty: 50 penalty units.

101.070 Operation in controlled airspace above 400 ft AGL

- (1) A person may operate an unmanned aircraft above 400 feet AGL in controlled airspace only:
 - (a) in an area approved under regulation 101.030 as an area for the operation of unmanned aircraft of the same kind as the aircraft, and in accordance with any conditions of the approval; and
 - (b) in accordance with an air traffic control clearance.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.072 Operation in controlled airspace—requirements prescribed by the Part 101 Manual of Standards

- (1) The Part 101 Manual of Standards may prescribe requirements relating to the operation of unmanned aircraft in controlled airspace.
- (2) A person commits an offence of strict liability if:
 - (a) the person operates an unmanned aircraft in controlled airspace; and
 - (b) the person is subject to a requirement under subregulation (1) in relation to the operation; and
 - (c) the person does not comply with the requirement.

Penalty: 50 penalty units.

101.073 Operation must generally be within visual line of sight

Unmanned aircraft must be operated within visual line of sight

- (1) A person commits an offence of strict liability if:
 - (a) the person operates an unmanned aircraft; and
 - (b) the aircraft is not operated within the person's visual line of sight.

Penalty: 50 penalty units.

Exception—CASA approval

- (2) Subregulation (1) does not apply if:
 - (a) the person holds an approval under regulation 101.029 to operate the unmanned aircraft beyond the person's visual line of sight; and

Regulation 101.075

(b) the conditions (if any) imposed on the approval are complied with.

Note: A defendant bears an evidential burden in relation to the matter in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

Meaning of operated within visual line of sight

- (3) An unmanned aircraft is being ***operated within the visual line of sight*** of the person operating the aircraft if the person can continually see, orient and navigate the aircraft to meet the person's separation and collision avoidance responsibilities, with or without corrective lenses, but without the use of binoculars, a telescope or other similar device.

101.075 Operation near aerodromes

- (1) A person may operate an unmanned aircraft at an altitude above 400 feet AGL within 3 nautical miles of an aerodrome only if:
- (a) the operation is permitted by another provision of this Part; or
 - (b) permission has been given for the operation under regulation 101.080.

Penalty: 25 penalty units.

- (2) A person may operate an unmanned aircraft over an area mentioned in paragraph (3)(a) or (b) only if:
- (a) the operation is permitted by another provision of this Part; or
 - (b) permission has been given for the operation under regulation 101.080.

Penalty: 25 penalty units.

- (3) The areas for subregulation (2) are:
- (a) a movement area or runway of an aerodrome; and
 - (b) the approach or departure path of a runway of an aerodrome.
- (4) A person must not operate an unmanned aircraft in such a manner as to create an obstruction to an aircraft taking off from, or approaching for landing at, a landing area or a runway of an aerodrome.

Penalty: 25 penalty units.

- (5) An offence against subregulation (1), (2) or (4) is an offence of strict liability.

Note: For ***strict liability***, see section 6.1 of the *Criminal Code*.

101.080 Permission for operation of unmanned aircraft near aerodrome

- (1) The authority from which permission must be obtained for the purposes of regulation 101.075 is:
- (a) if the aerodrome concerned is a controlled aerodrome—the air traffic control service for the aerodrome; or
 - (b) in the case of any other aerodrome—CASA.

Regulation 101.080

- (2) A person applies for permission under this regulation by giving to the relevant authority mentioned in subregulation (1) the information required by table 101.080, so far as relevant to the proposed operation.

Table 101.080 Details of operation of unmanned aircraft to be given to CASA or ATC

Item	Information to be provided
1	In all cases: (a) the name, address, email address and telephone number of the person who will operate the aircraft or (if the aircraft concerned is an unmanned free balloon) release the balloon (or, if several people will be involved, the name, address, email address and telephone number of the person who will coordinate the operation); and (b) the date and time the operation or release is to begin and how long it is to last; and (c) where it is to be carried out; and (d) if more than 1 unmanned aircraft is to be operated at a time, how many unmanned aircraft are to be operated at that time
2	In the case of the operation of a tethered balloon or a kite: (a) a brief description of the balloon or kite, including its predominant colour; and (b) the height to which it is to be operated; and (c) its mass
3	In the case of the release of an unmanned free balloon: (a) how many balloons are to be released; and (b) the estimated size and mass of the balloon's payload
4	In the case of the release of a medium or heavy balloon: (a) the balloon's flight identification or its project code name; and (b) the balloon's classification, or a description of the balloon; and (c) the balloon's SSR code or NDB frequency, and its Morse identification; and (d) the expected horizontal direction of the balloon's ascent, and the balloon's expected rate of climb; and (e) the balloon's float level (given as pressure altitude); and (f) when the balloon is expected to reach 60 000 feet pressure altitude, and the location over which it is expected to do so; and (g) when the flight is expected to end, and where the balloon and its payload are expected to fall

Note: For **free balloon** and **heavy balloon**, see regulation 101.145. For **tethered balloon**, see regulation 101.105.

- (3) If more than 1 aircraft is to be operated at a time, such a requirement is a requirement to give the information about each such aircraft.
- (4) Regulation 101.035 does not authorise a person who or that applies for permission under this regulation to make the application to a body mentioned in paragraph 101.035(1)(a) or (b).
- (5) If the authority grants the permission, it may impose conditions on the permission in the interests of the safety of air navigation.

Regulation 101.085

- (6) A person must not contravene a condition imposed under subregulation (5).

Penalty: 50 penalty units.

- (7) An offence against subregulation (6) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.085 Maximum operating height

- (1) A person may operate an unmanned aircraft above 400 feet AGL only:
- (a) in an area approved under regulation 101.030 as an area for the operation of unmanned aircraft of the same class as the aircraft concerned, and in accordance with any conditions of the approval; or
 - (b) as otherwise permitted by this Part.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.090 Dropping or discharging of things

- (1) A person must not cause a thing to be dropped or discharged from an unmanned aircraft in a way that creates a hazard to another aircraft, a person, or property.

Penalty: 25 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.095 Weather and day limitations

- (1) A person may operate an unmanned aircraft:
- (a) in or into cloud; or
 - (b) at night; or
 - (c) in conditions other than VMC;
- only if permitted by another provision of this Part, or in accordance with an air traffic control direction.

Penalty: 25 penalty units.

- (1A) Subregulation (1) does not apply if the person holds an approval under regulation 101.029 for the purposes of this subregulation.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (1A): see subsection 13.3(3) of the *Criminal Code*.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.097 Autonomous aircraft—launch or release without approval prohibited

- (1) This regulation:
 - (a) applies to an unmanned aircraft (an *autonomous aircraft*) that does not allow pilot intervention during all stages of the flight of the aircraft; but
 - (b) does not apply to balloons, kites or model aircraft.
- (2) A person commits an offence of strict liability if the person causes an autonomous aircraft to be launched or released.

Penalty: 50 penalty units.

- (3) Subregulation (2) does not apply if:
 - (a) the person holds an approval under regulation 101.029 to launch or release the autonomous aircraft; and
 - (b) the conditions (if any) imposed on the approval are complied with.

Note: A defendant bears an evidential burden in relation to the matter in subregulation (3): see subsection 13.3(3) of the *Criminal Code*.

101.098 Identification of certain RPA—requirements prescribed by the Part 101 Manual of Standards

- (1) The Part 101 Manual of Standards may prescribe requirements relating to the identification of RPA required to be registered under Division 47.C.2.
- (2) A person commits an offence of strict liability if:
 - (a) the person operates, or conducts an operation using, an RPA required to be registered under Division 47.C.2; and
 - (b) the person is subject to a requirement prescribed for the purposes of subregulation (1) in relation to that operation or conduct; and
 - (c) the person does not comply with the requirement.

Penalty: 50 penalty units.

101.099 Foreign registered RPA and model aircraft—requirements prescribed by the Part 101 Manual of Standards

- (1) The Part 101 Manual of Standards may prescribe requirements relating to the operation of, or the conduct of operations using, RPA or model aircraft registered under a law of a foreign country.
- (2) A person commits an offence of strict liability if:
 - (a) the person operates, or conducts an operation using, an RPA, or a model aircraft, within Australian territory; and
 - (b) the person is subject to a requirement prescribed under subregulation (1) in relation to that operation or conduct; and
 - (c) the person does not comply with the requirement.

Penalty: 50 penalty units.

Regulation 101.099AA

101.099AA Foreign registered RPA—unmanned aircraft levy

Payment of unmanned aircraft levy

- (1) An application under Chapter 13 of the *Part 101 (Unmanned Aircraft and Rockets) Manual of Standards 2019* for permission to operate, or to conduct operations using, an RPA registered under a law of a foreign country must be accompanied by the unmanned aircraft levy (if any) for the application.

Waiver or refund of unmanned aircraft levy

- (2) CASA may, on behalf of the Commonwealth, waive the payment of unmanned aircraft levy under subregulation (1), or refund levy that has been paid under that subregulation, if CASA is satisfied that there are exceptional circumstances justifying the waiver or refund.
- (3) The waiver or refund:
 - (a) may be of the whole or part of the levy; and
 - (b) may be made by CASA on its own initiative, or on written application in the approved form by the applicant for the registration.

101.099A Modifications of certain RPA—requirements prescribed by the Part 101 Manual of Standards

- (1) The Part 101 Manual of Standards may prescribe requirements relating to the modification of an RPA registered under Division 47.C.2, including the extent to which modifications may be made to such an aircraft before the aircraft is considered to be no longer the aircraft to which the aircraft's registration applies.
- (2) A person commits an offence of strict liability if:
 - (a) the RPA is registered under Division 47.C.2; and
 - (b) the aircraft is modified after it is registered under that Division; and
 - (c) the person operates the modified aircraft, or conducts an operation using the modified aircraft; and
 - (d) the person is subject to a requirement prescribed for the purposes of subregulation (1) in relation to that operation or conduct; and
 - (e) the person does not comply with the requirement.

Penalty: 50 penalty units.

101.099B Test flights of certain RPA—circumstances and requirements prescribed by the Part 101 Manual of Standards

Circumstances in which aircraft may be operated for test flights while not registered for the flights

- (1) The Part 101 Manual of Standards may prescribe the circumstances in which an RPA that is not required to be registered under Division 47.C.1, and is not

Regulation 101.099B

registered under Division 47.C.2, may be operated for the purposes of a test flight.

- (2) For the purposes of subregulation (1), circumstances in which an aircraft may be operated for the purposes of a test flight may be prescribed only if the circumstances are relevant to the development, manufacture, repair or maintenance of the aircraft or of equipment associated with the aircraft.

Requirements for aircraft operated for test flights while not registered for the flights

- (3) The Part 101 Manual of Standards may prescribe requirements relating to the operation of an aircraft mentioned in subregulation (1) for the purposes of a test flight.
- (4) A person commits an offence of strict liability if:
- (a) the person operates, or conducts an operation using, an RPA for the purposes of a test flight; and
 - (b) the person is subject to a requirement prescribed for the purposes of subregulation (3) in relation to that operation or conduct; and
 - (c) the person does not comply with the requirement.

Penalty: 50 penalty units.

Subpart 101.D—Tethered balloons and kites

101.100 Applicability of this Subpart

This Subpart applies to the operation of tethered balloons and kites.

- Note: This Subpart does not apply to:
- (a) the shielded operation (that is, operation within 100 metres of a structure and not above the top of the structure) of a small balloon; or
 - (b) the operation of an unmanned tethered balloon or kite below 400 feet AGL.
- See subregulation 101.005(3).

101.105 Definitions for Subpart

- (1) In this Subpart:

tethered balloon means an unmanned balloon that is attached to the ground, or an object on the ground, by a cable.

- (2) For this Subpart, the height of a tethered balloon is taken to be the height above ground or water level of the topmost part of its envelope.

101.110 Tethered balloons and kites that may be operated outside approved areas

- (1) A person may operate a tethered balloon or a kite above 400 feet AGL outside an area approved under regulation 101.030 as an area for the operation of unmanned balloons or kites (as the case requires) only if:
- (a) the mass of the balloon or kite is no more than 15 kilograms; and
 - (b) the horizontal visibility at the time is at least 5 kilometres; and
 - (c) the person gives to CASA the information required by table 101.110 about the proposed operation at least 1 working day before it is due to start.

Penalty: 10 penalty units.

- Note 1: A person can comply with this requirement by telling:
- (a) if the person is an approved aviation administration organisation—the Australian NOTAM Office; or
 - (b) the appropriate approved aviation administration organisation.
- See regulation 101.035.

Note 2: CASA must publish details of the approval of an area (including any conditions) in NOTAM or on an aeronautical chart—see subregulation 101.030(5).

- (1A) An offence against subregulation (1) is an offence of strict liability.

Note: For **strict liability**, see section 6.1 of the *Criminal Code*.

- (2) If more than 1 tethered balloon or kite is to be operated at a time, such a requirement is a requirement to give the information about each such balloon or kite.

Table 101.110 Details of operation of tethered balloon or kite to be given to CASA

Item	Information to be provided
1	The name, address, email address and telephone number of the person who will operate the balloon or kite (or, if several people will be involved, the name, address, email address and telephone number of the person who will coordinate the operation)
2	The date and time the operation is to begin, and how long it is to last
3	Where it is to be carried out
4	A brief description of the balloon or kite, including its predominant colour
5	The height to which it is to be operated
6	Its mass
7	If more than 1 tethered balloon or kite is to be operated at a time, how many tethered balloons or kites are to be operated at the time

101.115 Mooring-line marking

- (1) A person may operate a tethered balloon only if:
 - (a) each mooring line has coloured streamers attached at intervals of no more than 15 metres along it, with the first streamer no more than 150 feet AGL; and
 - (b) the streamers would be visible in normal daylight for at least 1.5 kilometres.

Penalty: 10 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.120 Operation of tethered balloon or kite under cloud

- (1) A person may operate a tethered balloon or kite under cloud only if he or she keeps the balloon or kite at least 500 feet (measured vertically) below the cloud.

Penalty: 10 penalty units.

Note: For *tethered balloon*, see regulation 101.105.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.125 Tethered balloon to be lit at night

- (1) A person may operate a tethered balloon at night at or above 400 feet AGL only if it is lit so as to be visible in VMC from at least 4 kilometres away.

Penalty: 10 penalty units.

- (1A) An offence against subregulation (1) is an offence of strict liability.

Regulation 101.130

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (2) The lighting required by subregulation (1) may be inside the balloon, on its outside, or on the ground.

101.130 Rapid deflation device required

- (1) A person may operate a tethered balloon only if it is fitted with a device that will cause it to deflate rapidly and completely if it escapes from its mooring.

Penalty: 10 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.135 What to do if tethered balloon escapes

- (1) If a tethered balloon escapes from its mooring, and the deflation device does not cause it to deflate, the person operating it must tell Airservices Australia as soon as possible:
 - (a) where the balloon was launched; and
 - (b) what time it broke free; and
 - (c) the direction it was headed when last seen.

Penalty: 10 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

Subpart 101.E—Unmanned free balloons

101.140 Applicability of this Subpart

This Subpart applies to the operation of an unmanned free balloon.

101.145 Kinds of unmanned free balloons

- (1) There are 4 kinds of unmanned free balloon. These are defined (in order of ascending size) in the following 4 subregulations.
- (2) A **small balloon** is an unmanned free balloon that:
 - (a) has a diameter of 2 metres or less at launch; and
 - (b) either:
 - (i) is not carrying a payload; or
 - (ii) is carrying a payload with a combined mass of 50 g or less.
- (3) A **light balloon** is an unmanned free balloon that:
 - (a) carries a payload to which all of the following apply:
 - (i) the payload does not include a heavy package;
 - (ii) the payload has a combined mass of more than 50 g but less than 4 kg;
 - (iii) if a rope or other device has been used for the suspension of the payload—an impact force of less than 230 N is required to separate the suspended payload from the balloon; or
 - (b) has a diameter of greater than 2 metres at launch and either:
 - (i) is not carrying a payload; or
 - (ii) is carrying a payload with a combined mass of 50 g or less.
- (4) A **medium balloon** is an unmanned free balloon that carries a payload to which all of the following apply:
 - (a) the payload includes at least 2 packages but no heavy packages;
 - (b) the payload has a combined mass of at least 4 kg but less than 6 kg;
 - (c) if a rope or other device has been used for the suspension of the payload—an impact force of less than 230 N is required to separate the suspended payload from the balloon.
- (5) A **heavy balloon** is an unmanned free balloon that carries a payload to which any of the following apply:
 - (a) the payload includes a heavy package;
 - (b) the combined mass of the payload is at least 6 kg;
 - (c) if a rope or other device has been used for the suspension of the payload—an impact force of 230 N or more is required to separate the suspended payload from the balloon.
- (6) A **heavy package** means a package that:

Regulation 101.150

- (a) weighs at least 3 kg; or
 - (b) weighs at least 2 kg and has an area density of more than 13 g per cm².
- (7) For paragraph (6)(b), the area density of a package is worked out by dividing the total mass in grams of the package by the area in square centimetres of its smallest surface.

101.150 Definition for Subpart—*approved area*

In this Subpart:

approved area means an area approved under regulation 101.030 as an area for the operation or release of unmanned free balloons.

Note: CASA must publish details of the approval of an area (including any conditions) in NOTAM or on an aeronautical chart—see subregulation 101.030(7).

101.155 Releasing small balloons

- (1) A person may release a small balloon only if the person has first complied with any requirements as to approval or notice set out in table 101.155-1.

Penalty: 10 penalty units.

- (1A) An offence against subregulation (1) is an offence of strict liability.

Note: For ***strict liability***, see section 6.1 of the *Criminal Code*.

- (2) Subregulation (1) does not apply if no more than 100 balloons are to be released at once.

Table 101.155-1 Requirements for release of small balloons

Item	Number of balloons to be released at once	Distance from place of release to nearest aerodrome			
		less than 3 nautical miles	3–6 nautical miles	6–12 nautical miles	over 12 nautical miles
1	101–1 000	approval required	NOTAM	no approval required	no approval required
2	1 001–10 000	approval required	approval required	NOTAM	no approval required
3	Over 10 000	approval required	approval required	approval required	NOTAM

- (3) In the table, for a combination of a number of balloons to be released and a distance to an aerodrome:

approval required means that an approval under subregulation (5) is required for the release of that number of balloons at a place within that distance from the nearest aerodrome.

Regulation 101.160

no approval required means that no such approval is required for the release of that number of balloons at a place within that distance from the nearest aerodrome.

NOTAM means that CASA's approval is not required, but the person intending to release that number of balloons at a place that distance from the nearest aerodrome must give to CASA the information about the proposed release required by table 101.155-2.

Table 101.155-2 Details of release of small balloons to be given to CASA

Item	Information to be provided
1	The name, address, email address and telephone number of the person who will release the balloons (or, if several people will be involved, the name, address, email address and telephone number of the person who will coordinate the release)
2	The date and time the release is to begin, and how long it will take
3	Where it is to be carried out
4	How many balloons are to be released
5	The estimated size and mass of any payload

Note: CASA will tell the NOTAM Office about the release.

- (4) A person may apply to CASA, in writing, for approval to release small balloons.

Note: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.

- (5) Subject to regulation 11.055, if approval is required under subregulation (1) to release small balloons, CASA must grant the approval.

Note 1: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to issue, or cancelling, suspending or varying, an approval; or
- (b) a decision imposing a condition on an approval.

Note 2: CASA will tell the NOTAM Office about the release.

101.160 Light balloons that may be released outside approved areas

- (1) A person may release a light balloon outside an approved area only if the person gives to CASA the information required by table 101.160 at least 1 working day before the proposed release.

Penalty: 10 penalty units.

Note 1: A person can comply with this requirement by telling:

- (a) if the person is an approved aviation administration organisation—the Australian NOTAM Office; or
- (b) the appropriate approved aviation administration organisation.

See regulation 101.035.

Note 2: CASA must publish details of the approval of an area (including any conditions) in NOTAM or on an aeronautical chart—see subregulation 101.030(5).

Regulation 101.165

(1A) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

(2) If more than 1 balloon is to be released at a time, such a requirement is a requirement to give the information about each such balloon.

Table 101.160 Details of release of light balloon to be given to CASA

Item	Information to be provided
1	The name, address, email address and telephone number of the person who will release the balloon (or, if several people will be involved, the name, address, email address and telephone number of the person who will coordinate the release)
2	The date and time the release is to begin
3	Where it is to be carried out
4	The estimated size and mass of the balloon's payload
5	If more than 1 balloon is to be released at a time, how many balloons are to be released at the time

(3) Subregulation (1) does not require the Bureau of Meteorology to give notice of the proposed release of a light balloon if:

- (a) the release is part of the Bureau's normal meteorological procedures; and
- (b) the release location has been notified in AIP or NOTAM.

101.165 Release of medium and heavy balloons outside approved areas

(1) Subject to subregulation (3), a person may release a medium or heavy balloon outside an approved area only if the person gives to CASA the information required by table 101.165 at least 2 working days before the proposed release.

Penalty: 10 penalty units.

Note 1: A person can comply with this requirement by telling:

- (a) if the person is an approved aviation administration organisation—the Australian NOTAM Office; or
- (b) the appropriate approved aviation administration organisation.

See regulation 101.035.

Note 2: CASA must publish details of the approval of an area (including any conditions) in NOTAM or on an aeronautical chart—see subregulation 101.030(5).

(2) If more than 1 balloon is to be operated at a time, such a requirement is a requirement to give the information about each such balloon.

Table 101.165 Details of release of medium or heavy balloon to be given to CASA

Item	Information to be provided
1	The name, address, email address and telephone number of the person who will release the balloon (or, if several people will be involved, the name, address, email address and telephone number of the person who will coordinate the release)
2	The date and time the release is to begin

Regulation 101.170

Table 101.165 Details of release of medium or heavy balloon to be given to CASA

Item	Information to be provided
3	Where it is to be carried out
4	The estimated size and mass of the balloon's payload
5	The balloon's flight identification or the project code name
6	The balloon's classification, or a description of the balloon
7	The balloon's SSR code or NDB frequency, and its Morse identification
8	The expected horizontal direction of the balloon's ascent, and the balloon's expected rate of climb
9	The balloon's planned float level (given as pressure altitude)
10	The time the balloon is expected to reach 60 000 feet pressure altitude, and the location over which it is expected to do so
11	The time the flight is expected to end, and where the balloon and its payload are expected to fall
12	If more than 1 balloon is to be released at a time, how many balloons are to be released at the time

- (3) Subregulation (1) does not require the Bureau of Meteorology to give notice of the proposed release of a medium balloon if:
- (a) the release is part of the Bureau's normal meteorological procedures; and
 - (b) the release location has been notified in AIP or NOTAM.
- (4) Subject to subregulation (5), the person must also confirm the details of the proposed release to the air traffic control service that has responsibility for the airspace within which the balloon will be released no later than the earlier of:
- (a) 6 hours before the expected release time; or
 - (b) the time the balloon begins to be inflated.

Penalty: 10 penalty units.

- (4A) An offence against subregulation (1) or (4) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (5) Subregulation (4) does not require the Bureau of Meteorology to confirm the details of the release of a medium balloon with an air traffic control service if:
- (a) the release is part of the Bureau's normal meteorological procedures; and
 - (b) the release location has been notified in AIP or NOTAM.

101.170 Medium and heavy balloons not to be flown low

- (1) A person who is operating a medium or heavy balloon must not allow it to go below 3 000 feet AGL while it is over a populous area.

Penalty: 10 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

Regulation 101.175

101.175 Medium and heavy balloons to be flown in clear sky

- (1) Subject to subregulations (3) and (4), a person must not operate a medium or heavy balloon below 60 000 feet pressure altitude if, at the altitude at which the balloon is being operated, the horizontal visibility is less than 8 kilometres.

Penalty: 10 penalty units.

- (2) Subject to subregulations (3) and (4), a person who is operating a medium or heavy balloon must not allow it to remain at an altitude below 60 000 feet pressure altitude at which cloud, fog or mist obscures more than half the sky.

Penalty: 10 penalty units.

- (2A) An offence against subregulation (1) or (2) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (3) Subregulations (1) and (2) do not apply to operation outside controlled airspace if CASA approves the operation and the operation is carried out in accordance with the approval.

- (4) Those subregulations also do not apply to operation in controlled airspace in accordance with an air traffic control clearance.

101.180 How payload must be supported—medium and heavy balloons

- (1) A person may operate a medium or heavy balloon only if the means by which the payload is attached to the balloon can support at least 10 times the mass of the payload.

Penalty: 10 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.185 Equipment that must be carried—medium and heavy balloons

- (1) A person may operate a medium or heavy balloon only if:
- (a) the balloon is fitted with at least 2 independent ways (either automatic or remotely-operated) of releasing its payload; and
 - (b) if the balloon is not a zero-pressure balloon, it has at least 2 independent ways of ending the flight of the balloon envelope; and
 - (c) either:
 - (i) the balloon envelope carries a radar reflector, or radar-reflective material, that will return an echo to a surface radar operating in the frequency range 200 megahertz to 2 700 megahertz; or
 - (ii) the balloon is fitted with a device to allow it to be continuously tracked by the operator beyond the range of ground-based radar; and
 - (d) if the balloon is operated in an area in which ground-based secondary surveillance radar is in use, it is fitted with an SSR transponder (with

Regulation 101.190

altitude-reporting capability) that either operates continuously or can be turned on by the operator if an air traffic control service so requires.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.190 Lighting—medium and heavy balloons

- (1) A person may operate a medium or heavy balloon below 60 000 feet pressure altitude at night only if both the balloon and its payload are lit (whether or not they become separated during the operation) so as to be visible, under the prevailing conditions, for at least 4 kilometres in all directions.

Penalty: 25 penalty units.

- (2) For subregulation (1), a balloon is being operated at night if the sun is below the balloon's horizon.

- (3) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.195 Marking—unmanned free balloons generally

- (1) A person may operate an unmanned free balloon that carries a trailing antenna that requires a force of more than 230 newtons to break it only if the antenna has coloured streamers or pennants attached to it every 15 metres.

Penalty: 25 penalty units.

- (2) A person may operate an unmanned free balloon that carries a payload only if the payload has fixed to it a durable identification plate carrying sufficient information:

- (a) to identify the payload; and
- (b) to enable somebody who finds the payload to contact the person who released the balloon.

Penalty: 10 penalty units.

- (3) Subregulation (2) does not apply to a light or medium balloon operated by the Bureau of Meteorology.

- (4) An offence against subregulation (1) or (2) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.200 Marking by day—heavy balloons

- (1) A person may operate a heavy balloon (being a heavy balloon that has its payload suspended more than 15 metres below the envelope) above 60 000 feet pressure altitude by day only if:

Regulation 101.205

- (a) the payload's suspension is coloured in alternate bands of conspicuous colours, or has coloured pennants attached to it; or
- (b) the balloon has a conspicuous payload-recovery parachute suspended under the envelope, or the balloon is suspended beneath a conspicuous open parachute.

Penalty: 25 penalty units.

- (2) For subregulation (1), a balloon is being operated by day if the sun is above the balloon's horizon.
- (3) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.205 Lighting by night—heavy balloons

- (1) A person may operate a heavy balloon above 60 000 feet pressure altitude at night only if it is lit so as to be visible in VMC from at least 4 kilometres away.

Penalty: 25 penalty units.

- (2) For subregulation (1), a balloon is being operated at night if the sun is below the balloon's horizon.
- (3) The lighting required by subregulation (1) may be inside the balloon, on its outside, or on the ground.
- (4) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.210 Obligation to stay in communication with ATC—medium and heavy balloons

- (1) The operator of a medium or heavy balloon must establish and maintain communication with the relevant air traffic control service from the time the balloon begins to be inflated until the flight ends.

Penalty: 25 penalty units.

- (2) The operator must tell the relevant air traffic control service at least 1 hour before the balloon is launched.

Penalty: 50 penalty units.

- (3) An offence against subregulation (1) or (2) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.215 Tracking of flight—medium and heavy balloons

- (1) The operator of a medium or heavy balloon must track its flight continuously.

Regulation 101.220

Penalty: 10 penalty units.

- (2) While the balloon is below 60 000 feet pressure altitude, if it cannot be tracked visually from the ground or by radar, the operator must ensure that a tracking aircraft accompanies it continuously.

Penalty: 10 penalty units.

- (3) An offence against subregulation (1) or (2) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.220 Flight reporting—medium and heavy balloons

- (1) The operator of a medium or heavy balloon must report the progress of the balloon's flight to the relevant air traffic control service as follows:
- (a) the operator must tell the service immediately when the balloon is released;
 - (b) the operator must tell the service when the balloon leaves each 10 000-foot level up to 60 000 feet (pressure altitude);
 - (c) the operator must report the balloon's position to the relevant air traffic control service periodically, as follows:
 - (i) when required to do so by the service;
 - (ii) while the balloon is below 60 000 feet pressure altitude—every 10 minutes;
 - (iii) while the balloon is at or above 60 000 feet pressure altitude—every 2 hours;
 - (d) if the operator loses the balloon's position, the operator must tell the service immediately that tracking has been lost and the balloon's last known position;
 - (e) after having re-established tracking of the balloon, the operator must tell the service immediately that tracking has been re-established and the balloon's position at that time.

Penalty: 10 penalty units.

- (2) If the balloon is being accompanied by a tracking aircraft, the operator must ensure that the crew of the aircraft maintains continuous 2-way communication with the relevant air traffic control service.

Penalty: 10 penalty units.

- (2A) An offence against subregulation (1) or (2) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (3) A reference in this regulation to the relevant air traffic control service is to be read, at a particular time, as a reference to the air traffic control service that is responsible for the airspace in which the balloon is located at the time.

Regulation 101.225

101.225 Ending flight and recovery—medium and heavy balloons

- (1) The operator of a medium or heavy balloon must give to the relevant air traffic control service at least 1 hour's notice of the time the flight is planned to end, and when doing so must also give to the air traffic control service the following information:
 - (a) the balloon's current position and altitude;
 - (b) the estimated time at which, and the estimated location over which, the balloon will pass through 60 000 feet pressure altitude during its descent;
 - (c) the estimated time when, and place where, the payload will fall.

Penalty: 10 penalty units.

- (2) The operator may command the balloon to end its flight only:
 - (a) in an emergency; or
 - (b) if cleared to do so by the relevant air traffic control service.

Penalty: 50 penalty units.

- (3) If the operator commands the balloon to end its flight when not cleared by air traffic control to do so, the operator must tell the relevant air traffic control service immediately, and when doing so must also give to it the following information:
 - (a) the balloon's current position and altitude;
 - (b) the estimated time when and place where the payload will fall.

Penalty: 10 penalty units.

- (4) The operator must tell the relevant air traffic control service as soon as possible after the balloon's payload falls.

Penalty: 10 penalty units.

- (4A) An offence against subregulation (1), (2), (3) or (4) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (5) A reference in this regulation to the relevant air traffic control service is to be read, at a particular time, as a reference to the air traffic control service that is responsible for the airspace in which the balloon is located at the time.

101.230 Direction by ATC to end flight in certain circumstances

- (1) If a balloon is in controlled airspace and an air traffic control service considers that it poses a hazard to other aircraft, or to people or property on the ground, that service may direct the balloon's operator to end the balloon's flight immediately.
- (2) The operator must comply with the direction by ending the balloon's flight by the fastest possible method.

Regulation 101.230

Penalty: 50 penalty units.

(3) An offence against subregulation (2) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

Subpart 101.F—Remotely piloted aircraft

Division 101.F.1—General

101.235 Application of Subpart 101.F

This Subpart applies to the operation of the following:

- (a) very small RPA;
- (b) small RPA;
- (c) medium RPA;
- (d) large RPA.

Note 1: This Subpart does not apply to model aircraft, as they are not RPA—see the definitions of *RPA* in regulation 101.021 and *model aircraft* in regulation 101.023.

Note 2: This Subpart also does not apply to micro RPA—see the definition of *micro RPA* in regulation 101.022.

101.236 Meaning of *approved area*

In this Subpart:

approved area means an area approved under regulation 101.030 as an area for the operation of RPA.

Note: CASA must publish details of the approval of an area (including any conditions) in NOTAMS or on an aeronautical chart: see subregulation 101.030(7).

101.237 Meaning of *excluded RPA*

- (1) This regulation sets out what is an *excluded RPA*.

Note: A remote pilot licence is not required to operate an excluded RPA. An accreditation is sufficient—see regulation 101.252 and Subpart 101.FA.

- (3) A very small RPA is an *excluded RPA* if it is being operated in standard RPA operating conditions.
- (4) A small RPA is an *excluded RPA* if it is being operated:
- (a) by or on behalf of the owner of the RPA; and
 - (b) over land owned or occupied by the owner of the RPA; and
 - (c) in standard RPA operating conditions; and
 - (d) for the purposes of one or more of the following:
 - (i) aerial spotting;
 - (ii) aerial photography;
 - (iii) agricultural operations;
 - (iv) aerial communications retransmission;
 - (v) the carriage of cargo;
 - (vi) any other activity that is similar to an activity mentioned in the subparagraphs above; and

for which no remuneration is received by the operator or the owner of the RPA, the owner or occupier of the land or any person on whose behalf the activity is being conducted.

- (6) A small RPA is an **excluded RPA** if it is being operated in standard RPA operating conditions by:
- (a) a person for the sole purpose of meeting the experience requirement mentioned in paragraph 101.295(2)(c) for the grant of a remote pilot licence; or
 - (b) the holder of a remote pilot licence for the sole purpose of getting practical experience and gaining competency in the operation of an RPA of a category that is specified in the licence.

Note: For paragraph (b), for example, if a remote pilot licence states that the holder is authorised to operate a small RPA with a gross weight of not more than 7 kg that is an aeroplane, a small RPA with a gross weight of 10 kg that is an aeroplane may be an excluded RPA when operated by that holder. However, a small RPA (of any weight) that is a helicopter cannot be an excluded RPA when operated by that holder, because an aeroplane is not of the same category of RPA as a helicopter (see the definition of **category** in Part 1 of the Dictionary).

- (7) A medium RPA is an **excluded RPA** if it is being operated:
- (a) by or on behalf of the owner of the RPA; and
 - (b) by a person who holds a remote pilot licence that authorises the person to operate the RPA; and
 - (c) over land owned or occupied by the owner of the RPA; and
 - (d) in standard RPA operating conditions; and
 - (e) for the purposes of one or more of the following:
 - (i) aerial spotting;
 - (ii) aerial photography;
 - (iii) agricultural operations;
 - (iv) aerial communications retransmission;
 - (v) the carriage of cargo;
 - (vi) any other activity that is similar to an activity mentioned in the subparagraphs above; andfor which no remuneration is received by the operator or owner of the RPA, the owner or occupier of the land or any person on whose behalf the activity is being conducted.
- (8) An RPA is an **excluded RPA** if it is being operated:
- (a) by a person solely for the purpose of the person receiving training from an RPA operator who holds a certificate under Division 101.F.4 that authorises the operator to conduct operations using the RPA; and
 - (b) in accordance with the operator's documented training procedures.

101.238 Meaning of standard RPA operating conditions

An RPA is operated in **standard RPA operating conditions** if, at all times during the operation:

Regulation 101.238

- (aa) the RPA is operated in Australian territory; and
- (a) the RPA is operated within the visual line of sight of the person operating the RPA; and
- (b) the RPA is operated at or below 400 ft AGL by day; and
- (c) the RPA is not operated within 30 m of a person who is not directly associated with the operation of the RPA; and
- (d) the RPA is not operated:
 - (i) in a prohibited area; or
 - (ii) in a restricted area that is classified as RA3; or
 - (iii) in a restricted area that is classified as RA2 or RA1 otherwise than in accordance with regulation 101.065; or
 - (iv) over a populous area; or
 - (v) within 3 nautical miles of the movement area of a controlled aerodrome; and
- (e) the RPA is not operated over an area where a fire, police or other public safety or emergency operation is being conducted without the approval of a person in charge of the operation; and
- (f) the person operating the RPA operates only that RPA.

Division 101.F.2—Operation of RPA generally

101.245 Operation near people

- (1) Subject to subregulations (2) and (3), a person must not operate an RPA within 30 metres of a person (the *second person*) who is not directly associated with the operation of the RPA.

Penalty: 10 penalty units.

- (1A) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (2) Subregulation (1) does not apply if the second person is standing behind the RPA while the RPA is taking off.

- (3) Subregulation (1) does not apply if:

- (a) the RPA is a very small RPA, small RPA or medium RPA; and
- (b) the second person has consented to the RPA operating within 30 m of him or her; and
- (c) the RPA is operated no closer than 15 m of him or her.

- (4) Subregulation (1) does not apply if:

- (a) the RPA is an airship; and
- (b) the airship approaches no closer to the second person than 10 m horizontally and 30 ft vertically.

- (5) Subregulation (1) does not apply if the person holds an approval under regulation 101.029 for the purposes of this subregulation.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2) to (5): see subsection 13.3(3) of the *Criminal Code*.

101.250 Where very small, small and medium RPA may be operated

- (1) A person may operate a very small RPA, a small RPA or a medium RPA outside an approved area only if:

- (a) where the RPA is operated above 400 feet AGL, the operator has CASA's approval to do so; and
- (b) the RPA stays clear of populous areas.

Penalty: 10 penalty units.

Note 2: CASA must publish details of the approval of an area (including any conditions) in NOTAM or on an aeronautical chart—see subregulation 101.030(5).

Note 3: This Subpart only applies to the operation of certain RPA: see regulation 101.235.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

Regulation 101.252

101.252 Certain RPA—requirement for remote pilot licence

- (1) This regulation does not apply in relation to the operation of an excluded RPA.
- (2) A person commits an offence of strict liability if:
 - (a) the person operates an RPA; and
 - (b) the person does not hold a remote pilot licence that authorises the person to operate the RPA.

Penalty: 50 penalty units.

- (3) A person (the *offender*) commits an offence of strict liability if:
 - (a) the offender operates an RPA; and
 - (b) one of the following persons demands the offender to produce, for inspection by the person, a remote pilot licence that authorises the offender to operate the RPA:
 - (i) an authorised person;
 - (ii) a member or special member of the Australian Federal Police;
 - (iii) a member of a police force or a police service of a State or Territory;
 - (c) the offender fails to comply with the demand.

Penalty: 5 penalty units.

- (4) Subregulation 302(1) of CAR does not apply in relation to a remote pilot licence.

101.255 Large RPA—requirement for certificate

- (1) A person may operate a large RPA only if either a special certificate of airworthiness (restricted category), or an experimental certificate, has been issued for it under Subpart 21.H of Part 21.

Penalty: 50 penalty units.

Note 1: For *large RPA*, see regulation 101.022.

Note 2: A large RPA is required to carry a manufacturer's data plate and an aircraft registration identification plate—see respectively regulation 21.820 and Subpart 45.D of Part 45.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.260 Maintenance of large RPA

- (1) Subdivision 2 of Division 2 of Part 4A of CAR applies to large RPA.

Note: That is, a large RPA must be maintained as a Class B aircraft.

- (2) A person who carries out maintenance on a large RPA must comply with any directions given in writing by CASA in relation to the maintenance of the RPA, or the maintenance of RPA of a class that includes the RPA.

101.265 Large RPA—persons permitted to carry out maintenance

- (3) For subsection 20AB(2) of the Act, and despite anything in regulation 42ZC of CAR 1988, a person may carry out maintenance on:
- (a) a large RPA that is an Australian aircraft; or
 - (b) an aircraft component for such an RPA; or
 - (c) aircraft material for such an RPA;
- if the person:
- (d) holds an airworthiness authority that authorises the maintenance; or
 - (e) carries out the maintenance under the supervision of a person who holds such an authority.

101.270 Certain RPA—requirement for RPA operator’s certificate

- (1) This regulation does not apply in relation to the operation of an excluded RPA.
- (2) A person commits an offence of strict liability if:
- (a) the person conducts operations using RPA; and
 - (b) the person does not hold a certificate as an RPA operator under Division 101.F.4 that authorises the person to conduct the operations.

Penalty: 50 penalty units.

101.272 Certain RPA—requirement to keep records or give information to CASA

- (1) The Part 101 Manual of Standards may require a person who operates, or proposes to operate, RPA to do either or both of the following:
- (a) keep records, in accordance with the requirements prescribed by the Part 101 Manual of Standards;
 - (b) give information to CASA, in accordance with the requirements prescribed by the Part 101 Manual of Standards.
- (2) A person commits an offence of strict liability if:
- (a) the person is subject to a requirement under subregulation (1); and
 - (b) the person does not comply with the requirement.

Penalty: 50 penalty units.

101.275 Approval of operation of large RPA

- (1) A person may operate a large RPA only with CASA’s approval.

Penalty: 50 penalty units.

- (1A) A person may apply to CASA, in writing, for approval to operate a large RPA.

Note 1: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.

Regulation 101.280

Note 2: Part 11 deals with applications and decision making.

- (1B) Subject to regulation 11.055, CASA must grant the approval if:
- (a) the person is certified as an operator of large RPA; and
 - (b) the operation would not contravene any condition of the certification.

Note 1: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to issue, or cancelling, suspending or varying, an approval; or
- (b) a decision imposing a condition on an approval.

Note 2: For certification as an operator of RPA, see Division 101.F.4.

- (3) Without limiting regulations 11.056 and 11.067, CASA may impose conditions on an approval:
- (a) prohibiting the operation of the relevant RPA at night or in conditions other than VMC; or
 - (b) restricting the extent to which the RPA may be operated at night or in conditions other than VMC; or
 - (c) requiring the RPA to stay within a specified area, or
 - (d) requiring the operator to make specified broadcasts.
- (6) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.280 RPA not to be operated over populous areas

- (1) In this regulation:

certificated RPA means an RPA for which a certificate of airworthiness has been issued.

- (2) A person must not operate an RPA that is not a certificated RPA over a populous area at a height less than the height from which, if any of its components fails, it would be able to clear the area.

Penalty: 50 penalty units.

Note 1: For **populous area**, see regulation 101.025. For **RPA**, see regulation 101.022.

Note 2: For the kinds of RPA operation to which this Subpart applies, see regulation 101.235.

- (3) Without the approval of CASA, a person must not operate a certificated RPA over a populous area at a height less than the height from which, if any of its components fails, it would be able to clear the area.

Penalty: 50 penalty units.

- (3A) An offence against subregulation (2) or (3) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (4) In considering whether to give an approval under subregulation (3), CASA must take into account:

- (a) the degree of redundancy in the RPA's critical systems; and
 - (b) any fail-safe design characteristics of the RPA; and
 - (c) the security of its communications and navigation systems.
- (5) Before giving an approval under subregulation (3), CASA must be satisfied that the person who intends to operate the RPA will take proper precautions to prevent the proposed flight being dangerous to people and property.

101.285 Use of aeronautical radio

- (1) A person may operate an RPA (other than a very small RPA) in controlled airspace only if he or she:
- (a) holds a relevant qualification; and
 - (b) maintains a listening watch on a specified frequency or frequencies; and
 - (c) makes broadcasts on a specified frequency or frequencies at the specified interval giving the specified information.

Penalty: 25 penalty units.

Note: This Subpart only applies to the operation of certain RPA: see regulation 101.235.

- (2) In this regulation:

relevant qualification means any of the following qualifications:

- (a) an aeronautical radio operator certificate;
- (b) a flight crew licence;
- (c) an ATC licence;
- (d) a military qualification equivalent to a licence mentioned in paragraph (b) or (c);
- (e) a flight service licence.

specified frequency for particular airspace means a frequency specified from time to time in AIP or by ATC as a frequency for use in the airspace.

specified information for particular airspace means information specified from time to time in AIP or by ATC as information that must be broadcast in the airspace.

specified interval for particular airspace means the interval specified from time to time in AIP or by ATC as the interval at which broadcasts must be made while in that airspace.

- (3) CASA may direct that a particular person must not operate an RPA unless the person:
- (a) holds a relevant qualification; and
 - (b) maintains a listening watch on a frequency or frequencies specified in the direction; and
 - (c) makes broadcasts:
 - (i) on a frequency or frequencies; and
 - (ii) at intervals; and

Regulation 101.285

(iii) giving information—
specified in the direction.

(4) The person must comply with the direction.

Penalty: 50 penalty units.

(5) CASA may direct, in regard to a particular RPA or type of RPA, that a person must not operate the RPA, or an RPA of that type, unless he or she:

(a) holds a relevant qualification; and

(b) maintains a listening watch on a frequency or frequencies specified in the direction; and

(c) makes broadcasts:

(i) on a frequency or frequencies; and

(ii) at intervals; and

(iii) giving information—
specified in the direction.

(6) The person must comply with the direction.

Penalty: 50 penalty units.

(7) For subregulations (3) and (5), CASA may specify that a frequency is to be a frequency prescribed by the Part 91 Manual of Standards for the purposes of subregulation 91.255(1) or paragraph 91.630(1)(b).

(8) An offence against subregulation (1), (4) or (6) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

Division 101.F.3—Remote pilot licences

Note: In addition to the provisions of this Division, Part 11 contains provisions relating to an application for a remote pilot licence.

101.290 Application for remote pilot licence

- (1A) An individual may apply to CASA, in writing, for a licence (a *remote pilot licence*) to operate an RPA.

Note: For the kinds of RPA to which this Subpart applies, see regulation 101.235.

- (1) An application for a remote pilot licence must include the following information:
- (a) details of any flight crew licence, ATC licence or flight service licence that the applicant holds (including details of ratings, endorsements and qualifications);
 - (aa) details of any military qualification the applicant holds that is equivalent to a licence mentioned in paragraph (a);
 - (b) details of any aeronautical experience that the applicant has;
 - (c) details of any of the following examinations the applicant has passed (other than any examination passed in the course of gaining a licence mentioned in paragraph (a)):
 - (i) an aeronautical examination (within the meaning of Part 61);
 - (ii) an aviation licence theory examination before 1 September 2014 that is taken to be an equivalent requirement for the grant of a flight crew licence under regulation 202.274;
 - (d) if the applicant does not hold a licence mentioned in paragraph (a), details of any aeronautical radio operator certificate that the applicant holds;
 - (e) details of the applicant's experience in operating RPA;
 - (f) evidence of the completion of any training course in RPA operation that the applicant has undertaken.

101.295 Eligibility for remote pilot licence

- (2) Subject to regulation 11.055, CASA must grant a remote pilot licence to the applicant if he or she:
- (a) has passed:
 - (i) an aeronautical knowledge examination (within the meaning of Part 61) for a flight crew licence under Part 61; or
 - (ii) an aviation licence theory examination before 1 September 2014 that is taken to be an equivalent requirement for the grant of a flight crew licence under regulation 202.274; or
 - (iii) the theory component of an RPL training course; or
 - (iv) the theory component of a course conducted in a foreign country which CASA is satisfied is equivalent to the theory component of an RPL training course; and
 - (b) has completed:

Regulation 101.300

- (i) an RPL training course in the manual or automated operation of a category of RPA that he or she proposes to operate; or
 - (ii) before 1 June 2017, a training course in the operation of a category of RPA that he or she proposes to operate, conducted by the RPA's manufacturer or an agent of the manufacturer; or
 - (iii) a flight test conducted by CASA for the purposes of this subparagraph; and
- (c) has at least 5 hours experience in operating an RPA under standard RPA operating conditions.

Note: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to grant, or cancelling, suspending or varying, a licence; or
- (b) a decision imposing a condition on a licence.

See also section 31 of the Act.

- (3) A person who holds or has held:
- (a) a flight crew licence; or
 - (b) a military qualification equivalent to a flight crew licence; or
 - (c) an ATC licence, or a military qualification equivalent to an ATC licence;
- is taken to satisfy the condition in paragraph (2)(a).

101.300 Conditions on remote pilot licences

- (2) Without limiting regulations 11.056 and 11.067, a condition may:
- (a) allow the person to operate RPA of only specified kinds; or
 - (b) limit the areas where he or she may operate RPA; or
 - (c) allow him or her to operate RPA only in VMC.
- (3) It is a condition of a remote pilot licence that the licence holder must not operate an RPA above 400 ft AGL in controlled airspace, or within 3 nautical miles of the movement area of a controlled aerodrome, unless he or she holds at least one of the following qualifications:
- (a) an aeronautical radio operator certificate;
 - (b) a flight crew licence;
 - (c) an ATC licence;
 - (d) a military qualification equivalent to a licence mentioned in paragraph (b) or (c);
 - (e) a flight service licence.
- (4) It is a condition of a remote pilot licence that an RPA must be operated within the visual line of sight of the licence holder unless he or she:
- (a) has passed:
 - (i) an aeronautical knowledge examination (within the meaning of Part 61) for the grant of an instrument rating under Part 61; or
 - (ii) an aviation licence theory examination before 1 September 2014 that is taken to be an equivalent requirement for the grant of an instrument rating under regulation 202.274; or

- (iii) an approved examination; and
- (b) either:
 - (i) holds both a certificate as an RPA operator under Division 101.F.4 and an approval under regulation 101.029 to operate the RPA beyond the person's visual line of sight; or
 - (ii) is a member of an RPA operator's personnel and the RPA operator holds both a certificate as an RPA operator under Division 101.F.4 and an approval under regulation 101.029 for the operator's personnel to operate RPA beyond their visual line of sight.
- (5) It is a condition of a remote pilot licence that the licence holder must not operate more than 1 RPA at a time unless:
 - (a) he or she holds an approval under regulation 101.029 to operate more than 1 RPA at a time; and
 - (b) the conditions (if any) imposed on the approval are complied with.
- (6) The holder of a remote pilot licence commits an offence of strict liability if the holder contravenes a condition mentioned in subregulation (3), (4) or (5).

Penalty: 50 penalty units.

101.315 Notice to holder of remote pilot licence to show cause

Show cause notice—variation, cancellation or suspension

- (1) CASA may give a show cause notice to the holder of a remote pilot licence if there are reasonable grounds for believing that there are facts or circumstances that would justify the variation, suspension or cancellation of the licence under regulation 101.320.
- (2) A show cause notice must:
 - (a) tell the holder of the licence of the facts and circumstances that, in CASA's opinion, would justify the variation, suspension or cancellation of the licence under regulation 101.320; and
 - (b) invite the holder of the licence to show in writing, within a reasonable time stated in the notice, why the licence should not be varied, suspended or cancelled.

Immediate suspension if serious risk to the safety of air navigation

- (3) The remote pilot licence is suspended from the time the show cause notice is given to the holder, if:
 - (a) CASA reasonably considers that there may be a serious risk to the safety of air navigation if the licence were not suspended; and
 - (b) the show cause notice states that the licence is suspended for that reason.
- (5) CASA may at any time revoke the suspension.
- (6) If the licence is suspended under subregulation (3):

Regulation 101.320

- (a) the holder is taken not to be the holder of a remote pilot licence during the period of suspension; and
- (b) the licence is not in force while suspended; and
- (c) if CASA has not dealt with the suspension under regulation 101.320 within 90 days after the day the licence is suspended, the suspension lapses at the end of that period (if it is not earlier revoked under subregulation (5) of this regulation or subregulation 101.320(2)).

Note: Regulation 201.004 provides for review of certain decisions by the Administrative Appeals Tribunal.

101.320 Variation, suspension or cancellation of remote pilot licence

- (1) CASA may vary, suspend or cancel a remote pilot licence by written notice to the holder of the licence, if:
 - (a) CASA has given to the holder a show cause notice under regulation 101.315 in relation to it; and
 - (b) CASA has taken into account any representations made, within the period stated in the notice, by or on behalf of the holder; and
 - (c) there are reasonable grounds for believing that the holder:
 - (i) has operated an RPA in contravention of these Regulations, an instrument under these Regulations or a condition of the licence; or
 - (ii) has operated an RPA negligently or carelessly; or
 - (iii) in operating an RPA, has recklessly endangered human life or property; or
 - (iv) at the time of the grant of the licence did not meet, or now no longer meets, the criteria for eligibility under regulation 11.055 as they applied at the time of the grant.

Note: For subparagraph (iv), in determining whether the criteria for eligibility were or are met, CASA may take into account the matters mentioned in subregulation 11.055(4).

Notice of decision

- (2) If CASA has given a show cause notice under regulation 101.315 to the holder of a remote pilot licence:
 - (a) in the event that CASA decides to vary, suspend or cancel the licence—CASA must give the holder notice of the decision, including (in the case of a decision to suspend the licence) notice of the period of suspension; and
 - (b) in the event that CASA decides not to vary, suspend or cancel the licence—CASA must, in writing:
 - (i) give the holder notice accordingly; and
 - (ii) if the licence was suspended under subregulation 101.315(3)—revoke the suspension.

Effect of suspension

- (3) If a remote pilot licence is suspended under this regulation:

Regulation 101.320

- (a) the holder is taken not to be the holder of a remote pilot licence during the period of suspension; and
- (b) the licence is not in force during the period of suspension stated in the notice under paragraph (2)(a).

Note 1: CASA may also impose a condition on the licence, or vary an existing condition of the licence—see regulation 11.067.

Note 2: Regulation 201.004 provides for review of certain decisions by the Administrative Appeals Tribunal.

Division 101.F.4—Certification of RPA operators

Note: In addition to the provisions of this Division, Part 11 contains provisions relating to an application for certification as an RPA operator.

101.330 Application for certification as RPA operator

(1A) A person may apply to CASA, in writing, for certification as an RPA operator.

Note: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.

- (1) An application for certification as an RPA operator must include:
- (a) details of:
 - (i) the applicant's structure and organisation; and
 - (ii) its staff and their qualifications and experience (including, in particular, the names, qualifications, experience, duties and functions of the persons who are to be the applicant's chief remote pilot and maintenance controller); and
 - (iii) its facilities and equipment; and
 - (iv) its practices and procedures; and
 - (b) a general description of the proposed operations, including the type or types of RPA to be used; and
 - (c) if the applicant proposes to conduct an RPL training course—details of the proposed training.
- (2) The application must be accompanied by a copy of each of the applicant's manuals relevant to the operation of RPA.

101.335 Eligibility for certification as RPA operator

(1A) Subject to regulation 11.055, CASA must certify an applicant as an RPA operator if the applicant is eligible to be certified as an RPA operator in accordance with this regulation.

Note: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to grant, or cancelling, suspending or varying, a certificate; or
- (b) a decision imposing a condition on a certificate.

See also section 31 of the Act.

- (1) A person is eligible to be certified as an RPA operator if:
- (a) the person has an organisation and structure that is appropriate for safe operation of RPA; and
 - (b) the person has enough qualified and experienced personnel to undertake the proposed operations safely; and
 - (c) the person has facilities and equipment appropriate to carry out the proposed operations using RPA of the type to be used; and

- (d) the person has suitable documented practices and procedures to do so, including practices and procedures for the maintenance of the operator's RPASs; and
 - (f) the person has nominated suitable persons to be its chief remote pilot and maintenance controller.
- (2) A body that is not a legal person is not eligible to be certified as an RPA operator.
- (3) Two or more persons cannot be certified jointly as an RPA operator.

101.340 Conditions on certification

- (1) It is a condition of the certification of a person as an RPA operator that the person:
- (a) maintains within its organisation a position of chief remote pilot having at least the functions and duties set out in regulation 101.342; and
 - (b) employs as its chief remote pilot a person who holds a remote pilot licence under Division 101.F.3 and who is competent to carry out those duties and perform those functions; and
 - (c) either:
 - (i) maintains a position within its organisation of maintenance controller, with the functions and duties set out in an advisory circular issued by CASA from time to time; or
 - (ii) has an arrangement with another qualified and competent person to carry out those functions and duties; and
 - (d) if it maintains within its organisation a position of maintenance controller—employs as its maintenance controller a person who is competent to carry out the duties and perform the functions of a maintenance controller; and
 - (e) complies with the operator's documented practices and procedures.
- (4) Without limiting regulations 11.056 and 11.067, a condition may:
- (a) allow the person to operate RPA of only specified kinds; or
 - (b) allow the person to operate RPA only for specified purposes; or
 - (c) limit the areas where the person may operate RPA; or
 - (d) allow the person to operate RPA only in VMC; or
 - (e) limit the number of RPA that an RPA operator may operate.

101.342 Functions and duties of chief remote pilot

For paragraph 101.340(1)(a), the functions and duties of a chief remote pilot are as follows:

- (a) ensuring the operator's RPA operations are conducted in accordance with the civil aviation legislation;
- (b) maintaining a record of the qualifications held by each person operating RPA for the operator;

Regulation 101.360

- (c) monitoring the operational standards and proficiency of each person operating RPA for the operator;
- (d) maintaining a complete and up-to-date reference library of operational documents required by CASA under subregulation 101.335(1) for the types of operations conducted by the operator.

101.360 Notice to certified RPA operator to show cause

Show cause notice—variation, cancellation or suspension

- (1) CASA may give a show cause notice to a certified RPA operator if there are reasonable grounds for believing that there are facts or circumstances that would justify the variation, suspension or cancellation of the certification under regulation 101.365.
- (2) A show cause notice must:
 - (a) tell the operator of the facts and circumstances that, in CASA's opinion, would justify the variation, suspension or cancellation of the certification under regulation 101.365; and
 - (b) invite the operator to show in writing, within a reasonable time stated in the notice, why the certification should not be varied, suspended or cancelled.

Immediate suspension if serious risk to the safety of air navigation

- (3) The certification is suspended from the time the show cause notice is given to the operator, if:
 - (a) CASA reasonably considers that there may be a serious risk to the safety of air navigation if the certification were not suspended; and
 - (b) the show cause notice states that the certification is suspended for that reason.
- (5) CASA may at any time revoke the suspension.
- (6) If the certification of a person as an RPA operator is suspended under subregulation (3):
 - (a) the operator is taken not to be a certified RPA operator during the period of suspension; and
 - (b) the certification is not in force while suspended; and
 - (c) if CASA has not dealt with the suspension under regulation 101.365 within 90 days after the day the certification is suspended, the suspension lapses at the end of that period (if it is not earlier revoked under subregulation (5) of this regulation or subregulation 101.365(2)).

Note: Regulation 201.004 provides for review of certain decisions by the Administrative Appeals Tribunal.

101.365 Variation, suspension or cancellation of RPA operator's certification

- (1) CASA may vary, suspend or cancel a certified RPA operator's certification by written notice to the operator, if:
-

- (a) CASA has given to the operator a show cause notice under regulation 101.360 in relation to it; and
- (b) CASA has taken into account any representations made, within the period stated in the notice, by or on behalf of the operator; and
- (c) there are reasonable grounds for believing that:
 - (i) the operator has operated an RPA in contravention of these Regulations, an instrument under these Regulations or a condition of the certification; or
 - (ii) a person engaged or employed by the operator has operated an RPA negligently or carelessly; or
 - (iii) a person engaged or employed by the operator, in operating an RPA, has recklessly endangered human life or property; or
 - (iv) at the time the operator was certified the operator did not meet, or now no longer meets, the criteria for eligibility under regulation 11.055 as they applied at the time of certification.

Note: For subparagraph (iv), in determining whether the criteria for eligibility were or are met, CASA may take into account the matters mentioned in subregulation 11.055(4).

Notice of decision

- (2) If CASA has given a show cause notice under regulation 101.360 to a certified RPA operator:
 - (a) in the event that CASA decides to vary, suspend or cancel the certification—CASA must give the operator notice of the decision, including (in the case of a decision to suspend the certification) notice of the period of suspension; and
 - (b) in the event that CASA decides not to vary, suspend or cancel the certification—CASA must, in writing:
 - (i) give the operator notice accordingly; and
 - (ii) if the certification was suspended under subregulation 101.360(3)—revoke the suspension.

Effect of suspension

- (3) If the certification of a person as an RPA operator is suspended under this regulation:
 - (a) the operator is taken not to be a certified RPA operator during the period of suspension; and
 - (b) the certification is not in force during the period of suspension stated in the notice under paragraph (2)(a).

Note 1: CASA may also impose a condition on the certification, or vary an existing condition of the certification—see regulation 11.067.

Note 2: Regulation 201.004 provides for review of certain decisions by the Administrative Appeals Tribunal.

Regulation 101.370

101.370 Compliance with RPA operator's practices and procedures

A person commits an offence of strict liability if the person:

- (a) is a member of an RPA operator's personnel; and
- (b) is subject to a requirement under the RPA operator's documented practices and procedures; and
- (c) does not comply with the requirement.

Penalty: 50 penalty units.

Division 101.F.5—Operation of certain RPA for hire or reward

101.371 Application of Division 101.F.5

- (1) This Division applies in relation to the first operation of a very small RPA, a small RPA or a medium RPA while the RPA is an excluded RPA under any of the following provisions:
 - (a) subregulation 101.237(3) (a very small RPA being operated in standard RPA operating conditions);
 - (b) subregulation 101.237(4) (a small RPA being operated in certain circumstances);
 - (c) subregulation 101.237(7) (a medium RPA being operated in certain circumstances).
- (2) The *first operation* of an RPA while it is an excluded RPA under a provision mentioned in subregulation (1) is its first operation, while it is such an excluded RPA, in each period during which it is registered under Subpart 47.C.

101.372 Notice of certain operations

- (1) Before the first operation of an RPA to which this Division applies (whether by the registration holder for the RPA or another person), the registration holder must notify CASA of the operation, in writing, in a form and manner approved by CASA.
- (2) A registration holder for an RPA commits an offence of strict liability if:
 - (a) the registration holder is subject to the requirement under subregulation (1) in relation to the RPA; and
 - (b) the registration holder fails to comply with the requirement.

Penalty: 50 penalty units.

- (3) Subregulations (1) and (2) do not apply if the registration holder, or another person, is certified under Division 101.F.4 to conduct the operation.

Note: A defendant bears an evidential burden in relation to the matter in this subregulation—see subsection 13.3(3) of the *Criminal Code*.

101.373 Notification of changes in relation to operating very small RPA for hire or reward etc.

- (1) If:
 - (a) a person has given CASA a notice under regulation 101.372; and
 - (b) a change, event or other matter of a kind prescribed by the Part 101 Manual of Standards occurs;the person must notify CASA of the change, event or matter within 21 business days of the change, event or matter occurring.

Regulation 101.374

- (2) The notification must be given in the form, and in the manner or way, approved by CASA.
- (3) A person commits an offence of strict liability if:
 - (a) the person is subject to a requirement under subregulation (1); and
 - (b) the person does not comply with the requirement.

Penalty: 50 penalty units.

101.374 Database of notifications

- (1) CASA may establish and maintain a database of information that relates to notifications given under regulations 101.372 and 101.373.
- (2) Without limiting subregulation (1), the database may contain the following information in relation to each notification:
 - (a) the name of the person who gave the notification;
 - (b) the person's contact details;
 - (c) the locations at which the operations will take place;
 - (d) the types of RPA covered by the notification.
- (3) The database may be made publicly available.
- (4) The database may be kept and made publicly available in electronic form.

Subpart 101.FA—Excluded RPA and micro RPA accreditation

Division 101.FA.1—General

101.374A Application of this Subpart

This Subpart applies to the operation of excluded RPA and micro RPA.

Note 1: See the definition of *excluded RPA* in regulation 101.237.

Note 2: This Subpart does not apply to model aircraft, as they are not RPA—see the definitions of *RPA* in regulation 101.021 and *model aircraft* in regulation 101.023.

Division 101.FA.2—Accreditation requirements

101.374B Excluded RPA and micro RPA—requirement for accreditation or remote pilot licence

Excluded RPA and micro RPA

- (1) A person commits an offence of strict liability if:
 - (a) the person operates an excluded RPA or a micro RPA; and
 - (b) the person holds neither of the following:
 - (i) an accreditation authorising the person to operate excluded RPA and micro RPA;
 - (ii) a remote pilot licence.

Penalty: 50 penalty units.

General exception—excluded RPA operated by child under adult supervision

- (4) Subregulation (1) does not apply to a person under 16 years old (the *child*) operating an excluded RPA or a micro RPA if:
 - (a) when the aircraft is being operated, the child is being supervised by another person (the *supervisor*); and
 - (b) the supervisor is at least 18 years old; and
 - (c) the supervisor holds:
 - (i) an accreditation authorising the supervisor to operate excluded RPA and micro RPA; or
 - (ii) a remote pilot licence.

Note: A defendant bears an evidential burden in relation to the matters in this subregulation—see subsection 13.3(3) of the *Criminal Code*.

101.374C Excluded RPA and micro RPA—requirement to produce accreditation or remote pilot licence

General requirement

- (1) A person who operates an excluded RPA or micro RPA must produce an accreditation or licence covered by subregulation (2) that authorises the person to do so, or a copy of such an accreditation or licence, for inspection on a demand made by a person covered by subregulation (3).

Accreditations and licences covered

- (2) The following accreditations and licences are covered by this subregulation:
 - (a) an accreditation authorising the operation of excluded RPA and micro RPA;
 - (b) a remote pilot licence.

Persons who may demand production of accreditations and licences

- (3) The following persons are covered by this subregulation:
- (a) an authorised person;
 - (b) a member or special member of the Australian Federal Police;
 - (c) a member of a police force or a police service of a State or Territory.

Offence for failing to comply with demand

- (4) A person (the **offender**) commits an offence of strict liability if:
- (a) the offender operates an excluded RPA or micro RPA; and
 - (b) a person makes a demand of the offender under subregulation (1); and
 - (c) the offender fails to comply with the demand.

Penalty: 5 penalty units.

Operation permissible without an accreditation or licence

- (5) Subregulations (1) to (4) do not apply to a person operating an excluded RPA or micro RPA if:
- (a) such operation by the person without an accreditation or licence covered by subregulation (2) of this regulation does not constitute an offence under regulation 101.374B; or
 - (b) subregulation (4) applies in relation to such operation.

Supervised operations

- (6) A person who supervises the operation by another person of an excluded RPA or micro RPA must produce an accreditation or licence covered by subregulation (2) for that RPA, or a copy of such accreditation or licence, for inspection on a demand made by a person covered by subregulation (3).
- (7) A person (the **supervisor**) commits an offence of strict liability if:
- (a) the supervisor supervises the operation by another person of an excluded RPA or micro RPA; and
 - (b) the other person is under 16 years old; and
 - (c) a person makes a demand of the supervisor under subregulation (6); and
 - (d) the supervisor fails to comply with the demand.

Penalty: 5 penalty units.

Regulation 101.374D

Division 101.FA.3—Grant of accreditation to operate excluded RPA and micro RPA

Note: In addition to the provisions of this Division, Part 11 contains provisions relating to an application for accreditation under this Division.

101.374D Accreditation—application

An individual may apply to CASA, in writing, for accreditation authorising the holder to operate excluded RPA and micro RPA.

101.374E Accreditation—grant

- (1) Subject to regulation 11.055, CASA must give an applicant under regulation 101.374D the accreditation applied for if the applicant is eligible for that accreditation under this regulation.

Note: Regulation 201.004 provides for review of certain decisions by the Administrative Appeals Tribunal. See also section 31 of the Act.

- (2) The applicant is eligible for the accreditation mentioned in regulation 101.374D if the applicant:
 - (a) is at least 16 years old; and
 - (b) has completed an online training course provided by CASA for that accreditation, to the standard required by CASA, in accordance with any conditions for completing the course required by CASA; and
 - (c) has achieved a standard required by CASA in an examination (including an online examination) for that accreditation, administered by CASA, in accordance with any conditions for undertaking that examination required by CASA.
- (3) However, the applicant is not eligible for the accreditation:
 - (a) if an accreditation formerly held by the applicant has been cancelled within the 12 months before the date of the application; or
 - (b) while an accreditation currently held by the applicant is suspended under regulation 101.374H or 101.374J.

- (3A) An applicant may undertake a course or an examination mentioned in subsection (2) only if the applicant is at least 16 years old at that time.
- (4) Two or more persons cannot jointly hold the accreditation.
- (5) The accreditation authorises the holder to operate excluded RPA and micro RPA as stated in the accreditation.

Note: Any conditions imposed on the accreditation under regulation 11.056 must also be set out in, or attached to, the accreditation.

101.374F Accreditation—conduct of online courses and examinations

- (1) The Part 101 Manual of Standards may prescribe requirements in relation to the following:
 - (a) the completion of an online training course under paragraph 101.374E(2)(b) (including conditions relating to cheating in such a course);
 - (b) the conduct of an online examination under paragraph 101.374E(2)(c) (including conditions relating to cheating in such an examination);
 - (c) the disclosure and use of information or documents which form part of, or are related to, such a training course or examination.
- (2) A person commits an offence if:
 - (a) the person completes, or attempts to complete:
 - (i) an online training course under paragraph 101.374E(2)(b); or
 - (ii) an online examination under paragraph 101.374E(2)(c); and
 - (b) the person is subject to a requirement under subregulation (1) of this regulation in relation to completing the course or examination; and
 - (c) the person does not comply with the requirement.

Penalty: 50 penalty units.

- (3) A person commits an offence if:
 - (a) the person discloses or uses information or a document which forms part of, or is related to:
 - (i) an online training course under paragraph 101.374E(2)(b); or
 - (ii) an online examination under paragraph 101.374E(2)(c); and
 - (b) the person is subject to a requirement under subregulation (1) of this regulation in relation to disclosing or using the information or document; and
 - (c) the person does not comply with the requirement.

Penalty: 50 penalty units.

101.374G Accreditation—cessation

An accreditation ceases at the start of the earlier of the following days (unless sooner cancelled):

- (a) if the person holding the accreditation is granted a remote pilot licence—the day after the licence is granted;
- (b) the day after the end of the period of 3 years beginning on the day the accreditation comes into effect.

Note 1: For when an accreditation comes into effect, see regulation 11.065.

Note 2: For cancellation, see regulation 101.374J.

Regulation 101.374H

101.374H Notice to accreditation holder to show cause

Show cause notice—cancellation or suspension

- (1) CASA may give a show cause notice to a person who holds an accreditation (the **accreditation holder**) if there are reasonable grounds for believing that there are facts or circumstances that would justify the suspension or cancellation of the accreditation under regulation 101.374J.
- (2) A show cause notice must:
 - (a) tell the accreditation holder of the facts and circumstances that, in CASA's opinion, would justify the suspension or cancellation of the accreditation; and
 - (b) invite the accreditation holder to show in writing, within a reasonable time stated in the notice, why the accreditation should not be suspended or cancelled.

Immediate suspension if serious risk to the safety of air navigation

- (3) The accreditation is suspended from the time the show cause notice is given to the accreditation holder, if:
 - (a) CASA reasonably considers that there may be a serious risk to the safety of air navigation if the accreditation were not suspended; and
 - (b) the show cause notice states that the accreditation is suspended for that reason.
- (4) CASA may at any time revoke the suspension.
- (5) If the accreditation is suspended under subregulation (3):
 - (a) the accreditation holder is taken not to be the holder of an accreditation during the period of suspension; and
 - (b) the accreditation is not in force while suspended; and
 - (c) the period of the accreditation under paragraph 101.374G(b) continues to run; and
 - (d) if CASA has not dealt with the suspension under regulation 101.374J within 90 days after the day the accreditation is suspended, the suspension lapses at the end of that period (if it is not earlier revoked under subregulation (4) of this regulation or subregulation 101.374J(2)).

Note: Regulation 201.004 provides for review of certain decisions by the Administrative Appeals Tribunal.

101.374J Suspension or cancellation of accreditation

Suspension or cancellation of accreditation

- (1) CASA may suspend or cancel an accreditation by written notice to the accreditation holder, if:
 - (a) CASA has given the accreditation holder a show cause notice under regulation 101.374H; and

- (b) CASA has taken into account any representations made, within the period stated in the notice, by or on behalf of the accreditation holder; and
- (c) there are reasonable grounds for believing that the accreditation holder:
 - (i) has operated an RPA in contravention of these Regulations, an instrument under these Regulations or a condition of the accreditation; or
 - (ii) has operated an RPA negligently or carelessly; or
 - (iii) in operating an RPA, has recklessly endangered human life or property; or
 - (iv) at the time the accreditation was given did not meet, or now no longer meets, the criteria for eligibility under regulation 11.055 as they applied at the time the accreditation was given.

Note: For subparagraph (iv), in determining whether the criteria for eligibility were or are met, CASA may take into account the matters mentioned in subregulation 11.055(4).

Notice of decision

- (2) If CASA has given a show cause notice under regulation 101.374H to an accreditation holder:
 - (a) in the event that CASA decides to suspend or cancel the accreditation—CASA must give the accreditation holder notice of the decision, including (in the case of a decision to suspend the accreditation) notice of the period of suspension; and
 - (b) in the event that CASA decides not to suspend or cancel the accreditation—CASA must, in writing:
 - (i) give the accreditation holder notice accordingly; and
 - (ii) if the accreditation was suspended under subregulation 101.374H(3)—revoke the suspension.

Effect of suspension

- (3) If an accreditation is suspended under this regulation:
 - (a) the accreditation holder is taken not to be the holder of an accreditation during the period of suspension; and
 - (b) the accreditation is not in force during the period of suspension stated in the notice under paragraph (2)(a); and
 - (c) the period of the accreditation under paragraph 101.374G(b) continues to run.

Note 1: CASA may also impose a condition on the accreditation, or vary a condition of the accreditation—see regulation 11.067.

Note 2: Regulation 201.004 provides for review of certain decisions by the Administrative Appeals Tribunal.

Subpart 101.G—Model aircraft

101.375 Applicability of this Subpart

This Subpart applies to the operation of model aircraft weighing more than 250 g (except operation mentioned in paragraph 101.005(3)(a) or (b)).

Note 1: For *model aircraft*, see regulation 101.023.

Note 2: This Subpart does not apply to:

- (a) a control-line model aircraft (that is, a model aircraft that is constrained to fly in a circle, and is controlled in attitude and altitude, by means of inextensible wires attached to a handle held by the person operating the model); or
- (b) a model aircraft flown indoors.

See subregulation 101.005(3).

101.380 Definitions for Subpart

In this Subpart:

approved area means an area approved under regulation 101.030 as an area for the operation of model aircraft.

101.385 Visibility for operation of model aircraft

- (1) A person may operate a model aircraft only if the visibility at the time is good enough for the person operating the model to be able to see it continuously.

Penalty: 25 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.390 Operating model aircraft at night

- (1) A person may operate a model aircraft at night only in accordance with the written procedures of an approved aviation administration organisation.

Penalty: 25 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.395 Keeping model aircraft away from people

- (1) A person must not operate a model aircraft over a populous area at a height less than the height from which, if any of its components fails, it would be able to clear the area.

Penalty: 50 penalty units.

Regulation 101.400

Note: For *populous area*, see regulation 101.025.

- (2) Subject to subregulations (3) and (4), somebody who is operating a powered model aircraft must ensure that, while the model aircraft is in flight, or is landing or taking off, it stays at least 30 metres away from anyone not directly associated with the operation of model aircraft.

Penalty: 50 penalty units.

- (3) Subregulation (2) is not contravened if somebody stands behind the model aircraft while it is taking off.
- (4) Subregulation (2) is also not contravened if, as part of a model flying competition, a model aircraft is flown within 30 metres of somebody who is judging the competition.
- (5) An offence against subregulation (1) or (2) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.400 Operation of model aircraft outside approved areas

- (1) A person may operate a model aircraft outside an approved area above 400 feet AGL only if he or she:
 - (a) keeps it in sight; and
 - (b) keeps it clear of populous areas.

Penalty: 10 penalty units.

Note 1: For *populous area*, see regulation 101.025.

Note 2: CASA must publish details of the approval of an area (including any conditions) in NOTAM or on an aeronautical chart—see subregulation 101.030(5).

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.405 Giant model aircraft

- (1) A person may operate a giant model aircraft only in accordance with:
 - (a) the rules and procedures of an approved aviation administration organisation; or
 - (b) an approval given by CASA.

Penalty: 50 penalty units.

Note: For *giant model aircraft*, see regulation 101.024.

- (2) CASA may impose a condition on the operation of a giant model aircraft if the condition is reasonably necessary in the circumstances in the interests of aviation safety.
- (3) The operator of a giant model aircraft must comply with any condition imposed under subregulation (2).

Regulation 101.410

Penalty: 50 penalty units.

- (4) An offence against subregulation (1) or (3) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.410 Model flying displays

- (1) A person may conduct a model aircraft flying display only in compliance with subregulation (2) or (3).

Penalty: 50 penalty units.

- (1A) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (2) A person complies with this subregulation if the display is conducted:

- (a) in an approved area; and
- (b) in accordance with the rules and procedures of an approved aviation administration organisation.

Note: CASA must publish details of the approval of an area (including any conditions) in NOTAM or on an aeronautical chart—see subregulation 101.030(5).

- (3) A person complies with this subregulation if the display is conducted in accordance with the following conditions and any other conditions imposed by CASA under subregulation (4):
- (a) at least 21 days before the display, somebody is nominated as the organiser of the display;
 - (b) at least 21 days before the display, he or she gives to CASA the following information:
 - (i) his or her name, address, email address and telephone number;
 - (ii) the proposed program of flying;
 - (iii) where the display will be held, and how big the intended flying field is;
 - (iv) how many spectators are expected, and where they will be;
 - (c) he or she ensures that:
 - (i) having regard to the events making up the display, proper precautions are taken for the safety of the participants and spectators; and
 - (ii) the operators participating in the display are competent to carry out each proposed manoeuvre safely.
- (4) CASA may impose a condition on the conduct of a model flying display if in the circumstances the condition is reasonably necessary in the interests of aviation safety.

Subpart 101.H—Rockets

101.415 Applicability of this Subpart

This Subpart applies to the operation of rockets of all kinds, except rockets mentioned in paragraph 101.005(3)(f).

Note 1: That is, this Subpart does not apply to a firework rocket not capable of rising more than 400 feet AGL. See paragraph 101.005(3)(f).

Note 2: **Rocket** in this Subpart does not include a rocket-powered aircraft—see regulation 101.425.

101.420 Application of State and Territory laws about rockets

- (1) If a law of a State or Territory deals with the operation or use of rockets, and is not inconsistent with this Subpart, nothing in this Subpart affects the operation of the law.
- (2) For subregulation (1), a law of a State or Territory is not inconsistent with this Subpart if it is possible to comply with both this Subpart and the State or Territory law at once.

101.425 Definitions for Subpart

In this Subpart:

approved area means an area approved under regulation 101.030 as an area for the operation of rockets.

Note: CASA must publish details of the approval of an area (including any conditions) in NOTAM or on an aeronautical chart—see subregulation 101.030(7).

model rocket means a rocket that:

- (a) weighs no more than 1 500 grams; and
- (b) carries no more than 125 grams of propellant; and
- (c) produces no more than 320 newton-seconds of impulse; and
- (d) is made of balsa, wood, paper or plastics or a combination of those materials, but contains no metal as structural parts.

rocket does not include a rocket-powered or rocket-assisted aircraft.

101.430 Launching rocket in or over prohibited or restricted area

- (1) A person may launch a rocket (including a model rocket) in or over a prohibited area, or in or over a restricted area, only with the permission of, and in accordance with any conditions imposed by, the authority controlling the area.

Penalty: 25 penalty units.

Note: Details of prohibited and restricted areas are published in the AIP or NOTAMS.

Regulation 101.435

- (2) In subregulation (1):

authority controlling the area means:

- (a) in the case of a prohibited area—the Secretary of the Department administered by the Minister administering section 1 of the *Defence Act 1903*; and
- (b) in the case of a restricted area—the authority mentioned in AIP (as issued from time to time) as the controlling authority for the area.

- (3) An offence against subregulation (1) is an offence of strict liability.

Note: For **strict liability**, see section 6.1 of the *Criminal Code*.

101.435 Launching rockets into controlled airspace

- (1) A person may launch a rocket (including a model rocket) to higher than 400 feet AGL in controlled airspace only:

- (a) in an approved area; or
- (b) in accordance with an air traffic control clearance.

Penalty: 50 penalty units.

Note: CASA must publish details of the approval of an area (including any conditions) in NOTAM or on an aeronautical chart—see subregulation 101.030(5).

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For **strict liability**, see section 6.1 of the *Criminal Code*.

101.440 Launching rockets near aerodromes

- (1) A person may launch a rocket that is not a small model rocket to higher than 400 feet AGL within 3 nautical miles of an aerodrome only if:

- (a) doing so is permitted by another provision of this Part; or
- (b) permission has been given for the operation under regulation 101.445.

Penalty: 25 penalty units.

Note 1: For **model rocket**, see regulation 101.425.

Note 2: Some special provisions apply to model rockets—see regulation 101.470.

- (2) In subregulation (1):

small model rocket means a model rocket that weighs less than 500 grams and either:

- (a) uses no more than 25 grams of propellant; or
- (b) produces no more than 20 newton-seconds of impulse.

- (3) A person may launch a rocket (including both a small model rocket and any other model rocket) from or over an area mentioned in paragraph (4)(a) or (b) only if:

- (a) doing so is permitted by another provision of this Part; or

Regulation 101.445

(b) permission has been given for the operation under regulation 101.445.

Penalty: 25 penalty units.

- (4) The areas for subregulation (3) are:
- (a) a movement area or runway of an aerodrome; and
 - (b) the approach or departure path of a runway of an aerodrome.
- (5) An offence against subregulation (1) or (3) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.445 Getting permission for launch of rocket near aerodrome

- (1) The authority that must give permission for regulation 101.440 is:
- (a) if the aerodrome concerned is a controlled aerodrome—the air traffic control service for the aerodrome; or
 - (b) in the case of any other aerodrome—CASA.
- (2) A person applies for permission under this regulation by giving to the relevant authority mentioned in subregulation (1) the information required by table 101.445, so far as relevant to the proposed launch:

Table 101.445 Details of launching of rocket to be given to CASA

Item	Information to be provided
1	The name, address, email address and telephone number of the person who will launch the rocket (or, if several people will be involved, the name, address, email address and telephone number of the person who will coordinate the launching)
2	The date and time the rocket is to be launched
3	Where it is to be carried out
4	The size and mass of the rocket
5	The estimated greatest altitude or flight level that the rocket will reach
6	If more than 1 rocket is to be launched at a time, how many rockets are to be launched at the time

- (3) If more than 1 rocket is to be launched at a time, such a requirement is a requirement to give the information about each such launch.
- (4) Regulation 101.035 does not authorise a person who or that applies for permission under this regulation to make the application to a body mentioned in paragraph 101.035(1)(a) or (b).
- (5) An authority mentioned in subregulation (1) may impose conditions on a permission in the interests of the safety of air navigation.
- (6) A person must not contravene a condition imposed under subregulation (5).
- Penalty: 50 penalty units.
- (7) An offence against subregulation (6) is an offence of strict liability.

Regulation 101.450

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.450 Rockets other than model rockets must be launched in approved area

- (1) A person may launch a rocket that is not a model rocket, or permit such a rocket to be launched, only in an approved area.

Penalty: 10 penalty units.

Note: CASA must publish details of the approval of an area (including any conditions) in NOTAM or on an aeronautical chart—see subregulation 101.030(7).

- (2) A person may launch a rocket that is not a model rocket, or permit such a rocket to be launched, only if the person gives the details listed in the table following subregulation 101.445(2) to CASA at least 1 working day before the intended time of the launch.

Penalty: 10 penalty units.

Note: A person can comply with this requirement by telling:

- (a) if the person is an approved aviation administration organisation—the Australian NOTAM Office; or
- (b) the appropriate approved aviation administration organisation.

See regulation 101.035.

- (3) If more than 1 rocket is to be launched at a time, such a requirement is a requirement to give the information about each such rocket.

- (4) An offence against subregulation (1) or (2) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.455 Maximum operating height of rockets

- (1) A person may launch a rocket that is not a model rocket to higher than 400 feet AGL only:

- (a) in an approved area; or
- (b) as permitted by another provision of this Part.

Penalty: 10 penalty units.

Note: CASA must publish details of the approval of an area (including any conditions) in NOTAM or on an aeronautical chart—see subregulation 101.030(7).

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.460 Dropping or discharging of things from rockets

- (1) A person must not cause anything to be dropped or discharged from a rocket in a way that creates a hazard to an aircraft.

Penalty: 25 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.
-

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.465 Weather and day limitations—rockets other than model rockets

- (1) A person may launch a rocket that is not a model rocket:
- (a) in or into cloud; or
 - (b) at night; or
 - (c) in conditions other than VMC;
- only as permitted by another provision of this Part, or in accordance with an air traffic control clearance.

Penalty: 10 penalty units.

Note: For *model rocket*, see regulation 101.425.

- (2) However, subregulation (1) does not prevent rockets being operated as part of a firework display.
- (3) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.470 Model rockets

- (1) A person must not launch a model rocket into cloud.

Penalty: 10 penalty units.

Note: For *model rocket*, see regulation 101.425.

- (2) A person must not launch a model rocket to higher than 400 feet AGL within 5 nautical miles of an aerodrome.

Penalty: 10 penalty units.

- (2A) An offence against subregulation (1) or (2) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (3) Subject to subregulations (1) and (2) and Subpart 101.B, a person may launch a model rocket outside an approved area, or at night.

Subpart 101.I—Firework displays

101.475 What this Subpart does

This Subpart regulates the conduct of certain firework displays, to the extent necessary to prevent them being a hazard to the safety of air navigation.

101.480 Application of State and Territory laws about fireworks

- (1) If a law of a State or Territory deals with the use of fireworks, and is not inconsistent with this Subpart, nothing in this Subpart affects the operation of the law.
- (2) For subregulation (1), a law of a State or Territory is not inconsistent with this Subpart if it is possible to comply with both this Subpart and the State or Territory law at once.

101.485 Meaning of *operate a firework display*

For this Subpart, a person *operates a firework display* if the person places the fireworks for the display, or fires them off.

101.490 Certain projectiles prohibited in firework displays

- (1) A person may use, in a firework display, a projectile that is capable of reaching more than 400 feet AGL only if CASA so approves.

Penalty: 10 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

101.495 Firework displays not permitted near aerodromes

- (1) A person may operate a firework display in or over an area mentioned in paragraph (2)(a) or (b) only if subregulation (3) or (4) applies to the display.

Penalty: 10 penalty units.

- (1A) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

- (2) The areas for subregulation (1) are:
 - (a) a movement area or runway of an aerodrome; and
 - (b) the approach or departure path of a runway of an aerodrome.
- (3) This subregulation applies to a firework display if:
 - (a) permission for the display has been given by:

Regulation 101.500

- (i) if the aerodrome is a controlled aerodrome—the air traffic control service for the aerodrome; and
 - (ii) in the case of any other aerodrome—CASA; and
 - (b) the person who proposes to operate the display has, before doing so, given to CASA the details required by table 101.500.
- (4) This subregulation applies to a firework display if the fireworks are set off on or near domestic premises by or for somebody who lives there.

101.500 Notice to CASA of certain firework displays

- (1) A person may operate a firework display at a place within 3 nautical miles of an aerodrome only if the person has given at least 2 working days' notice to CASA.

Penalty: 10 penalty units.

- (2) However, subregulation (1) does not apply if:
- (a) the fireworks are set off on or near domestic premises by or for somebody who lives there; and
 - (b) either:
 - (i) if a law of a State or Territory allows fireworks to be set off in that place only on a particular day or days—the fireworks are set off on such a day; or
 - (ii) if there is no such law in that place—the fireworks are set off on a day on which fireworks are customarily set off on domestic premises in that place.
- (3) When the person tells CASA, the person must also give to CASA the information required by table 101.500.

Table 101.500 Details of firework display to be given to CASA

Item	Information to be provided
1	The name, address, email address and telephone number of the person who will operate the display (or, if several people will be involved in its operation, the name, address, email address and telephone number of the person who will coordinate it)
2	The date the display is to begin, the starting time, and how long it is to last
3	Where it is to be given
4	How many projectiles capable of reaching more than 400 feet AGL are to be used in the display
5	A general description of the pyrotechnic characteristics of each such projectile
6	The estimated highest altitude that any projectile can reach
7	The maximum burst radius of the pyrotechnics in a projectile

- (4) CASA may impose a condition on the operation of a firework display if the condition is reasonably necessary in the circumstances in the interests of the safety of air navigation.

Part 101 Unmanned aircraft and rockets
Subpart 101.I Firework displays

Regulation 101.500

- (5) A person operating a display must comply with any condition imposed under subregulation (4).

Penalty: 50 penalty units.

- (6) An offence against subregulation (1) or (5) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

Part 103—Sport and recreation aircraft

Table of contents

Subpart 103.A—Preliminary

- 103.005 Application of Part 103
- 103.010 Other key definitions for Part 103
- 103.015 Issue of Manual of Standards for Part 103
- 103.020 Approvals by CASA for Part 103

Subpart 103.B—Aircraft listing, certification and markings

- 103.025 Listing with a Part 103 ASAO
- 103.030 Flying without a certificate of airworthiness—airworthiness standards for certain kinds of Part 103 aircraft
- 103.035 Display of markings—aircraft other than sailplanes

Subpart 103.C—General obligations

- 103.040 Requirements for undertaking Part 103 activities

Subpart 103.D—Operational procedures

- 103.045 Minimum height rules—other than over populous areas or public gatherings
- 103.050 Safety when aircraft operating on ground
- 103.055 Carriage of passengers
- 103.060 Carriage and restraint of persons
- 103.065 Carriage of cargo
- 103.070 Simulating IMC flying
- 103.075 Training flight limitations etc.
- 103.080 Consumption or provision of alcohol
- 103.085 Additional requirements in relation to Part 103 activities

Subpart 103.K—Equipment

- 103.090 Requirements relating to equipment

Subpart 103.M—Airworthiness requirements

- 103.100 Application of CAR Parts 4 to 4D
- 103.105 Requirements prescribed by the Part 103 Manual of Standards
- 103.110 Permission for section 20AB of Act
- 103.115 Requirements for ASAO exposition
- 103.120 Aircraft data plate—aircraft to which Part 21 does not apply
- 103.125 Major defects

Subpart 103.Z—Towing of Part 103 aircraft by other aircraft

- 103.130 Towing of Part 103 aircraft by other aircraft

Subpart 103.A—Preliminary

103.005 Application of Part 103

- (1) This Part (other than Subpart 103.Z) applies to Part 103 aircraft.
- (2) Despite subregulation (1), this Part does not apply to the operation of a Part 103 aircraft if Part 132, 133, 135 or 137 applies to the operation.
- (2A) Despite subregulation (1), this Part does not apply to the operation of a touring motor glider if:
 - (a) the touring motor glider is registered; and
 - (b) the touring motor glider is being operated solely under Part 91 during a flight; and
 - (c) either:
 - (i) the pilot in command for the flight is exercising the privileges of a pilot licence with an aeroplane category rating; or
 - (ii) the pilot in command for the flight holds an approval under regulation 61.040 for paragraph 61.1515(1)(b).
- (3) Subpart 103.Z applies in relation to the towing of a Part 103 aircraft by an aircraft that is not a Part 103 aircraft.

Meaning of Part 103 aircraft

- (4) An aircraft is a **Part 103 aircraft** if:
 - (a) the aircraft is not registered; and
 - (b) the aircraft is any of the following:
 - (i) a powered parachute;
 - (ii) a gyroglider;
 - (iii) a hang glider or powered hang glider;
 - (iv) a paraglider or powered paraglider;
 - (iva) a touring motor glider;
 - (v) a rotorcraft prescribed by the Part 103 Manual of Standards for the purposes of this subparagraph;
 - (vi) a weight-shift-controlled aeroplane prescribed by the Part 103 Manual of Standards for the purposes of this subparagraph;
 - (vii) any other aeroplane prescribed by the Part 103 Manual of Standards for the purposes of this subparagraph.
- (5) A sailplane is a **Part 103 aircraft**.

Note: This subregulation applies to all sailplanes, including sailplanes registered under Part 47 and sailplanes that are foreign registered aircraft. Sailplanes are required to be registered under Part 47, unless an exception in subregulation 47.015(1) applies.

- (6) Despite subregulations (4) and (5), neither of the following aircraft are **Part 103 aircraft**:
- (a) an RPA;
 - (b) a model aircraft.

103.010 Other key definitions for Part 103

In these Regulations:

Part 103 activity means any of the following:

- (a) operating a Part 103 aircraft;
- (b) maintaining, or ensuring the airworthiness of, a Part 103 aircraft or aeronautical products for Part 103 aircraft;
- (c) providing training in an activity covered by paragraph (a) or (b).
- (d) carrying on a business or undertaking involving the provision of services or equipment for undertaking an activity covered by paragraph (a) or (b);
- (e) the towing of a Part 103 aircraft by another Part 103 aircraft;
- (f) an activity prescribed by the Part 103 Manual of Standards.

Part 103 ASAO means an ASAO whose approved function is or includes administering a Part 103 activity.

103.015 Issue of Manual of Standards for Part 103

For the purposes of subsection 98(5A) of the Act, CASA may issue a Manual of Standards for this Part prescribing matters:

- (a) required or permitted by these Regulations to be prescribed by the Part 103 Manual of Standards; or
- (b) necessary or convenient to be prescribed for carrying out or giving effect to this Part.

Note: A Manual of Standards is a legislative instrument: see subsection 98(5AA) of the Act.

103.020 Approvals by CASA for Part 103

- (1) If a provision of this Part, or of the Part 103 Manual of Standards, refers to a person holding an approval under this regulation, a person may apply to CASA, in writing, for the approval.
- (2) Subject to regulation 11.055, the approval must be granted.
- (3) Subregulation 11.055(1B) applies to the granting of an approval under this regulation.

Subpart 103.B—Aircraft listing, certification and markings

103.025 Listing with a Part 103 ASAO

- (1) A Part 103 aircraft is listed with a Part 103 ASAO for the purposes of this regulation if the aircraft is listed with the Part 103 ASAO in accordance with the requirements prescribed by the Part 103 Manual of Standards for the purposes of this subregulation.

Certain Part 103 aircraft must be listed

- (2) The owner of a Part 103 aircraft contravenes this subregulation if:
 - (a) the aircraft is an aircraft other than a sailplane, hang glider, powered hang glider, paraglider, powered paraglider or registered touring motor glider; and
 - (b) the aircraft has an empty weight of more than 70 kg; and
 - (c) a person operates the aircraft; and
 - (d) the aircraft is not listed with a Part 103 ASAO.

Other Part 103 aircraft may be listed

- (3) If paragraphs (2)(a) and (b) do not apply to a Part 103 aircraft, the aircraft may be listed with a Part 103 ASAO.

Listing with more than one ASAO prohibited

- (4) The owner of a Part 103 aircraft contravenes this subregulation if:
 - (a) a person operates the aircraft; and
 - (b) the aircraft is listed with more than one Part 103 ASAO at the same time.

Offence

- (5) A person commits an offence of strict liability if the person contravenes subregulation (2) or (4).

Penalty: 50 penalty units.

103.030 Flying without a certificate of airworthiness—airworthiness standards for certain kinds of Part 103 aircraft

- (1) The Part 103 Manual of Standards may make provision in relation to one or more of the following:
 - (a) airworthiness standards for specified kinds of Part 103 aircraft;
 - (b) for Part 103 ASAOs whose approved functions include administering Part 103 aircraft:
 - (i) the kinds of aircraft for which the Part 103 ASAO may set airworthiness standards; and

- (ii) procedures for setting such standards;
 - (c) procedures for accepting a Part 103 aircraft that meets the standards referred to in paragraph (a) or (b);
 - (d) procedures for issuing a statement of acceptance to the owner of an aircraft accepted in accordance with the procedures mentioned in paragraph (c).
- (2) For the purposes of paragraph 20AA(3)(b) of the Act, a flight in a Part 103 aircraft is authorised without a certificate of airworthiness if a Part 103 ASAO has issued a statement of acceptance to the owner of the aircraft in accordance with the procedures mentioned in paragraph (1)(d) of this regulation.

103.035 Display of markings—aircraft other than sailplanes

- (1) Part 45 does not apply to a Part 103 aircraft that is not a sailplane.
- (2) If the approved functions of a Part 103 ASAO include administering a Part 103 activity in relation to Part 103 aircraft that are not sailplanes, the exposition for the Part 103 ASAO must:
- (a) include requirements relating to the display of markings (within the ordinary meaning of the term) on the aircraft; and
 - (b) prohibit the operation of the aircraft if the aircraft does not meet the requirements mentioned in paragraph (a).

Note: An ASAO, and the holder of an authorisation issued by an ASAO, must not contravene the ASAO's exposition: see regulations 149.345 and 149.410.

- (3) Without limiting subregulation (2), the exposition must include requirements relating to the following:
- (a) when markings must be displayed;
 - (b) the number of sets of markings that must be displayed;
 - (c) the location of sets of markings on aircraft;
 - (d) the characters to be used in each set of markings, including height, width and font requirements.

Subpart 103.C—General obligations

103.040 Requirements for undertaking Part 103 activities

Part 103 activity must be authorised

- (1) A person contravenes this subregulation if:
 - (a) the person undertakes a Part 103 activity; and
 - (b) the person does not hold an authorisation from a Part 103 ASAO authorising the person to undertake the activity.
- (2) Subregulation (1) does not apply if:
 - (a) the person holds an approval under regulation 103.020 to undertake the activity; or
 - (b) the person is otherwise authorised under these Regulations to undertake the activity.

Part 103 activity must be undertaken in accordance with authorisation

- (3) A person contravenes this subregulation if the person:
 - (a) undertakes a Part 103 activity; and
 - (b) holds an authorisation from a Part 103 ASAO authorising the person to undertake the activity; and
 - (c) undertakes the activity in a way that contravenes the authorisation.

Offence

- (4) A person commits an offence of strict liability if the person contravenes subregulation (1) or (3).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matter in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

Subpart 103.D—Operational procedures

103.045 Minimum height rules—other than over populous areas or public gatherings

- (1) This regulation applies if a Part 103 aircraft is flown other than over a populous area or a public gathering.

Note: For minimum height rules if an aircraft is flown over a populous area or a public gathering, see regulation 91.265.
- (2) The pilot in command of a Part 103 aircraft for a flight contravenes this subregulation if, during the flight:
 - (a) the aircraft is flown below 500 ft above the highest feature or obstacle within a horizontal radius of 300 m of the point on the ground or water immediately below the aircraft; and
 - (b) none of the circumstances mentioned in subregulation (3) applies.
- (3) The circumstances are the following:
 - (a) the aircraft is taking off, operating or landing in circumstances prescribed by the Part 103 Manual of Standards for the purposes of this paragraph;
 - (b) the aircraft is engaged in a missed approach;
 - (c) the aircraft is a glider engaged in ridge or hill soaring;
 - (d) the aircraft:
 - (i) is not carrying passengers; and
 - (ii) is engaged in a practice emergency procedure at an aerodrome;
 - (e) the aircraft:
 - (i) is not carrying passengers; and
 - (ii) is engaged in a practice forced landing procedure with the consent of the person or authority having control over the land or water above which the procedure is carried out;
 - (f) the aircraft is performing training circuits at an aerodrome in circumstances prescribed by the Part 103 Manual of Standards for the purposes of this paragraph;
 - (g) the pilot holds an approval for the purposes of regulation 91.180 (air displays in Australian territory);
 - (h) all of the following apply:
 - (i) the pilot in command of the aircraft holds an approval under regulation 103.020 to fly the aircraft below the height mentioned in paragraph (2)(a);
 - (ii) the pilot in command of the aircraft conducts a risk assessment of the area to be flown over;
 - (iii) the point on the ground or water vertically below the aircraft is not within 150 m of a person, vessel, vehicle or structure;

Regulation 103.050

- (i) for a rotorcraft—the rotorcraft is hovering, air transiting, air taxiing or ground taxiing at an aerodrome;
 - (j) for a rotorcraft, seaplane or amphibian—the aircraft is flying within an access lane:
 - (i) that is for use by aircraft taking off from, or landing at, a particular place; and
 - (ii) details of which are published in the authorised aeronautical information for the flight;
 - (k) the aircraft is engaged in a procedure to determine the suitability of an aerodrome for a landing.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

103.050 Safety when aircraft operating on ground

- (1) A person contravenes this subregulation if:
- (a) the person starts the engine of a Part 103 aircraft, or causes the engine to be started, while the aircraft is on the ground; and
 - (b) a requirement mentioned in subregulation (2) is not met.
- (2) The requirements are the following:
- (a) the person who starts the engine or causes the engine to be started must be:
 - (i) authorised by a Part 103 ASAO to pilot or maintain the aircraft; or
 - (ii) a person of a kind prescribed by the Part 103 Manual of Standards for the purposes of this subparagraph; and
 - (b) if subparagraph (a)(ii) applies—the aircraft must be secured from moving; and
 - (c) if the aircraft is hand-started—the requirements relating to hand-starting prescribed by the Part 103 Manual of Standards for the purposes of this paragraph.
- (3) A person contravenes this subregulation if:
- (a) the person operates a Part 103 aircraft on the ground, or causes a Part 103 aircraft to be operated on the ground; and
 - (b) the person permits another person to board the aircraft or to remain on the aircraft while a pilot seat of the aircraft is not occupied by a person who is competent to apply the brakes and control the engine.
- (4) For the purposes of paragraph (3)(b), a person is competent to apply the brakes and control the engine of an aircraft if:
- (a) the person has been given instructions on how, and assessed as competent, to apply the brakes and control the engine (including how to shut the engine down) by another person who is authorised by a Part 103 ASAO to pilot or maintain the aircraft; or
 - (b) the person is authorised by a Part 103 ASAO to maintain the aircraft.

- (5) A person commits an offence of strict liability if the person contravenes subregulation (1) or (3).

Penalty: 50 penalty units.

103.055 Carriage of passengers

An exposition for a Part 103 ASAO must include requirements in relation to the carriage of passengers on Part 103 aircraft.

Note: An ASAO, and the holder of an authorisation issued by an ASAO, must not contravene the ASAO's exposition: see regulations 149.345 and 149.410.

103.060 Carriage and restraint of persons

Carriage of infants

- (1) The pilot in command of a Part 103 aircraft for a flight contravenes this subregulation if the requirement mentioned in subregulation (2) is not met for the flight.
- (2) The requirement is that an infant must not be carried on the flight except in the circumstances prescribed by the Part 103 Manual of Standards for the purposes of this subregulation.

Restraint of adults and children

- (3) The pilot in command of a Part 103 aircraft for a flight contravenes this subregulation if a requirement mentioned in subregulation (4) is not met.
- (4) The requirements are the following:
- (a) if the aircraft is fitted with any seats—at all times during the flight:
 - (i) the pilot in command must occupy a pilot seat, with the seatbelt, and the shoulder harness (if any), securely fastened; and
 - (ii) any other adult carried on the flight must occupy a seat, with the seatbelt, and the shoulder harness (if any), securely fastened;
 - (b) if the aircraft is not fitted with any seats—at all times during the flight each adult on the flight must be wearing a harness or restraint that is securely fastened;
 - (c) in any case—any child carried on the flight must be restrained in accordance with the requirements prescribed by the Part 103 Manual of Standards for the purposes of this paragraph.
- (5) Subregulation (4) does not apply in relation to a person if regulation 105.105 imposes requirements in relation to restraint of the person.

Note: Regulation 105.105 is about restraint of persons carried on an aircraft being operated to facilitate a parachute descent.

- (6) A person commits an offence of strict liability if the person contravenes subregulation (1) or (3).

Regulation 103.065

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (5): see subsection 13.3(3) of the *Criminal Code*.

103.065 Carriage of cargo

- (1) This regulation does not apply in relation to an animal carried in a passenger cabin.

Note: For the carriage of animals, see regulation 91.620.

- (2) The pilot in command of a Part 103 aircraft for a flight contravenes this subregulation if:
- (a) cargo is carried on the flight; and
 - (b) a requirement mentioned in subregulation (3) is not met for the flight.
- (3) The requirements are the following:
- (a) cargo must not be carried in a place where the cargo may damage, obstruct or cause the failure of any part of the aircraft, or any equipment, that is essential to the safe operation of the aircraft;
 - (b) cargo carried on the aircraft must be:
 - (i) securely stowed in accordance with the aircraft flight manual instructions; or
 - (ii) otherwise safely restrained;
 - (c) cargo must be carried in accordance with any requirements relating to the carriage of cargo:
 - (i) in the aircraft flight manual instructions for the aircraft; or
 - (ii) on a placard on the aircraft;
 - (d) if cargo is carried on an unoccupied seat in the aircraft:
 - (i) the cargo must not weigh more than the weight limitation for that seating position; and
 - (ii) the cargo, and the means of restraint of the cargo, must not interfere with the safe operation of the aircraft;
 - (e) any other requirement relating to the restraint or stowage of cargo prescribed by the Part 103 Manual of Standards for the purposes of this paragraph.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

103.070 Simulating IMC flying

- (1) The pilot in command of a Part 103 aircraft for a flight contravenes this subregulation if:
- (a) during the flight, IMC are simulated; and
 - (b) a requirement mentioned in subregulation (2) is not met.

- (2) The requirements are the following:
- (a) the aircraft must be of a kind prescribed by the Part 103 Manual of Standards for the purposes of this paragraph;
 - (b) a pilot (the *safety pilot*) must:
 - (i) occupy a pilot seat fitted with fully functioning flight controls; and
 - (ii) have adequate vision forward and to each side of the aircraft;
 - (c) a pilot (the *second pilot*) flying the aircraft under simulated IMC must occupy a pilot seat fitted with fully functioning flight controls;
 - (d) the safety pilot must be authorised by a Part 103 ASAO to pilot the aircraft.
- (3) A person commits an offence if the person contravenes subregulation (1).
- Penalty: 50 penalty units.

103.075 Training flight limitations etc.

- (1) In this regulation:
- permitted person*, in relation to an aircraft, means a person who is carried on the aircraft for the purpose of:
- (a) giving or receiving flying training; or
 - (b) practising for the issue of an authorisation by a Part 103 ASAO; or
 - (c) being assessed for the issue of an authorisation by a Part 103 ASAO.
- (2) The pilot in command of a Part 103 aircraft for a flight contravenes this subregulation if, during the flight:
- (a) a person other than a permitted person is carried on the aircraft; and
 - (b) the pilot in command permits the simulation (other than verbally) of an emergency or abnormal situation that may affect the handling characteristics of the aircraft.
- (3) The pilot in command of a Part 103 aircraft for a flight contravenes this subregulation if, during the flight:
- (a) a person other than the following is carried on the aircraft:
 - (i) a permitted person;
 - (ii) a person prescribed by the Part 103 Manual of Standards for the purposes of this subparagraph; and
 - (b) the pilot in command permits a test of the aircraft, or any of its instruments, indicators, items of equipment or systems (other than a test of the aircraft during the course of checks associated with the normal operation of the aircraft).
- (4) A person commits an offence of strict liability if the person contravenes subregulation (2) or (3).
- Penalty: 50 penalty units.

Regulation 103.080

103.080 Consumption or provision of alcohol

- (1) A person on a Part 103 aircraft for a flight contravenes this subregulation if:
 - (a) the person consumes alcohol; or
 - (b) the person provides alcohol to another person on the aircraft.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

103.085 Additional requirements in relation to Part 103 activities

- (1) The Part 103 Manual of Standards may prescribe additional requirements in relation to undertaking a Part 103 activity.
- (2) Without limiting subregulation (1), the Part 103 Manual of Standards may prescribe requirements relating to the following:
 - (a) flights over populous areas, prohibited areas, restricted areas or water;
 - (b) flights in specified classes of airspace;
 - (d) flights at or above specified altitudes;
 - (e) the operation of a Part 103 aircraft at, or within a prescribed distance from, an aerodrome;
 - (f) the conduct of aerobatic manoeuvres during flights;
 - (g) the dropping of things from a Part 103 aircraft during flights;
 - (h) the towing of a Part 103 aircraft by another Part 103 aircraft;
 - (i) the conduct of training in operating a Part 103 aircraft;
 - (j) placards that must be displayed in a Part 103 aircraft;
 - (k) documents that must be carried on a Part 103 aircraft for a flight;
 - (l) documents or authorisations that must be in force when a Part 103 aircraft begins a flight.
- (3) A person contravenes this subregulation if:
 - (a) the person is subject to a requirement mentioned in subregulation (1) in relation to a Part 103 activity; and
 - (b) the requirement is not met in undertaking the Part 103 activity.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (3).

Penalty: 50 penalty units.

Subpart 103.K—Equipment

103.090 Requirements relating to equipment

- (1) The Part 103 Manual of Standards may prescribe requirements relating to:
 - (a) the fitment and non-fitment of equipment to a Part 103 aircraft; and
 - (b) the carrying of equipment on a Part 103 aircraft; and
 - (c) equipment that is fitted to, or carried on, a Part 103 aircraft.
- (2) A person contravenes this subregulation if:
 - (a) the person is subject to a requirement mentioned in subregulation (1); and
 - (b) the requirement is not met.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Subpart 103.M—Airworthiness requirements

103.100 Application of CAR Parts 4 to 4D

- (1) Parts 4 and 4A of CAR do not apply to a Part 103 aircraft unless:
 - (a) the aircraft is listed with a Part 103 ASAO; and
 - (b) a standard certificate of airworthiness is in force in relation to the aircraft.
- (2) Parts 4B, 4C and 4D of CAR do not apply to a Part 103 aircraft unless:
 - (a) a standard certificate of airworthiness is in force in relation to the aircraft;
and
 - (b) the aircraft is:
 - (i) a sailplane; or
 - (ii) listed with a Part 103 ASAO.

103.105 Requirements prescribed by the Part 103 Manual of Standards

- (1) The Part 103 Manual of Standards may prescribe requirements relating to the maintenance, or ensuring the airworthiness of, a Part 103 aircraft or aeronautical products for Part 103 aircraft.
- (2) A person contravenes this subregulation if:
 - (a) the person is subject to a requirement mentioned in subregulation (1); and
 - (b) the person does not comply with the requirement.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

103.110 Permission for section 20AB of Act

For the purposes of subsection 20AB(2) of the Act, a person is permitted to carry out maintenance:

- (a) on a Part 103 aircraft; or
- (b) on an aeronautical product for a Part 103 aircraft;

if the person holds an authorisation from a Part 103 ASAO authorising the person to carry out the maintenance.

Note: See also regulation 103.040.

103.115 Requirements for ASAO exposition

- (1) This regulation applies if the approved functions of a Part 103 ASAO include administering the activity mentioned in paragraph (b) of the definition of **Part 103 activity** (maintaining, or ensuring the airworthiness of, a Part 103 aircraft or aeronautical products for Part 103 aircraft).

- (2) The exposition for the Part 103 ASAO must include requirements relating to undertaking the activity.

Note: An ASAO, and the holder of an authorisation issued by an ASAO, must not contravene the ASAO's exposition: see regulations 149.345 and 149.410.

103.120 Aircraft data plate—aircraft to which Part 21 does not apply

- (1) This regulation applies in relation to an aircraft data plate attached, or to be attached, to a Part 103 aircraft that is administered by a Part 103 ASAO (other than a data plate attached in accordance with Division 21.Q.2).
- (2) The exposition for the Part 103 ASAO must include requirements relating to the procedures to be used for attaching an aircraft data plate to the aircraft.

Note: An ASAO, and the holder of an authorisation issued by an ASAO, must not contravene the ASAO's exposition: see regulations 149.345 and 149.410.

- (3) The owner of a Part 103 aircraft contravenes this subregulation if an aircraft data plate attached to the aircraft does not meet the requirements prescribed by the Part 103 Manual of Standards for the purposes of this subregulation.
- (4) A person contravenes this subregulation if:
- (a) the person removes or engages in conduct that results in the alteration of any of the information on an aircraft data plate attached to a Part 103 aircraft; and
 - (b) the person does not hold an approval under regulation 103.020 to do so.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (3) or (4).

Penalty: 50 penalty units.

103.125 Major defects

Reporting of defects

- (1) A person contravenes this subregulation if the person:
- (a) is the owner or operator of a Part 103 aircraft that is administered by a Part 103 ASAO; and
 - (b) knows there is a major defect in the aircraft; and
 - (c) does not report the defect, in accordance with the requirements prescribed by the Part 103 Manual of Standards for the purposes of this paragraph, to the Part 103 ASAO within 3 business days after becoming aware of the defect.

Note: Part 4B of CAR contains additional requirements in relation to the reporting of defects in sailplanes.

- (2) A Part 103 ASAO contravenes this subregulation if the Part 103 ASAO:
- (a) receives a report under subregulation (1); and

Regulation 103.125

- (b) does not, in accordance with the requirements prescribed by the Part 103 Manual of Standards for the purposes of this paragraph, provide a copy of the report to the following:
 - (i) CASA;
 - (ii) each other Part 103 ASAO prescribed by the Part 103 Manual of Standards for the purposes of this subparagraph;
 - (iii) the manufacturer of the aircraft.

Recording of defects

- (3) A person contravenes this subregulation if the person:
 - (a) is the owner or operator of a Part 103 aircraft that is administered by a Part 103 ASAO; and
 - (b) knows there is a major defect in the aircraft; and
 - (c) does not record the defect, in accordance with the requirements prescribed by the Part 103 Manual of Standards for the purposes of this paragraph.
- (4) The pilot in command of a Part 103 aircraft for a flight contravenes this subregulation if:
 - (a) the aircraft is administered by a Part 103 ASAO; and
 - (b) a major defect in the aircraft has been recorded in accordance with subregulation (3); and
 - (c) when the flight begins, a person authorised by the Part 103 ASAO has not signed a release to service for the aircraft in relation to the defect.

Offences

- (5) A person commits an offence if the person contravenes subregulation (1), (2), or (3).

Penalty: 50 penalty units.

- (6) A person commits an offence of strict liability if the person contravenes subregulation (4).

Penalty: 50 penalty units.

Subpart 103.Z—Towing of Part 103 aircraft by other aircraft

103.130 Towing of Part 103 aircraft by other aircraft

- (1) The Part 103 Manual of Standards may prescribe requirements in relation to the towing of a Part 103 aircraft by an aircraft that is not a Part 103 aircraft.
- (2) The pilot in command of an aircraft for a flight contravenes this subregulation if a requirement mentioned in subregulation (1) is not met for the flight.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Part 105—Parachuting from aircraft

Table of contents

Subpart 105.A—Preliminary

- 105.005 Application of Part 105
- 105.010 Key definitions for Part 105
- 105.015 Issue of Manual of Standards for Part 105

Subpart 105.C—General

Division 105.C.1—General flight limitations

- 105.020 Parachutists must not create hazards
- 105.025 Persons must not create hazards to aircraft operated to facilitate parachute descents

Division 105.C.2—Operational documents

Division 105.C.3—Flight related documents

Division 105.C.4—Reporting and recording defects, incidents etc.

- 105.045 Reserve parachutes and emergency parachutes—reporting of major defects by maintainers
- 105.050 Reserve parachutes—reporting of major defects by parachutists

Division 105.C.5—Search and rescue services and emergency and survival equipment

- 105.055 Reserve parachute and emergency parachute equipment requirements
- 105.060 Defective reserve parachutes and defective emergency parachutes

Division 105.C.6—Miscellaneous requirements

- 105.065 Requirements for undertaking parachuting activities
- 105.070 Additional obligations applying to parachute operators
- 105.075 Permission to undertake parachute descent
- 105.080 General requirements for aircraft used for parachute descents
- 105.085 Requirements for aircraft used for descents by trainee parachutists and tandem parachutists
- 105.090 Dropping things over populous areas
- 105.095 Dropping things other than over populous areas

Subpart 105.D—Operational requirements

- 105.100 Additional requirements in relation to parachuting activities
- 105.105 Restraint of persons other than flight crew members
- 105.110 Persons other than flight crew members—compliance with safety directions
- 105.115 Restrictions on aircraft occupants for descents by trainee parachutists and tandem parachutists

Subpart 105.G—Personnel fatigue management

- 105.120 Management of fatigue in relation to persons exercising certain parachute descent duties

Subpart 105.J—Weight and balance

105.125 Loading of aircraft used for parachute descents

Subpart 105.K—Instruments, indicators, equipment and systems

105.130 Requirements relating to radio equipment and oxygen equipment

Subpart 105.N—Flight crew

105.135 Pilot requirements for parachute descents—Part 103 aircraft

105.140 Pilot requirements for parachute descents—aeroplanes

105.145 Pilot requirements for parachute descents—helicopters

105.150 Pilot requirements for parachute descents—powered-lift aircraft

105.155 Pilot requirements for parachute descents—manned free balloons

Subpart 105.A—Preliminary

105.005 Application of Part 105

This Part does not apply in relation to:

- (a) parachutes that are not personnel parachutes; or
- (b) parachute descents that are not from aircraft; or
- (c) emergency parachute descents.

105.010 Key definitions for Part 105

In these Regulations:

emergency parachute has the meaning given by the Part 105 Manual of Standards.

major defect means:

- (a) for an emergency parachute—a defect of any part of the emergency parachute that may affect the safe operation of the parachute or cause the parachute to become a danger to persons or property;
- (b) for a reserve parachute—a defect of any part of the reserve parachute assembly that may affect the safe operation of the parachute or cause the parachute to become a danger to persons or property.

parachute does not include a parasail or a powered parachute.

parachute operator means a person who carries on a business or undertaking involving the provision of services or equipment for undertaking parachute descents.

parachuting activity means any of the following:

- (a) a parachute descent;
- (b) packing a parachute;
- (c) maintaining a parachute;
- (d) assembling a parachute;
- (e) supervising a parachute descent;
- (f) operating an aircraft to facilitate a parachute descent;
- (g) providing training in an activity covered by paragraphs (a) to (f);
- (h) carrying on a business or undertaking involving the provision of services or equipment for undertaking a parachute descent;
- (i) an activity prescribed by the Part 105 Manual of Standards.

Part 105 ASAO means an ASAO whose approved function is or includes administering a parachuting activity.

reserve parachute has the meaning given by the Part 105 Manual of Standards.

Regulation 105.015

reserve parachute assembly has the meaning given by the Part 105 Manual of Standards.

tandem parachutist means a person undertaking a parachute descent in which the person's harness is attached to the harness of another person who is in control of the descent.

trainee parachutist has the meaning given by the Part 105 Manual of Standards.

105.015 Issue of Manual of Standards for Part 105

For the purposes of subsection 98(5A) of the Act, CASA may issue a Manual of Standards for this Part prescribing matters:

- (a) required or permitted by these Regulations to be prescribed by the Part 105 Manual of Standards; or
- (b) necessary or convenient to be prescribed for carrying out or giving effect to this Part.

Note: A Manual of Standards is a legislative instrument: see subsection 98(5AA) of the Act.

Subpart 105.C—General

Division 105.C.1—General flight limitations

105.020 Parachutists must not create hazards

- (1) A person contravenes this subregulation if the person undertakes a parachute descent in a way that creates a hazard to an aircraft, another person or property.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

105.025 Persons must not create hazards to aircraft operated to facilitate parachute descents

- (1) A person contravenes this subregulation if the person does an act that creates a hazard to an aircraft that is being operated to facilitate a parachute descent.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 105.C.2—Operational documents

Note: This Division is reserved for future use.

Division 105.C.3—Flight related documents

Note: This Division is reserved for future use.

Division 105.C.4—Reporting and recording defects, incidents etc.

105.045 Reserve parachutes and emergency parachutes—reporting of major defects by maintainers

- (1) This regulation applies to a person if the person holds an authorisation from a Part 105 ASAO to carry out maintenance on:
 - (a) reserve parachutes; or
 - (b) emergency parachutes.
- (2) A person contravenes this subregulation if the person:
 - (a) carries out maintenance on a reserve parachute or emergency parachute; and
 - (b) knows there is a major defect in the parachute; and
 - (c) does not report the defect to the Part 105 ASAO within 3 business days after becoming aware of the defect.
- (3) The report must:
 - (a) be made in writing; and
 - (b) be made in a form approved by the Part 105 ASAO; and
 - (c) contain the following information:
 - (i) the make and type of the parachute;
 - (ii) the serial number of the parachute;
 - (iii) the name and address of the owner of the parachute;
 - (iv) a description of the defect;
 - (v) how the defect may affect the safety of the parachute or cause the parachute to become a danger to persons or property.
- (4) An ASAO contravenes this subregulation if the ASAO:
 - (a) receives a report under subregulation (2); and
 - (b) does not provide a copy of the report to the following within 3 business days of receiving the report:
 - (i) CASA;
 - (ii) the manufacturer of the parachute;
 - (iii) all other Part 105 ASAOs.
- (5) A person commits an offence if the person contravenes subregulation (2) or (4).
Penalty: 50 penalty units.

105.050 Reserve parachutes—reporting of major defects by parachutists

- (1) This regulation applies to a person if the person holds an authorisation from a Part 105 ASAO to undertake a parachute descent.
 - (2) A person contravenes this subregulation if the person:
-

Part 105 Parachuting from aircraft

Subpart 105.C General

Division 105.C.4 Reporting and recording defects, incidents etc.

Regulation 105.050

- (a) knows there is a major defect in the reserve parachute; and
 - (b) knows that the major defect has not been reported to the Part 105 ASAO;
and
 - (c) does not report the defect to the Part 105 ASAO within 3 business days
after becoming aware of the defect.
- (3) The report must:
- (a) be made in writing; and
 - (b) be made in a form approved by the Part 105 ASAO; and
 - (c) contain the following information:
 - (i) the make and type of the parachute;
 - (ii) the serial number of the parachute;
 - (iii) the name and address of the owner of the parachute;
 - (iv) a description of the defect;
 - (v) how the defect may affect the safety of the parachute or cause the
parachute to become a danger to persons or property.
- (4) An ASAO contravenes this subregulation if the ASAO:
- (a) receives a report under subregulation (2); and
 - (b) does not provide a copy of the report to the following within 3 business
days of receiving the report:
 - (i) CASA;
 - (ii) the manufacturer of the reserve parachute;
 - (iii) all other Part 105 ASAOs.
- (5) A person commits an offence if the person contravenes subregulation (2) or (4).
- Penalty: 50 penalty units.

Division 105.C.5—Search and rescue services and emergency and survival equipment

105.055 Reserve parachute and emergency parachute equipment requirements

Reserve parachutes

- (1) A person contravenes this subregulation if:
 - (a) the person undertakes a parachute descent; and
 - (b) the person is not equipped with a reserve parachute that meets the requirements in subregulation (3).
- (2) A person contravenes this subregulation if:
 - (a) the person provides a reserve parachute to another person for the purposes of the other person undertaking a parachute descent; and
 - (b) the reserve parachute does not meet the requirements in subregulation (3).
- (3) The requirements are as follows:
 - (a) the reserve parachute assembly must meet the requirements prescribed by the Part 105 Manual of Standards;
 - (b) the reserve parachute assembly must have been maintained in accordance with the requirements prescribed by the Part 105 Manual of Standards.

Emergency parachutes

- (4) A person contravenes this subregulation if:
 - (a) the person provides an emergency parachute to another person for carriage on board an aircraft prescribed by the Part 105 Manual of Standards; and
 - (b) the emergency parachute does not meet the requirements in subregulation (5).
- (5) The requirements are as follows:
 - (a) the emergency parachute must meet the requirements prescribed by the Part 105 Manual of Standards;
 - (b) the emergency parachute must have been maintained in accordance with the requirements prescribed by the Part 105 Manual of Standards.

Offence

- (6) A person commits an offence of strict liability if the person contravenes subregulation (1), (2) or (4).

Penalty: 50 penalty units.

Regulation 105.060

105.060 Defective reserve parachutes and defective emergency parachutes

Defective reserve parachutes

- (1) A person contravenes this subregulation if:
 - (a) the person undertakes a parachute descent; and
 - (b) the person is equipped with a defective reserve parachute.
- (2) Subregulation (1) does not apply if the person is a tandem parachutist or a trainee parachutist.

Defective reserve parachutes and defective emergency parachutes

- (3) A person contravenes this subregulation if the person provides a defective reserve parachute or a defective emergency parachute to another person for the purposes of the other person undertaking a parachute descent.

Offence

- (4) A person commits an offence of strict liability if the person contravenes subregulation (1) or (3).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

Defective reserve parachute

- (5) For the purposes of this regulation, a **defective reserve parachute** means a reserve parachute:
 - (a) that is covered by a report under regulation 105.045 or 105.050; or
 - (b) that is covered by an airworthiness directive; or
 - (c) whose assembly does not meet a requirement prescribed by the Part 105 Manual of Standards for the purposes of paragraph 105.055(3)(a); or
 - (d) for which the manufacturer of the parachute has issued a notice stating that action must be taken in relation to the parachute to ensure the safety of air navigation and that action has not been taken.

Defective emergency parachute

- (6) For the purposes of this regulation, a **defective emergency parachute** means an emergency parachute:
 - (a) that is covered by a report under regulation 105.045; or
 - (b) that is covered by an airworthiness directive; or
 - (c) that does not meet a requirement prescribed by the Part 105 Manual of Standards for the purposes of paragraph 105.055(5)(a); or
 - (d) for which the manufacturer of the parachute has issued a notice stating that action must be taken in relation to the parachute to ensure the safety of air navigation and that action has not been taken.

Division 105.C.6—Miscellaneous requirements

105.065 Requirements for undertaking parachuting activities

Parachuting activity must be authorised

- (1) A person contravenes this subregulation if the person:
 - (a) undertakes a parachuting activity; and
 - (b) does not hold an authorisation from a Part 105 ASAO authorising the person to undertake the activity.

Parachuting activity must be undertaken in accordance with authorisation

- (2) A person contravenes this subregulation if the person:
 - (a) undertakes a parachuting activity; and
 - (b) holds an authorisation from a Part 105 ASAO authorising the person to undertake the activity; and
 - (c) undertakes the activity in a way that contravenes the authorisation.

Offence

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

105.070 Additional obligations applying to parachute operators

- (1) A parachute operator must take reasonable steps to ensure that each person employed or otherwise engaged by the operator to provide services or equipment for undertaking parachute descents:
 - (a) is aware of the obligations imposed on persons under this Part; and
 - (b) complies with any written procedures of the operator relating to the safe provision of those services or that equipment.
- (2) A parachute operator must take reasonable steps to ensure that a person to whom the operator provides services or equipment for undertaking parachute descents:
 - (a) is aware of the obligations imposed on the person under this Part; and
 - (b) complies with any written procedures of the operator relating to the safe conduct of parachute descents.
- (3) A person commits an offence if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

Regulation 105.075

105.075 Permission to undertake parachute descent

- (1) This regulation applies in relation to a person undertaking a parachute descent other than as a tandem parachutist.
- (2) A person (the *parachutist*) contravenes this subregulation if:
 - (a) the parachutist undertakes a parachute descent; but
 - (b) before the parachutist exits the aircraft to begin the parachute descent, the pilot in command of the aircraft, or a person nominated by the pilot, has not given permission for the parachutist to do so.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

105.080 General requirements for aircraft used for parachute descents

- (1) The pilot in command of an aircraft contravenes this subregulation if:
 - (a) the aircraft is being operated to facilitate a parachute descent; and
 - (b) the aircraft is not one of the following:
 - (i) a Part 103 aircraft;
 - (ii) an aeroplane;
 - (iii) a helicopter;
 - (iv) a powered-lift aircraft;
 - (v) a manned free balloon.
- (2) The pilot in command of a Part 103 aircraft contravenes this subregulation if the aircraft is being operated to facilitate a parachute descent by either or both of the following:
 - (a) a trainee parachutist;
 - (b) a tandem parachutist.
- (3) The pilot in command of an aircraft (other than a Part 103 aircraft) contravenes this subregulation if:
 - (a) the aircraft is being operated to facilitate a parachute descent by either or both of the following:
 - (i) a trainee parachutist;
 - (ii) a tandem parachutist; and
 - (b) the pilot does not meet the pilot training requirements prescribed by the Part 105 Manual of Standards for the purposes of this paragraph.
- (4) The pilot in command of a multi-engine aeroplane or a single-engine turbine-powered aeroplane contravenes this subregulation if:
 - (a) the aircraft is being operated to facilitate a parachute descent by either or both of the following:
 - (i) a trainee parachutist;
 - (ii) a tandem parachutist; and

- (b) the pilot does not meet the flight time required by subregulation (5).
- (5) The flight time required by this subregulation is:
 - (a) if the aircraft is a multi-engine aeroplane:
 - (i) at least 10 hours of experience as pilot in command of the type of aircraft being operated; or
 - (ii) at least 100 hours of experience as pilot in command, or as pilot in command under supervision, of a multi-engine aeroplane; or
 - (b) if the aircraft is a single-engine turbine-powered aeroplane:
 - (i) at least 10 hours of experience as pilot in command of the type of aircraft being operated; or
 - (ii) at least 100 hours of experience as pilot in command, or as pilot in command under supervision, of a multi-engine aeroplane or a single-engine turbine-powered aeroplane.
- (6) The pilot in command of a powered-lift aircraft contravenes this subregulation if:
 - (a) the aircraft is being operated to facilitate a parachute descent by either or both of the following:
 - (i) a trainee parachutist;
 - (ii) a tandem parachutist; and
 - (b) the pilot does not meet the flight time requirements prescribed by the Part 105 Manual of Standards for the purposes of this paragraph.
- (7) A person commits an offence of strict liability if the person contravenes subregulation (1), (2), (3), (4) or (6).

Penalty: 50 penalty units.

- (8) In this regulation:

flight time has the same meaning as in Part 61.

multi-engine aeroplane has the same meaning as in Part 61.

105.085 Requirements for aircraft used for descents by trainee parachutists and tandem parachutists

- (1) This regulation applies if an aircraft is being operated to facilitate a parachute descent by either or both of the following:
 - (a) a trainee parachutist;
 - (b) a tandem parachutist.
- (2) The operator and the pilot in command of an aircraft each contravene this subregulation if the aircraft does not meet a requirement mentioned in subregulation (3).
- (3) The requirements are as follows:
 - (a) a standard certificate of airworthiness must be in force for the aircraft;

Regulation 105.090

- (b) if the certificate of airworthiness is granted subject to a condition or requirement—the condition or requirement must be complied with;
 - (c) there must be either:
 - (i) a certificate of release to service for the most recent maintenance carried out on the aircraft; or
 - (ii) a maintenance release for the aircraft;
 - (d) the aircraft and each of the aircraft's engines must have been maintained in accordance with the requirements prescribed by the Part 105 Manual of Standards.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

105.090 Dropping things over populous areas

- (1) A person contravenes this subregulation if:
- (a) the person undertakes a parachute descent over a populous area; and
 - (b) the person causes a thing to be dropped:
 - (i) from the aircraft before the descent; or
 - (ii) during the descent; and
 - (c) the thing is dropped otherwise than in accordance with any requirements prescribed by the Part 105 Manual of Standards for the purposes of this paragraph.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

105.095 Dropping things other than over populous areas

- (1) A person contravenes this subregulation if:
- (a) the person undertakes a parachute descent other than over a populous area; and
 - (b) the person causes a thing to be dropped:
 - (i) from the aircraft before the descent; or
 - (ii) during the descent; and
 - (c) either or both of the following apply:
 - (i) the thing is dropped otherwise than in accordance with an authorisation from a Part 105 ASAO to cause the thing to be dropped;
 - (ii) the thing is dropped otherwise than in accordance with any requirements prescribed by the Part 105 Manual of Standards for the purposes of this paragraph.
- (2) A person contravenes this subregulation if:
- (a) the person undertakes a parachute descent; and

Regulation 105.095

- (b) the person causes a thing to be dropped:
 - (i) from the aircraft before the descent; or
 - (ii) during the descent; and
 - (c) the thing creates a hazard to another aircraft, a person or property.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

Subpart 105.D—Operational requirements

105.100 Additional requirements in relation to parachuting activities

- (1) The Part 105 Manual of Standards may prescribe additional requirements in relation to undertaking parachuting activities.
- (2) Without limiting subregulation (1), the Part 105 Manual of Standards may prescribe requirements relating to the following:
 - (a) commencing parachute descents;
 - (b) the making of broadcasts by pilots in command of aircraft being operated to facilitate parachute descents;
 - (c) entering cloud during parachute descents;
 - (d) descents through different classes of airspace or in restricted areas;
 - (e) descents that involve landings near public gatherings;
 - (f) descents that involve landings in populous areas;
 - (g) packing, inspecting, maintaining, assembling, repairing, modifying or altering reserve parachutes, reserve parachute assemblies or emergency parachutes;
 - (h) the safe management of parachuting drop zones.
- (3) A person contravenes this subregulation if:
 - (a) the person is subject to a requirement mentioned in subregulation (1); and
 - (b) the person does not comply with the requirement.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (3).

Penalty: 50 penalty units.

105.105 Restraint of persons other than flight crew members

- (1) The pilot in command of an aircraft contravenes this subregulation if:
 - (a) the aircraft is being operated to facilitate a parachute descent; and
 - (b) a person is carried on the aircraft who is not a flight crew member; and
 - (c) the person is not provided with any of the following restraint devices:
 - (i) a seatbelt;
 - (ii) a shoulder harness;
 - (iii) a single-point or dual-point restraint that is an approved restraint device.
- (2) The pilot in command of an aircraft contravenes this subregulation if:
 - (a) the aircraft is being operated to facilitate a parachute descent; and
 - (b) a person is carried on the aircraft who is not a flight crew member; and
 - (c) the person:

Regulation 105.110

- (i) is provided with a restraint device mentioned in paragraph (1)(c); but
 - (ii) is not provided with instructions for the use of the device.
- (3) The pilot in command of an aircraft contravenes this subregulation if:
 - (a) the aircraft is being operated to facilitate a parachute descent; and
 - (b) a person is carried on the aircraft who is not a flight crew member; and
 - (c) the person is provided with a restraint device mentioned in paragraph (1)(c); and
 - (d) before doing any of the following, the requirement mentioned in subregulation (4) is not met:
 - (i) taxiing;
 - (ii) taking off;
 - (iii) landing.
- (4) The requirement is that the person must be directed to fasten the person's restraint device.
- (5) The pilot in command of an aircraft contravenes this subregulation if:
 - (a) the aircraft is being operated to facilitate a parachute descent; and
 - (b) a person is carried on the aircraft who is not a flight crew member; and
 - (c) the person is provided with a restraint device mentioned in paragraph (1)(c); and
 - (d) the pilot in command has reason to believe it is necessary, for the safety of the person, that the person's restraint device is fastened; and
 - (e) the pilot in command does not direct the person to fasten the person's restraint device.
- (6) A person commits an offence of strict liability if the person contravenes subregulation (1), (2), (3) or (5).
Penalty: 50 penalty units.
- (7) For the purposes of this regulation, a restraint device is an ***approved restraint device*** if it is approved by CASA under regulation 21.305.

105.110 Persons other than flight crew members—compliance with safety directions

- (1) A person contravenes this subregulation if:
 - (a) a person is carried on an aircraft being operated to facilitate a parachute descent; and
 - (b) the person is not a flight crew member; and
 - (c) a direction mentioned in subregulation 105.105(4) or paragraph 105.105(5)(e) is given to the person; and
 - (d) the person does not comply with the direction.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Regulation 105.115

Penalty: 50 penalty units.

105.115 Restrictions on aircraft occupants for descents by trainee parachutists and tandem parachutists

- (1) This regulation applies if an aircraft is being operated to facilitate a parachute descent by either or both of the following:
 - (a) a trainee parachutist;
 - (b) a tandem parachutist.
- (2) The pilot in command of the aircraft contravenes this subregulation if a person is carried on the aircraft and the person is not:
 - (a) undertaking a parachute descent from the aircraft; or
 - (b) a crew member; or
 - (c) an officer, or delegate of CASA, who is on board the aircraft to carry out the officer's or delegate's duties; or
 - (d) performing a duty in accordance with the exposition of a Part 105 ASAO; or
 - (e) authorised by a Part 105 ASAO to be carried on the flight for training purposes.
- (3) Subregulation (2) does not apply if:
 - (a) the aircraft is a manned free balloon; and
 - (b) the pilot in command holds an authorisation from a Part 105 ASAO to carry the person on board the balloon.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (3): see subsection 13.3(3) of the *Criminal Code*.

Subpart 105.G—Personnel fatigue management

105.120 Management of fatigue in relation to persons exercising certain parachute descent duties

- (1) The Part 105 Manual of Standards may prescribe requirements in relation to managing the risk of fatigue in persons who exercise a duty in relation to the operation of aircraft being operated to facilitate parachute descents.
- (2) A person contravenes this subregulation if:
 - (a) the person is subject to a requirement mentioned in subregulation (1); and
 - (b) the person does not comply with the requirement.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Subpart 105.J—Weight and balance

105.125 Loading of aircraft used for parachute descents

- (1) The Part 105 Manual of Standards may prescribe requirements in relation to the loading of aircraft being operated to facilitate a parachute descent.
- (2) Without limiting subregulation (1), the Part 105 Manual of Standards may prescribe requirements relating to one or more of the following:
 - (a) aircraft loading procedures that must be followed;
 - (b) aircraft loading system requirements;
 - (c) the making and retention of aircraft loading records.
- (3) A person contravenes this subregulation if:
 - (a) the person is subject to a requirement mentioned in subregulation (1); and
 - (b) the person does not comply with the requirement.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (3).

Penalty: 50 penalty units.

Subpart 105.K—Instruments, indicators, equipment and systems

105.130 Requirements relating to radio equipment and oxygen equipment

- (1) The Part 105 Manual of Standards may prescribe requirements relating to one or more of the following:
 - (a) radio equipment that must be carried on aircraft that are being operated to facilitate parachute descents;
 - (b) oxygen equipment that must be carried on aircraft that are being operated to facilitate parachute descents;
 - (c) the circumstances in which equipment mentioned in paragraph (a) or (b) must be used.
- (2) A person contravenes this subregulation if:
 - (a) the person is subject to a requirement mentioned in subregulation (1); and
 - (b) the person does not comply with the requirement.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Subpart 105.N—Flight crew

105.135 Pilot requirements for parachute descents—Part 103 aircraft

- (1) This regulation applies if a Part 103 aircraft is being operated to facilitate a parachute descent.
- (2) The pilot in command of the aircraft contravenes this subregulation if:
 - (a) the pilot does not satisfy the requirements prescribed by the Part 105 Manual of Standards for the purposes of this paragraph; or
 - (b) the aircraft does not satisfy the requirements prescribed by the Part 105 Manual of Standards for the purposes of this paragraph.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

105.140 Pilot requirements for parachute descents—aeroplanes

- (1) This regulation applies if an aeroplane (other than a Part 103 aircraft) is being operated to facilitate a parachute descent.
- (2) The pilot in command of the aeroplane contravenes this subregulation if none of the following apply:
 - (a) the pilot holds an air transport pilot licence with an aeroplane category rating;
 - (b) the pilot holds a commercial pilot licence with an aeroplane category rating;
 - (c) the pilot has both:
 - (i) a private pilot licence with an aeroplane category rating; and
 - (ii) the aeronautical experience mentioned in regulation 61.610.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

105.145 Pilot requirements for parachute descents—helicopters

- (1) This regulation applies if a helicopter (other than a Part 103 aircraft) is being operated to facilitate a parachute descent.
- (2) The pilot in command of the helicopter contravenes this subregulation if none of the following apply:
 - (a) the pilot holds an air transport pilot licence with a helicopter category rating;
 - (b) the pilot holds a commercial pilot licence with a helicopter category rating;

Regulation 105.150

- (c) the pilot has both:
 - (i) a private pilot licence with a helicopter category rating; and
 - (ii) the aeronautical experience mentioned in regulation 61.610 in a helicopter.
 - (3) A person commits an offence of strict liability if the person contravenes subregulation (2).
- Penalty: 50 penalty units.

105.150 Pilot requirements for parachute descents—powered-lift aircraft

- (1) This regulation applies if a powered-lift aircraft is being operated to facilitate a parachute descent.
 - (2) The pilot in command of the aircraft contravenes this subregulation if none of the following apply:
 - (a) the pilot holds an air transport pilot licence with a powered-lift aircraft category rating;
 - (b) the pilot holds a commercial pilot licence with a powered-lift aircraft category rating;
 - (c) the pilot has both:
 - (i) a private pilot licence with a powered-lift aircraft category rating; and
 - (ii) the aeronautical experience mentioned in regulation 61.610 in a powered-lift aircraft.
 - (3) A person commits an offence of strict liability if the person contravenes subregulation (2).
- Penalty: 50 penalty units.

105.155 Pilot requirements for parachute descents—manned free balloons

- (1) This regulation applies if a manned free balloon is being operated to facilitate a parachute descent.
- (2) The pilot in command of the balloon contravenes this subregulation if none of the following apply:
 - (a) the pilot holds a commercial pilot (balloon) licence;
 - (b) the pilot has both:
 - (i) an authorisation from a Part 131 ASAO that authorises the pilot to operate a manned free balloon; and
 - (ii) at least 75 hours of experience as pilot in command of a manned free balloon;
 - (c) the pilot meets the requirements prescribed by the Part 105 Manual of Standards for the purposes of this subregulation.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Part 105 Parachuting from aircraft
Subpart 105.N Flight crew

Regulation 105.155

Penalty: 50 penalty units.

Part 115—Commercial sport and recreational aviation operations

Note: This Part heading is reserved for future use.

Part 117—Representations and surveys

Contents of Part 117

- 117.005 What this Part is about
- 117.010 Misrepresentations about holding certain civil aviation authorisations
- 117.015 Safety-related surveys or questionnaires—holders of certain civil aviation authorisations
- 117.020 Owner or registered operator to provide information about aircraft
- 117.025 Owner or registered operator to provide traffic reports
- 117.030 Protection of information

117.005 What this Part is about

This Part provides for offences for:

- (a) misrepresentations about holding certain civil aviation authorisations; and
- (b) not completing safety-related surveys or questionnaires; and
- (c) not providing statistical information about aircraft; and
- (d) not providing traffic reports.

117.010 Misrepresentations about holding certain civil aviation authorisations

- (1) A person commits an offence if:
 - (a) the person represents to another person, in any way, that the person is willing to conduct an activity using an aircraft; and
 - (b) the person does not hold a particular civil aviation authorisation authorising the person to conduct the activity using the aircraft; and
 - (c) under the Act or these Regulations, it is an offence for a person to conduct the activity using the aircraft if the person does not hold the civil aviation authorisation.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

Note: For the definition of *civil aviation authorisation*, see section 3 of the Act.

117.015 Safety-related surveys or questionnaires—holders of certain civil aviation authorisations

- (1) CASA may, by written notice given to a person mentioned in subregulation (2), direct the person to:
 - (a) complete a safety-related survey or questionnaire by accurately answering all mandatory questions in the survey or questionnaire; and
 - (b) submit the completed survey or questionnaire to CASA within the time stated in the notice.
- (2) For subregulation (1), the persons are the following:

Regulation 117.020

- (a) the holder of an AOC;
 - (b) a Part 141 operator who conducts flight training in aircraft;
 - (c) a person who gave a notice to CASA under regulation 101.372 (Notice to operate very small RPA for hire or reward);
 - (d) the holder of a certificate as an RPA operator under Division 101.F.4;
 - (e) the holder of an aerial work certificate;
 - (f) the holder of an approval under regulation 131.035 to conduct a specialised balloon operation.
- (3) The person may, before the end of the time stated in the notice, apply in writing to CASA for an extension.
- (4) CASA may, by written notice given to the person (the *notice of extension*), grant the extension.
- (5) The person commits an offence if the person does not comply with the direction within:
- (a) if CASA grants an extension under subregulation (4)—the time stated in the notice of extension; or
 - (b) if paragraph (a) does not apply—the time stated in the notice under subregulation (1).

Penalty: 25 penalty units.

- (6) An offence against this regulation is an offence of strict liability.

117.020 Owner or registered operator to provide information about aircraft

- (1) CASA may, by written notice given to the owner of an aircraft or the registered operator of the aircraft if the owner is not the registered operator of the aircraft, direct the person to:
- (a) collect specified statistical and other information relating to the aircraft, including information in relation to any of the following:
 - (i) operations of the aircraft;
 - (ii) passengers or cargo carried by the aircraft;
 - (iii) crew members of the aircraft;
 - (iv) modifications, repairs, damage or defects in the aircraft; and
 - (b) provide the information to CASA within the time stated in the notice.
- (2) The person may, before the end of the time stated in the notice, apply in writing to CASA for an extension.
- (3) CASA may, by written notice given to the person, grant the extension.
- (4) If CASA gives a person a direction under this regulation, the person must comply with the direction:
- (a) if CASA grants an extension under subregulation (3)—within the time stated in the notice of extension; or
 - (b) otherwise—within the time stated in the notice under subregulation (1).

Regulation 117.025

- (5) A person commits an offence of strict liability if the person contravenes subregulation (4).

Penalty: 25 penalty units.

117.025 Owner or registered operator to provide traffic reports

- (1) CASA may, by written notice given to the owner of an aircraft engaged in air transport operations or the registered operator of the aircraft if the owner is not the registered operator of the aircraft, direct the person to:
- (a) prepare traffic reports; and
 - (b) provide the traffic reports to CASA within the time stated in the notice.
- (2) The person may, before the end of the time stated in the notice, apply in writing to CASA for an extension.
- (3) CASA may, by written notice given to the person, grant the extension.
- (4) If CASA gives a person a direction under this regulation, the person must comply with the direction:
- (a) if CASA grants an extension under subregulation (3)—within the time stated in the notice of extension; or
 - (b) otherwise—within the time stated in the notice under subregulation (1).
- (5) A person commits an offence of strict liability if the person contravenes subregulation (4).

Penalty: 25 penalty units.

117.030 Protection of information

When this regulation applies

- (1) This regulation does not apply in relation to personal information.

Note: For disclosure of personal information, see regulation 201.016.

Information must not be disclosed except in certain circumstances

- (2) A person to whom information has been disclosed under regulation 117.020 or 117.025 must not disclose the information.
- (3) Subregulation (2) does not apply if:
- (a) the disclosure is for the purposes of these Regulations or the Act; or
 - (b) the disclosure is authorised or required by a law of the Commonwealth; or
 - (c) the disclosure is in connection with compliance with a requirement of the Chicago Convention; or
 - (e) the disclosure is with the consent of the person to whom the information disclosed relates.

Regulation 117.030

- (4) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 25 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (3): see subsection 13.3(3) of the *Criminal Code*.

Part 119—Australian air transport operators—certification and management

Table of contents

Subpart 119.A—General

- 119.005 What Part 119 is about
- 119.010 Definition of *Australian air transport operation*
- 119.015 Definitions of *Australian air transport AOC* and *Australian air transport operator*
- 119.020 Definition of *significant change*
- 119.025 Approvals by CASA for Part 119
- 119.030 Prescribed purpose—Australian air transport operations
- 119.035 Prescribed position—safety manager
- 119.036 Required position—head of training and checking
- 119.040 Required material for reference library
- 119.045 Issue of Manual of Standards for Part 119
- 119.050 Australian air transport AOC required
- 119.055 Compliance with Australian air transport AOCs
- 119.060 Compliance with conditions of Australian air transport AOCs

Subpart 119.B—Australian air transport AOCs

- 119.065 Application
- 119.070 Conditions for issue
- 119.075 Approval of exposition
- 119.080 Conditions of an Australian air transport AOC

Subpart 119.C—Changes relating to Australian air transport operators

- 119.085 Changes of name etc.
- 119.090 Application for approval of significant changes
- 119.095 Approval of significant changes
- 119.100 Changes must be made in accordance with process in exposition
- 119.105 CASA directions relating to exposition or key personnel

Subpart 119.D—Organisation and personnel

- 119.110 Organisation and personnel
- 119.115 When key personnel cannot carry out responsibilities
- 119.120 Familiarisation training for key personnel
- 119.125 Chief executive officer—experience
- 119.130 Chief executive officer—responsibilities and accountabilities
- 119.135 Head of flying operations—qualifications and experience
- 119.140 Head of flying operations—responsibilities
- 119.145 Head of training and checking—qualifications and experience
- 119.150 Head of training and checking—responsibilities
- 119.155 Safety manager—experience
- 119.160 Safety manager—responsibilities
- 119.165 Key personnel—additional qualification and experience requirements

Subpart 119.E—Training and checking for operational safety-critical personnel

- 119.170 Training and checking system
- 119.175 Program for training and assessment in human factors principles and non-technical skills
- 119.180 Training in human factors principles and non-technical skills for flight crew etc.
- 119.185 Training in human factors principles and non-technical skills for other operational safety-critical personnel

Subpart 119.F—Safety management

- 119.190 Safety management system requirements
- 119.195 Flight data analysis program requirements

Subpart 119.G—Personnel fatigue management

Subpart 119.H—Expositions for Australian air transport operators

- 119.205 Content of exposition
- 119.210 Compliance with exposition by operator
- 119.215 Providing personnel with exposition
- 119.220 Compliance with exposition by personnel

Subpart 119.J—Records and documents

- 119.225 Personnel training and checking records—making records
- 119.230 Personnel training and checking records—availability of records
- 119.235 Copies of flight crew licences and medical certificates
- 119.240 Retention periods for personnel records
- 119.245 Retention periods for flight-related documents
- 119.250 Retention periods for other flight-related records

Subpart 119.K—Miscellaneous offences

- 119.255 Dealings in relation to cancelled, suspended, varied, pending or refused civil aviation authorisations
- 119.260 Maximum period for use of foreign registered aircraft in Australian territory

Subpart 119.A—General

119.005 What Part 119 is about

This Part makes provision for applicants for, and holders of, AOCs that authorise the operation of aeroplanes or rotorcraft for Australian air transport operations.

Note 1: See also Division 2 (Air Operators' Certificates (AOCs)) of Part III of the Act in relation to AOCs generally.

Note 2: A person must hold an AOC under this Part to conduct any of the following:

- (a) Part 121 operations;
- (b) Part 133 operations;
- (c) Part 135 operations.

119.010 Definition of *Australian air transport operation*

- (1) An operation is an *Australian air transport operation* if the operation is any of the following:
 - (a) an air transport operation conducted by an Australian operator using a registered aeroplane or rotorcraft;
 - (b) an air transport operation:
 - (i) that is a flight into or out of Australian territory or an operation in Australian territory; and
 - (ii) that is conducted by an Australian operator using an aeroplane or rotorcraft that is a foreign registered aircraft;
 - (c) an air transport operation:
 - (i) that is conducted by an Australian operator using an aeroplane or rotorcraft; and
 - (ii) that is provided for under the ANZA mutual recognition agreements;
 - (d) an air transport operation conducted by a foreign operator:
 - (i) using an aeroplane or rotorcraft that is a foreign registered aircraft; and
 - (ii) undertaken wholly within Australia; and
 - (iii) not undertaken as part of a flight into or out of Australian territory;
 - (e) an operation, conducted using an aeroplane or rotorcraft, of a kind prescribed by the Part 119 Manual of Standards for the purposes of this paragraph.
- (2) However, each of the following is not an *Australian air transport operation*:
 - (a) the operation of an aeroplane or rotorcraft under a permission under:
 - (i) section 25 (non-scheduled flights by foreign registered aircraft) of the Act; or
 - (ii) section 27A (permission for operation of foreign registered aircraft without AOC) of the Act;

- (b) an air transport operation authorised by a New Zealand AOC with ANZA privileges that is in force for Australia;
- (c) an operation of an aircraft to which Part 129 (foreign air transport operations) of these Regulations applies;
- (d) an operation, conducted using an aeroplane or rotorcraft, of a kind prescribed by the Part 119 Manual of Standards for the purposes of this paragraph.

Note: See Part 129 for provisions relating to foreign operators conducting flights into or out of Australian territory, or flights wholly within Australian territory that are conducted as part of flights into or out of Australian territory.

119.015 Definitions of *Australian air transport AOC* and *Australian air transport operator*

- (1) An *Australian air transport AOC* is an AOC that authorises the operation of an aeroplane or rotorcraft for an Australian air transport operation.
- (2) An *Australian air transport operator* is a person who holds an Australian air transport AOC.

119.020 Definition of *significant change*

A *significant change*, for an Australian air transport operator, means:

- (a) a change in relation to any of the following:
 - (i) the location and operation of the operator's main operating bases, including the opening or closing of main operating bases;
 - (ii) the operator's key personnel;
 - (iii) a person authorised to carry out the responsibilities of any of the key personnel if the position holder is absent from the position or cannot carry out the responsibilities of the position;
 - (iv) the formal reporting lines for a managerial or operational position with safety functions and responsibilities that reports directly to any of the key personnel;
 - (v) the operator's process for making changes that relate to the safe conduct and management of the operator's air transport operations;
 - (vi) the kinds of Australian air transport operations the operator is authorised to conduct under the operator's Australian air transport AOC;
 - (vii) the operator's areas of operation or routes, including beginning to operate in a new area or on a new route (but not including ceasing to operate in an area or on a route);
 - (viii) the types and models of aeroplanes or rotorcraft used in the operator's Australian air transport operations, including the addition of a new type or model (but not including ceasing to operate a type or model);
or
- (b) a change in relation to any of the following that does not maintain or improve, or is not likely to maintain or improve, aviation safety:

Regulation 119.025

- (i) the plans, processes, procedures, programs and systems for the safe conduct and management of the operator's Australian air transport operations;
 - (ii) the qualifications, experience and responsibilities required by the operator for any of the operator's key personnel;
 - (iii) any other aeronautical or aviation safety related services provided to the operator by third parties;
 - (iv) any change to the registration of an aeroplane or rotorcraft used in the operator's Australian air transport operations;
 - (v) any leasing or other arrangements for the supply of an aeroplane or rotorcraft used in the operator's Australian air transport operations; or
- (c) a change required to be approved by CASA under these Regulations, other than a change that results in the reissue or replacement of an instrument previously issued by CASA in which the conditions or other substantive content of the instrument are unchanged.

119.025 Approvals by CASA for Part 119

- (1) If a provision of this Part, or of the Part 119 Manual of Standards, refers to a person holding an approval under this regulation, the person may apply to CASA, in writing, for the approval.
- (2) Subject to regulation 11.055, CASA must grant the approval.
- (3) Subregulation 11.055(1B) applies to the granting of an approval under this regulation for either of the following provisions:
 - (a) paragraph 119.135(3)(a);
 - (b) paragraph 119.145(3)(a).

119.030 Prescribed purpose—Australian air transport operations

For the purposes of subsection 27(9) of the Act, the flying or operation of an aeroplane or rotorcraft for an Australian air transport operation is a prescribed purpose.

119.035 Prescribed position—safety manager

- (1) An Australian air transport operator must have a safety manager.
- (2) For the purposes of paragraph (e) of the definition of *key personnel* in subsection 28(3) of the Act, the position of safety manager is prescribed for Australian air transport operators.

119.036 Required position—head of training and checking

An Australian air transport operator must have a position (however described) that is the head of the training and checking part of the organisation.

119.040 Required material for reference library

- (1) For the purposes of paragraph 28BH(2)(b) of the Act, the following material is required for an Australian air transport operator:
 - (a) the civil aviation legislation that is relevant to the operator's Australian air transport operations;
 - (b) the parts of the AIP that are relevant to the operations;
 - (c) if the operator conducts operations in one or more foreign countries—the document for each of those countries that is equivalent to the AIP;
 - (d) all information about the flight operations of each type and model of aeroplane or rotorcraft operated by the operator for the operations that is necessary to ensure the safe conduct of the operations;
 - (e) any other publications, information or data required for the reference library by the operator's exposition.
- (2) To avoid doubt, if material is required under subregulation (1), the requirement is taken to be satisfied if an electronic copy of the material is readily available.

119.045 Issue of Manual of Standards for Part 119

For the purposes of subsection 98(5A) of the Act, CASA may issue a Manual of Standards for this Part prescribing matters:

- (a) required or permitted by these Regulations to be prescribed by the Part 119 Manual of Standards; or
- (b) necessary or convenient to be prescribed for carrying out or giving effect to this Part.

Note: A Manual of Standards is a legislative instrument: see subsection 98(5AA) of the Act.

119.050 Australian air transport AOC required

- (1) A person contravenes this subregulation if:
 - (a) the person conducts an Australian air transport operation; and
 - (b) the person does not hold an Australian air transport AOC that authorises the person to conduct the Australian air transport operation.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

119.055 Compliance with Australian air transport AOCs

- (1) A person contravenes this subregulation if:
 - (a) the person conducts an Australian air transport operation; and
 - (b) the person holds an Australian air transport AOC that authorises the person to conduct the Australian air transport operation; and
 - (c) the person conducts the operation in a way that contravenes the AOC.

Regulation 119.060

- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

119.060 Compliance with conditions of Australian air transport AOCs

- (1) An Australian air transport operator contravenes this subregulation if the operator contravenes a condition of the operator's Australian air transport AOC.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Subpart 119.B—Australian air transport AOCs

119.065 Application

- (1) A person may apply to CASA for the issue of an Australian air transport AOC.
- (2) The application must include the following:
 - (a) the applicant's name (including any operating or trading name), contact details and ABN (if any);
 - (b) if the address of the applicant's operational headquarters is different from the applicant's mailing address—the address of the applicant's operational headquarters;
 - (c) if the applicant is an individual—a statement that the individual is, or proposes to be, the applicant's chief executive officer;
 - (d) if the applicant is a corporation—the name of each of the directors of the corporation;
 - (e) if the applicant is a corporation registered in Australia that has an ACN—the applicant's ACN and the address of the applicant's registered office;
 - (f) if the applicant is a corporation not registered in Australia—the place the applicant was incorporated or formed;
 - (g) details of the Australian air transport operations covered by the application;
 - (h) a written undertaking from the person appointed, or proposed to be appointed, as the applicant's chief executive officer that, if CASA issues the AOC, the applicant will:
 - (i) be capable of operating in accordance with the applicant's exposition and the civil aviation legislation; and
 - (ii) operate in accordance with the applicant's exposition and the civil aviation legislation.
- (3) The application must be:
 - (a) accompanied by a copy of the applicant's proposed exposition; and
 - (b) signed by the person appointed, or proposed to be appointed, as the applicant's chief executive officer.

Note: See also sections 27AB (lodgment of manuals) and 27AC (CASA may require information etc. and inspections etc.) of the Act.

119.070 Conditions for issue

- (1) It is a condition for the issue to the applicant of an Australian air transport AOC that CASA is satisfied of each of the following:
 - (a) the applicant's proposed exposition complies with regulation 119.205;
 - (b) the applicant can conduct Australian air transport operations safely and in accordance with the applicant's exposition and the civil aviation legislation;
 - (c) if the applicant is an individual—the applicant:

Regulation 119.070

- (i) is a fit and proper person to be issued an Australian air transport AOC; and
- (ii) is, or proposes to be, the applicant's chief executive officer;
- (d) if the applicant is a corporation—each director of the corporation is a fit and proper person to be a director of a corporation that is issued an Australian air transport AOC;
- (e) each of the applicant's proposed key personnel:
 - (i) is a fit and proper person to be appointed to the position; and
 - (ii) has the qualifications and experience required under Subpart 119.D for the position; and
 - (iii) has the additional qualifications and experience required by CASA under regulation 119.165 for the position (if any); and
 - (iv) has the qualifications and experience required by the applicant under subparagraph 119.205(1)(e)(i) for the position (if any);
- (f) the applicant's arrangements for managing the continuing airworthiness of each type and model of aeroplane or rotorcraft the applicant proposes to operate in the applicant's Australian air transport operations comply with these Regulations.

Note 1: These matters are in addition to the matters specified in section 28 (CASA must issue AOC if satisfied about certain matters) of the Act.

Note 2: For Australian air transport AOCs with ANZA privileges, these matters are also in addition to the matters specified in section 28B (Additional conditions for issue of an Australian AOC with ANZA privileges) of the Act and subregulation (4) of this regulation.

- (2) For the purposes of paragraph (1)(b), without limiting the matters that CASA may consider, CASA must consider the following:
 - (a) the applicant's proposed exposition;
 - (b) whether the applicant can comply with the proposed exposition;
 - (c) the content of the undertaking mentioned in paragraph 119.065(2)(h);
 - (d) details of, and reasons for, any suspension or cancellation of:
 - (i) a civil aviation authorisation issued to the applicant; or
 - (ii) an equivalent authorisation issued to the applicant under the law of a foreign country or by a multinational aviation authority;
 - (e) the suitability of the applicant's corporate and organisational structures for the operations;
 - (f) any other information:
 - (i) accompanying the application; or
 - (ii) in any other document given to CASA by the applicant for the application, including any document requested by CASA in relation to the application.
- (3) For the purposes of paragraphs (1)(c) to (e), the matters CASA may consider in deciding whether a person is a fit and proper person include the following:
 - (a) the person's criminal record (if any), whether in Australia or a foreign country;

- (b) the person's bankruptcy (if any), whether in Australia or a foreign country;
- (c) the person's history (if any) of serious behavioural problems;
- (d) any information held or obtained by CASA that the person has contravened:
 - (i) the civil aviation legislation; or
 - (ii) another law, whether in Australia or a foreign country, relating to transport (including aviation) safety or safety in any other safety-critical industry;
- (e) the person's demonstrated attitude towards compliance with regulatory requirements, in Australia or a foreign country, relating to transport (including aviation) safety;
- (f) the record of compliance with regulatory requirements, in Australia or a foreign country, relating to transport (including aviation) safety of any corporation or other body in which the person:
 - (i) is or was a director or partner (however described); or
 - (ii) holds or held a position equivalent to any of the applicant's key personnel;
- (g) for any corporation in which the person is or was a director, or holds or held a position equivalent to any of the applicant's key personnel, in Australia or a foreign country—the following records:
 - (i) the corporation's criminal record (if any);
 - (ii) the corporation's record of insolvency, bankruptcy, receivership or winding up (if any);
 - (iii) the corporation's record (if any) as a body subject to investigation or comment by a statutory authority that regulates the share dealings by, or financial affairs of, corporations;
- (h) any other matter relating to the fitness of the person to:
 - (i) for an applicant—hold an Australian air transport AOC; or
 - (ii) for a director or proposed director—be a director of a corporation that holds an Australian air transport AOC.

Additional conditions—Australian air transport AOC with ANZA privileges

- (4) For the purposes of paragraph 28B(1)(e) of the Act, it is also a condition for the issue of an Australian air transport AOC with ANZA privileges that CASA must be satisfied that each aeroplane the applicant proposes to operate under the AOC for ANZA activities in New Zealand complies with the following requirements:
 - (a) the aeroplane either:
 - (i) has a maximum take-off weight of more than 15,000 kg; or
 - (ii) is permitted by its type certificate or foreign type certificate to have a passenger seating capacity of more than 30 seats;
 - (b) the aeroplane is registered in Australia or New Zealand.

Regulation 119.075

119.075 Approval of exposition

If CASA issues an Australian air transport AOC to the applicant, CASA is taken to have also approved the applicant's proposed exposition.

119.080 Conditions of an Australian air transport AOC

- (1) For the purposes of paragraph 28BA(1)(b) of the Act, each of the following is a condition of an Australian air transport AOC issued to an operator:
- (a) the operator must comply with each direction given to the operator, or obligation imposed on the operator, by CASA under a provision of these Regulations;
 - (b) each of the operator's key personnel must comply with:
 - (i) each provision of this Part that applies to the person; and
 - (ii) each direction given to the person, or obligation imposed on the person, by CASA under a provision of these Regulations; and
 - (iii) each other provision of the civil aviation legislation that applies to the operator's operations under the AOC;
 - (c) each of the positions of the operator's key personnel must be filled;
 - (d) each of the operator's personnel must comply with each provision of the civil aviation legislation that applies to the operator's operations under the AOC;
 - (e) if the operator is an individual—the individual must be the operator's chief executive officer;
 - (f) the positions of chief executive officer and safety manager may be occupied by the same person only:
 - (i) in an unforeseen circumstance; and
 - (ii) for the period mentioned in subregulation (2);
 - (g) the positions of head of flying operations and safety manager may be occupied by the same person:
 - (i) if there is an unforeseen circumstance—for the period mentioned in subregulation (2); or
 - (ii) if the operator holds an approval under regulation 119.025 for the positions to be occupied by the same person—for the period specified in the approval;
 - (h) for each registered aeroplane or rotorcraft operated by the operator under the AOC, the operator must:
 - (i) be the registered operator of the aeroplane or rotorcraft; or
 - (ii) hold an approval under regulation 119.025 for the aeroplane or rotorcraft.

Note 1: These matters are in addition to the matters specified in section 28BA (general conditions) and subsection 28BAA(1) (certain conditions for grant of AOC also have effect as ongoing conditions on the AOC) of the Act.

Note 2: For Australian air transport AOCs with ANZA privileges, these matters are also in addition to the matters specified in subsection 28BAA(2) (certain conditions for grant of AOC also have effect as ongoing conditions on the AOC) of the Act and subregulation (3) of this regulation.

- (2) For the purposes of subparagraphs (1)(f)(ii) and (g)(i), the period is:
- (a) no more than 7 consecutive days for each unforeseen circumstance; or
 - (b) if the operator holds an approval under regulation 119.025 in relation to an unforeseen circumstance—the period mentioned in the approval for the unforeseen circumstance.

Additional conditions—Australian air transport AOC with ANZA privileges

- (3) For the purposes of paragraph 28BA(1)(b) of the Act, it is also a condition of an Australian air transport AOC with ANZA privileges that each aeroplane operated by the AOC holder under the AOC for ANZA activities in New Zealand must comply with the following requirements:
- (a) the aeroplane either:
 - (i) has a maximum take-off weight of more than 15,000 kg; or
 - (ii) is permitted by its type certificate or foreign type certificate to have a passenger seating capacity of more than 30 seats;
 - (b) the aeroplane is registered in Australia or New Zealand.

Subpart 119.C—Changes relating to Australian air transport operators

119.085 Changes of name etc.

- (1) An Australian air transport operator contravenes this subregulation if the operator:
 - (a) makes a change mentioned in subregulation (2); and
 - (b) does not, before making the change:
 - (i) amend the operator's exposition to reflect the change; and
 - (ii) give CASA written notice of the change and a copy of the amended part of the exposition clearly identifying the change.
- (2) For the purposes of paragraph (1)(a), the changes are the following:
 - (a) a change to the operator's name (including any operating or trading name) or contact details;
 - (b) if the address of the operator's operational headquarters is different from the operator's mailing address—a change to the address of the operator's operational headquarters.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

119.090 Application for approval of significant changes

- (1) An Australian air transport operator contravenes this subregulation if:
 - (a) the operator makes a significant change other than a significant change mentioned in subregulation (2); and
 - (b) CASA has not approved the significant change.
- (2) An Australian air transport operator contravenes this subregulation if:
 - (a) the operator makes a significant change that is the permanent appointment, or the acting appointment (for a period of greater than 35 days), as any of the operator's key personnel of a person previously authorised to carry out the responsibilities of the position in a circumstance mentioned in subparagraph 119.205(1)(e)(iv); and
 - (b) the operator does not apply to CASA for approval of the change, in accordance with subregulation (4), within 7 days after the change is made.
- (3) An application for approval of a significant change must:
 - (a) be in writing; and
 - (b) set out the change; and
 - (c) be accompanied by a copy of the part of the operator's exposition affected by the change, clearly identifying the change.

- (4) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

119.095 Approval of significant changes

- (1) CASA may approve a significant change for an Australian air transport operator only if satisfied that the requirements mentioned in section 28 of the Act and subregulation 119.070(1) will continue to be met.
- (2) If CASA approves the significant change, CASA is taken to have also approved the changes to the operator's exposition covered by the application for the change.

119.100 Changes must be made in accordance with process in exposition

- (1) An Australian air transport operator contravenes this subregulation if:
- (a) the operator makes a change; and
 - (b) the change is not made in accordance with the process included in the operator's exposition in accordance with paragraph 119.205(1)(m).
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

119.105 CASA directions relating to exposition or key personnel

- (1) If CASA is satisfied that it is necessary in the interests of aviation safety, CASA may, by written notice given to an Australian air transport operator, direct the operator to change the operator's exposition:
- (a) to remove particular information, procedures or instructions from the exposition; or
 - (b) to include particular information, procedures or instructions in the exposition; or
 - (c) to revise or vary the information, procedures or instructions in the exposition.
- (2) CASA may, by written notice given to an Australian air transport operator, direct the operator to remove any of the operator's key personnel from the person's position if satisfied that the person is not:
- (a) carrying out the safety responsibilities of the position under Subpart 119.D; or
 - (b) if the person is the chief executive officer—properly managing safety matters for which the person is accountable under Subpart 119.D.
- (3) A notice under this regulation must state the time within which the direction must be complied with.

Regulation 119.105

- (4) An Australian air transport operator contravenes this subregulation if:
 - (a) CASA gives the operator a direction under this regulation; and
 - (b) the operator does not comply with the direction within the time stated in the notice.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (4).

Penalty: 50 penalty units.

Subpart 119.D—Organisation and personnel

119.110 Organisation and personnel

- (1) An Australian air transport operator must maintain an organisational structure that effectively manages the operator's Australian air transport operations, taking into account the size, nature and complexity of the operations.
- (2) An Australian air transport operator contravenes this subregulation if any of the operator's key personnel carries out a responsibility of the person's position in a way that contravenes the operator's exposition or this Subpart.
- (3) A person commits an offence if the person contravenes subregulation (2).

Penalty: 50 penalty units.

119.115 When key personnel cannot carry out responsibilities

- (1) An Australian air transport operator contravenes this subregulation if:
 - (a) the operator becomes aware that any of the operator's key personnel cannot carry out, or is likely to be unable to carry out, the person's responsibilities for a period of longer than 35 days; and
 - (b) the operator does not tell CASA of the matter mentioned in paragraph (a) within the time mentioned in subregulation (2).
- (2) The time is:
 - (a) if there is not another person authorised to carry out the responsibilities for all or part of the period—24 hours after the operator becomes aware of the matter; or
 - (b) if there is another person authorised to carry out the responsibilities for all or part of the period—3 days after the operator becomes aware of the matter.
- (3) A person commits an offence if the person contravenes subregulation (1).

Penalty: 50 penalty units.

119.120 Familiarisation training for key personnel

An Australian air transport operator must ensure that, before a person appointed as any of the operator's key personnel begins to carry out the responsibilities of the position, the person has completed any training that is necessary to familiarise the person with the responsibilities.

119.125 Chief executive officer—experience

- (1) The chief executive officer of an Australian air transport operator must have the experience required under subregulation (2).

Regulation 119.130

- (2) The experience required is:
 - (a) if the operator holds an approval under regulation 119.025—the experience mentioned in the approval; or
 - (b) if paragraph (a) does not apply—the experience mentioned in paragraphs (3)(a) and (b).
- (3) The experience is the following:
 - (a) sufficient relevant experience in organisational, operational, financial and people management of air operations to capably lead, manage and set standards to enable the operator to conduct safe operations in accordance with the operator’s exposition and the civil aviation legislation;
 - (b) a satisfactory record in the conduct or management of air operations.

119.130 Chief executive officer—responsibilities and accountabilities

- (1) The chief executive officer of an Australian air transport operator is responsible for the following:
 - (a) ensuring that, for the safe conduct of the operator’s Australian air transport operations in accordance with the operator’s Australian air transport AOC and exposition and the civil aviation legislation, the operator:
 - (i) has sufficient suitably experienced, qualified and competent personnel; and
 - (ii) has a suitable management structure; and
 - (iii) is adequately financed and resourced;
 - (b) ensuring that the operator:
 - (i) complies with the civil aviation legislation; and
 - (ii) complies with the aviation safety laws of each foreign country (if any) where the operator conducts Australian air transport operations; and
 - (iii) implements and manages the operator’s safety management system; and
 - (iv) has procedures that ensure that all of the operator’s personnel understand the operator’s safety policy; and
 - (v) has an organisational structure that ensures that the safety manager is independent and not subject to undue influence; and
 - (vi) sets and maintains standards for flight and ground operations; and
 - (vii) tells CASA if the operator becomes aware that a leasing, financing or other arrangement for the supply of an aeroplane or rotorcraft that the operator operates under the operator’s Australian air transport AOC may affect the operator’s safe conduct of the operator’s Australian air transport operations; and
 - (viii) tells CASA if the operator becomes aware that an arrangement mentioned in subparagraph (vii) may contravene a provision of the civil aviation legislation or the law of the country in which the aeroplane or rotorcraft is registered; and
 - (ix) for each foreign registered aircraft (if any) used in the operator’s Australian air transport operations—maintains the aircraft in

- accordance with the law of the country in which the aircraft is registered (subject to any applicable 83 bis agreement);
- (c) establishing and regularly reviewing the operator's safety performance indicators and targets;
 - (d) ensuring that the operator's exposition is monitored and managed for continuous improvement;
 - (e) ensuring that training and checking of the operator's operational safety-critical personnel (other than flight crew) conducted by or for the operator is conducted in accordance with the operator's exposition;
 - (f) ensuring that key personnel satisfactorily carry out the responsibilities of their positions in accordance with the operator's exposition and the civil aviation legislation.
- (2) The chief executive officer of an Australian air transport operator is accountable to the operator and CASA for ensuring the responsibilities mentioned in subregulation (1) are carried out effectively.

119.135 Head of flying operations—qualifications and experience

- (1) The head of flying operations of an Australian air transport operator must:
- (a) hold the pilot licence required under subregulation (2); and
 - (b) hold a pilot type or class rating (within the meaning of Part 61) for a type or class of aeroplane or rotorcraft that is used to conduct a significant proportion of the operator's Australian air transport operations; and
 - (c) have the experience required under subregulation (3); and
 - (d) have a satisfactory record in the conduct or management of air operations; and
 - (e) have sufficient safety and regulatory knowledge to enable the operator to conduct the operator's Australian air transport operations safely and in accordance with the operator's exposition and the civil aviation legislation.
- (2) The licence required is:
- (a) if the operator conducts only single-pilot operations—a commercial pilot licence or an air transport pilot licence; or
 - (b) in any other case—an air transport pilot licence.
- (3) The experience required is:
- (a) if the operator holds an approval under regulation 119.025—the experience mentioned in the approval; or
 - (b) if paragraph (a) does not apply—the experience mentioned in paragraphs (4)(a) and (b).
- (4) The experience is the following:
- (a) at least 500 hours flight time on a type of aeroplane or rotorcraft that is the same as, or substantially similar to, a type of aeroplane or rotorcraft used to conduct a significant proportion of the operator's Australian air transport operations;

Regulation 119.140

- (b) at least 6 months experience in the conduct or management of air operations conducted under an AOC or equivalent foreign authorisation.
- (5) CASA may, by written notice given to the head of flying operations, or proposed head of flying operations, of an Australian air transport operator, direct the person to undertake an assessment mentioned in subregulation (6).
- (6) The assessment:
 - (a) is an assessment conducted by CASA, or a person nominated by CASA, to demonstrate the head of flying operation's or proposed head of flying operation's suitability as head of flying operations for the operator; and
 - (b) may include assessment in an aeroplane, rotorcraft or flight simulation training device.

119.140 Head of flying operations—responsibilities

- (1) The head of flying operations of an Australian air transport operator must safely manage the flying operations of the operator.
- (2) Without limiting subregulation (1), the responsibilities of the head of flying operations include the following:
 - (a) monitoring and maintaining, and reporting to the chief executive officer on, the operator's compliance with the provisions of the civil aviation legislation and the operator's exposition that apply to flying operations;
 - (b) ensuring that the operator's flight crew are provided with the information and documentation necessary to properly carry out their responsibilities;
 - (c) ensuring the proper allocation and deployment of the operator's aeroplanes or rotorcraft, and the operator's personnel, for use in the operator's Australian air transport operations;
 - (d) ensuring that the operator complies with section 28BH (reference library) of the Act in relation to flight crew.

119.145 Head of training and checking—qualifications and experience

- (1) The head of training and checking of an Australian air transport operator must:
 - (a) hold the pilot licence required under subregulation (2); and
 - (b) hold a pilot type or class rating (within the meaning of Part 61) for a type or class of aeroplane or rotorcraft used to conduct a significant proportion of the operator's Australian air transport operations; and
 - (c) have the experience required under subregulation (3); and
 - (d) have a satisfactory record in the conduct or management of air operations; and
 - (e) have a satisfactory record in the conduct or management of training and checking in relation to air operations; and
 - (f) have sufficient safety and regulatory knowledge to enable the operator to conduct the operator's Australian air transport operations safely and in accordance with the operator's exposition and the civil aviation legislation.

- (2) The licence required is:
 - (a) if the operator conducts only single-pilot operations—a commercial pilot licence or an air transport pilot licence; or
 - (b) in any other case—an air transport pilot licence.
- (3) The experience required is:
 - (a) if the operator holds an approval under regulation 119.025—the experience mentioned in the approval; or
 - (b) if paragraph (a) does not apply—the experience mentioned in paragraphs (4)(a) and (b).
- (4) The experience is the following:
 - (a) at least 500 hours flight time on a type of aeroplane or rotorcraft that is the same as, or substantially similar to, a type of aeroplane or rotorcraft used to conduct a significant proportion of the operator’s Australian air transport operations;
 - (b) at least 6 months experience in the conduct or management of air operations conducted under an AOC or equivalent foreign authorisation.
- (5) CASA may, by written notice given to a head of training and checking, or proposed head of training and checking, of an Australian air transport operator, direct the person to undertake an assessment mentioned in subregulation (6).
- (6) The assessment:
 - (a) is an assessment conducted by CASA, or a person nominated by CASA, to demonstrate the heading of training or checking’s or proposed heading of training or checking’s suitability as head of training and checking for the operator; and
 - (b) may include assessment in an aeroplane, rotorcraft or flight simulation training device.

119.150 Head of training and checking—responsibilities

- (1) The head of training and checking of an Australian air transport operator must safely manage the training and checking activities of the operator for the operator’s flight crew.
- (2) Without limiting subregulation (1), the responsibilities of the head of training and checking include the following:
 - (a) ensuring that the operator complies with each provision of the civil aviation legislation that relates to the qualifications, training or checking of the operator’s flight crew;
 - (b) reporting to the head of flying operations on the operator’s compliance with the provisions mentioned in paragraph (a);
 - (c) ensuring that training and checking of flight crew conducted by or for the operator is conducted in accordance with the operator’s exposition;
 - (d) if the operator has a contract with a Part 142 operator for the Part 142 operator to conduct training or checking for the operator’s flight crew:

Regulation 119.155

- (i) ensuring that each person who conducts the training or checking for the Part 142 operator is authorised under Part 61 to conduct the activities involved in the training or checking; and
- (ii) telling the Part 142 operator, in writing, of any change in the Australian air transport operator's exposition relating to the training and checking activities the Part 142 operator conducts under the contract.

119.155 Safety manager—experience

A safety manager required under regulation 119.035 for an Australian air transport operator must have:

- (a) sufficient relevant safety management experience to capably lead, manage and set standards to enable the operator to safely implement the operator's safety management system in accordance with the operator's exposition; and
- (b) a satisfactory record in the conduct or management of air operations; and
- (c) sufficient safety and regulatory knowledge to enable the operator to conduct the operator's Australian air transport operations safely and in accordance with the operator's exposition and the civil aviation legislation.

119.160 Safety manager—responsibilities

- (1) A safety manager required under regulation 119.035 for an Australian air transport operator must manage the operator's safety management system.
- (2) Without limiting subregulation (1), the responsibilities of the safety manager include:
 - (a) managing the operation of the safety management system including managing corrective, remedial and preventative action in relation to the system; and
 - (b) regularly reporting to the chief executive officer on the effectiveness of the safety management system; and
 - (c) managing the maintenance and continuous improvement of the following systems:
 - (i) safety management system;
 - (ii) fatigue risk management system (if any).

119.165 Key personnel—additional qualification and experience requirements

- (1) This regulation applies to:
 - (a) an applicant for an Australian air transport AOC; and
 - (b) an Australian air transport operator.
- (2) CASA may, by written notice given to the applicant or operator, direct that any of the key personnel of the applicant or operator must have stated additional qualifications or experience to those otherwise required under this Subpart.

Regulation 119.165

- (3) If CASA is satisfied that it is necessary in the interests of aviation safety, CASA may, by written notice given to a person who is, or is proposed to be, any of the key personnel of the applicant or operator, direct the person:
- (a) to undertake a stated examination; or
 - (b) to be interviewed by CASA; or
 - (c) to complete a stated training course.
- (4) In deciding whether to give a direction under this regulation, CASA must have regard to, but is not limited to considering, the following:
- (a) the need to ensure that the applicant or operator can conduct Australian air transport operations safely and in accordance with the operator's exposition and the civil aviation legislation;
 - (b) the nature and complexity of the operations;
 - (c) the leadership, management and standards-setting skills required by the person for the operations;
 - (d) how recently the person has used the person's aviation skills;
 - (e) whether the person is able to exercise the privileges of each civil aviation authorisation held by the person.

Regulation 119.170

Subpart 119.E—Training and checking for operational safety-critical personnel

119.170 Training and checking system

- (1) An Australian air transport operator must have a training and checking system.
- (2) The training and checking system must include the following in relation to flight crew and cabin crew:
 - (a) a description of how training and checking, including recurrent training and line checking, is conducted by or for the operator;
 - (b) an auditable system for maintaining records of the results of training and checking;
 - (c) procedures that ensure that each of the operator's flight crew and cabin crew:
 - (i) completes training and checking in accordance with the training and checking system; and
 - (ii) is supervised effectively during training and checking;
 - (d) a description of how the operator assesses the competence of a flight crew member or cabin crew member to perform the duties assigned to the member for a flight;
 - (e) if the operator has a contract with a person for the person to conduct training or checking for the operator:
 - (i) details of the person; and
 - (ii) details of the training or checking covered by the contract; and
 - (iii) details of how the operator ensures that the person is complying with the operator's training and checking system.
- (3) The training and checking system must also include the following in relation to cabin crew:
 - (a) the circumstances in which training is required to familiarise a cabin crew member with their duties;
 - (b) if any of the training or checking of cabin crew is conducted by a member of the operator's personnel—a description of the operator's system for training and assessing such personnel.
- (4) If subregulation (5) applies in relation to the operator, the training and checking system must include the following in relation to operational safety-critical personnel who are not flight crew or cabin crew:
 - (a) a description of how training and checking, including recurrent training, for the personnel is conducted by or for the operator;
 - (b) an auditable system for maintaining records of the results of the training and checking;
 - (c) the circumstances in which training is required to familiarise a member of the personnel with their duties;

- (d) if the operator has a contract with a person for the person to conduct the training or checking for the operator:
 - (i) details of the person; and
 - (ii) details of the training or checking covered by the contract; and
 - (iii) details of how the operator ensures that the person is complying with the operator's training and checking system;
 - (e) if any of the training or checking is conducted by a member of the operator's personnel—a description of the operator's system for training and assessing such personnel.
- (5) This subregulation applies to the operator if the operator conducts one or more of the following operations:
- (a) operations in an aeroplane to which either or both of the following apply:
 - (i) the aeroplane has a maximum take-off weight of more than 8,618 kg;
 - (ii) the aeroplane has a maximum operational passenger seat configuration of more than 9 seats;
 - (b) operations in a rotorcraft to which either or both of the following apply:
 - (i) the rotorcraft has a maximum take-off weight of more than 3,175 kg;
 - (ii) the rotorcraft has a maximum operational passenger seat configuration of more than 9 seats;
 - (c) medical transport operations;
 - (d) operations of a kind prescribed by the Part 119 Manual of Standards for the purposes of this paragraph.
- (6) The operator must conduct checking for flight crew in relation to the flying of the aeroplane or rotorcraft if the operator operates:
- (a) an aeroplane or rotorcraft that is used for passenger transport operations and has a maximum operational passenger seat configuration of more than 30 seats; or
 - (b) an aeroplane or rotorcraft that is used for cargo transport operations and has a maximum payload capacity of at least 3,410 kg.
- (7) The operator must only use individuals employed by the operator to conduct the checking required by subregulation (6).
- (8) This regulation does not apply to:
- (a) training that is authorised Part 141 flight training for the operator; or
 - (b) training or checking that is an authorised Part 142 activity for the operator.

119.175 Program for training and assessment in human factors principles and non-technical skills

An Australian air transport operator must have a program for training and assessing operational safety-critical personnel in human factors principles and non-technical skills.

Regulation 119.180

119.180 Training in human factors principles and non-technical skills for flight crew etc.

- (1) An Australian air transport operator contravenes this subregulation if a person who is a member of the operator's personnel mentioned in subregulation (2) contravenes subregulation (3).
- (2) The personnel are the following:
 - (a) a flight crew member;
 - (b) a cabin crew member;
 - (c) an air crew member;
 - (d) a medical transport specialist;
 - (e) a flight dispatcher.
- (3) The person must not carry out a duty of the person's position unless the person meets the requirements in the operator's exposition about training in human factors principles and non-technical skills.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

119.185 Training in human factors principles and non-technical skills for other operational safety-critical personnel

- (1) An Australian air transport operator contravenes this subregulation if a person who is a member of the operator's personnel mentioned in subregulation (2) contravenes subregulation (3).
- (2) The personnel are operational safety-critical personnel other than personnel mentioned in subregulation 119.180(2).
- (3) The person must meet the requirements in the operator's exposition about training in human factors principles and non-technical skills within 3 months after being appointed to the person's position.
- (4) An Australian air transport operator contravenes this subregulation if:
 - (a) a person who is a member of the operator's personnel mentioned in subregulation (2) performs a duty of the person's position; and
 - (b) the duty is described in the operator's exposition as a duty that may be performed only by a person who meets the requirements in the operator's exposition about training in human factors principles and non-technical skills; and
 - (c) the person does not meet the requirements in the operator's exposition about training in human factors principles and non-technical skills.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (1) or (4).

Penalty: 50 penalty units.

Regulation 119.190

Subpart 119.F—Safety management

119.190 Safety management system requirements

- (1) An Australian air transport operator must have a safety management system that is appropriate for the size, nature and complexity of the operator's Australian transport operations.
- (2) The safety management system must include the following matters:
 - (a) a statement of the operator's safety policy and objectives, including details of the following:
 - (i) the management commitment to, and responsibility for, safety;
 - (ii) the safety accountabilities of managers (including key personnel);
 - (iii) the appointment of safety management personnel;
 - (iv) coordination of an emergency response plan;
 - (v) safety management system documentation;
 - (b) a safety risk management process, including:
 - (i) hazard identification processes; and
 - (ii) safety risk assessment and mitigation processes;
 - (c) a safety assurance system, including details of processes for:
 - (i) safety performance monitoring and measurement; and
 - (ii) management of change; and
 - (iii) continuous improvement of the safety management system;
 - (d) a safety training and promotion system, including details of the following:
 - (i) safety management system training and education;
 - (ii) safety management system safety communication;
 - (e) if regulation 119.195 applies in relation to the Australian air transport operator—a flight data analysis program that meets the requirements of that regulation.

119.195 Flight data analysis program requirements

- (1) This regulation applies in relation to an Australian air transport operator if the operator conducts Australian air transport operations in either or both of the following:
 - (a) an aeroplane with a maximum take-off weight of more than 27,000 kg;
 - (b) a rotorcraft:
 - (i) with a maximum take-off weight of more than 7,000 kg; or
 - (ii) with a maximum operational passenger seat configuration of more than 9 seats and that is required, under these Regulations, to be fitted with a flight data recorder.
- (2) The Australian air transport operator must have a flight data analysis program.

- (3) The flight data analysis program must:
- (a) regularly record and analyse the operational flight data of individual and aggregated operations for the purpose of improving the safety of flight operations; and
 - (b) be provided by:
 - (i) the operator; or
 - (ii) another appropriate person; and
 - (c) ensure that, except as mentioned in subregulation (5), the identity of a person (the **identified person**) who is the source of data is protected from disclosure to anyone other than the following:
 - (i) a person whose duties require that person to analyse operational flight data;
 - (ii) a person who has access to the identified person's identity solely for the purpose of analysing operational flight data;
 - (iii) a pilot appointed by the operator to liaise with flight crew in relation to matters arising from the flight data analysis program; and
 - (d) ensure that no punitive action in relation to the data may be taken by the operator against the identified person.
- (4) For the purposes of subparagraph (3)(b)(ii), the provision of the flight data analysis program by an appropriate person does not in any way compromise the operator's responsibility to provide, and ensure the effectiveness of, the program.
- (5) For the purposes of paragraph (3)(c), the identity of the identified person may be disclosed:
- (a) with the written consent of the person; or
 - (b) as required by CASA; or
 - (c) as otherwise required or authorised by law.

Subpart 119.G—Personnel fatigue management

Note: This Subpart reserved for future use.

Subpart 119.H—Expositions for Australian air transport operators

119.205 Content of exposition

- (1) An exposition for an Australian air transport operator must include the following:
 - (a) the operator's name (including any operating or trading name), contact details and ABN (if any);
 - (b) the address of:
 - (i) the operator's operational headquarters; and
 - (ii) each of the operator's main operating bases; and
 - (iii) each of the operator's operational facilities;
 - (c) a description and diagram of the operator's organisational structure showing formal reporting lines, including the formal reporting lines for each of the key personnel;
 - (d) if the operator is a corporation—a description of the operator's corporate structure;
 - (e) for each of the key personnel, the following information:
 - (i) the qualifications and experience (if any) required by the operator for the position in addition to the qualifications and experience required under Subpart 119.D for the position;
 - (ii) each matter (if any) for which the holder of the position is responsible in addition to the responsibilities mentioned in Subpart 119.D for the position;
 - (iii) the name of the person appointed to the position;
 - (iv) the name of each person authorised to carry out the responsibilities of the position when the position holder is absent from the position or cannot carry out the responsibilities;
 - (v) a description of how the operator will manage the responsibilities of the position during a circumstance mentioned in subparagraph (iv);
 - (f) each matter (if any) for which the chief executive officer is responsible and accountable in addition to the matters mentioned in regulation 119.130;
 - (g) an outline of the Australian air transport operations conducted by the operator under the operator's Australian air transport AOC, including the areas of operation and routes;
 - (h) details of each plan, process, procedure, program and system implemented by the operator to safely conduct and manage their Australian air transport operations in compliance with the civil aviation legislation;
 - (i) for each registered aeroplane or rotorcraft operated by the operator under the AOC—its type and model and registration mark;
 - (j) for each foreign registered aircraft operated by the operator under the AOC—its type and model, nationality and registration mark;

Regulation 119.210

- (k) a description of the arrangements for managing the continuing airworthiness of the operator's aeroplanes or rotorcraft;
- (l) a description of any leasing or other arrangements for the supply of the aeroplanes or rotorcraft as the arrangements relate to the operational control or continuing airworthiness of the aeroplanes or rotorcraft, or to any other safety matter;
- (m) a description of the operator's process for making changes, including:
 - (i) identifying changes that are significant changes; and
 - (ii) identifying changes that are not significant changes; and
 - (iii) telling CASA and the operator's personnel of the changes;
- (n) a description of anything else required to be approved by CASA under these Regulations in relation to the operations mentioned in paragraph (g);
- (o) any other matter required to be included in the exposition under these Regulations.

Note: The plans, processes, procedures, programs and systems mentioned in paragraph (h) may be set out in one or more operator manuals.

- (2) An Australian air transport operator contravenes this subregulation if the operator's exposition does not comply with subregulation (1).
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

119.210 Compliance with exposition by operator

- (1) An Australian air transport operator contravenes this subregulation if the operator does not meet a requirement of the operator's exposition.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

119.215 Providing personnel with exposition

- (1) An Australian air transport operator contravenes this subregulation if:
 - (a) a person who is a member of the operator's personnel is subject to a requirement under the operator's exposition; and
 - (b) the operator does not make the part of the exposition that relates to the requirement available to the person before the person first begins carrying out the person's duties relating to the requirement.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

119.220 Compliance with exposition by personnel

- (1) A member of an Australian air transport operator's personnel contravenes this subregulation if:
 - (a) the member is subject to a requirement under the operator's exposition in relation to the safe conduct of the operator's Australian air transport operations; and
 - (b) the member does not meet the requirement.
- (2) An Australian air transport operator contravenes this subregulation if:
 - (a) a member of the operator's personnel is subject to a requirement under the operator's exposition in relation to the safe conduct of the operator's Australian air transport operations; and
 - (b) the member does not meet the requirement.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

Subpart 119.J—Records and documents

119.225 Personnel training and checking records—making records

- (1) An Australian air transport operator contravenes this subregulation if:
 - (a) a person who is a member of the operator’s personnel undertakes an activity, obtains a qualification or certificate or gains flying experience; and
 - (b) the activity, qualification, certificate or flying experience is mentioned for the person in subregulation (2); and
 - (c) the following records are not made within 21 days after the person undertakes the activity, obtains the qualification or certificate or gains the flying experience:
 - (i) when the activity was undertaken, the qualification or certificate obtained or the flying experience gained;
 - (ii) if the activity was training or a check, flight test, flight review or assessment of competency—whether the training, check, flight test, flight review or assessment was successfully completed.
- (2) The activities, qualifications, certificates and flying experience for the person are the following:
 - (a) for a flight crew member of the operator’s personnel:
 - (i) training, or a check, flight test, flight review or assessment of competency, mentioned in Subpart 121.N, 133.N or 135.N; or
 - (ii) a qualification or certificate mentioned in Subpart 121.N, 133.N or 135.N; or
 - (iii) flying experience mentioned in Subpart 121.N, 133.N or 135.N; or
 - (iv) training in human factors principles or non-technical skills; or
 - (v) training or education in the operator’s safety management system;
 - (b) for a cabin crew member of the operator’s personnel:
 - (i) training, or a check or assessment of competency, mentioned in Subpart 121.P or Division 133.P.1; or
 - (ii) training in human factors principles or non-technical skills; or
 - (iii) training or education in the operator’s safety management system;
 - (c) for an air crew member of the operator’s personnel:
 - (i) training, or a check or assessment of competency, mentioned in Division 133.P.2 or 135.P.1; or
 - (ii) training in human factors principles or non-technical skills; or
 - (iii) training or education in the operator’s safety management system;
 - (d) for a medical transport specialist of the operator’s personnel:
 - (i) training, or a check or assessment of competency, mentioned in Division 133.P.3 or 135.P.2; or
 - (ii) training in human factors principles or non-technical skills; or

- (iii) training or education in the operator’s safety management system;
 - (e) for a member of the operator’s operational safety-critical personnel (other than a flight crew or cabin crew member):
 - (i) training in human factors principles or non-technical skills; or
 - (ii) training or education in the operator’s safety management system;
 - (f) for a member of the operator’s personnel who performs ground support duties—any training;
 - (g) for a member of the operator’s personnel not mentioned in paragraph (a), (b), (c), (d), (e) or (f)—training or education in the operator’s safety management system.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

119.230 Personnel training and checking records—availability of records

- (1) An Australian air transport operator contravenes this subregulation if:
- (a) the operator makes a record about a person under regulation 119.225; and
 - (b) the person requests that the record be made available to the person; and
 - (c) the operator does not make the record available to the person within 7 days after receiving the request.
- (2) An Australian air transport operator contravenes this subregulation if:
- (a) a record is made under regulation 119.225; and
 - (b) the operator receives a request from another Australian air transport operator for a copy of the record; and
 - (c) the operator holds a written authority from the person to whom the record relates to provide a copy of the person’s records to another Australian air transport operator if requested; and
 - (d) the operator does not give a copy of the record to the other Australian air transport operator within 7 days after receiving the request.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

119.235 Copies of flight crew licences and medical certificates

- (1) An Australian air transport operator contravenes this subregulation if:
- (a) a person who is a flight crew member of the operator’s personnel exercises a privilege of the person’s flight crew licence for the operator; and
 - (b) the operator does not have the following:
 - (i) a copy of the person’s flight crew licence;
 - (ii) a copy of the person’s medical certificate.

Regulation 119.240

- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

119.240 Retention periods for personnel records

- (1) An Australian air transport operator contravenes this subregulation if:
- (a) the operator is required, under this Part or Part 121, 133 or 135, to make or have a record of a kind mentioned in column 1 of an item of the following table about a person who is a member of the operator's personnel; and
 - (b) the operator does not keep the record for at least the period mentioned in column 2 of the item.

Retention periods—personnel records		
Item	Column 1 Kind of record	Column 2 Minimum period for which the record must be kept
1	A record required under regulation 119.225 for a flight crew member	The period beginning when the record is created and ending 5 years after the member ceases to be a member of the operator's personnel
2	A record required under regulation 119.225 for a cabin crew member	The period beginning when the record is created and ending 1 year after the member ceases to be a member of the operator's personnel
3	A record required under regulation 119.225 for an air crew member	The period beginning when the record is created and ending 5 years after the member ceases to be a member of the operator's personnel
4	A record required under regulation 119.225 for a medical transport specialist	The period beginning when the record is created and ending 1 year after the member ceases to be a member of the operator's personnel
5	A record required under regulation 119.225 for a member of the operator's personnel who performs ground support duties	The period beginning when the record is created and ending 1 year after the member ceases to be a member of the operator's personnel
6	A copy of a flight crew member's flight crew licence and medical certificate required by regulation 119.235	The period during which the member is exercising the privileges of the licence for the operator
7	A record of a flight crew member's cosmic radiation dose required under Part 121 or 135	The period beginning when the record is created and ending 5 years after the member ceases to be a member of the operator's personnel
8	A record of a cabin crew member's cosmic radiation dose required under Part 121	The period beginning when the record is created and ending 5 years

Regulation 119.245

Retention periods—personnel records

Item	Column 1 Kind of record	Column 2 Minimum period for which the record must be kept
		after the member ceases to be a member of the operator's personnel

- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

119.245 Retention periods for flight-related documents

- (1) An Australian air transport operator contravenes this subregulation if:
- (a) under Part 91, 121, 133 or 135, a document mentioned in subregulation (2) is required for a flight of an aeroplane or rotorcraft conducted under the operator's Australian air transport AOC; and
 - (b) the operator does not keep the document for at least 3 months after the end of the flight.
- (2) The documents are the following for the flight:
- (a) an operational flight plan;
 - (b) any authorised weather forecasts;
 - (c) the authorised aeronautical information;
 - (d) a weight and balance document;
 - (e) a statement or information about cargo that may require special or unusual handling;
 - (f) a passenger list;
 - (g) a notice of action, taken in an emergency by the pilot flying the aeroplane or rotorcraft, that involves a contravention of these Regulations.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

119.250 Retention periods for other flight-related records

- (1) An Australian air transport operator contravenes this subregulation if:
- (a) a person is required under Part 121, 133 or 135 to make a record that is a journey log for a flight of an aeroplane or rotorcraft conducted under the operator's Australian air transport AOC; and
 - (b) the record is made other than in the flight technical log for the aeroplane or rotorcraft; and
 - (c) the operator does not keep the record for at least 6 months after the end of the flight.

Regulation 119.250

Note: See regulation 42.260 (retention of continuing airworthiness records) for the retention period for records made in the flight technical log for the aeroplane or rotorcraft.

- (2) An Australian air transport operator contravenes this subregulation if:
- (a) the operator is required under Part 121 to make a record of the results of the verification of the accuracy of the weight and balance data generated by a computerised system that is not fitted to the aeroplane; and
 - (b) the operator does not keep the record for at least 6 months after it is made.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

Subpart 119.K—Miscellaneous offences

119.255 Dealings in relation to cancelled, suspended, varied, pending or refused civil aviation authorisations

Requirement for approval

- (1) An Australian air transport operator contravenes this subregulation if:
 - (a) the operator enters into an agreement with another person; and
 - (b) the operator does an act mentioned in subregulation (2), (4), (6) or (8); and
 - (c) the operator does not hold an approval under regulation 119.025 to do the act.

Acts in relation to cancelled authorisations

- (2) The acts are the following:
 - (a) to use, in an Australian air transport operation, an aeroplane or rotorcraft the operation of which was authorised by a cancelled authorisation held by the other person;
 - (b) to employ, in connection with an Australian air transport operation, a person who was, at the time of the cancellation of a cancelled authorisation held by the other person, employed in connection with an operation the conduct of which was authorised by the cancelled authorisation;
 - (c) to conduct an operation, or part of an operation, the conduct of which was authorised by a cancelled authorisation.

Acts in relation to suspended or varied authorisations

- (3) Subregulation (4) applies in relation to a suspended or varied authorisation held by the other person.
- (4) The acts are the following:
 - (a) to use, in an Australian air transport operation, an aeroplane or rotorcraft the operation of which:
 - (i) was, immediately before the suspension or variation, authorised by the authorisation; but
 - (ii) is no longer authorised by the authorisation as suspended or varied;
 - (b) to employ, in connection with an Australian air transport operation, a person who was, at the time of the suspension or variation, employed in connection with an operation the conduct of which:
 - (i) was, immediately before the suspension or variation, authorised by the authorisation; but
 - (ii) is no longer authorised by the authorisation as suspended or varied;
 - (c) to conduct an operation, or part of an operation, the conduct of which:

Regulation 119.255

- (i) was, immediately before the suspension or variation, authorised by the authorisation; but
- (ii) is no longer authorised by the authorisation as suspended or varied.

Note: See section 28BB (CASA may impose and vary AOC conditions) of the Act in relation to varying AOC conditions.

Pending applications for authorisations

- (5) Subregulation (6) applies in relation to an application by the other person for a civil aviation authorisation that has not been finally determined by CASA.
- (6) The acts are the following:
 - (a) to use, in an Australian air transport operation, an aeroplane or rotorcraft the operation of which would be authorised by the authorisation;
 - (b) to employ, in an Australian air transport operation, a person employed, or proposed to be employed, in connection with an operation the conduct of which would be authorised by the authorisation;
 - (c) to conduct an operation, or part of an operation, the conduct of which would be authorised by the authorisation.

Application for authorisation refused

- (7) Subregulation (8) applies in relation to an application by the other person for a civil aviation authorisation that has been refused by CASA.
- (8) The acts are the following:
 - (a) to use, in an Australian air transport operation, an aeroplane or rotorcraft the use of which would have been authorised by the authorisation;
 - (b) to employ, in an Australian air transport operation, a person employed, or proposed to be employed, in connection with an operation the conduct of which would have been authorised by the authorisation;
 - (c) to conduct an operation, or part of an operation, the conduct of which would have been authorised by the authorisation.
- (9) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

- (10) In this regulation:

cancelled authorisation means a civil aviation authorisation that has been cancelled otherwise than on the application or request of the holder of the authorisation.

employ includes engage, whether by contract or other arrangement.

suspended authorisation means a civil aviation authorisation that has been suspended otherwise than on the application or request of the holder of the authorisation.

varied authorisation means a civil aviation authorisation that has been varied otherwise than on the application or request of the holder of the authorisation.

119.260 Maximum period for use of foreign registered aircraft in Australian territory

- (1) An Australian air transport operator contravenes this subregulation if, in any 12 month period, the operator uses a foreign registered aircraft to conduct Australian air transport operations for a total of more than the number of days mentioned in subregulation (2).
- (2) The number of days is:
 - (a) 90; or
 - (b) if the operator holds an approval under regulation 119.025 in relation to the aircraft—the number mentioned in the approval for the aircraft.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Part 121—Australian air transport operations—larger aeroplanes

Table of contents

Subpart 121.A—Preliminary

- 121.005 Application of Part 121
- 121.010 Approvals by CASA for Part 121
- 121.015 Issue of Manual of Standards for Part 121

Subpart 121.C—General

Division 121.C.1—General flight limitations

- 121.020 Permitted categories of aeroplanes
- 121.025 Aeroplane to be flown under the IFR
- 121.030 Flights further than the 60 minute distance
- 121.035 Flights further than the threshold distance
- 121.040 Flight distance limitation over water
- 121.045 Simulation of emergency or abnormal situations, or IMC
- 121.050 Ferrying an aeroplane with one engine inoperative

Division 121.C.2—Operational documents

- 121.055 Compliance with flight manual
- 121.060 Operator to have minimum equipment list for certain flights
- 121.065 Duty statement to be available to crew
- 121.070 Availability of checklists

Division 121.C.3—Flight related documents

- 121.075 Electronic documents
- 121.080 Availability of parts of exposition
- 121.085 Carriage of documents
- 121.090 Accessibility of documents
- 121.095 Carriage of documents—flights that begin or end outside Australian territory
- 121.100 Keeping and updating documents etc.
- 121.105 Journey logs
- 121.110 Passenger lists
- 121.115 Flight preparation forms for flights that begin or end outside Australian territory

Division 121.C.4—Reporting and recording defects and incidents etc.

- 121.120 Procedures for reporting and recording defects etc.
- 121.125 Procedures for reporting and recording incidents

Division 121.C.5—Search and rescue services and emergency and survival equipment

- 121.130 Information about search and rescue services
- 121.135 Information about emergency and survival equipment

Division 121.C.6—Miscellaneous requirements

- 121.140 Crew activities necessary for safe operation
- 121.145 Competence of ground support personnel
- 121.150 Duty statement to be available to ground support personnel
- 121.155 Cockpit authorisation and briefing

Subpart 121.D—Operational procedures

Division 121.D.1—Operational control

- 121.160 Operational control

Division 121.D.2—Flight preparation

- 121.165 General flight preparation requirements
- 121.170 Flight preparation (Part 121 alternate aerodromes) requirements

Division 121.D.3—Flight planning

- 121.175 Operational flight plans
- 121.180 Availability of flight planning information

Division 121.D.4—Flight rules

- 121.185 Take-off and landing minima for aerodromes
- 121.190 Establishing lowest safe altitudes etc.
- 121.195 Exposition requirements for low-visibility operations
- 121.200 Stabilised approach requirements

Division 121.D.5—Aerodromes

- 121.205 Aerodrome requirements
- 121.210 Procedures to determine information about aerodromes
- 121.215 Procedures for safety at aerodromes
- 121.220 Taking off from and landing on narrow runways

Division 121.D.6—Fuel requirements

- 121.225 Fuel procedures
- 121.230 Oil requirements
- 121.235 Fuel requirements
- 121.240 Fuelling safety procedures

Division 121.D.7—Passenger transport and medical transport

- 121.245 Application of Division 121.D.7
 - 121.250 Carriage of restricted persons
 - 121.255 Carry-on baggage
 - 121.260 Aisles to remain unobstructed
 - 121.265 Stowage of passenger service equipment etc.
 - 121.270 Passengers in emergency exit row seats
 - 121.275 Carriage of passengers with reduced mobility
 - 121.280 Safety briefing cards
 - 121.285 Safety briefings, instructions and demonstrations
 - 121.290 Additional safety briefing for passengers in emergency exit rows
-

121.295 Safety briefing in the event of an emergency

Division 121.D.8—Instruments, indicators, equipment and systems

121.300 Airborne weather radar equipment
121.305 Head-up displays, enhanced vision systems and synthetic vision systems
121.310 Crew protective breathing equipment
121.315 Hand-held fire extinguishers
121.320 Procedures relating to first-aid kits
121.325 Procedures relating to universal precaution kits
121.330 Procedures relating to emergency medical kits
121.335 Life-saving equipment for life rafts
121.340 Survival equipment procedures

Division 121.D.9—Miscellaneous

121.345 Procedures relating to ice
121.350 Procedures relating to portable electronic devices
121.355 Procedures relating to carriage of animals
121.360 Polar operations
121.365 Cosmic radiation
121.370 Exceeding cosmic radiation limits
121.375 Obstruction of emergency exits
121.380 Assignment of cabin crew seats
121.385 CASA approvals relating to take-offs and landings

Subpart 121.F—Performance

121.390 Performance data
121.395 Take-off performance
121.420 Landing performance
121.425 Computerised performance data systems not fitted to aeroplanes
121.430 Procedures relating to inoperative engines

Subpart 121.J—Weight and balance

121.435 Loading of aeroplane
121.440 Procedures for loading aeroplane etc.
121.445 Pilot in command must have information about aeroplane's weight and balance
121.450 Computerised weight and balance systems not fitted to aeroplanes
121.455 Weight and balance documents

Subpart 121.K—Equipment

121.460 Requirements relating to equipment

Subpart 121.N—Flight crew

Division 121.N.1—General

121.470 Additional application of this Subpart
121.475 Composition, number, qualifications and training
121.480 Experience
121.485 Competence
121.490 Assignment to duty as pilot in command

- 121.495 Pilot in command
- 121.500 Co-pilots
- 121.505 Cruise relief co-pilots
- 121.510 Use of approved flight simulators for training or checking
- 121.515 Knowledge of route and aerodromes

Division 121.N.2—Operation of aeroplanes of different type ratings

- 121.520 Application of Division 121.N.2
- 121.525 Assignment of flight crew to aeroplanes of different type ratings
- 121.530 Credit for checks, qualifications, training and experience

Division 121.N.3—Relief

- 121.535 Relief of pilot in command

Division 121.N.4—Recent experience

- 121.540 Pilot in command and co-pilot—recent experience requirements
- 121.545 Cruise relief co-pilot—recent experience requirements
- 121.550 Flight engineers—recent experience requirements

Division 121.N.5—Non-recurrent training and checking etc.

- 121.555 Meeting initial training requirements
- 121.560 Meeting conversion training requirements
- 121.565 Command training requirements

Division 121.N.6—Recurrent training and checking

- 121.570 Recurrent training and checking requirements
- 121.575 Holding valid Part 121 proficiency check
- 121.580 Part 121 proficiency check
- 121.585 Holding valid line check
- 121.590 Line check requirements
- 121.595 Holding valid refresher check
- 121.600 Refresher training and checking requirements
- 121.605 Holding valid annual emergency and safety equipment check
- 121.610 Annual emergency and safety equipment training and checking requirements
- 121.615 Holding valid 3 yearly emergency and safety equipment check
- 121.620 The 3 yearly emergency and safety equipment training and checking requirements

Subpart 121.P—Cabin crew

Division 121.P.1—Preliminary

- 121.625 Application of Subpart 121.P
- 121.630 When cabin crew are required

Division 121.P.2—General

- 121.635 Number of cabin crew
- 121.640 Qualifications, experience and training
- 121.645 Competence
- 121.650 Minimum age
- 121.655 English proficiency

- 121.660 Assignment to duty as senior cabin crew member
- 121.665 Training and checking for senior cabin crew member
- 121.670 Operating with a reduced number of cabin crew
- 121.675 Second senior cabin crew member
- 121.680 Training facilities and devices

Division 121.P.3—Operation of aeroplanes of different aeroplane types

- 121.685 Application of Division 121.P.3
- 121.690 Content of exposition in relation to aeroplane types
- 121.695 Maximum number of aeroplane types
- 121.700 Assignment to different aeroplane types

Division 121.P.4—Recent experience

- 121.705 Recent experience requirements—6 months before flight

Division 121.P.5—Non-recurrent training and checking

- 121.710 Meeting initial training requirements
- 121.715 Meeting conversion training requirements
- 121.720 Meeting differences training requirements

Division 121.P.6—Recurrent training and checking

- 121.725 Annual training and holding valid annual training check
- 121.730 Holding valid line check
- 121.735 Three yearly training and holding valid 3 yearly training check

Division 121.P.7—When cabin crew are carried but not required

- 121.740 Competence
- 121.745 Minimum age
- 121.750 Annual emergency and safety equipment check

Subpart 121.V—Emergency evacuation procedures

- 121.755 Emergency evacuation procedures

Subpart 121.Z—Certain single-engine aeroplanes

- 121.760 Application of Part 135 to certain operations
- 121.765 At least 2 pilots required for certain IFR flights
- 121.770 Trend monitoring systems required for certain VFR flights by day
- 121.775 Terrain awareness and warning system
- 121.780 Aircraft not to be flown under the VFR at night

Subpart 121.A—Preliminary

121.005 Application of Part 121

- (1) This Part (other than Subpart 121.Z) applies to the operation of a multi-engine aeroplane for an Australian air transport operation if either or both of the following apply in relation to the aeroplane:
 - (a) it has a maximum operational passenger seat configuration of more than 9;
 - (b) it has a maximum take-off weight of more than 8,618 kg.

Note: For the additional application of Subpart 121.N, see regulation 121.470.
- (2) Subpart 121.Z applies to the operation of a single-engine aeroplane for an Australian air transport operation if both of the following apply in relation to the aeroplane:
 - (a) it has a maximum operational passenger seat configuration of more than 9;
 - (b) it has a maximum take-off weight of not more than 8,618 kg.

121.010 Approvals by CASA for Part 121

- (1) If a provision of this Part, or of the Part 121 Manual of Standards, refers to a person holding an approval under this regulation, a person may apply to CASA, in writing, for the approval.
- (2) Subject to regulation 11.055, the approval must be granted.
- (3) Subregulation 11.055(1B) applies to the granting of an approval under this regulation.

121.015 Issue of Manual of Standards for Part 121

For the purposes of subsection 98(5A) of the Act, CASA may issue a Manual of Standards for this Part prescribing matters:

- (a) required or permitted by these Regulations to be prescribed by the Part 121 Manual of Standards; or
- (b) necessary or convenient to be prescribed for carrying out or giving effect to this Part.

Note: A Manual of Standards is a legislative instrument: see subsection 98(5AA) of the Act.

Subpart 121.C—General

Division 121.C.1—General flight limitations

121.020 Permitted categories of aeroplanes

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the aeroplane begins the flight; and
 - (b) the aeroplane is not type certificated in any of the following categories:
 - (i) transport;
 - (ii) commuter;
 - (iii) normal (within the meaning of Special Federal Aviation Regulation 41 of the United States of America, as in force on 12 September 1983).
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

121.025 Aeroplane to be flown under the IFR

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if, during a stage of the flight, the aeroplane is flown under the VFR.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

121.030 Flights further than the 60 minute distance

Flying further than the 60 minute distance

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if:
 - (a) the aeroplane is mentioned in an item in column 1 of the following table; and
 - (b) the aeroplane is flown:
 - (i) further from an adequate aerodrome for the aeroplane than the distance (the **60 minute distance**) the aeroplane can fly if flying at the speed mentioned in column 2 of that item for 60 minutes; but
 - (ii) no further than the distance (the **threshold distance**) from an adequate aerodrome for the aeroplane that the aeroplane can fly if flying at the speed mentioned in column 2 of that item for the time mentioned in column 3 of that item; and

Regulation 121.030

(c) a requirement mentioned in subregulation (2) is not met.

Note: This provision will not apply in relation to items 1, 2 and 3 of the following table as, in those cases, the 60 minute distance is equal to the threshold distance.

Flight further than the 60 minute distance			
Item	Column 1	Column 2	Column 3
	Aeroplane	Speed (in International Standard Atmosphere conditions and still air)	Time
1	2-piston-engine aeroplane	the one-engine-inoperative cruising speed specified in the aeroplane operator's exposition for this regulation	60 minutes
2	2-turbine-engine propeller-driven aeroplane with a maximum certificated passenger seating capacity of 20 or more	the one-engine-inoperative cruising speed specified in the aeroplane operator's exposition for this regulation	60 minutes
3	2-turbine-engine aeroplane (other than a turbine-engine propeller-driven aeroplane) to which either or both of the following apply: (a) a maximum take-off weight of 54,500 kg or more; (b) a maximum certificated passenger seating capacity of 20 or more	the one-engine-inoperative cruising speed specified in the aeroplane operator's exposition for this regulation	60 minutes
4	2-turbine-engine propeller-driven aeroplane to which both of the following apply: (a) a maximum take-off weight of more than 5,700 kg; (b) a maximum certificated passenger seating capacity of 19 or less	the one-engine-inoperative cruising speed specified in the aeroplane operator's exposition for this regulation	120 minutes
5	2-turbine-engine aeroplane (other than a turbine-engine propeller-driven aeroplane) to which both of the following apply: (a) a maximum take-off weight of less than 54,500 kg; (b) a maximum certificated passenger seating capacity of 19 or less	the one-engine-inoperative cruising speed specified in the aeroplane operator's exposition for this regulation	180 minutes
6	3- or 4-turbine-engine aeroplane to which either or both of the following apply: (a) a maximum take-off weight of more than 8,618 kg; (b) a maximum certificated passenger seating capacity of 20 or more	the normal cruising speed specified in the aeroplane operator's exposition for this regulation	180 minutes

Requirements to be met

(2) The requirements are that:

Regulation 121.035

- (a) the aeroplane operator's exposition includes procedures for conducting flights further than the 60 minute distance, including procedures for:
 - (i) dispatching such flights; and
 - (ii) providing updated information relating to the adequate aerodrome to the flight crew during such flights; and
- (b) the operator estimates there will be an adequate aerodrome for the flight when the aeroplane is flown further than that distance; and
- (c) for a 2-engine aeroplane—the operator estimates that the landing minima for the adequate aerodrome at the estimated time of use of the aerodrome are not less than the landing minima required to comply with the requirements under Division 121.D.4 for the aerodrome; and
- (d) the operator has operational control for the flight in accordance with the operator's exposition procedures mentioned in regulation 121.160.

Offence

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

121.035 Flights further than the threshold distance

Flying further than the threshold distance

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if:
 - (a) the aeroplane is flown further from an adequate aerodrome for the aeroplane than the threshold distance mentioned in subparagraph 121.030(1)(b)(ii) for the aeroplane; and
 - (b) the operator does not hold an approval under regulation 121.010 to do so.

Requirements in the Manual of Standards

- (2) The Part 121 Manual of Standards may prescribe:
 - (a) criteria for the grant of an approval mentioned in paragraph (1)(b); and
 - (b) the form in which an application for such an approval must be made; and
 - (c) factors to be considered by CASA in deciding whether or not to grant such an approval.
- (3) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if:
 - (a) a requirement prescribed by the Part 121 Manual of Standards in relation to conducting flights further from an adequate aerodrome than the threshold distance applies to the aeroplane for the flight; and
 - (b) the requirement is not met for the flight.

Exposition procedures

- (4) If an aeroplane is flown further from an adequate aerodrome for the aeroplane than the threshold distance mentioned in subparagraph 121.030(1)(b)(ii) for the aeroplane, the aeroplane operator's exposition must include procedures for conducting flights further than that distance.

Offence

- (5) A person commits an offence of strict liability if the person contravenes subregulation (1) or (3).

Penalty: 50 penalty units.

121.040 Flight distance limitation over water

- (1) This regulation applies in relation to an aeroplane:
- (a) that has a maximum operational passenger seat configuration of more than 30; and
 - (b) that does not comply with the ditching requirements of the relevant airworthiness standards for the aeroplane.
- (2) The operator of an aeroplane for a flight contravenes this subregulation if, during the flight:
- (a) the aeroplane is flown over water; and
 - (b) the aeroplane is flown further than the distance mentioned in subregulation (3) from land.
- (3) The distance is the lesser of:
- (a) the distance the aeroplane can fly in 2 hours at its normal cruising speed in International Standard Atmosphere conditions and in still air; and
 - (b) 400 nautical miles.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

121.045 Simulation of emergency or abnormal situations, or IMC

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if an emergency or abnormal situation is simulated during the flight.
- (2) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if IMC are simulated during the flight.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

Regulation 121.050

121.050 Ferrying an aeroplane with one engine inoperative

- (1) The operator of an aeroplane for a flight contravenes this subregulation if, during the flight, the aeroplane is ferried with one engine inoperative.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 121.C.2—Operational documents

121.055 Compliance with flight manual

- (1) The operator of an aeroplane for a flight contravenes this subregulation if, during the flight, the aeroplane is operated in a way that does not meet a requirement or limitation that:

- (a) is set out in the aircraft flight manual instructions for the aeroplane; and
- (b) relates to the operation of the aeroplane.

Note: The pilot in command of the aeroplane must also ensure the aeroplane is operated in accordance with the aircraft flight manual instructions: see regulation 91.095.

- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

121.060 Operator to have minimum equipment list for certain flights

- (1) The operator of an aeroplane for a flight contravenes this subregulation if, when the flight begins, there is no minimum equipment list for the aeroplane.

- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

121.065 Duty statement to be available to crew

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
- (a) a crew member is assigned to duty for the flight; and
 - (b) the operator has not made a statement of the crew member's duties for the flight available to the crew member; and
 - (c) the crew member begins to carry out the crew member's duties for the flight.

- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

121.070 Availability of checklists

- (1) The operator of an aeroplane for a flight contravenes this subregulation if the requirement mentioned in subregulation (2) is not met for the flight.

- (2) The requirement is that, before a crew member for the flight begins to carry out a duty for the flight, the operator must make available to the member each

Part 121 Australian air transport operations—larger aeroplanes

Subpart 121.C General

Division 121.C.2 Operational documents

Regulation 121.070

checklist of normal, abnormal and emergency procedures for the aeroplane that is relevant to the duty.

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 121.C.3—Flight related documents

121.075 Electronic documents

To avoid doubt, if a document is required to be carried on a flight of an aircraft under this Division, that requirement is taken to be satisfied if an electronic copy of the document is carried on the flight.

Note: Electronic copies may not satisfy the requirements of the law of a foreign country for flights that begin or end at an aerodrome outside Australian territory.

121.080 Availability of parts of exposition

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the following parts of the aeroplane operator's exposition are not available to a crew member for the flight:
 - (i) a part that is relevant to the duties of the crew member;
 - (ii) a part that is required for the conduct of the flight; and
 - (b) the aeroplane begins the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

121.085 Carriage of documents

Documents required by Part 121 Manual of Standards

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if:
 - (a) a document prescribed by the Part 121 Manual of Standards for the purposes of this paragraph is not carried on the aeroplane; and
 - (b) the aeroplane begins the flight.

Flight crew medical certificates

- (2) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) a flight crew member's medical certificate is not carried on the aeroplane for the flight; and
 - (b) the flight crew member does not give CASA written notice that the certificate is not being carried on the aeroplane for the flight:
 - (i) before the flight begins; or
 - (ii) if it is not practicable to give the notice before the flight begins—within 24 hours after the flight ends.

Flight crew licences

- (3) The operator of an aeroplane for a flight contravenes this subregulation if:

Regulation 121.090

- (a) a flight crew member's flight crew licence is not carried on the aeroplane for the flight; and
- (b) the flight crew member does not give CASA written notice that the licence is not being carried on the aeroplane for the flight:
 - (i) before the flight begins; or
 - (ii) if it is not practicable to give the notice before the flight begins—within 24 hours after the flight ends.

Offence

- (4) A person commits an offence of strict liability if the person contravenes subregulation (1), (2) or (3).

Penalty: 50 penalty units.

121.090 Accessibility of documents

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if:
 - (a) under regulation 121.085, a document is required to be carried on the aeroplane for the flight; and
 - (b) when the flight begins, the document is not readily accessible to the aeroplane's crew.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

121.095 Carriage of documents—flights that begin or end outside Australian territory

- (1) This regulation applies to a flight of an aeroplane that begins or ends at an aerodrome outside Australian territory.
- (2) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if:
 - (a) a document prescribed by the Part 121 Manual of Standards for the purposes of this paragraph is not carried on the aeroplane; and
 - (b) the aeroplane begins the flight.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

121.100 Keeping and updating documents etc.

An aeroplane operator's exposition must include the following for a flight of the aeroplane:

- (a) procedures for keeping the documents prescribed by the Part 121 Manual of Standards accessible to a person on the ground for the duration of the flight;
- (b) procedures for providing updated information to such a person during the flight if the information in the document requires updating during that time.

121.105 Journey logs

Operator—preparation of journey log

- (1) The operator of an aeroplane for a flight contravenes this subregulation if, when the flight begins, the operator has not prepared a journey log for the flight:
 - (a) that is capable of containing the information mentioned in subregulations (3) and (5); and
 - (b) with a place for the pilot in command to verify the entries for the flight.

Pre-flight completion of journey log

- (2) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if, when the flight begins, the information about the flight mentioned in subregulation (3) is not recorded in the journey log.
- (3) The information is the following:
 - (a) the aeroplane's registration mark or flight number;
 - (b) the date of the flight;
 - (c) for each crew member assigned to the flight:
 - (i) the crew member's name or another means to identify the crew member; and
 - (ii) the duties assigned to the crew member for the flight;
 - (d) for the flight:
 - (i) the place of departure; and
 - (ii) the time the flight begins;
 - (e) the amount of fuel added to the aeroplane's fuel tanks before the flight begins (if any);
 - (f) the amount of fuel in the aeroplane's fuel tanks when the flight begins.

Post-flight completion of journey log

- (4) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if the information about the flight mentioned in subregulation (5) is not recorded in the journey log for the flight as soon as practicable after the flight ends.
- (5) The information is the following:
 - (a) the place of arrival;
 - (b) the time the flight ends;
 - (c) the duration of the flight;
 - (d) the amount of fuel in the aeroplane's fuel tanks when the flight ends;

Regulation 121.110

- (e) incidents and observations (if any) relevant to the flight.

Exception to completion of journey log

- (6) Subregulations (1), (2) and (4) do not apply to the operator or the pilot in command in relation to information mentioned in those subregulations if, by the time it is required to be recorded, the information is:
- (a) recorded in another document kept by the operator; or
 - (b) readily available to the operator from another source.

Note: An example for paragraph (a) is an operational flight plan kept by the operator for the flight.

Offence

- (7) A person commits an offence of strict liability if the person contravenes subregulation (1), (2) or (4).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (6): see subsection 13.3(3) of the *Criminal Code*.

121.110 Passenger lists

- (1) The operator of an aeroplane for a flight that is a passenger transport operation or a medical transport operation contravenes this subregulation if, when the flight begins, the operator has not prepared a passenger list for the flight that contains the information mentioned in subregulation (2).
- (2) The information is the following:
- (a) the aeroplane's registration mark or flight number;
 - (b) the name of each passenger;
 - (c) the places of departure and destination for each passenger;
 - (d) the number of infants carried;
 - (e) the date, and estimated time of departure, of the flight.
- (3) Subregulation (1) does not apply to the operator in relation to information mentioned in that subregulation if, by the time it is required to be recorded, the information is:
- (a) recorded in another document kept by the operator; or
 - (b) readily available to the operator from another source.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (3): see subsection 13.3(3) of the *Criminal Code*.

121.115 Flight preparation forms for flights that begin or end outside Australian territory

- (1) This regulation applies to a flight of an aeroplane that begins or ends at an aerodrome outside Australian territory.
- (2) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if, when the flight begins, the pilot in command has not signed a flight preparation form certifying that the pilot in command is satisfied of the matters mentioned in subregulation (3).
- (3) The matters are the following:
 - (a) the aeroplane can be operated during the flight in accordance with its configuration deviation list (if any);
 - (b) the parts of the operator's exposition required to be available to the aeroplane's crew before the flight by regulation 121.080 are available;
 - (c) the requirements and limitations in the operator's exposition relating to the flight can be complied with for the flight;
 - (d) regulations 121.085 and 121.095 are being complied with for the flight;
 - (e) equipment required to be fitted to, or carried on, the aeroplane for the flight by Subpart 121.K is fitted to, or carried on, the aeroplane in accordance with that Subpart;
 - (f) equipment mentioned in paragraph (e) is:
 - (i) operative; or
 - (ii) inoperative, and permitted to be inoperative for the flight under these Regulations;
 - (g) the aeroplane's take-off, en-route and landing performance capabilities meet the performance requirements for the circumstances and conditions expected during the flight;
 - (h) the aeroplane's weight and balance will remain within the aeroplane's weight and balance limits throughout the flight.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Division 121.C.4—Reporting and recording defects and incidents etc.

121.120 Procedures for reporting and recording defects etc.

An aeroplane operator's exposition must include procedures for the reporting and recording by a flight crew member for a flight of the aeroplane of any of the following that occur during the flight:

- (a) an abnormal instrument indication;
- (b) abnormal behaviour by the aeroplane;
- (c) exceedence of an operating limit specified in the aircraft flight manual instructions for the aeroplane;
- (d) a defect in the aeroplane.

121.125 Procedures for reporting and recording incidents

An aeroplane operator's exposition must include procedures for the reporting and recording by crew members of incidents relating to a flight of the aeroplane that endanger, or could endanger, the safe operation of the aeroplane.

Division 121.C.5—Search and rescue services and emergency and survival equipment

121.130 Information about search and rescue services

- (1) The operator of an aeroplane for a flight contravenes this subregulation if, when the flight begins, information about the search and rescue services relevant to the flight is not readily accessible to the flight crew members for the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

121.135 Information about emergency and survival equipment

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the Part 121 Manual of Standards prescribes an item of equipment for the purposes of this regulation; and
 - (b) when the flight begins, the information prescribed by the Part 121 Manual of Standards for that equipment is not available for immediate communication by the operator to a rescue coordination centre.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 121.C.6—Miscellaneous requirements

121.140 Crew activities necessary for safe operation

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the operator requires a crew member for the flight to perform an activity during take-off, initial climb, final approach or landing of the aeroplane for the flight; and
 - (b) the activity is not necessary for the safe operation of the aeroplane.
- (2) A crew member for a flight of an aeroplane contravenes this subregulation if:
 - (a) the crew member performs an activity during take-off, initial climb, final approach or landing of the aeroplane for the flight; and
 - (b) the activity is not necessary for the safe operation of the aeroplane.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

121.145 Competence of ground support personnel

- (1) The operator of an aeroplane for a flight contravenes this subregulation if, before a member of the operator's personnel carries out a ground support duty for the flight, the member has not met a requirement mentioned in subregulation (2).
- (2) The requirements are the following:
 - (a) the member must have successfully completed training for the duty;
 - (b) the member must have been assessed as competent to carry out the duty.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

121.150 Duty statement to be available to ground support personnel

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) a member of the operator's personnel is assigned to carry out a ground support duty for the flight; and
 - (b) the operator has not made a statement of the member's duties for the flight available to the member; and
 - (c) the member begins to carry out the duty for the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

121.155 Cockpit authorisation and briefing

- (1) This regulation applies to an aeroplane that is required to be equipped with a cockpit door under regulation 4.68 of the *Aviation Transport Security Regulations 2005*.
- (2) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if:
 - (a) during the flight, a person enters the cockpit; and
 - (b) the person is not a person mentioned in subregulation (3).
- (3) The persons are the following:
 - (a) an authorised officer who is carrying out an audit, check, examination, inspection or test under these Regulations;
 - (b) a person who is permitted to enter the cockpit by regulation 4.67 of the *Aviation Transport Security Regulations 2005*.

Note: A person is not allowed to enter the cockpit after take-off unless the person holds appropriate identification: see paragraph 4.67(4)(b) of the *Aviation Transport Security Regulations 2005*.

- (4) The pilot in command of an aeroplane for a flight contravenes this subregulation if:
 - (a) during the flight, a person other than a crew member for the flight enters the cockpit; and
 - (b) the person is not briefed by the pilot in command or the co-pilot on the safety procedures that are relevant to the cockpit:
 - (i) before the person enters the cockpit; or
 - (ii) as soon as practicable after the person enters the cockpit.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (2) or (4).

Penalty: 50 penalty units.

Part 121 Australian air transport operations—larger aeroplanes

Subpart 121.D Operational procedures

Division 121.D.1 Operational control

Regulation 121.160

Subpart 121.D—Operational procedures

Division 121.D.1—Operational control

121.160 Operational control

An aeroplane operator's exposition must include procedures for determining how operational control for a flight of the aeroplane is to be exercised and by whom.

Division 121.D.2—Flight preparation

121.165 General flight preparation requirements

An aeroplane operator's exposition must include procedures for complying with the following for a flight of the aeroplane:

- (a) the flight preparation (weather assessments) requirements;
- (b) the flight preparation (Part 121 alternate aerodromes) requirements.

121.170 Flight preparation (Part 121 alternate aerodromes) requirements

- (1) The Part 121 Manual of Standards may prescribe requirements relating to flight preparation and alternate aerodromes (the *flight preparation (Part 121 alternate aerodromes) requirements*).
- (2) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if a flight preparation (Part 121 alternate aerodromes) requirement is not met for the flight.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Division 121.D.3—Flight planning

121.175 Operational flight plans

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if, when the flight begins, an operational flight plan that meets the requirements mentioned in subregulation (2) has not been prepared for the flight.
- (2) The requirements are the following:
 - (a) the flight plan must be prepared having regard to:
 - (i) the safety of the aeroplane, and of the people on board the aeroplane, during the flight; and
 - (ii) the aeroplane's performance; and
 - (iii) the expected aeroplane operating limitations and conditions for the flight; and
 - (iv) meteorological conditions for the flight;
 - (b) the flight plan must contain the information prescribed by the Part 121 Manual of Standards for the purposes of this paragraph.
- (3) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if:
 - (a) the Part 121 Manual of Standards prescribes information about the flight for the purposes of this subregulation; and
 - (b) that information is not recorded in the operational flight plan for the flight:
 - (i) unless subparagraph (ii) applies—before the flight ends; or
 - (ii) if it is not practicable to record the information before the flight ends—as soon as practicable after the flight ends.
- (4) Subregulation (1) or (3) does not apply to the operator or the pilot in command in relation to information required to be included in the operational flight plan under that subregulation if, by the time it is required to be recorded, the information is:
 - (a) recorded in another document kept by the operator; or
 - (b) readily available to the operator from another source.

Note: An example for paragraph (a) is a journey log kept by the operator for the flight.

- (5) A person commits an offence of strict liability if the person contravenes subregulation (1) or (3).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (4): see subsection 13.3(3) of the *Criminal Code*.

121.180 Availability of flight planning information

- (1) The operator of an aeroplane for a flight contravenes this subregulation if a requirement mentioned in subregulation (2) is not met for the flight.
- (2) The requirements are the following:
 - (a) the pilot in command of the aeroplane must have access to the information mentioned in subregulation (3) before and during the flight;
 - (b) each person in the operator's organisation who is responsible for flight planning for the flight must have access to the information mentioned in subregulation (3) before the flight;
 - (c) each person in the operator's organisation who is responsible for flight replanning for the flight must have access to the information mentioned in subregulation (3) during the flight;
 - (d) each person in the operator's organisation who exercises operational control for the flight must have access to the information mentioned in subregulation (3) before and during the flight.
- (3) The information is the following:
 - (a) authorised weather forecasts and authorised weather reports:
 - (i) in relation to the flight; and
 - (ii) if a destination alternate aerodrome is required for the flight by the flight preparation (Part 121 alternate aerodromes) requirements—in relation to the destination alternate aerodrome;
 - (b) NOTAMs for the flight;
 - (c) the suitability for a take-off or landing by the aeroplane of:
 - (i) the departure and planned destination aerodromes for the flight; and
 - (ii) if a destination alternate aerodrome is required for the flight by the flight preparation (Part 121 alternate aerodromes) requirements—the destination alternate aerodrome.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 121.D.4—Flight rules

121.185 Take-off and landing minima for aerodromes

- (1) If an aeroplane conducts an IFR flight to or from an aerodrome, the aeroplane operator's exposition must include:
 - (a) procedures for determining take-off minima that meet the requirements mentioned in subregulation (2); and
 - (b) procedures for determining landing minima that meet the requirement mentioned in subregulation (3).
- (2) The requirements are the following:
 - (a) the take-off minima must not be less than the take-off minima prescribed by the take-off minima requirements for the aerodrome;
 - (b) the take-off minima must be sufficient to enable the pilot in command to control the aeroplane if it is necessary to conduct a discontinued take-off in adverse circumstances;
 - (c) for a multi-engine aeroplane—the take-off minima must be sufficient to enable the pilot in command to control the aeroplane if it is necessary to conduct a continued take-off after:
 - (i) failure of the aeroplane's critical engine; or
 - (ii) if the aeroplane does not have a critical engine—the failure of an engine.
- (3) The requirement is that the landing minima must not be less than the landing minima prescribed by the landing minima requirements for the aerodrome, including for an approach with visual circling.

121.190 Establishing lowest safe altitudes etc.

- (1) The operator of an aeroplane for a flight contravenes this subregulation if, when the flight begins, the operator has not established:
 - (a) for each route or route segment for the flight for which there is a published lowest safe altitude—the published lowest safe altitude for the route or route segment; and
 - (b) for each route or route segment for the flight for which there is no published lowest safe altitude—the lowest safe altitude for the route or route segment.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

121.195 Exposition requirements for low-visibility operations

An aeroplane operator's exposition must include the following:

- (a) each type of low-visibility operation conducted using the aeroplane;
- (b) the aircraft systems required to be used for each type of those operations;
- (c) the aerodrome facilities required to conduct each type of those operations;
- (d) the training and qualifications required for the aeroplane's flight crew members for each type of those operations;
- (e) the requirements to be met by the aeroplane's flight crew members during each of those operations.

121.200 Stabilised approach requirements

An aeroplane operator's exposition must include procedures about conducting stabilised approaches to land at an aerodrome.

Division 121.D.5—Aerodromes

121.205 Aerodrome requirements

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if the aeroplane takes off from, or lands at, an aerodrome that does not meet a requirement mentioned in subregulation (2).
- (2) The requirements are the following:
 - (a) the aerodrome must be suitable for the aeroplane to take-off and land;
 - (b) the aerodrome must be:
 - (i) a certified aerodrome that complies with the standards mentioned in the Part 139 Manual of Standards; or
 - (ii) an aerodrome for which the operator's exposition includes the matters required by subregulation 121.210(1).
- (3) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if:
 - (a) the aeroplane has a maximum certificated passenger seating capacity of 20 or more; and
 - (b) the aeroplane is a turbine-engine aeroplane (other than a turbine-engine propeller-driven aeroplane); and
 - (c) the aeroplane lands on an aerodrome runway; and
 - (d) the aerodrome is the planned destination aerodrome; and
 - (e) the aerodrome runway does not meet the requirement mentioned in subregulation (4).
- (4) The requirement is that:
 - (a) the runway is equipped with an approved visual approach slope indicator system in accordance with Part 139; or
 - (b) both of the following are satisfied:
 - (i) the runway is equipped with an approved visual approach slope indicator system in accordance with Part 139 that has been inoperative for no more than 7 days before the aeroplane lands on the runway;
 - (ii) the operator's exposition includes procedures for conducting an approach and landing on a runway with such a system inoperative; or
 - (c) the aeroplane is equipped or fitted with an approach slope indicator system mentioned in the operator's exposition that is suitable for use for the runway; or
 - (d) the operator holds an approval for the aeroplane and the runway under regulation 121.010.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (1) or (3).

Penalty: 50 penalty units.

121.210 Procedures to determine information about aerodromes

- (1) An aeroplane operator's exposition must include the following:
 - (a) if the information mentioned in subregulation (2) for an aerodrome mentioned in subregulation (3) is not published in the AIP—procedures to determine the information for the aerodrome;
 - (b) the special procedures and restrictions (if any) that the operator requires the flight crew of the aeroplane to use at an aerodrome mentioned in subregulation (3), including:
 - (i) engine failure procedures; and
 - (ii) obstacle clearance procedures;
 - (c) procedures for the pilot in command to plan a take-off from, or a landing at, an aerodrome not mentioned in subregulation (3), including a procedure to determine the kinds of information mentioned in subregulation (2) for the aerodrome.

- (2) The information is the following:
 - (a) runway or strip lengths, widths, directions, slopes and surface types for the aerodrome;
 - (b) the location of taxiways and turning nodes (if any);
 - (c) the aerodrome's elevation;
 - (d) the location on the aerodrome of the aerodrome reference point (if any);
 - (e) the location of the aerodrome's windsocks;
 - (f) the aids to navigation and communication facilities available at the aerodrome (if any);
 - (g) the limitations (if any) on the use of the aerodrome;
 - (h) the special procedures (if any) in use at the aerodrome, in flight or on the ground or water;
 - (i) a contact person capable of providing information about the condition of the aerodrome.

- (3) The aerodromes are the following for a flight of the aeroplane:
 - (a) the departure aerodrome;
 - (b) the planned destination aerodrome;
 - (c) any alternate aerodromes required for the flight by the flight preparation (Part 121 alternate aerodromes) requirements.

121.215 Procedures for safety at aerodromes

An aeroplane operator's exposition must include procedures to ensure the safety of persons in the vicinity of an aeroplane when any of the following circumstances apply:

- (a) a person is embarking or disembarking the aeroplane;
- (b) a passenger is embarking or disembarking, or on board, the aeroplane while an engine of the aeroplane is operating but the aeroplane is not being flown or fuelled;
- (c) the aeroplane is being loaded or unloaded;

Regulation 121.220

- (d) the aeroplane is being operated at an aerodrome.

121.220 Taking off from and landing on narrow runways

- (1) This regulation applies in relation to an aeroplane if:
- (a) the aeroplane takes off from, or lands on, a runway; and
 - (b) the width of the runway (a *narrow runway*) is less than the width for the aeroplane worked out in the manner prescribed by the Part 121 Manual of Standards for the purposes of this paragraph; and
 - (c) the aeroplane has a maximum certificated take-off weight of more than 5,700 kg; and
 - (d) the aeroplane is of a type first type certificated in its country of manufacture on or after 1 March 1978.
- (2) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if:
- (a) the aeroplane takes off from, or lands on, a narrow runway; and
 - (b) the aircraft flight manual instructions for the aeroplane do not include requirements for the operation of the aeroplane on a narrow runway.
- (3) An aeroplane operator's exposition must include procedures for taking off from, or landing on, a narrow runway.
- (4) An aeroplane operator's exposition must include procedures relating to the training required for the aeroplane's flight crew to conduct a take-off from, or a landing on, a narrow runway.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Division 121.D.6—Fuel requirements

121.225 Fuel procedures

An aeroplane operator's exposition must include procedures to ensure that a flight of the aeroplane is conducted in accordance with the requirements mentioned in subregulation 121.235(1).

121.230 Oil requirements

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if, when the flight begins, the aeroplane is not carrying sufficient oil to complete the flight safely.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

121.235 Fuel requirements

- (1) The Part 121 Manual of Standards may prescribe requirements relating to fuel for aeroplanes, including (but not limited to) the following:
 - (a) matters that must be considered when determining whether an aeroplane has sufficient fuel to complete a flight safely;
 - (b) the amounts of fuel that must be carried on board an aeroplane for a flight;
 - (c) procedures for monitoring amounts of fuel during a flight;
 - (d) procedures to be followed if fuel reaches specified amounts during a flight.
- (2) The pilot in command of an aeroplane for a flight contravenes this subregulation if:
 - (a) the pilot is subject to a requirement mentioned in subregulation (1) for the flight; and
 - (b) the requirement is not met for the flight.
- (3) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the operator is subject to a requirement mentioned in subregulation (1) for the flight; and
 - (b) the requirement is not met for the flight.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (2) or (3).

Penalty: 50 penalty units.

121.240 Fuelling safety procedures

An aeroplane operator's exposition must include the following:

Regulation 121.240

- (a) procedures to ensure the aeroplane is fuelled safely;
- (b) procedures relating to the safety of passengers for a flight of the aeroplane who are embarking or disembarking, or on board, the aeroplane during fuelling, including the normal, emergency and communication procedures to be followed by the following persons:
 - (i) any cabin crew for the flight;
 - (ii) any flight crew members for the flight who are on duty in the cockpit;
 - (iii) any of the operator's personnel who carry out a ground support duty for the flight;
- (c) if the operator permits a person to operate low-risk electronic devices inside the cabin of the aeroplane while the aeroplane is being fuelled—procedures to ensure that, before an engine of the aeroplane is started, any effects of radio frequency emissions from those devices have been corrected.

Division 121.D.7—Passenger transport and medical transport

121.245 Application of Division 121.D.7

This Division applies in relation to the operation of an aeroplane for a passenger transport operation or a medical transport operation.

121.250 Carriage of restricted persons

An aeroplane operator's exposition must include the following:

- (a) procedures for carrying a restricted person on the aeroplane for a flight;
- (b) procedures to inform the pilot in command of the aeroplane for a flight about the carriage of a restricted person for a flight.

Note: For other requirements for the carriage of restricted persons who are deportees, removees and other persons in custody, see Division 4.5 of the *Aviation Transport Security Regulations 2005*.

121.255 Carry-on baggage

An aeroplane operator's exposition must include procedures for the following:

- (a) securely stowing carry-on baggage;
- (b) determining the maximum weight and size of baggage that can be taken on the aeroplane as carry-on baggage;
- (c) determining the locations on the aeroplane where carry-on baggage can be stowed;
- (d) giving instructions to passengers about securely stowing carry-on baggage at the following times:
 - (i) before take-off;
 - (ii) before landing;
 - (iii) any other time that the pilot in command directs.

121.260 Aisles to remain unobstructed

- (1) This regulation applies in relation to a flight of an aeroplane for which regulation 121.630 requires the aeroplane to carry a cabin crew member.
- (2) The operator of the aeroplane for a flight contravenes this subregulation if an aisle of the aeroplane is obstructed during the flight, other than:
 - (a) by a person; or
 - (b) by cabin service equipment while cabin service is being provided to passengers.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Regulation 121.265

121.265 Stowage of passenger service equipment etc.

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the aeroplane is:
 - (i) taxiing; or
 - (ii) taking off; or
 - (iii) landing; and
 - (b) the requirement mentioned in subregulation (2) is not met.
- (2) The requirement is that any piece of passenger service equipment that could interfere with an evacuation of the aeroplane in an emergency must be secured in its stowed position.
- (3) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the aeroplane is taxiing, taking off or landing; and
 - (b) an item of galley equipment or a serving cart is not secured so as to prevent it from moving in the emergency landing conditions set out in the aeroplane's type certification basis.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1) or (3).

Penalty: 50 penalty units.

121.270 Passengers in emergency exit row seats

- (1) This regulation applies in relation to a flight of an aeroplane if regulation 121.630 requires a cabin crew member to be carried on the aeroplane for the flight.
- (2) An aeroplane operator's exposition must include procedures for the assigning of passengers to seats in an emergency exit row for a flight of the aeroplane.
- (3) The operator of an aeroplane for a flight contravenes this subregulation if, when the aeroplane is taxiing, taking off or landing, the requirement mentioned in subregulation (4) is not met.
- (4) The requirement is that at least one crew member for the flight must be satisfied that each person occupying an emergency exit row seat is a suitable person.
- (5) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) a person occupying an emergency exit row seat has not given the person's agreement to a crew member to assist the crew members with the evacuation of the aeroplane in an emergency; and
 - (b) the aeroplane begins the flight.
- (6) A person commits an offence of strict liability if the person contravenes subregulation (3) or (5).

Penalty: 50 penalty units.

121.275 Carriage of passengers with reduced mobility

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if, during the flight, a passenger with reduced mobility occupies a seat where the passenger could:
 - (a) hinder the crew in their safety duties; or
 - (b) obstruct access to emergency equipment; or
 - (c) hinder the evacuation of the aeroplane in an emergency.
- (2) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) a passenger with reduced mobility is carried on the flight; and
 - (b) before the flight begins, the operator does not tell at least one of the following that the passenger is carried on the flight:
 - (i) the pilot in command of the aeroplane for the flight;
 - (ii) if one cabin crew member is carried on the flight—the cabin crew member;
 - (iii) if more than one cabin crew member is carried on the flight—the person assigned to duty as the senior cabin crew member for the flight under regulation 121.660.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

121.280 Safety briefing cards

- (1) The operator of an aeroplane for a flight contravenes this subregulation if, when the flight begins, a safety briefing card for the aeroplane is not available to each passenger on the aeroplane.
- (2) The operator of an aeroplane for a flight contravenes this subregulation if, when the flight begins, a safety briefing card does not meet the requirements mentioned in subregulation (3).
- (3) The requirements are the following:
 - (a) the safety briefing card must include any information prescribed by the Part 121 Manual of Standards;
 - (b) the only other information that may be included in the safety briefing card is the following:
 - (i) information that is relevant to the type and model of aeroplane;
 - (ii) information that is relevant to the safety of the aeroplane and its passengers.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

Regulation 121.285

121.285 Safety briefings, instructions and demonstrations

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if a passenger is not given a safety briefing, instructions or demonstrations in accordance with the requirements prescribed by the Part 121 Manual of Standards for the purposes of this regulation.
- (2) The operator of an aeroplane for a flight contravenes this subregulation if a safety briefing, instruction or demonstration includes:
 - (a) information that is not relevant to the type and model of the aeroplane; or
 - (b) information that is not relevant to the safety of the aeroplane and its passengers.
- (3) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) a passenger with reduced mobility will be carried on the flight; and
 - (b) before the aeroplane takes off for the flight, the passenger, or a person accompanying or assisting the passenger, is not asked by a crew member for the flight about the best way of helping the passenger if an emergency evacuation of the aeroplane is necessary.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1), (2) or (3).

Penalty: 50 penalty units.

121.290 Additional safety briefing for passengers in emergency exit rows

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) a passenger is seated in an emergency exit row for the flight; and
 - (b) the passenger will be required to operate the emergency exit if it becomes necessary to use the exit during the flight; and
 - (c) before the flight begins, the passenger is not briefed by a crew member for the flight about what to do if it becomes necessary to use the exit.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

121.295 Safety briefing in the event of an emergency

An aeroplane operator's exposition must include procedures for briefing passengers on what to do if an emergency occurs during a flight of the aeroplane.

Division 121.D.8—Instruments, indicators, equipment and systems

121.300 Airborne weather radar equipment

An aeroplane operator's exposition must include the following:

- (a) procedures for using airborne weather radar equipment;
- (b) procedures for conducting a flight without airborne weather radar equipment, for use if the equipment is inoperative.

121.305 Head-up displays, enhanced vision systems and synthetic vision systems

- (1) This regulation applies in relation to an aeroplane if it is fitted with any of the following systems:
 - (a) a head-up display;
 - (b) an enhanced vision system;
 - (c) a synthetic vision system.
- (2) An aeroplane operator's exposition must include the following in relation to a flight of the aeroplane:
 - (a) procedures for using each system mentioned in subregulation (1) that is fitted to the aeroplane during the flight;
 - (b) procedures for conducting the flight without an element of the system, for use if the element is inoperative.

121.310 Crew protective breathing equipment

An aeroplane operator's exposition must include procedures for the use of protective breathing equipment that is required, under Subpart 121.K, to be fitted to, or carried on, the aeroplane.

121.315 Hand-held fire extinguishers

An aeroplane operator's exposition must include, for each configuration of the aeroplane operated by the operator, a description of the following:

- (a) the location of each hand-held fire extinguisher that is required, under Subpart 121.K, to be fitted to, or carried on, the aeroplane;
- (b) the extinguishing agent in each of the fire extinguishers.

121.320 Procedures relating to first-aid kits

- (1) This regulation applies to an aeroplane that is, or will be, used to conduct a flight for which the aeroplane is required, under Subpart 121.K, to carry one or more first-aid kits.
- (2) The aeroplane operator's exposition must include the following:
 - (a) procedures to ensure that the first-aid kits required under Subpart 121.K:

Regulation 121.325

- (i) contain sufficient supplies for the number of persons to be carried on a flight of the aeroplane; and
 - (ii) are readily recognisable as first-aid kits; and
 - (iii) are readily accessible by each crew member for a flight when the aeroplane is on the ground or water and not in operation;
 - (b) procedures for inspecting the first-aid kits;
 - (c) procedures for replacing items in the first-aid kits.
- (3) The operator's exposition must also include a list of the minimum contents of each first-aid kit for the aeroplane.

121.325 Procedures relating to universal precaution kits

- (1) This regulation applies to an aeroplane that is, or will be, used to conduct a flight for which the aeroplane is required, under Subpart 121.K, to carry one or more universal precaution kits.
- (2) The aeroplane operator's exposition must include the following:
 - (a) procedures for inspecting the universal precaution kits required under Subpart 121.K;
 - (b) procedures for replacing items in the universal precaution kits.
- (3) The operator's exposition must also include a list of the minimum contents of each universal precaution kit for the aeroplane.

121.330 Procedures relating to emergency medical kits

- (1) This regulation applies to an aeroplane that is, or will be, used to conduct a flight for which the aeroplane is required, under Subpart 121.K, to carry an emergency medical kit.
- (2) The aeroplane operator's exposition must include the following:
 - (a) procedures for inspecting the emergency medical kit;
 - (b) procedures for replacing items in the emergency medical kit;
 - (c) procedures for the administration and supply of prescription medicines in the emergency medical kit, including procedures to ensure that prescription medicines are administered only under the authority of a medical practitioner.
- (3) The operator's exposition must also include a list of the minimum contents of the emergency medical kit.

121.335 Life-saving equipment for life rafts

- (1) This regulation applies to an aeroplane that is, or will be, used to conduct a flight for which the aeroplane is required, under Subpart 121.K, to carry one or more life rafts.

- (2) The aeroplane operator's exposition must include a list of the minimum life-saving equipment carried on the aeroplane for each life raft.

121.340 Survival equipment procedures

- (1) This regulation applies to a flight of an aeroplane if:
- (a) the flight is in or through an area prescribed as a remote area by the Part 91 Manual of Standards; or
 - (b) the aeroplane is required, under Subpart 121.K, to carry a life raft for the flight.
- (2) If an aeroplane is, or will be, used to conduct a flight to which this regulation applies, the operator's exposition must include the following:
- (a) procedures for determining the survival equipment required for the area in or through which the flight will be conducted;
 - (b) for a flight mentioned in paragraph (1)(b)—procedures for determining the pyrotechnic signalling devices required to ensure the distress signals, set out in Appendix 1 to Annex 2, *Rules of the Air*, to the Chicago Convention, can be made.

Division 121.D.9—Miscellaneous

121.345 Procedures relating to ice

An aeroplane operator's exposition must include the following in relation to a flight of the aeroplane:

- (a) procedures for the inspection of the aeroplane by the pilot in command before the flight if frost or icing conditions exist;
- (b) if ground de-icing and ground anti-icing measures are required for the flight—procedures for carrying out these measures before the flight;
- (c) procedures for using de-icing and anti-icing equipment (where fitted) during the flight.

121.350 Procedures relating to portable electronic devices

An aeroplane operator's exposition must include procedures for the operation of portable electronic devices for a flight of the aeroplane.

121.355 Procedures relating to carriage of animals

An aeroplane operator's exposition must include procedures for the carriage of animals for a flight of the aeroplane.

121.360 Polar operations

- (1) This regulation applies in relation to a flight of an aeroplane if, during the flight, the aeroplane enters the polar region.
- (2) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the aeroplane is flown in the polar region during the flight; and
 - (b) the operator does not hold an approval under regulation 121.010 to fly in the polar region.
- (3) The aeroplane operator's exposition must include procedures for the following:
 - (a) monitoring and dealing with fuel freezing;
 - (b) ensuring communication capability for the duration of an operation that includes a flight in the polar region;
 - (c) training the aeroplane's flight crew in polar operations;
 - (d) mitigating crew member and passenger exposure to cosmic radiation during solar flare activity;
 - (e) if the aeroplane conducts a flight for which an alternate aerodrome in the polar region is required at a time of year when extreme climatic conditions are expected at the aerodrome—the carrying of at least 2 serviceable, cold weather, anti-exposure suits.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

121.365 Cosmic radiation

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the operator's exposition does not set a limit for the total cosmic radiation receivable inside the aeroplane's cabin during the flight; and
 - (b) the aeroplane is flown above flight level 490.
- (2) The operator of an aeroplane contravenes this subregulation if:
 - (a) a flight crew member or cabin crew member of the operator's personnel has, in the previous 12 month period, flown on a flight of an aeroplane operated by the operator during which the aeroplane was flown above flight level 490; and
 - (b) the operator does not have a record of the total cosmic radiation dose received by the member during that period on such flights.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

121.370 Exceeding cosmic radiation limits

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if:
 - (a) the aeroplane is flown above flight level 490; and
 - (b) the aeroplane operator's exposition sets a limit for the total cosmic radiation receivable inside the aeroplane's cabin during the flight; and
 - (c) the limit is exceeded during the flight; and
 - (d) the pilot in command does not, as soon as practicable after the limit is exceeded, descend to the lowest altitude at which it is practicable to complete the flight safely.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

121.375 Obstruction of emergency exits

- (1) The operator of an aeroplane for a flight contravenes this subregulation if an emergency exit is obstructed at any of the following times:
 - (a) while the aeroplane is taxiing;
 - (b) while the aeroplane is taking off;
 - (c) while the aeroplane is landing;
 - (d) at any time that the pilot in command directs that the exit not be obstructed.

Regulation 121.380

- (2) For the purposes of subregulation (1), an emergency exit is not taken to be obstructed by a passenger occupying a seat adjacent to the exit or a seat in a row of seats adjacent to the exit.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

121.380 Assignment of cabin crew seats

- (1) The operator of an aeroplane for a flight contravenes this subregulation if the requirement mentioned in subregulation (2) is not met for the flight.
- (2) The requirement is that the assignment of cabin crew seats to crew members for the flight must be in accordance with the emergency evacuation procedures for the aeroplane required by regulation 121.755.
- (3) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) a person, other than a crew member, is assigned to a cabin crew seat; and
 - (b) the cabin crew seat is in a row of cabin crew seats adjacent to a floor level exit; and
 - (c) the person is not a person to whom subregulation (4), (5) or (6) applies.
- (4) This subregulation applies to a person if:
 - (a) the person is a crew member employed by the operator who has not been assigned to the flight by the operator; and
 - (b) a passenger seat is not available for the person; and
 - (c) the person is identified as an employee of the operator; and
 - (d) the person is briefed by a cabin crew member for the flight on the following before the aeroplane takes off:
 - (i) the operation and use of the seat and its restraint system;
 - (ii) the location and use of the oxygen system at the seat (if any);
 - (iii) the location and use of the life jacket for the seat;
 - (iv) the person's responsibilities during an emergency.
- (5) This subregulation applies to a person if:
 - (a) the person is an authorised officer carrying out an in-flight passenger cabin inspection; and
 - (b) a passenger seat is not available for the person; and
 - (c) the person is briefed by a cabin crew member on the following before the aeroplane takes off:
 - (i) the operation and use of the seat and its restraint system;
 - (ii) the location and use of the oxygen system at the seat (if any);
 - (iii) the location and use of the life jacket for the seat;
 - (iv) the person's responsibilities during an emergency.
- (6) This subregulation applies to a person if:

- (a) the pilot in command:
 - (i) declares an emergency; or
 - (ii) directs the cabin crew that abnormal circumstances exist for the flight;
and
 - (b) the person is an able-bodied person; and
 - (c) a cabin crew member assigns the person to the cabin crew seat; and
 - (d) the person is briefed by a cabin crew member on the person's responsibilities while occupying the cabin crew seat.
- (7) A person commits an offence of strict liability if the person contravenes subregulation (1) or (3).

Penalty: 50 penalty units.

121.385 CASA approvals relating to take-offs and landings

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the aeroplane takes off or lands in circumstances mentioned in subregulation (2); and
 - (b) the requirement in subregulation (3) is not met.
- (2) The circumstances are the aeroplane conducts a 3D instrument approach operation with an approach path angle of 4.5 degrees or more.
- (3) The requirement is that the operator must hold an approval under regulation 121.010 to conduct the take-off or landing in those circumstances.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Subpart 121.F—Performance

121.390 Performance data

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the performance data in the aircraft flight manual instructions for the aeroplane does not comply with Annex 8 to the Chicago Convention; and
 - (b) the aeroplane begins the flight.
- (2) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if:
 - (a) a calculation relating to the aeroplane's performance for the flight is made for the purposes of this Subpart; and
 - (b) data other than either of the following is used to make that calculation:
 - (i) performance data set out in the aircraft flight manual instructions for the aeroplane;
 - (ii) performance data for which the aeroplane operator holds an approval under regulation 121.010.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

121.395 Take-off performance

- (1) The Part 121 Manual of Standards may prescribe requirements relating to take-off performance for a flight of an aeroplane.
- (2) Without limiting subregulation (1), the Part 121 Manual of Standards may prescribe requirements that relate to one or more of the following:
 - (a) the kinds of operations to be carried out during the flight;
 - (b) characteristics of the aerodrome at which the aeroplane takes off;
 - (c) characteristics of the route flown by the aeroplane;
 - (d) characteristics of the aerodrome at which the aeroplane lands.
- (3) The pilot in command of an aeroplane for a flight contravenes this subregulation if:
 - (a) the pilot is subject to a requirement mentioned in subregulation (1) for the flight; and
 - (b) the requirement is not met for the flight.
- (4) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the operator is subject to a requirement mentioned in subregulation (1) for the flight; and
 - (b) the requirement is not met for the flight.

- (5) A person commits an offence of strict liability if the person contravenes subregulation (3) or (4).

Penalty: 50 penalty units.

121.420 Landing performance

- (1) The Part 121 Manual of Standards may prescribe requirements relating to landing performance for a flight of an aeroplane.
- (2) Without limiting subregulation (1), the Part 121 Manual of Standards may prescribe requirements relating to one or more of the following:
- (a) the aeroplane's configuration;
 - (b) the operation of any equipment for the flight;
 - (c) characteristics of the aerodrome at which the aeroplane lands;
 - (d) safety factor percentages to be applied.
- (3) The pilot in command of an aeroplane for a flight contravenes this subregulation if:
- (a) the pilot is subject to a requirement mentioned in subregulation (1) for the flight; and
 - (b) the requirement is not met for the flight.
- (4) The operator of an aeroplane for a flight contravenes this subregulation if:
- (a) the operator is subject to a requirement mentioned in subregulation (1) for the flight; and
 - (b) the requirement is not met for the flight.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (3) or (4).

Penalty: 50 penalty units.

121.425 Computerised performance data systems not fitted to aeroplanes

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
- (a) a computerised system that is not fitted to the aeroplane is used as the primary means to make calculations relating to the aeroplane's performance for the flight for the purposes of this Subpart; and
 - (b) the system does not meet the requirements prescribed by the Part 121 Manual of Standards.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Regulation 121.430

121.430 Procedures relating to inoperative engines

- (1) An aeroplane operator's exposition must include procedures to allow the aeroplane's flight path to meet the requirements mentioned in subregulation (2) if one engine becomes inoperative during take-off and the take-off is continued.
- (2) The requirements are that the aeroplane's flight path must provide a safe route, clearing all obstacles along the flight path, for the aeroplane to land at either of the following aerodromes:
 - (a) the departure aerodrome for the flight;
 - (b) if the operational flight plan for the flight includes a take-off alternate aerodrome—the take-off alternate aerodrome.
- (3) The operator of a 3-engine or 4-engine aeroplane must include, in the operator's exposition, procedures to follow if 2 engines become inoperative during the flight.

Subpart 121.J—Weight and balance

121.435 Loading of aeroplane

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if, when the flight begins, the aeroplane is loaded in a way that contravenes the aeroplane's weight and balance limits.
- (2) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if, during the flight, the aeroplane ceases to be loaded in accordance with the aeroplane's weight and balance limits.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

121.440 Procedures for loading aeroplane etc.

- (1) An aeroplane operator's exposition must include the following:
 - (a) procedures for loading the aeroplane for a flight to comply with regulation 121.435;
 - (b) procedures for working out the following weights for a flight of the aeroplane:
 - (i) the total weight of the crew members and the carry-on baggage of the crew members;
 - (ii) the total weight of the passengers and the carry-on baggage of the passengers;
 - (iii) the total weight of the cargo (other than carry-on baggage);
 - (iv) the total weight of the usable fuel to be carried;
 - (c) procedures to ensure that the aeroplane is loaded:
 - (i) in accordance with the information for the loading of the aeroplane for the flight prepared by the person responsible for planning the loading of the aeroplane for the flight; and
 - (ii) by, or under the supervision of, the person responsible for supervising the loading of the aeroplane for the flight;
 - (d) procedures setting out the circumstances in which a last-minute change to a load may be made, including procedures to ensure that a last-minute change to a load does not cause the aeroplane to exceed its weight and balance limits;
 - (e) procedures for confirming the weight and balance documents;
 - (f) procedures for offloading passengers or cargo to ensure that the aeroplane does not exceed its weight and balance limits.
- (2) For the purposes of subparagraphs (1)(b)(i) and (ii), the procedures must provide that the weights mentioned in those subparagraphs must be worked out:

Regulation 121.445

- (a) by actual weighing; or
 - (b) in accordance with a method for which the operator holds an approval under regulation 121.010; or
 - (c) in accordance with the standard weights prescribed by the Part 121 Manual of Standards.
- (3) For the purposes of subparagraph (1)(b)(iv), the procedures must provide that the weight of the usable fuel must be worked out as follows:
- (a) if the density of the fuel is known—by reference to its density and in accordance with a method set out in the procedures;
 - (b) if the density of the fuel is not known—in accordance with a method set out in the procedures.

121.445 Pilot in command must have information about aeroplane's weight and balance

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if, when the flight begins, the pilot in command does not have the information about the aeroplane's weight and balance that is prescribed by the Part 121 Manual of Standards.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

121.450 Computerised weight and balance systems not fitted to aeroplanes

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) a computerised system that is not fitted to the aeroplane is used as the primary means to calculate the weight and balance of the aeroplane for the flight; and
 - (b) the system does not meet the requirements prescribed by the Part 121 Manual of Standards.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

121.455 Weight and balance documents

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if, when the flight begins, the weight and balance documents for the flight do not meet the requirements prescribed by the Part 121 Manual of Standards.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Subpart 121.K—Equipment

121.460 Requirements relating to equipment

- (1) The Part 121 Manual of Standards may prescribe requirements relating to:
 - (a) the fitment and non-fitment of equipment to an aeroplane; and
 - (b) the carrying of equipment on an aeroplane; and
 - (c) equipment that is fitted to, or carried on, an aeroplane.
- (2) A person contravenes this subregulation if:
 - (a) the person is subject to a requirement mentioned in subregulation (1); and
 - (b) the requirement is not met.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Subpart 121.N—Flight crew

Division 121.N.1—General

121.470 Additional application of this Subpart

This Subpart also applies to the operation of a multi-engine aeroplane if:

- (a) either or both of paragraphs 121.005(1)(a) and (b) apply in relation to the aeroplane; and
- (b) the operator of the aeroplane holds an Australian air transport AOC that authorises the conduct of Part 121 operations; and
- (c) the operation is of a kind specified in the operator's exposition.

121.475 Composition, number, qualifications and training

Composition, number, qualifications and training

- (1) The operator of an aeroplane for a flight contravenes this subregulation if, when the flight begins, a requirement mentioned in subregulation (2) is not met.
- (2) The requirements are as follows:
 - (a) the composition of the aeroplane's flight crew for the flight must comply with the aeroplane's flight manual;
 - (b) the flight crew must include at least 2 pilots;
 - (c) at least one pilot occupying a pilot seat must have the experience required by regulation 121.480 for a flight crew member for the operator and the aeroplane;
 - (d) if the flight is a kind of operation for which the operator's exposition requires the carriage of additional flight crew members—the flight crew must include the additional flight crew members;
 - (e) if the flight is a kind of operation for which these Regulations require the carriage of additional flight crew members—the flight crew must include the additional flight crew members;
 - (f) each flight crew member must be qualified under regulation 121.490, 121.495 or 121.500 to carry out the duties assigned to the flight crew member by the operator for the flight;
 - (g) if the operator's exposition includes requirements, in accordance with regulation 121.515, in relation to knowledge that the pilot in command must have of the route of, and aerodromes for, the flight—the pilot in command must meet the requirements;
 - (h) each flight crew member must have the recent experience for the flight required by Division 121.N.4;
 - (i) each flight crew member must meet the initial training requirements under regulation 121.555 for the operator;
 - (j) each flight crew member must meet the conversion training requirements under subregulation 121.560(1) for the operator and the aeroplane;

Regulation 121.480

- (k) each flight crew member assigned to duty for unsupervised line flying for the flight must meet the conversion training requirement under subregulation 121.560(2) for the operator and the aeroplane;
 - (l) each flight crew member must meet the recurrent training and checking requirements under subregulation 121.570(1) for the flight;
 - (m) each flight crew member assigned to duty for unsupervised line flying for the flight must meet the recurrent training and checking requirements under subregulation 121.570(2) for the flight;
 - (n) each flight crew member for whom, under the operator's exposition, differences training for the aeroplane is required, must have successfully completed the differences training:
 - (i) for the aeroplane; and
 - (ii) for equipment that is required under Subpart 121.K to be fitted to, or carried on, the aeroplane and may be used by the flight crew member in connection with operating the aeroplane.
- (3) For the purposes of paragraph (2)(d), the operator's exposition must include the kinds of operation (if any) for which additional flight crew members must be carried.

Training or checking involving safety or emergency equipment

- (4) The operator of an aeroplane contravenes this subregulation if training or checking mentioned in subregulation (2), to the extent that it involves safety equipment or emergency equipment, is conducted other than by a person who holds an approval under regulation 121.010.

Offence

- (5) A person commits an offence of strict liability if the person contravenes subregulation (1) or (4).

Penalty: 50 penalty units.

121.480 Experience

- (1) For the purposes of paragraph 121.475(2)(c), the experience required for a flight crew member for an aeroplane operator and an aeroplane is that:
- (a) the flight crew member:
 - (i) holds a rating that covers the aeroplane; or
 - (ii) has successfully completed command training that complies with regulation 121.565 for the operator and an aeroplane; and
 - (b) the flight crew member has completed the flying experience mentioned in subregulation (2).
- (2) For the purposes of paragraph (1)(b), the flying experience:
- (a) must be the number of hours and sectors mentioned in subregulation (3) in aeroplanes of that kind; and
 - (b) must be completed as part of line operations; and

Regulation 121.485

- (c) may include experience while the flight crew member is flying under supervision.
- (3) For the purposes of paragraph (2)(a), the number of hours and sectors is:
 - (a) at least 100 hours and 10 sectors; or
 - (b) if the aeroplane operator by whom the flight crew member is employed holds an approval under regulation 121.010 for a different numbers of hours and sectors for the flight crew member—at least that number of hours and sectors.
- (4) CASA may grant the approval mentioned in paragraph (3)(b) only if satisfied that there are special circumstances in relation to the operator’s operation that justify the grant of the approval.

121.485 Competence

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the operator assigns a person to duty as a flight crew member for the flight; and
 - (b) the person has not been assessed by the operator, in accordance with the operator’s training and checking system, as competent to perform the duties assigned to the person for the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

121.490 Assignment to duty as pilot in command

- (1) The operator of an aeroplane for a flight contravenes this subregulation if, when the flight begins, none of the pilots assigned as flight crew members for the flight is assigned to duty as the pilot in command of the aeroplane for the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

121.495 Pilot in command

- (1) A pilot is qualified as pilot in command for a flight of an aeroplane if:
 - (a) the pilot meets the minimum flying experience requirements specified, in accordance with subregulation (2), in the aeroplane operator’s exposition for the aeroplane; and
 - (b) the pilot has successfully completed command training that complies with regulation 121.565 for the aeroplane operator and an aeroplane; and
 - (c) the pilot is:
 - (i) if the aeroplane is an Australian aircraft—authorised to pilot the aeroplane during the flight as pilot in command under Part 61; or

Regulation 121.500

- (ii) if the aeroplane is a foreign registered aircraft—authorised to pilot the aeroplane during the flight as pilot in command by the aeroplane’s State of registry.
- (2) For the purposes of paragraph (1)(a), the aeroplane operator’s exposition must include minimum flying experience requirements for all aeroplanes operated by the operator for Part 121 operations.

121.500 Co-pilots

- (1) A pilot is qualified as co-pilot for a flight of an aeroplane if:
 - (a) the pilot is:
 - (i) if the aeroplane is an Australian aircraft—authorised to pilot the aeroplane during the flight as co-pilot under Part 61; or
 - (ii) if the aeroplane is a foreign registered aircraft—authorised to pilot the aeroplane during the flight as co-pilot by the aeroplane’s State of registry; and
 - (b) the pilot has completed supervised line flying on an aeroplane of that kind as co-pilot for the number of sectors or flight hours mentioned in the aeroplane operator’s exposition.
- (2) A pilot is qualified as co-pilot for a flight of an aeroplane if the pilot is qualified under regulation 121.495 as pilot in command for the flight.

121.505 Cruise relief co-pilots

- (1) A pilot is qualified as cruise relief co-pilot for a flight of an aeroplane if:
 - (a) the pilot is:
 - (i) if the aeroplane is an Australian aircraft—authorised to pilot the aeroplane during the flight as cruise relief co-pilot under Part 61; or
 - (ii) if the aeroplane is a foreign registered aircraft—authorised to pilot the aeroplane during the flight as cruise relief co-pilot by the aeroplane’s State of registry; and
 - (b) the pilot has completed supervised line flying on an aeroplane of that kind as cruise relief co-pilot for the number of sectors or flight hours mentioned in the aeroplane operator’s exposition.
- (2) A pilot is qualified as cruise relief co-pilot for a flight of an aeroplane if the pilot is:
 - (a) qualified under regulation 121.495 as pilot in command for the flight; or
 - (b) qualified under regulation 121.500 as co-pilot for the flight.

121.510 Use of approved flight simulators for training or checking

Seating capacity of more than 19 and certain other aeroplanes

- (1) Subregulation (2) applies to:

Regulation 121.510

- (a) an aeroplane with a maximum certificated passenger seating capacity of more than 19; or
 - (b) an aeroplane of a kind prescribed by the Part 121 Manual of Standards.
- (2) The operator of the aeroplane contravenes this subregulation if:
- (a) a flight crew member of the operator’s personnel undertakes training or checking, in accordance with this Subpart, for the aeroplane; and
 - (aa) the training or checking involves a simulated engine or system failure that affects, or is likely to affect, the aeroplane’s performance or handling characteristics; and
 - (b) there is an approved flight simulator for the aeroplane (whether in Australia, or in a recognised foreign State within the meaning of regulation 61.010) that is available for use, within the meaning of subregulation (5), by the operator for the training or checking; and
 - (c) the training or checking is conducted other than in the flight simulator.

Seating capacity of 19 or less

- (3) Subregulation (4) applies to an aeroplane with a maximum certificated passenger seating capacity of 19 or less, other than an aeroplane to which subregulation (2) applies.
- (4) The operator of the aeroplane contravenes this subregulation if:
- (a) a flight crew member of the operator’s personnel undertakes training or checking, in accordance with this Subpart, for the aeroplane; and
 - (aa) the training or checking involves a simulated engine or system failure that affects, or is likely to affect, the aeroplane’s performance or handling characteristics; and
 - (b) there is an approved flight simulator for the aeroplane in Australia that is available for use, within the meaning of subregulation (5), by the operator for the training or checking; and
 - (c) the training or checking is conducted other than in the flight simulator.

Available for use

- (5) For the purposes of paragraphs (2)(b) and (4)(b), an approved flight simulator is available for use by an operator if the flight simulator:
- (a) is available for the operator to use, or to reserve for use; and
 - (b) is offered for use on a commercial basis; and
 - (c) is serviceable.

Offence

- (6) A person commits an offence of strict liability if the person contravenes subregulation (2) or (4).

Penalty: 50 penalty units.

Regulation 121.515

121.515 Knowledge of route and aerodromes

An aeroplane operator's exposition must include requirements in relation to the knowledge that a pilot in command of the aeroplane for a flight must have of:

- (a) the route of the flight; and
- (b) the departure aerodrome and the planned destination aerodrome for the flight; and
- (c) any alternate aerodrome required for the flight by the flight preparation (Part 121 alternate aerodromes) requirements.

Division 121.N.2—Operation of aeroplanes of different type ratings

121.520 Application of Division 121.N.2

This Division applies in relation to the operator of an aeroplane if:

- (a) under the operator's AOC, the operator operates aeroplanes of more than one type rating for Part 121 operations; and
- (b) the operator assigns, or is likely to assign, a flight crew member employed by the operator to duty on aeroplanes of more than one type rating.

121.525 Assignment of flight crew to aeroplanes of different type ratings

The operator's exposition must include the following:

- (a) a description of the circumstances in which the operator may assign a flight crew member to duty on aeroplanes of more than one type rating;
- (b) the combinations of aeroplanes with different type ratings that a single flight crew member may be assigned to duty on by the operator;
- (c) the flying experience, checks and training that a flight crew member must gain or complete, while the flight crew member is employed by the operator, before being assigned to duty on aeroplanes of more than one type rating;
- (d) procedures to ensure that, if a flight crew member is assigned to duty on aeroplanes with different type ratings within one tour of duty, the flight crew member has adequate time between flights on aeroplanes with different ratings for the flight crew member to prepare for duty.

121.530 Credit for checks, qualifications, training and experience

- (1) Subregulation (2) applies if an operator holds an approval under regulation 121.010 in relation to:
 - (a) a particular check or qualification, or particular training or experience, mentioned in this Subpart; and
 - (b) aeroplanes of 2 particular type ratings (the *first type rating* and the *second type rating*).

Note: See also regulation 121.575 in relation to Part 121 proficiency checks completed for a previous operator.

- (2) For the purposes of these Regulations, the successful completion, by a flight crew member of the operator's personnel, of the check, qualification, training or experience for an aeroplane of the first type rating is taken to also be the successful completion by the flight crew member of the check, qualification, training or experience for an aeroplane of the second type rating.
- (3) CASA may grant an approval mentioned in subregulation (1) only if satisfied that:

Part 121 Australian air transport operations—larger aeroplanes

Subpart 121.N Flight crew

Division 121.N.2 Operation of aeroplanes of different type ratings

Regulation 121.530

- (a) the check, qualification, training or experience for an aeroplane of the first type rating is sufficiently similar to the check, qualification, training or experience for an aeroplane of the second type rating; and
- (b) an aeroplane of the first type rating and second type rating are sufficiently similar in relation to:
 - (i) their level of technology; and
 - (ii) their operational procedures; and
 - (iii) their handling characteristics.

Example: For the purposes of subparagraph (b)(i), the level of technology for an aeroplane might involve the following:

- (a) the aeroplane's flight management system;
- (b) the aeroplane's auto-pilot system;
- (c) the aeroplane's flight instrumentation.

Division 121.N.3—Relief

121.535 Relief of pilot in command

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if:
 - (a) the pilot in command delegates the conduct of the flight; and
 - (b) the delegation is not permitted by either subregulation (2) or (3).

General

- (2) The pilot in command of an aeroplane for a flight may delegate the conduct of the flight to a pilot who is qualified under regulation 121.495 as pilot in command for the flight.

Flight above flight level 200

- (3) The pilot in command of an aeroplane for a flight may delegate the conduct of the flight above flight level 200 to a pilot who meets the requirements mentioned in subregulation (4).
- (4) The requirements are as follows:
 - (a) the pilot must hold an air transport pilot licence;
 - (b) the pilot must be qualified under regulation 121.500 as co-pilot for the flight;
 - (c) the pilot must have the flying experience required by regulation 121.480 for the flight;
 - (d) the pilot must have the knowledge of the route of the flight required by the operator's exposition.
- (5) For the purposes of paragraph (4)(d), the operator's exposition must include the knowledge the pilot must have of the route of the flight.

Offence

- (6) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 121.N.4—Recent experience

121.540 Pilot in command and co-pilot—recent experience requirements

Operator

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the operator assigns a pilot to duty as pilot in command or co-pilot of the aeroplane for the flight; and
 - (b) the pilot does not have the recent experience required for the flight by subregulation (3).

Pilot

- (2) A pilot of an aeroplane for a flight contravenes this subregulation if:
 - (a) the pilot operates the aeroplane as pilot in command or co-pilot for the flight; and
 - (b) the pilot does not have the recent experience required for the flight by subregulation (3).

Recent experience requirements

- (3) The recent experience required for a flight is:
 - (a) within 90 days before the flight, the pilot must meet at least one of the requirements mentioned in subregulation (4); or
 - (b) if it is not practicable for the pilot to comply with paragraph (a)—the flight experience required under the aeroplane operator's exposition.
- (4) For the purposes of paragraph (3)(a), the requirements are as follows:
 - (a) the pilot has carried out, in an aeroplane of that kind or an approved flight simulator for the aeroplane:
 - (i) at least 3 take-offs that comply with subregulation (5) while controlling the aeroplane or simulator; and
 - (ii) at least 3 landings while controlling the aeroplane or simulator;
 - (b) the pilot has passed a flight test for the grant of a pilot licence or a rating on a pilot licence in an aeroplane of that kind or an approved flight simulator for the aeroplane;
 - (c) the pilot has successfully completed a Part 121 proficiency check for the operator and an aeroplane of that kind.
- (5) For the purposes of subparagraph (4)(a)(i), each take-off must be followed by a climb to at least 500 ft AGL.

Offence

- (6) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

121.545 Cruise relief co-pilot—recent experience requirements

Operator

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the operator assigns a pilot to duty as cruise relief co-pilot for the flight; and
 - (b) the pilot has not, within 90 days before the flight, done at least one of the following:
 - (i) completed at least 2 hours of simulated flight time as co-pilot in an approved flight simulator for the aeroplane;
 - (ii) passed a flight test for the grant of a pilot licence or a rating on a pilot licence in an aeroplane of that kind or an approved flight simulator for the aeroplane;
 - (iii) exercised the privileges of a pilot licence or a rating on a pilot licence that covers the aeroplane.

Pilot

- (2) A pilot of an aeroplane for a flight contravenes this subregulation if:
 - (a) the pilot operates the aeroplane as cruise relief co-pilot for the flight; and
 - (b) the pilot has not, within 90 days before the flight, done at least one of the following:
 - (i) completed at least 2 hours of simulated flight time as co-pilot in an approved flight simulator for the aeroplane;
 - (ii) passed a flight test for the grant of a pilot licence or a rating on a pilot licence in an aeroplane of that kind or an approved flight simulator for the aeroplane;
 - (iii) exercised the privileges of a pilot licence or a rating on a pilot licence that covers the aeroplane.

Offence

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

121.550 Flight engineers—recent experience requirements

Operator

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the operator assigns a flight engineer to duty as flight engineer of the aeroplane for the flight; and

Regulation 121.550

- (b) the flight engineer does not have the recent experience required under regulation 61.1335 (limitations on exercise of privileges of flight engineer licences—recent experience) for the flight.

Flight engineer

- (2) A flight engineer of an aeroplane for a flight contravenes this subregulation if:
 - (a) the flight engineer performs a duty that is essential to the operation of the aeroplane for the flight; and
 - (b) the flight engineer does not have the recent experience required under regulation 61.1335 (limitations on exercise of privileges of flight engineer licences—recent experience) for the flight.

Offence

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

Division 121.N.5—Non-recurrent training and checking etc.

121.555 Meeting initial training requirements

- (1) For the purposes of paragraph 121.475(2)(i), a flight crew member meets the initial training requirements for an operator of an aeroplane if:
 - (a) the flight crew member has completed the operator's initial training for a flight crew member; and
 - (b) the initial training meets the requirements prescribed by the Part 121 Manual of Standards; and
 - (c) the flight crew member has successfully completed an initial training check in accordance with the operator's exposition.
- (2) Without limiting paragraph (1)(b), the requirements may relate to training facilities or devices.

121.560 Meeting conversion training requirements

- (1) For the purposes of paragraph 121.475(2)(j), a flight crew member meets the conversion training requirements under this subregulation for an operator of an aeroplane and the aeroplane if:
 - (a) the flight crew member has completed training, for an aeroplane of that kind, that meets the requirements prescribed by the Part 121 Manual of Standards; and
 - (b) the training is conducted by:
 - (i) an individual employed by the operator to conduct the training; or
 - (ii) a Part 142 operator with which the operator has a contract for the Part 142 operator to conduct the training for the operator.
- (2) For the purposes of paragraph 121.475(2)(k), a flight crew member meets the conversion training requirement under this subregulation for an operator of an aeroplane and the aeroplane if the flight crew member has completed supervised line flying in an aeroplane of that kind.
- (3) The supervised line flying mentioned in subregulation (2) must have been completed after the flight crew member has successfully completed all of the following:
 - (a) a Part 121 proficiency check for the operator and the aeroplane;
 - (b) a valid annual emergency and safety equipment check for the operator and the aeroplane under regulation 121.605;
 - (c) a valid 3 yearly emergency and safety equipment check for the operator and the aeroplane under regulation 121.615.

121.565 Command training requirements

Command training for a pilot for an aeroplane operator and an aeroplane must include the following:

Part 121 Australian air transport operations—larger aeroplanes

Subpart 121.N Flight crew

Division 121.N.5 Non-recurrent training and checking etc.

Regulation 121.565

- (a) either:
 - (i) flying training conducted in an aeroplane of that kind; or
 - (ii) if there is an approved flight simulator for the aeroplane—training conducted in the approved flight simulator;
- (b) successful completion of a Part 121 proficiency check, for the operator and the aeroplane, for a pilot in command of the aeroplane;
- (c) training in the responsibilities of the pilot in command of an aeroplane of that kind;
- (d) training in relation to pilot incapacitation;
- (e) supervised line flying on an aeroplane of that kind as pilot in command under supervision for at least the number of sectors required by the operator's exposition;
- (f) successful completion of a line check that complies with regulation 121.590 for a pilot in command for an aeroplane of that kind.

Division 121.N.6—Recurrent training and checking

121.570 Recurrent training and checking requirements

- (1) For the purposes of paragraph 121.475(2)(l), a flight crew member meets the recurrent training and checking requirements for a flight of an aeroplane if the flight crew member:
 - (a) holds the following for the aeroplane operator and the aeroplane:
 - (i) a valid Part 121 proficiency check under regulation 121.575;
 - (ii) a valid refresher check under regulation 121.595;
 - (iii) a valid annual emergency and safety equipment check under regulation 121.605;
 - (iv) a valid 3 yearly emergency and safety equipment check under regulation 121.615; and
 - (b) has completed, within the previous 12 months, recurrent flight training, in accordance with the requirements prescribed by the Part 121 Manual of Standards, for an aeroplane of that kind.
- (2) For the purposes of paragraph 121.475(2)(m), a flight crew member meets the recurrent training and checking requirements for a flight of an aeroplane if the flight crew member holds a valid line check under regulation 121.585 for the aeroplane operator and the aeroplane.

121.575 Holding valid Part 121 proficiency check

Holding a valid check

- (1) If a person successfully completes a Part 121 proficiency check for the operator of an aeroplane and an aeroplane on a day (the **completion day**), the check is valid for the period:
 - (a) beginning on the completion day; and
 - (b) ending at the earliest of the following times:
 - (i) the beginning of the day the person successfully completes another Part 121 proficiency check for the operator and the aeroplane;
 - (ii) the end of the 8 month period beginning on the completion day;
 - (iii) if the person has, within the 12 month period ending immediately before the completion day, successfully completed one or more Part 121 proficiency checks (the **previous checks**) for the operator and the aeroplane—the end of the 12 month period beginning on the day the most recent of the previous checks was successfully completed.

When a check completed for a previous operator is valid

- (2) If:
 - (a) an operator (the **current operator**) of an aeroplane of a particular kind that has a maximum certificated passenger seating capacity of 19 or less holds an approval under regulation 121.010 in relation to Part 121 proficiency
-

Regulation 121.580

checks completed for another particular operator (the *previous operator*) and an aeroplane of that kind; and

- (b) a person holds a valid Part 121 proficiency check for the previous operator and an aeroplane of that kind;

the person is taken, for the purposes of these Regulations, to hold a valid Part 121 proficiency check for the current operator and an aeroplane of that kind.

121.580 Part 121 proficiency check

Pilots

- (1) A proficiency check for a pilot for an aeroplane must, in accordance with any requirements prescribed by the Part 121 Manual of Standards, check the competence of the pilot in carrying out normal, abnormal and emergency procedures in relation to the flying of an aeroplane of that kind while performing duties at their normal pilot seat.
- (2) The check for the pilot must be conducted by an individual:
- (a) who is either:
- (i) employed by the operator to conduct the check; or
- (ii) employed by a Part 142 operator with which the operator has a contract for the Part 142 operator to conduct the check for the operator; and
- (b) who meets the requirements mentioned in subregulation (3).
- (3) For the purposes of paragraph (2)(b), the individual must:
- (a) hold:
- (i) a flight examiner rating for an aeroplane of that kind; or
- (ii) an approval under regulation 121.010 to conduct a Part 121 proficiency check for an aeroplane of that kind; and
- (b) have successfully completed training in human factors principles and non-technical skills.

Flight engineers

- (4) A proficiency check for a flight engineer for an aeroplane must, in accordance with any requirements prescribed by the Part 121 Manual of Standards, check the competence of the flight engineer in carrying out the duties of a flight engineer in relation to the operation of an aeroplane of that kind while acting as part of a normal flight crew for the aeroplane.
- (5) The check for the flight engineer must be conducted by an individual:
- (a) who is either:
- (i) employed by the operator to conduct the check; or
- (ii) employed by a Part 142 operator with which the operator has a contract for the Part 142 operator to conduct the check for the operator; and
- (b) who meets the requirements mentioned in subregulation (6).

- (6) For the purposes of paragraph (5)(b), the individual must:
- (a) hold:
 - (i) a flight engineer examiner rating for an aeroplane of that kind; or
 - (ii) an approval under regulation 121.010 to conduct a Part 121 proficiency check for an aeroplane of that kind; and
 - (b) have successfully completed training in human factors principles and non-technical skills.

121.585 Holding valid line check

- (1) A flight crew member holds a valid line check for the operator of an aeroplane and the aeroplane if:
- (a) the flight crew member has successfully completed the operator's line check for an aeroplane of that kind; and
 - (b) the check complies with:
 - (i) for a pilot—subregulation 121.590(1); and
 - (ii) for a flight engineer—subregulation 121.590(2); and
 - (c) the check is valid in accordance with subregulations (2) and (3) of this regulation.
- (2) Subject to subregulation (3), a line check is valid for the period:
- (a) beginning on the day the check is completed; and
 - (b) ending at the end of the 12 month period beginning at the end of the month in which the check is completed.
- (3) If:
- (a) a person's line check (the **existing check**) for the operator of an aeroplane and an aeroplane is valid in accordance with subregulation (2); and
 - (b) the person successfully completes another line check (the **new check**) for that operator and aeroplane in accordance with paragraphs (1)(a) and (b) less than 3 months before the day the existing check is due to expire;
- the new check is valid for the period of 12 months beginning at the end of the day the existing check expires.

121.590 Line check requirements

Pilots

- (1) A line check for a pilot for an aeroplane must meet the following requirements:
- (a) the check must check the pilot's competence in carrying out a normal line operation for the aeroplane;
 - (b) if the pilot is assigned duties as both the pilot flying and the pilot monitoring, the check must check the pilot in both functions;
 - (c) the person conducting the check must hold an appointment by the operator of the aeroplane to conduct a line check for an aeroplane of that kind.

Regulation 121.595

Flight engineers

- (2) A line check for a flight engineer for an aeroplane must meet the following requirements:
 - (a) the check must check the flight engineer's competence in carrying out a normal line operation for the aeroplane;
 - (b) the person conducting the check (the **check flight engineer**) must not occupy a flight engineer panel seat during take-off, departure, initial cruise, descent, approach or landing;
 - (c) the check flight engineer must hold an appointment by the operator of the aeroplane to conduct a line check for an aeroplane of that kind.

121.595 Holding valid refresher check

- (1) A flight crew member holds a valid refresher check for the operator of an aeroplane and the aeroplane if:
 - (a) the flight crew member has undertaken the operator's refresher training for an aeroplane of that kind; and
 - (b) the training complies with subregulation 121.600(1); and
 - (c) the flight crew member has successfully completed the operator's refresher check for an aeroplane of that kind; and
 - (d) the check complies with subregulation 121.600(2); and
 - (e) the check is valid in accordance with subregulations (2) and (3) of this regulation.
- (2) Subject to subregulation (3), a refresher check is valid for the period:
 - (a) beginning on the day the check is completed; and
 - (b) ending at the end of the 12 month period beginning at the end of the month in which the check is completed.
- (3) If:
 - (a) a person's refresher check (the **existing check**) for the operator of an aeroplane and an aeroplane is valid in accordance with subregulation (2); and
 - (b) the person successfully completes another refresher check (the **new check**) for that operator and aeroplane in accordance with paragraph (1)(d) less than 3 months before the day the existing check is due to expire;
the new check is valid for the period of 12 months beginning at the end of the day the existing check expires.

121.600 Refresher training and checking requirements

Training requirements

- (1) Refresher training for a flight crew member for an aeroplane must meet the following requirements:
 - (a) for a pilot—the training must relate to the duties of a pilot for the aeroplane;
-

Regulation 121.605

- (b) for a flight engineer—the training must relate to the duties of a flight engineer for the aeroplane;
- (c) the training must include training on aeroplane systems;
- (d) the training must include training on operational procedures and requirements in relation to the Part 121 operations conducted by the operator using the aeroplane;
- (e) the training must include accident, incident and occurrence reviews.

Checking requirements

- (2) A refresher check for a flight crew member for an aeroplane must include an assessment of the flight crew member’s knowledge of the training mentioned in paragraphs (1)(a) to (d).

121.605 Holding valid annual emergency and safety equipment check

- (1) A flight crew member holds a valid annual emergency and safety equipment check for the operator of an aeroplane and the aeroplane if:
 - (a) the flight crew member has undertaken the operator’s annual emergency and safety equipment training for an aeroplane of that kind; and
 - (b) the training complies with subregulation 121.610(1); and
 - (c) the flight crew member has successfully completed the operator’s annual emergency and safety equipment check for an aeroplane of that kind; and
 - (d) the check complies with subregulation 121.610(2); and
 - (e) the check is valid in accordance with subregulations (2) and (3) of this regulation.
- (2) Subject to subregulation (3), an annual emergency and safety equipment check is valid for the period:
 - (a) beginning on the day the check is completed; and
 - (b) ending at the end of the 12 month period beginning at the end of the month in which the check is completed.
- (3) If:
 - (a) a person’s annual emergency and safety equipment check (the *existing check*) for the operator of an aeroplane and an aeroplane is valid in accordance with subregulation (2); and
 - (b) the person successfully completes another annual emergency and safety equipment check (the *new check*) for that operator and aeroplane in accordance with paragraph (1)(d) less than 3 months before the day the existing check is due to expire;

the new check is valid for the period of 12 months beginning at the end of the day the existing check expires.

Regulation 121.610

121.610 Annual emergency and safety equipment training and checking requirements

Training requirements

- (1) Annual emergency and safety equipment training for a flight crew member for an aeroplane must meet the following requirements:
 - (a) for a pilot—the training must relate to the duties of a pilot for the aeroplane in relation to emergency and safety equipment carried on the aeroplane;
 - (b) for a flight engineer—the training must relate to the duties of a flight engineer for the aeroplane in relation to emergency and safety equipment carried on the aeroplane;
 - (c) the training must meet the requirements prescribed by the Part 121 Manual of Standards.
- (1A) Without limiting paragraph (1)(c), the requirements may relate to training facilities or devices.

Checking requirements

- (2) An annual emergency and safety equipment check for a flight crew member for an aeroplane must:
 - (a) cover the location and use of all emergency and safety equipment carried on the aeroplane; and
 - (b) cover the equipment for which the flight crew member has undertaken training mentioned in subregulation (1); and
 - (c) be carried out using:
 - (i) the aeroplane; or
 - (ii) a training facility or device which meets the requirements prescribed by the Part 121 Manual of Standards for the purposes of regulation 121.680.

121.615 Holding valid 3 yearly emergency and safety equipment check

- (1) A flight crew member holds a valid 3 yearly emergency and safety equipment check for the operator of an aeroplane and the aeroplane if:
 - (a) the flight crew member has undertaken the operator's 3 yearly emergency and safety equipment training for an aeroplane of that kind; and
 - (b) the training complies with subregulation 121.620(1); and
 - (c) the flight crew member has successfully completed the operator's 3 yearly emergency and safety equipment check for an aeroplane of that kind; and
 - (d) the check complies with subregulation 121.620(2); and
 - (e) the check is valid in accordance with subregulations (2) and (3) of this regulation.
- (2) Subject to subregulation (3), a 3 yearly emergency and safety equipment check is valid for the period:
 - (a) beginning on the day the check is completed; and

(b) ending at the end of the 3-year period beginning at the end of the month in which the check is completed.

(3) If:

- (a) a person's 3 yearly emergency and safety equipment check (the *existing check*) for the operator of an aeroplane and an aeroplane is valid in accordance with subregulation (2); and
- (b) the person successfully completes another 3 yearly emergency and safety equipment check (the *new check*) for that operator and aeroplane in accordance with paragraph (1)(d) less than 3 months before the day the existing check is due to expire;

the new check is valid for the 3-year period beginning at the end of the day the existing check expires.

121.620 The 3 yearly emergency and safety equipment training and checking requirements

Training requirements

- (1) The 3 yearly emergency and safety equipment training for a flight crew member for an aeroplane must meet the following requirements:
 - (a) for a pilot—the training must relate to the duties of a pilot of the aeroplane in relation to emergency and safety equipment carried on the aeroplane;
 - (b) for a flight engineer—the training must relate to the duties of a flight engineer for the aeroplane in relation to emergency and safety equipment carried on the aeroplane;
 - (c) the training must meet the requirements prescribed by the Part 121 Manual of Standards.

(1A) Without limiting paragraph (1)(c), the requirements may relate to training facilities or devices.

Checking requirements

- (2) A 3 yearly emergency and safety equipment check for a flight crew member for an aeroplane must:
 - (a) check the competence of the flight crew member in relation to the requirements prescribed for the purposes of paragraph (1)(c); and
 - (b) be carried out using:
 - (i) the aeroplane; or
 - (ii) a training facility or device which meets the requirements prescribed by the Part 121 Manual of Standards for the purposes of regulation 121.680.

Subpart 121.P—Cabin crew

Division 121.P.1—Preliminary

121.625 Application of Subpart 121.P

- (1) This Subpart (other than Division 121.P.7) applies in relation to a flight of an aeroplane if regulation 121.630 requires a cabin crew member to be carried on the aeroplane for the flight.
- (2) Division 121.P.7 applies in relation to a flight of an aeroplane if regulation 121.630 does not require a cabin crew member to be carried on the aeroplane for the flight.

121.630 When cabin crew are required

A cabin crew member must be carried on a flight of an aeroplane if:

- (a) the flight is a passenger transport operation; and
- (b) either:
 - (i) the aeroplane has a maximum operational passenger seat configuration of more than 19; or
 - (ii) the aeroplane has a maximum operational passenger seat configuration of more than 9 and a maximum certificated passenger seating capacity of more than 19.

Division 121.P.2—General

121.635 Number of cabin crew

Number of cabin crew

- (1) The operator of an aeroplane for a flight contravenes this subregulation if, when the flight begins:
 - (a) if the aeroplane does not have twin aisles—a requirement mentioned in subregulation (2) is not met for the flight; or
 - (b) if the aeroplane does have twin aisles—a requirement mentioned in subregulation (3) is not met for the flight.

Aeroplanes without twin aisles

- (2) If the aeroplane does not have twin aisles, the number of cabin crew members for the flight must be at least:
 - (a) the flight base number of cabin crew members for the flight; or
 - (b) if there is a demonstration additional number of cabin crew members for the aeroplane and paragraph (c) does not apply to the aeroplane—the sum of:
 - (i) the flight base number of cabin crew members for the flight; and
 - (ii) the demonstration additional number of cabin crew members for the aeroplane; or
 - (c) if the operator holds an approval under regulation 121.010 for a number (the **reduced demonstration additional number**) in relation to the aeroplane that is less than the demonstration additional number of cabin crew members for the aeroplane—the sum of:
 - (i) the flight base number of cabin crew members for the flight; and
 - (ii) the reduced demonstration additional number.

Aeroplanes with twin aisles

- (3) If the aeroplane has twin aisles, the number of cabin crew members for the flight must be at least the greater of:
 - (a) the number of cabin crew members that would be required under subregulation (2) for the flight if the aeroplane did not have twin aisles; and
 - (b) the number equal to the sum of one cabin crew member for each floor level exit for the aeroplane.

Approvals by CASA

- (4) A number approved by CASA under regulation 121.010, as referred to in paragraph (2)(c) of this regulation, may be zero.

Regulation 121.640

Exception

- (5) Subregulation (1) does not apply if:
- (a) a requirement mentioned in subregulation (2) or (3) (as the case requires) is not met for the flight; but
 - (b) the flight is operated with a reduced number of cabin crew members in accordance with regulation 121.670.

Offence

- (6) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (5): see subsection 13.3(3) of the *Criminal Code*.

121.640 Qualifications, experience and training

Qualifications, experience and training

- (1) The operator of an aeroplane for a flight contravenes this subregulation if, when the flight begins, a requirement mentioned in subregulation (2) is not met for the flight.
- (2) The requirements are that each cabin crew member for the flight must:
- (a) have the recent experience required for the flight by regulation 121.705; and
 - (b) meet the initial training requirements under regulation 121.710 for the operator; and
 - (c) meet the conversion training requirements under subregulation 121.715(1) for the operator and the aeroplane type; and
 - (d) for unsupervised line flying for the flight—meet the conversion training requirements under subregulation 121.715(3) for the operator and the aeroplane; and
 - (e) meet the differences training requirements (if any) under regulation 121.720 for the operator and the aeroplane; and
 - (f) hold a valid annual training check under regulation 121.725 for the operator and the aeroplane type; and
 - (g) for unsupervised line flying for the flight—hold a valid line check under regulation 121.730 for the operator and an aeroplane operated by the operator; and
 - (h) hold a valid 3 yearly training check under regulation 121.735 for the operator and the aeroplane type; and
 - (i) have the qualifications and experience required by the operator's exposition for the duties assigned to the cabin crew member for the flight.

Regulation 121.645

Training or checking involving safety or emergency equipment

- (3) The operator of an aeroplane for a flight contravenes this subregulation if training or checking mentioned in subregulation (2), to the extent that it involves safety equipment or emergency equipment, is conducted other than by a person who holds an approval under regulation 121.010.

Exception

- (4) Subregulation (1) does not apply in relation to a requirement mentioned in subregulation (2) for a cabin crew member if:
- (a) the cabin crew member is successfully participating in the operator's training and checking system; and
 - (b) the operator holds an approval under regulation 121.010 that the system adequately covers the matters to which the requirement relates.

Offence

- (5) A person commits an offence of strict liability if the person contravenes subregulation (1) or (3).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (4): see subsection 13.3(3) of the *Criminal Code*.

121.645 Competence

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
- (a) the operator assigns a person to duty as a cabin crew member for the flight; and
 - (b) the person has not been assessed by the operator, in accordance with the operator's exposition, as competent to perform the duties assigned to the person for the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

121.650 Minimum age

- (1) The operator of an aeroplane for a flight contravenes this subregulation if, when the flight begins, a cabin crew member for the flight has not turned 18.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Regulation 121.655

121.655 English proficiency

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the operator assigns a person to duty as a cabin crew member for the flight; and
 - (b) the person does not meet a requirement relating to general English Language proficiency for cabin crew members prescribed by the Part 121 Manual of Standards.

- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

121.660 Assignment to duty as senior cabin crew member

- (1) The operator of an aeroplane for a flight contravenes this subregulation if, when the flight begins:
 - (a) there is more than one cabin crew member for the flight; and
 - (b) none of the cabin crew members is assigned to duty as the senior cabin crew member for the flight.

- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

121.665 Training and checking for senior cabin crew member

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the operator assigns a cabin crew member (the ***original senior cabin crew member***) to duty as the senior cabin crew member for the flight; and
 - (b) the cabin crew member has not successfully completed the training and checking for a senior cabin crew member prescribed by the Part 121 Manual of Standards.

- (2) Subregulation (1) does not apply if, before the flight begins:

- (a) another cabin crew member is assigned to duty as the senior cabin crew member for the flight; and
- (b) the original senior cabin crew member becomes unable to report for duty due to unforeseen circumstances that are beyond the operator's control.

Example: A senior cabin crew member becomes unfit for duty shortly before a flight at a place where a replacement senior cabin crew member is not available.

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

121.670 Operating with a reduced number of cabin crew

- (1) An aeroplane operator's exposition must include:
 - (a) the circumstances in which the aeroplane may be operated for a flight with a number (a **reduced number**) of cabin crew members that is fewer than the number of cabin crew members required for the flight by subregulation 121.635(2) or (3) (as the case requires); and
 - (b) procedures for operating the aeroplane for the flight with a reduced number of cabin crew members; and
 - (c) procedures for notifying CASA of the reduced number of cabin crew members carried on the flight.
- (2) Circumstances may only be included in the operator's exposition in accordance with paragraph (1)(a) if the circumstances are unforeseen and beyond the operator's control.

Example: A cabin crew member becomes unfit for duty shortly before a flight at a place where a replacement cabin crew member is not available.

- (3) A reduced number of cabin crew members permitted by paragraph (1)(a) for a flight must not be less than the number equal to the sum of one cabin crew member for each 50, or part of 50, passengers carried on each deck of the aeroplane for the flight.

121.675 Second senior cabin crew member

- (1) This regulation applies in relation to an aeroplane if the aeroplane is used to conduct a flight for which regulation 121.635 requires the aeroplane to carry more than 4 cabin crew members.
- (2) The operator of an aeroplane for a flight contravenes this subregulation if a cabin crew member is not assigned to duty as the second senior cabin crew member for the flight.
- (3) The aeroplane operator's exposition must include:
 - (a) procedures to assign a cabin crew member to duty as the second senior cabin crew member for a flight; and
 - (b) the duties to be carried out by a second senior cabin crew member for a flight.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

121.680 Training facilities and devices

- (1) An aeroplane operator's exposition must require any training and checking, under this Subpart (other than Division 121.P.7), of a cabin crew member of the operator's personnel that is carried out using a training facility or device to be carried out using a training facility or device specified in the exposition.

Part 121 Australian air transport operations—larger aeroplanes

Subpart 121.P Cabin crew

Division 121.P.2 General

Regulation 121.680

- (2) A training facility or device specified in an exposition in accordance with subregulation (1) must meet the requirements prescribed by the Part 121 Manual of Standards for the purposes of this regulation.

Division 121.P.3—Operation of aeroplanes of different aeroplane types

121.685 Application of Division 121.P.3

This Division applies in relation to the operator of an aeroplane if, under the operator's AOC, the operator operates more than one aeroplane type.

121.690 Content of exposition in relation to aeroplane types

For each aeroplane operated under an AOC, the operator's exposition must include the aeroplane's type for the purposes of this Subpart.

121.695 Maximum number of aeroplane types

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the operator assigns a cabin crew member to duty on the aeroplane for the flight; and
 - (b) the requirement in subregulation (2) is not met.
- (2) The requirement is that:
 - (a) the cabin crew member holds no more than 3 valid annual training checks under regulation 121.725 for the operator and aeroplane types operated by the operator; or
 - (b) the cabin crew member holds an approval under regulation 121.010 to be assigned to duty on 4 aeroplane types operated by the operator.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

121.700 Assignment to different aeroplane types

An aeroplane operator's exposition must include:

- (a) a description of the circumstances in which the operator may assign a cabin crew member who holds more than one valid annual training check under regulation 121.725 for the operator and aeroplane types operated by the operator to duty for a flight of that aeroplane type; and
- (b) procedures to ensure that such cabin crew members are assigned to duty for a flight of that aeroplane type only in those circumstances.

Division 121.P.4—Recent experience

121.705 Recent experience requirements—6 months before flight

For the purposes of paragraph 121.640(2)(a), the recent experience required for a cabin crew member for a flight of an aeroplane is that, within 6 months before the flight, the cabin crew member must have:

- (a) flown as a cabin crew member on an aeroplane of that aeroplane type; or
- (b) successfully completed the operator's refresher training for an aeroplane of that aeroplane type.

Division 121.P.5—Non-recurrent training and checking

121.710 Meeting initial training requirements

For the purposes of paragraph 121.640(2)(b), a cabin crew member meets the initial training requirements for an operator of an aeroplane if:

- (a) the cabin crew member has completed the operator's initial training for a cabin crew member; and
- (b) the initial training meets the requirements prescribed by the Part 121 Manual of Standards; and
- (c) the cabin crew member has successfully completed an initial training check in accordance with the operator's exposition.

121.715 Meeting conversion training requirements

- (1) For the purposes of paragraph 121.640(2)(c), a cabin crew member meets the conversion training requirements under this subregulation for an operator of an aeroplane and the aeroplane if:
 - (a) the cabin crew member has completed the operator's conversion training for the aeroplane type; and
 - (b) the training meets the requirements mentioned in subregulation (2).
- (2) The requirements are as follows:
 - (a) the training must meet the requirements prescribed by the Part 121 Manual of Standards;
 - (b) the training must include any additional training required to familiarise a cabin crew member with their duties.
- (3) For the purposes of paragraph 121.640(2)(d), a cabin crew member meets the conversion training requirements under this subregulation for an operator of an aeroplane and the aeroplane if:
 - (a) the member has completed supervised line flying on that aeroplane type; and
 - (b) the cabin crew member successfully completes a valid line check, under regulation 121.730, for the operator and an aeroplane operated by the operator.
- (4) The supervised line flying mentioned in subregulation (3) must have been completed after the cabin crew member has successfully completed both of the following:
 - (a) a valid annual training check for the operator and the aeroplane type under regulation 121.725;
 - (b) a valid 3 yearly training check for the operator and the aeroplane type under regulation 121.735.

Regulation 121.720

121.720 Meeting differences training requirements

- (1) For the purposes of paragraph 121.640(2)(e), a cabin crew member meets the differences training requirements for the operator of an aeroplane and the aeroplane if:
 - (a) the cabin crew member has completed the operator's differences training for the aeroplane; and
 - (b) the differences training includes the training mentioned in subregulation (2); and
 - (c) the cabin crew member has successfully completed the operator's differences training check in accordance with the operator's exposition.
- (2) The training is the following:
 - (a) if the safety equipment on that aeroplane is of a kind that the cabin crew member has not previously received training for—training in the location and use of the safety equipment;
 - (b) if the normal and emergency procedures for that aeroplane are of a kind that the cabin crew member has not previously received training for—training in the normal and emergency procedures.

Division 121.P.6—Recurrent training and checking

121.725 Annual training and holding valid annual training check

- (1) An aeroplane operator's annual training for a cabin crew member for that aeroplane type must meet the requirements prescribed by the Part 121 Manual of Standards.
- (2) An operator's annual training check for a cabin crew member for an aeroplane type must check the competence of the cabin crew member in relation to the requirements mentioned in subregulation (1) for the aeroplane type.
- (3) A cabin crew member holds a valid annual training check for the operator of an aeroplane and the aeroplane type at a particular time if:
 - (a) the member successfully completes the check mentioned in subregulation (2) in relation to the operator and the aeroplane type; and
 - (b) the time is within the period for which the check is valid in accordance with subregulations (4) and (5).
- (4) Subject to subregulation (5), an annual training check is valid for the period:
 - (a) beginning on the day the check is completed; and
 - (b) ending at the end of the 12 month period beginning at the end of the month in which the check is completed.
- (5) If:
 - (a) a person's annual training check (the **existing check**) for the operator of an aeroplane and an aeroplane type is valid in accordance with subregulation (4); and
 - (b) the person successfully completes another annual training check (the **new check**) for that operator and aeroplane type in accordance with paragraph (3)(a) less than 3 months before the day the existing check is due to expire;

the new check is valid for the period of 12 months beginning at the end of the day the existing check expires.

121.730 Holding valid line check

- (1) A line check for a cabin crew member for an operator of an aeroplane must check the competence of the cabin crew member in the following for a normal line flight operation of an aeroplane operated by the operator:
 - (a) complying with the operator's standard operating procedures during all phases of flight;
 - (b) knowledge of how to manage the following:
 - (i) passengers with reduced mobility;
 - (ii) restricted persons;
 - (iii) unruly passengers;

Regulation 121.735

- (c) any other procedures in the operator's exposition that are relevant to the flight.
- (2) A cabin crew member holds a valid line check for the operator of an aeroplane at a particular time if:
 - (a) the member has successfully completed the check mentioned in subregulation (1) for the operator and an aeroplane operated by the operator; and
 - (b) the time is within the period for which the check is valid in accordance with subregulations (3) and (4).
- (3) Subject to subregulation (4), a line check is valid for the period:
 - (a) beginning on the day the check is completed; and
 - (b) ending at the end of the 12 month period beginning at the end of the month in which the check is completed.
- (4) If:
 - (a) a person's line check (the *existing check*) for the operator of an aeroplane is valid in accordance with subregulation (3); and
 - (b) the person successfully completes another line check (the *new check*) for that operator and an aeroplane operated by the operator in accordance with paragraph (2)(a) less than 3 months before the day the existing check is due to expire;the new check is valid for the period of 12 months beginning at the end of the day the existing check expires.

121.735 Three yearly training and holding valid 3 yearly training check

- (1) Three yearly training for a cabin crew member for the operator of an aeroplane and the aeroplane type must meet the requirements prescribed by the Part 121 Manual of Standards.
- (2) A 3 yearly training check for a cabin crew member for an operator of an aeroplane and the aeroplane type must check the competence of the crew member in relation to the requirements mentioned in subregulation (1) in relation to the aeroplane type.
- (3) A cabin crew member holds a valid 3 yearly training check for the operator of an aeroplane and the aeroplane type at a particular time if:
 - (a) the member has successfully completed a check mentioned in subregulation (2) for the operator and the aeroplane type; and
 - (b) the time is within the period for which the check is valid in accordance with subregulations (4) and (5).
- (4) Subject to subregulation (5), a 3 yearly training check is valid for the period:
 - (a) beginning on the day the check is completed; and
 - (b) ending at the end of the 3 year period beginning at the end of the month in which the check is completed.

(5) If:

- (a) a person's 3 yearly training check (the ***existing check***) for the operator of an aeroplane and an aeroplane type is valid in accordance with subregulation (4); and
- (b) the person successfully completes another 3 yearly training check (the ***new check***) for that operator and aeroplane type in accordance with paragraph (3)(a) less than 3 months before the day the existing check is due to expire;

the new check is valid for the period of 3 years beginning at the end of the day the existing check expires.

Regulation 121.740

Division 121.P.7—When cabin crew are carried but not required

121.740 Competence

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the operator assigns a person to duty as a cabin crew member for the flight; and
 - (b) the person has not been assessed by the operator, in accordance with the operator's exposition, as competent to perform the duties assigned to the person for the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

121.745 Minimum age

- (1) The operator of an aeroplane for a flight contravenes this subregulation if, when the flight begins, a cabin crew member for the flight has not turned 18.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

121.750 Annual emergency and safety equipment check

- (1) The operator of an aeroplane for a flight contravenes this subregulation if, when the flight begins, a cabin crew member for the flight does not hold a valid annual emergency and safety equipment check under subregulation (2) for the operator and the aeroplane.
- (2) A cabin crew member holds a valid annual emergency and safety equipment check for the operator of an aeroplane and the aeroplane if:
 - (a) the flight crew member has successfully completed training and assessment in:
 - (i) the operation and use of emergency and safety equipment on an aeroplane of that aeroplane type that is relevant to the cabin crew member's duties; and
 - (ii) emergency evacuation procedures for an aeroplane of that aeroplane type; and
 - (b) the check is valid in accordance with subregulations (3) and (4).
- (3) Subject to subregulation (4), an annual emergency and safety equipment check is valid for the period:
 - (a) beginning on the day the check is completed; and

- (b) ending at the end of the 12 month period beginning at the end of the month in which the check is completed.
- (4) If:
- (a) a person's annual emergency and safety equipment check (the *existing check*) for the operator of an aeroplane and the aeroplane is valid in accordance with subregulation (3); and
 - (b) the person successfully completes another annual emergency and safety equipment check (the *new check*) for that operator and aeroplane in accordance with paragraph (2)(a) less than 3 months before the day the existing check is due to expire;
- the new check is valid for the period of 12 months beginning at the end of the day the existing check expires.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Subpart 121.V—Emergency evacuation procedures

121.755 Emergency evacuation procedures

- (1) The Part 121 Manual of Standards may prescribe requirements relating to emergency evacuation procedures, including the demonstration of such procedures.
- (2) The operator of an aeroplane contravenes this subregulation if:
 - (a) the operator is subject to a requirement mentioned in subregulation (1); and
 - (b) the requirement is not met.
- (3) Subregulation (2) does not apply to an operator and a requirement if the operator holds an approval under regulation 121.010 in relation to the requirement.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (3): see subsection 13.3(3) of the *Criminal Code*.

Subpart 121.Z—Certain single-engine aeroplanes

121.760 Application of Part 135 to certain operations

Application of this regulation

- (1) This regulation applies in relation to the operation of an aeroplane for:
 - (a) an IFR flight; and
 - (b) a VFR flight by day.

Part 135

- (2) Part 135, other than paragraph 135.380(2)(a) (which requires the composition of the flight crew to comply with the aeroplane's flight manual), applies to the operation of an aeroplane as if the operation were an operation to which Part 135 applies.
- (3) However, a provision of Part 135 does not apply to the operation of an aeroplane to the extent that the provision is inconsistent with another provision of this Subpart.

121.765 At least 2 pilots required for certain IFR flights

- (1) The operator of an aeroplane for an IFR flight contravenes this subregulation if, when the flight begins:
 - (a) the aeroplane is carrying more than 9 passengers; and
 - (b) the aeroplane's flight crew does not include at least 2 pilots.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

121.770 Trend monitoring systems required for certain VFR flights by day

Engine automatic electronic condition trend monitoring system

- (1) The operator of an aeroplane for a VFR flight by day contravenes this subregulation if, when the flight begins:
 - (a) the aeroplane is carrying more than 9 passengers; and
 - (b) the aeroplane is not fitted with an automatic electronic condition trend monitoring system for the engine.

Offence

- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Regulation 121.775

Penalty: 50 penalty units.

121.775 Terrain awareness and warning system

Turbine-engine aeroplanes

- (1) The operator of a turbine-engine aeroplane for a flight contravenes this subregulation if, when the flight begins, the aeroplane is not fitted with a TAWS-Class A.

Piston-engine aeroplanes

- (2) The operator of a piston-engine aeroplane for a flight contravenes this subregulation if, when the flight begins, the aeroplane is not fitted with either a TAWS-Class A or a TAWS-Class B.

Offence

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

121.780 Aircraft not to be flown under the VFR at night

- (1) The operator of an aeroplane for a flight contravenes this subregulation if the flight is a VFR flight at night.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Part 129—Foreign air transport operators—certification and operating requirements

Table of contents

Subpart 129.A—Foreign air transport operations—general

- 129.005 What Part 129 is about
- 129.020 Approvals by CASA for Part 129
- 129.025 Prescribed purpose—foreign air transport operations
- 129.030 Foreign air transport operations—foreign air transport AOC required
- 129.035 Foreign air transport operations—compliance with foreign air transport AOCs
- 129.040 Foreign air transport operations—compliance with conditions of foreign air transport AOCs

Subpart 129.B—Foreign air transport AOCs

- 129.045 Foreign air transport AOC—information and documents that may be required
- 129.050 Foreign air transport AOC—manner of giving CASA information etc.
- 129.055 Foreign air transport AOC—conditions for issue
- 129.060 Foreign air transport AOC—conditions
- 129.065 Foreign air transport AOC—requirement to give notice of certain events

Subpart 129.C—Foreign air transport operations—operating requirements

- 129.070 Foreign air transport operations—compliance with certain Part 91 provisions
- 129.075 Foreign air transport operations—compliance with Annex 6
- 129.080 Foreign air transport operations—common language for crew
- 129.085 Foreign air transport operations—flights to be in accordance with IFR or approval
- 129.090 Foreign air transport operations—flight crew licences
- 129.095 Foreign air transport operations—air displays
- 129.100 Foreign air transport operations—low-visibility operations
- 129.105 Foreign air transport operations—flying in formation
- 129.110 Foreign air transport operations—simulated IMC prohibited
- 129.115 Foreign air transport operations—simulated emergency and abnormal procedures prohibited
- 129.120 Foreign air transport operations—aerobatic manoeuvres prohibited
- 129.125 Foreign air transport operations—maximum period for use of Australian aircraft in Australian territory

Subpart 129.M—Foreign air transport operations—airworthiness

- 129.200 Foreign air transport operations—certificates of airworthiness
- 129.205 Foreign air transport operations—continuing airworthiness

Subpart 129.N—Foreign air transport operations—flight crew

- 129.250 Foreign air transport operations—flight crew experience for aircraft covered by overseas rating
- 129.255 Foreign air transport operations—co-pilot

Subpart 129.A—Foreign air transport operations—general

129.005 What Part 129 is about

This Part makes provision for:

- (a) applicants for, and holders of, AOCs that authorise the operation of aircraft for foreign air transport operations; and
- (b) operating requirements for aircraft engaged in foreign air transport operations.

Note 1: Part 92 (Consignment and carriage of dangerous goods by air) applies to all foreign aircraft (other than state aircraft) operating in Australian territory: see paragraph 92.005(1)(b).

Note 2: See also Division 2 of Part III of the Act in relation to AOCs generally.

129.020 Approvals by CASA for Part 129

- (1) If a provision of this Part refers to a person holding an approval under this regulation, the person may apply to CASA, in writing, for the approval.
- (2) Subject to regulation 11.055, CASA must grant the approval.
- (3) Subregulation 11.055(1B) applies to the granting of an approval under this regulation.

129.025 Prescribed purpose—foreign air transport operations

For subsection 27(9) of the Act, the flying or operation of any aircraft for a foreign air transport operation is a prescribed purpose.

129.030 Foreign air transport operations—foreign air transport AOC required

- (1) A person contravenes this subregulation if:
 - (a) the person conducts a foreign air transport operation; and
 - (b) the person does not hold a foreign air transport AOC that authorises the person to conduct the foreign air transport operation.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

129.035 Foreign air transport operations—compliance with foreign air transport AOCs

- (1) A person contravenes this subregulation if:
 - (a) the person conducts a foreign air transport operation; and
 - (b) the person:

- (i) holds a foreign air transport AOC that authorises the person to conduct the foreign air transport operation; but
 - (ii) conducts the operation in a way that contravenes the AOC.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

129.040 Foreign air transport operations—compliance with conditions of foreign air transport AOCs

- (1) A foreign air transport operator contravenes this subregulation if the operator does not comply with a condition of its foreign air transport AOC.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Subpart 129.B—Foreign air transport AOCs

129.045 Foreign air transport AOC—information and documents that may be required

For subparagraph 27AC(1)(c)(iii) of the Act, the information and documents that CASA may require from a foreign operator who is an applicant for a foreign air transport AOC are the following:

- (a) any business name, other than the name stated in the operator's foreign certificate, under which the operator may operate;
- (b) the operator's contact details in the country that issued the foreign certificate, including its mailing address;
- (c) the operator's contact details in Australia, including its mailing address;
- (d) the aircraft types that the operator proposes to use;
- (e) the registration and serial numbers of each aircraft that the operator proposes to use;
- (f) a minimum equipment list, or equivalent document, for each aircraft that the operator proposes to use;
- (g) the aerodromes, areas of operation and routes that the operator proposes to use;
- (h) if the operator is not an individual—the operator's certificate of incorporation or registration as a body corporate, or equivalent document;
- (i) any of the following manuals or equivalent documents:
 - (i) the operator's continuing airworthiness management manual;
 - (ii) the operator's operations manual;
 - (iii) the operator's training and checking manual;
 - (iv) the operator's dangerous goods manual.

Note: Under other provisions of section 27AC, and also section 27AE, of the Act, CASA may request other information and documents from an applicant for a foreign air transport AOC.

129.050 Foreign air transport AOC—manner of giving CASA information etc.

If, under section 27AB, 27AC or 27AE of the Act, an applicant for a foreign air transport AOC is required to lodge, or give CASA, a manual, information or a document, the operator must lodge, or give CASA, the manual, information or document in English.

129.055 Foreign air transport AOC—conditions for issue

- (1) It is a condition for the issue of a foreign air transport AOC to a foreign operator that CASA is satisfied of the following:
 - (a) the operator holds a foreign certificate that authorises the operator to conduct each operation covered by the application;

- (b) the national aviation authority that issued the foreign certificate meets the requirement mentioned in subregulation (2);
- (c) for each aircraft to be operated under the AOC, the operator holds a certificate of airworthiness issued in accordance with Annex 8, *Airworthiness of Aircraft*, to the Chicago Convention;
- (d) for each foreign registered aircraft to be operated under the AOC, the operator will ensure the continuing airworthiness of the aircraft in accordance with the standards set out in the relevant Part of Annex 6, *Operation of Aircraft*, to the Chicago Convention;
- (e) for each registered aircraft to be operated under the AOC, the operator will ensure the continuing airworthiness of the aircraft in accordance with the requirements of these Regulations that apply to the aircraft;
- (f) the operator has a safety management system that meets the standards set out in Annex 19, *Safety Management*, to the Chicago Convention.

Note: These matters are in addition to the matters specified in section 28 (CASA must issue AOC if satisfied about certain matters) of the Act.

- (2) For paragraph (1)(b), the requirement is that:
 - (a) the authority is the national aviation authority of a Contracting State and carries out its functions in respect of foreign air transport operations in accordance with the Chicago Convention; or
 - (b) the authority is not the national aviation authority of a Contracting State but carries out functions that are at least equivalent to the functions mentioned in paragraph (a).

129.060 Foreign air transport AOC—conditions

For paragraph 28BA(1)(b) of the Act, each of the following is a condition of a foreign air transport AOC issued to an operator:

- (a) the operator must conduct the operations authorised by the AOC:
 - (i) using only the aircraft types that are authorised for use by the AOC; and
 - (ii) if the AOC limits the operations to particular aircraft—using only those aircraft; and
 - (iii) using only the aerodromes, areas of operation and routes authorised by the AOC;
- (b) the operator must not use an aircraft to conduct a low-visibility operation or a land and hold short operation in Australian territory unless the AOC authorises the use of the aircraft for the operation;
- (c) the operator must not conduct an operation authorised by the AOC unless the operation is also authorised by:
 - (i) the operator's foreign certificate and the operations specifications issued in relation to the foreign certificate; or
 - (ii) an operational authorisation mentioned in paragraph 27AE(1)(c) of the Act that applies to the operation;
- (d) the operator must not conduct an operation authorised by the AOC in contravention of any of the following that applies to the operation:

Regulation 129.065

- (i) a limitation or condition mentioned in paragraph 27AE(1)(b) of the Act;
- (ii) a requirement mentioned in paragraph 27AE(1)(c) of the Act;
- (e) for each foreign registered aircraft to be operated under the AOC, the operator must ensure the continuing airworthiness of the aircraft in accordance with the standards set out in the relevant Part of Annex 6, *Operation of Aircraft*, to the Chicago Convention;
- (f) for each registered aircraft to be operated under the AOC, the operator must ensure the continuing airworthiness of the aircraft in accordance with the requirements of these Regulations that apply to the aircraft;
- (g) the operator must have a safety management system that meets the standards set out in Annex 19, *Safety Management*, to the Chicago Convention.

129.065 Foreign air transport AOC—requirement to give notice of certain events

- (1) This regulation applies to a foreign air transport operator if an event mentioned in subregulation (2) happens in relation to:
 - (a) the operator's foreign certificate; or
 - (b) an operations specification issued in relation to the certificate; or
 - (c) an operational authorisation mentioned in paragraph 27AE(1)(c) of the Act that applies to an operation conducted under the operator's foreign certificate.
- (2) For subregulation (1), the events are the following:
 - (a) the foreign certificate, operations specification or operational authorisation expires and is not renewed;
 - (b) the operator is notified by the national aviation authority that issued the certificate, specification or authorisation that action may be taken to vary, suspend or cancel the certificate, specification or authorisation;
 - (c) the certificate, specification or authorisation is varied, suspended or cancelled;
 - (d) a new operations specification or operational authorisation that applies to an operation conducted under the operator's foreign certificate is issued to the operator.
- (3) The foreign air transport operator contravenes this subregulation if the operator does not tell CASA, in writing, that the event has happened within 7 days after the day the event happens.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (3).

Penalty: 50 penalty units.

Subpart 129.C—Foreign air transport operations— operating requirements

129.070 Foreign air transport operations—compliance with certain Part 91 provisions

Note: This regulation is reserved for future use.

129.075 Foreign air transport operations—compliance with Annex 6

Aeroplanes

- (1) The operator of an aeroplane contravenes this subregulation if:
 - (a) the operator operates the aeroplane for a foreign air transport operation;
and
 - (b) the operation is conducted in a way that contravenes a standard set out in Part I of Annex 6, *Operation of Aircraft*, to the Chicago Convention.

Helicopters

- (2) The operator of a helicopter contravenes this subregulation if:
 - (a) the operator operates the helicopter for a foreign air transport operation;
and
 - (b) the operation is conducted in a way that contravenes a standard set out in Part III of Annex 6, *Operation of Aircraft*, to the Chicago Convention.

Compliance with more stringent requirements under this Part

- (3) To avoid doubt, if a provision of this Part imposes a more stringent requirement than the comparable requirement of a standard mentioned in paragraph (1)(b) or (2)(b), the operator must comply with the more stringent requirement.

Offence

- (4) A person commits an offence if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

129.080 Foreign air transport operations—common language for crew

- (1) The operator of an aircraft engaged in a flight that is a foreign air transport operation contravenes this subregulation if all crew members for the flight are not able to communicate orally with each other in a common language.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Regulation 129.085

129.085 Foreign air transport operations—flights to be in accordance with IFR or approval

- (1) The operator and the pilot in command of an aircraft engaged in a flight that is a foreign air transport operation each contravene this subregulation if the operation of the aircraft does not meet the requirement mentioned in subregulation (2).
- (2) For subregulation (1), the requirement is that the aircraft must be operated in accordance with:
 - (a) the IFR; or
 - (b) an approval under regulation 129.020 held by the operator for the aircraft to be operated otherwise than in accordance with the IFR.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

129.090 Foreign air transport operations—flight crew licences

- (1) The operator of an aircraft engaged in a flight that is a foreign air transport operation contravenes this subregulation if a flight crew member for the flight does not hold a licence (however described) that:
 - (a) authorises the flight crew member to carry out the duties assigned to the member for the flight by the operator; and
 - (b) is issued or authorised by the national aviation authority of the aircraft's State of registry.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

129.095 Foreign air transport operations—air displays

- (1) The operator of an aircraft engaged in a flight that is a foreign air transport operation contravenes this subregulation if the aircraft is flown in an air display.
- (2) The operator of an aircraft engaged in a flight that is a foreign air transport operation contravenes this subregulation if:
 - (a) the aircraft is flown below 1 000 ft AGL at an aerodrome at which an air display is being conducted; and
 - (b) the requirement mentioned in subregulation (3) is not met.
- (3) For paragraph (2)(b), the requirement is that:
 - (a) the operator must hold an approval under regulation 129.020 for the aircraft to be flown below 1 000 ft AGL while the air display is being conducted; or
 - (b) the aircraft must be taking off or landing for a flight that is not part of the air display.

- (4) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

129.100 Foreign air transport operations—low-visibility operations

Note: This regulation is reserved for future use.

129.105 Foreign air transport operations—flying in formation

- (1) The operator of an aircraft engaged in a flight that is a foreign air transport operation contravenes this subregulation if, during the flight:
- (a) the aircraft is flown in formation; and
 - (b) the operator does not hold an approval under regulation 129.020 for the aircraft to be flown in formation during the flight.

- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

129.110 Foreign air transport operations—simulated IMC prohibited

- (1) The pilot in command of an aircraft engaged in a flight that is a foreign air transport operation contravenes this subregulation if IMC are simulated during the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

129.115 Foreign air transport operations—simulated emergency and abnormal procedures prohibited

- (1) The operator of an aircraft engaged in a flight that is a foreign air transport operation contravenes this subregulation if an emergency procedure is simulated during the flight.
- (2) The operator of an aircraft engaged in a flight that is a foreign air transport operation contravenes this subregulation if an abnormal procedure is simulated during the flight.
- (3) Subregulations (1) and (2) do not apply to a procedure that is simulated only orally.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

Regulation 129.120

Note: A defendant bears an evidential burden in relation to the matter in subregulation (3): see subsection 13.3(3) of the *Criminal Code*.

129.120 Foreign air transport operations—aerobatic manoeuvres prohibited

- (1) The operator of an aircraft engaged in a flight that is a foreign air transport operation contravenes this subregulation if, during the flight, the aircraft is used to conduct an aerobatic manoeuvre.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

129.125 Foreign air transport operations—maximum period for use of Australian aircraft in Australian territory

- (1) A foreign air transport operator contravenes this subregulation if, within any 12 month period, the operator uses a particular Australian aircraft to conduct foreign air transport operations on a total number of days that is more than:
 - (a) 90; or
 - (b) if the operator holds an approval under regulation 129.020 for this regulation in relation to the aircraft—the number mentioned in the approval for the aircraft.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Subpart 129.M—Foreign air transport operations— airworthiness

129.200 Foreign air transport operations—certificates of airworthiness

Aircraft must have certificate of airworthiness

- (1) The operator of an aircraft contravenes this subregulation if:
 - (a) the aircraft begins a flight that is a foreign air transport operation; and
 - (b) the aircraft does not have a certificate of airworthiness (however described) that has been issued in accordance with Annex 8, *Airworthiness of Aircraft*, to the Chicago Convention.

Certificate of airworthiness must remain in force during flight

- (2) The operator of an aircraft contravenes this subregulation if:
 - (a) the aircraft is engaged in a flight that is a foreign air transport operation; and
 - (b) the certificate of airworthiness (however described) for the aircraft ceases to be in force before the end of the flight.

Offence

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

129.205 Foreign air transport operations—continuing airworthiness

- (1) The operator of an aircraft contravenes this subregulation if:
 - (a) the aircraft begins a flight that is a foreign air transport operation; and
 - (b) if the aircraft is a foreign registered aircraft—the operator has not ensured the continuing airworthiness of the aircraft in accordance with the standards set out in the relevant Part of Annex 6, *Operation of Aircraft*, to the Chicago Convention; and
 - (c) if the aircraft is a registered aircraft—the operator has not ensured the continuing airworthiness of the aircraft in accordance with the requirements of these Regulations that apply to the aircraft.
- (2) A person commits an offence if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Regulation 129.250

Subpart 129.N—Foreign air transport operations—flight crew

129.250 Foreign air transport operations—flight crew experience for aircraft covered by overseas rating

- (1) The operator of an aircraft contravenes this subregulation if:
 - (a) the aircraft begins a flight that is a foreign air transport operation; and
 - (b) the aircraft is covered by a type rating under the law of the foreign country the national aviation authority of which issued the operator's foreign certificate; and
 - (c) none of the pilots occupying a pilot seat for the flight has the experience required by subregulation (2) in relation to aircraft covered by the type rating.
- (2) For paragraph (1)(c), a pilot has the experience required in relation to aircraft covered by a type rating if:
 - (a) the pilot:
 - (i) holds an overseas rating issued under the law of the foreign country that covers the aircraft; or
 - (ii) has successfully completed a command course for an aircraft covered by the type rating; and
 - (b) the pilot has successfully completed, after the grant of the rating or completion of the course, the flying experience mentioned in subregulation (3).
- (3) For paragraph (2)(b), the flying experience must be the more stringent of the following:
 - (a) the flying experience mentioned in subregulation (4);
 - (b) the flying experience (if any) required under the law of the foreign country.
- (4) For paragraph (3)(a), the flying experience:
 - (a) must be the number of hours and sectors mentioned in subregulation (5) in that type of aircraft; and
 - (b) must be completed as part of line operations; and
 - (c) may include experience while the pilot is flying under supervision.
- (5) For paragraph (4)(a), the number of hours and sectors is:
 - (a) either of the following:
 - (i) at least 100 hours and 10 sectors in a 120-day period;
 - (ii) at least 150 hours and 20 sectors; or
 - (b) if the aircraft operator by whom the pilot is employed holds an approval under regulation 129.020 for this paragraph that applies to the pilot—at least the applicable number of hours and sectors for the pilot stated in the approval.

Regulation 129.255

- (6) CASA may grant the approval mentioned in paragraph (5)(b) only if satisfied that there are special circumstances in relation to the operator's operation that justify the grant of the approval.
- (7) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

129.255 Foreign air transport operations—co-pilot

- (1) The operator of an aircraft contravenes this subregulation if:
 - (a) the aircraft begins a flight that is a foreign air transport operation; and
 - (b) the operator is not satisfied that the co-pilot could land the aircraft safely if the pilot in command is incapacitated.
- (2) A person commits an offence if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Part 131—Balloons and hot air airships

Table of contents

Subpart 131.A—Preliminary

- 131.005 Application of Part 131
- 131.010 Definition of *balloon transport operation*
- 131.015 Definitions of *balloon transport AOC* and *balloon transport operator*
- 131.020 Definition of *specialised balloon operation*
- 131.025 Definition of *Part 131 recreational activity*
- 131.030 Definition of *significant change*
- 131.035 Approvals by CASA for Part 131
- 131.040 Prescribed purpose—balloon transport operations
- 131.045 Prescribed position—safety manager
- 131.050 Required material—reference library
- 131.055 Issue of Manual of Standards for Part 131

Subpart 131.B—Operator certification and management

Division 131.B.1—Requirement for certification for balloon transport operations

- 131.060 Balloon transport AOC required to conduct balloon transport operations
- 131.065 Compliance with balloon transport AOC
- 131.070 Compliance with conditions of balloon transport AOC

Division 131.B.2—Balloon transport AOCs

- 131.075 Application for balloon transport AOC
- 131.080 Conditions for issue of balloon transport AOC
- 131.085 Approval of exposition
- 131.090 Conditions of balloon transport AOCs

Division 131.B.3—Changes relating to balloon transport operators

- 131.095 Changes of name etc.
- 131.100 Application for approval of significant changes
- 131.105 Approval of significant changes
- 131.110 Changes must be made in accordance with process in exposition
- 131.115 CASA directions relating to exposition or key personnel

Division 131.B.4—Organisation and personnel

- 131.120 Organisation and personnel
- 131.125 Key personnel cannot carry out responsibilities
- 131.130 Familiarisation training for key personnel
- 131.135 Chief executive officer—experience
- 131.140 Chief executive officer—responsibilities and accountabilities
- 131.145 Head of flying operations—qualifications and experience
- 131.150 Head of flying operations—responsibilities
- 131.155 Head of training and checking—qualifications and experience
- 131.160 Head of training and checking—responsibilities

-
- 131.165 Safety manager—experience
 - 131.170 Safety manager—responsibilities
 - 131.175 Key personnel—additional qualification and experience requirements

Division 131.B.5—Systems

- 131.180 Safety management system requirements
- 131.185 Training and checking system
- 131.190 Fatigue management system

Division 131.B.6—Expositions for balloon transport operators

- 131.195 Content of exposition
- 131.200 Compliance with exposition by operator
- 131.205 Providing personnel with exposition
- 131.210 Compliance with exposition by personnel

Division 131.B.7—Records and documents

- 131.215 Personnel training and checking records—making records
- 131.220 Personnel training and checking records—availability of records
- 131.225 Copies of balloon flight crew licences and medical certificates
- 131.230 Retention periods for personnel records

Division 131.B.8—Miscellaneous offences

- 131.235 Dealings in relation to cancelled, suspended, varied, pending or refused civil aviation authorisations
- 131.240 Maximum period for use of foreign registered Part 131 aircraft in Australian territory

Subpart 131.C—General**Division 131.C.1—General flight limitations**

- 131.245 Pilots must be authorised
- 131.250 Simulation of emergency or abnormal situations

Division 131.C.2—Operational documents

- 131.255 Compliance with flight manual
- 131.260 Availability of checklists

Division 131.C.3—Flight related documents

- 131.265 Electronic documents
- 131.270 Availability of parts of exposition
- 131.275 Carriage of documents
- 131.280 Keeping documents with a person on the ground during flight

Division 131.C.4—Reporting and recording information

- 131.285 Reporting and recording information

Division 131.C.5—Search and rescue services and emergency and survival equipment

- 131.290 Information about search and rescue services
- 131.295 Information about emergency and survival equipment

Division 131.C.6—Miscellaneous requirements

- 131.300 Competence of ground support personnel
- 131.305 Flights over populous areas, public gatherings and other areas
- 131.310 Dropping things from aircraft
- 131.315 Flights at night
- 131.320 Use of supplemental oxygen equipment etc.
- 131.325 Specialised balloon operations
- 131.330 Additional requirements for specialised balloon operations

Subpart 131.D—Operational procedures

Division 131.D.1—Operational control

Division 131.D.2—Flight preparation

- 131.340 Flight preparation requirements

Division 131.D.3—Flight notifications and pre-flight checks

- 131.345 Balloon flight notification requirements
- 131.350 Matters to be checked before take-off

Division 131.D.4—Flight rules

Subdivision 131.D.4.1—General

- 131.353 Air traffic services—prescribed requirements
- 131.354 Use of radio—broadcasts and reports
- 131.355 Additional right of way rules
- 131.360 Operations at non-controlled aerodromes
- 131.365 Flights over water

Subdivision 131.D.4.2—Visual flight rules

- 131.367 VFR flights

Division 131.D.5—Taking off, landing and ground operations

- 131.370 Procedures for safety during ground operations
- 131.375 Operation of Part 131 aircraft while tethered

Division 131.D.6—Fuel requirements

- 131.380 Fuel and ballast procedures
- 131.385 Fuel and ballast requirements

Division 131.D.7—Safety of persons on aircraft and cargo requirements

- 131.390 Smoking not permitted during flight or within 15 metres of Part 131 aircraft
 - 131.395 Certain Part 131 aircraft to have signage about smoking
 - 131.400 Carriage of infants
 - 131.405 Carriage of persons requiring assistance
 - 131.410 Passengers—safety briefings and instructions
 - 131.415 Safety briefing in the event of an emergency
 - 131.420 Passengers—compliance with safety directions
 - 131.425 Restraint of cargo
-

131.430 Procedures relating to carriage of animals

Division 131.D.8—Miscellaneous

131.435 Training flight limitations

131.440 Test flights

Subpart 131.F—Performance

131.445 Loading weights

131.455 Carriage of passengers

Subpart 131.K—Equipment

131.460 Requirements relating to equipment

Subpart 131.M—Continuing airworthiness

Subpart 131.N—Flight crew

131.565 Qualifications and training for pilots

Subpart 131.P—Other operational safety-critical personnel

Division 131.P.1—Ground support personnel

131.570 Qualifications and training for ground support personnel

Division 131.P.2—Other operational support personnel

Subpart 131.R—Part 131 recreational activities

131.580 Part 131 recreational activities must be authorised

131.585 Procedures for carrying hang gliders

Subpart 131.S—Balloon flight crew licensing

Subpart 131.Z—Tethered gas balloons

131.685 Approval required to operate

131.690 Compliance with Part 131 Manual of Standards

131.695 Operation under cloud

131.700 Operation at night

131.705 Rapid deflation device required

131.710 What to do if balloon escapes

Subpart 131.A—Preliminary

131.005 Application of Part 131

- (1) This Part (other than Subpart 131.Z) applies in relation to Part 131 aircraft.
- (2) A **Part 131 aircraft** is any of the following:
 - (a) a manned free balloon;
 - (b) a hot air airship.
- (3) Subpart 131.Z applies in relation to a tethered gas balloon that:
 - (a) is equipped to carry one or more persons; and
 - (b) is permanently tethered.

131.010 Definition of *balloon transport operation*

An operation is a **balloon transport operation** if the operation is:

- (a) a passenger transport operation conducted using a Part 131 aircraft that is a registered aircraft or a foreign registered aircraft; and
- (b) conducted for hire or reward; and
- (c) undertaken wholly within Australia; and
- (d) not undertaken as part of a flight into or out of Australian territory.

131.015 Definitions of *balloon transport AOC* and *balloon transport operator*

- (1) A **balloon transport AOC** means an AOC that authorises the operation of a Part 131 aircraft for a balloon transport operation.
- (2) A **balloon transport operator** means a person who holds a balloon transport AOC.

131.020 Definition of *specialised balloon operation*

An operation is a **specialised balloon operation** if the operation:

- (a) is conducted using a Part 131 aircraft; and
- (b) is not a balloon transport operation; and
- (c) involves one or more of the following:
 - (i) specialised instruments, indicators, items of equipment or systems that affect the flight characteristics of the aircraft and that are fitted to, or carried on, the aircraft;
 - (ii) carrying a load (other than a hang glider) outside the aircraft;
 - (iii) operating the aircraft for advertising, or making a film or television production, solely or predominantly for hire or reward;
 - (iv) a flight into or out of Australian territory;

- (v) an activity prescribed by the Part 131 Manual of Standards for the purposes of this subparagraph.

131.025 Definition of *Part 131 recreational activity*

- (1) A ***Part 131 recreational activity*** means operating a Part 131 aircraft other than for one of the following:
 - (a) a balloon transport operation;
 - (b) a specialised balloon operation;
 - (c) balloon flying training (within the meaning of subregulation 5.01(1) of CAR) for the grant of a balloon flight crew licence (within the meaning of that subregulation) or a balloon flight crew rating (within the meaning of that subregulation).
- Note: Balloon flying training for any of these purposes is a prescribed purpose under paragraph 206(a) of CAR which means an AOC is required to conduct this training. Balloon flying training conducted for other purposes is a Part 131 recreational activity.
- (2) Despite subsection (1), a ***Part 131 recreational activity*** does not include operating a Part 131 aircraft in any circumstances prescribed by the Part 131 Manual of Standards for the purposes of this subregulation.

131.030 Definition of *significant change*

A ***significant change***, for a balloon transport operator, means:

- (a) a change in relation to any of the following:
 - (i) the location and operation of the operator's main operating bases, including the opening or closing of main operating bases;
 - (ii) the operator's key personnel;
 - (iii) a person authorised to carry out the responsibilities of any of the key personnel if the position holder is absent from the position or cannot carry out the responsibilities of the position;
 - (iv) the formal reporting lines for a managerial or operational position with safety functions and responsibilities that reports directly to any of the key personnel;
 - (v) the operator's process for making changes that relate to the safe conduct and management of the operator's balloon transport operations;
 - (vi) the kinds of balloon transport operations the operator is authorised to conduct under the operator's balloon transport AOC;
 - (vii) the operator's areas of operation, including beginning to operate in a new area;
 - (viii) the classes of Part 131 aircraft used in the operator's balloon transport operations, including the addition of a new class; or
- (b) a change in relation to any of the following that does not maintain or improve, or is not likely to maintain or improve, aviation safety:

Regulation 131.035

- (i) the plans, processes, procedures, programs and systems for the safe conduct and management of the operator's balloon transport operations;
 - (ii) the qualifications, experience and responsibilities required by the operator for any of the operator's key personnel;
 - (iii) any other aeronautical or aviation safety related services provided to the operator by third parties;
 - (iv) any change to the registration of a Part 131 aircraft used in the operator's balloon transport operations;
 - (v) any leasing or other arrangements for the supply of a Part 131 aircraft used in the operator's balloon transport operations; or
- (c) a change required to be approved by CASA under these Regulations, other than a change that results in the reissue or replacement of an instrument previously issued by CASA in which the conditions or other substantive content of the instrument are unchanged.

131.035 Approvals by CASA for Part 131

- (1) If a provision of this Part, or of the Part 131 Manual of Standards, refers to a person holding an approval under this regulation, the person may apply to CASA, in writing, for the approval.
- (2) Subject to regulation 11.055, CASA must grant the approval.
- (3) Subregulation 11.055(1B) applies to the granting of an approval under this regulation for paragraph 131.145(2)(a).

131.040 Prescribed purpose—balloon transport operations

For the purposes of subsection 27(9) of the Act, the flying or operation of a Part 131 aircraft for a balloon transport operation is a prescribed purpose.

131.045 Prescribed position—safety manager

Note: This regulation heading is reserved for future use.

131.050 Required material—reference library

- (1) For the purposes of paragraph 28BH(2)(b) of the Act, the following material is required for a balloon transport operator:
 - (a) the civil aviation legislation that is relevant to the operator's balloon transport operations;
 - (b) the parts of the AIP that are relevant to the operations;
 - (c) all information about the flight operations of each class of Part 131 aircraft operated by the operator for the operations that is necessary to ensure the safe conduct of the operations;
 - (d) any other publications, information or data required for the reference library by the operator's exposition.

Regulation 131.055

- (2) To avoid doubt, if material is required under subregulation (1), the requirement is taken to be satisfied if an electronic copy of the material is readily available.

131.055 Issue of Manual of Standards for Part 131

For the purposes of subsection 98(5A) of the Act, CASA may issue a Manual of Standards for this Part prescribing matters:

- (a) required or permitted by these Regulations to be prescribed by the Part 131 Manual of Standards; or
- (b) necessary or convenient to be prescribed for carrying out or giving effect to this Part.

Subpart 131.B—Operator certification and management

Division 131.B.1—Requirement for certification for balloon transport operations

131.060 Balloon transport AOC required to conduct balloon transport operations

- (1) A person contravenes this subregulation if:
 - (a) the person conducts a balloon transport operation; and
 - (b) the person does not hold a balloon transport AOC that authorises the person to conduct the operation.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

131.065 Compliance with balloon transport AOC

- (1) A person contravenes this subregulation if:
 - (a) the person conducts a balloon transport operation; and
 - (b) the person:
 - (i) holds a balloon transport AOC that authorises the person to conduct the balloon transport operation; but
 - (ii) conducts the operation in a way that contravenes the AOC.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

131.070 Compliance with conditions of balloon transport AOC

- (1) A balloon transport operator contravenes this subregulation if the operator contravenes a condition of the operator's balloon transport AOC.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 131.B.2—Balloon transport AOCs

131.075 Application for balloon transport AOC

- (1) A person may apply to CASA for the issue of a balloon transport AOC.
- (2) The application must include the following:
 - (a) the applicant's name (including any operating or trading name), contact details and ABN (if any);
 - (b) if the address of the applicant's operational headquarters is different from the applicant's mailing address—the address of the applicant's operational headquarters;
 - (c) if the applicant is an individual—a statement that the individual is, or proposes to be, the applicant's chief executive officer;
 - (d) if the applicant is a corporation—the name of each of the directors of the corporation;
 - (e) if the applicant is a corporation registered in Australia that has an ACN—its ACN and the address of its registered office;
 - (f) if the applicant is a corporation not registered in Australia—the place it was incorporated or formed;
 - (g) details of the balloon transport operations covered by the application;
 - (h) a written undertaking that, if CASA issues the certificate, the organisation established by the applicant to conduct the applicant's proposed balloon transport operations (the *applicant's organisation*) will:
 - (i) be capable of operating in accordance with its exposition and the civil aviation legislation; and
 - (ii) operate in accordance with its exposition and the civil aviation legislation.

Note: For additional rules in relation to AOCs, see Division 2 of Part III of the Act.

- (3) The application must be:
 - (a) accompanied by a copy of the applicant's proposed exposition; and
 - (b) signed by the person appointed, or proposed to be appointed, as the chief executive officer of the applicant's organisation.

131.080 Conditions for issue of balloon transport AOC

- (1) It is a condition for the issue to the applicant of a balloon transport AOC that CASA is satisfied of each of the following:
 - (a) the applicant's proposed exposition complies with regulation 131.195;
 - (b) the applicant can conduct balloon transport operations safely and in accordance with its exposition and the civil aviation legislation;
 - (c) if the applicant is an individual—the applicant:
 - (i) is a fit and proper person to be issued a balloon transport AOC; and

Regulation 131.080

- (ii) is, or proposes to be, the chief executive officer of the organisation established, or proposed to be established, by the applicant to conduct the applicant's proposed balloon transport operations;
- (d) if the applicant is a corporation—each director of the corporation is a fit and proper person to be a director of a corporation that is issued a balloon transport AOC;
- (e) each of the applicant's proposed key personnel:
 - (i) is a fit and proper person to be appointed to the position; and
 - (ii) has the qualifications and experience required under Division 131.B.4 for the position; and
 - (iii) has the additional qualifications and experience required by CASA under regulation 131.175 for the position (if any); and
 - (iv) has the qualifications and experience required by the applicant under subparagraph 131.195(1)(e)(i) for the position (if any);
- (f) the applicant's arrangements for managing the continuing airworthiness of each class of Part 131 aircraft the applicant proposes to operate in its balloon transport operations comply with Part 4 of CAR.

Note: These matters are in addition to the matters specified in section 28 (CASA must issue AOC if satisfied about certain matters) of the Act.

- (2) For the purposes of paragraph (1)(b), without limiting the matters that CASA may consider, CASA must consider the following:
 - (a) the applicant's proposed exposition;
 - (b) whether the applicant can comply with the proposed exposition;
 - (c) the content of the undertaking mentioned in paragraph 131.075(2)(h);
 - (d) details of, and reasons for, any suspension or cancellation of:
 - (i) a civil aviation authorisation issued to the applicant; or
 - (ii) an equivalent authorisation issued to the applicant under the law of a foreign country or by a multinational aviation authority;
 - (e) the suitability of the applicant's corporate and organisational structures for the operations;
 - (f) any other information:
 - (i) accompanying the application; or
 - (ii) in any other document given to CASA by the applicant for the application, including any document requested by CASA in relation to the application.
- (3) For the purposes of paragraphs (1)(c) to (e), the matters CASA may consider in deciding whether a person is a fit and proper person include the following:
 - (a) the person's criminal record (if any), whether in Australia or a foreign country;
 - (b) the person's bankruptcy (if any), whether in Australia or a foreign country;
 - (c) the person's history (if any) of serious behavioural problems;
 - (d) any information held or obtained by CASA that the person has contravened:
 - (i) the civil aviation legislation; or

- (ii) another law, whether in Australia or a foreign country, relating to transport (including aviation) safety or safety in any other safety-critical industry;
- (e) the person's demonstrated attitude towards compliance with regulatory requirements, in Australia or a foreign country, relating to transport (including aviation) safety;
- (f) the record of compliance with regulatory requirements, in Australia or a foreign country, relating to transport (including aviation) safety of any corporation or other body in which the person:
 - (i) is or was a director or partner (however described); or
 - (ii) holds or held a position equivalent to any of the applicant's key personnel;
- (g) for any corporation in which the person is or was a director, or holds or held a position equivalent to any of the applicant's key personnel, in Australia or a foreign country—the following records:
 - (i) the corporation's criminal record (if any);
 - (ii) the corporation's record of insolvency, receivership or winding up (if any);
 - (iii) the corporation's record (if any) as a body subject to investigation or comment by a statutory authority that regulates the share dealings by, or financial affairs of, corporations;
- (h) any other matter relating to the fitness of the person to:
 - (i) for an applicant—hold a balloon transport AOC; or
 - (ii) for a director or proposed director—be a director of a corporation that holds a balloon transport AOC.

131.085 Approval of exposition

If CASA issues a balloon transport AOC to an applicant, CASA is taken to have also approved the applicant's proposed exposition.

131.090 Conditions of balloon transport AOCs

For the purposes of paragraph 28BA(1)(b) of the Act, each of the following is a condition of a balloon transport AOC issued to an operator:

- (a) the operator must comply with each direction given to the operator, or obligation imposed on the operator, by CASA under a provision of these Regulations;
- (b) each of the operator's key personnel must comply with:
 - (i) each provision of this Part that applies to the person; and
 - (ii) each direction given to the person, or obligation imposed on the person, by CASA under a provision of these Regulations; and
 - (iii) each other provision of the civil aviation legislation that applies to the operator's operations under the AOC;
- (c) each of the positions of the operator's key personnel must be filled;

Regulation 131.090

- (d) each of the operator's personnel must comply with each provision of the civil aviation legislation that applies to the operator's operations under the AOC;
- (e) if the operator is an individual—the individual must be the chief executive officer of the operator's organisation;
- (f) for each Part 131 aircraft operated by the operator under the AOC, the operator must:
 - (i) be the registered operator of the aircraft; or
 - (ii) hold an approval under regulation 131.035 for this subparagraph for the aircraft.

Division 131.B.3—Changes relating to balloon transport operators

131.095 Changes of name etc.

- (1) A balloon transport operator contravenes this subregulation if the operator:
 - (a) makes a change mentioned in subregulation (2); and
 - (b) does not, before making the change:
 - (i) amend the operator's exposition to reflect the change; and
 - (ii) give CASA written notice of the change and a copy of the amended part of the exposition clearly identifying the change.
- (2) For the purposes of paragraph (1)(a), the changes are the following:
 - (a) a change to the operator's name (including any operating or trading name) or contact details;
 - (b) if the address of the operator's operational headquarters is different from the operator's mailing address—a change to the address of the operator's operational headquarters.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

131.100 Application for approval of significant changes

- (1) A balloon transport operator contravenes this subregulation if:
 - (a) the operator makes a significant change other than a significant change mentioned in subregulation (2); and
 - (b) CASA has not approved the significant change.
- (2) A balloon transport operator contravenes this subregulation if:
 - (a) the operator makes a significant change that is the permanent appointment, or the acting appointment (for a period of greater than 35 days), as any of the operator's key personnel of a person previously authorised to carry out the responsibilities of the position in a circumstance mentioned in subparagraph 131.195(1)(e)(iv); and
 - (b) the operator does not apply to CASA for approval of the change, in accordance with subregulation (3), within 7 days after the change is made.
- (3) An application for approval of a significant change must:
 - (a) be in writing; and
 - (b) set out the change; and
 - (c) be accompanied by a copy of the part of the operator's exposition affected by the change, clearly identifying the change.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Regulation 131.105

Penalty: 50 penalty units.

131.105 Approval of significant changes

- (1) CASA may approve a significant change for a balloon transport operator only if satisfied that the requirements mentioned in section 28 of the Act and subregulation 131.080(1) will continue to be met.
- (2) If CASA approves the significant change, CASA is taken to have also approved the changes to the operator's exposition covered by the application for the change.

131.110 Changes must be made in accordance with process in exposition

- (1) A balloon transport operator contravenes this subregulation if:
 - (a) the operator makes a change; and
 - (b) the change is not made in accordance with the process included in the operator's exposition in accordance with paragraph 131.195(1)(m).
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

131.115 CASA directions relating to exposition or key personnel

- (1) If CASA is satisfied that it is necessary in the interests of aviation safety, CASA may, by written notice given to a balloon transport operator, direct the operator to change its exposition:
 - (a) to remove particular information, procedures or instructions from the exposition; or
 - (b) to include particular information, procedures or instructions in the exposition; or
 - (c) to revise or vary the information, procedures or instructions in the exposition.
- (2) CASA may, by written notice given to a balloon transport operator, direct the operator to remove any of the operator's key personnel from the person's position if satisfied that the person is not:
 - (a) carrying out the responsibilities of the position; or
 - (b) if the person is the chief executive officer—properly managing matters for which the person is accountable.
- (3) A notice under this regulation must state the period within which the direction must be complied with.
- (4) A balloon transport operator contravenes this subregulation if:
 - (a) CASA gives the operator a direction under this regulation; and

- (b) the operator does not comply with the direction within the period stated in the notice.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (4).

Penalty: 50 penalty units.

Division 131.B.4—Organisation and personnel

131.120 Organisation and personnel

- (1) A balloon transport operator must maintain an organisational structure that effectively manages its balloon transport operations, taking into account the size, nature and complexity of the operations.
- (2) A balloon transport operator contravenes this subregulation if any of the operator's key personnel carries out a responsibility of the person's position in a way that contravenes the operator's exposition or this Part.
- (3) A person commits an offence if the person contravenes subregulation (2).

Penalty: 50 penalty units.

131.125 Key personnel cannot carry out responsibilities

- (1) A balloon transport operator contravenes this subregulation if:
 - (a) the operator becomes aware that any of its key personnel cannot carry out, or is likely to be unable to carry out, the person's responsibilities for a period of longer than 35 days; and
 - (b) the operator does not tell CASA of that fact within the time mentioned in subregulation (2).
- (2) For the purposes of paragraph (1)(b), the time is:
 - (a) if there is not another person authorised to carry out the responsibilities for all or part of the period—24 hours after the operator becomes aware of the matter; and
 - (b) if there is another person authorised to carry out the responsibilities for all or part of the period—3 days after the operator becomes aware of the matter.
- (3) A person commits an offence if the person contravenes subregulation (1).

Penalty: 50 penalty units.

131.130 Familiarisation training for key personnel

A balloon transport operator must ensure that, before a person appointed as any of the operator's key personnel begins to carry out the responsibilities of the position, the person has completed any training that is necessary to familiarise the person with the responsibilities.

131.135 Chief executive officer—experience

- (1) The chief executive officer of a balloon transport operator must have the experience required under subregulation (2).

- (2) The experience required is:
 - (a) if the operator holds an approval under regulation 131.035—the experience mentioned in the approval; or
 - (b) if paragraph (a) does not apply—the experience mentioned in paragraphs (3)(a) and (b).
- (3) The experience is the following:
 - (a) sufficient relevant experience in organisational, operational, financial and people management of air operations to capably lead, manage and set standards to enable the operator to conduct safe operations in accordance with the operator’s exposition and the civil aviation legislation;
 - (b) a satisfactory record in the conduct or management of air operations.

131.140 Chief executive officer—responsibilities and accountabilities

- (1) The chief executive officer of a balloon transport operator’s organisation is responsible for the following:
 - (a) ensuring that, for the safe conduct of the operator’s balloon transport operations in accordance with the operator’s balloon transport AOC and exposition and the civil aviation legislation, the operator:
 - (i) has sufficient suitably experienced, qualified and competent personnel; and
 - (ii) has a suitable management structure; and
 - (iii) is adequately financed and resourced;
 - (b) ensuring that the operator:
 - (i) complies with the civil aviation legislation; and
 - (ii) implements and manages the operator’s safety management system (if any); and
 - (iii) has procedures that ensure that all of the operator’s personnel understand the operator’s safety policy; and
 - (iv) sets and maintains standards for flight and ground operations; and
 - (v) tells CASA if the operator becomes aware that a leasing, financing or other arrangement for the supply of a Part 131 aircraft that the operator operates under the operator’s balloon transport AOC may affect the operator’s safe conduct of the operator’s balloon transport operations; and
 - (vi) for each Part 131 aircraft that is a registered foreign aircraft (if any) used in the operator’s balloon transport operations—maintains the aircraft in accordance with the law of the country in which the aircraft is registered;
 - (c) establishing and regularly reviewing the operator’s safety performance indicators and targets (if any);
 - (d) ensuring that the operator’s exposition is monitored and managed for continuous improvement;

Regulation 131.145

- (e) ensuring that training and checking of the operator's operational safety-critical personnel (other than flight crew) conducted by or for the operator are conducted in accordance with the operator's exposition;
 - (f) ensuring that key personnel satisfactorily carry out the responsibilities of their positions in accordance with the operator's exposition and the civil aviation legislation.
- (2) The chief executive officer of a balloon transport operator's organisation is accountable to the operator and CASA for ensuring the responsibilities mentioned in subregulation (1) are carried out effectively.

131.145 Head of flying operations—qualifications and experience

- (1) The head of flying operations of a balloon transport operator must:
- (a) hold a commercial pilot (balloon) licence endorsed for the classes of Part 131 aircraft to be used in the operator's balloon transport operations; and
 - (b) have the experience required under subregulation (2); and
 - (c) have a satisfactory record in the conduct or management of balloon transport operations; and
 - (d) have sufficient safety and regulatory knowledge to enable the operator to conduct the operator's balloon transport operations safely and in accordance with the operator's exposition and the civil aviation legislation.
- (2) The experience required is:
- (a) if the operator holds an approval under regulation 131.035—the experience mentioned in the approval; or
 - (b) if paragraph (a) does not apply—both of the following:
 - (i) at least 250 hours flight time as the pilot in command of a Part 131 aircraft;
 - (ii) at least 2 years' experience in the conduct of Part 131 aircraft operations.
- (3) CASA may, by written notice given to the head of flying operations, or proposed head of flying operations, of a balloon transport operator, direct the person to undertake an assessment mentioned in subregulation (4).
- (4) The assessment:
- (a) is an assessment conducted by CASA, or a person nominated by CASA, to demonstrate the head of flying operation's or proposed head of flying operation's suitability as head of flying operations for the operator; and
 - (b) may include a free flight assessment in a Part 131 aircraft.

131.150 Head of flying operations—responsibilities

- (1) The head of flying operations of a balloon transport operator must safely manage the flying operations of the operator.

- (2) Without limiting subregulation (1), the responsibilities of the head of flying operations include the following:
- (a) monitoring and maintaining, and reporting to the chief executive officer on, the operator's compliance with the provisions of the civil aviation legislation and the operator's exposition that apply to flying operations;
 - (b) ensuring that the operator's flight crew members are provided with the information and documentation necessary to properly carry out their responsibilities;
 - (c) ensuring the proper allocation and deployment of the operator's Part 131 aircraft, and the operator's personnel, for use in the operator's balloon transport operations;
 - (d) ensuring that the operator complies with section 28BH (Reference library) of the Act in relation to flight crew members;
 - (e) ensuring that training and checking of flight crew conducted by or for the operator is conducted in accordance with the operator's exposition;
 - (f) if the operator has a contract with a Part 142 operator for the Part 142 operator to conduct training or checking for the operator's flight crew:
 - (i) ensuring that each person who conducts the training or checking for the Part 142 operator is authorised under these Regulations to conduct the activities involved in the training or checking; and
 - (ii) telling the Part 142 operator, in writing, of any change in the balloon transport operator's exposition relating to the training and checking activities the Part 142 operator conducts under the contract.

131.155 Head of training and checking—qualifications and experience

Note: This regulation heading is reserved for future use.

131.160 Head of training and checking—responsibilities

Note: This regulation heading is reserved for future use.

131.165 Safety manager—experience

Note: This regulation heading is reserved for future use.

131.170 Safety manager—responsibilities

Note: This regulation heading is reserved for future use.

131.175 Key personnel—additional qualification and experience requirements

- (1) This regulation applies to:
- (a) an applicant for a balloon transport AOC; and
 - (b) a balloon transport operator.
- (2) CASA may, by written notice given to the applicant or operator, direct that any of the key personnel of the applicant or operator must have stated additional qualifications or experience to those otherwise required under this Part.

Regulation 131.175

- (3) If CASA is satisfied that it is necessary in the interests of aviation safety, CASA may, by written notice given to a person who is, or is proposed to be, any of the key personnel of the applicant or operator, direct the person:
- (a) to undertake a stated examination; or
 - (b) to be interviewed by CASA; or
 - (c) to complete a stated training course.
- (4) In deciding whether to give a direction under this regulation, CASA must have regard to, but is not limited to considering, the following:
- (a) the need to ensure that the applicant or operator can conduct balloon transport operations safely and in accordance with its exposition and the civil aviation legislation;
 - (b) the nature and complexity of the operations;
 - (c) the leadership, management and standards-setting skills required by the person for the operations;
 - (d) how recently the person has used the person's aviation skills;
 - (e) whether the person is able to exercise the privileges of each civil aviation authorisation held by the person.

Division 131.B.5—Systems

131.180 Safety management system requirements

Note: This regulation heading is reserved for future use.

131.185 Training and checking system

Note: This regulation heading is reserved for future use.

131.190 Fatigue management system

A balloon transport operator must have a system for managing crew fatigue that complies with the requirements prescribed by the Part 131 Manual of Standards.

Division 131.B.6—Expositions for balloon transport operators

131.195 Content of exposition

- (1) An exposition for a balloon transport operator must include the following:
 - (a) the operator's name (including any operating or trading name), contact details and ABN (if any);
 - (b) the address of:
 - (i) the operator's operational headquarters; and
 - (ii) each of the operator's main operating bases; and
 - (iii) each of the operator's operational facilities;
 - (c) a description and diagram of the operator's organisational structure showing formal reporting lines, including the formal reporting lines for each of the key personnel;
 - (d) if the operator is a corporation—a description of the operator's corporate structure;
 - (e) for each of the key personnel, the following information:
 - (i) the qualifications and experience (if any) required by the operator for the position in addition to the qualifications and experience required under Division 131.B.4 for the position;
 - (ii) each matter (if any) for which the holder of the position is responsible in addition to the responsibilities mentioned in Division 131.B.4 for the position;
 - (iii) the name of the person appointed to the position;
 - (iv) the name of each person authorised to carry out the responsibilities of the position when the position holder is absent from the position or cannot carry out the responsibilities;
 - (v) a description of how the operator will manage the responsibilities of the position during a circumstance mentioned in subparagraph (iv);
 - (f) each matter (if any) for which the chief executive officer is responsible and accountable in addition to the matters mentioned in regulation 131.140;
 - (g) an outline of the balloon transport operations conducted by the operator under the operator's balloon transport AOC including the areas of operation;
 - (h) details of each plan, process, procedure, program and system implemented by the operator to safely conduct and manage the operator's balloon transport operations in compliance with the civil aviation legislation;
 - (i) for each Part 131 aircraft registered in Australia—its class and model and registration mark;
 - (j) for each Part 131 aircraft that is a foreign registered aircraft—its class and model, nationality and registration mark;
 - (k) a description of the arrangements for managing the continuing airworthiness of the operator's Part 131 aircraft;

- (l) a description of any leasing or other arrangements for the supply of Part 131 aircraft as the arrangements relate to the operational control or continuing airworthiness of the aircraft, or to any other safety matter;
- (m) a description of the operator's process for making changes, including:
 - (i) identifying changes that are significant changes; and
 - (ii) identifying changes that are not significant changes; and
 - (iii) telling CASA and the operator's personnel of the changes;
- (n) a description of anything else required to be approved by CASA under these Regulations in relation to the operations mentioned in paragraph (g);
- (o) any other matter required to be included in the exposition under these Regulations.

Note: The plans, processes, procedures, programs and systems mentioned in paragraph (h) may be set out in one or more operator manuals.

- (2) A balloon transport operator contravenes this subregulation if the operator's exposition does not comply with subregulation (1).
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

131.200 Compliance with exposition by operator

- (1) A balloon transport operator contravenes this subregulation if the operator does not meet a requirement of the operator's exposition.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

131.205 Providing personnel with exposition

- (1) A balloon transport operator contravenes this subregulation if:
 - (a) a person who is a member of the operator's personnel is subject to a requirement under the operator's exposition; and
 - (b) the operator does not make the part of the exposition that relates to the requirement available to the person before the person first begins carrying out the person's duties relating to the requirement.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

131.210 Compliance with exposition by personnel

- (1) A member of a balloon transport operator's personnel contravenes this subregulation if:

Part 131 Balloons and hot air airships

Subpart 131.B Operator certification and management

Division 131.B.6 Expositions for balloon transport operators

Regulation 131.210

- (a) the member is subject to a requirement under the operator's exposition in relation to the safe conduct of the operator's balloon transport operations; and
 - (b) the member does not meet the requirement.
- (2) A balloon transport operator contravenes this subregulation if:
- (a) a member of the operator's personnel is subject to a requirement under the operator's exposition in relation to the safe conduct of the operator's balloon transport operations; and
 - (b) the member does not meet the requirement.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

Division 131.B.7—Records and documents

131.215 Personnel training and checking records—making records

- (1) A balloon transport operator contravenes this subregulation if:
 - (a) a person who is a member of the operator’s personnel undertakes an activity, obtains a qualification or certificate or gains flying experience; and
 - (b) the activity, qualification, certificate or flying experience is mentioned for the person in subregulation (2); and
 - (c) the following records are not made within 21 days after the person undertakes the activity, obtains the qualification or certificate or gains the flying experience:
 - (i) when the activity was undertaken, the qualification or certificate obtained or the flying experience gained;
 - (ii) if the activity was training or a check, flight test, flight review or assessment of competency—whether the training, check, flight test, flight review or assessment was successfully completed.
- (2) The activities, qualifications, certificates and flying experience for the person are the following:
 - (a) for a flight crew member of the operator’s personnel:
 - (i) training, or a check, flight test, flight review or assessment of competency under Subpart 131.N; or
 - (ii) a qualification or certificate under Subpart 131.N; or
 - (iii) flying experience under Subpart 131.N; or
 - (iv) training or education in the operator’s safety management system (if any);
 - (b) for a member of the operator’s operational safety-critical personnel (other than a flight crew member)—training or education in the operator’s safety management system (if any);
 - (c) for a member of the operator’s personnel who performs ground support duties—any training;
 - (d) for a member of the operator’s personnel not mentioned in paragraph (a), (b) or (c)—training or education in the operator’s safety management system (if any).
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

131.220 Personnel training and checking records—availability of records

- (1) A balloon transport operator contravenes this subregulation if:
 - (a) the operator makes a record about a person under regulation 131.215; and
-

Regulation 131.225

- (b) the person requests that the record be made available to the person; and
 - (c) the operator does not make the record available to the person within 7 days after receiving the request.
- (2) A balloon transport operator contravenes this subregulation if:
- (a) a record is made under regulation 131.215; and
 - (b) the operator receives a request from another balloon transport operator for a copy of the record; and
 - (c) the operator holds a written authority from the person to whom the record relates to provide a copy of the person's records to another balloon transport operator if requested; and
 - (d) the operator does not give a copy of the record to the other balloon transport operator within 7 days after receiving the request.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

131.225 Copies of balloon flight crew licences and medical certificates

- (1) A balloon transport operator contravenes this subregulation if:
- (a) a person who is a flight crew member of the operator's personnel exercises a privilege of the person's balloon flight crew licence for the operator; and
 - (b) the operator does not have the following:
 - (i) a copy of the person's balloon flight crew licence;
 - (ii) a copy of the person's medical certificate.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

131.230 Retention periods for personnel records

- (1) A balloon transport operator contravenes this subregulation if:
- (a) the operator is required, under this Part, to make or have a record of a kind mentioned in column 1 of an item of the following table about a person who is a member of the operator's personnel; and
 - (b) the operator does not keep the record for at least the period mentioned in column 2 of the item.

Retention periods—personnel records

Item	Column 1 Kind of record	Column 2 Minimum period for which the record must be kept
1	A record required under regulation 131.215 for a flight crew	The period beginning when the record is created and ending 5 years after the member

Regulation 131.230

Retention periods—personnel records

Item	Column 1 Kind of record	Column 2 Minimum period for which the record must be kept
	member	ceases to be a member of the operator's personnel
2	A record required under regulation 131.215 for a member of the operator's personnel who performs ground support duties	The period beginning when the record is created and ending 1 year after the member ceases to be a member of the operator's personnel
3	A copy of a flight crew member's balloon flight crew licence and medical certificate required by regulation 131.225	The period during which the member is exercising the privileges of the licence for the operator

(2) A person commits an offence of strict liability if the person contravenes
subregulation (1).

Penalty: 50 penalty units.

Division 131.B.8—Miscellaneous offences

131.235 Dealings in relation to cancelled, suspended, varied, pending or refused civil aviation authorisations

Requirement for approval

- (1) A balloon transport operator contravenes this subregulation if:
 - (a) the operator enters into an agreement with another person; and
 - (b) the operator does an act mentioned in subregulation (2), (4), (6) or (8); and
 - (c) the operator does not hold an approval under regulation 131.035 to do the act.

Acts in relation to cancelled authorisations

- (2) For the purposes of paragraph (1)(b), the acts are the following:
 - (a) to use, in a balloon transport operation, a Part 131 aircraft the operation of which was authorised by a cancelled authorisation;
 - (b) to employ a person, in connection with a balloon transport operation, who was, at the time of the cancellation of a cancelled authorisation, employed in connection with an operation that was authorised by the cancelled authorisation;
 - (c) to conduct an operation, or part of an operation, that was authorised by a cancelled authorisation.

Acts in relation to suspended or varied authorisations

- (3) Subregulation (4) applies in relation to an authorisation that has been suspended or varied other than on the application or request of the holder of the authorisation.
- (4) For the purposes of paragraph (1)(b), the acts are the following:
 - (a) to use, in a balloon transport operation, a Part 131 aircraft the operation of which:
 - (i) was, immediately before the suspension or variation, authorised by the authorisation; but
 - (ii) is no longer authorised by the authorisation as suspended or varied;
 - (b) to employ a person, in connection with a balloon transport operation, who was, at the time of the suspension or variation, employed in connection with an operation that:
 - (i) was, immediately before the suspension or variation, authorised by the authorisation; but
 - (ii) is no longer authorised by the authorisation as suspended or varied;
 - (c) to conduct an operation, or part of an operation, that:
 - (i) was, immediately before the suspension or variation, authorised by the authorisation; but

(ii) is no longer authorised by the authorisation as suspended or varied.

Note: See section 28BB (CASA may impose and vary AOC conditions) of the Act in relation to varying AOC conditions.

Pending applications for authorisations

- (5) Subregulation (6) applies in relation to an application for a civil aviation authorisation that has not been finally determined by CASA.
- (6) For the purposes of paragraph (1)(b), the acts are the following:
- (a) to use, in a balloon transport operation, a Part 131 aircraft the operation of which would be authorised by the authorisation;
 - (b) to employ, in a balloon transport operation, a person employed, or proposed to be employed, in connection with an operation that would be authorised by the authorisation;
 - (c) to conduct an operation, or part of an operation, that would be authorised by the authorisation.

Application for authorisation refused

- (7) Subregulation (8) applies in relation to an application for a civil aviation authorisation that has been refused by CASA.
- (8) For the purposes of paragraph (1)(b), the acts are the following:
- (a) to use, in a balloon transport operation, a Part 131 aircraft the use of which would have been authorised by the authorisation;
 - (b) to employ, in a balloon transport operation, a person employed, or proposed to be employed, in connection with an operation that would have been authorised by the authorisation;
 - (c) to conduct an operation, or part of an operation, that would have been authorised by the authorisation.
- (9) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

- (10) In this regulation:

cancelled authorisation means a civil aviation authorisation that has been cancelled otherwise than on the application or request of the holder of the authorisation.

employ includes engage, whether by contract or other arrangement.

131.240 Maximum period for use of foreign registered Part 131 aircraft in Australian territory

- (1) A balloon transport operator contravenes this subregulation if, in any 12 month period, the operator uses a Part 131 aircraft that is a foreign registered aircraft to

Regulation 131.240

conduct balloon transport operations for a total of more than the number of days mentioned in subregulation (2).

- (2) The number of days is:
- (a) 90; or
 - (b) if the operator holds an approval under regulation 131.035 in relation to the Part 131 aircraft—the number mentioned in the approval for the aircraft.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Subpart 131.C—General

Division 131.C.1—General flight limitations

131.245 Pilots must be authorised

- (1) The operator and pilot in command of a Part 131 aircraft for a flight each contravene this subregulation if, during the flight, the requirement mentioned in subregulation (2) is not met.
- (2) The requirement is that the flight must be conducted by at least one pilot who holds a Part 131 pilot authorisation that authorises the pilot to conduct the flight.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

131.250 Simulation of emergency or abnormal situations

- (1) The operator and the pilot in command of a Part 131 aircraft for a flight that is a balloon transport operation each contravene this subregulation if, during the flight, an emergency or abnormal situation is simulated.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 131.C.2—Operational documents

131.255 Compliance with flight manual

- (1) The operator of a Part 131 aircraft for a flight that is a balloon transport operation contravenes this subregulation if, during the flight, the aircraft is operated in a way that does not meet a requirement or limitation that:
 - (a) is set out in the aircraft flight manual instructions for the aircraft; and
 - (b) relates to the operation of the aircraft.

Note: The pilot in command of the aircraft must also ensure the aircraft is operated in accordance with the aircraft flight manual instructions: see regulation 91.095.

- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

131.260 Availability of checklists

- (1) The operator of a Part 131 aircraft for a flight that is a balloon transport operation contravenes this subregulation if the requirement mentioned in subregulation (2) is not met for the flight.
- (2) The requirement is that, before a crew member for the flight begins to carry out a duty for the flight, the operator must make available to the member each checklist of normal, abnormal and emergency procedures for the aircraft that is relevant to the duty.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 131.C.3—Flight related documents

131.265 Electronic documents

To avoid doubt, if a document is required to be carried on a flight of an aircraft under this Subpart, that requirement is taken to be satisfied if an electronic copy of the document is carried on the flight.

Note: Electronic copies may not satisfy the requirements of the law of a foreign country for flights that begin or end at an aerodrome outside Australian territory.

131.270 Availability of parts of exposition

- (1) The operator of a Part 131 aircraft for a flight that is a balloon transport operation contravenes this subregulation if the following parts of the operator's exposition are not available to a crew member for the flight before the flight begins:
 - (a) a part that is relevant to the duties of the crew member for the flight;
 - (b) a part that is required for the conduct of the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

131.275 Carriage of documents

- (1) The pilot in command of a Part 131 aircraft for a flight contravenes this subregulation if, when the aircraft begins the flight, a document prescribed by the Part 131 Manual of Standards is not carried on the aircraft.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

131.280 Keeping documents with a person on the ground during flight

A balloon transport operator's exposition must include procedures for keeping the documents prescribed by the Part 131 Manual of Standards accessible to a person on the ground for the duration of a flight of a Part 131 aircraft.

Division 131.C.4—Reporting and recording information

131.285 Reporting and recording information

- (1) The Part 131 Manual of Standards may prescribe requirements relating to the recording, retaining and reporting of information for a flight of a Part 131 aircraft, including (but not limited to) the following information:
 - (a) flight time;
 - (b) fuel usage;
 - (c) passenger lists;
 - (d) aircraft defects;
 - (e) flight incidents;
 - (f) weight documents.
- (2) Without limiting subregulation (1), the Part 131 Manual of Standards may prescribe different requirements:
 - (a) for Part 131 aircraft that are operated under a balloon transport AOC; and
 - (b) for Part 131 aircraft that are not operated under a balloon transport AOC.
- (3) The operator and pilot in command of a Part 131 aircraft for a flight each contravene this subregulation if:
 - (a) a requirement mentioned in subregulation (1) applies for the flight; and
 - (b) the requirement is not met for the flight.
- (4) A person commits an offence if the person contravenes subregulation (3).
Penalty: 50 penalty units.

Division 131.C.5—Search and rescue services and emergency and survival equipment

131.290 Information about search and rescue services

- (1) The operator of a Part 131 aircraft for a flight that is a balloon transport operation contravenes this subregulation if, when the flight begins, information about the search and rescue services relevant to the flight is not readily accessible to the flight crew members for the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

131.295 Information about emergency and survival equipment

- (1) The operator of a Part 131 aircraft for a flight that is a balloon transport operation contravenes this subregulation if:
 - (a) the Part 131 Manual of Standards prescribes an item of equipment for the purposes of this regulation; and
 - (b) when the flight begins, the information prescribed by the Part 131 Manual of Standards for that equipment is not available for immediate communication by the operator to a rescue coordination centre.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 131.C.6—Miscellaneous requirements

131.300 Competence of ground support personnel

- (1) The operator of a Part 131 aircraft for a flight that is a balloon transport operation contravenes this subregulation if, before a member of the operator's personnel carries out a ground support duty for the flight, the member has not met a requirement mentioned in subregulation (2).
- (2) The requirements are the following:
 - (a) the member must have successfully completed training for the duty;
 - (b) the member must have been assessed as competent to carry out the duty.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

131.305 Flights over populous areas, public gatherings and other areas

- (1) The pilot in command of a Part 131 aircraft for a flight contravenes this subregulation if, during the flight:
 - (a) the aircraft is flown over a populous area or a public gathering; and
 - (b) a requirement prescribed by the Part 131 Manual of Standards for the purposes of this paragraph is not met for the flight.
- (2) The pilot in command of a Part 131 aircraft for a flight contravenes this subregulation if, during the flight:
 - (a) the aircraft is flown other than over a populous area or a public gathering; and
 - (b) a requirement prescribed by the Part 131 Manual of Standards for the purposes of this paragraph is not met for the flight.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

131.310 Dropping things from aircraft

- (1) The pilot in command of a Part 131 aircraft for a flight contravenes this subregulation if, during the flight:
 - (a) a thing is dropped from the aircraft; and
 - (b) the safety of the aircraft, or of any person or property, is likely to be endangered as a result of the thing being dropped.

Note: Part 105 applies in relation to parachute descents undertaken from Part 131 aircraft.

Regulation 131.315

- (2) Subregulation (1) does not apply in relation to a thing of a kind prescribed by the Part 131 Manual of Standards.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

131.315 Flights at night

- (1) The operator and the pilot in command of a Part 131 aircraft for a flight that is a balloon transport operation each contravene this subregulation if:
 - (a) the aircraft is flown at night; and
 - (b) the operator or pilot in command does not hold an approval under regulation 131.035 to fly the aircraft at night.
- (2) The pilot in command of a Part 131 aircraft for a flight that is not a balloon transport operation contravenes this subregulation if:
 - (a) the aircraft is flown at night; and
 - (b) the pilot in command does not hold:
 - (i) if the flight is a specialised balloon operation that requires an approval under regulation 131.035 to conduct the operation—an approval under regulation 131.035 to fly the aircraft at night; or
 - (ii) otherwise—an authorisation from a Part 131 ASAO to fly the aircraft at night.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

131.320 Use of supplemental oxygen equipment etc.

- (1) The operator and pilot in command of a Part 131 aircraft for a flight that is a balloon transport operation each contravene this subregulation if:
 - (a) during the flight, the aircraft is flown above 10,000 ft above mean sea level; and
 - (b) the operator does not hold an approval under regulation 131.035 to fly the aircraft above that height.
- (2) The operator and pilot in command of a Part 131 aircraft for a flight each contravene this subregulation if, during the flight, a requirement mentioned in subregulation (3) is not met for the flight.
- (3) The Part 131 Manual of Standards may prescribe requirements about the use, by persons on board a Part 131 aircraft for a flight, of equipment to supply supplemental oxygen during the flight.

Regulation 131.325

- (4) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

131.325 Specialised balloon operations

- (1) The operator of a Part 131 aircraft for a flight that involves a specialised balloon operation contravenes this subregulation if the requirement in subregulation (2) is not met for the flight.
- (2) The requirement is that the operator must hold an approval under regulation 131.035 to conduct the specialised balloon operation.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

131.330 Additional requirements for specialised balloon operations

- (1) The Part 131 Manual of Standards may prescribe additional requirements relating to flights of Part 131 aircraft involving specialised balloon operations.
- (2) To avoid doubt, the Part 131 Manual of Standards may prescribe different requirements for different kinds of specialised balloon operations referred to in regulation 131.020.
- (3) The operator of a Part 131 aircraft for a flight involving a specialised balloon operation contravenes this subregulation if:
- (a) the operator is subject to a requirement mentioned in subregulation (1) for the flight; and
 - (b) the requirement is not met for the flight.
- (4) The pilot in command of a Part 131 aircraft for a flight involving a specialised balloon operation contravenes this subregulation if:
- (a) the pilot in command is subject to a requirement mentioned in subregulation (1) for the flight; and
 - (b) the requirement is not met for the flight.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (3) or (4).

Penalty: 50 penalty units.

Subpart 131.D—Operational procedures

Division 131.D.1—Operational control

Note: This Division is reserved for future use.

Division 131.D.2—Flight preparation

131.340 Flight preparation requirements

- (1) The Part 131 Manual of Standards may prescribe requirements relating to flight preparation and weather assessments for Part 131 aircraft (the *balloon flight preparation (weather assessments) requirements*).
- (2) A balloon transport operator's exposition must include procedures for complying with the balloon flight preparation (weather assessments) requirements for a flight of a Part 131 aircraft.
- (3) The pilot in command of a Part 131 aircraft for a flight contravenes this subregulation if a balloon flight preparation (weather assessments) requirement is not met for the flight.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (3).

Penalty: 50 penalty units.

Division 131.D.3—Flight notifications and pre-flight checks

131.345 Balloon flight notification requirements

- (1) The Part 131 Manual of Standards may prescribe requirements (the *balloon flight notification requirements*) relating to flight notifications for flights of Part 131 aircraft.
- (2) The pilot in command of a Part 131 aircraft for a flight contravenes this subregulation if a balloon flight notification requirement is not met for the flight.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

131.350 Matters to be checked before take-off

- (1) The Part 131 Manual of Standards may prescribe requirements relating to checks to be carried out on Part 131 aircraft prior to take-off.
- (2) The pilot in command of a Part 131 aircraft for a flight contravenes this subregulation if, when the aircraft takes off for the flight, a check prescribed by the Part 131 Manual of Standards has not been carried out.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Division 131.D.4—Flight rules

Subdivision 131.D.4.1—General

131.353 Air traffic services—prescribed requirements

- (1) The Part 131 Manual of Standards may prescribe requirements in relation to the use by a Part 131 aircraft of:
 - (a) a class of airspace or a portion of a class of airspace; or
 - (b) a controlled aerodrome; or
 - (c) a control area; or
 - (d) a control zone; or
 - (e) a prohibited area; or
 - (f) a restricted area; or
 - (g) a danger area.
- (2) The pilot in command of a Part 131 aircraft for a flight contravenes this subregulation if a requirement mentioned in subregulation (1) is not met for the flight.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

131.354 Use of radio—broadcasts and reports

- (1) The pilot in command of a Part 131 aircraft for a flight contravenes this subregulation if:
 - (a) the aircraft is fitted with, or carries, a radio; and
 - (b) during the flight, the pilot in command does not make a broadcast or a report relating to the flight that is prescribed by the Part 131 Manual of Standards for this paragraph.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

131.355 Additional right of way rules

- (1) The pilot in command of a Part 131 aircraft contravenes this subregulation if:
 - (a) the aircraft is in the vicinity of another Part 131 aircraft; and
 - (b) the aircraft is higher than the other aircraft; and
 - (c) the pilot in command contravenes the right of way rule mentioned in subregulation (2).
- (2) The right of way rule is that a higher aircraft must give way to a lower aircraft.

- (3) Subregulation (2) does not apply if the other aircraft is a hot air airship.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matter in subregulation (3): see subsection 13.3(3) of the *Criminal Code*.

131.360 Operations at non-controlled aerodromes

- (1) The Part 131 Manual of Standards may prescribe requirements in relation to the operation of Part 131 aircraft at, or within the vicinity of, non-controlled aerodromes.
- (2) A person contravenes this subregulation if:
 - (a) the person is subject to a requirement mentioned in subregulation (1); and
 - (b) the person contravenes the requirement.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

131.365 Flights over water

- (1) The Part 131 Manual of Standards may prescribe requirements in relation to the operation of Part 131 aircraft over water.
- (2) A person contravenes this subregulation if:
 - (a) the person is subject to a requirement mentioned in subregulation (1); and
 - (b) the person contravenes the requirement.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Subdivision 131.D.4.2—Visual flight rules

131.367 VFR flights

- (1) The Part 131 Manual of Standards may prescribe requirements relating to the operation of a Part 131 aircraft for a VFR flight.
- (2) The pilot in command of a Part 131 aircraft for a VFR flight contravenes this subregulation if a requirement mentioned in subregulation (1) is not met for the flight.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Part 131 Balloons and hot air airships
Subpart 131.D Operational procedures
Division 131.D.4 Flight rules

Regulation 131.367

Penalty: 50 penalty units.

Division 131.D.5—Taking off, landing and ground operations

131.370 Procedures for safety during ground operations

A balloon transport operator's exposition must include procedures to ensure the safety of persons in the vicinity of a Part 131 aircraft when any of the following circumstances apply:

- (a) a person is embarking or disembarking the aircraft;
- (b) the aircraft is being prepared for flight;
- (c) the aircraft is being manoeuvred on the ground.

131.375 Operation of Part 131 aircraft while tethered

- (1) The pilot in command of a Part 131 aircraft for a flight contravenes this subregulation if:
 - (a) the aircraft is tethered to the ground for the flight; and
 - (b) a requirement prescribed by the Part 131 Manual of Standards is not met for the flight.

Note: See Subpart 131.Z for rules to apply to permanently tethered gas balloons.

- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 131.D.6—Fuel requirements

131.380 Fuel and ballast procedures

A balloon transport operator's exposition must include procedures to ensure that a flight of a Part 131 aircraft is conducted in accordance with the requirements mentioned in subregulation 131.385.

131.385 Fuel and ballast requirements

- (1) The Part 131 Manual of Standards may prescribe requirements relating to fuel and ballast for Part 131 aircraft, including (but not limited to) the following:
 - (a) matters that must be considered when determining whether a Part 131 aircraft has sufficient fuel or ballast to complete a flight safely;
 - (b) the amounts of fuel or ballast that must be carried on board a Part 131 aircraft for a flight;
 - (c) procedures for monitoring amounts of fuel or ballast during a flight of a Part 131 aircraft;
 - (d) procedures to be followed if fuel or ballast reaches specified amounts during a flight of a Part 131 aircraft.
- (2) The operator and the pilot in command of a Part 131 aircraft for a flight that is a balloon transport operation each contravene this subregulation if a requirement mentioned in subregulation (1) is not met for the flight.
- (3) The pilot in command of a Part 131 aircraft for a flight that is not a balloon transport operation contravenes this subregulation if a requirement mentioned in subregulation (1) is not met for the flight.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (2) or (3).

Penalty: 50 penalty units.

Division 131.D.7—Safety of persons on aircraft and cargo requirements

131.390 Smoking not permitted during flight or within 15 metres of Part 131 aircraft

- (1) A person on a Part 131 aircraft for a flight contravenes this subregulation if the person smokes during the flight.
- (2) A person contravenes this subregulation if the person smokes within 15 metres of a Part 131 aircraft that:
 - (a) is being prepared for a flight; or
 - (b) is being fuelled for a flight; or
 - (c) is being deflated after a flight.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

131.395 Certain Part 131 aircraft to have signage about smoking

- (1) The operator of a Part 131 aircraft for a flight that is a balloon transport operation contravenes this subregulation if, before the flight begins, the operator has not provided as many permanent “no smoking” signs or graphics in the aircraft as are necessary to indicate to all occupants of the aircraft that smoking is not permitted.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

131.400 Carriage of infants

- (1) The operator and the pilot in command of a Part 131 aircraft for a flight that is a balloon transport operation each contravene this subregulation if:
 - (a) an infant is carried on the aircraft during the flight; and
 - (b) the operator does not hold an approval under regulation 131.035 to carry an infant on the aircraft during the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Regulation 131.405

131.405 Carriage of persons requiring assistance

- (1) The operator and the pilot in command of a Part 131 aircraft for a flight each contravene this subregulation if:
 - (a) a passenger is carried on the flight who is likely to require assistance; and
 - (b) a requirement prescribed by the Part 131 Manual of Standards for the purposes of this paragraph is not met for the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

131.410 Passengers—safety briefings and instructions

- (1) The operator and pilot in command of a Part 131 aircraft for a flight each contravene this subregulation if, before the aircraft takes off for the flight, a passenger is not given a safety briefing and instructions that include each of the matters prescribed by the Part 131 Manual of Standards for the flight.
- (2) The operator and pilot in command of a Part 131 aircraft for a flight each contravene this subregulation if:
 - (a) during the flight circumstances prescribed by the Part 131 Manual of Standards apply; and
 - (b) a passenger is not given a safety briefing and instructions that include each of the matters prescribed by the Part 131 Manual of Standards for those circumstances.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

131.415 Safety briefing in the event of an emergency

A balloon transport operator's exposition must include procedures for briefing passengers on what to do if an emergency occurs during a flight of a Part 131 aircraft.

131.420 Passengers—compliance with safety directions

- (1) A passenger on a Part 131 aircraft for a flight contravenes this subregulation if:
 - (a) an instruction mentioned in subregulation 131.410(1) or (2) is given to the passenger; and
 - (b) the passenger does not comply with the direction.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

131.425 Restraint of cargo

- (1) The operator and pilot in command of a Part 131 aircraft for a flight each contravene this subregulation if:
 - (a) the aircraft is landing; and
 - (b) any cargo carried on the aircraft is not restrained or securely stowed.
- (2) A person commits an offence if the person contravenes subregulation (1).

Penalty: 50 penalty units.

131.430 Procedures relating to carriage of animals

A balloon transport operator's exposition must include procedures for the carriage of animals for a flight of a Part 131 aircraft.

Division 131.D.8—Miscellaneous

131.435 Training flight limitations

- (1) The operator and pilot in command of a Part 131 aircraft for a flight that is a balloon transport operation each contravene this subregulation if, during the flight, the pilot in command permits balloon flying training (within the meaning of subregulation 5.01(1) of CAR) for any purpose.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

131.440 Test flights

- (1) The pilot in command of a Part 131 aircraft for a flight that is a balloon transport operation contravenes this subregulation if, during the flight, the pilot in command permits a test of the aircraft, or any of its components or equipment (other than a test of the aircraft during the course of checks associated with the normal operation of the aircraft).
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Subpart 131.F—Performance

131.445 Loading weights

Maximum loading weights

- (1) The operator and the pilot in command of a Part 131 aircraft for a flight each contravene this subregulation if, during the flight, the aircraft's weight is greater than:
 - (a) the maximum loading weight (however described) permitted by the flight manual for the aircraft; or
 - (b) if circumstances prescribed under paragraph (2)(a) apply—the weight for the aircraft for the flight calculated in accordance with the method prescribed under paragraph (2)(b).
- (2) The Part 131 Manual of Standards may prescribe:
 - (a) the circumstances in which a weight for a Part 131 aircraft for a flight must be calculated under this subregulation; and
 - (b) methods for calculating that weight.

Minimum loading weights

- (3) The operator and the pilot in command of a Part 131 aircraft for a flight each contravene this subregulation if, during the flight, the aircraft's weight is less than:
 - (a) any minimum loading weight (however described) permitted by the flight manual for the aircraft; or
 - (b) if circumstances prescribed under paragraph (4)(a) apply—the weight for the aircraft for the flight calculated in accordance with the method prescribed under paragraph (4)(b).
- (4) The Part 131 Manual of Standards may prescribe:
 - (a) the circumstances in which a weight for a Part 131 aircraft for a flight must be calculated under this subregulation; and
 - (b) methods for calculating that weight.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (1) or (3).

Penalty: 50 penalty units.

131.450 Loading procedures

A balloon transport operator's exposition must include the following in relation to a flight of a Part 131 aircraft:

- (a) procedures for loading the aircraft for a flight to comply with regulation 131.445;

Regulation 131.455

- (b) procedures for working out the following weights for a flight of the aircraft:
 - (i) the total weight of the crew members and any carry-on baggage of the crew members;
 - (ii) the total weight of any passengers and any carry-on baggage of the passengers;
 - (iii) the total weight of any cargo (other than carry-on baggage);
 - (iv) the total weight of any usable fuel and fuel containers to be carried;
 - (v) the total weight of any assembled balloon components;
- (c) procedures to ensure that a last-minute change to a load does not cause the aircraft to exceed its weight limits;
- (d) procedures for offloading passengers or cargo to ensure that the aircraft does not exceed its weight limits;
- (e) procedures to ensure the aircraft's minimum weight can be maintained throughout the flight;
- (f) procedures for ensuring that ambient temperature increases before the aircraft takes off for the flight do not cause the aircraft to exceed its weight limits.

131.455 Carriage of passengers

- (1) The Part 131 Manual of Standards may prescribe requirements relating to the carriage of passengers for a flight of a Part 131 aircraft.
- (2) Without limiting subregulation (1), the Part 131 Manual of Standards may prescribe requirements relating to:
 - (a) the maximum number of passengers that may be carried for the flight; and
 - (b) the location of passengers on the Part 131 aircraft for the flight.
- (3) The operator and the pilot in command of a Part 131 aircraft for a flight each contravene this subregulation if a requirement mentioned in subregulation (1) is not met for the flight.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (3).

Penalty: 50 penalty units.

Subpart 131.K—Equipment

131.460 Requirements relating to equipment

- (1) The Part 131 Manual of Standards may prescribe requirements relating to:
 - (a) the fitment and non-fitment of equipment to a Part 131 aircraft; and
 - (b) the carrying of equipment on a Part 131 aircraft; and
 - (c) equipment that is fitted to, or carried on, a Part 131 aircraft.
- (2) A person contravenes this subregulation if:
 - (a) the person is subject to a requirement mentioned in subregulation (1); and
 - (b) the requirement is not met.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Subpart 131.M—Continuing airworthiness

Note: This Subpart heading is reserved for future use.

Subpart 131.N—Flight crew

131.565 Qualifications and training for pilots

- (1) The operator and pilot in command of a Part 131 aircraft for a flight each contravene this subregulation if, when the flight begins, a requirement mentioned in subregulation (2) or (2A) is not met.
- (2) The requirements are as follows:
 - (a) the pilot in command of the Part 131 aircraft for the flight must hold one or more of the following that authorises the pilot to operate the Part 131 aircraft:
 - (i) a commercial pilot (balloon) licence;
 - (ii) a CAR certificate of validation;
 - (iii) an authorisation from a Part 131 ASAO;
 - (b) the pilot must meet any training and checking requirements for the flight prescribed by the Part 131 Manual of Standards;
 - (c) the pilot must have any other qualification or experience prescribed by the Part 131 Manual of Standards for the purposes of this paragraph;
 - (d) if the flight is a balloon transport operation—the pilot must have any other qualification or experience required by the operator’s exposition;
 - (e) if the flight is a specialised balloon operation—the pilot must have any other qualification or experience set out in the approval under regulation 131.035 that authorises the operation.
- (2A) The requirement is that any other person who is to perform an activity essential to the operation of the Part 131 aircraft for the flight is authorised to perform that activity under regulation 5.03 of CAR.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Subpart 131.P—Other operational safety-critical personnel

Division 131.P.1—Ground support personnel

131.570 Qualifications and training for ground support personnel

- (1) The operator of a Part 131 aircraft for a flight that is a balloon transport operation contravenes this subregulation if, when the flight begins, a requirement mentioned in subregulation (2) or (3) is not met.
- (2) The requirement is that each member of the operator's ground support personnel who carries out a ground support duty for the flight must meet any training and checking requirements for the flight prescribed by the Part 131 Manual of Standards.
- (3) The requirement is that the number of ground support personnel carrying out ground support duties for the flight must be at least the number of ground support personnel prescribed by the Part 131 Manual of Standards for the number of passengers carried on the flight.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 131.P.2—Other operational support personnel

Note: This Division is reserved for future use.

Subpart 131.R—Part 131 recreational activities

131.580 Part 131 recreational activities must be authorised

Part 131 recreational activity must be authorised

- (1) A person contravenes this subregulation if:
 - (a) the person undertakes a Part 131 recreational activity; and
 - (b) the person does not hold a Part 131 pilot authorisation that authorises the person to undertake the activity.
- (2) Subregulation (1) does not apply if the person is otherwise permitted under these Regulations to undertake the activity.

Part 131 recreational activity must be undertaken in accordance with authorisation

- (3) A person contravenes this subregulation if the person:
 - (a) undertakes a Part 131 recreational activity; and
 - (b) holds a Part 131 pilot authorisation that authorises the person to undertake the activity; and
 - (c) undertakes the activity in a way that contravenes the authorisation.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1) or (3).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matter in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

131.585 Procedures for carrying hang gliders

If the approved functions of a Part 131 ASAO include authorising a person to undertake an activity that involves carrying a hang glider outside a Part 131 aircraft, the exposition for the Part 131 ASAO must include procedures for the carrying of hang gliders outside a Part 131 aircraft.

Note: An ASAO, and the holder of an authorisation issued by an ASAO, must not contravene the ASAO's exposition: see regulations 149.345 and 149.410.

Subpart 131.S—Balloon flight crew licensing

Note: This Subpart heading is reserved for future use.

Subpart 131.Z—Tethered gas balloons

131.685 Approval required to operate

- (1) A person contravenes this subregulation if:
 - (a) the person operates a tethered gas balloon; and
 - (b) the person does not hold an approval under regulation 131.035 to operate the tethered gas balloon.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

131.690 Compliance with Part 131 Manual of Standards

- (1) A person contravenes this subregulation if:
 - (a) the person operates a tethered gas balloon; and
 - (b) a requirement prescribed by the Part 131 Manual of Standards for the purposes of this paragraph is not met for the operation.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

131.695 Operation under cloud

- (1) A person contravenes this subregulation if:
 - (a) the person operates a tethered gas balloon; and
 - (b) the balloon does not remain at least 500 ft (measured vertically) below the cloud ceiling.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

131.700 Operation at night

- (1) A person contravenes this subregulation if:
 - (a) the person operates a tethered gas balloon at night at or above 400 ft above ground level; and
 - (b) the balloon is not lit so as to be visible from at least 4,000 metres away.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

131.705 Rapid deflation device required

- (1) A person contravenes this subregulation if:
 - (a) the person operates a tethered gas balloon; and
 - (b) the balloon is not fitted with a device that will cause it to deflate rapidly and completely if it escapes from its mooring.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

131.710 What to do if balloon escapes

- (1) A person contravenes this subregulation if:
 - (a) the person operates a tethered gas balloon; and
 - (b) the balloon escapes from its mooring; and
 - (c) the balloon is not deflated completely using a deflation device; and
 - (d) the person does not comply with the requirement in subregulation (2).
- (2) The requirement is that the person must tell Air Traffic Services as soon as possible:
 - (a) where the balloon was launched; and
 - (b) what time it broke free; and
 - (c) the direction it was headed when last seen.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Part 132—Limited category aircraft

Table of contents

Subpart 132.A—Preliminary

- 132.005 What Part 132 is about
- 132.010 Key definitions for Part 132
- 132.015 Definition of *adventure flight* for limited category aircraft
- 132.020 Definition of *major* for modifications and repairs for limited category aircraft
- 132.025 Definition of *safety-critical aeronautical product* for limited category aircraft
- 132.030 Approval of modifications and repairs for limited category aircraft
- 132.035 Approvals by CASA or administering authority for Part 132
- 132.040 Issue of Manual of Standards for Part 132
- 132.045 Relationship of Part 132 to other requirements for operating limited category aircraft

Subpart 132.B—Flying limited category aircraft—general requirements

- 132.050 General operational requirements
- 132.055 Authorised operations for limited category aircraft
- 132.060 Maximum number of persons to be carried
- 132.065 Passenger briefing for flights other than adventure flights
- 132.070 Content of safety briefing for flights other than adventure flights
- 132.075 Flights over populous areas
- 132.085 Flights in foreign country's airspace

Subpart 132.C—Flying limited category aircraft—adventure flights

Division 132.C.1—Adventure flights—general requirements

- 132.090 Adventure flight procedures required
- 132.095 Limited category certificate must include adventure flights as special purpose operation
- 132.100 When adventure flights prohibited—aircraft airframe life and life-limited safety-critical aeronautical products
- 132.105 When adventure flights prohibited—major modifications or repairs
- 132.110 When adventure flights prohibited—certain aircraft that are not ex-armed forces or historic aircraft
- 132.115 When adventure flights prohibited—aircraft with special flight permit
- 132.120 Requirements for pilot in command of adventure flights
- 132.125 Unbroken round trips only
- 132.130 Sightseeing flights prohibited
- 132.135 Clothes and equipment supplied by operator
- 132.140 Passengers who cannot understand safety briefing to be accompanied on adventure flights

Division 132.C.2—Adventure flights—passenger safety briefings

- 132.145 Requirement for passenger safety briefing when booking
- 132.150 Content of passenger safety briefing when booking
- 132.155 Requirement for passenger safety briefing before boarding aircraft
- 132.160 Acknowledgement by passengers who are at least 18 and who can understand passenger safety briefing

-
- 132.165 Acknowledgement for passengers under 18 or who cannot understand passenger safety briefing
 - 132.170 Retention of acknowledgements

Subpart 132.D—Limited category aircraft—certification and airworthiness requirements

Division 132.D.1—Certification and airworthiness—general

- 132.175 Advice about modifications, repairs, damage, defects and life-limited aeronautical products
- 132.180 Requirements for giving approvals, certificates and advice—individuals
- 132.185 Authorisations to give approvals, certificates and advice for limited category aircraft
- 132.190 Requirements for giving approvals, certificates and advice—limited category organisations

Division 132.D.2—Certification and airworthiness—permit index numbers

- 132.195 Assignment of permit index numbers—general
- 132.200 Assignment of new permit index numbers on initiative of administering authority
- 132.205 Assignment of new permit index numbers at CASA direction
- 132.210 Assignment of new permit index numbers on application by registered operator
- 132.215 When assignment of new permit index number takes effect
- 132.220 Notice to operator if new permit index number assigned

Division 132.D.3—Certification and airworthiness—notice to CASA of certain matters

- 132.225 Notice to CASA—permit index numbers assigned by limited category organisation for aircraft
- 132.230 Notice to CASA—certain proposed actions by limited category organisation
- 132.235 Notice to CASA—safety of aircraft

Subpart 132.M—Limited category aircraft—airworthiness and maintenance

Subpart 132.A—Preliminary

132.005 What Part 132 is about

- (2) Subpart 132.A sets out preliminary matters, including the relationship of Part 132 to other requirements for operating limited category aircraft.
- (3) Subpart 132.B sets out the general requirements for flying limited category aircraft.
- (4) Subpart 132.C sets out the requirements for conducting adventure flights.
- (5) Subpart 132.D sets out the certification and airworthiness requirements for limited category aircraft.

132.010 Key definitions for Part 132

In these Regulations:

administering authority, for a limited category aircraft, means:

- (a) a limited category organisation in relation to the aircraft; or
- (b) if there is no limited category organisation in relation to the aircraft—CASA.

adventure flight procedures, for a limited category aircraft, means procedures for conducting an adventure flight using the aircraft for which the operator of the aircraft holds an approval granted by the administering authority for the aircraft under regulation 132.035.

approved airframe life, for a limited category aircraft, means the airframe life stated in the most recent of the following:

- (a) the aircraft's approved design;
- (b) a variation (if any) of the airframe life by the national aviation authority of the country of the aircraft's manufacture;
- (c) if the aircraft is an ex-armed forces aircraft—a variation (if any) of the airframe life by the armed force that operated the aircraft or for which the aircraft was manufactured;
- (d) a certificate (if any) stating an airframe life for the aircraft's airframe given by the administering authority for the aircraft.

Note: Airframe life may be expressed in a number of ways, including the amount of operating time, the number of operating cycles or a calendar period.

ex-armed forces aircraft means:

- (a) a version of an aircraft that has been manufactured in accordance with the requirements of, and accepted for use by, an armed force of any country (whether or not it has been used by such a force); or
- (b) a particular aircraft:

Regulation 132.015

- (i) to which paragraph (a) does not apply; and
- (ii) that has been operated by an armed force of any country.

historic aircraft means:

- (a) an aircraft that was manufactured before 1 January 1960; or
- (b) an Australian-manufactured aircraft of a type that is no longer being manufactured; or
- (c) a replica of an aircraft mentioned in paragraph (a) or (b); or
- (d) an aircraft prescribed by the Part 132 Manual of Standards for this paragraph.

limited category aircraft means an aircraft for which a special certificate of airworthiness mentioned in regulation 21.189 is in force.

limited category certificate means a special certificate of airworthiness to which an applicant is entitled under regulation 21.189.

limited category organisation means an organisation that is approved under regulation 262AN of CAR to perform functions in relation to limited category aircraft.

permit index number, for an aircraft for which a limited category certificate has been issued, means the permit index number most recently assigned to the aircraft under subregulation 21.176(5) or Division 132.D.2.

132.015 Definition of *adventure flight* for limited category aircraft

A flight of a limited category aircraft is an **adventure flight** if it is a flight:

- (a) on which a passenger is carried; and
- (b) that is:
 - (i) conducted for hire or reward; or
 - (ii) publicly available.

132.020 Definition of *major* for modifications and repairs for limited category aircraft

- (1) A modification or repair to a limited category aircraft is a **major** modification or repair if the modification or repair has a significant effect on a characteristic affecting the aircraft's airworthiness, including any of the following:
 - (a) its weight or balance;
 - (b) its structural strength;
 - (c) its reliability;
 - (d) its performance;
 - (e) its operational characteristics.
- (2) However, a modification or repair to a limited category aircraft is taken not to be a **major** modification or repair if advice has been given under regulation 132.175 that the modification or repair is not a major modification or repair.

Regulation 132.025

(3) In this regulation:

modification includes a combination of modifications.

repair includes a combination of repairs.

132.025 Definition of *safety-critical aeronautical product* for limited category aircraft

- (1) An aeronautical product for a limited category aircraft is a *safety-critical aeronautical product* for the aircraft if the aircraft cannot be operated safely if the product is inoperative or missing.
- (2) However, an aeronautical product for a limited category aircraft is taken not to be a *safety-critical aeronautical product* for the aircraft if advice has been given under regulation 132.175 that the aeronautical product is not a safety-critical aeronautical product for the aircraft.

132.030 Approval of modifications and repairs for limited category aircraft

- (1) A modification or repair to a limited category aircraft is approved for the purposes of this regulation if the modification or repair has been approved (however described, and whether before, on or after the commencement of this regulation) by any of the following:
 - (a) the aircraft's manufacturer;
 - (b) CASA;
 - (c) the national aviation authority of a foreign country under a law of the foreign country;
 - (d) if the aircraft is an ex-armed forces aircraft—an armed force that operated the aircraft or for which the aircraft was manufactured;
 - (e) the administering authority for the aircraft.
- (2) A modification or repair to a limited category aircraft is approved for the purposes of this regulation if the modification or repair, or the design for the modification or repair, has been approved (however described, and whether before, on or after the commencement of this regulation) under Part 21 by:
 - (a) an authorised person; or
 - (b) an approved design organisation.
- (3) A modification or repair to a limited category aircraft is approved for the purposes of this regulation if an approval (however described) for the modification or repair, or the design for the modification or repair, is in force in accordance with regulation 202.054 or 202.055.

132.035 Approvals by CASA or administering authority for Part 132

- (1) If a provision of this Part refers to a person holding an approval granted by CASA under this regulation, a person may apply to CASA, in writing, for the approval.

Regulation 132.040

- (2) If a provision of this Part refers to a person holding an approval granted by the administering authority for a limited category aircraft under this regulation, a person may apply to the administering authority, in writing, for the approval.
- (3) Subject to regulation 11.055, CASA or the administering authority must grant the approval.
- (4) Subregulation 11.055(1B) applies to the granting of an approval under this regulation for any of the following provisions:
 - (a) paragraph 132.055(1)(i) (authorised operations for limited category aircraft);
 - (b) subregulation 132.060(1) (maximum number of persons to be carried);
 - (c) paragraph 132.075(4)(a) or subregulation 132.075(6) (flights over populous areas).

132.040 Issue of Manual of Standards for Part 132

For subsection 98(5A) of the Act, CASA may issue a Manual of Standards for this Part prescribing matters:

- (a) required or permitted by these Regulations to be prescribed by the Part 132 Manual of Standards; or
- (b) necessary or convenient to be prescribed for carrying out or giving effect to this Part.

132.045 Relationship of Part 132 to other requirements for operating limited category aircraft

- (1) To avoid doubt:
 - (b) a provision of CAR or of Part 91 that applies to the operation of a limited category aircraft and is inconsistent with this Part has no effect, in relation to the operation of the limited category aircraft, to the extent of the inconsistency, but the provision is taken to be consistent with this Part to the extent that it is capable of operating concurrently with this Part; and
 - (c) if this Part, or a provision of a document mentioned in subregulation (2), imposes a more stringent requirement (however described) on the operation of a limited category aircraft than the comparable requirement mentioned in paragraph (a), the more stringent requirement prevails.

Example: For paragraph (c), more stringent requirements might include the following:

- (a) the aircraft must be operated only under the VFR by day;
 - (b) the aircraft must be flown only by a named pilot;
 - (c) the aircraft must not be flown faster than a stated speed, higher than a stated height or have a take-off weight of more than a stated weight.
- (2) For paragraph (1)(c), the documents are the following, as in force from time to time:
 - (a) the aircraft's limited category certificate;
 - (b) a document that states the aircraft's approved airframe life;

Regulation 132.045

- (c) a document that states the life limit of a safety-critical aeronautical product fitted to the limited category aircraft;
- (d) the approval of a modification or repair to the aircraft;
- (e) an approval under regulation 132.035 in relation to the aircraft;
- (f) the aircraft's flight manual;
- (g) for an adventure flight of the aircraft—the adventure flight procedures for the aircraft;
- (h) an instrument issued under regulation 11.068 (conditions imposed on class of authorisations) that applies to the aircraft;
- (i) a direction under Subpart 11.G that applies to the aircraft;
- (j) if the administering authority for the aircraft is a limited category organisation—the organisation's operations manual.

Note: The aircraft must be operated in accordance with the requirements in a document mentioned in subregulation (2): see regulation 132.050.

Subpart 132.B—Flying limited category aircraft—general requirements

132.050 General operational requirements

Aircraft without a special flight permit

- (1) The operator and the pilot in command of a limited category aircraft each contravene this subregulation if:
 - (a) a special flight permit is not in force for the aircraft; and
 - (b) the aircraft is operated for a flight; and
 - (c) a requirement mentioned in subregulation (2) is not met for the flight.
 - (2) The requirements are the following:
 - (a) the flight must be an authorised operation for the aircraft under regulation 132.055;
 - (b) a maintenance release must be in force for the aircraft;
 - (c) the flight must be conducted in accordance with each requirement (however described) in a document mentioned in subregulation 132.045(2);
 - (d) the total number of persons on board the aircraft for the flight must be not more than the number of persons allowed under regulation 132.060;
 - (e) if the aircraft is capable of carrying a passenger—a placard that complies with the requirements prescribed by the Part 132 Manual of Standards must be displayed inside the aircraft so that it is conspicuous to, and can be easily read by, each passenger on board the aircraft, including a passenger sitting in a flight control seat;
 - (f) before beginning the flight, the pilot in command must make himself or herself aware of all relevant information about the aircraft, including the following:
 - (i) each requirement (however described) in a document mentioned in subregulation 132.045(2);
 - (ii) the matters mentioned in subregulation (3);
 - (g) the pilot in command must be authorised under Part 61 (flight crew licensing) to conduct the flight.
- Note: For example, for paragraph (e): an aircraft with dual controls that may be flown by a single pilot is capable of carrying a passenger.
- (3) For subparagraph (2)(f)(ii), the matters are the following:
 - (a) each authorisation (within the meaning of Part 11) that relates to the operation of the aircraft and is in force;
 - (b) each condition imposed under Subpart 11.BA on an authorisation mentioned in paragraph (a) that is in force;
 - (c) each exemption granted by CASA under Subpart 11.F that relates to the operation of the aircraft and is in force;

Regulation 132.055

- (d) each direction issued by CASA under these Regulations that relates to the operation of the aircraft and is in force.

Aircraft with a special flight permit

- (4) The operator and the pilot in command of a limited category aircraft each contravene this subregulation if:
- (a) a special flight permit is in force for the aircraft; and
 - (b) the aircraft is operated for a flight; and
 - (c) either:
 - (i) the operation of the aircraft for the flight is not in accordance with the special flight permit; or
 - (ii) a requirement mentioned in paragraph (2)(d) or (e), subparagraph (2)(f)(ii) or paragraph (2)(g) is not met for the flight.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (1) or (4).

Penalty: 50 penalty units.

132.055 Authorised operations for limited category aircraft

- (1) For paragraph 132.050(2)(a), each of the following is an authorised operation for a limited category aircraft:
- (a) a personal use of the aircraft;
 - (b) a cost-sharing flight;
 - (c) flight training for:
 - (i) a flight crew endorsement for a type or class rating for the aircraft; or
 - (ii) the competency standards mentioned in regulation 61.385 (limitations on exercise of privileges of pilot licences—general competency requirement);
 - (d) a flight review or test for a flight crew licence, rating or endorsement that authorises the person to pilot, or act as the flight engineer for, the aircraft;
 - (e) a special purpose operation for which the aircraft's limited category certificate was issued;
 - (f) an activity necessary to conduct the special purpose operation, including training for the operation;
 - (g) if the administering authority for the aircraft is a limited category organisation—an activity that is stated, in the organisation's operations manual, to be an activity in support of the special purpose operation for the aircraft;
 - (h) an operation prescribed as an authorised operation by the Part 132 Manual of Standards;
 - (i) a flight conducted in accordance with an approval, held by the operator, granted by CASA under regulation 132.035 for this paragraph.
- (2) For paragraph (1)(a), a flight of an aircraft is a **personal use** of the aircraft if the flight:
-

- (a) is not publicly available; and
- (b) is a flight for which no payment or reward is made or given to the aircraft's registered operator, operator or flight crew.

132.060 Maximum number of persons to be carried

Approval from administering authority

- (1) For paragraph 132.050(2)(d), if the operator holds an approval granted by the administering authority for the aircraft under regulation 132.035 for the aircraft to be flown with a stated number of persons (that is greater than 6) on board, the number of persons allowed is the number stated in the approval.
- (2) However, for subregulation (1), the number of persons stated in the approval must not be more than the number of persons the aircraft was designed to carry.

Approval of modification

- (3) For paragraph 132.050(2)(d), if:
 - (a) the aircraft has been modified for it to be flown with a number of persons (that is greater than the number of persons the aircraft was designed to carry) on board; and
 - (b) the modification to the aircraft is approved for the purposes of regulation 132.030; and
 - (c) the approval states the number of persons that the aircraft may carry; the number of persons allowed is the number stated in the approval.

Other cases

- (4) For paragraph 132.050(2)(d), in any other case the number of persons allowed is the lower of the following numbers:
 - (a) the number of persons the aircraft was designed to carry;
 - (b) 6.

132.065 Passenger briefing for flights other than adventure flights

- (1) This regulation applies to a flight of a limited category aircraft if:
 - (a) a passenger is to be carried on the flight; and
 - (b) the flight is not an adventure flight.

Note: For the passenger briefing requirement for adventure flights, see regulation 132.155.

- (2) The operator of the aircraft contravenes this subregulation if the requirement mentioned in subregulation (3) is not met for the passenger for the flight.
- (3) For subregulation (2), the requirement is that, on the day of the flight, before the passenger is taken to the aircraft, a briefing that complies with subregulation (4) must be given to:
 - (a) the passenger; and
 - (b) if the passenger is under 18—the passenger's parent or guardian; and

Regulation 132.070

- (c) if the person giving the briefing reasonably believes that the passenger will not be able to understand the briefing—a person who has care of the passenger.
- (4) For subregulation (3), the briefing must:
 - (a) include the content mentioned in subregulation 132.070(1); and
 - (b) be in a language that the passenger (and, if applicable, the passenger’s parent, guardian or carer) understands.
- (5) Subregulation (2) does not apply to the operator if:
 - (a) the passenger was carried on an earlier flight of the aircraft on the same day; and
 - (b) the requirement mentioned in subregulation (3) was met for the passenger for the earlier flight.
- (6) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (5): see subsection 13.3(3) of the *Criminal Code*.

132.070 Content of safety briefing for flights other than adventure flights

- (1) For paragraph 132.065(4)(a), the briefing must include the following:
 - (a) statements to the effect that:
 - (i) the design, manufacture and airworthiness of the aircraft are not required to meet any standard recognised by CASA; and
 - (ii) the aircraft is not required by CASA to be operated to the same safety standards as an aircraft used for air transport operations; and
 - (iii) travel in the aircraft is done at the passenger’s own risk;
 - (b) if subregulation (2) applies to the aircraft—a statement of how the subregulation applies to the aircraft.
- (2) For paragraph (1)(b), this subregulation applies to the aircraft if:
 - (a) the aircraft has reached its approved airframe life; or
 - (b) a safety-critical aeronautical product fitted to the aircraft has reached its life limit; or
 - (c) the aircraft has a major modification or repair that is not approved for the purposes of regulation 132.030.

132.075 Flights over populous areas

- (1) The operator and the pilot in command of a limited category aircraft each contravene this subregulation if:
 - (a) the aircraft is flown over a populous area; and
 - (b) the flight is not permitted by this regulation.

- (2) A limited category aircraft for which there is no permit index number is not permitted to be flown over a populous area.
- (3) A limited category aircraft with a permit index number of 0 may be flown over a populous area.
- (4) A limited category aircraft with a permit index number of 1 may be flown over a populous area only:
 - (a) in accordance with an approval, held by the operator of the aircraft, granted by the administering authority for the aircraft under regulation 132.035 for this paragraph; or
 - (b) for the purpose of taking off from, or landing at, a landing area other than a landing area prescribed as an unsuitable landing area for this paragraph by the Part 132 Manual of Standards.
- (5) In deciding whether to grant an approval mentioned in paragraph (4)(a), the administering authority must take into account:
 - (a) the aircraft's permit index number; and
 - (b) anything else relevant to the safety of other airspace users or persons on the ground or water.
- (6) A limited category aircraft with a permit index number of 2 may be flown over a populous area only in accordance with an approval, held by the operator of the aircraft, granted by CASA under regulation 132.035 for this subregulation.
- (7) In deciding whether to grant an approval mentioned in subregulation (6), CASA must take into account:
 - (a) the aircraft's permit index number; and
 - (b) anything else relevant to the safety of other airspace users or persons on the ground or water.
- (8) Despite subregulations (3), (4) and (6), an aircraft is not permitted to be flown over a populous area if:
 - (a) the aircraft:
 - (i) has reached its approved airframe life; or
 - (ii) would reach its approved airframe life during the flight; or
 - (b) an aeronautical product fitted to the aircraft that is a safety-critical aeronautical product:
 - (i) has reached its life limit; or
 - (ii) would reach its life limit during the flight; or
 - (c) a modification or repair to the aircraft:
 - (i) is a major modification or repair; and
 - (ii) is not approved for the purposes of regulation 132.030.
- (9) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Regulation 132.085

132.085 Flights in foreign country's airspace

- (1) The operator and the pilot in command of a limited category aircraft each contravene this subregulation if:
 - (a) the aircraft is flown in a foreign country's airspace; and
 - (b) either:
 - (i) the country's national aviation authority has not granted an approval to the operator for the flight; or
 - (ii) the country's national aviation authority has granted an approval to the operator for the flight subject to a condition and the condition is contravened for the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 10 penalty units.

Subpart 132.C—Flying limited category aircraft—adventure flights

Division 132.C.1—Adventure flights—general requirements

132.090 Adventure flight procedures required

- (1) The operator and the pilot in command of a limited category aircraft each contravene this subregulation if, when the aircraft begins an adventure flight, there are no adventure flight procedures for the aircraft.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

132.095 Limited category certificate must include adventure flights as special purpose operation

- (1) The operator of a limited category aircraft contravenes this subregulation if, when the aircraft begins an adventure flight, a limited category certificate that includes conducting adventure flights in historic or ex-military aircraft as a special purpose operation for the aircraft is not in force for the aircraft.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

132.100 When adventure flights prohibited—aircraft airframe life and life-limited safety-critical aeronautical products

- (1) The operator of a limited category aircraft contravenes this subregulation if, when the aircraft begins an adventure flight:
 - (a) the aircraft has reached its approved airframe life; or
 - (b) an aeronautical product fitted to the aircraft:
 - (i) is a safety-critical aeronautical product; and
 - (ii) has reached its life limit.

Note: An aeronautical product is not a safety-critical aeronautical product if advice has been given under regulation 132.175 that the aeronautical product is not a safety-critical aeronautical product: see subregulation 132.025(2).

- (2) The operator of a limited category aircraft contravenes this subregulation if, during an adventure flight of the aircraft:
 - (a) the aircraft reaches its approved airframe life; or
 - (b) an aeronautical product fitted to the aircraft:
 - (i) is a safety-critical aeronautical product; and

Part 132 Limited category aircraft

Subpart 132.C Flying limited category aircraft—adventure flights

Division 132.C.1 Adventure flights—general requirements

Regulation 132.105

(ii) reaches its life limit.

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

132.105 When adventure flights prohibited—major modifications or repairs

- (1) This regulation applies to the operator of a limited category aircraft if:
- (a) the aircraft has a modification or repair; and
 - (b) the modification is a major modification or repair.

Approval of modifications and repairs

- (2) The operator contravenes this subregulation if, when the aircraft begins an adventure flight, the modification or repair is not approved for the purposes of regulation 132.030.

Certificate from administering authority

- (3) The operator contravenes this subregulation if, when the aircraft begins an adventure flight, the operator does not hold a certificate, given by the administering authority for the aircraft, to the effect that the modified or repaired aircraft may be operated for an adventure flight subject to the limitations (however described) stated in the certificate.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (2) or (3).

Penalty: 50 penalty units.

132.110 When adventure flights prohibited—certain aircraft that are not ex-armed forces or historic aircraft

- (1) This regulation applies to a limited category aircraft that is not an ex-armed forces aircraft or historic aircraft.
- (2) The operator of the aircraft contravenes this subregulation if:
- (a) the aircraft is used to conduct an adventure flight; and
 - (b) the aircraft meets the airworthiness requirements for the issue of a standard certificate of airworthiness.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

132.115 When adventure flights prohibited—aircraft with special flight permit

- (1) The operator of a limited category aircraft contravenes this subregulation if, when the aircraft begins an adventure flight, a special flight permit is in force for the aircraft.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

132.120 Requirements for pilot in command of adventure flights

- (1) The operator and the pilot in command of a limited category aircraft each contravene this subregulation if, when an adventure flight of the aircraft begins, the pilot in command does not meet a requirement (if any) mentioned in the adventure flight procedures for the aircraft for the pilot in command for the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: The pilot in command must also be otherwise authorised under Part 61 to conduct the flight: see paragraph 132.050(2)(g).

132.125 Unbroken round trips only

- (1) The operator of a limited category aircraft contravenes this subregulation if an adventure flight of the aircraft contravenes subregulation (2).
- (2) For subregulation (1), the flight must begin and end at the same landing area and must not involve a landing anywhere else.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

132.130 Sightseeing flights prohibited

- (1) The operator of a limited category aircraft contravenes this subregulation if an adventure flight of the aircraft is marketed or represented as a sightseeing flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

132.135 Clothes and equipment supplied by operator

- (1) The operator of a limited category aircraft contravenes this subregulation if:
-

Part 132 Limited category aircraft

Subpart 132.C Flying limited category aircraft—adventure flights

Division 132.C.1 Adventure flights—general requirements

Regulation 132.140

- (a) the operator supplies clothing or equipment to a passenger for an adventure flight of the aircraft; and
 - (b) the clothing or equipment is supplied to the passenger before the briefing mentioned in subregulation 132.155(2) is given to the passenger.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

132.140 Passengers who cannot understand safety briefing to be accompanied on adventure flights

- (1) The operator of a limited category aircraft contravenes this subregulation if:
- (a) the aircraft is used to conduct an adventure flight; and
 - (b) the person giving a passenger on the flight the briefing mentioned in subregulation 132.155(2) reasonably believes that the passenger is not able to understand the briefing; and
 - (c) the passenger is not accompanied on the flight by a parent, guardian or carer.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 132.C.2—Adventure flights—passenger safety briefings

132.145 Requirement for passenger safety briefing when booking

- (1) The operator of a limited category aircraft contravenes this subregulation if:
 - (a) a booking for the carriage of a passenger for an adventure flight of the aircraft is taken by:
 - (i) the operator or an employee or agent of the operator; or
 - (ii) a booking vendor for the aircraft; and
 - (b) before the booking is finalised, the person making the booking is not given a briefing that:
 - (i) complies with regulation 132.150; and
 - (ii) is in a language the person understands.
- (2) Subregulation (1) does not apply to the operator in relation to a booking taken by an agent of the operator or a booking vendor for the aircraft if, before the agent or vendor took the booking:
 - (a) the operator, or the administering authority for the aircraft, had instructed the agent or vendor that the agent or vendor must ensure that a briefing that complies with paragraph (1)(b) is given to a person making a booking for the carriage of a passenger on an adventure flight of the aircraft before finalising the booking; and
 - (b) the operator or the administering authority (as applicable) had given the agent or vendor the information that is necessary for the agent or vendor to give a briefing that complies with regulation 132.150.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

- (4) For the purposes of this regulation, a person is a **booking vendor** for a limited category aircraft if the person takes bookings for the carriage of passengers on adventure flights for the aircraft, but is not the operator of the aircraft or an employee or agent of the operator.

132.150 Content of passenger safety briefing when booking

For subparagraph 132.145(1)(b)(i), the briefing must include the following:

- (a) statements to the effect that:
 - (i) the design, manufacture and airworthiness of the aircraft are not required to meet any standard recognised by CASA; and
 - (ii) the aircraft is not required by CASA to be operated to the same safety standards as an aircraft used for air transport operations; and
 - (iii) travel in the aircraft is done at the passenger's own risk; and

Part 132 Limited category aircraft

Subpart 132.C Flying limited category aircraft—adventure flights

Division 132.C.2 Adventure flights—passenger safety briefings

Regulation 132.155

- (iv) a more detailed briefing about the safety of the aircraft will be given to the passenger before the passenger boards the aircraft;
- (b) if the person making the booking is not the passenger—information on the effect of regulation 132.155 (requirement for passenger safety briefing before boarding aircraft);
- (c) information on the effect of regulation 132.140 (passengers who cannot understand safety briefing to be accompanied on adventure flights).

132.155 Requirement for passenger safety briefing before boarding aircraft

- (1) The operator of a limited category aircraft contravenes this subregulation if:
 - (a) the aircraft is used to conduct an adventure flight; and
 - (b) the requirement mentioned in subregulation (2) is not met for a passenger for the flight.
- (2) For paragraph (1)(b), the requirement is that, on the day of the flight, before the passenger is taken to the aircraft, the passenger must be given a briefing that:
 - (a) complies with subregulation (4); and
 - (b) is in a language the passenger understands.
- (3) Subregulation (1) does not apply to the operator if:
 - (a) the passenger was carried on an earlier flight of the aircraft on the same day; and
 - (b) the requirement mentioned in subregulation (2) was met for the passenger for the earlier flight.
- (4) For paragraph (2)(a), the briefing must include the following:
 - (a) information comparing the safety of the aircraft with aircraft used for air transport operations, including that CASA does not require the aircraft to be operated to the same degree of safety as an aircraft used for air transport operations;
 - (b) information about the design, airworthiness and type certification of the aircraft, including that the design, manufacture and airworthiness of the aircraft are not required to meet any standard recognised by CASA;
 - (c) a statement of the risks associated with undertaking the flight;
 - (d) a statement to the effect that travel in the aircraft is done at the passenger's own risk;
 - (e) if the operator requires the passenger to wear safety equipment (other than a seat belt) during the flight—a statement that the safety equipment must be worn and information about its purpose.

Note: For other provisions about the safety of aircraft occupants, see Division 91.D.7.

- (5) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (3): see subsection 13.3(3) of the *Criminal Code*.

132.160 Acknowledgement by passengers who are at least 18 and who can understand passenger safety briefing

- (1) The operator of a limited category aircraft contravenes this subregulation if:
 - (a) the aircraft is used to conduct an adventure flight; and
 - (b) a passenger for the flight is at least 18; and
 - (c) the person giving the passenger the briefing mentioned in subregulation 132.155(2) reasonably believes that the passenger is able to understand the briefing; and
 - (d) the requirement mentioned in subregulation (2) is not met for the passenger for the flight.
- (2) For paragraph (1)(d), the requirement is that, on the day of the flight, before the passenger is taken to the aircraft:
 - (a) the passenger must be given a written copy of the briefing mentioned in subregulation 132.155(2) in a language the passenger understands; and
 - (b) the passenger must sign an acknowledgement, in a language that the passenger understands, that the passenger has received and understood:
 - (i) the briefing mentioned in subregulation 132.155(2); and
 - (ii) the written copy of the briefing.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

132.165 Acknowledgement for passengers under 18 or who cannot understand passenger safety briefing

- (1) The operator of a limited category aircraft contravenes this subregulation if:
 - (a) the aircraft is used to conduct an adventure flight; and
 - (b) either or both of the following apply to a passenger for the flight:
 - (i) the passenger is under 18;
 - (ii) the person giving the passenger for the flight the briefing mentioned in subregulation 132.155(2) reasonably believes that the passenger will not be able to understand the briefing; and
 - (c) the requirement mentioned in subregulation (2) is not met for the passenger for the flight.
- (2) For paragraph (1)(c), the requirement is that, before the passenger is taken to the aircraft:
 - (a) a parent, guardian or carer of the passenger must have been given a written copy of the briefing mentioned in subregulation 132.155(2) in a language the parent, guardian or carer understands; and
 - (b) the parent, guardian or carer of the passenger must have signed an acknowledgement, in a language that the parent, guardian or carer understands, that he or she has received and understood the written copy of the briefing.

Part 132 Limited category aircraft

Subpart 132.C Flying limited category aircraft—adventure flights

Division 132.C.2 Adventure flights—passenger safety briefings

Regulation 132.170

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

132.170 Retention of acknowledgements

- (1) The operator of a limited category aircraft contravenes this subregulation if:
- (a) the aircraft is used to conduct an adventure flight; and
 - (b) a signed acknowledgement mentioned in paragraph 132.160(2)(b) or 132.165(2)(b) for a passenger for the flight is not retained by the operator for at least 3 months after the day the flight ends.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Subpart 132.D—Limited category aircraft—certification and airworthiness requirements

Division 132.D.1—Certification and airworthiness—general

132.175 Advice about modifications, repairs, damage, defects and life-limited aeronautical products

Giving advice on request from aircraft operator

- (1) The operator of a limited category aircraft may, in writing, ask the administering authority for the aircraft for its advice about any of the following matters in relation to the aircraft:
 - (a) whether a modification or repair is a major modification or repair;
 - (b) whether damage is major damage;
 - (c) whether a defect is a major defect;
 - (d) whether a life-limited aeronautical product for the aircraft is a safety-critical aeronautical product for the aircraft.
- (2) If the administering authority for a limited category aircraft receives a request from the operator of the aircraft under subregulation (1) about a matter in relation to the aircraft, the authority must give the operator of the aircraft, in writing, its advice about the matter.

Giving advice on administering authority's initiative

- (3) The administering authority for a limited category aircraft may, on its own initiative, give the operator of the aircraft, in writing, the authority's advice about a matter mentioned in subregulation (1) in relation to the aircraft.

Note: Under regulation 47 of CAR:

- (a) damage to a limited category aircraft is taken not to be major damage if, under this regulation, advice has been given that the damage is not major damage; and
- (b) a defect in a limited category aircraft is taken not to be a major defect if, under this regulation, advice has been given that the defect is not a major defect.

132.180 Requirements for giving approvals, certificates and advice—individuals

Individuals must be authorised to give approvals, certificates and advice

- (1) An individual contravenes this subregulation if:
 - (a) the individual gives, on behalf of a limited category organisation, an approval, certificate or advice covered by subregulation (4) for a limited category aircraft; and
 - (b) the individual is not authorised under subregulation 132.185(1) by the organisation to give the advice, approval or certificate for the aircraft.

Part 132 Limited category aircraft

Subpart 132.D Limited category aircraft—certification and airworthiness requirements

Division 132.D.1 Certification and airworthiness—general

Regulation 132.185

Individuals must comply with relevant requirements when giving approvals, certificates and advice

- (2) An individual contravenes this subregulation if:
- (a) the individual gives, on behalf of a limited category organisation, an approval, certificate or advice covered by subregulation (4); and
 - (b) a procedure included in the organisation's manual for the purposes of paragraph 262AN(3)(d) of CAR applies to the individual and the approval, certificate or advice; and
 - (c) the individual does not comply with the procedure in relation to the giving of the approval, certificate or advice.
- (3) An individual contravenes this subregulation if:
- (a) the individual gives, on behalf of a limited category organisation, an approval, certificate or advice covered by subregulation (4); and
 - (b) the approval, certificate or advice is covered by a requirement prescribed by the Part 132 Manual of Standards; and
 - (c) the individual does not comply with the requirement.

Kinds of approvals, certificates and advice

- (4) The approvals, certificates and advice covered by this subregulation are:
- (a) certificates of airworthiness;
 - (b) an approval mentioned in regulation 132.030 (approval of modifications and repairs);
 - (c) a certificate mentioned in subregulation 132.105(3) (operation of an aircraft that has a major modification or repair for an adventure flight subject to limitations);
 - (d) a certificate stating an airframe life for the aircraft's airframe given by the administering authority for the aircraft;
 - (e) advice under regulation 132.175 (advice about modifications, repairs, damage etc.);
 - (f) an approval or certificate prescribed by the Part 132 Manual of Standards under subparagraph 262AN(3)(d)(vi) of CAR.

Offence

- (5) A person commits an offence of strict liability if the person contravenes subregulation (1), (2) or (3).

Penalty: 50 penalty units.

132.185 Authorisations to give approvals, certificates and advice for limited category aircraft

How individuals become authorised to give approvals, certificates and advice

- (1) An individual is authorised under this subregulation to give, on behalf of a limited category organisation, an approval, a certificate or advice of a kind
-

covered by subregulation 132.180(4) for a limited category aircraft if the individual holds a written authorisation, issued by the limited category organisation, to give the approval, certificate or advice for the aircraft.

Individuals must have relevant qualifications and experience

- (2) A limited category organisation must not issue an authorisation to an individual for the purposes of subregulation (1) unless the organisation is satisfied that the individual has the qualifications and experience prescribed by the Part 132 Manual of Standards.

Approvals, certificates and advice given on behalf of limited category organisations

- (3) If an individual is authorised under subregulation (1) by a limited category organisation, approvals, certificates and advice given by the individual in accordance with the approval are taken, for the purposes of these Regulations (other than regulation 132.180), to have been given by the limited category organisation.

132.190 Requirements for giving approvals, certificates and advice—limited category organisations

- (1) A limited category organisation contravenes this subregulation if:
- (a) the organisation gives an approval, certificate or advice covered by subregulation 132.180(4); and
 - (b) a procedure included in the organisation's manual for the purposes of paragraph 262AN(3)(d) of CAR is not complied with in relation to the giving of the approval, certificate or advice.
- (2) A limited category organisation contravenes this subregulation if:
- (a) the organisation gives an approval, certificate or advice covered by subregulation 132.180(4); and
 - (b) the approval or certificate is covered by a requirement prescribed by the Part 132 Manual of Standards; and
 - (c) the organisation does not comply with the requirement.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

Division 132.D.2—Certification and airworthiness—permit index numbers

132.195 Assignment of permit index numbers—general

- (1) A permit index number assigned to a limited category aircraft must:
 - (a) meet the requirements prescribed by the Part 132 Manual of Standards for the assignment of the number; and
 - (b) not be likely to have an adverse effect on the safety of other airspace users or persons on the ground or water.
- (2) A permit index number must be a whole number from 0 to 3.

Note: For the assignment of a permit index number with the issue of a limited category certificate, see subregulation 21.176(5).

132.200 Assignment of new permit index numbers on initiative of administering authority

The administering authority for a limited category aircraft must assign a new permit index number to the aircraft if satisfied that the aircraft's existing permit index number does not comply with regulation 132.195.

Note: See also regulation 132.230 (Notice to CASA—certain proposed actions by limited category organisation).

132.205 Assignment of new permit index numbers at CASA direction

- (1) This regulation applies if:
 - (a) there is a limited category organisation in relation to a limited category aircraft; and
 - (b) CASA is satisfied that the aircraft's existing permit index number does not comply with regulation 132.195.
- (2) CASA must direct the organisation to assign a new permit index number to the aircraft.
- (3) The organisation contravenes this subregulation if it does not comply with the direction.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (3).

Penalty: 50 penalty units.

132.210 Assignment of new permit index numbers on application by registered operator

- (1) The registered operator of a limited category aircraft may apply, in writing, to the administering authority for the aircraft for the assignment of a new permit index number for the aircraft.
- (2) Part 11 applies to an application mentioned in subregulation (1) as if a permit index number were an authorisation (within the meaning of Part 11).
- (3) Subject to regulation 11.055, the administering authority must assign a new permit index number to the aircraft.

Note: See also regulation 132.230 (notice to CASA—certain proposed actions by limited category organisation).

132.215 When assignment of new permit index number takes effect

An assignment of a new permit index number for a limited category aircraft takes effect when the aircraft's registered operator is given, under regulation 132.200, 132.205 or 132.210, a reissued limited category certificate for the aircraft, or a reissued attachment to the certificate, that includes the new number.

Note: The permit index number initially assigned to the aircraft must be included in the limited category certificate or an attachment to the certificate: see paragraph 21.176(5A)(b).

132.220 Notice to operator if new permit index number assigned

If a new permit index number is assigned to a limited category aircraft, and the registered operator is not the aircraft's operator, the administering authority for the aircraft must give written notice of the assignment of the new permit index number to the aircraft's operator.

Division 132.D.3—Certification and airworthiness—notice to CASA of certain matters

132.225 Notice to CASA—permit index numbers assigned by limited category organisation for aircraft

- (1) This regulation applies if a permit index number is assigned to a limited category aircraft under subregulation 21.176(5) or Division 132.D.2 by a limited category organisation.
- (2) The limited category organisation contravenes this subregulation if the organisation does not give CASA written notice of the assignment of the number in accordance with subregulation (3).
- (3) The notice must:
 - (a) include the aircraft's registration mark and the permit index number assigned to the aircraft; and
 - (b) be given not later than 14 days after the day the number is assigned.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 10 penalty units.

132.230 Notice to CASA—certain proposed actions by limited category organisation

- (1) This regulation applies if a limited category organisation proposes to:
 - (a) refuse to issue a limited category certificate;
 - (b) refuse to vary a limited category certificate.
- (2) This regulation also applies if:
 - (a) a limited category organisation proposes to assign a new permit index number to a limited category aircraft under Division 132.D.2; and
 - (b) the aircraft's existing permit index number was assigned by CASA.
- (3) The limited category organisation contravenes this subregulation if it does not give CASA notice of the proposed action in accordance with the organisation's operations manual.
- (4) CASA may give the limited category organisation any advice or comments it considers appropriate in relation to the proposed action within the period mentioned in the manual.
- (5) The limited category organisation contravenes this subregulation if it does not have regard to any advice or comments given to it by CASA under subregulation (4) when deciding whether to take the action.

- (6) A person commits an offence of strict liability if the person contravenes subregulation (3) or (5).

Penalty: 10 penalty units.

132.235 Notice to CASA—safety of aircraft

- (1) This regulation applies if a limited category organisation reasonably believes that:
- (a) a matter exists in relation to a limited category aircraft; and
 - (b) CASA might want to exercise its powers under subregulation 21.181(6) to suspend or cancel the aircraft's limited category certificate because of the matter.
- (2) The organisation must give CASA notice of the matter in accordance with the organisation's operations manual.

Part 132 Limited category aircraft

Subpart 132.M Limited category aircraft—airworthiness and maintenance

Subpart 132.M—Limited category aircraft—airworthiness and maintenance

Note: This Subpart is reserved for future use.

Part 133—Australian air transport operations—rotorcraft

Table of contents

Subpart 133.A—Preliminary

- 133.005 Application of Part 133
- 133.010 Definition of *suitable forced landing area* for rotorcraft flights
- 133.015 Approvals by CASA for Part 133
- 133.020 Issue of Manual of Standards for Part 133

Subpart 133.C—General

Division 133.C.1—General flight limitations

- 133.025 Permitted categories of rotorcraft

Division 133.C.2—Operational documents

- 133.030 Compliance with flight manual
- 133.035 Operator to have minimum equipment list for certain flights
- 133.040 Availability of checklists

Division 133.C.3—Flight related documents

- 133.045 Electronic documents
- 133.050 Availability of parts of exposition
- 133.055 Carriage of documents
- 133.060 Availability or carriage of documents for certain flights
- 133.065 Carriage of documents—flights that begin or end outside Australian territory
- 133.070 Keeping and updating documents etc.
- 133.075 Journey logs
- 133.080 Passenger lists
- 133.085 Flight preparation forms for flights that begin or end outside Australian territory

Division 133.C.4—Reporting and recording defects and incidents etc.

- 133.090 Procedures for reporting and recording defects etc.
- 133.095 Procedures for reporting and recording incidents

Division 133.C.5—Search and rescue services and emergency and survival equipment

- 133.100 Information about search and rescue services
- 133.105 Information about emergency and survival equipment

Division 133.C.6—Miscellaneous requirements

- 133.110 Crew activities necessary for safe operation
- 133.115 Competence of ground support personnel
- 133.120 Crew station authorisation and briefing

Subpart 133.D—Operational procedures

Division 133.D.1—Operational control

133.125 Operational control

Division 133.D.2—Flight preparation

133.130 Flight preparation requirements

Division 133.D.3—Flight planning

133.135 Operational flight plans

133.140 Availability of flight planning information

Division 133.D.4—Flight rules

133.145 Take-off and landing minima

133.150 Flights to or from foreign countries that do not use ICAO procedures

133.155 Authorised instrument approach procedures not in the AIP

133.160 Exposition requirements for low-visibility operations

133.165 IFR flights without destination alternate aerodromes

133.167 Minimum height rules for medical transport operations

Division 133.D.5—Aerodromes

133.170 Procedures to determine information about aerodromes

133.175 Procedures for safety at aerodromes

Division 133.D.6—Fuel requirements

133.180 Fuel procedures

133.185 Oil requirements

133.190 Fuel requirements

133.195 Fuelling safety procedures

Division 133.D.7—Passenger transport and medical transport

133.200 Application of Division 133.D.7

133.205 Simulation of emergency or abnormal situations

133.210 Carriage of restricted persons

133.215 Carry-on baggage

133.220 Obstruction of emergency exits

133.225 Passengers in seats adjacent to emergency exits

133.230 Carriage of passengers with reduced mobility

133.235 Safety briefing cards

133.240 Safety briefings, instructions and demonstrations

133.245 Safety briefing in the event of an emergency

Division 133.D.8—Instruments, indicators, equipment and systems

133.250 Airborne weather radar equipment

133.255 Head-up displays, enhanced vision systems and synthetic vision systems

133.260 Survival equipment procedures

133.265 NVIS flights

133.270 Securing moveable equipment

Division 133.D.9—Miscellaneous

- 133.275 Procedures relating to ice
- 133.280 Procedures relating to portable electronic devices
- 133.285 Procedures relating to carriage of animals
- 133.290 Polar operations
- 133.295 External load operations involving winching a person

Subpart 133.F—Performance

- 133.305 Take-off performance
- 133.310 Landing performance
- 133.315 Flight in a performance class
- 133.320 Rotorcraft permitted to fly in performance class 1 or 2, or performance class 2 with exposure
- 133.325 Flight in performance class 2 with exposure
- 133.330 Flight in performance class 1 for certain rotorcraft
- 133.335 Flight in performance class 1 or 2, or performance class 2 with exposure for certain rotorcraft
- 133.340 Flight in performance class 3 over populous areas

Subpart 133.J—Weight and balance

- 133.345 Loading of rotorcraft
- 133.350 Procedures for loading rotorcraft etc.
- 133.355 Weight and balance documents

Subpart 133.K—Equipment

- 133.360 Requirements relating to equipment

Subpart 133.N—Flight crew

Division 133.N.1—General

- 133.370 Composition, number, qualifications and training
- 133.375 Competence
- 133.377 Training and checking to be conducted by certain persons
- 133.380 Assignment to duty of pilot in command
- 133.385 Pilot in command
- 133.390 Co-pilot
- 133.395 Pilot in command in non-command pilot's seat
- 133.400 Knowledge of route and aerodromes

Division 133.N.2—Flight crew training—miscellaneous

Division 133.N.3—Operation of rotorcraft of different types

- 133.410 Application of Division 133.N.3
- 133.415 Assignment of flight crew to different multi-engine rotorcraft

Division 133.N.4—Recent experience

- 133.420 Recent experience requirements—90 days before flight

Subpart 133.P—Crew other than flight crew

Division 133.P.1—Cabin crew

- 133.425 Number, qualifications, experience and training
- 133.430 Competence
- 133.435 Minimum age
- 133.440 English proficiency
- 133.445 Assignment to duty as senior cabin crew member
- 133.450 Training and checking requirements for senior cabin crew member

Division 133.P.2—Air crew

- 133.455 Training and checking
- 133.460 Competence
- 133.465 English proficiency

Division 133.P.3—Medical transport specialists

- 133.470 Training and checking
- 133.475 Competence

Subpart 133.A—Preliminary

133.005 Application of Part 133

This Part applies in relation to the operation of a rotorcraft for an Australian air transport operation.

133.010 Definition of *suitable forced landing area* for rotorcraft flights

Areas of ground

- (1) An area of ground is a ***suitable forced landing area*** for a flight of a rotorcraft if the rotorcraft could make a forced landing in the area with a reasonable expectation that there would be no injuries to persons in the rotorcraft or on the ground.

Areas of water

- (2) An area of water that meets the requirements mentioned in subregulation (3) is a ***suitable forced landing area*** for a flight of a rotorcraft if the rotorcraft:
 - (a) is equipped with emergency flotation equipment; or
 - (b) has a type certificate or supplemental type certificate for landing on water.
- (3) For the purposes of subregulation (2), the requirements are the following:
 - (a) the rotorcraft must be able to ditch in the area of water with a reasonable expectation that there would be no injuries to persons in the rotorcraft or on the water;
 - (b) there must be a reasonable expectation that persons in the rotorcraft would survive in the area of water for the time that it would take to rescue the persons;
 - (c) if the flight is a passenger transport operation or a medical transport operation—the area of water must be:
 - (i) adjacent to land; or
 - (ii) adjacent to an offshore installation with search and rescue capabilities; or
 - (iii) in a location, set out in the rotorcraft operator’s exposition, that has search and rescue capabilities.
- (4) Factors that affect whether there is a reasonable expectation about the matters mentioned in paragraphs (3)(a) and (b) include the following:
 - (a) the surface condition of the area of water, including the wave height, wind conditions and swell;
 - (b) the limits of the capability of the rotorcraft’s emergency flotation system to stay upright and floating in certain sea states.

Regulation 133.015

133.015 Approvals by CASA for Part 133

- (1) If a provision of this Part, or of the Part 133 Manual of Standards, refers to a person holding an approval under this regulation, a person may apply to CASA, in writing, for the approval.
- (2) Subject to regulation 11.055, the approval must be granted.
- (3) Subregulation 11.055(1B) applies to the granting of an approval under this regulation.

133.020 Issue of Manual of Standards for Part 133

For the purposes of subsection 98(5A) of the Act, CASA may issue a Manual of Standards for this Part prescribing matters:

- (a) required or permitted by these Regulations to be prescribed by the Part 133 Manual of Standards; or
- (b) necessary or convenient to be prescribed for carrying out or giving effect to this Part.

Note: A Manual of Standards is a legislative instrument: see subsection 98(5AA) of the Act.

Subpart 133.C—General

Division 133.C.1—General flight limitations

133.025 Permitted categories of rotorcraft

- (1) The operator of a rotorcraft for a flight contravenes this subregulation if:
 - (a) the rotorcraft begins the flight; and
 - (b) the rotorcraft is not type certificated in any of the following categories:
 - (i) transport;
 - (ii) normal;
 - (iii) a category prescribed by the Part 133 Manual of Standards.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 133.C.2—Operational documents

133.030 Compliance with flight manual

- (1) The operator and the pilot in command of a rotorcraft for a flight each contravene this subregulation if, during the flight, the rotorcraft is operated in a way that does not meet a requirement or limitation that:
 - (a) is set out in the aircraft flight manual instructions for the rotorcraft; and
 - (b) relates to the operation of the rotorcraft.

Note: The pilot in command of the rotorcraft must also ensure the rotorcraft is operated in accordance with the aircraft flight manual instructions: see regulation 91.095.

- (2) Subregulation (1) does not apply to a requirement or limitation if:
 - (a) circumstances prescribed by the Part 133 Manual of Standards exist for the flight; and
 - (b) the requirement or limitation is of a kind prescribed by the Part 133 Manual of Standards for those circumstances.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

133.035 Operator to have minimum equipment list for certain flights

- (1) The operator of a rotorcraft for a flight contravenes this subregulation if:
 - (a) the flight is either or both of the following:
 - (i) an IFR flight;
 - (ii) a flight that begins or ends at an aerodrome outside Australian territory; and
 - (b) there is a master minimum equipment list for the rotorcraft; and
 - (c) when the flight begins, there is no minimum equipment list for the rotorcraft.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

133.040 Availability of checklists

- (1) The operator of a rotorcraft for a flight contravenes this subregulation if the requirement mentioned in subregulation (2) is not met for the flight.
- (2) The requirement is that, before a crew member for the flight begins to carry out a duty for the flight, the operator must make available to the member each

Regulation 133.040

checklist of normal, abnormal and emergency procedures for the rotorcraft that is relevant to the duty.

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 133.C.3—Flight related documents

133.045 Electronic documents

To avoid doubt, if a document is required to be carried on a flight of a rotorcraft under this Division, that requirement is taken to be satisfied if an electronic copy of the document is carried on the flight.

Note: Electronic copies may not satisfy the requirements of the law of a foreign country for flights that begin or end at an aerodrome outside Australian territory.

133.050 Availability of parts of exposition

- (1) The operator of a rotorcraft for a flight contravenes this subregulation if the following parts of the rotorcraft operator's exposition are not available to a crew member for the flight before the flight begins:
 - (a) a part that is relevant to the duties of the crew member for the flight;
 - (b) a part that is required for the conduct of the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

133.055 Carriage of documents

Documents required by the Part 133 Manual of Standards

- (1) The operator and the pilot in command of a rotorcraft for a flight each contravene this subregulation if:
 - (a) a document prescribed by the Part 133 Manual of Standards for the purposes of this paragraph is not carried on the rotorcraft; and
 - (b) the rotorcraft begins the flight.

Flight crew medical certificates

- (2) The operator and a flight crew member for a flight of a rotorcraft each contravene this subregulation if:
 - (a) the flight crew member's medical certificate is not carried on the rotorcraft for the flight; and
 - (b) the flight crew member does not give CASA written notice that the certificate is not being carried on the rotorcraft for the flight:
 - (i) before the flight begins; or
 - (ii) if it is not practicable to give the notice before the flight begins—within 24 hours after the flight ends.

Flight crew licences

- (3) The operator and a flight crew member for a flight of a rotorcraft each contravene this subregulation if:
- (a) the flight crew member's flight crew licence is not carried on the rotorcraft for the flight; and
 - (b) the flight crew member does not give CASA written notice that the licence is not being carried on the rotorcraft for the flight:
 - (i) before the flight begins; or
 - (ii) if it is not practicable to give the notice before the flight begins—within 24 hours after the flight ends.

Offence

- (4) A person commits an offence of strict liability if the person contravenes subregulation (1), (2) or (3).

Penalty: 50 penalty units.

133.060 Availability or carriage of documents for certain flights

Flights for which documents must be carried

- (1) The operator and the pilot in command of a rotorcraft for a flight each contravene this subregulation if:
- (a) the flight is:
 - (i) an IFR flight; or
 - (ii) a VFR flight at night; or
 - (iii) a flight during which the rotorcraft will not remain within 50 nautical miles of the departure aerodrome; and
 - (b) when the flight begins, a document mentioned in subregulation (4) is not carried on the rotorcraft.

Flights for which documents must be available or carried

- (2) The operator and the pilot in command of a rotorcraft for a flight each contravene this subregulation if:
- (a) the rotorcraft begins a VFR flight by day during which the rotorcraft will remain within 50 nautical miles of the departure aerodrome; and
 - (b) the requirement mentioned in subregulation (3) is not met.
- (3) The requirement is that each document mentioned in subregulation (4) must be:
- (a) available to the pilot in command immediately before the flight; or
 - (b) carried on the rotorcraft.

Required documents

- (4) The documents are the following:

Regulation 133.065

- (a) if a flight notification is required for the flight under Part 91—the flight notification;
- (b) weight and balance documents for the flight;
- (c) NOTAMs and AIS briefing documents for the flight;
- (d) authorised weather forecasts for:
 - (i) the planned route of the flight; and
 - (ii) the planned area of operation for the flight; and
 - (iii) if a destination alternate aerodrome is required for the flight by the flight preparation (alternate aerodromes) requirements—the destination alternate aerodrome;
- (e) if there is a person on board who may require special consideration during the flight or during an evacuation of the rotorcraft—a statement identifying the person and the special consideration;
- (f) forms to comply with the reporting requirements under the operator’s safety management system;
- (g) if the rotorcraft is fitted with computerised navigation equipment—the operating instructions for the equipment;
- (h) each other document (if any) required by a foreign country within whose territory the flight is conducted.

Offence

- (5) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

133.065 Carriage of documents—flights that begin or end outside Australian territory

- (1) This regulation applies to a flight of a rotorcraft that begins or ends at an aerodrome outside Australian territory.
- (2) However, this regulation does not apply to a flight of a rotorcraft if:
 - (a) the flight:
 - (i) begins in Australia and ends at a helideck outside Australian territory;
or
 - (ii) begins at a helideck outside Australian territory and ends in Australia;
and
 - (b) the flight is not part of a multi-flight journey that begins or ends at an aerodrome that is outside Australian territory.
- (3) The operator and the pilot in command of a rotorcraft for a flight each contravene this subregulation if:
 - (a) a document prescribed by the Part 133 Manual of Standards for the purposes of this paragraph is not carried on the rotorcraft; and
 - (b) the rotorcraft begins the flight.

- (4) A person commits an offence of strict liability if the person contravenes subregulation (3).

Penalty: 50 penalty units.

133.070 Keeping and updating documents etc.

A rotorcraft operator's exposition must include the following for a flight of the rotorcraft:

- (a) procedures for keeping the documents prescribed by the Part 133 Manual of Standards accessible to a person on the ground for the duration of the flight;
- (b) procedures for providing updated information in relation to the flight to a person on the ground if:
 - (i) the flight is part of a multi-flight journey; and
 - (ii) a copy of a document for the flight has been kept on the ground in relation to an earlier flight that is part of the multi-flight journey; and
 - (iii) the information in the document requires updating; and
 - (iv) it is not practicable to keep a copy of the updated document on the ground;
- (c) the circumstances in which a person on the ground who has access to the information about the flight mentioned in paragraphs (a) and (b) may provide that information to another person;
- (d) procedures for providing information in a circumstance mentioned in paragraph (c).

133.075 Journey logs

Operator—preparation of journey log

- (1) The operator of a rotorcraft for a flight contravenes this subregulation if, when the flight begins, the operator has not prepared a journey log for the flight:
- (a) that is capable of containing the information mentioned in subregulations (3) and (6); and
 - (b) with a place for the pilot in command to verify the entries for the flight.

Pre-flight completion of journey log

- (2) The operator and the pilot in command of a rotorcraft for a flight each contravene this subregulation if, when the flight begins, the information about the flight mentioned in subregulation (3) is not recorded in the journey log.
- (3) The information is the following:
- (a) the rotorcraft's registration mark and flight number (if any);
 - (b) the date of the flight;
 - (c) for each crew member assigned to the flight:
 - (i) the crew member's name; and
 - (ii) the duties assigned to the crew member for the flight;

Regulation 133.080

- (d) for the flight:
 - (i) the place of departure; and
 - (ii) the time the flight begins;
 - (e) the amount of fuel added to the rotorcraft's fuel tanks before the flight begins (if any);
 - (f) the amount of fuel in the rotorcraft's fuel tanks when the flight begins.
- (4) Subregulation (2) does not apply if:
- (a) the flight is a medical transport operation; and
 - (b) the information mentioned in that subregulation is not recorded in the journey log before the flight begins because of the urgent nature of the medical transport operation; and
 - (c) the pilot in command is satisfied, when the flight begins, that the failure to record the information in the journey log before the flight begins will not affect the safety of the rotorcraft; and
 - (d) the information is recorded in the journey log as soon as practicable after the flight ends.

Post-flight completion of journey log

- (5) The operator and the pilot in command of a rotorcraft for a flight each contravene this subregulation if the information about the flight mentioned in subregulation (6) is not recorded in the journey log for the flight as soon as practicable after the flight ends.
- (6) The information is the following:
- (a) the place of arrival;
 - (b) the time the flight ends;
 - (c) the duration of the flight;
 - (d) the amount of fuel in the rotorcraft's fuel tanks when the flight ends;
 - (e) incidents and observations (if any) relevant to the flight.

Offence

- (7) A person commits an offence of strict liability if the person contravenes subregulation (1), (2) or (5).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (4): see subsection 13.3(3) of the *Criminal Code*.

133.080 Passenger lists

- (1) The operator of a rotorcraft for a flight that is a passenger transport operation contravenes this subregulation if, when the flight begins, the operator has not prepared a passenger list for the flight that contains the information mentioned in subregulation (2).
- (2) The information is the following:
-

Regulation 133.085

- (a) the rotorcraft's registration mark and flight number (if any);
 - (b) the name of each passenger;
 - (c) the places of departure and destination for each passenger;
 - (d) the number of infants carried;
 - (e) the date, and estimated time of departure, of the flight.
- (3) Subregulation (1) does not apply to the operator in relation to information mentioned in that subregulation if, by the time it is required to be recorded, the information is:
- (a) recorded in another document kept by the operator; or
 - (b) readily available to the operator from another source.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (3): see subsection 13.3(3) of the *Criminal Code*.

133.085 Flight preparation forms for flights that begin or end outside Australian territory

- (1) This regulation applies to a flight of a rotorcraft that begins or ends at an aerodrome outside Australian territory.
- (2) However, this regulation does not apply to a flight of a rotorcraft if:
- (a) the flight:
 - (i) begins in Australia and ends at a helideck outside Australian territory; or
 - (ii) begins at a helideck outside Australian territory and ends in Australia; and
 - (b) the flight is not part of a multi-flight journey that begins or ends at an aerodrome that is outside Australian territory.
- (3) The operator and the pilot in command of a rotorcraft for a flight each contravene this subregulation if, when the flight begins, the pilot in command has not signed a flight preparation form certifying that the pilot in command is satisfied of the matters mentioned in subregulation (4).
- (4) The matters are the following:
- (a) the rotorcraft can be operated during the flight in accordance with its configuration deviation list (if any);
 - (b) the parts of the operator's exposition required to be available to the rotorcraft's crew before the flight by regulation 133.050 are available;
 - (c) the requirements and limitations in the operator's exposition relating to the flight can be complied with for the flight;
 - (d) regulations 133.055, 133.060 and 133.065 are being complied with for the flight;

Regulation 133.085

- (e) equipment required, under Subpart 133.K, to be fitted to, or carried on, the rotorcraft for the flight is fitted to, or carried on, the rotorcraft in accordance with that Subpart;
 - (f) equipment mentioned in paragraph (e) is:
 - (i) operative; or
 - (ii) inoperative, and permitted to be inoperative for the flight under these Regulations;
 - (g) the rotorcraft's take-off, en-route and landing performance capabilities meet the performance requirements for the circumstances and conditions expected during the flight;
 - (h) the rotorcraft's weight and balance will remain within the rotorcraft's weight and balance limits throughout the flight.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (3).

Penalty: 50 penalty units.

Division 133.C.4—Reporting and recording defects and incidents etc.

133.090 Procedures for reporting and recording defects etc.

A rotorcraft operator's exposition must include procedures for the reporting and recording, by a flight crew member for a flight of the rotorcraft, of any of the following that occur during the flight:

- (a) an abnormal instrument indication;
- (b) abnormal flight conditions;
- (c) abnormal behaviour by the rotorcraft;
- (d) exceedence of an operating limit specified in the aircraft flight manual instructions for the rotorcraft;
- (e) a defect in the rotorcraft.

133.095 Procedures for reporting and recording incidents

A rotorcraft operator's exposition must include procedures for the reporting and recording by crew members of incidents relating to a flight of the rotorcraft that endanger, or could endanger, the safe operation of the rotorcraft.

Division 133.C.5—Search and rescue services and emergency and survival equipment

133.100 Information about search and rescue services

- (1) The operator of a rotorcraft for a flight contravenes this subregulation if, when the flight begins, information about the search and rescue services relevant to the flight is not readily accessible to the flight crew members for the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

133.105 Information about emergency and survival equipment

- (1) The operator of a rotorcraft for a flight contravenes this subregulation if:
 - (a) the Part 133 Manual of Standards prescribes an item of equipment for the purposes of this regulation; and
 - (b) when the flight begins, the information prescribed by the Part 133 Manual of Standards for that equipment is not available for immediate communication by the operator to a rescue coordination centre.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 133.C.6—Miscellaneous requirements

133.110 Crew activities necessary for safe operation

- (1) The operator of a rotorcraft for a flight contravenes this subregulation if:
 - (a) the operator requires a crew member for the flight to perform an activity during take-off, initial climb, final approach or landing of the rotorcraft for the flight; and
 - (b) the activity is not necessary for the safe operation of the rotorcraft.
- (2) A crew member for a flight of a rotorcraft contravenes this subregulation if:
 - (a) the crew member performs an activity during take-off, initial climb, final approach or landing of the rotorcraft for the flight; and
 - (b) the activity is not necessary for the safe operation of the rotorcraft.
- (3) Subregulations (1) and (2) do not apply if:
 - (a) the flight is a medical transport operation; and
 - (b) the crew member is a medical transport specialist; and
 - (c) the activity relates to providing care to a medical patient; and
 - (d) the crew member is satisfied that:
 - (i) it is essential to perform the activity; and
 - (ii) performing the activity will not affect the safe operation of the rotorcraft.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (3): see subsection 13.3(3) of the *Criminal Code*.

133.115 Competence of ground support personnel

- (1) The operator of a rotorcraft for a flight contravenes this subregulation if, before a member of the operator's personnel carries out a ground support duty for the flight, the member has not met a requirement mentioned in subregulation (2).
- (2) The requirements are the following:
 - (a) the member must have successfully completed training for the duty;
 - (b) the member must have been assessed as competent to carry out the duty.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Regulation 133.120

133.120 Crew station authorisation and briefing

- (1) The operator and the pilot in command of a rotorcraft for a flight each contravene this subregulation if:
 - (a) during the flight, a person occupies a crew station; and
 - (b) the person is not a person mentioned in subregulation (2).
- (2) The persons are the following:
 - (a) a flight crew member assigned to duty for the flight by the operator;
 - (b) another crew member authorised by the operator and the pilot in command to occupy the crew station during the flight;
 - (c) an authorised officer who is carrying out an audit, check, examination, inspection or test under these Regulations;
 - (d) a person who is permitted by the operator's exposition to occupy the crew station.
- (3) The pilot in command of a rotorcraft for a flight contravenes this subregulation if:
 - (a) during the flight, a person other than a member of the rotorcraft's crew occupies a crew station; and
 - (b) before the person occupies the crew station, the pilot in command does not cause the person to be briefed on the safety procedures that are relevant to the crew station.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1) or (3).

Penalty: 50 penalty units.

Subpart 133.D—Operational procedures

Division 133.D.1—Operational control

133.125 Operational control

A rotorcraft operator's exposition must include procedures for determining how operational control for a flight of the rotorcraft is to be exercised and by whom.

Division 133.D.2—Flight preparation

133.130 Flight preparation requirements

A rotorcraft operator's exposition must include procedures for complying with the following for a flight of the rotorcraft:

- (a) the flight preparation (weather assessments) requirements;
- (b) the flight preparation (alternate aerodromes) requirements.

Division 133.D.3—Flight planning

133.135 Operational flight plans

- (1) The operator and the pilot in command of a rotorcraft for a flight each contravene this subregulation if:
 - (a) the flight is:
 - (i) an IFR flight; or
 - (ii) a VFR flight at night; or
 - (iii) a flight during which the rotorcraft will not remain within 50 nautical miles of the departure aerodrome; and
 - (b) when the flight begins, an operational flight plan that meets the requirements mentioned in subregulation (2) has not been prepared for the flight.
 - (2) The requirements are the following:
 - (a) the flight plan must be prepared having regard to:
 - (i) the safety of the rotorcraft, and of the people on board the rotorcraft, during the flight; and
 - (ii) the rotorcraft's performance; and
 - (iii) the expected rotorcraft operating limitations and conditions for the flight; and
 - (iv) meteorological conditions for the flight;
 - (b) the flight plan must contain the information prescribed by the Part 133 Manual of Standards for the purposes of this paragraph.
 - (3) The operator and the pilot in command of a rotorcraft for a flight each contravene this subregulation if:
 - (a) the Part 133 Manual of Standards prescribes information about the flight for the purposes of this subregulation; and
 - (b) that information is not recorded in the operational flight plan for the flight:
 - (i) before the flight ends; or
 - (ii) if it is not practicable to record the information before the flight ends—as soon as practicable after the flight ends.
 - (4) Subregulation (1) or (3) does not apply to the operator or the pilot in command in relation to information required to be included in the operational flight plan under that subregulation if, by the time it is required to be recorded, the information is:
 - (a) recorded in another document kept by the operator; or
 - (b) readily available to the operator from another source.
- Note: An example for paragraph (a) is a journey log kept by the operator for the flight.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (1) or (3).

Regulation 133.140

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (4): see subsection 13.3(3) of the *Criminal Code*.

133.140 Availability of flight planning information

- (1) The operator of a rotorcraft for a flight contravenes this subregulation if a requirement mentioned in subregulation (2) is not met for the flight.
- (2) The requirements are the following:
 - (a) the pilot in command of the rotorcraft must have access to the information mentioned in subregulation (3) before and during the flight;
 - (b) each person in the operator's organisation who is responsible for flight planning for the flight must have access to the information mentioned in subregulation (3) before the flight;
 - (c) each person in the operator's organisation who is responsible for flight replanning for the flight must have access to the information mentioned in subregulation (3) during the flight;
 - (d) each person in the operator's organisation who exercises operational control for the flight must have access to the information mentioned in subregulation (3) before and during the flight.
- (3) The information is the following:
 - (a) authorised weather forecasts and authorised weather reports:
 - (i) in relation to the flight; and
 - (ii) if a destination alternate aerodrome is required for the flight by the flight preparation (alternate aerodromes) requirements—in relation to the destination alternate aerodrome;
 - (b) NOTAMs for the flight;
 - (c) the suitability for a take-off or landing by the rotorcraft of:
 - (i) the departure and planned destination aerodrome for the flight; and
 - (ii) if a destination alternate aerodrome is required for the flight by the flight preparation (alternate aerodromes) requirements—the destination alternate aerodrome.
- (4) Subregulation (1) does not apply in relation to information mentioned in subparagraph (3)(c)(i) about the planned destination aerodrome, if:
 - (a) when the flight begins, the rotorcraft is carrying sufficient fuel to allow the flight to be continued to another aerodrome that is suitable for the safe landing of the rotorcraft if the rotorcraft cannot land at the planned destination aerodrome; and
 - (b) before starting an approach to land at the planned destination aerodrome, the pilot in command for the flight determines, in accordance with the procedures included in the operator's exposition under regulation 133.170, that the planned destination aerodrome is suitable to land at.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (4):
see subsection 13.3(3) of the *Criminal Code*.

Division 133.D.4—Flight rules

133.145 Take-off and landing minima

- (1) If a rotorcraft conducts an IFR flight to or from an aerodrome, the rotorcraft operator's exposition must include:
 - (a) procedures for determining take-off minima that meet the requirements mentioned in subregulation (2); and
 - (b) procedures for determining landing minima that meet the requirement mentioned in subregulation (3).
- (2) The requirements are the following:
 - (a) the take-off minima must not be less than the take-off minima prescribed by the take-off minima requirements for the aerodrome;
 - (b) the take-off minima must be sufficient to enable the pilot in command to control the rotorcraft, in an emergency, in a way that ensures there is no undue hazard to a person on the ground or water under the rotorcraft's flight path;
 - (c) for a multi-engine rotorcraft flown in performance class 1—the take-off minima must be sufficient to enable the pilot in command to reject or continue a take-off safely if one engine fails;
 - (d) for a multi-engine rotorcraft flown in performance class 2—the take-off minima must be sufficient to enable the pilot in command to:
 - (i) manoeuvre the rotorcraft safely to reach a suitable forced landing area; or
 - (ii) continue a take-off if one engine fails after the defined point after take-off;
 - (e) for a multi-engine rotorcraft flown in performance class 2 with exposure—the take-off minima must be sufficient to enable the pilot in command to continue a take-off if one engine fails after the defined point after take-off.
- (3) The requirement is that the landing minima must not be less than the landing minima prescribed by the landing minima requirements for the aerodrome, including for an approach with visual circling.
- (4) If a rotorcraft conducts an IFR flight to or from an aerodrome with an approach involving visual circling, the rotorcraft operator's exposition must include procedures for determining landing minima for the aerodrome.
- (5) The operator and the pilot in command of a rotorcraft for a flight mentioned in subregulation (1) or (4) each contravene this subregulation if the minima for the take-off or landing for the flight are less than the minima determined in accordance with a procedure mentioned in subregulation (1) or (4) (as the case requires).
- (6) A person commits an offence of strict liability if the person contravenes subregulation (5).

Penalty: 50 penalty units.

133.150 Flights to or from foreign countries that do not use ICAO procedures

- (1) This regulation applies if:
 - (a) a rotorcraft conducts an IFR flight to or from an aerodrome:
 - (i) in a foreign country; and
 - (ii) at which IMC exist; and
 - (b) the country does not base the design of its instrument approach and departure procedures on ICAO Document 8168 (PANS-OPS).
- (2) The rotorcraft operator's exposition must include the instrument approach and departure procedures for the aerodrome that are approved by the national aviation authority of the country.
- (3) The operator of a rotorcraft for a flight contravenes this subregulation if a requirement mentioned in subregulation (4) is not met for the flight.
- (4) The requirements are the following:
 - (a) each pilot assigned to the flight by the operator must have successfully completed training in the country's instrument approach and departure procedures;
 - (b) the flight must be conducted in accordance with the instrument approach and departure procedures for the aerodrome included in the operator's exposition.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (3).

Penalty: 50 penalty units.

133.155 Authorised instrument approach procedures not in the AIP

- (1) The operator of a rotorcraft for an IFR flight contravenes this subregulation if:
 - (a) during the flight, the rotorcraft conducts an instrument approach to an aerodrome for which an authorised instrument approach procedure is not published in the AIP; and
 - (b) an authorised instrument approach procedure for the aerodrome is not included in the operator's exposition.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

133.160 Exposition requirements for low-visibility operations

A rotorcraft operator's exposition must include the following:

- (a) each type of low-visibility operation conducted using the rotorcraft;
- (b) the aircraft systems required to be used for each type of those operations;

Regulation 133.165

- (c) the aerodrome facilities required to conduct each type of those operations;
- (d) the training and qualifications required for the rotorcraft's flight crew members for each type of those operations;
- (e) the requirements to be met by the rotorcraft's flight crew members during each of those operations.

133.165 IFR flights without destination alternate aerodromes

- (1) This regulation applies to a flight of a rotorcraft if:
 - (a) the flight is an IFR flight; and
 - (b) the operational flight plan for the flight does not include a destination alternate aerodrome.
- (2) The pilot in command of a rotorcraft for a flight contravenes this subregulation if:
 - (a) during the flight, the pilot in command receives an authorised weather forecast for the planned destination aerodrome for the flight; and
 - (b) because of the authorised weather forecast, a destination alternate aerodrome must be nominated in accordance with the flight preparation (alternate aerodromes) requirements; and
 - (c) the rotorcraft is not carrying sufficient fuel to allow the flight to be continued to another aerodrome that is suitable for the safe landing of the rotorcraft if the rotorcraft cannot land at the planned destination aerodrome; and
 - (d) the flight is continued to the planned destination aerodrome.
- (3) Subregulation (2) does not apply if:
 - (a) within 30 minutes before the rotorcraft's estimated arrival time at the planned destination aerodrome, the pilot in command receives an authorised weather forecast for the planned destination aerodrome; and
 - (b) the authorised weather forecast indicates that the visibility or cloud ceiling height at the planned destination aerodrome is expected to be:
 - (i) below the alternate minima for the planned destination aerodrome required by the flight preparation (alternate aerodromes) requirements; but
 - (ii) above the landing minima required by the landing minima requirements for the planned destination aerodrome.
- (4) Also, subregulation (2) does not apply if the rotorcraft is carrying sufficient fuel to allow it to hold near the planned destination aerodrome until the end of 30 minutes after the visibility and cloud ceiling height is expected to be at or above the specified landing minima for the rotorcraft for the aerodrome.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Regulation 133.167

Note: A defendant bears an evidential burden in relation to the matters in subregulation (3) or (4): see subsection 13.3(3) of the *Criminal Code*.

133.167 Minimum height rules for medical transport operations

Regulation 91.265, 91.267, 91.277 or 91.305 does not apply to a pilot in command of a rotorcraft for a flight that is a medical transport operation if:

- (a) circumstances prescribed by the Part 133 Manual of Standards for the purposes of this paragraph apply to the rotorcraft and the operation; or
- (b) requirements prescribed by the Part 133 Manual of Standards for the purposes of this paragraph are complied with in relation to the flight.

Division 133.D.5—Aerodromes

133.170 Procedures to determine information about aerodromes

- (1) A rotorcraft operator's exposition must include the following:
 - (a) procedures to determine the kinds of information mentioned in subregulation (2) for a flight of the rotorcraft in relation to the following:
 - (i) the departure aerodrome;
 - (ii) the planned destination aerodrome;
 - (iii) if a destination alternate aerodrome is required for the flight by the flight preparation (alternate aerodromes) requirements—the destination alternate aerodrome;
 - (b) procedures for the pilot in command to plan a take-off from, or a landing at, an aerodrome, including a procedure to determine the kinds of information mentioned in subregulation (2) in relation to the aerodrome.
- (2) The kinds of information are the following:
 - (a) final approach and take-off area dimensions, directions, slopes, surface types and ground or water types for the aerodrome;
 - (b) touch down and lift-off area dimensions, limitations and location;
 - (c) the location of taxiways and turning nodes (if any);
 - (d) the aerodrome's elevation;
 - (e) the location on the aerodrome of the aerodrome reference point (if any);
 - (f) the location of the aerodrome's windsocks (if any);
 - (g) the aids to navigation and communication facilities available at the aerodrome (if any);
 - (h) the limitations (if any) on the use of the aerodrome;
 - (i) the special procedures (if any) in use at the aerodrome, in flight or on the ground or water;
 - (j) a contact person capable of providing information about the condition of the aerodrome;
 - (k) the special procedures and restrictions (if any) that the operator requires the flight crew of the rotorcraft to use at the aerodrome, including:
 - (i) engine failure procedures; and
 - (ii) obstacle clearance procedures.

133.175 Procedures for safety at aerodromes

A rotorcraft operator's exposition must include the following:

- (a) procedures to ensure the safety of persons in the vicinity of the rotorcraft when any of the following circumstances apply:
 - (i) a person is embarking or disembarking the rotorcraft;
 - (ii) the rotorcraft is being loaded or unloaded;
 - (iii) the rotorcraft is being operated at an aerodrome;

Regulation 133.175

- (b) procedures to determine the minimum distance that a person, animal or thing must be kept from the following to ensure the safety of the person, animal or thing:
- (i) the rotorcraft while it is on the ground at an aerodrome with its rotors turning;
 - (ii) the movement area of an aerodrome while the rotorcraft is landing or taking off;
 - (iii) a hazard created by the downwash of the rotorcraft at an aerodrome.

Regulation 133.180

Division 133.D.6—Fuel requirements

133.180 Fuel procedures

A rotorcraft operator's exposition must include procedures to ensure that a flight of the rotorcraft is conducted in accordance with the requirements mentioned in subregulation 133.190(1).

133.185 Oil requirements

- (1) The operator and the pilot in command of a rotorcraft for a flight each contravene this subregulation if, when the flight begins, the rotorcraft is not carrying sufficient oil to complete the flight safely.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

133.190 Fuel requirements

- (1) The Part 133 Manual of Standards may prescribe requirements relating to fuel for rotorcraft, including (but not limited to) the following:
 - (a) matters that must be considered when determining whether a rotorcraft has sufficient fuel to complete a flight safely;
 - (b) the amounts of fuel that must be carried on board a rotorcraft for a flight;
 - (c) procedures for monitoring amounts of fuel during a flight;
 - (d) procedures to be followed if fuel reaches specified amounts during a flight.
- (2) The pilot in command of a rotorcraft for a flight contravenes this subregulation if:
 - (a) the pilot is subject to a requirement mentioned in subregulation (1) for the flight; and
 - (b) the requirement is not met for the flight.
- (3) The operator of a rotorcraft for a flight contravenes this subregulation if:
 - (a) the operator is subject to a requirement mentioned in subregulation (1) for the flight; and
 - (b) the requirement is not met for the flight.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (2) or (3).

Penalty: 50 penalty units.

133.195 Fuelling safety procedures

A rotorcraft operator's exposition must include the following:

Regulation 133.195

- (a) procedures to ensure the rotorcraft is fuelled safely;
- (b) procedures relating to the safety of passengers for a flight of the rotorcraft who are embarking or disembarking, or on board, the rotorcraft during fuelling, including the normal, emergency and communication procedures to be followed by the following persons:
 - (i) any crew members for the flight other than flight crew members;
 - (ii) any flight crew members for the flight who are on duty in the cockpit;
 - (iii) any of the operator's personnel who carry out a ground support duty for the flight;
- (c) if the operator permits a person to operate low-risk electronic devices inside the cabin of the rotorcraft while the rotorcraft is being fuelled:
 - (i) a statement that radio frequency emissions from those devices will not affect systems on the rotorcraft; or
 - (ii) procedures to ensure that, before an engine of the rotorcraft is started, any effects of radio frequency emissions from those devices have been corrected.

Regulation 133.200

Division 133.D.7—Passenger transport and medical transport

133.200 Application of Division 133.D.7

- (1) This Division applies in relation to the operation of a rotorcraft for a passenger transport operation.
- (2) This Division (other than regulations 133.215, 133.225 and 133.235) also applies in relation to the operation of a rotorcraft for a medical transport operation.

133.205 Simulation of emergency or abnormal situations

- (1) The operator and the pilot in command of a rotorcraft for a flight each contravene this subregulation if, during the flight, an emergency or abnormal situation is simulated.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

133.210 Carriage of restricted persons

- (1) A rotorcraft operator's exposition must state whether the operator will, or will not, carry a restricted person on a flight of the rotorcraft.

Note: For other requirements for the carriage of restricted persons who are deportees, removees and other persons in custody, see Division 4.5 of the *Aviation Transport Security Regulations 2005*.

- (2) If a rotorcraft operator's exposition states that the operator will carry a restricted person on a flight of the rotorcraft, the exposition must also include the following:
 - (a) procedures for carrying a restricted person on the rotorcraft;
 - (b) procedures to inform each crew member for the flight about the carriage of a restricted person for the flight.

133.215 Carry-on baggage

A rotorcraft operator's exposition must include procedures for the following:

- (a) securely stowing carry-on baggage;
- (b) determining the maximum weight and size of baggage that can be taken on the rotorcraft as carry-on baggage;
- (c) determining the locations on the rotorcraft where carry-on baggage can be stowed;
- (d) giving instructions to passengers about securely stowing carry-on baggage at the following times:
 - (i) before take-off;
 - (ii) before landing;

(iii) any other time that the pilot in command directs.

133.220 Obstruction of emergency exits

- (1) The operator and the pilot in command of a rotorcraft for a flight each contravene this subregulation if, during the flight, an emergency exit is obstructed.
- (2) For the purposes of subregulation (1), an emergency exit is not obstructed only because a seat adjacent to the exit, or a seat in a row of seats adjacent to the exit, is occupied by a passenger.
- (3) Subregulation (1) does not apply if:
 - (a) the flight is a medical transport operation; and
 - (b) the emergency exit is obstructed by a stretcher fit-out that is described or identified in a supplemental type certificate for the rotorcraft.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (3): see subsection 13.3(3) of the *Criminal Code*.

133.225 Passengers in seats adjacent to emergency exits

- (1) The operator of a rotorcraft for a flight contravenes this subregulation if, during the flight, the requirement mentioned in subregulation (2) is not met.
- (2) The requirement is that the pilot in command of the rotorcraft for the flight must be satisfied that each person occupying a seat adjacent to an emergency exit:
 - (a) is a suitable person; or
 - (b) is accompanied or assisted, for the flight, by a suitable person who can access the emergency exit.
- (3) The operator of a rotorcraft for a flight contravenes this subregulation if, when the flight begins:
 - (a) a suitable person is occupying a seat adjacent to an emergency exit; and
 - (b) the suitable person has not agreed to assist the rotorcraft's crew with the evacuation of the rotorcraft in an emergency.
- (4) The operator of a rotorcraft for a flight contravenes this subregulation if, when the flight begins:
 - (a) a person other than a suitable person is occupying a seat adjacent to an emergency exit; and
 - (b) a suitable person is, for the flight, accompanying or assisting the person; and
 - (c) the suitable person has not agreed to assist the rotorcraft's crew with the evacuation of the rotorcraft in an emergency.

Regulation 133.230

- (5) A person commits an offence of strict liability if the person contravenes subregulation (1), (3) or (4).

Penalty: 50 penalty units.

133.230 Carriage of passengers with reduced mobility

- (1) The operator and the pilot in command of a rotorcraft for a flight each contravene this subregulation if, during the flight, a passenger with reduced mobility occupies a seat where the passenger could:
- (a) hinder the crew in their safety duties; or
 - (b) obstruct access to emergency equipment; or
 - (c) hinder the evacuation of the rotorcraft in an emergency.
- (2) Subregulation (1) does not apply in relation to a passenger with reduced mobility if:
- (a) the passenger is accompanied or assisted, for the flight, by a suitable person who is seated adjacent to an emergency exit; and
 - (b) the suitable person is accompanying or assisting only that passenger for the flight; and
 - (c) the suitable person has agreed to assist the rotorcraft's crew with the evacuation of the rotorcraft in an emergency.
- (3) A rotorcraft operator's exposition must include procedures for informing crew members for a flight about any passenger with reduced mobility who is to be carried on the flight.
- (4) The operator of a rotorcraft for a flight contravenes this subregulation if a procedure mentioned in subregulation (3) is not complied with for the flight.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (1) or (4).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

133.235 Safety briefing cards

- (1) This regulation applies to a rotorcraft with a maximum operational passenger seat configuration of more than 2.
- (2) The operator of a rotorcraft for a flight contravenes this subregulation if, when the flight begins, a safety briefing card for the rotorcraft is not available to each passenger on the rotorcraft.
- (3) The operator of a rotorcraft for a flight contravenes this subregulation if, when the flight begins, a safety briefing card does not meet the requirements mentioned in subregulation (4).
- (4) The requirements are the following:
-

- (a) the safety briefing card must include any information prescribed by the Part 133 Manual of Standards;
 - (b) the only other information that may be included in the safety briefing card is the following:
 - (i) information that is relevant to the type and model of rotorcraft;
 - (ii) information that is relevant to the safety of the rotorcraft and its passengers.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (2) or (3).

Penalty: 50 penalty units.

133.240 Safety briefings, instructions and demonstrations

- (1) The operator and the pilot in command of a rotorcraft for a flight each contravene this subregulation if a passenger is not given a safety briefing, instructions or demonstrations in accordance with the requirements prescribed by the Part 133 Manual of Standards for the purposes of this regulation.
- (2) Subregulation (1) does not apply in relation to a medical patient on a flight that is a medical transport operation.
- (3) The operator of a rotorcraft for a flight contravenes this subregulation if a safety briefing, instruction or demonstration required to be given to a passenger under this regulation includes:
 - (a) information that is not relevant to the type and model of the rotorcraft; or
 - (b) information that is not relevant to the safety of the rotorcraft and its passengers.
- (4) The operator of a rotorcraft for a flight contravenes this subregulation if:
 - (a) a passenger with reduced mobility will be carried on the flight; and
 - (b) before the rotorcraft takes off for the flight, the passenger, or a person accompanying or assisting the passenger, is not asked by a crew member for the flight about the best way of helping the passenger if an emergency evacuation of the rotorcraft is necessary.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (1), (3) or (4).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

133.245 Safety briefing in the event of an emergency

- (1) A rotorcraft operator's exposition must include procedures for briefing passengers on what to do if an emergency occurs during a flight of the rotorcraft.

Regulation 133.245

- (2) Subregulation (1) does not apply to a medical patient on a flight that is a medical transport operation.

Division 133.D.8—Instruments, indicators, equipment and systems

133.250 Airborne weather radar equipment

- (1) This regulation applies to a rotorcraft that conducts a flight:
 - (a) for which airborne weather radar equipment is required, under Subpart 133.K, to be fitted to the rotorcraft; or
 - (b) whilst the rotorcraft is fitted with airborne weather radar equipment (whether or not the airborne weather radar equipment is required, under Subpart 133.K, to be fitted for the flight).
- (2) The rotorcraft operator's exposition must include the following:
 - (a) procedures for using the equipment during a flight mentioned in subregulation (1);
 - (b) procedures for conducting a flight mentioned in subregulation (1) without the equipment, for use if the equipment is inoperative.

133.255 Head-up displays, enhanced vision systems and synthetic vision systems

- (1) This regulation applies to a flight of a rotorcraft if:
 - (a) the rotorcraft is fitted with any of the following systems:
 - (i) a head-up display;
 - (ii) an enhanced vision system;
 - (iii) a synthetic vision system; and
 - (b) the flight is:
 - (i) an IFR flight; or
 - (ii) a VFR flight at night.
- (2) A rotorcraft operator's exposition must include the following:
 - (a) procedures for using each system that is fitted to the rotorcraft during a flight mentioned in paragraph (1)(b);
 - (b) procedures for conducting a flight mentioned in paragraph (1)(b) without an element of the system, for use if the element is inoperative.
- (3) The Part 133 Manual of Standards may prescribe requirements for the use of a system mentioned in paragraph (1)(a) for a flight of a rotorcraft.
- (4) The operator and the pilot in command of a rotorcraft for a flight each contravene this subregulation if:
 - (a) a system mentioned in paragraph (1)(a) is used during the flight; and
 - (b) a requirement mentioned in subregulation (3) for that system is not met for the flight.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (4).

Penalty: 50 penalty units.

Regulation 133.260

133.260 Survival equipment procedures

- (1) This regulation applies to a flight of a rotorcraft if:
 - (a) the flight is in or through an area prescribed as a remote area by the Part 91 Manual of Standards; or
 - (b) the rotorcraft is required, under Subpart 133.K, to carry a life raft for the flight.
- (2) If a rotorcraft is, or will be, used to conduct a flight to which this regulation applies, the operator's exposition must include the following:
 - (a) procedures for determining the survival equipment required for the area in or through which the flight will be conducted;
 - (b) for a flight mentioned in paragraph (1)(b)—procedures for determining the pyrotechnic signalling devices required to ensure the distress signals, set out in Appendix 1 to Annex 2, *Rules of the Air*, to the Chicago Convention, can be made.

133.265 NVIS flights

- (1) This regulation applies to a flight of a rotorcraft if:
 - (a) the rotorcraft is fitted with a night vision imaging system; and
 - (b) the flight is:
 - (i) an IFR flight; or
 - (ii) a VFR flight at night.
- (2) A rotorcraft operator's exposition must include the following:
 - (a) procedures for using a night vision imaging system during a flight to which subregulation (1) applies;
 - (b) procedures for conducting such a flight without an element of a night vision imaging system, for use if the element is inoperative.
- (3) The Part 133 Manual of Standards may prescribe requirements for the use of a night vision imaging system for a flight of a rotorcraft.
- (4) The operator and the pilot in command of a rotorcraft for a flight each contravene this subregulation if:
 - (a) a night vision imaging system is used during the flight; and
 - (b) a requirement mentioned in subregulation (3) is not met for the flight.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (4).

Penalty: 50 penalty units.

133.270 Securing moveable equipment

A rotorcraft operator's exposition must include the following:

- (a) procedures for identifying items of moveable equipment that must be stowed securely on board the rotorcraft at the following times during a flight:
 - (i) while the rotorcraft is taking off;
 - (ii) while the rotorcraft is landing;
 - (iii) any other time that the pilot in command directs;
- (b) procedures for stowing the items.

Division 133.D.9—Miscellaneous

133.275 Procedures relating to ice

A rotorcraft operator's exposition must include the following in relation to a flight of the rotorcraft:

- (a) procedures for the inspection of the rotorcraft by the pilot in command before a flight if frost or freezing conditions exist;
- (b) if de-icing and anti-icing measures are required for the flight—procedures for carrying out these measures before the flight;
- (c) procedures for using de-icing and anti-icing equipment (where fitted) during the flight.

133.280 Procedures relating to portable electronic devices

A rotorcraft operator's exposition must include procedures for the operation of portable electronic devices for a flight of the rotorcraft.

133.285 Procedures relating to carriage of animals

A rotorcraft operator's exposition must include procedures for the carriage of animals for a flight of the rotorcraft.

133.290 Polar operations

- (1) This regulation applies to a rotorcraft that conducts a flight to or from an aerodrome in a polar region.
- (2) A rotorcraft operator's exposition must include procedures for the following:
 - (a) monitoring and dealing with fuel freezing;
 - (b) ensuring communication capability for the duration of an operation that includes a flight mentioned in subregulation (1);
 - (c) training the rotorcraft's flight crew in polar operations;
 - (d) mitigating crew member and passenger exposure to cosmic radiation during solar flare activity;
 - (e) if the rotorcraft is not flown over water during a flight mentioned in subregulation (1)—ensuring that each person on the rotorcraft wears a serviceable, cold-weather, anti-exposure suit that is appropriate for the temperatures in which the flight is conducted;
 - (f) if the rotorcraft is flown over water during a flight mentioned in subregulation (1)—ensuring that each person on the rotorcraft wears an immersion suit that is appropriate for the temperatures in which the flight is conducted.

133.295 External load operations involving winching a person

- (1) The operator and the pilot in command of a rotorcraft for a flight each contravene this subregulation if:
 - (a) an external load operation involving winching a person is conducted during the flight; and
 - (b) a requirement prescribed by the Part 133 Manual of Standards is not met for the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Regulation 133.305

Subpart 133.F—Performance

133.305 Take-off performance

- (1) The Part 133 Manual of Standards may prescribe requirements relating to take-off performance for a flight of a rotorcraft.
- (2) Without limiting subregulation (1), the Part 133 Manual of Standards may prescribe requirements that relate to one or more of the following:
 - (a) the kinds of operations to be carried out during the flight;
 - (b) characteristics of the aerodrome at which the rotorcraft takes off;
 - (c) characteristics of the route flown by the rotorcraft;
 - (d) characteristics of the aerodrome at which the rotorcraft lands.
- (3) The pilot in command of a rotorcraft for a flight contravenes this subregulation if:
 - (a) the pilot is subject to a requirement mentioned in subregulation (1) for the flight; and
 - (b) the requirement is not met for the flight.
- (4) The operator of a rotorcraft for a flight contravenes this subregulation if:
 - (a) the operator is subject to a requirement mentioned in subregulation (1) for the flight; and
 - (b) the requirement is not met for the flight.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (3) or (4).

Penalty: 50 penalty units.

133.310 Landing performance

- (1) The Part 133 Manual of Standards may prescribe requirements relating to landing performance for a flight of a rotorcraft.
- (2) Without limiting subregulation (1), the Part 133 Manual of Standards may prescribe requirements relating to one or more of the following:
 - (a) the rotorcraft's configuration;
 - (b) the operation of any equipment for the flight;
 - (c) characteristics of the aerodrome at which the rotorcraft lands;
 - (d) safety factor percentages to be applied.
- (3) The pilot in command of a rotorcraft for a flight contravenes this subregulation if:
 - (a) the pilot is subject to a requirement mentioned in subregulation (1) for the flight; and
 - (b) the requirement is not met for the flight.

Regulation 133.315

- (4) The operator of a rotorcraft for a flight contravenes this subregulation if:
 - (a) the operator is subject to a requirement mentioned in subregulation (1) for the flight; and
 - (b) the requirement is not met for the flight.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (3) or (4).

Penalty: 50 penalty units.

133.315 Flight in a performance class

- (1) The operator and the pilot in command of a rotorcraft for a flight each contravene this subregulation if, during any stage of the flight, the rotorcraft is not flown in a performance class.
- (2) Subregulation (1) does not apply in relation to a stage of a flight if:
 - (a) the flight is a medical transport operation; and
 - (b) the stage of the flight is conducted at a medical transport operating site; and
 - (c) the operator's exposition includes risk assessment and management procedures that must be complied with if the rotorcraft is not flown in a performance class during such a stage; and
 - (d) the procedures are complied with for the flight.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

133.320 Rotorcraft permitted to fly in performance class 1 or 2, or performance class 2 with exposure

- (1) The operator and the pilot in command of a rotorcraft for a flight each contravene this subregulation if, during any stage of the flight:
 - (a) the rotorcraft is flown in performance class 1 or 2, or performance class 2 with exposure; and
 - (b) the requirement mentioned in subregulation (2) is not met.
- (2) The requirement is that the rotorcraft must be a rotorcraft of a kind prescribed by the Part 133 Manual of Standards.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Regulation 133.325

133.325 Flight in performance class 2 with exposure

- (1) The operator and the pilot in command of a rotorcraft for a flight each contravene this subregulation if:
 - (a) the rotorcraft is flown in performance class 2 with exposure during the take-off, take-off and initial climb, approach and landing, or baulked landing stage of the flight; and
 - (b) a requirement mentioned in subregulation (2) is not met.
- (2) The requirements are the following:
 - (a) the rotorcraft must be flown in accordance with any requirements prescribed by the Part 133 Manual of Standards for the purposes of this paragraph;
 - (b) the operator must hold an approval under regulation 133.015 for the rotorcraft to be flown in performance class 2 with exposure during that stage of the flight.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

133.330 Flight in performance class 1 for certain rotorcraft

- (1) The operator and the pilot in command of a rotorcraft for a flight each contravene this subregulation if:
 - (a) the rotorcraft has a maximum operational passenger seat configuration of more than 19; and
 - (b) the rotorcraft is flown in a performance class other than performance class 1 during a stage of the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

133.335 Flight in performance class 1 or 2, or performance class 2 with exposure for certain rotorcraft

- (1) This regulation applies to a flight of a rotorcraft if:
 - (a) the rotorcraft has a maximum operational passenger seat configuration of more than 9 and not more than 19; or
 - (b) the flight is a medical transport operation; or
 - (c) all of the following apply:
 - (i) the rotorcraft has a maximum operational passenger seat configuration of not more than 19;
 - (ii) the flight is a passenger transport operation;
 - (iii) the flight is conducted under the IFR or at night.

Regulation 133.340

- (2) The operator and the pilot in command of a rotorcraft for a flight each contravene this subregulation if a requirement mentioned in subregulation (3) is not met for the flight.
- (3) The requirements are the following:
 - (a) during the take-off, take-off and initial climb, the approach and landing, or baulked landing, stage of the flight, the rotorcraft must be flown in performance class 1 or 2, or performance class 2 with exposure;
 - (b) during any other stage of the flight, the rotorcraft must be flown in performance class 1.
- (4) Subregulation (2) does not apply in relation to the take-off, take-off and initial climb, the approach and landing, or baulked landing stage of a flight, if:
 - (a) the flight is a medical transport operation; and
 - (b) the stage is conducted from or at a place as part of the medical transport operation; and
 - (c) the operator holds an approval under regulation 133.015 in relation to the place and the rotorcraft.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (4): see subsection 13.3(3) of the *Criminal Code*.

133.340 Flight in performance class 3 over populous areas

- (1) The operator and the pilot in command of a rotorcraft for a flight over a populous area each contravene this subregulation if:
 - (a) during a stage of the flight, the rotorcraft is flown in performance class 3; and
 - (b) a suitable forced landing area is not available to the rotorcraft; and
 - (c) the requirements prescribed by the Part 133 Manual of Standards are not met.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Regulation 133.345

Subpart 133.J—Weight and balance

133.345 Loading of rotorcraft

- (1) The operator and the pilot in command of a rotorcraft for a flight each contravene this subregulation if, when the flight begins, the rotorcraft is loaded in a way that contravenes the rotorcraft's weight and balance limits.
- (2) The operator and the pilot in command of a rotorcraft for a flight each contravene this subregulation if, during the flight, the rotorcraft ceases to be loaded in accordance with the rotorcraft's weight and balance limits.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

133.350 Procedures for loading rotorcraft etc.

A rotorcraft operator's exposition must include the following:

- (a) procedures for loading the rotorcraft for a flight to comply with regulation 133.345;
- (b) procedures for working out the following weights for a flight of the rotorcraft:
 - (i) the total weight of the crew members and the carry-on baggage of the crew members;
 - (ii) the total weight of the passengers and the carry-on baggage of the passengers;
 - (iii) the total weight of the cargo (other than carry-on baggage);
 - (iv) the total weight of the usable fuel to be carried;
- (c) procedures to ensure that a last-minute change to a load does not cause the rotorcraft to exceed its weight and balance limits;
- (d) procedures for offloading passengers or cargo to ensure that the rotorcraft does not exceed its weight and balance limits.

133.355 Weight and balance documents

- (1) The operator and the pilot in command of a rotorcraft for a flight each contravene this subregulation if, when the flight begins, the weight and balance documents for the flight do not comply with subregulation (2).
- (2) The weight and balance documents must include the following:
 - (a) the weight and balance of the rotorcraft and the information used to calculate the weight and balance;
 - (b) the name of the person who prepared the weight and balance documents;

Regulation 133.355

- (c) confirmation by the person responsible for planning and supervising the loading of the rotorcraft that the rotorcraft has been loaded in accordance with:
 - (i) the procedures set out in the operator’s exposition for loading the rotorcraft; and
 - (ii) the weight and balance documents;
 - (d) if the person mentioned in paragraph (c) is not the pilot in command or the co-pilot—confirmation of the acceptance of the weight and balance documents by the pilot in command or the co-pilot;
 - (e) any other information that the pilot in command needs to ensure that the loading of the rotorcraft is in accordance with the weight and balance limits for the rotorcraft.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Subpart 133.K—Equipment

133.360 Requirements relating to equipment

- (1) The Part 133 Manual of Standards may prescribe requirements relating to:
 - (a) the fitment and non-fitment of equipment to a rotorcraft; and
 - (b) the carrying of equipment on a rotorcraft; and
 - (c) equipment that is fitted to, or carried on, a rotorcraft.
- (2) A person contravenes this subregulation if:
 - (a) the person is subject to a requirement mentioned in subregulation (1); and
 - (b) the requirement is not met.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Subpart 133.N—Flight crew

Division 133.N.1—General

133.370 Composition, number, qualifications and training

General

- (1) The operator of a rotorcraft for a flight contravenes this subregulation if, when the flight begins, a requirement mentioned in subregulation (2) is not met.
- (2) The requirements are as follows:
 - (a) the composition of the rotorcraft's flight crew for the flight must comply with the rotorcraft's flight manual;
 - (b) if the rotorcraft has a maximum operational passenger seat configuration of more than 9—the flight crew must include 2 pilots;
 - (c) if the flight is a kind of operation for which the operator's exposition requires the carriage of additional flight crew members—the flight crew must include the additional flight crew members;
 - (d) each flight crew member must be qualified under regulation 133.385 or 133.390 to carry out the duties assigned to the flight crew member by the operator for the flight;
 - (e) if the flight is a VFR flight at night that is a passenger transport operation or a medical transport operation—at least one of the flight crew members must hold an instrument rating;
 - (f) the pilot in command and the co-pilot (if any) for the flight must have the recent experience for the flight required by Division 133.N.4;
 - (g) each flight crew member must meet the training and checking requirements for the flight crew member and the flight mentioned in subregulation (4);
 - (h) if the operator's exposition includes requirements, in accordance with regulation 133.400, in relation to knowledge that the pilot in command must have relating to the route of, and aerodromes for, the flight—the pilot in command must meet the requirements;
 - (i) each flight crew member for whom, under the operator's exposition, differences training for the rotorcraft is required, must have successfully completed the differences training.
- (3) For the purposes of paragraph (2)(c), the rotorcraft operator's exposition must include the kinds of operation (if any) for which additional flight crew members must be carried.
- (4) The Part 133 Manual of Standards may prescribe requirements relating to training and checking that must be completed by a flight crew member for a flight.

Regulation 133.375

New or inexperienced crew members

- (5) A rotorcraft operator's exposition must include the requirements that must be met for new or inexperienced crew members to be assigned to duty for a flight of the rotorcraft.

Offence

- (6) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

133.375 Competence

- (1) The operator of a rotorcraft for a flight contravenes this subregulation if:
- (a) the operator assigns a person to duty as a flight crew member for the flight; and
 - (b) the person has not been assessed by the operator, in accordance with the operator's training and checking system, as competent to perform the duties assigned to the person for the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

133.377 Training and checking to be conducted by certain persons

- (1) The operator of a rotorcraft contravenes this subregulation if:
- (a) a flight crew member of the operator's personnel undertakes training or a check that is required under this Part; and
 - (b) the training or check is conducted other than in accordance with subregulation (2).
- (2) The training or check must be conducted by:
- (a) an individual who:
 - (i) is engaged by the operator (whether by contract or other arrangement) to conduct the training or check; and
 - (ii) meets the requirements prescribed by the Part 133 Manual of Standards; or
 - (b) a Part 142 operator with whom the operator has a contract for the Part 142 operator to conduct the training or check for the operator.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

133.380 Assignment to duty of pilot in command

- (1) The operator of a rotorcraft for a flight contravenes this subregulation if, when the flight begins, none of the pilots assigned as flight crew members for the flight is assigned to duty as the pilot in command of the rotorcraft for the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

133.385 Pilot in command

- (1) A pilot is qualified as pilot in command for a flight of a rotorcraft if:
 - (a) the pilot meets the minimum flying experience requirements specified, in accordance with subregulation (2), in the rotorcraft operator’s exposition for the rotorcraft; and
 - (b) for a flight described in an item of column 1 of the following table—the pilot has completed, in a rotorcraft of that kind, the flight hours mentioned in column 2 of the item; and
 - (c) for a flight that is a multi-crew operation—the pilot has successfully completed command training that complies with the requirements prescribed by the Part 133 Manual of Standards; and
 - (d) the pilot is:
 - (i) if the rotorcraft is an Australian aircraft—authorised to pilot the rotorcraft during the flight as pilot in command under Part 61; or
 - (ii) if the rotorcraft is a foreign registered aircraft—authorised to pilot the rotorcraft during the flight as pilot in command by the rotorcraft’s State of registry.

Flight hours required to qualify as pilot in command

Item	Column 1 Flight	Column 2 Flight hours
1	Flight at night	5 hours as pilot in command, or pilot in command under supervision, at night
2	VFR flight in single-engine rotorcraft	Either: (a) 5 hours as pilot in command, or pilot in command under supervision, by day in a rotorcraft of that kind; or (b) if the pilot has 5 hours of aeronautical experience in another kind of single-engine rotorcraft—3 hours as pilot in command, or pilot in command under supervision, by day in a rotorcraft of the kind referred to in paragraph (a)
3	VFR flight in multi-engine rotorcraft	10 hours as pilot in command, or pilot in command under supervision, by day
4	IFR flight in multi-engine rotorcraft	15 hours as pilot in command under supervision under the IFR
5	Flight that is a multi-crew	Either:

Regulation 133.390

Flight hours required to qualify as pilot in command

Item	Column 1	Column 2
	Flight	Flight hours
	operation	(a) 20 hours as pilot in command; or (b) 20 hours as pilot in command under supervision in a multi-crew operation

- (2) For the purposes of paragraph (1)(a), the rotorcraft operator's exposition must include minimum flying experience requirements for all rotorcraft operated by the operator for Australian air transport operations.
- (3) To avoid doubt, more than one item of column 2 of the table in subregulation (1) may apply to a particular hour of flight time.

133.390 Co-pilot

- (1) A pilot is qualified as co-pilot for a flight of a rotorcraft if:
- (a) the pilot is:
 - (i) if the rotorcraft is an Australian aircraft—authorised to pilot the rotorcraft during the flight as co-pilot under Part 61; or
 - (ii) if the rotorcraft is a foreign registered aircraft—authorised to pilot the rotorcraft during the flight as co-pilot by the rotorcraft's State of registry; and
 - (b) the pilot has completed supervised line flying on a rotorcraft of that aircraft type rating as co-pilot for the number of sectors or flight hours mentioned in the operator's exposition.
- (2) A pilot is qualified as co-pilot for a flight of a rotorcraft if the pilot is qualified under regulation 133.385 as pilot in command of the rotorcraft for the flight.

133.395 Pilot in command in non-command pilot's seat

Operator

- (1) The operator of a rotorcraft for a flight contravenes this subregulation if:
- (a) the operator requires the pilot in command of the rotorcraft for the flight to do any of the following in the non-command pilot's seat:
 - (i) operate the rotorcraft as pilot in command;
 - (ii) carry out the duties of co-pilot;
 - (iii) carry out training or examining duties; and
 - (b) the pilot in command does not hold a valid proficiency check, in accordance with the requirements prescribed by the Part 133 Manual of Standards, for the operator and the rotorcraft for a pilot who will be required to operate the rotorcraft in the non-command pilot's seat.

Pilot in command

- (2) The pilot in command of a rotorcraft for a flight contravenes this subregulation if:
- (a) the pilot in command operates the rotorcraft in the non-command pilot's seat; and
 - (b) the pilot in command does not hold a valid proficiency check, in accordance with the requirements prescribed by the Part 133 Manual of Standards, for the operator and the rotorcraft for a pilot who will be required to operate the rotorcraft in the non-command pilot's seat.

Offence

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

133.400 Knowledge of route and aerodromes

A rotorcraft operator's exposition must include requirements in relation to the knowledge that a pilot in command of the rotorcraft for a flight must have of:

- (a) the route of the flight; and
- (b) the departure aerodrome and the planned destination aerodrome for the flight; and
- (c) any alternate aerodrome required for the flight by the flight preparation (alternate aerodromes) requirements; and
- (d) if the flight is to an unfamiliar aerodrome—any procedures included in the operator's exposition under regulation 133.170 or 133.175 that relate to managing the safety of operations to an unfamiliar aerodrome.

Part 133 Australian air transport operations—rotorcraft

Subpart 133.N Flight crew

Division 133.N.2 Flight crew training—miscellaneous

Division 133.N.2—Flight crew training—miscellaneous

Note: This Division is reserved for future use.

Division 133.N.3—Operation of rotorcraft of different types

133.410 Application of Division 133.N.3

This Division applies to the operator of a rotorcraft if the operator operates rotorcraft of more than one type for Part 133 operations.

133.415 Assignment of flight crew to different multi-engine rotorcraft

A rotorcraft operator's exposition must include the following:

- (a) a description of the circumstances in which the operator may assign a flight crew member to duty on 2 or more different multi-engine rotorcraft;
- (b) the combinations of different rotorcraft that a single flight crew member may be assigned to duty on by the operator;
- (c) the flying experience, checks and training that a flight crew member must gain or complete, while the flight crew member is employed by the operator, before being assigned to duty on 2 or more different multi-engine rotorcraft;
- (d) procedures to ensure that, if a flight crew member is assigned to duty on 2 or more different multi-engine rotorcraft within one tour of duty, the flight crew member has adequate time between flights on the different rotorcraft for the flight crew member to prepare for duty.

Division 133.N.4—Recent experience

133.420 Recent experience requirements—90 days before flight

Operator

- (1) The operator of a rotorcraft for a flight contravenes this subregulation if:
 - (a) the operator assigns a pilot to duty as pilot in command or co-pilot of the rotorcraft for the flight; and
 - (b) the pilot does not have:
 - (i) if the flight is a flight by day—the recent experience required for the flight by subregulation (3); or
 - (ii) if the flight is a flight at night—the recent experience required for the flight by subregulation (4).

Pilot

- (2) A pilot of a rotorcraft for a flight contravenes this subregulation if:
 - (a) the pilot operates the rotorcraft as pilot in command or co-pilot for the flight; and
 - (b) the pilot does not have:
 - (i) if the flight is a flight by day—the recent experience required for the flight by subregulation (3); or
 - (ii) if the flight is a flight at night—the recent experience required for the flight by subregulation (4).

Requirements for flights by day

- (3) The recent experience required for a flight by day is that, within 90 days before the flight:
 - (a) the pilot must have carried out, in a rotorcraft of that kind or an approved flight simulator for the rotorcraft:
 - (i) at least 3 take-offs followed by climbs to at least 500 ft AGL while controlling the rotorcraft or simulator; and
 - (ii) at least 3 landings while controlling the rotorcraft or simulator; or
 - (b) the pilot must have passed a flight test for the grant of a pilot licence or a rating on a pilot licence in a rotorcraft of that kind or an approved flight simulator for the rotorcraft; or
 - (c) the pilot must have successfully completed a proficiency check for the rotorcraft that complies with the requirements prescribed by the Part 133 Manual of Standards.

Note: For other recent experience requirements, see Part 61.

Requirements for flights at night

- (4) The recent experience required for a flight at night is that, within 90 days before the flight:
- (a) the pilot must have carried out, at night in a rotorcraft of that kind or under night time conditions in an approved flight simulator for the rotorcraft:
 - (i) at least 3 take-offs followed by climbs to at least 500 ft AGL while controlling the rotorcraft or simulator; and
 - (ii) at least 3 landings while controlling the rotorcraft or simulator; or
 - (b) the pilot must have passed a flight test for the grant of a pilot licence or a rating on a pilot licence in a rotorcraft of that kind or an approved flight simulator for the rotorcraft; or
 - (c) the pilot must have successfully completed a proficiency check for the rotorcraft that complies with the requirements prescribed by the Part 133 Manual of Standards.

Offence

- (5) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

Subpart 133.P—Crew other than flight crew

Division 133.P.1—Cabin crew

133.425 Number, qualifications, experience and training

- (1) The operator of a rotorcraft for a flight contravenes this subregulation if, when the flight begins:
 - (a) under subregulation (2), a cabin crew member must be carried on the flight; and
 - (b) a requirement mentioned in subregulation (3) is not met for the flight.
- (2) A cabin crew member must be carried on the flight if circumstances prescribed by the Part 133 Manual of Standards exist for the flight.
- (3) The requirements are the following:
 - (a) the number of cabin crew for the flight must be at least the number prescribed by the Part 133 Manual of Standards;
 - (b) each cabin crew member must meet the training and checking requirements for the cabin crew member and the flight mentioned in subregulation (4).
- (4) The Part 133 Manual of Standards may prescribe requirements relating to training and checking that must be completed by a cabin crew member for a flight of a rotorcraft.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

133.430 Competence

- (1) The operator of a rotorcraft for a flight contravenes this subregulation if:
 - (a) the operator assigns a person to duty as a cabin crew member for a flight; and
 - (b) the person has not been assessed by the operator, in accordance with the operator's exposition, as competent to perform the duties assigned to the person for the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

133.435 Minimum age

- (1) The operator of a rotorcraft for a flight contravenes this subregulation if, when the flight begins, a cabin crew member for the flight has not turned 18.

- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

133.440 English proficiency

- (1) The operator of a rotorcraft for a flight contravenes this subregulation if:
- (a) the operator assigns a person to duty as a cabin crew member for the flight; and
 - (b) the person does not meet the requirement mentioned in subregulation (2).

- (2) The requirement is that the person must meet the ICAO level 4, 5 or 6 aviation English language proficiency standards mentioned in the Part 61 Manual of Standards.

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

133.445 Assignment to duty as senior cabin crew member

- (1) The operator of a rotorcraft for a flight contravenes this subregulation if, when the flight begins:
- (a) there is more than one cabin crew member for the flight; and
 - (b) none of the cabin crew members is assigned to duty as the senior cabin crew member for the flight.

- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

133.450 Training and checking requirements for senior cabin crew member

- (1) The operator of a rotorcraft for a flight contravenes this subregulation if:
- (a) the operator assigns a cabin crew member to duty as the senior cabin crew member for a flight; and
 - (b) the cabin crew member has not successfully completed the training and checking requirements for a senior cabin crew member set out in the operator's exposition.

- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Regulation 133.455

Division 133.P.2—Air crew

133.455 Training and checking

- (1) The operator of a rotorcraft for a flight contravenes this subregulation if:
 - (a) an air crew member is carried on the flight; and
 - (b) the air crew member does not meet the training and checking requirements for the air crew member and the flight mentioned in subregulation (2).
- (2) The Part 133 Manual of Standards may prescribe requirements relating to training and checking that must be completed by an air crew member for a flight of a rotorcraft.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

133.460 Competence

- (1) The operator of a rotorcraft for a flight contravenes this subregulation if:
 - (a) the operator assigns a person to duty as an air crew member for a flight; and
 - (b) the person has not been assessed by the operator, in accordance with the operator's exposition, as competent to perform the duties assigned to the person for the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

133.465 English proficiency

- (1) The operator of a rotorcraft for a flight contravenes this subregulation if:
 - (a) the operator assigns a person to duty as an air crew member for the flight; and
 - (b) the person does not meet the requirement mentioned in subregulation (2).
- (2) The requirement is that the person must meet the ICAO level 4, 5 or 6 aviation English language proficiency standards mentioned in the Part 61 Manual of Standards.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 133.P.3—Medical transport specialists

133.470 Training and checking

- (1) The operator of a rotorcraft for a flight contravenes this subregulation if:
 - (a) a medical transport specialist is carried on the flight; and
 - (b) the medical transport specialist does not meet the training and checking requirements for the medical transport specialist and the flight mentioned in subregulation (2).
- (2) The Part 133 Manual of Standards may prescribe requirements relating to training and checking that must be completed by a medical transport specialist for a flight of a rotorcraft.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

133.475 Competence

- (1) The operator of a rotorcraft for a flight contravenes this subregulation if:
 - (a) the operator assigns a person to duty as a medical transport specialist for a flight; and
 - (b) the person has not been assessed by the operator, in accordance with the operator's exposition, as competent to perform the duties assigned to the person for the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Part 135—Australian air transport operations—smaller aeroplanes

Table of contents

Subpart 135.A—Preliminary

- 135.005 Application of Part 135
- 135.010 Compliance with Part 121 provisions
- 135.015 Definition of *suitable forced landing area* for aeroplane flights
- 135.020 Approvals by CASA for Part 135
- 135.025 Issue of Manual of Standards for Part 135

Subpart 135.C—General

Division 135.C.1—General flight limitations

- 135.030 Permitted categories of aeroplanes
- 135.035 Flight distance limitations

Division 135.C.2—Operational documents

- 135.040 Compliance with flight manual
- 135.045 Operator to have minimum equipment list for certain flights
- 135.050 Availability of checklists

Division 135.C.3—Flight related documents

- 135.055 Electronic documents
- 135.060 Availability of parts of exposition
- 135.065 Carriage of documents
- 135.070 Availability or carriage of documents for certain flights
- 135.075 Carriage of documents—flights that begin or end outside Australian territory
- 135.080 Keeping and updating documents etc.
- 135.085 Journey logs
- 135.090 Passenger lists
- 135.095 Flight preparation forms for flights that begin or end outside Australian territory

Division 135.C.4—Reporting and recording defects and incidents etc.

- 135.100 Procedures for reporting and recording defects etc.
- 135.105 Procedures for reporting and recording incidents

Division 135.C.5—Search and rescue services and emergency and survival equipment

- 135.110 Information about search and rescue services
- 135.115 Information about emergency and survival equipment

Division 135.C.6—Miscellaneous requirements

- 135.120 Crew activities necessary for safe operation
- 135.125 Competence of ground support personnel
- 135.130 Flight crew seat authorisation and briefing

Subpart 135.D—Operational procedures

Division 135.D.1—Operational control

135.135 Operational control

Division 135.D.2—Flight preparation

135.140 Flight preparation requirements

Division 135.D.3—Flight planning

135.145 Operational flight plans

135.150 Availability of flight planning information

Division 135.D.4—Flight rules

135.155 Take-off and landing minima

135.160 IFR flights to or from foreign countries that do not use ICAO procedures

135.165 Authorised instrument approach procedures not in the AIP

135.170 Exposition requirements for low-visibility operations

135.175 Stabilised approach requirements

135.180 Take-off alternate aerodromes

135.185 Alternate aerodrome requirements in certain circumstances

135.190 IFR flights without destination alternate aerodromes

Division 135.D.5—Aerodromes

135.195 Procedures to determine information about aerodromes

135.200 Procedures for safety at aerodromes

Division 135.D.6—Fuel requirements

135.205 Fuel procedures

135.210 Oil requirements

135.215 Fuel requirements

135.220 Fuelling safety procedures

Division 135.D.7—Passenger transport and medical transport

135.225 Application of Division 135.D.7

135.230 IFR flights

135.235 VFR flights at night

135.240 Prescribed single-engine aeroplanes

135.245 Simulation of emergency or abnormal situations

135.250 Carriage of restricted persons

135.255 Carry-on baggage

135.260 Obstruction of emergency exits

135.265 Passengers in seats adjacent to emergency exits

135.270 Carriage of passengers with reduced mobility

135.275 Safety briefing cards

135.280 Safety briefings, instructions and demonstrations

135.285 Safety briefing in the event of an emergency

135.290 Flights over water for single-engine aeroplanes

Division 135.D.8—Instruments, indicators, equipment and systems

- 135.295 Airborne weather radar equipment
- 135.300 Head-up displays, enhanced vision systems and synthetic vision systems
- 135.305 Survival equipment procedures

Division 135.D.9—Miscellaneous

- 135.310 Procedures relating to ice
- 135.315 Procedures relating to portable electronic devices
- 135.320 Procedures relating to carriage of animals
- 135.325 Polar operations
- 135.330 Cosmic radiation
- 135.335 Exceeding cosmic radiation limits

Subpart 135.F—Performance

- 135.340 Performance data
- 135.345 Take-off performance
- 135.350 Landing performance

Subpart 135.J—Weight and balance

- 135.355 Loading of aeroplane
- 135.360 Procedures for loading aeroplane etc.
- 135.365 Weight and balance documents

Subpart 135.K—Equipment

- 135.370 Requirements relating to equipment

Subpart 135.N—Flight crew

Division 135.N.1—General

- 135.380 Composition, number, qualifications and training
- 135.385 Competence
- 135.387 Training and checking to be conducted by certain persons
- 135.390 Assignment to duty of pilot in command
- 135.395 Pilot in command
- 135.400 Co-pilot
- 135.405 Pilot in command in non-command pilot's seat
- 135.410 Knowledge of route and aerodromes

Division 135.N.2—Operation of aeroplanes of different type ratings

- 135.415 Application of Division 135.N.2
- 135.420 Assignment of flight crew to aeroplanes of different type ratings

Division 135.N.3—Operation of aeroplanes of different types

- 135.425 Application of Division 135.N.3
- 135.430 Assignment as pilot in command on aeroplanes of different types

Division 135.N.4—Recent experience

- 135.435 Recent experience requirements—90 days before flight
-

Subpart 135.P—Crew other than flight crew

Division 135.P.1—General

Division 135.P.2—Air crew

135.445 Training and checking

135.450 Competence

135.455 English proficiency

Division 135.P.3—Medical transport specialists

135.460 Training and checking

135.465 Competence

Subpart 135.A—Preliminary

135.005 Application of Part 135

This Part applies in relation to the operation of an aeroplane for an Australian air transport operation if the aeroplane has:

- (a) a maximum operational passenger seat configuration of not more than 9;
and
- (b) a maximum take-off weight of not more than 8,618 kg.

135.010 Compliance with Part 121 provisions

An operator is taken to comply with a provision of this Part about a particular matter if:

- (a) there is a provision in Part 121 about the same matter; and
- (b) the operator complies with that provision of Part 121.

135.015 Definition of *suitable forced landing area* for aeroplane flights

Areas of ground

- (1) An area of ground is a ***suitable forced landing area*** for a flight of an aeroplane if the aeroplane could make a forced landing in the area with a reasonable expectation that there would be no injuries to persons in the aeroplane or on the ground.

Areas of water

- (2) An area of water that meets the requirements mentioned in subregulation (3) is a ***suitable forced landing area*** for a flight of an aeroplane if:
 - (a) both of the following apply:
 - (i) the aeroplane is a prescribed single-engine aeroplane;
 - (ii) the area of water is closer to land than the distance prescribed by the Part 135 Manual of Standards; or
 - (b) the aeroplane has a type certificate or supplemental type certificate for landing on water.
- (3) For the purposes of subregulation (2), the requirements are the following:
 - (a) the aeroplane must be able to ditch in the area of water with a reasonable expectation that there would be no injuries to persons in the aeroplane or on the water;
 - (b) there must be a reasonable expectation that persons in the aeroplane would survive in the area of water for the time that it would take to rescue the persons;
 - (c) if the flight is a passenger transport operation or a medical transport operation—the area of water must be:

- (i) adjacent to land; or
 - (ii) adjacent to an offshore installation with search and rescue capabilities;
or
 - (iii) in a location, set out in the aeroplane operator's exposition, that has search and rescue capabilities.
- (4) Factors that affect whether there is a reasonable expectation about the matters mentioned in paragraphs (3)(a) and (b) include the following:
- (a) the surface condition of the area of water, including the wave height, wind conditions and swell;
 - (b) the limits of the capability of the life rafts carried on the aeroplane to stay upright and floating in certain sea states, and to support the survival of persons who were in the aeroplane.

135.020 Approvals by CASA for Part 135

- (1) If a provision of this Part, or of the Part 135 Manual of Standards, refers to a person holding an approval under this regulation, a person may apply to CASA, in writing, for the approval.
- (2) Subject to regulation 11.055, the approval must be granted.
- (3) Subregulation 11.055(1B) applies to the granting of an approval under this regulation.

135.025 Issue of Manual of Standards for Part 135

For the purposes of subsection 98(5A) of the Act, CASA may issue a Manual of Standards for this Part prescribing matters:

- (a) required or permitted by these Regulations to be prescribed by the Part 135 Manual of Standards; or
- (b) necessary or convenient to be prescribed for carrying out or giving effect to this Part.

Note: A Manual of Standards is a legislative instrument: see subsection 98(5AA) of the Act.

Subpart 135.C—General

Division 135.C.1—General flight limitations

135.030 Permitted categories of aeroplanes

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the aeroplane begins the flight; and
 - (b) the aeroplane is not type certificated in any of the following categories:
 - (i) transport;
 - (ii) commuter;
 - (iii) normal;
 - (iv) a category prescribed by the Part 135 Manual of Standards.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

135.035 Flight distance limitations

- (1) The Part 135 Manual of Standards may prescribe requirements relating to flight distance limitations for a flight of an aeroplane.
- (2) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if a requirement mentioned in subregulation (1) is not met for the flight.
- (2A) Subregulation (2) does not apply to:
 - (a) an operator or a pilot; and
 - (b) a requirement;if the operator or the pilot holds an approval under regulation 135.020 for the requirement.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2A): see subsection 13.3(3) of the *Criminal Code*.

Division 135.C.2—Operational documents

135.040 Compliance with flight manual

- (1) The operator of an aeroplane for a flight contravenes this subregulation if, during the flight, the aeroplane is operated in a way that does not meet a requirement or limitation that:
 - (a) is set out in the aircraft flight manual instructions for the aeroplane; and
 - (b) relates to the operation of the aeroplane.

Note: The pilot in command of the aeroplane must also ensure the aeroplane is operated in accordance with the aircraft flight manual instructions: see regulation 91.095.

- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

135.045 Operator to have minimum equipment list for certain flights

- (1) The operator of an aeroplane for an IFR flight contravenes this subregulation if:
 - (a) there is a master minimum equipment list for the aeroplane; and
 - (b) when the flight begins, there is no minimum equipment list for the aeroplane.

- (2) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the flight begins or ends at an aerodrome outside Australian territory; and
 - (b) when the flight begins, there is no minimum equipment list for the aeroplane.

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

135.050 Availability of checklists

- (1) The operator of an aeroplane for a flight contravenes this subregulation if the requirement mentioned in subregulation (2) is not met for the flight.
- (2) The requirement is that, before a crew member for the flight begins to carry out a duty for the flight, the operator must make available to the member each checklist of normal, abnormal and emergency procedures for the aeroplane that is relevant to the duty.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 135.C.3—Flight related documents

135.055 Electronic documents

To avoid doubt, if a document is required to be carried on a flight of an aeroplane under this Division, that requirement is taken to be satisfied if an electronic copy of the document is carried on the flight.

Note: Electronic copies may not satisfy the requirements of the law of a foreign country for flights that begin or end at an aerodrome outside Australian territory.

135.060 Availability of parts of exposition

- (1) The operator of an aeroplane for a flight contravenes this subregulation if the following parts of the aeroplane operator's exposition are not available to a crew member for the flight before the flight begins:
 - (a) a part that is relevant to the duties of the crew member for the flight;
 - (b) a part that is required for the conduct of the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

135.065 Carriage of documents

Documents required by the Part 135 Manual of Standards

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if:
 - (a) a document prescribed by the Part 135 Manual of Standards is not carried on the aeroplane; and
 - (b) the aeroplane begins the flight.

Flight crew medical certificates

- (2) The operator and a flight crew member of an aeroplane for a flight each contravene this subregulation if:
 - (a) the flight crew member's medical certificate is not carried on the aeroplane for the flight; and
 - (b) the flight crew member does not give CASA written notice that the certificate is not being carried on the aeroplane for the flight:
 - (i) before the flight begins; or
 - (ii) if it is not practicable to give the notice before the flight begins—within 24 hours after the flight ends.

Flight crew licences

- (3) The operator and a flight crew member of an aeroplane for a flight each contravene this subregulation if:
- (a) the flight crew member's flight crew licence is not carried on the aeroplane for the flight; and
 - (b) the flight crew member does not give CASA written notice that the licence is not being carried on the aeroplane for the flight:
 - (i) before the flight begins; or
 - (ii) if it is not practicable to give the notice before the flight begins—within 24 hours after the flight ends.

Offence

- (4) A person commits an offence of strict liability if the person contravenes subregulation (1), (2) or (3).

Penalty: 50 penalty units.

135.070 Availability or carriage of documents for certain flights

Flights for which documents must be carried

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if:
- (a) the aeroplane begins:
 - (i) an IFR flight; or
 - (ii) a VFR flight at night; or
 - (iii) a flight during which the aeroplane will not remain within 50 nautical miles of the departure aerodrome; and
 - (b) a document mentioned in subregulation (4) is not carried on the aeroplane.

Flights for which documents must be available or carried

- (2) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if:
- (a) the aeroplane begins a VFR flight by day during which the aeroplane will remain within 50 nautical miles of the departure aerodrome; and
 - (b) the requirement mentioned in subregulation (3) is not met.
- (3) The requirement is that each document mentioned in subregulation (4) must be:
- (a) available to the pilot in command immediately before the flight; or
 - (b) carried on the aeroplane.

Required documents

- (4) The documents are the following:
- (a) if a flight notification is required for the flight under Part 91—the flight notification;

Regulation 135.075

- (b) weight and balance documents for the flight;
- (c) any NOTAMs and AIS briefing documents for the flight;
- (d) any authorised weather forecasts for:
 - (i) the planned route of the flight; and
 - (ii) if a destination alternate aerodrome is required for the flight by the flight preparation (alternate aerodromes) requirements—the destination alternate aerodrome;
- (e) if there is a person on board who may require special consideration during the flight or during an evacuation of the aeroplane—a statement identifying the person and the special consideration;
- (f) forms to comply with the reporting requirements under the operator’s safety management system (if any);
- (g) if the aeroplane is fitted with computerised navigation equipment—the operating instructions for the equipment;
- (h) each other document (if any) required by a foreign country within whose territory the flight is conducted.

Offence

- (5) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

135.075 Carriage of documents—flights that begin or end outside Australian territory

- (1) This regulation applies to a flight of an aeroplane that begins or ends at an aerodrome outside Australian territory.
- (2) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if:
 - (a) a document prescribed by the Part 135 Manual of Standards for the purposes of this paragraph is not carried on the aeroplane; and
 - (b) the aeroplane begins the flight.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

135.080 Keeping and updating documents etc.

An aeroplane operator’s exposition must include the following for a flight of the aeroplane:

- (a) procedures for keeping the documents prescribed by the Part 135 Manual of Standards accessible to a person on the ground for the duration of the flight;

- (b) procedures for providing updated information in relation to the flight to a person on the ground if:
 - (i) the flight is part of a multi-flight journey; and
 - (ii) a copy of a document for the flight has been kept on the ground in relation to an earlier flight that is part of the multi-flight journey; and
 - (iii) the information in the document requires updating; and
 - (iv) it is not practicable to keep a copy of the updated document on the ground;
- (c) the circumstances in which a person on the ground who has access to the information about the flight mentioned in paragraphs (a) and (b) may provide that information to another person;
- (d) procedures for providing information in a circumstance mentioned in paragraph (c).

135.085 Journey logs

Operator—preparation of journey log

- (1) The operator of an aeroplane for a flight contravenes this subregulation if, when the flight begins, the operator has not prepared a journey log for the flight:
 - (a) that is capable of containing the information mentioned in subregulations (3) and (5); and
 - (b) with a place for the pilot in command to verify the entries for the flight.

Pre-flight completion of journey log

- (2) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if, when the flight begins, the information about the flight mentioned in subregulation (3) is not recorded in the journey log.
- (3) The information is the following:
 - (a) the aeroplane's registration mark or flight number;
 - (b) the date of the flight;
 - (c) for each crew member assigned to the flight:
 - (i) the crew member's name or another means to identify the crew member; and
 - (ii) the duties assigned to the crew member for the flight;
 - (d) for the flight:
 - (i) the place of departure; and
 - (ii) the time the flight begins;
 - (e) the amount of fuel added to the aeroplane's fuel tanks before the flight begins (if any);
 - (f) the amount of fuel in the aeroplane's fuel tanks when the flight begins.

Regulation 135.090

Post-flight completion of journey log

- (4) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if the information about the flight mentioned in subregulation (5) is not recorded in the journey log for the flight as soon as practicable after the flight ends.
- (5) The information is the following:
 - (a) the place of arrival;
 - (b) the time the flight ends;
 - (c) the duration of the flight;
 - (d) the amount of fuel in the aeroplane's fuel tanks when the flight ends;
 - (e) incidents and observations (if any) relevant to the flight.

Exceptions to completion of journey log

- (6) Subregulations (1), (2) and (4) do not apply to the operator or the pilot in command in relation to information mentioned in those subregulations if, by the time it is required to be recorded, the information is:
 - (a) recorded in another document kept by the operator; or
 - (b) readily available to the operator from another source.

Note: An example for paragraph (a) is an operational flight plan kept by the operator for the flight.

- (7) Subregulation (2) does not apply to the operator or the pilot in command in relation to information mentioned in that subregulation if:
 - (a) the flight is a medical transport operation; and
 - (b) the information is not recorded in the journey log before the flight begins because of the urgent nature of the medical transport operation; and
 - (c) the pilot in command is satisfied, when the flight begins, that the failure to record the information in the journey log before the flight begins will not affect the safety of the aeroplane; and
 - (d) the information is recorded in the journey log as soon as practicable after the flight ends.

Offence

- (8) A person commits an offence of strict liability if the person contravenes subregulation (1), (2) or (4).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (6) or (7): see subsection 13.3(3) of the *Criminal Code*.

135.090 Passenger lists

- (1) The operator of an aeroplane for a flight that is a passenger transport operation contravenes this subregulation if, when the flight begins, the operator has not

prepared a passenger list for the flight that contains the information mentioned in subregulation (2).

- (2) The information is the following:
 - (a) the aeroplane's registration mark or flight number;
 - (b) the name of each passenger;
 - (c) the places of departure and destination for each passenger;
 - (d) the number of infants carried;
 - (e) the date, and estimated time of departure, of the flight.
- (3) Subregulation (1) does not apply to the operator in relation to information mentioned in that subregulation if, by the time it is required to be recorded, the information is:
 - (a) recorded in another document kept by the operator; or
 - (b) readily available to the operator from another source.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (3): see subsection 13.3(3) of the *Criminal Code*.

135.095 Flight preparation forms for flights that begin or end outside Australian territory

- (1) This regulation applies to a flight of an aeroplane that begins or ends at an aerodrome outside Australian territory.
- (2) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if, when the flight begins, the pilot in command has not signed a flight preparation form certifying that the pilot in command is satisfied of the matters mentioned in subregulation (3).
- (3) The matters are the following:
 - (a) the aeroplane can be operated during the flight in accordance with its configuration deviation list (if any);
 - (b) the parts of the operator's exposition required to be available to the aeroplane's crew before the flight by regulation 135.060 are available;
 - (c) the requirements and limitations in the operator's exposition relating to the flight can be complied with for the flight;
 - (d) regulations 135.065, 135.070 and 135.075 are being complied with for the flight;
 - (e) equipment required, under Subpart 135.K, to be fitted to, or carried on, the aeroplane for the flight is fitted to, or carried on, the aeroplane in accordance with that Subpart;
 - (f) equipment mentioned in paragraph (e) is:
 - (i) operative; or

Regulation 135.095

- (ii) inoperative, and permitted to be inoperative for the flight under these Regulations;
 - (g) the aeroplane's take-off, en-route and landing performance capabilities meet the performance requirements for the circumstances and conditions expected during the flight;
 - (h) the aeroplane's weight and balance will remain within the aeroplane's weight and balance limits throughout the flight.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Division 135.C.4—Reporting and recording defects and incidents etc.

135.100 Procedures for reporting and recording defects etc.

An aeroplane operator's exposition must include procedures for the reporting and recording by a flight crew member for a flight of the aeroplane of any of the following that occur during the flight:

- (a) an abnormal instrument indication;
- (b) abnormal flight conditions;
- (c) abnormal behaviour by the aeroplane;
- (d) exceedence of an operating limit specified in the aircraft flight manual instructions for the aeroplane;
- (e) a defect in the aeroplane.

135.105 Procedures for reporting and recording incidents

An aeroplane operator's exposition must include procedures for the reporting and recording by crew members of incidents relating to a flight of the aeroplane that endanger, or could endanger, the safe operation of the aeroplane.

Division 135.C.5—Search and rescue services and emergency and survival equipment

135.110 Information about search and rescue services

- (1) The operator of an aeroplane for a flight contravenes this subregulation if, when the flight begins, information about the search and rescue services relevant to the flight is not readily accessible to the flight crew members for the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

135.115 Information about emergency and survival equipment

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the Part 135 Manual of Standards prescribes an item of equipment for the purposes of this regulation; and
 - (b) when the flight begins, the information prescribed by the Part 135 Manual of Standards for that equipment is not available for immediate communication by the operator to a rescue coordination centre.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 135.C.6—Miscellaneous requirements

135.120 Crew activities necessary for safe operation

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the operator requires a crew member for the flight to perform an activity during take-off, initial climb, final approach or landing of the aeroplane for the flight; and
 - (b) the activity is not necessary for the safe operation of the aeroplane.
- (2) A crew member for a flight of an aeroplane contravenes this subregulation if:
 - (a) the crew member performs an activity during take-off, initial climb, final approach or landing of the aeroplane for the flight; and
 - (b) the activity is not necessary for the safe operation of the aeroplane.
- (3) Subregulations (1) and (2) do not apply if:
 - (a) the flight is a medical transport operation; and
 - (b) the crew member is a medical transport specialist; and
 - (c) the activity relates to providing care to a medical patient; and
 - (d) the crew member is satisfied that:
 - (i) it is essential to perform the activity; and
 - (ii) performing the activity will not affect the safety of the aeroplane or a person on board the aeroplane.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

135.125 Competence of ground support personnel

- (1) The operator of an aeroplane for a flight contravenes this subregulation if, before a member of the operator's personnel carries out a ground support duty for the flight, the member has not met a requirement mentioned in subregulation (2).
- (2) The requirements are the following:
 - (a) the member must have successfully completed training for the duty;
 - (b) the member must have been assessed as competent to carry out the duty.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

135.130 Flight crew seat authorisation and briefing

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if:
-

Regulation 135.130

- (a) during the flight, a person occupies a flight crew seat; and
 - (b) the person is not a person mentioned in subregulation (2).
- (2) The persons are the following:
- (a) a flight crew member assigned to duty for the flight by the operator;
 - (b) another crew member authorised by the operator and the pilot in command to occupy the flight crew seat during the flight;
 - (c) an authorised officer who is carrying out an audit, check, examination, inspection or test under these Regulations;
 - (d) a person who is permitted by the operator's exposition to occupy the flight crew seat.
- (3) The pilot in command of an aeroplane for a flight contravenes this subregulation if:
- (a) during the flight, a person other than a member of the aeroplane's crew occupies a flight crew seat; and
 - (b) before the person occupies the flight crew seat, the pilot in command does not cause the person to be briefed on the safety procedures that are relevant to the seat.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1) or (3).

Penalty: 50 penalty units.

Subpart 135.D—Operational procedures

Division 135.D.1—Operational control

135.135 Operational control

An aeroplane operator's exposition must include procedures for determining how operational control for a flight of the aeroplane is to be exercised and by whom.

Division 135.D.2—Flight preparation

135.140 Flight preparation requirements

An aeroplane operator's exposition must include procedures for complying with the following for a flight of the aeroplane:

- (a) the flight preparation (weather assessments) requirements;
- (b) the flight preparation (alternate aerodromes) requirements.

Division 135.D.3—Flight planning

135.145 Operational flight plans

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if:
 - (a) the flight is:
 - (i) an IFR flight; or
 - (ii) a VFR flight at night; or
 - (iii) a flight during which the aeroplane will not remain within 50 nautical miles of the departure aerodrome; and
 - (b) when the flight begins, an operational flight plan that meets the requirements mentioned in subregulation (2) has not been prepared for the flight.
 - (2) The requirements are the following:
 - (a) the flight plan must be prepared having regard to:
 - (i) the safety of the aeroplane, and of the people on board the aeroplane, during the flight; and
 - (ii) the aeroplane's performance; and
 - (iii) the expected aeroplane operating limitations and conditions for the flight; and
 - (iv) meteorological conditions for the flight;
 - (b) the flight plan must contain the information prescribed by the Part 135 Manual of Standards for the purposes of this paragraph.
 - (3) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if:
 - (a) the Part 135 Manual of Standards prescribes information about the flight for the purposes of this subregulation; and
 - (b) that information is not recorded in the operational flight plan for the flight:
 - (i) unless subparagraph (ii) applies—before the flight ends; or
 - (ii) if it is not practicable to record the information before the flight ends—as soon as practicable after the flight ends.
 - (4) Subregulation (1) or (3) does not apply to the operator or the pilot in command in relation to information required to be included in the operational flight plan under that subregulation if, by the time it is required to be recorded, the information is:
 - (a) recorded in another document kept by the operator; or
 - (b) readily available to the operator from another source.
- Note: An example for paragraph (a) is a journey log kept by the operator for the flight.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (1) or (3).

Regulation 135.150

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (4): see subsection 13.3(3) of the *Criminal Code*.

135.150 Availability of flight planning information

- (1) The operator of an aeroplane for a flight contravenes this subregulation if a requirement mentioned in subregulation (2) is not met for the flight.
- (2) The requirements are the following:
 - (a) the pilot in command of the aeroplane must have access to the information mentioned in subregulation (3) before and during the flight;
 - (b) each person in the operator's organisation who is responsible for flight planning for the flight must have access to the information mentioned in subregulation (3) before the flight;
 - (c) each person in the operator's organisation who is responsible for flight replanning for the flight must have access to the information mentioned in subregulation (3) during the flight;
 - (d) each person in the operator's organisation who exercises operational control for the flight must have access to the information mentioned in subregulation (3) before and during the flight.
- (3) The information is the following:
 - (a) authorised weather forecasts and authorised weather reports:
 - (i) in relation to the flight; and
 - (ii) if a destination alternate aerodrome is required for the flight by the flight planning (alternate aerodromes) requirements—in relation to the destination alternate aerodrome;
 - (b) NOTAMs for the flight;
 - (c) the suitability for a take-off or landing by the aeroplane of:
 - (i) the departure and planned destination aerodromes for the flight; and
 - (ii) if a destination alternate aerodrome is required for the flight by the flight preparation (alternate aerodromes) requirements—the destination alternate aerodrome.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 135.D.4—Flight rules

135.155 Take-off and landing minima

- (1) If an aeroplane conducts an IFR flight to or from an aerodrome, the aeroplane operator's exposition must include:
 - (a) procedures for determining take-off minima that meet the requirements mentioned in subregulation (2); and
 - (b) procedures for determining landing minima that meet the requirement mentioned in subregulation (3).
- (2) The requirements are the following:
 - (a) the take-off minima must not be less than the take-off minima prescribed by the take-off minima requirements for the aerodrome;
 - (b) the take-off minima must be sufficient to enable the pilot in command to control the aeroplane if it is necessary to conduct a discontinued take-off in adverse circumstances;
 - (c) for a multi-engine aeroplane—the take-off minima must be sufficient to enable the pilot in command to control the aeroplane if it is necessary to conduct a continued take-off after:
 - (i) failure of the aeroplane's critical engine; or
 - (ii) if the aeroplane does not have a critical engine—the failure of an engine.
- (3) The requirement is that the landing minima must not be less than the landing minima prescribed by the landing minima requirements for the aerodrome, including for an approach with visual circling.
- (4) If an aeroplane conducts an IFR flight to or from an aerodrome with an approach involving visual circling, the aeroplane operator's exposition must include procedures for determining landing minima for the aerodrome.
- (5) The operator and the pilot in command of an aeroplane for a flight mentioned in subregulation (1) or (4) each contravene this subregulation if the minima for the take-off or landing for the flight are less than the minima determined in accordance with a procedure mentioned in subregulation (1) or (4) (as the case requires).
- (6) A person commits an offence of strict liability if the person contravenes subregulation (5).

Penalty: 50 penalty units.

135.160 IFR flights to or from foreign countries that do not use ICAO procedures

- (1) This regulation applies if:
 - (a) an aeroplane conducts an IFR flight to or from an aerodrome:

Regulation 135.165

- (i) in a foreign country; and
 - (ii) at which IMC exist; and
 - (b) the country does not base the design of its instrument approach and departure procedures on ICAO Document 8168 (PANS-OPS).
- (2) The aeroplane operator's exposition must include the instrument approach and departure procedures for the aerodrome that are approved by the national aviation authority of the country.

135.165 Authorised instrument approach procedures not in the AIP

- (1) The operator of an aeroplane for an IFR flight contravenes this subregulation if:
- (a) during the flight, the aeroplane conducts an instrument approach to an aerodrome for which an authorised instrument approach procedure is not published in the AIP; and
 - (b) an authorised instrument approach procedure for the aerodrome is not included in the operator's exposition.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

135.170 Exposition requirements for low-visibility operations

An aeroplane operator's exposition must include the following:

- (a) each type of low-visibility operation conducted using the aeroplane;
- (b) the aircraft systems required to be used for each type of those operations;
- (c) the aerodrome facilities required to conduct each type of those operations;
- (d) the training and qualifications required for the aeroplane's flight crew members for each type of those operations;
- (e) the requirements to be met by the aeroplane's flight crew members during each of those operations.

135.175 Stabilised approach requirements

An aeroplane operator's exposition must include procedures about conducting stabilised approaches to land at an aerodrome.

135.180 Take-off alternate aerodromes

- (1) This regulation applies to a flight of a multi-engine aeroplane if:
- (a) the flight is a passenger transport operation or a medical transport operation; and
 - (b) the flight is an IFR flight.
- (2) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if:

- (a) at the time of take-off, the aeroplane will not be able to return to the departure aerodrome:
 - (i) because the visibility and cloud ceiling height at the departure aerodrome will be less than the landing minima requirements for the aerodrome for at least 1 hour after take-off; or
 - (ii) for any other reason; and
 - (b) the operational flight plan for the flight does not include a take-off alternate aerodrome that meets the requirements mentioned in subregulation (3).
- (3) The requirements are the following:
- (a) the authorised weather forecast for the take-off alternate aerodrome must indicate that the visibility and cloud ceiling height at the aerodrome meet the landing minima requirements for the aerodrome for at least 1 hour after take-off;
 - (b) the take-off alternate aerodrome must be within the distance from the departure aerodrome that the aeroplane can fly in 1 hour at the aeroplane's one-engine inoperative cruising speed.
- (4) Subregulation (2) does not apply if:
- (a) the flight is a medical transport operation; and
 - (b) when the flight begins, the aeroplane is carrying sufficient fuel:
 - (i) to fly to the planned destination aerodrome for the flight; or
 - (ii) if a destination alternate aerodrome is required for the flight by the flight preparation (alternate aerodromes) requirements—to comply with the requirements for conducting a flight to a destination alternate prescribed by the flight preparation (alternate aerodromes) requirements.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (4): see subsection 13.3(3) of the *Criminal Code*.

135.185 Alternate aerodrome requirements in certain circumstances

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if:
 - (a) circumstances prescribed by the Part 135 Manual of Standards apply for the flight; and
 - (b) a requirement prescribed by the Part 135 Manual of Standards relating to alternate aerodromes is not met for the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Regulation 135.190

135.190 IFR flights without destination alternate aerodromes

- (1) This regulation applies to a flight of an aeroplane if:
 - (a) the flight is an IFR flight; and
 - (b) the operational flight plan for the flight does not include a destination alternate aerodrome.
- (2) The pilot in command of an aeroplane for a flight contravenes this subregulation if:
 - (a) during the flight, the pilot in command receives an authorised weather forecast for the planned destination aerodrome for the flight; and
 - (b) because of the authorised weather forecast, a destination alternate aerodrome must be nominated in accordance with the flight preparation (alternate aerodromes) requirements; and
 - (c) the aeroplane is not carrying sufficient fuel to allow the flight to be continued to another aerodrome that is suitable for the safe landing of the aeroplane if the aeroplane cannot land at the planned destination aerodrome; and
 - (d) the flight is continued to the planned destination aerodrome.
- (3) Subregulation (2) does not apply if:
 - (a) within 30 minutes before the aeroplane's estimated arrival time at the planned destination aerodrome, the pilot in command receives an authorised weather forecast for the planned destination aerodrome; and
 - (b) the authorised weather forecast indicates that the visibility or cloud ceiling height at the planned destination aerodrome is expected to be:
 - (i) below the alternate minima for the planned destination aerodrome required by the flight preparation (alternate aerodromes) requirements; but
 - (ii) above the landing minima required by the landing minima requirements for the planned destination aerodrome.
- (4) Also, subregulation (2) does not apply if the aeroplane is carrying sufficient fuel to allow it to hold near the planned destination aerodrome until the end of 30 minutes after the visibility and cloud ceiling height is expected to be at or above the specified landing minima for the aeroplane for the aerodrome.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (3) or (4): see subsection 13.3(3) of the *Criminal Code*.

Division 135.D.5—Aerodromes

135.195 Procedures to determine information about aerodromes

- (1) An aeroplane operator's exposition must include the following:
 - (a) procedures to determine the kinds of information mentioned in subregulation (2) for a flight of the aeroplane in relation to the following:
 - (i) the departure aerodrome;
 - (ii) the planned destination aerodrome;
 - (iii) if a destination alternate aerodrome is required for the flight by the flight preparation (alternate aerodromes) requirements—the destination alternate aerodrome;
 - (b) procedures for the pilot in command to plan a take-off from, or a landing at, an aerodrome, including a procedure to determine the kinds of information mentioned in subregulation (2) in relation to the aerodrome.
- (2) The kinds of information are the following:
 - (a) runway or strip lengths, widths, directions, slopes and surface types for the aerodrome;
 - (b) the location of taxiways and turning nodes (if any);
 - (c) the aerodrome's elevation;
 - (d) the location on the aerodrome of the aerodrome reference point (if any);
 - (e) the location of the aerodrome's windsocks (if any);
 - (f) the aids to navigation and communication facilities available at the aerodrome (if any);
 - (g) the limitations (if any) on the use of the aerodrome;
 - (h) the special procedures (if any) in use at the aerodrome, in flight or on the ground or water;
 - (i) a contact person capable of providing information about the condition of the aerodrome;
 - (j) the special procedures and restrictions (if any) that the operator requires the flight crew of the aeroplane to use at the aerodrome, including:
 - (i) engine failure procedures; and
 - (ii) obstacle clearance procedures.

135.200 Procedures for safety at aerodromes

An aeroplane operator's exposition must include procedures to ensure the safety of persons in the vicinity of the aeroplane when any of the following circumstances apply:

- (a) a person is embarking or disembarking the aeroplane;
- (b) a passenger is embarking or disembarking, or on board, the aeroplane while an engine of the aeroplane is operating but the aeroplane is not being flown or fuelled;
- (c) the aeroplane is being loaded or unloaded;

Part 135 Australian air transport operations—smaller aeroplanes

Subpart 135.D Operational procedures

Division 135.D.5 Aerodromes

Regulation 135.200

(d) the aeroplane is being operated at an aerodrome.

Division 135.D.6—Fuel requirements

135.205 Fuel procedures

An aeroplane operator's exposition must include procedures to ensure that a flight of the aeroplane is conducted in accordance with the requirements mentioned in subregulation 135.215(1).

135.210 Oil requirements

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if, when the flight begins, the aeroplane is not carrying sufficient oil to complete the flight safely.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

135.215 Fuel requirements

- (1) The Part 135 Manual of Standards may prescribe requirements relating to fuel for aeroplanes, including (but not limited to) the following:
 - (a) matters that must be considered when determining whether an aeroplane has sufficient fuel to complete a flight safely;
 - (b) the amounts of fuel that must be carried on board an aeroplane for a flight;
 - (c) procedures for monitoring amounts of fuel during a flight;
 - (d) procedures to be followed if fuel reaches specified amounts during a flight.
- (2) The pilot in command of an aeroplane for a flight contravenes this subregulation if:
 - (a) the pilot is subject to a requirement mentioned in subregulation (1) for the flight; and
 - (b) the requirement is not met for the flight.
- (3) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the operator is subject to a requirement mentioned in subregulation (1) for the flight; and
 - (b) the requirement is not met for the flight.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (2) or (3).

Penalty: 50 penalty units.

135.220 Fuelling safety procedures

An aeroplane operator's exposition must include the following:

Regulation 135.220

- (a) procedures to ensure the aeroplane is fuelled safely;
- (b) procedures relating to the safety of passengers for a flight of the aeroplane who are embarking or disembarking, or on board, the aeroplane during fuelling, including the normal, emergency and communication procedures to be followed by the following persons:
 - (i) any cabin crew for the flight;
 - (ii) any flight crew members for the flight who are on duty in the cockpit;
 - (iii) any of the operator's personnel who carry out a ground support duty for the flight;
- (c) if the operator permits a person to operate low-risk electronic devices inside the cabin of the aeroplane while the aeroplane is being fuelled—procedures to ensure that, before an engine of the aeroplane is started, any effects of radio frequency emissions from those devices have been corrected.

Division 135.D.7—Passenger transport and medical transport

135.225 Application of Division 135.D.7

This Division applies to the operation of an aeroplane for a passenger transport operation or a medical transport operation.

135.230 IFR flights

- (1) The operator of an aeroplane for an IFR flight contravenes this subregulation if the aeroplane does not meet the requirement mentioned in subregulation (2).
- (2) The requirement is that the aeroplane must be a multi-engine aeroplane or a prescribed single-engine aeroplane.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

135.235 VFR flights at night

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the flight is a VFR flight at night; and
 - (b) a requirement mentioned in subregulation (2) is not met.
- (2) The requirements are the following:
 - (a) the aeroplane must be a multi-engine aeroplane or a prescribed single-engine aeroplane;
 - (b) the aeroplane must have a maximum take-off weight of not more than 5,700 kg;
 - (c) a flight crew member for the flight must meet the requirement mentioned in paragraph 135.380(2)(d).
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

135.240 Prescribed single-engine aeroplanes

- (1) This regulation applies to a prescribed single-engine aeroplane that conducts:
 - (a) an IFR flight; or
 - (b) a VFR flight at night.
- (2) The aeroplane operator's exposition must include procedures for the matters prescribed by the Part 135 Manual of Standards for the purposes of this subregulation.

Regulation 135.245

- (3) A single-engine aeroplane is a *prescribed single-engine aeroplane* if it is of a kind prescribed by the Part 135 Manual of Standards for the purposes of this subregulation.

135.245 Simulation of emergency or abnormal situations

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if, during the flight, an emergency or abnormal situation is simulated.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

135.250 Carriage of restricted persons

- (1) An aeroplane operator's exposition must state whether the operator will, or will not, carry a restricted person on a flight of the aeroplane.

Note: For other requirements for the carriage of restricted persons who are deportees, removees and other persons in custody, see Division 4.5 of the *Aviation Transport Security Regulations 2005*.

- (2) If the operator's exposition states that the operator will carry a restricted person on a flight of the aeroplane, the exposition must also include the following:
- (a) procedures for carrying a restricted person on the aeroplane;
 - (b) procedures to inform each crew member for the flight about the carriage of a restricted person for the flight.

135.255 Carry-on baggage

An aeroplane operator's exposition must include procedures for the following:

- (a) securely stowing carry-on baggage;
- (b) determining the maximum weight and size of baggage that can be taken on the aeroplane as carry-on baggage;
- (c) determining the locations on the aeroplane where carry-on baggage can be stowed;
- (d) giving instructions to passengers about securely stowing carry-on baggage at the following times:
 - (i) before take-off;
 - (ii) before landing;
 - (iii) any other time that the pilot in command directs.

135.260 Obstruction of emergency exits

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if, at any of the following times, an emergency exit is obstructed:
- (a) while the aeroplane is taxiing;

- (b) while the aeroplane is taking-off;
 - (c) while the aeroplane is landing;
 - (d) any other time that the pilot in command directs.
- (2) An emergency exit is not obstructed only because a seat adjacent to the exit is occupied by a passenger.
- (3) Subregulation (1) does not apply if:
- (a) the flight is a medical transport operation; and
 - (b) the emergency exit is obstructed by a stretcher fit-out that is described or identified in a supplemental type certificate for the aeroplane.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (3): see subsection 13.3(3) of the *Criminal Code*.

135.265 Passengers in seats adjacent to emergency exits

- (1) The operator of an aeroplane for a flight contravenes this subregulation if, during the flight, the requirement mentioned in subregulation (2) is not met.
- (2) The requirement is that the pilot in command of the aeroplane for the flight must be satisfied that each person occupying a seat adjacent to an emergency exit:
- (a) is a suitable person; or
 - (b) is accompanied or assisted, for the flight, by a suitable person who can access the emergency exit.
- (3) The operator of an aeroplane for a flight contravenes this subregulation if, when the flight begins:
- (a) a suitable person is occupying a seat adjacent to an emergency exit; and
 - (b) the suitable person has not agreed to assist the aeroplane's crew with the evacuation of the aeroplane in an emergency.
- (4) The operator of an aeroplane for a flight contravenes this subregulation if, when the flight begins:
- (a) a person other than a suitable person is occupying a seat adjacent to an emergency exit; and
 - (b) a suitable person is, for the flight, accompanying or assisting the person; and
 - (c) the suitable person has not agreed to assist the aeroplane's crew with the evacuation of the aeroplane in an emergency.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (1), (3) or (4).

Penalty: 50 penalty units.

Regulation 135.270

135.270 Carriage of passengers with reduced mobility

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if, during the flight, a passenger with reduced mobility occupies a seat where the passenger could:
 - (a) hinder the crew in their safety duties; or
 - (b) obstruct access to emergency equipment; or
 - (c) hinder the evacuation of the aeroplane in an emergency.
- (2) Subregulation (1) does not apply in relation to a passenger with reduced mobility if:
 - (a) the person is accompanied or assisted, for the flight, by a suitable person who is seated adjacent to an emergency exit; and
 - (b) the suitable person is accompanying or assisting only that person for the flight; and
 - (c) the suitable person has agreed to assist the aeroplane's crew with the evacuation of the aeroplane in an emergency.
- (3) An aeroplane operator's exposition must include procedures for informing crew members for a flight about any passenger with reduced mobility who is to be carried on the flight.
- (4) The operator of an aeroplane for a flight contravenes this subregulation if a procedure mentioned in subregulation (3) is not complied with for the flight.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (1) or (4).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

135.275 Safety briefing cards

- (1) This regulation applies to an aeroplane that has more than 2 rows of seats.
- (2) The operator of an aeroplane for a flight contravenes this subregulation if, when the flight begins, a safety briefing card for the aeroplane is not available to each passenger on the aeroplane.
- (3) The operator of an aeroplane for a flight contravenes this subregulation if, when the flight begins, a safety briefing card does not meet the requirements mentioned in subregulation (4).
- (4) The requirements are the following:
 - (a) the safety briefing card must include any information prescribed by the Part 135 Manual of Standards;
 - (b) the only other information that may be included in the safety briefing card is the following:
 - (i) information that is relevant to the type and model of aeroplane;

- (ii) information that is relevant to the safety of the aeroplane and its passengers.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (2) or (3).
- Penalty: 50 penalty units.

135.280 Safety briefings, instructions and demonstrations

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if a passenger is not given a safety briefing, instructions or demonstrations in accordance with the requirements prescribed by the Part 135 Manual of Standards for the purposes of this regulation.
- (2) Subregulation (1) does not apply in relation to a medical patient on a flight that is a medical transport operation.
- (3) The operator of an aeroplane for a flight contravenes this subregulation if a safety briefing, instruction or demonstration required to be given to a passenger under this regulation includes:
 - (a) information that is not relevant to the type and model of the aeroplane; or
 - (b) information that is not relevant to the safety of the aeroplane and its passengers.
- (4) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) a passenger with reduced mobility will be carried on the flight; and
 - (b) before the aeroplane takes off for the flight, the passenger, or a person accompanying or assisting the passenger, is not asked by a crew member for the flight about the best way of helping the passenger if an emergency evacuation of the aeroplane is necessary.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (1), (3) or (4).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

135.285 Safety briefing in the event of an emergency

- (1) An aeroplane operator's exposition must include procedures for briefing passengers on what to do if an emergency occurs during a flight of the aeroplane.
- (2) Subregulation (1) does not apply to a medical patient on a flight that is a medical transport operation.

135.290 Flights over water for single-engine aeroplanes

- (1) The operator and the pilot in command of a single-engine aeroplane (other than a prescribed single-engine aeroplane) for a flight each contravene this
-

Regulation 135.290

subregulation if, during the flight, the aeroplane is flown more than 25 nautical miles over water from a suitable forced landing area.

- (2) The operator and the pilot in command of a prescribed single-engine aeroplane for a flight each contravene this subregulation if:
- (a) during the flight, the aeroplane is flown more than 25 nautical miles over water from a suitable forced landing area; and
 - (b) either:
 - (i) the aeroplane is not a kind of aeroplane allowed by the Part 135 Manual of Standards for the purposes of this regulation to be flown more than 25 nautical miles over water from a suitable forced landing area; or
 - (ii) the aeroplane is a kind of aeroplane allowed by the Part 135 Manual of Standards to be flown more than 25 nautical miles over water from a suitable forced landing area, but is flown in a way that contravenes a procedure prescribed by the Part 135 Manual of Standards for that kind of flight.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

Division 135.D.8—Instruments, indicators, equipment and systems

135.295 Airborne weather radar equipment

- (1) This regulation applies to an aeroplane that conducts a flight:
 - (a) for which airborne weather radar equipment is required, under Subpart 135.K, to be fitted to the aeroplane; or
 - (b) whilst the aeroplane is fitted with airborne weather radar equipment (whether or not the airborne weather radar equipment is required, under Subpart 135.K, to be fitted for the flight).
- (2) The aeroplane operator's exposition must include the following:
 - (a) procedures for using airborne weather radar equipment during a flight mentioned in subregulation (1);
 - (b) procedures for conducting a flight mentioned in subregulation (1) without airborne weather radar equipment, for use if the equipment is inoperative.

135.300 Head-up displays, enhanced vision systems and synthetic vision systems

- (1) This regulation applies to a flight of an aeroplane if:
 - (a) it is fitted with any of the following systems:
 - (i) a head-up display;
 - (ii) an enhanced vision system;
 - (iii) a synthetic vision system; and
 - (b) the flight is:
 - (i) an IFR flight; or
 - (ii) a VFR flight at night.
- (2) The aeroplane operator's exposition must include the following:
 - (a) procedures for using each system that is fitted to the aeroplane during a flight mentioned in paragraph (1)(b);
 - (b) procedures for conducting a flight mentioned in paragraph (1)(b) without an element of the system, for use if the element is inoperative.

135.305 Survival equipment procedures

- (1) This regulation applies to a flight of an aeroplane if:
 - (a) the flight is in or through an area prescribed as a remote area by the Part 91 Manual of Standards; or
 - (b) the aeroplane is required, under Subpart 135.K, to carry a life raft for the flight.
- (2) If an aeroplane is, or will be, used to conduct a flight to which this regulation applies, the aeroplane operator's exposition must include the following:
 - (a) procedures for determining the survival equipment required for the area in or through which the flight will be conducted;

Part 135 Australian air transport operations—smaller aeroplanes

Subpart 135.D Operational procedures

Division 135.D.8 Instruments, indicators, equipment and systems

Regulation 135.305

- (b) for a flight mentioned in paragraph (1)(b)—procedures for determining the pyrotechnic signalling devices required to ensure the distress signals, set out in Appendix 1 to Annex 2, *Rules of the Air*, to the Chicago Convention, can be made.

Division 135.D.9—Miscellaneous

135.310 Procedures relating to ice

An aeroplane operator's exposition must include the following in relation to a flight of the aeroplane:

- (a) procedures for the inspection of the aeroplane by the pilot in command before the flight if frost or freezing conditions exist;
- (b) if ground de-icing and ground anti-icing measures are required for the flight—procedures for carrying out these measures before the flight;
- (c) procedures for using de-icing and anti-icing equipment (where fitted) during the flight.

135.315 Procedures relating to portable electronic devices

An aeroplane operator's exposition must include procedures for the operation of portable electronic devices for a flight of the aeroplane.

135.320 Procedures relating to carriage of animals

An operator's exposition must include procedures for the carriage of animals for a flight of the aeroplane.

135.325 Polar operations

- (1) This regulation applies to an aeroplane that conducts a flight to or from an aerodrome in a polar region.
- (2) The aeroplane operator's exposition must include procedures for the following:
 - (a) monitoring and dealing with fuel freezing;
 - (b) ensuring communication capability for the duration of an operation that includes a flight mentioned in subregulation (1);
 - (c) training the aeroplane's flight crew in polar operations;
 - (d) mitigating crew member and passenger exposure to cosmic radiation during solar flare activity;
 - (e) if the aeroplane is not flown over water during a flight mentioned in subregulation (1)—ensuring that each person on the aeroplane wears a serviceable, cold weather, anti-exposure suit that is appropriate for the temperatures in which the flight is conducted;
 - (f) if the aeroplane is flown over water during a flight mentioned in subregulation (1)—ensuring that each person on the aeroplane wears an immersion suit that is appropriate for the temperatures in which the flight is conducted.

135.330 Cosmic radiation

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
-

Regulation 135.335

- (a) the operator's exposition does not state a limit for the total cosmic radiation receivable inside the aeroplane's cabin during the flight; and
 - (b) the aeroplane is flown above flight level 490.
- (2) The operator of an aeroplane contravenes this subregulation if:
- (a) a flight crew member of the operator's personnel has, in the previous 12 month period, flown on a flight of an aeroplane operated by the operator during which the aeroplane was flown above flight level 490; and
 - (b) the operator does not have a record of the total cosmic radiation dose received by the member during that period on such flights.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

135.335 Exceeding cosmic radiation limits

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if:
- (a) the aeroplane is flown above flight level 490; and
 - (b) during the flight, the limit stated in the operator's exposition for the total cosmic radiation receivable inside the aeroplane's cabin during a flight is exceeded; and
 - (c) the pilot in command does not, as soon as practicable after the limit is exceeded, descend to the lowest altitude at which it is practicable to complete the flight safely.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Subpart 135.F—Performance

135.340 Performance data

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if, in making a calculation relating to the aeroplane's performance for a flight, data other than the following is used:
 - (a) the performance data set out in the aircraft flight manual instructions for the aeroplane;
 - (b) performance data for the aeroplane for which the operator holds an approval under regulation 135.020.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

135.345 Take-off performance

- (1) The Part 135 Manual of Standards may prescribe requirements relating to take-off performance for a flight of an aeroplane.
- (2) Without limiting subregulation (1), the Part 135 Manual of Standards may prescribe requirements that relate to one or more of the following:
 - (a) the kinds of operations to be carried out during the flight;
 - (b) characteristics of the aerodrome at which the aeroplane takes off;
 - (c) characteristics of the route flown by the aeroplane;
 - (d) characteristics of the aerodrome at which the aeroplane lands.
- (3) The pilot in command of an aeroplane for a flight contravenes this subregulation if:
 - (a) the pilot is subject to a requirement mentioned in subregulation (1) for the flight; and
 - (b) the requirement is not met for the flight.
- (4) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the operator is subject to a requirement mentioned in subregulation (1) for the flight; and
 - (b) the requirement is not met for the flight.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (3) or (4).

Penalty: 50 penalty units.

Regulation 135.350

135.350 Landing performance

- (1) The Part 135 Manual of Standards may prescribe requirements relating to landing performance for a flight of an aeroplane.
- (2) Without limiting subregulation (1), the Part 135 Manual of Standards may prescribe requirements relating to one or more of the following:
 - (a) the aeroplane's configuration;
 - (b) the operation of any equipment for the flight;
 - (c) characteristics of the aerodrome at which the aeroplane lands;
 - (d) safety factor percentages to be applied.
- (3) The pilot in command of an aeroplane for a flight contravenes this subregulation if:
 - (a) the pilot is subject to a requirement mentioned in subregulation (1) for the flight; and
 - (b) the requirement is not met for the flight.
- (4) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the operator is subject to a requirement mentioned in subregulation (1) for the flight; and
 - (b) the requirement is not met for the flight.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (3) or (4).

Penalty: 50 penalty units.

Subpart 135.J—Weight and balance

135.355 Loading of aeroplane

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if, when the flight begins, the aeroplane is loaded in a way that contravenes the aeroplane's weight and balance limits.
- (2) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if, during the flight, the aeroplane ceases to be loaded in accordance with the aeroplane's weight and balance limits.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

135.360 Procedures for loading aeroplane etc.

An aeroplane operator's exposition must include the following:

- (a) procedures for loading the aeroplane for a flight to comply with regulation 135.355;
- (b) procedures for working out the following weights for a flight of the aeroplane:
 - (i) the total weight of the crew members;
 - (ii) the total weight of the passengers;
 - (iii) the total weight of the cargo, including carry-on baggage;
 - (iv) the total weight of the fuel to be carried;
- (c) procedures to ensure that a last-minute change to a load does not cause the aeroplane to exceed its weight and balance limits;
- (d) procedures for offloading passengers or cargo to ensure that the aeroplane does not exceed its weight and balance limits.

135.365 Weight and balance documents

- (1) The operator and the pilot in command of an aeroplane for a flight each contravene this subregulation if, when the flight begins, the weight and balance documents for the flight do not comply with subregulation (2).
- (2) The weight and balance documents must include the following:
 - (a) the weight and balance of the aeroplane and the information used to calculate the weight and balance;
 - (b) the name of the person who prepared the weight and balance documents;
 - (c) confirmation by the person responsible for planning and supervising the loading of the aeroplane that the aeroplane has been loaded in accordance with:

Regulation 135.365

- (i) the procedures set out in the operator's exposition for loading the aeroplane; and
 - (ii) the weight and balance documents;
 - (d) if the person mentioned in paragraph (c) is not the pilot in command or the co-pilot—confirmation of the acceptance of the weight and balance documents by the pilot in command or the co-pilot;
 - (e) any other information that the pilot in command needs to ensure that the loading of the aeroplane is in accordance with the weight and balance limits for the aeroplane.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Subpart 135.K—Equipment

135.370 Requirements relating to equipment

- (1) The Part 135 Manual of Standards may prescribe requirements relating to:
 - (a) the fitment and non-fitment of equipment to an aeroplane; and
 - (b) the carrying of equipment on an aeroplane; and
 - (c) equipment that is fitted to, or carried on, an aeroplane.
- (2) A person contravenes this subregulation if:
 - (a) the person is subject to a requirement mentioned in subregulation (1); and
 - (b) the requirement is not met.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Subpart 135.N—Flight crew

Division 135.N.1—General

135.380 Composition, number, qualifications and training

General

- (1) The operator of an aeroplane for a flight contravenes this subregulation if, when the flight begins, a requirement mentioned in subregulation (2) is not met.
- (2) The requirements are as follows:
 - (a) the composition of the aeroplane's flight crew for the flight must comply with the aircraft flight manual instructions for the aeroplane;
 - (b) if the flight is a kind of operation for which the operator's exposition requires the carriage of additional flight crew members—the flight crew must include the additional flight crew members;
 - (c) each flight crew member must be qualified under regulation 135.395 or 135.400 to carry out the duties assigned to the flight crew member by the operator for the flight;
 - (d) if the flight is a VFR flight at night that is a passenger transport operation or a medical transport operation—at least one of the flight crew members must hold an instrument rating;
 - (e) the pilot in command and the co-pilot for the flight must have the recent experience for the flight required by Division 135.N.4;
 - (f) each flight crew member must meet the training and checking requirements for the flight crew member and the flight mentioned in subregulation (4);
 - (g) if the operator's exposition includes requirements, in accordance with regulation 135.410, in relation to knowledge that the pilot in command must have of the route of, and aerodromes for, the flight—the pilot in command must meet the requirements;
 - (h) each flight crew member for whom, under the operator's exposition, differences training for the aeroplane is required, must have successfully completed the differences training.
- (3) For the purposes of paragraph (2)(b), the aeroplane operator's exposition must include the kinds of operation (if any) for which additional flight crew members must be carried.
- (4) The Part 135 Manual of Standards may prescribe requirements relating to training and checking that must be completed by a flight crew member for a flight.

Regulation 135.385*New or inexperienced crew members*

- (5) An aeroplane operator's exposition must include the requirements that must be met for new or inexperienced crew members to be assigned to duty for a flight of the aeroplane.

Offences

- (6) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

135.385 Competence

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
- (a) the operator assigns a person to duty as a flight crew member for the flight; and
 - (b) the person has not been assessed by the operator, in accordance with the operator's training and checking system, as competent to perform the duties assigned to the person for the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

135.387 Training and checking to be conducted by certain persons

- (1) The operator of an aeroplane contravenes this subregulation if:
- (a) a flight crew member of the operator's personnel undertakes training or a check that is required under this Part; and
 - (b) the training or check is conducted other than in accordance with subregulation (2).
- (2) The training or check must be conducted by:
- (a) an individual who:
 - (i) is engaged by the operator (whether by contract or other arrangement) to conduct the training or check; and
 - (ii) meets the requirements prescribed by the Part 135 Manual of Standards; or
 - (b) a Part 142 operator with whom the operator has a contract for the Part 142 operator to conduct the training or check for the operator.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Regulation 135.390

135.390 Assignment to duty of pilot in command

- (1) The operator of an aeroplane for a flight contravenes this subregulation if, when the flight begins, none of the pilots assigned as flight crew members for the flight is assigned to duty as the pilot in command of the aeroplane for the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

135.395 Pilot in command

- (1) A pilot is qualified as pilot in command for a flight of an aeroplane if:
 - (a) the pilot meets the minimum flying experience requirements specified, in accordance with subregulation (2), in the aeroplane operator's exposition for the aeroplane; and
 - (b) for a flight described in an item of column 1 of the following table—the pilot has completed, in an aeroplane of that kind, the flight hours mentioned in column 2 of the item; and
 - (c) the pilot has successfully completed command training that complies with the requirements prescribed by the Part 135 Manual of Standards; and
 - (d) the pilot is:
 - (i) if the aeroplane is an Australian aircraft—authorised to pilot the aeroplane during the flight as pilot in command under Part 61; or
 - (ii) if the aeroplane is a foreign registered aircraft—authorised to pilot the aeroplane during the flight as pilot in command by the aeroplane's State of registry.

Flight hours required to qualify as pilot in command

Item	Column 1 Flight	Column 2 Flight hours
1	IFR flight at night	15 hours as pilot in command, or pilot in command under supervision, under the IFR at night
2	Flight in a multi-engine aeroplane that has a maximum take-off weight of less than 5,700 kg	Both: (a) 10 hours as pilot in command, or pilot in command under supervision, of a multi-engine aeroplane; and (b) 10 hours as pilot in command, or pilot in command under supervision, of an aeroplane of that kind
3	Flight in a multi-engine aeroplane that has a maximum take-off weight of at least 5,700 kg	Both: (a) 50 hours as pilot in command, or pilot in command under supervision, of a multi-engine aeroplane; and (b) 10 hours as pilot in command, or pilot in command under supervision, of an aeroplane of that kind
4	Flight in a prescribed	20 hours as pilot in command, or pilot in command under supervision,

Regulation 135.400

Flight hours required to qualify as pilot in command

Item	Column 1	Column 2
	Flight	Flight hours
	single-engine aeroplane	of an aeroplane of that kind
5	Flight in an aeroplane covered by an aircraft type rating	25 hours as pilot in command, or pilot in command under supervision, of an aeroplane of that aircraft type rating

- (2) For the purposes of paragraph (1)(a), the operator's exposition must include minimum flying experience requirements for all aeroplanes operated by the operator for Australian air transport operations.
- (3) To avoid doubt, more than one item of column 2 of the table in subregulation (1) may apply to a particular hour of flight time.

135.400 Co-pilot

- (1) A pilot is qualified as co-pilot for a flight of an aeroplane if:
- (a) the pilot is:
 - (i) if the aeroplane is an Australian aircraft—authorised to pilot the aeroplane during the flight as co-pilot under Part 61; or
 - (ii) if the aeroplane is a foreign registered aircraft—authorised to pilot the aeroplane during the flight as co-pilot by the aeroplane's State of registry; and
 - (b) the pilot has completed supervised line flying on an aeroplane of that kind as co-pilot for the number of sectors or flight hours mentioned in the operator's exposition.
- (2) A pilot is qualified as co-pilot for a flight of an aeroplane if the pilot is qualified under regulation 135.395 as pilot in command for the flight.

135.405 Pilot in command in non-command pilot's seat*Operator*

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
- (a) the operator requires the pilot in command of the aeroplane for the flight to do any of the following in the non-command pilot's seat:
 - (i) operate the aeroplane as pilot in command;
 - (ii) carry out the duties of co-pilot;
 - (iii) carry out training or examining duties; and
 - (b) the pilot in command does not hold a valid proficiency check, in accordance with the requirements prescribed by the Part 135 Manual of Standards, for the operator and the flight for a pilot who will be required to operate the aeroplane in the non-command pilot's seat.

Regulation 135.410

Pilot in command

- (2) The pilot in command of an aeroplane for a flight contravenes this subregulation if the pilot in command:
- (a) operates the aeroplane in the non-command pilot's seat; and
 - (b) does not hold a valid proficiency check, in accordance with the requirements prescribed by the Part 135 Manual of Standards, for the operator and the flight for a pilot who will be required to operate the aeroplane in the non-command pilot's seat.

Offence

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

135.410 Knowledge of route and aerodromes

An aeroplane operator's exposition must include requirements in relation to the knowledge that a pilot in command of the aeroplane for a flight must have of:

- (a) the route of the flight; and
- (b) the departure aerodrome and the planned destination aerodrome for the flight; and
- (c) any alternate aerodrome required for the flight by the flight preparation (alternate aerodromes) requirements.

Division 135.N.2—Operation of aeroplanes of different type ratings

135.415 Application of Division 135.N.2

This Division applies in relation to the operator of an aeroplane if:

- (a) under the operator's AOC, the operator operates aeroplanes of more than one type rating for Part 135 operations; and
- (b) the operator assigns, or is likely to assign, a flight crew member employed by the operator to duty on aeroplanes of more than one type rating.

135.420 Assignment of flight crew to aeroplanes of different type ratings

An aeroplane operator's exposition must include the following:

- (a) a description of the circumstances in which the operator may assign a flight crew member to duty on aeroplanes of more than one type rating;
- (b) the combinations of aeroplanes with different type ratings that a single flight crew member may be assigned to duty on by the operator;
- (c) the flying experience, checks and training that a flight crew member must gain or complete, while the flight crew member is employed by the operator, before being assigned to duty on aeroplanes of more than one type rating;
- (d) procedures to ensure that, if a flight crew member is assigned to duty on aeroplanes with different type ratings within one tour of duty, the flight crew member has adequate time between flights on aeroplanes with different ratings for the flight crew member to prepare for duty.

Division 135.N.3—Operation of aeroplanes of different types

135.425 Application of Division 135.N.3

This Division applies to the operator of an aeroplane if the operator operates aeroplanes of more than one type for Part 135 operations.

135.430 Assignment as pilot in command on aeroplanes of different types

Turbine-engine aeroplanes

- (1) An operator contravenes this subregulation if:
 - (a) the operator assigns a pilot to duty as pilot in command for flights on different types of turbine-engine aeroplanes; and
 - (b) the pilot does not hold a valid proficiency check, in accordance with the requirements prescribed by the Part 135 Manual of Standards, for an aeroplane of each type for a pilot in command.

Piston-engine aeroplanes

- (2) An operator contravenes this subregulation if:
 - (a) the operator assigns a pilot to duty as pilot in command for flights on different types of piston-engine aeroplanes; and
 - (b) the pilot does not meet the requirement mentioned in subregulation (3).
- (3) For the purposes of paragraph (2)(b), the requirement is that:
 - (a) if the aeroplanes are of the same aircraft class rating—the pilot must hold a valid proficiency check, in accordance with the requirements prescribed by the Part 135 Manual of Standards, for an aeroplane of one of the types for a pilot in command; or
 - (b) if the aeroplanes are of different aircraft class ratings—the pilot must hold a valid proficiency check, in accordance with the requirements prescribed by the Part 135 Manual of Standards, for an aeroplane of each class for a pilot in command.

Offence

- (4) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

Division 135.N.4—Recent experience**135.435 Recent experience requirements—90 days before flight***Operator*

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the operator assigns a pilot to duty as pilot in command or co-pilot of the aeroplane for the flight; and
 - (b) the pilot does not have:
 - (i) if the flight is a flight by day—the recent experience required for the flight by subregulation (3); or
 - (ii) if the flight is a flight at night—the recent experience required for the flight by subregulation (4).

Pilot

- (2) A pilot of an aeroplane for a flight contravenes this subregulation if:
 - (a) the pilot operates the aeroplane as pilot in command or co-pilot for the flight; and
 - (b) the pilot does not have:
 - (i) if the flight is a flight by day—the recent experience required for the flight by subregulation (3); or
 - (ii) if the flight is a flight at night—the recent experience required for the flight by subregulation (4).

Requirements for flights by day

- (3) The recent experience required for a flight by day is that, within 90 days before the flight:
 - (a) the pilot must have carried out, in an aeroplane of that kind or an approved flight simulator for the aeroplane:
 - (i) at least 3 take-offs followed by climbs to at least 500 ft AGL while controlling the aeroplane or simulator; and
 - (ii) at least 3 landings while controlling the aeroplane or simulator; or
 - (b) the pilot must have passed a flight test for the grant of a pilot licence or a rating on a pilot licence in an aeroplane of that kind or an approved flight simulator for the aeroplane; or
 - (c) the pilot must have successfully completed a proficiency check, in accordance with the requirements prescribed by the Part 135 Manual Standards, for the aeroplane.

Note: For other recent experience requirements, see Part 61.

Regulation 135.435

Requirements for flights at night

- (4) The recent experience required for a flight at night is that, within 90 days before the flight:
- (a) the pilot must have carried out, at night in an aeroplane of that kind or under night time conditions in an approved flight simulator for the aeroplane:
 - (i) at least 3 take-offs followed by climbs to at least 500 ft AGL while controlling the aeroplane or simulator; and
 - (ii) at least 3 landings while controlling the aeroplane or simulator; or
 - (b) the pilot must have passed a flight test for the grant of a pilot licence or a rating on a pilot licence in an aeroplane of that kind or an approved flight simulator for the aeroplane; or
 - (c) the pilot must have successfully completed a proficiency check, in accordance with the requirements prescribed by the Part 135 Manual Standards, for the aeroplane.

Offence

- (5) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

Subpart 135.P—Crew other than flight crew

Division 135.P.1—General

Note: This Division is reserved for future use.

Division 135.P.2—Air crew

135.445 Training and checking

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) an air crew member is carried on the flight; and
 - (b) the air crew member does not meet the training and checking requirements for the air crew member and the flight mentioned in subregulation (2).
- (2) The Part 135 Manual of Standards may prescribe requirements relating to training and checking that must be completed by an air crew member for a flight of an aeroplane.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

135.450 Competence

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the operator assigns a person to duty as an air crew member for a flight; and
 - (b) the person has not been assessed by the operator, in accordance with the operator's exposition, as competent to perform the duties assigned to the person for the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

135.455 English proficiency

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the operator assigns a person to duty as an air crew member for the flight; and
 - (b) the person does not meet the requirement mentioned in subregulation (2).
- (2) The requirement is that the person must meet the ICAO level 4, 5 or 6 aviation English language proficiency standards mentioned in the Part 61 Manual of Standards.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 135.P.3—Medical transport specialists

135.460 Training and checking

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) a medical transport specialist is carried on the flight; and
 - (b) the medical transport specialist does not meet the training and checking requirements for the medical transport specialist and the flight mentioned in subregulation (2).
- (2) The Part 135 Manual of Standards may prescribe requirements relating to training and checking that must be completed by a medical transport specialist for a flight of an aeroplane.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

135.465 Competence

- (1) The operator of an aeroplane for a flight contravenes this subregulation if:
 - (a) the operator assigns a person to duty as a medical transport specialist for a flight; and
 - (b) the person has not been assessed by the operator, in accordance with the operator's exposition, as competent to perform the duties assigned to the person for the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Civil Aviation Safety Regulations 1998

Statutory Rules No. 237, 1998

made under the

Civil Aviation Act 1988

Compilation No. 99

Compilation date: 11 April 2024

Includes amendments: F2024L00297

Registered: 18 April 2024

This compilation is in 5 volumes

- Volume 1: regulations 1.001–42.1105
- Volume 2: regulations 45.005–92.205
- Volume 3: regulations 99.005–135.465
- Volume 4: regulations 137.005–175.500**
- Volume 5: regulations 200.005–202.900
Dictionary and Endnotes

Each volume has its own contents

Prepared by the Office of Parliamentary Counsel, Canberra

About this compilation

This compilation

This is a compilation of the *Civil Aviation Safety Regulations 1998* that shows the text of the law as amended and in force on 11 April 2024 (the *compilation date*).

The notes at the end of this compilation (the *endnotes*) include information about amending laws and the amendment history of provisions of the compiled law.

Uncommenced amendments

The effect of uncommenced amendments is not shown in the text of the compiled law. Any uncommenced amendments affecting the law are accessible on the Register (www.legislation.gov.au). The details of amendments made up to, but not commenced at, the compilation date are underlined in the endnotes. For more information on any uncommenced amendments, see the Register for the compiled law.

Application, saving and transitional provisions for provisions and amendments

If the operation of a provision or amendment of the compiled law is affected by an application, saving or transitional provision that is not included in this compilation, details are included in the endnotes.

Editorial changes

For more information about any editorial changes made in this compilation, see the endnotes.

Modifications

If the compiled law is modified by another law, the compiled law operates as modified but the modification does not amend the text of the law. Accordingly, this compilation does not show the text of the compiled law as modified. For more information on any modifications, see the Register for the compiled law.

Self-repealing provisions

If a provision of the compiled law has been repealed in accordance with a provision of the law, details are included in the endnotes.

138.305	Carriage of passengers—general.....	83
138.320	Procedures for carriage of restricted persons	83

Division 138.D.8—Instruments, indicators, equipment and systems	84
138.340 Head-up displays, enhanced vision systems and synthetic vision systems	84
138.345 Survival equipment procedures	84
138.350 NVIS flights	84
Division 138.D.9—Miscellaneous	86
138.370 Operator must conduct risk assessments	86
138.375 Wearing of seatbelts and other restraint devices	86
138.380 Procedures in relation to frost etc.	86
138.385 Procedures in relation to polar operations	87
Division 138.D.10—Rules for external load operations	88
138.400 Certain night operations prohibited unless operation is an emergency service operation or approved by CASA	88
138.410 Manual of Standards may prescribe requirements for external load operations	88
Division 138.D.11—Rules for dispensing operations	90
138.425 Manual of Standards may prescribe requirements for dispensing operations.....	90
Division 138.D.12—Rules for task specialist operations	91
138.430 Manual of Standards may prescribe requirements for task specialist operations	91
138.432 Possessing and discharging firearms	91
Subpart 138.F—Performance	92
138.435 Take-off performance	92
138.440 Landing performance	92
Subpart 138.J—Weight and balance	94
138.450 Loading of aircraft	94
138.460 Weight and balance documents	94
Subpart 138.K—Equipment	95
138.465 Requirements relating to equipment.....	95
Subpart 138.N—Flight crew	96
138.475 Composition, number, qualifications and training	96
138.480 Training for new or inexperienced flight crew members	96
138.485 Competence	96
138.490 Assignment to duty of pilot in command	97
138.500 Qualification as pilot in command	97
138.505 Training and checking to be conducted by certain persons.....	98
Subpart 138.P—Air crew members and task specialists	99
Division 138.P.1—Air crew members	99
138.535 Application of Division 138.P.1	99
138.540 Composition, number, qualifications and training	99
138.550 Training and checking to be conducted by certain persons.....	99

Division 138.P.2—Task specialists	101
138.575	Application of Division 138.P.2.....101
138.580	Qualifications and training101
138.590	Training and checking to be conducted by certain persons.....101
Part 139—Aerodromes	102
Subpart 139.A—Preliminary	105
139.001	Simplified outline of this Part105
139.005	Issue of Manual of Standards for Part 139105
139.010	Approvals by CASA for Part 139.....106
139.015	Effect on operation of other laws106
Subpart 139.B—Aerodrome certificates	107
139.020	Application for aerodrome certificate107
139.025	When aerodromes are required to have an aerodrome certificate.....107
139.030	Grant of aerodrome certificate107
139.035	Suspension or cancellation of aerodrome certificate by CASA107
139.040	Notification requirement if aerodrome ceases to be certified.....108
Subpart 139.C—Operation and maintenance of a certified aerodrome	110
Division 139.C.1—Aerodrome manual	110
139.045	Requirement to have aerodrome manual.....110
139.050	Amendments of aerodrome manual110
139.055	Compliance with aerodrome manual.....110
139.060	Notice of non-compliance with aerodrome manual111
Division 139.C.2—Aerodrome facilities and equipment	112
139.065	Aerodrome facilities and equipment112
139.070	Planning and carrying out aerodrome works.....112
Division 139.C.3—Aerodrome inspections, monitoring and reporting	114
139.075	Aerodrome inspections.....114
139.080	Reporting information to AIS providers114
139.085	Reporting changes or occurrences at aerodromes115
139.090	Monitoring airspace and reporting infringements115
Division 139.C.4—Safety management, emergency preparedness and other systems	117
139.095	Safety management systems and risk management plans.....117
139.100	Emergency preparedness and aerodrome emergency plans117
139.105	Other aerodrome systems118
Division 139.C.5—Aerodrome personnel	120
139.110	Aerodrome personnel120
139.115	Training etc. of aerodrome personnel.....121

139.120	Aerodrome personnel carrying out responsibilities.....	121
Division 139.C.6—Aerodrome ground surveillance systems		122
139.125	Condition on aerodrome certificate to operate aerodrome ground surveillance system	122
139.130	Requirements for aerodrome ground surveillance systems	123
Division 139.C.7—Other matters		124
139.135	Access to aerodromes to conduct tests	124
139.140	Requests for data from aerodrome operator	124
139.145	Requests for data from ATS providers.....	125
Subpart 139.D—Aerodrome radiocommunication services		126
Division 139.D.1—Frequency confirmation system		126
139.150	Frequency confirmation systems for aerodromes	126
Division 139.D.2—Air/ground radio service		127
139.155	Air/ground radio service must be approved	127
139.160	Requirements for operating certified air/ground radio service	127
Subpart 139.E—Hazards to aircraft operations		129
Division 139.E.1—Notifying potential hazards		129
139.165	Notifying CASA of certain proposed objects or structures	129
139.170	Notifying CASA of activities that create certain emissions sources	129
Division 139.E.2—Determination of hazards		131
139.175	Determination that certain existing objects, structures or emissions sources are a hazard to aircraft operations.....	131
139.180	Determination that certain proposed objects, structures or emissions sources are a hazard to aircraft operations.....	131
139.185	Kinds of objects, structures or emissions sources that may be hazards	132
Subpart 139.H—Aerodrome rescue and firefighting services		133
Division 139.H.1—General		133
139.700	Applicability of this Subpart	133
139.705	Definitions for this Subpart	133
139.710	Functions of ARFFS.....	134
139.711	Person not to provide service without approval	134
139.712	Issue of Manual of Standards	134
139.715	Effect of Manual of Standards.....	135
Division 139.H.3—Requirements to be complied with by ARFFS provider		136
139.750	Requirements in this Division	136
139.755	Definition for Division— <i>applicable standards and requirements</i>	136
139.760	Inconsistency between Manual and chapter 9 of Annex 14	137

139.765	Knowledge, equipment and expertise to deal with aviation hazards	137
139.770	General obligation to maintain service.....	137
139.771	Response time of ARFFS	137
139.772	Buildings and emergency facilities	137
139.773	Officer in charge.....	138
139.775	Notice about times service is available etc.....	138
139.780	Agreements with other fire fighting bodies.....	138
139.785	Stock of fire extinguishing agents	139
139.795	Extinguishing equipment and vehicles.....	139
139.800	Other vehicles and equipment	140
139.805	Vehicles and equipment for firefighting and rescue in difficult environments	140
139.810	Commissioning of certain equipment.....	140
139.815	Protective clothing and equipment	140
139.820	Communications.....	141
139.825	Test and maintenance equipment	141
139.830	Commissioning of new vehicles and equipment.....	141
139.835	Number of operating personnel	141
139.840	Medical standard of firefighters	142
139.845	Qualifications and training of firefighters	142
139.850	Operations manual.....	142
139.855	Amendment of operations manual	143
139.860	Voice data recording	143
139.865	Record of accidents or incidents	143
139.870	Contingency plan.....	143
139.875	Records management	143
139.880	Organisation	144
139.885	System for rectification of service failures.....	144
139.890	Quality control.....	144
139.895	Change management	144
139.900	Safety management	144
139.905	Applicant's organisation.....	144
139.910	Telling users and CASA about changes	144
Division 139.H.4—Conduct of ARFFS operations		146
139.915	Powers of officer in charge or firefighter	146
Division 139.H.5—Administration		148
139.920	Definition for Division	148
139.925	How to apply for approval as ARFFS provider	148
139.965	When CASA must grant approval.....	149
139.970	When decision must be made.....	149
139.995	Application for variation of approval.....	150
139.1005	Suspension or continued suspension of approval by show cause notice	150
139.1010	Grounds for cancellation of approval	150
139.1015	Notice to approved ARFFS provider to show cause	151
139.1020	Cancellation of approval after show cause notice	151
139.1022	Cancellation if holder ceases to provide ARFFS	151

Part 141—Recreational, private and commercial pilot flight training, other than certain integrated training courses	152
Subpart 141.A—General	154
141.005	What Part 141 is about154
141.010	Aircraft and flight simulation training devices to which Part 141 applies154
141.015	Definitions of <i>Part 141 flight training, authorised Part 141 flight training, Part 141 operator and Part 141 certificate</i>154
141.020	Definition of <i>key personnel</i> for Part 141155
141.025	Definition of <i>significant change</i> for Part 141155
141.030	Definitions for Part 141156
141.035	Approvals by CASA for Part 141157
141.040	Legislative instruments—flight training157
141.045	Regulations 11.070 to 11.075 do not apply in relation to certain matters157
141.050	Part 141 flight training—requirement for Part 141 certificate or approval157
Subpart 141.B—Part 141 certificates	159
141.055	Part 141 certificates—application159
141.060	Part 141 certificate—issue159
141.065	Part 141 certificate—approval of operations manual161
141.070	Part 141 certificate—conditions161
141.075	Part 141 certificate—compliance with conditions161
Subpart 141.C—Part 141 operators—changes	162
141.080	Part 141 operators—changes of name etc162
141.085	Part 141 operators—application for approval of significant changes162
141.090	Part 141 operators—approval of significant changes163
141.095	Part 141 operators—process for making changes163
141.100	Part 141 operators—CASA directions relating to operations manual or key personnel163
Subpart 141.D—Part 141 operators—organisation and personnel	165
141.105	Part 141 operators—organisation and personnel165
141.110	Part 141 operators—key personnel cannot carry out responsibilities165
141.115	Part 141 operators—familiarisation training for key personnel165
141.120	Part 141 operators—chief executive officer: responsibilities and accountabilities166
141.125	Part 141 operators—head of operations: qualifications and experience167
141.130	Part 141 operators—head of operations: responsibilities167
141.155	Part 141 operators—key personnel: additional qualification and experience requirements169
141.160	Part 141 operators—reference library170

Subpart 141.E—Part 141 operators—instructors	171
141.165	Part 141 operators—instructors must comply with Part 141 certificate.....171
141.170	Part 141 operators—instructors must comply with operations manual.....171
141.175	Part 141 operators—instructors must be authorised under Part 61171
141.180	Part 141 operators—instructors must have access to records171
141.185	Part 141 operators—instructors must hold valid standardisation and proficiency check for operator171
141.190	Part 141 operators—holding valid standardisation and proficiency check for operator.....172
141.195	Part 141 operators—standardisation and proficiency check requirements.....172
141.200	Part 141 operators—instructors—training in human factors principles and non-technical skills173
141.205	Part 141 operators—instructors must be competent to conduct flight training in flight simulation training device173
141.210	Part 141 operators—person recommended for flight test.....173
Subpart 141.G—Part 141 operators—quality system	174
141.225	Part 141 operators—quality system for flight simulation training devices.....174
Subpart 141.H—Part 141 operators—personnel fatigue management	175
Subpart 141.I—Part 141 operators—operations manuals	176
141.260	Part 141 operators—content of operations manual176
141.265	Part 141 operators—compliance with operations manual by operator.....178
141.270	Part 141 operators—providing personnel with operations manual.....178
Subpart 141.J—Part 141 operators—logs and records	179
141.275	Part 141 operators—making and keeping flight training records.....179
141.280	Part 141 operators—availability of flight training records179
Subpart 141.K—Part 141 operators—miscellaneous offences	180
141.285	Part 141 operators—suitable facilities, records and resources for flight test180
141.290	Part 141 operators—pilot in command to be authorised under Part 61180
141.295	Part 141 operators—carriage of passengers prohibited during abnormal operations or low-flying flight training180
141.300	Part 141 operators—authorisation of carriage of passengers.....180
141.305	Part 141 operators—completion of training and assessment of competency for certain solo flights181

141.306	Part 141 operators—appropriate briefing and capability to conduct certain solo flights etc.	182
141.310	Part 141 operators—dealings in relation to suspended, cancelled, varied, pending or refused civil aviation authorisations: when approval required.....	183
141.315	Part 141 operators—maximum period for use of foreign registered aircraft in Australian territory	184
Part 142—Integrated and multi-crew pilot flight training, contracted training and contracted checking		186
Subpart 142.A—General		189
142.005	What Part 142 is about	189
142.010	Part 142 applies only to aeroplanes, rotorcraft, airships and flight simulation training devices.....	189
142.015	Definitions of <i>Part 142 activity</i> , <i>Part 142 flight training</i> , <i>Part 142 authorisation</i> , <i>Part 142 operator</i> and <i>authorised Part 142 activity</i> for Part 142.....	189
142.020	Definitions of <i>contracted checking</i> , <i>contracted training</i> and <i>contracting operator</i> for Part 142.....	190
142.025	Definition of <i>key personnel</i> for Part 142	190
142.030	Definition of <i>significant change</i> for Part 142.....	191
142.035	Definitions for Part 142	192
142.040	Approvals by CASA for Part 142.....	193
142.045	Legislative instruments—Part 142 operators	194
142.050	Part 142 activities—requirement for Part 142 authorisation	194
142.055	Part 142 activities—compliance with Part 142 authorisations: offence for operators	194
142.060	Part 142 activities—compliance with conditions of Part 142 authorisations: offence for operators	195
Subpart 142.B—Part 142 authorisations		196
Division 142.B.1—AOCs for Part 142 activities that involve operation of aircraft		196
142.065	Prescribed purpose—Part 142 activities involving the operation of aircraft	196
142.070	Prescribed position—safety manager	196
142.075	Required material—reference library	196
142.080	AOC—application	196
142.085	AOC—conditions for issue	197
142.095	AOC—approval of exposition.....	199
142.100	AOC—conditions	199
Division 142.B.2—Certificates for Part 142 activities conducted in flight simulation training devices		200
142.105	Certificate—application	200
142.110	Certificate—issue	200
142.115	Certificate—approval of exposition	201
142.120	Certificate—conditions	201
142.125	Certificate holders—reference library.....	202

142.130	Certificate holders—regulations 11.070 to 11.075 do not apply in relation to certain matters.....	203
Subpart 142.C—Part 142 operators—changes		204
142.135	Part 142 operators—changes of name etc	204
142.140	Part 142 operators—application for approval of significant change.....	204
142.145	Part 142 operators—approval of significant changes	205
142.150	Part 142 operators—process for making changes	205
142.155	Part 142 operators—CASA directions relating to exposition or key personnel.....	205
Subpart 142.D—Part 142 operators—organisation and personnel		207
142.160	Part 142 operators—organisation and personnel.....	207
142.165	Part 142 operators—key personnel cannot carry out responsibilities.....	207
142.170	Part 142 operators—familiarisation training for key personnel.....	208
142.175	Part 142 operators—chief executive officer: experience.....	208
142.180	Part 142 operators—chief executive officer: responsibilities and accountabilities.....	208
142.185	Part 142 operators—head of operations: qualifications and experience	209
142.190	Part 142 operators—head of operations: responsibilities.....	210
142.195	Part 142 operators—safety manager: experience.....	212
142.200	Part 142 operators—safety manager: responsibilities.....	212
142.205	Part 142 operators—quality assurance manager: experience.....	212
142.210	Part 142 operators—quality assurance manager: responsibilities.....	213
142.215	Part 142 operators—key personnel: additional qualifications and experience requirements	213
Subpart 142.E—Part 142 operators—instructors and examiners		214
142.220	Part 142 activities—instructors and examiners must comply with Part 142 authorisation.....	214
142.225	Part 142 activities—instructors and examiners must comply with exposition	214
142.230	Part 142 operators—instructors and examiners must be authorised under Part 61	214
142.235	Part 142 operators—instructors and examiners must have access to records.....	214
142.240	Part 142 operators—instructors and examiners must be competent to conduct authorised Part 142 activities in flight simulation training devices	215
142.245	Part 142 operators—person recommended for flight test.....	215

Subpart 142.F—Part 142 operators—training management system	216
142.250 Part 142 operators—training management system.....	216
142.255 Part 142 operators—training management system requirements	216
Subpart 142.G—Part 142 operators—safety management system	217
142.260 Part 142 operators—safety management system.....	217
142.265 Part 142 operators—safety management system requirements	217
Subpart 142.H—Part 142 operators—quality assurance management system	220
142.270 Part 142 operators—quality assurance management system	220
142.275 Part 142 operators—quality assurance management system requirements.....	220
Subpart 142.I—Part 142 operators—personnel fatigue management	221
Subpart 142.J—Part 142 operators—internal training and checking	222
142.310 Part 142 operators—internal training and checking system.....	222
142.315 Part 142 operators—internal training and checking system requirements	222
142.320 Part 142 operators—proficiency of instructors	222
142.325 Part 142 operators—holding valid standardisation and proficiency check for operator.....	223
142.330 Part 142 operators—standardisation and proficiency check requirements.....	223
142.335 Part 142 operators—instructors and examiners—training in human factors principles and non-technical skills.....	224
Subpart 142.K—Part 142 operators—expositions	225
142.340 Part 142 operators—content of exposition	225
142.345 Part 142 operators—compliance with exposition by operator.....	227
142.350 Part 142 operators—providing personnel with exposition	227
Subpart 142.L—Part 142 operators—logs and records	229
142.355 Part 142 operators—making and keeping records	229
142.360 Part 142 operators—availability of records.....	229
Subpart 142.M—Part 142 operators—miscellaneous offences	230
142.365 Part 142 operators—pilot in command for training to be authorised under Part 61	230
142.370 Part 142 operators—carriage of passengers prohibited during abnormal operations or low-flying activity	230

142.375	Part 142 operators—authorisation of carriage of passengers.....	230
142.380	Part 142 operators—integrated training courses: transfer of student from another Part 142 operator	231
142.385	Part 142 operators—completion of training and assessment of competency for certain solo flights	231
142.386	Part 142 operators—appropriate briefing and capability to conduct certain solo flights etc.	232
142.390	Part 142 operators—dealings in relation to cancelled, suspended, varied, pending or refused civil aviation authorisations: when approval required.....	233
142.395	Part 142 operators—maximum period for use of foreign registered aircraft in Australian territory	235
Part 143—Air Traffic Services Training Providers		236
Subpart 143.A—General		238
143.005	Applicability of this Part	238
143.010	Definitions for this Part	238
143.015	What is an ATS training provider	239
143.016	Person not to provide service without approval	239
143.017	Issue of Manual of Standards	239
Subpart 143.B—Approval as an ATS training provider		240
143.020	What an application must be accompanied by	240
143.025	When applicant is eligible for approval	240
143.027	CASA may impose conditions on approvals.....	240
143.050	Variation of approvals	241
Subpart 143.C—Requirements to be complied with by ATS training providers		242
Division 143.C.1—Requirements for training		242
143.055	Standard for training.....	242
143.060	Training plan	242
Division 143.C.2—Personnel		243
143.065	Personnel	243
143.070	Qualifications for certain personnel	243
Division 143.C.3—Reference materials, documents and records		244
143.075	Reference materials	244
143.080	Material to be included in reference materials	244
143.085	Documents and records	244
143.090	Document and record control system	244
Subpart 143.D—Telling CASA about changes		245
143.095	Advice on organisational changes	245
143.100	Discontinuing training	245
143.105	Status as registered training organisation.....	245
Subpart 143.E—Miscellaneous		246
143.110	Unapproved training.....	246

Subpart 143.F—Administration	247
Division 143.F.1—Preliminary	247
143.115 Applicability of this Subpart	247
Division 143.F.2—Approvals	248
143.118 Applying for approval	248
143.120 Joint applications not permitted	248
143.130 Applications by corporations etc—what must be included	248
143.145 CASA may require demonstrations of procedures or equipment.....	248
143.175 Grant of approval.....	248
143.180 When decision must be made.....	248
Division 143.F.4—Suspension and cancellation of approvals	250
143.215 Definition for this Division	250
143.220 Suspension of approval by show cause notice	250
143.225 Grounds for cancellation of approval	250
143.230 Notice to show cause.....	250
143.235 Cancellation of approval after show cause notice	251
143.245 Cancellation if cooperation or arrangement ceases	251
Part 144—Distribution organisations	252
Part 145—Continuing airworthiness—Part 145 approved maintenance organisations	253
Subpart 145.A—General	254
145.005 Purpose of Part	254
145.010 Definitions for Part.....	254
145.015 Part 145 Manual of Standards	255
145.020 Regulations 11.070 to 11.075 do not apply in relation to certain matters	256
Subpart 145.B—Approval of Part 145 organisations	257
145.025 Applying for approval	257
145.030 Issuing approval	257
145.035 Approval certificate	258
145.040 Privileges for Part 145 organisations.....	258
145.045 Approval subject to conditions.....	259
Subpart 145.C—Changes to Part 145 organisations	260
145.050 Application for approval of significant changes to organisations.....	260
145.055 Approval of significant changes	260
145.060 Changes to Part 145 organisations that are not significant changes	260
145.065 CASA may direct Part 145 organisations to change exposition	261
Subpart 145.D—Requirements and offences for Part 145 organisations	262
145.070 Provision of maintenance services	262
145.075 Provision of permitted training.....	262

145.080	Providing employees with exposition	262
145.085	Complying with directions	262
Part 147—Continuing airworthiness—maintenance training organisations		264
Subpart 147.A—General		265
147.005	Purpose of Part	265
147.010	Definitions for Part	265
147.015	Part 147 Manual of Standards	267
147.020	Regulations 11.070 to 11.075 do not apply in relation to certain matters	267
Subpart 147.B—Approval of maintenance training organisations		269
147.025	Applying for approval	269
147.030	Issuing approval	269
147.035	Approval certificate	270
147.040	Privileges for maintenance training organisations	271
147.045	Approval subject to conditions	271
Subpart 147.C—Changes to maintenance training organisations		272
147.050	Application for approval of significant changes to organisations	272
147.055	Decision on application for approval of significant changes	272
147.060	Changes to maintenance training organisations that are not significant changes	273
147.065	CASA may direct maintenance training organisations to change exposition	273
Subpart 147.D—Requirements and offences for maintenance training organisations		274
147.070	Provision of maintenance training and assessment	274
147.075	Assessment of foreign licences	274
147.080	Providing employees with exposition	274
147.085	Complying with directions	274
Part 149—Approved self-administering aviation organisations		276
Subpart 149.A—General		278
149.005	Approvals by CASA for Part 149	278
149.010	Manual of Standards for Part 149	278
149.015	Aviation administration functions—ASAO certificate required	278
149.020	Compliance with conditions of ASAO certificate	278
Subpart 149.B—ASAO certificates		279
149.060	CASA may limit number of ASAO certificates	279
149.070	Application for ASAO certificate	279
149.075	Issue of ASAO certificate	280
149.080	Approval of exposition	281
149.085	Conditions of ASAO certificate	281

149.090	Form of ASAO certificate	281
Subpart 149.C—Changes to exposition or personnel		282
149.110	Certain changes to exposition must be pre-approved by CASA	282
149.115	Approval of changes to exposition	282
149.120	CASA directions relating to exposition or personnel	283
Subpart 149.D—Organisation and personnel		284
149.195	Organisation and personnel	284
149.200	Notifying CASA if key personnel cannot carry out responsibilities	284
149.205	Familiarisation training for key personnel	284
149.210	Experience etc. of key personnel	284
149.215	Reporting interference with decisions of key personnel	285
149.220	Register of key personnel and appointed persons	285
Subpart 149.E—Systems, facilities, reference materials and rules		287
149.270	Safety management system	287
149.275	Audit and surveillance system	287
149.280	Facilities and equipment	287
149.285	Reference materials	287
149.290	Aviation administration and enforcement rules	287
Subpart 149.F—Expositions		289
149.340	Content of exposition	289
149.345	Compliance with exposition	290
149.350	Access to exposition etc.	290
Subpart 149.G—Authorisations		291
149.400	Grounds for refusal of application for authorisation	291
149.405	Disclosure of information in application for authorisation	291
149.410	Authorisation holders must comply with ASAO's exposition	291
149.415	Notice of suspension, variation or cancellation of authorisation	292
149.425	Reporting conduct of authorisation holders etc.	293
149.430	Reporting applications for authorisations in certain circumstances	293
149.435	ASAO to refuse to issue authorisation if suspended etc.	294
149.440	ASAO to refuse to issue authorisation if exclusion period is in force	295
Subpart 149.H—Authorisations and enforcement		297
149.490	Direction to ASAO to exercise ASAO enforcement powers	297
149.495	Variation, suspension and cancellation of authorisations issued by ASAOs	297

149.500	Effect of suspension or cancellation by CASA of authorisations issued by ASAOs	298
Subpart 149.J—Information and documents		299
149.540	Providing information or documents to CASA	299
149.550	Copies of documents to CASA	299
Subpart 149.K—Review of ASAO decisions		300
149.605	Application for internal review by ASAO	300
149.610	Application for review by CASA	300
149.615	Notifying the ASAO of application.....	301
149.620	ASAO to provide information and documents to CASA	301
149.625	CASA may request further information etc. from applicant for review	301
149.630	Review procedures and review decision	301
Part 171—Aeronautical telecommunication service and radionavigation service providers		303
Subpart 171.A—General		305
171.005	Applicability of this Part	305
171.010	Interpretation	305
171.012	Meaning of <i>telecommunication service</i>	307
171.015	Person not to provide service without approval	308
171.017	Issue of Manual of Standards	308
Subpart 171.B—Approval of service providers		309
171.020	Application	309
171.022	Joint applications not permitted	309
171.025	If applicant is a corporation.....	310
171.026	CASA may ask for demonstration of service	310
171.027	Grant of approval.....	310
171.028	When decision must be made.....	310
171.029	Conditions	311
Subpart 171.C—Obligations and privileges of service provider		312
171.030	Service by provider	312
171.035	Changes by service provider to service.....	312
171.040	Changes by service provider to operations manual.....	312
171.050	Technicians.....	313
171.055	Test transmissions	313
171.065	Interruption to service	313
171.070	Test equipment	313
171.075	Documents to be maintained	314
171.080	Records.....	314
171.085	Security program	315
171.086	Safety management system	315
Subpart 171.D—Contents of operations manual		316
171.090	Operations manual to contain or refer to information	316
171.095	Organisation and management of service provider.....	316

171.100	Way in which standards are met.....	316
171.105	Functional specification and performance values of services.....	316
171.110	Technical description	317
171.115	Safe operation.....	317
171.120	Facility operation and maintenance plan.....	318
171.125	Safety management system	318
171.140	Test equipment	318
171.145	Interruption to service	319
171.150	Document control.....	319
171.155	Security program	319
171.160	Changes to procedures.....	319
Subpart 171.E—Suspension and cancellation of approvals, and directions to vary manuals		320
171.220	Suspension and cancellation of approvals.....	320
171.225	Notice to approval holder to show cause.....	320
171.230	Grounds for cancellation of approval.....	320
171.235	Cancellation of approval after show cause notice	321
171.237	Cancellation if cooperation or arrangement ceases	321
171.245	CASA’s power to direct variation of manual	321
Part 172—Air Traffic Service Providers		322
Subpart 172.A—General		324
172.005	Applicability of this Part	324
172.010	Definitions for this Part	324
172.015	What is an ATS provider.....	325
172.020	Providing air traffic service without approval.....	325
172.022	Issue of Manual of Standards	325
Subpart 172.B—Approval as an ATS provider		326
172.024	Applicant for approval as ATS provider	326
172.030	When applicant is eligible for approval	326
172.055	Variation of approvals	326
Subpart 172.C—Requirements to be complied with by ATS providers		327
Division 172.C.1—Operations manual		327
172.060	Operations manual.....	327
Division 172.C.2—Air traffic service		328
172.065	Standards for air traffic service	328
172.070	Aeronautical telecommunications procedures.....	328
172.075	ICAO Doc. 4444 and ICAO Doc. 7030	328
172.080	Compliance with provider’s operations manual.....	328
172.085	Priority of standards	329
172.090	Priority of inconsistent procedures.....	329
Division 172.C.3—Standards for facilities and equipment		330
172.095	Facilities and equipment.....	330
Division 172.C.4—Organisation and personnel		331
172.100	Definition for this Division	331

172.105	Organisation	331
172.110	Personnel	331
172.115	Supervisory personnel	331
172.120	Qualifications for certain personnel	331
Division 172.C.5—Arrangements to maintain service		333
172.125	Agreements with service providers	333
172.130	Agreements with aerodrome operators.....	333
172.135	Arrangements for transfer of information	333
Division 172.C.6—Management		334
172.140	Training and checking program	334
172.145	Safety management system	334
172.150	Contingency plan.....	334
172.155	Security program	334
Division 172.C.7—Reference materials, documents, records and log books		335
172.160	Reference materials	335
172.165	Documents and records	335
172.170	Document and record control system.....	335
172.175	Logbooks	336
Division 172.C.8—Notice of air traffic service		337
172.180	Availability of air traffic service	337
Subpart 172.D—Telling CASA about changes		338
172.185	Advice on organisational changes.....	338
172.190	Discontinuing air traffic service	338
Subpart 172.E—Miscellaneous		339
172.195	ATS provider must not provide unauthorised air traffic service	339
Subpart 172.F—Administration		340
Division 172.F.1—Preliminary		340
172.200	Applicability of this Subpart	340
Division 172.F.2—Approvals		341
172.202	Applying for approval	341
172.205	Joint applications not permitted	341
172.215	Applications by corporations etc—what must be included	341
172.230	CASA may require demonstrations of procedures or equipment.....	341
172.260	When CASA must approve an applicant.....	341
172.265	When decision must be made.....	342
172.270	Conditions	342
Division 172.F.4—Directions to amend provider’s operations manual		343
172.300	CASA may direct amendments to provider’s operations manual.....	343
Division 172.F.5—Suspension and cancellation of approvals		344
172.305	Definition for this Division	344

172.310	Suspension of approval by show cause notice	344
172.315	Grounds for cancellation of approval	344
172.320	Notice to show cause	344
172.325	Cancellation of approval after show cause notice	345
172.327	Cancellation if cooperation or arrangement ceases	345
Part 173—Instrument flight procedure design		346
Subpart 173.A—General		349
173.005	Applicability	349
173.010	Definitions for this Part	349
173.015	What is a <i>certified designer</i>	350
173.020	What is a <i>procedure design certificate</i>	350
173.025	What is an <i>authorised designer</i>	351
173.030	What is a <i>procedure design authorisation</i>	351
173.035	Design, review or amendment of terminal instrument flight procedures—requirement for procedure design certificate etc	351
173.040	Designing instrument flight procedures other than terminal instrument flight procedures	352
Subpart 173.B—Certified designers		353
Division 173.B.1—Certification as certified designer		353
173.045	Applications for procedure design certificates	353
173.050	Criteria for grant of procedure design certificates	353
173.055	Procedure design certificate	354
173.065	How long procedure design certificates remain in force	354
173.070	Applications to vary procedure design certificates	354
Division 173.B.2—Requirements to be complied with by certified designers		355
173.075	Certified designer to maintain operations manual	355
173.080	Compliance with operations manual	355
173.085	Standards for design of terminal instrument flight procedures etc	355
173.090	Verification of terminal instrument flight procedures	355
173.095	Validation of terminal instrument flight procedures	356
173.100	Publication of terminal instrument flight procedures	357
173.105	Radio navigation aids	357
173.110	Maintenance of terminal instrument flight procedures	357
173.115	Certified designer to provide facilities etc	358
173.120	Certified designer to have appropriate organisation	358
173.125	Certified designer to have sufficient personnel	358
173.130	Supervisory personnel	358
173.135	Certified designer to appoint chief designer	359
173.140	Certified designer to provide training and checking program	359
173.145	Certified designer to have safety management system	359

173.150	Certified designer to maintain reference materials.....	359
173.155	Certified designer to keep documents and records.....	360
173.160	Certified designer to have document and record control system.....	360
Division 173.B.3—Chief designer		361
173.165	Approval for appointment of chief designer	361
173.170	Approval for appointment to act as chief designer.....	361
173.175	Appointment likely to have adverse effect on air safety	361
173.180	Chief designer’s functions and duties	362
173.185	Duration of approval	362
173.190	Withdrawal or suspension of approval of appointment.....	362
Division 173.B.4—Miscellaneous		363
173.195	Advice on organisational changes	363
173.200	Discontinuing design work on terminal instrument flight procedures of a particular type	363
173.205	Notifying the AIS of a variation to a procedure design certificate.....	363
173.210	Discontinuing maintenance of particular terminal instrument flight procedures.....	363
173.215	Transfer of maintenance responsibility	363
Subpart 173.C—Authorised designers		365
Division 173.C.1—Authorisation as authorised designer		365
173.220	Applications for procedure design authorisations	365
173.225	Criteria for grant of procedure design authorisations.....	365
173.240	How long procedure design authorisations remain in force.....	365
173.245	Applications to vary procedure design authorisations.....	366
Division 173.C.2—Requirements to be complied with by authorised designers		367
173.250	Operations manual.....	367
173.255	Compliance with operations manual	367
173.260	Standards for design of terminal instrument flight procedures etc.....	367
173.265	Off-shore installations	367
173.270	Maintenance of terminal instrument flight procedures	368
173.275	Authorised designer to have sufficient personnel	368
173.280	Authorised designer to maintain reference materials	369
173.285	Authorised designer to keep documents and records	369
173.290	Authorised designer to have document and record control system.....	369
Division 173.C.3—Miscellaneous		370
173.295	Discontinuing design work on terminal instrument flight of a particular type	370

173.300	Discontinuing maintenance of terminal instrument flight procedures.....	370
173.305	Transfer of maintenance responsibility	370
Subpart 173.D—Performance of design work		372
173.310	Certified designer not to exceed the limitations of the designer’s procedure design certificate	372
173.315	Authorised designer not to exceed the limitations of authorisation.....	372
Subpart 173.E—Administration		373
Division 173.E.1—Grant of procedure design certificates and procedure design authorisations		373
173.330	CASA may require demonstrations of equipment etc	373
173.335	Grant of procedure design certificate or procedure design authorisation.....	373
173.345	CASA may grant certificate or authorisation subject to conditions.....	373
173.350	When decision must be made.....	373
Division 173.E.3—Directions to amend certified designer’s or authorised designer’s operations manual		375
173.375	CASA may direct amendments to designer’s operations manual.....	375
Division 173.E.4—Suspension and cancellation of procedure design certificates and procedure design authorisations		376
173.380	Suspension or cancellation of procedure design certificate or procedure design authorisation by CASA	376
Division 173.E.5—Authorised inspectors		377
173.390	CASA may appoint authorised inspectors.....	377
173.395	Identity card.....	377
173.400	Powers of authorised inspector.....	377
Part 175—Aeronautical information management		379
Subpart 175.A—Aeronautical information management—general		383
175.005	What Part 175 is about	383
175.010	Application of Part 175	383
175.015	Definitions for Part 175	383
175.020	References in Part 175 to Annexes 3, 4 and 15.....	384
175.025	Issue of Manual of Standards for Part 175	384
Subpart 175.B—Aeronautical information management—AIS providers		385
Division 175.B.1—AIS providers—general		385
175.030	Definitions for Subpart 175.B	385
175.035	Provision of AIS—requirement for certificate.....	385

Division 175.B.2—AIS provider certificates	386
175.040 AIS provider certificates—who may apply.....	386
175.045 AIS provider certificates—requirements for application	386
175.050 AIS provider certificates—CASA may ask for demonstration of service, facility or equipment	387
175.055 AIS provider certificates—issue of certificate	387
175.060 AIS provider certificates—approval of exposition	387
175.065 AIS provider certificates—conditions.....	388
175.067 AIS provider certificates—cancellation of certificate if cooperation or arrangement ceases	388
Division 175.B.3—AIS providers—changes	389
175.070 AIS providers—changes to services—matters included in certificate	389
175.075 AIS providers—other changes	389
175.080 AIS providers—CASA directions relating to exposition	389
175.085 AIS providers—notifying CASA of changes in circumstances	390
Division 175.B.4—AIS providers—requirements for provision of AIS	391
175.090 AIS providers—provision of AIS must comply with laws.....	391
175.095 AIS providers—compliance with exposition	391
175.100 AIS providers—provision of AIS must comply with standards.....	391
175.105 AIS providers—standards for development and publication of Integrated Aeronautical Information Package and aeronautical charts.....	392
175.110 AIS providers—standards for aeronautical data processing system.....	392
175.115 AIS providers—contravention of exposition or standards.....	393
175.120 AIS providers—NOTAM service	393
175.125 AIS providers—briefing service	394
175.130 AIS providers—post-flight information service.....	394
175.135 AIS providers—CASA directions about NOTAMS for a location.....	394
175.140 AIS providers—aerodromes not covered by Part 139—removal of references in AIP	395
175.145 AIS providers—publication of aeronautical charts relating to areas etc. outside authority.....	395
Division 175.B.5—AIS providers—requirements about aeronautical data and aeronautical information	396
175.150 AIS providers—CASA directions relating to aeronautical data or aeronautical information	396
175.155 AIS providers—integrity of aeronautical data and aeronautical information.....	396
175.160 AIS providers—giving data product specifications to aeronautical data originators	397
175.165 AIS providers—revoking data product specifications	398

175.170	AIS providers—compliance with data product specification.....	398
175.175	AIS providers—correction and notification of errors and omissions in aeronautical data and aeronautical information.....	398
175.180	AIS providers—storage and security of aeronautical data and aeronautical information.....	398
175.185	AIS providers—timing of effective dates and distribution of certain documents and information	399
175.190	AIS providers—licence agreements with data service providers for supply of data sets	399
175.195	AIS providers—compliance with licence agreement	400
Division 175.B.6—AIS providers—organisational requirements		401
175.200	AIS providers—exposition.....	401
175.205	AIS providers—organisational structure.....	403
175.210	AIS providers—personnel—general	403
175.215	AIS providers—personnel—accountable manager	403
175.220	AIS providers—personnel—training and checking system for operational personnel.....	403
175.225	AIS providers—safety management system	404
175.230	AIS providers—quality management system.....	404
175.235	AIS providers—facilities, equipment, data and information	405
175.240	AIS providers—contingency plan	405
175.245	AIS providers—reference materials.....	405
175.250	AIS providers—annual review by accountable manager	405
175.255	AIS providers—records.....	406
175.260	AIS providers—retention period for aeronautical data, aeronautical information and records	406
Subpart 175.C—Aeronautical information management—data service providers		408
Division 175.C.1—Data service providers—general		408
175.265	Definitions for Subpart 175.C	408
175.270	Conduct of data service activity—requirement for certificate	408
175.275	CASA to publish list of data service providers	409
Division 175.C.2—Data service provider certificates		410
175.280	Data service provider certificates—who may apply	410
175.285	Data service provider certificates—requirements for application.....	410
175.290	Data service provider certificates—CASA may ask for demonstration of service, facility or equipment	410
175.295	Data service provider certificates—issue of certificate	410
175.300	Data service provider certificates—approval of exposition	411
175.305	Data service provider certificates—conditions	411

Part 137—Aerial application operations—other than rotorcraft

Table of contents

Subpart 137.A—Applicability and definitions

- 137.005 Applicability
- 137.010 Definitions

Subpart 137.B—General

- 137.015 Approvals
- 137.020 Effect of other provisions
- 137.025 Aeroplane—type certificate
- 137.030 Authority of the pilot

Subpart 137.C—Operator certification and supervision

- 137.035 Applicant to prepare manual
- 137.040 Standard operations manual
- 137.045 Application for an AOC or variation of an AOC
- 137.050 Decision on AOC and manual
- 137.055 Offences concerning operations manual
- 137.060 Operator’s organisational structure
- 137.065 Head of flight operations
- 137.070 Head of aeroplane maintenance control
- 137.075 Replacement of holder of key personnel position
- 137.080 Amendments to operations manual by operator
- 137.085 Amendments to schedule of differences
- 137.090 Amendments to standard operations manual

Subpart 137.D—Operational procedures

- 137.095 Operation to be in VMC
- 137.100 Use of weather forecasts or observations
- 137.105 Landing areas
- 137.110 Safety of persons other than crew at landing areas
- 137.115 Refuelling
- 137.120 Documents to be carried on a flight
- 137.125 Manipulation of flight controls
- 137.130 Use of seats, seatbelts and harnesses
- 137.135 Carriage of passengers
- 137.140 Minimum height and lateral separation for operation
- 137.145 Application over populous areas
- 137.150 In-flight fuel management
- 137.160 Aerodrome circuit requirements
- 137.165 Close proximity operations
- 137.170 Night operations
- 137.175 Firefighting operations

Subpart 137.E—All-weather operations

Subpart 137.H—Aeroplane performance

- 137.180 General
- 137.185 Take-off over a populous area

Subpart 137.J—Weight and balance

- 137.190 Weight limitations
- 137.195 Loading—supervision

Subpart 137.K—Instruments and equipment

- 137.200 Installation of instruments and equipment
- 137.210 Position of instruments and equipment
- 137.215 Instruments and equipment required
- 137.220 Crew intercom system
- 137.225 Seatbelts and harnesses

Subpart 137.M—Aeroplane maintenance

- 137.230 Fitting and removal of role equipment

Subpart 137.N—Pilots

- 137.235 Pilot in command must be authorised under Part 61
- 137.240 Operator proficiency checks

Subpart 137.P—Manuals, logs and records

- 137.245 Flight manual
- 137.250 Checking records
- 137.255 Document retention periods
- 137.260 Maintenance record to be given to new operator

Subpart 137.Q—Flight duty time limitations and rest requirements

- 137.265 Application of Subpart 137.Q
- 137.270 Subpart not to affect subsection 1 of CAO 48.1
- 137.275 Limit on flying hours
- 137.280 Off-duty period before and after tour of duty
- 137.285 Tour of duty—duration
- 137.290 Off-duty period each 14 days
- 137.295 Limit on time spent on tours of duty
- 137.300 Pilot to be fit for duty

Subpart 137.A—Applicability and definitions

137.005 Applicability

- (1) Subject to this regulation, this Part applies to aerial application operations using aeroplanes.

Operators

- (2) This Part applies to a person who is applying for an AOC, on or after the commencing day, to authorise the person to undertake application operations.
- (3) If:
 - (a) a person has applied, on or after the application day but before the commencing day, for an AOC to authorise the holder to undertake agricultural operations or purposes substantially similar to agricultural operations; and
 - (b) before the commencing day, the person has not been issued with the AOC; this Part applies to the person and the application as if:
 - (c) the application had been made on the commencing day; and
 - (d) the application was for an authorisation to undertake application operations.
- (4) If, on the commencing day, a person holds an AOC that covers agricultural operations or purposes substantially similar to agricultural operations:
 - (a) the person may, after the commencing day, prepare and submit to CASA an operations manual; and
 - (b) this Part applies to the person and the manual as if the person was applying for an AOC on or after the commencing day to authorise the person to undertake application operations.
- (5) This Part applies on and after the day that falls 12 months after the commencing day to a person who has an AOC that authorises the person to undertake agricultural operations or purposes substantially similar to agricultural operations if:
 - (a) that AOC is in effect on that day; and
 - (b) this Part does not otherwise apply to the person.

Pilots

- (6) If:
 - (a) a pilot is engaged in an application operation on or after the commencing day; and
 - (b) the pilot is not employed by an operator for that operation; this Part applies to the pilot for that operation.
 - (7) If:
-

Regulation 137.010

- (a) this Part applies to an operator on a particular day; and
- (b) a pilot employed by the operator undertakes an application operation for the operator on that day;

this Part applies to the pilot for that operation.

- (8) In this regulation:

application day means the day that falls 30 days before the day this Part commences.

commencing day means the day this Part commences.

137.010 Definitions

In this Part:

aerial application operation (or application operation) means:

- (a) a flight that is carried out by an aeroplane to apply application material; and
- (b) a flight by an aeroplane that is for, or partly for, 1 or more of the following:
 - (i) inspection of a work area;
 - (ii) pilot training or checking relating to a flight mentioned in paragraph (a);
 - (iii) training of a crew member other than the pilot;
 - (iv) travel from a landing area to a work area and back;
 - (v) the carriage of a passenger specified in regulation 137.135 for a purpose set out in that regulation; and
- (c) preparation for any activities mentioned in paragraphs (a) and (b).

application material means fertiliser, trace elements, seeds, baits, water, pesticides or other material.

apply, in relation to application material, means to drop or spray the material onto the ground or water.

crew member includes a person who is on board an aeroplane to give, or receive, training in an aspect of application operations.

employ, in relation to a pilot, includes to engage as an independent contractor.

GPS marking system means a system that uses global positioning system equipment to show the flight path required for an aeroplane when applying application material.

head of aeroplane maintenance control, in relation to an operator, means the person who holds the position whose duties include those mentioned in regulation 137.070.

head of flight operations, in relation to an operator, means the person who holds the position whose duties include those mentioned in regulation 137.065.

Regulation 137.010

key personnel position, in relation to an operator, means the positions of head of aeroplane maintenance control and head of flight operations for the operator.

landing area means a place, whether or not an aerodrome, where an aeroplane is able to take off and land.

MEL, or **minimum equipment list**, for an aeroplane, means an approved list that provides for the operation of the aeroplane with particular equipment inoperative, and sets out any special conditions for such operation.

operations manual, in relation to an operator or an application operation carried out by an operator, means:

- (a) the manual, and the schedule of differences (if any), approved under regulation 137.050; and
- (b) any amendments approved under regulation 137.080, 137.085 or 137.090, as appropriate.

Note: An operations manual may comprise a standard operations manual and a schedule of differences: see subregulation 137.035(2).

operator, in relation to an aeroplane, means a person who holds an AOC that authorises the use of the aeroplane in application operations.

populous area, in relation to a flight by an aeroplane, means an area where, if the aeroplane's engine failed, the aeroplane would not be able to glide safely clear of any occupied building.

resting time, for a pilot, means any time during a tour of duty when the pilot:

- (a) has no duties to perform; and
- (b) has access to accommodation that is conducive to rest and includes a comfortable chair.

role equipment means equipment fitted to an aeroplane for an application operation, including booms, spreaders and mirrors.

schedule of differences, for an operator, means the schedule prepared by the operator under paragraph 137.045(3)(c) and approved by CASA under regulation 137.050.

sleeping time, for a pilot, means any time during a tour of duty when the pilot:

- (a) has no duties to perform; and
- (b) has access to a comfortable room that:
 - (i) is subject to minimal noise levels; and
 - (ii) is well ventilated; and
 - (iii) is equipped with a method of controlling the entry of light; and
 - (iv) is equipped with a comfortable bed and chair.

standard operations manual means an operations manual approved under regulation 137.040.

work area, in relation to an application operation, means:

Regulation 137.010

- (a) the area of ground or water where application material is to be applied; and
- (b) the area over which the aeroplane concerned flies as it approaches and departs from the area mentioned in paragraph (a).

Subpart 137.B—General

137.015 Approvals

If a provision of this Part provides that anything (including a document, body or activity) must be approved, CASA may approve the thing, in writing, for the provision.

137.020 Effect of other provisions

If a provision in these Regulations is inconsistent with a provision in this Part, the provision in this Part prevails to the extent of the inconsistency.

137.025 Aeroplane—type certificate

- (1) If an aeroplane does not conform to a type certificate or type acceptance certificate in the normal, restricted or utility category:
 - (a) the operator of the aeroplane must not allow it to be used for an application operation; and
 - (b) a pilot must not use it to carry out an application operation.

Penalty: 50 penalty units.

- (2) A contravention of subregulation (1) is an offence of strict liability.

Note: CASA may grant an exemption from a provision of these Regulations: see Subpart 11.F.

137.030 Authority of the pilot

The operator of an aeroplane must take all reasonable measures to ensure that, if the pilot in command of the aeroplane, acting in accordance with a provision of these Regulations, directs anybody to do something, or not do something, the person complies with the direction.

Subpart 137.C—Operator certification and supervision

137.035 Applicant to prepare manual

- (1) A person applying for an AOC to cover application operations must prepare a manual that:
 - (a) specifies procedures to be followed by crew members and other persons to ensure the safety of the operations that are to be covered by the AOC; and
 - (b) includes the names of the persons who are to be the CEO and holders of the key personnel positions.
- (2) The person may comply with subregulation (1) by:
 - (a) nominating a standard operations manual to apply to the person's operations; and
 - (b) preparing a schedule of differences to the standard operations manual.
- (3) The manual may:
 - (a) consist of 1 or more volumes; and
 - (b) include material prepared by someone other than the person making the application; and
 - (c) incorporate another document or documents by reference.

Note: CASA approves the manual under regulation 137.050 when approving the application for the AOC.

137.040 Standard operations manual

- (1) CASA may approve, in writing, a manual prepared by a person other than an operator, as a standard operations manual.
- (2) The manual must specify procedures to be followed by crew members of aeroplanes and other persons engaged in application operations to ensure the safety of the operations.

137.045 Application for an AOC or variation of an AOC

- (1) An application by a person for an AOC to cover application operations must be submitted to CASA at least 90 days before the date of intended operation.
- (2) The manual that, for subsection 27AB(2) of the Act, must be lodged with CASA by the person need not include landing area information.
- (3) If the person nominates a standard operations manual the application must include:
 - (a) a statement identifying the standard operations manual; and
 - (b) an undertaking to comply with the standard operations manual as in force from time to time; and

- (c) a schedule to the standard operations manual, prepared by the applicant, showing:
 - (i) the ways (if any) in which the person's application operations are proposed to differ from those described in the standard operations manual adopted by the person under paragraph (b); and
 - (ii) the names of the persons who are proposed to be the CEO and holders of the key personnel positions.
- (4) The manual or schedule (if any) that relates to the application must be submitted to CASA at least 60 days before the date of intended operation.
- (5) An application for a variation of an AOC must be submitted to CASA at least 30 days before the date of the proposed change to the operation.

Note: For matters about which CASA must be satisfied before issuing an AOC, see section 28 of the Act.
- (6) CASA may accept an application later than required under subregulation (1) or (5), or a late submission under subregulation (4).

137.050 Decision on AOC and manual

- (1) CASA must, in writing, approve or refuse to approve:
 - (a) an application for an AOC; and
 - (b) an application for a variation of an AOC.
- (2) If CASA approves an application for an AOC under subregulation (1), it is taken to have approved:
 - (a) the applicant's manual; and
 - (b) if applicable—the schedule mentioned in paragraph 137.045(3)(c).
- (3) CASA is taken to have refused an application for an AOC if it has not approved or refused the application within the period of 90 days starting on the later of the following:
 - (a) the day the application is made;
 - (b) the day the applicant has complied with any notice given by CASA under section 27AC of the Act.
- (4) CASA is taken to have refused an application for a variation of an AOC if it has not approved or refused the application within the period of 90 days starting when the application is made.

137.055 Offences concerning operations manual

- (1) An operator must conduct application operations in accordance with:
 - (a) the operations manual; and
 - (b) if the operator has an exemption given by CASA under Part 11—the exemption.

Penalty: 25 penalty units.

Regulation 137.060

- (2) The operator must ensure that the manual, and information relating to any exemption, is available to crew members and other persons engaged in application operations for the operator.

Penalty: 25 penalty units.

- (3) A contravention of subregulation (1) or (2) is an offence of strict liability.

137.060 Operator's organisational structure

- (1) An operator must nominate an individual to be chief executive officer (**CEO**) of the operator's organisation.
- (2) The CEO must be responsible for ensuring that all application operations and aeroplane maintenance can be carried out to the standard required by these Regulations.
- (3) An operator must nominate individuals to hold the key personnel positions in the organisation.
- (4) If, having regard to the size of an operator's organisation or the nature and scope of operations authorised by the operator's AOC, it would not adversely affect the safety of the operations to do so, an operator may:
 - (a) appoint a person to a key personnel position on a part-time basis; or
 - (b) appoint a person to more than 1 key personnel position.
- (5) An operator must ensure that, at all times, a person is occupying, or acting in, each key personnel position.

137.065 Head of flight operations

- (1) Subject to subregulation (5), an operator must nominate an individual to be head of flight operations in the operator's organisation.
- (2) The duties of the head of flight operations must include being responsible for the following:
 - (a) monitoring the operator's compliance with the Act, these Regulations and the conditions to which the operator's AOC is subject, and reporting on compliance to the operator's CEO;
 - (b) monitoring the adequacy of the operator's systems and procedures to ensure safe operations under the operator's AOC, and reporting on the adequacy of the systems and procedures to the CEO;
 - (c) arranging rosters for the pilots employed to carry out application operations for the operator;
 - (d) maintaining an efficient system for recording flight and duty times for each pilot;
 - (e) maintaining up-to-date records of all licences, ratings, medical certificates and endorsements held by each pilot;

Regulation 137.070

- (f) maintaining a system that will ensure compliance with the relevant loading procedures for each type of aeroplane used in operations carried out under the operator's AOC;
 - (g) ensuring that the operator keeps any documents required by the Act, these Regulations and the conditions of the operator's AOC;
 - (h) setting and monitoring the standard of application operations, including activities on the ground, carried out under the operator's AOC;
 - (i) ensuring that the checking required by Subpart 137.N is carried out and, if a pilot fails a check, that the appropriate retraining and re-checking are carried out;
 - (j) allocating an aeroplane for use in each operation carried out under the operator's AOC.
- (3) If an operator uses only 1 aeroplane for application operations, the person occupying the position of head of flight operations must have at least 300 hours total flight time as pilot in command in application operations.
- (4) If an operator uses more than 1 aeroplane for application operations, the person occupying the position of head of flight operations must hold an agricultural pilot (aeroplane) grade 1 rating within the meaning given in Civil Aviation Order 40.6.
- (5) A person who, under Civil Aviation Order 82.0, is approved as Chief Pilot of an operator, is taken to be the head of flight operations for the operator.

137.070 Head of aeroplane maintenance control

- (1) An operator must nominate an individual to be head of aeroplane maintenance control in the operator's organisation.
- (2) The duties of the head of aeroplane maintenance control must include ensuring that the operator complies with Subpart 137.M.

137.075 Replacement of holder of key personnel position

If an operator proposes a replacement of the holder of a key personnel position, the operator must:

- (a) notify CASA as soon as is practicable before the proposed replacement;
and
- (b) if the replacement does not take effect—notify CASA accordingly.

137.080 Amendments to operations manual by operator

- (1) This regulation applies to an operator that:
 - (a) is using an operations manual prepared by the operator; and
 - (b) proposes a change to a procedure or another matter that, because of its nature, would require amendment of the manual.
- (2) The operator must:

Regulation 137.085

- (a) prepare an amendment to the manual to reflect the proposed change; and
 - (b) give the amendment to CASA as soon as practicable after preparing it and before implementing the change.
- (3) CASA must, in writing, approve or refuse to approve the proposed amendment.

137.085 Amendments to schedule of differences

- (1) This regulation applies to an operator that:
- (a) has adopted a standard operations manual; and
 - (b) proposes a change to a procedure or another matter that, because of its nature, would require amendment of the schedule of differences.
- (2) The operator must:
- (a) prepare an amendment to the schedule to reflect the proposed change; and
 - (b) give the amendment to CASA as soon as practicable after preparing it and before implementing the change.
- (3) CASA must, in writing, approve or refuse to approve the proposed amendment.

137.090 Amendments to standard operations manual

- (1) A person that has prepared a standard operations manual may prepare an amendment of the manual.
- (2) The person must submit the amendment to CASA.
- (3) CASA must, in writing, approve or refuse to approve the amendment.

Subpart 137.D—Operational procedures

137.095 Operation to be in VMC

- (1) The pilot in command of an aeroplane may only conduct an application operation in VMC.

Penalty: 25 penalty units.

- (2) A contravention of subregulation (1) is an offence of strict liability.

137.100 Use of weather forecasts or observations

- (1) This regulation applies to the operator of the aeroplane and its pilot in command if the operator is planning an application operation that is to take place more than 50 nautical miles from the take-off aerodrome.
- (2) The operator and pilot must:
 - (a) use a weather forecast or report prepared by the Bureau of Meteorology or another approved body; or
 - (b) if the pilot is not reasonably able to obtain a weather forecast or report of a kind mentioned in paragraph (a)—satisfy subregulation (4).

Penalty: 5 penalty units.

- (3) The operator must provide any equipment necessary to obtain the forecast or report.

Penalty: 10 penalty units.

- (4) The operator and pilot satisfy this subregulation if the pilot:
 - (a) uses his or her observations, or weather information from a source other than those mentioned in paragraph (2)(a); and
 - (b) the pilot reasonably believed it was safe to use the observations or information.

- (5) A contravention of subregulation (2) or (3) is an offence of strict liability.

137.105 Landing areas

Despite any other provision of these Regulations, the pilot in command of an aeroplane engaged in an application operation may use any landing area that can be used safely for take-offs and landings.

137.110 Safety of persons other than crew at landing areas

- (1) The operator of an aeroplane must, for the safety of persons during application operations at a landing area:

Regulation 137.115

- (a) use appropriate procedures, including those necessary for the safe loading and unloading of aeroplanes; and
- (b) provide appropriate equipment, including any necessary lighting.

Penalty: 25 penalty units.

- (2) The procedures must be set out in the operations manual.
- (3) A contravention of subregulation (1) is an offence of strict liability.

137.115 Refuelling

- (1) An operator must use appropriate safety procedures for the refuelling of each of the operator's aeroplanes that is used in an application operation.

Penalty: 25 penalty units.

- (2) The operations manual must set out the procedures.
- (3) A contravention of subregulation (1) is an offence of strict liability.

137.120 Documents to be carried on a flight

- (1) The pilot in command of an aeroplane being used for an application operation must have a copy of the aeroplane's flight manual, or an approved alternative document, on board the aeroplane on every flight.

Penalty: 10 penalty units.

- (2) The pilot must also have the documents or copies mentioned in subregulations (4) and (5) on board the aeroplane on a flight if the aeroplane will be more than 1 hour's flying time (at cruise speed in still air) from the operator's principal operating base.

Penalty: 10 penalty units.

- (3) However, if:
 - (a) the aeroplane is to be based for more than 7 days at a place that is not the operator's principal operating base (a *substitute base*); and
 - (b) the aeroplane is less than 1 hour's flying time (at cruise speed in still air) from the substitute base;

the documents or copies mentioned in subregulations (4) and (5) may be kept at the substitute base.

- (4) For subregulations (2) and (3), the documents are:
 - (a) the aeroplane's flight and maintenance records; and
 - (b) each of the following documents, or copies of the documents:
 - (i) the aeroplane's certificate of registration;
 - (ii) the aeroplane's certificate of airworthiness (or, if applicable, special flight permit);
 - (iii) the current medical certificate for, and licence of, the pilot.

- (5) However, if the operations manual states that only a specified part of a document mentioned in subregulation (1) or paragraph (4)(a) must be carried during a flight, only that part need be carried.
- (6) A contravention of subregulation (1) or (2) is an offence of strict liability.

137.125 Manipulation of flight controls

- (1) While an aeroplane is engaged in an application operation its flight controls may be manipulated by a person only if the person is:
 - (a) the pilot in command of the aeroplane; or
 - (b) a pilot who is being trained in application operations; or
 - (c) a person authorised to do so by CASA.

Penalty: 25 penalty units.

- (2) If an aeroplane engaged in an application operation is on the ground with the engine running, the pilot in command must be at the controls unless:
 - (a) the pilot is refuelling the aeroplane in accordance with the operations manual; or
 - (b) the following apply:
 - (i) the pilot remains near the aeroplane;
 - (ii) the wheel brakes are locked and, if practicable, the wheels are chocked;
 - (iii) the aeroplane's power controls are friction locked and, if possible, the propeller is feathered;
 - (iv) the engine is retarded to idle and, if possible, ground idle.

Penalty: 25 penalty units.

- (3) Subregulation (4) applies if a person who is not, under these Regulations, entitled to manipulate the aeroplane's flight controls:
 - (a) occupies a control seat fitted with fully or partially functioning controls; or
 - (b) is seated in a position where he or she could interfere with the controls.
- (4) The pilot in command of the aeroplane must:
 - (a) instruct the person not to interfere with the controls; and
 - (b) be satisfied on reasonable grounds that the person has understood the instruction.

Penalty: 25 penalty units.

- (5) A contravention of subregulation (1) or (2) is an offence of strict liability.
- (6) Strict liability applies to the physical element mentioned in paragraph (4)(a).

Regulation 137.130

137.130 Use of seats, seatbelts and harnesses

- (1) A person in an aeroplane engaged in an application operation must occupy a seat and wear a seatbelt or harness whenever the aeroplane is moving under its own power.

Penalty: 10 penalty units.

- (2) However, subregulation (1) does not apply to a person in the aeroplane if, during the operation:
- (a) he or she is acting in accordance with an instruction by the pilot in command; or
 - (b) he or she is wearing an approved restraint device and either:
 - (i) has satisfactorily completed a course of training in the operation and is directly involved in the operation; or
 - (ii) is being trained in the operation.

- (3) A contravention of subregulation (1) is an offence of strict liability.

137.135 Carriage of passengers

- (1) If an aeroplane is engaged in an application operation, neither the operator nor the pilot in command may allow a passenger to be carried unless subregulation (2), (3) or (4) applies to the operation and the passenger.

Penalty: 50 penalty units.

- (2) This subregulation applies if the passenger is an officer, or delegate of CASA, who is on board the aeroplane to carry out his or her duties.
- (3) This subregulation applies if:
- (a) the passenger is on board the aeroplane to identify the area where the application material is to be applied; and
 - (b) no application material is applied during the operation.
- (4) This subregulation applies if:
- (a) the passenger is on board the aeroplane to carry out duties necessary for his or her employment; and
 - (b) both the operator and the pilot agree to the carriage of the passenger.
- (5) A contravention of subregulation (1) is an offence of strict liability.

137.140 Minimum height and lateral separation for operation

- (1) Subject to subregulations (2), (3) and (4) the pilot in command of an aeroplane engaged in an application operation may fly at any height while:
- (a) over the work area; or
 - (b) travelling from the landing area used for loading the aeroplane to the work area.

Regulation 137.145

- (2) In a populous area, the aeroplane must not fly closer than 100 metres, measured horizontally, from an occupied building.
- Penalty: 25 penalty units.
- (3) In an area other than a populous area the aeroplane must not fly less than 350 feet AGL while closer than 100 metres, measured horizontally, from an occupied building.
- Penalty: 25 penalty units.
- (4) The aeroplane may fly closer to a building and to the ground than provided for in subregulation (2) or (3) if:
- (a) more than 48 hours before the proposed operation, the occupier of the building was notified in writing about the operation and did not object to the operator about it; or
 - (b) if it was not reasonably practicable to give written notice—the occupier was notified verbally before the operation and did not object to the operator about it.
- (5) A contravention of subregulation (2) or (3) is an offence of strict liability.

137.145 Application over populous areas

- (1) A person may conduct an application operation over a populous area only if:
- (a) the person is an operator; and
 - (b) the procedures for the operation are set out in the operations manual; and
 - (c) the operation was requested by a person that, under a law of a State or Territory, may authorise the operation.
- Penalty: 25 penalty units.
- (2) An operator must, before conducting the operation, make a plan for the operation that:
- (a) includes consultation with the person that requested the operation; and
 - (b) identifies any obstructions to flight and sets out how these will be avoided; and
 - (c) identifies the most suitable emergency landing area for the operation; and
 - (d) sets out any coordination with ATC that is necessary for the operation.
- Penalty: 25 penalty units.
- (3) A contravention of subregulation (1) or (2) is an offence of strict liability.

137.150 In-flight fuel management

- (1) The pilot in command of an aeroplane engaged in an application operation must plan a flight for the operation so that, at all times, the aeroplane has enough fuel to complete the flight safely.
- Penalty: 50 penalty units.
-

Regulation 137.160

- (2) If an operations manual applies to the pilot, it must set out:
 - (a) the procedures that the pilot must follow to ensure that the aeroplane carries enough fuel; and
 - (b) a procedure to ensure that in-flight fuel checks and fuel management are carried out.
- (3) A contravention of subregulation (1) is an offence of strict liability.

137.160 Aerodrome circuit requirements

- (1) The pilot in command of an aeroplane engaged in an application operation that involves a take-off from, or landing at, an aerodrome need not conform with the circuit traffic protocol specified in the AIP for the aerodrome if:
 - (a) the aeroplane is fitted with a radio; and
 - (b) the pilot:
 - (i) maintains a continuous listening watch on the aerodrome frequency; and
 - (ii) broadcasts his or her intentions in accordance with the AIP; and
 - (iii) gives priority to other traffic.
- (2) However, subregulation (1) does not apply if the flight is subject to ATC instructions.
- (3) In this regulation, *AIP* includes a document that is equivalent to the AIP.

137.165 Close proximity operations

- (1) For this regulation, 2 or more aeroplanes are engaged in a ***close proximity operation*** if they are flying so close to each other during an application operation as to create a collision hazard if special measures are not taken.
- (2) A person must not operate an aeroplane in a close proximity operation if the person is not an operator.

Penalty: 25 penalty units.
- (3) The pilot in command of an aeroplane must not engage in a close proximity operation unless the operation is coordinated by:
 - (a) if the operation is to be conducted by 1 operator—the operator’s head of flight operations, or another person nominated by the operator; or
 - (b) otherwise—a suitably qualified pilot agreed to by all pilots involved in the operation.

Penalty: 25 penalty units.
- (4) The coordinator must give, to all pilots involved in the operation, instructions about the following:
 - (a) transit between the landing area and the work area;
 - (b) radio communications, including loss-of-communication procedures;

- (c) refuelling arrangements;
- (d) the conduct of the operation.

Penalty: 25 penalty units.

- (5) During the operation each pilot must:
 - (a) maintain safe lateral separation from the other aeroplanes by visual and radio contact; and
 - (b) comply with the instructions of the person coordinating the operation.

Penalty: 25 penalty units.

- (6) A contravention of subregulation (2), (3), (4) or (5) is an offence of strict liability.

137.170 Night operations

- (1) This regulation applies to an application operation conducted at night.
- (2) The pilot in command of the aeroplane to be used in the operation must, by inspection during daylight, be familiar with:
 - (a) the work area; and
 - (b) the route between the work area and the landing area.

Penalty: 25 penalty units.

- (3) The operator of the aeroplane must plan the operation so the distance from a work area to a landing area is less than 30 minutes flying time at normal cruise power in still air, unless:
 - (a) the aeroplane is equipped, and certificated under Part 21, for night VFR flight; and
 - (b) the pilot holds, in addition to any rating required for night application operations, the rating required for a VFR flight at night.

Penalty: 25 penalty units.

- (4) The operator must not allow the operation to commence unless the aeroplane is equipped with a two-way radio that enables the pilot to communicate with each person on the ground who has a role in the operation.

Penalty: 25 penalty units.

- (5) The pilot must not commence or continue the operation if horizontal visibility from the aeroplane is less than 5 km.

Penalty: 25 penalty units.

- (6) The operator must ensure that lights are placed at the work area to help the pilot with orientation.

Penalty: 25 penalty units.

Regulation 137.175

- (7) A contravention of subregulation (2), (3), (4), (5) or (6) is an offence of strict liability.

137.175 Firefighting operations

- (1) A person must not operate an aeroplane for an application operation that involves firefighting unless the emergency control authority responsible for the firefighting:
- (a) has not, when the operation commences, taken control of the fighting of the fire; or
 - (b) has taken control of the firefighting and asks the person to carry out the operation.

Penalty: 50 penalty units.

- (2) A pilot is authorised to conduct an application operation that:
- (a) involves firefighting; and
 - (b) is requested by the relevant emergency control authority;
- only if he or she has more than 500 hours experience as pilot in command in application operations when the operation commences.

Penalty: 50 penalty units.

- (3) A contravention of subregulation (1) or (2) is an offence of strict liability.

Subpart 137.E—All-weather operations

Note: Reserved for future use.

Regulation 137.180

Subpart 137.H—Aeroplane performance

137.180 General

- (1) The pilot in command of an aeroplane engaged in an application operation must, before take-off, take reasonable steps to satisfy himself or herself that the take-off can be safely carried out by considering the aeroplane's take-off weight and each other relevant factor.

Penalty: 50 penalty units.

- (2) Before landing, the pilot must satisfy himself or herself that the landing can be safely carried out by considering the aeroplane's landing weight and each other relevant factor.

Penalty: 50 penalty units.

- (3) A contravention of subregulation (1) or (2) is an offence of strict liability.

137.185 Take-off over a populous area

- (1) The pilot in command of an aeroplane engaged in an application operation may commence a take off over a populous area only if the aeroplane's performance will allow it to be 200 feet or more AGL when it crosses the aerodrome boundary and climbing at 200 feet or more per minute.

Penalty: 50 penalty units.

- (2) A contravention of subregulation (1) is an offence of strict liability.

Subpart 137.J—Weight and balance

137.190 Weight limitations

- (1) The pilot in command of an aeroplane engaged in an application operation must not commence a take-off if the aeroplane's gross weight exceeds:
 - (a) the maximum gross weight shown in the aeroplane's flight manual; or
 - (b) any maximum gross weight that:
 - (i) has been established for that type of aeroplane by a flight test supervised by CASA; and
 - (ii) is shown on a placard, approved by CASA and displayed in the aeroplane's cockpit; or
 - (c) the maximum gross weight shown on the type certificate, or type certificate data sheet, that is issued for the aeroplane by the national aviation authority of the State of Design (within the meaning given in Annex 8 to the Chicago Convention) of the aeroplane.

Penalty: 50 penalty units.

- (2) The pilot must calculate the take-off weight by a method that includes calculating the weight of:
 - (a) the crew and any equipment carried; and
 - (b) the aeroplane's fuel and load.

Penalty: 50 penalty units.

- (3) The operator of the aeroplane must not specify a minimum load to be carried by the aeroplane that is greater than the load that the pilot reasonably considers to be safe.

Penalty: 50 penalty units.

- (4) A contravention of subregulation (1), (2) or (3) is an offence of strict liability.

137.195 Loading—supervision

- (1) The pilot in command of an aeroplane to be used in an application operation must:
 - (a) supervise the loading of the aeroplane; and
 - (b) not commence the operation unless the load is placed in a way that is consistent with the data used for the calculation of the aeroplane's weight and balance.

Penalty: 25 penalty units.

- (2) A contravention of subregulation (1) is an offence of strict liability.

Subpart 137.K—Instruments and equipment

137.200 Installation of instruments and equipment

- (1) Subject to subregulation (3), the operator of an aeroplane that is to be used in an application operation must ensure that instruments and items of equipment, other than role equipment, used in the aeroplane are:
 - (a) other than items mentioned in subregulation (3)—approved; and
 - (b) properly installed so they are fit for their purpose, and do not interfere with the operation of any other equipment; and
 - (c) except as provided in the applicable MEL—serviceable.

Penalty: 50 penalty units.

- (2) For paragraph (1)(b), an instrument or item of equipment is properly installed if:
 - (a) there is a Part 21 approval that covers the installation; and
 - (b) the instrument or item is installed in accordance with its approved design; and
 - (c) the instrument or item is compatible with the configuration of the aircraft; and
 - (d) the instrument or item is installed by a person who:
 - (i) has been trained to carry out the installation; and
 - (ii) is authorised, under these Regulations, to carry out the installation.
- (3) The following items are not required to be approved:
 - (a) electric torch;
 - (b) timepiece;
 - (c) a GPS marking system;
 - (d) chart holder;
 - (e) first-aid kit;
 - (f) survival and pyrotechnic signalling equipment.
- (4) A contravention of subregulation (1) is an offence of strict liability.
- (5) In this regulation:

approved design: see subregulation 42.015(1).

Part 21 approval: see subregulation 42.015(1).

137.210 Position of instruments and equipment

- (1) The operator of an aeroplane must not allow the aeroplane to be used in an application operation unless:

Regulation 137.215

- (a) equipment on the aeroplane that is operated during flight by only 1 crew member is installed so that it can readily be operated from the member's station; and
- (b) an instrument that need only be read by 1 crew member is installed:
 - (i) so the crew member can easily read the instrument from his or her station; and
 - (ii) as close as practicable to the crew member's line of vision in the direction of the flight path.

Penalty: 50 penalty units.

- (2) A contravention of subregulation (1) is an offence of strict liability.

137.215 Instruments and equipment required

- (1) The operator of an aeroplane must not allow the aeroplane to engage in an application operation unless it is fitted with the equipment mentioned in each item of Table 137.215-1.

Penalty: 50 penalty units.

Table 137.215-1 Equipment for all application operations

Item	Equipment
1	A magnetic compass
2	A timepiece showing the time in hours, minutes and seconds (unless the pilot in command carries such a timepiece)
3	A sensitive pressure altimeter that: <ul style="list-style-type: none"> (a) reads in feet; and (b) has a sub-scale setting, calibrated in hectopascals, that can be set to any barometric pressure that may occur during flight
4	An airspeed indicator calibrated in knots
5	A slip indicator
6	An outside air temperature indicator calibrated in degrees Celsius
7	If the aeroplane is equipped with radio—a headset, whether or not built into a helmet, with a boom microphone or an equivalent microphone
8	Any other instruments and equipment required to be fitted for type certification.

- (2) The operator must not allow the aeroplane to engage in an application operation at night unless it is fitted with the equipment mentioned in each item of Table 137.215-2.

Penalty: 50 penalty units.

Table 137.215-2 Equipment for night application operations

Item	Equipment
1	At least 2 serviceable work lights that are suitable for the operation, installed so as

Regulation 137.220

Table 137.215-2 Equipment for night application operations

Item	Equipment
	to minimise glare in the cockpit
2	Navigation lights
3	An approved anti-collision lighting system
4	A system of cockpit lighting that is appropriate to the operation
5	Either: (a) a turn indicator; or (b) an attitude indicator that provides pitch and roll information at all attitudes

- (3) A contravention of subregulation (1) or (2) is an offence of strict liability.

137.220 Crew intercom system

- (1) The operator of an aeroplane that requires a crew of more than 1 person must not allow it to engage in an application operation unless it is equipped with an intercom system that:
- (a) can be used by all members of the crew; and
 - (b) includes headsets, whether or not built into a helmet, and microphones that are not of a handheld type.

Penalty: 25 penalty units.

- (2) Subregulation (1) does not apply to the operation if:
- (a) the use of any item of intercom equipment may adversely affect the safety of the operation; and
 - (b) another appropriate method of communication between the crew is arranged before the operation commences.
- (3) A contravention of subregulation (1) is an offence of strict liability.

137.225 Seatbelts and harnesses

- (1) This regulation applies to an aeroplane, other than an aeroplane that has been certified in the normal category.
- (2) The operator of the aeroplane must not allow it to engage in an application operation unless:
- (a) the pilot's seat is equipped with a four-point restraint harness with a single point release; and
 - (b) a harness or seatbelt for any other crew member is equipped with a single point release.

Penalty: 50 penalty units.

- (3) A contravention of subregulation (2) is an offence of strict liability.

Subpart 137.M—Aeroplane maintenance

137.230 Fitting and removal of role equipment

- (1) A person must not fit role equipment to, or remove role equipment from, an aeroplane that is used in an application operation.

Penalty: 25 penalty units.

- (2) Subregulation (1) does not apply to a person who:
 - (a) has been trained by an operator, or an approved person, in the fitting and removal of a kind of role equipment; and
 - (b) fits or removes equipment of that kind.
- (3) A contravention of subregulation (1) is an offence of strict liability.

Regulation 137.235

Subpart 137.N—Pilots

137.235 Pilot in command must be authorised under Part 61

- (1) The operator of an aeroplane commits an offence if:
 - (a) the aeroplane is used to conduct an application operation; and
 - (b) the pilot in command of the aeroplane is not authorised under Part 61 to pilot the aeroplane in the operation.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

137.240 Operator proficiency checks

- (1) For this regulation, a pilot holds a *valid operator proficiency check* if:
 - (a) he or she has satisfactorily completed a check that satisfies the criteria in subregulations (3), (4), (5) and (9); and
 - (b) under subregulations (7) and (8), the check is valid.
- (2) The operator of an aeroplane commits an offence if:
 - (a) the aeroplane is used to conduct an application operation; and
 - (b) the pilot in command of the aeroplane does not hold a valid operator proficiency check.

Penalty: 50 penalty units.
- (3) An operator proficiency check for a pilot who is employed by an operator must be conducted by:
 - (a) the operator's head of flight operations; or
 - (b) a flight examiner or instructor authorised under Part 61 to conduct application operations.
- (4) An operator proficiency check for the operator's head of flight operations must be conducted by an examiner or instructor mentioned in paragraph (3)(b).
- (5) Despite subregulations (3) and (4), an operator proficiency check for a pilot who, in the 12 months immediately before the check, has completed less than 50 hours flight time in application operations must be conducted by an examiner or instructor mentioned in paragraph (3)(b).
- (6) A synthetic flight trainer may be used for a check, or part of a check, if CASA approves its use for the purpose.
- (7) A check is valid for 12 months from the day on which the check is completed.

Regulation 137.240

- (8) However, if the check is completed less than 3 months before the day on which the check would otherwise expire (the *expiry day*), the check is valid for 12 months commencing at the end of the expiry day.
- (9) To complete an operator proficiency check the pilot must demonstrate that he or she is familiar with the systems, the normal and emergency flight manoeuvres, performance, fuel consumption rates, and weight and balance requirements for an aeroplane that he or she flies.

Note: A check of a pilot of a single seat aeroplane may be conducted by observation from the ground and may include review of GPS data logs, job planning and post flight records.

- (11) A contravention of subregulation (2) is an offence of strict liability.

Regulation 137.245

Subpart 137.P—Manuals, logs and records

137.245 Flight manual

- (1) An operator must maintain a current aircraft flight manual, or another approved document, for each aeroplane used by the operator for application operations.

Penalty: 25 penalty units.

- (2) A contravention of subregulation (1) is an offence of strict liability.

137.250 Checking records

- (1) An operator must:

(a) make a record of the checking that is:

- (i) required, under Subpart 137.N, for each pilot employed by the operator; and
(ii) completed by each pilot; and

(b) allow each pilot to examine and copy the records that relate to him or her.

Penalty: 10 penalty units.

- (2) A contravention of subregulation (1) is an offence of strict liability.

Note: Records made for this regulation must be retained: see regulation 137.255.

137.255 Document retention periods

- (1) The operator of an aeroplane that is used for application operations must keep an aircraft maintenance record relating to the aeroplane (including a record of the time in service of each component for which that information is kept):

- (a) for at least 90 days after the aeroplane concerned is in a condition that prevents it being flown in the future; and
(b) in a form that is suitable for, and allows access to, the information.

Penalty: 50 penalty units.

- (2) The operator of an aeroplane must keep each record mentioned in column 2 of an item in Table 137.255:

- (a) for at least the period mentioned in column 3 of the item; and
(b) in a form that is suitable for, and allows access to, the information.

Penalty: 25 penalty units.

- (3) A contravention of subregulation (1) or (2) is an offence of strict liability.

Table 137.255

Item	Record	Period
1	A copy of the following that relates to each pilot employed by the operator: (a) medical certificate; (b) licence; (c) any rating, endorsement or approval that is relevant to the pilot's employment by the operator	Until the pilot ceases to be employed as a pilot by the operator
2	The 2 most recent records of any training undertaken by a pilot employed by the operator if: (a) the training is required under the operations manual; and (b) the record is not retained for item 2	Until the pilot ceases to be employed as a pilot by the operator
3	A report about an event relating to the safety of an application operation made by a pilot employed by the operator	90 days from the day on which it is made
4	Pilot flight, duty and rest times	15 months from the day of the most recent entry in the document
5	Pilot conversion training	36 months from the day of the most recent entry in the document
6	Pilot recurrent training and annual proficiency check for Subpart 137.N	36 months from the day of the most recent entry in the document

137.260 Maintenance record to be given to new operator

- (1) A person that ceases to be the operator of an aeroplane that is used for application operations must, if another person becomes the operator, give the aeroplane's aircraft maintenance record, or a copy of the record, to the other person.

Penalty: 25 penalty units.

- (2) A contravention of subregulation (1) is an offence of strict liability.

Regulation 137.265

Subpart 137.Q—Flight duty time limitations and rest requirements

137.265 Application of Subpart 137.Q

This Subpart sets out requirements about duty and rest times for a pilot who conducts application operations.

137.270 Subpart not to affect subsection 1 of CAO 48.1

This Subpart does not affect the operation of subsection 1 of Civil Aviation Order 48.1.

137.275 Limit on flying hours

- (1) The pilot must not fly more than:
 - (a) 1 200 hours in 365 consecutive days; or
 - (b) 170 hours in 28 consecutive days.

Penalty: 25 penalty units.

- (2) A contravention of subregulation (1) is an offence of strict liability.

137.280 Off-duty period before and after tour of duty

- (1) Subject to subregulations (2) and (3), the pilot must not undertake duties relating to his or her employment by an operator, including being on call or planning less than:
 - (a) 8 hours before commencing a tour of duty; or
 - (b) 8 hours after completing a tour of duty of 10 hours or less; or
 - (c) 10 hours after completing a tour of duty of more than 10 hours.

Penalty: 25 penalty units.

- (2) No less than 8 hours after completing a tour of duty of more than 10 hours, the pilot may choose to recommence duty up to 1 hour earlier than the time required under paragraph (1)(c) if the pilot believes he or she is mentally and physically able to do so.
- (3) The pilot must not recommence duty under subregulation (2) if, in doing so, he or she would be in breach of regulation 137.275, 137.285, 137.290, 137.295 or 137.300.
- (4) A contravention of subregulation (1) is an offence of strict liability.

137.285 Tour of duty—duration

- (1) The pilot must not undertake, and a person must not require the pilot to undertake, a tour of duty that exceeds 14 hours.

Penalty: 25 penalty units.
- (2) However, the pilot may extend a tour of duty in accordance with subregulation (3), (4) or (5) if:
 - (a) the pilot reasonably believes he or she is mentally and physically able to do so; and
 - (c) in doing so, the pilot would not be in breach of regulation 137.275, 137.280, 137.290, 137.295 or 137.300.
- (3) After the pilot has completed 14 hours of a tour of duty, he or she may extend the tour of duty by no more than 1 hour.
- (4) If, during a tour of duty, the pilot has had 3 or more consecutive hours of resting time, the pilot may extend the tour of duty by no more than the lesser of the following:
 - (a) 50% of the duration of the resting time;
 - (b) 2 hours.
- (5) If, during a tour of duty, the pilot has had 2 or more consecutive hours of sleeping time, the pilot may extend the tour of duty by no more than the lesser of the following:
 - (a) the duration of the sleeping time;
 - (b) 3 hours.
- (6) A contravention of subregulation (1) is an offence of strict liability.

137.290 Off-duty period each 14 days

- (1) In any 14 consecutive days the pilot must have a continuous period of at least 36 hours during which he or she carries out no duties for an operator.

Penalty: 25 penalty units.
- (2) A person must not require the pilot to contravene subregulation (1).

Penalty: 25 penalty units.
- (3) A contravention of subregulation (1) or (2) is an offence of strict liability.

137.295 Limit on time spent on tours of duty

- (1) The pilot must not spend more than:
 - (a) 44 hours on tours of duty in any 3 consecutive days; or
 - (b) 98 hours on tours of duty in any 7 consecutive days.
Penalty: 25 penalty units.

Regulation 137.300

- (2) However, if:
- (a) the pilot has 1 or more periods of resting time during any of the days mentioned in subregulation (1); and
 - (b) each period is 6 or more continuous hours;
- the maximum amount of time for the subregulation is increased by 50% of the duration of the resting time (or the total of those resting times).
- (3) Despite subregulation (2), the maximum time for subregulation (1) is not increased if, in doing so, the pilot would be in breach of regulation 137.275, 137.280, 137.285, 137.290 or 137.300.
- (4) A person must not require the pilot to contravene subregulation (1).
Penalty: 25 penalty units.
- (5) A contravention of subregulation (1) or (4) is an offence of strict liability.

137.300 Pilot to be fit for duty

- (1) The pilot must not commence an application operation if he or she is not fit for duty.
Penalty: 25 penalty units.
- (2) The operator of an aeroplane to be used in an application operation must not allow the pilot to commence the operation if the operator has reason to believe that the pilot is not fit for duty.
Penalty: 25 penalty units.
- (3) For subregulations (1) and (2), a pilot is ***not fit for duty*** if, for example:
- (a) he or she has not had adequate rest, food or drink; or
 - (b) he or she is adversely affected by a medical condition or a psychoactive substance.
- Note: The expression ***psychoactive substances*** refers to alcohol, drugs and volatile solvents, but not coffee and tobacco: see clause 60 of Part 2 of the Dictionary.
- (4) In paragraph (3)(b):
medical includes psychological and psychiatric.
- (5) A contravention of subregulation (1) or (2) is an offence of strict liability.

Part 138—Aerial work operations

Table of contents

Subpart 138.A—Preliminary

- 138.005 Application of Part 138
- 138.010 Definition of *aerial work operation* etc.
- 138.012 Definition of *significant change*
- 138.015 Definition of *task specialist*
- 138.020 Issue of Manual of Standards for Part 138
- 138.025 Approvals by CASA for Part 138

Subpart 138.B—Certification

Division 138.B.1—Requirement for certification for certain operations

- 138.030 Requirement to hold aerial work certificate

Division 138.B.2—Aerial work certificates

- 138.035 Application for aerial work certificate
- 138.040 Issue of aerial work certificate
- 138.045 Approval of manuals
- 138.050 Conditions of aerial work certificates
- 138.055 Compliance with conditions of aerial work certificates

Division 138.B.3—Changes relating to aerial work operators

- 138.060 Changes of name etc.
- 138.062 Application for approval of significant changes
- 138.064 Approval of significant changes
- 138.066 Changes must be made in accordance with process in operations manual
- 138.068 CASA directions relating to operations manual or key personnel

Division 138.B.4—Organisation and personnel

- 138.070 Organisation and personnel
- 138.075 Key personnel cannot carry out responsibilities
- 138.080 Familiarisation training for key personnel
- 138.085 Responsibilities and accountabilities of chief executive officer
- 138.090 Qualifications and experience of head of operations
- 138.095 Responsibilities of head of operations
- 138.100 Qualifications and experience of head of training and checking
- 138.105 Responsibilities of head of training and checking
- 138.110 Experience of safety manager
- 138.115 Responsibilities of safety manager
- 138.120 Additional qualification and experience requirements for key personnel

Division 138.B.5—Training and checking

- 138.125 Operators who are required to have a training and checking system
-

- 138.130 Requirements for flight crew
- 138.135 Requirements for other operational safety-critical personnel

Division 138.B.6—Safety management system

- 138.140 Operators who are required to have a safety management system
- 138.145 Safety management system requirements

Division 138.B.7—Personnel fatigue management

- 138.150 Operators who are required to have a crew fatigue management system

Division 138.B.8—Operations manuals

- 138.155 Content of operations manual
- 138.157 Compliance with operations manual by operator
- 138.160 Compliance with operations manual by personnel
- 138.165 Providing personnel with operations manual

Division 138.B.9—Records and documents

- 138.170 Personnel training and checking records
- 138.175 Availability of records
- 138.180 Copies of flight crew licences and medical certificates
- 138.185 Retention periods for personnel records

Division 138.B.10—Miscellaneous

- 138.195 Reference library
- 138.200 Maximum period for use of foreign registered aircraft in Australian territory

Subpart 138.C—General

Division 138.C.1—General flight limitations

- 138.205 Permitted categories of aircraft for aerial work operations

Division 138.C.2—Operational documents

- 138.210 Compliance with flight manual
- 138.215 Availability of checklists

Division 138.C.3—Flight related documents

- 138.220 Electronic documents
- 138.225 Availability of parts of operations manual

Division 138.C.4—Reporting and recording defects and incidents etc.

- 138.230 Procedures for reporting and recording defects etc.
- 138.235 Reporting and recording incidents

Division 138.C.5—Search and rescue services and emergency and survival equipment

Division 138.C.6—Miscellaneous requirements

Subpart 138.D—Operational procedures

Division 138.D.1—Operational control**Division 138.D.2—Flight preparation**

138.265 Flight preparation requirements

Division 138.D.3—Flight planning

138.270 Availability of flight planning information

Division 138.D.4—Flight rules

138.275 Minimum height rules

Division 138.D.5—Take-offs and landings

138.280 Procedures for safety at aerodromes

Division 138.D.6—Fuel requirements

138.285 Fuel procedures

138.290 Oil requirements

138.300 Hot fuelling

138.302 Fuelling safety procedures

Division 138.D.7—Carriage of passengers or cargo

138.305 Carriage of passengers—general

138.320 Procedures for carriage of restricted persons

Division 138.D.8—Instruments, indicators, equipment and systems

138.340 Head-up displays, enhanced vision systems and synthetic vision systems

138.345 Survival equipment procedures

138.350 NVIS flights

Division 138.D.9—Miscellaneous

138.370 Operator must conduct risk assessments

138.375 Wearing of seatbelts and other restraint devices

138.380 Procedures in relation to frost etc.

138.385 Procedures in relation to polar operations

Division 138.D.10—Rules for external load operations

138.400 Certain night operations prohibited unless operation is an emergency service operation or approved by CASA

138.410 Manual of Standards may prescribe requirements for external load operations

Division 138.D.11—Rules for dispensing operations

138.425 Manual of Standards may prescribe requirements for dispensing operations

Division 138.D.12—Rules for task specialist operations

138.430 Manual of Standards may prescribe requirements for task specialist operations

138.432 Possessing and discharging firearms

Subpart 138.F—Performance

- 138.435 Take-off performance
- 138.440 Landing performance

Subpart 138.J—Weight and balance

- 138.450 Loading of aircraft
- 138.460 Weight and balance documents

Subpart 138.K—Equipment

- 138.465 Requirements relating to equipment

Subpart 138.N—Flight crew

- 138.475 Composition, number, qualifications and training
- 138.480 Training for new or inexperienced flight crew members
- 138.485 Competence
- 138.490 Assignment to duty of pilot in command
- 138.500 Qualification as pilot in command
- 138.505 Training and checking to be conducted by certain persons

Subpart 138.P—Air crew members and task specialists

Division 138.P.1—Air crew members

- 138.535 Application of Division 138.P.1
- 138.540 Composition, number, qualifications and training
- 138.550 Training and checking to be conducted by certain persons

Division 138.P.2—Task specialists

- 138.575 Application of Division 138.P.2
- 138.580 Qualifications and training
- 138.590 Training and checking to be conducted by certain persons

Subpart 138.A—Preliminary

138.005 Application of Part 138

- (1) This Part applies in relation to the operation of an aircraft for an aerial work operation if:
 - (a) the aircraft is an aeroplane or rotorcraft; and
 - (b) Part 101 does not apply to the operation of the aircraft.
- (2) Despite subregulation (1), a provision of this Part does not apply in relation to the operation of an aircraft if:
 - (a) the aircraft is engaged in any of the following:
 - (i) a police, national security or customs operation;
 - (ii) a search and rescue operation conducted by, or at the request of, a search and rescue body; and
 - (b) in the circumstances, it is reasonable that the provision not apply to the operation.
- (3) Despite subregulation (1), a provision of this Part or the Part 138 Manual of Standards applies in relation to an operator of an aircraft for an aerial work operation only if the operator holds an aerial work certificate authorising that operation.
- (4) Despite subregulation (3), a provision of this Part or the Part 138 Manual of Standards applies to the operator of an aircraft for an aerial work operation whether or not the operator holds an aerial work certificate authorising that operation if the provision is expressed to so apply.

Note: See Part 137 for matters relating to aerial application operations.

138.010 Definition of *aerial work operation* etc.

- (1) An ***aerial work operation*** means one or more of the following (and each of the following is a kind of aerial work operation):
 - (a) an external load operation;
 - (b) a dispensing operation;
 - (c) a task specialist operation;
 - (d) an operation of a kind prescribed by the Part 138 Manual of Standards for the purposes of this paragraph.
- (2) An ***external load operation*** means carrying or towing a load outside an aircraft in flight and includes training for such an operation.
- (3) A ***dispensing operation*** means dropping or releasing any substance or object from an aircraft in flight and includes training for such an operation.
- (4) A ***task specialist operation*** means carrying out a specialised activity using an aircraft in flight and includes training for such an activity.

Regulation 138.012

- (5) Despite subregulation (1), an ***aerial work operation*** does not include the following:
- (a) a medical transport operation;
 - (b) an external load operation involving winching a person, if the operation is conducted as part of an air transport operation;
 - (c) glider towing;
 - (d) a person undertaking a parachute descent;
 - (e) an aerial application operation (including any external load operation undertaken as part of that operation) to apply fire retardants (including water), or oil or chemical dispersants, if the operation is conducted by a person holding a civil aviation authorisation under Part 137 to undertake the operation;
 - (f) any other aerial application operation;
 - (g) any other operation of a kind prescribed by the Part 138 Manual of Standards for the purposes of this paragraph.

138.012 Definition of ***significant change***

A ***significant change***, for an aerial work operator, means:

- (a) a change in relation to any of the following:
 - (i) the location and operation of the operator's main operating bases, including the opening or closing of main operating bases;
 - (ii) the operator's key personnel;
 - (iii) a person authorised to carry out the responsibilities of any of the key personnel if the position holder is absent from the position or cannot carry out the responsibilities of the position;
 - (iv) the formal reporting lines for a managerial or operational position with safety functions and responsibilities that reports directly to any of the key personnel;
 - (v) the operator's process for making changes that relate to the safe conduct and management of the operator's aerial work operations;
 - (vi) the kinds of aerial work operations the operator is authorised to conduct under the operator's aerial work certificate;
 - (vii) the kind of operations involving a Class D external load conducted by the operator, including beginning to operate that kind of operation (but not including ceasing to conduct that kind of operation);
 - (viii) for an aerial work operator that is not required to have either a training and checking system under regulation 138.125 or a safety management system under regulation 138.140—the flight rules under which the operator conducts the operator's aerial work operations (but not including starting operations under the visual flight rules if operations were already conducted under the instrument flight rules);
or
- (b) any of the following changes in relation to the aircraft used in the operator's aerial work operations:

Regulation 138.015

- (i) the operator first starts to use an aircraft for which a pilot of the aircraft would need a type rating for the aircraft and no other aircraft is already used by the operator that requires the same type rating;
 - (ii) the operator first starts to use an aircraft that is in a different category of aircraft (within the meaning of Part 61) compared to the category of aircraft already used by the operator;
 - (iii) the operator first starts to use an aircraft that is a multi-engine aeroplane or a multi-engine rotorcraft; or
- (c) a change in relation to any of the following that does not maintain or improve, or is not likely to maintain or improve, aviation safety:
- (i) the plans, processes, procedures, programs and systems for the safe conduct and management of the operator's aerial work operations;
 - (ii) the qualifications, experience and responsibilities required by the operator for any of the operator's key personnel;
 - (iii) any other aeronautical or aviation safety related services provided to the operator by third parties;
 - (iv) any leasing or other arrangements for the supply of an aeroplane or rotorcraft used in the operator's aerial work operations; or
- (d) a change required to be approved by CASA under these Regulations, other than a change that results in the reissue or replacement of an instrument previously issued by CASA in which the conditions or other substantive content of the instrument are unchanged.

138.015 Definition of *task specialist*

- (1) A ***task specialist***, for an aerial work operation, means a crew member for a flight:
- (a) who carries out a function for the flight relating to the aerial work operation; and
 - (b) who is not a flight crew member or an air crew member for the flight.
- (2) Despite subregulation (1), a ***task specialist***:
- (a) includes a crew member of a kind prescribed by the Part 138 Manual of Standards for the purposes of this paragraph; and
 - (b) does not include a crew member of a kind prescribed by the Part 138 Manual of Standards for the purposes of this paragraph.

138.020 Issue of Manual of Standards for Part 138

For subsection 98(5A) of the Act, CASA may issue a Manual of Standards for this Part prescribing matters:

- (a) required or permitted by these Regulations to be prescribed by the Part 138 Manual of Standards; or
- (b) necessary or convenient to be prescribed for carrying out or giving effect to this Part.

Note: A Manual of Standards is a legislative instrument: see subsection 98(5AA) of the Act.

Regulation 138.025

138.025 Approvals by CASA for Part 138

- (1) If a provision of this Part, or of the Part 138 Manual of Standards, refers to a person holding an approval under this regulation, the person may apply to CASA, in writing, for the approval.
- (2) Subject to regulation 11.055, CASA must grant the approval.
- (3) Subregulation 11.055(1B) applies to the granting of an approval under this regulation for either of the following provisions:
 - (a) paragraph 138.090(2)(a);
 - (b) paragraph 138.100(3)(a).

Subpart 138.B—Certification

Division 138.B.1—Requirement for certification for certain operations

138.030 Requirement to hold aerial work certificate

- (1) A person contravenes this subregulation if:
 - (a) the person conducts an aerial work operation (other than an aerial work operation covered by subregulation (2)); and
 - (b) the person does not hold an aerial work certificate that authorises the person to conduct the operation.
- (2) An aerial work operation in an aircraft is covered by this subregulation if either or both of the following apply:
 - (a) the operation is spotting or photography and no remuneration is received by any of the following for the operation:
 - (i) the pilot;
 - (ii) the person mentioned in subregulation (3);
 - (iii) a person or organisation on whose behalf the operation is conducted;
 - (b) the operation:
 - (i) is conducted over land owned or occupied by the person mentioned in subregulation (3); and
 - (ii) is not conducted over a populous area or public gathering; and
 - (iii) is not an external load operation involving the carriage of a person as an external load.
- (3) The person is:
 - (a) if the aircraft is required to be registered—the registered operator of the aircraft; or
 - (b) otherwise—the owner of the aircraft.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 138.B.2—Aerial work certificates

138.035 Application for aerial work certificate

- (1) A person may apply to CASA, in writing, for an aerial work certificate.
- (2) The application must include the following:
 - (a) the applicant's name (including any operating or trading name), contact details and ABN (if any);
 - (b) if the address of the applicant's operational headquarters is different from its mailing address—the address of its operational headquarters;
 - (c) if the applicant is a corporation registered in Australia that has an ACN—its ACN and the address of its registered office;
 - (d) if the applicant is a corporation not registered in Australia—the place it was incorporated or formed;
 - (e) the aerial work operations that the applicant proposes to conduct;
 - (f) a written undertaking that, if CASA issues the certificate, the organisation established by the applicant to conduct the applicant's proposed aerial work operations (the *applicant's organisation*) will:
 - (i) be capable of operating in accordance with the applicant's proposed operations manual and the civil aviation legislation; and
 - (ii) operate in accordance with the applicant's proposed operations manual and the civil aviation legislation.
- (3) The application must be accompanied by:
 - (a) a copy of the applicant's proposed operations manual; and
 - (b) if the applicant proposes to conduct operations mentioned in regulation 138.125—a copy of the applicant's proposed training and checking manual; and
 - (c) if the applicant proposes to conduct operations mentioned in regulation 138.140—a copy of the applicant's proposed safety management system manual.
- (4) The application must be signed by the person appointed, or proposed to be appointed, as the chief executive officer of the applicant's organisation.

138.040 Issue of aerial work certificate

- (1) Subject to regulation 11.055, CASA must issue the certificate if satisfied of each of the following:
 - (a) the applicant's proposed operations manual complies with regulation 138.155;
 - (b) the applicant can conduct the proposed aerial work operations safely and in accordance with its operations manual and the civil aviation legislation;
 - (c) the organisation established, or proposed to be established, by the applicant to conduct the applicant's proposed aerial work operations (the *applicant's*

- organisation**) is suitable to ensure that the operations can be conducted safely, having regard to the nature of the operations;
- (d) the chain of command of the applicant's organisation is appropriate to ensure that the operations can be conducted safely;
 - (e) the applicant's organisation has a sufficient number of suitably qualified and competent personnel to conduct the operations safely;
 - (f) the facilities of the applicant's organisation are sufficient to enable the operations to be conducted safely;
 - (g) the applicant's organisation has suitable procedures and practices to control the organisation and ensure the operations can be conducted safely;
 - (h) each of the key personnel appointed, or proposed to be appointed, to a position in the applicant's organisation:
 - (i) is a fit and proper person to be appointed to the position; and
 - (ii) has the qualifications and experience required by Division 138.B.4 for the position; and
 - (iii) has the qualifications and experience for the position (if any) required by the applicant's operations manual; and
 - (iv) has the additional qualifications and experience (if any) required by CASA under regulation 138.120 for the position.
- (2) For paragraph (1)(b), without limiting the matters that CASA may consider, CASA must consider the following:
- (a) the applicant's proposed:
 - (i) operations manual; and
 - (ii) training and checking manual (if any); and
 - (iii) safety management system manual (if any);
 - (b) whether the applicant can comply with the proposed operations manual, training and checking manual and safety management system manual;
 - (c) the content of the undertaking mentioned in paragraph 138.035(2)(f);
 - (d) details of, and reasons for, any suspension or cancellation of:
 - (i) a civil aviation authorisation issued to the applicant; or
 - (ii) an equivalent authorisation issued to the applicant under the law of a foreign country; or
 - (iii) an equivalent authorisation issued to the applicant by a multinational aviation authority;
 - (e) the suitability of the applicant's corporate and organisational structures for the proposed operations;
 - (f) any other information:
 - (i) accompanying the application; or
 - (ii) in any other document given to CASA by the applicant for the application, including any document requested by CASA in relation to the application.
- (3) For subparagraph (1)(h)(i), the matters CASA may consider in deciding whether a person is a fit and proper person include the matters mentioned in subregulation 11.055(4).
-

Regulation 138.045

- (4) If CASA decides to issue the certificate, CASA must determine the aerial work operations the applicant is authorised to conduct, including any limitations or conditions in relation to the aerial work operations.
- (5) The certificate must include:
 - (a) the matters mentioned in subregulation (4); and
 - (b) a certificate reference number determined by CASA.

138.045 Approval of manuals

If CASA issues the certificate to the applicant, CASA is taken to have also approved the applicant's proposed:

- (a) operations manual; and
- (b) training and checking manual (if any); and
- (c) safety management system manual (if any).

138.050 Conditions of aerial work certificates

- (1) Each of the following is a condition of an aerial work certificate issued to an aerial work operator:
 - (a) the operator must comply with:
 - (i) each provision of this Part that applies to the operator; and
 - (ii) each direction given to the operator, or obligation imposed on the operator, by CASA under a provision of these Regulations; and
 - (iii) each other provision of the civil aviation legislation that applies to the operator's aerial work operations mentioned in the certificate;
 - (b) each of the operator's key personnel must comply with:
 - (i) each provision of this Part that applies to the person; and
 - (ii) each direction given to the person, or obligation imposed on the person, by CASA under a provision of these Regulations; and
 - (iii) each other provision of the civil aviation legislation that applies to the operator's aerial work operations mentioned in the certificate;
 - (c) each vacancy in the operator's key personnel must be:
 - (i) notified to CASA within the period specified in the operator's operations manual; and
 - (ii) filled within the period specified in the operator's operations manual;
 - (d) each of the operator's personnel must comply with each provision of the civil aviation legislation that applies to the operator's aerial work operations mentioned in the certificate;
 - (e) if the operator is an individual—the individual must be the chief executive officer of the operator's organisation;
 - (f) if the operator is required by regulation 138.125 to have a training and checking system:
 - (i) the positions of chief executive officer and head of training and checking may be occupied by the same person only if the operator holds an approval under regulation 138.025 for this subparagraph; and

Regulation 138.055

- (ii) the positions of head of operations and head of training and checking may be occupied by the same person only if the operator holds an approval under regulation 138.025 for this subparagraph;
 - (g) if the operator is required by regulation 138.140 to have a safety management system:
 - (i) the positions of chief executive officer and safety manager may be occupied by the same person only in an unforeseen circumstance, and only for the period mentioned in subregulation (2); and
 - (ii) the positions of head of operations and safety manager may be occupied by the same person only in an unforeseen circumstance, and only for the period mentioned in subregulation (2).
- (2) For subparagraphs (1)(g)(i) and (ii), the period is:
- (a) no more than 7 consecutive days for each unforeseen circumstance; or
 - (b) if the operator holds an approval under regulation 138.025 for this paragraph in relation to an unforeseen circumstance—the period mentioned in the approval for the unforeseen circumstance.

138.055 Compliance with conditions of aerial work certificates

- (1) An aerial work operator contravenes this subregulation if the operator contravenes a condition of its aerial work certificate.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 138.B.3—Changes relating to aerial work operators

138.060 Changes of name etc.

- (1) An aerial work operator contravenes this subregulation if the operator:
 - (a) makes a change mentioned in subregulation (2); and
 - (b) does not, before making the change:
 - (i) amend the operator's operations manual to reflect the change; and
 - (ii) give CASA written notice of the change and a copy of the amended part of the operations manual clearly identifying the change.
- (2) For the purposes of paragraph (1)(a), the changes are the following:
 - (a) a change to the operator's name (including any operating or trading name) or contact details;
 - (b) if the address of the operator's operational headquarters is different from the operator's mailing address—a change to the address of the operator's operational headquarters.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

138.062 Application for approval of significant changes

- (1) An aerial work operator contravenes this subregulation if:
 - (a) the operator makes a significant change other than a significant change mentioned in subregulation (2) or (3); and
 - (b) CASA has not approved the significant change.
- (2) An aerial work operator contravenes this subregulation if:
 - (a) the operator makes a significant change that is the permanent appointment, or the acting appointment (for a period of greater than 35 days), as any of the operator's key personnel of a person previously authorised to carry out the responsibilities of the position in a circumstance mentioned in subparagraph 138.155(1)(e)(iv); and
 - (b) the operator does not apply to CASA for approval of the change, in accordance with subregulation (4), within 7 days after the change is made.
- (3) An aerial work operator contravenes this subregulation if:
 - (a) the operator makes a significant change that is the permanent appointment as any of the operator's key personnel of a person not previously authorised to carry out the responsibilities of the position in a circumstance mentioned in subparagraph 138.155(1)(e)(iv); and
 - (b) the operator does not apply to CASA for approval of the change, in accordance with subregulation (4), within 3 days after the change is made.
- (4) An application for approval of a significant change must:

- (a) be in writing; and
 - (b) set out the change; and
 - (c) be accompanied by a copy of the part of the operator's operations manual affected by the change, clearly identifying the change.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (1), (2) or (3).

Penalty: 50 penalty units.

138.064 Approval of significant changes

- (1) CASA must approve a significant change for an aerial work operator if satisfied that the requirements mentioned in subregulation 138.040(1) will continue to be met.
- (2) If CASA approves the significant change, CASA is taken to have also approved the changes to the operator's operations manual covered by the application.

138.066 Changes must be made in accordance with process in operations manual

- (1) An aerial work operator contravenes this subregulation if:
 - (a) the operator makes a change; and
 - (b) the change is not made in accordance with the process included in the operator's operations manual in accordance with paragraph 138.155(1)(m).
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

138.068 CASA directions relating to operations manual or key personnel

- (1) If CASA is satisfied that it is necessary in the interests of aviation safety, CASA may direct an aerial work operator to change its operations manual:
 - (a) to remove particular information, procedures or instructions from the operations manual; or
 - (b) to include particular information, procedures or instructions in the operations manual; or
 - (c) to revise or vary the information, procedures or instructions in the operations manual.
- (2) CASA may direct an aerial work operator to remove any of the operator's key personnel from the person's position if satisfied that the person is not:
 - (a) carrying out the responsibilities of the position; or
 - (b) if the person is the chief executive officer—properly managing matters for which the person is accountable.
- (3) A direction under this regulation must:

Part 138 Aerial work operations

Subpart 138.B Certification

Division 138.B.3 Changes relating to aerial work operators

Regulation 138.068

- (a) be in writing; and
 - (b) state the time within which the direction must be complied with.
- (4) An aerial work operator contravenes this subregulation if:
- (a) CASA gives the operator a direction under this regulation; and
 - (b) the operator does not comply with the direction within the time stated in the direction.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (4).

Penalty: 50 penalty units.

Division 138.B.4—Organisation and personnel

138.070 Organisation and personnel

- (1) An aerial work operator must maintain an organisational structure that effectively manages the operator's aerial work operations, taking into account the size, nature and complexity of the operations.
- (2) An aerial work operator contravenes this subregulation if any of the operator's key personnel carries out a responsibility of the person's position in a way that contravenes the operator's operations manual or this Subpart.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

138.075 Key personnel cannot carry out responsibilities

- (1) An aerial work operator contravenes this subregulation if:
 - (a) the operator becomes aware that any of its key personnel cannot carry out, or is likely to be unable to carry out, the person's responsibilities for a period of longer than 30 days; and
 - (b) the operator does not tell CASA of the matter mentioned in paragraph (a) within the time mentioned in subregulation (2).
- (2) For paragraph (1)(b), the time is:
 - (a) if there is not another person authorised to carry out the responsibilities for all or part of the period—24 hours after the operator becomes aware of the matter; or
 - (b) if there is another person authorised to carry out the responsibilities for all or part of the period—3 days after the operator becomes aware of the matter.
- (3) A person commits an offence if the person contravenes subregulation (1).

Penalty: 50 penalty units.

138.080 Familiarisation training for key personnel

An aerial work operator must ensure that, before a person appointed as any of the operator's key personnel begins to carry out the responsibilities of the position, the person has completed any training that is necessary to familiarise the person with the responsibilities.

138.085 Responsibilities and accountabilities of chief executive officer

- (1) The chief executive officer of an aerial work operator's organisation is responsible for the following:

Regulation 138.090

- (a) ensuring that, for the safe conduct of the operator's aerial work operations in accordance with the operator's aerial work certificate and operations manual, and the civil aviation legislation, the operator:
 - (i) has sufficient suitably experienced, qualified and competent personnel; and
 - (ii) has a suitable management structure; and
 - (iii) is adequately financed and resourced;
 - (b) ensuring that the operator:
 - (i) sets and maintains standards for the operations in accordance with the operator's operations manual; and
 - (ii) complies with the civil aviation legislation; and
 - (iii) for each foreign registered aircraft (if any) used in the operations—maintains the aircraft in accordance with the law of the country in which the aircraft is registered; and
 - (iv) has procedures that ensure that all of the operator's personnel understand the operator's safety policy; and
 - (v) has processes for identifying and addressing deficiencies in the operator's aerial work operations;
 - (c) if the operator is required to have a safety management system—ensuring that the operator:
 - (i) implements and manages the operator's safety management system; and
 - (ii) has an organisational structure that ensures that the safety manager is independent and not subject to undue influence;
 - (d) establishing and regularly reviewing the operator's safety performance indicators and targets;
 - (e) ensuring that the operator's operations manual is monitored and managed for continuous improvement;
 - (f) ensuring that key personnel satisfactorily carry out the responsibilities of their positions in accordance with:
 - (i) the operator's operations manual; and
 - (ii) the civil aviation legislation.
- (2) The chief executive officer of an aerial work operator's organisation is accountable to the operator and CASA for ensuring the responsibilities mentioned in subregulation (1) are carried out effectively.

138.090 Qualifications and experience of head of operations

- (1) The head of operations of an aerial work operator must:
 - (a) be qualified to pilot an aircraft in each kind of aerial work operation that the operator conducts; and
 - (b) hold the pilot type rating or class rating (within the meaning of Part 61) for the type or class of aircraft that is used to conduct the greatest proportion of the operator's aerial work operations; and
 - (c) have the experience required under subregulation (2); and

- (d) have a satisfactory record in the conduct or management of air operations;
and
 - (e) have sufficient safety and regulatory knowledge to enable the operator to conduct the operator's aerial work operations safely and in accordance with its operations manual and the civil aviation legislation.
- (2) For paragraph (1)(c), the experience required is:
- (a) if the operator holds an approval under regulation 138.025 for this paragraph—the experience mentioned in paragraph (3)(a) or (b); or
 - (b) if paragraph (a) does not apply—the experience mentioned in paragraphs (3)(a) and (b).
- (3) For subregulation (2), the experience is the following:
- (a) at least 300 hours flight time on an aircraft of the category used to conduct the greatest proportion of the operator's aerial work operations;
 - (b) at least 6 months experience in the conduct or management of air operations.
- (4) CASA may, by written notice given to a head of operations, or a proposed head of operations, of an aerial work operator, direct the person to undertake an assessment mentioned in subregulation (5).
- (5) For subregulation (4), the assessment:
- (a) is an assessment conducted by CASA or a person nominated by CASA to demonstrate a person's suitability as head of operations for the operator;
and
 - (b) may include assessment in an aircraft or flight simulation training device.
- (6) In this regulation:
- category* has the meaning given by regulation 61.015.

138.095 Responsibilities of head of operations

- (1) The head of operations of an aerial work operator must safely manage the operator's aerial work operations.
- (2) Without limiting subregulation (1), the responsibilities of the head of operations include the following:
 - (a) monitoring and maintaining, and reporting to the chief executive officer on, the operator's compliance with the provisions of the civil aviation legislation and the operator's operations manual that apply to the operations;
 - (b) setting and maintaining the operator's standards for the operations in accordance with the operator's operations manual;
 - (c) developing, managing and maintaining the operator's dangerous goods manual (if any);
 - (d) ensuring the proper allocation and deployment of aircraft and personnel for use in the operations;

Regulation 138.100

- (e) ensuring that the operator's personnel are provided with the information and documentation necessary to properly carry out their responsibilities;
- (f) managing the maintenance and continuous improvement of the operator's fatigue risk management system (if any);
- (g) ensuring the operator's personnel understand the operator's safety policy;
- (h) if the operator is required to have a training and checking system—ensuring that training and checking of the operator's operational safety critical personnel (other than flight crew) conducted by or for the operator is conducted in accordance with the operator's operations manual.

138.100 Qualifications and experience of head of training and checking

- (1) This regulation applies to an aerial work operator that is required by regulation 138.125 to have a training and checking system.
- (2) The head of training and checking must:
 - (a) be qualified to fly each kind of aerial work operation that the operator conducts; and
 - (b) hold the pilot type or class rating (within the meaning of Part 61) for the type or class of aircraft used to conduct the greatest proportion of the operator's aerial work operations; and
 - (c) have the experience required under subregulation (3); and
 - (d) have a satisfactory record in the conduct or management of air operations; and
 - (e) have sufficient safety and regulatory knowledge to enable the operator to conduct the operator's aerial work operations safely and in accordance with its operations manual and the civil aviation legislation.
- (3) For paragraph (2)(c), the experience required is:
 - (a) if the operator holds an approval under regulation 138.025 for this paragraph—the experience mentioned in paragraph (4)(a) or (b); or
 - (b) if paragraph (a) does not apply—the experience mentioned in paragraphs (4)(a) and (b).
- (4) For subregulation (3), the experience is the following:
 - (a) at least 300 hours flight time conducting training in an aircraft of the category used to conduct the greatest proportion of the operator's aerial work operations;
 - (b) at least 6 months experience in the conduct or management of air operations.
- (5) CASA may, by written notice given to a head of training and checking, or proposed head of training and checking, of an aerial work operator, direct the person to undertake an assessment mentioned in subregulation (6).
- (6) For subregulation (5), the assessment:

- (a) is an assessment conducted by CASA or a person nominated by CASA to demonstrate suitability as head of training and checking for the operator; and
- (b) may include assessment in an aircraft or flight simulation training device.

(7) In this regulation:

category has the meaning given by regulation 61.015.

138.105 Responsibilities of head of training and checking

- (1) This regulation applies to an aerial work operator that is required by regulation 138.125 to have a training and checking system.
- (2) The head of training and checking must safely manage the training and checking activities of the operator for the operator's flight crew.
- (3) Without limiting subregulation (2), the responsibilities of the head of training and checking include the following:
 - (a) ensuring that the operator complies with each provision of the civil aviation legislation that relates to the qualifications, training or checking of the operator's flight crew;
 - (b) reporting to the head of operations on the operator's compliance with the provisions mentioned in paragraph (a);
 - (c) ensuring that training and checking of flight crew conducted by the operator is conducted in accordance with the operator's training and checking manual;
 - (d) if the operator has a contract with a Part 142 operator for the Part 142 operator to conduct training or checking for the operator's flight crew:
 - (i) ensuring that each person who conducts the training or checking for the Part 142 operator is authorised under Part 61 to conduct the training or checking; and
 - (ii) ensuring that the training or checking is conducted in accordance with the aerial work operator's training and checking manual; and
 - (iii) telling the Part 142 operator, in writing, of any change in the aerial work operator's training and checking manual.

138.110 Experience of safety manager

- (1) This regulation applies to an aerial work operator that is required by regulation 138.140 to have a safety management system.
 - (2) The operator's safety manager must have:
 - (a) sufficient relevant experience in carrying out, or managing other persons in carrying out, air operations; and
 - (b) sufficient relevant safety management experience to capably lead, manage and set standards to enable the operator to safely implement its safety management system in accordance with its operations manual; and
 - (c) a satisfactory record in the conduct or management of air operations; and
-

Regulation 138.115

- (d) sufficient safety and regulatory knowledge to enable the operator to conduct the operator's aerial work operations safely and in accordance with its operations manual and the civil aviation legislation.

138.115 Responsibilities of safety manager

- (1) This regulation applies to an aerial work operator that is required by regulation 138.140 to have a safety management system.
- (2) The operator's safety manager must manage the operator's safety management system.
- (3) Without limiting subregulation (2), the responsibilities of the safety manager include:
 - (a) managing the operation of the safety management system including managing corrective, remedial and preventative action in relation to the system; and
 - (b) regularly reporting to the chief executive officer on the effectiveness of the safety management system; and
 - (c) managing the maintenance and continuous improvement of the safety management system.

138.120 Additional qualification and experience requirements for key personnel

- (1) This regulation applies to:
 - (a) an applicant for an aerial work certificate; or
 - (b) an aerial work operator.
- (2) CASA may, by written notice given to the applicant or operator, direct that any of the key personnel of the applicant or operator must have stated additional qualifications or experience to those otherwise required under this Subpart.
- (3) If satisfied that it is necessary in the interests of aviation safety, CASA may, by written notice given to a person who is, or is proposed to be, any of the key personnel of the applicant or operator, direct the person:
 - (a) to undertake a stated examination; or
 - (b) to be interviewed by CASA; or
 - (c) to complete a stated training course.
- (4) In deciding whether to give a direction under this regulation, CASA must have regard to, but is not limited to considering, the following:
 - (a) the need to ensure that the applicant or operator can conduct safe aerial work operations in accordance with its operations manual and the civil aviation legislation;
 - (b) the nature and complexity of the operations;
 - (c) the leadership, management and standards-setting skills required by the person for the operations;
 - (d) how recently the person has used the person's aviation skills;

- (e) whether the person is able to exercise the privileges of each civil aviation authorisation held by the person.

Division 138.B.5—Training and checking

138.125 Operators who are required to have a training and checking system

- (1) An aerial work operator who conducts one or more of the following must have a training and checking system:
 - (a) operations transporting marine pilots;
 - (b) operations in:
 - (i) multi-engine transport category rotorcraft with a maximum take-off weight of more than 3,175 kg; or
 - (ii) multi-engine aeroplanes with a maximum take-off weight of more than 5,700 kg; or
 - (iii) turbine-engine aeroplanes (other than turbine-engine propeller-driven aeroplanes);
 - (c) operations prescribed by the Part 138 Manual of Standards for the purposes of this paragraph.
- (2) Despite subregulation (1), an aerial work operator is not required to have a training and checking system for an aerial work operation conducted in an aeroplane or a rotorcraft if circumstances prescribed by the Part 138 Manual of Standards apply to the aeroplane or rotorcraft and the operation.
- (3) The training and checking system must meet the requirements of regulations 138.130 and 138.135.

138.130 Requirements for flight crew

- (1) This regulation applies to an operator of an aeroplane or a rotorcraft if the operator is required, under regulation 138.125, to have a training and checking system.
- (2) Despite subregulation (1), this regulation does not apply in relation to the following:
 - (a) for an operator that is also a Part 141 operator—training that is authorised Part 141 flight training for the operator;
 - (b) for an operator that is also a Part 142 operator—training or checking that is an authorised Part 142 activity for the operator.
- (3) The operator's training and checking for flight crew, including recurrent training and line checking, must include the matters mentioned in subregulation (4).
- (4) The training and checking system must include the following:
 - (a) a description of how the training and checking is conducted by or for the operator;
 - (b) an auditable system for maintaining records of the results of the training and checking;
 - (c) procedures that ensure that each of the operator's flight crew:

- (i) completes training and checking in accordance with the training and checking system; and
 - (ii) is supervised effectively during training and checking;
 - (d) a description of:
 - (i) the operator's requirement for conversion training for flight crew; and
 - (ii) how the operator manages conversion training for flight crew;
 - (e) a description of the operator's requirement for differences training for flight crew;
 - (f) any additional training required to familiarise a flight crew member with their duties;
 - (g) a description of how the operator assesses the competence of a flight crew member to perform the duties assigned to the member for a flight;
 - (h) the remedial training requirements for flight crew;
 - (i) if the operator has a contract with a person for the person to conduct training or checking of flight crew for the operator:
 - (i) details of the person; and
 - (ii) details of the training or checking covered by the contract; and
 - (iii) details of how the operator ensures that the person is complying with the operator's training and checking system;
 - (j) for each kind of aeroplane or rotorcraft operated by the operator:
 - (i) the number of flight hours of supervised line flying as pilot in command a pilot must complete on that kind of aeroplane or rotorcraft to be qualified as pilot in command for the aeroplane or rotorcraft; and
 - (ii) the number of flight hours of supervised line flying as co-pilot a pilot must complete on that kind of aeroplane or rotorcraft to be qualified as a co-pilot for the aeroplane or rotorcraft.
- (5) Without limiting paragraph (4)(a), the description must include the following:
 - (a) details of the training resources used in the training and checking;
 - (b) details of the persons conducting the training and checking;
 - (c) for each position in the operator's organisation the holder of which has managerial or operational responsibilities under the system:
 - (i) selection criteria for the position; and
 - (ii) the responsibilities of the position; and
 - (iii) details of the training, assessment and certification of competence that must be completed before the position-holder begins carrying out the position-holder's responsibilities;
 - (d) for each kind of training conducted by or for the operator—the minimum number of check pilots and the minimum crew qualifications required by the operator for the training (if any);
 - (e) for each kind of training conducted by or for the operator—a course outline, detailed syllabus, standards to be met and record forms;
 - (f) the requirements that a person conducting conversion training, other than flying training and training conducted in a flight simulator, must meet;

Regulation 138.135

- (g) training checklists (if any) and the circumstances when use of a training checklist is permitted;
- (h) a description of the normal line operation covered by a line check;
- (i) command responsibility during flights for training and checking;
- (j) any general restrictions, specifications or safety precautions for training and checking (including in relation to fuel load, ballast and minimum weather conditions);
- (k) methods of conducting training and checking sequences including the following:
 - (i) the standards to be achieved;
 - (ii) training sequences for common faults;
 - (iii) the method of simulating emergencies or malfunctions;
- (l) the procedure to be followed when a standard is not met;
- (m) details of how the operator will address matters of high risk that are identified by the operator's safety management system.

138.135 Requirements for other operational safety-critical personnel

- (1) The training and checking system must include the following in relation to operational safety-critical personnel who are not flight crew:
 - (a) a description of how training and checking, including recurrent training, for the personnel is conducted by or for the operator;
 - (b) an auditable system for maintaining records of the results of the training and checking;
 - (c) the circumstances in which training is required to familiarise a member of the personnel with their duties;
 - (d) the remedial training requirements for the personnel;
 - (e) if the operator has a contract with a person for the person to conduct the training or checking for the operator:
 - (i) details of the person; and
 - (ii) details of the training or checking covered by the contract; and
 - (iii) details of how the operator ensures that the person is complying with the operator's training and checking system;
 - (f) if any of the training or checking is conducted by a member of the personnel—a description of the operator's system for training and assessing such personnel.
- (2) Without limiting paragraph (1)(a), the description must include the following:
 - (a) any general restrictions, specifications or safety precautions for the training and checking;
 - (b) for each kind of training conducted by or for the operator—a course outline, detailed syllabus, standards to be met and record forms;
 - (c) the procedure to be followed when a standard is not met.

Division 138.B.6—Safety management system

138.140 Operators who are required to have a safety management system

- (1) An aerial work operator who conducts one or more of the following must have a safety management system:
 - (a) aerial work operations transporting marine pilots;
 - (b) operations in:
 - (i) multi-engine transport category rotorcraft with a maximum take-off weight of more than 3,175 kg; or
 - (ii) multi-engine aeroplanes with a maximum take-off weight of more than 5,700 kg; or
 - (iii) turbine-engine aeroplanes (other than turbine-engine propeller-driven aeroplanes);
 - (c) operations prescribed by the Part 138 Manual of Standards for the purposes of this paragraph.
- (2) Despite subregulation (1), an aerial work operator is not required to have a safety management system for an aerial work operation conducted in an aeroplane or a rotorcraft if circumstances prescribed by the Part 138 Manual of Standards apply to the aeroplane or rotorcraft and the operation.
- (3) The safety management system must meet the requirements of regulation 138.145.

138.145 Safety management system requirements

The safety management system must include the following matters:

- (a) a statement of the operator's safety policy and objectives, including details of the following:
 - (i) the management commitment to, and responsibility for, safety;
 - (ii) the safety accountabilities of managers (including key personnel);
 - (iii) the appointment of safety management personnel;
 - (iv) coordination of an emergency response plan;
 - (v) safety management system documentation;
- (b) a safety risk management process, including:
 - (i) hazard identification processes; and
 - (ii) safety risk assessment and mitigation processes;
- (c) a safety assurance system, including details of processes for:
 - (i) safety performance monitoring and measurement; and
 - (ii) management of change; and
 - (iii) continuous improvement of the safety management system;
- (d) a safety training and promotion system, including details of the following:
 - (i) safety management system training and education;
 - (ii) safety management system safety communication.

Division 138.B.7—Personnel fatigue management

138.150 Operators who are required to have a crew fatigue management system

- (1) This regulation applies to the operator of an aircraft for an aerial work operation whether or not the operator holds an aerial work certificate authorising the operation.
- (2) The aerial work operator must have a system for managing crew fatigue that meets the requirements prescribed by the Part 138 Manual of Standards for the purposes of this subregulation.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Division 138.B.8—Operations manuals

138.155 Content of operations manual

- (1) An operations manual for an aerial work operator must include the following:
 - (a) the operator's name (including any operating or trading name), contact details and ABN (if any);
 - (b) the address of:
 - (i) the operator's operational headquarters; and
 - (ii) each of the operator's main operating bases;
 - (c) a description and diagram of the operator's organisational structure showing formal reporting lines, including the formal reporting lines for each of the key personnel;
 - (d) if the operator is a corporation—a description of the operator's corporate structure;
 - (e) for each of the key personnel, the following information:
 - (i) the qualifications and experience (if any) required by the operator for the position in addition to the qualifications and experience required under Division 138.B.4 for the position;
 - (ii) each matter (if any) for which the holder of the position is responsible in addition to the responsibilities mentioned in Division 138.B.4 for the position;
 - (iii) the name of the person appointed to the position;
 - (iv) the name of each person (if any) authorised to carry out the responsibilities of the position when the position holder is absent from the position or cannot carry out the responsibilities;
 - (v) a description of how the operator will manage the responsibilities of the position during a circumstance mentioned in subparagraph (iv);
 - (f) each matter (if any) for which the chief executive officer is responsible and accountable in addition to the matters mentioned in regulation 138.085;
 - (g) an outline of the aerial work operations conducted by the operator under the operator's aerial work certificate;
 - (h) details of each plan, process, procedure, program and system implemented by the operator to safely conduct and manage their aerial work operations in compliance with the civil aviation legislation;
 - (i) for each registered aircraft operated by the operator under their aerial work certificate—the kind of aircraft;
 - (j) for each foreign registered aircraft operated by the operator under their aerial work certificate—the kind of aircraft and its nationality;
 - (k) a description of the arrangements for managing the continuing airworthiness of the aircraft used by the operator under its aerial work certificate;
 - (l) for operators that are not required to have a safety management system under regulation 138.140—a description of the operator's safety policy;
 - (m) a description of the operator's process for making changes, including:

Regulation 138.157

- (i) identifying changes that are significant changes; and
- (ii) identifying changes that are not significant changes; and
- (iii) telling CASA and the operator's personnel of the changes;
- (n) a description of anything else required to be approved by CASA under these Regulations in relation to the operations mentioned in paragraph (g);
- (o) any other matter required to be included in the operations manual under these Regulations.

Note: The plans, processes, procedures, programs and systems mentioned in paragraph (h) may be set out in one or more operator manuals.

- (2) An aerial work operator contravenes this subregulation if the operator's operations manual does not comply with subregulation (1).
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

138.157 Compliance with operations manual by operator

- (1) An aerial work operator contravenes this subregulation if the operator does not meet a requirement of the operator's operations manual.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

138.160 Compliance with operations manual by personnel

- (1) A member of an aerial work operator's personnel contravenes this subregulation if:
 - (a) the member is subject to a requirement in relation to an aircraft under the operator's operations manual; and
 - (b) the requirement relates to:
 - (i) the operation of the aircraft; or
 - (ii) the safety of the aircraft, or of a person on board the aircraft or in the vicinity of the aircraft; and
 - (c) the member does not meet the requirement.
- (2) An aerial work operator contravenes this subregulation if:
 - (a) a member of the aerial work operator's personnel is subject to a requirement in relation to an aircraft under the operator's operations manual; and
 - (b) the requirement relates to:
 - (i) the operation of the aircraft; or
 - (ii) the safety of the aircraft, or of a person on board the aircraft or in the vicinity of the aircraft; and

(c) the member does not meet the requirement.

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

138.165 Providing personnel with operations manual

- (1) An aerial work operator contravenes this subregulation if:
- (a) the operator's operations manual relates to a duty or responsibility of a person who is a member of the operator's personnel; and
 - (b) the operator does not make the part of the operations manual that relates to the duty or responsibility available to the person before the person first begins carrying out the duty or responsibility.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 138.B.9—Records and documents

138.170 Personnel training and checking records

- (1) An aerial work operator contravenes this subregulation if:
 - (a) a person who is a member of the operator’s personnel undertakes a training activity, obtains a qualification or certificate relating to aerial work operations or gains flying experience; and
 - (b) the following records are not made within 21 days after the person undertakes the activity, obtains the qualification or certificate or gains the flying experience:
 - (i) the date the activity was undertaken, the qualification or certificate obtained or the flying experience gained;
 - (ii) if the activity was training or a check, flight test, flight review or assessment of competency—whether the training, check, flight test, flight review or assessment was successfully completed.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

138.175 Availability of records

- (1) An aerial work operator contravenes this subregulation if:
 - (a) the operator makes a record about a person under regulation 138.170; and
 - (b) the person requests that the record be made available to the person; and
 - (c) the operator does not make the record available to the person within 7 days after receiving the request.
- (2) An aerial work operator contravenes this subregulation if:
 - (a) a record is made under regulation 138.170; and
 - (b) the operator receives a request from another aerial work operator for a copy of the record; and
 - (c) the operator holds a written authority from the person to whom the record relates to provide a copy of the person’s records to another aerial work operator if requested; and
 - (d) the operator does not give a copy of the record to the other aerial work operator within 7 days after receiving the request.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

138.180 Copies of flight crew licences and medical certificates

- (1) An aerial work operator contravenes this subregulation if:
-

Regulation 138.185

- (a) a person who is a flight crew member of the operator's personnel exercises a privilege of the person's flight crew licence for the operator; and
- (b) the operator does not have the following:
 - (i) a copy of the person's flight crew licence;
 - (ii) a copy of the person's medical certificate.

Note: A reference to a flight crew licence or medical certificate includes a certificate of validation of an overseas flight crew licence or overseas medical certificate: see the definitions of *flight crew licence* and *medical certificate* in Part 1 of the Dictionary.

- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

138.185 Retention periods for personnel records

- (1) An aerial work operator contravenes this subregulation if:
 - (a) the operator is required under regulation 138.170 to make a record about a member of the operator's personnel, other than a member mentioned in subregulation (2) of this regulation; and
 - (b) the operator does not keep the record for the period beginning when the record is created and ending 5 years after the member ceases to be a member of the operator's personnel.
- (2) An aerial work operator contravenes this subregulation if:
 - (a) the operator is required under regulation 138.170 to make a record about a member of the operator's personnel who carries out ground support duties; and
 - (b) the operator does not keep the record for the period beginning when the record is created and ending 1 year after the member ceases to be a member of the operator's personnel.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

Division 138.B.10—Miscellaneous

138.195 Reference library

- (1) An aerial work operator contravenes this subregulation if the operator does not maintain a reference library that complies with subregulation (2).
- (2) For subregulation (1), the reference library must:
 - (a) include the following documents:
 - (i) all operational documents and material;
 - (ii) the civil aviation legislation that is relevant to the operator's aerial work operations;
 - (iii) the parts of the AIP that are relevant to the operations;
 - (iv) documents that include information about each kind of aircraft operated, and each kind of aerial work operation conducted, by the operator;
 - (v) any other material required for the reference library by the operator's operations manual; and
 - (b) be readily available to all members of the operator's personnel; and
 - (c) be up-to-date and in a readily accessible form; and
 - (d) include a system for notifying the operator's personnel of any updates to the documents mentioned in paragraph (a).
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

138.200 Maximum period for use of foreign registered aircraft in Australian territory

- (1) An aerial work operator contravenes this subregulation if, in a period mentioned in subregulation (2), the operator uses a particular foreign registered aircraft to conduct aerial work operations in Australian territory on a consecutive number of days during that period that is more than:
 - (a) 90; or
 - (b) if the operator holds an approval under regulation 138.025 in relation to the aircraft—the number mentioned in the approval for the aircraft.
- (2) The periods are:
 - (a) the 12 month period from the day the foreign registered aircraft first becomes available to conduct the aerial work operations in Australian territory; and
 - (b) each subsequent 12 month period.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Subpart 138.C—General

Division 138.C.1—General flight limitations

138.205 Permitted categories of aircraft for aerial work operations

- (1) The operator of an aircraft contravenes this subregulation if:
 - (a) the aircraft is operated for a flight involving an aerial work operation; and
 - (b) if the operation is covered by subregulation (2)—the aircraft is not type certificated in the normal, commuter or transport category; and
 - (c) if the operation is not covered by subregulation (2)—the aircraft is not type certificated in the normal, commuter, transport, restricted or utility category.
- (2) An operation is covered by this subregulation if the operation is one in which the aircraft carries an aerial work passenger.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 138.C.2—Operational documents

138.210 Compliance with flight manual

- (1) This regulation applies to the operator of an aircraft for an aerial work operation whether or not the operator holds an aerial work certificate.
- (2) The operator and the pilot in command of an aircraft for a flight involving an aerial work operation each contravene this subregulation if the aircraft is operated in a way during the flight that does not meet a requirement or limitation that:
 - (a) is set out in the aircraft flight manual instructions for the aircraft; and
 - (b) relates to the operation of the aircraft.
- (3) Subregulation (2) does not apply to a limitation or requirement if circumstances prescribed by the Part 138 Manual of Standards apply to the aircraft for the flight.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (3): see subsection 13.3(3) of the *Criminal Code*.

138.215 Availability of checklists

- (1) The operator of an aircraft for a flight involving an aerial work operation contravenes this subregulation if the requirement mentioned in subregulation (2) is not met.
- (2) The requirement is that, before a crew member for the aircraft begins to carry out a duty of the crew member's position, the operator must make each checklist of normal, abnormal and emergency procedures for the aircraft that is relevant to the duty available to the crew member.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 138.C.3—Flight related documents

138.220 Electronic documents

To avoid doubt, if a document is required to be carried on a flight of an aircraft under this Division, that requirement is taken to be satisfied if an electronic copy of the document is carried on the flight.

Note: Electronic copies may not satisfy the requirements of the law of a foreign country for flights that begin or end at an aerodrome outside Australian territory.

138.225 Availability of parts of operations manual

- (1) The operator of an aircraft for a flight contravenes this subregulation if the following parts of the aircraft operator's operations manual are not available to a crew member for the flight before the flight begins:
 - (a) a part that is relevant to the duties of the crew member for the flight;
 - (b) a part that is required for the conduct of the flight.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 138.C.4—Reporting and recording defects and incidents etc.

138.230 Procedures for reporting and recording defects etc.

An aerial work operator's operations manual must include procedures for the reporting and recording by a flight crew member for a flight of the aircraft of any of the following that occur during the flight:

- (a) an abnormal instrument indication;
- (b) abnormal behaviour by the aircraft;
- (c) exceedence of an operating limit specified in the aircraft flight manual instructions for the aircraft;
- (d) a defect in the aircraft.

Note: For other provisions dealing with aircraft defects, see Part 42 and regulation 37 of CAR.

138.235 Reporting and recording incidents

An aerial work operator's operations manual must include procedures for the reporting and recording by crew members of incidents relating to a flight of an aircraft for an aerial work operation that endanger, or could endanger, the safe operation of the aircraft.

Part 138 Aerial work operations

Subpart 138.C General

Division 138.C.5 Search and rescue services and emergency and survival equipment

Division 138.C.5—Search and rescue services and emergency and survival equipment

Note: This Division is reserved for future use.

Division 138.C.6—Miscellaneous requirements

Note: This Division is reserved for future use.

Part 138 Aerial work operations
Subpart 138.D Operational procedures
Division 138.D.1 Operational control

Subpart 138.D—Operational procedures

Division 138.D.1—Operational control

Note: This Division is reserved for future use.

Division 138.D.2—Flight preparation

138.265 Flight preparation requirements

An aerial work operator's operations manual must include procedures for complying with the following for a flight of an aircraft involving an aerial work operation:

- (a) the flight preparation (weather assessments) requirements;
- (b) the flight preparation (alternate aerodromes) requirements.

Division 138.D.3—Flight planning

138.270 Availability of flight planning information

- (1) The operator of an aircraft for a flight involving an aerial work operation contravenes this subregulation if a requirement mentioned in subregulation (2) is not met for the flight.
- (2) The requirements are the following:
 - (a) the pilot in command of the aircraft must have access to the information mentioned in subregulation (3) before and during the flight;
 - (b) each person in the operator's organisation who is responsible for flight planning for the flight must have access to the information mentioned in subregulation (3) before the flight;
 - (c) each person in the operator's organisation who is responsible for flight replanning for the flight must have access to the information mentioned in subregulation (3) during the flight;
 - (d) each person in the operator's organisation who exercises operational control for the flight must have access to the information mentioned in subregulation (3) before and during the flight.
- (3) The information is the following:
 - (a) authorised weather forecasts and authorised weather reports:
 - (i) in relation to the flight; and
 - (ii) if a destination alternate aerodrome is required for the flight by the flight planning (alternate aerodromes) requirements—in relation to the destination alternate aerodrome;
 - (b) NOTAMs for the flight.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Division 138.D.4—Flight rules

138.275 Minimum height rules

Regulation 91.265, 91.267, 91.277 or 91.305 does not apply to a pilot in command of an aircraft for a flight involving an aerial work operation if:

- (a) circumstances prescribed by the Part 138 Manual of Standards for the purposes of this paragraph apply to the aircraft and the operation; or
- (b) requirements prescribed by the Part 138 Manual of Standards for the purposes of this paragraph are complied with in relation to the flight.

Division 138.D.5—Take-offs and landings

138.280 Procedures for safety at aerodromes

An aerial work operator's operations manual must include procedures to ensure the safety of persons in the vicinity of an aircraft when any of the following circumstances apply:

- (a) a person is embarking or disembarking the aircraft;
- (b) the aircraft is being loaded or unloaded;
- (c) the aircraft is on the ground with its engine or engines running;
- (d) the aircraft is landing or taking off at an aerodrome that is not a certified aerodrome.

Division 138.D.6—Fuel requirements

138.285 Fuel procedures

An aerial work operator's operations manual must include procedures to ensure that a flight of an aircraft operated by the operator is conducted in accordance with the requirements mentioned in subregulation 91.455(1).

138.290 Oil requirements

- (1) The operator and the pilot in command of an aircraft for a flight each contravene this subregulation if, when the flight begins, the aircraft is not carrying sufficient oil to complete the flight safely.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

138.300 Hot fuelling

- (1) The operator and the pilot in command of an aircraft for a flight each contravene this subregulation if:
 - (a) the aircraft is hot fuelled; and
 - (b) the following are not set out in the aircraft flight manual instructions for the aircraft or the operator's operations manual:
 - (i) procedures for the hot fuelling of the aircraft;
 - (ii) the circumstances in which the aircraft can be hot fuelled;
 - (iii) procedures to be followed if an emergency occurs during hot fuelling;
 - (iv) procedures to ensure a person involved in hot fuelling the aircraft is trained and competent to be involved in hot fuelling the aircraft.
- (2) The pilot in command of an aircraft for a flight contravenes this subregulation if:
 - (a) a requirement of a procedure mentioned in subparagraph (1)(b)(i), (iii) or (iv) is not met in relation to the hot fuelling of the aircraft for the flight; or
 - (b) the aircraft is hot fuelled in a circumstance that is not mentioned in subparagraph (1)(b)(ii).
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

138.302 Fuelling safety procedures

- (1) An aerial work operator's operations manual must include the following in relation to an aircraft operated by the operator:
 - (a) procedures to ensure the aircraft is fuelled safely;

Regulation 138.302

- (b) procedures relating to the safety of:
 - (i) any aerial work passengers; and
 - (ii) crew members other than air crew members, cabin crew members or flight crew members;
who are embarking or disembarking, or on board, the aircraft during fuelling, including the procedures mentioned in subregulation (2);
 - (c) if the operator permits a person to operate low-risk electronic devices inside the cabin of the aircraft while the aircraft is being fuelled—
procedures to ensure that, before an engine of the aircraft is started, any effects of radio frequency emissions from those devices have been corrected.
- (2) For the purposes of paragraph (1)(b), the procedures must include the normal, emergency and communication procedures to be followed by the following persons:
- (a) any air crew members;
 - (b) any cabin crew members;
 - (c) any flight crew members who are on duty in the cockpit of the aircraft;
 - (d) any of the operator's personnel who carry out a ground support duty for a flight of the aircraft.

Division 138.D.7—Carriage of passengers or cargo

138.305 Carriage of passengers—general

- (1) This regulation applies to the operator of an aircraft for an aerial work operation whether or not the operator holds an aerial work certificate authorising the operation.
- (2) A person contravenes this subregulation if:
 - (a) the person is the operator, or the pilot in command, of an aircraft for a flight involving an aerial work operation; and
 - (b) a passenger is carried on the aircraft for the flight; and
 - (c) any of the following circumstances exist in relation to the flight:
 - (i) the passenger is not an aerial work passenger;
 - (ii) when the passenger is carried on the aircraft, the operator of the flight does not hold an aerial work certificate authorising the operation;
 - (iii) when the passenger is carried on the aircraft, the operator's operations manual does not include procedures to ensure the safety of the passenger;
 - (iv) any requirements about carrying the passenger that are prescribed by the Part 138 Manual of Standards for the purposes of this subparagraph are not met.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

138.320 Procedures for carriage of restricted persons

An aerial work operator's operations manual must state whether or not the operator will carry restricted persons as part of aerial work operations.

Division 138.D.8—Instruments, indicators, equipment and systems

138.340 Head-up displays, enhanced vision systems and synthetic vision systems

- (1) This regulation applies to an aircraft for a flight involving an aerial work operation if:
 - (a) the aircraft is fitted with any of the following systems:
 - (i) a head-up display;
 - (ii) an enhanced vision system;
 - (iii) a synthetic vision system; and
 - (b) the flight is:
 - (i) an IFR flight; or
 - (ii) a VFR flight at night.
- (2) An aerial work operator's operations manual must include the following:
 - (a) procedures for using each system mentioned in paragraph (1)(a) that is fitted to an aircraft for a flight mentioned in paragraph (1)(b);
 - (b) procedures for conducting such a flight without an element of the system, for use if the element is inoperative.

138.345 Survival equipment procedures

- (1) This regulation applies to a flight of an aircraft if:
 - (a) the flight is in or through an area prescribed as a remote area by the Part 91 Manual of Standards; or
 - (b) the aircraft is required, under Subpart 138.K, to carry a life raft for the flight.
- (2) If an aircraft is, or will be, used to conduct a flight to which this regulation applies, an aerial work operator's operations manual must include the following:
 - (a) procedures for determining the survival equipment required for the area in or through which the flight will be conducted;
 - (b) for a flight mentioned in paragraph (1)(b)—procedures for determining the pyrotechnic signalling devices required to ensure the distress signals, set out in Appendix 1 to Annex 2, *Rules of the Air*, to the Chicago Convention, can be made.

138.350 NVIS flights

- (1) This regulation applies to a flight of an aircraft if:
 - (a) the flight involves use of a night vision imaging system; and
 - (b) the flight is:
 - (i) an IFR flight; or
 - (ii) a VFR flight at night.
 - (2) An aerial work operator's operations manual must include the following:
-

Regulation 138.350

- (a) procedures for using a night vision imaging system during a flight to which subregulation (1) applies;
 - (b) procedures for conducting such a flight without an element of a night vision imaging system, for use if the element is inoperative.
- (3) The Part 138 Manual of Standards may prescribe requirements for the use of a night vision imaging system for a flight of an aircraft.
- (4) The operator and the pilot in command of an aircraft for a flight each contravene this subregulation if:
- (a) a night vision imaging system is used during the flight; and
 - (b) a requirement mentioned in subregulation (3) is not met for the flight.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (4).

Penalty: 50 penalty units.

Division 138.D.9—Miscellaneous

138.370 Operator must conduct risk assessments

- (1A) This regulation applies to the operator of an aircraft for an aerial work operation whether or not the operator holds an aerial work certificate authorising the operation.
- (1) The Part 138 Manual of Standards may prescribe requirements relating to:
- (a) risk criteria that must be met to conduct an aerial work operation; and
 - (b) risk assessment and mitigation processes to be undertaken before conducting an aerial work operation.
- (2) The operator of an aircraft for a flight involving an aerial work operation contravenes this subregulation if:
- (a) a requirement mentioned in subregulation (1) applies for the flight; and
 - (b) the requirement is not met for the flight.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

138.375 Wearing of seatbelts and other restraint devices

- (1) The Part 138 Manual of Standards may prescribe requirements relating to the wearing of seatbelts or other restraint devices during aerial work operations.
- (2) A person contravenes this subregulation if:
- (a) the person is subject to a requirement mentioned in subregulation (1); and
 - (b) the person does not comply with the requirement.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

138.380 Procedures in relation to frost etc.

An aerial work operator's operations manual must include the following:

- (a) procedures for the inspection of the aircraft by the pilot in command before a flight for which frost or freezing conditions exist or are forecast;
- (b) procedures for carrying out de-icing and anti-icing measures before a flight for which these measures are necessary;
- (c) procedures for using de-icing and anti-icing equipment during a flight.

138.385 Procedures in relation to polar operations

- (1) This regulation applies to an aircraft if it is used to conduct a flight to or from an aerodrome in a polar region.
- (2) The aerial work operator's operations manual must include procedures for the following:
 - (a) monitoring and dealing with fuel freezing;
 - (b) ensuring communication capability for the duration of an operation that includes a flight mentioned in subregulation (1);
 - (c) training the aircraft's flight crew in polar operations;
 - (d) ensuring that maintenance personnel who will carry out maintenance on the aircraft in a polar region are appropriately trained;
 - (e) mitigating crew member and aerial work passenger exposure to cosmic radiation during solar flare activity;
 - (f) if the aircraft will not be flown over water during a flight mentioned in subregulation (1) and it is reasonably likely a normal or emergency landing will expose persons on the aircraft to the polar environment in a location without support personnel immediately available—ensuring that each person on the aircraft will wear a serviceable, cold-weather, anti-exposure suit;
 - (g) if the aircraft will be flown over water during a flight mentioned in subregulation (1) and it is reasonably likely that an emergency landing will expose the persons on the aircraft to a landing on or in water—ensuring that each person on the aircraft will wear an immersion suit that is appropriate for the temperatures in which the flight will be conducted;
 - (h) dealing with emergency landings, or instruments, indicators, equipment or systems becoming inoperative, while the aircraft is away from the base for an operation that includes a flight mentioned in subregulation (1).

Division 138.D.10—Rules for external load operations

138.400 Certain night operations prohibited unless operation is an emergency service operation or approved by CASA

- (1A) This regulation applies to the operator of an aircraft for an aerial work operation whether or not the operator holds an aerial work certificate authorising the operation.
- (1) The operator and the pilot in command of an aircraft for a flight involving an aerial work operation each contravene this subregulation if:
- (a) the operation is an external load operation at night; and
 - (b) the operation is not conducted as part of an emergency service operation; and
 - (c) the requirement in subregulation (2) is not met.
- (2) The requirement is that the operator must hold an approval under regulation 138.025 to conduct the operation at night.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

138.410 Manual of Standards may prescribe requirements for external load operations

- (1) This regulation applies to the operator of an aircraft for an aerial work operation whether or not the operator holds an aerial work certificate.
- (2) The Part 138 Manual of Standards may prescribe requirements relating to flights of aircraft involving external load operations.
- (3) Without limiting subregulation (2), the Part 138 Manual of Standards may prescribe classes of external loads.
- (4) The pilot in command of an aircraft for a flight contravenes this subregulation if:
- (a) the pilot is subject to a requirement mentioned in subregulation (2) for the flight; and
 - (b) the requirement is not met for the flight.
- (5) The operator of an aircraft for a flight contravenes this subregulation if:
- (a) the operator is subject to a requirement mentioned in subregulation (2) for the flight; and
 - (b) the requirement is not met for the flight.
- (6) A person commits an offence of strict liability if the person contravenes subregulation (4) or (5).

Penalty: 50 penalty units.

Division 138.D.11—Rules for dispensing operations

138.425 Manual of Standards may prescribe requirements for dispensing operations

- (1) This regulation applies to the operator of an aircraft for an aerial work operation whether or not the operator holds an aerial work certificate.
- (2) The Part 138 Manual of Standards may prescribe requirements relating to dispensing operations.
- (3) The pilot in command of an aircraft for a flight contravenes this subregulation if:
 - (a) the pilot is subject to a requirement mentioned in subregulation (2) for the flight; and
 - (b) the requirement is not met for the flight.
- (4) The operator of an aircraft for a flight contravenes this subregulation if:
 - (a) the operator is subject to a requirement mentioned in subregulation (2) for the flight; and
 - (b) the requirement is not met for the flight.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (3) or (4).

Penalty: 50 penalty units.

Division 138.D.12—Rules for task specialist operations

138.430 Manual of Standards may prescribe requirements for task specialist operations

- (1) This regulation applies to the operator of an aircraft for an aerial work operation whether or not the operator holds an aerial work certificate.
- (2) The Part 138 Manual of Standards may prescribe requirements relating to flights of aircraft involving task specialist operations.
- (3) The pilot in command of an aircraft for a flight involving an aerial work operation contravenes this subregulation if:
 - (a) the pilot is subject to a requirement mentioned in subregulation (2) for the flight; and
 - (b) the requirement is not met for the flight.
- (4) The operator of an aircraft for a flight involving an aerial work operation contravenes this subregulation if:
 - (a) the operator is subject to a requirement mentioned in subregulation (2) for the flight; and
 - (b) the requirement is not met for the flight.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (3) or (4).

Penalty: 50 penalty units.

138.432 Possessing and discharging firearms

- (1) This regulation applies to the operator of an aircraft for an aerial work operation whether or not the operator holds an aerial work certificate authorising the operation.
- (2) The operator and the pilot in command of an aircraft for a flight involving an aerial work operation each contravene this subregulation if:
 - (a) either or both of the following apply for the flight:
 - (i) a person carries or otherwise possesses a firearm on an aircraft;
 - (ii) a person discharges a firearm while on an aircraft; and
 - (b) a requirement prescribed by the Part 138 Manual of Standards for the purposes of this paragraph is not met for the flight.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

- (4) This regulation applies despite regulations 91.160, 91.165 and 91.190.

Subpart 138.F—Performance

138.435 Take-off performance

- (1) This regulation applies to the operator of an aircraft for an aerial work operation whether or not the operator holds an aerial work certificate authorising the operation.
- (2) The Part 138 Manual of Standards may prescribe requirements relating to take-off performance for a flight of an aircraft.
- (3) Without limiting subregulation (2), the Part 138 Manual of Standards may prescribe requirements that relate to one or more of the following:
 - (a) the kinds of operations to be carried out during the flight;
 - (b) characteristics of the aerodrome at which the aircraft takes off;
 - (c) characteristics of the route flown by the aircraft;
 - (d) characteristics of the aerodrome at which the aircraft lands.
- (4) The pilot in command of an aircraft for a flight contravenes this subregulation if:
 - (a) the pilot is subject to a requirement mentioned in subregulation (2) for the flight; and
 - (b) the requirement is not met for the flight.
- (5) The operator of an aircraft for a flight contravenes this subregulation if:
 - (a) the operator is subject to a requirement mentioned in subregulation (2) for the flight; and
 - (b) the requirement is not met for the flight.
- (6) A person commits an offence of strict liability if the person contravenes subregulation (4) or (5).

Penalty: 50 penalty units.

138.440 Landing performance

- (1) This regulation applies to the operator of an aircraft for an aerial work operation whether or not the operator holds an aerial work certificate authorising the operation.
- (2) The Part 138 Manual of Standards may prescribe requirements relating to landing performance for a flight of an aircraft.
- (3) Without limiting subregulation (2), the Part 138 Manual of Standards may prescribe requirements relating to one or more of the following:
 - (a) the aircraft's configuration;
 - (b) the operation of any equipment for the flight;
 - (c) characteristics of the aerodrome at which the aircraft lands;

Regulation 138.440

- (d) safety factor percentages to be applied.
- (4) The pilot in command of an aircraft for a flight contravenes this subregulation if:
 - (a) the pilot is subject to a requirement mentioned in subregulation (2) for the flight; and
 - (b) the requirement is not met for the flight.
- (5) The operator of an aircraft for a flight contravenes this subregulation if:
 - (a) the operator is subject to a requirement mentioned in subregulation (2) for the flight; and
 - (b) the requirement is not met for the flight.
- (6) A person commits an offence of strict liability if the person contravenes subregulation (4) or (5).

Penalty: 50 penalty units.

Subpart 138.J—Weight and balance

138.450 Loading of aircraft

- (1) This regulation applies to the operator of an aircraft for an aerial work operation whether or not the operator holds an aerial work certificate.
- (2) The operator and the pilot in command of an aircraft for a flight involving an aerial work operation each contravene this subregulation if, when the flight begins, the aircraft is loaded in a way that contravenes the aircraft's weight and balance limits.
- (3) The operator and the pilot in command of an aircraft for a flight involving an aerial work operation each contravene this subregulation if, during the flight, the aircraft ceases to be loaded in accordance with the aircraft's weight and balance limits.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (2) or (3).

Penalty: 50 penalty units.

138.460 Weight and balance documents

- (1) The Part 138 Manual of Standards may prescribe the weight and balance documents that are required for flights involving aerial work operations, and requirements in relation to those documents.
- (2) The operator and the pilot in command of an aircraft for a flight involving an aerial work operation each contravene this subregulation if, when the flight begins:
 - (a) weight and balance documents for the flight are required by the Part 138 Manual of Standards; and
 - (b) either:
 - (i) there are no weight and balance documents for the flight; or
 - (ii) the weight and balance documents for the flight do not comply with the requirements prescribed by the Part 138 Manual of Standards.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 50 penalty units.

Subpart 138.K—Equipment

138.465 Requirements relating to equipment

- (1) This regulation applies to the operator of an aircraft for an aerial work operation whether or not the operator holds an aerial work certificate authorising the operation.
- (2) The Part 138 Manual of Standards may prescribe requirements relating to:
 - (a) the fitment and non-fitment of equipment to an aircraft; and
 - (b) the carrying of equipment on an aircraft; and
 - (c) equipment that is fitted to, or carried on, an aircraft.
- (3) A person contravenes this subregulation if:
 - (a) the person is subject to a requirement mentioned in subregulation (2); and
 - (b) the requirement is not met.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (3).

Penalty: 50 penalty units.

Subpart 138.N—Flight crew

138.475 Composition, number, qualifications and training

- (1A) This regulation applies to the operator of an aircraft for an aerial work operation whether or not the operator holds an aerial work certificate authorising the operation.
- (1) The operator of an aircraft for a flight involving an aerial work operation contravenes this subregulation if, when the flight begins, a requirement mentioned in subregulation (2) is not met.
- (2) The requirements are as follows:
- (a) the composition of the aircraft's flight crew for the flight must comply with the aircraft flight manual instructions for the aircraft;
 - (b) if the aerial work operation is one for which the operator's operations manual requires the carriage of additional flight crew members—the flight crew must include the additional flight crew members;
 - (c) each flight crew member must:
 - (i) if the aircraft is an Australian aircraft—be authorised to pilot the aircraft during the flight under Part 61; or
 - (ii) if the aircraft is a foreign registered aircraft—be authorised to pilot the aircraft during the flight by the aircraft's State of registry;
 - (f) each flight crew member must meet the training and checking requirements for the flight crew member and the flight mentioned in subregulation (3).
- (3) The Part 138 Manual of Standards may prescribe requirements relating to training and checking that must be completed by a flight crew member for a flight.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

138.480 Training for new or inexperienced flight crew members

An aerial work operator's operations manual must include the requirements that must be met for new or inexperienced flight crew members to be assigned to duty on the aircraft for an aerial work operation conducted by the operator.

138.485 Competence

- (1) The operator of an aircraft for a flight involving an aerial work operation contravenes this subregulation if:
- (a) the operator assigns a person to duty as a flight crew member for the flight; and

Regulation 138.490

(b) the person has not been assessed by the operator as competent to perform the duties assigned to the person for the flight in accordance with the operator's operations manual.

- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

138.490 Assignment to duty of pilot in command

- (1) The operator of an aircraft for a flight involving an aerial work operation contravenes this subregulation if, when the flight begins, none of the pilots assigned as flight crew members for the flight is assigned to duty as the pilot in command of the aircraft for the flight.

- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

138.500 Qualification as pilot in command

- (1A) This regulation applies to the operator of an aircraft for an aerial work operation whether or not the operator holds an aerial work certificate authorising the operation.

- (1) A pilot is qualified as pilot in command of an aircraft for a flight involving an aerial work operation if:

(a) the pilot is:

- (i) if the aircraft is an Australian aircraft—authorised under Part 61 to carry out, in relation to the flight, the duties assigned to the pilot by the operator of the flight; or
(ii) if the aircraft is a foreign registered aircraft—authorised by the aircraft's State of registry to carry out, in relation to the flight, the duties assigned to the pilot by the operator of the flight; and

(b) the pilot has the qualifications and experience required by the operator's operations manual (if any) for the flight; and

(c) the pilot has the qualifications and experience prescribed by the Part 138 Manual of Standards for the flight.

- (2) The pilot in command of an aircraft for a flight involving an aerial work operation contravenes this subregulation if:

(a) the pilot performs a duty as pilot in command for the flight; and

(b) the pilot is not qualified under subregulation (1) as pilot in command for the flight.

- (2A) The operator of an aircraft for a flight involving an aerial work operation contravenes this subregulation if:

Regulation 138.505

- (a) the operator assigns a pilot to duty as pilot in command of the aircraft for the flight; and
 - (b) the pilot is not qualified under subregulation (1) as pilot in command for the flight.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2) or (2A).

Penalty: 50 penalty units.

138.505 Training and checking to be conducted by certain persons

- (1) The operator of an aircraft contravenes this subregulation if:
- (a) a flight crew member of the operator's personnel undertakes training or a check mentioned in this Subpart; and
 - (b) the training or check is conducted other than in accordance with subregulation (2).
- (2) The training or check must be conducted by:
- (a) an individual who:
 - (i) is engaged by the operator (whether by contract or other arrangement) to conduct the training or check; and
 - (ii) meets the requirements prescribed by the Part 138 Manual of Standards; or
 - (b) a Part 142 operator with which the operator has a contract for the Part 142 operator to conduct the training or check for the operator.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Subpart 138.P—Air crew members and task specialists

Division 138.P.1—Air crew members

138.535 Application of Division 138.P.1

This Division applies in relation to an operator of an aircraft for a flight involving an aerial work operation if an air crew member is carried on the aircraft for the flight.

138.540 Composition, number, qualifications and training

- (1) The operator of an aircraft for a flight involving an aerial work operation contravenes this subregulation if, when the flight begins, a requirement mentioned in subregulation (2) is not met.
- (2) The requirements are as follows:
 - (a) if the aerial work operation is one for which the operator's operations manual requires the carriage of air crew members—those air crew members must be carried on the flight;
 - (b) each air crew member must meet the training and checking requirements for the air crew member and the flight mentioned in subregulation (3).
- (3) The Part 138 Manual of Standards may prescribe requirements relating to training and checking that must be completed by an air crew member for a flight.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

138.550 Training and checking to be conducted by certain persons

- (1) The operator of an aircraft contravenes this subregulation if:
 - (a) an air crew member of the operator's personnel undertakes training or a check mentioned in this Subpart; and
 - (b) the training or check is conducted other than in accordance with subregulation (2).
- (2) The training or check must be conducted by an individual:
 - (a) who is engaged by the operator (whether by contract or other arrangement) to conduct the training or check; and
 - (b) who meets the requirements prescribed by the Part 138 Manual of Standards.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Part 138 Aerial work operations
Subpart 138.P Air crew members and task specialists
Division 138.P.1 Air crew members

Regulation 138.550

Penalty: 50 penalty units.

Division 138.P.2—Task specialists

138.575 Application of Division 138.P.2

This Division applies in relation to an operator of an aircraft for a flight involving an aerial work operation if a task specialist is carried on the aircraft for the flight.

138.580 Qualifications and training

- (1) The operator of an aircraft for a flight involving an aerial work operation contravenes this subregulation if, when the flight begins, a requirement mentioned in subregulation (2) is not met.
- (2) The requirements are as follows:
 - (a) if the aerial work operation is one for which the operator's operations manual requires the carriage of task specialists—those task specialists must be carried on the flight;
 - (b) each task specialist must meet the training and checking requirements for the task specialist and the flight mentioned in subregulation (3).
- (3) The Part 138 Manual of Standards may prescribe requirements relating to training and checking that must be completed by a task specialist for a flight.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

138.590 Training and checking to be conducted by certain persons

- (1) The operator of an aircraft contravenes this subregulation if:
 - (a) a task specialist of the operator's personnel undertakes training or a check mentioned in this Subpart; and
 - (b) the training or check is conducted other than in accordance with subregulation (2).
- (2) The training or check must be conducted by an individual:
 - (a) who is engaged by the operator (whether by contract or other arrangement) to conduct the training or check; and
 - (b) who meets the requirements prescribed by the Part 138 Manual of Standards.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Part 139—Aerodromes

Table of contents

Subpart 139.A—Preliminary

- 139.001 Simplified outline of this Part
- 139.005 Issue of Manual of Standards for Part 139
- 139.010 Approvals by CASA for Part 139
- 139.015 Effect on operation of other laws

Subpart 139.B—Aerodrome certificates

- 139.020 Application for aerodrome certificate
- 139.025 When aerodromes are required to have an aerodrome certificate
- 139.030 Grant of aerodrome certificate
- 139.035 Suspension or cancellation of aerodrome certificate by CASA
- 139.040 Notification requirement if aerodrome ceases to be certified

Subpart 139.C—Operation and maintenance of a certified aerodrome

Division 139.C.1—Aerodrome manual

- 139.045 Requirement to have aerodrome manual
- 139.050 Amendments of aerodrome manual
- 139.055 Compliance with aerodrome manual
- 139.060 Notice of non-compliance with aerodrome manual

Division 139.C.2—Aerodrome facilities and equipment

- 139.065 Aerodrome facilities and equipment
- 139.070 Planning and carrying out aerodrome works

Division 139.C.3—Aerodrome inspections, monitoring and reporting

- 139.075 Aerodrome inspections
- 139.080 Reporting information to AIS providers
- 139.085 Reporting changes or occurrences at aerodromes
- 139.090 Monitoring airspace and reporting infringements

Division 139.C.4—Safety management, emergency preparedness and other systems

- 139.095 Safety management systems and risk management plans
- 139.100 Emergency preparedness and aerodrome emergency plans
- 139.105 Other aerodrome systems

Division 139.C.5—Aerodrome personnel

- 139.110 Aerodrome personnel
- 139.115 Training etc. of aerodrome personnel
- 139.120 Aerodrome personnel carrying out responsibilities

Division 139.C.6—Aerodrome ground surveillance systems

- 139.125 Condition on aerodrome certificate to operate aerodrome ground surveillance system
- 139.130 Requirements for aerodrome ground surveillance systems

Division 139.C.7—Other matters

- 139.135 Access to aerodromes to conduct tests
- 139.140 Requests for data from aerodrome operator
- 139.145 Requests for data from ATS providers

Subpart 139.D—Aerodrome radiocommunication services**Division 139.D.1—Frequency confirmation system**

- 139.150 Frequency confirmation systems for aerodromes

Division 139.D.2—Air/ground radio service

- 139.155 Air/ground radio service must be approved
- 139.160 Requirements for operating certified air/ground radio service

Subpart 139.E—Hazards to aircraft operations**Division 139.E.1—Notifying potential hazards**

- 139.165 Notifying CASA of certain proposed objects or structures
- 139.170 Notifying CASA of activities that create certain emissions sources

Division 139.E.2—Determination of hazards

- 139.175 Determination that certain existing objects, structures or emissions sources are a hazard to aircraft operations
- 139.180 Determination that certain proposed objects, structures or emissions sources are a hazard to aircraft operations
- 139.185 Kinds of objects, structures or emissions sources that may be hazards

- 139.710 Functions of ARFFS
- 139.711 Person not to provide service without approval
- 139.712 Issue of Manual of Standards
- 139.715 Effect of Manual of Standards

Division 139.H.3—Requirements to be complied with by ARFFS provider

- 139.750 Requirements in this Division
 - 139.755 Definition for Division—*applicable standards and requirements*
 - 139.760 Inconsistency between Manual and chapter 9 of Annex 14
 - 139.765 Knowledge, equipment and expertise to deal with aviation hazards
 - 139.770 General obligation to maintain service
 - 139.771 Response time of ARFFS
 - 139.772 Buildings and emergency facilities
-

- 139.773 Officer in charge
- 139.775 Notice about times service is available etc
- 139.780 Agreements with other fire fighting bodies
- 139.785 Stock of fire extinguishing agents
- 139.795 Extinguishing equipment and vehicles
- 139.800 Other vehicles and equipment
- 139.805 Vehicles and equipment for firefighting and rescue in difficult environments
- 139.810 Commissioning of certain equipment
- 139.815 Protective clothing and equipment
- 139.820 Communications
- 139.825 Test and maintenance equipment
- 139.830 Commissioning of new vehicles and equipment
- 139.835 Number of operating personnel
- 139.840 Medical standard of firefighters
- 139.845 Qualifications and training of firefighters
- 139.850 Operations manual
- 139.855 Amendment of operations manual
- 139.860 Voice data recording
- 139.865 Record of accidents or incidents
- 139.870 Contingency plan
- 139.875 Records management
- 139.880 Organisation
- 139.885 System for rectification of service failures
- 139.890 Quality control
- 139.895 Change management
- 139.900 Safety management
- 139.905 Applicant's organisation
- 139.910 Telling users and CASA about changes

Division 139.H.4—Conduct of ARFFS operations

- 139.915 Powers of officer in charge or firefighter

Division 139.H.5—Administration

- 139.920 Definition for Division
- 139.925 How to apply for approval as ARFFS provider
- 139.965 When CASA must grant approval
- 139.970 When decision must be made
- 139.995 Application for variation of approval
- 139.1005 Suspension or continued suspension of approval by show cause notice
- 139.1010 Grounds for cancellation of approval
- 139.1015 Notice to approved ARFFS provider to show cause
- 139.1020 Cancellation of approval after show cause notice
- 139.1022 Cancellation if holder ceases to provide ARFFS

Subpart 139.A—Preliminary

139.001 Simplified outline of this Part

- The operator of an aerodrome may apply to CASA for an aerodrome certificate. An aerodrome that has an aerodrome certificate is a certified aerodrome.
- Certain aerodromes are required to be certified. Generally these are aerodromes with terminal instrument flight procedures. Other aerodromes can opt to become certified.
- The operator of a certified aerodrome must meet certain requirements for operating and maintaining the aerodrome. The Part 139 Manual of Standards has detailed requirements (which may be different for different classes of aerodrome).
- An aerodrome (whether certified or not) that provides a frequency confirmation service or air/ground radio service must also meet certain requirements.
- Some objects, structures or emissions sources can create a hazard to aircraft operations at an aerodrome and more generally. CASA can make determinations that such things are hazards, and must be notified of proposed building or other activity that will potentially create such hazards.
- Providers of aerodrome rescue and firefighting services must be approved by CASA and must comply with operating and technical standards.

Note 1: **Aerodrome** is defined in section 3 of the Act. For the reference in that definition to an area being authorised under the regulations for use as an aerodrome, see also regulations 91.410 and 121.205.

Note 2: There are requirements relating to aerodromes that are not in this Part. For example:

- (a) aerodrome operators may have obligations about drug and alcohol management plans (Part 99), or as aeronautical data originators (Part 175); and
- (b) aerodromes may need to meet certain requirements to support operational rules that apply to aircraft operators and pilots (such as in Part 121).

Note 3: Other legislation apart from these Regulations may regulate aspects of aerodromes, such as the *Air Navigation Act 1920*, the *Airports Act 1996*, the *Air Services Act 1995*, the *Airspace Act 2007* and regulations made under those Acts.

139.005 Issue of Manual of Standards for Part 139

For the purposes of subsection 98(5A) of the Act, CASA may issue a Manual of Standards for this Part prescribing matters:

- (a) required or permitted by these Regulations to be prescribed by the Part 139 Manual of Standards; or

Regulation 139.010

- (b) necessary or convenient to be prescribed for carrying out or giving effect to this Part.

139.010 Approvals by CASA for Part 139

- (1) If a provision of this Part refers to a person holding an approval under this regulation, a person may apply to CASA, in writing, for the approval.
- (2) Subject to regulation 11.055, the approval must be granted.
- (3) Subregulation 11.055(1B) applies to the granting of an approval under this regulation.

139.015 Effect on operation of other laws

Nothing in this Part affects the operation of the following:

- (a) the *Airports (Building Control) Regulations 1996*;
- (b) the *Airports (Protection of Airspace) Regulations 1996*;
- (c) the *Airports (Control of On-Airport Activities) Regulations 1997*.

Subpart 139.B—Aerodrome certificates

139.020 Application for aerodrome certificate

- (1) A person may apply to CASA, in writing, for an aerodrome certificate for an aerodrome.
- (2) The application must be accompanied by a copy of the applicant's proposed aerodrome manual for the aerodrome.
- (3) Regulation 11.045 applies in relation to an aerodrome certificate.

139.025 When aerodromes are required to have an aerodrome certificate

- (1) The operator of an aerodrome must hold an aerodrome certificate for the aerodrome if:
 - (a) there is a terminal instrument flight procedure for the aerodrome; and
 - (b) the procedure is not only for use in a specialised helicopter operation.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

139.030 Grant of aerodrome certificate

Subject to regulation 11.055, CASA must grant an aerodrome certificate to an applicant if CASA is satisfied that:

- (a) the aerodrome facilities and equipment comply with this Part and the Part 139 Manual of Standards; and
- (b) the proposed aerodrome manual for the aerodrome complies with the requirements mentioned in regulation 139.045; and
- (c) the aerodrome complies with the requirements that apply in relation to the aerodrome under Division 139.C.4 (safety management, emergency preparedness and other systems); and
- (d) the applicant would, if the certificate were granted, be able to operate and maintain the aerodrome safely and in accordance with the aerodrome manual for the aerodrome and the civil aviation legislation.

139.035 Suspension or cancellation of aerodrome certificate by CASA

- (1) CASA may, by written notice given to the holder of an aerodrome certificate, suspend or cancel the certificate if CASA reasonably believes that:
 - (a) the aerodrome facilities and equipment do not comply with this Part or the Part 139 Manual of Standards; or
 - (b) the aerodrome manual for the aerodrome does not comply with the requirements mentioned in regulation 139.045; or

Regulation 139.040

- (c) the aerodrome does not comply with the requirements that apply in relation to the aerodrome under Division 139.C.4 (safety management, emergency preparedness and other systems); or
 - (d) the holder is not operating or maintaining the aerodrome safely and in accordance with the aerodrome manual for the aerodrome and the civil aviation legislation; or
 - (e) the holder has failed to operate and maintain the aerodrome with a reasonable degree of care and diligence; or
 - (f) a condition to which the certificate is subject has been breached; or
 - (g) the aerodrome facilities and equipment, or the operations or maintenance of the aerodrome, are not of the standard necessary in the interests of the safety of air navigation; or
 - (h) the holder has failed to comply with regulation 139.135.
- (2) Before suspending or cancelling an aerodrome certificate, CASA must:
- (a) give to the holder a show cause notice that:
 - (i) sets out the facts and circumstances that, in the opinion of CASA, would justify the suspension or cancellation; and
 - (ii) invites the holder to show cause, in writing, within 30 days after the date of the notice, why the certificate should not be suspended or cancelled; and
 - (b) take into account any written submissions that the holder makes to CASA within the time allowed under subparagraph (a)(ii).
- (3) Suspension or cancellation under this regulation has effect:
- (a) if a time is specified in the notice given by CASA under subregulation (1)—at that time; or
 - (b) otherwise—at the time the holder is given the written notice under subregulation (1).
- (4) Suspension under this regulation ceases to have effect:
- (a) if the notice given by CASA under subregulation (1) specifies a time at which the suspension is to cease—at that time; or
 - (b) otherwise—at the time CASA directs, by written notice to the person who, immediately before the suspension, was the holder of the aerodrome certificate.
- (5) If an aerodrome certificate is suspended under this regulation, the certificate is not in force during the period of the suspension.

139.040 Notification requirement if aerodrome ceases to be certified

- (1) The operator of an aerodrome contravenes this subregulation if:
- (a) the operator holds an aerodrome certificate for the aerodrome; and
 - (b) the aerodrome ceases to be a certified aerodrome because the aerodrome certificate has been suspended or cancelled under these Regulations or the Act; and

Regulation 139.040

- (c) the operator does not, as soon as possible after the cessation, give written notice of the cessation to:
 - (i) the AIS; and
 - (ii) if the aerodrome has one or more terminal instrument flight procedures—each certified designer (within the meaning of regulation 173.015) responsible for maintaining a terminal instrument flight procedure for the aerodrome.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 10 penalty units.

Subpart 139.C—Operation and maintenance of a certified aerodrome

Division 139.C.1—Aerodrome manual

139.045 Requirement to have aerodrome manual

- (1) The operator of a certified aerodrome must have an aerodrome manual for the aerodrome that complies with the requirements prescribed by the Part 139 Manual of Standards.
- (2) Without limiting subregulation (1), the Part 139 Manual of Standards may prescribe requirements relating to the following:
 - (a) the information that must be included in an aerodrome manual;
 - (b) keeping an aerodrome manual up-to-date;
 - (c) the accessibility of an aerodrome manual.
- (3) The operator of a certified aerodrome contravenes this subregulation if:
 - (a) the operator is subject to a requirement mentioned in subregulation (1); and
 - (b) the operator does not comply with the requirement.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (3).

Penalty: 10 penalty units.

139.050 Amendments of aerodrome manual

- (1) If the operator of a certified aerodrome amends the aerodrome manual for the aerodrome, the operator must:
 - (a) give CASA written notice of the amendment and a copy of the amended part of the aerodrome manual clearly identifying the amendment; and
 - (b) do so within 30 days after the amendment is made.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 5 penalty units.

139.055 Compliance with aerodrome manual

- (1) The operator of a certified aerodrome must operate the aerodrome in accordance with the procedures set out in the aerodrome's aerodrome manual.

Note: Section 3 of the Act defines *operate*, in relation to an aerodrome, to include manage, maintain and improve the aerodrome.

- (2) However, subregulation (1) does not apply to the operator if:

- (a) the operator does not comply with the procedures set out in the aerodrome's aerodrome manual; and
 - (b) the non-compliance is necessary to ensure the safety of aircraft, aircraft operations or individuals using the aerodrome; and
 - (c) the operator tells CASA of the non-compliance in accordance with regulation 139.060.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 25 penalty units.

Note: A defendant bears an evidential burden in relation to the matter in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

139.060 Notice of non-compliance with aerodrome manual

- (1) This regulation applies if the operator of a certified aerodrome does not comply with a procedure set out in the aerodrome's aerodrome manual as mentioned in paragraphs 139.055(2)(a) and (b).
- (2) The operator must tell CASA, in writing, of the non-compliance within 30 days after the non-compliance.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 5 penalty units.

Division 139.C.2—Aerodrome facilities and equipment

139.065 Aerodrome facilities and equipment

- (1) The Part 139 Manual of Standards may prescribe requirements relating to aerodrome facilities and equipment for certified aerodromes.
- (2) Without limiting subregulation (1), the Part 139 Manual of Standards may prescribe requirements relating to the following:
 - (a) the physical characteristics of the movement area of an aerodrome;
 - (b) visual aids for the movement area and other areas of an aerodrome;
 - (c) the maintenance of visual aids at an aerodrome;
 - (d) wind direction indicators at an aerodrome;
 - (e) visual approach slope indicator systems at an aerodrome;
 - (f) lighting systems at an aerodrome;
 - (g) reference code systems at an aerodrome;
 - (h) the installation, operation or maintenance of aerodrome facilities and equipment;
 - (i) access to an aerodrome, including requirements relating to fencing for the aerodrome;
 - (j) design requirements to avoid the creation of hazards from aircraft propulsion systems at an aerodrome.
- (3) The operator of a certified aerodrome must ensure that the aerodrome facilities and equipment for the aerodrome comply with the requirements mentioned in subregulation (1).
- (4) A person commits an offence of strict liability if the person contravenes subregulation (3).

Penalty: 10 penalty units.

139.070 Planning and carrying out aerodrome works

- (1) The Part 139 Manual of Standards may prescribe requirements relating to the following:
 - (a) planning aerodrome works at a certified aerodrome;
 - (b) giving notice of planned aerodrome works at a certified aerodrome;
 - (c) carrying out aerodrome works at a certified aerodrome.
- (2) The operator of a certified aerodrome contravenes this subregulation if:
 - (a) the operator is subject to a requirement mentioned in subregulation (1); and
 - (b) the requirement is not met.
- (3) The operator of a certified aerodrome must ensure that any aerodrome works at the aerodrome are carried out in a way that does not create a hazard to aircraft or cause confusion to pilots.

- (4) A person commits an offence of strict liability if the person contravenes subregulation (2) or (3).

Penalty: 10 penalty units.

Division 139.C.3—Aerodrome inspections, monitoring and reporting

139.075 Aerodrome inspections

- (1) The Part 139 Manual of Standards may prescribe requirements relating to aerodrome inspections.
- (2) Without limiting subregulation (1), the Part 139 Manual of Standards may prescribe requirements relating to the following:
 - (a) different kinds of inspections that must be conducted;
 - (b) aerodrome facilities and equipment that must be inspected as part of inspections;
 - (c) when inspections must be conducted;
 - (d) the qualifications and experience of persons conducting inspections;
 - (e) records of inspections that the operator of an aerodrome must keep;
 - (f) reports of inspections that the operator of an aerodrome must provide to CASA;
 - (g) notifications that the operator of an aerodrome must give to CASA in relation to matters identified in inspections.
- (3) The operator of a certified aerodrome contravenes this subregulation if:
 - (a) the operator is subject to a requirement mentioned in subregulation (1); and
 - (b) the requirement is not met.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (3).

Penalty: 10 penalty units.

139.080 Reporting information to AIS providers

- (1) The Part 139 Manual of Standards may prescribe requirements relating to the operator of a certified aerodrome reporting information to an AIS provider.
- (2) Without limiting subregulation (1), the Part 139 Manual of Standards may prescribe requirements relating to the following:
 - (a) information that must be reported;
 - (b) the form and manner in which information must be reported;
 - (c) establishing procedures for reporting.
- (3) The operator of a certified aerodrome contravenes this subregulation if:
 - (a) the operator is subject to a requirement mentioned in subregulation (1); and
 - (b) the requirement is not met.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (3).

Penalty: 10 penalty units.

139.085 Reporting changes or occurrences at aerodromes

- (1) The Part 139 Manual of Standards may prescribe requirements relating to reporting changes or occurrences at certified aerodromes.
- (2) Without limiting subregulation (1), the Part 139 Manual of Standards may prescribe requirements relating to the following:
 - (a) changes or occurrences at a certified aerodrome that must be reported;
 - (b) persons to whom changes or occurrences must be reported;
 - (c) how changes or occurrences must be reported;
 - (d) information that must be reported;
 - (e) the form and manner in which information must be reported;
 - (f) establishing procedures for reporting.
- (3) The operator of a certified aerodrome contravenes this subregulation if:
 - (a) the operator is subject to a requirement mentioned in subregulation (1); and
 - (b) the requirement is not met.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (3).

Penalty: 10 penalty units.

139.090 Monitoring airspace and reporting infringements

- (1) The Part 139 Manual of Standards may prescribe requirements relating to:
 - (a) monitoring the airspace around a certified aerodrome for infringements, or potential infringements, of the airspace; and
 - (b) reporting such infringements, or potential infringements.
- (2) Without limiting subregulation (1), the Part 139 Manual of Standards may prescribe requirements relating to the following:
 - (a) monitoring the obstacle limitation surfaces of an aerodrome;
 - (b) monitoring other surfaces and obstacles associated with the airspace around an aerodrome;
 - (c) establishing procedures for monitoring;
 - (d) kinds of infringements that must be monitored for and reported;
 - (e) persons to whom infringements must be reported;
 - (f) how infringements must be reported;
 - (g) information that must be reported;
 - (h) the form and manner in which information must be reported;
 - (i) establishing procedures for reporting.
- (3) To avoid doubt, and without limiting subregulation (1) or (2), an infringement of airspace may include a gaseous efflux or other emissions source that affects the airspace.
- (4) The operator of a certified aerodrome contravenes this subregulation if:

Part 139 Aerodromes

Subpart 139.C Operation and maintenance of a certified aerodrome

Division 139.C.3 Aerodrome inspections, monitoring and reporting

Regulation 139.090

- (a) the operator is subject to a requirement mentioned in subregulation (1); and
 - (b) the requirement is not met.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (4).

Penalty: 10 penalty units.

Division 139.C.4—Safety management, emergency preparedness and other systems

139.095 Safety management systems and risk management plans

- (1) The Part 139 Manual of Standards may prescribe:
 - (a) the circumstances in which a certified aerodrome must have a safety management system; and
 - (b) requirements relating to safety management systems for aerodromes; and
 - (c) the circumstances in which a certified aerodrome must have a risk management plan; and
 - (d) requirements relating to risk management plans for aerodromes.
- (2) The operator of a certified aerodrome contravenes this subregulation if:
 - (a) the Part 139 Manual of Standards requires the aerodrome to have a safety management system; and
 - (b) any of the following apply:
 - (i) the aerodrome does not have a safety management system;
 - (ii) a requirement mentioned in paragraph (1)(b) that applies in relation to the safety management system for the aerodrome is not met;
 - (iii) a procedure under the safety management system for the aerodrome is not complied with.
- (3) The operator of a certified aerodrome contravenes this subregulation if:
 - (a) the Part 139 Manual of Standards requires the aerodrome to have a risk management plan; and
 - (b) either:
 - (i) the aerodrome does not have a risk management plan; or
 - (ii) a requirement mentioned in paragraph (1)(d) that applies in relation to the risk management plan for the aerodrome is not met.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (2) or (3).

Penalty: 10 penalty units.

139.100 Emergency preparedness and aerodrome emergency plans

- (1) The Part 139 Manual of Standards may prescribe:
 - (a) requirements relating to emergency preparedness of aerodromes; and
 - (b) the circumstances in which a certified aerodrome must have an aerodrome emergency plan; and
 - (c) requirements relating to aerodrome emergency plans for aerodromes.
- (2) Without limiting subregulation (1), the Part 139 Manual of Standards may prescribe requirements relating to the following:

Part 139 Aerodromes

Subpart 139.C Operation and maintenance of a certified aerodrome

Division 139.C.4 Safety management, emergency preparedness and other systems

Regulation 139.105

- (a) maintaining and reviewing aerodrome emergency plans;
 - (b) conducting emergency exercises to test the adequacy of procedures and facilities provided for in an aerodrome emergency plan;
 - (c) keeping and retaining records of reviews of an aerodrome emergency plan and exercises conducted to test the plan.
- (3) The operator of a certified aerodrome contravenes this subregulation if:
- (a) the operator is subject to a requirement relating to emergency preparedness mentioned in paragraph (1)(a); and
 - (b) the requirement is not met.
- (4) The operator of a certified aerodrome contravenes this subregulation if:
- (a) the Part 139 Manual of Standards requires the aerodrome to have an aerodrome emergency plan; and
 - (b) either:
 - (i) the aerodrome does not have an aerodrome emergency plan; or
 - (ii) a requirement mentioned in paragraph (1)(c) that applies in relation to the aerodrome emergency plan for the aerodrome is not met.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (3) or (4).

Penalty: 10 penalty units.

139.105 Other aerodrome systems

- (1) The Part 139 Manual of Standards may prescribe:
- (a) a kind of system (other than a safety management system) that an aerodrome must have, including (but not limited to) the following:
 - (i) a wildlife hazard management system;
 - (ii) an airside vehicle control system;
 - (iii) an aircraft parking control system; and
 - (b) the circumstances in which a certified aerodrome must have a system of a kind mentioned in paragraph (a); and
 - (c) requirements relating to that kind of system.
- (2) The operator of a certified aerodrome contravenes this subregulation if:
- (a) the Part 139 Manual of Standards requires the aerodrome to have a system of a kind mentioned in paragraph (1)(a); and
 - (b) any of the following apply:
 - (i) the aerodrome does not have a system of that kind;
 - (ii) a requirement mentioned in paragraph (1)(c) that applies in relation to the system for the aerodrome is not met;
 - (iii) a procedure under the system for the aerodrome is not complied with.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 10 penalty units.

Division 139.C.5—Aerodrome personnel

139.110 Aerodrome personnel

Requirement to have personnel

- (1) The operator of a certified aerodrome must have personnel who carry out the responsibilities of the following positions for the aerodrome:
 - (a) accountable manager;
 - (b) reporting officer;
 - (c) if aerodrome works are being carried out at the aerodrome—works safety officer;
 - (d) any other position prescribed by the Part 139 Manual of Standards.
- (2) Without limiting subregulation (1):
 - (a) the personnel of an operator of a certified aerodrome may include any of the following persons:
 - (i) an employee of the operator;
 - (ii) a person engaged by the operator (whether by contract or other arrangement) to provide services to the operator;
 - (iii) an employee of a person mentioned in subparagraph (ii); and
 - (b) more than one person may carry out the responsibilities of a position mentioned in subregulation (1).
- (3) The operator of a certified aerodrome contravenes this subregulation if the operator does not have the personnel for the aerodrome mentioned in subregulation (1).
- (4) A person commits an offence of strict liability if the person contravenes subregulation (3).

Penalty: 20 penalty units.

Accountable manager

- (5) The responsibilities of an accountable manager for a certified aerodrome are:
 - (a) ensuring that the operator of the aerodrome complies with the civil aviation legislation; and
 - (b) ensuring that the operator of the aerodrome operates and maintains the aerodrome safely and with a reasonable degree of care and diligence; and
 - (c) ensuring that the operator of the aerodrome operates and maintains the aerodrome in accordance with the aerodrome manual for the aerodrome.

Reporting officer

- (6) The responsibilities of a reporting officer for a certified aerodrome are:
 - (a) monitoring the serviceability of the aerodrome; and

- (b) reporting information to AIS providers as required under regulation 139.080; and
- (c) reporting changes or occurrences at the aerodrome as required under regulation 139.085; and
- (d) monitoring airspace and reporting as required under regulation 139.090.

Works safety officer

- (7) The responsibilities of a works safety officer for a certified aerodrome are ensuring aerodrome safety while aerodrome works are being carried out at the aerodrome.

139.115 Training etc. of aerodrome personnel

- (1) The Part 139 Manual of Standards may prescribe requirements relating to the training, knowledge, qualifications or experience of personnel carrying out the responsibilities of positions mentioned in subregulation 139.110(1).
- (2) The operator of a certified aerodrome contravenes this subregulation if:
 - (a) a person who is a member of the operator's personnel for the aerodrome carries out the responsibilities of a position mentioned in subregulation 139.110(1); and
 - (b) the person does not meet the requirements relating to the position mentioned in subregulation (1) of this regulation.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 20 penalty units.

139.120 Aerodrome personnel carrying out responsibilities

- (1) The Part 139 Manual of Standards may prescribe requirements relating to personnel carrying out the responsibilities of positions mentioned in subregulation 139.110(1).
- (2) The operator of a certified aerodrome contravenes this subregulation if:
 - (a) a person who is a member of the operator's personnel for the aerodrome carries out the responsibilities of a position mentioned in subregulation 139.110(1); and
 - (b) the person does not meet a requirement relating to the position mentioned in subregulation (1) of this regulation.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 20 penalty units.

Division 139.C.6—Aerodrome ground surveillance systems

139.125 Condition on aerodrome certificate to operate aerodrome ground surveillance system

Request by ATS provider for condition to be imposed or varied

- (1) An ATS provider for a certified aerodrome may request CASA:
 - (a) to impose a condition on the aerodrome certificate that an aerodrome ground surveillance system must operate in relation to one or more areas of the aerodrome; or
 - (b) if such a condition has been imposed on the aerodrome certificate—to vary the condition.
- (2) A request under paragraph (1)(a) must:
 - (a) specify the areas of the aerodrome in relation to which the aerodrome ground surveillance system is to operate; and
 - (b) include a safety assessment demonstrating that the use of an aerodrome ground surveillance system is necessary to ensure the safe control of aircraft and vehicles operating in those areas of the aerodrome.
- (3) A request under paragraph (1)(b) must:
 - (a) if the variation includes a change to the areas of the aerodrome in relation to which an aerodrome ground surveillance system operates—specify the changes to those areas; and
 - (b) include a safety assessment demonstrating that the requested variation in relation to the use of an aerodrome ground surveillance system is necessary to ensure the safe control of aircraft and vehicles operating in the relevant areas of the aerodrome.
- (4) Before making a request under subregulation (1), the ATS provider must consult the operator of the aerodrome in relation to the request.

CASA may impose or vary condition

- (5) CASA may, in accordance with regulation 11.067:
 - (a) impose the condition mentioned in subregulation (1) of this regulation on an aerodrome certificate; or
 - (b) if such a condition has been imposed on the aerodrome certificate—vary the condition.

Note: For breach of a condition imposed under regulation 11.067, see the offence in regulation 11.077.

- (6) The condition may include requirements relating to the aerodrome ground surveillance system to be operated.
- (7) The condition, or variation of the condition, may be different from the condition or variation requested by the ATS provider.

Notice of decisions etc.

- (8) If CASA decides to impose or vary the condition mentioned in subregulation (1):
 - (a) CASA must give notice of the decision to both the ATS provider and the holder of the aerodrome certificate; and
 - (b) the time the condition or variation takes effect must not be less than 6 months after the date of the notice of the decision.
- (9) If CASA decides to refuse a request from an ATS provider under subregulation (1), CASA must:
 - (a) give written notice of the decision, and the reasons for the decision, to the ATS provider; and
 - (b) do so as soon as practicable.

CASA's other powers to impose or vary conditions not affected

- (10) This regulation does not limit any other power of CASA to impose a condition on an aerodrome certificate or vary a condition of an aerodrome certificate.

Note: See for example the powers in regulations 11.056, 11.067 and 11.068.

139.130 Requirements for aerodrome ground surveillance systems

- (1) The Part 139 Manual of Standards may prescribe requirements relating to aerodrome ground surveillance systems.
- (2) Without limiting subregulation (1), the Part 139 Manual of Standards may prescribe requirements relating to the following:
 - (a) surveillance and communications equipment that must be installed on vehicles moving in areas of an aerodrome in which an aerodrome ground surveillance system operates;
 - (b) establishing procedures for vehicle movements in areas of an aerodrome in which an aerodrome ground surveillance system operates.
- (3) The operator of a certified aerodrome contravenes this subregulation if:
 - (a) it is a condition of the aerodrome certificate that an aerodrome ground surveillance system operate in relation to the aerodrome; and
 - (b) a requirement mentioned in subregulation (1) applies in relation to the aerodrome ground surveillance system; and
 - (c) the requirement is not met.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (3).

Penalty: 25 penalty units.

Regulation 139.135

Division 139.C.7—Other matters

139.135 Access to aerodromes to conduct tests

- (1) The operator of a certified aerodrome must allow CASA to conduct tests of aerodrome facilities and equipment for the aerodrome, or operating procedures at the aerodrome, for the purpose of ensuring the safety of aircraft.
- (2) The operator must allow CASA access to any part of the aerodrome, any aerodrome facilities and equipment for the aerodrome or any of the operator's records relating to the aerodrome for the purposes of subregulation (1).
- (3) CASA:
 - (a) must give reasonable notice of any tests to be conducted to the operator; and
 - (b) must carry out the tests at a reasonable time.
- (4) The operation of regulation 305 of CAR is not limited by subregulation (1) or (2) of this regulation.

139.140 Requests for data from aerodrome operator

- (1) CASA may, by written notice given to the operator of a certified aerodrome, request the operator to provide aircraft movement data of a kind prescribed by the Part 139 Manual of Standards for the purposes of this subregulation.
- (2) Without limiting subregulation (1), the Part 139 Manual of Standards may prescribe data relating to the following:
 - (a) the number of aircraft using the aerodrome;
 - (b) the type of aircraft using the aerodrome.
- (3) A person contravenes this subregulation if:
 - (a) CASA gives the person a request under subregulation (1); and
 - (b) the person does not comply with the request within the period mentioned in subregulation (4).
- (4) The person must comply with the request within:
 - (a) if paragraph (b) does not apply—28 days after the request is given; or
 - (b) if CASA specifies a longer period in the request—that period.
- (5) Subregulation (3) does not apply if:
 - (a) the person does not possess the data requested; and
 - (b) the person has taken all reasonable steps available to the person to obtain the data requested and has been unable to obtain the data.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (5): see subsection 13.3(3) of the *Criminal Code*.

- (6) A person commits an offence of strict liability if the person contravenes subregulation (3).

Penalty: 10 penalty units.

139.145 Requests for data from ATS providers

- (1) CASA may, by written notice given to an ATS provider, request the ATS provider to provide aircraft movement data of a kind prescribed by the Part 139 Manual of Standards for the purposes of this subregulation.
- (2) Without limiting subregulation (1), the Part 139 Manual of Standards may prescribe data relating to the following:
- (a) the number of aircraft using an aerodrome;
 - (b) the type of aircraft using an aerodrome;
 - (c) the nature of the operations undertaken by aircraft at an aerodrome;
 - (d) the flight rules applying to aircraft at an aerodrome.
- (3) The ATS provider must comply with the request within:
- (a) if paragraph (b) does not apply—28 days after the request is given; or
 - (b) if CASA specifies a longer period in the request—that period.

Subpart 139.D—Aerodrome radiocommunication services

Division 139.D.1—Frequency confirmation system

139.150 Frequency confirmation systems for aerodromes

- (1) The Part 139 Manual of Standards may prescribe:
 - (a) the circumstances in which a certified aerodrome must have a frequency confirmation system for the aerodrome; and
 - (b) requirements relating to frequency confirmation systems for aerodromes.
- (2) The operator of an aerodrome contravenes this subregulation if:
 - (a) the aerodrome has a frequency confirmation system; and
 - (b) a requirement mentioned in paragraph (1)(b) that applies in relation to the frequency confirmation system for the aerodrome is not met.
- (3) The operator of a certified aerodrome contravenes this subregulation if:
 - (a) the Part 139 Manual of Standards requires the aerodrome to have a frequency confirmation system; and
 - (b) the aerodrome does not have a frequency confirmation system.
- (4) A person commits an offence of strict liability if the person contravenes subregulation (2) or (3).

Penalty: 10 penalty units.

Division 139.D.2—Air/ground radio service

139.155 Air/ground radio service must be approved

- (1) The operator of an aerodrome contravenes this subregulation if:
 - (a) there is an air/ground radio service for the aerodrome; and
 - (b) the operator does not hold an approval under regulation 139.010 for the air/ground radio service.
- (2) CASA may grant an approval mentioned in paragraph (1)(b) only if CASA is satisfied that the service meets the requirements for an air/ground radio service prescribed by the Part 139 Manual of Standards.
- (3) Regulation 11.045 applies in relation to approval of an air/ground radio service.
- (4) An air/ground radio service for which there is an approval mentioned in paragraph (1)(b) is a *certified air/ground radio service*.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 10 penalty units.

139.160 Requirements for operating certified air/ground radio service

Operator of radio service must hold approval

- (1) The operator of an aerodrome contravenes this subregulation if:
 - (a) there is a certified air/ground radio service for the aerodrome; and
 - (b) the service is operated by a person who does not hold an approval under regulation 139.010 to operate the service.
- (2) CASA may grant an approval mentioned in paragraph (1)(b) only if CASA is satisfied that the person meets the requirements for operating a certified air/ground radio service prescribed by the Part 139 Manual of Standards.

Part 139 Manual of Standards may prescribe requirements

- (3) The Part 139 Manual of Standards may prescribe requirements relating to the operation of certified air/ground radio services.
- (4) Without limiting subregulation (3), the Part 139 Manual of Standards may prescribe requirements relating to the following:
 - (a) the facilities to be provided for the operation of a certified air/ground radio service;
 - (b) when a certified air/ground radio service must be operating for an aerodrome;
 - (c) documenting operational procedures for a certified air/ground radio service;

Part 139 Aerodromes

Subpart 139.D Aerodrome radiocommunication services

Division 139.D.2 Air/ground radio service

Regulation 139.160

- (d) information and notifications about a certified air/ground radio service for an aerodrome that the operator of the aerodrome must provide to the NOTAM Office.
- (5) The operator of an aerodrome contravenes this subregulation if:
 - (a) there is a certified air/ground radio service for the aerodrome; and
 - (b) a requirement mentioned in subregulation (3) applies in relation to the service; and
 - (c) the requirement is not met.

Offence

- (6) A person commits an offence of strict liability if the person contravenes subregulation (1) or (5).

Penalty: 10 penalty units.

Subpart 139.E—Hazards to aircraft operations

Division 139.E.1—Notifying potential hazards

139.165 Notifying CASA of certain proposed objects or structures

- (1) This regulation applies if a person proposes to construct or erect an object or structure that:
 - (a) will have a height of 100 metres or more above ground level; or
 - (b) will include an emissions source that generates a gaseous efflux with a velocity exceeding 4.3 metres per second at the point of emission; or
 - (c) is of a kind prescribed by the Part 139 Manual of Standards.
- (2) The person must, as soon as practicable after forming the intention to construct or erect the proposed object or structure, give written notice to CASA of the following:
 - (a) the proposal;
 - (b) the proposed height and location of the object or structure;
 - (c) if the object or structure includes an emissions source—the details of the velocity and location of the emissions;
 - (d) the proposed timeframe for constructing or erecting the object or structure;
 - (e) any other information about the proposal that is prescribed by the Part 139 Manual of Standards for the purposes of this paragraph.
- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 10 penalty units.

- (4) The kinds of objects or structures that may be prescribed by the Part 139 Manual of Standards under paragraph (1)(c) are not limited by paragraph (1)(a) or (b).

Note: See also Subpart 175.E in relation to requests for data about objects or structures that affect aviation safety.

139.170 Notifying CASA of activities that create certain emissions sources

- (1) This regulation applies if a person proposes to undertake an activity (other than constructing or erecting an object or structure) that will create an emissions source that:
 - (a) generates a gaseous efflux with a velocity exceeding 4.3 metres per second at the point of emission; or
 - (b) is of a kind prescribed by the Part 139 Manual of Standards.
- (2) The person must, as soon as practicable after forming the intention to undertake the proposed activity, give written notice to CASA of the following:
 - (a) the proposal;
 - (b) the proposed location of the activity;

Part 139 Aerodromes

Subpart 139.E Hazards to aircraft operations

Division 139.E.1 Notifying potential hazards

Regulation 139.170

- (c) the proposed timeframe for undertaking the activity;
- (d) the details of the emissions source that will be created;
- (e) any other information about the proposal that is prescribed by the Part 139 Manual of Standards for the purposes of this paragraph.

- (3) A person commits an offence of strict liability if the person contravenes subregulation (2).

Penalty: 10 penalty units.

- (4) The kinds of emissions sources that may be prescribed by the Part 139 Manual of Standards under paragraph (1)(b) are not limited by paragraph (1)(a).

Division 139.E.2—Determination of hazards

139.175 Determination that certain existing objects, structures or emissions sources are a hazard to aircraft operations

- (1) CASA may determine, in writing, that an object or structure that:
 - (a) has a height of 100 metres or more above ground level; or
 - (b) includes an emissions source that generates a gaseous efflux with a velocity exceeding 4.3 metres per second at the point of emission; or
 - (c) is of a kind mentioned in regulation 139.185;is a hazard to aircraft operations.
- (2) CASA may determine, in writing, that an emissions source that:
 - (a) generates a gaseous efflux with a velocity exceeding 4.3 metres per second at the point of emission; or
 - (b) is of a kind mentioned in regulation 139.185;is a hazard to aircraft operations.
- (3) If CASA makes a determination under subregulation (1) or (2), CASA must:
 - (a) publish in the AIP or NOTAMS the particulars of the hazard to which the determination relates, unless the hazard is of a kind that the operator of a certified aerodrome is required to report under Division 139.C.3 (aerodrome inspections, monitoring and reporting); and
 - (b) if CASA can identify a person who owns, or is in occupation or control of, the object, structure or emissions source—give written notice of the determination to the person.

139.180 Determination that certain proposed objects, structures or emissions sources are a hazard to aircraft operations

- (1) If there is a proposal to construct or erect an object or structure that:
 - (a) will have a height of 100 metres or more above ground level; or
 - (b) will include an emissions source that generates a gaseous efflux with a velocity exceeding 4.3 metres per second at the point of emission; or
 - (c) is of a kind mentioned in regulation 139.185;CASA may determine, in writing, that the proposed object or structure will be a hazard to aircraft operations.
- (2) If there is a proposal to undertake an activity (other than constructing or erecting an object or structure) that will create an emissions source that:
 - (a) generates a gaseous efflux with a velocity exceeding 4.3 metres per second at the point of emission; or
 - (b) is of a kind mentioned in regulation 139.185;CASA may determine, in writing, that the proposed activity will be a hazard to aircraft operations.

Regulation 139.185

- (3) If CASA makes a determination under subregulation (1) or (2), CASA must give written notice of the determination to:
- (a) the person proposing to construct or erect the object or structure, or undertake the activity; and
 - (b) if the approval of an authority is required to construct or erect the object or structure, or undertake the activity—the authority.

139.185 Kinds of objects, structures or emissions sources that may be hazards

- (1) For the purposes of regulations 139.175 and 139.180, the Part 139 Manual of Standards may prescribe:
- (a) kinds of objects or structures that may constitute a hazard to aircraft operations; and
 - (b) kinds of emissions sources that may constitute a hazard to aircraft operations.
- (2) The kinds of objects or structures that may be prescribed by the Part 139 Manual of Standards under subregulation (1) are not limited by paragraph 139.175(1)(a) or (b) or 139.180(1)(a) or (b).
- (3) The kinds of emissions sources that may be prescribed by the Part 139 Manual of Standards under subregulation (1) are not limited by paragraph 139.175(2)(a) or 139.180(2)(a).

Note: For powers to remove or mark hazards affecting an aerodrome, see the following:

- (a) Division 9 of Part 9 of CAR;
- (b) the *Civil Aviation (Buildings Control) Regulations 1988*;
- (c) Part 12 of the *Airports Act 1996* and the *Airports (Protection of Airspace) Regulations 1996*.

Subpart 139.H—Aerodrome rescue and firefighting services

Note: As a signatory to the Chicago Convention, Australia is obliged to require, as part of its domestic law, that certain classes of airport provide rescue and firefighting services of an adequate standard. (See generally section 9.2 of chapter 9 of Annex 14 to the Chicago Convention.) To satisfy that obligation, this Subpart requires operators of aerodromes that have scheduled international traffic, or specified levels of domestic passenger traffic, to provide those services, and sets out the standards that apply to such services. Aerodromes that are not obliged to provide an ARFFS may choose to do so, and this Subpart will apply to a service so provided until the operator gives reasonable notice that it will no longer provide such a service.

Division 139.H.1—General

139.700 Applicability of this Subpart

- (1) This Subpart applies to aerodrome rescue and firefighting services.
- (2) This Subpart sets out:
 - (a) how a person receives approval as a provider of an aerodrome rescue and firefighting service; and
 - (b) the operating and technical standards applicable to such a service.

Note: In addition to the provisions of this Subpart, Part 11 contains provisions relating to an application for approval as a provider of an aerodrome rescue and firefighting service.

- (3) This Subpart does not apply to:
 - (a) a person who is providing an aerodrome rescue and firefighting service in the course of his or her duties for the Defence Force; or
 - (b) any aerodrome rescue and firefighting service provided by the Defence Force.

139.705 Definitions for this Subpart

- (1) In this Subpart:

airside of an aerodrome has the same meaning as *airside* of an airport in the *Airports Act 1996*.

ARFFS means aerodrome rescue and fire-fighting service.

ARFFS operation means an operation undertaken in carrying out a function mentioned in paragraph 139.710(1)(a) or (b).

ARFFS provider for an aerodrome means the person or organisation that provides ARFFS for the aerodrome.

category of an aerodrome means its category worked out by the method set out in section 9.2 of chapter 9 of Annex 14 to the Chicago Convention.

ERSA means the part of AIP known as En Route Supplement Australia.

Regulation 139.710

Manual of Standards means the document called ‘Manual of Standards (MOS) – Subpart 139.H’ issued by CASA under regulation 139.712, as in force from time to time.

- (2) A reference in this Subpart to an AFC certificate of a particular level is a reference to:
- (a) a certificate of that level issued under the Australian Fire Competencies Scheme (that is, the training scheme administered by the Australian Fire Authorities Council); or
 - (b) a certificate accepted by CASA as indicating that the certificate holder has successfully completed a training program of a standard equivalent to that required for the issue of an AFC certificate of that level.

139.710 Functions of ARFFS

- (1) The functions of an ARFFS for an aerodrome are:
- (a) to rescue persons and property from an aircraft that has crashed or caught fire during landing or take-off; and
 - (b) to control and extinguish, and to protect persons and property threatened by, a fire on the aerodrome, whether or not in an aircraft.
- (2) Nothing in subregulation (1) prevents the ARFFS provider for an aerodrome from performing fire control services or rescue services elsewhere than on an aerodrome, but the provider must give priority to operations mentioned in subregulation (1).

139.711 Person not to provide service without approval

- (1) A person must not provide an ARFFS at an aerodrome unless the person is approved, under Division 139.H.5, to provide the ARFFS.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

139.712 Issue of Manual of Standards

- (1) CASA may issue a Manual of Standards for this Subpart that provides for the following matters:
- (a) standards and criteria for the establishment and disestablishment of an ARFFS;
 - (b) standards relating to the procedures, systems and documents required for the provision of an ARFFS;
 - (c) standards for facilities and equipment used to provide an ARFFS;
 - (d) standards, including competency standards, minimum qualifications and training standards, for persons engaged in an ARFFS;
 - (e) any matter required or permitted by these Regulations to be provided for by the Manual of Standards;

(f) any matter necessary or convenient to be provided for the effective operation of this Subpart.

Note: A Manual of Standards is a legislative instrument—see subsections 98(5A) and (5B) of the Act. It must be registered in accordance with the *Legislation Act 2003* and must be tabled in both Houses of the Parliament within 6 sitting days after its making.

(2) CASA must give a copy of a notice about a Manual of Standards for this Subpart (being a notice referred to in subregulation 11.275(3) or regulation 11.280) to each ARFFS provider.

Note: Subpart 11.J (including regulations 11.275 and 11.280) sets out procedures for the issue, amendment and revocation of a MOS.

139.715 Effect of Manual of Standards

- (1) If CASA sets out, in the Manual of Standards, a way of complying with a requirement of this Subpart, an ARFFS provider who uses that way is taken to have complied with the requirement unless the contrary is shown.
- (2) CASA may take the extent to which an ARFFS provider complies with the Manual into account in deciding whether the service provided by the provider is adequate.

Division 139.H.3—Requirements to be complied with by ARFFS provider

139.750 Requirements in this Division

A requirement in this Division for there to be a system or procedure to do something is a requirement that the system or procedure:

- (a) must exist; and
- (b) must be in use.

139.755 Definition for Division—*applicable standards and requirements*

- (1) In this Division:

applicable standards and requirements, for an aerodrome of a particular category, means:

- (a) for an aerodrome to which subregulation (2) applies—the standards and requirements for an aerodrome of its category set out in:
 - (i) Chapter 9 of Annex 14 to the Chicago Convention; and
 - (ii) the Manual of Standards; or
- (b) for any other aerodrome—the standards and requirements for an aerodrome of its category set out in the Manual of Standards.

- (2) This subregulation applies to:

- (a) an aerodrome from or to which an international passenger air service operates; and
- (b) any other aerodrome through which more than 350 000 passengers passed on air transport flights during the previous financial year.

- (3) In paragraph (2)(a):

international passenger air service means:

- (a) an international air service (within the meaning given by subsection 3(1) of the *Air Navigation Act 1920*) that carries passengers, other than a non-scheduled service (within the meaning given by that subsection); or
- (b) a non-scheduled passenger-carrying flight, or program of non-scheduled passenger-carrying flights, carried out under a permission granted under section 15D of the *Air Navigation Act 1920*; or
- (c) a non-scheduled passenger-carrying flight, or program of non-scheduled passenger-carrying flights, in a category in respect of which the Secretary to the Department has determined, under subsection 15A(3) of that Act, that such a permission is not required.

- (4) For paragraph (2)(b), the number of passengers that pass through an aerodrome is to be determined according to statistics published by the Department.

Note: **Department** means the Department administered by the Minister who administers these Regulations (see section 19A of the *Acts Interpretation Act 1901* as it applies because of section 13 of the *Legislation Act 2003*).

139.760 Inconsistency between Manual and chapter 9 of Annex 14

If a requirement of the Manual of Standards, as it applies to a particular aerodrome, is inconsistent with a requirement of chapter 9 of Annex 14 to the Chicago Convention, as it applies to that aerodrome, the requirement of the Manual prevails to the extent of the inconsistency.

139.765 Knowledge, equipment and expertise to deal with aviation hazards

An ARFFS provider must have the knowledge, equipment and expertise to deal with any hazard likely to arise during an aviation accident or incident, including any hazard mentioned in the Manual of Standards.

139.770 General obligation to maintain service

- (1) An ARFFS provider must ensure that the service is available during the period or periods published in ERSA as the period or periods of its availability.
- (2) Subregulation (1) does not prevent the level of protection provided during predictable periods of reduced activity at the aerodrome from being reduced, within the limit allowed by Chapter 9 of Annex 14 to the Chicago Convention.

139.771 Response time of ARFFS

- (1) An ARFFS must be able to meet the criteria for response time set out in Chapter 9 of Annex 14 to the Chicago Convention.
- (2) Subregulation (1) applies to an ARFFS whether or not Annex 14 to the Chicago Convention applies to the ARFFS.

139.772 Buildings and emergency facilities

- (1) An ARFFS provider for an aerodrome to which subregulation 139.755(2) applies must ensure that the necessary buildings and facilities for the service, including the following, are at the aerodrome:
 - (a) a fire station;
 - (b) communications facilities;
 - (c) facilities for the maintenance of vehicles and equipment;
 - (d) training facilities;
 - (e) storage facilities;
 - (f) if there is a body of water within 1 000 metres of a runway threshold—a boat ramp and boat launching facilities.
- (2) The ARFFS provider must ensure that those buildings and facilities comply with any applicable requirements (including requirements as to location) in the Manual of Standards.

Part 139 Aerodromes

Subpart 139.H Aerodrome rescue and firefighting services

Division 139.H.3 Requirements to be complied with by ARFFS provider

Regulation 139.773

- (3) The ARFFS provider must ensure that there is a facility, in accordance with the requirements of the Manual of Standards, for replenishing the water supply of a fire fighting vehicle.
- (4) The ARFFS provider must ensure that there are the appropriate emergency roads on the aerodrome in accordance with the requirements of the Manual of Standards.
- (5) An ARFFS provider must ensure that there are, at an aerodrome other than one to which subregulation 139.755(2) applies, the following facilities:
 - (a) a standby point for an emergency vehicle that will allow the vehicle to achieve the response time required by the Manual of Standards;
 - (b) storage for a reserve stock of extinguishing agents.

139.773 Officer in charge

- (1) An ARFFS provider must appoint, as officer in charge of ARFFS operations for an aerodrome, a person who is based at the aerodrome and who holds:
 - (a) for an aerodrome categorised as Category 6 or above—an AFC Advanced Diploma that meets the standards in the Manual of Standards; or
 - (b) for an aerodrome categorised as Category 5 or below—an AFC Diploma that meets the standards in the Manual of Standards.
- (2) In paragraphs (1)(a) and (b):

AFC means Australian Fire Competencies.

139.775 Notice about times service is available etc

- (1) An ARFFS provider must ensure that notice is published in ERSAs of the hours during which the service is available.
- (2) If for some reason (such as an emergency on the aerodrome) it becomes temporarily impossible to provide an ARFFS to the standard required by this Subpart, the provider must tell the Australian NOTAM Office:
 - (a) of the reduction in the service; and
 - (b) how long it is likely to be before the full service is restored.
- (3) The provider must tell CASA in writing of any proposed reduction in the standard of service that:
 - (a) will last longer than 24 hours; or
 - (b) reduces the standard of ARFFS provided at the airport concerned to a greater extent than is permissible under Chapter 9 of Annex 14 to the Chicago Convention.

139.780 Agreements with other fire fighting bodies

- (1) An ARFFS provider may make an arrangement:

- (a) for an aerodrome that is a joint user airport (within the meaning of the *Airports Act 1996*)—with the Defence Force for the provision of the ARFFS provider’s services to the Defence Force for the part of the aerodrome under the control of the Force; or
 - (b) with a State or Territory, or another person or body, for the services of the provider for firefighting or rescue in the State or Territory beyond the airside of the aerodrome concerned.
- (2) If a provider makes such an arrangement, the provider must ensure that it is recorded in writing.

139.785 Stock of fire extinguishing agents

- (1) There must be, on the aerodrome, a stock of fire-extinguishing agents of the kind or kinds, and meeting the performance standards, required by the applicable standards and requirements.
- (2) The fire-extinguishing agents must be held in at least the quantities required by those standards and requirements.

139.795 Extinguishing equipment and vehicles

- (1) There must be, on the aerodrome, vehicles and equipment for delivering extinguishing agent onto a fire.
- (2) There must be at least as many vehicles, and at least as much equipment, as required by the applicable standards and requirements.
- (3) Each vehicle or piece of equipment:
 - (a) must be capable of delivering extinguishing agent onto a fire at at least the rate required by the applicable standards and requirements; and
 - (b) must have at least the performance (in other respects) required by those standards and requirements.
- (4) The vehicles must carry ancillary equipment in accordance with the applicable standards and requirements.
- (5) Each vehicle and piece of equipment must be in good working order.
- (6) The vehicles must be of a colour permitted by the applicable standards and requirements.
- (7) The provider must keep maintenance instructions for each vehicle and each piece of the equipment, including all the information necessary to permit an appropriately qualified and technically competent person to carry out maintenance, performance monitoring, defect reporting, fault reporting and record-keeping on or for the vehicle or equipment.

Regulation 139.800

139.800 Other vehicles and equipment

- (1) There must be, at the aerodrome, enough vehicles and equipment (other than vehicles and equipment for delivering extinguishing agent onto a fire) to provide the service, in accordance with the applicable standards and requirements.
- (2) The performance of the vehicles and equipment must be in accordance with the applicable standards and requirements.
- (3) The vehicles must carry ancillary equipment in accordance with the applicable standards and requirements.
- (4) The provider must keep maintenance instructions for each piece of the provider's equipment, including all the information necessary to permit a technically competent person to carry out maintenance, performance monitoring, defect reporting, fault reporting and record-keeping on or for the equipment.

139.805 Vehicles and equipment for firefighting and rescue in difficult environments

- (1) If a significant proportion of aircraft movements at the aerodrome take place over water, swamp or another difficult environment, there must be appropriate vehicles, boats and equipment for firefighting and rescue in that environment within 1 000 metres of the threshold of each runway.
- (2) The vehicles, boats and equipment must be in at least the numbers and quantity required by the applicable standards and requirements.
- (3) The vehicles and boats must be of a colour required or permitted by the applicable standards and requirements.

139.810 Commissioning of certain equipment

An ARFFS provider must not begin to use a piece of operational equipment for the purpose of an ARFFS unless the equipment has been approved by CASA as conforming to specifications and any applicable standards, in accordance with the operator's aerodrome manual, and any applicable standards or requirements in the Manual of Standards.

139.815 Protective clothing and equipment

At the aerodrome there must be, for the firefighters and rescue personnel:

- (a) protective clothing that complies with:
 - (i) if there is a relevant Australian Standard (as in force immediately before this regulation commences)—that Standard; or
 - (ii) if there is no such Australian Standard—any relevant internationally recognised standard;in at least the quantity required by the applicable standards and requirements; and

- (b) other protective equipment in the quantity required by, and of a kind in accordance with, those standards and requirements.

139.820 Communications

- (1) There must be, on the aerodrome, sufficient communications equipment available to provide communication during an ARFFS operation.
- (2) The vehicles used for the service must carry suitable communications equipment.
- (3) A person who is required to operate the equipment must hold an aeronautical radio operator certificate.
- (4) The equipment must not interfere, when in use, with communications equipment used by the air traffic service at the aerodrome.

139.825 Test and maintenance equipment

- (1) The provider must have the necessary equipment and tools, in accordance with the applicable standards and requirements, to test and maintain the equipment used to provide the service.
- (2) If the applicable standards and requirements require particular test or maintenance equipment, particular kinds of test or maintenance equipment, or particular numbers or quantities of a particular type of test or maintenance equipment, the provider must have that equipment or that number or quantity of that type of equipment.

139.830 Commissioning of new vehicles and equipment

The provider must not put a new vehicle, or a new item of equipment that affects the quality or rate of discharge of extinguishing agent, into service unless:

- (a) the vehicle or equipment has been approved by CASA, for conformity to specification and the applicable standards and requirements, in accordance with the provider's operations manual; and
- (b) CASA has acknowledged that the vehicle or equipment meets the applicable standards and requirements; and
- (c) any necessary personnel training has been completed.

139.835 Number of operating personnel

- (1) During any period announced in ERSA as a period during which ARFFS is available at an aerodrome, there must be enough trained personnel available at the aerodrome to operate the equipment and vehicles required to provide the service at full capacity.
- (2) Those personnel must be stationed at places that allow the ARFFS to respond to an emergency at least as quickly as required by the applicable standards and requirements.

Regulation 139.840

139.840 Medical standard of firefighters

- (1) The people employed as firefighters must meet the medical standard for firefighters set out in the Manual of Standards.
- (2) There must be a system of continuing medical checks for the people employed as firefighters that ensures that the ARFFS provider knows whether or not those people continue to meet that standard.

139.845 Qualifications and training of firefighters

- (1) The people employed as firefighters must already be trained to at least AFC Certificate 2 standard, or, if for a particular position the Manual of Standards specifies a higher standard, that higher standard.
- (2) Before being used in any operational capacity, those people must also receive, or have received, appropriate training in dealing with hazards specific to aviation accidents and incidents, to the extent that such training is not part of the training required for an AFC Certificate 2.
- (3) The people employed as firefighters must receive appropriate training to familiarise them with local conditions.
- (4) There must be ongoing training for the people employed as firefighters to ensure that they continue to meet that standard.
- (5) If a significant proportion of aircraft movements at the aerodrome take place over water, swamp or another difficult environment, the firefighters must be appropriately trained to carry out their functions in that environment.

139.850 Operations manual

- (1) There must be an operations manual for the service that complies with the standards set out in the Manual of Standards.
- (2) The operations manual must include a chart showing the organisations that provide services to the provider, setting out the roles and responsibilities of those organisations and how those roles and responsibilities affect the Aerodrome Emergency Procedures for the aerodrome concerned.
- (3) The operations manual must be kept up to date.
- (4) Each of the provider's employees must have ready access to an up-to-date copy of the operations manual.
- (5) The provider must give CASA a copy of the operations manual, and of any changes to it.
- (6) There must be an up-to-date copy of the operations manual at each operational station.
- (7) The provider must comply with the requirements of the operations manual.

139.855 Amendment of operations manual

- (1) An ARFFS provider may amend its operations manual, but an amendment is of no effect until approved in writing by CASA.
- (2) CASA may direct an ARFFS provider to amend its operations manual in a way specified in the direction.
- (3) The provider must comply with the direction.

139.860 Voice data recording

There must be a system to record electronically, in accordance with the standards or requirements set out in the Manual of Standards, any voice communication by radio or telephone in the course of an ARFFS operation.

139.865 Record of accidents or incidents

There must be a system, in accordance with the standards or requirements set out in the Manual of Standards, to record the details of any aircraft accident or incident, or building fire, in relation to which the service is required to take any action.

139.870 Contingency plan

- (1) There must be a plan, in accordance with the standards or requirements set out in the Manual of Standards, of the procedures to be used in the event of an emergency that results, or may result, in the service being interrupted.
- (2) The plan must include at least the following:
 - (a) actions to be taken by firefighters and rescue personnel;
 - (b) possible alternative arrangements for providing the service (including arrangements for procuring any necessary replacement vehicles or spare parts, or supplies of extinguishing materials);
 - (c) notification procedures;
 - (d) procedures for re-establishing normal services.

139.875 Records management

- (1) There must be a system, in accordance with the standards or requirements set out in the Manual of Standards, to collect, index, store and maintain the records relating to the service.
- (2) The records must include:
 - (a) voice records made under regulation 139.860; and
 - (b) records of accidents or incidents made under regulation 139.865.
- (3) A record must be kept for 5 years (or a shorter period specified for the particular kind of record in the Manual) after the date to which it relates.

Regulation 139.880

139.880 Organisation

The provider must, at all times, maintain an appropriate organisation with a sound and effective management structure, having regard to the nature of the service it provides.

139.885 System for rectification of service failures

There must be a system, in accordance with the standards or requirements in the Manual of Standards, to rectify any failure that results or may result in an interruption in the service or a reduction in the standard of the service.

139.890 Quality control

There must be a system, in accordance with the standards or requirements set out in the Manual of Standards, to ensure that the service complies with the requirements of this Subpart.

139.895 Change management

There must be a system, in accordance with the Manual of Standards, to manage changes in:

- (a) equipment and procedures; and
- (b) what the service does; and
- (c) the level or kinds of service provided; and
- (d) the way the service is provided.

139.900 Safety management

There must be a safety management system for the service, in accordance with the standards or requirements in the Manual of Standards, including the policies, procedures and practices necessary to provide the service safely.

139.905 Applicant's organisation

- (1) The provider must tell CASA in writing:
 - (a) who its managers are; and
 - (b) its organisational structure; and
 - (c) how many staff of each class it uses to provide the service.
- (2) The provider must tell CASA in writing about any change in a matter mentioned in paragraph (1)(a), (b) or (c) within 14 days after the change.

139.910 Telling users and CASA about changes

- (1) There must be a procedure, in accordance with the standards and requirements in the Manual of Standards, for an ARFFS provider to give, to aerodrome users, safety-related information about changes, faults or interruptions to the service.

- (2) The procedure must comply with CASA's requirements for reporting information to the Aeronautical Information and Data Service and the Australian NOTAM Office.
- (3) If the provider fails, for a period of 24 hours or longer, to provide the service at the standard required by Division 139.H.3, the ARFFS provider for the aerodrome must tell CASA in writing as soon as practicable:
 - (a) why the service is not being provided at that standard; and
 - (b) how long it is likely to be before the service can be resumed; and
 - (c) what action the service provider has taken and will take to resume the service at that standard.

Division 139.H.4—Conduct of ARFFS operations

139.915 Powers of officer in charge or firefighter

- (1) In this regulation:

firefighter, in relation to an ARFFS operation for an aerodrome, means:

- (a) somebody employed as a firefighter by the ARFFS provider for the aerodrome; or
- (b) a member of a fire brigade, or of a rescue or fire fighting service, who is taking part in the operation in accordance with an arrangement made with such a brigade or service.

officer in charge, in relation to an ARFFS operation for an aerodrome, means:

- (a) the person appointed under regulation 139.773 as officer in charge of ARFFS operations at the aerodrome; or
- (b) if, in accordance with an arrangement made with a fire brigade, or a rescue or fire fighting service, the person in control of the operation is a member of such a brigade or service—that person.

volunteer, in relation to an ARFFS operation, means somebody who has volunteered to help in the operation under the direction of the officer in charge.

- (2) For an ARFFS operation for an aerodrome under this Subpart, the officer in charge may:

- (a) give directions that he or she thinks proper to firefighters and volunteers under his or her control; and
- (b) take measures that he or she thinks proper.

- (3) Without limiting paragraph (2)(b), the officer in charge may do the following things for the purpose of the ARFFS operation:

- (a) enter (by force, if necessary), take possession of and deal with in any appropriate way, premises, an aircraft or other property;
- (b) close a road or other thoroughfare to traffic;
- (c) use a convenient water supply (including shutting off water supply from a main or pipe to obtain greater pressure or supply);
- (d) disconnect electricity supply to premises;
- (e) remove flammable, explosive or other dangerous material from premises, an aircraft or other property;
- (f) order a person to leave premises, an aircraft or other property;
- (g) remove from the vicinity of the operation a person or thing the presence of whom or which is interfering, or is likely to interfere, significantly with the operation;
- (h) take a fire engine or other fire appliance onto land or premises;
- (i) shore up or destroy a wall or building that is insecure or may be dangerous to persons or property;

- (j) direct or authorise a firefighter or a volunteer to do something that, under this regulation, the officer may do.
- (4) For an ARFFS operation, a firefighter may do something mentioned in paragraph (3)(a), (b), (c), (d), (e), (f) or (h) without authorisation under paragraph (3)(j) if there are reasonable grounds for believing that, for the operation:
- (a) it is necessary or desirable to do the thing; and
 - (b) it is not practicable for him or her to get authorisation to do so.
- (5) A person is guilty of an offence punishable by a fine of 10 penalty units if he or she fails to comply with:
- (a) a direction of the officer in charge under paragraph (3)(f); or
 - (b) a direction of the kind mentioned in that paragraph, given by a firefighter or volunteer, if:
 - (i) the firefighter or volunteer has been authorised under paragraph (3)(j) by the officer in charge to give it; or
 - (ii) the conditions in paragraphs (4)(a) and (b) are satisfied in relation to the direction.

Regulation 139.920

Division 139.H.5—Administration

139.920 Definition for Division

In this Division:

show cause notice means a notice under regulation 139.1015.

139.925 How to apply for approval as ARFFS provider

- (1A) An eligible person may apply to CASA for approval as an ARFFS provider.
- (1) A person is eligible to apply for approval as an ARFFS provider if:
- (a) the person is mentioned in column 2 of an item in table 139.925; and
 - (b) the application relates to an aerodrome mentioned in column 3 of that item.
- (2) The application must be in writing.
- (3) The application:
- (a) must set out the applicant's name and address; and
 - (b) if the applicant is a corporation (within the meaning given by the *Corporations Act 2001*)—must set out the applicant's registered address and ACN and the names and addresses of its officers.
- (4) In paragraph (3)(b):
- officer* has the meaning given by section 9 of the *Corporations Act 2001*.
- (5) The applicant must include with the application:
- (a) a copy of the applicant's operations manual, prepared as if the applicant were an approved provider; and
 - (b) information that will enable CASA to decide whether or not the applicant is of sound financial standing; and
 - (c) a statement of the intended location and category of the service to be provided.

Note: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.

Table 139.925

Item	Applicant	Aerodrome
1	the Commonwealth	any aerodrome
2	AA	any aerodrome
2A	Delta Fire Service Pty. Ltd.	Townsville Airport
3	Broome Airport Services Pty Ltd	Broome International Airport
4	Administration of Norfolk Island	Norfolk Island International Airport

Table 139.925

Item	Applicant	Aerodrome
5	a person who is to provide an ARFFS at a particular aerodrome: (a) in cooperation with AA, in accordance with paragraph 11(3)(b) of the <i>Air Services Act 1995</i> ; or (b) by arrangement with AA, in accordance with paragraph 11(3)(c) of the <i>Air Services Act 1995</i>	the aerodrome mentioned in column 2
6	a person who is to provide an ARFFS in accordance with an arrangement mentioned in paragraph 216(1)(e) of the <i>Airports Act 1996</i>	the aerodrome specified in the arrangement mentioned in column 2

139.965 When CASA must grant approval

- (1) Subject to regulation 11.055 and subregulation (3), if a person has applied for approval as an ARFFS provider under this Subpart, CASA must grant the approval.

Note: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

 - (a) a decision refusing to issue, or cancelling, suspending or varying, an approval; or
 - (b) a decision imposing a condition on an approval.
- (3) CASA may approve an application only if CASA approves the applicant's draft operations manual.
- (4) CASA must not approve the draft operations manual unless the draft manual complies with the relevant requirements in the Manual of Standards.
- (6) Without limiting regulations 11.056 and 11.067, if the application is made by a person mentioned in column 2 of item 1, 2, 5 or 6 of Table 139.925 in relation to an ARFFS at the corresponding aerodrome, CASA may impose any condition necessary to give effect to an arrangement mentioned in subsection 11(3) of the *Air Services Act 1995*.

139.970 When decision must be made

- (1) If CASA does not make a decision about an application within 21 days after receiving it, CASA is taken to have refused the application.
- (2) However, if CASA makes a request under regulation 11.035 or 11.040, the time between when CASA makes the request, and when the applicant's officer or officers participates or participate in the interview, or gives CASA the information or copy requested, does not count towards the period.
- (3) Also, if CASA asks an applicant to make a statutory declaration under regulation 11.047 or subregulation 11.050(3A), the time between when CASA asks the applicant to do so and when the applicant gives CASA the statutory declaration does not count towards the period.

Regulation 139.995

- (4) Also, if CASA invites an applicant to make a written submission under subregulation 11.050(2), the time between when CASA gives the invitation and when the applicant makes the written submission does not count towards the period.

139.995 Application for variation of approval

- (1) An approved ARFFS provider may apply to vary its approval.
(2) Regulations 139.965 and 139.970 apply to the application.

Note: Part 11 also contains provisions relating to an application for variation of approval.

139.1005 Suspension or continued suspension of approval by show cause notice

- (1) CASA may state, in a show cause notice, that the approval as an approved ARFFS provider of the ARFFS provider concerned is suspended if CASA reasonably considers that not suspending the approval would be likely to have an adverse effect on the safety of air navigation.

Note: Regulation 201.004 provides for review of certain decisions by the Administrative Appeals Tribunal.

- (2) If a show cause notice states that the approval is suspended:
- (a) if the approval is already suspended when the show cause notice is given to the holder—the approval continues to be suspended until CASA revokes the suspension, or the suspension lapses under subregulation (4); or
 - (b) the approval is suspended from when the notice is given to the approved ARFFS provider concerned.
- (3) CASA may revoke the suspension at any time.
(4) If CASA has not cancelled the approval within 90 days after the day the show cause notice is given to the provider, the suspension lapses at the end of that period.

139.1010 Grounds for cancellation of approval

It is grounds for the cancellation of the approval of an approved ARFFS provider if the provider:

- (a) has breached a condition of the approval; or
- (b) has contravened the Act or these Regulations; or
- (c) has otherwise been guilty of conduct that renders the holder's continued holding of the approval likely to have an adverse effect on the safety of air navigation.

Note: Regulation 201.004 provides for review of certain decisions by the Administrative Appeals Tribunal.

139.1015 Notice to approved ARFFS provider to show cause

- (1) CASA may give an approved ARFFS provider a show cause notice if there are reasonable grounds for believing that there are facts or circumstances that amount to grounds for the cancellation of the approval.
- (2) A show cause notice must:
 - (a) tell the provider of the facts and circumstances that justify the cancellation of the approval; and
 - (b) invite the holder to show in writing, within a reasonable period stated in the notice, why the approval should not be cancelled.
- (3) For paragraph (2)(b), the period must not be less than 7 days.

139.1020 Cancellation of approval after show cause notice

- (1) CASA may cancel an approval only if:
 - (a) there exist facts or circumstances that amount to grounds for the cancellation of the approval; and
 - (b) CASA has given the holder a show cause notice in relation to the grounds for the proposed cancellation; and
 - (c) CASA has taken into account any written representations made, within the period stated in the notice, by or on behalf of the holder; and
 - (d) not cancelling the approval would be likely to have an adverse effect on the safety of air navigation.
- (2) If CASA has given a show cause notice to an approved ARFFS provider, and it decides not to cancel the approval, it:
 - (a) must tell the provider in writing of the decision; and
 - (b) must, if the approval is suspended, revoke the suspension.

139.1022 Cancellation if holder ceases to provide ARFFS

- (1) CASA must cancel the approval of a person mentioned in column 2 of item 3 or 4 of Table 139.925 if the person ceases to be an ARFFS provider for the aerodrome mentioned in column 3 of the item.
- (2) CASA must cancel the approval of a person mentioned in column 2 of item 5 of Table 139.925 if the cooperation or arrangement mentioned in that item ceases.
- (3) CASA must cancel the approval of a person mentioned in column 2 of item 6 of Table 139.925 if the arrangement mentioned in that item ceases.

Part 141—Recreational, private and commercial pilot flight training, other than certain integrated training courses

Table of contents

Subpart 141.A—General

- 141.005 What Part 141 is about
- 141.010 Aircraft and flight simulation training devices to which Part 141 applies
- 141.015 Definitions of *Part 141 flight training*, *authorised Part 141 flight training*, *Part 141 operator* and *Part 141 certificate*
- 141.020 Definition of *key personnel* for Part 141
- 141.025 Definition of *significant change* for Part 141
- 141.030 Definitions for Part 141
- 141.035 Approvals by CASA for Part 141
- 141.040 Legislative instruments—flight training
- 141.045 Regulations 11.070 to 11.075 do not apply in relation to certain matters
- 141.050 Part 141 flight training—requirement for Part 141 certificate or approval

Subpart 141.B—Part 141 certificates

- 141.055 Part 141 certificates—application
- 141.060 Part 141 certificate—issue
- 141.065 Part 141 certificate—approval of operations manual
- 141.070 Part 141 certificate—conditions
- 141.075 Part 141 certificate—compliance with conditions

Subpart 141.C—Part 141 operators—changes

- 141.080 Part 141 operators—changes of name etc
- 141.085 Part 141 operators—application for approval of significant changes
- 141.090 Part 141 operators—approval of significant changes
- 141.095 Part 141 operators—process for making changes
- 141.100 Part 141 operators—CASA directions relating to operations manual or key personnel

Subpart 141.D—Part 141 operators—organisation and personnel

- 141.105 Part 141 operators—organisation and personnel
- 141.110 Part 141 operators—key personnel cannot carry out responsibilities
- 141.115 Part 141 operators—familiarisation training for key personnel
- 141.120 Part 141 operators—chief executive officer: responsibilities and accountabilities
- 141.125 Part 141 operators—head of operations: qualifications and experience
- 141.130 Part 141 operators—head of operations: responsibilities
- 141.155 Part 141 operators—key personnel: additional qualification and experience requirements
- 141.160 Part 141 operators—reference library

Subpart 141.E—Part 141 operators—instructors

- 141.165 Part 141 operators—instructors must comply with Part 141 certificate
- 141.170 Part 141 operators—instructors must comply with operations manual

-
- 141.175 Part 141 operators—instructors must be authorised under Part 61
 - 141.180 Part 141 operators—instructors must have access to records
 - 141.185 Part 141 operators—instructors must hold valid standardisation and proficiency check for operator
 - 141.190 Part 141 operators—holding valid standardisation and proficiency check for operator
 - 141.195 Part 141 operators—standardisation and proficiency check requirements
 - 141.200 Part 141 operators—instructors—training in human factors principles and non-technical skills
 - 141.205 Part 141 operators—instructors must be competent to conduct flight training in flight simulation training device
 - 141.210 Part 141 operators—person recommended for flight test

Subpart 141.G—Part 141 operators—quality system

- 141.225 Part 141 operators—quality system for flight simulation training devices

Subpart 141.H—Part 141 operators—personnel fatigue management

Subpart 141.I—Part 141 operators—operations manuals

- 141.260 Part 141 operators—content of operations manual
- 141.265 Part 141 operators—compliance with operations manual by operator
- 141.270 Part 141 operators—providing personnel with operations manual

Subpart 141.J—Part 141 operators—logs and records

- 141.275 Part 141 operators—making and keeping flight training records
- 141.280 Part 141 operators—availability of flight training records

Subpart 141.K—Part 141 operators—miscellaneous offences

- 141.285 Part 141 operators—suitable facilities, records and resources for flight test
- 141.290 Part 141 operators—pilot in command to be authorised under Part 61
- 141.295 Part 141 operators—carriage of passengers prohibited during abnormal operations or low-flying flight training
- 141.300 Part 141 operators—authorisation of carriage of passengers
- 141.305 Part 141 operators—completion of training and assessment of competency for certain solo flights
- 141.306 Part 141 operators—appropriate briefing and capability to conduct certain solo flights etc.
- 141.310 Part 141 operators—dealings in relation to suspended, cancelled, varied, pending or refused civil aviation authorisations: when approval required
- 141.315 Part 141 operators—maximum period for use of foreign registered aircraft in Australian territory

Subpart 141.A—General

141.005 What Part 141 is about

This Part:

- (a) deals with the conduct of recreational, private and commercial pilot flight training, other than certain integrated training courses; and
- (b) makes provision for applicants for, and holders of, Part 141 certificates.

141.010 Aircraft and flight simulation training devices to which Part 141 applies

- (1) This Part applies only to the following:
 - (a) an aeroplane, rotorcraft or airship that is permitted by its flight manual to be flown by one pilot;
 - (b) an aeroplane, rotorcraft or airship covered by a type rating mentioned in a legislative instrument under regulation 142.045;
 - (c) a flight simulation training device for an aircraft mentioned in paragraph (a) or (b).
- (2) Accordingly, a reference in this Part to an *aircraft* is a reference to an aeroplane, rotorcraft or airship mentioned in paragraph (1)(a) or (b).

141.015 Definitions of *Part 141 flight training, authorised Part 141 flight training, Part 141 operator and Part 141 certificate*

- (1) *Part 141 flight training* is any of the following that is conducted in an aircraft or flight simulation training device:
 - (a) training for the grant under Part 61 of a private pilot licence or commercial pilot licence that is not an integrated training course;
 - (b) training for the grant under Part 61 of a recreational pilot licence;
 - (c) training, other than training conducted as a multi-crew operation, for the grant under Part 61 of a flight crew rating other than a type rating;
 - (d) training for the grant under Part 61 of a type rating mentioned in a legislative instrument under regulation 142.045;
 - (e) training, other than training conducted as a multi-crew operation, for the grant under Part 61 of a flight crew endorsement other than:
 - (i) a design feature endorsement; or
 - (ii) a flight activity endorsement;
 - (f) training, other than training conducted as a multi-crew operation, that is given as part of a flight review;
 - (g) differences training:
 - (i) that is required as mentioned in regulation 61.780 or 61.835 for a variant covered by a type rating mentioned in a legislative instrument under regulation 142.045; and

Regulation 141.020

-
- (ii) that is not conducted by an operator that has a training and checking system that is in accordance with the requirements of Part 119 or 138.
 - (2) **Authorised Part 141 flight training**, for a Part 141 operator, is Part 141 flight training mentioned in the operator's Part 141 certificate.
 - (3) A **Part 141 operator** is the holder of a Part 141 certificate.
 - (4) A **Part 141 certificate** is a certificate issued under regulation 141.060.

141.020 Definition of key personnel for Part 141

In this Part:

key personnel, for a Part 141 operator, means the people (however described) that hold, or carry out the responsibilities of, the following positions in the operator's organisation:

- (a) chief executive officer;
- (b) head of operations.

141.025 Definition of significant change for Part 141

In this Part:

significant change, for a Part 141 operator, means:

- (a) a change in relation to any of the following:
 - (i) the location and operation of any of the operator's training bases, including the opening or closing of training bases;
 - (ii) the operator's key personnel;
 - (iii) a person authorised to carry out the responsibilities of any of the key personnel;
 - (iv) the formal reporting line for a managerial or operational position reporting directly to any of the key personnel;
 - (v) the qualifications, experience and responsibilities required by the operator for any of the key personnel;
 - (vi) the familiarisation training mentioned in regulation 141.115 for any of the key personnel;
 - (vii) the operator's process for making changes:
 - (A) that are significant changes; and
 - (B) that are not significant changes;
 - (viii) the authorised Part 141 flight training conducted by the operator;
 - (ix) if the operator conducts the training in aircraft—the kinds of aircraft used to conduct the training;
 - (x) if the operator conducts the training in flight simulation training devices:
 - (A) the ownership arrangements for a device; or
 - (B) the types of devices; or
- (b) if the operator conducts the training in foreign registered aircraft:

Regulation 141.030

- (i) a change in the foreign registered aircraft used in the training; or
- (ii) a change in relation to a foreign registered aircraft used in the training, including a change to its nationality or registration mark; or
- (c) a change in relation to any of the following that does not maintain or improve, or is not likely to maintain or improve, aviation safety:
 - (i) the procedures by which the operator conducts and manages the training;
 - (ii) training and checking conducted by the operator;
 - (iii) the operator's dangerous goods manual (if any);
 - (iv) the way the operator manages the risk of fatigue in its personnel;
 - (v) the operator's safety policy;
 - (vi) the operator's quality system; or
- (d) a change required to be approved by CASA under these Regulations, other than a change that results in the reissue or replacement of an instrument previously issued by CASA in which the conditions or other substantive content of the instrument are unchanged.

141.030 Definitions for Part 141

In this Part:

aircraft: see regulation 141.010.

authorised Part 141 flight training, for a Part 141 operator: see subregulation 141.015(2).

conducts: a Part 141 operator **conducts** Part 141 flight training if an instructor for the operator conducts the training on behalf of the operator.

instructor, for a Part 141 operator, means a person engaged by the operator to conduct authorised Part 141 flight training on behalf of the operator.

key personnel, for a Part 141 operator: see regulation 141.020.

low-flying flight training means flight training that is conducted below 500 feet AGL.

operations manual, for a Part 141 operator, means:

- (a) the set of documents approved by CASA under regulation 141.065 in relation to the operator; or
- (b) if the set of documents is changed under regulation 141.080, 141.090 or 141.100 or the process mentioned in regulation 141.095—the set of documents as changed.

Part 141 certificate: see subregulation 141.015(4).

Part 141 flight training: see subregulation 141.015(1).

Regulation 141.035

personnel, for a Part 141 operator, includes any of the following persons who have duties or responsibilities that relate to the safe conduct of the operator's authorised Part 141 flight training:

- (a) an employee of the operator;
- (b) a person engaged by the operator (whether by contract or other arrangement) to provide services to the operator;
- (c) an employee of a person mentioned in paragraph (b).

significant change, for a Part 141 operator: see regulation 141.025.

training and checking, for a Part 141 operator, means the training and assessment of proficiency that the operator conducts to ensure that its personnel are competent to perform their duties.

training base, for a Part 141 operator, means a facility from which the operator conducts flight training.

141.035 Approvals by CASA for Part 141

- (1) If a provision of this Part refers to a person holding an approval under this regulation, the person may apply to CASA, in writing, for the approval.
- (2) Subject to regulation 11.055, CASA must grant the approval.
- (3) Subregulation 11.055(1B) applies to the granting of an approval under this regulation.

141.040 Legislative instruments—flight training

For paragraph 98(5A)(a) of the Act, CASA may issue a legislative instrument to prescribe matters for paragraph 141.260(1)(u).

141.045 Regulations 11.070 to 11.075 do not apply in relation to certain matters

Regulations 11.070 to 11.075 do not apply to the following for a Part 141 operator:

- (a) a change of which CASA is notified under regulation 141.080;
- (b) a significant change that is approved by CASA under regulation 141.090;
- (c) a change made under the process mentioned in regulation 141.095;
- (d) a change that is made as a consequence of a change made to the operator's operations manual in accordance with a direction given by CASA under regulation 141.100.

141.050 Part 141 flight training—requirement for Part 141 certificate or approval

- (1) A person commits an offence if:
 - (a) the person conducts Part 141 flight training; and
 - (b) the person does not meet the requirement mentioned in subregulation (2).

Part 141 Recreational, private and commercial pilot flight training, other than certain integrated training courses

Subpart 141.A General

Regulation 141.050

Penalty: 50 penalty units.

- (2) For paragraph (1)(b), the requirement is that the person must hold:
 - (a) a Part 141 certificate that authorises the person to conduct the training; or
 - (b) an approval under regulation 141.035 to conduct the training.
- (3) An offence against this regulation is an offence of strict liability.

Subpart 141.B—Part 141 certificates

141.055 Part 141 certificates—application

- (1) A person may apply to CASA, in writing, for a Part 141 certificate.
- (2) The application must include the following:
 - (a) the applicant's name (including any operating or trading name), contact details and ABN (if any);
 - (aa) if the address of the applicant's operational headquarters is different from its mailing address—the address of its operational headquarters;
 - (b) if the applicant is an individual—a statement that the individual is, or proposes to be, the applicant's chief executive officer;
 - (c) if the applicant is a corporation registered in Australia that has an ACN—its ACN and the address of its registered office;
 - (d) if the applicant is a corporation not registered in Australia—the place it was incorporated or formed;
 - (e) the Part 141 flight training that the applicant proposes to conduct;
 - (f) a written undertaking from the person appointed, or proposed to be appointed, as the applicant's chief executive officer that, if CASA issues the certificate, the applicant will:
 - (i) be capable of operating in accordance with its operations manual and civil aviation legislation; and
 - (ii) operate in accordance with its operations manual and civil aviation legislation.
- (3) The application must be:
 - (a) accompanied by a copy of the applicant's proposed operations manual; and
 - (b) signed by the person appointed, or proposed to be appointed, as the applicant's chief executive officer.

141.060 Part 141 certificate—issue

- (1) Subject to regulation 11.055, CASA must issue the certificate if satisfied of each of the following:
 - (a) the applicant's proposed operations manual complies with regulation 141.260;
 - (b) the applicant can conduct the proposed Part 141 flight training safely and in accordance with its operations manual and civil aviation legislation;
 - (c) the applicant's organisation is suitable to ensure that the training can be conducted safely, having regard to the nature of the training;
 - (d) the chain of command of the applicant's organisation is appropriate to ensure that the training can be conducted safely;
 - (e) the applicant's organisation has a sufficient number of suitably qualified and competent personnel to conduct the training safely;

Regulation 141.060

- (f) the facilities of the applicant's organisation are sufficient to enable the training to be conducted safely;
 - (g) the applicant's organisation has suitable procedures and practices to control the organisation and ensure the training can be conducted safely;
 - (h) if the applicant is an individual—the applicant is, or proposes to be, the applicant's chief executive officer;
 - (i) each of the applicant's proposed key personnel:
 - (i) is a fit and proper person to be appointed to the position; and
 - (ii) has the qualifications and experience required by Subpart 141.D for the position; and
 - (iii) has the qualifications and experience required by the applicant under subparagraph 141.260(1)(e)(i) for the position (if any); and
 - (iv) has the additional qualifications and experience required by CASA under regulation 141.155 for the position (if any).
- (2) For paragraph (1)(b), without limiting the matters that CASA may consider, CASA must consider the following:
- (a) the applicant's proposed operations manual;
 - (b) whether the applicant can comply with the proposed operations manual;
 - (c) the content of the undertaking mentioned in paragraph 141.055(2)(f);
 - (d) details of, and reasons for, any suspension or cancellation of:
 - (i) a civil aviation authorisation issued to the applicant; or
 - (ii) an equivalent authorisation issued to the applicant:
 - (A) under the law of a foreign country; or
 - (B) by a multinational aviation authority;
 - (e) the suitability of the applicant's corporate and organisational structures for the training;
 - (f) any other information:
 - (i) accompanying the application; or
 - (ii) in any other document given to CASA by the applicant for the application, including any document requested by CASA in relation to the application.
- (3) For subparagraph (1)(i)(i), the matters CASA may consider in deciding whether a person is a fit and proper person include the matters mentioned in subregulation 11.055(4).
- (4) If CASA decides to issue the certificate, CASA must determine the Part 141 flight training the applicant is authorised to conduct, including any limitations or conditions in relation to the flight training.
- (5) The certificate must include:
- (a) the matters mentioned in subregulation (4); and
 - (b) a certificate reference number determined by CASA.
- (6) If CASA approves a significant change to a Part 141 operator under regulation 141.090, CASA may issue a new Part 141 certificate to the operator.
-

141.065 Part 141 certificate—approval of operations manual

If CASA issues the certificate to the applicant, CASA is taken to have also approved the applicant's proposed operations manual.

141.070 Part 141 certificate—conditions

Each of the following is a condition of a Part 141 certificate issued to an operator:

- (a) the operator must comply with:
 - (i) each provision of this Part that applies to the operator; and
 - (ii) each direction given to the operator, or obligation imposed on the operator, by CASA under a provision of these Regulations; and
 - (iii) each other provision of civil aviation legislation that applies to the operator's authorised Part 141 flight training;
- (b) each of the operator's key personnel must comply with:
 - (i) each provision of this Part that applies to the person; and
 - (ii) each direction given to the person, or obligation imposed on the person, by CASA under a provision of these Regulations; and
 - (iii) each other provision of civil aviation legislation that applies to the operator's authorised Part 141 flight training;
- (c) each of the positions of the operator's key personnel must be filled;
- (d) each of the operator's personnel must comply with each provision of civil aviation legislation that applies to the operator's authorised Part 141 flight training;
- (e) if the operator is an individual—the individual must be the operator's chief executive officer.

141.075 Part 141 certificate—compliance with conditions

- (1) A Part 141 operator commits an offence if the operator contravenes a condition of its Part 141 certificate.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

Subpart 141.C—Part 141 operators—changes

141.080 Part 141 operators—changes of name etc

- (1) A Part 141 operator commits an offence if the operator:
 - (a) makes a change mentioned in subregulation (2); and
 - (b) does not, before making the change:
 - (i) amend its operations manual to reflect the change; and
 - (ii) give CASA written notice of the change and a copy of the amended part of the operations manual clearly identifying the change.

Penalty: 50 penalty units.

- (2) For paragraph (1)(a), the changes are the following:
 - (a) a change to its name (including any operating or trading name) or contact details;
 - (b) if the address of its operational headquarters is different from its mailing address—a change to the address of its operational headquarters.
- (3) An offence against this regulation is an offence of strict liability.

141.085 Part 141 operators—application for approval of significant changes

- (1) A Part 141 operator commits an offence if:
 - (a) the operator makes a significant change other than a significant change mentioned in subregulation (2) or (3); and
 - (b) CASA has not approved the significant change.

Penalty: 50 penalty units.

- (2) A Part 141 operator commits an offence if:
 - (a) the operator makes a significant change that is the permanent appointment as any of the operator's key personnel of a person previously authorised to carry out the responsibilities of the position in a circumstance mentioned in subparagraph 141.260(1)(e)(iv); and
 - (b) the operator does not apply to CASA for approval of the change, in accordance with subregulation (4), within 7 days after the change is made.

Penalty: 50 penalty units.

- (3) A Part 141 operator commits an offence if:
 - (a) the operator makes a significant change that is the permanent appointment as any of the operator's key personnel of a person not previously authorised to carry out the responsibilities of the position in a circumstance mentioned in subparagraph 141.260(1)(e)(iv); and
 - (b) the operator does not apply to CASA for approval of the change, in accordance with subregulation (4), within 3 days after the change is made.

Regulation 141.090

Penalty: 50 penalty units.

- (4) An application for approval of a significant change must:
 - (a) be in writing; and
 - (b) set out the change; and
 - (c) be accompanied by a copy of the part of the operator's operations manual affected by the change, clearly identifying the change.
- (5) An offence against this regulation is an offence of strict liability.

141.090 Part 141 operators—approval of significant changes

- (1) Subject to regulation 11.055, CASA must approve a significant change for a Part 141 operator if satisfied that the requirements mentioned in subregulation 141.060(1) will continue to be met.
- (2) If CASA approves the significant change, CASA is taken to have also approved the changes to the operator's operations manual covered by the application.

141.095 Part 141 operators—process for making changes

- (1) A Part 141 operator commits an offence if:
 - (a) the operator makes a change; and
 - (b) the change is not made in accordance with the process described in the operator's operations manual for making changes.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

141.100 Part 141 operators—CASA directions relating to operations manual or key personnel

- (1) If satisfied that it is necessary in the interests of aviation safety, CASA may direct a Part 141 operator to change its operations manual:
 - (a) to remove particular information, procedures or instructions from the operations manual; or
 - (b) to include particular information, procedures or instructions in the operations manual; or
 - (c) to revise or vary the information, procedures or instructions in the operations manual.
- (2) CASA may direct a Part 141 operator to remove any of the operator's key personnel from the person's position if satisfied that the person is not:
 - (a) carrying out the responsibilities of the position; or
 - (b) if the person is the chief executive officer—properly managing matters for which the person is accountable.
- (3) A direction under this regulation must:

Part 141 Recreational, private and commercial pilot flight training, other than certain integrated training courses

Subpart 141.C Part 141 operators—changes

Regulation 141.100

- (a) be in writing; and
 - (b) state the time within which the direction must be complied with.
- (4) A Part 141 operator commits an offence if:
- (a) CASA gives the operator a direction under this regulation; and
 - (b) the operator does not comply with the direction within the time stated in the direction.

Penalty: 50 penalty units.

- (5) An offence against this regulation is an offence of strict liability.

Subpart 141.D—Part 141 operators—organisation and personnel

141.105 Part 141 operators—organisation and personnel

- (1) A Part 141 operator must maintain an organisational structure that effectively manages its authorised Part 141 flight training, taking into account the following:
 - (a) the nature and complexity of the training;
 - (b) the number and kinds of aircraft or flight simulation training devices used to conduct the training;
 - (c) the number and location of training bases used by the operator;
 - (d) the number of the operator's personnel;
 - (e) the number of course participants undertaking the training.
- (2) A Part 141 operator commits an offence if any of the operator's key personnel carries out a responsibility of the person's position otherwise than in accordance with the operator's operations manual or this Subpart.

Penalty: 50 penalty units.

141.110 Part 141 operators—key personnel cannot carry out responsibilities

- (1) A Part 141 operator commits an offence if:
 - (a) the operator becomes aware that any of its key personnel cannot carry out, or is likely to be unable to carry out, the person's responsibilities for a period of longer than 30 days; and
 - (b) the operator does not tell CASA of the matter mentioned in paragraph (a) within the time mentioned in subregulation (2).

Penalty: 50 penalty units.

- (2) For paragraph (1)(b), the time is:
 - (a) if there is not another person authorised to carry out the responsibilities for all or part of the period—24 hours after the operator becomes aware of the matter; or
 - (b) if there is another person authorised to carry out the responsibilities for all or part of the period—3 days after the operator becomes aware of the matter.

141.115 Part 141 operators—familiarisation training for key personnel

A Part 141 operator must ensure that before a person appointed as any of the operator's key personnel begins to carry out the responsibilities of the position, the person has completed any training that is necessary to familiarise the person with the responsibilities.

Regulation 141.120

141.120 Part 141 operators—chief executive officer: responsibilities and accountabilities

- (1) The chief executive officer of a Part 141 operator is responsible for the following:
 - (a) ensuring that, for the safe conduct of the operator's authorised Part 141 flight training in accordance with the operator's Part 141 certificate, operations manual and civil aviation legislation, the operator:
 - (i) has sufficient suitably experienced, qualified and competent personnel; and
 - (ii) has a suitable management structure; and
 - (iii) is adequately financed and resourced;
 - (b) ensuring that the operator:
 - (i) sets and maintains standards for the training in accordance with the operator's operations manual; and
 - (ii) complies with civil aviation legislation;
 - (c) if the operator conducts the training in aircraft—ensuring that the operator:
 - (i) tells CASA if the operator enters into a leasing, financing or other arrangement for the supply of a turbine-engined aircraft for use in the training; and
 - (ii) tells CASA if the operator becomes aware that any arrangement mentioned in subparagraph (i) may:
 - (A) affect the operator's safe conduct of the training; or
 - (B) contravene a provision of civil aviation legislation or the law of the country in which the aircraft is registered; and
 - (iii) complies with the aviation safety laws of each foreign country (if any) where the operator conducts the training; and
 - (iv) for each foreign registered aircraft (if any) used in the training—maintains the aircraft in accordance with the law of the country in which the aircraft is registered;
 - (ca) ensuring that the operator has procedures that ensure that all of the operator's personnel understand the operator's safety policy;
 - (cb) ensuring that the operator has processes for identifying and addressing deficiencies in the operator's authorised Part 141 training;
 - (d) if the operator conducts the training in a flight simulation training device—ensuring that the operator implements and manages the operator's quality system;
 - (f) ensuring that the operator's operations manual is monitored and managed for continuous improvement;
 - (g) ensuring that key personnel satisfactorily carry out the responsibilities of their positions in accordance with:
 - (i) the operator's operations manual; and
 - (ii) civil aviation legislation.

Regulation 141.125

-
- (2) The chief executive officer of a Part 141 operator is accountable to the operator and CASA for ensuring the responsibilities mentioned in subregulation (1) are carried out effectively.

141.125 Part 141 operators—head of operations: qualifications and experience

- (1) The head of operations of a Part 141 operator must hold:
- (a) an instructor rating and either:
 - (i) a grade 1 training endorsement under Part 61; or
 - (ii) the required training endorsements for all the Part 141 flight training the operator proposes to conduct; or
 - (b) an approval under regulation 141.035 to be the head of operations of the operator.
- (2) For paragraph (1)(b), the matters CASA may consider in deciding whether to approve a person as the head of operations of a Part 141 operator include the following:
- (a) the operator's current and proposed authorised Part 141 flight training;
 - (b) the person's:
 - (i) management experience; and
 - (ii) formal educational qualifications; and
 - (iii) experience as a trainer or educator; and
 - (iv) operational experience; and
 - (v) flight crew qualifications.
- (3) CASA may, by written notice given to a head of operations, or proposed head of operations, of a Part 141 operator, direct the person to undertake an assessment mentioned in subregulation (4).
- (4) For subregulation (3), the assessment:
- (a) is an assessment conducted by CASA or a person nominated by CASA to demonstrate suitability as head of operations for the operator; and
 - (b) may include assessment in an aeroplane, rotorcraft, airship or flight simulation training device.

141.130 Part 141 operators—head of operations: responsibilities

- (1) The head of operations of a Part 141 operator must safely manage the operator's authorised Part 141 flight training.
- (2) Without limiting subregulation (1), the responsibilities of the head of operations include the following:
- (a) ensuring that the operator conducts the training in accordance with principles of competency-based training in a consistent and systematic manner;
 - (b) monitoring and maintaining, and reporting to the chief executive officer on, the operator's compliance with the provisions of civil aviation legislation and the operator's operations manual that apply to the training;

Regulation 141.130

- (c) setting and maintaining the operator's standards for the training in accordance with the operator's operations manual;
- (d) developing, managing and maintaining the operator's dangerous goods manual (if any);
- (e) ensuring the proper allocation and deployment of aircraft and personnel for use in the training;
- (f) ensuring that the operator's personnel are provided with the information and documentation necessary to properly carry out their responsibilities;
- (g) ensuring that the operator has procedures that include the information mentioned in subregulation (3);
- (h) ensuring that the requirements mentioned in subregulation (4) are complied with for the training;
- (i) if the operator conducts the training in a flight simulation training device:
 - (i) ensuring the correct operation and maintenance of the device; and
 - (ii) ensuring that the device is used only in accordance with the operator's operations manual;
- (j) if the operator conducts the training in a flight simulator or flight training device—ensuring that the simulator or device is qualified under Part 60;
- (k) if the operator conducts the training in a synthetic trainer—ensuring that the trainer is approved under Civil Aviation Order 45.0;
- (l) if the operator conducts the training in any other device—ensuring that the device:
 - (i) meets the qualification standards prescribed by a legislative instrument under regulation 61.045; or
 - (ii) is qualified (however described) by the national aviation authority of a recognised foreign State (within the meaning of regulation 61.010);
- (m) managing the maintenance and continuous improvement of the operator's fatigue risk management system (if any);
- (n) ensuring the operator's personnel understand the operator's safety policy;
- (o) implementing and managing the operator's processes for identifying and addressing deficiencies in training outcomes for the operator's authorised Part 141 training, including the processes mentioned in subregulation (5).

Note: For the definition of *civil aviation legislation*, see section 3 of the Act.

- (3) For paragraph (2)(g), the information is the following:
 - (a) a training plan and syllabus for each kind of training;
 - (b) a description of the operator's process to determine the competency of course participants;
 - (c) a description of the operator's process to manage underperformance of course participants;
 - (d) a description of how the operator ensures supervision of course participants when they are receiving training;
 - (e) information about how the operator:
 - (i) plans, delivers and reviews the training; and

Regulation 141.155

- (ii) monitors the progress of course participants to clearly defined knowledge and flight standards; and
 - (iii) maintains records of the results achieved by course participants in training activities and assessments; and
 - (iv) ensures that it has the training facilities and resources to provide the training; and
 - (v) maintains its training facilities and resources.
- (4) For paragraph (2)(h), the requirements are the following:
- (a) the conduct of the training must be monitored effectively;
 - (b) each instructor who conducts the training must:
 - (i) be authorised under Part 61 to conduct the training; and
 - (ii) meet the requirements in the operator's operations manual about training in human factors principles and non-technical skills; and
 - (iii) have an understanding of the operator's training syllabus for the training; and
 - (iv) hold a valid standardisation and proficiency check for the operator under regulation 141.190; and
 - (v) be supervised effectively; and
 - (vi) comply with the operator's operations manual.
- (5) For paragraph (2)(o), the processes are the following:
- (a) a process for auditing the training;
 - (b) a process for promoting the continual improvement of the training;
 - (c) a process for evaluating the training outcomes from pre-flight test assessments and post-flight test feedback from flight examiners;
 - (d) a process for regularly assessing the suitability of the operator's facilities and resources for conducting the training;
 - (e) a process for recommending changes to a process mentioned in paragraphs (a), (b), (c) or (d).

141.155 Part 141 operators—key personnel: additional qualification and experience requirements

- (1) This regulation applies to:
- (a) an applicant for a Part 141 certificate; or
 - (b) a Part 141 operator.
- (2) CASA may, by written notice given to the applicant or operator, direct that any of the key personnel of the applicant or operator must have stated additional qualifications or experience to those otherwise required under this Subpart.
- (3) If satisfied that it is necessary in the interests of aviation safety, CASA may, by written notice given to a person who is, or is proposed to be, any of the key personnel of the applicant or operator, direct the person:
- (a) to undertake a stated examination; or
 - (b) to be interviewed by CASA; or

Part 141 Recreational, private and commercial pilot flight training, other than certain integrated training courses

Subpart 141.D Part 141 operators—organisation and personnel

Regulation 141.160

(c) to complete a stated training course.

- (4) In deciding whether to give a direction under this regulation, CASA must have regard to, but is not limited to considering, the following:
- (a) the need to ensure that the applicant or operator can conduct safe authorised Part 141 flight training in accordance with its operations manual and civil aviation legislation;
 - (b) the nature and complexity of the training;
 - (c) the leadership, management and standards-setting skills required by the person for the training;
 - (d) how recently the person has used his or her aviation skills;
 - (e) whether the person is able to exercise the privileges of each civil aviation authorisation held by the person.

141.160 Part 141 operators—reference library

- (1) A Part 141 operator commits an offence if the operator does not maintain a reference library that complies with subregulation (2).

Penalty: 50 penalty units.

- (2) For subregulation (1), the reference library must:
- (a) include the following documents:
 - (i) all operational documents and material;
 - (ii) the civil aviation legislation that is relevant to the operator's authorised Part 141 flight training;
 - (iii) the parts of the AIP that are relevant to the training;
 - (iv) documents that include information about the flight operations of each kind of aircraft operated by the operator to conduct the training that is necessary to ensure the safe conduct of the training;
 - (v) documents that include information about the operation or maintenance of each kind of flight simulation training device operated by the operator to conduct the training;
 - (vi) any other publications, information or data required for the reference library by the operator's operations manual; and
 - (b) be readily available to all members of the operator's personnel; and
 - (c) be up-to-date and in a readily accessible form.
- (3) A Part 141 operator commits an offence if the operator does not keep up-to-date records of the distribution of operational documents to members of the operator's personnel.

Penalty: 50 penalty units.

- (4) An offence against this regulation is an offence of strict liability.

Subpart 141.E—Part 141 operators—instructors

141.165 Part 141 operators—instructors must comply with Part 141 certificate

- (1) An instructor for a Part 141 operator commits an offence if the instructor conducts Part 141 flight training otherwise than in accordance with the operator's Part 141 certificate.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

141.170 Part 141 operators—instructors must comply with operations manual

- (1) An instructor for a Part 141 operator commits an offence if the instructor conducts authorised Part 141 flight training for the operator otherwise than in accordance with the operator's operations manual.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

141.175 Part 141 operators—instructors must be authorised under Part 61

- (1) A Part 141 operator commits an offence if:
 - (a) an instructor for the operator conducts authorised Part 141 flight training for the operator; and
 - (b) the instructor is not authorised under Part 61 to conduct the training.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

141.180 Part 141 operators—instructors must have access to records

- (1) A Part 141 operator commits an offence if:
 - (a) an instructor for the operator conducts authorised Part 141 flight training for the operator; and
 - (b) the instructor does not have access to the operator's training records for course participants.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

141.185 Part 141 operators—instructors must hold valid standardisation and proficiency check for operator

- (1) A Part 141 operator commits an offence if:
-

Part 141 Recreational, private and commercial pilot flight training, other than certain integrated training courses

Subpart 141.E Part 141 operators—instructors

Regulation 141.190

- (a) an instructor for the operator conducts authorised Part 141 flight training for the operator; and
- (b) the instructor does not hold a valid standardisation and proficiency check for the operator under regulation 141.190.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

141.190 Part 141 operators—holding valid standardisation and proficiency check for operator

- (1) An instructor for a Part 141 operator holds a valid standardisation and proficiency check for the operator if:
 - (a) the instructor has successfully completed the operator's standardisation and proficiency check; and
 - (b) the check complies with regulation 141.195; and
 - (c) under subregulation (2) or (3), the check is valid.
- (2) A standardisation and proficiency check is valid for the period comprising:
 - (a) the period beginning on the day on which the check is completed, and ending at the end of the month in which the check is completed; and
 - (b) the period of 12 months immediately following the month in which the check was completed.
- (3) If:
 - (a) an instructor holds a standardisation and proficiency check that is valid under subregulation (2) (the *existing check*); and
 - (b) the instructor successfully completes a new standardisation and proficiency check on a day that is less than 3 months before the day on which the existing check is due to expire;

the new check is valid for 12 months beginning at the end of the day on which the existing check expires.

141.195 Part 141 operators—standardisation and proficiency check requirements

- (1) A Part 141 operator's standardisation and proficiency check for an instructor must, for the flight training that the operator has engaged the instructor to conduct, check the competency of the instructor to:
 - (a) deliver ground briefings in accordance with the operator's training syllabus; and
 - (b) deliver flight training in an aircraft or flight simulation training device in accordance with the operator's training syllabus.
- (2) The check must be carried out by:
 - (a) the operator's head of operations; or

Regulation 141.200

- (b) a person authorised to conduct the check by the operator's head of operations.

141.200 Part 141 operators—instructors—training in human factors principles and non-technical skills

- (1) A Part 141 operator commits an offence if:
- (a) an instructor for the operator conducts authorised Part 141 flight training for the operator; and
 - (b) the instructor does not meet the requirements in the operator's operations manual about training in human factors principles and non-technical skills.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

141.205 Part 141 operators—instructors must be competent to conduct flight training in flight simulation training device

- (1) A Part 141 operator commits an offence if:
- (a) an instructor for the operator conducts authorised Part 141 flight training for the operator in a flight simulation training device; and
 - (b) the instructor has not been assessed by the operator as competent to conduct the training in the device.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

141.210 Part 141 operators—person recommended for flight test

- (1) A Part 141 operator and the operator's head of operations each commit an offence if:
- (a) a person is recommended for a flight test by:
 - (i) the head of operations; or
 - (ii) a person named in the operator's operations manual as responsible for the authorised Part 141 flight training to which the flight test relates; and
 - (b) the person is not eligible under regulation 61.235 to undertake the test.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

Part 141 Recreational, private and commercial pilot flight training, other than certain integrated training courses

Subpart 141.G Part 141 operators—quality system

Regulation 141.225

Subpart 141.G—Part 141 operators—quality system

141.225 Part 141 operators—quality system for flight simulation training devices

- (1) A Part 141 operator that conducts authorised Part 141 flight training in a flight simulation training device must have a quality system that ensures the correct operation and maintenance of the device.
- (2) The quality system must cover at least the following matters:
 - (a) quality policy;
 - (b) management responsibility;
 - (c) document control;
 - (d) resource allocation;
 - (e) quality procedures;
 - (f) internal audit.

Subpart 141.H—Part 141 operators—personnel fatigue management

Note: This Subpart is reserved for future use.

Regulation 141.260

Subpart 141.I—Part 141 operators—operations manuals

141.260 Part 141 operators—content of operations manual

- (1) An operations manual for a Part 141 operator must include the following:
 - (a) the operator's name (including any operating or trading name), contact details and ABN (if any);
 - (b) the address of:
 - (i) the operator's operational headquarters; and
 - (ii) each of the operator's training bases;
 - (c) a description and diagram of the operator's organisational structure showing formal reporting lines including the formal reporting lines for each of the key personnel;
 - (d) if the operator is a corporation—a description of the operator's corporate structure;
 - (e) for each of the key personnel, the following information:
 - (i) the qualifications and experience (if any) required by the operator for the position in addition to the qualifications and experience required under Subpart 141.D for the position;
 - (ii) each matter (if any) for which the holder of the position is responsible in addition to the responsibilities mentioned in Subpart 141.D for the position;
 - (iii) the name of the person appointed to the position;
 - (iv) the name of each person authorised to carry out the responsibilities of the position when the position holder:
 - (A) is absent from the position; or
 - (B) cannot carry out the responsibilities;
 - (v) a description of how the operator will manage the responsibilities of the position during a circumstance mentioned in subparagraph (iv);
 - (f) each matter (if any) for which the chief executive officer is accountable in addition to the matters mentioned in regulation 141.120;
 - (g) the name of each instructor appointed by the operator's head of operations to have responsibility for particular authorised Part 141 flight training;
 - (h) a description of the operator's program for training and assessing personnel in human factors principles and non-technical skills;
 - (i) details of the responsibilities of the operator's personnel (other than key personnel) under these Regulations;
 - (j) a description of the authorised Part 141 flight training conducted by the operator including the training plans and syllabuses for the training;
 - (k) a description of the procedures by which the operator conducts and manages the training, including the supervision of instructors and course participants;
 - (l) if the operator conducts the training in aircraft:

Regulation 141.260

- (i) for each registered aircraft—the kind of aircraft and its registration mark; and
- (ii) for each foreign registered aircraft—the kind of aircraft and its nationality and registration marks; and
- (iii) a description of any leasing or other arrangements for the supply of any turbine-engined aircraft; and
- (iv) a description of the way any turbine-engined aircraft are managed and maintained, and the way continuing airworthiness of the aircraft is assured; and
- (v) a description of each flight training area;
- (m) if the training includes training for a flight crew licence or rating of a kind for which low-flying flight training is required—a description of how the operator will determine a suitable flight training area for the training;
- (ma) a description of the operator’s safety policy;
- (mb) a description of how the operator will identify and address deficiencies in training outcomes of its authorised Part 141 flight training, including the operator’s processes for:
 - (i) auditing the training; and
 - (ii) promoting the continual improvement of the training; and
 - (iii) evaluating the training outcomes from pre-flight test assessments and post-flight test feedback from flight examiners; and
 - (iv) regularly assessing the suitability of the operator’s facilities and resources for conducting the training; and
 - (v) recommending changes to a process mentioned in subparagraph (i), (ii), (iii) or (iv);
- (n) if the operator conducts the training in flight simulation training devices:
 - (ia) a description of the operator’s quality system;
 - (i) a description of the devices used by the operator in conducting the training; and
 - (ii) for each device—each purpose mentioned in Part 61 that the device may be used for; and
 - (iii) for flight simulators and flight training devices—a description of the procedures by which the operator ensures the qualification of the simulators and devices under Part 60; and
 - (iv) for synthetic trainers—a description of the procedures by which the operator ensures the approval of the trainers under Civil Aviation Order 45.0; and
 - (v) for any other device—a description of the procedures by which the operator ensures that the device:
 - (A) meets the qualification standards prescribed by a legislative instrument under regulation 61.045; or
 - (B) is qualified (however described) by the national aviation authority of a recognised foreign State (within the meaning of regulation 61.010);

Regulation 141.265

- (o) a description of the way the operator manages the risk of fatigue in its personnel, including the operator's fatigue risk management system manual (if any);
 - (p) the facilities used by the operator for the activities;
 - (q) a description of any operations, other than the training, conducted by the operator;
 - (r) a dangerous goods manual (if any);
 - (s) a description of the operator's process for making changes including:
 - (i) identifying changes that are significant changes; and
 - (ii) identifying changes that are not significant changes; and
 - (iii) telling CASA of the changes;
 - (t) a description of any other matter required to be approved by CASA under these Regulations in relation to the training;
 - (u) a matter prescribed by a legislative instrument under regulation 141.040 for this paragraph.
- (2) An operations manual for a Part 141 operator may include a list of material required for the operator's reference library.

141.265 Part 141 operators—compliance with operations manual by operator

- (1) A Part 141 operator commits an offence if the operator contravenes a provision of its operations manual.
- Penalty: 50 penalty units.
- (2) An offence against this regulation is an offence of strict liability.

141.270 Part 141 operators—providing personnel with operations manual

- (1) A Part 141 operator commits an offence if:
- (a) the operator's operations manual relates to a duty or responsibility of a person who is a member of the operator's personnel; and
 - (b) the operator does not make the part of the operations manual that relates to the duty or responsibility available to the person before the person first begins carrying out the duty or responsibility.
- Penalty: 50 penalty units.
- (2) An offence against this regulation is an offence of strict liability.

Subpart 141.J—Part 141 operators—logs and records

141.275 Part 141 operators—making and keeping flight training records

- (1) A Part 141 operator commits an offence if:
 - (a) a person completes a session of the operator’s authorised Part 141 flight training; and
 - (b) a record of the training is not made within 7 days after the session.

Penalty: 50 penalty units.

- (2) A Part 141 operator commits an offence if the operator does not retain a record made under subregulation (1) for at least 7 years after the record is made.

Penalty: 50 penalty units.

- (3) An offence against this regulation is an offence of strict liability.

141.280 Part 141 operators—availability of flight training records

- (1) A Part 141 operator commits an offence if:
 - (a) a record is made under regulation 141.275; and
 - (b) the operator does not give a copy of the record to the person to whom it relates within 7 days after the record is made.

Penalty: 50 penalty units.

- (2) A Part 141 operator commits an offence if:
 - (a) a record is made under regulation 141.275; and
 - (b) the operator receives a request from another Part 141 operator for a copy of the record; and
 - (c) the operator holds a written authority from the person to whom the record relates to provide a copy of the person’s records to another Part 141 operator if requested; and
 - (d) the operator does not give a copy of the record to the other Part 141 operator within 7 days after receiving the request.

Penalty: 50 penalty units.

- (3) An offence against this regulation is an offence of strict liability.

Part 141 Recreational, private and commercial pilot flight training, other than certain integrated training courses

Subpart 141.K Part 141 operators—miscellaneous offences

Regulation 141.285

Subpart 141.K—Part 141 operators—miscellaneous offences

141.285 Part 141 operators—suitable facilities, records and resources for flight test

- (1) This regulation applies if a Part 141 operator arranges with a flight examiner for the examiner to conduct a flight test.
- (2) The Part 141 operator commits an offence if suitable facilities, records and resources are not available to the flight examiner for the flight test.

Penalty: 50 penalty units.

141.290 Part 141 operators—pilot in command to be authorised under Part 61

- (1) A Part 141 operator commits an offence if:
 - (a) a person flies an aircraft used in the operator's authorised Part 141 flight training as pilot in command; and
 - (b) the person is not authorised under Part 61 to fly the aircraft as pilot in command.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

Note: See also subsection 20AB(1) of the Act.

141.295 Part 141 operators—carriage of passengers prohibited during abnormal operations or low-flying flight training

- (1) A Part 141 operator commits an offence if:
 - (a) during a flight of an aircraft for authorised Part 141 flight training for the operator:
 - (i) a simulated engine or system failure that affects the aircraft's performance or handling characteristics is conducted; or
 - (ii) low-flying flight training is conducted; and
 - (b) a passenger is carried on the flight.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

141.300 Part 141 operators—authorisation of carriage of passengers

- (1) A Part 141 operator commits an offence if:
 - (a) a person flies an aircraft used in the operator's authorised Part 141 flight training as pilot in command; and

Regulation 141.305

- (b) the operator authorises the carriage of a passenger on the flight; and
- (c) the person is not authorised under Part 61 to fly the aircraft as pilot in command with a passenger on board.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

141.305 Part 141 operators—completion of training and assessment of competency for certain solo flights

Student pilots

- (1) A Part 141 operator commits an offence if:
 - (a) a student pilot who is undertaking authorised Part 141 flight training with the operator conducts a solo flight of a kind mentioned in subregulation (2) for the first time; and
 - (b) the student pilot does not meet the requirements mentioned in subregulation (3).

Penalty: 50 penalty units.

- (2) For paragraph (1)(a), the kinds of solo flight are the following:
 - (a) a circuit training flight;
 - (b) a flight between an aerodrome and the flight training area for the aerodrome;
 - (c) a cross-country flight;
 - (d) a flight at night.
- (3) For paragraph (1)(b), the requirements are the following:
 - (a) the student pilot must have completed the training mentioned in the operator's operations manual that relates to the conduct of a solo flight of that kind by a student pilot;
 - (b) the student pilot must have been assessed by the operator as competent to conduct the solo flight;
 - (c) if the flight is a flight of a kind mentioned in paragraph (2)(c) or (d)—the student pilot must have completed at least 2 hours of dual instrument time, 1 hour of which is conducted during dual instrument flight time.

Holders of pilot licences

- (4) A Part 141 operator commits an offence if:
 - (a) the holder of a pilot licence who is receiving flight training from the operator for a rating or endorsement on the pilot's licence conducts a solo flight at night for the first time; and
 - (b) the flight training is authorised Part 141 training for the operator; and
 - (c) the holder does not meet the requirements mentioned in subregulation (5).

Regulation 141.306

Penalty: 50 penalty units.

- (5) For paragraph (4)(c), the requirements are the following:
- (a) the holder must have completed the training mentioned in the operator's operations manual that relates to the conduct of a solo flight for flight training for the rating or endorsement;
 - (b) the holder must have been assessed by the operator as competent to conduct the solo flight.
- (6) A Part 141 operator commits an offence if:
- (a) the holder of a pilot licence who is receiving flight training from the operator for a recreational navigation endorsement conducts a solo cross-country flight or a flight at night for the first time; and
 - (b) the holder has not completed at least 2 hours of dual instrument time, 1 hour of which is conducted during dual instrument flight time.

Penalty: 50 penalty units.

- (7) An offence against this regulation is an offence of strict liability.

Note: See also Subdivision 61.A.3.1 and regulation 61.1225.

141.306 Part 141 operators—appropriate briefing and capability to conduct certain solo flights etc.

- (1) A Part 141 operator commits an offence if:
- (a) a person who is undertaking authorised Part 141 flight training with the operator conducts a solo flight for the first time; and
 - (b) the person does not meet the requirements mentioned in subregulation (2).

Penalty: 50 penalty units.

- (2) For paragraph (1)(b), the requirements are the following:
- (a) the person must have been briefed appropriately for the flight;
 - (b) the person must be capable of conducting the flight safely;
 - (c) if the person is a student pilot—the person must:
 - (i) have been assessed by CASA or an examiner as meeting the general English language proficiency standard mentioned in the Part 61 Manual of Standards; or
 - (ii) have completed an approved course of training in English language proficiency;
 - (d) the person must have an ARN.

- (3) Strict liability applies to paragraph (1)(a).

Note: See also Subdivision 61.A.3.1 and regulation 61.1225.

141.310 Part 141 operators—dealings in relation to suspended, cancelled, varied, pending or refused civil aviation authorisations: when approval required

Requirement for approval

- (1) A Part 141 operator commits an offence if:
- (a) the operator does an act mentioned in subregulation (2), (4), (6) or (8); and
 - (b) the operator does not hold an approval under regulation 141.035 to do the act.

Penalty: 50 penalty units.

Acts in relation to cancelled authorisations

- (2) For paragraph (1)(a), the acts are the following:
- (a) to use, in any of the operator's authorised Part 141 flight training, an aircraft the operation of which was authorised by a cancelled authorisation;
 - (b) to employ, in connection with any of the operator's authorised Part 141 flight training, a person who was, at the time of the cancellation, employed in connection with an operation the conduct of which was authorised by a cancelled authorisation;
 - (c) to conduct an operation, or part of an operation, the conduct of which was authorised by a cancelled authorisation.

Acts in relation to suspended or varied authorisations

- (3) Subregulation (4) applies in relation to a suspended or varied authorisation.
- (4) For paragraph (1)(a), the acts are the following:
- (a) to use, in any of the operator's authorised Part 141 flight training, an aircraft the operation of which:
 - (i) was, immediately before the suspension or variation, authorised by the authorisation; but
 - (ii) is no longer authorised by the authorisation as suspended or varied;
 - (b) to employ, in connection with any of the operator's authorised Part 141 flight training, a person who was, at the time of the suspension or variation, employed in connection with an operation the conduct of which:
 - (i) was, immediately before the suspension or variation, authorised by the authorisation; but
 - (ii) is no longer authorised by the authorisation as suspended or varied;
 - (c) to conduct an operation, or part of an operation, the conduct of which:
 - (i) was, immediately before the suspension or variation, authorised by the authorisation; but
 - (ii) is no longer authorised by the authorisation as suspended or varied.

Note: See section 28BB of the Act in relation to varying AOC conditions.

Regulation 141.315

Pending applications for authorisations

- (5) Subregulation (6) applies in relation to an application for a civil aviation authorisation that has not been finally determined by CASA.
- (6) For paragraph (1)(a), the acts are the following:
 - (a) to use, in any of the operator's authorised Part 141 flight training, an aircraft the operation of which would be authorised by the authorisation;
 - (b) to employ, in connection with any of the operator's authorised Part 141 flight training, a person employed, or proposed to be employed, in connection with an operation the conduct of which would be authorised by the authorisation;
 - (c) to conduct an operation, or part of an operation, the conduct of which would be authorised by the authorisation.

Application for authorisation refused

- (7) Subregulation (8) applies in relation to an application for a civil aviation authorisation that has been refused by CASA.
- (8) For paragraph (1)(a), the acts are the following:
 - (a) to use, in any of the operator's authorised Part 141 flight training, an aircraft the use of which would have been authorised by the authorisation;
 - (b) to employ, in connection with any of the operator's authorised Part 141 flight training, a person employed, or proposed to be employed, in connection with an operation the conduct of which would have been authorised by the authorisation;
 - (c) to conduct an operation, or part of an operation, the conduct of which would have been authorised by the authorisation.
- (9) An offence against this regulation is an offence of strict liability.
- (10) In this regulation:

cancelled authorisation means a civil aviation authorisation that has been cancelled otherwise than on application by the holder of the authorisation.

employ includes engage, whether by contract or other arrangement.

suspended authorisation means a civil aviation authorisation that has been suspended otherwise than on application by the holder of the authorisation.

varied authorisation means a civil aviation authorisation that has been varied otherwise than on application by the holder of the authorisation.

141.315 Part 141 operators—maximum period for use of foreign registered aircraft in Australian territory

- (1) A Part 141 operator commits an offence if, in any 12 month period, the operator uses a foreign registered aircraft to conduct authorised activities in Australian

Regulation 141.315

territory for a total of more than the number of days mentioned in subregulation (2).

Penalty: 50 penalty units.

- (2) For subregulation (1), the number of days is:
- (a) 90; or
 - (b) if the operator holds an approval under regulation 141.035 for this regulation in relation to the aircraft—the number mentioned in the approval for the aircraft.
- (3) An offence against this regulation is an offence of strict liability.
- (4) In this regulation:

authorised activity, for a Part 141 operator, means an activity authorised by a civil aviation authorisation held by the operator.

Part 142—Integrated and multi-crew pilot flight training, contracted training and contracted checking

Table of contents

Subpart 142.A—General

- 142.005 What Part 142 is about
- 142.010 Part 142 applies only to aeroplanes, rotorcraft, airships and flight simulation training devices
- 142.015 Definitions of *Part 142 activity*, *Part 142 flight training*, *Part 142 authorisation*, *Part 142 operator* and *authorised Part 142 activity* for Part 142
- 142.020 Definitions of *contracted checking*, *contracted training* and *contracting operator* for Part 142
- 142.025 Definition of *key personnel* for Part 142
- 142.030 Definition of *significant change* for Part 142
- 142.035 Definitions for Part 142
- 142.040 Approvals by CASA for Part 142
- 142.045 Legislative instruments—Part 142 operators
- 142.050 Part 142 activities—requirement for Part 142 authorisation
- 142.055 Part 142 activities—compliance with Part 142 authorisations: offence for operators
- 142.060 Part 142 activities—compliance with conditions of Part 142 authorisations: offence for operators

Subpart 142.B—Part 142 authorisations

Division 142.B.1—AOCs for Part 142 activities that involve operation of aircraft

- 142.065 Prescribed purpose—Part 142 activities involving the operation of aircraft
- 142.070 Prescribed position—safety manager
- 142.075 Required material—reference library
- 142.080 AOC—application
- 142.085 AOC—conditions for issue
- 142.095 AOC—approval of exposition
- 142.100 AOC—conditions

Division 142.B.2—Certificates for Part 142 activities conducted in flight simulation training devices

- 142.105 Certificate—application
- 142.110 Certificate—issue
- 142.115 Certificate—approval of exposition
- 142.120 Certificate—conditions
- 142.125 Certificate holders—reference library
- 142.130 Certificate holders—regulations 11.070 to 11.075 do not apply in relation to certain matters

Subpart 142.C—Part 142 operators—changes

- 142.135 Part 142 operators—changes of name etc
- 142.140 Part 142 operators—application for approval of significant change
- 142.145 Part 142 operators—approval of significant changes
- 142.150 Part 142 operators—process for making changes

142.155 Part 142 operators—CASA directions relating to exposition or key personnel

Subpart 142.D—Part 142 operators—organisation and personnel

- 142.160 Part 142 operators—organisation and personnel
- 142.165 Part 142 operators—key personnel cannot carry out responsibilities
- 142.170 Part 142 operators—familiarisation training for key personnel
- 142.175 Part 142 operators—chief executive officer: experience
- 142.180 Part 142 operators—chief executive officer: responsibilities and accountabilities
- 142.185 Part 142 operators—head of operations: qualifications and experience
- 142.190 Part 142 operators—head of operations: responsibilities
- 142.195 Part 142 operators—safety manager: experience
- 142.200 Part 142 operators—safety manager: responsibilities
- 142.205 Part 142 operators—quality assurance manager: experience
- 142.210 Part 142 operators—quality assurance manager: responsibilities
- 142.215 Part 142 operators—key personnel: additional qualifications and experience requirements

Subpart 142.E—Part 142 operators—instructors and examiners

- 142.220 Part 142 activities—instructors and examiners must comply with Part 142 authorisation
- 142.225 Part 142 activities—instructors and examiners must comply with exposition
- 142.230 Part 142 operators—instructors and examiners must be authorised under Part 61
- 142.235 Part 142 operators—instructors and examiners must have access to records
- 142.240 Part 142 operators—instructors and examiners must be competent to conduct authorised Part 142 activities in flight simulation training devices
- 142.245 Part 142 operators—person recommended for flight test

Subpart 142.F—Part 142 operators—training management system

- 142.250 Part 142 operators—training management system
- 142.255 Part 142 operators—training management system requirements

Subpart 142.G—Part 142 operators—safety management system

- 142.260 Part 142 operators—safety management system
- 142.265 Part 142 operators—safety management system requirements

Subpart 142.H—Part 142 operators—quality assurance management system

- 142.270 Part 142 operators—quality assurance management system
- 142.275 Part 142 operators—quality assurance management system requirements

Subpart 142.I—Part 142 operators—personnel fatigue management

Subpart 142.J—Part 142 operators—internal training and checking

- 142.310 Part 142 operators—internal training and checking system
- 142.315 Part 142 operators—internal training and checking system requirements
- 142.320 Part 142 operators—proficiency of instructors
- 142.325 Part 142 operators—holding valid standardisation and proficiency check for operator
- 142.330 Part 142 operators—standardisation and proficiency check requirements
- 142.335 Part 142 operators—instructors and examiners—training in human factors principles and non-technical skills

Subpart 142.K—Part 142 operators—expositions

- 142.340 Part 142 operators—content of exposition
- 142.345 Part 142 operators—compliance with exposition by operator
- 142.350 Part 142 operators—providing personnel with exposition

Subpart 142.L—Part 142 operators—logs and records

- 142.355 Part 142 operators—making and keeping records
- 142.360 Part 142 operators—availability of records

Subpart 142.M—Part 142 operators—miscellaneous offences

- 142.365 Part 142 operators—pilot in command for training to be authorised under Part 61
- 142.370 Part 142 operators—carriage of passengers prohibited during abnormal operations or low-flying activity
- 142.375 Part 142 operators—authorisation of carriage of passengers
- 142.380 Part 142 operators—integrated training courses: transfer of student from another Part 142 operator
- 142.385 Part 142 operators—completion of training and assessment of competency for certain solo flights
- 142.386 Part 142 operators—appropriate briefing and capability to conduct certain solo flights etc.
- 142.390 Part 142 operators—dealings in relation to cancelled, suspended, varied, pending or refused civil aviation authorisations: when approval required
- 142.395 Part 142 operators—maximum period for use of foreign registered aircraft in Australian territory

Subpart 142.A—General

142.005 What Part 142 is about

This Part:

- (a) deals with the conduct of integrated and multi-crew pilot flight training, contracted training and contracted checking; and
- (b) makes provision for applicants for, and holders of, Part 142 authorisations (which are AOCs or other certificates that deal with the training and checking mentioned in paragraph (a)).

Note: See also Division 2 of Part III of the Act in relation to AOCs generally.

142.010 Part 142 applies only to aeroplanes, rotorcraft, airships and flight simulation training devices

- (1) This Part applies only to:
 - (a) an aeroplane, rotorcraft or airship; or
 - (b) a flight simulation training device for an aircraft mentioned in paragraph (a).
- (2) Accordingly, a reference in this Part to an *aircraft* is a reference to an aeroplane, rotorcraft or airship.

142.015 Definitions of *Part 142 activity*, *Part 142 flight training*, *Part 142 authorisation*, *Part 142 operator* and *authorised Part 142 activity* for Part 142

- (1) A *Part 142 activity* is any of the following conducted in an aircraft or a flight simulation training device:
 - (a) Part 142 flight training;
 - (b) contracted training;
 - (c) contracted checking.
- (2) *Part 142 flight training* is any of the following:
 - (a) an integrated training course for the grant under Part 61 of a private pilot licence or commercial pilot licence;
 - (b) training for the grant under Part 61 of a multi-crew pilot licence, air transport pilot licence or flight engineer licence;
 - (c) multi-crew cooperation training;
 - (d) training for the grant under Part 61 of a type rating other than a type rating mentioned in an instrument under regulation 142.045;
 - (da) training, conducted as a multi-crew operation, for the grant under Part 61 of a flight crew rating other than a type rating;
 - (e) training, conducted as a multi-crew operation, for the grant under Part 61 of a flight crew endorsement other than:

Regulation 142.020

- (i) a design feature endorsement; or
- (ii) a flight activity endorsement;
- (f) training that is given as part of a flight review that is conducted as a multi-crew operation;
- (g) differences training:
 - (i) that is required as mentioned in regulation 61.780, 61.835 or 61.1370 for a variant covered by a type rating that is not a type rating mentioned in a legislative instrument under regulation 142.045; and
 - (ii) that is not conducted by an operator that has a training and checking system that is in accordance with the requirements of Part 119 or 138.
- (3) An **authorised Part 142 activity**, for a Part 142 operator, is a Part 142 activity mentioned in the operator's Part 142 authorisation.
- (4) A **Part 142 operator** is the holder of a Part 142 authorisation.
- (5) A **Part 142 authorisation** is:
 - (a) an AOC that authorises the conduct of a Part 142 activity in an aircraft; or
 - (b) a certificate under Division 142.B.2 that authorises the conduct of a Part 142 activity in a flight simulation training device.

142.020 Definitions of *contracted checking*, *contracted training* and *contracting operator* for Part 142

In this Part:

contracted checking means checking conducted by a Part 142 operator for a contracting operator.

contracted training means training that is:

- (a) conducted by a Part 142 operator for a contracting operator; and
- (b) the responsibility of the contracting operator under these Regulations.

contracting operator means an aircraft operator who enters into a contract with a Part 142 operator for the Part 142 operator to conduct training or checking that is the responsibility of the aircraft operator under these Regulations.

142.025 Definition of *key personnel* for Part 142

In this Part:

key personnel, for a Part 142 operator, means the people (however described) that hold, or carry out the responsibilities of, the following positions in the operator's organisation:

- (a) chief executive officer;
- (b) head of operations;
- (c) if the operator conducts authorised Part 142 activities only in aircraft, or aircraft and flight simulation training devices—safety manager;

- (d) if the operator conducts authorised Part 142 activities only in flight simulation training devices—quality assurance manager.

142.030 Definition of *significant change* for Part 142

In this Part:

significant change, for a Part 142 operator, means:

- (a) a change in relation to any of the following:
- (i) the location and operation of any of the operator's training bases, including the opening or closing of training bases;
 - (ii) the operator's corporate structure;
 - (iii) the operator's organisational structure;
 - (iv) the operator's key personnel;
 - (v) a person authorised to carry out the responsibilities of any of the key personnel;
 - (vi) the formal reporting line for a managerial or operational position reporting directly to any of the key personnel;
 - (vii) the qualifications, experience and responsibilities required by the operator for any of the key personnel;
 - (viii) the familiarisation training mentioned in regulation 142.170 for any of the key personnel;
 - (ix) the operator's process for making changes:
 - (A) that are significant changes; and
 - (B) that are not significant changes;
 - (x) the authorised Part 142 activities conducted by the operator;
 - (xi) if the operator conducts the activities in aircraft—the kinds of aircraft used to conduct the activities;
 - (xii) if the operator conducts the activities in turbine-engined aircraft—any leasing or other arrangements for the supply of a turbine-engined aircraft;
 - (xiii) if the operator conducts the activities in flight simulation training devices:
 - (A) the ownership arrangements for a device; or
 - (B) the types of devices; or
- (b) if the operator conducts the activities in foreign registered aircraft:
- (i) a change in the foreign registered aircraft used in the activities; or
 - (ii) a change in relation to a foreign registered aircraft used in the activities, including a change to its nationality or registration mark; or
- (c) a change in relation to any of the following that does not maintain or improve, or is not likely to maintain or improve, aviation safety:
- (i) the procedures by which the operator conducts and manages the activities;
 - (ii) the operator's operations manual;
 - (iii) the operator's dangerous goods manual (if any);

Regulation 142.035

- (iv) the operator's training management system manual;
- (v) the way that the operator manages the risk of fatigue in its personnel;
- (vi) the operator's internal training and checking system manual;
- (vii) if the operator conducts the activities only in aircraft, or in aircraft and flight simulation training devices—the operator's safety management system manual;
- (viii) if the operator conducts the activities only in flight simulation training devices—the operator's quality assurance management system manual;
- (ix) if the operator conducts the activities in aircraft:
 - (A) the way the aircraft are managed or maintained; or
 - (B) the way the continuing airworthiness of the aircraft is assured; or
- (d) a change required to be approved by CASA under these Regulations, other than a change that results in the reissue or replacement of an instrument previously issued by CASA in which the conditions or other substantive content of the instrument are unchanged.

142.035 Definitions for Part 142

In this Part:

aircraft: see regulation 142.010.

authorised Part 142 activity, for a Part 142 operator: see subregulation 142.015(3).

checking means the assessment of proficiency of the personnel of an aircraft operator or the operator of a flight simulation training device that is conducted to ensure that the personnel are competent to carry out their responsibilities.

conducts: a Part 142 operator **conducts** a Part 142 activity if an instructor or examiner for the operator conducts the activity on behalf of the operator.

contracted checking: see regulation 142.020.

contracting operator: see regulation 142.020.

corporation: see regulation 11.015.

examiner, for a Part 142 operator, means a flight examiner or flight engineer examiner engaged by the operator:

- (a) to conduct flight tests for the grant of a licence, rating or endorsement under Part 61 on behalf of the operator; or
- (b) to conduct contracted checking on behalf of the operator.

exposition, for a Part 142 operator, means:

- (a) the set of documents approved by CASA under regulation 142.095 or 142.115 in relation to the operator; and

- (b) if the set of documents is changed under regulation 142.135, 142.145 or 142.155, or the process mentioned in regulation 142.150—the set of documents as changed.

instructor, for a Part 142 operator, means a person engaged by the operator to conduct Part 142 flight training or contracted training on behalf of the operator.

key personnel, for a Part 142 operator: see regulation 142.025.

low-flying activity means a flight that is conducted below 500 feet AGL, other than:

- (a) climbing from take-off; and
(b) descending for the purpose of landing.

officer, of a corporation, means:

- (a) for a corporation that is a company (within the meaning of the *Corporations Act 2001*)—a director, secretary or executive officer of the corporation; or
(b) for a corporation of any other kind—a person exercising responsibility, in relation to the corporation, as nearly as possible the same as that of a director, secretary or executive officer of a company (within the meaning of the *Corporations Act 2001*).

Part 142 activity: see subregulation 142.015(1).

Part 142 authorisation: see subregulation 142.015(5).

Part 142 flight training: see subregulation 142.015(2).

personnel, for a Part 142 operator, includes any of the following persons who have duties or responsibilities that relate to the safe conduct of the operator's authorised Part 142 activities:

- (a) an employee of the operator;
(b) a person engaged by the operator (whether by contract or other arrangement) to provide services to the operator;
(c) an employee of a person mentioned in paragraph (b).

significant change, for a Part 142 operator: see regulation 142.030.

training base, for a Part 142 operator, means a facility at or from which the operator conducts Part 142 activities.

142.040 Approvals by CASA for Part 142

- (1) If a provision of this Part refers to a person holding an approval under this regulation, the person may apply to CASA, in writing, for the approval.
- (2) Subject to regulation 11.055, CASA must grant the approval.
- (3) Subregulation 11.055(1B) applies to the granting of an approval under this regulation for the following provisions:

Regulation 142.045

- (a) paragraph 142.050(3)(b);
- (b) paragraph 142.185(1)(b);
- (c) paragraph 142.185(4)(a).

142.045 Legislative instruments—Part 142 operators

For paragraph 98(5A)(a) of the Act, CASA may issue a legislative instrument to prescribe the following:

- (a) type ratings for paragraph (d) and subparagraph (g)(i) of the definition of **Part 142 flight training** in subregulation 142.015(2);
- (b) matters for paragraph 142.340(1)(v).

142.050 Part 142 activities—requirement for Part 142 authorisation

- (1) A person commits an offence if:
 - (a) the person conducts a Part 142 activity in an aircraft; and
 - (b) the person does not hold an AOC that authorises the person to conduct the activity.

Penalty: 50 penalty units.

- (2) A person commits an offence if:
 - (a) the person conducts a Part 142 activity in a flight simulation training device; and
 - (b) the person does not meet the requirement mentioned in subregulation (3).

Penalty: 50 penalty units.

- (3) For paragraph (2)(b), the requirement is that the person must hold:
 - (a) a certificate under Division 142.B.2 that authorises the person to conduct the activity; or
 - (b) an approval under regulation 142.040 to conduct the activity.
- (4) An offence against this regulation is an offence of strict liability.

142.055 Part 142 activities—compliance with Part 142 authorisations: offence for operators

- (1) A Part 142 operator commits an offence if the operator conducts an authorised Part 142 activity for the operator otherwise than in accordance with its Part 142 authorisation.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

**142.060 Part 142 activities—compliance with conditions of Part 142
authorisations: offence for operators**

- (1) A Part 142 operator commits an offence if the operator contravenes a condition of its Part 142 authorisation.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

Subpart 142.B—Part 142 authorisations

Division 142.B.1—AOCs for Part 142 activities that involve operation of aircraft

142.065 Prescribed purpose—Part 142 activities involving the operation of aircraft

For subsection 27(9) of the Act, conducting a Part 142 activity that involves the operation of an aircraft is a prescribed purpose.

142.070 Prescribed position—safety manager

For paragraph (e) of the definition of *key personnel* in subsection 28(3) of the Act, the position of safety manager is prescribed for this Part.

142.075 Required material—reference library

For paragraph 28BH(2)(b) of the Act, the following material is required for a Part 142 operator that holds an AOC that authorises the conduct of Part 142 activities that involve the operation of aircraft:

- (a) the civil aviation legislation that is relevant to the activities;
- (b) the parts of the AIP that are relevant to the activities;
- (c) all information about the flight operations of each kind of aircraft that is necessary to ensure the safe conduct of the activities;
- (d) any other publications, information or data required for the reference library by the operator's exposition.

142.080 AOC—application

- (1) A person may apply to CASA for the issue of an AOC that authorises the person to conduct a Part 142 activity that involves the operation of an aircraft.
- (2) The application must include the following:
 - (a) the applicant's name (including any operating or trading name), contact details and ABN (if any);
 - (aa) if the address of the applicant's operational headquarters is different from its mailing address—the address of its operational headquarters;
 - (b) if the applicant is an individual—a statement that the individual is, or proposes to be, the applicant's chief executive officer;
 - (c) if the applicant is a corporation—the name of each of the officers of the corporation;
 - (d) if the applicant is a corporation registered in Australia that has an ACN—its ACN and the address of its registered office;
 - (e) if the applicant is a corporation not registered in Australia—the place at which it was incorporated or formed;

- (f) the Part 142 activities that the applicant proposes to conduct;
- (g) a written undertaking from the person appointed, or proposed to be appointed, as the applicant's chief executive officer that, if CASA issues the AOC, the applicant will:
 - (i) be capable of operating in accordance with its exposition and civil aviation legislation; and
 - (ii) operate in accordance with its exposition and civil aviation legislation.

Note: See also sections 27AB and 27AC of the Act.

- (3) The application must be:
 - (a) accompanied by a copy of the applicant's proposed exposition; and
 - (b) signed by the person appointed, or proposed to be appointed, as the applicant's chief executive officer.

142.085 AOC—conditions for issue

- (1) It is a condition for the issue to the applicant of an AOC that authorises the applicant to conduct Part 142 activities that CASA is satisfied of each of the following:
 - (a) the applicant's proposed exposition complies with regulation 142.340;
 - (b) the applicant can conduct the activities safely and in accordance with its exposition and civil aviation legislation;
 - (c) if the applicant is an individual—the applicant:
 - (i) is a fit and proper person to be issued an AOC that authorises the conduct of the activities; and
 - (ii) is, or proposes to be, the applicant's chief executive officer;
 - (d) if the applicant is a corporation—each officer of the corporation is a fit and proper person to be an officer of a corporation that is issued an AOC that authorises the conduct of the activities;
 - (e) each of the applicant's proposed key personnel:
 - (i) is a fit and proper person to be appointed to the position; and
 - (ii) has the qualifications and experience required by Subpart 142.D for the position; and
 - (iii) has the qualifications and experience required by the applicant under subparagraph 142.340(1)(e)(i) for the position (if any); and
 - (iv) has the additional qualifications and experience required by CASA under regulation 142.215 for the position (if any).

Note: These matters are in addition to the matters specified in section 28 of the Act.

- (2) For paragraph (1)(b), without limiting the matters that CASA may consider, CASA must consider the following:
 - (a) the applicant's proposed exposition;
 - (b) whether the applicant can comply with the proposed exposition;
 - (c) the content of the undertaking mentioned in paragraph 142.080(2)(g);
 - (d) details of, and the reasons for, any suspension or cancellation of:
 - (i) a civil aviation authorisation issued to the applicant; or

Regulation 142.085

- (ii) an equivalent authorisation issued to the applicant:
 - (A) under the law of a foreign country; or
 - (B) by a multinational aviation authority;
 - (e) the suitability of the applicant's corporate and organisational structures for the activities;
 - (f) any other information:
 - (i) accompanying the application; or
 - (ii) in any other document submitted to CASA by the applicant for the application, including any document requested by CASA in relation to the application.
- (3) For paragraphs (1)(c) to (e), the matters CASA may consider in deciding whether a person is a fit and proper person include the following:
 - (a) the person's criminal record (if any), whether in Australia or a foreign country;
 - (b) the person's bankruptcy (if any), whether in Australia or a foreign country;
 - (c) the person's history (if any) of serious behavioural problems;
 - (d) any evidence held by CASA that the person has contravened:
 - (i) civil aviation legislation; or
 - (ii) another law relating to transport (including aviation) safety, whether in Australia or a foreign country;
 - (e) the person's demonstrated attitude towards compliance with regulatory requirements, in Australia or a foreign country, relating to transport (including aviation) safety;
 - (f) the record of compliance with regulatory requirements relating to transport (including aviation) safety of any corporation in Australia or a foreign country in which the person:
 - (i) is or was an officer or partner (however described); or
 - (ii) holds or held a position equivalent to any of the applicant's key personnel;
 - (g) for any corporation in which the person is or was an officer, or holds or held a position equivalent to any of the applicant's key personnel, in Australia or a foreign country, the following records:
 - (i) the corporation's criminal record (if any);
 - (ii) the corporation's record of insolvency, bankruptcy, receivership or winding up (if any);
 - (iii) the corporation's record (if any) as a body subject to investigation or comment by any statutory authority established to regulate the share dealings or financial affairs of corporations;
 - (h) any other matter relating to the fitness of the person to:
 - (i) for an applicant—hold an AOC that authorises the conduct of the activities; or
 - (ii) for an officer or proposed officer—be an officer of a corporation that holds an AOC that authorises the conduct of the activities.

142.095 AOC—approval of exposition

If CASA issues an AOC to the applicant that authorises the conduct of the proposed Part 142 activities, CASA is taken to have also approved the applicant's proposed exposition.

142.100 AOC—conditions

- (1) For paragraph 28BA(1)(b) of the Act, each of the following is a condition of an AOC issued to an operator that authorises the conduct of Part 142 activities:
 - (a) the operator must comply with each direction given to the operator, or obligation imposed on the operator, by CASA under a provision of these Regulations;
 - (b) each of the operator's key personnel must comply with:
 - (i) each provision of this Part that applies to the person; and
 - (ii) each direction given to the person, or obligation imposed on the person, by CASA under a provision of these Regulations; and
 - (iii) each other provision of civil aviation legislation that applies to the activities;
 - (c) each of the positions of the operator's key personnel must be filled;
 - (d) each of the operator's personnel must comply with each provision of civil aviation legislation that applies to the activities;
 - (e) if the operator is an individual—the individual must be the operator's chief executive officer;
 - (f) the positions of chief executive officer and safety manager may be occupied by the same person only:
 - (i) in an unforeseen circumstance; and
 - (ii) for the period mentioned in subregulation (2);
 - (g) the positions of head of operations and safety manager may be occupied by the same person only:
 - (i) in an unforeseen circumstance; and
 - (ii) for the period mentioned in subregulation (2).
- (2) For subparagraphs (1)(f)(ii) and (g)(ii), the period is:
 - (a) no more than 7 consecutive days for each unforeseen circumstance; or
 - (b) if the operator holds an approval under regulation 142.040 for this paragraph in relation to an unforeseen circumstance—the period mentioned in the approval for the unforeseen circumstance.

Division 142.B.2—Certificates for Part 142 activities conducted in flight simulation training devices

142.105 Certificate—application

- (1) A person may apply to CASA, in writing, for a certificate authorising the person to conduct Part 142 activities in flight simulation training devices.
- (2) The application must include the following:
 - (a) the information and documents mentioned in paragraphs 142.080(2)(a) to (f);
 - (b) a written undertaking from the person appointed, or proposed to be appointed, as the applicant's chief executive officer that, if CASA issues the certificate, the applicant will:
 - (i) be capable of operating in accordance with its exposition and civil aviation legislation; and
 - (ii) operate in accordance with its exposition and civil aviation legislation.
- (3) The application must be:
 - (a) accompanied by a copy of the applicant's proposed exposition; and
 - (b) signed by the person appointed, or proposed to be appointed, as the applicant's chief executive officer.

142.110 Certificate—issue

- (1) Subject to regulation 11.055, CASA must issue the certificate if satisfied of each of the following:
 - (a) the matters mentioned in subregulation 142.085(1);
 - (b) the applicant's organisation is suitable to ensure that the activities can be conducted safely, having regard to the nature of the activities;
 - (c) the chain of command of the applicant's organisation is appropriate to ensure that the activities can be conducted safely;
 - (d) the applicant's organisation has a sufficient number of suitably qualified and competent personnel to conduct the activities safely;
 - (e) the facilities of the applicant's organisation are sufficient to enable the activities to be conducted safely;
 - (f) the applicant's organisation has suitable procedures and practices to control the organisation and ensure the activities can be conducted safely.
- (2) For subregulation (1), in deciding whether an applicant is capable of conducting the activities safely and in accordance with its exposition and civil aviation legislation, CASA must consider:
 - (a) the matters set out in paragraphs 142.085(2)(a), (b) and (d) to (f); and
 - (b) the content of the undertaking mentioned in paragraph 142.105(2)(b).

- (3) For subregulation (1), the matters CASA may consider in deciding whether a person is a fit and proper person include the matters mentioned in subregulation 142.085(3).
- (4) For this regulation, regulation 142.085 applies to an application for a certificate as if:
 - (a) a reference to an AOC were a reference to a certificate; and
 - (b) any other necessary changes had been made.
- (5) If CASA decides to issue the certificate, CASA must determine the Part 142 activities the applicant is authorised to conduct in flight simulation training devices, including any limitations or conditions in relation to the activities.
- (6) The certificate must include:
 - (a) the matters mentioned in subregulation (5); and
 - (b) a certificate reference number determined by CASA.
- (7) If, under regulation 142.145, CASA approves a significant change to a Part 142 operator that holds a certificate under this Division, CASA may issue a new certificate to the operator.

142.115 Certificate—approval of exposition

If CASA issues the certificate to the applicant, CASA is taken to have also approved the applicant's proposed exposition.

142.120 Certificate—conditions

- (1) Each of the following is a condition of a certificate issued to an operator under this Division:
 - (a) the operator must comply with:
 - (i) each provision of this Part that applies to the operator; and
 - (ii) each direction given to the operator, or obligation imposed on the operator, by CASA under a provision of these Regulations; and
 - (iii) each other provision of civil aviation legislation that applies to the operator's authorised Part 142 activities covered by the certificate;
 - (b) each of the operator's key personnel must comply with:
 - (i) each provision of this Part that applies to the person; and
 - (ii) each direction given to the person, or obligation imposed on the person, by CASA under a provision of these Regulations; and
 - (iii) each other provision of civil aviation legislation that applies to the activities covered by the certificate;
 - (c) each of the positions of the operator's key personnel must be filled;
 - (d) each of the operator's personnel must comply with each provision of civil aviation legislation that applies to the activities;
 - (e) if the operator is an individual—the individual must be the operator's chief executive officer;

Regulation 142.125

- (f) the positions of chief executive officer and quality assurance manager may be occupied by the same person only:
 - (i) in an unforeseen circumstance; and
 - (ii) for the period mentioned in subregulation (2);
 - (g) the positions of head of operations and quality assurance manager may be occupied by the same person only:
 - (i) in an unforeseen circumstance; and
 - (ii) for the period mentioned in subregulation (2).
- (2) For subparagraphs (1)(f)(ii) and (g)(ii), the period is:
- (a) no more than 7 consecutive days for each unforeseen circumstance; or
 - (b) if the operator holds an approval under regulation 142.040 for this paragraph in relation to an unforeseen circumstance—the period mentioned in the approval for the unforeseen circumstance.

142.125 Certificate holders—reference library

- (1) A Part 142 operator that holds a certificate under this Division commits an offence if the operator does not maintain a reference library that complies with subregulation (2).

Penalty: 50 penalty units.

- (2) For subregulation (1), the reference library must:
- (a) include the following documents:
 - (i) all operational documents and material;
 - (ii) the civil aviation legislation that is relevant to the operator's authorised Part 142 activities covered by the certificate;
 - (iii) the parts of the AIP that are relevant to the activities;
 - (iv) documents that include information about the operation or maintenance of each kind of flight simulation training device operated by the operator to conduct the activities;
 - (v) any other publications, information or data required for the reference library by the operator's exposition; and
 - (b) be readily available to all members of the operator's personnel; and
 - (c) be up-to-date and in a readily accessible form.
- (3) A Part 142 operator commits an offence if the operator does not keep up-to-date records of the distribution of operational documents to members of the operator's personnel.

Penalty: 50 penalty units.

- (4) An offence against this regulation is an offence of strict liability.

142.130 Certificate holders—regulations 11.070 to 11.075 do not apply in relation to certain matters

Regulations 11.070 to 11.075 do not apply to the following for a Part 142 operator that holds a certificate under this Division:

- (a) a change of which CASA is notified under regulation 142.135;
- (b) a significant change that is approved by CASA under regulation 142.145;
- (c) a change made under a process mentioned in regulation 142.150;
- (d) a change that is made as a consequence of a change made to the organisation's exposition in accordance with a direction given by CASA under regulation 142.155.

Subpart 142.C—Part 142 operators—changes

142.135 Part 142 operators—changes of name etc

- (1) A Part 142 operator commits an offence if the operator:
 - (a) makes a change mentioned in subregulation (2); and
 - (b) does not, before making the change:
 - (i) amend its exposition to reflect the change; and
 - (ii) give CASA written notice of the change and a copy of the amended part of the exposition clearly identifying the change.

Penalty: 50 penalty units.

- (2) For paragraph (1)(a), the changes are the following:
 - (a) a change to its name (including any operating or trading name) or contact details;
 - (b) if the address of the applicant's operational headquarters is different from its mailing address—a change to the address of its operational headquarters.
- (3) An offence against this regulation is an offence of strict liability.

142.140 Part 142 operators—application for approval of significant change

- (1) A Part 142 operator commits an offence if:
 - (a) the operator makes a significant change other than a significant change mentioned in subregulation (2) or (3); and
 - (b) CASA has not approved the significant change.

Penalty: 50 penalty units.

- (2) A Part 142 operator commits an offence if:
 - (a) the operator makes a significant change that is the permanent appointment as any of the operator's key personnel of a person previously authorised to carry out the responsibilities of the position in a circumstance mentioned in subparagraph 142.340(1)(e)(iv); and
 - (b) the operator does not apply to CASA for approval of the change, in accordance with subregulation (4), within 7 days after the change is made.

Penalty: 50 penalty units.

- (3) A Part 142 operator commits an offence if:
 - (a) the operator makes a significant change that is the permanent appointment as any of the operator's key personnel of a person not previously authorised to carry out the responsibilities of the position in a circumstance mentioned in subparagraph 142.340(1)(e)(iv); and

- (b) the operator does not apply to CASA for approval of the change, in accordance with subregulation (4), within 3 days after the change is made.

Penalty: 50 penalty units.

- (4) An application for approval of a significant change must:
 - (a) be in writing; and
 - (b) set out the change; and
 - (c) be accompanied by a copy of the part of the operator's exposition affected by the change, clearly identifying the change.
- (5) An offence against this regulation is an offence of strict liability.

142.145 Part 142 operators—approval of significant changes

- (1) CASA may approve a significant change for a Part 142 operator that holds an AOC that authorises the operator to conduct Part 142 activities only if satisfied that the requirements mentioned in section 28 of the Act and subregulation 142.085(1) will continue to be met.
- (2) Subject to regulation 11.055, CASA must approve a significant change for a Part 142 operator that holds a certificate under Division 142.B.2 if satisfied that the requirements mentioned in subregulation 142.110(1) will continue to be met.
- (3) If CASA approves the significant change, CASA is taken to have also approved the changes to the operator's exposition covered by the application.

142.150 Part 142 operators—process for making changes

- (1) A Part 142 operator commits an offence if:
 - (a) the operator makes a change; and
 - (b) the change is not made in accordance with the process described in the operator's exposition for making changes.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

142.155 Part 142 operators—CASA directions relating to exposition or key personnel

- (1) If satisfied that it is necessary in the interests of aviation safety, CASA may direct a Part 142 operator to change its exposition:
 - (a) to remove particular information, procedures or instructions from the exposition; or
 - (b) to include particular information, procedures or instructions in the exposition; or
 - (c) to revise or vary the information, procedures or instructions in the exposition.

Regulation 142.155

- (2) CASA may direct a Part 142 operator to remove any of the operator's key personnel from the person's position if satisfied that the person is not:
 - (a) carrying out the responsibilities of the position; or
 - (b) if the person is the chief executive officer—properly managing matters for which the person is accountable.
- (3) A direction under this regulation must:
 - (a) be in writing; and
 - (b) state the time within which the direction must be complied with.
- (4) A Part 142 operator commits an offence if:
 - (a) CASA gives the operator a direction under this regulation; and
 - (b) the operator does not comply with the direction within the time stated in the direction.

Penalty: 50 penalty units.

- (5) An offence against this regulation is an offence of strict liability.

Subpart 142.D—Part 142 operators—organisation and personnel

Note: For the qualifications for the position of head of aircraft airworthiness and maintenance control, see the qualifications specified in the Part 42 Manual of Standards for the position of continuing airworthiness manager.

142.160 Part 142 operators—organisation and personnel

- (1) A Part 142 operator must maintain an organisational structure that effectively manages its authorised Part 142 activities, taking into account the following:
 - (a) the nature and complexity of the activities;
 - (b) the number and kinds of aircraft or flight simulation training devices used to conduct the activities;
 - (c) the number and location of training bases used by the operator to conduct the activities;
 - (d) the number of the operator's personnel;
 - (e) for Part 142 flight training—the number of course participants undertaking the training;
 - (f) for contracted training—the number of contracting operators and the number of their personnel for which the Part 142 operator is conducting contracted training;
 - (g) for contracted checking—the number of contracting operators and the number of their personnel for which the Part 142 operator is conducting contracted checking.
- (2) A Part 142 operator commits an offence if any of the operator's key personnel carries out a responsibility of the person's position otherwise than in accordance with the operator's exposition or this Subpart.

Penalty: 50 penalty units.

142.165 Part 142 operators—key personnel cannot carry out responsibilities

- (1) A Part 142 operator commits an offence if:
 - (a) the operator becomes aware that any of its key personnel cannot carry out, or is likely to be unable to carry out, the person's responsibilities for a period of longer than 35 days; and
 - (b) the operator does not tell CASA of the matter mentioned in paragraph (a) within the time mentioned in subregulation (2).

Penalty: 50 penalty units.

- (2) For paragraph (1)(b), the time is:
 - (a) if there is not another person authorised to carry out the responsibilities for all or part of the period—24 hours after the operator becomes aware of the matter; or

Regulation 142.170

- (b) if there is another person authorised to carry out the responsibilities for all or part of the period—3 days after the operator becomes aware of the matter.

142.170 Part 142 operators—familiarisation training for key personnel

A Part 142 operator must ensure that before a person appointed as any of the operator's key personnel begins to carry out the responsibilities of the position, the person has completed any training that is necessary to familiarise the person with the responsibilities.

142.175 Part 142 operators—chief executive officer: experience

The chief executive officer of a Part 142 operator must have sufficient relevant experience in organisational, operational, financial and people management of air operations to enable the operator to conduct safe operations in accordance with its exposition and civil aviation legislation.

142.180 Part 142 operators—chief executive officer: responsibilities and accountabilities

- (1) The chief executive officer of a Part 142 operator is responsible for the following:
 - (a) ensuring that, for the safe conduct of the operator's authorised Part 142 activities in accordance with the operator's Part 142 authorisation, exposition and civil aviation legislation, the operator:
 - (i) has sufficient suitably experienced, qualified and competent personnel; and
 - (ii) has a suitable management structure; and
 - (iii) is adequately financed and resourced;
 - (b) ensuring that the operator:
 - (i) sets and maintains standards for the activities in accordance with the operator's exposition; and
 - (ii) complies with civil aviation legislation;
 - (c) if the operator conducts the activities in aircraft—ensuring that the operator:
 - (i) implements and manages the operator's safety management system; and
 - (ii) has procedures that ensure that all of the operator's personnel understand the operator's safety policy; and
 - (iii) has an organisational structure that ensures that the safety manager is independent and not subject to undue influence; and
 - (iv) tells CASA if the operator enters into a leasing, financing or other arrangement for the supply of a turbine-engined aircraft for use in the activities; and
 - (v) tells CASA if the operator becomes aware that any arrangement mentioned in subparagraph (iv) may:

- (A) affect the operator's safe conduct of the activities; or
 - (B) contravene a provision of civil aviation legislation or the law of the country in which the aircraft is registered; and
 - (vi) complies with the aviation safety laws of each foreign country (if any) where the operator conducts the activities; and
 - (vii) for each foreign registered aircraft (if any) used in the activities—maintains the aircraft in accordance with the law of the country in which the aircraft is registered;
 - (d) if the operator conducts the activities only in flight simulation training devices—ensuring that the operator implements and manages the operator's quality assurance management system;
 - (e) establishing and regularly reviewing the operator's safety performance indicators and targets;
 - (f) ensuring that the operator's exposition is monitored and managed for continuous improvement;
 - (g) ensuring that key personnel satisfactorily carry out the responsibilities of their positions in accordance with:
 - (i) the operator's exposition; and
 - (ii) civil aviation legislation.
- (2) The chief executive officer of a Part 142 operator is accountable to the operator and CASA for ensuring the responsibilities mentioned in subregulation (1) are carried out effectively.

142.185 Part 142 operators—head of operations: qualifications and experience

- (1) The head of operations of a Part 142 operator must:
- (a) meet the requirements mentioned in subregulation (2); or
 - (b) hold an approval under regulation 142.040 to be the head of operations for the operator.
- (2) For paragraph (1)(a), the requirements are that the person must:
- (a) hold, and be able to exercise the privileges of, a flight examiner rating; and
 - (b) hold the pilot licence required by subregulation (3); and
 - (c) be authorised under Part 61 to pilot a kind of aircraft that is used to conduct a significant proportion of the operator's authorised Part 142 activities; and
 - (d) have the experience required by subregulation (4); and
 - (e) have a satisfactory record in the conduct or management of air operations; and
 - (f) have sufficient safety and regulatory knowledge to enable the operator to conduct the activities safely and in accordance with its exposition and civil aviation legislation.
- (3) For paragraph (2)(b), the licence required is:
- (a) if any of the activities relate to the operation of an aircraft for a multi-crew operation—an air transport pilot licence; or

Regulation 142.190

- (b) in any other case—a commercial pilot licence or an air transport pilot licence.
- (4) For paragraph (2)(d), the experience required is:
 - (a) if the operator holds an approval under regulation 142.040 for this paragraph—the experience mentioned in paragraph (5)(a) or (b); or
 - (b) if paragraph (a) does not apply—the experience mentioned in paragraphs (5)(a) and (b).
- (5) For subregulation (4), the experience is the following:
 - (a) at least 500 hours flight time on a kind of aircraft used to conduct a significant proportion of the activities;
 - (b) at least 6 months experience in the conduct or management of air operations conducted under an AOC or equivalent foreign authorisation.
- (6) CASA may, by written notice given to a head of operations, or proposed head of operations, of a Part 142 operator, direct the person to undertake an assessment mentioned in subregulation (7).
- (7) For subregulation (6), the assessment:
 - (a) is an assessment conducted by CASA or a person nominated by CASA to demonstrate suitability as head of operations for the operator; and
 - (b) may include assessment in an aeroplane, rotorcraft, airship or flight simulation training device.

142.190 Part 142 operators—head of operations: responsibilities

- (1) The head of operations of a Part 142 operator must safely manage the authorised Part 142 activities of the operator.
- (2) Without limiting subregulation (1), the responsibilities of the head of operations include the following:
 - (a) monitoring and maintaining, and reporting to the chief executive officer on, the operator's compliance with the provisions of civil aviation legislation and the operator's exposition that apply to the activities;
 - (b) setting and maintaining the operator's standards for the activities in accordance with the operator's exposition;
 - (c) if the activities include flight training or contracted training—ensuring that the training is conducted in accordance with the operator's training management system;
 - (d) ensuring that the activities are monitored effectively;
 - (e) managing the maintenance and continuous improvement of the operator's fatigue risk management system (if any);
 - (f) ensuring the proper allocation and deployment of aircraft, flight simulation training devices and personnel for use in the activities;
 - (g) ensuring that the operator's personnel are provided with the information and documentation necessary to properly carry out their responsibilities;

- (h) if the operator conducts an activity in a flight simulation training device—ensuring that the device is used only in accordance with the operator’s exposition;
- (i) if the operator conducts an activity in a flight simulator or flight training device—ensuring that the simulator or device is qualified under Part 60;
- (j) if the operator conducts an activity in a synthetic trainer—ensuring that the trainer is approved under Civil Aviation Order 45.0;
- (k) if the operator conducts an activity in any other device—ensuring that the device:
 - (i) meets the qualification standards prescribed by a legislative instrument under regulation 61.045; or
 - (ii) is qualified (however described) by the national aviation authority of a recognised foreign State (within the meaning of regulation 61.010);
- (l) ensuring that each instructor who conducts an activity for the operator:
 - (i) has access to the parts of the operator’s exposition that relate to the instructor’s duties; and
 - (ii) holds a valid standardisation and proficiency check for the operator under regulation 142.325;
- (m) ensuring that each examiner who conducts an activity for the operator has access to the parts of the operator’s exposition that relate to the examiner’s duties;
- (n) ensuring that each instructor or examiner who conducts an activity for the operator:
 - (i) is authorised to conduct the activity under Part 61; and
 - (ii) has successfully completed the training set out in the operator’s internal training and checking system manual; and
 - (iii) meets the requirements in the operator’s exposition about training in human factors principles and non-technical skills;
- (o) reporting to the chief executive officer on the operator’s compliance with the matters mentioned in paragraph (n);
- (p) ensuring that each instructor or examiner who conducts contracted training or contracted checking for the operator has access to the contracting operator’s training and checking manual;
- (q) if an instructor attempts but does not successfully complete a standardisation and proficiency check mentioned in the operator’s internal training and checking system manual—telling CASA, in writing, within 14 days after the date of the attempt, of the person’s name, position and ARN;
- (r) ensuring that the operator establishes and maintains effective communication, in relation to the activities, with CASA and each contracting operator for which the operator conducts contracted training or contracted checking;
- (s) ensuring that written reports are provided to the head of training and checking of each contracting operator in relation to the performance of each person for whom the operator conducts contracted training or contracted checking;

Regulation 142.195

- (t) if the operator conducts the activities in aircraft—ensuring that the operator complies with section 28BH of the Act in relation to flight crew.

142.195 Part 142 operators—safety manager: experience

The safety manager of a Part 142 operator must have:

- (a) sufficient relevant safety management experience to capably lead, manage and set standards to enable the operator to safely implement its safety management system in accordance with its exposition; and
- (b) a satisfactory record in the conduct or management of air operations; and
- (c) sufficient safety and regulatory knowledge to enable the operator to conduct safe authorised Part 142 activities in accordance with its exposition and civil aviation legislation.

Note: A Part 142 operator must have a safety manager if the operator conducts authorised Part 142 activities only in aircraft, or in aircraft and flight simulation training devices: see regulation 142.025, definition of *key personnel*.

142.200 Part 142 operators—safety manager: responsibilities

- (1) The safety manager of a Part 142 operator must manage the safety management system of the operator.
- (2) Without limiting subregulation (1), the responsibilities of the safety manager include:
 - (a) managing the operation of the safety management system including managing corrective, remedial and preventative action in relation to the system; and
 - (b) regularly reporting to the chief executive officer on the effectiveness of the safety management system; and
 - (c) managing the maintenance and continuous improvement of the following systems:
 - (i) safety management system;
 - (ii) fatigue risk management system (if any).

142.205 Part 142 operators—quality assurance manager: experience

The quality assurance manager of a Part 142 operator must have:

- (a) sufficient relevant quality assurance management experience to capably lead, manage and set standards to enable the operator to safely implement its quality assurance management system in accordance with its exposition; and
- (b) sufficient safety and regulatory knowledge to enable the operator to conduct authorised Part 142 activities safely and in accordance with its exposition and civil aviation legislation.

Note: A Part 142 operator must have a quality assurance manager if the operator conducts authorised Part 142 activities only in flight simulation training devices: see regulation 142.025, definition of *key personnel*.

142.210 Part 142 operators—quality assurance manager: responsibilities

- (1) The quality assurance manager of a Part 142 operator must manage the quality assurance management system of the operator.
- (2) Without limiting subregulation (1), the responsibilities of the quality assurance manager include:
 - (a) managing the operation of the quality assurance management system including managing corrective, remedial and preventative action in relation to the system; and
 - (b) regularly reporting to the chief executive officer on the effectiveness of the quality assurance management system; and
 - (c) managing the maintenance and continuous improvement of the quality assurance management system.

142.215 Part 142 operators—key personnel: additional qualifications and experience requirements

- (1) This regulation applies to:
 - (a) an applicant for a Part 142 authorisation; and
 - (b) a Part 142 operator.
- (2) CASA may, by written notice given to the applicant or operator, direct that any of the key personnel of the applicant or operator must have stated additional qualifications or experience to those otherwise required under this Subpart.
- (3) If satisfied that it is necessary in the interests of aviation safety, CASA may, by written notice given to a person who is, or is proposed to be, any of the key personnel of the applicant or operator, direct the person:
 - (a) to undertake a stated examination; or
 - (b) to be interviewed by CASA; or
 - (c) to complete a stated training course.
- (4) In deciding whether to give a direction under this regulation, CASA must have regard to, but is not limited to considering, the following:
 - (a) the need to ensure that the applicant or operator can conduct safe authorised Part 142 activities in accordance with its exposition and civil aviation legislation;
 - (b) the nature and complexity of the activities;
 - (c) the leadership, management and standards-setting skills required by the person for the activities;
 - (d) how recently the person has used his or her aviation skills;
 - (e) whether the person is able to exercise the privileges of each civil aviation authorisation held by the person.

Regulation 142.220

Subpart 142.E—Part 142 operators—instructors and examiners

142.220 Part 142 activities—instructors and examiners must comply with Part 142 authorisation

- (1) An instructor or examiner for a Part 142 operator commits an offence if the instructor or examiner conducts a Part 142 activity otherwise than in accordance with the operator's Part 142 authorisation.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

142.225 Part 142 activities—instructors and examiners must comply with exposition

- (1) An instructor or examiner for a Part 142 operator commits an offence if the instructor or examiner conducts an authorised Part 142 activity for the operator otherwise than in accordance with the operator's exposition.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

142.230 Part 142 operators—instructors and examiners must be authorised under Part 61

- (1) A Part 142 operator commits an offence if:
 - (a) an instructor or examiner for the operator conducts an authorised Part 142 activity for the operator; and
 - (b) the instructor or examiner is not authorised under Part 61 to conduct the activity.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

142.235 Part 142 operators—instructors and examiners must have access to records

- (1) A Part 142 operator commits an offence if:
 - (a) an instructor or examiner for the operator conducts an authorised Part 142 activity for the operator; and
 - (b) the instructor or examiner does not have access to the operator's records for the persons participating in the activity.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

142.240 Part 142 operators—instructors and examiners must be competent to conduct authorised Part 142 activities in flight simulation training devices

- (1) A Part 142 operator commits an offence if:
- (a) an instructor or examiner for the operator conducts an authorised Part 142 activity for the operator in a flight simulation training device; and
 - (b) the instructor or examiner has not been assessed by the operator as competent to conduct the activity in the device.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

142.245 Part 142 operators—person recommended for flight test

- (1) A Part 142 operator and the operator's head of operations each commit an offence if:
- (a) a person is recommended for a flight test by:
 - (i) the head of operations; or
 - (ii) a person named in the operator's exposition as responsible for the Part 142 activity to which the flight test relates; and
 - (b) the person is not eligible under regulation 61.235 to undertake the test.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

Regulation 142.250

Subpart 142.F—Part 142 operators—training management system

142.250 Part 142 operators—training management system

A Part 142 operator must have a training management system that meets the requirements of regulation 142.255.

142.255 Part 142 operators—training management system requirements

The training management system must include the following:

- (a) for each kind of Part 142 flight training or contracted training that is an authorised Part 142 activity for the operator—a course outline, detailed syllabus, standards to be met and record forms;
- (b) the procedures to be followed when a standard is not met;
- (c) an auditable system for maintaining records of the results of the operator's flight training or contracted training.

Subpart 142.G—Part 142 operators—safety management system

142.260 Part 142 operators—safety management system

A Part 142 operator that conducts authorised Part 142 activities only in aircraft, or in aircraft and flight simulation training devices, must have a safety management system that meets the requirements of regulation 142.265.

142.265 Part 142 operators—safety management system requirements

- (1) The safety management system must be a systemic approach to managing safety that:
 - (a) includes the matters mentioned in subregulation (2); and
 - (b) ensures that the operator's authorised Part 142 activities are conducted in a planned and systematic manner and identifies and addresses deficiencies in training outcomes; and
 - (c) if the operator conducts the training in flight simulation training devices:
 - (i) ensures the correct operation and maintenance of the devices; and
 - (ii) without limiting subparagraph (i), includes the matters mentioned in subregulation 142.275(2); and
 - (d) integrates human factors principles.
- (2) For paragraph (1)(a), the matters are the following:
 - (a) organisational structures, accountabilities, policies and procedures necessary to manage safety in a systemic way;
 - (b) a statement of the operator's safety policy, objectives and planning, including details of the following:
 - (i) the management commitment to, and responsibility for, safety;
 - (ii) the safety accountabilities of managers (including key personnel);
 - (iii) the appointment of safety management personnel;
 - (iv) how human factors principles are integrated into the safety management system;
 - (v) a safety management system implementation plan;
 - (vi) relevant third party relationships and interactions;
 - (vii) coordination of an emergency response plan;
 - (viii) safety management system documentation;
 - (c) a safety risk management system, including:
 - (i) hazard identification processes; and
 - (ii) risk assessment and mitigation processes;
 - (d) a safety assurance system, including:
 - (i) details of processes for:
 - (A) safety performance monitoring and measurement; and

Regulation 142.265

- (B) internal safety investigation; and
 - (C) management of change; and
 - (D) continuous improvement of the safety management system; and
 - (ii) if the operator operates an aircraft mentioned in subregulation (3) for the activities—a flight data analysis program that meets the requirements mentioned in subregulation (4);
 - (e) a safety training and promotion system, including details of the following:
 - (i) safety management system training and education;
 - (ii) safety management system safety communication.
- (3) For subparagraph (2)(d)(ii), the aircraft are the following:
- (a) an aeroplane with a maximum certificated take-off weight of more than 27 000 kg;
 - (b) a rotorcraft with a maximum certificated take-off weight of more than 7 000 kg.
- (4) For subparagraph (2)(d)(ii), the requirements are that the flight data analysis program must:
- (a) regularly record and analyse the operational flight data of individual and aggregated operations for the purpose of improving the safety of flight operations; and
 - (b) be provided by:
 - (i) the operator; or
 - (ii) another appropriate person; and
 - (c) ensure that, except as mentioned in subregulations (6) and (7):
 - (i) the identity of a person who is the source of data is protected from disclosure to anyone other than the following:
 - (A) a person whose duties require the person to analyse operational flight data;
 - (B) a person who has access to the person's identity solely for the purpose of analysing operational flight data;
 - (C) a pilot appointed by the operator to liaise with flight crew in relation to matters arising from the flight data analysis program; and
 - (ii) no punitive action in relation to the data may be taken by the operator against the person.
- (5) For subparagraph (4)(b)(ii), the provision of the flight data analysis program by an appropriate person does not in any way compromise the operator's responsibility to provide, and ensure the effectiveness of, the program.
- (6) For paragraph (4)(c), the identity of a person who is the source of data may be disclosed:
- (a) with the written consent of the person; or
 - (b) under a court order.

- (7) For paragraph (4)(c), the identity of a person who is the source of data may be disclosed, and the operator may take punitive action against the person, if the operator has evidence that the person:
- (a) deliberately contravened a provision of civil aviation legislation or the operator's exposition; or
 - (b) persistently engaged in unsafe actions without appropriate safety reasons.
- (8) Without limiting paragraph (1)(b), the system must include the following:
- (a) a process for auditing the activities;
 - (b) a process for promoting the continual improvement of the activities;
 - (c) a process for evaluating the training outcomes from pre-flight test assessments and post-flight test feedback from examiners;
 - (d) a process for regularly assessing the suitability of the operator's facilities and resources used for conducting the activities;
 - (e) a process for recommending changes to the following:
 - (i) the safety management system;
 - (ii) the training management system;
 - (iii) the internal training and checking system.

Regulation 142.270

Subpart 142.H—Part 142 operators—quality assurance management system

142.270 Part 142 operators—quality assurance management system

A Part 142 operator that conducts authorised Part 142 activities only in flight simulation training devices must have a quality assurance management system that meets the requirements of regulation 142.275.

142.275 Part 142 operators—quality assurance management system requirements

- (1) The quality assurance system must:
 - (a) ensure the correct operation and maintenance of the flight simulation training devices; and
 - (b) ensure that the operator's authorised Part 142 activities are conducted in a planned and systematic manner and identifies and addresses deficiencies in training outcomes.
- (2) Without limiting paragraph (1)(a), the system must include the following:
 - (a) quality policy;
 - (b) management responsibility;
 - (c) document control;
 - (d) resource allocation;
 - (e) quality procedures;
 - (f) internal audit.
- (3) Without limiting paragraph (1)(b), the system must include the following:
 - (a) a process for auditing the activities;
 - (b) a process for promoting the continual improvement of the activities;
 - (c) a process for evaluating the training outcomes from pre-flight test assessments and post-flight test feedback from examiners;
 - (d) a process for regularly assessing the suitability of the operator's facilities and resources used for conducting the activities;
 - (e) a process for recommending changes to the following:
 - (i) the quality assurance management system;
 - (ii) the training management system;
 - (iii) the internal training and checking system.

Subpart 142.I—Part 142 operators—personnel fatigue management

Note: This Subpart is reserved for future use.

Regulation 142.310

Subpart 142.J—Part 142 operators—internal training and checking

142.310 Part 142 operators—internal training and checking system

A Part 142 operator must have an internal training and checking system for its personnel that meets the requirements of regulation 142.315.

142.315 Part 142 operators—internal training and checking system requirements

The internal training and checking system must include the following:

- (a) a description of the operator's internal training and checking, including details of how the training and checking is conducted;
- (b) a description of the duties and responsibilities assigned to personnel conducting internal training and checking;
- (d) procedures that ensure that each of the operator's personnel:
 - (i) has an understanding of the operator's training management system; and
 - (ii) completes internal training and checking as described under paragraph (a); and
 - (iii) is supervised effectively;
- (e) command responsibility during flights for internal training and checking;
- (f) for each kind of internal training and checking conducted by or for the operator—the minimum number of check pilots and the minimum crew qualifications required by the operator for the training (if any);
- (g) any general restrictions, specifications or safety precautions for internal training and checking (including in relation to fuel load, ballast and minimum weather conditions);
- (h) methods of conducting internal training and checking including the following:
 - (i) the standards to be achieved;
 - (ii) training sequences for common faults;
 - (iii) the method of simulating emergencies or malfunctions;
- (i) procedures that ensure that an instructor who conducts an authorised Part 142 activity for the operator holds a valid standardisation and proficiency check for the operator under regulation 142.325;
- (j) procedures that ensure that an instructor who uses a flight simulation training device to conduct an authorised Part 142 activity for the operator is competent to use the device to conduct the activity.

142.320 Part 142 operators—proficiency of instructors

- (1) A Part 142 operator commits an offence if:
-

- (a) an instructor for the operator conducts an authorised Part 142 activity for the operator; and
- (b) the instructor does not meet the requirement mentioned in subregulation (2).

Penalty: 50 penalty units.

- (2) For paragraph (1)(b), the requirement is that the instructor must:
 - (a) hold a valid standardisation and proficiency check for the operator under regulation 142.325; or
 - (b) be successfully participating in the operator's internal training and checking system.
- (3) An offence against this regulation is an offence of strict liability.

142.325 Part 142 operators—holding valid standardisation and proficiency check for operator

- (1) An instructor for a Part 142 operator holds a valid standardisation and proficiency check for the operator if:
 - (a) the instructor has successfully completed the operator's standardisation and proficiency check; and
 - (b) the check complies with regulation 142.330; and
 - (c) under subregulation (2) or (3), the check is valid.
- (2) A standardisation and proficiency check is valid for the period comprising:
 - (a) the period beginning on the day on which the check is completed, and ending at the end of the month in which the check is completed; and
 - (b) the period of 12 months immediately following the month in which the check was completed.
- (3) If:
 - (a) an instructor holds a standardisation and proficiency check that is valid under subregulation (2) (the *existing check*); and
 - (b) the instructor successfully completes a new standardisation and proficiency check on a day that is less than 3 months before the day on which the existing check is due to expire;the new check is valid for 12 months beginning at the end of the day on which the existing check expires.

142.330 Part 142 operators—standardisation and proficiency check requirements

- (1) A Part 142 operator's standardisation and proficiency check for an instructor must check the competency of the instructor to conduct the Part 142 activity that the operator has engaged the instructor to conduct.
- (2) The check must be carried out by:
 - (a) the operator's head of operations; or

Regulation 142.335

- (b) a person authorised to conduct the check by the operator's head of operations.

142.335 Part 142 operators—instructors and examiners—training in human factors principles and non-technical skills

- (1) A Part 142 operator commits an offence if:
 - (a) an instructor or examiner for the operator conducts an authorised Part 142 activity for the operator; and
 - (b) the instructor or examiner does not meet the requirements in the operator's exposition about training in human factors principles and non-technical skills.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

Subpart 142.K—Part 142 operators—expositions

142.340 Part 142 operators—content of exposition

- (1) An exposition for a Part 142 operator must include the following:
 - (a) the operator's name (including any operating or trading name), contact details and ABN (if any);
 - (b) the address of:
 - (i) the operator's operational headquarters; and
 - (ii) each of the operator's training bases;
 - (c) a description and diagram of the operator's organisational structure showing formal reporting lines including the formal reporting lines for each of the key personnel;
 - (d) if the operator is a corporation—a description of the operator's corporate structure;
 - (e) for each of the key personnel, the following information:
 - (i) the qualifications and experience (if any) required by the operator for the position in addition to the qualifications and experience required under Subpart 142.D for the position;
 - (ii) each matter (if any) for which the holder of the position is responsible in addition to the responsibilities mentioned in Subpart 142.D for the position;
 - (iii) the name of the person appointed to the position;
 - (iv) the name of each person authorised to carry out the responsibilities of the position when the position holder:
 - (A) is absent from the position; or
 - (B) cannot carry out the responsibilities;
 - (v) a description of how the operator will manage the responsibilities of the position during a circumstance mentioned in subparagraph (iv);
 - (f) each matter (if any) for which the chief executive officer is responsible and accountable in addition to the matters mentioned in regulation 142.180;
 - (g) if the operator's authorised Part 142 activities include Part 142 flight training—the name of each instructor appointed by the operator's head of operations to have responsibility for particular flight training;
 - (h) a description of the operator's program for training and assessing personnel in human factors principles and non-technical skills;
 - (i) details of the responsibilities of the operator's personnel (other than key personnel) under these Regulations;
 - (j) a description of the authorised Part 142 activities conducted by the operator including:
 - (i) for Part 142 flight training or contracted training:
 - (A) the training plans and syllabuses for the training; and
 - (B) the areas of operation for the training; and

Regulation 142.340

- (C) checklists (if any) and the circumstances when the use of a checklist is permitted; and
- (ii) minimum qualifications and experience for personnel conducting the activities; and
- (iii) command responsibility during flights for the activities; and
- (iv) for contracted training or contracted checking—procedures to ensure that the operator conducts the training or checking in accordance with the contracting operator’s training and checking manual and standard operating procedures (if any);
- (k) a description of the procedures by which the operator conducts and manages the activities, including the supervision of instructors and persons participating in activities;
- (l) if the operator conducts the activities in aircraft:
 - (i) for each registered aircraft that is flown into, out of or outside Australian territory in the course of conducting the activities—the kind of aircraft and its registration mark; and
 - (ii) for each foreign registered aircraft—the kind of aircraft and its nationality and registration marks; and
 - (iii) a description of any leasing or other arrangements for the supply of any turbine-engined aircraft; and
 - (iv) a description of the way any turbine-engined aircraft are managed and maintained, and the way continuing airworthiness of the aircraft is assured; and
 - (v) a description of each flight training area;
- (m) if the operator conducts the activities in relation to a flight crew licence or rating of a kind for which a low-flying activity is required—a description of how the operator will determine a suitable flight training area for the activity;
- (n) if the operator conducts the activities in flight simulation training devices:
 - (i) a description of the devices used by the operator in conducting the activities; and
 - (ii) for each device—each purpose mentioned in Part 61 that the device may be used for; and
 - (iii) for flight simulators and flight training devices—a description of the procedures by which the operator ensures the qualification of the simulators and devices under Part 60; and
 - (iv) for synthetic trainers—a description of the procedures by which the operator ensures the approval of the trainers under Civil Aviation Order 45.0; and
 - (v) for any other device—a description of the procedures by which the operator ensures that the device:
 - (A) meets the qualification standards prescribed by a legislative instrument under regulation 61.045; or
 - (B) is qualified (however described) by the national aviation authority of a recognised foreign State (within the meaning of regulation 61.010);

- (o) a description of the way the operator manages the risk of fatigue in its personnel, including the operator's fatigue risk management system manual (if any);
 - (p) the facilities used by the operator for the activities;
 - (q) a description of any operations, other than authorised Part 142 activities, conducted, or proposed to be conducted, by the operator;
 - (r) a description of any aeronautical or aviation-related services provided, or to be provided, by third parties to the operator;
 - (s) the following manuals:
 - (i) an operations manual;
 - (ii) a dangerous goods manual (if any);
 - (iii) a training management system manual that describes the operator's training management system;
 - (iv) if the operator conducts the activities only in aircraft, or in aircraft and flight simulation training devices—a safety management system manual that describes the operator's safety management system;
 - (v) if the operator conducts the activities only in flight simulation training devices—a quality assurance management system manual that describes the operator's quality assurance management system;
 - (vi) an internal training and checking system manual that describes the operator's internal training and checking system;
 - (t) a description of the operator's process for making changes including:
 - (i) identifying changes that are significant changes; and
 - (ii) identifying changes that are not significant changes; and
 - (iii) telling CASA of the changes;
 - (u) a description of any other matter required to be approved by CASA under these Regulations in relation to Part 142 activities;
 - (v) a matter prescribed by a legislative instrument under regulation 142.045 for this paragraph.
- (2) A manual mentioned in paragraph (o) or any of subparagraphs (1)(s)(ii) to (vi) may be included as part of the operator's operations manual.
- (3) An exposition for a Part 142 operator may include a list of material required for the operator's reference library.

142.345 Part 142 operators—compliance with exposition by operator

- (1) A Part 142 operator commits an offence if the operator contravenes a provision of its exposition.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

142.350 Part 142 operators—providing personnel with exposition

- (1) A Part 142 operator commits an offence if:
-

Regulation 142.350

- (a) the operator's exposition relates to a duty or responsibility of a person who is a member of the operator's personnel; and
- (b) the operator does not make the part of the exposition that relates to the duty or responsibility available to the person before the person first begins carrying out the duty or responsibility.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

Subpart 142.L—Part 142 operators—logs and records

142.355 Part 142 operators—making and keeping records

- (1) A Part 142 operator commits an offence if:
 - (a) a person participates in an authorised Part 142 activity conducted by the operator; and
 - (b) a record of the person's participation, including a description and assessment of the person's performance, is not made within 21 days after the activity is conducted.

Penalty: 50 penalty units.

- (2) A Part 142 operator commits an offence if the operator does not retain a record made under subregulation (1) for at least 7 years after the record is made.

Penalty: 50 penalty units.

- (3) An offence against this regulation is an offence of strict liability.

142.360 Part 142 operators—availability of records

- (1) A Part 142 operator commits an offence if the operator does not make a record made under regulation 142.355 available, on request, to the person to whom the record relates.

Penalty: 50 penalty units.

- (2) A Part 142 operator commits an offence if:
 - (a) a record is made under regulation 142.355; and
 - (b) the operator receives a request from another Part 142 operator for a copy of the record; and
 - (c) the operator holds a written authority from the person to whom the record relates to provide a copy of the person's records to another Part 142 operator if requested; and
 - (d) the operator does not give a copy of the record to the other Part 142 operator within 7 days after receiving the request.

Penalty: 50 penalty units.

- (3) An offence against this regulation is an offence of strict liability.

Regulation 142.365

Subpart 142.M—Part 142 operators—miscellaneous offences

142.365 Part 142 operators—pilot in command for training to be authorised under Part 61

- (1) A Part 142 operator commits an offence if:
 - (a) a person flies an aircraft as pilot in command in the conduct of an authorised Part 142 activity for the operator; and
 - (b) the person is not authorised under Part 61 to fly the aircraft as pilot in command.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

Note: See also subsection 20AB(1) of the Act.

142.370 Part 142 operators—carriage of passengers prohibited during abnormal operations or low-flying activity

- (1) A Part 142 operator commits an offence if:
 - (a) during a flight of an aircraft for an authorised Part 142 activity for the operator:
 - (i) a simulated engine or system failure that affects the aircraft's performance or handling characteristics is conducted; or
 - (ii) a low-flying activity is conducted; and
 - (b) a passenger is carried on the flight.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

142.375 Part 142 operators—authorisation of carriage of passengers

- (1) A Part 142 operator commits an offence if:
 - (a) a person flies an aircraft used in an authorised Part 142 activity for the operator as pilot in command; and
 - (b) the operator authorises the carriage of a passenger on the flight; and
 - (c) the person is not authorised under Part 61 to fly the aircraft as pilot in command with a passenger on board.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

142.380 Part 142 operators—integrated training courses: transfer of student from another Part 142 operator

- (1) This regulation applies if:
 - (a) a person seeks to undertake part of an integrated training course with a Part 142 operator (the *current operator*); and
 - (b) the person has previously undertaken part of the course with one or more other Part 142 operators (the *previous operators*).
- (2) The current operator commits an offence if:
 - (a) the operator provides part of the course to the person; and
 - (b) the operator does not meet the requirement mentioned in subregulation (3).

Penalty: 50 penalty units.

- (3) For paragraph (2)(b), the requirement is that the current operator must have determined:
 - (a) what part of the course the person has completed with the previous operators; and
 - (b) what part of the course the person needs to complete with the current operator to ensure that, taken together, the parts of the course provided by the previous and current operators will meet the standards specified in the Part 61 Manual of Standards for the course.
- (4) An offence against this regulation is an offence of strict liability.

142.385 Part 142 operators—completion of training and assessment of competency for certain solo flights

Student pilots

- (1) A Part 142 operator commits an offence if:
 - (a) a student pilot who is undertaking authorised Part 142 flight training with the operator conducts a solo flight of a kind mentioned in subregulation (2) for the first time; and
 - (b) the student pilot does not meet the requirements mentioned in subregulation (3).

Penalty: 50 penalty units.

- (2) For paragraph (1)(a), the kinds of solo flight are the following:
 - (a) a circuit training flight;
 - (b) a flight between an aerodrome and the flight training area for the aerodrome;
 - (c) a cross-country flight;
 - (d) a flight at night.
- (3) For paragraph (1)(b), the requirements are the following:

Regulation 142.386

- (a) the student pilot must have completed the training mentioned in the operator's exposition that relates to the conduct of a solo flight of that kind by a student pilot;
- (b) the student pilot must have been assessed by the operator as competent to conduct the solo flight;
- (c) if the flight is a flight of a kind mentioned in paragraph (2)(c) or (d)—the student pilot must have completed at least 2 hours of dual instrument time, 1 hour of which is conducted during dual instrument flight time.

Holders of pilot licences

- (4) A Part 142 operator commits an offence if:
 - (a) the holder of a pilot licence who is receiving flight training from the operator for a rating or endorsement on the pilot's licence conducts a solo flight at night for the first time; and
 - (b) the flight training is authorised Part 142 training for the operator; and
 - (c) the holder does not meet the requirements mentioned in subregulation (5).

Penalty: 50 penalty units.

- (5) For paragraph (4)(c), the requirements are the following:
 - (a) the holder must have completed the training mentioned in the operator's exposition that relates to the conduct of a solo flight for flight training for the rating or endorsement;
 - (b) the holder must have been assessed by the operator as competent to conduct the solo flight.

Penalty: 50 penalty units.

- (6) An offence against this regulation is an offence of strict liability.

Note: See also Subdivision 61.A.3.1 and regulation 61.1225.

142.386 Part 142 operators—appropriate briefing and capability to conduct certain solo flights etc.

- (1) A Part 142 operator commits an offence if:
 - (a) a person who is undertaking authorised Part 142 flight training with the operator conducts a solo flight for the first time; and
 - (b) the person does not meet the requirements mentioned in subregulation (2).

Penalty: 50 penalty units.

- (2) For paragraph (1)(b), the requirements are the following:
 - (a) the person must have been briefed appropriately for the flight;
 - (b) the person must be capable of conducting the flight safely;
 - (c) if the person is a student pilot—the person must:
 - (i) have been assessed by CASA or an examiner as meeting the general English language proficiency standard mentioned in the Part 61 Manual of Standards; or

- (ii) have completed an approved course of training in English language proficiency;
 - (d) the person must have an ARN.
- (3) Strict liability applies to paragraph (1)(a).

Note: See also Subdivision 61.A.3.1 and regulation 61.1225.

142.390 Part 142 operators—dealings in relation to cancelled, suspended, varied, pending or refused civil aviation authorisations: when approval required

Requirement for approval

- (1) A Part 142 operator commits an offence if:
- (a) the operator does an act mentioned in subregulation (2), (4), (6) or (8); and
 - (b) the operator does not hold an approval under regulation 142.040 to do the act.

Penalty: 50 penalty units.

Acts in relation to cancelled authorisations

- (2) For paragraph (1)(a), the acts are the following:
- (a) to use, in any of the operator's authorised Part 142 activities, an aircraft the operation of which was authorised by a cancelled authorisation;
 - (b) to employ, in connection with any of the operator's authorised Part 142 activities, a person who was, at the time of the cancellation, employed in connection with an operation the conduct of which was authorised by a cancelled authorisation;
 - (c) to conduct an operation, or part of an operation, the conduct of which was authorised by a cancelled authorisation.

Acts in relation to suspended or varied authorisations

- (3) Subregulation (4) applies in relation to a suspended or varied authorisation.
- (4) For paragraph (1)(a), the acts are the following:
- (a) to use, in any of the operator's authorised Part 142 activities, an aircraft the operation of which:
 - (i) was, immediately before the suspension or variation, authorised by the authorisation; but
 - (ii) is no longer authorised by the authorisation as suspended or varied;
 - (b) to employ, in connection with any of the operator's authorised Part 142 activities, a person who was, at the time of the suspension or variation, employed in connection with an operation the conduct of which:
 - (i) was, immediately before the suspension or variation, authorised by the authorisation; but
 - (ii) is no longer authorised by the authorisation as suspended or varied;

Regulation 142.390

- (c) to conduct an operation, or part of an operation, the conduct of which:
 - (i) was, immediately before the suspension or variation, authorised by the authorisation; but
 - (ii) is no longer authorised by the authorisation as suspended or varied.

Note: See section 28BB of the Act in relation to varying AOC conditions.

Pending applications for authorisations

- (5) Subregulation (6) applies in relation to an application for a civil aviation authorisation that has not been finally determined by CASA.
- (6) For paragraph (1)(a), the acts are the following:
 - (a) to use, in any of the operator's authorised Part 142 activities, an aircraft the operation of which would be authorised by the authorisation;
 - (b) to employ, in connection with any of the operator's authorised Part 142 activities, a person employed, or proposed to be employed, in connection with an operation the conduct of which would be authorised by the authorisation;
 - (c) to conduct an operation, or part of an operation, the conduct of which would be authorised by the authorisation.

Application for authorisation refused

- (7) Subregulation (8) applies in relation to an application for a civil aviation authorisation that has been refused by CASA.
- (8) For paragraph (1)(a), the acts are the following:
 - (a) to use, in any of the operator's authorised Part 142 activities, an aircraft the use of which would have been authorised by the authorisation;
 - (b) to employ, in connection with any of the operator's authorised Part 142 activities, a person employed, or proposed to be employed, in connection with an operation the conduct of which would have been authorised by the authorisation;
 - (c) to conduct an operation, or part of an operation, the conduct of which would have been authorised by the authorisation.
- (9) An offence against this regulation is an offence of strict liability.
- (10) In this regulation:

cancelled authorisation means a civil aviation authorisation that has been cancelled otherwise than on application by the holder of the authorisation.

employ includes engage, whether by contract or other arrangement.

suspended authorisation means a civil aviation authorisation that has been suspended otherwise than on application by the holder of the authorisation.

varied authorisation means a civil aviation authorisation that has been varied otherwise than on application by the holder of the authorisation.

142.395 Part 142 operators—maximum period for use of foreign registered aircraft in Australian territory

- (1) A Part 142 operator commits an offence if, in any 12 month period, the operator uses a foreign registered aircraft to conduct authorised activities in Australian territory for a total of more than the number of days mentioned in subregulation (2).

Penalty: 50 penalty units.

- (2) For subregulation (1), the number of days is:
- (a) 90; or
 - (b) if the operator holds an approval under regulation 142.040 for this regulation in relation to the aircraft—the number mentioned in the approval for the aircraft.
- (3) An offence against this regulation is an offence of strict liability.
- (4) In this regulation:

authorised activity, for a Part 142 operator, means an activity authorised by a civil aviation authorisation held by the operator.

Part 143—Air Traffic Services Training Providers

Table of contents

Subpart 143.A—General

- 143.005 Applicability of this Part
- 143.010 Definitions for this Part
- 143.015 What is an ATS training provider
- 143.016 Person not to provide service without approval

Subpart 143.F—Administration

Division 143.F.1—Preliminary

- 143.115 Applicability of this Subpart
-

Division 143.F.2—Approvals

- 143.118 Applying for approval
- 143.120 Joint applications not permitted
- 143.130 Applications by corporations etc—what must be included
- 143.145 CASA may require demonstrations of procedures or equipment
- 143.175 Grant of approval
- 143.180 When decision must be made

Division 143.F.4—Suspension and cancellation of approvals

- 143.215 Definition for this Division
- 143.220 Suspension of approval by show cause notice
- 143.225 Grounds for cancellation of approval
- 143.230 Notice to show cause
- 143.235 Cancellation of approval after show cause notice
- 143.245 Cancellation if cooperation or arrangement ceases

Subpart 143.A—General

143.005 Applicability of this Part

- (1) This Part:
 - (a) applies to a person that wants to become, or is, an ATS training provider; and
 - (b) sets out certain administrative rules applying to CASA in its administration of this Part.
- (2) However, this Part does not apply to:
 - (a) a person who is providing ATS training in the course of his or her duties for the Defence Force; or
 - (b) any ATS training provided by the Defence Force.

143.010 Definitions for this Part

In this Part:

Australian National Training Authority means the Australian National Training Authority established by the *Australian National Training Authority Act 1992*.

Australian Qualifications Framework means the framework set out in a document called ‘Australian Qualifications Framework Implementation Handbook’ published by the Australian Qualifications Framework (AQF) Advisory Board in 1998.

Australian Quality Training Framework means the quality arrangements for vocational education and training services set out in the document called ‘Australian Quality Training Framework – Standards for Registered Training Organisations’ published by the Australian National Training Authority in 2001.

Manual of Standards – Part 65 means the document called ‘Manual of Standards (MOS) – Part 65’ issued by CASA under regulation 65.033, as in force from time to time.

Manual of Standards – Part 143 means the document called ‘Manual of Standards (MOS) – Part 143’ issued by CASA under regulation 143.017, as in force from time to time.

training provider means a person who, or entity that, provides vocational education and training.

training recognition authority, in relation to a State or Territory, means a body that has, under a law of the State or Territory, the responsibility for registering training providers in that State or Territory.

143.015 What is an ATS training provider

An ATS training provider is a person approved, under Subpart 143.F, to provide the training relating to air traffic services that is covered by the approval.

143.016 Person not to provide service without approval

- (1) A person must not provide training relating to air traffic services unless the person:
 - (a) is approved, under Division 143.F.2, to provide the training; or
 - (b) is an ATS provider within the meaning in Part 172.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

143.017 Issue of Manual of Standards

- (1) CASA may issue a Manual of Standards for this Part that provides for the following matters:
 - (a) standards, including procedures, plans, systems and documentation, for the provision of air traffic services training;
 - (b) standards for facilities and equipment used to provide air traffic services training;
 - (c) standards, including competency standards and minimum qualifications, for instructors engaged in air traffic services training;
 - (d) any matter required or permitted by these Regulations to be provided for by the Manual of Standards;
 - (e) any matter necessary or convenient to be provided for the effective operation of this Part.

Note: A Manual of Standards is a legislative instrument—see subsections 98(5A) and (5B) of the Act. It must be registered in accordance with the *Legislation Act 2003* and must be tabled in both Houses of the Parliament within 6 sitting days after its making.

- (2) CASA must give a copy of a notice about a Manual of Standards for this Part (being a notice referred to in subregulation 11.275(3) or regulation 11.280) to each ATS training provider.

Note: Subpart 11.J (including regulations 11.275 and 11.280) sets out procedures for the issue, amendment and revocation of a MOS.

Subpart 143.B—Approval as an ATS training provider

143.020 What an application must be accompanied by

An application for approval as an ATS training provider must be accompanied by:

- (a) a written statement setting out details of the training relating to air traffic services that the applicant proposes to provide; and
- (b) a written statement setting out details of the relevant qualifications and experience of the applicant and applicant's personnel, including the number of suitably qualified personnel who will be involved in providing the training; and
- (c) enough information to show that the applicant is a registered training organisation whose registration:
 - (i) is in force; and
 - (ii) is for training delivery covering the training; and
- (d) a written statement describing the arrangements the applicant has made to comply with the requirements of Subparts 143.C and 143.D.

143.025 When applicant is eligible for approval

For Subpart 143.F, an applicant is eligible to become an ATS training provider for particular training relating to air traffic services if the applicant:

- (aa) is any of the following:
 - (i) the Commonwealth;
 - (ii) AA;
 - (iii) a person who is to provide air traffic services training services in cooperation with AA, in accordance with paragraph 11(3)(b) of the *Air Services Act 1995*;
 - (iv) a person who is to provide air traffic services training services by arrangement with AA, in accordance with paragraph 11(3)(c) of the *Air Services Act 1995*; and
- (a) is a registered training organisation whose registration:
 - (i) is in force; and
 - (ii) is for training delivery covering that training; and
- (b) is able to comply with the requirements of Subparts 143.C and 143.D or will be able to do so if the applicant is approved.

143.027 CASA may impose conditions on approvals

Without limiting regulations 11.056 and 11.067, CASA may impose, on an approval, any condition necessary to give effect to an arrangement mentioned in subsection 11(3) of the *Air Services Act 1995*.

143.050 Variation of approvals

- (1) If an ATS training provider wants to vary its approval, it must apply to CASA, under Subpart 143.F, for that purpose.
- (2) The application must contain, or have with it, a copy of the proposed variation.

Subpart 143.C—Requirements to be complied with by ATS training providers

Division 143.C.1—Requirements for training

143.055 Standard for training

An ATS training provider must ensure that the training relating to air traffic services that it provides:

- (a) is of at least the standard required by the Manual of Standards – Part 65;
and
- (b) complies with the Australian Qualifications Framework.

143.060 Training plan

An ATS training provider must have, and put into effect, a training plan for the training relating to air traffic services covered by its approval that is in accordance with the standards and requirements set out in the Manual of Standards – Part 65.

Division 143.C.2—Personnel

143.065 Personnel

An ATS training provider must have, at all times, enough suitably qualified personnel to enable it to provide, in accordance with both the Australian Quality Training Framework and the standards and requirements set out in the Manual of Standards – Part 65, the training relating to air traffic services that is covered by its approval.

143.070 Qualifications for certain personnel

An ATS training provider must not give to a person responsibility as an instructor or assessor for any training relating to air traffic services that it provides unless the person:

- (a) has suitable qualifications and experience in accordance with the Australian Quality Training Framework; and
- (b) satisfies the requirements of the Manual of Standards – Part 65 for persons having that responsibility.

Division 143.C.3—Reference materials, documents and records

143.075 Reference materials

- (1) An ATS training provider must maintain a set of the reference materials mentioned in regulation 143.080 for use by members of its personnel who have responsibilities as instructors or assessors for any training relating to air traffic services that it provides.
- (2) The provider must maintain another set of the reference materials for use by anyone undertaking training relating to air traffic services that it provides.
- (3) The provider must keep the reference materials up to date and in a readily accessible form.
- (4) The instructors and assessors and anyone undertaking training must have ready access to the reference materials.

143.080 Material to be included in reference materials

For regulation 143.075, the reference materials to be maintained by the provider must include the following:

- (a) copies of the Act and these Regulations;
- (b) copies of Annexes 1, 6, 11 and 12 to the Chicago Convention;
- (c) a copy of the AIP;
- (d) copies of the Manual of Standards – Part 65 and the Manual of Standards – Part 143;
- (e) all manuals and documents specified in the Manual of Standards – Part 65 and Manual of Standards – Part 143.

143.085 Documents and records

- (1) The provider must keep documents and records of the kinds specified in the Manual of Standards – Part 143.
- (2) A document or record must be retained for as long as the Manual specifies for the particular kind of document or record.
- (3) The provider must, at CASA's request, make the documents and records, or copies of them or extracts from them, available for inspection by CASA.

143.090 Document and record control system

- (1) The provider must establish, and put into effect, a system, in accordance with the standards set out in the Manual of Standards – Part 143, for controlling the documents and records required to be kept under regulation 143.085.
- (2) The system must include the policies and procedures for making, amending and preserving those documents and records.

Subpart 143.D—Telling CASA about changes

143.095 Advice on organisational changes

The provider must tell CASA, in writing, of a change of circumstances that materially affects its capacity to provide any training relating to air traffic services that is covered by its approval within 7 days after the change occurs.

143.100 Discontinuing training

- (1) The provider must not discontinue any training relating to air traffic services that is covered by its approval, unless it has given CASA at least 28 days written notice that the training is to be discontinued.
- (2) Subregulation (1) does not apply if, having regard to the provider's circumstances:
 - (a) it was not reasonably practicable for the provider to give to CASA at least 28 days notice; and
 - (b) the provider gives the notice as soon as reasonably practicable before, on or after the day when the service is discontinued.

143.105 Status as registered training organisation

If an ATS training provider, for any reason at any time after its approval as an ATS training provider, loses its status as a registered training organisation, it must, within 7 days, tell CASA in writing accordingly.

Subpart 143.E—Miscellaneous

143.110 Unapproved training

An ATS training provider must not provide any training relating to air traffic services unless:

- (a) its approval:
 - (i) is in force; and
 - (ii) covers that training; and
- (b) it is a registered training organisation whose registration:
 - (i) is in force; and
 - (ii) is for training delivery covering that training.

Subpart 143.F—Administration

Note: In addition to the provisions of this Subpart, Part 11 contains provisions relating to an application for approval as an ATS training provider.

Division 143.F.1—Preliminary

143.115 Applicability of this Subpart

This Subpart:

- (a) sets out certain administrative rules applying to CASA in its administration of this Part; and
- (b) includes certain generic provisions applying to anyone who wants to become, or is, an ATS training provider.

Regulation 143.118

Division 143.F.2—Approvals

143.118 Applying for approval

Subject to regulation 143.120, a person may apply to CASA, in writing, for approval as an ATS training provider.

Note: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.

143.120 Joint applications not permitted

- (1) An application purportedly made by 2 or more persons jointly is not a valid application for any purpose.
- (2) An application purportedly made by a partnership is not a valid application for any purpose.

143.130 Applications by corporations etc—what must be included

- (1) An application from a person other than an individual must set out:
 - (a) the applicant's registered address and ACN; and
 - (b) the names and addresses of its officers.
- (2) In paragraph (1)(b):

officer has the meaning given by section 9 of the *Corporations Act 2001*.

143.145 CASA may require demonstrations of procedures or equipment

Regulation 11.045 applies in relation to an approval as an ATS training provider.

143.175 Grant of approval

Subject to regulation 11.055, if an applicant has applied for approval as an ATS training provider under this Part, CASA must grant the approval.

Note: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to issue, or cancelling, suspending or varying, an approval; or
- (b) a decision imposing a condition on an approval.

143.180 When decision must be made

- (1) If CASA does not make a decision about an application within the period mentioned in subregulation (2) after receiving it, CASA is taken to have refused the application.
- (2) The period is 6 months.

- (3) However, if CASA makes a request under regulation 11.035, 11.040 or 11.045, the time between when CASA makes the request, and when the applicant conducts the demonstration, comes in for interview, or gives CASA the information or copy requested, does not count towards the period.
- (4) Also, if CASA asks an applicant to make a statutory declaration under regulation 11.047 or subregulation 11.050(3A), the time between when CASA asks the applicant to do so and when the applicant gives CASA the statutory declaration does not count towards the period.
- (5) Also, if CASA invites an applicant to make a written submission under subregulation 11.050(2), the time between when CASA gives the invitation and when the applicant makes the written submission does not count towards the period.
- (6) In this regulation:

application includes an application to vary an approval under this Division.

Division 143.F.4—Suspension and cancellation of approvals

143.215 Definition for this Division

In this Division:

show cause notice means a notice under regulation 143.230.

143.220 Suspension of approval by show cause notice

- (1) CASA may state, in a show cause notice, that an ATS training provider's approval is suspended if CASA reasonably considers that not suspending the approval would be likely to have an adverse effect on the safety of air navigation.

Note: Regulation 201.4 provides for review of certain decisions by the Administrative Appeals Tribunal.

- (2) If a show cause notice states that the approval is suspended, the approval is suspended from when the notice is given to the provider.
- (3) CASA may revoke the suspension at any time.
- (4) If CASA has not cancelled the approval under regulation 143.235, within 90 days after the day the show cause notice is given to the provider, the suspension lapses at the end of that period.

143.225 Grounds for cancellation of approval

It is grounds for the cancellation of an ATS training provider's approval if the provider:

- (a) has breached a condition of the approval; or
- (b) has contravened the Act or these Regulations; or
- (c) does not meet, or continue to meet, a requirement of this Part for getting the approval; or
- (d) has otherwise been guilty of conduct that renders the provider's continued holding of the approval likely to have an adverse effect on the safety of air navigation.

Note: Regulation 201.004 provides for review of certain decisions by the Administrative Appeals Tribunal.

143.230 Notice to show cause

- (1) CASA may give an ATS training provider a show cause notice if there are reasonable grounds for believing that there are facts or circumstances that amount to grounds for the cancellation of the provider's approval.
- (2) A show cause notice must:
 - (a) tell the provider of the facts and circumstances that justify the cancellation of the approval; and

- (b) invite the provider to show in writing, within a reasonable period stated in the notice, why the approval should not be cancelled.
- (3) For paragraph (2)(b), the period must not be less than 7 days.

143.235 Cancellation of approval after show cause notice

- (1) Subject to regulation 143.245, CASA may cancel an ATS training provider's approval only if:
 - (a) there exist facts or circumstances that amount to grounds for the cancellation of the approval; and
 - (b) CASA has given the provider a show cause notice in relation to the grounds for the proposed cancellation; and
 - (c) CASA has taken into account any written representations made, within the period stated in the notice, by or on behalf of the provider; and
 - (d) not cancelling the approval would be likely to have an adverse effect on the safety of air navigation.
- (2) If CASA has given a show cause notice to an ATS training provider, and it decides not to cancel the provider's approval, it:
 - (a) must tell the provider, in writing, of the decision; and
 - (b) must, if the approval is suspended, revoke the suspension.

143.245 Cancellation if cooperation or arrangement ceases

- (1) CASA must cancel the approval of a person mentioned in subparagraph 143.025(aa)(iii) if the cooperation mentioned in that subparagraph ceases.
- (2) CASA must cancel the approval of a person mentioned in subparagraph 143.025(aa)(iv) if the arrangement mentioned in that subparagraph ceases.

Part 144—Distribution organisations

Note: This Part heading is reserved for future use.

Part 145—Continuing airworthiness—Part 145 approved maintenance organisations

Table of contents

Subpart 145.A—General

- 145.005 Purpose of Part
- 145.010 Definitions for Part
- 145.015 Part 145 Manual of Standards
- 145.020 Regulations 11.070 to 11.075 do not apply in relation to certain matters

Subpart 145.B—Approval of Part 145 organisations

- 145.025 Applying for approval
- 145.030 Issuing approval
- 145.035 Approval certificate
- 145.040 Privileges for Part 145 organisations
- 145.045 Approval subject to conditions

Subpart 145.C—Changes to Part 145 organisations

- 145.050 Application for approval of significant changes to organisations
- 145.055 Approval of significant changes
- 145.060 Changes to Part 145 organisations that are not significant changes
- 145.065 CASA may direct Part 145 organisations to change exposition

Subpart 145.D—Requirements and offences for Part 145 organisations

- 145.070 Provision of maintenance services
- 145.075 Provision of permitted training
- 145.080 Providing employees with exposition
- 145.085 Complying with directions

Regulation 145.005

Subpart 145.A—General

145.005 Purpose of Part

This Part:

- (a) sets out matters relating to Part 145 organisations, including:
 - (i) requirements for approval as a Part 145 organisation; and
 - (ii) requirements that apply to Part 145 organisations; and
- (b) empowers CASA to issue a Manual of Standards for this Part.

Note: See Division 202.GE.2.1 for transitional provisions under which Part 145 organisations can be approved to undertake CAR maintenance activities.

145.010 Definitions for Part

(1) In this Part:

accountable manager, for a Part 145 organisation, means the individual, appointed by the organisation, who is responsible for:

- (a) ensuring that the organisation complies with its exposition, each approval rating that it holds, and these Regulations; and
- (b) ensuring that the organisation is able to finance the provision of the maintenance services set out in its exposition; and
- (c) ensuring that the organisation has adequate resources available to enable it to provide maintenance services in accordance with its exposition; and
- (d) establishing and promoting policies for safety management and quality systems in accordance with the requirements of this Part and Part 42.

approval certificate means a certificate issued under regulation 145.035.

approval rating means a rating for a kind of aircraft, aeronautical product or specialist maintenance specified in the Part 145 Manual of Standards.

exposition, for a Part 145 organisation, means the document that is approved by CASA under regulation 145.030 in relation to the organisation, including:

- (a) if a change to the document is approved by CASA under regulation 145.055—that change; and
- (b) if the document is updated and the organisation gives CASA a copy of the updated part of the document under regulation 145.060—the updated part of the document; and
- (c) if the organisation makes a change to the document in accordance with a direction given by CASA under regulation 145.065—that change.

quality manager, for a Part 145 organisation, means the individual, appointed by the organisation, who is responsible for the quality management system described in the Part 145 Manual of Standards for the organisation.

responsible manager, for a Part 145 organisation, means an individual appointed by the organisation to be responsible to the accountable manager for ensuring that the organisation complies with its exposition and these Regulations in relation to a particular matter.

safety manager, for a Part 145 organisation, means the individual, appointed by the organisation, who is responsible for the safety management system described in the Part 145 Manual of Standards for the organisation.

significant change, in relation to a Part 145 organisation, has the meaning given by subregulation (2).

Note: See the Dictionary for definitions of other terms used in this Part.

- (2) A **significant change**, in relation to a Part 145 organisation, means any of the following changes:
- (a) a change to the organisation's name;
 - (b) a change to the location of the organisation's maintenance facility, including the addition of a new maintenance facility;
 - (c) a change in the personnel holding:
 - (i) the position of accountable manager in the organisation; or
 - (ii) the position of quality manager in the organisation; or
 - (iii) any of the positions of responsible manager in the organisation; or
 - (iv) the position of safety manager in the organisation;
 - (d) a change to the maintenance services provided by the organisation, if the change would require a change to the approval ratings mentioned in the organisation's approval certificate;
 - (e) a change to the permitted training that it is approved to provide;
 - (f) a change to the organisation's facilities, equipment, tools, materials, procedures or certifying employees that could adversely affect the organisation's ability to provide maintenance services that it is approved to provide.

145.015 Part 145 Manual of Standards

- (1) For subsection 98(5A) of the Act, CASA may issue a Manual of Standards for this Part that specifies matters affecting the maintenance or airworthiness of aircraft.
- (2) In particular, a Manual of Standards may specify the following matters:
 - (a) maintenance that is specialist maintenance for a Part 145 organisation;
 - (b) ratings for kinds of aircraft, aeronautical products and specialist maintenance;
 - (c) requirements for a Part 145 organisation's exposition;
 - (d) the privileges that apply to an approval rating;
 - (e) requirements for a Part 145 organisation, including requirements in relation to the following:
 - (i) facilities;

Regulation 145.020

- (ii) managers;
- (iii) certifying employees;
- (iv) employee qualifications;
- (v) the grant of certification authorisations;
- (vi) training;
- (vii) equipment, tools and materials;
- (viii) aeronautical products;
- (ix) maintenance data;
- (x) writing procedures for carrying out maintenance;
- (xi) production planning;
- (xii) the issue of certificates of release to service;
- (xiii) in-house maintenance and in-house release documents;
- (xiv) the fabrication of parts in the course of carrying out maintenance;
- (xv) records;
- (xvi) defect reporting;
- (xvii) a quality management system, including auditing;
- (xviii) a safety management system;
- (xix) a procedure for making changes to the organisation that are not significant changes;
- (f) requirements for providing permitted training;
- (g) requirements for a Part 145 organisation in relation to arranging for the manufacturer of an aircraft or aircraft engine that forms part of a permitted aircraft type to provide training and assessment for the permitted aircraft type to the organisation's employees.

145.020 Regulations 11.070 to 11.075 do not apply in relation to certain matters

Regulations 11.070 to 11.075 do not apply to:

- (a) a significant change to a Part 145 organisation that is approved by CASA under regulation 145.055; or
- (b) a change to a Part 145 organisation of which CASA is notified under regulation 145.060; or
- (c) a change to a Part 145 organisation that is made as a consequence of a change made to the organisation's exposition in accordance with a direction given by CASA under regulation 145.065.

Subpart 145.B—Approval of Part 145 organisations

145.025 Applying for approval

- (1) A person (the *applicant*) may apply to CASA for approval as a Part 145 organisation.
- (2) The application must:
 - (a) be in writing; and
 - (b) be signed by a person who is, or proposes to be, the applicant's accountable manager.
- (3) The application must include the following:
 - (a) a copy of the applicant's proposed exposition;
 - (b) the approval rating sought by the applicant for:
 - (i) each kind of aircraft or aeronautical product for which the applicant proposes to provide maintenance services; and
 - (ii) each kind of specialist maintenance that the applicant proposes to provide;
 - (c) if the applicant intends to provide permitted training for its employees—each aircraft type, aircraft system or subset of an aircraft system for which the applicant intends to provide training.

Note 1: An application must be in the approved form, include all the information required by these Regulations, and be accompanied by every document required by these Regulations—see regulation 11.030.

Note 2: Part 11 deals with applications and decision making.

145.030 Issuing approval

- (1) Subject to regulation 11.055, CASA must approve an applicant as a Part 145 organisation if CASA is satisfied that:
 - (a) the applicant has an exposition that complies with the requirements specified in the Part 145 Manual of Standards; and
 - (b) the applicant has facilities, equipment, materials, maintenance data and tools that are suitable for:
 - (i) providing maintenance services for the kinds of aircraft or aeronautical product for which the applicant proposes to provide maintenance services; and
 - (ii) providing the specialist maintenance that the applicant proposes to provide; and
 - (iii) providing the permitted training that the applicant proposes to provide for its employees; and
 - (c) the facilities, equipment, materials, maintenance data and tools mentioned in paragraph (b) comply with the requirements specified in the Part 145 Manual of Standards; and

Regulation 145.035

- (d) the applicant has nominated an individual for each of the following positions in the organisation:
 - (i) accountable manager;
 - (ii) quality manager;
 - (iii) safety manager; and
- (e) the applicant has nominated an individual for each position of responsible manager in the organisation; and
- (f) each individual nominated for a position mentioned in paragraph (d) or (e) is appropriately qualified to hold the position; and
- (g) the audit requirements of the applicant's quality management system will be carried out by a person who is not:
 - (i) the accountable manager; or
 - (ii) a responsible manager.

Note: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to issue, or cancelling, suspending or varying, an approval; or
- (b) a decision imposing a condition on an approval.

- (2) If CASA decides to approve an applicant as a Part 145 organisation, CASA must determine:
 - (a) the approval rating for each kind of aircraft or aeronautical product for which the applicant is approved to provide maintenance services; and
 - (b) the approval rating for each kind of specialist maintenance that the applicant is approved to provide; and
 - (c) any limitations applying to an approval rating mentioned in paragraph (a) or (b); and
 - (d) the permitted training that the applicant is approved to provide for its employees.
- (3) In approving the applicant, CASA also approves the applicant's proposed exposition.

145.035 Approval certificate

- (1) If CASA approves an applicant as a Part 145 organisation, CASA must issue a certificate setting out the matters mentioned in paragraphs 145.030(2)(a) to (c).
- (2) The certificate issued by CASA must include an approval certificate reference number determined by CASA.
- (3) If CASA approves a significant change to a Part 145 organisation under regulation 145.055, CASA may issue a new approval certificate to the organisation.

145.040 Privileges for Part 145 organisations

- (1) A Part 145 organisation may provide:
 - (a) maintenance services that it is approved to provide; and
-

- (b) permitted training that it is approved to provide for its employees.
- (2) A Part 145 organisation may arrange for training and assessment for a permitted aircraft type to be provided by the manufacturer of the aircraft or the aircraft engine.

145.045 Approval subject to conditions

It is a condition of approval of a Part 145 organisation that:

- (a) the organisation must, at all times, comply with the requirements of:
 - (i) its exposition; and
 - (ii) the approval rating for each kind of aircraft or aeronautical product for which the organisation is approved to provide maintenance services; and
 - (iii) the approval rating for each kind of specialist maintenance that the organisation is approved to provide; and
 - (iv) any limitations applying to an approval rating mentioned in subparagraph (ii) or (iii); and
 - (v) the Part 145 Manual of Standards; and
 - (vi) Part 42 and this Part; and
- (b) the organisation must ensure that, at all times, its employees comply with the requirements mentioned in paragraph (a).

Note 1: The approval is also subject to the conditions set out in Part 11.

Note 2: Subpart 11.G empowers CASA to issue directions.

Regulation 145.050

Subpart 145.C—Changes to Part 145 organisations

145.050 Application for approval of significant changes to organisations

- (1) If a Part 145 organisation proposes to make a significant change, the organisation must apply to CASA for approval of the change.
- (2) The application must:
 - (a) be in writing; and
 - (b) set out the proposed change; and
 - (c) include a copy of the part of the exposition consequentially affected by the change, showing the proposed change.
- (3) Subject to subregulation (4), the application must be made before the change is made.
- (4) If:
 - (a) the change is of the kind mentioned in paragraph 145.010(2)(c); and
 - (b) the organisation does not apply, in accordance with subregulation (2), before making the change;

the organisation must apply in accordance with subregulation (2) within 7 days after making the change.

Note 1: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.

Note 2: Part 11 deals with applications and decision making.

Note 3: Making a significant change without applying for approval in accordance with this regulation will be a breach of condition of an approval—see regulation 145.045.

145.055 Approval of significant changes

- (1) Subject to regulation 11.055, CASA must approve a significant change to a Part 145 organisation if CASA is satisfied that, after making the change, the requirements mentioned in subregulation 145.030(1) will continue to be met.

Note: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to issue, or cancelling, suspending or varying, an approval; or
 - (b) a decision imposing a condition on an approval.
- (2) In approving the significant change, CASA also approves the consequential changes to the applicant's exposition.

145.060 Changes to Part 145 organisations that are not significant changes

- (1) A change that is not a significant change to a Part 145 organisation must be made in accordance with the procedure set out in the organisation's exposition for making changes to the organisation that are not significant changes.

- (2) If such a change is made, the organisation must, within 28 days after making the change:
- (a) update its exposition; and
 - (b) give CASA written notice of the change and a copy of the updated part of the exposition.

145.065 CASA may direct Part 145 organisations to change exposition

- (1) CASA may direct a Part 145 organisation to change its exposition:
- (a) to remove particular information from the exposition; or
 - (b) to include particular information in the exposition; or
 - (c) to revise or vary the information in the exposition.
- (2) CASA may give a direction under this regulation only if CASA is satisfied that it is necessary to do so to ensure that the exposition complies with the requirements specified in the Part 145 Manual of Standards.
- (3) A direction under this regulation must:
- (a) be in writing; and
 - (b) specify the time within which the direction must be complied with.

Note: The Part 145 organisation must comply with the direction—see regulation 145.085.

Regulation 145.070

Subpart 145.D—Requirements and offences for Part 145 organisations

145.070 Provision of maintenance services

- (1) If a Part 145 organisation provides maintenance services, it must provide the services only in accordance with:
 - (a) its exposition; and
 - (b) the approval rating for each kind of aircraft or aeronautical product for which the organisation is approved to provide maintenance services; and
 - (c) the approval rating for each kind of specialist maintenance that the organisation is approved to provide; and
 - (d) any limitations applying to an approval rating mentioned in paragraph (b) or (c); and
 - (e) the privileges that apply to the approval rating under the Part 145 Manual of Standards.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

145.075 Provision of permitted training

- (1) If a Part 145 organisation provides permitted training for its employees, it must:
 - (a) provide only the permitted training that it is approved to provide; and
 - (b) provide the permitted training only in accordance with its exposition.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

145.080 Providing employees with exposition

- (1) If a Part 145 organisation's exposition relates to the duties of an employee of the organisation, the organisation must make the part of the organisation's exposition that relates to those duties available to the employee before the employee begins carrying out the duties.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

145.085 Complying with directions

- (1) If CASA gives a direction to a Part 145 organisation under regulation 145.065, the organisation must comply with the direction within the time mentioned in the direction.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Part 147—Continuing airworthiness—maintenance training organisations

Table of contents

Subpart 147.A—General

- 147.005 Purpose of Part
- 147.010 Definitions for Part
- 147.015 Part 147 Manual of Standards
- 147.020 Regulations 11.070 to 11.075 do not apply in relation to certain matters

Subpart 147.B—Approval of maintenance training organisations

- 147.025 Applying for approval
- 147.030 Issuing approval
- 147.035 Approval certificate
- 147.040 Privileges for maintenance training organisations
- 147.045 Approval subject to conditions

Subpart 147.C—Changes to maintenance training organisations

- 147.050 Application for approval of significant changes to organisations
- 147.055 Decision on application for approval of significant changes
- 147.060 Changes to maintenance training organisations that are not significant changes
- 147.065 CASA may direct maintenance training organisations to change exposition

Subpart 147.D—Requirements and offences for maintenance training organisations

- 147.070 Provision of maintenance training and assessment
- 147.075 Assessment of foreign licences
- 147.080 Providing employees with exposition
- 147.085 Complying with directions

Subpart 147.A—General

147.005 Purpose of Part

This Part:

- (a) sets out matters relating to maintenance training organisations, including:
 - (i) requirements for approval as a maintenance training organisation; and
 - (ii) requirements that apply to maintenance training organisations; and
- (b) empowers CASA to issue a Manual of Standards for this Part.

147.010 Definitions for Part

(1) In this Part:

accountable manager, for a maintenance training organisation, means the individual, appointed by the organisation, who is responsible for ensuring that the organisation:

- (a) complies with its exposition and these Regulations; and
- (b) is able to finance the provision of the kinds of maintenance training set out in its exposition; and
- (c) has adequate resources available to enable it to provide maintenance training in accordance with its exposition.

aircraft type has the meaning given by regulation 66.010.

approval certificate means a certificate issued under regulation 147.035.

assessment means an assessment of units of competency for category training, or elements for aircraft type training, by any or all of the following means:

- (a) examination of theory by means of written questions or oral questions or both;
- (b) practical testing of the skills acquired in practical training;
- (c) consideration of evidence for recognition of prior learning.

Examples: Evidence that may be assessed for recognition of prior learning

- 1 Responses to interview questions.
- 2 Formal qualifications and other documents evidencing an area of competence.
- 3 Third party verification.
- 4 Workplace observation.
- 5 Sample examination results or sample practical test results.

course plan, for a maintenance training organisation and a maintenance training course, means the plan for the maintenance training course set out in the organisation's exposition.

Regulation 147.010

exposition, for a maintenance training organisation, means the document that is approved by CASA under regulation 147.030 in relation to the organisation, including:

- (a) if a change to the document is approved under regulation 147.055—that change; and
- (b) if the document is updated and the organisation gives CASA a copy of the updated part of the document under subregulation 147.060—the updated part of the document; and
- (c) if the organisation makes a change to the document in accordance with a direction given by CASA under regulation 147.065—that change.

feedback system, for a quality management system, has the meaning given by the Part 147 Manual of Standards.

practical training means training that allows a student who has undertaken training in theory to practise applying the theory.

quality management system, for a maintenance training organisation, means the quality management system described in the Part 147 Manual of Standards.

recognition of prior learning means full or partial credit given in a unit of competency for category training, or in an element for aircraft type training, for prior work experience, training or qualifications attained in Australia or a foreign country.

responsible manager, for a maintenance training organisation, means an individual appointed by the organisation to be responsible to the accountable manager for ensuring that the organisation complies with its exposition and these Regulations in relation to a particular matter.

significant change, in relation to a maintenance training organisation, has the meaning given by subregulation (2).

theory means a theoretical element of aircraft type training or category training.

Note: See the Dictionary for definitions of other terms used in this Part.

- (2) A **significant change**, in relation to a maintenance training organisation, means any of the following changes:
 - (a) a change to the organisation's name;
 - (b) a change to the location of the organisation's maintenance training facility, including the addition of a new maintenance training facility;
 - (c) a change in the personnel holding:
 - (i) the position of accountable manager in the organisation; or
 - (ii) any of the positions of responsible manager in the organisation;
 - (d) a change to a course or a course plan provided by the organisation, other than a change resulting from a change to Appendix I, II, III or IV to the Part 66 Manual of Standards;

- (e) a change to the organisation's quality management system, other than a change involving the taking of any necessary corrective action under the feedback system;
- (f) a change to the organisation's facilities, personnel, record management system, instructional equipment, maintenance training material or procedures that could adversely affect the organisation's ability to provide the maintenance training that it is approved to provide.

147.015 Part 147 Manual of Standards

- (1) For subsection 98(5A) of the Act, CASA may issue a Manual of Standards for this Part that specifies matters affecting the maintenance or airworthiness of aircraft.
- (2) In particular, a Manual of Standards may specify the following matters:
 - (a) the category training a maintenance training organisation may be approved to provide;
 - (b) the aircraft type training a maintenance training organisation may be approved to provide;
 - (c) the kinds of assessment a maintenance training organisation may be approved to carry out;
 - (d) requirements for a maintenance training organisation's exposition;
 - (e) requirements for a maintenance training organisation, including requirements in relation to the following:
 - (i) facilities;
 - (ii) employees, including employee qualifications;
 - (iii) records of instructors and assessors;
 - (iv) course plans;
 - (v) conduct of assessments;
 - (vi) instructional equipment;
 - (vii) maintenance training material;
 - (viii) records;
 - (ix) training procedures and the quality management system, including auditing;
 - (x) assessments;
 - (xi) a procedure for making changes to the organisation that are not significant changes.

147.020 Regulations 11.070 to 11.075 do not apply in relation to certain matters

Regulations 11.070 to 11.075 do not apply to:

- (a) a significant change to a maintenance training organisation that is approved by CASA under regulation 147.055; or
- (b) a change to a maintenance training organisation of which CASA is notified under regulation 147.060; or

Regulation 147.020

- (c) a change to a maintenance training organisation that is made as a consequence of a change made to the organisation's exposition in accordance with a direction given by CASA under regulation 147.065.

Subpart 147.B—Approval of maintenance training organisations

147.025 Applying for approval

- (1) A person (the *applicant*) may apply to CASA for approval as a maintenance training organisation.
- (2) Only a person who is a registered training organisation may apply for approval as a maintenance training organisation to provide category training or carry out assessment of units of competency.
- (3) The application must:
 - (a) be in writing; and
 - (b) be signed by a person who is, or proposes to be, the applicant's accountable manager.
- (4) The application must include the following:
 - (a) a copy of the applicant's proposed exposition;
 - (b) if the applicant is seeking approval to provide category training—the categories of aircraft engineer licence for which the applicant proposes to provide training;
 - (c) if the applicant is seeking approval to provide aircraft type training—the ratings for which the applicant proposes to provide training;
 - (d) the kinds of assessment that the applicant proposes to carry out;
 - (e) whether the applicant is seeking approval to recognise prior learning for assessment purposes.

Note 1: An application must be in the approved form, include all the information required by these Regulations, and be accompanied by every document required by these Regulations—see regulation 11.030.

Note 2: Part 11 deals with applications and decision making.

147.030 Issuing approval

- (1) Subject to regulation 11.055, CASA must approve an applicant as a maintenance training organisation if CASA is satisfied that:
 - (a) the applicant has an exposition that complies with the requirements specified in the Part 147 Manual of Standards; and
 - (b) the applicant has facilities, personnel, a record management system, instructional equipment, maintenance training material and a quality management system that comply with the Part 147 Manual of Standards; and
 - (c) the applicant has nominated an individual for the position of accountable manager in the organisation; and

Regulation 147.035

- (d) the applicant has nominated an individual for each position of responsible manager in the organisation; and
- (e) each individual nominated for a position mentioned in paragraph (c) or (d) is appropriately qualified to hold the position.

Note: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to issue, or cancelling, suspending or varying, an approval; or
- (b) a decision imposing a condition on an approval.

- (2) If CASA decides to approve an applicant as a maintenance training organisation, CASA must determine:
 - (a) whether the organisation is approved to provide:
 - (i) category training; or
 - (ii) aircraft type training; or
 - (iii) both category training and aircraft type training; and
 - (b) if the organisation is approved to provide category training—the categories of aircraft engineer licence for which the applicant is approved to provide training; and
 - (c) if the organisation is approved to provide aircraft type training—the ratings for which the applicant is approved to provide training; and
 - (d) the kinds of assessment that the organisation is approved to carry out; and
 - (e) whether the organisation may recognise prior learning for assessment purposes.
- (3) Subject to regulation 11.055, CASA must approve an applicant to provide category training if:
 - (a) CASA has approved the applicant as a maintenance training organisation; and
 - (b) CASA is satisfied that the applicant meets the criteria set out in Appendices I, II and IV to the Part 66 Manual of Standards.
- (4) Subject to regulation 11.055, CASA must approve an applicant to provide aircraft type training if:
 - (a) CASA has approved the applicant as a maintenance training organisation; and
 - (b) CASA is satisfied that the applicant meets the criteria set out in Appendix III to the Part 66 Manual of Standards.
- (5) In approving the applicant, CASA also approves the applicant's proposed exposition.

147.035 Approval certificate

- (1) If CASA approves an applicant as a maintenance training organisation, CASA must issue a certificate setting out the matters mentioned in subregulation 147.030(2).

- (2) The certificate issued by CASA must include an approval certificate reference number determined by CASA.
- (3) If CASA approves a significant change to a maintenance training organisation under regulation 147.055, CASA may issue a new approval certificate to the organisation.

147.040 Privileges for maintenance training organisations

A maintenance training organisation may:

- (a) provide maintenance training that it is approved to provide; and
- (b) carry out assessments that it is approved to carry out; and
- (c) if the organisation is approved to recognise prior learning for assessment purposes—carry out assessments based on recognition of prior learning; and
- (d) issue certificates, in the approved form, to students who have successfully completed that training and assessment.

147.045 Approval subject to conditions

It is a condition of approval of a maintenance training organisation that:

- (a) the organisation must, at all times, comply with the requirements of:
 - (i) its approval as a maintenance training organisation; and
 - (ii) its exposition; and
 - (iii) the Part 147 Manual of Standards; and
 - (iv) this Part; and
- (b) the organisation must ensure that, at all times, its employees comply with the requirements mentioned in paragraph (a).

Note 1: The approval is also subject to the conditions set out in Part 11.

Note 2: Subpart 11.G empowers CASA to issue directions.

Regulation 147.050

Subpart 147.C—Changes to maintenance training organisations

147.050 Application for approval of significant changes to organisations

- (1) If a maintenance training organisation proposes to make a significant change, the organisation must apply to CASA for approval of the change.
- (2) The application must:
 - (a) be in writing; and
 - (b) set out the proposed change; and
 - (c) include a copy of the part of the exposition consequentially affected by the proposed change, showing the proposed change.
- (3) Subject to subregulation (4), the application must be made before the change is made.
- (4) If:
 - (a) the change is:
 - (i) a change of the kind mentioned in paragraph 147.010(2)(c); or
 - (ii) a change of the kind mentioned in paragraph 147.010(2)(f) in relation to the personnel of the organisation; and
 - (b) the organisation does not apply, in accordance with subregulation (2), before making the change;

the organisation must apply in accordance with subregulation (2) within 7 days after making the change.

Note 1: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.

Note 2: Part 11 deals with applications and decision making.

Note 3: Making a significant change without applying for approval in accordance with this regulation will be a breach of condition of an approval—see regulation 147.045.

147.055 Decision on application for approval of significant changes

- (1) Subject to regulation 11.055, CASA must approve a significant change to a maintenance training organisation if CASA is satisfied that, after making the change, the requirements mentioned in subregulation 147.030(1) will continue to be met.

Note: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

 - (a) a decision refusing to issue, or cancelling, suspending or varying, an approval; or
 - (b) a decision imposing a condition on an approval.
- (2) In approving the significant change, CASA also approves the consequential changes to the applicant's exposition.

147.060 Changes to maintenance training organisations that are not significant changes

- (1) A change that is not a significant change to a maintenance training organisation must be made in accordance with the amendment procedure set out in the organisation's exposition.
- (2) If such a change is made, the organisation must, within 28 days after making the change:
 - (a) update its exposition; and
 - (b) give CASA written notice of the change and a copy of the updated part of the exposition.

147.065 CASA may direct maintenance training organisations to change exposition

- (1) CASA may direct a maintenance training organisation to change its exposition:
 - (a) to remove particular information from the exposition; or
 - (b) to include particular information in the exposition; or
 - (c) to revise or vary the information in the exposition.
- (2) CASA may give a direction under this regulation only if CASA is satisfied that it is necessary to do so to ensure that the exposition complies with the requirements specified in the Part 147 Manual of Standards.
- (3) A direction under this regulation must:
 - (a) be in writing; and
 - (b) specify the time within which the direction must be complied with.

Note: The maintenance training organisation must comply with the direction—see regulation 147.085.

Regulation 147.070

Subpart 147.D—Requirements and offences for maintenance training organisations

147.070 Provision of maintenance training and assessment

- (1) If a maintenance training organisation provides maintenance training, carries out assessments or issues certificates, it must do so only in accordance with:
 - (a) its approval as a maintenance training organisation; and
 - (b) its exposition; and
 - (c) the Part 147 Manual of Standards.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

147.075 Assessment of foreign licences

- (1) In assessing a person, a maintenance training organisation must not give credit to the person for holding a licence (however described) that was issued to the person by an excluded State.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note 1: Subregulation 66.060 prevents the recognition of a licence issued by an excluded State.

Note 2: For recognition of a foreign licence issued by a recognised State, see regulations 66.030 and 66.035.

Note 3: For recognition of a foreign licence not issued by a recognised State, see regulations 66.040, 66.045, 66.050 and 66.055.

147.080 Providing employees with exposition

- (1) If a maintenance training organisation's exposition relates to the duties of an employee of the organisation, the organisation must make the part of the organisation's exposition that relates to those duties available to the employee before the employee begins carrying out the duties.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

147.085 Complying with directions

- (1) If CASA gives a maintenance training organisation a direction under regulation 147.065, the organisation must comply with the direction within the time mentioned in the direction.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Part 149—Approved self-administering aviation organisations

Table of contents

Subpart 149.A—General

- 149.005 Approvals by CASA for Part 149
- 149.010 Manual of Standards for Part 149
- 149.015 Aviation administration functions—ASAO certificate required
- 149.020 Compliance with conditions of ASAO certificate

Subpart 149.B—ASAO certificates

- 149.060 CASA may limit number of ASAO certificates
- 149.070 Application for ASAO certificate
- 149.075 Issue of ASAO certificate
- 149.080 Approval of exposition
- 149.085 Conditions of ASAO certificate
- 149.090 Form of ASAO certificate

Subpart 149.C—Changes to exposition or personnel

- 149.110 Certain changes to exposition must be pre-approved by CASA
- 149.115 Approval of changes to exposition
- 149.120 CASA directions relating to exposition or personnel

Subpart 149.D—Organisation and personnel

- 149.195 Organisation and personnel
- 149.200 Notifying CASA if key personnel cannot carry out responsibilities
- 149.205 Familiarisation training for key personnel
- 149.210 Experience etc. of key personnel
- 149.215 Reporting interference with decisions of key personnel
- 149.220 Register of key personnel and appointed persons

Subpart 149.E—Systems, facilities, reference materials and rules

- 149.270 Safety management system
- 149.275 Audit and surveillance system
- 149.280 Facilities and equipment
- 149.285 Reference materials
- 149.290 Aviation administration and enforcement rules

Subpart 149.F—Expositions

- 149.340 Content of exposition
- 149.345 Compliance with exposition
- 149.350 Access to exposition etc.

Subpart 149.G—Authorisations

- 149.400 Grounds for refusal of application for authorisation
-

- 149.405 Disclosure of information in application for authorisation
- 149.410 Authorisation holders must comply with ASAO's exposition
- 149.415 Notice of suspension, variation or cancellation of authorisation
- 149.425 Reporting conduct of authorisation holders etc.
- 149.430 Reporting applications for authorisations in certain circumstances
- 149.435 ASAO to refuse to issue authorisation if suspended etc.
- 149.440 ASAO to refuse to issue authorisation if exclusion period is in force

Subpart 149.H—Authorisations and enforcement

- 149.490 Direction to ASAO to exercise ASAO enforcement powers
- 149.495 Variation, suspension and cancellation of authorisations issued by ASAOs
- 149.500 Effect of suspension or cancellation by CASA of authorisations issued by ASAOs

Subpart 149.J—Information and documents

- 149.540 Providing information or documents to CASA
- 149.550 Copies of documents to CASA

Subpart 149.K—Review of ASAO decisions

- 149.605 Application for internal review by ASAO
- 149.610 Application for review by CASA
- 149.615 Notifying the ASAO of application
- 149.620 ASAO to provide information and documents to CASA
- 149.625 CASA may request further information etc. from applicant for review
- 149.630 Review procedures and review decision

Subpart 149.A—General

149.005 Approvals by CASA for Part 149

- (1) If a provision of this Part refers to a person holding an approval under this regulation, the person may apply to CASA, in writing, for the approval.
- (2) Subject to regulation 11.055, CASA must grant the approval.

149.010 Manual of Standards for Part 149

For the purposes of subsection 98(5A) of the Act, CASA may issue a Manual of Standards for this Part prescribing matters:

- (a) required or permitted by these Regulations to be prescribed by the Part 149 Manual of Standards; or
- (b) necessary or convenient to be prescribed for carrying out or giving effect to this Part.

149.015 Aviation administration functions—ASAO certificate required

- (1) A person must not perform an aviation administration function if the person does not hold an ASAO certificate authorising the person to perform the function.

Note: This regulation does not apply to certain sport aviation bodies for a limited period: see regulation 202.861.

- (2) Subregulation (1) does not apply if the person is otherwise permitted, under these Regulations, to perform the function.

Note: A defendant bears an evidential burden in relation to the matter in this subregulation: see subsection 13.3(3) of the *Criminal Code*.

- (3) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

149.020 Compliance with conditions of ASAO certificate

- (1) An ASAO must not contravene a condition of its ASAO certificate.
- (2) An ASAO commits an offence of strict liability if the ASAO contravenes subregulation (1).

Penalty: 50 penalty units.

Subpart 149.B—ASAO certificates

149.060 CASA may limit number of ASAO certificates

- (1) For the purposes of subsection 98(5A) of the Act, CASA may issue a legislative instrument imposing limits on the number of ASAO certificates that may be issued if CASA is satisfied that exceeding the limit is likely to have an adverse effect on the safety of air navigation.
- (2) A limit may be imposed:
 - (a) indefinitely or for a specified period; or
 - (b) generally or in relation to a specified class of aviation administration functions.
- (3) CASA may, by legislative instrument, vary or revoke an instrument made under subregulation (1).

149.070 Application for ASAO certificate

- (1) A person may apply to CASA, in writing, for the issue of an ASAO certificate to the person.
- (2) However, a body corporate may make an application only if it is incorporated in Australia.
- (3) An application for an ASAO certificate must include the following:
 - (a) the applicant's name and contact details;
 - (b) any operating or business name of the organisation (the **applicant's organisation**) established, or proposed to be established, by the applicant to perform the aviation administration functions covered by the application on behalf of the ASAO, including its ABN (if any);
 - (c) the principal physical address at which the person proposed to be appointed as the accountable manager of the applicant's organisation will perform their duties and responsibilities;
 - (d) if the applicant is a corporation—the name of each of the officers of the corporation, its ACN and the address of its registered office;
 - (e) details of the aviation administration functions covered by the application, including:
 - (i) the kinds of aircraft (if any) that the applicant proposes to administer; and
 - (ii) the activities that the applicant proposes to administer; and
 - (iii) any ASAO enforcement powers that the ASAO proposes to exercise;
 - (f) a written undertaking from the person proposed to be appointed as the accountable manager of the applicant's organisation that, if CASA issues the certificate, the applicant and the applicant's organisation will:

Regulation 149.075

- (i) be capable of operating in accordance with the applicant's exposition and the civil aviation legislation; and
 - (ii) operate in accordance with the applicant's exposition and the civil aviation legislation.
- (4) The application must be:
- (a) accompanied by a copy of the applicant's proposed exposition; and
 - (b) signed by the person proposed to be appointed as the accountable manager of the applicant's organisation.

149.075 Issue of ASAO certificate

- (1) Subject to regulations 11.055 and 149.060, CASA must issue an ASAO certificate to an applicant if CASA is satisfied:
- (a) that the applicant's proposed exposition complies with regulation 149.340; and
 - (b) about the following matters in relation to the organisation (the ***applicant's organisation***) established, or proposed to be established, by the applicant to perform, on behalf of the applicant, the aviation administration functions covered by the application:
 - (i) the applicant's organisation can perform the functions safely and in accordance with the applicant's exposition and the civil aviation legislation;
 - (ii) the applicant's organisation has the facilities and equipment required by regulation 149.280;
 - (iii) the applicant's organisation has the reference materials required by regulation 149.285; and
 - (c) that the applicant has nominated an individual for each of the key personnel positions of the applicant's organisation; and
 - (d) that the individuals nominated to hold the positions of accountable manager and safety manager of the applicant's organisation have the qualifications and experience required by the applicant's proposed exposition; and
 - (e) that each individual nominated to hold any other key personnel position of the applicant's organisation is appropriately qualified to hold the position.
- (2) If CASA decides to issue the ASAO certificate, CASA must:
- (a) determine the aviation administration functions that the applicant is authorised to perform, including:
 - (i) the kinds of aircraft (if any) that the applicant is authorised to administer; and
 - (ii) the activities that the applicant is authorised to administer; and
 - (iii) the ASAO enforcement powers (if any) that the ASAO may exercise; and
 - (b) determine the period (not exceeding 5 years) for which the certificate is in force.

149.080 Approval of exposition

If CASA issues an ASAO certificate to the applicant, CASA is taken to have also approved the applicant's proposed exposition.

149.085 Conditions of ASAO certificate

Each of the following is a condition of an ASAO certificate issued to an ASAO:

- (a) the ASAO must comply with the ASAO's exposition and the civil aviation legislation;
- (b) the ASAO must comply with any direction given to the ASAO, or obligation imposed on the ASAO, by CASA under these Regulations;
- (c) each of the key personnel of the ASAO must comply with:
 - (i) each provision of this Part that applies to the person; and
 - (ii) each direction given to the person, or obligation imposed on the person, by CASA under a provision of these Regulations; and
 - (iii) each other provision of the civil aviation legislation that applies to the ASAO's approved functions;
- (d) each vacancy in the key personnel of the ASAO must be:
 - (i) notified to CASA within the period specified in the ASAO's exposition; and
 - (ii) filled within the period specified in the ASAO's exposition;
- (e) each of the personnel of the ASAO must comply with each provision of the civil aviation legislation that applies to the ASAO's approved functions;
- (f) the position of safety manager and any other key personnel position in the ASAO's organisation may be occupied by the same person simultaneously only:
 - (i) in an unforeseen circumstance, and for the period specified in the ASAO's exposition; or
 - (ii) in the circumstances, and for the period, for which the ASAO holds an approval under regulation 149.005.

149.090 Form of ASAO certificate

An ASAO certificate must include the following:

- (a) the name of the ASAO;
- (b) the date of issue of the certificate;
- (c) the aviation administration functions of the ASAO determined under paragraph 149.075(2)(a);
- (d) the period determined under paragraph 149.075(2)(b) for which the certificate is in force;
- (e) a certificate reference number determined by CASA.

Subpart 149.C—Changes to exposition or personnel

149.110 Certain changes to exposition must be pre-approved by CASA

- (1) A change to an ASAO's exposition must be approved by CASA under regulation 149.115 before the change is made.
- (2) Subregulation (1) does not apply if the change is of a kind specified in the ASAO's exposition in accordance with paragraph 149.340(h).

Note: Such a change may need to be notified to CASA within a specified period after the change is made: see paragraph 149.340(i).

149.115 Approval of changes to exposition

Application for approval

- (1) An ASAO may apply to CASA for the approval of a change to the ASAO's exposition.
- (2) The application must:
 - (a) be in the approved form; and
 - (b) be accompanied by a copy of the part of the ASAO's exposition affected by the change, clearly identifying the change; and
 - (c) comply with the requirements (if any) prescribed by the Part 149 Manual of Standards.

Decision on application

- (3) CASA must, by written notice given to the applicant, do one of the following within 21 days after receiving the application:
 - (a) if subregulation (4) applies—grant the approval;
 - (b) refuse to grant the approval.
- (4) For the purposes of paragraph (3)(a), this subregulation applies if CASA is satisfied that:
 - (a) the requirements mentioned in subregulation 149.075(1) will continue to be met in relation to the ASAO; and
 - (b) approving the change would not be likely to have an adverse effect on the safety of air navigation.

Request for further information

- (5) CASA may, by written notice, request further information from the applicant about the application.
- (6) If a notice is given under subregulation (5):
 - (a) the 21-day period stops on the day the notice is given; and

- (b) that period begins again on the day after the information is received by CASA.
- (7) More than one notice may be given under subregulation (5) in relation to an application.

149.120 CASA directions relating to exposition or personnel

- (1) If CASA is satisfied that it is necessary in the interests of aviation safety, CASA may, by written notice given to an ASAO, direct the ASAO to change the ASAO's exposition:
 - (a) to remove particular information, procedures or instructions from the exposition; or
 - (b) to include particular information, procedures or instructions in the exposition; or
 - (c) to revise or vary the information, procedures or instructions in the exposition.
- (2) CASA may, by written notice given to an ASAO, direct the ASAO to remove any of the key personnel of the ASAO from the person's position if CASA is satisfied that the person is not:
 - (a) carrying out the responsibilities of the position; or
 - (b) if the person is the accountable manager of the ASAO's organisation—properly managing matters for which the person is accountable.
- (3) A notice under this regulation must state the time within which the direction must be complied with.
- (4) If CASA gives an ASAO a direction under this regulation, the ASAO must comply with the direction within the time specified in the notice.
- (5) An ASAO commits an offence of strict liability if the ASAO contravenes subregulation (4).

Penalty: 50 penalty units.

Subpart 149.D—Organisation and personnel

149.195 Organisation and personnel

- (1) An ASAO's organisation must maintain a structure that effectively manages the ASAO's approved functions, taking into account the nature and complexity of the functions.
- (2) An ASAO's organisation must have enough suitably competent, qualified and trained personnel to enable the ASAO to perform the ASAO's approved functions in accordance with the ASAO's exposition and the civil aviation legislation.
- (3) An ASAO contravenes this subregulation if any of the ASAO's key personnel carries out a responsibility of the person's position in a way that contravenes the ASAO's exposition or this Subpart.
- (4) An ASAO commits an offence if the ASAO contravenes subregulation (3).

Penalty: 50 penalty units.

149.200 Notifying CASA if key personnel cannot carry out responsibilities

- (1) If an ASAO becomes aware that any of the ASAO's key personnel cannot carry out, or is likely to be unable to carry out, the person's responsibilities for a period of longer than 35 days, the ASAO must tell CASA of that fact within:
 - (a) if there is not another person authorised to carry out the responsibilities for all or part of the period—5 days after the ASAO becomes aware of that fact; or
 - (b) if there is another person authorised to carry out the responsibilities for all or part of the period—10 days after the ASAO becomes aware of that fact.
- (2) An ASAO commits an offence if the ASAO contravenes subregulation (1).

Penalty: 50 penalty units.

149.205 Familiarisation training for key personnel

An ASAO must ensure that, before a person appointed as any of the ASAO's key personnel begins to carry out the responsibilities of the position, the person has completed any training that is necessary to familiarise the person with the responsibilities.

149.210 Experience etc. of key personnel

- (1) The accountable manager of an ASAO:
 - (a) must have the experience and qualifications required by the ASAO's exposition; and

- (b) is responsible for managing, and is accountable for, the matters set out in the ASAO's exposition.
- (2) The safety manager of an ASAO:
 - (a) must have the experience and qualifications required by the ASAO's exposition; and
 - (b) is responsible for the matters set out in the ASAO's exposition.
- (3) The key personnel of an ASAO, other than the accountable manager and the safety manager of the ASAO:
 - (a) are responsible for the matters set out in the ASAO's exposition; and
 - (b) must have experience and qualifications that are commensurate with the risk associated with the ASAO's approved functions.

149.215 Reporting interference with decisions of key personnel

- (1) If the accountable manager of an ASAO becomes aware that a person has overridden an aviation safety-related decision of a member of the key personnel of the ASAO, the accountable manager must report the matter to CASA, in writing, as soon as practicable, and in any case not later than 7 days, after becoming aware of the matter.

Note: CASA may direct an ASAO to remove the accountable manager of the ASAO if he or she does not comply with this subregulation: see subregulation 149.120(2).

- (2) If the safety manager of an ASAO becomes aware that a person has overridden an aviation safety-related decision of a member of the key personnel of the ASAO, the safety manager must report the matter to CASA, in writing, as soon as practicable, and in any case not later than 7 days, after becoming aware of the matter.

Note: CASA may direct an ASAO to remove the safety manager of the ASAO if he or she does not comply with this subregulation: see subregulation 149.120(2).

149.220 Register of key personnel and appointed persons

- (1) An ASAO must maintain a register containing the following information for each of the ASAO's key personnel:
 - (a) the title of the position;
 - (b) the name of the person occupying the position;
 - (c) the date the person began occupying the position;
 - (d) if applicable—the date the person ceased to occupy the position.
- (2) An ASAO must maintain a register containing the following information for each person appointed by the ASAO to perform an approved function on behalf of the ASAO:
 - (a) the name of the person;
 - (b) each approved function of the ASAO that the person performs on behalf of the ASAO;
 - (c) the date the person began performing each function;

Regulation 149.220

(d) if applicable—the date the person ceased performing each function.

Subpart 149.E—Systems, facilities, reference materials and rules

149.270 Safety management system

An ASAO must have a safety management system that:

- (a) is appropriate for the ASAO's approved functions, taking into account the nature and complexity of the functions, and the size of the ASAO; and
- (b) complies with the requirements prescribed by the Part 149 Manual of Standards.

149.275 Audit and surveillance system

An ASAO must have an audit and surveillance system that complies with the requirements prescribed by the Part 149 Manual of Standards.

149.280 Facilities and equipment

An ASAO's organisation must have the facilities and equipment that are necessary for performing the ASAO's approved functions, including appropriate equipment to allow the ASAO's personnel to perform their duties.

149.285 Reference materials

- (1) An ASAO must provide access to up-to-date copies of the following reference materials that are relevant to the performance of the ASAO's approved functions:
 - (a) the civil aviation legislation;
 - (b) technical standards and practices;
 - (c) technical bulletins and instructions;
 - (d) manuals for equipment used by the ASAO's personnel;
 - (e) any other materials prescribed by the Part 149 Manual of Standards.
- (2) An ASAO must ensure that the ASAO's personnel have ready access to the reference materials.

149.290 Aviation administration and enforcement rules

- (1) An ASAO must prepare rules (the *aviation administration and enforcement rules*) that provide for the following:
 - (a) the process for applying for an authorisation from the ASAO to undertake an activity administered by the ASAO, including the information that must be included in the application;
 - (b) the eligibility criteria for the issuing of an authorisation by the ASAO to undertake an activity administered by the ASAO;
 - (c) conditions that may be attached to an authorisation issued by the ASAO;

Regulation 149.290

- (d) procedures relating to the variation, suspension and cancellation of authorisations at the authorisation holder's request;
 - (e) procedures relating to the internal review of decisions made by the ASAO;
 - (f) if the ASAO is authorised to exercise ASAO enforcement powers:
 - (i) the circumstances in which those powers may be exercised; and
 - (ii) procedures relating to the exercise of those powers;
 - (g) procedures that require safe conduct by authorisation holders at all times;
 - (h) measures for providing an authorisation holder with preventative, corrective or remedial solutions to identified training or skills deficiencies;
 - (i) any disciplinary action that may be undertaken by the ASAO in relation to authorisation holders;
 - (j) an effective and appropriate review process in relation to any preventative, corrective, remedial or disciplinary action undertaken by the ASAO;
 - (k) any other matter prescribed by the Part 149 Manual of Standards.
- (2) The aviation administration and enforcement rules of an ASAO must have due regard to procedural fairness.

Subpart 149.F—Expositions

149.340 Content of exposition

An exposition for an ASAO must include the following:

- (a) for each of the ASAO's key personnel, the following information:
 - (i) the qualifications and experience (if any) required by the ASAO for the position in addition to the qualifications and experience required under the Part 149 Manual of Standards for the position;
 - (ii) each matter (if any) for which the holder of the position is responsible in addition to the responsibilities mentioned in the Part 149 Manual of Standards for the position;
 - (iii) the name of the person appointed to the position;
 - (iv) the name of each person authorised to carry out the responsibilities of the position when the position holder is absent from the position or cannot carry out the responsibilities;
 - (v) a description of how the ASAO will manage the responsibilities of the position during a circumstance mentioned in subparagraph (iv);
- (b) for each position occupied by a person appointed by the ASAO to perform an approved function on behalf of the ASAO, the following information:
 - (i) the duties and responsibilities of the position;
 - (ii) how a person will be selected, trained and authorised to perform the duties and responsibilities of the position;
 - (iii) the qualifications, knowledge and experience required for the position;
- (c) a description of the approved functions of the ASAO;
- (d) a description of the procedures by which the ASAO ensures that the performance of the ASAO's approved functions comply with:
 - (i) the ASAO's exposition; and
 - (ii) the civil aviation legislation;
- (e) a description of the ASAO's safety management system required by regulation 149.270;
- (f) a description of the ASAO's audit and surveillance system required by regulation 149.275;
- (g) the ASAO's aviation administration and enforcement rules;
- (h) the kinds of changes to the ASAO's exposition that do not require approval by CASA;
- (i) the ASAO's process for managing changes to the ASAO's exposition that do not require approval by CASA, including:
 - (i) procedures for notifying the ASAO's personnel and CASA of such changes; and
 - (ii) the period within which such changes are to be so notified;

Regulation 149.345

- (j) a description of the procedures by which the ASAO will ensure compliance with regulation 149.550, should any of the circumstances specified in that regulation arise;
- (k) any other matter required to be included in the exposition by the Part 149 Manual of Standards or these Regulations.

149.345 Compliance with exposition

- (1) An ASAO must not contravene a provision of the ASAO's exposition.
- (2) An ASAO commits an offence of strict liability if the ASAO contravenes subregulation (1).

Penalty: 50 penalty units.

149.350 Access to exposition etc.

- (1) An ASAO contravenes this subregulation if:
 - (a) the ASAO does not keep its exposition in a readily accessible form; or
 - (b) a member of the ASAO's personnel does not have ready access to the exposition; or
 - (c) the holder of an authorisation issued by the ASAO does not have ready access to the exposition; or
 - (d) CASA does not have ready access to the exposition; or
 - (e) the ASAO does not keep the exposition up-to-date.
- (2) An ASAO commits an offence of strict liability if the ASAO contravenes subregulation (1).

Penalty: 50 penalty units.

Subpart 149.G—Authorisations

149.400 Grounds for refusal of application for authorisation

- (1) An ASAO must not reject an application by a person for an authorisation to undertake an activity administered by the ASAO on grounds other than the eligibility criteria set out in the ASAO's aviation administration and enforcement rules.

Note: For review by CASA of decisions by ASAOs, see Subpart 149.K.

- (2) Subregulation (1) does not apply if the ASAO reasonably believes that acceptance of the application would constitute an offence against the civil aviation legislation.

149.405 Disclosure of information in application for authorisation

- (1) A person contravenes this subregulation if:
 - (a) the person applies to an ASAO for an authorisation to undertake an activity; and
 - (b) the person does not disclose, in the application, details of each cancellation, variation or suspension (other than at the person's request) of authorisations:
 - (i) held by the person that are the same in substance as the authorisation applied for; and
 - (ii) issued by the ASAO, another sport aviation body, CASA or the national aviation authority of a foreign country; in the period starting 10 years before the making of the application.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

149.410 Authorisation holders must comply with ASAO's exposition

- (1) The holder of an authorisation issued by an ASAO contravenes this subregulation if:
 - (a) a provision of the ASAO's exposition applies to the holder; and
 - (b) the holder contravenes the provision.
- (2) A person commits an offence of strict liability if the person contravenes subregulation (1).

Penalty: 50 penalty units.

Regulation 149.415

149.415 Notice of suspension, variation or cancellation of authorisation

CASA-issued authorisation—cancellation etc. by CASA

- (1) Subregulation (2) applies if:
 - (a) a person holds an authorisation (the **first authorisation**) issued by CASA; and
 - (b) CASA suspends, varies or cancels the first authorisation other than at the person's request; and
 - (c) a person holds an authorisation (the **second authorisation**) issued by an ASAO.
- (2) The person must, within 7 days after the suspension, variation or cancellation takes effect, give written notice of the suspension, variation or cancellation to the ASAO.

ASAO-issued authorisation—cancellation etc. by ASAO or CASA

- (3) Subregulation (4) applies if:
 - (a) a person holds an authorisation (the **first authorisation**) issued by an ASAO to undertake an activity; and
 - (b) CASA or the ASAO suspends, varies or cancels the first authorisation other than at the person's request; and
 - (c) the person holds an authorisation issued by another sport aviation body.
- (4) The person must, within 7 days after the suspension, variation or cancellation takes effect, give written notice of the suspension, variation or cancellation to the other sport aviation body.

ASAO-issued authorisation—cancellation etc. by national aviation authority of a foreign country

- (5) Subregulation (6) applies if:
 - (a) a person holds an authorisation (the **first authorisation**) issued by an ASAO; and
 - (b) the person holds an authorisation (the **other authorisation**) issued by a national aviation authority of a foreign country; and
 - (c) the other authorisation is suspended, varied or cancelled other than at the person's request.
- (6) The person must, within 7 days after the suspension, variation or cancellation takes effect, give written notice of the suspension, variation or cancellation to the ASAO and CASA.

Offence

- (7) A person commits an offence of strict liability if the person contravenes subregulation (2), (4) or (6).

Penalty: 50 penalty units.

149.425 Reporting conduct of authorisation holders etc.

- (1) An ASAO must give a report to CASA, in writing, if the ASAO reasonably believes that:
 - (a) both of the following apply:
 - (i) the holder of an authorisation issued by the ASAO has contravened the ASAO's exposition;
 - (ii) despite remedial or disciplinary action taken by the ASAO, the conduct of the holder of the authorisation jeopardises the safety of civil aviation; or
 - (b) both of the following apply:
 - (i) a person is undertaking an activity for which the person is required, under these Regulations, to hold an authorisation issued by an ASAO;
 - (ii) the person does not hold an authorisation issued by the ASAO to undertake the activity; or
 - (c) a person is undertaking an activity for which the person holds an authorisation issued by an ASAO in a way that contravenes the authorisation; or
 - (d) an aircraft that has ceased to be registered under Part 47 or administered by the ASAO is being flown.
- (2) An ASAO must give the report to CASA within the time specified in the ASAO's exposition.
- (3) An ASAO commits an offence of strict liability if the ASAO contravenes subregulation (2).

Penalty: 50 penalty units.

149.430 Reporting applications for authorisations in certain circumstances

Reporting of all variations and cancellations

- (1) An ASAO contravenes this subregulation if:
 - (a) a person applies to the ASAO for an authorisation to undertake an activity; and
 - (b) the ASAO knows that the person holds, or has held, an authorisation (the **other authorisation**):
 - (i) that is the same in substance as the authorisation applied for; and
 - (ii) that was issued by the ASAO, another sport aviation body, CASA or the national aviation authority of a foreign country; and
 - (c) the ASAO knows that the other authorisation was varied or cancelled other than at the person's request; and
 - (d) the ASAO does not report details of the application to CASA, in writing, within 7 days after the person makes the application.

Regulation 149.435

Reporting of current suspensions

- (2) An ASAO contravenes this subregulation if:
- (a) a person applies to the ASAO for an authorisation to undertake an activity; and
 - (b) the ASAO knows that the person holds an authorisation (the ***other authorisation***):
 - (i) that is the same in substance as the authorisation applied for; and
 - (ii) that was issued by the ASAO, another sport aviation body, CASA or the national aviation authority of a foreign country; and
 - (c) the ASAO knows that, at the time of the application, the other authorisation is suspended other than at the person's request; and
 - (d) the ASAO does not report details of the application to CASA, in writing, within 7 days after the person makes the application.
- (3) An ASAO commits an offence if the ASAO contravenes subregulation (1) or (2).

Penalty: 50 penalty units.

149.435 ASAO to refuse to issue authorisation if suspended etc.

Other authorisation currently suspended

- (1) An ASAO contravenes this subregulation if:
- (a) a person applies to the ASAO for an authorisation (the ***new authorisation***) to undertake an activity; and
 - (b) the ASAO knows that the person holds an authorisation (the ***other authorisation***):
 - (i) that is the same in substance as the new authorisation; and
 - (ii) that was issued by the ASAO, another sport aviation body, CASA or the national aviation authority of a foreign country; and
 - (c) the ASAO knows that, at the time of the application, the other authorisation is suspended other than at the person's request; and
 - (d) the ASAO issues the new authorisation to the person.

Other authorisation is or has been varied

- (2) An ASAO contravenes this subregulation if:
- (a) a person applies to the ASAO for an authorisation (the ***new authorisation***) to undertake an activity; and
 - (b) the ASAO knows that the person holds, or has held, an authorisation (the ***other authorisation***):
 - (i) that is the same in substance as the new authorisation; and
 - (ii) that was issued by the ASAO, another sport aviation body, CASA or the national aviation authority of a foreign country; and
 - (c) the ASAO knows that the other authorisation was varied other than at the person's request; and

(d) the ASAO issues the new authorisation to the person.

Other authorisation has been cancelled

- (3) An ASAO contravenes this subregulation if:
- (a) a person applies to the ASAO for an authorisation (the **new authorisation**) to undertake an activity; and
 - (b) the ASAO knows that the person has held an authorisation (the **other authorisation**):
 - (i) that is the same in substance as the new authorisation; and
 - (ii) that was issued by the ASAO, another sport aviation body, CASA or the national aviation authority of a foreign country; and
 - (c) the ASAO knows that the other authorisation was cancelled other than at the person's request; and
 - (d) the ASAO issues the new authorisation to the person.

Exception—CASA approval

- (4) Subregulation (1), (2) or (3) does not apply if, before the new authorisation is issued, CASA has given approval under this subregulation to the ASAO to issue the new authorisation to the person.

Note: A defendant bears an evidential burden in relation to the matter in this subregulation: see subsection 13.3(3) of the *Criminal Code*.

Offence

- (5) An ASAO commits an offence if the ASAO contravenes subregulation (1), (2) or (3).

Penalty: 50 penalty units.

- (6) Strict liability applies to paragraphs (1)(a) and (d), (2)(a) and (d) and (3)(a) and (d).

149.440 ASAO to refuse to issue authorisation if exclusion period is in force

- (1) An ASAO contravenes this subregulation if:
- (a) a person applies to the ASAO for an authorisation authorising the person to undertake an activity; and
 - (b) the ASAO knows that an exclusion period is in force under an order under section 30A of the Act in relation to the person and an authorisation that is the same in substance as the authorisation applied for; and
 - (c) the ASAO issues the authorisation.
- (2) Subregulation (1) does not apply if, before the authorisation is issued, CASA has given approval under this subregulation to the ASAO to issue the authorisation to the person.

Note: A defendant bears an evidential burden in relation to the matter in this subregulation: see subsection 13.3(3) of the *Criminal Code*.

Regulation 149.440

(3) An ASAO commits an offence if the ASAO contravenes subregulation (1).

Penalty: 50 penalty units.

Subpart 149.H—Authorisations and enforcement

149.490 Direction to ASAO to exercise ASAO enforcement powers

- (1) CASA may, if satisfied that it is necessary in the interests of the safety of air navigation, direct an ASAO to exercise an ASAO enforcement power in relation to the holder of an authorisation issued by the ASAO.
- (2) The ASAO must comply with the direction within 20 days.
- (3) An ASAO commits an offence of strict liability if the ASAO contravenes subregulation (2).

Penalty: 50 penalty units.

149.495 Variation, suspension and cancellation of authorisations issued by ASAOs

- (1) CASA may exercise the powers in subregulation (2):
 - (a) if an ASAO does not comply with a direction under regulation 149.490 within 20 days; or
 - (b) on written request of an ASAO; or
 - (c) on CASA's own initiative;if CASA is satisfied that it is necessary in the interests of the safety of air navigation to do so.
- (2) CASA may, by written notice given to the holder of an authorisation issued by an ASAO, vary, suspend or cancel the authorisation.
- (3) Before making a decision under subregulation (2), CASA must:
 - (a) give the holder of the authorisation a notice setting out the reasons why CASA is considering making the decision; and
 - (b) allow the holder of the authorisation to show cause, within such reasonable time as CASA specifies in the notice, why CASA should not make the decision.
- (4) A variation or suspension has effect for the period specified in the notice, unless earlier revoked by CASA.
- (5) A cancellation takes effect on the day specified in the notice.
- (6) If CASA varies, suspends or cancels an authorisation issued by an ASAO, CASA must notify the ASAO in writing of the variation, suspension or cancellation as soon as practicable.
- (7) The suspension of an authorisation issued by an ASAO under this regulation does not prevent the revocation of the authorisation by the ASAO or by CASA.

Regulation 149.500

149.500 Effect of suspension or cancellation by CASA of authorisations issued by ASAOs

- (1) If CASA suspends an authorisation issued by an ASAO under regulation 149.495, the authorisation is taken not to be in force during the period of suspension.
- (2) If:
 - (a) CASA suspends an authorisation issued by an ASAO under regulation 149.495; and
 - (b) under the civil aviation legislation, a person is required to hold the authorisation to undertake an activity;the person to whom the authorisation was issued is taken not to be the holder of the authorisation for the period of the suspension.
- (3) If an authorisation is cancelled by CASA under regulation 149.495, the person to whom the authorisation was issued is not eligible to apply for the grant of, and must not be granted, another authorisation that is the same in substance as the cancelled authorisation until 3 years after the day the cancellation takes effect.

Subpart 149.J—Information and documents

149.540 Providing information or documents to CASA

- (1) CASA may, by notice given to an ASAO, require the ASAO to:
 - (a) give to CASA information of the kind specified in the notice; or
 - (b) produce to CASA documents of the kind specified in the notice.
- (2) The information or documents must relate to the ASAO's approved functions.
- (3) The notice must:
 - (a) be in writing; and
 - (b) specify the manner and form in which the information or documents must be given.
- (4) If an ASAO is given a notice under this regulation, the ASAO must comply with the notice within the period specified in the notice (which must end at least 7 days after the notice is given).
- (5) An ASAO commits an offence of strict liability if the ASAO contravenes subregulation (4).

Penalty: 50 penalty units.

149.550 Copies of documents to CASA

- (1) An ASAO must provide to CASA copies of all documents used by the ASAO in the performance of its approved functions if any of the following events occur:
 - (a) the ASAO becomes incapable of complying with the ASAO's obligations under the civil aviation legislation;
 - (b) if the ASAO is an individual—the ASAO becomes insolvent under administration;
 - (c) if the ASAO is a body corporate—the ASAO becomes a Chapter 5 body corporate (within the meaning of the *Corporations Act 2001*);
 - (d) CASA cancels the ASAO certificate issued to the ASAO.
- (2) The copies of documents required by subregulation (1) must be provided to CASA within 30 days after the event occurs.

Subpart 149.K—Review of ASAO decisions

149.605 Application for internal review by ASAO

- (1) This regulation applies if a person is dissatisfied with one of the following decisions:
 - (a) a decision of an ASAO to refuse to issue an authorisation to the person;
 - (b) a decision of an ASAO to issue an authorisation to the person in terms different from those applied for;
 - (c) a decision of an ASAO to vary, suspend or cancel an authorisation issued to the person other than at the person's request;
 - (d) a decision to attach conditions to an authorisation issued to the person, other than at the person's request;
 - (e) a decision to vary conditions attached to an authorisation issued to the person, other than at the person's request.
- (2) The person may apply to the ASAO for internal review of the decision, in accordance with the procedures specified in the ASAO's aviation administration and enforcement rules.
- (3) The ASAO may:
 - (a) affirm, vary or set aside the decision; and
 - (b) if the ASAO sets aside the decision—make such other decision as the ASAO considers appropriate.
- (4) If the ASAO has not made a decision on the application within 21 days after receiving the application, the ASAO is taken to have affirmed the decision on that day.
- (5) A decision made under subregulation (3), or taken to have been made because of the operation of subregulation (4), by an ASAO is an **internal review decision**.

149.610 Application for review by CASA

- (1) If a person who made an application under subregulation 149.605(2) is dissatisfied with the internal review decision of the ASAO, the person may apply to CASA for a review of the internal review decision.
- (2) The application must be made:
 - (a) in the approved form; and
 - (b) within 21 days after the internal review decision, or such longer period as CASA allows.
- (3) An application under this regulation is not taken to have been made unless:
 - (a) it is made in the manner approved by CASA for that purpose; and
 - (b) it is made in the approved form; and
 - (c) it includes all of the information required by the form; and

Regulation 149.615

- (d) the applicant has notified the ASAO of the application in accordance with regulation 149.615; and
 - (e) if a fee is payable for the application—that fee has been paid.
- (4) The making of an application to CASA for review of an internal review decision of an ASAO does not affect the operation of the decision or prevent the taking of action to implement the decision.

149.615 Notifying the ASAO of application

If a person makes an application under regulation 149.610 for review of an internal review decision made by an ASAO, the person must notify the ASAO, in writing, of that fact.

149.620 ASAO to provide information and documents to CASA

- (1) If an ASAO receives a notice under regulation 149.615, the ASAO must, within 28 days after receiving the notice, give the following to CASA:
- (a) a statement setting out the findings on material questions of fact, referring to the evidence or other material on which those findings were based and giving the reasons for the internal review decision of the ASAO;
 - (b) copies of every document that is in the ASAO's possession or under the ASAO's control and is relevant to the review by CASA of the internal review decision.
- (2) An ASAO commits an offence of strict liability if:
- (a) the ASAO is subject to a requirement under subregulation (1); and
 - (b) the ASAO fails to comply with the requirement.

Penalty: 50 penalty units.

149.625 CASA may request further information etc. from applicant for review

- (1) If CASA reasonably believes that it is necessary to do so for the purposes of conducting the review, CASA may request that the applicant for review of an internal review decision of an ASAO do one or more of the following:
- (a) provide further information or documents to CASA;
 - (b) submit to an examination or test conducted by CASA;
 - (c) attend an interview with CASA.
- (2) CASA may refuse to make a decision on the application for review until a request under subregulation (1) is complied with.

149.630 Review procedures and review decision

- (1) In conducting a review of an internal review decision of an ASAO:
- (a) the procedures for conducting the review are within the discretion of CASA; and
 - (b) CASA is not bound by the rules of evidence; and

Regulation 149.630

- (c) CASA may inform itself in any way it thinks fit; and
 - (d) the review is to be conducted with as little technicality and formality, and as quickly and economically, as a proper consideration of the matters permit.
- (2) On review of an internal review decision of an ASAO, CASA must make a decision:
- (a) affirming the internal review decision; or
 - (b) varying the internal review decision; or
 - (c) setting the internal review decision aside and substituting a new decision; or
 - (d) setting the internal review decision aside and remitting the matter to the ASAO for reconsideration in accordance with any directions or recommendations of CASA.
- (3) A decision under subregulation (2) comes into effect on the day specified by CASA.
- (4) CASA must, as soon as practicable after making a decision under subregulation (2), give written notice to the applicant and the ASAO of:
- (a) the decision; and
 - (b) the reasons for the decision.

Part 171—Aeronautical telecommunication service and radionavigation service providers

Table of contents

Subpart 171.A—General

- 171.005 Applicability of this Part
- 171.010 Interpretation
- 171.012 Meaning of *telecommunication service*
- 171.015 Person not to provide service without approval
- 171.017 Issue of Manual of Standards

Subpart 171.B—Approval of service providers

- 171.020 Application
- 171.022 Joint applications not permitted
- 171.025 If applicant is a corporation
- 171.026 CASA may ask for demonstration of service
- 171.027 Grant of approval
- 171.028 When decision must be made
- 171.029 Conditions

Subpart 171.C—Obligations and privileges of service provider

- 171.030 Service by provider
- 171.035 Changes by service provider to service
- 171.040 Changes by service provider to operations manual
- 171.050 Technicians
- 171.055 Test transmissions
- 171.065 Interruption to service
- 171.070 Test equipment
- 171.075 Documents to be maintained
- 171.080 Records
- 171.085 Security program
- 171.086 Safety management system

Subpart 171.D—Contents of operations manual

- 171.090 Operations manual to contain or refer to information
- 171.095 Organisation and management of service provider
- 171.100 Way in which standards are met
- 171.105 Functional specification and performance values of services
- 171.110 Technical description
- 171.115 Safe operation
- 171.120 Facility operation and maintenance plan
- 171.125 Safety management system
- 171.140 Test equipment
- 171.145 Interruption to service
- 171.150 Document control

- 171.155 Security program
- 171.160 Changes to procedures

Subpart 171.E—Suspension and cancellation of approvals, and directions to vary manuals

- 171.220 Suspension and cancellation of approvals
- 171.225 Notice to approval holder to show cause
- 171.230 Grounds for cancellation of approval
- 171.235 Cancellation of approval after show cause notice
- 171.237 Cancellation if cooperation or arrangement ceases
- 171.245 CASA's power to direct variation of manual

Subpart 171.A—General

171.005 Applicability of this Part

- (1) This Part sets out:
 - (a) the requirements for a person to be approved as a provider of a ground-based aeronautical telecommunication or radionavigation service; and
 - (b) the requirements for the operation and maintenance of those services; and
 - (c) certain administrative rules relating to CASA in its administration of this Part.
- (2) However, this Part does not apply to:
 - (a) a person who is providing an aeronautical telecommunication or radionavigation service in the course of his or her duties for the Defence Force; or
 - (b) any aeronautical telecommunication or radionavigation service provided by the Defence Force.

171.010 Interpretation

- (1) In this Part:

accuracy, in relation to a radionavigation service or facility, means the degree to which the value measured or displayed by the service or facility conforms to the true value.

approval means an approval, given by CASA, to provide a telecommunication or radionavigation service.

availability, for a telecommunication service, radionavigation service or support service, means the percentage of its operating hours that the service is not interrupted.

configuration, in relation to:

- (a) a telecommunication or radionavigation service—means the configuration of each facility and any interconnection between facilities that make up the service; and
- (b) a facility—means the configuration of equipment, hardware, software and data, and the interconnections between equipment.

coverage, in relation to a telecommunication or radionavigation service, means the volume of airspace in which, or the locations between which, the service is nominally provided.

Example 1: The volume of airspace in which an aeronautical broadcasting service can be received and used.

Example 2: The places served by an aeronautical fixed line telecommunication service.

Regulation 171.010

functional specification, for a telecommunication service, a radionavigation service or a support service, is a general description of the service, its operating principles and its functions.

Example: The functional specification of an aeronautical radionavigation service may describe the kind of service, each standard to which it operates, the accuracy of its signal and the aircraft for which the service is provided.

hazard means a source of potential harm to aviation safety.

integrity, of a telecommunication service, a radionavigation service or a support service:

- (a) means the likelihood that the information supplied by the service at a particular moment is correct; and
- (b) includes the ability of the service to warn users promptly when the service should not be used.

key personnel, in relation to a service provider, means the person or persons who manage 1 or more of the following:

- (a) operations;
- (b) maintenance;
- (c) safety.

Manual of Standards means the document called ‘Manual of Standards (MOS) – Part 171’ issued by CASA under regulation 171.017, as in force from time to time.

operating hours, for a telecommunication or radionavigation service, means the times during which the service provider must, under its approval, operate the service.

operations manual means a manual of the kind described in Subpart 171.D, prepared by a service provider or a person applying for approval.

recovery time means the period during which a service is interrupted.

reliability, of a telecommunication service, a radionavigation service or a support service, means the probability that the service will perform its function or functions without failure for a specified period.

risk means risk to aviation safety.

safety means aviation safety.

service provider means a person approved to operate and maintain a telecommunication or radionavigation service, and whose approval is not suspended or revoked.

technical specification, for a telecommunication service or facility, or a radionavigation service or facility, is a detailed description, that may use technical terms and concepts, of:

- (a) the way in which the service or facility operates and performs its functions; and
- (b) the technical standards to which the service or facility has been designed and manufactured.

Example: The technical specification of a particular kind of radionavigation service may include its frequency band, channel spacing, frequency tolerance, effective radiated transmitter power, antenna type and gain, effective radiated power and radial phase modulation.

technician means a person who is engaged by a service provider to do 1 or more of the following:

- (a) operate a facility;
- (b) maintain a facility;
- (c) conduct measurements of the performance of, and calibration of, a facility during a flight inspection.

(2) For this Part:

- (a) a telecommunication or radionavigation service is provided using 1 or more **facilities** at 1 or more locations, each facility consisting of:
 - (i) 1 item of equipment; or
 - (ii) items of interconnected equipment;at a particular location; and
- (b) a service is **interrupted** if, during its operating hours:
 - (i) it is not operating because it has failed or has been suspended; or
 - (ii) it is operating outside its technical specification.

171.012 Meaning of *telecommunication service*

(1) In this Part, **telecommunication service** means any of the following:

- (a) 1 or both of the following, within the meaning given for each in Volume II of Annex 10 to the Chicago Convention:
 - (i) an aeronautical broadcasting service;
 - (ii) an aeronautical fixed service;
- (b) an aeronautical mobile service, within the meaning given in Volume II of Annex 10 to the Chicago Convention, that is used to support an air traffic service of a kind mentioned in Annex 11 to the Chicago Convention;
- (c) any system that processes or displays air traffic control data.

(2) However, none of the following is a **telecommunication service**:

- (a) an aerodrome weather information broadcast service (within the meaning in AIP);
- (b) a certified air/ground radio service at an aerodrome;
- (c) a frequency confirmation system at an aerodrome;
- (d) pilot activated lighting (within the meaning in AIP) at an aerodrome;
- (e) a UNICOM service (within the meaning in AIP).

Regulation 171.015

171.015 Person not to provide service without approval

- (1) A person that is not a service provider must not provide a telecommunication or radionavigation service.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

171.017 Issue of Manual of Standards

- (1) CASA may issue a Manual of Standards for this Part that provides for the following matters:
- (a) standards relating to the procedures, systems and documents required for the provision of a radionavigation service or a telecommunication service;
 - (b) standards for facilities and equipment used to provide a radionavigation service or a telecommunication service;
 - (c) standards, including competency standards and minimum qualifications, for a technician or, if a service provider is an individual, a service provider;
 - (d) any matter required or permitted by these Regulations to be provided for by the Manual of Standards;
 - (e) any matter necessary or convenient to be provided for the effective operation of this Part.

Note: A Manual of Standards is a legislative instrument—see subsections 98(5A) and (5B) of the Act. It must be registered in accordance with the *Legislation Act 2003* and must be tabled in both Houses of the Parliament within 6 sitting days after its making.

- (2) CASA must give a copy of a notice about a Manual of Standards for this Part (being a notice referred to in subregulation 11.275(3) or regulation 11.280) to each service provider.

Note: Subpart 11.J (including regulations 11.275 and 11.280) sets out procedures for the issue, amendment and revocation of a MOS.

Subpart 171.B—Approval of service providers

Note: In addition to the provisions of this Subpart, Part 11 contains provisions relating to an application for approval as a telecommunication or radionavigation service provider.

171.020 Application

- (1A) Subject to regulation 171.022, an eligible person may apply to CASA for approval as a provider of a telecommunication service or a radionavigation service, or both.
- (1) For subregulation (1A), a person is an eligible person if the person is any of the following:
- (a) the Commonwealth;
 - (b) AA;
 - (c) a person who is to provide a telecommunication service, a radionavigation service, or both:
 - (i) in cooperation with AA, in accordance with paragraph 11(3)(b) of the *Air Services Act 1995*; or
 - (ii) by arrangement with AA, in accordance with paragraph 11(3)(c) of the *Air Services Act 1995*.
- (2) An application must be in writing, and must include:
- (a) the applicant's name and address; and
 - (b) a copy of the applicant's operations manual, prepared as if the applicant were a service provider; and
 - (c) a statement, prepared by referring to the list of services in the Manual of Standards, showing each kind of telecommunication or radionavigation service for which the application is being made; and
 - (d) a statement of the intended location and coverage of each service.
- (3) If an application is made to provide a telecommunication or radionavigation service that would not comply with 1 or more of the standards set out in:
- (a) Annexes 10, 11 and 14 to the Chicago Convention; and
 - (b) the Manual of Standards;
- the application must also describe the reasons for, and consequences of, the non-compliance.

Note: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.

171.022 Joint applications not permitted

- (1) An application purportedly made by 2 or more persons jointly is not a valid application for any purpose.

Regulation 171.025

- (2) An application purportedly made by a partnership is not a valid application for any purpose.

171.025 If applicant is a corporation

- (1) For regulation 171.020, if the applicant is a corporation, the application must include:
 - (a) the applicant's registered address and ACN; and
 - (b) the names and addresses of its officers.
- (2) In paragraph (1)(b):

officer has the meaning given by section 9 of the *Corporations Act 2001*.

Note: See Subpart 171.E for provisions about administration of applications.

171.026 CASA may ask for demonstration of service

Regulation 11.045 applies in relation to an approval as a provider of a telecommunication service or a radionavigation service.

171.027 Grant of approval

- (1) Subject to regulation 11.055 and subregulation (2), if a person (the *applicant*) has applied for approval as a provider of a telecommunication service or a radionavigation service under this Part, CASA must grant the approval.
- (2) CASA may approve the applicant only if CASA approves the applicant's draft operations manual.

Note: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to issue, or cancelling, suspending or varying, an approval; or
- (b) a decision imposing a condition on an approval.

171.028 When decision must be made

- (1) If CASA does not make a decision about an application within 90 days after receiving it, CASA is taken to have refused the application.
- (2) However, if CASA makes a request under regulation 11.035, 11.040 or 11.045, the time between when CASA makes the request, and when the applicant conducts the demonstration, comes in for interview, or gives CASA the information or copy requested, does not count towards the period.
- (3) Also, if CASA asks an applicant to make a statutory declaration under regulation 11.047 or subregulation 11.050(3A), the time between when CASA asks the applicant to do so and when the applicant gives CASA the statutory declaration does not count towards the period.
- (4) Also, if CASA invites an applicant to make a written submission under subregulation 11.050(2), the time between when CASA gives the invitation and

when the applicant makes the written submission does not count towards the period.

(5) In this regulation:

application includes an application to vary an approval under this Division.

171.029 Conditions

- (1) Without limiting regulations 11.056 and 11.067, CASA may impose, on an approval, a condition that restricts:
 - (a) the kind of telecommunication or radionavigation service to be provided;
or
 - (b) the way in which a service is provided; or
 - (c) the coverage of a service; or
 - (d) the time during which a service is provided.
- (2) In particular, CASA may impose, on an approval, any condition necessary to give effect to an arrangement mentioned in subsection 11(3) of the *Air Services Act 1995*.

Regulation 171.030

Subpart 171.C—Obligations and privileges of service provider

171.030 Service by provider

- (1) A telecommunication or radionavigation service must be provided in accordance with:
 - (a) the approval; and
 - (b) the service provider's operations manual.
- (2) Subregulation (1) does not apply to:
 - (a) a test transmission made in accordance with regulation 171.055; or
 - (b) a telecommunication or radionavigation service provided in an emergency.

171.035 Changes by service provider to service

- (1) This regulation applies if a service provider wants to make a change to its telecommunication or radionavigation service (including by providing an additional service):
 - (a) the effect of which would be that the provider's telecommunication or radionavigation service would no longer be in accordance with the certificate issued to the provider under regulation 171.250 (as in force before 27 June 2011) or regulation 11.060; or
 - (b) that requires prior notification to CASA because of a requirement to do so in the safety management system prepared in accordance with regulation 171.086.
- (2) Before making the change the service provider must:
 - (a) prepare a draft amendment of the operations manual that reflects the proposed change; and
 - (b) send a copy of the draft amendment to CASA.
- (2A) A service provider that complies with subregulation (2) in relation to making a change is taken to have applied for the approval of the proposed change under Subpart 171.E.
- (3) If CASA approves the draft amendment of the manual, the provider may:
 - (a) incorporate the amendment into the manual; and
 - (b) after approval of the change comes into effect in accordance with regulation 11.065, make the change.

171.040 Changes by service provider to operations manual

A provider may change its operations manual without changing its service if it sends CASA a copy of the amendment to the manual.

171.050 Technicians

- (1) A service provider must ensure that each technician is competent and holds the qualifications specified in the Manual of Standards for a technician of that kind.
- (2) In particular, the provider must ensure that each technician has been:
 - (a) appropriately trained; and
 - (b) assessed as competent by a person who is qualified in accordance with the standard set out in the Manual of Standards.
- (3) A service provider must give each technician a certificate that:
 - (a) names the technician; and
 - (b) describes the operation and maintenance functions that the technician may perform; and
 - (c) describes the kinds of facility or facilities for which the technician is authorised to perform those functions; and
 - (d) states the period during which the certificate is effective.

171.055 Test transmissions

A service provider may make a test transmission if:

- (a) the transmission is necessary to test a service, facility or equipment; and
- (b) the provider takes any one or more of the following precautions:
 - (i) a reasonable time before commencing the transmission, the provider tells AIS about the transmission;
 - (ii) at the commencement of the transmission, the service provider identifies the transmission as a test transmission;
 - (iii) the transmission contains information identifying it as a test transmission.

171.065 Interruption to service

- (1) This regulation applies if a telecommunication or radionavigation service is interrupted or if the service provider knows that the service is to be interrupted.
- (2) If the service is published in an AIP the service provider must tell AIS about the interruption.
- (3) If it is practicable to do so the service provider must tell users of the service about the interruption.

171.070 Test equipment

A service provider's facility or facilities must be tested and maintained using test equipment that is maintained and calibrated in accordance with the standards in the Manual of Standards.

Regulation 171.075

171.075 Documents to be maintained

- (1) The following documents must be maintained by a service provider:
 - (a) the operations manual;
 - (b) any technical manual used by the service provider at the facility;
 - (c) any documents of a kind listed in the Manual of Standards that relate to the provider's service.
- (2) For subregulation (1), a document is *maintained*, if it:
 - (a) includes all amendments (other than draft amendments prepared for regulation 171.035); and
 - (b) bears the date of:
 - (i) the creation of the document; or
 - (ii) for a revised document—the most recent revision of the document;and
 - (c) is available to the personnel who must refer to the document; and
 - (d) identifies the person who authorised the creation and any revision of the document.
- (3) For paragraph (1)(b), a *technical manual* means a document, other than the operations manual, that contains technical information about the operation and maintenance of a facility.

Example: An equipment manufacturer's instruction book.
- (4) A service provider must ensure that:
 - (a) a master copy of each document mentioned in this regulation is kept safely; and
 - (b) copies of documents are kept in a form that enables amendments to be made; and
 - (c) any document that has been replaced can not be used by mistake.

171.080 Records

- (1) A service provider must retain each document that:
 - (a) is given to or is created by or for the service provider; and
 - (b) could relate to aviation safety; and
 - (c) helps provide a history of events that relate to the design, installation, testing, operation, maintenance, modification or repair of, or changes to, each facility.
- (2) A document for subregulation (1) includes any record of a kind mentioned in the Manual of Standards that is given to, or created by or for, the provider.

Examples: Records of the operational performance of a service, changes to the configuration of a facility, records showing software upgrades, or records of commissioning procedures.
- (3) A document retained for this regulation must be:
 - (a) stored so it can be retrieved if needed for an aviation safety investigation; and

(b) retained for at least 5 years.

171.085 Security program

- (1) A service provider must have, and put into effect, the security program set out in the operations manual.
- (2) The security program must be in accordance with the standards set out in the Manual of Standards.

171.086 Safety management system

- (1) A service provider must have, and put into effect, a safety management system that includes the policies, procedures, and practices necessary to safely provide the telecommunication and radionavigation services permitted under its approval.
- (2) The safety management system must be in accordance with the standards set out in the Manual of Standards.
- (3) The service provider must keep its safety management system under review and must take such corrective action as is necessary to ensure that it operates properly.

Subpart 171.D—Contents of operations manual

171.090 Operations manual to contain or refer to information

- (1) An operations manual must contain the information mentioned in this Subpart that applies to each telecommunication or radionavigation service and kind of facility of the service provider.
- (2) A requirement under this Subpart to include particular information in an operations manual may be satisfied by referring, in the manual, to that information in another document held by the service provider.

Example: An equipment manufacturer's technical manual.

171.095 Organisation and management of service provider

An operations manual must include an organisation chart of the service provider that shows:

- (a) the names, relevant qualifications, relevant experience and positions of the key personnel; and
- (b) the number of technicians who will provide each service; and
- (c) whether the people mentioned in paragraphs (a) and (b) are employees.

171.100 Way in which standards are met

- (1) An operations manual must:
 - (a) contain each standard that relates to the design, installation, testing, operation or maintenance of the service provider's services and facilities; and
 - (b) explain how each standard is met.

- (2) For subregulation (1):

standards means any of the following standards that apply to the service or facility:

- (a) an ICAO standard;
- (b) a standard set out in Annex 10 to the Chicago Convention;
- (c) a standard in the Manual of Standards;
- (d) any other standard included in the operations manual.

171.105 Functional specification and performance values of services

- (1) An operations manual must include:
 - (a) the functional specification of each of the service provider's telecommunication or radionavigation services; and
 - (b) the values or characteristics for each of the following that apply to the service:

- (i) availability;
 - (ii) reliability;
 - (iii) accuracy;
 - (iv) integrity.
- (2) The values mentioned in paragraph (1)(b) must be derived or measured from either or both of:
- (a) the configuration of each service; and
 - (b) the known performance of each service.
- (3) An operations manual must also describe the method used to calculate each of the values.
- (4) For a radionavigation service, the integrity values or characteristics must be given for each kind of navigation aid facility that forms part of the service.

171.110 Technical description

An operations manual must describe, for each telecommunication or radionavigation service provided:

- (a) the kind and location of each facility; and
- (b) the technical specification of each kind of facility; and
- (c) how each facility interconnects with any other facility or service; and
- (d) the way in which the service provider monitors each facility to ensure that it is operating in accordance with its technical specification.

171.115 Safe operation

- (1) An operations manual must describe the following:
- (a) the procedure that records the way in which each telecommunication or radionavigation service and each related facility is configured at any time;
 - (b) the procedure used to design each facility and each item of equipment so that it provides a safe service;
 - (c) the procedure that ensures that the design of, or changes to, a service or facility are authorised by a person who is qualified and competent to do so;
 - (d) the method to be used to specify any changes to a service or facility, and to design, test and implement those changes;
 - (e) the procedure to be used to commission a new service or facility;
 - (f) the system to be used to maintain a record of the operational performance of a service;
 - (g) the procedure to be used to monitor the performance of each service and facility, and to compare the results with the appropriate technical specification;
 - (h) the procedure to be used if a service fails or a facility fault occurs, including the way in which the failure or fault is to be reported and rectified;

Regulation 171.120

- (i) the procedure to be used to report and rectify any defects found during operation and maintenance of the facility;
 - (j) the procedure to be used to:
 - (i) detect and correct any latent defects in equipment; and
 - (ii) change software to adapt to any changes to the configuration of hardware; and
 - (iii) change the design of equipment or facilities to adapt to any change to the functional or technical specification.
- (2) For subparagraph (1)(j)(ii), **software** includes any form of data or instructions for an electronic device.

171.120 Facility operation and maintenance plan

- (1) For this regulation:

flight inspection means a test of the accuracy, coverage or any other aspect of the performance of a service or facility conducted by using test equipment on board an aircraft in flight.

- (2) An operations manual must contain, for each kind of facility, an operation and maintenance plan that includes the following:
- (a) the procedures used for maintenance, including the procedures used for repair;
 - (b) a description of the system used to schedule maintenance;
 - (c) the interval between performance inspections and the method used to determine the interval;
 - (d) a copy of the operating and maintenance instructions for the facility;
 - (e) an analysis of the workload of technicians and key personnel that takes into account the numbers of these people and their qualifications;
 - (f) if 1 or more flight inspections are necessary:
 - (i) the standards and procedures used for flight inspections; and
 - (ii) the interval between flight inspections; and
 - (iii) the identity of the person or persons who will conduct flight inspections.

171.125 Safety management system

An operations manual must include information about the safety management system set out in regulation 171.086.

171.140 Test equipment

An operations manual must describe the procedures to maintain and calibrate test equipment.

171.145 Interruption to service

- (1) An operations manual must:
 - (a) describe the procedure to be used if a telecommunication or radionavigation service is interrupted; and
 - (b) specify an acceptable recovery time for each service; and
 - (c) describe the procedure to be used if the acceptable recovery time of a service is exceeded; and
 - (d) if there is a method to provide an alternative service if a service is interrupted—describe the method.
- (2) Paragraph (1)(d) does not apply if, under an ATS agreement, an ATS provider is to arrange the alternative service.

171.150 Document control

An operations manual must describe the system by which documents mentioned in regulation 171.080 are stored and retrieved.

171.155 Security program

An operations manual must describe the security program mentioned in regulation 171.085.

171.160 Changes to procedures

An operations manual must describe the method by which changes are made to the operation and maintenance procedures.

Regulation 171.220

Subpart 171.E—Suspension and cancellation of approvals, and directions to vary manuals

171.220 Suspension and cancellation of approvals

- (1) CASA may state, in a show cause notice, that an approval is suspended if CASA reasonably considers that not suspending the approval would be likely to have an adverse effect on the safety of air navigation.

Note: Regulation 201.004 provides for review of certain decisions by the Administrative Appeals Tribunal.

- (2) If a show cause notice states that the approval is suspended:
 - (a) if the approval is already suspended when the show cause notice is given to the holder—the approval continues to be suspended until CASA revokes the suspension, or the suspension lapses under subregulation (4); or
 - (b) the approval is suspended from when the notice is given to the holder.
- (3) CASA may revoke the suspension at any time.
- (4) If CASA has not cancelled the approval within 3 months after the day the show cause notice is given to the service provider, the suspension lapses at the end of that period.

171.225 Notice to approval holder to show cause

- (1) CASA may give an approval holder a show cause notice if there are reasonable grounds for believing that there are facts or circumstances that amount to grounds for the cancellation of the approval.
- (2) A show cause notice must:
 - (a) tell the approval holder of the facts and circumstances that justify the cancellation of the approval; and
 - (b) invite the holder to show in writing, within a reasonable period stated in the notice, why the approval should not be cancelled.
- (3) For paragraph (2)(b), the period must not be less than 7 days.

171.230 Grounds for cancellation of approval

It is grounds for the cancellation of an approval if the holder:

- (a) has breached a condition of the approval; or
- (b) has contravened the Act or these Regulations; or
- (c) has otherwise been guilty of conduct that renders the holder's continued holding of the approval likely to have an adverse effect on the safety of air navigation.

Note: Regulation 201.004 provides for review of certain decisions by the Administrative Appeals Tribunal.

171.235 Cancellation of approval after show cause notice

- (1) CASA may cancel an approval only if:
 - (a) there exist facts or circumstances that amount to grounds for the cancellation of the approval; and
 - (b) CASA has given the holder a show cause notice in relation to the grounds for the proposed cancellation; and
 - (c) CASA has taken into account any written representations made, within the period stated in the notice, by or on behalf of the holder; and
 - (d) not cancelling the approval would be likely to have an adverse effect on the safety of air navigation.
- (2) Subregulation (1) does not apply in relation to an approval in circumstances in which CASA must cancel the approval.
- (3) If CASA has given a show cause notice to an approval holder, and it decides not to cancel the approval, it:
 - (a) must tell the holder in writing of the decision; and
 - (b) must, if the approval is suspended, revoke the suspension.

171.237 Cancellation if cooperation or arrangement ceases

- (1) CASA must cancel the approval of a person mentioned in subparagraph 171.020(1)(c)(i) if the cooperation mentioned in that subparagraph ceases.
- (2) CASA must cancel the approval of a person mentioned in subparagraph 171.020(1)(c)(ii) if the arrangement mentioned in that subparagraph ceases.

171.245 CASA's power to direct variation of manual

- (1) If necessary in the interests of the safety of air navigation, CASA may direct a service provider in writing to vary its operations manual, within a reasonable period specified in the direction, in a way specified in the direction.
- (2) CASA may extend the period by written notice, before or after the end of the period mentioned in subregulation (1).
- (3) If the service provider does not comply with the direction within the period (including any extension of it), the manual is taken to cease to be approved at the end of the period.
- (4) After complying with the direction, the holder must give CASA a copy of the manual as so varied.

Part 172—Air Traffic Service Providers

Table of contents

Subpart 172.A—General

- 172.005 Applicability of this Part
- 172.010 Definitions for this Part
- 172.015 What is an ATS provider
- 172.020 Providing air traffic service without approval
- 172.022 Issue of Manual of Standards

Subpart 172.B—Approval as an ATS provider

- 172.024 Applicant for approval as ATS provider
- 172.030 When applicant is eligible for approval
- 172.055 Variation of approvals

Subpart 172.C—Requirements to be complied with by ATS providers

Division 172.C.1—Operations manual

- 172.060 Operations manual

Division 172.C.2—Air traffic service

- 172.065 Standards for air traffic service
- 172.070 Aeronautical telecommunications procedures
- 172.075 ICAO Doc. 4444 and ICAO Doc. 7030
- 172.080 Compliance with provider's operations manual
- 172.085 Priority of standards
- 172.090 Priority of inconsistent procedures

Division 172.C.3—Standards for facilities and equipment

- 172.095 Facilities and equipment

Division 172.C.4—Organisation and personnel

- 172.100 Definition for this Division
- 172.105 Organisation
- 172.110 Personnel
- 172.115 Supervisory personnel
- 172.120 Qualifications for certain personnel

Division 172.C.5—Arrangements to maintain service

- 172.125 Agreements with service providers
- 172.130 Agreements with aerodrome operators
- 172.135 Arrangements for transfer of information

Division 172.C.6—Management

- 172.140 Training and checking program
-

-
- 172.145 Safety management system
 - 172.150 Contingency plan
 - 172.155 Security program

Division 172.C.7—Reference materials, documents, records and log books

- 172.160 Reference materials
- 172.165 Documents and records
- 172.170 Document and record control system
- 172.175 Logbooks

Division 172.C.8—Notice of air traffic service

- 172.180 Availability of air traffic service

Subpart 172.D—Telling CASA about changes

- 172.185 Advice on organisational changes
- 172.190 Discontinuing air traffic service

Subpart 172.E—Miscellaneous

- 172.195 ATS provider must not provide unauthorised air traffic service

Subpart 172.F—Administration**Division 172.F.1—Preliminary**

- 172.200 Applicability of this Subpart

Division 172.F.2—Approvals

- 172.202 Applying for approval
- 172.205 Joint applications not permitted
- 172.215 Applications by corporations etc—what must be included
- 172.230 CASA may require demonstrations of procedures or equipment
- 172.260 When CASA must approve an applicant
- 172.265 When decision must be made
- 172.270 Conditions

Division 172.F.4—Directions to amend provider's operations manual

- 172.300 CASA may direct amendments to provider's operations manual

Division 172.F.5—Suspension and cancellation of approvals

- 172.305 Definition for this Division
- 172.310 Suspension of approval by show cause notice
- 172.315 Grounds for cancellation of approval
- 172.320 Notice to show cause
- 172.325 Cancellation of approval after show cause notice
- 172.327 Cancellation if cooperation or arrangement ceases

Subpart 172.A—General

172.005 Applicability of this Part

- (1) This Part:
 - (a) applies to a person that wants to become, or is, an ATS provider; and
 - (b) sets out certain administrative rules applying to CASA in its administration of this Part.
- (2) However, this Part does not apply to:
 - (a) a person who is providing an air traffic service in the course of his or her duties for the Defence Force; or
 - (b) any air traffic service provided by the Defence Force.

172.010 Definitions for this Part

In this Part:

airspace authority means:

- (a) the body having the responsibility for making determinations under regulation 5, declarations under regulation 6 and designations under regulation 8 of the *Airspace Regulations 2007*; or
- (b) if another body is given that responsibility under other regulations having the same or similar effect—that body.

air traffic service means an air traffic service of a kind mentioned in Annex 11, other than a certified air/ground radio service at an aerodrome.

Annex 10 means Annex 10 to the Chicago Convention.

Annex 11 means Annex 11 to the Chicago Convention.

ICAO Doc. 4444 means Doc. 4444-RAC/501 (Procedures for Air Navigation Services – Rules of the Air and Air Traffic Services) approved and published by decision of the Council of the International Civil Aviation Organisation, as in force from time to time.

ICAO Doc. 7030 means Doc. 7030 (Regional Supplementary Procedures) approved and published by decision of the Council of the International Civil Aviation Organisation, as in force from time to time.

Manual of Standards means the document called ‘Manual of Standards (MOS) – Part 172’ issued by CASA under regulation 172.022, as in force from time to time.

provider’s operations manual, in relation to an ATS provider, means the manual maintained by the provider under regulation 172.060.

172.015 What is an ATS provider

An ATS provider is a person approved, under Subpart 172.F, to provide the air traffic services that are covered by the approval.

172.020 Providing air traffic service without approval

- (1) A person that is not an ATS provider must not provide an air traffic service.

Penalty: 50 penalty units.

- (2) An offence against subregulation (1) is an offence of strict liability.

Note: For *strict liability*, see section 6.1 of the *Criminal Code*.

172.022 Issue of Manual of Standards

- (1) CASA may issue a Manual of Standards for this Part that provides for the following matters:
- (a) standards, including procedures, systems and documents used to provide an air traffic service;
 - (b) standards for facilities and equipment used to provide an air traffic service;
 - (c) standards for the training and checking of an ATS provider's personnel;
 - (d) any matter required or permitted by these Regulations to be provided for by the Manual of Standards;
 - (e) any matter necessary or convenient to be provided for the effective operation of this Part.

Note: A Manual of Standards is a legislative instrument—see subsections 98(5A) and (5B) of the Act. It must be registered in accordance with the *Legislation Act 2003* and must be tabled in both Houses of the Parliament within 6 sitting days after its making.

- (2) CASA must give a copy of a notice about a Manual of Standards for this Part (being a notice referred to in subregulation 11.275(3) or regulation 11.280) to each ATS provider.

Note: Subpart 11.J (including regulations 11.275 and 11.280) sets out procedures for the issue, amendment and revocation of a MOS.

Subpart 172.B—Approval as an ATS provider

172.024 Applicant for approval as ATS provider

A person is eligible to apply for approval as an ATS provider if the person is any of the following:

- (a) the Commonwealth;
- (b) AA;
- (c) a person who is to provide an air traffic service:
 - (i) in cooperation with AA, in accordance with paragraph 11(3)(b) of the *Air Services Act 1995*; or
 - (ii) by arrangement with AA, in accordance with paragraph 11(3)(c) of the *Air Services Act 1995*.

172.030 When applicant is eligible for approval

For Subpart 172.F, an applicant is eligible to become an ATS provider if the applicant is able to comply with the requirements of Subparts 172.C and 172.D or will be able to do so if the applicant is approved.

172.055 Variation of approvals

- (1) If an ATS provider wants to vary its approval, it must apply to CASA, under Subpart 172.F, for that purpose.
- (2) The application must contain, or have with it, a copy of the proposed variation.

Subpart 172.C—Requirements to be complied with by ATS providers

Division 172.C.1—Operations manual

172.060 Operations manual

- (1) An ATS provider must, at all times, maintain an operations manual that complies with the standards set out in the Manual of Standards.
- (2) The provider:
 - (a) must keep the manual in a readily accessible form; and
 - (b) must ensure that each member of its personnel who performs functions in connection with any air traffic service that it provides has ready access to the manual.
- (3) The provider must amend the manual whenever it is necessary to do so to keep it in an up to date form.
- (4) If the provider is given a direction, under regulation 172.300, to amend the manual, the provider must comply with the direction.
- (5) The provider must ensure:
 - (a) that all the amendments are incorporated in all copies of the manual kept by the operator; and
 - (b) that copies of the amendments are given to CASA.

Division 172.C.2—Air traffic service

172.065 Standards for air traffic service

- (1) An ATS provider must ensure that any air traffic service that it provides is provided in accordance with:
 - (a) the standards set out in the Manual of Standards; and
 - (b) the standards set out or referred to in Annex 11, as varied by Gen 1.7 of Part 1 of the AIP.
- (2) However, the provider may deviate from the standards if an emergency, or other circumstance, arises that makes the deviation necessary in the interests of aviation safety.
- (3) As soon as practicable, the provider must tell CASA of the deviation and how long it is likely to last.

172.070 Aeronautical telecommunications procedures

An ATS provider must ensure that any air traffic service that it provides is provided in accordance with:

- (a) the radiotelephony procedures set out in Parts 1 and 2 of the AIP; and
- (b) the procedures for aeronautical telecommunications set out in Volume II of Annex 10, as varied by Gen 1.7 of Part 1 of the AIP.

172.075 ICAO Doc. 4444 and ICAO Doc. 7030

- (1) An ATS provider must ensure that any air traffic service that it provides is provided in accordance with the procedures and rules set out in ICAO Doc. 4444, as varied by Gen 1.7 of Part 1 of the AIP.
- (2) If a regional supplementary procedure set out in ICAO Doc. 7030 relates to an air traffic service that the provider provides, the provider must also ensure that the service is provided in accordance with that procedure.
- (3) However, the provider may deviate from a procedure or rule mentioned in subregulation (1), or a regional supplementary procedure mentioned in subregulation (2), if an emergency, or other circumstance, arises that makes the deviation necessary in the interests of aviation safety.
- (4) As soon as practicable, the provider must tell CASA of the deviation and how long it is likely to last.

172.080 Compliance with provider's operations manual

An ATS provider must ensure that any air traffic service that it provides is provided in accordance with its provider's operations manual.

172.085 Priority of standards

If, apart from this regulation, an ATS provider would be required by this Division to ensure that any air traffic service that it provides is provided in accordance with a standard in the Manual of Standards and a standard in Annex 11, as varied by Gen 1.7 of Part 1 of the AIP, and it is not possible to comply with both standards, the provider is only required to ensure that the service is provided in accordance with the standard in the Manual.

172.090 Priority of inconsistent procedures

- (1) In this regulation:
procedure includes rules.
- (2) If, apart from this regulation, an ATS provider would be required by this Division to ensure that any air traffic service that it provides is provided in accordance with 2 or more procedures that are inconsistent, the provider is only required to ensure that the service is provided in accordance with whichever of the procedures has the highest priority.
- (3) For this regulation, 2 or more procedures are inconsistent if:
 - (a) it is not possible to comply with both or all of the procedures; or
 - (b) they require the same, or substantially similar, action to be taken at different times or in a different way.
- (4) The order of priority of a procedure is as follows (starting with those of highest priority):
 - (a) procedures in Parts 1 and 2 of the AIP;
 - (b) procedures for aeronautical telecommunications in Volume II of Annex 10, as varied by Gen 1.7 of Part 1 of the AIP;
 - (c) procedures in ICAO Doc. 7030;
 - (d) procedures in ICAO Doc. 4444, as varied by Gen 1.7 of Part 1 of the AIP;
 - (e) any procedures in the provider's operations manual.

Division 172.C.3—Standards for facilities and equipment

172.095 Facilities and equipment

- (1) An ATS provider must, at all times, make available for use by its personnel the equipment and facilities necessary for providing, in accordance with the standards set out in the Manual of Standards, the air traffic services covered by its approval.
- (2) The equipment must include equipment of the kinds specified in the Manual of Standards.
- (3) Any equipment and facilities mentioned in chapter 6 of Annex 11 that the provider uses in providing an air traffic service must comply with the standards of that chapter.
- (4) If the provider uses a control tower in providing an air traffic service, the provider must ensure the control tower is designed, sited, constructed, equipped and maintained in accordance with the standards set out in the Manual of Standards.

Division 172.C.4—Organisation and personnel

172.100 Definition for this Division

In this Division:

trained, in relation to a member of an ATS provider's personnel, means trained in accordance with any relevant requirements set out in the provider's training and checking program mentioned in regulation 172.140.

172.105 Organisation

An ATS provider must, at all times, maintain an appropriate organisation with a sound and effective management structure to enable it to provide, in accordance with the standards set out in the Manual of Standards and the standards set out or referred to in Annex 11, the air traffic services covered by its approval.

172.110 Personnel

An ATS provider must have, at all times, enough suitably qualified and trained personnel to enable it to provide, in accordance with the standards set out in the Manual of Standards and the standards set out or referred to in Annex 11, the air traffic services covered by its approval.

172.115 Supervisory personnel

An ATS provider must have, at all times, enough suitably qualified and trained personnel who are able to supervise the provision of any air traffic service that it provides.

172.120 Qualifications for certain personnel

- (1) An ATS provider must not give to a person responsibility for an air traffic control function to be performed in connection with any air traffic service that it provides unless:
 - (a) CASA has authorised the person to perform the function under regulation 65.035; or
 - (b) the person holds an ATC licence with a rating for the function and an endorsement for the controlled aerodrome for which, or the airspace in relation to which, the person performs the function; or
 - (c) the person performs the function under the supervision of another person who holds an ATC licence with a rating for the function and an endorsement for the controlled aerodrome for which, or the airspace in relation to which, the person performs the function.
- (2) The provider must not give to a person responsibility for a flight service function to be performed in connection with any air traffic service that it provides unless:

Part 172 Air Traffic Service Providers

Subpart 172.C Requirements to be complied with by ATS providers

Division 172.C.4 Organisation and personnel

Regulation 172.120

- (a) CASA has authorised the person to perform the function under regulation 65.050; or
 - (b) the person holds a flight service licence with a rating for the function and an endorsement for the aerodrome for which, or the airspace in relation to which, the person performs the function; or
 - (c) the person performs the function under the supervision of another person who holds a flight service licence with a rating for the function and an endorsement for the aerodrome for which, or the airspace in relation to which, the person performs the function.
- (3) The provider must not give to a person responsibility for an air traffic control function to be performed in connection with any air traffic service that it provides if the person is subject to a direction under regulation 65.255.
- (4) The provider must not give to a person responsibility for a flight service function to be performed in connection with any air traffic service that it provides if the person is subject to a direction under regulation 65.255.

Division 172.C.5—Arrangements to maintain service

172.125 Agreements with service providers

- (1) In this regulation:

service provider means a person:

- (a) that is approved, under Part 171, to provide a telecommunication service, radionavigation service, or both; and
 - (b) whose approval is in force.
- (2) An ATS provider (other than an ATS provider that is also a service provider) must have an agreement with a service provider for any telecommunication service or radionavigation service that the service provider provides to the ATS provider.
- (3) An agreement, under subregulation (2), must be in accordance with the standards set out in the Manual of Standards.

172.130 Agreements with aerodrome operators

- (1) In this regulation:

vehicle includes boat.

- (2) If an ATS provider (other than an ATS provider that is also an aerodrome operator) provides an air traffic service for a controlled aerodrome, the provider must have an agreement with the aerodrome operator covering the arrangements for controlling aircraft, vehicles and people on the manoeuvring area of the aerodrome.
- (3) An agreement, under subregulation (2), must be in accordance with the standards set out in the Manual of Standards.

172.135 Arrangements for transfer of information

- (1) An ATS provider must have, at all times, adequate arrangements to ensure that it gets, and will continue to get, the services and information necessary to provide the air traffic services covered by its approval.
- (2) The provider must have, at all times, adequate arrangements to ensure that it is able, and will continue to be able, to provide information in connection with any of those air traffic services to another person whose duties or functions reasonably require that information.

Division 172.C.6—Management

172.140 Training and checking program

An ATS provider must, at all times, provide a training and checking program, in accordance with the Manual of Standards, to ensure that each member of its personnel who performs functions in connection with any air traffic service that it provides is competent to perform those functions.

172.145 Safety management system

- (1) An ATS provider must have, and put into effect, a safety management system that includes the policies, procedures, and practices necessary to provide the air traffic services covered by its approval safely.
- (2) The safety management system must be in accordance with the standards set out in the Manual of Standards.
- (3) The provider must keep under review its safety management system and take such corrective action as is necessary to ensure that it operates properly.

172.150 Contingency plan

- (1) An ATS provider must have a contingency plan, in accordance with the standards set out in the Manual of Standards, of the procedures to be followed if, for any reason, an air traffic service being provided by it is interrupted.
- (2) The plan must include:
 - (a) the actions to be taken by the members of the provider's personnel responsible for providing the service; and
 - (b) possible alternative arrangements for providing the service; and
 - (c) the arrangements for resuming normal operations for the service.

172.155 Security program

- (1) An ATS provider must have, and put into effect, a security program that sets out the procedures designed to protect its personnel, and any facility and equipment that it uses, in providing any of its air traffic services.
- (2) The security program must be in accordance with the standards set out in the Manual of Standards.

Division 172.C.7—Reference materials, documents, records and log books

172.160 Reference materials

- (1) An ATS provider must maintain the following reference materials:
 - (a) copies of the Act and these Regulations;
 - (b) copies of Annex 11 and Volume II of Annex 10;
 - (c) a copy of ICAO Doc. 4444;
 - (d) if a regional supplementary procedure set out in ICAO Doc. 7030 relates to an air traffic service that the provider provides—a copy of ICAO Doc. 7030;
 - (e) a copy of the parts of the AIP that are relevant to any air traffic services that it provides;
 - (f) the Manual of Standards;
 - (g) all manuals and documents specified in the Manual of Standards;
 - (h) a copy of any instruction issued by it to its personnel in relation to the provision of its air traffic services.
- (2) The provider must keep the reference materials up to date and in a readily accessible form.
- (3) The provider's personnel who perform functions in connection with any air traffic service that the provider provides must have ready access to the reference materials.

172.165 Documents and records

- (1) An ATS provider must keep documents and records of the kinds specified in the Manual of Standards.
- (2) A document or record must be retained for as long as the Manual specifies for the particular kind of document or record.
- (3) The provider must, at CASA's request, make the documents and records, or copies of them or extracts from them, available for inspection by CASA.

172.170 Document and record control system

- (1) An ATS provider must establish, and put into effect, a system for controlling documents and records relating to the air traffic services that it provides, including the policies and procedures for making, amending, preserving and disposing those documents and records.
- (2) The system must be in accordance with the standards set out in the Manual of Standards.

Part 172 Air Traffic Service Providers

Subpart 172.C Requirements to be complied with by ATS providers

Division 172.C.7 Reference materials, documents, records and log books

Regulation 172.175

- (3) The documents and records must include the documents and records required to be kept under regulation 172.165.

172.175 Logbooks

- (1) An ATS provider must keep, for each air traffic service that it provides from a particular location, a logbook in accordance with the standards set out in the Manual of Standards.
- (2) The provider must ensure that information of the kinds mentioned in the Manual is recorded in each logbook.
- (3) The provider must, at CASA's request, make each logbook, or a copy of it or an extract from it, available for inspection by CASA.

Division 172.C.8—Notice of air traffic service

172.180 Availability of air traffic service

- (1) An ATS provider must give to the AIS details of each air traffic service that it provides in particular airspace, or for a particular aerodrome, including the hours during which the service is available.
- (2) An ATS provider must tell the AIS about changes, interruptions or the unavailability of any of its air traffic services, if it is practicable to do so.

Subpart 172.D—Telling CASA about changes

172.185 Advice on organisational changes

An ATS provider must tell CASA, in writing, of a change of circumstances that materially affects its capacity to provide any of its air traffic services within 7 days after the change occurs.

172.190 Discontinuing air traffic service

- (1) An ATS provider must not discontinue an air traffic service that it provides, unless it has given CASA at least 7 days written notice that the service is to be discontinued.
- (2) Subregulation (1) does not apply if, having regard to the provider's circumstances:
 - (a) it was not reasonably practicable for the provider to give to CASA at least 7 days notice; and
 - (b) the provider gives the notice as soon as reasonably practicable before, on or after the day when the service is discontinued.

Subpart 172.E—Miscellaneous

172.195 ATS provider must not provide unauthorised air traffic service

An ATS provider must not provide an air traffic service unless its approval:

- (a) is in force; and
- (b) covers that service.

Subpart 172.F—Administration

Note: In addition to the provisions of this Subpart, Part 11 contains provisions relating to an application for approval as an ATS provider.

Division 172.F.1—Preliminary

172.200 Applicability of this Subpart

This Subpart:

- (a) sets out certain administrative rules applying to CASA in its administration of this Part; and
- (b) includes certain generic provisions applying to anyone who wants to become, or is, an ATS provider.

Division 172.F.2—Approvals

172.202 Applying for approval

Subject to regulation 172.205, a person may apply to CASA, in writing, for approval as an ATS provider.

Note: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.

172.205 Joint applications not permitted

- (1) An application purportedly made by 2 or more persons jointly is not a valid application for any purpose.
- (2) An application purportedly made by a partnership is not a valid application for any purpose.

172.215 Applications by corporations etc—what must be included

- (1) An application from a person other than an individual must set out:
 - (a) the applicant's registered address and ACN; and
 - (b) the names and addresses of its officers.
- (2) In paragraph (1)(b):

officer has the meaning given by section 9 of the *Corporations Act 2001*.

172.230 CASA may require demonstrations of procedures or equipment

Regulation 11.045 applies in relation to an approval as an ATS provider.

172.260 When CASA must approve an applicant

- (1) Subject to regulation 11.055 and subregulation (2), if an applicant has applied for approval as an ATS provider under this Part, CASA must grant the approval.
- (2) CASA must refuse an application for an approval for an air traffic service to be provided in particular airspace, or for a particular aerodrome, if anyone else who is an ATS provider already provides that service in that airspace or for that aerodrome.

Note: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to issue, or cancelling, suspending or varying, an approval; or
- (b) a decision imposing a condition on an approval.

Regulation 172.265

172.265 When decision must be made

- (1) If CASA does not make a decision about an application within the period mentioned in subregulation (2) after receiving it, CASA is taken to have refused the application.
- (2) The period is 6 months.
- (3) However, if CASA makes a request under regulation 11.035, 11.040 or 11.045, the time between when CASA makes the request, and when the applicant conducts the demonstration, comes in for interview, or gives CASA the information or copy requested, does not count towards the period.
- (4) Also, if CASA asks an applicant to make a statutory declaration under regulation 11.047 or subregulation 11.050(3A), the time between when CASA asks the applicant to do so and when the applicant gives CASA the statutory declaration does not count towards the period.
- (5) Also, if CASA invites an applicant to make a written submission under subregulation 11.050(2), the time between when CASA gives the invitation and when the applicant makes the written submission does not count towards the period.
- (6) In this regulation:

application includes an application to vary an approval under this Division.

172.270 Conditions

Without limiting regulations 11.056 and 11.067, CASA may impose, on an approval, any condition necessary to give effect to an arrangement mentioned in subsection 11(3) of the *Air Services Act 1995*.

Division 172.F.4—Directions to amend provider's operations manual

172.300 CASA may direct amendments to provider's operations manual

- (1) If necessary in the interests of the safety of air navigation, CASA may direct an ATS provider, in writing, within a reasonable period specified in the direction, to amend its provider's operations manual in a way specified in the direction.
- (2) CASA may extend the period by written notice, before or after the end of the period referred to in subregulation (1).

Division 172.F.5—Suspension and cancellation of approvals

172.305 Definition for this Division

In this Division:

show cause notice means a notice under regulation 172.320.

172.310 Suspension of approval by show cause notice

- (1) CASA may state, in a show cause notice, that an ATS provider's approval is suspended if CASA reasonably considers that not suspending the approval would be likely to have an adverse effect on the safety of air navigation.

Note: Regulation 201.004 provides for review of certain decisions by the Administrative Appeals Tribunal.

- (2) If a show cause notice states that the approval is suspended, the approval is suspended from when the notice is given to the provider.
- (3) CASA may revoke the suspension at any time.
- (4) If CASA has not cancelled the approval under regulation 172.325, within 90 days after the day the show cause notice is given to the provider, the suspension lapses at the end of that period.

172.315 Grounds for cancellation of approval

It is grounds for the cancellation of an ATS provider's approval if the provider:

- (a) has breached a condition of the approval; or
- (b) has contravened the Act or these Regulations; or
- (c) does not meet, or continue to meet, a requirement of this Part for getting the approval; or
- (d) has otherwise been guilty of conduct that renders the provider's continued holding of the approval likely to have an adverse effect on the safety of air navigation.

Note: Regulation 201.004 provides for review of certain decisions by the Administrative Appeals Tribunal.

172.320 Notice to show cause

- (1) CASA may give an ATS provider a show cause notice if there are reasonable grounds for believing that there are facts or circumstances that amount to grounds for the cancellation of the provider's approval.
- (2) A show cause notice must:
 - (a) tell the provider of the facts and circumstances that justify the cancellation of the approval; and

- (b) invite the provider to show in writing, within a reasonable period stated in the notice, why the approval should not be cancelled.
- (3) For paragraph (2)(b), the period must not be less than 7 days.

172.325 Cancellation of approval after show cause notice

- (1) CASA may cancel an ATS provider's approval only if:
 - (a) there exist facts or circumstances that amount to grounds for the cancellation of the approval; and
 - (b) CASA has given the provider a show cause notice in relation to the grounds for the proposed cancellation; and
 - (c) CASA has taken into account any written representations made, within the period stated in the notice, by or on behalf of the provider; and
 - (d) not cancelling the approval would be likely to have an adverse effect on the safety of air navigation.
- (2) If CASA has given a show cause notice to an ATS provider, and it decides not to cancel the provider's approval, it:
 - (a) must tell the provider, in writing, of the decision; and
 - (b) must, if the approval is suspended, revoke the suspension.

172.327 Cancellation if cooperation or arrangement ceases

- (1) CASA must cancel the approval of a person mentioned in subparagraph 172.024(c)(i) if the cooperation mentioned in that subparagraph ceases.
- (2) CASA must cancel the approval of a person mentioned in subparagraph 172.024(c)(ii) if the arrangement mentioned in that subparagraph ceases.

Part 173—Instrument flight procedure design

Table of contents

Subpart 173.A—General

- 173.005 Applicability
- 173.010 Definitions for this Part
- 173.015 What is a *certified designer*
- 173.020 What is a *procedure design certificate*
- 173.025 What is an *authorised designer*
- 173.030 What is a *procedure design authorisation*
- 173.035 Design, review or amendment of terminal instrument flight procedures—requirement for procedure design certificate etc
- 173.040 Designing instrument flight procedures other than terminal instrument flight procedures

Subpart 173.B—Certified designers

Division 173.B.1—Certification as certified designer

- 173.045 Applications for procedure design certificates
- 173.050 Criteria for grant of procedure design certificates
- 173.055 Procedure design certificate
- 173.065 How long procedure design certificates remain in force
- 173.070 Applications to vary procedure design certificates

Division 173.B.2—Requirements to be complied with by certified designers

- 173.075 Certified designer to maintain operations manual
- 173.080 Compliance with operations manual
- 173.085 Standards for design of terminal instrument flight procedures etc
- 173.090 Verification of terminal instrument flight procedures
- 173.095 Validation of terminal instrument flight procedures
- 173.100 Publication of terminal instrument flight procedures
- 173.105 Radio navigation aids
- 173.110 Maintenance of terminal instrument flight procedures
- 173.115 Certified designer to provide facilities etc
- 173.120 Certified designer to have appropriate organisation
- 173.125 Certified designer to have sufficient personnel
- 173.130 Supervisory personnel
- 173.135 Certified designer to appoint chief designer
- 173.140 Certified designer to provide training and checking program
- 173.145 Certified designer to have safety management system
- 173.150 Certified designer to maintain reference materials
- 173.155 Certified designer to keep documents and records
- 173.160 Certified designer to have document and record control system

Division 173.B.3—Chief designer

- 173.165 Approval for appointment of chief designer
- 173.170 Approval for appointment to act as chief designer

-
- 173.175 Appointment likely to have adverse effect on air safety
 - 173.180 Chief designer's functions and duties
 - 173.185 Duration of approval
 - 173.190 Withdrawal or suspension of approval of appointment

Division 173.B.4—Miscellaneous

- 173.195 Advice on organisational changes
- 173.200 Discontinuing design work on terminal instrument flight procedures of a particular type
- 173.205 Notifying the AIS of a variation to a procedure design certificate
- 173.210 Discontinuing maintenance of particular terminal instrument flight procedures
- 173.215 Transfer of maintenance responsibility

Subpart 173.C—Authorised designers**Division 173.C.1—Authorisation as authorised designer**

- 173.220 Applications for procedure design authorisations
- 173.225 Criteria for grant of procedure design authorisations
- 173.240 How long procedure design authorisations remain in force
- 173.245 Applications to vary procedure design authorisations

Division 173.C.2—Requirements to be complied with by authorised designers

- 173.250 Operations manual
- 173.255 Compliance with operations manual
- 173.260 Standards for design of terminal instrument flight procedures etc
- 173.265 Off-shore installations
- 173.270 Maintenance of terminal instrument flight procedures
- 173.275 Authorised designer to have sufficient personnel
- 173.280 Authorised designer to maintain reference materials
- 173.285 Authorised designer to keep documents and records
- 173.290 Authorised designer to have document and record control system

Division 173.C.3—Miscellaneous

- 173.295 Discontinuing design work on terminal instrument flight of a particular type
- 173.300 Discontinuing maintenance of terminal instrument flight procedures
- 173.305 Transfer of maintenance responsibility

Subpart 173.D—Performance of design work

- 173.310 Certified designer not to exceed the limitations of the designer's procedure design certificate
- 173.315 Authorised designer not to exceed the limitations of authorisation

Subpart 173.E—Administration**Division 173.E.1—Grant of procedure design certificates and procedure design authorisations**

- 173.330 CASA may require demonstrations of equipment etc
- 173.335 Grant of procedure design certificate or procedure design authorisation
- 173.345 CASA may grant certificate or authorisation subject to conditions
- 173.350 When decision must be made

Division 173.E.3—Directions to amend certified designer’s or authorised designer’s operations manual

173.375 CASA may direct amendments to designer’s operations manual

Division 173.E.4—Suspension and cancellation of procedure design certificates and procedure design authorisations

173.380 Suspension or cancellation of procedure design certificate or procedure design authorisation by CASA

Division 173.E.5—Authorised inspectors

173.390 CASA may appoint authorised inspectors

173.395 Identity card

173.400 Powers of authorised inspector

Subpart 173.A—General

173.005 Applicability

- (1) This Part:
 - (a) provides for the standards that apply to the design of instrument flight procedures; and
 - (b) applies to the following persons:
 - (i) persons who want to become, or are, certified designers or authorised designers of terminal instrument flight procedures and certain employees of those persons;
 - (ii) persons who design instrument flight procedures other than terminal instrument flight procedures.
- (2) This Part also sets out certain rules that apply to CASA in administering procedure design certificates and procedure design authorisations.
- (3) Nothing in this Part applies:
 - (a) in relation to the design of terminal instrument flight procedures for use by an aircraft in circumstances where one or more engines of the aircraft become inoperative while it is on an IFR flight; or
 - (b) to a person who carries on design work on such procedures.

173.010 Definitions for this Part

In this Part, unless the contrary intention appears:

authorised designer has the meaning given by regulation 173.025.

certified designer has the meaning given by regulation 173.015.

chief designer, for a certified designer, means a person appointed as chief designer for the certified designer under Division 173.B.3.

continental shelf means the continental shelf of Australia, within the meaning of the Seas and Submerged Lands Act 1973.

design work, in relation to a terminal instrument flight procedure, means any of the following work:

- (a) designing the procedure or a part of the procedure;
- (b) verifying, maintaining, reviewing or amending the procedure;
- (c) supervising a person carrying on any work mentioned in paragraph (a) or (b).

employee, of a certified designer or an authorised designer, includes a person who carries on design work on a terminal instrument flight procedure for the designer in the course of performing services for the designer.

Regulation 173.015

ICAO Doc. 8168 (PANS-OPS) means Doc.8168-OPS/611 Volume II (Procedures for Air Navigation Services – Construction of Visual and Instrument Flight Procedures) approved and published by decision of the Council of the International Civil Aviation Organisation, as in force from time to time.

Manual of Standards means the document called ‘*Manual of Standards (MOS) Part 173 – Standards Applicable to the Provision of Instrument Flight Procedure Design*’, published by CASA, as in force from time to time.

Note: The Manual of Standards is available from CASA’s website at:
www.casa.gov.au.

operations manual:

- (a) in relation to a certified designer, means the manual maintained by the designer under regulation 173.075; and
- (b) in relation to an authorised designer, means the manual maintained by the designer under regulation 173.250.

procedure design authorisation has the meaning given by regulation 173.030.

procedure design certificate has the meaning given by regulation 173.020.

type of terminal instrument flight procedure means a type of terminal instrument flight procedure mentioned in the Manual of Standards.

validate has the same meaning as in the Manual of Standards.

verify has the same meaning as in regulation 173.090.

Note: The following terms are defined in the Dictionary:

- AIS
- instrument approach procedure
- instrument departure procedure
- instrument flight procedures
- lowest safe altitude
- off-shore installation
- specialised helicopter operation
- terminal instrument flight procedure.

173.015 What is a certified designer

A **certified designer** is a person who is the holder of a procedure design certificate that is in force.

173.020 What is a procedure design certificate

A **procedure design certificate** is a certificate that:

- (a) is granted by CASA to a person under this Part; and
- (b) certifies that the person is authorised to carry on design work on a terminal instrument flight procedure of a type covered by the certificate subject to any conditions set out in the certificate.

173.025 What is an *authorised designer*

An *authorised designer* is a person who is the holder of a procedure design authorisation that is in force.

173.030 What is a *procedure design authorisation*

A *procedure design authorisation* is an authorisation that:

- (a) is granted by CASA to a person under this Part; and
- (b) authorises the person to carry on either of the following activities:
 - (i) review or amend a terminal instrument flight procedure that is of a type covered by the authorisation and is for use by Australian aircraft operating under the IFR at, or in the vicinity of, an aerodrome in a foreign country;
 - (ii) carry on design work on a terminal instrument flight procedure that is of a type covered by the authorisation and is for use by Australian aircraft operating under the IFR at, or in the vicinity of, an off-shore installation located no closer than the distance specified in the Manual of Standards from the nearest land.

173.035 Design, review or amendment of terminal instrument flight procedures—requirement for procedure design certificate etc

- (1) A person commits an offence if:
 - (a) the person carries on design work (other than work mentioned in subregulation (2) or (3)) on a terminal instrument flight procedure for use by Australian aircraft operating under the IFR, or by foreign aircraft operating under the IFR in Australian territory; and
 - (b) the person is not permitted to do so under subregulation (2).

Penalty: 50 penalty units.

- (2) For paragraph (1)(b), the following persons may carry on the work:
 - (a) CASA;
 - (b) a certified designer whose procedure design certificate authorises the designer to carry on design work on the procedure;
 - (c) an employee of a certified designer mentioned in paragraph (b) who carries on the design work in the course of the employee's duties.
- (3) A person commits an offence if:
 - (a) the person reviews or amends a terminal instrument flight procedure for use by Australian aircraft operating under the IFR at, or in the vicinity of, an aerodrome in a foreign country; and
 - (b) the person is not permitted to do so under subregulation (4).

Penalty: 50 penalty units.

- (4) For paragraph (3)(b), the following persons may review or amend the procedure:
 - (a) CASA;

Regulation 173.040

- (b) a certified designer whose procedure design certificate authorises the designer to carry on design work on the procedure;
- (c) an employee of a certified designer mentioned in paragraph (b) who reviews or amends the procedure in the course of the employee's duties;
- (d) an authorised designer whose procedure design authorisation authorises the designer to review or amend the procedure;
- (e) an employee of an authorised designer mentioned in paragraph (d) who reviews or amends the procedure in the course of the employee's duties.

(5) A person commits an offence if:

- (a) the person carries on design work on a terminal instrument flight procedure for use by Australian aircraft operating under the IFR at, or in the vicinity of, an off-shore installation; and
- (b) the person is not permitted to do so under subregulation (6).

Penalty: 50 penalty units.

(6) For paragraph (5)(b), the following persons may carry on the work:

- (a) CASA;
- (b) a certified designer whose procedure design certificate authorises the designer to carry on design work on the procedure;
- (c) an employee of a certified designer mentioned in paragraph (b) who carries on the design work in the course of the employee's duties;
- (d) an authorised designer whose procedure design authorisation authorises the designer to carry on design work on the procedure;
- (e) an employee of an authorised designer mentioned in paragraph (d) who carries on the design work in the course of the employee's duties.

(7) An offence against subregulation (1), (3) or (5) is an offence of strict liability.

173.040 Designing instrument flight procedures other than terminal instrument flight procedures

(1) A person who designs an instrument flight procedure that is not a terminal instrument flight procedure must, in designing the procedure, meet any standards for the design of such a procedure set out in the Manual of Standards.

Penalty: 10 penalty units.

(2) An offence against subregulation (1) is an offence of strict liability.

Subpart 173.B—Certified designers

Division 173.B.1—Certification as certified designer

Note: In addition to the provisions of this Division, Part 11 contains provisions relating to an application for certification as a certified designer.

173.045 Applications for procedure design certificates

- (1) A person may apply to CASA, in writing, for a procedure design certificate.

Note: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.

- (2) The application:

(b) must state:

- (i) the applicant's name and address; or
- (ii) if the applicant is incorporated by or under a law of the Commonwealth or of a State or Territory, the applicant's name, registered address and ACN and the names and addresses of the people responsible for its management and control; and

(c) must contain or be accompanied by:

- (i) a written statement specifying the type or each type of terminal instrument flight procedure proposed to be covered by the procedure design certificate; and
- (ii) a written statement setting out the name, qualifications and relevant experience of the individual who is proposed to be the chief designer for the applicant's organisation; and
- (iii) a written statement setting out the qualifications and relevant experience of any other member of the applicant's personnel whose duties would, if the certificate were granted to the applicant, include carrying on design work under the certificate; and

(d) must be accompanied by a copy of the operations manual under which the applicant proposes to design, or engage in design work on, terminal instrument flight procedures of the type or types concerned.

Note: Part 11 also contains provisions relating to an application for a procedure design certificate.

173.050 Criteria for grant of procedure design certificates

For regulation 173.335, a person who has applied for the grant of a procedure design certificate must, if the certificate is granted, be able to comply with the requirements of Division 173.B.2.

Regulation 173.055

173.055 Procedure design certificate

- (1) If CASA grants a procedure design certificate to a person under Subpart 173.E, CASA must state on the certificate:
- (a) the person's name and principal place of business; and
 - (b) the type or each type of terminal instrument flight procedure covered by the certificate; and
 - (c) any conditions applicable to it; and
 - (d) the date when it comes into force; and
 - (e) any other information that CASA thinks should be included.

173.065 How long procedure design certificates remain in force

A procedure design certificate remains in force unless it is cancelled.

173.070 Applications to vary procedure design certificates

An application to vary a procedure design certificate must contain, or have with it, a copy of the proposed variation.

Division 173.B.2—Requirements to be complied with by certified designers

173.075 Certified designer to maintain operations manual

- (1) A certified designer must, at all times, maintain an operations manual that meets the standards for operations manuals set out in the Manual of Standards.
- (2) A certified designer:
 - (a) must keep the manual in a readily accessible form; and
 - (b) must ensure that each employee of the designer whose duties include carrying on design work under the designer's procedure design certificate has ready access to the manual; and
 - (c) must amend the manual whenever it is necessary to do so to keep it in an up-to-date form.
- (3) A certified designer must ensure:
 - (a) that all amendments of the manual are incorporated in all copies of the manual kept by the certified designer; and
 - (b) that copies of the amendments are given to CASA.

173.080 Compliance with operations manual

A certified designer must, in carrying on design work authorised under the designer's procedure design certificate, comply with the designer's operations manual.

173.085 Standards for design of terminal instrument flight procedures etc

- (1) A certified designer designing a terminal instrument flight procedure under the certified designer's procedure design certificate must ensure that the procedure is designed in accordance with:
 - (a) any applicable standards set out or referred to in ICAO Doc. 8168 (PANS-OPS); and
 - (b) any applicable standards set out in the Manual of Standards.
- (2) If, apart from this subregulation, a certified designer would be required to ensure that a terminal instrument flight procedure is designed in accordance with a standard set out or referred to in the ICAO Doc. 8168 (PANS-OPS) and a standard set out in the Manual of Standards, and it is not possible to comply with both standards, the designer is only required to ensure that the procedure is designed in accordance with the Manual of Standards.

173.090 Verification of terminal instrument flight procedures

- (1) A certified designer must establish procedures for verifying terminal instrument procedures that it is authorised to design under the designer's procedure design certificate or on which the designer is authorised to carry on design work.

Regulation 173.095

- (2) The verification procedures:
- (a) must provide for 2 qualified designers to check independently the design of each terminal instrument flight procedure designed, or on which design work is carried on, under the certified designer's procedure design certificate; and
 - (b) must provide for one of those checks to be made by a qualified designer who did not carry on the design work concerned.
- (3) In this regulation, a reference to verifying a terminal instrument flight procedure is a reference to the process of checking the procedure (including all data, computations and drawings for the procedure) in accordance with any applicable standards set out in the Manual of Standards.

- (4) In this regulation:

qualified designer, in relation to a terminal instrument flight procedure, means an individual who:

- (a) is the holder, or an employee of the holder, of a procedure design certificate that authorises the holder to design terminal instrument flight procedures of the same type as the terminal instrument flight procedure concerned; and
- (b) has successfully completed:
 - (i) an approved course of training in the methods and practices contained in ICAO Doc. 8168 (PANS-OPS); and
 - (ii) any training for persons carrying on design work on terminal instrument flight procedures that is specified in the operations manual under which the qualified designer performs the designer's duties; and
- (c) meets the experience requirements for performing the functions of a qualified designer set out in the Manual of Standards.

173.095 Validation of terminal instrument flight procedures

- (1) A certified designer must ensure that each terminal instrument flight procedure designed under the designer's procedure design certificate is validated by a CASA pilot in accordance with any applicable standards set out in the Manual of Standards.

- (2) In this regulation:

CASA pilot means a pilot:

- (a) who is an officer of CASA; and
- (b) who meets the standards set out in the Manual of Standards for carrying out a validation flight check of a terminal instrument flight procedure.

validation flight check has the same meaning as in the Manual of Standards.

173.100 Publication of terminal instrument flight procedures

- (1) A certified designer must ensure that each terminal instrument flight procedure designed under the designer's procedure design certificate is given to the AIS for publication in the AIP together with a certificate by the certified designer's chief designer to the effect that the procedure is designed and validated in accordance with any applicable standards set out or referred to in ICAO Doc. 8168 (PANS-OPS) and the Manual of Standards.
- (2) However, the designer need not give a terminal instrument flight procedure to the AIS if the procedure is for use only by an aircraft in a specialised helicopter operation.
- (3) A certified designer must ensure that all procedures designed under its procedure design certificate that are not given to the AIS for publication in the AIP are given to CASA.

173.105 Radio navigation aids

A certified designer must ensure that a terminal instrument flight procedure designed under the designer's procedure design certificate does not require the use of a ground-based radio-navigation aid other than one that is operated and maintained by a person certificated to do so under Part 171.

173.110 Maintenance of terminal instrument flight procedures

- (1) Subject to subregulation (2), a certified designer is responsible for maintaining, in accordance with the standards for the maintenance of terminal instrument flight procedures set out in the Manual of Standards, a terminal instrument flight procedure designed under the designer's procedure design certificate or for which that responsibility is transferred to the certified designer under regulation 173.215.
- (2) The certified designer ceases to be responsible for the maintenance of the procedure:
 - (a) if the certified designer has notified CASA and, if the procedure is published in the AIP, the AIS, under regulation 173.210, that the designer has ceased to have that responsibility:
 - (i) on the day when the notice is given; or
 - (ii) if a later day is specified in the notice—on the later day; or
 - (b) if the certified designer's responsibility for the maintenance of the procedure is transferred to another certified designer in accordance with regulation 173.215—on the day when the responsibility is transferred; or
 - (c) if the certified designer has notified CASA and, if the procedure is published in the AIP, the AIS, under regulation 173.200, that the designer has ceased to design the type of terminal instrument flight procedure concerned:
 - (i) on the day when the notice is given; or
 - (ii) if a later day is specified in the notice—on the later day; or

Regulation 173.115

- (d) if the certified designer's procedure design certificate is varied under Subpart 173.E to exclude that type of procedure—on the day when the variation takes effect; or
- (e) if the certified designer ceases to be a certified designer—on the day when the designer ceases to be a certified designer.

173.115 Certified designer to provide facilities etc

- (1) A certified designer must provide and maintain adequate facilities for carrying on design work on terminal instrument flight procedures under the designer's procedure design certificate, including:
 - (a) providing premises and equipment appropriate for the certified designer's employees to carry on the design work; and
 - (b) ensuring that those employees have access to all necessary data for designing the procedures including:
 - (i) accurate and current databases or charts detailing terrain and obstacle information; and
 - (ii) accurate and current navigation aid coordinate data; and
 - (iii) accurate and current aerodrome reference point and threshold data.
- (2) A certified designer must, if an aeronautical database and aeronautical data is required for designing a terminal instrument flight procedure under the designer's procedure design certificate, have, and put into effect, procedures to ensure the integrity of the database and the data.

173.120 Certified designer to have appropriate organisation

A certified designer must, at all times, maintain an appropriate organisation with a sound and effective management structure to enable the designer to carry on design work on terminal instrument flight procedures under the designer's procedure design certificate in accordance with these Regulations.

173.125 Certified designer to have sufficient personnel

A certified designer:

- (a) must employ a sufficient number of personnel to enable the designer to carry on design work on terminal instrument flight procedures under the designer's procedure design certificate in accordance with these Regulations; and
- (b) must ensure that those personnel:
 - (i) are suitably qualified and competent to perform their duties; and
 - (ii) are trained in accordance with the Manual of Standards and the designer's operations manual.

173.130 Supervisory personnel

A certified designer must ensure that each employee who is occupying or acting in a supervisory position in the designer's organisation in relation to design work

on terminal instrument flight procedures carried on under the designer's procedure design certificate meets the standards for supervisory positions set out in the Manual of Standards.

173.135 Certified designer to appoint chief designer

A certified designer must not carry on design work on a terminal instrument flight procedure under the designer's procedure design certificate unless:

- (a) the certified designer has appointed a person to be the chief designer for the designer's organisation; and
- (b) the appointment is approved by CASA and is in force; and
- (c) the functions of the chief designer are being carried out by the person or, if the chief designer is temporarily absent from duty, another person:
 - (i) who is appointed by the certified designer to act as chief designer; and
 - (ii) whose appointment is approved by CASA and is in force.

173.140 Certified designer to provide training and checking program

A certified designer must provide a training and checking program that is of an adequate standard to ensure that the employees of the designer maintain their competence and are provided with ongoing training appropriate to their duties.

173.145 Certified designer to have safety management system

- (1) A certified designer must have, and put into effect, a safety management system that includes the policies, procedures, and practices necessary for managing design work on terminal instrument flight procedures carried on under the designer's procedure design certificate.
- (2) The safety management system must be in accordance with the standards set out in the Manual of Standards.
- (3) The designer must keep its safety management system under review and take any necessary corrective action to ensure that it operates properly.

173.150 Certified designer to maintain reference materials

- (1) A certified designer must maintain reference materials of the kinds specified in the Manual of Standards.
- (2) A certified designer must keep the reference materials up-to-date and in a readily accessible form.
- (3) Each employee of the certified designer who carries on design work on a terminal instrument flight procedure under the certified designer's procedure design certificate must have ready access to the reference materials.

Regulation 173.155

173.155 Certified designer to keep documents and records

- (1) A certified designer must keep documents and records of the kinds specified in the Manual of Standards.
- (2) A document or record must be retained for as long as the Manual of Standards specifies for the particular kind of document or record.
- (3) The designer must, at CASA's request, make the documents and records, or copies of them or extracts from them, available for inspection by CASA.

173.160 Certified designer to have document and record control system

- (1) A certified designer must establish, and put into effect, a system for controlling documents and records relating to the terminal instrument flight procedures on which the designer carries on design work under the certified designer's procedure design certificate, including the policies and procedures for making, amending, preserving and disposing of those documents and records.
- (2) The system must be in accordance with the standards set out in the Manual of Standards.
- (3) The documents and records must include the documents and records required to be kept under this Division.

Division 173.B.3—Chief designer

173.165 Approval for appointment of chief designer

- (1) A certified designer must not appoint a person as chief designer unless the appointment is approved by CASA.
- (2) To be appointed as chief designer, a person must, at the time of appointment, meet the standards for the chief designer for a certified designer's organisation set out in the Manual of Standards.

173.170 Approval for appointment to act as chief designer

- (1) A certified designer must not appoint a person to act as chief designer for the certified designer unless the appointment is approved by CASA.
- (2) To be appointed to act as chief designer, a person must, at the time of appointment, have sufficient qualifications and experience to enable the individual to carry out the functions of the appointment properly, having regard to the nature and scope of the design work carried on by the chief designer.

173.175 Appointment likely to have adverse effect on air safety

- (1) Without limiting the matters that CASA may take into account in deciding whether to approve an appointment of a person as chief designer or an appointment of a person to act as chief designer, CASA is not required to approve the appointment if the approval would be likely to have an adverse effect on the safety of air navigation.
- (2) In deciding whether approval of the appointment of a person would be likely to have an adverse effect on the safety of air navigation, CASA may take into account the following:
 - (a) the person's record of compliance with regulatory requirements (in Australia or elsewhere) relating to aviation safety and other transport safety;
 - (b) the experience of the person in aviation;
 - (c) the person's knowledge of the regulatory requirements applicable to civil aviation in Australia;
 - (d) any evidence held by CASA that the person has contravened:
 - (i) the Act or these Regulations; or
 - (ii) a law of another country relating to aviation safety; or
 - (iii) another law (of Australia or of another country) relating to transport safety.

Note: Section 30A of the Act allows the Court to make an order excluding a person from a particular aviation activity. Such an order may have the effect of precluding the approval or acceptance of an appointment while the order is in force.

Regulation 173.180

173.180 Chief designer's functions and duties

The chief designer for a certified designer's organisation is responsible to the certified designer for the following:

- (a) ensuring that any design work on the terminal instrument flight procedures that is carried on under the designer's procedure design certificate is carried on in accordance with these Regulations;
- (b) appointing persons as employees of the certified designer to carry on design work on terminal instrument flight procedures under the designer's procedure design certificate;
- (c) effectively managing work done in relation to those terminal instrument flight procedures by those persons;
- (d) issuing certificates as required by regulation 173.100.

173.185 Duration of approval

- (1) An approval under regulation 173.165 or 173.170 stops being in force if:
 - (a) the appointment to which it relates ends; or
 - (b) it is withdrawn.
- (2) An approval is not in force during any period in which it is suspended.

173.190 Withdrawal or suspension of approval of appointment

- (1) CASA may, by notice in writing to a person appointed as the chief designer, or to act as the chief designer, for a certified designer's organisation, withdraw or suspend approval of the person's appointment if continuing approval of the appointment would be likely to have an adverse effect on the safety of air navigation.
- (2) In deciding whether continuing approval of a person's appointment would be likely to have an adverse effect on the safety of air navigation, CASA may take into account the matters mentioned in subregulation 173.175(2).
- (3) The notice:
 - (a) must set out the reasons for the withdrawal or suspension; and
 - (b) in the case of a suspension, must specify the period of suspension or state when, or in what circumstances, it will end.
- (4) CASA must give a copy of the notice to the certified designer.
- (5) If CASA suspends approval of a person's appointment, the person must not carry out the functions of the appointment during the period of the suspension.
- (6) If CASA withdraws approval of a person's appointment:
 - (a) for the purposes of these Regulations, the appointment is taken to end; and
 - (b) the person must not continue to carry out the functions of the position to which the appointment relates.

Division 173.B.4—Miscellaneous

173.195 Advice on organisational changes

A certified designer must tell CASA, in writing, of a change of circumstances that materially affects its capacity to design a terminal instrument flight procedure under the designer's procedure design certificate, or engage in any design work on that procedure, within 7 days after the change occurs.

173.200 Discontinuing design work on terminal instrument flight procedures of a particular type

- (1) If a certified designer ceases to carry on design work on terminal instrument flight procedures of a particular type, the certified designer must give written notice to that effect to CASA, and, if any of the procedures are published in the AIP, the AIS, within 7 days after ceasing to carry on the design work concerned.
- (2) Subregulation (1) does not apply if, having regard to the certified designer's circumstances, it is not reasonably practicable for the designer to give CASA or, if applicable, the AIS, at least 7 days notice and the notice is given as soon as is reasonably practicable.

173.205 Notifying the AIS of a variation to a procedure design certificate

If a certified designer's procedure design certificate is varied under Subpart 173.E to exclude a particular type of terminal instrument flight procedure and the designer has given any procedures of that type to the AIS for publication in the AIP, the designer must give written notice to the AIS of the variation within 7 days after the day when the variation takes effect.

173.210 Discontinuing maintenance of particular terminal instrument flight procedures

- (1) If a certified designer ceases to be responsible for the maintenance of a terminal instrument flight procedure, the certified designer must give written notice to that effect to CASA and, if the procedure is published in the AIP, to the AIS, within 7 days after ceasing to have that responsibility.
- (2) Subregulation (1) does not apply if, having regard to the certified designer's circumstances, it is not reasonably practicable for the designer to give CASA at least 7 days notice and the notice is given as soon as is reasonably practicable.

173.215 Transfer of maintenance responsibility

- (1) A certified designer may transfer the designer's responsibility for maintaining a terminal instrument flight procedure under regulation 173.110 to another certified designer whose procedure design certificate authorises that designer to design terminal instrument flight procedures of the same type as the procedure concerned.

Regulation 173.215

- (2) If a certified designer accepts responsibility for the maintenance of a terminal instrument flight procedure under this regulation, the designer:
 - (a) must give written notice to the transferor to that effect; and
 - (b) must give written notice of the transfer to CASA and, if the procedure is published in the AIP, to the AIS, within 14 days after the transfer.
- (3) A transfer takes effect on the day when the certified designer accepting responsibility for maintaining the procedure gives notice to the transferor under paragraph (2)(a) or, if a later day is specified in the notice, on the later day.
- (4) If a certified designer transfers the designer's responsibility for maintaining a terminal instrument flight procedure, the designer must give written notice of the transfer to CASA and, if the procedure is published in the AIP, to the AIS, within 14 days after the transfer.

Subpart 173.C—Authorised designers

Division 173.C.1—Authorisation as authorised designer

Note: In addition to the provisions of this Division, Part 11 contains provisions relating to an application for the grant of a procedure design authorisation.

173.220 Applications for procedure design authorisations

- (1) A person may apply to CASA, in writing, for a procedure design authorisation.

Note: An application must be in the approved form, include all the information required by these Regulations and be accompanied by every document required by these Regulations—see regulation 11.030.

- (2) The application:

(b) must state:

- (i) the applicant's name and address; or
- (ii) if the applicant is incorporated by or under a law of the Commonwealth or of a State or Territory, the applicant's name, registered address and ACN and the names and addresses of the people responsible for its management and control; and

(c) must contain or be accompanied by:

- (i) a written statement specifying the activity mentioned in subparagraph 173.030(b)(i) or (ii) that is proposed to be authorised under the authorisation, including specifying the type or each type of terminal instrument flight procedure proposed to be covered by the authorisation; and
- (ii) a written statement setting out the qualifications and relevant experience of each member of the applicant's personnel whose duties would, if the authorisation were granted to the applicant, include carrying on the design work concerned; and

(d) must be accompanied by a copy of the operations manual under which the applicant proposes to carry on that activity.

Note: Part 11 also contains provisions relating to an application for a procedure design authorisation.

173.225 Criteria for grant of procedure design authorisations

For regulation 173.335, a person who has applied for the grant of a procedure design authorisation must, if the authorisation is granted, be able to comply with the requirements of Division 173.C.2.

173.240 How long procedure design authorisations remain in force

A procedure design authorisation remains in force unless it is cancelled.

Regulation 173.245

173.245 Applications to vary procedure design authorisations

An application to vary a procedure design authorisation must contain, or have with it, a copy of the proposed variation.

Division 173.C.2—Requirements to be complied with by authorised designers

173.250 Operations manual

- (1) An authorised designer must, at all times, maintain an operations manual that meets the standards set out in the Manual of Standards.
- (2) An authorised designer:
 - (a) must keep the manual in a readily accessible form; and
 - (b) must ensure that each employee of the designer whose duties include carrying on design work authorised by the designer's procedure design authorisation has ready access to the manual; and
 - (c) must amend the manual whenever it is necessary to do so to keep it in an up-to-date form.
- (3) An authorised designer must ensure:
 - (a) that all amendments of the manual are incorporated in all copies of the manual kept by the designer; and
 - (b) that copies of the amendments are given to CASA.

173.255 Compliance with operations manual

An authorised designer must, in carrying on the activity authorised by the designer's procedure design authorisation, comply with the designer's operations manual.

173.260 Standards for design of terminal instrument flight procedures etc

- (1) An authorised designer designing a terminal instrument flight procedure under the authorised designer's procedure design authorisation must ensure that the procedure is designed in accordance with:
 - (a) any applicable standards set out or referred to in ICAO Doc. 8168 (PANS-OPS); and
 - (b) any applicable standards set out in the Manual of Standards.
- (2) If, apart from this subregulation, an authorised designer would be required to ensure that a terminal instrument flight procedure is designed in accordance with a standard set out or referred to in the ICAO Doc. 8168 (PANS-OPS) and a standard set out in the Manual of Standards, and it is not possible to comply with both standards, the designer is only required to ensure that the procedure is designed in accordance with the Manual of Standards.

173.265 Off-shore installations

- (1) This regulation applies to an authorised designer who is authorised to carry on the activity mentioned in subparagraph 173.030(b)(ii).

Regulation 173.270

- (2) The authorised designer must ensure that a copy of each terminal instrument flight procedure designed under the designer's procedure design authorisation is given to CASA.
- (3) The authorised designer must ensure that a terminal instrument flight procedure designed under the designer's procedure design authorisation does not require the use of a ground-based radio-navigation aid other than one that is operated and maintained by a person certificated to do so under Part 171.

173.270 Maintenance of terminal instrument flight procedures

- (1) Subject to subregulation (2), an authorised designer is responsible for maintaining, in accordance with the standards for the maintenance of terminal instrument flight procedures set out in the Manual of Standards, a terminal instrument flight procedure designed under the designer's procedure design authorisation or a terminal instrument flight procedure for which that responsibility is transferred to the authorised designer under regulation 173.305.
- (2) The authorised designer ceases to be responsible for the maintenance of the procedure:
 - (a) if the authorised designer has notified CASA, under regulation 173.300, that the designer has ceased to have that responsibility:
 - (i) on the day when the notice is given; or
 - (ii) if a later day is specified in the notice—on the later day; or
 - (b) if the authorised designer's responsibility for the maintenance of the procedure is transferred to a certified designer or another authorised designer under regulation 173.305—on the day when the responsibility is transferred; or
 - (c) if the authorised designer has notified CASA, under regulation 173.295, that the designer has ceased to design the type of terminal instrument flight procedure concerned:
 - (i) on the day when the notice is given; or
 - (ii) if a later day is specified in the notice—on the later day; or
 - (d) if the authorised designer's procedure design authorisation is varied under Subpart 173.E to exclude that type of procedure—on the day when the authorisation is varied; or
 - (e) if the authorised designer ceases to be an authorised designer—on the day when the designer ceases to be an authorised designer.

173.275 Authorised designer to have sufficient personnel

An authorised designer:

- (a) must employ a sufficient number of personnel to enable the designer to carry on the activity authorised by the designer's procedure design authorisation in accordance with these Regulations; and
- (b) must ensure that those personnel:
 - (i) are suitably qualified and competent to perform their duties; and

- (ii) are trained in accordance with the Manual of Standards and the designer's operations manual.

173.280 Authorised designer to maintain reference materials

- (1) An authorised designer must maintain reference materials of the kinds specified in the Manual of Standards.
- (2) An authorised designer must keep the reference materials up-to-date and in a readily accessible form.
- (3) Each employee of the authorised designer whose duties include carrying on design work that is authorised under the designer's procedure design authorisation must have ready access to the reference materials.

173.285 Authorised designer to keep documents and records

- (1) An authorised designer must keep documents and records of the kinds specified in the Manual of Standards.
- (2) A document or record must be retained for as long as the Manual of Standards specifies for the particular kind of document or record.
- (3) The designer must, at CASA's request, make the documents and records, or copies of them or extracts from them, available for inspection by CASA.

173.290 Authorised designer to have document and record control system

- (1) An authorised designer must establish, and put into effect, a system for controlling documents and records relating to the activity authorised under the authorised designer's procedure design authorisation, including the policies and procedures for making, amending, preserving and disposing of those documents and records.
- (2) The system must be in accordance with the standards set out in the Manual of Standards.
- (3) The documents and records must include the documents and records required to be kept under this Division.

Division 173.C.3—Miscellaneous

173.295 Discontinuing design work on terminal instrument flight of a particular type

- (1) If an authorised designer ceases to carry on design work on terminal instrument flight procedures of a particular type, the authorised designer must give written notice to CASA to that effect within 7 days after ceasing to carry on the design work concerned.
- (2) Subregulation (1) does not apply if, having regard to the authorised designer's circumstances, it is not reasonably practicable for the designer to give CASA at least 7 days notice and the notice is given as soon as is reasonably practicable.

173.300 Discontinuing maintenance of terminal instrument flight procedures

- (1) If an authorised designer ceases to be responsible for the maintenance of a terminal instrument flight procedure, the authorised designer must give written notice to CASA to that effect within 7 days after ceasing to have that responsibility.
- (2) Subregulation (1) does not apply if, having regard to the authorised designer's circumstances, it is not reasonably practicable for the designer to give CASA at least 7 days notice and the notice is given as soon as is reasonably practicable.

173.305 Transfer of maintenance responsibility

- (1) An authorised designer may transfer the designer's responsibility for maintaining a terminal instrument flight procedure under regulation 173.270:
 - (a) to a certified designer whose procedure design certificate authorises that designer to design terminal instrument flight procedures of the same type as the procedure concerned; or
 - (b) to another authorised designer whose procedure design authorisation authorises that designer to design such a terminal instrument flight procedure.
- (2) If a certified designer or an authorised designer accepts responsibility for the maintenance of a terminal instrument flight procedure under this regulation, the designer:
 - (a) must give written notice to the transferor to that effect; and
 - (b) must give written notice of the transfer to CASA within 14 days after the transfer.
- (3) A transfer takes effect on the day when the certified designer or authorised designer accepting responsibility for maintaining the procedure gives notice to the transferor under subregulation (2) or, if a later day is specified in the notice, on the later day.

Regulation 173.305

- (4) If an authorised designer transfers the designer's responsibility for maintaining a terminal instrument flight procedure, the designer must give written notice of the transfer to CASA within 14 days after the transfer.

Regulation 173.310

Subpart 173.D—Performance of design work

173.310 Certified designer not to exceed the limitations of the designer's procedure design certificate

A certified designer must not carry on design work on a terminal instrument flight procedure that is not of a type covered by the designer's procedure design certificate.

173.315 Authorised designer not to exceed the limitations of authorisation

A authorised designer must not carry on an activity mentioned in paragraph 173.030(b)(i) or (ii) unless that activity is authorised by the designer's procedure design authorisation.

Subpart 173.E—Administration

Division 173.E.1—Grant of procedure design certificates and procedure design authorisations

Note: In addition to the provisions of this Division, Part 11 contains provisions relating to the grant of a procedure design certificate or procedure design authorisation.

173.330 CASA may require demonstrations of equipment etc

Regulation 11.045 applies in relation to a procedure design certificate or procedure design authorisation.

173.335 Grant of procedure design certificate or procedure design authorisation

Subject to regulation 11.055, if an applicant has applied for the grant of a procedure design certificate or procedure design authorisation under this Part, CASA must grant the certificate or authorisation.

Note: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to issue or grant, or cancelling, suspending or varying, a certificate or authorisation; or
- (b) a decision imposing a condition on a certificate or authorisation.

See also section 31 of the Act.

173.345 CASA may grant certificate or authorisation subject to conditions

- (2) Without limiting regulation 11.056, CASA may grant a procedure design certificate or procedure design authorisation subject to a condition requiring its holder to permit an authorised inspector (within the meaning given by Division 173.E.5) to exercise the powers of an authorised inspector under that Division in relation to the certificate or authorisation.
- (3) However, such a condition is not taken to require the holder to permit the exercise of those powers:
 - (a) unless the inspector first shows his or her identity card to the holder, or another person on behalf of the holder, if asked to do so by the holder or other person; or
 - (b) at a time other than during normal business hours.
- (4) Such a condition is not taken to authorise the inspector to use force to any extent in exercising those powers.

173.350 When decision must be made

- (1) If CASA does not make a decision about an application under this Part within 6 months after receiving it, CASA is taken to have refused the application.

Part 173 Instrument flight procedure design

Subpart 173.E Administration

Division 173.E.1 Grant of procedure design certificates and procedure design authorisations

Regulation 173.350

- (2) However, if CASA makes a request under regulation 11.035, 11.040 or 11.045, the time between when CASA makes the request, and when the applicant conducts the demonstration, attends the interview, or gives CASA the information or copy requested, does not count towards the period.
- (2A) Also, if CASA asks an applicant to make a statutory declaration under regulation 11.047 or subregulation 11.050(3A), the time between when CASA asks the applicant to do so and when the applicant gives CASA the statutory declaration does not count towards the period.
- (3) Also, if CASA invites an applicant to make a written submission under subregulation 11.050(2), the time between when CASA gives the invitation and when the applicant makes the submission does not count towards the period.
- (4) In this regulation:

application includes an application to vary a procedure design certificate or procedure design authorisation.

Division 173.E.3—Directions to amend certified designer's or authorised designer's operations manual

173.375 CASA may direct amendments to designer's operations manual

- (1) If necessary in the interests of the safety of air navigation, CASA may, in writing, direct a certified designer or an authorised designer, within a reasonable period specified in the direction, to amend the designer's operations manual by:
 - (a) including in the manual the information or other things set out or described in the direction; or
 - (b) altering the information or other things in the manual in the manner set out in the direction.
- (2) CASA may extend the period by written notice, before or after the end of the period referred to in subregulation (1).

Division 173.E.4—Suspension and cancellation of procedure design certificates and procedure design authorisations

173.380 Suspension or cancellation of procedure design certificate or procedure design authorisation by CASA

- (1) CASA may, by written notice given to a certified designer or authorised designer, suspend or cancel the designer's procedure design certificate or procedure design authorisation if there are reasonable grounds for believing that the designer:
 - (a) has breached a condition of the certificate or authorisation; or
 - (b) has contravened a provision of this Part; or
 - (c) does not meet, or continue to meet, a requirement of this Part for getting or holding the certificate or authorisation; or
 - (d) has otherwise been guilty of conduct that renders the designer's continued holding of the certificate or authorisation likely to have an adverse effect on the safety of air navigation.

- (2) Before suspending or cancelling a certified designer's procedure design certificate or an authorised designer's procedure design authorisation, CASA:
 - (a) must give written notice to the designer of the facts or circumstances that, in the opinion of CASA, amount to grounds for the suspension or cancellation of the certificate; and
 - (b) must invite the designer to show cause in writing, within 30 days after the date of the notice, why the certificate or authorisation should not be suspended or cancelled; and
 - (c) must take into account any written representations made, within the time allowed under paragraph (b), by or on behalf of the designer explaining why the certificate should not be cancelled.

Note: Most decisions in relation to certificates and authorisations are reviewable by the Administrative Appeals Tribunal. See section 31 of the Act and regulation 201.4.

Division 173.E.5—Authorised inspectors

173.390 CASA may appoint authorised inspectors

- (1) The Director may, in writing, appoint an officer of CASA as an authorised inspector.
- (2) The instrument of appointment may:
 - (a) describe the premises and activities in relation to which the inspector may use his or her powers under regulation 173.400; and
 - (b) specify the duration of the appointment; and
 - (c) specify that the appointment is subject to 1 or more conditions.

173.395 Identity card

- (1) CASA must issue each authorised inspector with an identity card that includes a recent photograph of the inspector.
- (2) No more than 7 days after ceasing to be an authorised inspector, a person must return his or her identity card to CASA.

Penalty: 1 penalty unit.

- (3) An offence against subregulation (2) is an offence of strict liability.

173.400 Powers of authorised inspector

- (1) The powers that an authorised inspector may exercise are the powers to do any or all of the following:
 - (a) enter and inspect premises connected with, or used for the purposes of, design work that is carried on by, or for, a certified designer or authorised designer or where any documents or records relating to that work are kept;
 - (b) observe the practices and procedures of the certified designer or authorised designer (including the designer's employees) in carrying on design work under the designer's procedure design certificate or procedure design authorisation;
 - (c) inspect the designer's facilities used for, or in relation to, that work;
 - (d) inspect and test any systems and equipment used for, or in relation to, that work;
 - (e) inspect any documents or records maintained, or required to be kept under this Part, by the designer in relation to that work;
 - (f) make a copy of any document or record that the authorised inspector inspects.
- (2) However, an authorised inspector may exercise his or her powers only:
 - (a) at premises connected with, or used for the purposes of, design work that is carried on by, or for, a certified designer or authorised designer or where any documents or records relating to that work are kept; and

Part 173 Instrument flight procedure design

Subpart 173.E Administration

Division 173.E.5 Authorised inspectors

Regulation 173.400

- (b) with the permission of the certified designer or authorised designer; and
 - (c) if the designer, or a person on behalf of the designer, so requests—after the designer or person has been shown the inspector’s identity card; and
 - (d) during normal business hours; and
 - (e) to ensure that design work is being carried on in accordance with these Regulations.
- (3) The cost of any copying carried out for the purposes of paragraph (1)(f) must be met by CASA.

Part 175—Aeronautical information management

Table of contents

Subpart 175.A—Aeronautical information management—general

- 175.005 What Part 175 is about
- 175.010 Application of Part 175
- 175.015 Definitions for Part 175
- 175.020 References in Part 175 to Annexes 3, 4 and 15
- 175.025 Issue of Manual of Standards for Part 175

Subpart 175.B—Aeronautical information management—AIS providers

Division 175.B.1—AIS providers—general

- 175.030 Definitions for Subpart 175.B
- 175.035 Provision of AIS—requirement for certificate

Division 175.B.2—AIS provider certificates

- 175.040 AIS provider certificates—who may apply
- 175.045 AIS provider certificates—requirements for application
- 175.050 AIS provider certificates—CASA may ask for demonstration of service, facility or equipment
- 175.055 AIS provider certificates—issue of certificate
- 175.060 AIS provider certificates—approval of exposition
- 175.065 AIS provider certificates—conditions
- 175.067 AIS provider certificates—cancellation of certificate if cooperation or arrangement ceases

Division 175.B.3—AIS providers—changes

- 175.070 AIS providers—changes to services—matters included in certificate
- 175.075 AIS providers—other changes
- 175.080 AIS providers—CASA directions relating to exposition
- 175.085 AIS providers—notifying CASA of changes in circumstances

Division 175.B.4—AIS providers—requirements for provision of AIS

- 175.090 AIS providers—provision of AIS must comply with laws
 - 175.095 AIS providers—compliance with exposition
 - 175.100 AIS providers—provision of AIS must comply with standards
 - 175.105 AIS providers—standards for development and publication of Integrated Aeronautical Information Package and aeronautical charts
 - 175.110 AIS providers—standards for aeronautical data processing system
 - 175.115 AIS providers—contravention of exposition or standards
 - 175.120 AIS providers—NOTAM service
 - 175.125 AIS providers—briefing service
 - 175.130 AIS providers—post-flight information service
 - 175.135 AIS providers—CASA directions about NOTAMS for a location
 - 175.140 AIS providers—aerodromes not covered by Part 139—removal of references in AIP
-

175.145 AIS providers—publication of aeronautical charts relating to areas etc. outside authority

Division 175.B.5—AIS providers—requirements about aeronautical data and aeronautical information

175.150 AIS providers—CASA directions relating to aeronautical data or aeronautical information

175.155 AIS providers—integrity of aeronautical data and aeronautical information

175.160 AIS providers—giving data product specifications to aeronautical data originators

175.165 AIS providers—revoking data product specifications

175.170 AIS providers—compliance with data product specification

175.175 AIS providers—correction and notification of errors and omissions in aeronautical data and aeronautical information

175.180 AIS providers—storage and security of aeronautical data and aeronautical information

175.185 AIS providers—timing of effective dates and distribution of certain documents and information

175.190 AIS providers—licence agreements with data service providers for supply of data sets

175.195 AIS providers—compliance with licence agreement

Division 175.B.6—AIS providers—organisational requirements

175.200 AIS providers—exposition

175.205 AIS providers—organisational structure

175.210 AIS providers—personnel—general

175.215 AIS providers—personnel—accountable manager

175.220 AIS providers—personnel—training and checking system for operational personnel

175.225 AIS providers—safety management system

175.230 AIS providers—quality management system

175.235 AIS providers—facilities, equipment, data and information

175.240 AIS providers—contingency plan

175.245 AIS providers—reference materials

175.250 AIS providers—annual review by accountable manager

175.255 AIS providers—records

175.260 AIS providers—retention period for aeronautical data, aeronautical information and records

Subpart 175.C—Aeronautical information management—data service providers

Division 175.C.1—Data service providers—general

175.265 Definitions for Subpart 175.C

175.270 Conduct of data service activity—requirement for certificate

175.275 CASA to publish list of data service providers

Division 175.C.2—Data service provider certificates

175.280 Data service provider certificates—who may apply

175.285 Data service provider certificates—requirements for application

175.290 Data service provider certificates—CASA may ask for demonstration of service, facility or equipment

175.295 Data service provider certificates—issue of certificate

175.300 Data service provider certificates—approval of exposition

175.305 Data service provider certificates—conditions

Division 175.C.3—Data service providers—changes

- 175.310 Data service providers—changes to authorised data service activities—matters included in certificate
- 175.315 Data service providers—other changes
- 175.320 Data service providers—CASA directions relating to exposition
- 175.325 Data service providers—notifying CASA of changes in circumstances
- 175.330 Data service providers—notifying CASA of intention to cease activities

Division 175.C.4—Data service providers—requirements for provision of data service

- 175.335 Data service providers—standards for data service provision
- 175.340 Data service providers—compliance with exposition
- 175.345 Data service providers—standards for aeronautical data processing system

Division 175.C.5—Data service providers—requirements about aeronautical data and aeronautical information

- 175.350 Data service providers—CASA directions to amend aeronautical data or aeronautical information
- 175.355 Data service providers—integrity of aeronautical data and aeronautical information
- 175.360 Data service providers—correction and notification of errors and omissions in aeronautical data and aeronautical information
- 175.365 Data service providers—storage and security of aeronautical data and aeronautical information
- 175.370 Data service providers—effective dates and validity of aeronautical data, information and charts
- 175.375 Data service providers—compliance with licence agreement with AIS providers

Division 175.C.6—Data service providers—organisational requirements

- 175.380 Data service providers—exposition
- 175.385 Data service providers—organisational structure
- 175.390 Data service providers—personnel—general
- 175.395 Data service providers—personnel—accountable manager
- 175.400 Data service providers—personnel—training and checking system for operational personnel
- 175.405 Data service providers—safety management system
- 175.410 Data service providers—quality management system
- 175.415 Data service providers—facilities, equipment, data and information
- 175.420 Data service providers—contingency plan
- 175.425 Data service providers—reference materials
- 175.430 Data service providers—annual review by accountable manager
- 175.435 Data service providers—records
- 175.440 Data service providers—retention period for aeronautical data, aeronautical information and records

Subpart 175.D—Aeronautical information management—aeronautical data originators**Division 175.D.1—Aeronautical data originators—general**

- 175.445 Aeronautical data originators—AIP responsible person and NOTAM authorised persons
- 175.450 Aeronautical data originators—telling AIS provider of AIP responsible person and NOTAM authorised persons
- 175.455 Aeronautical data originators—requirement to provide updated aeronautical data or aeronautical information published other than in NOTAMS

- 175.460 Aeronautical data originators—requirements in relation to providing aeronautical data or aeronautical information published other than in NOTAMS
- 175.465 Aeronautical data originators—annual review of aeronautical data and aeronautical information
- 175.470 Aeronautical data originators—requirements in relation to requests for issue of NOTAMS

Division 175.D.2—Aeronautical data originators—Geoscience Australia

- 175.475 Aeronautical data originators—responsibilities of Geoscience Australia

Subpart 175.E—Aeronautical information management—objects and structures that affect aviation safety

- 175.480 Objects and structures that affect aviation safety—application of Subpart 175.E
- 175.485 Objects and structures that affect aviation safety—requests for data by AA
- 175.490 Objects and structures that affect aviation safety—requests for data from owners etc.
- 175.495 Objects and structures that affect aviation safety—requests for data from aerodrome operators
- 175.500 Objects and structures that affect aviation safety—requests for data from government authorities

Subpart 175.A—Aeronautical information management— general

175.005 What Part 175 is about

- (1) This Part establishes standards and requirements for the quality and integrity of data and information used in air navigation.
- (2) Subpart 175.B establishes standards and requirements for AIS providers—persons responsible for the publication of aeronautical data and aeronautical information in the Integrated Aeronautical Information Package and on aeronautical charts.
- (3) Subpart 175.C establishes standards and requirements for data service providers—persons authorised to publish aeronautical data, aeronautical information or aeronautical charts, or to supply aeronautical data, that pilots may use as an alternative to the Integrated Aeronautical Information Package and aeronautical charts published by AIS providers.
- (4) Subpart 175.D sets out requirements for aeronautical data originators—persons responsible for providing aeronautical data and aeronautical information to AIS providers for publication in the Integrated Aeronautical Information Package and on aeronautical charts.
- (5) Subpart 175.E contains powers that can be used to gather data about objects and structures that affect aviation safety.

Note: The data gathered under Subpart 175.E will be used in air navigation applications, including the following:

- (a) the design of terminal instrument flight procedures;
- (b) the calculation of lowest safe altitudes;
- (c) aircraft operating limitations analysis;
- (d) minimum safe altitude warning systems;
- (e) the publication of visual navigation charts.

175.010 Application of Part 175

This Part does not apply to the following:

- (a) a person who is providing an AIS in the course of his or her duties for the Defence Force;
- (b) an AIS provided by the Defence Force.

175.015 Definitions for Part 175

In this Part:

corporation has the meaning given by regulation 11.015.

officer, of a corporation, means:

Regulation 175.020

- (a) for a corporation that is a company (within the meaning of the *Corporations Act 2001*)—a director, secretary or executive officer of the corporation; or
- (b) for a corporation of any other kind—a person exercising responsibility, in relation to the corporation, as nearly as possible the same as that of a director, secretary or executive officer of a company (within the meaning of the *Corporations Act 2001*).

175.020 References in Part 175 to Annexes 3, 4 and 15

In this Part, a reference to Annex 3, 4 or 15 to the Chicago Convention is a reference to the Annex subject to the differences mentioned in Gen 1.7 of Part 1 of the AIP.

175.025 Issue of Manual of Standards for Part 175

- (1) For subsection 98(5A) of the Act, CASA may issue a Manual of Standards for this Part prescribing matters:
 - (a) required or permitted by this Part to be prescribed by the Manual of Standards; or
 - (b) necessary or convenient to be prescribed for carrying out or giving effect to this Part.
- (2) CASA must give a copy of a notice mentioned in subregulation 11.275(3) or regulation 11.280, about a Manual of Standards for this Part, to each AIS provider and data service provider.

Subpart 175.B—Aeronautical information management— AIS providers

Division 175.B.1—AIS providers—general

175.030 Definitions for Subpart 175.B

In this Subpart:

accountable manager, for an AIS provider, means the individual, appointed by the provider, who has the following responsibilities:

- (a) responsibility for ensuring that the provider's AIS is provided in accordance with the provider's exposition and this Subpart;
- (b) responsibility for ensuring that the provider is able to finance, and has adequate resources to provide, its AIS in accordance with the provider's exposition and this Subpart;
- (c) responsibility for the provider's safety management system required by regulation 175.225 and its implementation.

exposition, for an AIS provider, means:

- (a) the documents approved by CASA under regulation 175.060 in relation to the provider; or
- (b) if the documents are changed under regulation 175.070, 175.075 or 175.080—the documents as changed.

175.035 Provision of AIS—requirement for certificate

- (1) A person commits an offence if:
 - (a) the person provides an AIS; and
 - (b) the person does not hold a certificate under regulation 175.055 that authorises the person to provide the AIS.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

Division 175.B.2—AIS provider certificates

175.040 AIS provider certificates—who may apply

- (1) A person mentioned in subregulation (2) may apply to CASA, in writing, for a certificate authorising the person to provide an AIS.
- (2) For subregulation (1), the persons are the following:
 - (a) the Commonwealth;
 - (b) AA;
 - (c) a person who proposes to provide the AIS:
 - (i) in cooperation with AA, in accordance with paragraph 11(3)(b) of the *Air Services Act 1995*;
 - (ii) by arrangement with AA, in accordance with paragraph 11(3)(c) of the *Air Services Act 1995*.
- (3) However, an application cannot be made:
 - (a) by 2 or more persons jointly; or
 - (b) on behalf of a partnership.

175.045 AIS provider certificates—requirements for application

- (1) An application under regulation 175.040 must include the following:
 - (a) the applicant's name (including any operating or trading name), contact details and ABN (if any);
 - (b) if the address of the applicant's operational headquarters is different from its mailing address—the address of its operational headquarters;
 - (c) if the applicant is a corporation—the name of each of the officers of the corporation;
 - (d) if the applicant is a corporation registered in Australia that has an ACN—its ACN and the address of its registered office;
 - (e) if the applicant is a corporation not registered in Australia—the place it was incorporated or formed;
 - (f) the services that the applicant proposes to provide as part of the AIS;
 - (g) the following information about each service:
 - (i) the location from which the service is proposed to be provided;
 - (ii) the area of Australian territory, and the aerodromes, airspace and ATS routes, that the service is proposed to cover;
 - (iii) the hours during which the service is proposed to be available;
 - (h) a written undertaking from the person appointed, or proposed to be appointed, as the applicant's accountable manager that, if CASA issues the certificate, the applicant will:
 - (i) be capable of operating in accordance with its exposition and this Subpart; and
 - (ii) operate in accordance with its exposition and this Subpart.

- (2) The application must be accompanied by a copy of the applicant's proposed exposition.

175.050 AIS provider certificates—CASA may ask for demonstration of service, facility or equipment

Regulation 11.045 applies in relation to a certificate under regulation 175.055.

175.055 AIS provider certificates—issue of certificate

- (1) Subject to regulation 11.055, CASA must issue a certificate to an applicant if satisfied that:
- (a) the applicant's proposed exposition complies with regulation 175.200; and
 - (b) the individual named in the applicant's exposition as the applicant's accountable manager:
 - (i) has the authority to carry out the responsibilities of the position; and
 - (ii) has an understanding of this Part and the applicant's exposition; and
 - (c) the applicant is able and willing to conduct the AIS safely and in accordance with its exposition and this Subpart; and
 - (d) if the applicant proposes to provide the AIS in cooperation or by arrangement with another person—the AIS will be provided in accordance with any agreement relating to the cooperation or arrangement.
- (2) If CASA decides to issue the certificate, CASA must determine:
- (a) the services that the applicant is authorised to provide as part of the AIS; and
 - (b) the following about each service:
 - (i) the location from which the service is to be provided;
 - (ii) the area of Australian territory, and the aerodromes, airspace and ATS routes, that the service is to cover;
 - (iii) the hours during which the service is to be available.
- (3) The certificate must include the following:
- (a) the applicant's name and operational headquarters;
 - (b) the matters mentioned in subregulation (2);
 - (c) a certificate reference number determined by CASA.
- (4) CASA must issue a new certificate to an AIS provider if CASA:
- (a) approves a change under subregulation 175.070(4); or
 - (b) directs a change under regulation 175.080 that causes the certificate to contain anything that is not, or is no longer, correct.

175.060 AIS provider certificates—approval of exposition

If CASA issues the certificate to the applicant, CASA is taken to have also approved the applicant's proposed exposition.

Regulation 175.065

175.065 AIS provider certificates—conditions

- (1) It is a condition of a certificate issued to an AIS provider that the provider must comply with:
 - (a) this Subpart; and
 - (b) any direction given to the provider, or obligation imposed on the provider, by CASA under a provision of these Regulations.
- (2) An AIS provider commits an offence if the provider contravenes the condition mentioned in subregulation (1).

Penalty: 50 penalty units.
- (3) An offence against this regulation is an offence of strict liability.

175.067 AIS provider certificates—cancellation of certificate if cooperation or arrangement ceases

- (1) CASA must cancel a certificate under regulation 175.055 held by a person mentioned in subparagraph 175.040(2)(c)(i) if the cooperation mentioned in that subparagraph ceases.
- (2) CASA must cancel a certificate under regulation 175.055 held by a person mentioned in subparagraph 175.040(2)(c)(ii) if the arrangement mentioned in that subparagraph ceases.

Division 175.B.3—AIS providers—changes

175.070 AIS providers—changes to services—matters included in certificate

- (1) An AIS provider must not make a change to the services that it provides as part of its AIS unless the change has been approved by CASA.
- (2) An AIS provider must not make a change to any of the following about a service that it provides as part of its AIS unless the change has been approved by CASA:
 - (a) the location from which the service is provided;
 - (b) the area of Australian territory, and the aerodromes, airspace and ATS routes, that the service covers;
 - (c) the hours during which the service is available.
- (3) An application for approval of a change must:
 - (a) be in writing; and
 - (b) set out the change; and
 - (c) be accompanied by a copy of the part of the provider's exposition affected by the change, clearly identifying the change.
- (4) Subject to regulation 11.055, CASA must approve a change for an AIS provider if satisfied that the requirements mentioned in regulation 175.055 will continue to be met.
- (5) If CASA approves the change, CASA is taken to have also approved the changes to the provider's exposition covered by the application.

175.075 AIS providers—other changes

An AIS provider must not make a change other than a change mentioned in regulation 175.070 unless the AIS provider has:

- (a) amended its exposition to reflect the change; and
- (b) given CASA written notice of the change and a copy of the amended part of the exposition clearly identifying the change.

175.080 AIS providers—CASA directions relating to exposition

- (1) If satisfied that it is necessary in the interests of aviation safety, CASA may, by written notice given to an AIS provider, direct the provider to change its exposition.
- (2) A notice under this regulation must state the time within which the direction must be complied with.

Part 175 Aeronautical information management

Subpart 175.B Aeronautical information management—AIS providers

Division 175.B.3 AIS providers—changes

Regulation 175.085

175.085 AIS providers—notifying CASA of changes in circumstances

An AIS provider must give CASA written notice of any change of circumstance which significantly affects its ability to provide its AIS within 7 days after the change occurs.

Division 175.B.4—AIS providers—requirements for provision of AIS

175.090 AIS providers—provision of AIS must comply with laws

- (1) The requirements of this Subpart are in addition to requirements that apply to an AIS provider under the following:
 - (a) the civil aviation legislation, other than this Subpart;
 - (b) the *Airspace Act 2007*;
 - (c) the *Airspace Regulations 2007*.
- (2) However, if it is not possible for an AIS provider to comply with both a requirement under legislation mentioned in subregulation (1) and a requirement under this Subpart in relation to a particular matter, the provider is required to comply only with the requirement under the legislation mentioned in subregulation (1) in relation to the matter.
- (3) If a circumstance mentioned in subregulation (2) arises, the AIS provider must, as soon as practicable after the circumstance arises, give CASA written notice of the circumstance.

175.095 AIS providers—compliance with exposition

An AIS provider must comply with its exposition.

175.100 AIS providers—provision of AIS must comply with standards

- (1) An AIS provider must provide a service that it provides as part of its AIS in accordance with the standards mentioned in the following that apply to the service:
 - (a) the Part 175 Manual of Standards;
 - (b) Annexes 4 and 15 to the Chicago Convention;
 - (c) if PANS-AIM is in force—that document;
 - (d) ICAO Documents 8126 and 8697;
 - (e) the other AIS applicable ICAO documents;
 - (f) the aeronautical data processing standards.
- (2) However, if 2 standards mentioned in different documents mentioned in subregulation (1) apply in relation to a particular matter, and it is not possible for the provider to comply with both standards in relation to the matter, then the provider is required to comply only with the standard mentioned in the document that is first mentioned in subregulation (1) in relation to the matter.
- (3) If a circumstance mentioned in subregulation (2) arises, the provider must, as soon as practicable after the circumstance arises, give CASA written notice of the circumstance.

Regulation 175.105

175.105 AIS providers—standards for development and publication of Integrated Aeronautical Information Package and aeronautical charts

- (1) An AIS provider must publish aeronautical data and aeronautical information as an Integrated Aeronautical Information Package or on aeronautical charts.
- (2) The data and information must be developed from data that complies with the standards for data accuracy and integrity mentioned in Annexes 11 and 14 to the Chicago Convention.
- (3) The format and quality of the data and information must be suitable for the intended end use of the data and information.
- (4) The data and information must be published in accordance with the standards mentioned in the following:
 - (a) the Part 175 Manual of Standards;
 - (b) Annexes 4 and 15 to the Chicago Convention;
 - (c) if PANS-AIM is in force—that document;
 - (d) ICAO Documents 8126 and 8697;
 - (e) the other AIS applicable ICAO documents.
- (5) However, if 2 standards mentioned in different documents mentioned in subregulation (4) apply in relation to a particular matter, and it is not possible for the provider to comply with both standards in relation to the matter, then the provider is required to comply only with the standard mentioned in the document that is first mentioned in subregulation (4) in relation to the matter.
- (6) If a circumstance mentioned in subregulation (5) arises, the provider must, as soon as practicable after the circumstance arises, give CASA written notice of the circumstance.
- (7) An aeronautical chart published by the provider must:
 - (a) be a chart of a type mentioned in Annex 4 to the Chicago Convention; and
 - (b) contain the aeronautical data and aeronautical information required for the function of a chart of that type as mentioned in Annex 4 to the Chicago Convention.

AIS provided in cooperation or arrangement with AA

- (8) If an AIS provider is providing its AIS in cooperation, or by arrangement, with AA, AA must ensure that subregulation (1) is complied with.

175.110 AIS providers—standards for aeronautical data processing system

- (1) An AIS provider must:
 - (a) have an automated system for the processing of aeronautical data and aeronautical information as part of providing its AIS; and
 - (b) update the data in the system as necessary; and

- (c) ensure that the system:
 - (i) allows the digital exchange and supply of aeronautical data and aeronautical information; and
 - (ii) can provide the data and information in a format suitable for its intended use; and
 - (d) ensure that the format and standards for the exchange and supply of aeronautical data and aeronautical information comply with the following:
 - (i) Annexes 4 and 15 to the Chicago Convention;
 - (ii) if PANS-AIM is in force—that document;
 - (iii) ICAO Documents 8126 and 8697;
 - (iv) the other AIS applicable ICAO documents; and
 - (e) ensure that aeronautical data and aeronautical information is exchanged and supplied as required by the following:
 - (i) Annexes 4 and 15 to the Chicago Convention;
 - (ii) if PANS-AIM is in force—that document;
 - (iii) ICAO Documents 8126 and 8697;
 - (iv) the other AIS applicable ICAO documents.
- (2) However, if 2 documents mentioned in paragraph (1)(d) apply in relation to a particular matter, and it is not possible for the provider to comply with both documents in relation to the matter, then the provider is required to comply only with the document that is first mentioned in paragraph (1)(d) in relation to the matter.
- (3) Also, if 2 documents mentioned in paragraph (1)(e) apply in relation to a particular matter, and it is not possible for the provider to comply with both documents in relation to the matter, then the provider is required to comply only with the document that is first mentioned in paragraph (1)(e) in relation to the matter.
- (4) If a circumstance mentioned in subregulation (2) or (3) arises, the provider must, as soon as practicable after the circumstance arises, give CASA written notice of the circumstance.

175.115 AIS providers—contravention of exposition or standards

- (1) An AIS provider may contravene regulation 175.095, 175.100, 175.105 or 175.110 if the contravention is necessary in the interests of aviation safety.
- (2) The provider must, as soon as practicable after the contravention occurs, give CASA written notice of the contravention, including an estimate of how long the contravention will last.

175.120 AIS providers—NOTAM service

If an AIS provider provides a NOTAM service, the provider must ensure that the service:

- (a) operates 24 hours a day, every day of the year; and

Regulation 175.125

- (b) issues a NOTAM in the following circumstances:
 - (i) the circumstances mentioned in Annex 15 to the Chicago Convention;
 - (ii) when required by Australian law;
 - (iii) when it is necessary in the interests of aviation safety; and
- (c) has agreements with international NOTAM offices for the exchange of NOTAMS; and
- (d) is connected to the aeronautical fixed service.

175.125 AIS providers—briefing service

If an AIS provider provides a briefing service, the provider must ensure that the service:

- (a) is an automated pre-flight information service; and
- (b) operates 24 hours a day, every day of the year; and
- (c) allows self-briefing by flight crew members and other operational personnel; and
- (d) is capable of providing flight crew members and other operational personnel with:
 - (i) aeronautical data and aeronautical information to enable pre-flight planning of flights; and
 - (ii) pre-flight information bulletins, within the meaning of Annex 15 to the Chicago Convention; and
 - (iii) NOTAMS that are relevant to a proposed flight; and
 - (iv) meteorological information that is relevant to a proposed flight; and
- (e) allows flight crew members or other operational personnel to enter a flight plan; and
- (f) provides information that assists in the provision of a flight information service.

175.130 AIS providers—post-flight information service

If an AIS provider provides a post-flight information service, the provider must ensure that the service:

- (a) is capable of receiving reports by flight crew members on:
 - (i) the state and operation of air navigation facilities and services; and
 - (ii) the presence of birds and other wildlife that may affect aircraft operations; and
- (b) disseminates the information received in a format and timeframe appropriate to the operational significance of the information.

175.135 AIS providers—CASA directions about NOTAMS for a location

- (1) CASA may, by written notice given to an AIS provider, direct the provider to do the following:
 - (a) allow NOTAMS to be published that relate only to a particular location;
 - (b) publish NOTAMS:

- (i) that relate only to the location; and
 - (ii) that contain details stated in the notice.
- (2) A notice under this regulation must state the time within which the direction must be complied with.

175.140 AIS providers— aerodromes not covered by Part 139—removal of references in AIP

- (1) This regulation applies if an AIS provider becomes aware of an aeronautical data originator:
- (a) who is responsible for aeronautical data or aeronautical information about an aerodrome that is not a certified aerodrome; and
 - (b) who has not complied with Subpart 175.D in relation to the aerodrome.
- (2) The provider must remove any references to the aerodrome that the provider has published in the AIP from the AIP when the AIP is next amended.

Note: The aeronautical data or aeronautical information for which the aeronautical data originator is responsible must be specified in a data product specification: see paragraph 175.160(4)(a).

175.145 AIS providers—publication of aeronautical charts relating to areas etc. outside authority

- (1) This regulation applies if an AIS provider publishes an aeronautical chart that includes aeronautical data or aeronautical information that relates to an area, aerodrome, airspace or ATS route not covered by the provider's certificate.
- (2) This Subpart, other than this regulation, does not apply to the publication of the data or information if the data or information accurately reflects data or information that is published:
- (a) by another AIS provider under this Subpart; or
 - (b) by an AIS of a foreign country.

Regulation 175.150

Division 175.B.5—AIS providers—requirements about aeronautical data and aeronautical information

175.150 AIS providers—CASA directions relating to aeronautical data or aeronautical information

- (1) This regulation applies in relation to aeronautical data or aeronautical information that an AIS provider publishes:
 - (a) in the Integrated Aeronautical Information Package; or
 - (b) on an aeronautical chart.
- (2) If satisfied that it is necessary in the interests of aviation safety, CASA may, by written notice given to the provider, direct the AIS provider to do the following:
 - (a) add to, amend, or remove the data or information;
 - (b) give CASA stated information or records relating to any change to the data or information.
- (3) A notice under this regulation must state the time within which the direction must be complied with.

175.155 AIS providers—integrity of aeronautical data and aeronautical information

- (1) This regulation applies in relation to aeronautical data or aeronautical information that an AIS provider publishes:
 - (a) in the Integrated Aeronautical Information Package; or
 - (b) on an aeronautical chart.
- (2) The provider must ensure that the integrity of the data or information is maintained during the processing of the data and information by the provider.
- (3) The provider must ensure that the data or information:
 - (a) is obtained from entities responsible for the data or information; and
 - (b) is kept up-to-date; and
 - (c) is traceable to its origin.
- (4) The provider must verify that the data or information:
 - (a) has not been altered from the source data while it is in storage or transit or while it is being formatted; and
 - (b) has been checked for accuracy against the source data before publication; and
 - (c) has been published only during the period when the data or information is valid.
- (5) The provider must verify:
 - (a) that the data or information is complete; and

- (b) that all of the data or information needed to support the intended use of the data or information has been published.
- (6) If the data or information was provided to the provider, the provider must verify that the data or information was provided in a format that is suitable for use by the provider.
- (7) If the data or information is for inclusion in a NOTAM, the provider must verify that the data or information was provided to the provider by a NOTAM authorised person.

175.160 AIS providers—giving data product specifications to aeronautical data originators

- (1) An AIS provider must give a person a written data product specification that complies with subregulation (4) if the person is responsible for aeronautical data or aeronautical information that the provider has published, or will publish:
 - (a) in the Integrated Aeronautical Information Package; or
 - (b) on an aeronautical chart.
- (2) Subregulation (3) applies if the provider is also responsible for aeronautical data or aeronautical information that the provider has published, or will publish:
 - (a) in the Integrated Aeronautical Information Package; or
 - (b) on an aeronautical chart.
- (3) The provider must give a written data product specification that complies with subregulation (4) to the area of the provider's organisation responsible for the data or information.
- (4) For subregulations (1) and (3), the data product specification must include the following:
 - (a) the aeronautical data or aeronautical information for which the person or area is responsible;
 - (b) the standards for the accuracy and resolution of the data or information that the person or area will provide to the provider;
 - (c) the dates by which the data or information must be provided;
 - (d) the format for the data or information;
 - (e) the details of the authenticated electronic means for providing the data or information;
 - (f) the procedures for managing requests for alterations to the data or information;
 - (g) the procedures for giving notice of, and for rectifying, errors and omissions detected in the data or information;
 - (h) the procedures the provider will follow to verify that changes to the data or information have been approved by the person or area;
 - (i) the circumstances (if any) in which the person or area must ask the provider to issue a NOTAM.

Regulation 175.165

175.165 AIS providers—revoking data product specifications

An AIS provider must, in writing, revoke a data product specification given to a person, or an area of the provider's organisation, under regulation 175.160, if the person or part of the organisation is no longer responsible for the aeronautical data or aeronautical information mentioned in the data product specification.

175.170 AIS providers—compliance with data product specification

An AIS provider must comply with the procedures mentioned in a data product specification given by the provider under regulation 175.160.

175.175 AIS providers—correction and notification of errors and omissions in aeronautical data and aeronautical information

- (1) This regulation applies if an AIS provider becomes aware of an error or omission in aeronautical data or aeronautical information that the provider publishes:
 - (a) in the Integrated Aeronautical Information Package; or
 - (b) on an aeronautical chart.
- (2) The provider must, as soon as practicable after the provider becomes aware of the error or omission:
 - (a) record and investigate the error or omission; and
 - (b) ensure that the error or omission is corrected by the most appropriate means taking into account the operational significance of the error or omission; and
 - (c) ensure that notice of the corrected aeronautical data or aeronautical information is given to persons who had received the data or information; and
 - (d) identify the root cause of the error or omission; and
 - (e) establish and implement processes to eliminate the root cause of the error or omission.
- (3) The provider must give CASA written notice of any significant error or omission that may affect the safety of air navigation as soon as practicable after the provider becomes aware of the error or omission.

175.180 AIS providers—storage and security of aeronautical data and aeronautical information

An AIS provider must ensure that aeronautical data and aeronautical information necessary for the provision of its AIS:

- (a) is stored digitally; and
- (b) is kept secure to prevent unauthorised access or alteration.

175.185 AIS providers—timing of effective dates and distribution of certain documents and information

- (1) An AIS provider that publishes any of the following documents or information must ensure that the document or information becomes effective only on an AIRAC effective date:
 - (a) an AIP Amendment;
 - (b) an AIP Supplement;
 - (c) an aeronautical chart;
 - (d) information mentioned in Appendix 4 (Information to be notified by AIRAC) of Annex 15 to the Chicago Convention.
- (2) The provider must distribute the document or information so that a recipient receives the document or information at least 28 days before the document or information becomes effective.
- (3) However, if the document or information contains, or is, information mentioned in Part 3 of Appendix 4 (Information to be notified by AIRAC) of Annex 15 to the Chicago Convention, the provider must distribute the document or information so that a recipient receives the document or information at least 56 days before the document or information becomes effective.
- (4) The provider must ensure that a document or information that becomes effective in accordance with subregulation (1) and is distributed in accordance with subregulation (2) or (3) is identified by the acronym “AIRAC”.
- (5) However, the provider may contravene subregulation (1), (2) or (3) if the contravention is necessary in the interests of aviation safety.
- (6) If the provider contravenes subregulation (1), (2) or (3), the provider must give CASA written notice of the contravention as soon as practicable after the contravention occurs.

175.190 AIS providers—licence agreements with data service providers for supply of data sets

- (1) An AIS provider must enter into a licence agreement with each data service provider.
- (2) The licence agreement must cover any of the following that the data service provider requires for its authorised data service activities:
 - (a) aeronautical data and aeronautical information that the AIS provider publishes in the Integrated Aeronautical Information Package;
 - (b) aeronautical charts that the AIS provider publishes.
- (3) The licence agreement must:
 - (a) require the AIS provider to supply data sets containing the data, information or charts covered by the agreement to the data service provider; and

Part 175 Aeronautical information management

Subpart 175.B Aeronautical information management—AIS providers

Division 175.B.5 AIS providers—requirements about aeronautical data and aeronautical information

Regulation 175.195

- (b) allow the data service provider to use, format and publish the data, information or charts; and
 - (c) include a complete data product specification of the data sets; and
 - (d) detail when the data sets will be supplied to the data service provider; and
 - (e) detail the authenticated electronic means by which the data sets will be supplied to the data service provider; and
 - (f) describe the method of protection to be applied to the data sets to ensure that data is not corrupted during the transfer; and
 - (g) include the method by which requests, by either party, for alterations to the data, information or charts are to be managed; and
 - (h) describe how errors and omissions detected in the data, information or charts are to be notified and rectified.
- (4) The licence agreement may include charges for the supply of the data sets to the data service provider.

175.195 AIS providers—compliance with licence agreement

An AIS provider must comply with each licence agreement it has entered into under regulation 175.190.

Division 175.B.6—AIS providers—organisational requirements

175.200 AIS providers—exposition

- (1) The exposition of an AIS provider must contain the following:
 - (a) the provider's name (including any operating or trading name), contact details and ABN (if any);
 - (b) the location and address of:
 - (i) the provider's operational headquarters; and
 - (ii) each of the provider's operational facilities;
 - (c) the name of the provider's accountable manager;
 - (d) a description and diagram of the provider's organisational structure showing formal reporting lines;
 - (e) if the provider is a corporation—a description of the provider's corporate structure;
 - (f) for each operational position, including each operational supervisory position, within the organisational structure:
 - (i) a statement of the duties and responsibilities of the position; and
 - (ii) the recent experience requirements for the position (if any); and
 - (iii) the endorsements and qualifications required for the position (if any); and
 - (iv) the currency requirements (if any) for the endorsements or qualifications;
 - (g) a description of how the provider determines the number of operational personnel, including operational supervisory personnel, required to provide its AIS;
 - (h) a list of the services that the provider provides as part of its AIS;
 - (i) the following information about each service:
 - (i) the location from which the service is provided;
 - (ii) the area of Australian territory, and the aerodromes, airspace and ATS routes, that the service covers;
 - (iii) the hours during which the service is available;
 - (j) a description of the procedures that ensure that each service is provided in accordance with this Subpart;
 - (k) a description and an example of the format used for the publication of the Integrated Aeronautical Information Package and aeronautical charts published by the provider;
 - (l) a description of the format for the digital exchange or supply of aeronautical data;
 - (m) a description of the arrangements that ensure that the AIS provider receives, on a daily basis, the aeronautical data and aeronautical information necessary for providing its AIS;
 - (n) a description of the arrangements that ensure that the provider is able to continue to provide its AIS to persons who reasonably require the service;

Part 175 Aeronautical information management

Subpart 175.B Aeronautical information management—AIS providers

Division 175.B.6 AIS providers—organisational requirements

Regulation 175.200

- (o) a copy of each agreement (if any) entered into by the provider to provide its AIS in cooperation or by arrangement with another person;
- (p) a copy of:
 - (i) each data product specification given by the provider under regulation 175.160; and
 - (ii) each licence agreement entered into by the provider under regulation 175.190;
- (q) a copy of any data product specification the provider has in relation to any aeronautical data it supplies or receives as part of its AIS;
- (r) a copy of the provider's data, personnel and physical security program;
- (s) a description of the processes and documents used to present to personnel the relevant standards, rules and procedures mentioned in the following:
 - (i) the Part 175 Manual of Standards;
 - (ii) Annexes 4 and 15 to the Chicago Convention;
 - (iii) if PANS-AIM is in force—that document;
 - (iv) ICAO Documents 8126 and 8697;
 - (v) the other AIS applicable ICAO documents;
 - (vi) the aeronautical data processing standards;
 - (vii) the provider's instructions for the provision of its AIS (if any) that relate to particular operational facilities;
- (t) details of any recommended practices mentioned in the following documents that the provider does not follow:
 - (i) Annexes 4 and 15 to the Chicago Convention;
 - (ii) if PANS-AIM is in force—that document;
 - (iii) ICAO Documents 8126 and 8697;
 - (iv) the other AIS applicable ICAO documents;
 - (v) the aeronautical data processing standards;
- (u) a copy of each document that contains operational instructions for personnel;
- (v) a description of the procedures that ensure all operational personnel are familiar with any operational changes that have occurred since they last performed operational duties;
- (w) a description of the provider's training and checking system, as required by regulation 175.220;
- (x) a description of the provider's safety management system, as required by regulation 175.225;
- (y) a description of the provider's quality management system, as required by regulation 175.230;
- (z) a copy of the provider's contingency plan, as required by regulation 175.240;
- (za) a description of the provider's record keeping procedures, as required by regulation 175.255;
- (zb) a description of the procedures used in commissioning new facilities, equipment and services;

- (zc) a description of the procedures that ensure that all equipment, including software, is operated in accordance with the manufacturer's operating instructions and manuals;
 - (zd) a description of the procedures for making changes.
- (2) The provider must:
- (a) keep the exposition in a readily accessible form; and
 - (b) ensure that operational personnel and CASA have ready access to the exposition; and
 - (c) keep the exposition up-to-date.

175.205 AIS providers—organisational structure

An AIS provider must have an appropriate organisation with a sound and effective management structure that enables the provider to provide its AIS in accordance with its exposition and this Subpart.

175.210 AIS providers—personnel—general

An AIS provider must have enough suitably competent, qualified and trained personnel to:

- (a) enable the provider to provide its AIS in accordance with its exposition and this Subpart; and
- (b) supervise the provision of each service it provides as part of its AIS.

175.215 AIS providers—personnel—accountable manager

An AIS provider must have an accountable manager.

175.220 AIS providers—personnel—training and checking system for operational personnel

- (1) An AIS provider must have a training and checking system that ensures that the provider's operational personnel maintain their competence and are provided with ongoing training appropriate to their duties.
- (2) Without limiting subregulation (1), the training and checking system must ensure that each person who is a member of the provider's operational personnel:
 - (a) is trained and proven to be proficient in the performance of the person's duties; and
 - (b) meets the recent experience requirements (if any) under the provider's exposition for the person's position; and
 - (c) holds each endorsement or qualification (if any) that is required under the provider's exposition for the person's position; and
 - (d) meets the currency requirements (if any) under the provider's exposition for the endorsements and qualifications.

Regulation 175.225

175.225 AIS providers—safety management system

- (1) An AIS provider must have a safety management system that:
 - (a) is a systemic approach to managing safety; and
 - (b) integrates human factors principles; and
 - (c) includes the matters mentioned in subregulation (2).
- (2) For paragraph (1)(c), the matters are the following:
 - (a) organisational structures, accountabilities, policies and procedures necessary to manage safety in a systemic way;
 - (b) a statement of the provider's safety policy, objectives and planning, including details of the following:
 - (i) the management commitment to, and responsibility for, safety;
 - (ii) the safety accountabilities of managers;
 - (iii) the appointment of safety management personnel;
 - (iv) how human factors principles are integrated into the safety management system;
 - (v) a safety management system implementation plan;
 - (vi) relevant third party relationships and interactions;
 - (vii) coordination of an emergency response plan;
 - (viii) safety management system documentation;
 - (c) a safety risk management process, including:
 - (i) hazard identification processes; and
 - (ii) risk assessment and mitigation processes;
 - (d) a safety assurance system, including details of processes for:
 - (i) safety performance monitoring and measurement; and
 - (ii) internal safety investigation; and
 - (iii) management of change; and
 - (iv) continuous improvement of the safety management system;
 - (e) a safety training and promotion system, including details of the following:
 - (i) safety management system training and education;
 - (ii) safety management system safety communication.

175.230 AIS providers—quality management system

An AIS provider must have a quality management system that:

- (a) is based on the elements of the latest edition of the ISO 9001 standard, as in force from time to time, that are relevant to the provision of AIS; and
- (b) includes quality management procedures that address the quality management requirements mentioned in the aeronautical data processing standards.

175.235 AIS providers—facilities, equipment, data and information

- (1) An AIS provider must have the facilities and equipment that are necessary for providing its AIS, including appropriate premises and equipment to allow operational personnel to perform their duties.
- (2) An AIS provider must provide its operational personnel with access to the aeronautical data and aeronautical information required for the publication of the Integrated Aeronautical Information Package, or the aeronautical charts, that the provider publishes.

175.240 AIS providers—contingency plan

- (1) An AIS provider must have a contingency plan that sets out the procedures to be followed if a service provided as part of its AIS is interrupted.
- (2) The contingency plan must include:
 - (a) the actions to be taken by personnel responsible for providing the service; and
 - (b) possible alternative arrangements for providing the service; and
 - (c) arrangements for resuming normal provision of the service.

175.245 AIS providers—reference materials

- (1) An AIS provider must have up-to-date copies of the following reference materials in a readily accessible form:
 - (a) the civil aviation legislation relevant to the provision of its AIS;
 - (b) Annexes 4, 11, 14 and 15 to the Chicago Convention;
 - (c) if PANS-AIM is in force—that document;
 - (d) ICAO Documents 8126 and 8697;
 - (e) the other AIS applicable ICAO documents;
 - (f) the aeronautical data processing standards;
 - (g) any instructions issued by the provider to its personnel in relation to the provision of its AIS;
 - (h) manuals for equipment used by personnel in the provision of its AIS.
- (2) The provider must ensure that operational personnel have ready access to the reference materials.

175.250 AIS providers—annual review by accountable manager

An AIS provider must ensure that its accountable manager:

- (a) conducts an annual review of the provider against the requirements of its exposition and this Subpart; and
- (b) addresses any deficiencies that are identified during the review; and
- (c) gives CASA a report of the annual review, including:
 - (i) any significant deficiencies identified since any previous annual review; and

Regulation 175.255

- (ii) how the deficiencies are to be addressed.

175.255 AIS providers—records

- (1) An AIS provider must have procedures for making, collecting, indexing, storing, securing, maintaining, accessing and disposing of the following:
- (a) records that identify all incoming and outgoing aeronautical data and aeronautical information;
 - (b) records that identify each person who is authorised by the provider to process, check, edit, publish or supply aeronautical data and aeronautical information;
 - (c) records that list the endorsements, qualifications and competencies of personnel who process, check, edit, publish or supply aeronautical data and aeronautical information;
 - (d) records that identify each AIP responsible person for an aeronautical data originator that provides aeronautical data or aeronautical information to the provider;
 - (e) records that identify each NOTAM authorised person for an aeronautical data originator that requests the provider to issue NOTAMS;
 - (f) records that identify each occurrence of an error or omission in aeronautical data or aeronautical information published by the provider in the Integrated Aeronautical Information Package or on an aeronautical chart;
 - (g) records that contain the results of any audit or review of the provider's AIS.
- (2) The provider must ensure that a record mentioned in subregulation (1) is legible and permanent.

175.260 AIS providers—retention period for aeronautical data, aeronautical information and records

Aeronautical data and information

- (1) Subregulation (2) applies if aeronautical data or aeronautical information necessary for the provision of an AIS provider's AIS:
- (a) has been published by the provider; and
 - (b) has become effective; and
 - (c) is not a Commonwealth record within the meaning of the *Archives Act 1983*.
- (2) The provider must keep the data or information for at least 7 years after the data or information ceases to be effective.

Records

- (3) Subregulation (4) applies if a record mentioned in subregulation 175.255(1) is not a Commonwealth record within the meaning of the *Archives Act 1983*.

- (4) The provider must keep the record:
- (a) if the record relates to aeronautical data or aeronautical information mentioned in subregulation (1)—for as long as the data or information is required to be kept; or
 - (b) otherwise—for at least 7 years after the record is made.

Subpart 175.C—Aeronautical information management— data service providers

Division 175.C.1—Data service providers—general

175.265 Definitions for Subpart 175.C

In this Subpart:

accountable manager, for a data service provider, means the individual, appointed by the provider, who has the following responsibilities:

- (a) responsibility for ensuring that the provider's authorised data service activities are conducted in accordance with its exposition and this Subpart;
- (b) responsibility for ensuring that the provider is able to finance, and has adequate resources to conduct, its authorised data service activities in accordance with its exposition and this Subpart;
- (c) responsibility for the provider's safety management system required by regulation 175.405 and its implementation.

exposition, for a data service provider, means:

- (a) the documents approved by CASA under regulation 175.300 in relation to the provider; or
- (b) if the documents are changed under regulation 175.310, 175.315 or 175.320—the documents as changed.

175.270 Conduct of data service activity—requirement for certificate

- (1) A person commits an offence if:
 - (a) the person conducts a data service activity; and
 - (b) the person does not hold a certificate under regulation 175.295 that authorises the person to conduct the activity.

Penalty: 50 penalty units.

- (2) Subregulation (1) does not apply to an AIS provider publishing aeronautical data, aeronautical information or an aeronautical chart in the course of providing an AIS.
- (3) Subregulation (1) does not apply to an aerodrome operator publishing one of the following charts, as mentioned in Annex 4 to the Chicago Convention:
 - (a) an Aerodrome Obstacle Chart—ICAO Type A;
 - (b) an Aerodrome Obstacle Chart—ICAO Type B;
 - (c) an Aerodrome Terrain and Obstacle Chart—ICAO (Electronic);
 - (d) a Precision Approach Terrain Chart—ICAO.
- (4) Subregulation (1) does not apply to a person who supplies navigation equipment or a navigation system containing aeronautical data in a database, if the database

has been supplied to the person by a third party for use in the equipment or system.

Note: A defendant bears an evidential burden in relation to the matters in subregulations (2), (3) and (4): see subsection 13.3(3) of the *Criminal Code*.

(5) An offence against this regulation is an offence of strict liability.

175.275 CASA to publish list of data service providers

- (1) CASA must publish a list of:
 - (a) data service providers; and
 - (b) the matters mentioned in subregulation 175.295(2) for each of the data service providers.
- (2) CASA must keep the list up-to-date.

Regulation 175.280

Division 175.C.2—Data service provider certificates

175.280 Data service provider certificates—who may apply

- (1) A person may apply to CASA, in writing, for a certificate authorising the person to conduct a data service activity.
- (2) However, an application cannot be made:
 - (a) by 2 or more persons jointly; or
 - (b) on behalf of a partnership.

175.285 Data service provider certificates—requirements for application

- (1) An application under regulation 175.280 must include the following:
 - (a) the applicant's name (including any operating or trading name), contact details and ABN (if any);
 - (b) if the address of the applicant's operational headquarters is different from its mailing address—the address of its operational headquarters;
 - (c) if the applicant is a corporation—the name of each of the officers of the corporation;
 - (d) if the applicant is a corporation registered in Australia that has an ACN—its ACN and the address of its registered office;
 - (e) if the applicant is a corporation not registered in Australia—the place it was incorporated or formed;
 - (f) a description of the data service activities the applicant proposes to conduct;
 - (g) the area of coverage of the aeronautical data, aeronautical information or aeronautical charts covered by the activities;
 - (h) a written undertaking from the person appointed, or proposed to be appointed, as the applicant's accountable manager that, if CASA issues the certificate, the applicant will:
 - (i) be capable of operating in accordance with its exposition and this Subpart; and
 - (ii) operate in accordance with its exposition and this Subpart.
- (2) The application must be accompanied by a copy of the applicant's proposed exposition.

175.290 Data service provider certificates—CASA may ask for demonstration of service, facility or equipment

Regulation 11.045 applies in relation to a certificate under regulation 175.295.

175.295 Data service provider certificates—issue of certificate

- (1) Subject to regulation 11.055, CASA must issue a certificate to an applicant if satisfied that:
-

Regulation 175.300

- (a) the applicant's proposed exposition complies with regulation 175.380; and
 - (b) the individual named in the applicant's exposition as the applicant's accountable manager:
 - (i) has the authority to carry out the responsibilities of the position; and
 - (ii) has an understanding of this Part and the applicant's exposition; and
 - (c) the applicant is able and willing to conduct the data service activities mentioned in the application safely and in accordance with its exposition and this Subpart.
- (2) If CASA decides to issue the certificate, CASA must determine:
- (a) the data service activities the applicant is authorised to conduct; and
 - (b) the area of coverage of the aeronautical data, aeronautical information or aeronautical charts covered by the activities.
- (3) The certificate must include the following:
- (a) the applicant's name and operational headquarters;
 - (b) the matters mentioned in subregulation (2);
 - (c) a certificate reference number determined by CASA.
- (4) CASA must issue a new certificate to a data service provider if CASA:
- (a) approves a change under subregulation 175.310(4); or
 - (b) directs a change under regulation 175.320 that causes the certificate to contain anything that is not, or is no longer, correct.

175.300 Data service provider certificates—approval of exposition

If CASA issues the certificate to the applicant, CASA is taken to have also approved the applicant's proposed exposition.

175.305 Data service provider certificates—conditions

- (1) It is a condition of a certificate issued to a data service provider that the provider must comply with:
- (a) this Subpart; and
 - (b) any direction given to the provider, or obligation imposed on the provider, by CASA under a provision of these Regulations.
- (2) A data service provider commits an offence if the provider contravenes the condition mentioned in subregulation (1).
- Penalty: 50 penalty units.
- (3) An offence against this regulation is an offence of strict liability.

Division 175.C.3—Data service providers—changes

175.310 Data service providers—changes to authorised data service activities—matters included in certificate

- (1) A data service provider commits an offence if:
 - (a) the provider makes a change to the provider’s authorised data service activities; and
 - (b) the change has not been approved by CASA.Penalty: 50 penalty units.
- (2) A data service provider commits an offence if:
 - (a) the provider makes a change to the area of coverage for aeronautical data, aeronautical information or an aeronautical chart covered by an authorised data service activity; and
 - (b) the change has not been approved by CASA.Penalty: 50 penalty units.
- (3) An application for approval of a change must:
 - (a) be in writing; and
 - (b) set out the change; and
 - (c) be accompanied by a copy of the part of the provider’s exposition affected by the change, clearly identifying the change.
- (4) Subject to regulation 11.055, CASA must approve a change for a data service provider if satisfied that the requirements mentioned in regulation 175.295 will continue to be met.
- (5) If CASA approves the change, CASA is taken to have also approved the changes to the provider’s exposition covered by the application.
- (6) An offence against this regulation is an offence of strict liability.

175.315 Data service providers—other changes

- (1) A data service provider commits an offence if:
 - (a) the provider makes a change other than a change mentioned in regulation 175.310; and
 - (b) the provider did not, before making the change, comply with subregulation (2).Penalty: 50 penalty units.
 - (2) For paragraph (1)(b), the provider must:
 - (a) amend its exposition to reflect the change; and
 - (b) give CASA written notice of the change and a copy of the amended part of the exposition clearly identifying the change.
-

- (3) An offence against this regulation is an offence of strict liability.

175.320 Data service providers—CASA directions relating to exposition

- (1) If satisfied that it is necessary in the interests of aviation safety, CASA may, by written notice given to a data service provider, direct the provider to change its exposition.
- (2) A direction under this regulation must state the time within which the direction must be complied with.
- (3) The provider commits an offence if the provider does not comply with the direction within the time stated in the direction.

Penalty: 50 penalty units.

- (4) An offence against this regulation is an offence of strict liability.

175.325 Data service providers—notifying CASA of changes in circumstances

- (1) A data service provider commits an offence if:
- (a) a change of circumstance occurs which significantly affects the provider's ability to conduct its authorised data service activities; and
 - (b) the provider does not give CASA written notice of the change of circumstance within 7 days after the change occurs.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

175.330 Data service providers—notifying CASA of intention to cease activities

- (1) A data service provider commits an offence if:
- (a) the provider ceases to conduct an authorised data service activity; and
 - (b) the provider did not, at least 2 months before ceasing to conduct the activity, give CASA written notice of the following:
 - (i) the provider's intention to cease conducting the activity;
 - (ii) the date on which the provider intended to cease conducting the activity.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

Division 175.C.4—Data service providers—requirements for provision of data service

175.335 Data service providers—standards for data service provision

- (1) A data service provider commits an offence if:
 - (a) the provider publishes or supplies aeronautical data or aeronautical information in conducting a data service activity; and
 - (b) the data or information does not meet the requirement mentioned in subregulation (2).

Penalty: 50 penalty units.

- (2) For paragraph (1)(b), the data or information must be the same as the data or information published in the following:
 - (a) the AIP;
 - (b) an AIP Amendment;
 - (c) an AIP Supplement;
 - (d) a permanent NOTAM;
 - (e) an aeronautical chart published by an AIS provider;
 - (f) an aeronautical chart mentioned in subregulation 175.270(3) published by an aerodrome operator.

- (3) A data service provider commits an offence if the provider contravenes a provision of the Part 175 Manual of Standards.

Penalty: 50 penalty units.

- (4) A data service provider commits an offence if:
 - (a) the provider processes aeronautical data or aeronautical information; and
 - (b) the provider does so other than in accordance with the aeronautical data processing standards.

Penalty: 50 penalty units.

- (5) Subregulation (4) does not apply in relation to a particular matter if:
 - (a) 2 standards mentioned in the Part 175 Manual of Standards and the aeronautical data processing standards apply in relation to the matter; and
 - (b) it is not possible for the provider to comply with both standards in relation to the matter.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (5): see subsection 13.3(3) of the *Criminal Code*.

- (6) A data service provider commits an offence if:
 - (a) a circumstance mentioned in subregulation (5) arises; and
 - (b) the provider does not, as soon as practicable after the circumstance arises, give CASA written notice of the circumstance.

Penalty: 50 penalty units.

175.340 Data service providers—compliance with exposition

- (1) A data service provider commits an offence if the provider contravenes a provision of its exposition.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

175.345 Data service providers—standards for aeronautical data processing system

- (1) A data service provider commits an offence if the provider does not meet a requirement mentioned in subregulation (2).

Penalty: 50 penalty units.

- (2) For subregulation (1), the requirements are the following:

- (a) the provider must have an automated system for the processing of aeronautical data and aeronautical information as part of conducting its authorised data service activities;
- (b) the provider must update the data in the system as necessary.

- (3) A data service provider commits an offence if:

- (a) the provider has a system mentioned in paragraph (2)(a); but
- (b) the system does not:
 - (i) allow the digital exchange and supply of aeronautical data and aeronautical information; or
 - (ii) provide the data and information in a format suitable for its intended use.

Penalty: 50 penalty units.

Division 175.C.5—Data service providers—requirements about aeronautical data and aeronautical information

175.350 Data service providers—CASA directions to amend aeronautical data or aeronautical information

- (1) If satisfied that it is necessary in the interests of aviation safety, CASA may, by written notice given to a data service provider, direct the provider to add to, amend, or remove any aeronautical data or aeronautical information that the provider publishes or supplies in conducting a data service activity.
- (2) A direction under this regulation must state the time within which the direction must be complied with.
- (3) The provider commits an offence if the provider does not comply with the direction within the time stated in the direction.

Penalty: 50 penalty units.

- (4) An offence against this regulation is an offence of strict liability.

175.355 Data service providers—integrity of aeronautical data and aeronautical information

- (1) A data service provider commits an offence if:
 - (a) the provider publishes or supplies aeronautical data or aeronautical information in conducting a data service activity; and
 - (b) the provider has not verified the matters mentioned in subregulation (2).

Penalty: 50 penalty units.

- (2) For paragraph (1)(b), the matters are the following:
 - (a) that the data or information was not altered from the source data while in storage or transit or while being formatted;
 - (b) that the data or information was checked for accuracy against the source data before publication or supply;
 - (c) that the data or information is complete;
 - (d) that all of the data or information needed to support the intended use of the data or information has been published or supplied.

175.360 Data service providers—correction and notification of errors and omissions in aeronautical data and aeronautical information

Correction of errors and omissions

- (1) A data service provider commits an offence if:

Regulation 175.365

- (a) the provider becomes aware of an error or omission in aeronautical data or aeronautical information that it publishes or supplies in conducting a data service activity; and
- (b) the provider does not comply with subregulation (2) as soon as practicable after becoming aware of the error or omission.

Penalty: 50 penalty units.

- (2) For paragraph (1)(b), the provider must do the following:
 - (a) record and investigate the error or omission;
 - (b) ensure that the error or omission is corrected by the most appropriate means taking into account the operational significance of the error or omission;
 - (c) ensure that notice of the corrected aeronautical data or aeronautical information is given to persons who had received the data or information;
 - (d) identify the root cause of the error or omission;
 - (e) establish and implement processes to eliminate the root cause of the error or omission.

Notifying CASA of errors and omissions

- (3) A data service provider commits an offence if:
 - (a) the provider becomes aware of an error or omission in aeronautical data or aeronautical information that it publishes or supplies in conducting a data service activity; and
 - (b) the error or omission is a significant error or omission that may affect the safety of air navigation; and
 - (c) the provider does not give CASA written notice of the error or omission as soon as practicable after the provider becomes aware of the error or omission.

Penalty: 50 penalty units.

Notifying AIS provider of errors and omissions

- (4) A data service provider commits an offence if:
 - (a) the provider identifies an error or omission in aeronautical data or aeronautical information supplied by an AIS provider; and
 - (b) the provider does not tell the AIS provider of the error or omission as soon as practicable after identifying the error or omission.

Penalty: 50 penalty units.

175.365 Data service providers—storage and security of aeronautical data and aeronautical information

- (1) A data service provider commits an offence if aeronautical data or aeronautical information necessary for its authorised data service activities:
 - (a) is not stored digitally; or

Part 175 Aeronautical information management

Subpart 175.C Aeronautical information management—data service providers

Division 175.C.5 Data service providers—requirements about aeronautical data and aeronautical information

Regulation 175.370

(b) is not kept secure to prevent unauthorised access or alteration.

Penalty: 50 penalty units.

(2) An offence against this regulation is an offence of strict liability.

175.370 Data service providers—effective dates and validity of aeronautical data, information and charts

(1) A data service provider commits an offence if:

- (a) the provider publishes or supplies aeronautical data, aeronautical information or an aeronautical chart in conducting a data service activity; and
- (b) the data, information or chart does not become effective on the same date, or remain valid for the same period, as the corresponding data, information or chart contained in the following:
 - (i) the AIP;
 - (ii) an AIP Amendment;
 - (iii) an AIP Supplement;
 - (iv) a permanent NOTAM;
 - (v) an aeronautical chart published by an AIS provider;
 - (vi) an aeronautical chart mentioned in subregulation 175.270(3) published by an aerodrome operator.

Penalty: 50 penalty units.

(2) Subregulation (1) does not apply if:

- (a) the corresponding data, information or chart was:
 - (i) published by an AIS provider in contravention of subregulation 175.185(1); or
 - (ii) distributed by an AIS provider in contravention of subregulation 175.185(2) or (3); and
- (b) the data service provider publishes or supplies the data, information or chart by the next effective AIRAC date following the publication or distribution of the corresponding data, information or chart.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (2): see subsection 13.3(3) of the *Criminal Code*.

(3) An offence against this regulation is an offence of strict liability.

175.375 Data service providers—compliance with licence agreement with AIS providers

A data service provider commits an offence if the provider contravenes a provision of a licence agreement, mentioned in regulation 175.190, entered into by the provider.

Penalty: 50 penalty units.

Division 175.C.6—Data service providers—organisational requirements

175.380 Data service providers—exposition

- (1) The exposition of a data service provider must contain the following:
 - (a) the provider's name (including any operating or trading name), address, contact details and ABN (if any);
 - (b) the location and address of:
 - (i) the provider's operational headquarters; and
 - (ii) each of the provider's operational facilities;
 - (c) the name of the provider's accountable manager;
 - (d) a description and diagram of the provider's organisational structure showing formal reporting lines;
 - (e) if the provider is a corporation—a description of the provider's corporate structure;
 - (f) for each operational position, including each operational supervisory position, within the organisational structure:
 - (i) a statement of the duties and responsibilities of the position; and
 - (ii) the recent experience requirements for the position (if any); and
 - (iii) the qualifications required for the position (if any); and
 - (iv) the currency requirements (if any) for the qualifications;
 - (g) a description of how the provider determines the number of operational personnel, including operational supervisory personnel, required for the provider's authorised data service activities;
 - (h) a description of the data service activities that the provider conducts;
 - (i) the area of coverage of the aeronautical data, aeronautical information and aeronautical charts covered by the activities;
 - (j) a description of the procedures that ensure that each of the provider's authorised data service activities is provided in accordance with this Subpart;
 - (k) a description and an example of the formats used for the aeronautical data, aeronautical information and aeronautical charts published or supplied by the provider in conducting its authorised data service activities;
 - (l) a description of the format for the digital exchange or supply of aeronautical data;
 - (m) a description of the arrangements that ensure that the provider receives, on a daily basis, the aeronautical data and aeronautical information necessary for conducting the provider's authorised data service activities;
 - (n) a description of the arrangements that ensure that the provider is able to continue to publish or supply aeronautical data or aeronautical information, in conducting its authorised data service activities, to persons who reasonably require the data or information;

Part 175 Aeronautical information management

Subpart 175.C Aeronautical information management—data service providers

Division 175.C.6 Data service providers—organisational requirements

Regulation 175.380

- (o) a copy of any licence agreement mentioned in regulation 175.190 entered into by the provider;
 - (p) a copy of any data product specification in relation to any aeronautical data that the provider receives from an AIS provider;
 - (q) a copy of the provider's data, personnel and physical security program;
 - (r) a description of the processes and documents used to present to personnel the relevant aeronautical data and aeronautical information contained in the following:
 - (i) the AIP;
 - (ii) AIP Amendments;
 - (iii) AIP Supplements;
 - (iv) permanent NOTAM;
 - (v) aeronautical charts;
 - (vi) the provider's instructions for conducting its authorised data service activities that relate to particular operational facilities;
 - (s) a description of the processes and documents used to present to personnel the relevant standards, rules and procedures contained in:
 - (i) the Part 175 Manual of Standards; and
 - (ii) the aeronautical data processing standards;
 - (t) a copy of each document that contains operational instructions for personnel;
 - (u) a description of the procedures that ensure all operational personnel are familiar with any operational changes that have occurred since they last performed operational duties;
 - (v) a description of the provider's training and checking system, as required by regulation 175.400;
 - (w) a description of the provider's safety management system, as required by regulation 175.405;
 - (x) a description of the provider's quality management system, as required by regulation 175.410;
 - (y) a copy of the provider's contingency plan, as required by regulation 175.420;
 - (z) a description of the provider's record keeping procedures, as required by regulation 175.435;
 - (za) a description of the procedures used in commissioning new facilities, equipment and services;
 - (zb) a description of the procedures that ensure that all equipment, including software, is operated in accordance with the manufacturer's operating instructions and manuals;
 - (zc) a description of the procedures for making changes.
- (2) The provider commits an offence if:
- (a) the provider does not keep the exposition in a readily accessible form; or
 - (b) operational personnel do not have ready access to the exposition; or
 - (c) CASA does not have ready access to the exposition; or

- (d) the provider does not keep the exposition up-to-date.

Penalty: 50 penalty units.

175.385 Data service providers—organisational structure

A data service provider must have an appropriate organisation with a sound and effective management structure that enables the provider to conduct its authorised data service activities in accordance with its exposition and this Subpart.

175.390 Data service providers—personnel—general

A data service provider must have enough suitably competent, qualified and trained personnel to:

- (a) enable the provider to conduct its authorised data service activities in accordance with its exposition and this Subpart; and
- (b) supervise the conduct of each of its authorised data service activities.

175.395 Data service providers—personnel—accountable manager

A data service provider must have an accountable manager.

175.400 Data service providers—personnel—training and checking system for operational personnel

- (1) A data service provider must have a training and checking system that ensures that the provider's operational personnel maintain their competence and are provided with ongoing training appropriate to their duties.
- (2) Without limiting subregulation (1), the training and checking system must ensure that each person who is a member of the provider's operational personnel:
 - (a) is trained and proven to be proficient in the performance of the person's duties; and
 - (b) meets the recent experience requirements (if any) under the provider's exposition for the person's position; and
 - (c) holds each qualification (if any) that is required under the provider's exposition for the person's position; and
 - (d) meets the currency requirements (if any) under the provider's exposition for the qualifications.

175.405 Data service providers—safety management system

- (1) A data service provider must have a safety management system that:
 - (a) is a systemic approach to managing safety; and
 - (b) integrates human factors principles; and
 - (c) includes the matters mentioned in subregulation (2).
 - (2) For paragraph (1)(c), the matters are the following:
-

Regulation 175.410

- (a) organisational structures, accountabilities, policies and procedures necessary to manage safety in a systemic way;
- (b) a statement of the data service provider's safety policy, objectives and planning, including details of the following:
 - (i) the management commitment to, and responsibility for, safety;
 - (ii) the safety accountabilities of managers;
 - (iii) the appointment of safety management personnel;
 - (iv) how human factors principles are integrated into the safety management system;
 - (v) a safety management system implementation plan;
 - (vi) relevant third party relationships and interactions;
 - (vii) coordination of an emergency response plan;
 - (viii) safety management system documentation;
- (c) a safety risk management process, including:
 - (i) hazard identification processes; and
 - (ii) risk assessment and mitigation processes;
- (d) a safety assurance system, including details of processes for:
 - (i) safety performance monitoring and measurement; and
 - (ii) internal safety investigation; and
 - (iii) management of change; and
 - (iv) continuous improvement of the safety management system;
- (e) a safety training and promotion system, including details of the following:
 - (i) safety management system training and education;
 - (ii) safety management system safety communication.

175.410 Data service providers—quality management system

A data service provider must have a quality management system that:

- (a) is based on the elements of the latest edition of the ISO 9001 standard, as in force from time to time, that are relevant to the processing, publication and supply of aeronautical data and aeronautical information for the provider's authorised data service activities; and
- (b) includes quality management procedures that address the quality management requirements mentioned in the aeronautical data processing standards.

175.415 Data service providers—facilities, equipment, data and information

- (1) A data service provider must have the facilities and equipment that are necessary for conducting its authorised data service activities, including appropriate premises and equipment to allow operational personnel to perform their duties.
- (2) A data service provider must provide its operational personnel with access to the aeronautical data and aeronautical information required for conducting its authorised data service activities.

175.420 Data service providers—contingency plan

- (1) A data service provider must have a contingency plan that sets out the procedures to be followed if an authorised data service activity for the provider is interrupted.
- (2) The contingency plan must include:
 - (a) the actions to be taken by personnel responsible for conducting the activity; and
 - (b) possible alternative arrangements for conducting the activity; and
 - (c) arrangements for resuming normal conduct of the activity.

175.425 Data service providers—reference materials

- (1) A data service provider must have up-to-date copies of the following reference materials in a readily accessible form:
 - (a) the civil aviation legislation relevant to the conduct of the data service provider's authorised data service activities;
 - (b) the AIP;
 - (c) any AIP Amendments;
 - (d) any AIP Supplements;
 - (e) any permanent NOTAM;
 - (f) any aeronautical charts published by an AIS provider;
 - (g) any aeronautical charts mentioned in subregulation 175.270(3) published by an aerodrome operator;
 - (h) the aeronautical data processing standards;
 - (i) any instructions issued by the provider to its personnel in relation to the conduct of the data service provider's authorised data service activities;
 - (j) manuals for equipment used by personnel in the conduct of the provider's authorised data service activities.
- (2) The provider must ensure that operational personnel have ready access to the reference materials.

175.430 Data service providers—annual review by accountable manager

- (1) A data service provider commits an offence if the provider's accountable manager contravenes subregulation (2).

Penalty: 50 penalty units.

- (2) For subregulation (1), the accountable manager must:
 - (a) conduct an annual review of the provider against the requirements of its exposition and this Subpart; and
 - (b) address any deficiencies that are identified during the review; and
 - (c) give CASA a report of the annual review, including:
 - (i) any significant deficiencies identified since any previous annual review; and

Regulation 175.435

- (ii) how the deficiencies are to be addressed.

175.435 Data service providers—records

- (1) A data service provider must have procedures for making, collecting, indexing, storing, securing, maintaining, accessing and disposing of the following:
- (a) records that identify all incoming and outgoing aeronautical data and aeronautical information;
 - (b) records that identify each person who is authorised by the provider to process, check, edit, publish or supply aeronautical data and aeronautical information;
 - (c) records that list the qualifications and competencies of personnel who process, check, edit, publish or supply aeronautical data and aeronautical information;
 - (d) records that identify each occurrence of an error or omission in:
 - (i) aeronautical data or aeronautical information that the provider receives; or
 - (ii) aeronautical data or aeronautical information that the provider publishes or supplies in conducting a data service activity;
 - (e) records that contain the results of any audit or review of the provider's activities.
- (2) The provider must ensure that a record mentioned in subregulation (1) is legible and permanent.

175.440 Data service providers—retention period for aeronautical data, aeronautical information and records

Aeronautical data and information

- (1) A data service provider commits an offence if:
- (a) the provider publishes or supplies aeronautical data or aeronautical information in conducting a data service activity; and
 - (b) the provider does not keep a copy of the data or information for at least 7 years after the data or information ceases to be effective.

Penalty: 50 penalty units.

Records

- (2) A data service provider commits an offence if the provider does not keep a record mentioned in subregulation 175.435(1):
- (a) if the record relates to aeronautical data or aeronautical information mentioned in subregulation (1)—for as long as the data or information is required to be kept; or
 - (b) otherwise—for at least 7 years after the record is made.

Penalty: 50 penalty units.

- (3) An offence against this regulation is an offence of strict liability.

Subpart 175.D—Aeronautical information management— aeronautical data originators

Division 175.D.1—Aeronautical data originators—general

175.445 Aeronautical data originators—AIP responsible person and NOTAM authorised persons

AIP responsible persons

- (1) An aeronautical data originator commits an offence if:
 - (a) the originator provides aeronautical data or aeronautical information to an AIS provider; and
 - (b) the originator has not appointed a single senior manager within the originator's organisation as the AIP responsible person for the originator.

Penalty: 50 penalty units.

- (2) An AIP responsible person is responsible for the provision of aeronautical data or aeronautical information, other than in NOTAMS, from the originator to an AIS provider.
- (3) An aeronautical data originator commits an offence if:
 - (a) the originator appoints a person as the AIP responsible person for the originator; and
 - (b) the person does not have the knowledge and competence to carry out the responsibilities of an AIP responsible person.

Penalty: 50 penalty units.

NOTAM authorised persons

- (4) An aeronautical data originator commits an offence if:
 - (a) the originator asks an AIS provider to issue, review or cancel a NOTAM; and
 - (b) the originator has not appointed a person in the originator's organisation as a NOTAM authorised person for the originator.

Penalty: 50 penalty units.

- (5) A NOTAM authorised person is responsible for requesting the issue, review and cancellation of NOTAMS for the originator.
- (6) An aeronautical data originator commits an offence if:
 - (a) the originator appoints a person as a NOTAM authorised person for the originator; and
 - (b) the person does not have the knowledge and competence to request the issue, review and cancellation of NOTAMS.

Penalty: 50 penalty units.

175.450 Aeronautical data originators—telling AIS provider of AIP responsible person and NOTAM authorised persons

- (1) An aeronautical data originator commits an offence if:
 - (a) the originator provides aeronautical data or aeronautical information to an AIS provider; and
 - (b) the originator has not told the AIS provider, in writing, of the following:
 - (i) the name of the AIP responsible person for the originator;
 - (ii) the names of the NOTAM authorised persons (if any) for the originator;
 - (iii) any changes (if any) to the persons who occupy the positions mentioned in subparagraphs (i) and (ii) since any previous provision of aeronautical data or aeronautical information to the AIS provider.

Penalty: 50 penalty units.

- (2) An offence against this regulation is an offence of strict liability.

175.455 Aeronautical data originators—requirement to provide updated aeronautical data or aeronautical information published other than in NOTAMS

- (1) This regulation applies if an aeronautical data originator becomes aware of a change that is needed to aeronautical data or aeronautical information:
 - (a) for which the originator is responsible; and
 - (b) that has been published by an AIS provider:
 - (i) in the Integrated Aeronautical Information Package (other than in NOTAMS); or
 - (ii) on an aeronautical chart.

Note: The aeronautical data or aeronautical information for which the aeronautical data originator is responsible must be specified in a data product specification: see paragraph 175.160(4)(a).

- (2) The originator commits an offence if the originator does not, as soon as practicable after becoming aware of the need for the change, provide the AIS provider with the following:
 - (a) updated aeronautical data or aeronautical information;
 - (b) the date the updated data or information becomes effective.

Penalty: 50 penalty units.

Regulation 175.460

175.460 Aeronautical data originators—requirements in relation to providing aeronautical data or aeronautical information published other than in NOTAMS

- (1) This regulation applies if an aeronautical data originator provides aeronautical data or aeronautical information to an AIS provider for publication:
 - (a) in the Integrated Aeronautical Information Package (other than in NOTAMS); or
 - (b) on an aeronautical chart.

Requirements for providing data or information

- (2) The originator must:
 - (a) provide the data or information to the AIS provider in accordance with the requirements of the data product specification given to the originator by the AIS provider, including in relation to the standards for accuracy and resolution and timeframes; and
 - (b) provide the data or information so that the AIS provider can readily identify any changes from existing published data or information; and
 - (c) provide, with the data or information, a statement of any consultation undertaken under subregulation (4); and
 - (d) provide, with the data or information, any consequential changes that need to be made to other aeronautical data or aeronautical information published:
 - (i) in the Integrated Aeronautical Information Package (other than in NOTAMS); or
 - (ii) on aeronautical charts.

Note: Compliance with the timeframes specified in the data product specification allows the AIS provider to comply with regulation 175.185.

Additional requirement for Bureau of Meteorology

- (3) If the originator is the Bureau of Meteorology, the originator must provide the data or information in accordance with the standards and format mentioned in Annex 3 to the Chicago Convention.

Consultation with aviation organisations about data or information

- (4) If the data or information will cause an aviation organisation to make plans for changes to the organisation's operations or procedures, the originator must, before providing the data or information to the AIS provider, consult the organisation about the data or information.

175.465 Aeronautical data originators—annual review of aeronautical data and aeronautical information

- (1) An aeronautical data originator commits an offence if the originator contravenes subregulation (2).

Penalty: 50 penalty units.

- (2) For subregulation (1), the originator must:
- (a) review, at least annually, the aeronautical data and aeronautical information in the Integrated Aeronautical Information Package (other than in NOTAMS), and on aeronautical charts, for which the originator is responsible; and
 - (b) keep a record of a review mentioned in paragraph (a) for at least 3 years; and
 - (c) if CASA requests a copy of a record mentioned in paragraph (b)—comply with the request.

Note: The aeronautical data or aeronautical information for which the aeronautical data originator is responsible must be specified in a data product specification: see paragraph 175.160(4)(a).

- (3) An offence against this regulation is an offence of strict liability.

175.470 Aeronautical data originators—requirements in relation to requests for issue of NOTAMS

- (1) This regulation applies if:
- (a) an aeronautical data originator becomes aware that a circumstance exists; and
 - (b) the circumstance is specified in a data product specification given to the originator by an AIS provider as a circumstance that requires the originator to ask the AIS provider to issue a NOTAM.

Requesting issue of NOTAM

- (2) The originator must, as soon as practicable after becoming aware of the circumstance, ask the AIS provider to issue a NOTAM in accordance with the data product specification.

Changes to data and information to be readily identifiable

- (3) If the request for a NOTAM will change any existing published aeronautical data or aeronautical information, the originator must ensure that the change can be readily identified.

Data and information to be suitable for publication

- (4) The originator must ensure that the aeronautical data or aeronautical information included in the request for a NOTAM is suitable for publication in NOTAM format.

Consultation with aviation organisations about NOTAM

- (5) If a NOTAM that the originator asks the AIS provider to issue will cause an aviation organisation to make plans for changes to the organisation's operations

Part 175 Aeronautical information management

Subpart 175.D Aeronautical information management—aeronautical data originators

Division 175.D.1 Aeronautical data originators—general

Regulation 175.470

or procedures, the originator must, before asking the AIS provider to issue the NOTAM, consult the organisation about the NOTAM.

**Division 175.D.2—Aeronautical data originators—Geoscience
Australia**

175.475 Aeronautical data originators—responsibilities of Geoscience Australia

The Commonwealth of Australia as represented by Geoscience Australia is responsible for:

- (a) providing AIS providers with magnetic variation updates; and
- (b) providing AIS providers with terrain, topographic and cultural data, as mentioned in Annexes 4 and 15 to the Chicago Convention, for publication:
 - (i) in the Integrated Aeronautical Information Package; or
 - (ii) on an aeronautical chart.

Subpart 175.E—Aeronautical information management— objects and structures that affect aviation safety

175.480 Objects and structures that affect aviation safety—application of Subpart 175.E

This Subpart applies to an object or structure:

- (a) that has a maximum height of at least 100 m above ground level; or
- (b) that penetrates an obstacle limitation surface of an aerodrome; or
- (c) that penetrates an obstacle data collection surface, as mentioned in Appendix 8 of Annex 15 to the Chicago Convention; or
- (d) that is an obstacle that is required to be included on an Aerodrome Obstacle Chart—ICAO Type A, as mentioned in Annex 4 to the Chicago Convention; or
- (e) that is an obstacle that is required to be included on an Aerodrome Obstacle Chart—ICAO Type B, as mentioned in Annex 4 to the Chicago Convention; or
- (f) if AA requires data about the object or structure in the interests of aviation safety.

175.485 Objects and structures that affect aviation safety—requests for data by AA

- (1) Under this Subpart, AA may request the following data about an object or structure:
 - (a) the person who owns, controls or operates the object or structure;
 - (b) the name, identification or designation of the object or structure;
 - (c) the type of object or structure, including whether the object or structure is a building, telecommunications tower or wind turbine;
 - (d) the geographic location of the object or structure;
 - (e) the height of the object or structure;
 - (f) the elevation above mean sea level of the object or structure;
 - (g) whether the object or structure is marked;
 - (h) if the object or structure is marked—how it is marked;
 - (i) whether the object or structure is lit;
 - (j) if the object or structure is lit—how it is lit;
 - (k) any other data that is necessary in the interests of aviation safety.
- (2) A request for data under this Subpart must state the following:
 - (a) the format in which the data must be provided;
 - (b) that the request must be complied with within 28 days after receiving the request.

Regulation 175.490

-
- (3) A request for data under this Subpart may state other requirements in relation to the data (for example, the degree of accuracy or resolution of the data).

Extension of time for compliance

- (4) The recipient of a request may, before the end of 28 days after receiving the request, ask AA for an extension.
- (5) AA may, by written notice given to the recipient, grant the extension.

175.490 Objects and structures that affect aviation safety—requests for data from owners etc.

- (1) AA may, by written notice given to a person who owns, controls or operates an object or structure, request the person to give AA data mentioned in subregulation 175.485(1) about the object or structure.
- (2) A person commits an offence if:
- (a) AA gives the person a request under this regulation; and
 - (b) the person does not comply with subregulation (3) or (4).

Penalty: 50 penalty units.

- (3) For paragraph (2)(b), the person must comply with the request within:
- (a) if AA grants an extension under subregulation 175.485(5)—the time stated in the notice of extension; or
 - (b) if paragraph (a) does not apply—28 days after receiving the request.
- (4) For paragraph (2)(b), the person must specify the degree of accuracy of the data the person supplies.
- (5) Subregulation (2) does not apply if:
- (a) the person does not possess the data requested; and
 - (b) the person has taken all reasonable steps available to the person to obtain the data requested and has been unable to obtain the data.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (5): see subsection 13.3(3) of the *Criminal Code*.

- (6) An offence against this regulation is an offence of strict liability.

175.495 Objects and structures that affect aviation safety—requests for data from aerodrome operators

- (1) AA may, by written notice given to an aerodrome operator, request the operator to give AA data mentioned in subregulation 175.485(1), that the operator possesses, about an object or structure.
- (2) An aerodrome operator commits an offence if:
- (a) AA gives the operator a request under this regulation; and
 - (b) the operator does not comply with the request within:

Part 175 Aeronautical information management

Subpart 175.E Aeronautical information management—objects and structures that affect aviation safety

Regulation 175.500

- (i) if AA grants an extension under subregulation 175.485(5)—the time stated in the notice of extension; or
- (ii) if subparagraph (i) does not apply—28 days after receiving the request.

Penalty: 50 penalty units.

- (3) An offence against this regulation is an offence of strict liability.

175.500 Objects and structures that affect aviation safety—requests for data from government authorities

- (1) AA may, by written notice given to a Commonwealth, State, Territory or local government authority, request the authority to give AA data mentioned in subregulation 175.485(1), that the authority possesses, about an object or structure.
- (2) The authority must comply with the request.

Civil Aviation Safety Regulations 1998

Statutory Rules No. 237, 1998

made under the

Civil Aviation Act 1988

Compilation No. 99

Compilation date: 11 April 2024

Includes amendments: F2024L00297

Registered: 18 April 2024

This compilation is in 5 volumes

- Volume 1: regulations 1.001–42.1105
- Volume 2: regulations 45.005–92.205
- Volume 3: regulations 99.005–135.465
- Volume 4: regulations 137.005–175.500
- Volume 5: regulations 200.005–202.900**
Dictionary and Endnotes

Each volume has its own contents

Prepared by the Office of Parliamentary Counsel, Canberra

About this compilation

This compilation

This is a compilation of the *Civil Aviation Safety Regulations 1998* that shows the text of the law as amended and in force on 11 April 2024 (the *compilation date*).

The notes at the end of this compilation (the *endnotes*) include information about amending laws and the amendment history of provisions of the compiled law.

Uncommenced amendments

The effect of uncommenced amendments is not shown in the text of the compiled law. Any uncommenced amendments affecting the law are accessible on the Register (www.legislation.gov.au). The details of amendments made up to, but not commenced at, the compilation date are underlined in the endnotes. For more information on any uncommenced amendments, see the Register for the compiled law.

Application, saving and transitional provisions for provisions and amendments

If the operation of a provision or amendment of the compiled law is affected by an application, saving or transitional provision that is not included in this compilation, details are included in the endnotes.

Editorial changes

For more information about any editorial changes made in this compilation, see the endnotes.

Modifications

If the compiled law is modified by another law, the compiled law operates as modified but the modification does not amend the text of the law. Accordingly, this compilation does not show the text of the compiled law as modified. For more information on any modifications, see the Register for the compiled law.

Self-repealing provisions

If a provision of the compiled law has been repealed in accordance with a provision of the law, details are included in the endnotes.

Contents

Part 200—Modified application of Regulations to certain aircraft	1
Subpart 200.B—Exemption from certain Regulations	2
200.005 Parasails	2
200.008 Defence Force aircraft operated by civilian flight crew	2
Subpart 200.C—Authorisation to fly	3
200.020 Authorised flight without certificate of airworthiness	3
200.025 Flying unregistered aircraft.....	3
200.030 Flying unregistered aircraft—offence.....	3
Part 201—Miscellaneous	4
201.001 Appointment of authorised persons	4
201.002 Identity cards.....	4
201.002A Authorised persons requesting cockpit entry or occupation of seat etc.....	5
201.003 Commonwealth and CASA not liable in certain cases	6
201.004 Review of decisions	6
201.016 Disclosure etc. of information	10
201.020 Service of documents.....	11
201.022 Carriage of medicines—relationship with other laws.....	11
201.025 Prescription of matters for definitions in these Regulations	11
201.030 Approvals by CASA—definitions in these Regulations.....	11
Part 202—Transitional	13
Subpart 202.AB—Transitional provisions for Part 1 (Preliminary)	23
Subpart 202.AD—Transitional provisions for Part 11 (Regulatory administrative procedures)	24
Division 202.AD.2—Amendments made by Schedule 3 to the Civil Aviation Safety Amendment (Remotely Piloted Aircraft and Model Aircraft—Registration and Accreditation) Regulations 2019	24
202.014 Applications by agents for authorisations.....	24
Subpart 202.AF—Transitional provisions for Part 13 (Enforcement)	25
Subpart 202.AJ—Transitional provisions for Part 21 (Certification and airworthiness requirements for aircraft and parts)	26
Division 202.AJ.1—Transitional provisions relating to certification of aircraft and aircraft components	26
Subdivision 202.AJ.1.A—Amendments made by Civil Aviation and Civil Aviation Safety Amendment Regulations 2011 (No. 1)	26
202.049A Certain design standards taken to be applicable airworthiness standards for regulation 21.017	26
Subdivision 202.AJ.1.B—Amendments made by Civil Aviation Amendment Regulations 1999 (No. 5)	26
202.050 Certificates of type approval.....	26
202.051 Certificates of airworthiness	27
202.052 Export certificate of airworthiness.....	27

Subdivision 202.AJ.1.D—Amendments made by the Civil Aviation Legislation		
Amendment (Part 132) Regulation 2016		27
202.052AA	Definitions for Subdivision 202.AJ.1.D	27
202.052B	Applications for certain limited category certificates made but not finally determined before commencement time	27
202.052C	Application of subregulations 21.176(5) and (5A)—limited category certificates issued on or after commencement time	27
202.052D	Certain special purpose operations for limited category aircraft.....	28
202.052E	Certain experimental certificates for certain ex-armed forces aircraft expire no later than 6 months after the commencement time.....	28
Division 202.AJ.2—Transitional provisions relating to approvals of designs of modifications and repairs		29
Subdivision 202.AJ.2.A—Amendments made by the Civil Aviation and Civil Aviation Safety Amendment Regulations 2011 (No. 1)		29
202.053	Approvals of systems of certification under regulation 34 of CAR	29
202.054	Approvals of designs of modifications and repairs under regulation 35 of CAR.....	29
202.055	Approvals of aircraft components for use as replacements under regulation 36 of CAR.....	29
202.056	Use of aircraft material for particular purposes under regulation 36A of CAR.....	30
202.058	Approval of changes to flight manuals under regulations 55 and 55A of CAR	31
Subdivision 202.AJ.2.B—Amendments made by the Civil Aviation Legislation Amendment (Part 21) Regulation 2014		31
202.058A	Approval of damage as permissible unserviceability under regulation 21.007	31
Division 202.AJ.3—Transitional provisions relating to authorised persons		32
Subdivision 202.AJ.3.A—Amendments made by the Civil Aviation and Civil Aviation Safety Amendment Regulations 2011 (No. 1)		32
202.059	Authorised persons for regulations 35, 36 and 36A of CAR.....	32
Subpart 202.AK—Transitional provisions for Part 22 (Airworthiness standards for sailplanes and powered sailplanes)		33
202.060	Approvals under airworthiness instruments in force before 1 July 2009	33
Subpart 202.AL—Transitional provisions for Part 23 (Airworthiness standards for aeroplanes in the normal, utility, acrobatic or commuter category)		34
202.070	Approvals under airworthiness instruments in force before 1 July 2009	34
Subpart 202.AN—Transitional provisions for Part 25 (Airworthiness standards for aeroplanes in the transport category)		35
202.090	Approvals under airworthiness instruments in force before 1 July 2009	35
Subpart 202.AO—Transitional provisions for Part 26 (Airworthiness standards for aircraft in the primary category or intermediate category)		36

Subpart 202.AP—Transitional provisions for Part 27 (Airworthiness standards for rotorcraft in the normal category)	37
Subpart 202.AR—Transitional provisions for Part 29 (Airworthiness standards for rotorcraft in the transport category)	38
Subpart 202.AT—Transitional provisions for Part 31 (Airworthiness standards for manned free balloons)	39
Subpart 202.AU—Transitional provisions for Part 32 (Airworthiness standards for engines for very light aeroplanes)	40
202.140 Approvals under airworthiness instruments in force before 1 July 2009	40
Subpart 202.AV—Transitional provisions for Part 33 (Airworthiness standards for aircraft engines)	41
Subpart 202.AX—Transitional provisions for Part 35 (Airworthiness standards for aircraft propellers)	42
Subpart 202.AZ—Transitional provisions for Part 39 (Airworthiness directives)	43
202.170 Airworthiness directives	43
202.171 Application for exemption from, or variation of, requirement of airworthiness directive	43
202.172 Exemption from requirement of airworthiness directive	43
Subpart 202.BA—Transitional provisions for Part 42 (Continuing airworthiness requirements for aircraft and aeronautical products)	44
202.180 Application of Part 42	44
202.181 Election that Part 42 is to apply to an aircraft	44
202.183 Application of subparagraph 42.030(2)(c)(ii) (airworthiness review certificates) to existing and new aircraft	45
202.185 Approved maintenance programs taken to include approved systems of maintenance	45
202.186 Approved reliability programs taken to include reliability programs included in approved systems of maintenance	45
202.187 Defects recorded in maintenance releases (regulation 42.355)	46
202.188 References to authorised release certificates (subparagraphs 42.420(5)(a)(i) and (b)(i))	46
202.191 Maintenance certification taken to include certification of completion of maintenance (paragraph 42.745(c))	46
202.193 Reference to maintenance carried out in accordance with Part 42 (subparagraph 42.795(c)(i))	46
202.194 CASA may direct making of applications under regulation 42.585	47
Subpart 202.BD—Transitional provisions for Part 45 (Display of nationality and registration marks)	48
Division 202.BD.1—Amendments made by the Civil Aviation Amendment Regulation 2000 (No. 3)	48
202.200 Australian aircraft marked in accordance with CAR	48

Division 202.BD.2—Amendments made by Schedule 3 to the Civil Aviation Legislation Amendment (Airworthiness and Other Matters—2015 Measures No. 1) Regulation 2015	49
202.205 Approvals—markings on aircraft	49
202.210 Exemptions—antique, experimental and ex-military aircraft.....	49
202.215 Directions—aircraft with special configuration	49
202.217 Directions—identification plates	49
Subpart 202.BF—Transitional provisions for Part 47 (Registration of aircraft and related matters)	50
Division 202.BF.1—Transitional provisions relating to the commencement of Part 47	50
202.220 Definitions for Division 202.BF.1	50
202.221 Continuation of Aircraft Register	50
202.222 Reference to <i>holder of a certificate of registration</i>	50
202.223 Registration under CAR to continue.....	50
202.224 Pending applications or notices	51
202.225 Application to register aircraft under Part 47	51
Division 202.BF.2—Amendments made by the Civil Aviation Safety Amendment (Cape Town Convention) Regulation 2014	53
202.226 Definitions for Division 202.BF.2	53
202.227 Application of regulation 47.131A	53
202.228 Application of regulation 47.165	53
Subpart 202.CB—Transitional provisions for Part 61 (Flight crew licensing)	54
Division 202.CB.1—Amendments made by regulations commencing 1 September 2014	54
Subdivision 202.CB.1.1—General	54
202.260 Application of Division 202.CB.1—balloons excluded	54
202.261 Definitions for Division 202.CB.1.....	54
202.262 Application of Division 202.CB.1 to student pilot licences	55
Subdivision 202.CB.1.2—Continued authorisations	55
202.263 Continuation of old authorisations.....	55
202.264 Continuation of suspended old authorisations	56
202.265 Non-finalised action to vary, suspend or cancel old authorisations	56
202.266 Removal of conditions on certain continued authorisations	56
202.267 Flight review and proficiency check requirements.....	58
202.268 Removal of limitation on exercise of privileges of private or commercial pilot licences—multi-crew operations	58
202.268A Removal of limitation on exercise of privileges of class rating for aircraft prescribed under regulation 61.062	59
202.269 Personal log books under regulation 5.51 of CAR—certain continued authorisations	59
202.270 Extended meaning of <i>licence document</i> in Part 61	59
202.271 Expiry of Subdivision 202.CB.1.2 at end of 31 August 2018	59
Subdivision 202.CB.1.3—New authorisations for holders of old authorisations	60
202.272 Grant of equivalent new authorisations for certain holders of old authorisations	60

202.273	References to authorisations granted on the basis of regulation 202.272	60
Subdivision 202.CB.1.4—Other provisions		61
202.274	Non-finalised applications for old authorisations	61
202.275	Eligibility for ratings—former holders of time-limited authorisations	61
202.276	Flight review and proficiency check requirements for certain new authorisations	61
202.277	Personal logbooks—obligations for holders of old authorisations etc.	62
202.277C	English competency for certain holders of student pilot licences	62
202.278	Grant of pilot type ratings on basis of overseas training and assessment.....	62
202.279	Instrument proficiency checks partially conducted by foreign-authorized person	63
202.281	Expiry of Division 202.CB.1 at end of 31 August 2025.....	63
Division 202.CB.2—Amendments made by the Civil Aviation Safety Amendment (Flight Crew Licensing Measures No. 1) Regulations 2020		64
202.290	Flight test requirements for 3D instrument approach operations endorsement.....	64
Subpart 202.CE—Transitional provisions for Part 64 (Authorisations for non-licensed personnel)		65
Division 202.CE.1—Amendments made by regulations commencing 1 September 2014		65
Subdivision 202.CE.1.1—Aircraft radiotelephone operator certificate of proficiency		65
202.300	Definitions for Subdivision 202.CE.1.1.....	65
202.301	Continuation of old authorisations.....	66
202.302	Continuation of suspended old authorisations	66
202.303	Non-finalised action to vary, suspend or cancel old authorisations	66
202.304	Grant of aeronautical radio operator certificates for certain holders of old authorisations.....	66
202.304A	References to aeronautical radio operator certificates granted on the basis of regulation 202.304.....	67
202.305	Non-finalised applications for old authorisations	67
Subdivision 202.CE.1.2—Approval to taxi an aeroplane		67
202.307	Definitions for Subdivision 202.CE.1.2.....	67
202.308	Continuation of old authorisations.....	68
202.309	Continuation of suspended old authorisations	68
202.310	Non-finalised action to vary, suspend or cancel old authorisations	69
202.311	Production of continued authorisation.....	69
Subdivision 202.CE.1.3—Expiry of Division 202.CE.1		69
202.312	Expiry of Division 202.CE.1	69
Subpart 202.CF—Transitional provisions for Part 65 (Air traffic services licensing)		70
202.320	Manual of Standards for Part 65	70
202.321	Persons holding certain licences	70

Subpart 202.CG—Transitional provisions for Part 66 (Continuing airworthiness—aircraft engineer licences and ratings)	71
202.340	Having regard to other airworthiness authorities in granting aircraft engineer licences.....71
202.341	Category A licence holders and certification of completion of maintenance71
202.342	Category A licence holders and final certificates for completion of maintenance72
202.343	Category A licence holders and endorsing maintenance releases72
202.355	Validation of certain licences and ratings granted subject to exclusions during relevant period73
Subpart 202.CH—Transitional provisions for Part 67 (Medical)	74
202.360	Medical certificates issued under <i>Civil Aviation Regulations 1988</i>74
202.361	Designated aviation medical examiners appointed under <i>Civil Aviation Regulations 1988</i>74
202.362	Actions by Director of Aviation Medicine74
202.363	Applications for issue of medical certificates pending on 3 September 200374
Subpart 202.DA—Transitional provisions for Part 71 (Airspace)	76
Subpart 202.EA—Transitional provisions for Part 90 (Additional airworthiness requirements)	77
202.400	Transitional provision—Part 90 Manual of Standards77
Subpart 202.EAA—Transitional provisions for Parts 91, 103, 105, 119, 121, 131, 133, 135 and 138	78
Division 202.EAA.1—Amendments made by the Civil Aviation Legislation Amendment (Flight Operations—Consequential Amendments and Transitional Provisions) Regulations 2021	78
Subdivision 202.EAA.1.1—Preliminary	78
202.405	Definitions for this Division78
202.405A	Meaning of <i>eligible instrument</i>79
202.405B	Meaning and effect of <i>new Regulations</i>79
202.405C	Relationship with section 7 of the <i>Acts Interpretation Act 1901</i>80
Subdivision 202.EAA.1.2—Requirements for existing AOC holders before main commencement time	80
202.406	AOC holders to give CASA proposed operations manuals and expositions etc. before main commencement time80
Subdivision 202.EAA.1.3—Existing AOCs due to expire	83
202.407	AOCs due to expire.....83
Subdivision 202.EAA.1.4—Applications for Australian air transport AOCs made before main commencement time	83
202.408	Applications for Australian air transport AOCs under new law made before main commencement time83
202.408A	Applications for AOCs under old law made before main commencement time84

Subdivision 202.EAA.1.5—Applications for balloon transport AOCs made before main commencement time	84
202.409 Applications for balloon transport AOCs under new law made before main commencement time.....	84
Subdivision 202.EAA.1.6—Applications for aerial work certificates made before main commencement time	84
202.410 Applications for aerial work certificates under new law made before main commencement time.....	84
Subdivision 202.EAA.1.7—Applications for instruments (other than AOCs and aerial work certificates) made before main commencement time	85
202.411 Applications for instruments (other than AOCs and aerial work certificates) under new law made before main commencement time.....	85
202.411A Applications for instruments (other than AOCs, aerial work certificates and exemptions) under old law made before main commencement time.....	85
202.411B Applications for exemptions under old law made before main commencement time.....	86
Subdivision 202.EAA.1.8—Main translation rules for old instruments	88
202.412 References in old instruments to old Regulations	88
202.412A References in old instruments to old terminology	88
202.412B References in old instruments to kinds of aircraft	89
202.412C References in old instruments to kinds of operations	91
Subdivision 202.EAA.1.9—AOCs	92
202.413 Old AOCs taken to authorise operations etc.....	92
202.413A Operations manuals, expositions and training and checking manuals taken to be approved.....	95

Part 200—Modified application of Regulations to certain aircraft

Table of contents

Subpart 200.B—Exemption from certain Regulations

200.005 Parasails

200.008 Defence Force aircraft operated by civilian flight crew

Subpart 200.C—Authorisation to fly

200.020 Authorised flight without certificate of airworthiness

200.025 Flying unregistered aircraft

200.030 Flying unregistered aircraft—offence

Regulation 200.005

Subpart 200.B—Exemption from certain Regulations

200.005 Parasails

(1) A parasail is exempt from CASR (other than this regulation) if the conditions in section 95.14 of the Civil Aviation Orders, as in force from time to time, are complied with.

(2) In these Regulations:

parasail means a parachute tethered to a point or vehicle on the ground or to a watercraft and deriving lift chiefly from aerodynamic reactions on flexible surfaces remaining fixed under given conditions of flight.

200.008 Defence Force aircraft operated by civilian flight crew

(1) This regulation applies to a Defence Force aircraft that is being flown and operated by persons, other than members of the Defence Force, who hold commercial or higher category licences, and that is engaged in:

- (a) flight testing; or
- (b) search and rescue; or
- (c) support of aircraft development and flight test programs; or
- (d) any other activity authorised by the Defence Force.

(2) The aircraft is exempt from CASR (other than this regulation) if the conditions in section 95.20 of the Civil Aviation Orders, as in force from time to time, are complied with.

(3) In this regulation:

flight testing, of an aircraft, means flying performed on behalf of the contractor or Defence Force to establish that the aircraft meets all the requirements of the contractor or Defence Force after manufacture or major servicing and inspection.

Subpart 200.C—Authorisation to fly

200.020 Authorised flight without certificate of airworthiness

For paragraph 20AA(3)(b) of the Act, an Australian aircraft that is exempt from CASR is authorised to fly without a certificate of airworthiness.

200.025 Flying unregistered aircraft

For paragraph 20AB(1)(a) of the Act, a person is taken to hold a civil aviation authorisation that is in force and authorises the person to perform a duty that is essential to the operation of an unregistered Australian aircraft during flight time if:

- (a) the person holds a pilot certificate granted by a sport aviation body (other than an ASAO) that administers aviation activities in the aircraft; and
- (b) the person operates the aircraft in accordance with the sport aviation body's operations manual.

200.030 Flying unregistered aircraft—offence

A person commits an offence if:

- (a) the person pilots an unregistered Australian aircraft; and
- (b) a sport aviation body (other than an ASAO) administers aviation activities in the aircraft; and
- (c) the person does not:
 - (i) hold a pilot certificate granted by the sport aviation body; and
 - (ii) operate the aircraft in accordance with the sport aviation body's operations manual.

Penalty: 50 penalty units.

Part 201—Miscellaneous

Table of contents

201.001	Appointment of authorised persons
201.002	Identity cards
201.002A	Authorised persons requesting cockpit entry or occupation of seat etc.
201.003	Commonwealth and CASA not liable in certain cases
201.004	Review of decisions
201.016	Disclosure etc. of information
201.020	Service of documents
201.022	Carriage of medicines—relationship with other laws
201.025	Prescription of matters for definitions in these Regulations
201.030	Approvals by CASA—definitions in these Regulations

201.001 Appointment of authorised persons

- (1) CASA may appoint a person, or the persons included in a class of persons, to be an authorised person in relation to any one or more of the following:
 - (a) CASR;
 - (b) a particular provision of CASR;
 - (c) CAR;
 - (d) a particular provision of CAR.
- (2) CASA may appoint a person only if CASA is satisfied that the person has the qualifications and experience to be an authorised person.
- (3) CASA may appoint a class of persons only if CASA is satisfied that each person included in the class has the qualifications and experience to be an authorised person.
- (4) An appointment may be made subject to conditions stated in the instrument of appointment.

201.002 Identity cards

CASA must issue identity cards

- (1) CASA must issue an authorised person with an identity card if the person:
 - (a) is an officer; and
 - (b) performs functions or duties or exercise powers under any one or more of the following provisions:
 - (i) subregulation 30(4) of CAR;
 - (ii) subregulation 33(2) of CAR;
 - (iii) regulation 43A of CAR;
 - (iv) regulation 50D of CAR;

Regulation 201.002A

- (v) regulation 53 of CAR;
 - (vi) regulation 290 of CAR;
 - (vii) regulation 302 of CAR;
 - (viii) regulation 305 of CAR;
 - (ix) a provision of CASR under which the person may enter premises or exercise inspection powers.
- (2) The identity card is valid for the period that the person has been appointed as an authorised person for.
- (3) The identity card must:
- (a) contain a photograph of the person that is no more than 5 years old; and
 - (b) specify which of the following the person is appointed as an authorised person for:
 - (i) CASR;
 - (ii) a particular provision of CASR;
 - (iii) CAR;
 - (iv) a particular provision of CAR; and
 - (c) specify any conditions of the appointment.

Returning identity cards

- (4) A person contravenes this subregulation if:
- (a) the person has been issued with an identity card; and
 - (b) the person ceases to be an authorised person for any or all of the provisions specified in the card; and
 - (c) the person does not return the card to CASA within 7 days of the person ceasing to be an authorised person.
- (5) A person commits an offence of strict liability if the person contravenes subregulation (4).

Penalty: 10 penalty units.

Display and production of identity cards

- (6) If an authorised person is performing functions or exercising powers in accordance with CASR or CAR, the person must:
- (a) wear their identity card so that it can be readily seen; and
 - (b) upon request, show their identity card.

201.002A Authorised persons requesting cockpit entry or occupation of seat etc.

- (1) The pilot in command of an aircraft for a flight contravenes this subregulation if:
- (a) during the flight, an authorised person requests to enter the cockpit; and
 - (b) the request is for the purposes of, or in connection with, the authorised person performing their duties; and
 - (c) the authorised person produces or displays their identity card; and

Regulation 201.003

- (d) the pilot in command refuses or fails to comply with the request.
- (2) The pilot in command of an aircraft for a flight contravenes this subregulation if:
- (a) during the flight, an authorised person requests to occupy a particular seat or particular position on the aircraft; and
 - (b) the request is for the purposes of, or in connection with, the authorised person performing their duties; and
 - (c) the authorised person produces or displays their identity card; and
 - (d) the pilot in command refuses or fails to comply with the request.
- (3) Subregulation (1) or (2) does not apply if the pilot in command is satisfied that the safety of the aircraft, or of any person or property, is likely to be endangered as a result of the entry of the authorised person to the cockpit, or the occupation of the seat or position by the authorised person (as the case may be).
- (4) The pilot in command of an aircraft for a flight contravenes this subregulation if:
- (a) subregulation (1) or (2) applies in relation to a request (the **first request**) by an authorised person; and
 - (b) the authorised person requests the pilot in command to report to CASA the reasons for the refusal or failure to comply with the first request; and
 - (c) the pilot in command fails to give the report to CASA in the approved form within 7 days of the refusal or failure.

Note: Under regulation 11.018, a report in the approved form is not complete unless it contains all of the information required by the form.

- (5) A person commits an offence of strict liability if the person contravenes subregulation (1), (2) or (4).

Penalty: 50 penalty units.

Note: A defendant bears an evidential burden in relation to the matters in subregulation (3): see subsection 13.3(3) of the *Criminal Code*.

201.003 Commonwealth and CASA not liable in certain cases

- (1) Neither the Commonwealth nor CASA is liable in negligence or otherwise for any loss or damage incurred by anyone because of, or arising out of, the design, construction, restoration, repair, maintenance or operation of a limited category aircraft or an experimental aircraft, or any act or omission of CASA done or made in good faith in relation to any of those things.
- (2) Neither the Commonwealth nor CASA is liable in negligence or otherwise for any loss or damage incurred by anyone because of, or arising out of, CASA exercising powers to conduct tests under regulation 139.135, or any act or omission of CASA done or made in good faith in relation to those powers.

201.004 Review of decisions

- (1) In this regulation:

authorisation: see regulation 11.015.

Regulation 201.004

Decisions made by CASA

- (2) An application may be made to the Administrative Appeals Tribunal for the review of a decision of CASA mentioned in table 201.004.

Table 201.004 Reviewable decisions

Item	A decision...
1	under a provision of these Regulations: (a) refusing to grant or issue an authorisation; or (b) cancelling or suspending an authorisation otherwise than on the application of the authorisation-holder; or (c) varying an authorisation otherwise than on the application of the authorisation-holder; or (d) refusing to vary an authorisation
2	under a provision of these Regulations imposing a condition on, or varying a condition of, an authorisation otherwise than on the application of the authorisation-holder
2A	under Subpart 11.D refusing, because of regulation 47.131B, to cancel the registration of an aircraft
3	under Division 11.F.1 or 11.F.2 refusing to grant an exemption
4	under regulation 21.043 refusing to consider an application for a type certificate
4A	under subregulation 21.176(5) or Division 132.D.2: (a) to assign a permit index number to the aircraft; or (b) to refuse to assign a new permit index number requested by the aircraft's registered operator
5	under regulation 21.855 refusing approval to remove or alter information on a critical part
6	under regulation 21.870 agreeing that it is impractical to mark information on a part
7	under subregulation 39.004(2) or (3) refusing to issue an instrument of approval or exclusion
8	under regulation 39.007 refusing to revoke or amend an Australian airworthiness directive
8A	under regulation 42.640 directing that an authorisation issued by a continuing airworthiness management organisation to a pilot licence holder be changed or cancelled
9	under regulation 45.060 refusing approval to place a design, mark or symbol on an aircraft
10	under regulation 45.065 refusing approval to display different markings
10A	under regulation 45.070 refusing approval to display different markings, or no markings, for the purposes of an exhibition
10B	under regulation 45.100 refusing approval to display different words, or no words, for the purposes of an exhibition
10C	under regulation 45.135 refusing approval of a method of displaying aircraft markings
11	under regulation 45.140 refusing approval to attach an aircraft identification plate other than in accordance with regulation 45.125
12A	under regulation 47.110 refusing, because of subregulation 47.110(9), to amend the Australian Civil Aircraft Register and give a certificate of registration
13	under regulation 47.131C or 47.132 cancelling the registration of an aircraft
14	under regulation 47.175 assigning fewer dealer's marks to an aircraft dealer than were applied for by the dealer

Regulation 201.004

Table 201.004 Reviewable decisions

Item	A decision...
15	under Subpart 67.B refusing to appoint a person as a DAME or DAO
16	under regulation 67.095 cancelling the appointment of a person as a DAME or DAO
17	under regulation 90.010 refusing to exclude an aircraft or aeronautical product from the operation of a provision of Part 90
17A	under subregulation 91.980(1) imposing conditions on the operation of foreign registered aircraft in Australian territory
17B	under subregulation 119.105(1) directing an Australian air transport operator to change its exposition
17C	under subregulation 119.105(2) directing an Australian air transport operator to remove key personnel
17D	under subregulation 119.135(5) directing a head of flying operations of an Australian air transport operator to undertake an assessment
17E	under subregulation 119.145(5) directing a head of training and checking of an Australian air transport operator to undertake an assessment
17F	under subregulation 119.165(2) directing an Australian air transport operator that key personnel of the operator must have additional qualifications or experience
17G	under subregulation 119.165(3) directing key personnel of an Australian air transport operator to undertake an examination, interview or training
17H	under subregulation 131.115(1) directing a balloon transport operator to change its exposition
17J	under subregulation 131.115(2) directing a balloon transport operator to remove key personnel
17K	under subregulation 131.145(3) directing a head of flying operations of a balloon transport operator to undertake an assessment
17L	under subregulation 131.175(2) directing a balloon transport operator that key personnel of the operator must have additional qualifications or experience
17M	under subregulation 131.175(3) directing key personnel of a balloon transport operator to undertake an examination, interview or training
18	under regulation 137.040 refusing to approve a standard operations manual
19	under subregulation 137.045(6) refusing to accept: <ul style="list-style-type: none"> (a) an application for an AOC submitted later than required under subregulation 137.045(1); or (b) a manual or schedule of differences that is submitted later than required under subregulation 137.045(4); or (c) an application for the variation of an AOC submitted later than required under subregulation 137.045(5)
20	under regulation 137.080 refusing to approve a proposed amendment to an operations manual
21	under regulation 137.085 refusing to approve a proposed amendment to a schedule of differences
22	under regulation 137.090 refusing to approve a proposed amendment to a standard operations manual

Regulation 201.004

Table 201.004 Reviewable decisions

Item	A decision...
23	under subregulation 138.068(1) directing an aerial work operator to change its operations manual
23A	under subregulation 138.068(2) directing an aerial work operator to remove key personnel
23B	under subregulation 138.090(4) directing a head of operations of an aerial work operator to undertake an assessment
23C	under subregulation 138.100(5) directing a head of training and checking of an aerial work operator to undertake an assessment
23D	under subregulation 138.120(2) directing an aerial work operator that key personnel of the operator must have additional qualifications or experience
23E	under subregulation 138.120(3) directing key personnel of an aerial work operator to undertake an examination, interview or training
24	under regulation 139.125, refusing to impose, or to vary, a condition on an aerodrome certificate in relation to the operation of an aerodrome ground surveillance system
25	under subregulation 141.100(1) directing a Part 141 operator to change its operations manual
25A	under subregulation 141.100(2) directing a Part 141 operator to remove key personnel
25B	under subregulation 141.125(3) directing a head of operations of a Part 141 operator to undertake an assessment
25C	under subregulation 141.155(2) directing a Part 141 operator that key personnel of the operator must have additional qualifications or experience
25D	under subregulation 141.155(3) directing key personnel of a Part 141 operator to undertake an examination, interview or training
25E	under subregulation 142.155(1) directing a Part 142 operator to change its exposition
25F	under subregulation 142.155(2) directing a Part 142 operator to remove key personnel
25G	under subregulation 142.185(6) directing a head of operations of a Part 142 operator to undertake an assessment
25H	under subregulation 142.215(2) directing a Part 142 operator that key personnel of the operator must have additional qualifications or experience
25J	under subregulation 142.215(3) directing key personnel of a Part 142 operator to undertake an examination, interview or training
26	under subregulation 149.120(2) giving a direction to an ASAO
27	under regulation 149.490 giving a direction to an ASAO
28	under regulation 149.495 varying, suspending or cancelling an authorisation issued by an ASAO
29	under regulation 149.630 affirming, varying, setting aside or remitting an internal review decision of an ASAO

Note: See also section 31 of the Act.

Decisions made by other decision-makers

- (3) Applications may be made to the Administrative Appeals Tribunal for review of a decision mentioned in subregulation (5) that is made:
- (a) under a provision of these Regulations; and

Regulation 201.016

(b) by a person mentioned in subregulation (4) who may make the decision under the provision.

(4) For paragraph (3)(b), the persons are the following:

- (a) an authorised person;
- (b) an examiner;
- (c) an instructor;
- (d) the holder of an approval under regulation 61.040, 141.035 or 142.040;
- (e) a limited category organisation.

(5) For subregulation (3), the decisions are the following:

- (a) a decision refusing to grant or issue an authorisation;
- (b) a decision varying an authorisation otherwise than on the application of the authorisation-holder;
- (c) a decision refusing to vary an authorisation;
- (d) a decision imposing a condition on, or varying a condition of, an authorisation otherwise than on the application of the authorisation-holder;
- (e) under subregulation 21.176(5) or Division 132.D.2, a decision by a limited category organisation:
 - (i) to assign a permit index number to a limited category aircraft; or
 - (ii) to refuse to assign a new permit index number requested by the registered operator of a limited category aircraft.

Note: Section 27A of the *Administrative Appeals Tribunal Act 1975* requires a person who makes a reviewable decision to give a person, whose interests are affected by the decision, notice of:

- (a) the making of the decision; and
- (b) the person's right to have the decision reviewed.

201.016 Disclosure etc. of information

Safety of air navigation

(1) CASA is authorised to disclose information covered by subregulation (2) in the circumstance that:

- (a) the disclosure is to a person:
 - (i) providing an air traffic service (within the meaning of Part 172) in Australian territory; or
 - (ii) carrying out search and rescue operations in Australian territory; and
- (b) the disclosure is necessary for the safety of air navigation.

Note: For further authorisation to collect, use and disclose information covered by this subregulation that is personal information, see the *Privacy Act 1988*.

(2) The information is the following about an individual who holds a civil aviation authorisation:

- (a) the person's name;
- (b) the person's ARN (if any);
- (c) the person's address;

- (d) the person's telephone number;
- (e) details of each civil aviation authorisation and any medical certificate that the person holds.

Registered RPA

- (3) CASA is authorised to disclose information relating to an aircraft registered under Division 47.C.2 in the circumstance that:
 - (a) the disclosure is to a person providing an air traffic service (within the meaning of Part 172) in Australian territory; or
 - (b) the disclosure is to an enforcement body (within the meaning of the *Privacy Act 1988*) and is for the purposes of one or more enforcement related activities conducted by, or on behalf of, the enforcement body.

Note: For further authorisation to collect, use and disclose information covered by this subregulation that is personal information, see the *Privacy Act 1988*.

201.020 Service of documents

Despite section 28A of the *Acts Interpretation Act 1901*, service may be effected on CASA only at its principal office at:

16 Furzer Street
Phillip ACT 2606

201.022 Carriage of medicines—relationship with other laws

- (1) This regulation applies if a provision of these Regulations or of a Manual of Standards:
 - (a) requires that a medicine or drug must be carried on an aircraft; or
 - (b) prescribes a requirement in relation to the carriage or use of a medicine or drug on an aircraft.
- (2) None of the following persons are required to obtain or have a licence, approval or permission for carrying or using the medicine or drug on the aircraft:
 - (a) the operator of the aircraft;
 - (b) the pilot in command of the aircraft;
 - (c) a crew member of the aircraft.
- (3) This regulation applies despite any other law of a State or Territory.

201.025 Prescription of matters for definitions in these Regulations

For subsection 98(5A) of the Act, CASA may issue instruments prescribing matters for definitions in these Regulations relating to matters mentioned in the subsection.

201.030 Approvals by CASA—definitions in these Regulations

- (1) If a definition in these Regulations refers to a person holding an approval under this regulation, a person may apply, in writing, to CASA for the approval.

Regulation 201.030

- (2) Subject to regulation 11.055, CASA must grant the approval.
- (3) Subregulation 11.055(1B) applies to the granting of an approval under this regulation.

Part 202—Transitional

Table of contents

Subpart 202.AB—Transitional provisions for Part 1 (Preliminary)

Subpart 202.AD—Transitional provisions for Part 11 (Regulatory administrative procedures)

Division 202.AD.2—Amendments made by Schedule 3 to the Civil Aviation Safety Amendment (Remotely Piloted Aircraft and Model Aircraft—Registration and Accreditation) Regulations 2019

202.014 Applications by agents for authorisations

Subpart 202.AF—Transitional provisions for Part 13 (Enforcement)

Subpart 202.AJ—Transitional provisions for Part 21 (Certification and airworthiness requirements for aircraft and parts)

Division 202.AJ.1—Transitional provisions relating to certification of aircraft and aircraft components

Subdivision 202.AJ.1.A—Amendments made by Civil Aviation and Civil Aviation Safety Amendment Regulations 2011 (No. 1)

202.049A Certain design standards taken to be applicable airworthiness standards for regulation 21.017

Subdivision 202.AJ.1.B—Amendments made by Civil Aviation Amendment Regulations 1999 (No. 5)

202.050 Certificates of type approval

202.051 Certificates of airworthiness

202.052 Export certificate of airworthiness

Subdivision 202.AJ.1.C—Amendments made by Civil Aviation Legislation Amendment (Subpart 21.J) Regulation 2013

202.052A Transitional—certificates of approval for design activities

Subdivision 202.AJ.1.D—Amendments made by the Civil Aviation Legislation Amendment (Part 132) Regulation 2016

202.052AA Definitions for Subdivision 202.AJ.1.D

202.052B Applications for certain limited category certificates made but not finally determined before commencement time

202.052C Application of subregulations 21.176(5) and (5A)—limited category certificates issued on or after commencement time

202.052D Certain special purpose operations for limited category aircraft

202.052E Certain experimental certificates for certain ex-armed forces aircraft expire no later than 6 months after the commencement time

Division 202.AJ.2—Transitional provisions relating to approvals of designs of modifications and repairs

Subdivision 202.AJ.2.A—Amendments made by the Civil Aviation and Civil Aviation Safety Amendment Regulations 2011 (No. 1)

- 202.053 Approvals of systems of certification under regulation 34 of CAR
- 202.054 Approvals of designs of modifications and repairs under regulation 35 of CAR
- 202.055 Approvals of aircraft components for use as replacements under regulation 36 of CAR
- 202.056 Use of aircraft material for particular purposes under regulation 36A of CAR
- 202.058 Approval of changes to flight manuals under regulations 55 and 55A of CAR

Subdivision 202.AJ.2.B—Amendments made by the Civil Aviation Legislation Amendment (Part 21) Regulation 2014

- 202.058A Approval of damage as permissible unserviceability under regulation 21.007

Division 202.AJ.3—Transitional provisions relating to authorised persons

Subdivision 202.AJ.3.A—Amendments made by the Civil Aviation and Civil Aviation Safety Amendment Regulations 2011 (No. 1)

- 202.059 Authorised persons for regulations 35, 36 and 36A of CAR

Subpart 202.AK—Transitional provisions for Part 22 (Airworthiness standards for sailplanes and powered sailplanes)

- 202.060 Approvals under airworthiness instruments in force before 1 July 2009

Subpart 202.AL—Transitional provisions for Part 23 (Airworthiness standards for aeroplanes in the normal, utility, acrobatic or commuter category)

- 202.070 Approvals under airworthiness instruments in force before 1 July 2009

Subpart 202.AN—Transitional provisions for Part 25 (Airworthiness standards for aeroplanes in the transport category)

- 202.090 Approvals under airworthiness instruments in force before 1 July 2009

Subpart 202.AO—Transitional provisions for Part 26 (Airworthiness standards for aircraft in the primary category or intermediate category)

Subpart 202.AP—Transitional provisions for Part 27 (Airworthiness standards for rotorcraft in the normal category)

Subpart 202.AR—Transitional provisions for Part 29 (Airworthiness standards for rotorcraft in the transport category)

Subpart 202.AT—Transitional provisions for Part 31 (Airworthiness standards for manned free balloons)

Subpart 202.AU—Transitional provisions for Part 32 (Airworthiness standards for engines for very light aeroplanes)

- 202.140 Approvals under airworthiness instruments in force before 1 July 2009

Subpart 202.AV—Transitional provisions for Part 33 (Airworthiness standards for aircraft engines)

Subpart 202.AX—Transitional provisions for Part 35 (Airworthiness standards for aircraft propellers)

Subpart 202.AZ—Transitional provisions for Part 39 (Airworthiness directives)

- 202.170 Airworthiness directives
- 202.171 Application for exemption from, or variation of, requirement of airworthiness directive
- 202.172 Exemption from requirement of airworthiness directive

Subpart 202.BA—Transitional provisions for Part 42 (Continuing airworthiness requirements for aircraft and aeronautical products)

- 202.180 Application of Part 42
- 202.181 Election that Part 42 is to apply to an aircraft
- 202.183 Application of subparagraph 42.030(2)(c)(ii) (airworthiness review certificates) to existing and new aircraft
- 202.185 Approved maintenance programs taken to include approved systems of maintenance
- 202.186 Approved reliability programs taken to include reliability programs included in approved systems of maintenance
- 202.187 Defects recorded in maintenance releases (regulation 42.355)
- 202.188 References to authorised release certificates (subparagraphs 42.420(5)(a)(i) and (b)(i))
- 202.191 Maintenance certification taken to include certification of completion of maintenance (paragraph 42.745(c))
- 202.193 Reference to maintenance carried out in accordance with Part 42 (subparagraph 42.795(c)(i))
- 202.194 CASA may direct making of applications under regulation 42.585

Subpart 202.BD—Transitional provisions for Part 45 (Display of nationality and registration marks)

Division 202.BD.1—Amendments made by the Civil Aviation Amendment Regulation 2000 (No. 3)

- 202.200 Australian aircraft marked in accordance with CAR

Division 202.BD.2—Amendments made by Schedule 3 to the Civil Aviation Legislation Amendment (Airworthiness and Other Matters—2015 Measures No. 1) Regulation 2015

- 202.205 Approvals—markings on aircraft
- 202.210 Exemptions—antique, experimental and ex-military aircraft
- 202.215 Directions—aircraft with special configuration
- 202.220 Directions—identification plates

Subpart 202.BF—Transitional provisions for Part 47 (Registration of aircraft and related matters)

Division 202.BF.1—Transitional provisions relating to the commencement of Part 47

- 202.220 Definitions for Division 202.BF.1
 - 202.221 Continuation of Aircraft Register
 - 202.222 Reference to *holder of a certificate of registration*
 - 202.223 Registration under CAR to continue
 - 202.224 Pending applications or notices
-

202.225 Application to register aircraft under Part 47

Division 202.BF.2—Amendments made by the Civil Aviation Safety Amendment (Cape Town Convention) Regulation 2014

202.226 Definitions for Division 202.BF.2

202.227 Application of regulation 47.131A

202.228 Application of regulation 47.165

Subpart 202.CB—Transitional provisions for Part 61 (Flight crew licensing)

Division 202.CB.1—Amendments made by regulations commencing 1 September 2014

Subdivision 202.CB.1.1—General

202.260 Application of Division 202.CB.1—balloons excluded

202.261 Definitions for Division 202.CB.1

202.262 Application of Division 202.CB.1 to student pilot licences

Subdivision 202.CB.1.2—Continued authorisations

202.263 Continuation of old authorisations

202.264 Continuation of suspended old authorisations

202.265 Non-finalised action to vary, suspend or cancel old authorisations

202.266 Removal of conditions on certain continued authorisations

202.267 Flight review and proficiency check requirements

202.268 Removal of limitation on exercise of privileges of private or commercial pilot licences—multi-crew operations

202.268A Removal of limitation on exercise of privileges of class rating for aircraft prescribed under regulation 61.062

202.269 Personal log books under regulation 5.51 of CAR—certain continued authorisations

202.270 Extended meaning of *licence document* in Part 61

202.271 Expiry of Subdivision 202.CB.1.2 at end of 31 August 2018

Subdivision 202.CB.1.3—New authorisations for holders of old authorisations

202.272 Grant of equivalent new authorisations for certain holders of old authorisations

202.273 References to authorisations granted on the basis of regulation 202.272

Subdivision 202.CB.1.4—Other provisions

202.274 Non-finalised applications for old authorisations

202.275 Eligibility for ratings—former holders of time-limited authorisations

202.276 Flight review and proficiency check requirements for certain new authorisations

202.277 Personal logbooks—obligations for holders of old authorisations etc.

202.277C English competency for certain holders of student pilot licences

202.278 Grant of pilot type ratings on basis of overseas training and assessment

202.279 Instrument proficiency checks partially conducted by foreign-authorised person

202.281 Expiry of Division 202.CB.1 at end of 31 August 2025

Division 202.CB.2—Amendments made by the Civil Aviation Safety Amendment (Flight Crew Licensing Measures No. 1) Regulations 2020

202.290 Flight test requirements for 3D instrument approach operations endorsement

Subpart 202.CE—Transitional provisions for Part 64 (Authorisations for non-licensed personnel)**Division 202.CE.1—Amendments made by regulations commencing 1 September 2014****Subdivision 202.CE.1.1—Aircraft radiotelephone operator certificate of proficiency**

- 202.300 Definitions for Subdivision 202.CE.1.1
- 202.301 Continuation of old authorisations
- 202.302 Continuation of suspended old authorisations
- 202.303 Non-finalised action to vary, suspend or cancel old authorisations
- 202.304 Grant of aeronautical radio operator certificates for certain holders of old authorisations
- 202.304A References to aeronautical radio operator certificates granted on the basis of regulation 202.304
- 202.305 Non-finalised applications for old authorisations

Subdivision 202.CE.1.2—Approval to taxi an aeroplane

- 202.307 Definitions for Subdivision 202.CE.1.2
- 202.308 Continuation of old authorisations
- 202.309 Continuation of suspended old authorisations
- 202.310 Non-finalised action to vary, suspend or cancel old authorisations
- 202.311 Production of continued authorisation

Subdivision 202.CE.1.3—Expiry of Division 202.CE.1

- 202.312 Expiry of Division 202.CE.1

Subpart 202.CF—Transitional provisions for Part 65 (Air traffic services licensing)

- 202.320 Manual of Standards for Part 65
- 202.321 Persons holding certain licences

Subpart 202.CG—Transitional provisions for Part 66 (Continuing airworthiness—aircraft engineer licences and ratings)

- 202.340 Having regard to other airworthiness authorities in granting aircraft engineer licences
- 202.341 Category A licence holders and certification of completion of maintenance
- 202.342 Category A licence holders and final certificates for completion of maintenance
- 202.343 Category A licence holders and endorsing maintenance releases
- 202.355 Validation of certain licences and ratings granted subject to exclusions during relevant period

Subpart 202.CH—Transitional provisions for Part 67 (Medical)

- 202.360 Medical certificates issued under *Civil Aviation Regulations 1988*
- 202.361 Designated aviation medical examiners appointed under *Civil Aviation Regulations 1988*
- 202.362 Actions by Director of Aviation Medicine
- 202.363 Applications for issue of medical certificates pending on 3 September 2003

Subpart 202.DA—Transitional provisions for Part 71 (Airspace)**Subpart 202.EA—Transitional provisions for Part 90 (Additional airworthiness requirements)**

- 202.400 Transitional provision—Part 90 Manual of Standards

Subpart 202.EAA—Transitional provisions for Parts 91, 103, 105, 119, 121, 131, 133, 135 and 138

Division 202.EAA.1—Amendments made by the Civil Aviation Legislation Amendment (Flight Operations—Consequential Amendments and Transitional Provisions) Regulations 2021

Subdivision 202.EAA.1.1—Preliminary

- 202.405 Definitions for this Division
- 202.405A Meaning of *eligible instrument*
- 202.405B Meaning and effect of *new Regulations*
- 202.405C Relationship with section 7 of the *Acts Interpretation Act 1901*

Subdivision 202.EAA.1.2—Requirements for existing AOC holders before main commencement time

- 202.406 AOC holders to give CASA proposed operations manuals and expositions etc. before main commencement time

Subdivision 202.EAA.1.3—Existing AOCs due to expire

- 202.407 AOCs due to expire

Subdivision 202.EAA.1.4—Applications for Australian air transport AOCs made before main commencement time

- 202.408 Applications for Australian air transport AOCs under new law made before main commencement time
- 202.408A Applications for AOCs under old law made before main commencement time

Subdivision 202.EAA.1.5—Applications for balloon transport AOCs made before main commencement time

- 202.409 Applications for balloon transport AOCs under new law made before main commencement time

Subdivision 202.EAA.1.6—Applications for aerial work certificates made before main commencement time

- 202.410 Applications for aerial work certificates under new law made before main commencement time

Subdivision 202.EAA.1.7—Applications for instruments (other than AOCs and aerial work certificates) made before main commencement time

- 202.411 Applications for instruments (other than AOCs and aerial work certificates) under new law made before main commencement time
- 202.411A Applications for instruments (other than AOCs, aerial work certificates and exemptions) under old law made before main commencement time
- 202.411B Applications for exemptions under old law made before main commencement time

Subpart 202.EB—Transitional provisions for Part 91 (General operating and flight rules)

Subpart 202.EC—Transitional provisions for Part 92 (Consignment and carriage of dangerous goods by air)

202.440 Approval of certain training courses and instructors

Subpart 202.FA—Transitional provisions for Part 101 (Unmanned aircraft and rockets)

Division 202.FA.1—Amendments made by the Civil Aviation Legislation Amendment (Part 101) Regulation 2016

- 202.455 Definition of *commencement date* for Division 202.FA.1
202.460 Transitional—approved areas for UAVs
202.461 Transitional—UAV controllers
202.462 Transitional—UAV operators

Division 202.FA.2—Amendments made by Schedule 2 to the Civil Aviation Safety Amendment (Remotely Piloted Aircraft and Model Aircraft—Registration and Accreditation) Regulations 2019

- 202.463 Definitions for Division 202.FA.2
202.466 Delayed application—model aircraft

Subpart 202.FC—Transitional provisions for Part 103 (Sport and recreational aviation operations)

Subpart 202.FE—Transitional provisions for Part 105 (Parachuting from aircraft)

Division 202.FE.1—Amendments made by the Civil Aviation Legislation Amendment (Parts 103, 105 and 131) Regulations 2019

- 202.500 Definitions for Division 202.FE.1
202.501 Application of Part 105 to parachuting activities

Subpart 202.FJ—Transitional provisions for Part 115 (Operations using sport aviation aircraft for non-recreational activities)

Subpart 202.FL—Transitional provisions for Part 119 (Air operator certification—air transport)

Subpart 202.FN—Transitional provisions for Part 121A (Air transport operations—large aeroplanes)

Subpart 202.FO—Transitional provisions for Part 121B (Air transport operations—small aeroplanes)

Subpart 202.FR—Transitional provisions for Part 129 (Foreign air transport operators—certification and operating requirements)

Subpart 202.FS—Transitional provisions for Part 132 (Limited category aircraft)

Division 202.FS.1—Amendments made by the Civil Aviation Legislation Amendment (Part 132) Regulation 2016

- 202.609 Definitions for Division 202.FS.1
202.610 Warning placards
202.611 Permit indexes assigned by CASA or Australian Warbirds Association Limited
202.612 Limited category aircraft without permit index
202.613 Approval of major modifications and repairs

202.614 Approval to carry more than 6 passengers

Subpart 202.FT—Transitional provisions for Part 133 (Air transport and aerial work operations—rotorcraft)

Subpart 202.FV—Transitional provisions for Part 136 (Aerial work operations—other than those covered by Parts 133, 137, 138, 141 and 142)

Subpart 202.FW—Transitional provisions for Part 137 (Aerial agriculture operations—other than rotorcraft)

Subpart 202.FX—Transitional provisions for Part 138 (Search and rescue operations)

Subpart 202.FY—Transitional provisions for Part 139 (Aerodromes)

- 202.700 Definitions for this Subpart
- 202.701 Aerodrome licences issued under CAR
- 202.702 Conditions of transitional aerodrome licences
- 202.703 Duration of transitional aerodrome licences
- 202.704 Previous aerodrome manuals and standards for aerodromes
- 202.705 Exemptions

Subpart 202.FYH—Transitional provisions for Subpart 139.H (Aerodrome rescue and fire fighting services)

202.710 Manual of Standards for Subpart 139.H

Subpart 202.GA—Transitional provisions for Part 141 (Recreational, private and commercial pilot flight training, other than certain integrated training courses)

Subpart 202.GB—Transitional provisions for Part 142 (Integrated and multi-crew pilot flight training, contracted training and contracted checking)

Subpart 202.GC—Transitional provisions for Part 143 (Air traffic services training providers)

202.760 Manual of Standards for Part 143

Subpart 202.GD—Transitional provisions for Part 144 (Product distribution organisations)

Subpart 202.GE—Transitional provisions for Part 145 (Continuing airworthiness—Part 145 approved maintenance organisations)

Division 202.GE.1—Amendments made by the Civil Aviation and Civil Aviation Safety Amendment Regulations 2010 (No. 1)

202.800 CASA may direct making of applications under regulation 145.025

Division 202.GE.2—Amendments made by the Civil Aviation Legislation Amendment (Maintenance and Other Matters) Regulation 2013

Subdivision 202.GE.2.1—Part 145 organisations undertaking CAR maintenance activities—general

-
- 202.801 Interpretation for Division 202.GE.2—Part 145 references to maintenance services taken to include references to CAR maintenance activities
 - 202.802 Interpretation for Division 202.GE.2—Part 145 definition of *approval rating*
 - 202.803 Interpretation for Division 202.GE.2—Part 145 definition of *significant change*
 - 202.804 Part 145 Manual of Standards—additional matters for CAR maintenance activities

Subdivision 202.GE.2.2—Part 145 organisations undertaking CAR maintenance activities—approval of organisations

- 202.805 Applying for approval
- 202.806 Issuing approval
- 202.807 Approval certificate
- 202.808 Privileges for Part 145 organisations
- 202.809 Approval subject to conditions

Subdivision 202.GE.2.3—Part 145 organisations undertaking CAR maintenance activities—offence

- 202.810 Undertaking CAR maintenance activities

Subpart 202.GG—Transitional provisions for Part 147 (Continuing airworthiness—maintenance training organisations)

- 202.840 Recognised organisations taken to be maintenance training organisations
- 202.841 Applications for approval as a recognised organisation made but not finally determined before 27 June 2011
- 202.842 CASA may direct the making of applications under regulation 147.025

Subpart 202.GI—Transitional provisions for Part 149 (Approved self-administering aviation organisations)

Division 202.GI.1—Amendments made by the Civil Aviation Legislation Amendment (Part 149) Regulations 2018

- 202.860 Definition of *commencement day* for Division 202.GI.1
- 202.862 Transitional—holders of authorisations from bodies that become ASAOs

Subpart 202.HA—Transitional provisions for Part 171 (Aeronautical telecommunication service and radionavigation service providers)

- 202.880 Manual of Standards for Part 171

Subpart 202.HB—Transitional provisions for Part 172 (Air traffic service providers)

- 202.900 Manual of Standards for Part 172

Subpart 202.HC—Transitional provisions for Part 173 (Instrument flight procedure design)

Subpart 202.HD—Transitional provisions for Part 174 (Aviation meteorological services)

Subpart 202.HE—Transitional provisions for Part 175 (Aeronautical information management)

Subpart 202.HL—Transitional provisions for Part 200 (Exemptions)

Subpart 202.HM—Transitional provisions for Part 201 (Miscellaneous)

Subpart 202.AB—Transitional provisions for Part 1 (Preliminary)

Note: This Subpart heading is reserved for future use.

Part 202 Transitional

Subpart 202.AD Transitional provisions for Part 11 (Regulatory administrative procedures)

Division 202.AD.2 Amendments made by Schedule 3 to the Civil Aviation Safety Amendment (Remotely Piloted Aircraft and Model Aircraft—Registration and Accreditation) Regulations 2019

Regulation 202.014

Subpart 202.AD—Transitional provisions for Part 11 (Regulatory administrative procedures)

Division 202.AD.2—Amendments made by Schedule 3 to the Civil Aviation Safety Amendment (Remotely Piloted Aircraft and Model Aircraft—Registration and Accreditation) Regulations 2019

202.014 Applications by agents for authorisations

The amendments made by Schedule 3 to the *Civil Aviation Safety Amendment (Remotely Piloted Aircraft and Model Aircraft—Registration and Accreditation) Regulations 2019* apply in relation to an application to CASA for an authorisation covered by subregulation 11.033(2) (as inserted by those amendments) if the application is made on or after the commencement of that Schedule.

Note: Subregulation 11.033(2) covers remote pilot licences under Division 101.F.3, and other authorisations determined under subregulation 11.033(3).

Subpart 202.AF—Transitional provisions for Part 13 (Enforcement)

Note 1: This Subpart heading is reserved for future use.

Note 2: Regulation numbers 202.030 to 202.049 are reserved for use in this Subpart.

Part 202 Transitional

Subpart 202.AJ Transitional provisions for Part 21 (Certification and airworthiness requirements for aircraft and parts)

Division 202.AJ.1 Transitional provisions relating to certification of aircraft and aircraft components

Regulation 202.049A

**Subpart 202.AJ—Transitional provisions for Part 21
(Certification and airworthiness requirements for
aircraft and parts)**

**Division 202.AJ.1—Transitional provisions relating to certification of
aircraft and aircraft components**

**Subdivision 202.AJ.1.A—Amendments made by Civil Aviation and Civil
Aviation Safety Amendment Regulations 2011 (No. 1)**

**202.049A Certain design standards taken to be applicable airworthiness
standards for regulation 21.017**

- (1) A design standard for an aircraft:
 - (a) that was issued under regulation 21 of CAR; and
 - (b) that was in force immediately before 27 June 2011;is taken, on and after 27 June 2011, to be an applicable airworthiness standard for the aircraft for regulation 21.017.
- (2) A design standard for an aircraft component:
 - (a) that was issued under regulation 21A of CAR; and
 - (b) that was in force immediately before 27 June 2011;is taken, on and after 27 June 2011, to be an applicable airworthiness standard for the aircraft component for regulation 21.017.

**Subdivision 202.AJ.1.B—Amendments made by Civil Aviation
Amendment Regulations 1999 (No. 5)**

202.050 Certificates of type approval

- (1) A certificate of type approval for an aircraft, or an aircraft engine or a propeller, that was, immediately before 1 October 1998, in force under regulation 22 of CAR as then in force continues in force on and after that date as if it were a type certificate issued under regulation 21.013A or 21.029.
- (2) A certificate of type approval for an aircraft that was, immediately before 1 October 1998, in force under regulation 22A of CAR as then in force continues in force on and after that date as if it were a type acceptance certificate issued under regulation 21.029A.
- (3) A certificate of type approval continued in force under this regulation remains subject to any condition to which it was subject immediately before 1 October 1998.

202.051 Certificates of airworthiness

- (1) A certificate of airworthiness that was, immediately before 1 October 1998, in force under regulation 24 of CAR as then in force continues in force on and after that date as if it were a certificate of airworthiness issued under regulation 21.176.
- (2) A certificate of airworthiness continued in force under subregulation (1) remains subject to any condition to which it was subject immediately before 1 October 1998.
- (3) Subject to Division 7 of Part 4A of CAR, a direction that was, immediately before 1 October 1998, in force under paragraph 25(1)(b) of CAR as then in force continues in force on and after that date according to its terms.

202.052 Export certificate of airworthiness

An export certificate of airworthiness that was, immediately before 1 October 1998, in force under regulation 28 of CAR as then in force continues in force on and after that date as if it were an export airworthiness approval issued under regulation 21.324.

Subdivision 202.AJ.1.D—Amendments made by the Civil Aviation Legislation Amendment (Part 132) Regulation 2016

202.052AA Definitions for Subdivision 202.AJ.1.D

In this Subdivision:

commencement time means the commencement of the *Civil Aviation Legislation Amendment (Part 132) Regulation 2016*.

202.052B Applications for certain limited category certificates made but not finally determined before commencement time

- (1) This regulation applies if, before the commencement time, an application for a limited category certificate for an aircraft was made but had not been finally determined.
- (2) The application must be determined in accordance with regulations 21.176 and 21.189 as in force before the commencement time.

202.052C Application of subregulations 21.176(5) and (5A)—limited category certificates issued on or after commencement time

Subregulations 21.176(5) and (5A) apply to a limited category certificate for an aircraft issued on or after the commencement time.

Part 202 Transitional

Subpart 202.AJ Transitional provisions for Part 21 (Certification and airworthiness requirements for aircraft and parts)

Division 202.AJ.1 Transitional provisions relating to certification of aircraft and aircraft components

Regulation 202.052D

202.052D Certain special purpose operations for limited category aircraft

- (1) This regulation applies if, immediately before the commencement time, a person held a special certificate of airworthiness for operating an historic or ex-military aircraft in adventure style operations.
- (2) The person is taken, on and after the commencement time, to hold a special certificate of airworthiness for conducting adventure flights in an historic or ex-military aircraft.

202.052E Certain experimental certificates for certain ex-armed forces aircraft expire no later than 6 months after the commencement time

- (1) This regulation applies to an experimental certificate for an ex-armed forces aircraft if:
 - (a) it was in force or under suspension immediately before the commencement time; and
 - (b) it was issued for a purpose mentioned in paragraph 21.191(d) (exhibition).

Note: A suspended certificate is taken not to be in force: see regulations 11.132, 21.002C and 21.195B.

- (2) The certificate expires at the earliest of the following times:
 - (a) if a period for which the certificate is in force is specified in the certificate—the end of the period;
 - (b) when a limited category certificate is issued for the aircraft;
 - (c) when the certificate is cancelled;
 - (d) when the aircraft ceases to be registered in Australia;
 - (e) the day after the end of the period of 6 months beginning at the commencement time.
- (3) This regulation applies despite subregulation 21.195B(2).

Division 202.AJ.2—Transitional provisions relating to approvals of designs of modifications and repairs

Subdivision 202.AJ.2.A—Amendments made by the Civil Aviation and Civil Aviation Safety Amendment Regulations 2011 (No. 1)

202.053 Approvals of systems of certification under regulation 34 of CAR

Despite the repeal of regulation 34 of CAR:

- (a) an approval of a system of certification under that regulation, being an approval that was in force immediately before 27 June 2011, continues in force on and after 27 June 2011 according to its terms; and
- (b) CASA may vary, suspend or revoke the approval as if that regulation had not been repealed.

202.054 Approvals of designs of modifications and repairs under regulation 35 of CAR

- (1) Despite the repeal of regulation 35 and subregulations 47(4) and (7) of CAR:
 - (a) an approval of a design of a modification or repair that was in force under subregulation 35(2) or (6) of CAR immediately before 27 June 2011 continues in force on and after 27 June 2011 according to its terms; and
 - (b) an authorisation that was in force under subregulation 35(3) of CAR immediately before 27 June 2011 continues in force on and after 27 June 2011 according to its terms; and
 - (c) subregulations 47(4) and (7) of CAR, as in force immediately before 27 June 2011, continue to apply to such an authorisation as if neither regulation 35 of CAR, nor those subregulations, had been repealed; and
 - (d) CASA may vary, suspend or revoke such an approval or authorisation as if regulation 35 of CAR had not been repealed.
- (2) If:
 - (a) before 27 June 2011, an application was made to CASA or an authorised person under regulation 35 of CAR for the approval of the design of a modification or repair; and
 - (b) the application was not finally determined by CASA or the authorised person immediately before 27 June 2011;the application is taken, on and after 27 June 2011, to be an application for a modification/repair design approval made to CASA or the authorised person under regulation 21.405.

202.055 Approvals of aircraft components for use as replacements under regulation 36 of CAR

- (1) Despite the repeal of regulation 36 and subregulations 47(4) and (7) of CAR:

Part 202 Transitional

Subpart 202.AJ Transitional provisions for Part 21 (Certification and airworthiness requirements for aircraft and parts)

Division 202.AJ.2 Transitional provisions relating to approvals of designs of modifications and repairs

Regulation 202.056

- (a) an approval of an aircraft component, or aircraft components included in a type of aircraft component, for use as a replacement that was in force under subregulation 36(2) or (6) of CAR immediately before 27 June 2011 continues in force on and after 27 June 2011 according to its terms; and
- (b) an authorisation that was in force under subregulation 36(3) of CAR immediately before 27 June 2011 continues in force on and after 27 June 2011 according to its terms; and
- (c) subregulations 47(4) and (7) of CAR, as in force immediately before 27 June 2011, continue to apply to such an authorisation as if neither regulation 36 of CAR, nor those subregulations, had been repealed; and
- (d) CASA may vary, suspend or revoke such an approval or authorisation as if regulation 36 of CAR had not been repealed.

(2) If:

- (a) before 27 June 2011, an application was made to CASA or an authorised person for an approval under regulation 36 of CAR; and
- (b) the application was not finally determined by CASA or the authorised person immediately before 27 June 2011;

the application is taken, on and after 27 June 2011, to be an application for a modification/repair design approval made to CASA or the authorised person under regulation 21.405.

202.056 Use of aircraft material for particular purposes under regulation 36A of CAR

(1) Despite the repeal of regulation 36A of CAR:

- (a) a direction under subregulation 36A(2) of CAR that was in force immediately before 27 June 2011 continues in force on and after 27 June 2011 according to its terms; and
- (b) subregulation 36A(3) of CAR, as in force immediately before 27 June 2011, continues to apply to such a direction as if regulation 36A of CAR had not been repealed; and
- (c) CASA may vary, suspend or revoke such a direction as if regulation 36A of CAR had not been repealed.

(2) Despite the repeal of regulation 36A of CAR:

- (a) an approval of an aircraft material, being an approval that was in force under subregulation 36A(3A) of CAR immediately before 27 June 2011, continues in force on and after 27 June 2011 according to its terms; and
- (b) CASA may vary, suspend or revoke such an approval as if regulation 36A of CAR had not been repealed.

(3) If:

- (a) before 27 June 2011, a person asked CASA or an authorised person to approve the use of aircraft material for a particular purpose under regulation 36A of CAR; and
- (b) CASA or the authorised person has not, before 27 June 2011, decided whether or not to approve the use of the material;

the request is taken, on and after 27 June 2011, to be an application for a modification/repair design approval made to CASA or the authorised person under regulation 21.405.

202.058 Approval of changes to flight manuals under regulations 55 and 55A of CAR

- (1) Despite the repeal of regulation 55 of CAR, an approval of a change to an aircraft's flight manual that was in force under that regulation immediately before 27 June 2011 continues in force on and after 27 June 2011 as if it were an approval given under regulation 21.006A.
- (2) If:
 - (a) before 27 June 2011, a person asked CASA or an authorised person to approve a change to an aircraft's flight manual under regulation 55 of CAR; and
 - (b) CASA or the authorised person has not, before 27 June 2011, decided whether or not to give the approval;the request is taken, on and after 27 June 2011, to be an application for approval of the change made to CASA or the authorised person under regulation 21.006A.
- (3) Despite the repeal of regulation 55A of CAR, an approval of a change to an aircraft's flight manual that was in force under that regulation immediately before 27 June 2011 continues in force on and after 27 June 2011 as if it were an approval given by CASA under regulation 21.006A.
- (4) If:
 - (a) before 27 June 2011, an application was made under regulation 55A of CAR for the approval of a change to an aircraft's flight manual; and
 - (b) the application was not finally determined by CASA immediately before 27 June 2011;the application is taken, on and after 27 June 2011, to be an application for approval of the change under regulation 21.006A.

Subdivision 202.AJ.2.B—Amendments made by the Civil Aviation Legislation Amendment (Part 21) Regulation 2014

202.058A Approval of damage as permissible unserviceability under regulation 21.007

Despite the amendment of regulation 21.007 by the *Civil Aviation Legislation Amendment (Part 21) Regulation 2014*, an approval of damage as a permissible unserviceability that was in force immediately before 1 May 2014 continues in force in accordance with its terms.

Part 202 Transitional

Subpart 202.AJ Transitional provisions for Part 21 (Certification and airworthiness requirements for aircraft and parts)

Division 202.AJ.3 Transitional provisions relating to authorised persons

Regulation 202.059

Division 202.AJ.3—Transitional provisions relating to authorised persons

Subdivision 202.AJ.3.A—Amendments made by the Civil Aviation and Civil Aviation Safety Amendment Regulations 2011 (No. 1)

202.059 Authorised persons for regulations 35, 36 and 36A of CAR

- (1) This regulation applies to a person who was, immediately before 27 June 2011, an authorised person appointed under regulation 6 of CAR for the purposes of regulation 35, 36 or 36A of CAR (as in force before 27 June 2011).
- (2) CASA is taken to have appointed the person on 27 June 2011 under regulation 201.001 to be an authorised person for regulations 21.006A and 21.009 and the provisions of Subpart 21.M.
- (3) The appointment is subject to the conditions to which the person's appointment as an authorised person under regulation 6 of CAR was subject to immediately before 27 June 2011.
- (4) However, the appointment expires:
 - (a) when the person's appointment as an authorised person for regulation 35, 36 or 36A of CAR would have expired; or
 - (b) at the end of 26 June 2013; or
 - (c) when it is revoked;whichever happens first.

Subpart 202.AK—Transitional provisions for Part 22 (Airworthiness standards for sailplanes and powered sailplanes)

202.060 Approvals under airworthiness instruments in force before 1 July 2009

- (1) Despite the amendments of Part 22 taking effect on 1 July 2009:
 - (a) an approval that:
 - (i) was given by CASA under a repealed provision; and
 - (ii) was in effect immediately before 1 July 2009;has effect on and after 1 July 2009 as if those amendments had not been made; and
 - (b) CASA may suspend or cancel an approval mentioned in paragraph (a) if it is necessary in the interests of aviation safety.
- (2) In this regulation:

repealed provision means regulation 22.006, 22.007, 22.008 or 22.009 as in force immediately before 1 July 2009.

Part 202 Transitional

Subpart 202.AL Transitional provisions for Part 23 (Airworthiness standards for aeroplanes in the normal, utility, acrobatic or commuter category)

Regulation 202.070

**Subpart 202.AL—Transitional provisions for Part 23
(Airworthiness standards for aeroplanes in the
normal, utility, acrobatic or commuter category)**

202.070 Approvals under airworthiness instruments in force before 1 July 2009

- (1) Despite the amendments of Part 23 taking effect on 1 July 2009:
 - (a) an approval that:
 - (i) was given by CASA under a repealed provision; and
 - (ii) was in effect immediately before 1 July 2009;has effect on and after 1 July 2009 as if those amendments had not been made; and
 - (b) CASA may suspend or cancel an approval mentioned in paragraph (a) if it is necessary in the interests of aviation safety.
- (2) In this regulation:

repealed provision means regulation 23.007 or 23.008 as in force immediately before 1 July 2009.

Subpart 202.AN—Transitional provisions for Part 25 (Airworthiness standards for aeroplanes in the transport category)

202.090 Approvals under airworthiness instruments in force before 1 July 2009

- (1) Despite the amendments of Part 25 taking effect on 1 July 2009:
 - (a) an approval that:
 - (i) was given by CASA under the former regulation 25.006; and
 - (ii) was in effect immediately before 1 July 2009;has effect on and after 1 July 2009 as if those amendments had not been made; and
 - (b) CASA may suspend or cancel an approval mentioned in paragraph (a) if it is necessary in the interests of aviation safety.

- (2) In this regulation:

the former regulation 25.006 means regulation 25.006 as in force immediately before 1 July 2009.

Part 202 Transitional

Subpart 202.AO Transitional provisions for Part 26 (Airworthiness standards for aircraft in the primary category or intermediate category)

**Subpart 202.AO—Transitional provisions for Part 26
(Airworthiness standards for aircraft in the primary
category or intermediate category)**

Note 1: This Subpart heading is reserved for future use.

Note 2: Regulation numbers 202.100 to 202.109 are reserved for use in this Subpart.

Subpart 202.AP—Transitional provisions for Part 27 (Airworthiness standards for rotorcraft in the normal category)

Note 1: This Subpart heading is reserved for future use.

Note 2: Regulation numbers 202.110 to 202.119 are reserved for use in this Subpart.

Part 202 Transitional

Subpart 202.AR Transitional provisions for Part 29 (Airworthiness standards for rotorcraft in the transport category)

Subpart 202.AR—Transitional provisions for Part 29 (Airworthiness standards for rotorcraft in the transport category)

Note 1: This Subpart heading is reserved for future use.

Note 2: Regulation numbers 202.120 to 202.129 are reserved for use in this Subpart.

Subpart 202.AT—Transitional provisions for Part 31 (Airworthiness standards for manned free balloons)

Note 1: This Subpart heading is reserved for future use.

Note 2: Regulation numbers 202.130 to 202.139 are reserved for use in this Subpart.

Subpart 202.AU—Transitional provisions for Part 32 (Airworthiness standards for engines for very light aeroplanes)

202.140 Approvals under airworthiness instruments in force before 1 July 2009

- (1) Despite the amendments of Part 32 taking effect on 1 July 2009:
 - (a) an approval that:
 - (i) was given by CASA under the former regulation 32.004; and
 - (ii) was in effect immediately before 1 July 2009;has effect on and after 1 July 2009 as if those amendments had not been made; and
 - (b) CASA may suspend or cancel an approval mentioned in paragraph (a) if it is necessary in the interests of aviation safety.
- (2) In this regulation:

the former regulation 32.004 means regulation 32.004 as in force immediately before 1 July 2009.

Subpart 202.AV—Transitional provisions for Part 33 (Airworthiness standards for aircraft engines)

Note 1: This Subpart heading is reserved for future use.

Note 2: Regulation numbers 202.150 to 202.159 are reserved for use in this Subpart.

Part 202 Transitional

Subpart 202.AX Transitional provisions for Part 35 (Airworthiness standards for aircraft propellers)

Subpart 202.AX—Transitional provisions for Part 35 (Airworthiness standards for aircraft propellers)

Note 1: This Subpart heading is reserved for future use.

Note 2: Regulation numbers 202.160 to 202.169 are reserved for use in this Subpart.

Subpart 202.AZ—Transitional provisions for Part 39 (Airworthiness directives)

202.170 Airworthiness directives

If an airworthiness directive issued under regulation 37A of CAR, or such an airworthiness directive as subsequently varied, had effect immediately before 1 January 2000, then, subject to these Regulations, the airworthiness directive, or the airworthiness directive as varied, continues to have effect on and after that day as if it were an airworthiness directive issued by CASA under regulation 39.001.

202.171 Application for exemption from, or variation of, requirement of airworthiness directive

If an application under regulation 42ZR of CAR for an exemption from, or a variation of, a requirement of an airworthiness directive, in so far as it relates to a particular aircraft, was still pending immediately before 1 January 2000, the application has effect as if it were a written request made by the applicant, on that day, for CASA to exclude, under regulation 39.004, the aircraft from the operation of the airworthiness directive.

202.172 Exemption from requirement of airworthiness directive

If an exemption from a requirement of an airworthiness directive granted, under regulation 42ZS of CAR, in relation to an aircraft was still in force immediately before 1 January 2000, then, subject to these Regulations, the exemption has effect as if it were an instrument issued under regulation 39.004, on that day, excluding the aircraft from the operation of the airworthiness directive.

Subpart 202.BA—Transitional provisions for Part 42 (Continuing airworthiness requirements for aircraft and aeronautical products)

202.180 Application of Part 42

- (1) Part 42 applies to:
 - (a) a registered aircraft that is used to conduct a Part 121 operation that is a scheduled air transport operation; and
 - (aa) a registered aircraft that is used to conduct a Part 135 operation that is a scheduled air transport operation; and
 - (b) a registered aircraft for which an election under regulation 202.181 is in force; and
 - (c) an aeronautical product for an aircraft mentioned in paragraph (a) or (b).
- (2) Part 42 applies to a Part 145 organisation that is providing maintenance services for:
 - (a) an aircraft mentioned in paragraph (1)(a) or (b); or
 - (b) an aeronautical product for an aircraft mentioned in paragraph (1)(a) or (b).
- (3) Part 42 applies to an independent maintainer mentioned in item 4 or 5 of table 42.300 who is carrying out maintenance on an aircraft mentioned in paragraph (1)(a) or (b).

202.181 Election that Part 42 is to apply to an aircraft

- (1) This regulation applies to any of the following:
 - (a) a registered aircraft that is used to conduct a Part 121 operation that is not a scheduled air transport operation;
 - (b) a registered aircraft that is used to conduct a Part 133 operation;
 - (c) a registered aircraft that is used to conduct a Part 135 operation that is not a scheduled air transport operation;
 - (d) a registered aircraft that is used to conduct an aerial work operation under an aerial work certificate;
 - (e) a registered aircraft that is used to conduct an aerial application operation under an AOC;
 - (f) a registered aircraft that is used to conduct authorised Part 141 flight training or an authorised Part 142 activity;
 - (g) a registered large aircraft that is not authorised to operate under an AOC, an aerial work certificate or a Part 141 certificate.
- (2) The registered operator of the aircraft may, by written notice given to CASA, elect that Part 42 is to apply to the aircraft.
- (3) An election under this regulation must be in the approved form.

Regulation 202.183

-
- (4) An election under this regulation is not revocable.
 - (5) However, an election under this regulation for an aircraft ceases to be in force if there is a change of registered operator for the aircraft.

202.183 Application of subparagraph 42.030(2)(c)(ii) (airworthiness review certificates) to existing and new aircraft

Existing aircraft

- (1) Subparagraph 42.030(2)(c)(ii) applies to the registered operator of an existing aircraft of a particular type and model on and after the day that is 3 years after the approval day for the operator for that type and model of aircraft.
- (2) An aircraft of a particular type and model is an **existing aircraft** for a registered operator if the aircraft is mentioned in the registered operator's AOC on the approval day for the operator for that type and model of aircraft.

New aircraft

- (3) Subparagraph 42.030(2)(c)(ii) applies to the registered operator of a new aircraft of a particular type and model on and after the day after the approval day for the operator for that type and model of aircraft.
- (4) An aircraft of a particular type and model is a **new aircraft** for a registered operator if the aircraft was added to the registered operator's AOC after the approval day for the operator for that type and model of aircraft.

Approval day

- (5) In this regulation:

approval day, for the registered operator of a particular type and model of aircraft, means the day when the operator is approved as a continuing airworthiness management organisation for that type and model of aircraft.

202.185 Approved maintenance programs taken to include approved systems of maintenance

For Part 42, a reference to an approved maintenance program for an aircraft is taken to include an approved system of maintenance for the aircraft.

202.186 Approved reliability programs taken to include reliability programs included in approved systems of maintenance

For Part 42, a reference to an approved reliability program for an aircraft is taken to include a reliability program included in an approved system of maintenance for the aircraft.

Regulation 202.187

202.187 Defects recorded in maintenance releases (regulation 42.355)

- (2) For regulation 42.355, if a maintenance release that is in force for an aircraft immediately before Part 42 begins to apply to the aircraft is endorsed with information about a defect in the aircraft, the defect is taken to be recorded in the continuing airworthiness records system for the aircraft.

- (3) In this regulation:

maintenance release, for the registered operator of an aircraft, includes another document approved by CASA for use by the operator as an alternative for the purposes of regulation 49 or 50 of CAR.

202.188 References to authorised release certificates (subparagraphs 42.420(5)(a)(i) and (b)(i))

For subparagraphs 42.420(5)(a)(i) and (b)(i), a reference to an authorised release certificate is taken to include an authorised release certificate, within the meaning given by subclause 18(1) of Part 2 of the Dictionary, that is issued before 27 June 2013.

202.191 Maintenance certification taken to include certification of completion of maintenance (paragraph 42.745(c))

- (1) This regulation applies to an approved maintenance organisation that, before becoming an approved maintenance organisation:
- (a) was the holder of a certificate of approval that covered maintenance of aircraft or aircraft components; and
 - (b) carried out maintenance on an aircraft.
- (2) For paragraph 42.745(c), a reference to maintenance certification having been performed for maintenance carried out on an aircraft is taken to include, in relation to maintenance mentioned in paragraph (1)(b), certification of the completion of the maintenance in accordance with regulation 42ZE or 42ZN of CAR.

202.193 Reference to maintenance carried out in accordance with Part 42 (subparagraph 42.795(c)(i))

- (1) This regulation applies to an approved maintenance organisation that, before becoming an approved maintenance organisation:
- (a) was the holder of a certificate of approval that covered maintenance of aircraft or aircraft components; and
 - (b) carried out maintenance:
 - (i) on an aeronautical product that is an aircraft component; and
 - (ii) in accordance with the approved maintenance data for the component.

Note: For the definition of *approved maintenance data*, see subsection 2(1) of CAR.

Regulation 202.194

- (2) For subparagraph 42.795(c)(i), a reference to maintenance having been carried out on the product in accordance with Part 42 is taken to include maintenance mentioned in paragraph (1)(b).

202.194 CASA may direct making of applications under regulation 42.585

- (1) CASA may direct the registered operator of an aircraft of a particular type and model to make an application under regulation 42.585 for approval as a continuing airworthiness management organisation for that type and model of aircraft.
- (2) A direction under this regulation must:
- (a) be in writing; and
 - (b) specify the time within which the direction must be complied with.
- (3) A person to whom a direction is given must comply with the direction within the time specified in the direction.

Note: CASA intends to give directions under this regulation to assist it in managing the implementation of Part 42.

Part 202 Transitional

Subpart 202.BD Transitional provisions for Part 45 (Display of nationality and registration marks)

Division 202.BD.1 Amendments made by the Civil Aviation Amendment Regulation 2000 (No. 3)

Regulation 202.200

Subpart 202.BD—Transitional provisions for Part 45 (Display of nationality and registration marks)

Division 202.BD.1—Amendments made by the Civil Aviation Amendment Regulation 2000 (No. 3)

202.200 Australian aircraft marked in accordance with CAR

Despite Part 45, an Australian aircraft registered before 1 October 2000 need not bear markings that comply with that Part until it is repainted if, until then, the aircraft bears nationality marks and registration marks in accordance with Division 7 of Part 3 of CAR (as in force immediately before 1 October 2000).

**Division 202.BD.2—Amendments made by Schedule 3 to the Civil
Aviation Legislation Amendment (Airworthiness and Other
Matters—2015 Measures No. 1) Regulation 2015**

202.205 Approvals—markings on aircraft

- (1) This regulation applies to an approval that was in force under regulation 45.090 immediately before 4 July 2016.
- (2) The approval has effect, on and after 4 July 2016, as if it were an approval granted under regulation 45.060.

202.210 Exemptions—antique, experimental and ex-military aircraft

Despite the amendments of these Regulations made by Schedule 3 to the *Civil Aviation Legislation Amendment (Airworthiness and Other Matters—2015 Measures No. 1) Regulation 2015*, regulation 45.100 (as in force immediately before 4 July 2016) continues to apply to an aircraft covered by paragraphs 45.100(1)(a) and (b) until the aircraft is repainted as if a reference in that regulation to regulations 45.045, 45.050, 45.055, 45.060, 45.065, 45.070, 45.075, 45.080 and 45.085 were a reference to the requirements prescribed by the Part 45 Manual of Standards under regulation 45.050.

202.215 Directions—aircraft with special configuration

- (1) This regulation applies to a written direction that was in force under regulation 45.105 immediately before 4 July 2016.
- (2) The direction has effect, on and after 4 July 2016, as if it were an approval granted under regulation 45.065.

202.217 Directions—identification plates

- (1) This regulation applies to a written direction that was in force under regulation 45.150 immediately before 4 July 2016.
- (2) The direction has effect, on and after 4 July 2016, as if it were an approval granted under regulation 45.140.

Subpart 202.BF—Transitional provisions for Part 47 (Registration of aircraft and related matters)

Division 202.BF.1—Transitional provisions relating to the commencement of Part 47

202.220 Definitions for Division 202.BF.1

In this Division:

certificate of registration means a certificate of registration issued under the old Regulations.

eligible person has the meaning given by regulation 47.010.

old Regulations means CAR as in force immediately before 15 November 2004.

property interest has the meaning given by the old Regulations.

registered operator has the meaning given by regulation 47.100.

202.221 Continuation of Aircraft Register

- (1) For Subpart 47.B, the Aircraft Register mentioned in regulation 8 of the old Regulations (the *Aircraft Register*) continues in existence under the name *Australian Civil Aircraft Register*.
- (2) Entries made in the Aircraft Register under Part 3 of the old Regulations are incorporated in, and form part of, the Australian Civil Aircraft Register.

202.222 Reference to holder of a certificate of registration

- (1) A reference in CAR to the holder of a certificate of registration of an aircraft is taken to be a reference to the registered operator of the aircraft.
- (2) A duty imposed on the holder of a certificate of registration of an aircraft is taken to be imposed on the registered operator of the aircraft.

202.223 Registration under CAR to continue

- (1) The registration of an aircraft in the Aircraft Register continues as if the old Regulations were still in force until:
 - (a) the day when CASA registers, or refuses to register, the aircraft under Part 47; or
 - (b) CASA cancels the registration.

Note: After 15 November 2005, CASA may cancel or suspend the registration of an aircraft if the owner of the aircraft does not reply to a request made under subregulation 202.225(5).

- (2) However, CASA must not accept an application for a change of any details about an aircraft that are kept in the Aircraft Register, other than an application for:
 - (a) a change of name or address of the holder of the certificate of registration, or a property interest holder, of the aircraft; or
 - (b) the cancellation of the registration of the aircraft.
- (3) If the registration of an aircraft is suspended under the old Regulations, the suspension continues as if the old Regulations were still in force.

202.224 Pending applications or notices

- (1) This regulation applies if:
 - (a) before 15 November 2004, a person applied to CASA or sent CASA a notice under Part 3 of the old Regulations; and
 - (b) on or after 15 November 2004, CASA had not decided about the application or acted on the notice.
- (2) CASA must decide about the application or act on the notice as if the old Regulations were still in force.

202.225 Application to register aircraft under Part 47

- (1) The owner of an aircraft that is registered in the Aircraft Register may apply to CASA to register the aircraft under Part 47.
- (2) The application must be made in an approved form and include:
 - (a) the aircraft's registration mark, manufacturer, model and serial number; and
 - (b) the name, address and signature of the owner of the aircraft; and
 - (c) the registered operator's name and postal address, and:
 - (i) if the registered operator is an individual—his or her home address; or
 - (ii) if the registered operator is a corporation—the address of the corporation's registered office; and
 - (d) the name, address and signature of the person who holds the certificate of registration; and
 - (e) the name, address and signature of each person who holds a property interest in the aircraft.
- (3) If CASA receives an application in accordance with subregulation (2), CASA must register the aircraft.
- (4) However, CASA may approve an application without 1 or more of the signatures required by paragraph (2)(e), if there is other evidence available to demonstrate that the application is genuine.
- (5) If, after 15 November 2005, CASA asks an applicant, or the owner of an aircraft, to provide information, or take an action, to complete an application in the approved form, the applicant, or owner, must provide the information, or take the action, within 90 days of CASA making the request.

Part 202 Transitional

Subpart 202.BF Transitional provisions for Part 47 (Registration of aircraft and related matters)

Division 202.BF.1 Transitional provisions relating to the commencement of Part 47

Regulation 202.225

Note: Regulation 47.045 of CASR sets out relevant directions about communicating with CASA.

- (6) CASA may cancel or suspend the registration of the aircraft if the applicant, or owner of the aircraft, fails to comply with subregulation (5).

Note: An explanation of the procedures that apply in relation to a suspension are set out in the advisory circular AC 47-1 which can be viewed at, or downloaded from, CASA's website: www.casa.gov.au.

Division 202.BF.2—Amendments made by the Civil Aviation Safety Amendment (Cape Town Convention) Regulation 2014

202.226 Definitions for Division 202.BF.2

In this Division:

amending regulation means the *Civil Aviation Safety Amendment (Cape Town Convention) Regulation 2014*.

commencement means the commencement of the amending regulation.

202.227 Application of regulation 47.131A

Regulation 47.131A applies if:

- (a) CASA became aware, before commencement, that a registered operator of an aircraft was not an eligible person, but CASA has not, as at commencement, issued a notice cancelling the registration of the aircraft;
or
- (b) CASA becomes aware, after commencement, that a registered operator of an aircraft is not an eligible person (whether the aircraft is registered before or after commencement).

202.228 Application of regulation 47.165

The amendment of regulation 47.165 made by the amending regulation applies in relation to applications under that regulation approved after commencement (whether the application is made before or after commencement).

Subpart 202.CB—Transitional provisions for Part 61 (Flight crew licensing)

Division 202.CB.1—Amendments made by regulations commencing 1 September 2014

- Note: The regulations comprise:
- (a) the *Civil Aviation Legislation Amendment Regulation 2013 (No. 1)*; and
 - (b) the *Civil Aviation Legislation Amendment (Flight Crew Licensing and Other Matters) Regulation 2013*; and
 - (c) the *Civil Aviation Legislation Amendment (Flight Crew Licensing) Regulation 2014*.

Subdivision 202.CB.1.1—General

202.260 Application of Division 202.CB.1—balloons excluded

This Division does not apply in relation to an old authorisation for a balloon.

202.261 Definitions for Division 202.CB.1

In this Division:

amendments means:

- (a) the amendments of these Regulations made by:
 - (i) the *Civil Aviation Legislation Amendment Regulation 2013 (No. 1)*; and
 - (ii) the *Civil Aviation Legislation Amendment (Flight Crew Licensing and Other Matters) Regulation 2013*; and
 - (iii) the *Civil Aviation Legislation Amendment (Flight Crew Licensing) Regulation 2014*; and
- (b) the amendments of the following commencing immediately before the commencement of the *Civil Aviation Legislation Amendment Regulation 2013 (No. 1)*:
 - (i) Civil Aviation Order 29.6;
 - (ii) Civil Aviation Order 29.10;
 - (iii) Civil Aviation Order 29.11; and
- (c) the amendments of Civil Aviation Order 82.6 commencing on 1 September 2014.

approved course of training: see regulation 61.010.

Certificate IV in Training and Assessment: see regulation 61.010.

cessation time, for an old authorisation that is continued in force under this Division, means the earliest of the following:

- (a) when the old authorisation expires or is surrendered or cancelled;

- (b) when CASA grants a new authorisation to the holder of the old authorisation as a replacement for the old authorisation;
- (c) the end of 31 August 2018.

continued authorisation means an old authorisation that is continued in force under subregulation 202.263(1) or subparagraph 202.264(2)(b)(ii).

new authorisation means a flight crew licence, rating or endorsement granted under Part 61.

old authorisation:

- (a) means a civil aviation authorisation to carry out an activity essential to, or associated with, the operation of an aircraft in flight (a **flight activity**) issued under either of the following before 1 September 2014:
 - (i) Part 5 of CAR;
 - (ii) a relevant CAO; and
- (b) includes the following:
 - (i) an appointment as an approved person under a relevant CAO for a flight activity;
 - (ii) an approval or certification, including a certification in a personal log book, under CAR or a relevant CAO to carry out a flight activity;
 - (iii) a delegation under CAR to give a permission (however described) to conduct a flight activity.

relevant CAO means any of the following:

- (a) a Civil Aviation Order made under Part 5 of CAR;
- (b) Civil Aviation Order 29.6;
- (c) Civil Aviation Order 29.10;
- (d) Civil Aviation Order 29.11;
- (e) Civil Aviation Order 82.6.

time-limited authorisation: see regulation 11.015.

202.262 Application of Division 202.CB.1 to student pilot licences

- (1) This Division applies to a student pilot licence issued under Part 5 of CAR only if the holder of the licence passed a general flying progress test under Part 5 of CAR before 1 September 2014.
- (2) For this Division, the student pilot licence is taken to be equivalent to a recreational pilot licence.

Subdivision 202.CB.1.2—Continued authorisations

202.263 Continuation of old authorisations

- (1) Despite the amendments, an old authorisation that was in force immediately before 1 September 2014 is continued in force on and after 1 September 2014 according to its terms.

Regulation 202.264

- (2) Part 61 applies to the continued authorisation as if it were the equivalent new authorisation.
- (2A) For subregulation (2), if the old authorisation is an aircraft endorsement for a type of aircraft for which there is no equivalent pilot type rating, the aircraft endorsement is taken to be equivalent to a class rating for the class of aircraft that includes the type of aircraft.
- (3) The continued authorisation ceases to be in force at its cessation time.
- (4) Subregulation (3) applies despite Parts 11 and 61.

202.264 Continuation of suspended old authorisations

- (1) This regulation applies to an old authorisation that was under suspension immediately before 1 September 2014.
- (2) Despite the amendments:
 - (a) the suspension continues according to its terms on and after 1 September 2014; and
 - (b) if the suspension ends before the cessation time for the authorisation:
 - (i) the old authorisation comes back into force at the end of the suspension; and
 - (ii) the old authorisation is continued in force on and after the time mentioned in subparagraph (i) according to its terms; and
 - (iii) Part 61 applies to the old authorisation as if it were the equivalent new authorisation; and
 - (iv) the old authorisation ceases to be in force at its cessation time.
- (3) Subparagraph (2)(b)(iv) applies despite Parts 11 and 61.

202.265 Non-finalised action to vary, suspend or cancel old authorisations

Action to vary, suspend or cancel a person's old authorisation that, immediately before 1 September 2014, had not been finally determined is taken to be the same action in relation to the person's continued authorisation.

202.266 Removal of conditions on certain continued authorisations

Pilot licence conditions about airspace

- (1) Subregulation (2) applies to a continued authorisation that is equivalent to a pilot licence if the authorisation is subject to the condition that operations are limited to:
 - (a) flight within 25 nautical miles of the departure aerodrome; or
 - (b) flight within a flight training area; or
 - (c) flight direct between the departure aerodrome and a flight training area.
- (2) If this subregulation applies, CASA must remove the condition if:

- (a) the licence holder applies to CASA, in writing, for the removal of the condition; and
 - (b) the licence holder meets the requirements for the grant of a private pilot licence or commercial pilot licence under Part 61.
- (3) Subregulation (4) applies to a continued authorisation that is equivalent to a pilot licence if the authorisation is subject to the condition that operations as pilot in command are limited to uncontrolled airspace and any other class of airspace endorsed in the licence holder's personal log book by an instructor before 1 September 2014.
- (4) If this subregulation applies, CASA must remove the condition if:
- (a) the licence holder applies to CASA, in writing, for the removal of the condition; and
 - (b) the licence holder meets the requirements for the grant of a controlled airspace endorsement under Part 61.

Instrument rating conditions about acting as pilot in command under IFR

- (5) Subregulation (6) applies to a continued authorisation that is equivalent to an instrument rating if the authorisation is subject to the condition that the holder is not authorised to act as pilot in command under the IFR.
- (6) If this subregulation applies, CASA must remove the condition, to the extent that it relates to a particular aircraft category or class, if:
- (a) the holder applies to CASA, in writing, for the removal of the condition; and
 - (b) the holder meets the requirements for the grant, under Part 61, of:
 - (i) an instrument rating; and
 - (ii) an instrument endorsement that would authorise the holder to pilot an aircraft of that category or class under the IFR.

Type rating conditions about acting as pilot in command

- (7) Subregulation (8) applies to a continued authorisation that is equivalent to an aircraft type rating if the authorisation is subject to the condition that the holder must not act as pilot in command of the relevant aircraft type.
- (8) If this subregulation applies, CASA must remove the condition if:
- (a) the holder applies to CASA, in writing, for the removal of the condition; and
 - (b) the holder meets the requirements for the grant of the type rating under Part 61.
- (9) In this regulation:

instructor: see regulation 61.010.

pilot licence: see regulation 61.010.

Regulation 202.267

202.267 Flight review and proficiency check requirements

- (1) Subregulation (2) applies to the holder of a continued authorisation at a particular time if:
 - (a) the continued authorisation is equivalent to a private instrument rating; and
 - (b) the holder would have met the flight review requirements for the continued authorisation at that time if the amendments had not been made.
- (2) Despite Part 61, the holder is taken to meet the flight review requirements for the continued authorisation at that time.
- (3) Subregulation (4) applies to the holder of a continued authorisation (the *first authorisation*) at a particular time if:
 - (a) the first authorisation is equivalent to a rating, other than a private instrument rating, for which there are flight review requirements under Part 61; and
 - (b) the holder also holds a continued authorisation (the *second authorisation*), other than a student pilot licence, that is equivalent to a flight crew licence; and
 - (c) the holder would have met the flight review requirements for the second authorisation at that time if the amendments had not been made.
- (4) Despite Part 61, the holder is taken to meet the flight review requirements for the first authorisation at that time.
- (5) Subregulation (6) applies at a particular time if:
 - (a) an old authorisation that is continued in force under this Division was, before the amendments, a time-limited authorisation; and
 - (b) the old authorisation would have remained in force at that time if the amendments had not been made.
- (6) Despite Part 61, the holder of the old authorisation is taken to meet the proficiency check requirements for the equivalent new authorisation at that time.

202.268 Removal of limitation on exercise of privileges of private or commercial pilot licences—multi-crew operations

- (1) Regulation 61.510 does not apply to the holder of a continued authorisation that is equivalent to a private pilot licence if, before 1 September 2015, the holder conducted a multi-crew operation.
- (2) Regulation 61.575 does not apply to the holder of a continued authorisation that is equivalent to a commercial pilot licence if, before 1 September 2015, the holder conducted a multi-crew operation.

Note: Under regulations 61.510 and 61.575, a licence holder is authorised to exercise the privileges of the licence only if the holder has completed an approved course of training in multi-crew cooperation.

202.268A Removal of limitation on exercise of privileges of class rating for aircraft prescribed under regulation 61.062

Regulation 61.747 does not apply to the holder of a continued authorisation that is equivalent to a class rating if:

- (a) the holder held an aircraft endorsement, for an aircraft covered by the class rating, that was in force immediately before 1 September 2014; and
- (b) the endorsement was for a type of aircraft prescribed in an instrument under regulation 61.062.

202.269 Personal log books under regulation 5.51 of CAR—certain continued authorisations

- (1) This regulation applies to the holder of a continued authorisation that is equivalent to:
 - (a) a flight crew licence; or
 - (b) a certificate of validation for a flight crew licence.
- (2) Regulation 61.355 (Retention of personal logbooks) applies to the holder as if a reference to a personal logbook under regulation 61.345 or 61.350 included a reference to the personal logbook that the holder was required to keep under regulation 5.51 of CAR as in force immediately before 1 September 2014.
- (3) Regulation 61.365 (Production of personal logbooks) applies to the holder as if a reference to the holder's personal logbook included a reference to the personal logbook that the holder was required to keep under regulation 5.51 of CAR as in force immediately before 1 September 2014.

202.270 Extended meaning of *licence document* in Part 61

- (1) This regulation applies to the holder of a continued authorisation.
- (2) A reference to a licence document in Part 61 is taken to include a reference to the document issued to the holder by CASA showing the authorisations that were granted to the holder before 1 September 2014 under:
 - (a) Part 5 of CAR; or
 - (b) a relevant CAO.

202.271 Expiry of Subdivision 202.CB.1.2 at end of 31 August 2018

This Subdivision, and the entries for this Subdivision in the Part 202 table of contents, expire at the end of 31 August 2018 as if they had been repealed by another regulation.

Regulation 202.272

Subdivision 202.CB.1.3—New authorisations for holders of old authorisations

202.272 Grant of equivalent new authorisations for certain holders of old authorisations

Certain holders of old authorisations taken to meet requirements for grant of equivalent new authorisations

- (1) This regulation applies in relation to a person if:
 - (a) the person held an old authorisation at any time before 1 September 2014 (other than an old authorisation that is equivalent to a flight examiner rating); and
 - (b) the old authorisation was not surrendered or cancelled at any time before 1 September 2018; and
 - (c) on or after 1 September 2018, the person applies in accordance with these Regulations to CASA for the grant under Part 61 of the equivalent new authorisation.
- (2) The person is taken to meet the requirements for the grant of the equivalent new authorisation, despite Part 61.
- (3) However, if the old authorisation was an aircraft endorsement, the person is taken to meet the requirements for the grant of the equivalent aircraft class or type rating only if the person also held, immediately before 1 September 2014, an old authorisation that is equivalent to a flight crew licence.

Grant of equivalent new authorisation

- (4) CASA must (subject to subregulations (2) and (3) and Part 11) grant the equivalent new authorisation to the person under the provision of Part 61 that provides for the grant of the equivalent new authorisation.
- (5) If, when CASA grants the equivalent new authorisation, the old authorisation would have been suspended if the old authorisation had continued in force, the equivalent new authorisation is suspended until the time the suspension of the old authorisation would, according to its terms, have ended.
- (6) If, when CASA grants the equivalent new authorisation, the old authorisation would have been subject to a condition (other than a condition set out in a relevant CAO) if the old authorisation had continued in force, the equivalent new authorisation must be granted subject to an equivalent condition.

202.273 References to authorisations granted on the basis of regulation 202.272

A reference in these Regulations to an authorisation (however described) granted on the basis of regulation 202.272 is a reference to an authorisation granted under that regulation whether before or after the commencement of the *Civil Aviation Safety Amendment (Flight Crew Licensing Measures No. 1) Regulations 2018*.

Subdivision 202.CB.1.4—Other provisions

202.274 Non-finalised applications for old authorisations

- (1) An application for the issue of an old authorisation that, immediately before 1 September 2014, had not been finally determined is taken to be an application for the grant of the equivalent new authorisation.
- (2) For subregulation (1), and despite Parts 11 and 61, if a person met the requirements for the grant of an old authorisation before 1 September 2014, but the old authorisation had not been granted, the person is taken to meet the requirements for the grant of the equivalent new authorisation on 1 September 2014.
- (3) This regulation, and the entry for this regulation in the Part 202 table of contents, expire at the end of 31 August 2018 as if they had been repealed by another regulation.

202.275 Eligibility for ratings—former holders of time-limited authorisations

- (1) This regulation applies to a person if:
 - (a) before 1 September 2014, the person held an old authorisation that is equivalent to an operational rating (other than a flight examiner rating); and
 - (b) the old authorisation was time-limited; and
 - (c) the old authorisation expired before 1 September 2014.
- (2) Despite Parts 11 and 61, the person is taken to meet the requirements for the grant of the equivalent operational rating.
- (3) In this regulation:

operational rating: see regulation 61.010.
- (4) This regulation, and the entry for this regulation in the Part 202 table of contents, expire at the end of 31 August 2018 as if they had been repealed by another regulation.

202.276 Flight review and proficiency check requirements for certain new authorisations

- (1) Subregulation (2) applies at a particular time to the holder of a new authorisation granted on the basis of regulation 202.272 if:
 - (a) the new authorisation has flight review requirements; and
 - (b) the holder would have met the flight review requirements for the equivalent continued authorisation if it were still in force at that time.
- (2) Despite Part 61, the holder is taken to meet the flight review requirements for the new authorisation at that time.

Part 202 Transitional

Subpart 202.CB Transitional provisions for Part 61 (Flight crew licensing)

Division 202.CB.1 Amendments made by regulations commencing 1 September 2014

Regulation 202.277

- (2A) To avoid doubt, the holder of an aircraft class rating or type rating granted on the basis of regulation 202.272 must meet the flight review requirements for the rating under Part 61.
- (3) Subregulation (4) applies at a particular time to the holder of a new authorisation granted on the basis of regulation 202.272 if:
 - (a) the new authorisation has proficiency check requirements; and
 - (b) the new authorisation is equivalent to an old authorisation that was a time-limited authorisation; and
 - (c) the old authorisation would not have expired by that time if the amendments had not been made.
- (4) Despite Part 61, the holder is taken to meet the proficiency check requirements for the new authorisation at that time.
- (5) This regulation, and the entry for this regulation in the Part 202 table of contents, expire at the end of 31 August 2018 as if they had been repealed by another regulation.

202.277 Personal logbooks—obligations for holders of old authorisations etc.

- (1) Subregulation (2) applies to a person who, immediately before 1 September 2014, was required under regulation 5.51 of CAR to have a personal log book (the *old logbook*).
- (2) Regulations 61.355 (retention of personal logbooks) and 61.365 (production of personal logbooks) apply to the person as if the old logbook was a personal logbook required to be kept under regulation 61.345 or 61.350.

202.277C English competency for certain holders of student pilot licences

- (1) Subregulation (2) applies to a person who:
 - (a) held a student pilot licence immediately before 1 September 2014; and
 - (b) had not passed a general flying progress flight test under Part 5 of CAR before that day.
- (2) The person is taken to have been assessed by CASA as meeting the general English language proficiency standard mentioned in the Part 61 Manual of Standards.

202.278 Grant of pilot type ratings on basis of overseas training and assessment

- (1) An applicant for a pilot type rating is taken to meet the requirements of subregulation 61.810(3) (Requirements for grant of pilot type ratings) if CASA is satisfied that:
 - (a) the applicant has completed training, conducted by a training provider that is authorised by the national aviation authority of a recognised foreign State to conduct the training, for the grant of an overseas rating; and

- (b) the applicant has been assessed, by a person who is authorised by the national aviation authority of the recognised foreign State to conduct the assessment, as meeting the flight test standard for the grant of the overseas rating; and
 - (c) the training meets the standards specified in the Part 61 Manual of Standards for training for the rating; and
 - (d) the overseas rating is at least equivalent to the rating.
- (2) This regulation, and the entry for this regulation in the Part 202 table of contents, expire at the end of 31 August 2023 as if they had been repealed by another regulation.

202.279 Instrument proficiency checks partially conducted by foreign-authorised person

- (1) This regulation applies in relation to:
- (a) an instrument proficiency check mentioned in paragraph 61.650(3)(d) or (e) for the holder of a multi-crew pilot licence; and
 - (b) an instrument proficiency check mentioned in paragraph 61.695(3)(d) or (e) for the holder of an air transport pilot licence; and
 - (c) an instrument proficiency check mentioned in paragraph 61.880(3)(e) or (f) for the holder of an instrument rating.
- (2) The holder is taken to have successfully completed the instrument proficiency check if:
- (a) a person who is authorised by the national aviation authority of a recognised State to conduct an instrument proficiency check (however named) conducts a check of the holder; and
 - (b) the check meets the authority's flight standards for a proficiency check; and
 - (c) CASA or a flight examiner:
 - (i) assesses the holder against the knowledge standards mentioned in the Part 61 Manual of Standards for the instrument proficiency check; and
 - (ii) is satisfied that the holder meets the knowledge standards; and
 - (iii) endorses the holder's licence document to the effect that the holder has completed the instrument proficiency check.
- (3) This regulation, and the entry for this regulation in the Part 202 table of contents, expire at the end of 31 August 2023 as if they had been repealed by another regulation.

202.281 Expiry of Division 202.CB.1 at end of 31 August 2025

This Division, and the entries for this Division in the Part 202 table of contents, expire at the end of 31 August 2025 as if they had been repealed by another regulation.

Part 202 Transitional

Subpart 202.CB Transitional provisions for Part 61 (Flight crew licensing)

Division 202.CB.2 Amendments made by the Civil Aviation Safety Amendment (Flight Crew Licensing Measures No. 1) Regulations 2020

Regulation 202.290

Division 202.CB.2—Amendments made by the Civil Aviation Safety Amendment (Flight Crew Licensing Measures No. 1) Regulations 2020

202.290 Flight test requirements for 3D instrument approach operations endorsement

The amendments of paragraphs 61.640(1A)(a), 61.680(2A)(a) and 61.900(2)(a) by the *Civil Aviation Safety Amendment (Flight Crew Licensing Measures No. 1) Regulations 2020* do not apply in relation to a 3D instrument approach operation (the **authorised operation**) conducted on or after the commencement of those amendments by the holder of a pilot licence or endorsement if:

- (a) the holder passed the flight test for the licence or endorsement before the commencement of those amendments; and
- (b) the flight test included a 3D instrument approach operation; and
- (c) the authorised operation is conducted within the period:
 - (i) starting when the holder passed the flight test; and
 - (ii) ending 24 months later, or when the holder next attempts an instrument proficiency check, whichever is earlier.

Subpart 202.CE—Transitional provisions for Part 64 (Authorisations for non-licensed personnel)

Division 202.CE.1—Amendments made by regulations commencing 1 September 2014

- Note: The regulations comprise:
- (a) the *Civil Aviation Legislation Amendment Regulation 2013 (No. 1)*; and
 - (b) the *Civil Aviation Legislation Amendment (Flight Crew Licensing and Other Matters) Regulation 2013*; and
 - (c) the *Civil Aviation Legislation Amendment (Flight Crew Licensing) Regulation 2014*.

Subdivision 202.CE.1.1—Aircraft radiotelephone operator certificate of proficiency

202.300 Definitions for Subdivision 202.CE.1.1

In this Subdivision:

aeronautical radio operator certificate: see regulation 64.010.

amendments means the amendments made by:

- (a) the *Civil Aviation Legislation Amendment Regulation 2013 (No. 1)*; and
- (b) the *Civil Aviation Legislation Amendment (Flight Crew Licensing and Other Matters) Regulation 2013*; and
- (c) the *Civil Aviation Legislation Amendment (Flight Crew Licensing) Regulation 2014*.

cessation time, for an old authorisation that is continued in force under this Subdivision, means the earliest of the following:

- (a) when the old authorisation expires or is surrendered or cancelled;
- (b) when CASA grants a new authorisation to the holder of the old authorisation as a replacement for the old authorisation;
- (c) the end of 31 August 2018.

continued authorisation means an old authorisation that is continued in force under subregulation 202.301(1) or subparagraph 202.302(2)(b)(ii).

old authorisation means:

- (a) a flight radio operator's licence issued under Part 5 of CAR; or
- (b) an aircraft radiotelephone operator certificate of proficiency issued under regulation 83A of CAR.

Regulation 202.301

202.301 Continuation of old authorisations

- (1) Despite the amendments, an old authorisation that was in force immediately before 1 September 2014 is continued in force on and after 1 September 2014 according to its terms.
- (2) These Regulations apply to the continued authorisation as if the authorisation were an aeronautical radio operator certificate.
- (3) The continued authorisation ceases to be in force at its cessation time.
- (4) Subregulation (3) applies despite Parts 11 and 64.

202.302 Continuation of suspended old authorisations

- (1) This regulation applies to an old authorisation that was under suspension immediately before 1 September 2014.
- (2) Despite the amendments:
 - (a) the suspension continues according to its terms on and after 1 September 2014; and
 - (b) if the suspension ends before the cessation time for the authorisation:
 - (i) the old authorisation comes back into force at the end of the suspension; and
 - (ii) the old authorisation is continued in force on and after the time mentioned in subparagraph (i) according to its terms; and
 - (iii) these Regulations apply to the old authorisation as if it were an aeronautical radio operator certificate; and
 - (iv) the old authorisation ceases to be in force at the cessation time for the authorisation.
- (3) Subparagraph (2)(b)(iv) applies despite Parts 11 and 64.

202.303 Non-finalised action to vary, suspend or cancel old authorisations

Action to vary, suspend or cancel a person's old authorisation that, immediately before 1 September 2014, had not been finally determined is taken to be the same action in relation to the person's continued authorisation.

202.304 Grant of aeronautical radio operator certificates for certain holders of old authorisations

Certain holders of old authorisations taken to meet requirements for grant of aeronautical radio operator certificate

- (1) This regulation applies in relation to a person if:
 - (a) the person held an old authorisation at any time before 1 September 2014; and

- (b) the old authorisation was not surrendered or cancelled at any time before 1 September 2018; and
 - (c) on or after 1 September 2018, the person applies in accordance with these Regulations to CASA for the grant under Part 64 of an aeronautical radio operator certificate.
- (2) The person is taken to meet the requirements for the grant of the aeronautical radio operator certificate, despite Part 64.

Grant of aeronautical radio operator certificate

- (3) CASA must (subject to subregulation (2) and Part 11) grant the aeronautical radio operator certificate to the person under regulation 64.030.
- (4) If, when CASA grants the aeronautical radio operator certificate, the old authorisation would have been suspended if the old authorisation had continued in force, the aeronautical radio operator certificate is suspended until the time the suspension of the old authorisation would, according to its terms, have ended.
- (5) If, when CASA grants the aeronautical radio operator certificate, the old authorisation would have been subject to a condition if the old authorisation had continued in force, the aeronautical radio operator certificate must be granted subject to an equivalent condition.

202.304A References to aeronautical radio operator certificates granted on the basis of regulation 202.304

A reference in these Regulations to an aeronautical radio operator certificate granted on the basis of regulation 202.304 is a reference to an aeronautical radio operator certificate granted under that regulation whether before or after the commencement of the *Civil Aviation Safety Amendment (Flight Crew Licensing Measures No. 1) Regulations 2018*.

202.305 Non-finalised applications for old authorisations

- (1) An application for the issue of an old authorisation that, immediately before 1 September 2014, had not been finally decided is taken to be an application for the grant of an aeronautical radio operator certificate.
- (2) For subregulation (1), and despite Parts 11 and 64, if a person met the requirements for the grant of an old authorisation before 1 September 2014, but the old authorisation had not been granted, the person is taken to meet the requirements for the grant of an aeronautical radio operator certificate on 1 September 2014.

Subdivision 202.CE.1.2—Approval to taxi an aeroplane

202.307 Definitions for Subdivision 202.CE.1.2

In this Subdivision:

Regulation 202.308

amendments means:

- (a) the amendments of these Regulations made by:
 - (i) the *Civil Aviation Legislation Amendment Regulation 2013 (No. 1)*;
and
 - (ii) the *Civil Aviation Legislation Amendment (Flight Crew Licensing and Other Matters) Regulation 2013*; and
 - (iii) the *Civil Aviation Legislation Amendment (Flight Crew Licensing) Regulation 2014*; and
- (b) the amendments of Civil Aviation Order 20.22 commencing on 1 September 2014.

certificate of competency: see regulation 64.010.

cessation time, for an old authorisation that is continued in force under this Subdivision, means the earlier of the following:

- (a) when the old authorisation expires or is surrendered or cancelled;
- (b) the end of 31 August 2018.

continued authorisation means an old authorisation that is continued in force under subregulation 202.308(1) or subparagraph 202.309(2)(b)(ii).

old authorisation means:

- (a) an approval issued under regulation 229 of CAR entitling a person to taxi an aeroplane; or
- (b) an approval issued under Civil Aviation Order 20.22 entitling a person to taxi an aircraft.

202.308 Continuation of old authorisations

- (1) Despite the amendments, an old authorisation that was in force immediately before 1 September 2014 continues in force on and after 1 September 2014 according to its terms.
- (2) These Regulations apply to the continued authorisation as if the authorisation were a certificate of competency.
- (3) The continued authorisation ceases to be in force at its cessation time.
- (4) Subregulation (3) applies despite Parts 11 and 64.

202.309 Continuation of suspended old authorisations

- (1) This regulation applies to an old authorisation that was under suspension immediately before 1 September 2014.
- (2) Despite the amendments:
 - (a) the suspension continues according to its terms on and after 1 September 2014; and
 - (b) if the suspension ends before the cessation time for the authorisation:

- (i) the old authorisation comes back into force at the end of the suspension; and
- (ii) the old authorisation is continued in force on and after the time mentioned in subparagraph (i) according to its terms; and
- (iii) these Regulations apply to the old authorisation as if it were a certificate of competency; and
- (iv) the old authorisation ceases to be in force at the cessation time for the authorisation.

(3) Subparagraph (2)(b)(iv) applies despite Parts 11 and 64.

202.310 Non-finalised action to vary, suspend or cancel old authorisations

Action to vary, suspend or cancel a person's old authorisation that, immediately before 1 September 2014, had not been finally determined is taken to be the same action in relation to the person's continued authorisation.

202.311 Production of continued authorisation

- (1) This regulation applies to the holder of an old authorisation that is continued in force under this Subpart.
- (2) Regulation 64.060 (Production of certificate of competency) applies to the holder as if a reference to the holder's certificate of competency were a reference to the holder's old authorisation.

Subdivision 202.CE.1.3—Expiry of Division 202.CE.1

202.312 Expiry of Division 202.CE.1

- (1) The early expiry provisions, and the entries for the early expiry provisions in the Part 202 table of contents, expire at the end of 31 August 2018 as if they had been repealed by another regulation.
- (2) This Division, and the entries for this Division in the Part 202 table of contents, expire at the end of 31 August 2025 (to the extent they have not already expired under subregulation (1)) as if they had been repealed by another regulation.
- (3) In this regulation:

early expiry provisions means the provisions of this Division other than the following:

- (a) regulations 202.300, 202.304 and 202.304A;
- (b) this regulation.

Subpart 202.CF—Transitional provisions for Part 65 (Air traffic services licensing)

202.320 Manual of Standards for Part 65

- (1) A document called ‘Manual of Standards (MOS) – Part 65’ published by CASA before 1 May 2003 is taken to be a Manual of Standards issued under regulation 65.033.
- (2) The procedures in regulations 65.033A, 65.033B and 65.033C (as in force on 1 May 2003) are taken to have been complied with in relation to the issue of the Manual of Standards.

202.321 Persons holding certain licences

- (1) In this regulation:

old licence means an air traffic controller licence or a flight service officer licence issued under CAR and in force (or suspended) immediately before 1 May 2003.
- (2) A person who, immediately before 1 May 2003, held an old licence (including a licence that is suspended) is taken to hold a corresponding licence issued under Part 65.
- (3) A rating, endorsement or qualification endorsed on an old licence is taken to continue in force for the period during which it would have been in force but for that Part.
- (4) A licence that a person is taken to hold under subregulation (2), or a rating, endorsement or qualification mentioned in subregulation (3), may be suspended or cancelled as if it had been granted under that Part.
- (5) An old licence that, immediately before 1 May 2003, was suspended is taken, on and after that day, to continue to be suspended.
- (6) For the purposes of action against the holder of an old licence mentioned in subregulation (5), the amendments of CAR by regulation 4 of, and Schedule 2 to, the *Civil Aviation Amendment Regulations 2002 (No. 2)* are to be disregarded.

Subpart 202.CG—Transitional provisions for Part 66 (Continuing airworthiness—aircraft engineer licences and ratings)

202.340 Having regard to other airworthiness authorities in granting aircraft engineer licences

If:

- (a) a person holds, or has held, an airworthiness authority of the kind mentioned in paragraph 33B(1)(a) of CAR; and
 - (b) CASA grants an aircraft engineer licence to the person;
- CASA must have regard to the authority in granting the licence.

202.341 Category A licence holders and certification of completion of maintenance

- (1) Despite anything in Part 4A of CAR, a person may certify completion of maintenance if:
 - (a) the person is a category A licence holder; and
 - (b) the maintenance is mentioned in Appendix II to the Part 145 Manual of Standards; and
 - (c) the person certifies completion of the maintenance:
 - (i) in accordance with regulation 42ZE of CAR; and
 - (ii) on behalf of a holder of a certificate of approval under regulation 30 of CAR.
- (2) If a person certifies completion of maintenance in accordance with subregulation (1), the person is taken, for the purposes of regulation 42ZC of CAR, to be permitted by that regulation to carry out the maintenance.
- (3) A person commits an offence of strict liability if:
 - (a) the person is a category A licence holder; and
 - (b) the person certifies completion of maintenance:
 - (i) in accordance with regulation 42ZE of CAR; and
 - (ii) on behalf of a holder of a certificate of approval under regulation 30 of CAR; and
 - (c) one or more of the following apply:
 - (i) the person did not carry out the maintenance;
 - (ii) the maintenance is not mentioned in Appendix II to the Part 145 Manual of Standards.

Penalty: 50 penalty units.

Regulation 202.342

- (4) A reference in subregulation (3) to maintenance does not include supervision of maintenance.

202.342 Category A licence holders and final certificates for completion of maintenance

- (1) Despite anything in Part 4A of CAR, a person may issue a final certificate for completion of maintenance for an aircraft in relation to maintenance carried out on the aircraft if:
- (a) the person is a category A licence holder; and
 - (b) the maintenance is mentioned in Appendix II to the Part 145 Manual of Standards; and
 - (c) he or she issues the final certificate for completion of maintenance:
 - (i) in accordance with Part 4 of Schedule 6 of CAR; and
 - (ii) on behalf of the holder of a certificate of approval under regulation 30 of CAR.
- (2) If a person issues a final certificate for completion of maintenance in accordance with subregulation (1), the person is taken, for the purposes of regulation 42ZC of CAR, to be permitted by that regulation to carry out the maintenance.
- (3) A person commits an offence of strict liability if:
- (a) the person is a category A licence holder; and
 - (b) the person issues a final certificate for completion of maintenance:
 - (i) in accordance with Part 4 of Schedule 6 of CAR; and
 - (ii) on behalf of the holder of a certificate of approval under regulation 30 of CAR; and
 - (c) the maintenance is not mentioned in Appendix II to the Part 145 Manual of Standards.

Penalty: 50 penalty units.

- (4) A reference in subregulation (3) to maintenance does not include supervision of maintenance.

202.343 Category A licence holders and endorsing maintenance releases

- (1) Despite anything in Part 4A of CAR, a person may endorse a maintenance release for an aircraft for the purposes of regulation 48 of CAR if:
- (a) the person is a category A licence holder; and
 - (b) the maintenance is mentioned in Appendix II to the Part 145 Manual of Standards; and
 - (c) the endorsement is on behalf of the holder of a certificate of approval under regulation 30 of CAR.
- (2) If a person endorses a maintenance release in accordance with subregulation (1), the person is taken, for the purposes of regulation 42ZC of CAR, to be permitted by that regulation to carry out the maintenance.

Regulation 202.355

- (3) A person commits an offence of strict liability if:
- (a) the person is a category A licence holder; and
 - (b) the person endorses a maintenance release on behalf of the holder of a certificate of approval under regulation 30 of CAR; and
 - (c) the maintenance is not mentioned in Appendix II to the Part 145 Manual of Standards.

Penalty: 50 penalty units.

202.355 Validation of certain licences and ratings granted subject to exclusions during relevant period

- (1) This regulation applies to a licence granted, or purportedly granted, under regulation 66.026, or to a rating granted, or purportedly granted, under regulation 66.095, if the licence or rating was granted, or purportedly granted:
- (a) during the relevant period; and
 - (b) subject to an exclusion that did not relate to a type rated aircraft type.
- (2) The licence or rating is valid and effective, and is taken always to have been as valid and effective, as it would have been if the amendments made by the *Civil Aviation Legislation Amendment (Miscellaneous Measures) Regulation 2016* had been in force during the relevant period.
- (3) Any act or thing done under the licence or rating is valid and effective, and is taken always to have been as valid and effective, as it would have been if the amendments made by the *Civil Aviation Legislation Amendment (Miscellaneous Measures) Regulation 2016* had been in force during the relevant period.

- (4) In this regulation:

relevant period means the period:

- (a) beginning at the start of 4 July 2016; and
- (b) ending at the commencement of the *Civil Aviation Legislation Amendment (Miscellaneous Measures) Regulation 2016*.

Subpart 202.CH—Transitional provisions for Part 67 (Medical)

202.360 Medical certificates issued under *Civil Aviation Regulations 1988*

- (1) A medical certificate or special medical certificate issued before 3 September 2003, under Part 6 of CAR, as in force at any time before that day, continues to have, on and after that day, the same force and effect as it would have had if that Part had continued in force.
- (2) Such a certificate may be suspended or cancelled under Part 67.
- (3) Subject to subregulation (4), such a certificate expires at the time it would have expired if Part 6 of CAR had continued in force.
- (4) The period during which such a certificate is in force may be extended under Part 67, but not beyond the end of 1 year after the day when the certificate would expire if the period had not been extended.

202.361 Designated aviation medical examiners appointed under *Civil Aviation Regulations 1988*

- (1) The appointment of a person, before 3 September 2003, as a designated aviation medical examiner continues to have effect according to its terms.
- (2) Such an appointment may be cancelled in accordance with Part 67.

202.362 Actions by Director of Aviation Medicine

- (1) In this regulation:

Principal Medical Officer means the officer of CASA occupying, or performing the duties of, the position in CASA of that title, and includes a person who occupied, or performed the duties of, the former position in CASA known as ‘Director of Aviation Medicine’.

- (2) An approval given by the Principal Medical Officer, before 3 September 2003, for the purposes of a provision of Schedule 1 to CAR, as in force at any time before that day, continues to have effect according to its terms, on and after that day, as if CASA had given the approval for the purposes of the corresponding provision of table 67.150, table 67.155 or table 67.160.

202.363 Applications for issue of medical certificates pending on 3 September 2003

- (1) This regulation applies if:
 - (a) an application under Part 6 of the old regulations for the issue of a medical certificate was pending immediately before 3 September 2003; and

Regulation 202.363

- (b) the application was in accordance with that Part as then in force.
- (2) The application is taken, for these Regulations, to be an application for the issue of the medical certificate, made, on 3 September 2003, in accordance with Subpart 67.C.
- (3) If an examination required for the issue of the medical certificate under Part 6 of the old regulations had commenced but was not completed before 3 September 2003, the examination is taken to have commenced under Subpart 67.C.
- (4) In this regulation:

old regulations means CAR as in force at any time before 3 September 2003.

Subpart 202.DA—Transitional provisions for Part 71 (Airspace)

Note 1: This Subpart heading is reserved for future use.

Note 2: Regulation numbers 202.380 to 202.399 are reserved for use in this Subpart.

Subpart 202.EA—Transitional provisions for Part 90 (Additional airworthiness requirements)

202.400 Transitional provision—Part 90 Manual of Standards

- (1) This regulation applies to the Part 90 Manual of Standards that was in force under regulation 90.020 immediately before the day the *Civil Aviation Safety Amendment (Part 90) Regulations 2017* commence.
- (2) The Part 90 Manual of Standards has effect on and after that day as if it had been made under regulation 90.020 as amended by the *Civil Aviation Safety Amendment (Part 90) Regulations 2017*.

Part 202 Transitional

Subpart 202.EAA Transitional provisions for Parts 91, 103, 105, 119, 121, 131, 133, 135 and 138

Division 202.EAA.1 Amendments made by the Civil Aviation Legislation Amendment (Flight Operations—Consequential Amendments and Transitional Provisions) Regulations 2021

Regulation 202.405

Subpart 202.EAA—Transitional provisions for Parts 91, 103, 105, 119, 121, 131, 133, 135 and 138

Division 202.EAA.1—Amendments made by the Civil Aviation Legislation Amendment (Flight Operations—Consequential Amendments and Transitional Provisions) Regulations 2021

Subdivision 202.EAA.1.1—Preliminary

202.405 Definitions for this Division

In this Division:

aerial work (air ambulance) operation means an operation (however described) for the purpose mentioned in subparagraph 206(1)(a)(vii) of the old CAR.

amending Regulations means the *Civil Aviation Legislation Amendment (Flight Operations—Consequential Amendments and Transitional Provisions) Regulations 2021*.

authorisation has the same meaning as in Part 11.

corresponding new provision: in relation to a provision (the ***old provision***) of the old Regulations that is repealed by the amending Regulations, the ***corresponding new provision*** is the provision (or provisions) of the new Regulations that:

- (a) is in relation to a matter covered by the old provision; and
- (b) has a substantially similar effect in relation to the matter as the old provision.

early commencement time means the time when Schedule 2 to the amending Regulations commences.

eligible instrument: see regulation 202.405A.

IFR includes the I.F.R. within the meaning of the old CAR.

IFR flight includes an I.F.R. flight within the meaning of the old CAR.

instrument means a legislative or administrative instrument made under, or for the purposes of, a provision of:

- (a) these Regulations (including the old Regulations); or
- (b) the Act; or
- (c) another instrument made under or for the purposes of these Regulations (including the old Regulations) or the Act.

main commencement time means the time when Schedule 1 to the amending Regulations commences.

Regulation 202.405A

make, in relation to an instrument, includes grant or issue the instrument.

new Regulations: see subregulation 202.405B(2).

old CAR means CAR as in force immediately before the main commencement time and includes Civil Aviation Orders issued under those Regulations.

old Regulations means these Regulations (including the old CAR) as in force immediately before the main commencement time.

transition period means the period:

- (a) beginning immediately after the early commencement time; and
- (b) ending immediately before the main commencement time.

VFR includes the V.F.R. within the meaning of the old CAR.

VFR flight includes a V.F.R. flight within the meaning of the old CAR.

202.405A Meaning of *eligible instrument*

An instrument is an ***eligible instrument*** if the instrument is made under, or for the purposes of, a provision of these Regulations (including the old Regulations) or the Act and is in relation to any of the following:

- (a) a particular person;
- (b) a particular flight;
- (c) a particular aircraft;
- (d) a particular aerodrome;
- (e) a particular act, event, case or circumstance.

202.405B Meaning and effect of *new Regulations*

- (1) For the purposes of Subdivisions 202.EAA.1.1 to 202.EAA.1.7, assume that the following regulations (and any Manuals of Standards issued under those regulations) commence at the early commencement time:
 - (a) the *Civil Aviation Safety Amendment (Part 91) Regulations 2018*;
 - (b) the *Civil Aviation Legislation Amendment (Parts 103, 105 and 131) Regulations 2019*;
 - (c) the *Civil Aviation Safety Amendment (Part 119) Regulations 2018*;
 - (d) the *Civil Aviation Safety Amendment (Part 121) Regulations 2018*;
 - (e) the *Civil Aviation Safety Amendment (Part 133) Regulations 2018*;
 - (f) the *Civil Aviation Safety Amendment (Part 135) Regulations 2018*;
 - (g) the *Civil Aviation Safety Amendment (Part 138) Regulations 2018*;
 - (h) the *Civil Aviation Safety Amendment (Operations Definitions) Regulations 2019*.
- (2) The ***new Regulations*** means these Regulations as amended by the regulations mentioned in subregulation (1) and any includes Manuals of Standards issued under those regulations.

Part 202 Transitional

Subpart 202.EAA Transitional provisions for Parts 91, 103, 105, 119, 121, 131, 133, 135 and 138

Division 202.EAA.1 Amendments made by the Civil Aviation Legislation Amendment (Flight Operations—Consequential Amendments and Transitional Provisions) Regulations 2021

Regulation 202.405C

202.405C Relationship with section 7 of the *Acts Interpretation Act 1901*

Nothing in this Division limits the effect of section 7 of the *Acts Interpretation Act 1901* (as it applies because of paragraph 13(1)(a) of the *Legislation Act 2003*).

Subdivision 202.EAA.1.2—Requirements for existing AOC holders before main commencement time

202.406 AOC holders to give CASA proposed operations manuals and expositions etc. before main commencement time

- (1) An operator mentioned in column 1 of an item in the following table must, during the period mentioned in column 3 of the item, give CASA the documents and information (the *compliance material*) mentioned in column 2 of the item.

Operators to give compliance material

Item	Column 1	Column 2	Column 3
	Operator	Compliance material	Compliance period
1	An operator who is the holder of an AOC that: (a) authorises the holder to conduct charter operations, regular public transport operations, or aerial work (air ambulance) operations, in an aeroplane or a rotorcraft; and (b) is in force at any time during the transition period	All of the following: (a) the operator's proposed exposition prepared for the purposes of compliance with the requirements of the new Regulations; (b) a compliance statement for the operator that meets the requirement in subregulation (2); (c) a copy of each civil aviation authorisation and exemption that is held by the operator and that is in force at any time during the transition period	The transition period
2	An operator who is the holder of an AOC that: (a) authorises the holder to conduct aerial work operations (other than aerial work (air ambulance) operations) in an aeroplane or a rotorcraft; and (b) is in force at any time during the transition period	All of the following: (a) the operator's proposed operations manual prepared for the purposes of compliance with the requirements of the new Regulations; (b) a compliance statement for the operator that meets the requirement in subregulation (2); (c) a copy of each civil aviation authorisation and exemption that is held by the operator and that is in force at any time during the transition period; (d) if the operator proposes to conduct	The transition period

Operators to give compliance material

Item	Column 1	Column 2	Column 3
	Operator	Compliance material	Compliance period
		<p>operations mentioned in subregulation 138.125(1) of the new Regulations after the main commencement time—the operator’s proposed training and checking manual prepared for the purposes of compliance with the requirements of the new Regulations;</p> <p>(e) if the operator proposes to conduct operations mentioned in subregulation 138.140(1) of the new Regulations after the main commencement time—the operator’s proposed safety management system manual prepared for the purposes of compliance with the requirements of the new Regulations</p>	
3	<p>An operator who is the holder of an AOC that:</p> <p>(a) authorises the holder to conduct a charter operation in a manned free balloon or a hot air airship; and</p> <p>(b) is in force at any time during the transition period</p>	<p>Both of the following:</p> <p>(a) the operator’s proposed exposition prepared for the purposes of compliance with the requirements of the new Regulations;</p> <p>(b) a copy of each civil aviation authorisation and exemption that is held by the operator and that is in force at any time during the transition period</p>	The transition period

Part 202 Transitional

Subpart 202.EAA Transitional provisions for Parts 91, 103, 105, 119, 121, 131, 133, 135 and 138

Division 202.EAA.1 Amendments made by the Civil Aviation Legislation Amendment (Flight Operations—Consequential Amendments and Transitional Provisions) Regulations 2021

Regulation 202.406

Operators to give compliance material

Item	Column 1	Column 2	Column 3
	Operator	Compliance material	Compliance period
	ambulance) operations in an aeroplane or a rotorcraft; and (b) is in force at any time during the transition period		
5	An operator who is the holder of an AOC that: (a) authorises the holder to conduct aerial work operations (other than aerial work (air ambulance) operations) in an aeroplane or a rotorcraft; and (b) is in force at any time during the transition period	An extract from the operator's proposed operations manual: (a) prepared for the purposes of compliance with the requirements of the new Regulations; and (b) containing a description of the operator's process for making changes to the operations manual that meets the requirements under paragraph 138.155(1)(m) of the new Regulations; and (c) if the operator proposes to conduct an operation involving the carriage of an aerial work passenger after the main commencement time—containing a description of the operator's procedures relating to the carriage of passengers that meets the requirements prescribed by the Part 138 Manual of Standards for the purposes of subparagraph 138.305(2)(c)(iv) of the new Regulations	The period: (a) beginning immediately after the early commencement time; and (b) ending at the start of 6 October 2021

Note: For the definitions of *aerial work (air ambulance) operations* and *transition period*, see 202.405.

- (2) The compliance statement mentioned in column 2 of the table in subregulation (1) must be made in the approved form.

Note: Under regulation 11.018, a compliance statement in the approved form is not complete unless it contains all of the information required by the form.

Effect of suspension

- (3) In determining if an AOC is in force during the transition period for the purposes of an item in the table in subregulation (1), disregard any suspension of the AOC during that period.

Subdivision 202.EAA.1.3—Existing AOCs due to expire

202.407 AOCs due to expire

- (1) If the term of an AOC held by a person would, apart from this regulation, expire on a day (the *old AOC expiry day*) during the period (the *relevant period*):
 - (a) beginning on 4 September 2021; and
 - (b) ending on 2 March 2022;then, the term of the AOC is extended for a period of 6 months beginning on the old AOC expiry day.
- (2) If:
 - (a) the term of a person's AOC is extended under subregulation (1); and
 - (b) the person holds an authorisation or exemption that would, apart from this regulation, cease to have effect on a day (the *old authorisation expiry day*) during the relevant period;then, the authorisation or exemption continues in effect until the later of the following days or times:
 - (c) the end of the period of 6 months beginning on the old AOC expiry day;
 - (d) the old authorisation expiry day.

Subdivision 202.EAA.1.4—Applications for Australian air transport AOCs made before main commencement time

202.408 Applications for Australian air transport AOCs under new law made before main commencement time

- (1) A person may apply to CASA for the issue of an Australian air transport AOC under the new Regulations during the period:
 - (a) beginning on 7 June 2021; and
 - (b) ending immediately before the main commencement time.
- (2) If the application meets the requirements mentioned in regulation 119.065 of the new Regulations, CASA may, before or after the main commencement time, subject to the Act and the conditions mentioned in regulation 119.070 of the new Regulations, issue an Australian air transport AOC to the person.
- (3) If CASA issues the Australian air transport AOC to the person:
 - (a) the Australian air transport AOC comes into force at the later of:
 - (i) the main commencement time; or
 - (ii) a time after the main commencement time specified in the Australian air transport AOC; and
 - (b) regulation 119.075 of the new Regulations applies in relation to the person.

Part 202 Transitional

Subpart 202.EAA Transitional provisions for Parts 91, 103, 105, 119, 121, 131, 133, 135 and 138

Division 202.EAA.1 Amendments made by the Civil Aviation Legislation Amendment (Flight Operations—Consequential Amendments and Transitional Provisions) Regulations 2021

Regulation 202.408A

202.408A Applications for AOCs under old law made before main commencement time

- (1) This regulation applies if:
 - (a) a person applies to CASA for the issue or variation of an AOC under the old Regulations; and
 - (b) the application is made before the main commencement time; and
 - (c) CASA has not made a decision on the application as at the main commencement time.
- (2) Despite the amending Regulations, the old Regulations continue to apply in relation to the application.

Subdivision 202.EAA.1.5—Applications for balloon transport AOCs made before main commencement time

202.409 Applications for balloon transport AOCs under new law made before main commencement time

- (1) A person may apply to CASA for the issue of a balloon transport AOC under the new Regulations during the period:
 - (a) beginning on 7 June 2021; and
 - (b) ending immediately before the main commencement time.
- (2) If the application meets the requirements mentioned in regulation 131.075 of the new Regulations, CASA may, before or after the main commencement time, subject to the Act and the conditions mentioned in regulation 131.080 of the new Regulations, issue a balloon transport AOC to the person.
- (3) If CASA issues the balloon transport AOC to the person:
 - (a) the balloon transport AOC comes into force at the later of:
 - (i) the main commencement time; or
 - (ii) a time after the main commencement time specified in the balloon transport AOC; and
 - (b) regulation 131.085 of the new Regulations applies in relation to the person.

Subdivision 202.EAA.1.6—Applications for aerial work certificates made before main commencement time

202.410 Applications for aerial work certificates under new law made before main commencement time

- (1) A person may apply to CASA for the issue of an aerial work certificate under the new Regulations during the period:
 - (a) beginning on 7 June 2021; and
 - (b) ending immediately before the main commencement time.

-
- (2) If the application meets the requirements mentioned in regulation 138.035 of the new Regulations, CASA may, before or after the main commencement time, subject to the conditions mentioned in regulation 138.040 of the new Regulations, issue an aerial work certificate to the person.
- (3) If CASA issues the aerial work certificate to the person:
- (a) the aerial work certificate comes into force at the later of:
 - (i) the main commencement time; or
 - (ii) a time after the main commencement time specified in the aerial work certificate; and
 - (b) regulation 138.045 of the new Regulations applies in relation to the person.

Subdivision 202.EAA.1.7—Applications for instruments (other than AOCs and aerial work certificates) made before main commencement time

202.411 Applications for instruments (other than AOCs and aerial work certificates) under new law made before main commencement time

- (1) A person may apply to CASA for an instrument (other than an AOC or an aerial work certificate) to be made under the new Regulations during the period:
- (a) beginning on 7 June 2021; and
 - (b) ending immediately before the main commencement time.
- (2) If the application meets the requirements (if any) of the new Regulations, CASA may, before or after the main commencement time, subject to the conditions (if any) mentioned in the new Regulations, make the instrument.
- (3) If CASA makes the instrument, the instrument comes into force at the later of:
- (a) the main commencement time; or
 - (b) a time after the main commencement time specified in the instrument.

202.411A Applications for instruments (other than AOCs, aerial work certificates and exemptions) under old law made before main commencement time

When this regulation applies

- (1) This regulation applies if:
- (a) before the main commencement time, a person made an application (the **old application**) to CASA for the making of an instrument (other than an AOC, an aerial work certificate or an exemption) under a provision of the old Regulations that is repealed by the amending Regulations; and
 - (b) the old application is for an instrument that authorises a particular activity or thing; and
 - (c) CASA has not made a decision on the old application as at the main commencement time.

Part 202 Transitional

Subpart 202.EAA Transitional provisions for Parts 91, 103, 105, 119, 121, 131, 133, 135 and 138

Division 202.EAA.1 Amendments made by the Civil Aviation Legislation Amendment (Flight Operations—Consequential Amendments and Transitional Provisions) Regulations 2021

Regulation 202.411B

Old law continues to apply if application is for transitional instrument

- (2) If the old application is for an instrument of a kind covered by subregulation (4), then, despite the amending Regulations, the old Regulations continue to apply in relation to the application.

New law applies to other instruments

- (3) If:
- (a) the old application is not for an instrument of a kind covered by subregulation (4); and
 - (b) under the new Regulations a person may apply for an authorisation in relation to the activity or thing mentioned in paragraph (1)(b); and
 - (c) the requirements mentioned in subregulation 11.030(1) are met in relation to the old application;
- then, both of the following apply:
- (d) the old application is taken:
 - (i) to be an application under the new Regulations for an authorisation in relation to the activity or thing; and
 - (ii) to meet the requirements mentioned in regulation 11.030 and any other requirements relating to the making of the application under another provision of the new Regulations that deals with authorisations of that kind; and
 - (iii) to have been made at the main commencement time;
 - (e) Part 11 (applications and decision making) of these Regulations applies in relation to the application.

Transitional instruments

- (4) An instrument is covered by this subregulation if:
- (a) despite the repeal of the provision of the old Regulations under which, or for the purposes of which, the instrument is made, the instrument continues in force after the main commencement time as a result of the operation of a provision of this Division; or
 - (b) another provision of this Division provides that if the instrument is in force immediately before the main commencement time, a new instrument is taken to be made for the purposes of a provision of the new Regulations.

202.411B Applications for exemptions under old law made before main commencement time

When this regulation applies

- (1) This regulation applies if:
- (a) before the main commencement time, a person made an application (the **old application**) to CASA for an exemption from compliance with a requirement under a provision (the **old provision**) of the old Regulations that is repealed by the amending Regulations or a provision (the **old**

Regulation 202.411B

provision) of an instrument made under, or for the purposes of, the old Regulations or the Act; and

- (b) CASA has not made a decision on the old application as at the main commencement time.

Old law continues to apply if application is for transitional exemption

- (2) If the old application is for an exemption of a kind covered by subregulation (4), then, despite the amending Regulations, the old Regulations continue to apply in relation to the old application.

New law applies to other exemptions

- (3) If:
- (a) the old application is not for an exemption of a kind covered by subregulation (4); and
 - (b) there is a corresponding new provision in relation to the old provision; and
 - (c) an application may be made under the new Regulations for an exemption from compliance in relation to the corresponding new provision; and
 - (d) the requirements mentioned in subregulations 11.165(2) and (3) are met in relation to the old application;
- then, both of the following apply:
- (e) the old application is taken:
 - (i) to be an application for an exemption in relation to the corresponding new provision; and
 - (ii) to meet the requirements mentioned in regulation 11.165; and
 - (iii) to have been made at the main commencement time;
 - (f) Part 11 (applications and decision making) of these Regulations applies in relation to the application.

Note: For the definition of *corresponding new provision*, see 202.405.

Transitional exemptions

- (4) An exemption is covered by this subregulation if:
- (a) despite the repeal of the provision of the old Regulations under which, or for the purposes of which, the exemption is made, the exemption continues in force after the main commencement time as a result of the operation of a provision of this Division; or
 - (b) another provision of this Division provides that if the exemption is in force immediately before the main commencement time, a new exemption is taken to be made for the purposes of a provision of the new Regulations.

Part 202 Transitional

Subpart 202.EAA Transitional provisions for Parts 91, 103, 105, 119, 121, 131, 133, 135 and 138

Division 202.EAA.1 Amendments made by the Civil Aviation Legislation Amendment (Flight Operations—Consequential Amendments and Transitional Provisions) Regulations 2021

Regulation 202.412

Subdivision 202.EAA.1.8—Main translation rules for old instruments

202.412 References in old instruments to old Regulations

When this regulation applies

- (1) This regulation applies to an instrument (the **old instrument**) made under, or for the purposes of, a provision of these Regulations (including the old Regulations) or the Act if the old instrument:
 - (a) is in force immediately before the main commencement time and continues in force (including as a result of the operation of a provision of this Division) immediately after that time; or
 - (b) is made, or is taken to be made, after the main commencement time as a result of the operation of a provision of this Division.

Note: Examples of old instruments include AOCs, CAOs, approvals and other authorisations.

Effect of old instrument

- (2) Subject to this Division, if:
 - (a) the old instrument refers to a provision (the **old provision**) of the old Regulations that is repealed by the amending Regulations; and
 - (b) there is a corresponding new provision in relation to the old provision;then the reference to the old provision is taken, after the main commencement time, to be a reference to the corresponding new provision.

Note: For the definition of **corresponding new provision**, see 202.405.

202.412A References in old instruments to old terminology

When this regulation applies

- (1) This regulation applies to an instrument (the **old instrument**) made under, or for the purposes of, a provision of these Regulations (including the old Regulations) or the Act if the old instrument:
 - (a) is in force immediately before the main commencement time and continues in force (including as a result of the operation of a provision of this Division) immediately after that time; or
 - (b) is made, or is taken to be made, after the main commencement time as a result of the operation of a provision of this Division.

Effect of old instrument

- (2) Subject to this Division, the old instrument has effect after the main commencement time in accordance with the following table.

Effect of old instruments

Item	Column 1	Column 2
	A reference in the old instrument to ...	is taken instead to be a reference to ...
1	an airline	an operator who conducts scheduled air transport operations, other than medical transport operations.
2	foreign aircraft	foreign registered aircraft.
3	I.F.R.	IFR.
4	I.F.R. flight	IFR flight.
5	I.F.R. operation	IFR operation.
6	I.M.C.	IMC.
7	manned balloon	manned free balloon
8	public transport service	an air transport operation, other than a medical transport operation.
9	V.F.R.	VFR.
10	V.F.R. flight	VFR flight.
11	V.F.R. operation	VFR operation.
12	V.M.C.	VMC.

202.412B References in old instruments to kinds of aircraft

When this regulation applies

- (1) This regulation applies to an instrument (the **old instrument**) made under, or for the purposes of, a provision of these Regulations (including the old Regulations) or the Act if the old instrument:
 - (a) is in force immediately before the main commencement time and continues in force (including as a result of the operation of a provision of this Division) immediately after that time; or
 - (b) is made, or is taken to be made, after the main commencement time as a result of the operation of a provision of this Division.

Effect of old instrument

- (2) Subject to this Division, the old instrument has effect after the main commencement time in relation to an aircraft (the **relevant aircraft**) in accordance with the following table.

Part 202 Transitional

Subpart 202.EAA Transitional provisions for Parts 91, 103, 105, 119, 121, 131, 133, 135 and 138

Division 202.EAA.1 Amendments made by the Civil Aviation Legislation Amendment (Flight Operations—Consequential Amendments and Transitional Provisions) Regulations 2021

Regulation 202.412B

Effect of old instruments

Item	Column 1	Column 2	Column 3
	If the old instrument refers to an aircraft of the following kind ...	and the relevant aircraft is, after the main commencement time, used for conducting an operation or activity of the following kind ...	then, a reference in the old instrument to an aircraft of the kind mentioned in column 1 is taken instead to be a reference to ...
1	a regular public transport aircraft	a scheduled air transport operation	an aircraft used for conducting a scheduled air transport operation.
2	a charter aircraft	a non-scheduled air transport operation	an aircraft used for conducting an operation that is a non-scheduled air transport operation.
3	a charter aircraft	a medical transport operation	an aircraft used for conducting a medical transport operation.
4	a charter aircraft	a balloon transport operation	an aircraft used for conducting a balloon transport operation.
5	an aerial work aircraft	an aerial work operation	an aircraft used for conducting an aerial work operation.
6	an aerial work aircraft	an aerial application operation within the meaning of Part 137	an aircraft used for conducting an aerial application operation under an AOC that authorises the use of the aircraft in aerial application operations within the meaning of that Part.
7	an aerial work aircraft	an aerial work operation in a manned free balloon or a hot air airship	an aircraft used for conducting a specialised balloon transport operation.
8	an aerial work aircraft	Part 141 flight training within the meaning of Part 141	an aircraft used for conducting Part 141 flight training.
9	an aerial work aircraft	a Part 142 activity within the meaning of Part 142	an aircraft used for conducting a Part 142 activity.
10	an aerial work aircraft	balloon flying training within the meaning of Part 5 of CAR	an aircraft used for conducting balloon flying training within the meaning of Part 5 of CAR.

(3) However, the effect of subregulation (2) applies only in relation to the relevant aircraft to the extent that the aircraft is used for the purpose of conducting the operation or activity of the kind mentioned in column 2 of the item in the table.

(4) The definition of *kind*, of an aircraft, in Part 1 of the Dictionary does not apply in relation to this regulation.

202.412C References in old instruments to kinds of operations

When this regulation applies

- (1) This regulation applies to an instrument (the **old instrument**) made under, or for the purposes of, a provision of these Regulations (including the old Regulations) or the Act if the old instrument:
 - (a) is in force immediately before the main commencement time and continues in force (including as a result of the operation of a provision of this Division) immediately after that time; or
 - (b) is made, or is taken to be made, after the main commencement time as a result of the operation of a provision of this Division.

Effect of old instrument

- (2) Subject to this Division, the old instrument has effect after the main commencement time in relation to an operation or activity (the **relevant operation or activity**) conducted by an aircraft in accordance with the following table.

Effect of old instruments			
Item	Column 1	Column 2	Column 3
	If the old instrument refers to an operation of the following kind ...	and the relevant operation or activity is an operation or activity of the following kind ...	then, a reference in the old instrument to an operation of the kind mentioned in column 1 is taken instead to be a reference to ...
1	a regular public transport operation	a scheduled air transport operation	a scheduled air transport operation.
2	a charter operation	a non-scheduled air transport operation	a non-scheduled air transport operation.
3	a charter operation	a medical transport operation	a medical transport operation.
4	a charter operation	a balloon transport operation	a balloon transport operation.
5	an aerial work operation	an aerial work operation	an aerial work operation under an aerial work certificate.
6	an aerial work operation	an aerial application operation within the meaning of Part 137	an aerial application operation under an AOC that authorises the use of the aircraft in aerial application operations.
7	an aerial work operation	balloon flying training within the meaning of Part 5 of CAR	balloon flying training within the meaning of Part 5 of CAR.
8	an aerial work operation	Part 141 flight training within the meaning of Part 141	Part 141 flight training.

Part 202 Transitional

Subpart 202.EAA Transitional provisions for Parts 91, 103, 105, 119, 121, 131, 133, 135 and 138

Division 202.EAA.1 Amendments made by the Civil Aviation Legislation Amendment (Flight Operations—Consequential Amendments and Transitional Provisions) Regulations 2021

Regulation 202.413

Effect of old instruments

Item	Column 1	Column 2	Column 3
	If the old instrument refers to an operation of the following kind ...	and the relevant operation or activity is an operation or activity of the following kind ...	then, a reference in the old instrument to an operation of the kind mentioned in column 1 is taken instead to be a reference to ...
9	an aerial work operation	a Part 142 activity within the meaning of Part 142	a Part 142 activity.
10	an aerial work operation	a specialised balloon operation within the meaning of Part 131	a specialised balloon operation that is conducted for hire or reward.
11	any of: (a) an aerial work (air ambulance) operation; or (b) an air ambulance operation; or (c) any other operation involving aerial ambulance functions (however described)	a medical transport operation	a medical transport operation.

(3) However, if:

- (a) as a result of the operation of subregulation (2), an aircraft used for conducting a medical transport operation is subject, after the main commencement time, to both of the following requirements:
 - (i) a requirement that applies in relation to an air ambulance operation;
 - (ii) a requirement that applies in relation to a charter operation; and
- (b) the requirements apply in relation to the same matter;

then the old instrument has effect after the main commencement time in relation to the aircraft as if the requirement mentioned in subparagraph (a)(i) does not apply.

Subdivision 202.EAA.1.9—AOCs

202.413 Old AOCs taken to authorise operations etc.

When this regulation applies

- (1) This regulation applies in relation to an operator who is the holder of an AOC (the *old AOC*) if:
 - (a) the old AOC authorises the operator to conduct an operation or activity of the kind mentioned in column 1 of an item in the table in subregulation (2); and
 - (b) the old AOC:

Regulation 202.413

- (i) is in force immediately before the main commencement time and continues in force (including as a result of the operation of a provision of this Division) immediately after that time; or
- (ii) is issued after the main commencement time as a result of the operation of a provision of this Division.

Old AOCs taken to authorise operations etc.

(2) The following table has effect.

Effect of old AOCs		
Item	Column 1	Column 2
	If the old AOC authorises an operation of the following kind ...	then, from the later of: (a) the main commencement time; or (b) the time when the operator gives CASA the compliance material for the operator mentioned in column 2 of the table in subregulation 202.413A(1) ...
1	a regular public transport operation	the old AOC is taken to authorise: (a) a scheduled air transport operation; and (b) a non-scheduled air transport operation.
2	a charter operation, other than an a charter operation in: (a) a manned free balloon; or (b) a hot air airship	the old AOC is taken to authorise a non-scheduled air transport operation.
3	a charter operation in: (a) a manned free balloon; or (b) a hot air airship	the old AOC is taken to authorise a balloon transport operation.
4	an aerial work (air ambulance) operation	the old AOC is taken to authorise a medical transport operation.
5	an aerial work operation (the relevant aerial work operation), other than: (a) an aerial application operation; or (b) an aerial work (air ambulance) operation; or (c) an aerial work operation in a manned free balloon or a hot air airship	an aerial work certificate is taken to have been issued to the operator under regulation 138.040 authorising the relevant aerial work operation.
6	an aerial work operation: (a) in a manned free balloon; or (b) in a hot air airship; other than commercial balloon flying training	an approval is taken to have been issued to the operator under regulation 131.035 to conduct a specialised balloon operation.

Part 202 Transitional

Subpart 202.EAA Transitional provisions for Parts 91, 103, 105, 119, 121, 131, 133, 135 and 138

Division 202.EAA.1 Amendments made by the Civil Aviation Legislation Amendment (Flight Operations—Consequential Amendments and Transitional Provisions) Regulations 2021

Regulation 202.413

Terms and conditions of AOCs authorising new operations—scheduled and non-scheduled air transport operations

- (3) If column 1 of item 1, 2, or 4 in the table applies in relation to an old AOC, then:
- (a) the holder of the old AOC is authorised to conduct the operation mentioned in column 2 of the item, subject to:
 - (i) the conditions in regulation 119.080; and
 - (ii) any conditions of the old AOC; and
 - (b) regulations 119.070 (conditions for issue) and 119.075 (approval of exposition) do not apply in relation to the holder of the AOC.

Terms and conditions of AOCs authorising new operations—balloon transport operations

- (4) If column 1 of item 3 in the table applies in relation to an old AOC, then:
- (a) the holder of the old AOC is authorised to conduct the operation mentioned in column 2 of the item, subject to:
 - (i) the conditions in regulation 131.090; and
 - (ii) any conditions of the old AOC; and
 - (b) regulations 131.080 (conditions for issue) and 131.085 (approval of exposition) do not apply in relation to the holder of the AOC.

Terms and conditions of aerial work certificates

- (5) If column 1 of item 5 in the table applies in relation to an old AOC, then:
- (a) the aerial work certificate mentioned in column 2 of the item is subject to:
 - (i) the conditions in regulation 138.050; and
 - (ii) any conditions of the old AOC; and
 - (b) subregulation 138.040(1) (conditions for issue) and regulation 138.045 (approval of manuals) do not apply in relation to the holder of the aerial work certificate; and
 - (c) the aerial work certificate ceases to be in force on the day the old AOC expires.

Terms and conditions of approvals—specialised balloon operations

- (6) If column 1 of item 6 in the table applies in relation to an old AOC, then:
- (a) for the purposes of regulation 11.056, the approval mentioned in column 2 of the item is taken to have been granted on the condition that any terms or conditions of the old AOC are complied with; and
 - (b) subregulation 11.056(2) does not apply in relation to the approval; and
 - (c) the approval ceases to be in force on the day the old AOC expires.

Effect of suspension

- (7) If an old AOC has been suspended and the suspension is in force immediately before the main commencement time, then:
- (a) disregard the suspension for the purposes of subparagraph (1)(b)(i); and

Regulation 202.413A

- (b) if, as a result of subregulation (2), the old AOC is taken to authorise an operation—the suspension continues in force in relation to the old AOC and applies in relation to that operation; and
- (c) if, as a result of subregulation (2), an authorisation is taken to be issued, then:
 - (i) the authorisation is taken to be suspended; and
 - (ii) the period of suspension for the authorisation is the same as for the old AOC.

202.413A Operations manuals, expositions and training and checking manuals taken to be approved

(1) The following table has effect in relation to an operator.

Operations manuals and expositions taken to be approved			
Item	Column 1	Column 2	Column 3
	If ...	and the operator gives CASA the following documents and information (the <i>compliance material</i>) ...	then, from the later of: (a) the main commencement time; or (b) the time when the compliance material is given to CASA; CASA is taken to have approved ...
1	either of the following apply: (a) both: (i) the operator is the holder of an AOC that authorises the holder to conduct charter operations, regular public transport operations or aerial work (air ambulance) operations; and (ii) the AOC is in force immediately before the main commencement time; (b) after the main commencement time, the operator is the holder of an AOC that is taken to authorise an Australian air transport operation as a result of the operation of a provision of this Division	both: (a) the operator’s proposed exposition prepared for the purpose of compliance with the requirements of these Regulations; and (b) a compliance statement for the operator that meets the requirements mentioned in subregulation 202.406(2)	the operator’s proposed exposition under regulation 119.075.
2	either of the following apply:	both:	the operator’s proposed

Subpart 202.EAA Transitional provisions for Parts 91, 103, 105, 119, 121, 131, 133, 135 and 138

Division 202.EAA.1 Amendments made by the Civil Aviation Legislation Amendment (Flight Operations—Consequential Amendments and Transitional Provisions) Regulations 2021

Regulation 202.413A

Operations manuals and expositions taken to be approved

Item	Column 1	Column 2	Column 3
	If ...	and the operator gives CASA the following documents and information (the compliance material) ...	then, from the later of: (a) the main commencement time; or (b) the time when the compliance material is given to CASA; CASA is taken to have approved ...
	(a) both: (i) the operator is the holder of an AOC that authorises the holder to conduct aerial work operations (other than aerial work (air ambulance) operations) in an aeroplane or a rotorcraft; and (ii) the AOC is in force immediately before the main commencement time; (b) after the main commencement time, the operator is issued an aerial work certificate as a result of the operation of a provision of this Division	(a) the operator's proposed operations manual prepared for the purposes of compliance with the requirements of these Regulations; and (b) a compliance statement for the operator that meets the requirements mentioned in subregulation 202.406(2)	operations manual under regulation 138.045.
3	all of the following apply: (a) the operator had given CASA a training and checking manual in accordance with Civil Aviation Order 82.1; (b) as at the main commencement time, the training and checking manual is the most recent training and checking manual for the operator; (c) after the main commencement time, the operator is required under regulation 138.125 to have a training and checking system	the operator's proposed training and checking manual prepared for the purposes of compliance with the requirements of these Regulations	the operator's proposed training and checking manual under regulation 138.045.
4	either of the following apply: (a) both: (i) the operator is the holder of an AOC that	the operator's proposed exposition prepared for the purposes of compliance with the requirements of	the operator's proposed exposition under regulation 131.085.

Operations manuals and expositions taken to be approved

Item	Column 1	Column 2	Column 3
	If ...	and the operator gives CASA the following documents and information (the <i>compliance material</i>) ...	then, from the later of: (a) the main commencement time; or (b) the time when the compliance material is given to CASA; CASA is taken to have approved ...
	authorises the holder to conduct a charter operation in a manned free balloon or a hot air airship; and (ii) the AOC is in force immediately before the main commencement time; (b) after the main commencement time, the operator is the holder of an AOC that is taken to authorise a balloon transport operation as a result of the operation of a provision of this Division	these Regulations	

Effect of suspension

- (2) In determining if an AOC is in force immediately before the main commencement time for the purposes of an item in the table in subregulation (1), disregard if the AOC is suspended at that time.

Subdivision 202.EAA.1.10—Applications for AOCs made after main commencement time

202.414 Applications for AOCs made after main commencement time

Subject to this Division, the new Regulations apply in relation to an application for an AOC made after the main commencement time.

Part 202 Transitional

Subpart 202.EAA Transitional provisions for Parts 91, 103, 105, 119, 121, 131, 133, 135 and 138

Division 202.EAA.1 Amendments made by the Civil Aviation Legislation Amendment (Flight Operations—Consequential Amendments and Transitional Provisions) Regulations 2021

Regulation 202.415

Subdivision 202.EAA.1.11—Applications for aerial work certificates made after main commencement time

202.415 Applications for aerial work certificates made after main commencement time

Subject to this Division, the new Regulations apply in relation to an application for an aerial work certificate made after the main commencement time.

Subdivision 202.EAA.1.12—Old instruments other than AOCs

202.416 Approvals taken to be granted

Approval taken to be granted

- (1) If
- (a) a flight of an aircraft occurs after the main commencement time; and
 - (b) an instrument (the *old instrument*) mentioned in column 2 of an item in the following table applies in relation to the flight, or would have applied in relation to the flight if the amending Regulations had not been made; and
 - (c) the old instrument is an eligible instrument; and
 - (d) the old instrument:
 - (i) is in force immediately before the main commencement time; or
 - (ii) is made, or is taken to be made, after the main commencement time as a result of the operation of a provision of this Division;

then, for the purposes of the provision mentioned in column 3 of the item, after the main commencement time, an approval under regulation 91.045 for the activity or thing mentioned in column 4 of the item is taken to be granted to the person mentioned in column 5 of the item in relation to the flight.

Note: For the definition of *eligible instrument*, see 202.405A.

Approved activities where old instrument applies

Item	Column 1 Subject	Column 2 Old instrument	Column 3 Provision of new Regulations	Column 4 Approved activity or thing	Column 5 Approved person
1	VFR flights in class A airspace	An approval under subregulation 99AA(3) of the old CAR to conduct a flight as a VFR flight in class A airspace	Paragraph 91.285(1)(b)	To conduct the flight as a VFR flight in class A airspace	The pilot in command of the aircraft
2	Towing of things by aircraft	Permission or an approval under regulation 149 of	Paragraph 91.210(2)(a)	To tow the thing during the flight	The pilot in command of the aircraft

Regulation 202.416

Approved activities where old instrument applies

Item	Column 1	Column 2	Column 3	Column 4	Column 5
	Subject	Old instrument	Provision of new Regulations	Approved activity or thing	Approved person
		the old CAR to tow a thing by an aircraft			
3	Aerobatic manoeuvres over populous area	Permission under paragraph 155(4)(b) of the old CAR to conduct an aerobatic manoeuvre over a populous area	Subparagraph 91.185 (2)(b)(i)	To conduct the aerobatic manoeuvre during the flight over the populous area	The pilot in command of the aircraft
4	Aerobatic manoeuvres at air display	Permission under paragraph 155(4)(b) of the old CAR to conduct an aerobatic manoeuvre at a public gathering	Subparagraph 91.185 (2)(b)(ii)	To conduct the aerobatic manoeuvre during the flight at an air display performed before the public gathering	The pilot in command of the aircraft
5	Formation flying at night	An approval under subparagraph 163AA(1)(c)(ii) of the old CAR to fly an aircraft in formation flight at night	Paragraph 91.205(2)(b)	To fly in formation at night during the flight	The pilot in command of the aircraft
6	Formation flying in IMC	An approval under subparagraph 163AA(1)(c)(ii) of the old CAR to fly an aircraft in formation flight in IMC	Paragraph 91.205(3)(b)	To fly in formation in IMC during the flight	The pilot in command of the aircraft
7	Carriage on wings, undercarriage etc. for non-aerial work operations	Permission under subregulation 250(2) of the old CAR for the carriage of a person on or in a part of an aircraft during a flight not involving an aerial work operation	Paragraph 91.200(1)(b)	To carry a person on or in: (a) a part of the aircraft that is not designed to carry crew members	Both: (a) the operator of the aircraft; and (b) the pilot in command of the

Part 202 Transitional

Regulation 202.416

Approved activities where old instrument applies

Item	Column 1 Subject	Column 2 Old instrument	Column 3 Provision of new Regulations	Column 4 Approved activity or thing	Column 5 Approved person
				or passengers ; or (b) a thing attached to the aircraft; during the flight	aircraft
8	Aerodrome meteorological minima for landing or taking-off	An exemption under regulation 11.160 from compliance with subregulation 257(3) or (4) of the old CAR	Subparagraphs 91.315(1)(b)(i) and (ii)	To conduct a low-visibility operation at an aerodrome during the flight	Both: (a) the operator of the aircraft; and (b) the pilot in command of the aircraft
9	Carriage of people in provisionally certificated aircraft	An authorisation for a person to be carried in an aircraft for the purposes of paragraph 262AO(11)(a) of the old CAR	Subparagraph 91.865 (2)(b)(ii)	For the carriage of the person covered by the authorisation mentioned in column 2	The holder of the provisional certificate of airworthiness for the aircraft
10	Experimental aircraft	An authorisation for an aircraft to be operated over the built up area of a city or town for the purposes of subregulation 262AP(5) of the old CAR	Paragraph 91.875(2)(f)	To conduct the flight over a populous area	The holder of the experimental certificate for the aircraft
11	Experimental aircraft	An approval under paragraph 262AP(6)(b) of the old CAR for the operation of an experimental aircraft other than	Subparagraph 91.875 (2)(e)(ii)	To conduct the flight other than by day and under the VFR	The holder of the experimental certificate for the aircraft

Approved activities where old instrument applies

Item	Column 1	Column 2	Column 3	Column 4	Column 5
	Subject	Old instrument	Provision of new Regulations	Approved activity or thing	Approved person
		under the VFR by day			
12	Experimental aircraft	An approval under paragraph 262AP(8)(a) of the old CAR for an experimental aircraft to carry a specified number of passengers that is more than 6	Paragraph 91.885(a)	To carry on board the aircraft up to the number of passengers specified in the approval mentioned in column 2	The holder of the experimental certificate for the aircraft

Terms of approval

- (2) For the purposes of regulation 11.056, the approval is taken to have been granted on the condition that any terms or conditions of the old instrument are complied with.
- (3) The approval ceases at the earliest of the following:
- the day (if any) specified in the old instrument as the day on which the old instrument ceases to be in force;
 - the second anniversary of the day the old instrument was made that occurs after the main commencement time;
 - if the operator of the aircraft is the holder of an AOC and the old instrument applies in relation to the operations authorised by the AOC—the day the operator's AOC expires;
 - if the operator of the aircraft is the holder of an aerial work certificate and the old instrument applies in relation to the operations authorised by the aerial work certificate—the day the operator's aerial work certificate expires;
 - if the operator of the aircraft is the holder of a Part 141 certificate and the old instrument applies in relation to the operations authorised by the Part 141 certificate—the day the operator's Part 141 certificate expires.
- (4) Subregulation 11.056(2) (conditions to be set out) does not apply in relation to the approval.

Effect of suspension

- (5) If the old instrument has been suspended and the suspension is in force immediately before the main commencement time, then:
- disregard the suspension for the purposes of subparagraph (1)(d)(i); and

Part 202 Transitional

Subpart 202.EAA Transitional provisions for Parts 91, 103, 105, 119, 121, 131, 133, 135 and 138

Division 202.EAA.1 Amendments made by the Civil Aviation Legislation Amendment (Flight Operations—Consequential Amendments and Transitional Provisions) Regulations 2021

Regulation 202.416A

- (b) the approval taken to be granted under subregulation (1) is taken to be suspended; and
- (c) the period of suspension for the approval is the same as for the old instrument.

202.416A Exemptions taken to be granted

When this regulation applies

- (1) This regulation applies in relation to a flight of an aircraft that occurs after the main commencement time if:
 - (a) an instrument (the **old instrument**) mentioned in column 2 of an item in the following table applies in relation to the flight, or would have applied in relation to the flight if the amending Regulations had not been made; and
 - (b) the old instrument is an eligible instrument; and
 - (c) the old instrument:
 - (i) is in force immediately before the main commencement time; or
 - (ii) is made, or taken to be made, after the main commencement time as a result of the operation of a provision of this Division; and
 - (d) after the main commencement time, a requirement (the **new requirement**) mentioned in column 3 of the item applies in relation to the flight.

Note: For the definition of **eligible instrument**, see 202.405A.

Exemption from new requirement where old instrument applies			
Item	Column 1	Column 2	Column 3
	Subject	Old instrument	New requirement
1	Radio-communication systems	An approval of a radiocommunication system under subregulation 82(1) of the old CAR in relation to an aircraft	A requirement under any of the following provisions relating to the fitment or carriage of a radiocommunication system: <ul style="list-style-type: none">(a) a provision of the Part 91 Manual of Standards prescribed for the purposes of subregulation 91.810(1);(b) a provision of the Part 103 Manual of Standards prescribed for the purposes of subregulation 103.090(1);(c) a provision of the Part 121 Manual of Standards prescribed for the purposes of subregulation 121.460(1);(d) a provision of the Part 131 Manual of Standards prescribed for the purposes of subregulation 131.460(1);(e) a provision of the Part 133 Manual of Standards prescribed for the purposes of subregulation 133.360(1);(f) a provision of the Part 135 Manual of Standards prescribed for the purposes of subregulation 135.370(1);

Regulation 202.416A

Exemption from new requirement where old instrument applies

Item	Column 1	Column 2	Column 3
	Subject	Old instrument	New requirement
			(g) a provision of the Part 138 Manual of Standards prescribed for the purposes of subregulation 138.465(2)
2	Radio-communication systems	An exemption under subregulation 82(3) of CAR (as in force before the commencement of the <i>Civil Aviation and Civil Aviation Safety Amendment Regulations 2011 (No. 2)</i>) in relation to an aircraft that continued to have effect because of regulation 202.011A of these Regulations (as in force before the main commencement time)	A requirement under any of the following provisions relating to the fitment or carriage of a radiocommunication system: <ul style="list-style-type: none"> (a) a provision of the Part 91 Manual of Standards prescribed for the purposes of subregulation 91.810(1); (b) a provision of the Part 103 Manual of Standards prescribed for the purposes of subregulation 103.090(1); (c) a provision of the Part 121 Manual of Standards prescribed for the purposes of subregulation 121.460(1); (d) a provision of the Part 131 Manual of Standards prescribed for the purposes of subregulation 131.460(1); (e) a provision of the Part 133 Manual of Standards prescribed for the purposes of subregulation 133.360(1); (f) a provision of the Part 135 Manual of Standards prescribed for the purposes of subregulation 135.370(1); (g) a provision of the Part 138 Manual of Standards prescribed for the purposes of subregulation 138.465(2)
3	Documents to be carried in aircraft	An approval under paragraph 139(1)(c) or (d) of the old CAR in relation to a document that must be carried on an aircraft when flying	A requirement under any of the following provisions to carry the document on an aircraft when a flight begins: <ul style="list-style-type: none"> (a) paragraph 91.105(2)(a) or subregulation 91.110(3); (b) a provision of the Part 121 Manual of Standards prescribed for the purposes of paragraph 121.085(1)(a); (c) a provision of the Part 131 Manual of Standards prescribed for the purposes of subregulation 131.275(1); (d) a provision of the Part 133 Manual of Standards prescribed for the purposes of paragraph 133.055(1)(a); (e) a provision of the Part 135 Manual of Standards prescribed for the purposes of paragraph 135.065(1)(a)
4	Picking up of	Authority under	A requirement in relation to the pick up or set

			Standards prescribed for the purposes of subregulation 135.370(1); (d) a provision of the Part 138 Manual of Standards prescribed for the purposes of subregulation 138.465(2)
17	Anti-collision lights	A direction under subregulation 196(3) of the old CAR in relation to the display of anti-collision lights for a flight or operation of an aeroplane	A requirement under any of the following provisions to fit or display anti-collision lights: (a) a provision of the Part 91 Manual of Standards prescribed for the purposes of subregulation 91.810(1); (b) a provision of the Part 121 Manual of Standards prescribed for the purposes of subregulation 121.460(1); (c) a provision of the Part 135 Manual of Standards prescribed for the purposes of subregulation 135.370(1); (d) a provision of the Part 138 Manual of Standards prescribed for the purposes of subregulation 138.465(2)
18	Airship lights	A direction under subregulation 203(1) of the old CAR in relation to the display of lights for a flight or operation of an airship	A requirement under a provision of the Part 131 Manual of Standards prescribed for the purposes of subregulation 131.460(1) to fit or display lights
19	Aircraft instruments and equipment	An approval under subregulation 207(2) of the old CAR in relation to the fitting of an instrument, or the carriage of equipment, for an aircraft	Both: (a) a requirement to fit an instrument of the type covered by the approval mentioned in column 2, or to carry equipment of the type covered by the approval mentioned in column 2, for an aircraft; and (b) a requirement relating to an instrument of the type covered by the approval mentioned in column 2, or equipment of the type covered by the approval mentioned in column 2, that is fitted to, or carried on, an aircraft; under any of the following provisions: (c) a provision of the Part 91 Manual of Standards prescribed for the purposes of subregulation 91.810(1); (d) a provision of the Part 103 Manual of Standards prescribed for the purposes of subregulation 103.090(1); (e) a provision of the Part 121 Manual of

Part 202 Transitional

Subpart 202.EAA Transitional provisions for Parts 91, 103, 105, 119, 121, 131, 133, 135 and 138

Division 202.EAA.1 Amendments made by the Civil Aviation Legislation Amendment (Flight Operations—Consequential Amendments and Transitional Provisions) Regulations 2021

Regulation 202.416A

Exemption from new requirement where old instrument applies

Item	Column 1	Column 2	Column 3
	Subject	Old instrument	New requirement
			Standards prescribed for the purposes of subregulation 121.460(1); (f) a provision of the Part 131 Manual of Standards prescribed for the purposes of subregulation 131.460(1); (g) a provision of the Part 133 Manual of Standards prescribed for the purposes of subregulation 133.360(1); (h) a provision of the Part 135 Manual of Standards prescribed for the purposes of subregulation 135.370(1); (i) a provision of the Part 138 Manual of Standards prescribed for the purposes of subregulation 138.465(2)
20	Flight check systems	An approval under subregulation 232(2) of the old CAR of a flight check system for an aircraft	A requirement under paragraph 91.095(2)(a) or subregulation 121.055(1), 131.255(1), 133.030(1), 135.040(1) or 138.210(2) to comply with the flight check requirements set out in the aircraft flight manual instructions for an aircraft
21	Carriage on wings, undercarriage etc. for aerial work operations	Permission under subregulation 250(2) of the old CAR for the carriage of a person during a flight involving an aerial work operation	A requirement under a provision of the Part 138 Manual of Standards prescribed for the purposes of subregulation 138.410(2)
22	Carriage of animals	A permission under subregulation 256A(1) of the old CAR to carry a live animal on an aircraft	A requirement under a provision of the Part 91 Manual of Standards prescribed for the purposes of subregulation 91.620(5) relating to the carriage of animals on an aircraft

Exemption taken to be granted

- (2) A person who would (apart from this subregulation) contravene an offence provision of these Regulations if the new requirement is not met in relation to the flight is taken, after the main commencement time, to have been granted an exemption (the **new exemption**) under Division 11.F.1 from the new requirement for the flight.

Terms of exemption

- (3) For the purposes of regulation 11.205, the new exemption is taken to have been granted on the condition that any terms or conditions of the old instrument are complied with.
- (4) The new exemption ceases at the earliest of the following:
 - (a) the day (if any) specified in the old instrument as the day on which the old instrument ceases to be in force;
 - (b) the second anniversary of the day the old instrument was made, granted, given or issued (as the case requires) that occurs after the main commencement time;
 - (c) if the operator of the aircraft is the holder of an AOC and the old instrument applies in relation to the operations authorised by the AOC—the day the operator's AOC expires;
 - (d) if the operator of the aircraft is the holder of an aerial work certificate and the old instrument applies in relation to the operations authorised by the aerial work certificate—the day the operator's aerial work certificate expires;
 - (e) if the operator of the aircraft is the holder of a Part 141 certificate and the old instrument applies in relation to the operations authorised by the Part 141 certificate—the day the operator's Part 141 certificate expires.
- (5) Subregulation 11.056(2) (conditions to be set out) and regulations 11.225 (publication of exemption) and 11.230 (when exemptions cease) do not apply in relation to the new exemption.

Effect of suspension

- (6) If the old instrument has been suspended and the suspension is in force immediately before the main commencement time, then:
 - (a) disregard the suspension for the purposes of subparagraph (1)(c)(i); and
 - (b) the exemption taken to be granted under subregulation (2) is taken to be suspended; and
 - (c) the period of suspension for the exemption is the same as for the old instrument.

202.416B Directions taken to be issued

When this regulation applies

- (1) This regulation applies if:
 - (a) CASA issued a direction under one of the following provisions of the old CAR:
 - (i) subregulation 92(2) (use of aerodromes);
 - (ii) paragraph 174A(1A)(a) or (2)(e) (instruments and equipment for VFR flights);
 - (iii) subregulation 177(1) (instruments and equipment for IFR flights);

Part 202 Transitional

Subpart 202.EAA Transitional provisions for Parts 91, 103, 105, 119, 121, 131, 133, 135 and 138

Division 202.EAA.1 Amendments made by the Civil Aviation Legislation Amendment (Flight Operations—Consequential Amendments and Transitional Provisions) Regulations 2021

Regulation 202.416C

- (iv) subregulation 207(2) or (3) (aircraft instruments and equipment);
- (v) subregulation 209(1) (private operations);
- (vi) subregulation 221(1) (facilities and safety devices);
- (vii) subregulation 235(2) or (7) (weights for take-off and landing of aircraft);
- (viii) subregulation 244(2) (safety precautions before take-off);
- (ix) subregulation 245(1) (tests before take-off);
- (x) subregulation 251(3) or (6) (seat belts and safety harnesses);
- (xi) subregulation 252(1) (emergency systems and equipment); and
- (b) the direction is an eligible instrument; and
- (c) the direction:
 - (i) is in force immediately before the main commencement time; or
 - (ii) is made, or is taken to be made, after the main commencement time as a result of the operation of a provision of this Division.

Note: For the definition of *eligible instrument*, see 202.405A.

Effect of direction

- (2) The direction has effect, after the main commencement time, as if the direction were issued by CASA under subregulation 11.245(1).
- (3) The direction ceases to be in force at the earlier of the following:
 - (a) the day (if any) specified in the direction as the day on which the direction ceases to be in force;
 - (b) the second anniversary of the day the direction was issued that occurs after the main commencement time.
- (4) Subregulation 11.245(2) is taken to be satisfied in relation to the direction.
- (5) Regulation 11.250 (period of effect of direction) does not apply in relation to the direction.

202.416C Effect of old exemptions

When this regulation applies

- (1) This regulation applies in relation to a person if:
 - (a) either:
 - (i) CASA granted the person an exemption (the *old exemption*) under regulation 11.160 from compliance with a provision (the *old provision*) under the old Regulations; or
 - (ii) the person is subject to an exemption (the *old exemption*) from compliance with a provision (the *old provision*) of the old Regulations that continued to have effect under regulation 202.011, 202.011B or 202.011F of the old Regulations; and
 - (b) the old exemption is an eligible instrument; and
 - (c) the old exemption:

Regulation 202.416C

- (i) is in force immediately before the main commencement time; or
- (ii) is granted after the main commencement time as a result of the operation of a provision of this Division; and
- (d) the old provision is repealed by the amending Regulations; and
- (e) after the main commencement time, there is a corresponding new provision in relation to the old provision.

Note 1: For the definition of *eligible instrument*, see 202.405A.

Note 2: For the definition of *corresponding new provision*, see 202.405.

Exemption taken to be granted

- (2) The person is taken, after the main commencement time, to have been granted an exemption (the *new exemption*) under Division 11.F.1 from compliance with the corresponding new provision.

Terms of exemption

- (3) For the purposes of regulation 11.205, the new exemption is taken to have been granted on the condition that any terms or conditions of the old exemption are complied with.
- (4) The new exemption ceases at the earliest of the following:
 - (a) the day (if any) specified in the old exemption as the day on which the old exemption ceases to be in force;
 - (b) the second anniversary of the day the old exemption was granted that occurs after the main commencement time;
 - (c) if the person is the holder of an AOC and the old exemption applies in relation to the operations authorised by the AOC—the day the person's AOC expires;
 - (d) if the person is the holder of an aerial work certificate and the old exemption applies in relation to the operations authorised by the aerial work certificate—the day the person's aerial work certificate expires;
 - (e) if the person is the holder of a Part 141 certificate and the old exemption applies in relation to the operations authorised by the Part 141 certificate—the day the person's Part 141 certificate expires.
- (5) Subregulation 11.056(2) (conditions to be set out) and regulations 11.225 (publication of exemption) and 11.230 (when exemptions cease) do not apply in relation to the new exemption.

Effect of suspension

- (6) If the old exemption has been suspended and the suspension is in force immediately before the main commencement time, then:
 - (a) disregard the suspension for the purposes of subparagraph (1)(c)(i); and
 - (b) the new exemption taken to be granted under subregulation (2) is taken to be suspended; and

Part 202 Transitional

Subpart 202.EAA Transitional provisions for Parts 91, 103, 105, 119, 121, 131, 133, 135 and 138

Division 202.EAA.1 Amendments made by the Civil Aviation Legislation Amendment (Flight Operations—Consequential Amendments and Transitional Provisions) Regulations 2021

Regulation 202.417

- (c) the period of suspension for the new exemption is the same as for the old exemption.

Subdivision 202.EAA.1.13—Applications for instruments other than AOCs and aerial work certificates

202.417 Applications for instruments (other than AOCs and aerial work certificates) made after main commencement time

Subject to this Division, the new Regulations apply in relation to an application for an instrument (other than an AOC or an aerial work certificate) that is made after the main commencement time.

Subdivision 202.EAA.1.14—Other general transitional matters

202.418 Flight training and checking

When this regulation applies

- (1) This regulation applies in relation to a flight by an aircraft if:
- (a) after the main commencement time, a requirement (the *new requirement*) under a provision of these Regulations or an instrument made under, or for the purposes of, these Regulations, applies in relation to the flight; and
 - (b) the new requirement is in relation to a training or checking event (the *new event*) that is:
 - (i) specified in a determination made for the purposes of subregulation (3); and
 - (ii) in relation to a person; and
 - (c) a training or checking event (the *old event*) that is specified in the determination in relation to the new event happened in relation to the person before the main commencement time; and
 - (d) the flight occurs:
 - (i) after the main commencement time; and
 - (ii) before the time (if any) specified in the determination in relation to the new event.

New event taken to have happened

- (2) After the main commencement time, for the purposes of these Regulations or an instrument made under, or for the purposes of, these Regulations, the new event is taken to have happened in relation to the person.

Determination

- (3) CASA may make a written determination for the purposes of this regulation.

Note: A determination made under this subregulation is a legislative instrument: see subsection 98(5AA) of the Act.

Training or checking events

- (4) In this regulation, a **training or checking event** includes any of the following:
- (a) satisfactory completion of training or education (however described);
 - (b) successful completion of a check, a test, a flight review or an assessment of competency (however described);
 - (c) obtaining a qualification or certificate;
 - (d) completing experience;
 - (e) completing a flight or series of flights;
 - (f) successfully participating in a training and checking system (however described).

202.418A Flights in progress

If a flight of an aircraft begins before the main commencement time but has not ended by that time, then, despite the amending Regulations, the old Regulations continue to apply in relation to the flight.

202.418B Manuals of Standards may deal with other transitional matters

For the avoidance of doubt, a Manual of Standards made for a Part under these Regulations may provide for matters of a transitional nature (including prescribing any saving or application provisions) relating to a provision of the Manual of Standards.

Note: If there is an inconsistency between a MOS and a provision of the Act or these Regulations, the provision of the Act or these Regulations prevails to the extent of the inconsistency: see regulation 1.008.

Subdivision 202.EAA.1.15—Miscellaneous transitional provisions

202.419 Statistical returns

When this regulation applies

- (1) This regulation applies if:
- (a) before the main commencement time, a person was directed to give information under subregulation 132(1) of the old CAR in relation to an aircraft; and
 - (b) the direction is an eligible instrument; and
 - (c) the direction is in force immediately before the main commencement time; and
 - (d) as at the main commencement time, the direction has not been complied with.

Note: For the definition of **eligible instrument**, see 202.405A.

Part 202 Transitional

Subpart 202.EAA Transitional provisions for Parts 91, 103, 105, 119, 121, 131, 133, 135 and 138

Division 202.EAA.1 Amendments made by the Civil Aviation Legislation Amendment (Flight Operations—Consequential Amendments and Transitional Provisions) Regulations 2021

Regulation 202.419A

Direction continues to have effect

- (2) The direction continues to have effect, after the main commencement time, as if the direction had been given by CASA under regulation 117.020 in relation to the aircraft.
- (3) For the purposes of subregulation 117.020(4), the person must comply with the direction within 60 days after the main commencement time.

202.419A Reports

- (1) If:
 - (a) before the main commencement time, a person was required (the *old requirement*) to give a traffic report under subregulation 132(2) of the old CAR; and
 - (b) as at the main commencement time, the old requirement has not been complied with;then, after the main commencement time, the person is taken to have been given a direction under regulation 117.025 to prepare and provide a traffic report.
- (2) For the purposes of subregulation 117.025(4), the person must comply with the direction within 60 days after the main commencement time.

202.419B Protection of information

Regulation 117.030 applies in relation to disclosures of information in accordance with regulations 117.020 and 117.025 (including those provisions as applied by regulations 202.419 and 202.419A) that happen after the main commencement time (whether the information was obtained or disclosed before or after the main commencement time).

202.419C Special flight permits

When this regulation applies

- (1) This regulation applies if:
 - (a) before the main commencement time, CASA or an authorised person has:
 - (i) issued a special flight permit for an aircraft under regulation 21.197; and
 - (ii) directed that all or any of paragraphs 133(1)(a), (c) and (d) and regulation 139 of the old CAR do not apply to the aircraft; and
 - (b) the permit and the direction are in force immediately before the main commencement time.

Effect of regulations

- (2) These Regulations have effect, after the main commencement time, as if:
 - (a) a reference in the direction to paragraph 133(1)(a) of the old CAR were instead a reference to paragraph 91.145(2)(c); and

Regulation 202.419D

- (b) a reference in the direction to paragraph 133(1)(c) of the old CAR were instead a reference to paragraph 91.145(2)(d); and
- (c) a reference in the direction to regulation 139 of the old CAR were instead a reference to Division 91.C.3.

202.419D Special flight authorisations

- (1) If:
 - (a) before the main commencement time, a special flight authorisation (the *old authorisation*) for the operation of an aircraft had been issued under regulation 135A of the old CAR; and
 - (b) the old authorisation is in force immediately before the main commencement time;then, after the main commencement time, a special flight authorisation (the *new authorisation*) is taken to be in force in relation to the aircraft under regulation 91.970 for flight of the aircraft in Australian territory.
- (2) For the purposes of paragraph 91.970(3)(c), the new authorisation is taken to have been granted on the condition that any terms or conditions of the old authorisation are complied with.
- (3) The new authorisation ceases:
 - (a) if the old authorisation specifies a day on which the old authorisation ceases to be in force—on that day; or
 - (b) otherwise—the second anniversary of the day the old authorisation was given that occurs after the main commencement time.

202.419E Foreign state aircraft

When this regulation applies

- (1) This regulation applies in relation to a flight in Australian territory by a state aircraft of a foreign country that occurs after the main commencement time if:
 - (a) before the main commencement time, CASA had given permission or an invitation (the *old permission*) for the flight under regulation 136 of the old CAR; and
 - (b) the old permission is an eligible instrument; and
 - (c) the old permission is in force immediately before the main commencement time.

Note: For the definition of *eligible instrument*, see 202.405A.

Approval taken to be granted

- (2) For the purposes of subregulation 91.975(1), after the main commencement time, the operator of the aircraft is taken to have been granted an approval under regulation 91.045 for the flight.

Part 202 Transitional

Subpart 202.EAA Transitional provisions for Parts 91, 103, 105, 119, 121, 131, 133, 135 and 138

Division 202.EAA.1 Amendments made by the Civil Aviation Legislation Amendment (Flight Operations—Consequential Amendments and Transitional Provisions) Regulations 2021

Regulation 202.419F

- (3) For the purposes of regulation 11.056, the approval is taken to have been granted on the condition that any terms or conditions of the old permission are complied with.
- (4) Subregulation 11.056(2) does not apply in relation to the approval.
- (5) The approval ceases:
 - (a) if the old permission specifies a day on which the old permission ceases to be in force—on that day; or
 - (b) otherwise—the second anniversary of the day the old permission was given that occurs after the main commencement time.

202.419F Discharge of firearms in aircraft

When this regulation applies

- (1) This regulation applies in relation to a flight of an aircraft involved in an aerial work operation that occurs after the main commencement time if:
 - (a) before the main commencement time, CASA had given permission (the **old permission**) under subregulation 144(3) of the old CAR for a person to discharge a firearm while on an aircraft involved in an aerial work operation; and
 - (b) the old permission is an eligible instrument; and
 - (c) the old permission is in force immediately before the main commencement time.

Note: For the definition of **eligible instrument**, see 202.405A.

Person taken to be authorised to discharge firearm

- (2) For the purposes of subregulation 91.165(2), after the main commencement time, the person is taken to have been granted an authorisation (the **new authorisation**) to discharge the firearm while on the aircraft.

Terms of authorisation

- (3) For the purposes of regulation 11.056, the new authorisation is taken to have been granted on the condition that any terms or conditions of the old permission are complied with.
- (4) Subregulation 11.056(2) (conditions to be set out) does not apply in relation to the new authorisation.
- (5) The new authorisation ceases at the earlier of the following:
 - (a) the day (if any) specified in the old permission as the day on which the old permission ceases to be in force;
 - (b) the second anniversary of the day the old permission was given that occurs after the main commencement time.

Exemption for operator and pilot taken to be granted

- (6) Subregulations (7) to (10) apply if the operator and the pilot in command of the aircraft for the flight are subject to a requirement (the **new requirement**) under a provision prescribed by the Part 138 Manual of Standards for the purposes of paragraph 138.432(2)(b) in relation to the discharge of a firearm while on the aircraft.
- (7) For the purposes of regulation 138.432, after the main commencement time, the operator and the pilot in command of the aircraft for the flight are each taken to have been granted an exemption (the **new exemption**) under Division 11.F.1 from the new requirement in relation to the flight.

Terms of exemption

- (8) For the purposes of regulation 11.205, the new exemption is taken to have been granted on the condition that any terms or conditions of the old permission are complied with.
- (9) The new exemption ceases at the earliest of the following:
 - (a) the day (if any) specified in the old permission as the day on which the old permission ceases to be in force;
 - (b) the second anniversary of the day the old permission was given that occurs after the main commencement time;
 - (c) if the operator of the aircraft is the holder of an aerial work certificate and the old permission applies in relation to the operations authorised by the aerial work certificate—the day the operator’s aerial work certificate expires.
- (10) Subregulation 11.205(2) (conditions to be set out) and regulations 11.225 (publication of exemption) and 11.230 (when exemptions cease) do not apply in relation to the new exemption.

202.419G Instrument approach and departure procedure*When this regulation applies*

- (1) This regulation applies if:
 - (a) before the main commencement time, CASA had issued a determination (the **old determination**):
 - (i) under paragraph 178(6)(b) of the old CAR in relation to an instrument approach procedure; or
 - (ii) under paragraph 178(6)(c) of the old CAR in relation to an instrument departure procedure; and
 - (b) the old determination is an eligible instrument; and
 - (c) the old determination is in force immediately before the main commencement time.

Note: For the definition of **eligible instrument**, see 202.405A.

Part 202 Transitional

Subpart 202.EAA Transitional provisions for Parts 91, 103, 105, 119, 121, 131, 133, 135 and 138

Division 202.EAA.1 Amendments made by the Civil Aviation Legislation Amendment (Flight Operations—Consequential Amendments and Transitional Provisions) Regulations 2021

Regulation 202.419H

Determination continues to have effect

- (2) The old determination continues to have effect, after the main commencement time, as if the determination were an instrument (the **new instrument**):
 - (a) if subparagraph (1)(a)(i) applies—issued under regulation 201.025 for the purposes of subparagraph (a)(ii) of the definition of **authorised instrument approach procedure** in Part 1 of the Dictionary; or
 - (b) if subparagraph (1)(a)(ii) applies—issued under regulation 201.025 for the purposes of subparagraph (a)(ii) of the definition of **authorised instrument departure procedure** in Part 1 of the Dictionary.
- (3) The new instrument ceases to be in force at the earlier of the following:
 - (a) the day (if any) specified in the old determination as the day on which the old determination ceases to be in force;
 - (b) the second anniversary of the day the old determination was issued that occurs after the main commencement time.

202.419H Existing RVSM approvals

When this regulation applies

- (1) This regulation applies in relation to an operator of an aircraft if:
 - (a) the operator held an RVSM operational approval (the **old operational approval**) under regulation 181M of the old CAR; and
 - (b) the old operational approval covers the aircraft; and
 - (c) the old operational approval is in force immediately before the main commencement time; and
 - (d) an RVSM airworthiness approval (the **old airworthiness approval**) under regulation 181G of the old CAR is in force for the aircraft immediately before the main commencement time.

Approval taken to be granted

- (2) For the purposes of regulation 91.655, the operator of the aircraft is taken, after the main commencement time, to hold an approval (the **new approval**) under regulation 91.045 for the aircraft to be flown in RVSM airspace.
- (3) The new approval ceases to have effect at the earliest of the following:
 - (a) the day (if any) specified in the old operational approval as the day on which the old operational approval ceases to be in force;
 - (b) the day (if any) specified in the old airworthiness approval as the day on which the old airworthiness approval ceases to be in force;
 - (c) the second anniversary of the day the old operational approval was given that occurs after the main commencement time;
 - (d) the second anniversary of the day the old airworthiness approval was given that occurs after the main commencement time;
 - (e) if the operator is the holder of an AOC—the day the operator’s AOC expires;

-
- (f) if the operator is the holder of an aerial work certificate—the day the operator’s aerial work certificate expires.

202.419J Applications for RVSM operational approval

When this regulation applies

- (1) This regulation applies in relation to an operator of an aircraft if:
- (a) before the main commencement time, the operator applied for a RVSM operational approval under regulation 181L of the old CAR; and
 - (b) as at the main commencement time, the application has not been finally determined; and
 - (c) the requirements in paragraphs 181M(1)(a) to (c) of the old CAR would have been satisfied in relation to the aircraft (assuming that regulation 181M had not been repealed by the amending Regulations).

Application taken to be made

- (2) At the main commencement time, the application is taken to have been made under regulation 91.045 for the aircraft to be flown in RVSM airspace for the purposes of subparagraph 91.655(2)(a)(i).

202.419K Operations manuals

When this regulation applies

- (1) This regulation applies if:
- (a) before the main commencement time, CASA had given a direction under subregulation 215(3) of the old CAR in relation to an operator’s operations manual; and
 - (b) the direction is an eligible instrument; and
 - (c) the direction is in force immediately before the main commencement time.

Note: For the definition of *eligible instrument*, see 202.405A.

Direction continues to have effect

- (2) The direction continues to have effect, after the main commencement time:
- (a) in relation to an operator that is an Australian air transport operator—as if the direction had been given by CASA under subregulation 119.105(1) in relation to the operator’s exposition; and
 - (b) in relation to an operator that is an aerial work operator—as if the direction had been given by CASA under subregulation 138.068(1) in relation to the operator’s operations manual; and
 - (c) in relation to an operator that is a balloon transport operator—as if the direction had been given by CASA under subregulation 131.115(1) in relation to the operator’s exposition.
- (3) The direction ceases to be in force:

Part 202 Transitional

Subpart 202.EAA Transitional provisions for Parts 91, 103, 105, 119, 121, 131, 133, 135 and 138

Division 202.EAA.1 Amendments made by the Civil Aviation Legislation Amendment (Flight Operations—Consequential Amendments and Transitional Provisions) Regulations 2021

Regulation 202.419L

- (a) in relation to an operator that is an Australian air transport operator—on the day the operator’s AOC expires; and
- (b) in relation to an operator that is an aerial work operator—on the day the operator’s aerial work certificate expires; and
- (c) in relation to an operator that is balloon transport operator—on the day the operator’s AOC expires.

202.419L Fuel records

When this regulation applies

- (1) This regulation applies in relation to a record that was required to be maintained under regulation 220 of the old CAR immediately before the main commencement time.

Old CAR continues to apply

- (2) Despite the repeal of regulation 220 of the old CAR by the amending Regulations, that regulation as in force immediately before the main commencement time continues to apply in relation to the record for a period of 6 months beginning immediately after the main commencement time.

202.419M Light sport aircraft

When this regulation applies

- (1) This regulation applies if:
 - (a) before the main commencement time, for the purposes of subregulation 262APA(7) of the old CAR, a person was appointed by CASA to perform the functions of the manufacturer in relation to the continuing airworthiness of an aircraft; and
 - (b) the appointment is in force immediately before the main commencement time.

Person taken to be authorised person

- (2) For the purposes of subregulation 91.900(4), after the main commencement time the person is taken to be an authorised person.

202.419N Operating requirements for light sport aircraft

When this regulation applies

- (1) This regulation applies if:
 - (a) before the main commencement time, CASA had determined (the **old determination**) one or more additional operating limitations in relation to an aircraft under subregulation 262APA(4) of the old CAR; and
 - (b) the old determination is an eligible instrument; and

Regulation 202.419P

- (c) the old determination is in force immediately before the main commencement time.

Note: For the definition of *eligible instrument*, see 202.405A.

Effect of determination

- (2) The old determination has effect, after the main commencement time, as if it had been issued as a direction by CASA under subregulation 11.245(1) in relation to the aircraft.
- (3) The direction ceases to be in force at the earlier of the following:
- (a) the day (if any) specified in the old determination as the day on which the old determination ceases to be in force;
 - (b) the second anniversary of the day the old determination was issued that occurs after the main commencement time.
- (4) Subregulation 11.245(2) is taken to be satisfied in relation to the direction.
- (5) Regulation 11.250 (period of effect of direction) does not apply in relation to the direction.

202.419P Reviewable decisions

Despite the amendments of regulation 297A of the old CAR made by the amending Regulations, that regulation, as in force immediately before the main commencement time, continues to apply after the main commencement time in relation to a decision made before the main commencement time.

202.419Q Authorised persons and identity cards

When this regulation applies

- (1) This regulation applies if:
- (a) before the main commencement time, a person was appointed (the *old appointment*) under paragraph 6(1)(a) or (b) of the old CAR to be an authorised person in relation to a provision of CAR; and
 - (b) the old appointment is in force immediately before the main commencement time.

Person taken to be authorised person

- (2) For the purposes of these Regulations, after the main commencement time, the person is taken to be an authorised person under regulation 201.001 in relation to:
- (a) if the relevant provision of CAR is in force immediately after the main commencement time—that provision of CAR; or
 - (b) if the relevant provision of CAR is repealed by the amending Regulations—the corresponding new provision (if any).

Note: For the definition of *corresponding new provision*, see 202.405.

Part 202 Transitional

Subpart 202.EAA Transitional provisions for Parts 91, 103, 105, 119, 121, 131, 133, 135 and 138

Division 202.EAA.1 Amendments made by the Civil Aviation Legislation Amendment (Flight Operations—Consequential Amendments and Transitional Provisions) Regulations 2021

Regulation 202.419R

- (3) For the purposes of subregulation 201.001(4), a person taken to be an authorised person under subregulation (2) of this regulation is appointed on the conditions of the person's old appointment.
- (4) To avoid doubt, subregulations 201.001(2) and (3) do not apply in relation to a person taken to be an authorised person under subregulation (2) of this regulation.

Identity cards

- (5) If:
 - (a) before the main commencement time, an identity card had been issued under subregulation 6A(1) of the old CAR to an authorised person in relation to one or more provisions (the *old provision*) of CAR; and
 - (b) the identity card was in the possession of the authorised person immediately before the main commencement time;then, for the purposes of these Regulations, after the main commencement time, the identity card is taken:
 - (c) to have been issued to the authorised person under regulation 201.002; and
 - (d) to specify whichever of the following is applicable:
 - (i) if paragraph (2)(a) of this regulation applies—the relevant provision of CAR;
 - (ii) if paragraph (2)(b) of this regulation applies—the relevant corresponding new provision.

Note: For the definition of *corresponding new provision*, see 202.405.

202.419R Applications for certificates of airworthiness

- (1) Despite the amendment of regulation 21.173 by Schedule 1 to the amending Regulations, the owner of an aircraft that is registered with one of the following bodies is eligible, under that regulation, to apply for a certificate of airworthiness for the aircraft:
 - (a) Australian Sport Rotorcraft Association Incorporated;
 - (b) The Gliding Federation of Australia Incorporated;
 - (c) Sports Aviation Federation of Australia Limited;
 - (d) Recreational Aviation Australia Limited.
- (2) This regulation is repealed at the end of 2 December 2024.

202.419S Applications for experimental certificates

- (1) Despite the amendment of regulation 21.192 by Schedule 1 to the amending Regulations, the owner of an aircraft that is registered with one of the following bodies is eligible, under that regulation, to apply for an experimental certificate for one or more of the purposes mentioned in regulation 21.191:
 - (a) Australian Sport Rotorcraft Association Incorporated;
 - (b) The Gliding Federation of Australia Incorporated;

Regulation 202.419S

- (c) Sports Aviation Federation of Australia Limited;
 - (d) Recreational Aviation Australia Limited.
- (2) This regulation is repealed at the end of 2 December 2024.

Subpart 202.EB—Transitional provisions for Part 91 (General operating and flight rules)

Note 1: This Subpart heading is reserved for future use.

Note 2: Regulation numbers 202.420 to 202.439 are reserved for use in this Subpart.

Subpart 202.EC—Transitional provisions for Part 92 (Consignment and carriage of dangerous goods by air)

202.440 Approval of certain training courses and instructors

- (1) Subregulations (2) and (3) have effect if the Governor-General has made regulations that will amend CASR to require the approval of:
 - (a) courses of training in relation to dangerous goods; and
 - (b) instructors to give such courses;and those regulations have been registered but have not come into force.
- (2) CASA may approve such a course of training, or such an instructor, for the purposes of CASR as so to be amended.
- (3) Such an approval may be expressed to be for the purposes of a provision of CASR as so to be amended.
- (4) Such an approval given before the amending regulations come into force is not, after those regulations come into force, ineffective only because it was given before those regulations came into force.

Subpart 202.FA—Transitional provisions for Part 101 (Unmanned aircraft and rockets)

Division 202.FA.1—Amendments made by the Civil Aviation Legislation Amendment (Part 101) Regulation 2016

202.455 Definition of *commencement date* for Division 202.FA.1

In this Division:

commencement date means the day on which the *Civil Aviation Legislation Amendment (Part 101) Regulation 2016* commences.

202.460 Transitional—approved areas for UAVs

Applications for approved areas for UAVs—if made but not finally determined before commencement date

- (1) Subregulation (2) applies if, before the commencement date:
 - (a) a person applied for the approval of an area as an area for the operation of UAVs under regulation 101.030; and
 - (b) the application had not been finally determined by CASA.
- (2) The application is taken, on and after the commencement date, to be an application for the approval of an area for the operation of RPA under regulation 101.030.

Approved areas for UAVs immediately before the commencement date

- (3) An approval of an area as an area for the operation of UAVs under regulation 101.030 that was in force immediately before the commencement date is taken, on and after that date, to be an approval of the area as an area for the operation of RPA under regulation 101.030 subject to the same terms and conditions.

202.461 Transitional—UAV controllers

Applications for certification as UAV controller—if made but not finally determined before commencement date

- (1) Subregulation (2) applies if, before the commencement date:
 - (a) a person applied for certification as a UAV controller under regulation 101.290; and
 - (b) the application had not been finally determined by CASA.
- (2) The application is taken, on and after the commencement date, to be an application for a remote pilot licence under regulation 101.290.

Certified UAV controllers

- (3) If, immediately before the commencement date, a person was certified as a UAV controller under regulation 101.295, the certification has effect on and after that date as if it were a remote pilot licence granted under regulation 101.295.
- (4) Any condition to which the certification was subject immediately before the commencement date continues in force as a condition of the licence.

Non-finalised action to vary, suspend or cancel certification of UAV controller

- (5) Action to vary, suspend or cancel the certification of a person as a UAV controller that, immediately before the commencement date, had not been finally determined, is taken to be action to vary, suspend or cancel the person's remote pilot licence.

202.462 Transitional—UAV operators

Applications for certification as UAV operator—if made but not finally determined before commencement date

- (1) Subregulation (2) applies if, before the commencement date:
 - (a) a person applied for certification as a UAV operator under regulation 101.330; and
 - (b) the application had not been finally determined by CASA.
- (2) The application is taken, on and after the commencement date, to be an application for certification as an RPA operator under regulation 101.330.

Certification of UAV operators immediately before commencement date

- (3) The certification of a person as a UAV operator under regulation 101.335 that was in force immediately before the commencement date is taken, on and after that date, to be a certification of the person as an RPA operator under regulation 101.335 subject to the same terms and conditions.

Non-finalised action to vary, suspend or cancel certification of UAV operator

- (4) Action to vary, suspend or cancel the certification of a person as a UAV operator that, immediately before the commencement date, had not been finally determined is taken to be the same action in relation to the certification of the person as an RPA operator.

Division 202.FA.2—Amendments made by Schedule 2 to the Civil Aviation Safety Amendment (Remotely Piloted Aircraft and Model Aircraft—Registration and Accreditation) Regulations 2019

202.463 Definitions for Division 202.FA.2

In this Division:

amending Regulations means the *Civil Aviation Safety Amendment (Remotely Piloted Aircraft and Model Aircraft—Registration and Accreditation) Regulations 2019*.

subsequent amending regulations means the *Civil Aviation Safety Amendment (Parts 47 and 101 No. 2) Regulations 2022*.

202.466 Delayed application—model aircraft

Rules for operating model aircraft

- (3) Subpart 101.G (model aircraft), as in force immediately before the commencement of Schedule 2 to the amending Regulations, continues to apply until immediately before the day the subsequent amending regulations commence.

Note: Schedule 2 to the amending Regulations commences on 1 April 2020 (or a later day): see section 2 of the amending Regulations.

Subpart 202.FC—Transitional provisions for Part 103 (Sport and recreational aviation operations)

Note 1: This Subpart heading is reserved for future use.

Note 2: Regulation numbers 202.480 to 202.499 are reserved for use in this Subpart.

Subpart 202.FE—Transitional provisions for Part 105 (Parachuting from aircraft)

Division 202.FE.1—Amendments made by the Civil Aviation Legislation Amendment (Parts 103, 105 and 131) Regulations 2019

202.500 Definitions for Division 202.FE.1

In this Division:

amending regulations means the *Civil Aviation Legislation Amendment (Parts 103, 105 and 131) Regulations 2019*.

202.501 Application of Part 105 to parachuting activities

Part 105, as inserted by Schedule 2 to the amending regulations, applies in relation to parachuting activities undertaken on or after 2 December 2021.

**Subpart 202.FJ—Transitional provisions for Part 115
(Operations using sport aviation aircraft for
non-recreational activities)**

Note 1: This Subpart heading is reserved for future use.

Note 2: Regulation numbers 202.520 to 202.539 are reserved for use in this Subpart.

Subpart 202.FL—Transitional provisions for Part 119 (Air operator certification—air transport)

Note 1: This Subpart heading is reserved for future use.

Note 2: Regulation numbers 202.540 to 202.559 are reserved for use in this Subpart.

Subpart 202.FN—Transitional provisions for Part 121A (Air transport operations—large aeroplanes)

Note 1: This Subpart heading is reserved for future use.

Note 2: Regulation numbers 202.560 to 202.579 are reserved for use in this Subpart.

Subpart 202.FO—Transitional provisions for Part 121B (Air transport operations—small aeroplanes)

Note 1: This Subpart heading is reserved for future use.

Note 2: Regulation numbers 202.580 to 202.599 are reserved for use in this Subpart.

**Subpart 202.FR—Transitional provisions for Part 129
(Foreign air transport operators—certification and
operating requirements)**

Note 1: This Subpart heading is reserved for future use.

Note 2: Regulation numbers 202.600 to 202.608 are reserved for use in this Subpart.

Subpart 202.FS—Transitional provisions for Part 132 (Limited category aircraft)

Division 202.FS.1—Amendments made by the Civil Aviation Legislation Amendment (Part 132) Regulation 2016

202.609 Definitions for Division 202.FS.1

In this Division:

commencement time means the commencement of the *Civil Aviation Legislation Amendment (Part 132) Regulation 2016*.

202.610 Warning placards

- (1) This regulation applies to an aircraft for which a limited category certificate was in force immediately before the commencement time.
- (2) A placard that:
 - (a) was fitted to the aircraft before the commencement time; and
 - (b) bears the warning set out in subregulation 262AM(6) of CAR (as in force immediately before the commencement time);is taken, on and after the commencement time, to comply with the Part 132 Manual of Standards.

202.611 Permit indexes assigned by CASA or Australian Warbirds Association Limited

- (1) This regulation applies if, immediately before the commencement time:
 - (a) a limited category certificate for an aircraft was in force or under suspension; and
 - (b) a permit index assigned to the aircraft under regulation 262AM of CAR by CASA or the Australian Warbirds Association Limited was in force.
- (2) The permit index is taken to be the permit index number for the aircraft.
- (3) The permit index number is taken to have been assigned to the aircraft under subregulation 21.176(5).

202.612 Limited category aircraft without permit index

Aircraft with limited category certificates in force

- (1) Subregulation (2) applies if, immediately before the commencement time:
 - (a) a limited category certificate for an aircraft was in force; and
 - (b) there was no permit index in force for the aircraft under regulation 262AM of CAR.

- (2) The administering authority for the aircraft must assign a permit index number to the aircraft in accordance with regulation 132.195.

Aircraft with limited category certificates under suspension

- (3) Subregulation (4) applies if, immediately before the commencement time:
 - (a) a limited category certificate for an aircraft was under suspension; and
 - (b) there was no permit index in force for the aircraft under regulation 262AM of CAR.
- (4) If the suspension is lifted, the administering authority for the aircraft must assign a permit index number to the aircraft in accordance with regulation 132.195.

Note: The administering authority must also reissue the limited category certificate for the aircraft, or an attachment to the certificate, so that the certificate or attachment includes the permit index number: see regulation 132.215.

202.613 Approval of major modifications and repairs

- (1) This regulation applies to an aircraft if, immediately before the commencement time:
 - (a) a limited category certificate was in force for the aircraft; and
 - (b) the certificate included operating historic or ex-military aircraft in adventure style operations as a special purpose operation for the aircraft; and
 - (c) the aircraft has a major modification or repair.
- (2) On and after the commencement time, the major modification or repair is taken to have been approved for the purposes of regulation 132.030.

202.614 Approval to carry more than 6 passengers

- (1) This regulation applies to an aircraft if, immediately before the commencement time, an approval under paragraph 262AM(4)(a) of CAR to carry a greater number of passengers than 6 was in force for the aircraft.
- (2) On and after the commencement time, the approval has effect as if it were an approval granted under regulation 132.035 for the purposes of paragraph 132.050(2)(d).

Subpart 202.FT—Transitional provisions for Part 133 (Air transport and aerial work operations—rotorcraft)

Note 1: This Subpart heading is reserved for future use.

Note 2: Regulation numbers 202.620 to 202.639 are reserved for use in this Subpart.

**Subpart 202.FV—Transitional provisions for Part 136
(Aerial work operations—other than those covered
by Parts 133, 137, 138, 141 and 142)**

Note 1: This Subpart heading is reserved for future use.

Note 2: Regulation numbers 202.640 to 202.659 are reserved for use in this Subpart.

**Subpart 202.FW—Transitional provisions for Part 137
(Aerial agriculture operations—other than
rotorcraft)**

Note 1: This Subpart heading is reserved for future use.

Note 2: Regulation numbers 202.660 to 202.679 are reserved for use in this Subpart.

Subpart 202.FX—Transitional provisions for Part 138 (Search and rescue operations)

Note 1: This Subpart heading is reserved for future use.

Note 2: Regulation numbers 202.680 to 202.699 are reserved for use in this Subpart.

Subpart 202.FY—Transitional provisions for Part 139 (Aerodromes)

Division 202.FY.1—Amendments made by the Civil Aviation Safety Amendment (Part 139) Regulations 2019

202.700 Definitions for this Division

In this Division:

certificate transition period: see subregulation 202.702(10).

commencement time means the time the *Civil Aviation Safety Amendment (Part 139) Regulations 2019* commence.

Note: The *Civil Aviation Safety Amendment (Part 139) Regulations 2019* commence on 13 August 2020.

end time, for a transitional instrument: see subregulation 202.704(3).

new manual: see subregulation 202.702(5).

new manual day: see subregulation 202.702(6).

new Part 139 Manual of Standards means the Part 139 Manual of Standards.

Note: For the *Part 139 Manual of Standards*, see the Dictionary.

new Part 139 Regulations means these Regulations as amended by the *Civil Aviation Safety Amendment (Part 139) Regulations 2019*.

Note: The *Civil Aviation Safety Amendment (Part 139) Regulations 2019* amended these Regulations to repeal Subparts 139.A to 139.F of Part 139 and substitute new Subparts 139.A to 139.E.

old Part 139 Manual of Standards means the *Manual of Standards Part 139—Aerodromes*, as in force immediately before the commencement time.

old Part 139 Regulations means these Regulations as in force immediately before the commencement time.

Note: These Regulations as so in force included Part 139 as in force immediately before the commencement time.

transitional aerodrome certificate: see subregulation 202.701(1).

transitional instrument: see subregulation 202.704(1).

202.701 Transitional aerodrome certificates

What is a transitional aerodrome certificate?

- (1) Each of the following is a **transitional aerodrome certificate**:

- (a) an aerodrome certificate continued in force under subregulation (2);
- (b) an aerodrome certificate granted as mentioned in paragraph (3)(b);
- (c) an aerodrome certificate taken to have been granted as mentioned in subregulation (4);
- (d) an aerodrome certificate granted under paragraph (5)(b).

Certified aerodromes

- (2) If, immediately before the commencement time, the operator of an aerodrome was the holder of an aerodrome certificate for the aerodrome, the certificate continues in force as if it had been granted to the operator under regulation 139.030 of the new Part 139 Regulations, subject to regulation 202.702.
- (3) If, before the commencement time, a person had made an application in accordance with regulation 139.045 of the old Part 139 Regulations for an aerodrome certificate, but CASA had not made a decision on the application immediately before that time:
 - (a) Subpart 139.B of the old Part 139 Regulations, and the old Part 139 Manual of Standards, continue to apply in relation to the application and CASA's decision on the application; and
 - (b) CASA may grant an aerodrome certificate for the aerodrome to the person accordingly under regulation 139.050 of the old Part 139 Regulations; and
 - (c) an aerodrome certificate granted to the person as mentioned in paragraph (b) has effect as if it had been granted under regulation 139.030 of the new Part 139 Regulations, subject to regulation 202.702.

Registered aerodromes

- (4) If, immediately before the commencement time, a registration under regulation 139.265 of the old Part 139 Regulations was in force for an aerodrome, an aerodrome certificate for the aerodrome is taken to have been granted to the operator of the aerodrome under regulation 139.030 of the new Part 139 Regulations, subject to regulation 202.702.
- (5) If, before the commencement time, a person had made an application in accordance with regulation 139.260 of the old Part 139 Regulations for the registration of an aerodrome, but CASA had not made a decision on the application immediately before that time:
 - (a) Subpart 139.C of the old Part 139 Regulations, and the old Part 139 Manual of Standards, continue to apply in relation to CASA's consideration of the application; and
 - (b) if CASA is satisfied that the application is in accordance with the old Part 139 Regulations, CASA must grant an aerodrome certificate for the aerodrome to the applicant; and
 - (c) an aerodrome certificate granted under paragraph (b) has effect as if it had been granted under regulation 139.030 of the new Part 139 Regulations, subject to regulation 202.702.

202.702 Transitional aerodrome certificates—effect

Scope

- (1) This regulation applies in relation to an aerodrome while a transitional aerodrome certificate is in force for the aerodrome (see regulation 202.701).

Application of the Regulations

- (2) During the certificate transition period for the aerodrome:
 - (a) the transitional aerodrome certificate has effect for the aerodrome, unless it is sooner suspended or cancelled, and subject otherwise to the new Part 139 Regulations; and
 - (b) the new Part 139 Regulations apply in relation to the aerodrome as if the certificate had been granted to the operator of the aerodrome under regulation 139.030 of the new Part 139 Regulations (subject to subregulations (3) and (4) of this regulation); and
 - (c) in the case of a transitional aerodrome certificate mentioned in paragraph 202.701(1)(a)—any conditions applying to the certificate immediately before the commencement time continue to apply in relation to the certificate, subject to the new Part 139 Regulations.
- (3) In the case of a transitional aerodrome certificate mentioned in paragraph 202.701(1)(a) or (b), during the certificate transition period:
 - (a) Division 139.B.2 of the old Part 139 Regulations applies to the operator of the aerodrome; and
 - (b) Division 139.C.1 of the new Part 139 Regulations does not apply to the operator of the aerodrome; and
 - (c) a reference in the new Part 139 Regulations to a provision of Division 139.C.1 (which includes regulations 139.045 to 139.060) is taken to be a reference to the corresponding provision of Division 139.B.2 of the old Part 139 Regulations.

Note: Those Divisions deal with requirements in relation to aerodrome manuals for certified aerodromes.

- (4) In the case of a transitional aerodrome certificate mentioned in paragraph 202.701(1)(c) or (d), during the certificate transition period the following provisions of the new Part 139 Regulations do not apply to the operator of the aerodrome:
 - (a) paragraph 139.035(1)(b);
 - (b) Division 139.C.1.

New aerodrome certificate—requirement for new manual

- (5) The operator of the aerodrome may give CASA a proposed new aerodrome manual (a **new manual**) for the aerodrome prepared for the purpose of compliance with the requirements mentioned in regulation 139.045 of the new Part 139 Regulations before the new manual day for the aerodrome.

- (6) The ***new manual day***, for the aerodrome, is:
- (a) in the case of an aerodrome for which a transitional aerodrome certificate mentioned in paragraph 202.701(1)(a) or (b) is in force—13 May 2021; or
 - (b) in the case of an aerodrome for which a transitional aerodrome certificate mentioned in paragraph 202.701(1)(c) or (d) is in force—13 May 2022.
- (7) If the operator of the aerodrome gives CASA a new manual under subregulation (5), CASA must:
- (a) if the new manual complies with the requirements mentioned in regulation 139.045 of the new Part 139 Regulations—grant a new aerodrome certificate to the operator; or
 - (b) in any other case—refuse to grant a new aerodrome certificate to the operator.

Note: Under regulation 201.004, an application may be made to the Administrative Appeals Tribunal for review of:

- (a) a decision refusing to grant a new aerodrome certificate; or
 - (b) a decision imposing a condition on a new aerodrome certificate.
- (8) Without limiting the application of any other provisions of Part 11, the following provisions of Part 11 apply (or do not apply) as follows in relation to the decision under subregulation (7) to grant, or to refuse to grant, a new aerodrome certificate to the operator of an aerodrome:
- (a) Subpart 11.B (applications for authorisations) does not apply;
 - (b) regulation 11.055 (grant of authorisation) does not apply;
 - (c) regulation 11.056 (authorisation may be granted subject to conditions) applies;
 - (d) regulation 11.060 (notice of decision) applies as if the operator, by giving the new manual to CASA, had made an application for an aerodrome certificate under the new Part 139 Regulations;
 - (e) regulation 11.065 (when authorisation comes into effect) applies;
 - (f) regulations 11.067 to 11.077 (provisions relating to conditions) apply;
 - (g) regulation 11.080 (authorisations not transferable) applies.
- (9) A decision to refuse to grant a new aerodrome certificate to a person under paragraph (7)(b) comes into effect when the time for making an application for review by the Administrative Appeals Tribunal of the decision has elapsed, subject to any order of the Tribunal or of a court staying the effect of the decision.

Note: An application for review of a decision by the Administrative Appeals Tribunal must generally be made within 28 days after the applicant is notified of the decision (see section 29 of the *Administrative Appeals Tribunal Act 1975*). For stay orders by the Tribunal, see section 41 of that Act.

Certificate transition period

- (10) The ***certificate transition period***, in relation to a transitional aerodrome certificate, is the period starting at the commencement time or when it was granted or taken to have been granted (whichever is later), and ending:

- (a) if the operator of the aerodrome fails to give CASA a new manual before the end of the new manual day—at the end of the new manual day; or
- (b) if CASA grants a new aerodrome certificate to the operator under paragraph (7)(a)—when the certificate comes into effect (see regulation 11.065); or
- (c) if CASA makes a decision, under paragraph (7)(b), to refuse to grant a new aerodrome certificate to the operator—when the decision comes into effect (see subregulation (9)); or
- (d) if CASA cancels the certificate before the occurrence of any of the events mentioned in paragraphs (a) to (c)—when the cancellation comes into effect.

202.703 Certified air/ground radio services and operators

Air/ground radio services

- (1) If, immediately before the commencement time, a certification of an air/ground radio service was in force for an aerodrome for the purposes of Division 139.F.3 of the old Part 139 Regulations then, at and after that time:
 - (a) the operator of the aerodrome is taken to hold an approval granted for the purposes of regulation 139.155 of the new Part 139 Regulations for that service:
 - (i) subject to any conditions in force for the certification immediately before the commencement time; and
 - (ii) for the period (if any) during which the certification would otherwise have remained in force, unless the approval taken to be held is sooner suspended or cancelled; and
 - (iii) subject otherwise to the new Part 139 Regulations; and
 - (b) the new Part 139 Regulations otherwise apply in relation to the service.
- (2) If, before the commencement time, a person had made a request to CASA in accordance with regulation 139.410 of the old Part 139 Regulations for the certification of an air/ground radio service, but CASA had not made a decision on the request immediately before that time:
 - (a) Division 139.F.3 of the old Part 139 Regulations, and the old Part 139 Manual of Standards, continue to apply in relation to the request and CASA's decision on the request; and
 - (b) CASA may certify the service accordingly under regulation 139.410 of the old Part 139 Regulations; and
 - (c) such a certification has effect as if it were an approval granted for the purposes of regulation 139.155 of the new Part 139 Regulations; and
 - (d) the new Part 139 Regulations otherwise apply in relation to the service.

Operators of air/ground radio services

- (3) If, immediately before the commencement time, a certification of a person as the operator of an air/ground radio service was in force for an aerodrome for the

purposes of Division 139.F.3 of the old Part 139 Regulations then, at and after that time:

- (a) the operator of the service is taken to hold an approval granted for the purposes of regulation 139.160 of the new Part 139 Regulations to operate the service:
 - (i) subject to any conditions in force for the certification immediately before the commencement time; and
 - (ii) for the period (if any) during which the certification would otherwise have remained in force, unless the approval taken to be held is sooner suspended or cancelled; and
 - (iii) subject otherwise to the new Part 139 Regulations; and
 - (b) the new Part 139 Regulations otherwise apply in relation to the approval.
- (4) If, before the commencement time, a person had made an application to CASA in accordance with regulation 139.430 of the old Part 139 Regulations for certification as the operator of an air/ground radio service for an aerodrome, but CASA had not made a decision on the application immediately before that time:
- (a) CASA must (subject to regulation 11.055) grant an approval to the applicant under regulation 139.010 of the new Part 139 Regulations for the purposes of regulation 139.160 of the new Part 139 Regulations, if CASA is satisfied that the person meets the requirements for operating a certified air/ground radio service prescribed by the new Part 139 Manual of Standards as in force immediately after the commencement time; and
 - (b) subregulation 11.055(1B) applies to the granting of the approval.
- (5) At and after the commencement time, a person who holds, or who is, under this regulation, taken to hold, an approval granted for the purposes of regulation 139.160 of the new Part 139 Regulations to operate an air/ground radio service for an aerodrome is taken also to be approved for the purposes of paragraph 120(1)(b) of CAR (weather reports not to be used if not made with authority).

202.704 Transitional authorisations

Scope

- (1) This regulation applies if:
- (a) an instrument (the ***transitional instrument***) was made under these Regulations for the purposes of Part 139 or the old Part 139 Manual of Standards, or under the old Part 139 Manual of Standards, before the commencement time; and
 - (b) the transitional instrument was in force immediately before the commencement time, or is expressed to commence at a later time; and
 - (c) the transitional instrument would (apart from the amendments made by Schedule 1 to the *Civil Aviation Safety Amendment (Part 139) Regulations 2019*, and the repeal of the old Part 139 Manual of Standards) have had the effect, on or after the commencement time, of authorising or allowing a person, in particular circumstances, to do a thing in relation to

an aerodrome that the person would not otherwise have been authorised or allowed to do because of Part 139 of the old Part 139 Regulations or the old Part 139 Manual of Standards.

Example: *CASA EX128/19—Approved VASIS (Charter Operations—Relevant Runway Ends for Certified Aerodromes) Exemption 2019*. This transitional instrument was made under regulation 11.160, and exempted the aerodrome operators of certified aerodromes from compliance with subregulation 139.190(1) of the old Part 139 Regulations in relation to runway ends in particular specified circumstances. Immediately before the commencement time, the instrument had the effect that such operators were allowed not to provide an approved visual approach slope indicator system (VASIS) for runway ends in those circumstances.

Authorisation

- (2) On and after the commencement time, or the time the transitional instrument is expressed to commence, whichever is later, until the end time for the transitional instrument, the person is authorised or allowed to do that thing in those circumstances:
 - (a) despite any provision to the contrary in the new Part 139 Regulations or the new Part 139 Manual of Standards; but
 - (b) subject to any conditions provided in the transitional instrument.
- (3) The **end time** for a transitional instrument is the earliest of the following times:
 - (a) if the instrument is, by its own terms, expressed to be repealed, or to cease to have effect, at a particular time—that time;
 - (b) if paragraph (a) does not apply—the end of 31 December 2021;
 - (c) in any case:
 - (i) if the instrument is repealed—the time the repeal takes effect; or
 - (ii) if the instrument cannot be repealed because it lapsed at the commencement time—a time determined for the instrument by a determination under subregulation (4).
- (4) CASA may, by legislative instrument, determine a time for an instrument for the purposes of subparagraph (3)(c)(ii).
- (5) This regulation does not apply to an instrument that is:
 - (a) an aerodrome certificate; or
 - (b) a certification of an air/ground radio service; or
 - (c) a certification of a person as the operator of an air/ground radio service.

Subpart 202.FYH—Transitional provisions for Subpart 139.H (Aerodrome rescue and fire fighting services)

202.710 Manual of Standards for Subpart 139.H

- (1) A document called ‘Manual of Standards (MOS) – Subpart 139.H’ published by CASA before 1 May 2003 is taken to be a Manual of Standards issued under regulation 139.712.
- (2) The procedures in regulations 139.712A, 139.712B and 139.712C (as in force on 1 May 2003) are taken to have been complied with in relation to the issue of the Manual of Standards.

**Subpart 202.GA—Transitional provisions for Part 141
(Recreational, private and commercial pilot flight
training, other than certain integrated training
courses)**

**Subpart 202.GB—Transitional provisions for Part 142
(Integrated and multi-crew pilot flight training,
contracted training and contracted checking)**

Subpart 202.GC—Transitional provisions for Part 143 (Air traffic services training providers)

202.760 Manual of Standards for Part 143

- (1) A document called ‘Manual of Standards (MOS) – Part 143’ published by CASA before 1 May 2003 is taken to be a Manual of Standards issued under regulation 143.017.
- (2) The procedures in regulations 143.017A, 143.017B and 143.017C (as in force on 1 May 2003) are taken to have been complied with in relation to the issue of the Manual of Standards.

Subpart 202.GD—Transitional provisions for Part 144 (Product distribution organisations)

Note 1: This Subpart heading is reserved for future use.

Note 2: Regulation numbers 202.780 to 202.799 are reserved for use in this Subpart.

**Subpart 202.GE—Transitional provisions for Part 145
(Continuing airworthiness—Part 145 approved
maintenance organisations)**

**Division 202.GE.1—Amendments made by the Civil Aviation and
Civil Aviation Safety Amendment Regulations 2010 (No. 1)**

202.800 CASA may direct making of applications under regulation 145.025

- (1) CASA may direct the holder of a certificate of approval that covers maintenance of an aircraft or aeronautical product to which Part 42 applies to make an application under regulation 145.025 for approval as a Part 145 organisation.
- (2) A direction under this regulation must:
 - (a) be in writing; and
 - (b) specify the time within which the direction must be complied with.
- (3) The holder of the certificate must comply with the direction within the time specified in the direction.

Note: CASA intends to give directions under this regulation to assist it in managing the implementation of Part 145.

**Division 202.GE.2—Amendments made by the Civil Aviation
Legislation Amendment (Maintenance and Other Matters)
Regulation 2013**

**Subdivision 202.GE.2.1—Part 145 organisations undertaking CAR
maintenance activities—general**

**202.801 Interpretation for Division 202.GE.2—Part 145 references to
maintenance services taken to include references to CAR
maintenance activities**

For this Division:

- (a) the references in paragraphs (b) and (c) of the definition of *accountable manager* in subregulation 145.010(1) to providing maintenance services are taken to include references to undertaking CAR maintenance activities; and
- (b) the reference in paragraph 145.010(2)(d) to the maintenance services provided by an organisation is taken to include a reference to the CAR maintenance activities undertaken by the organisation; and
- (c) the reference in paragraph 145.010(2)(f) to the maintenance services that an organisation is approved to provide is taken to include a reference to the CAR maintenance activities that the organisation is approved to undertake.

202.802 Interpretation for Division 202.GE.2—Part 145 definition of *approval rating*

For this Division, the definition of *approval rating* in subregulation 145.010(1) is taken to include a rating for a kind of aircraft, aircraft component or aircraft material specified in the Part 145 Manual of Standards in relation to CAR maintenance activities.

202.803 Interpretation for Division 202.GE.2—Part 145 definition of *significant change*

For this Division, the definition of *significant change* in subregulation 145.010(2) is taken to include the following:

- (a) a change to the CAR maintenance activities undertaken by the organisation, if the change would require a change to the approval ratings mentioned in the organisation's approval certificate;
- (b) a change to the organisation's facilities, equipment, tools, materials, procedures or employees that could adversely affect the organisation's ability to undertake the CAR maintenance activities that it is approved to undertake;
- (c) a change to the organisation's system of certification of completion of maintenance.

202.804 Part 145 Manual of Standards—additional matters for CAR maintenance activities

A Manual of Standards issued under regulation 145.015 may specify the following matters in relation to CAR maintenance activities:

- (a) ratings for kinds of aircraft, aircraft components and aircraft materials;
- (b) requirements for a Part 145 organisation's exposition;
- (c) the privileges that apply to an approval rating;
- (d) requirements for undertaking CAR maintenance activities, including requirements in relation to the following:
 - (i) a system of certification of completion of maintenance;
 - (ii) aircraft, aircraft components and aircraft materials;
 - (iii) defects;
 - (iv) writing procedures for meeting the requirements of Parts 4, 4A and 4B of CAR.

Subdivision 202.GE.2.2—Part 145 organisations undertaking CAR maintenance activities—approval of organisations

202.805 Applying for approval

- (1) An application under regulation 145.025 may cover the undertaking of CAR maintenance activities.
- (2) If the application covers the undertaking of CAR maintenance activities, the application must include the approval rating sought by the applicant for each kind of aircraft, aircraft component or aircraft material for which the applicant proposes to undertake CAR maintenance activities.

202.806 Issuing approval

- (1) If the application covers the undertaking of CAR maintenance activities, CASA must approve the applicant as a Part 145 organisation only if CASA is satisfied that:
 - (a) the applicant has an exposition that complies with the requirements specified in the Part 145 Manual of Standards relating to CAR maintenance activities; and
 - (b) the applicant has facilities, equipment, materials, approved maintenance data and tools that are suitable for undertaking CAR maintenance activities for the kinds of aircraft, aircraft components and aircraft materials for which the applicant proposes to undertake CAR maintenance activities; and
 - (c) the facilities, equipment, materials, approved maintenance data and tools mentioned in paragraph (b) comply with the requirements specified in the Part 145 Manual of Standards.
- (2) If CASA decides to approve the applicant as a Part 145 organisation, CASA must determine:

- (a) the approval rating for each kind of aircraft, aircraft component or aircraft material for which the applicant is approved to undertake CAR maintenance activities; and
- (b) any limitations applying to an approval rating mentioned in paragraph (a).

202.807 Approval certificate

If CASA approves the applicant as a Part 145 organisation, the certificate issued under regulation 145.035 must include the approval rating for each kind of aircraft, aircraft component or aircraft material for which the applicant is approved to undertake CAR maintenance activities.

202.808 Privileges for Part 145 organisations

A Part 145 organisation may undertake the CAR maintenance activities that it is approved to undertake.

202.809 Approval subject to conditions

It is a condition of approval of a Part 145 organisation that is approved to undertake CAR maintenance activities that:

- (a) the organisation must, at all times, comply with the requirements of the following in relation to CAR maintenance activities it undertakes:
 - (i) its exposition;
 - (ii) the approval rating for each kind of aircraft, aircraft component or aircraft material for which the organisation is approved to undertake CAR maintenance activities;
 - (iii) any limitations applying to an approval rating mentioned in subparagraph (ii);
 - (iv) Parts 4, 4A and 4B of CAR; and
- (b) the organisation must ensure that, at all times, its employees comply with the requirements mentioned in paragraph (a) in relation to CAR maintenance activities the organisation undertakes.

Subdivision 202.GE.2.3—Part 145 organisations undertaking CAR maintenance activities—offence

202.810 Undertaking CAR maintenance activities

- (1) A Part 145 organisation commits an offence if it undertakes CAR maintenance activities in contravention of any of the following:
 - (a) its exposition;
 - (b) the approval rating for each kind of aircraft, aircraft component or aircraft material for which the organisation is approved to undertake CAR maintenance activities;
 - (c) any limitations applying to an approval rating mentioned in paragraph (b);

(d) the privileges that apply to the approval rating under the Part 145 Manual of Standards.

Penalty: 50 penalty units.

(2) An offence against this regulation is an offence of strict liability.

Subpart 202.GG—Transitional provisions for Part 147 (Continuing airworthiness—maintenance training organisations)

202.840 Recognised organisations taken to be maintenance training organisations

- (1) This regulation applies to an organisation that, immediately before 27 June 2011, is a recognised organisation within the meaning given by Schedule 1 to the *Civil Aviation Order 100.66 Instrument 2007*.
- (2) On 27 June 2011, the organisation is taken to have applied for, and to meet the requirements mentioned in regulation 147.030 for the grant of, approval as a maintenance training organisation.

202.841 Applications for approval as a recognised organisation made but not finally determined before 27 June 2011

- (1) This regulation applies to a person if:
 - (a) before 27 June 2011, the person made an application for approval as a recognised organisation; and
 - (b) the application was not finally determined by CASA before 27 June 2011.
- (2) On 27 June 2011, the person is taken to have made an application under regulation 147.025 for approval as a maintenance training organisation.

202.842 CASA may direct the making of applications under regulation 147.025

- (1) CASA may direct the holder of a certificate of approval that covers:
 - (a) the training of candidates for examinations mentioned in paragraph 31(4)(e) of CAR, as in force before 27 June 2011; or
 - (b) the conducting of examinations mentioned in paragraph 31(4)(e) of CAR, as in force before 27 June 2011;to make an application under regulation 147.025 for approval as a maintenance training organisation.
- (2) A direction under this regulation must:
 - (a) be in writing; and
 - (b) specify the time within which the direction must be complied with.
- (3) The holder of the certificate must comply with the direction within the time mentioned in the direction.

Note: CASA intends to give directions under this regulation to assist it in managing the implementation of Part 147.

Subpart 202.GI—Transitional provisions for Part 149 (Approved self-administering aviation organisations)

Division 202.GI.1—Amendments made by the Civil Aviation Legislation Amendment (Part 149) Regulations 2018

202.860 Definition of *commencement day* for Division 202.GI.1

In this Division:

commencement day means the day on which the *Civil Aviation Legislation Amendment (Part 149) Regulations 2018* commence.

202.862 Transitional—holders of authorisations from bodies that become ASAOs

- (1) This regulation applies if:
 - (a) a body covered by subregulation (4) is issued with an ASAO certificate on a particular day (the *transition day*) that authorises the body to administer an activity; and
 - (b) immediately before the transition day, a person was the holder of an authorisation (however described) (an *old authorisation*) from the body that authorised the person to undertake the activity.
- (2) The person is taken to be the holder of an authorisation (a *Part 149 authorisation*) in relation to the activity for the purposes of Part 149 during the period:
 - (a) starting on the day the ASAO certificate for the body enters into force; and
 - (b) ending at the earlier of:
 - (i) if the Part 149 authorisation is cancelled—the day the cancellation takes effect; and
 - (ii) the day that is 12 months after the ASAO certificate for the body enters into force.
- (3) The Part 149 authorisation is subject to the same terms and conditions that applied to the old authorisation.
- (4) Each of the following bodies is covered by this subregulation:
 - (a) a sport aviation body (within the meaning of CASR before the commencement day);
 - (b) the Australian Skydiving Association Incorporated.
- (5) This regulation does not, by implication, prevent the Part 149 authorisation from being varied, suspended or revoked after the transition day.

Subpart 202.HA—Transitional provisions for Part 171 (Aeronautical telecommunication service and radionavigation service providers)

202.880 Manual of Standards for Part 171

- (1) A document called ‘Manual of Standards (MOS) – Part 171’ published by CASA before 1 May 2003 is taken to be a Manual of Standards issued under regulation 171.017.
- (2) The procedures in regulations 171.017A, 171.017B and 171.017C (as in force on 1 May 2003) are taken to have been complied with in relation to the issue of the Manual of Standards.

Subpart 202.HB—Transitional provisions for Part 172 (Air traffic service providers)

202.900 Manual of Standards for Part 172

- (1) A document called ‘Manual of Standards (MOS) – Part 172’ published by CASA before 1 May 2003 is taken to be a Manual of Standards issued under regulation 172.022.
- (2) The procedures in regulations 172.022A, 172.022B and 172.022C (as in force on 1 May 2003) are taken to have been complied with in relation to the issue of the Manual of Standards.

Subpart 202.HC—Transitional provisions for Part 173 (Instrument flight procedure design)

Note 1: This Subpart heading is reserved for future use.

Note 2: Regulation numbers 202.920 to 202.939 are reserved for use in this Subpart.

Subpart 202.HD—Transitional provisions for Part 174 (Aviation meteorological services)

Note 1: This Subpart heading is reserved for future use.

Note 2: Regulation numbers 202.940 to 202.959 are reserved for use in this Subpart.

**Subpart 202.HE—Transitional provisions for Part 175
(Aeronautical information management)**

Subpart 202.HL—Transitional provisions for Part 200 (Exemptions)

Note 1: This Subpart heading is reserved for future use.

Note 2: Regulation numbers 202.980 to 202.989 are reserved for use in this Subpart.

Subpart 202.HM—Transitional provisions for Part 201 (Miscellaneous)

Note 1: This Subpart heading is reserved for future use.

Note 2: Regulation numbers 202.990 to 202.999 are reserved for use in this Subpart.

Dictionary

(regulation 1.4)

Part 1—Definitions

2D instrument approach operation means an instrument approach operation using lateral navigation guidance only.

3D instrument approach operation means an instrument approach operation using lateral and vertical navigation guidance.

ABN (Australian Business Number) has the same meaning as in the *A New Tax System (Australian Business Number) Act 1999*.

accountable manager, of an ASAO, means the individual appointed by the ASAO who is responsible for:

- (a) ensuring that the ASAO and the ASAO's organisation comply with the ASAO's exposition and the civil aviation legislation; and
- (b) ensuring that the ASAO is able to finance, and has adequate resources to perform, the ASAO's approved functions.

accreditation means an accreditation under Division 101.FA.3 authorising the holder to operate excluded RPA and micro RPA.

accreditation holder: see regulation 101.374H.

ACN has the same meaning as in the *Corporations Act 2001*.

Act means the *Civil Aviation Act 1988*.

adequate aerodrome, in relation to a flight of an aeroplane, means an aerodrome that complies with the following:

- (a) an authorised weather forecast for the aerodrome must be available for the aeroplane's estimated time of use of the aerodrome;
- (b) the aerodrome's services and facilities must be operational for at least the estimated time of use;
- (c) the landing distance available for the aeroplane must be at least the landing distance required under these Regulations for the aeroplane's landing at the aerodrome;
- (d) for an IFR flight—at least one authorised instrument approach procedure that is suitable for use by the aeroplane must be operational for at least the estimated time of use.

administering authority, for a limited category aircraft: see regulation 132.010.

adult means a person who has turned 13.

adventure flight, for a limited category aircraft: see regulation 132.015.

adventure flight procedures, for a limited category aircraft: see regulation 132.010.

aerial work certificate means a certificate issued under regulation 138.040.

aerial work operation: see regulation 138.010.

aerial work operator means the holder of an aerial work certificate.

aerial work passenger means a person in a class of persons prescribed by the Part 138 Manual of Standards for the purposes of this definition.

aerobatic manoeuvres, for an aircraft, means manoeuvres of the aircraft that involve:

- (a) bank angles that are greater than 60°; or
- (b) pitch angles that are greater than 45°, or are otherwise abnormal to the aircraft type; or
- (c) abrupt changes of speed, direction, angle of bank or angle of pitch.

aerodrome certificate means a certificate granted under regulation 139.030.

aerodrome control service has the same meaning as in Annex 11 to the Chicago Convention.

aerodrome facilities and equipment means facilities and equipment, inside or outside the boundaries of an aerodrome, that are installed or maintained for use by aircraft operating at the aerodrome.

aerodrome manual, for a certified aerodrome, means the aerodrome manual for the aerodrome required by regulation 139.045.

aerodrome operator means:

- (a) for a certified aerodrome—the person who holds the aerodrome certificate for the aerodrome; or
- (b) otherwise—the person who is responsible for the operation and maintenance of the aerodrome.

aerodrome reference point, in relation to an aerodrome, means the geographical location of the aerodrome:

- (a) determined in accordance with the Part 139 Manual of Standards; or
- (b) specified by a Part 141 operator in its operations manual, or a Part 142 operator in its exposition.

aerodrome traffic has the same meaning as in Annex 11 to the Chicago Convention.

aerodrome works means any construction or maintenance work on or near the movement area of an aerodrome that may create an obstacle or hazard, or restrict the normal take-off and landing of aircraft, at the aerodrome.

aeronautical data has the same meaning as in Annex 15 to the Chicago Convention.

aeronautical data originator means a person who has been given a data product specification under regulation 175.160 that is in force.

aeronautical data processing standards means:

- (a) EUROCAE ED-76; or
- (b) RTCA/DO-200A.

aeronautical fixed service has the same meaning as in Annex 11 to the Chicago Convention.

aeronautical information has the same meaning as in Annex 15 to the Chicago Convention.

Aeronautical Information Publication or ***AIP*** has the same meaning as in the *Air Services Regulations 2019*.

aeronautical radio operator certificate: see regulation 64.010.

aeroplane means a power-driven heavier-than-air aircraft deriving its lift in flight chiefly from aerodynamic reactions on surfaces remaining fixed under given conditions of flight, but does not include a power-assisted sailplane.

AGL means above ground or water level.

AIP: see ***Aeronautical Information Publication***.

AIP Amendment has the same meaning as in Annex 15 to the Chicago Convention.

AIP responsible person, for an aeronautical data originator, means a person appointed by the originator as an AIP responsible person under regulation 175.445.

AIP Supplement has the same meaning as in Annex 15 to the Chicago Convention.

AIRAC effective date means an AIRAC effective date published in ICAO Document 8126.

airborne collision avoidance system means a system fitted to an aircraft to provide information to its pilot for avoiding collisions with other aircraft.

aircraft engineer licence means any of the following licences granted under regulation 66.025 or 66.026:

- (a) subcategory A1;
- (b) subcategory A2;
- (c) subcategory A3;
- (d) subcategory A4;
- (e) subcategory B1.1;
- (f) subcategory B1.2;
- (g) subcategory B1.3;

- (h) subcategory B1.4;
- (i) category B2;
- (j) category C.

aircraft flight manual instructions, for an aircraft, means the following documents and information provided by the aircraft's manufacturer or issued in accordance with a Part 21 approval:

- (a) the aircraft's flight manual;
- (b) checklists of normal, abnormal and emergency procedures for the aircraft;
- (c) any operating limitation, instructions, markings and placards relating to the aircraft.

aircraft registration identification plate: see regulation 45.010.

aircraft type rating, in relation to flight crew, means a type rating prescribed by a legislative instrument issued under regulation 61.055 or 61.060.

air crew member means a crew member for a flight of an aircraft (other than a flight crew member) who carries out a function during the flight relating to the safety of the operation of the aircraft, or the safety of the use of the aircraft.

air display means organised flying performed before a public gathering, including the following:

- (a) a contest;
- (b) an exhibition of aerobatic manoeuvres;
- (c) flying in formation;
- (d) other aircraft operations associated with the air display.

air/ground radio service means a radio service at an aerodrome that provides information relating to the aerodrome (including relevant air traffic) to aircraft operating in the vicinity of the aerodrome.

air security officer means:

- (a) a protective service officer or special protective service officer of the Australian Federal Police who is directed by the Commissioner to carry out the duties of a position of air security officer; or
- (b) a person who is:
 - (i) employed and trained by a foreign government to travel on aircraft to provide security for aircraft and their passengers and crew (other than a person who is employed to provide exclusive personal protection for 1 or more individuals travelling on an aircraft); and
 - (ii) operating in accordance with an arrangement between the foreign government and the Australian Government.

airship means a powered, lighter-than-air aircraft.

air traffic has the same meaning as in Annex 11 to the Chicago Convention.

air traffic control means Air Traffic Services in its capacity as a provider of air traffic control services.

air traffic control clearance means an authorisation given by a person performing duties in air traffic control for an aircraft to proceed under conditions specified in the authorisation.

air traffic control function means a function described in a paragraph of subregulation 65.075(2).

air traffic control instructions means directions given by a person performing duties in air traffic control for an aircraft to conduct its flight in the manner specified in the directions.

air traffic control service has the same meaning as in Annex 11 to the Chicago Convention.

air traffic service means a service of a kind mentioned in Annex 11, *Air Traffic Services*, to the Chicago Convention, other than a certified air/ground radio service (within the meaning of regulation 139.390) at an aerodrome.

Air Traffic Services:

- (a) in relation to an air traffic service provided in Australian-administered airspace—means:
 - (i) an ATS provider; or
 - (ii) the Defence Force in its capacity as a provider of air traffic services; and
- (b) in relation to an air traffic service provided in airspace that is not Australian-administered airspace—an air traffic service provider authorised by the national aviation authority of the relevant foreign country to provide the air traffic service.

air transport operation: see clause 3 of Part 2 of this Dictionary.

airworthiness directive: see regulation 39.001A.

AIS has the meaning given in Annex 15 to the Chicago Convention.

AIS provider means a person who holds a certificate under regulation 175.055.

alternate aerodrome has the same meaning as in Annex 2 to the Chicago Convention.

altitude has the same meaning as in Annex 2 to the Chicago Convention.

amateur-built aircraft means an aircraft described in paragraph 21.191(g).

Amateur Built Aircraft Acceptance, or ***ABAA***, means a document given by CASA or an authorised person as a type approval for an amateur-built aircraft.

amphibian means an aeroplane that is designed to take off from, and land on, either land or water.

AOC: see subsection 3(1) of the Act.

APMA means Australian Parts Manufacturer Approval.

appliance means any instrument, mechanism, equipment, part, apparatus, appurtenance, or accessory, including communication equipment, that is used or intended to be used in operating or controlling an aircraft in flight, is installed in or attached to the aircraft, and is not part of an airframe, engine or propeller.

Source FARs section 1.1.

application material: see regulation 137.010.

apply, in relation to application material, has the meaning given by regulation 137.010.

approach control service has the same meaning as in Annex 11 to the Chicago Convention.

approved means approved by CASA.

approved airframe life, for a limited category aircraft: see regulation 132.010.

approved design organisation means a person who holds an approval under regulation 21.243 that is in force.

approved flight simulator has the meaning given by regulation 61.010.

approved form means:

- (a) for an application—the form approved by CASA under subregulation 11.030(3) for the application (if any); and
- (b) for a document other than an application—the form approved by CASA under regulation 11.018 for the document (if any).

approved function, of an ASAO, means an aviation administration function mentioned in the ASAO certificate of the ASAO.

approved maintenance data: see regulation 2A of CAR.

approved maintenance organisation means a Subpart 42.F organisation or a Part 145 organisation.

apron has the same meaning as in Annex 11 to the Chicago Convention.

area control service has the same meaning as in Annex 11 to the Chicago Convention.

ARFFS provider has the meaning given by subregulation 139.705(1).

ARN or **Aviation Reference Number** means the unique identifier assigned to a person by CASA for the purposes of CASA's records.

article manufacturer: see paragraph 21.601(2)(e).

ASAO (short for approved self-administering aviation organisation) means a person who holds an ASAO certificate that is in force.

ASAO certificate means a certificate issued by CASA under regulation 149.075.

ASAO enforcement power means the power to vary, suspend or cancel an authorisation issued by an ASAO other than at the request of the authorisation holder.

AS/NZS: a reference to **AS/NZS** followed by a number and a year is a reference to the Australian/New Zealand Standard of that number, published jointly in that year by, or on behalf of, Standards Australia and Standards New Zealand.

ATC licence means an air traffic controller licence granted under Part 65.

ATSO: see paragraph 21.601(2)(a).

ATSO authorisation: see paragraph 21.601(2)(b).

ATS provider has the meaning given by regulation 172.015.

ATS routes has the same meaning as in Annex 4 to the Chicago Convention.

ATS training provider has the meaning given by regulation 143.015.

Australian-administered airspace has the same meaning as in the *Air Services Act 1995*.

Australian air transport AOC has the meaning given by subregulation 119.015(1).

Australian air transport operation has the meaning given by regulation 119.010.

Australian air transport operator has the meaning given by subregulation 119.015(2).

Australian Civil Aircraft Register means the register established and maintained under regulation 47.025.

Australian nationality mark: see regulation 45.010.

Australian operator means an operator whose principal place of business, or whose place of permanent residence, is in Australian territory.

Australian Parts Manufacturer Approval or **APMA** means an Australian Parts Manufacturer Approval issued under subregulation 21.303(9) or subregulation 21.305A(2).

authorised aeronautical information, for a flight of an aircraft, means the aeronautical maps, charts and other aeronautical information relevant to the route of the flight, and any probable diversionary route, that are published:

- (a) if paragraph (b) does not apply:
 - (i) in the AIP; or
 - (ii) by a data service provider; or
 - (iii) in NOTAMs; or
- (b) for a flight in a foreign country:
 - (i) in the document that in that country is equivalent to the AIP; or

- (ii) by an organisation approved to publish aeronautical information by the national aviation authority of that country.

authorised data service activity, for a data service provider, means a data service activity mentioned in the data service provider's certificate issued under regulation 175.295.

authorised instrument approach procedure means:

- (a) for an aerodrome other than an aerodrome in a foreign country—an instrument approach procedure that is:
 - (i) designed by a certified designer or authorised designer, and published in the AIP or given to CASA under Part 173; or
 - (ii) prescribed by an instrument issued under regulation 201.025 for this paragraph; or
- (b) for an aerodrome in a foreign country—an instrument approach procedure that is authorised by the national aviation authority of the country.

authorised instrument departure procedure means:

- (a) for an aerodrome other than an aerodrome in a foreign country—an instrument departure procedure that is:
 - (i) designed by a certified designer or authorised designer, and published in the AIP or given to CASA under Part 173; or
 - (ii) prescribed by an instrument issued under regulation 201.025 for this paragraph; or
- (b) for an aerodrome in a foreign country—an instrument departure procedure that is authorised by the national aviation authority of the country.

authorised Part 141 flight training: see regulation 141.015.

authorised Part 142 activity: see regulation 142.015.

authorised person means a person who is appointed under regulation 201.001 to be an authorised person in relation to one or more of the following:

- (a) CASR;
- (b) a particular provision of CASR;
- (c) CAR;
- (d) a particular provision of CAR.

authorised release certificate has the meaning given by clause 18 of Part 2 of this Dictionary.

authorised weather forecast means:

- (a) other than in a foreign country—a weather forecast made by the Bureau of Meteorology for aviation purposes; or
- (b) in a foreign country—a weather forecast made by a person or body that holds an authorisation (however described), granted by an authority of the country, to provide weather forecasts for aviation purposes.

authorised weather report means:

- (a) other than in a foreign country—a weather report made by:
 - (i) the Bureau of Meteorology for aviation purposes; or
 - (ii) an individual who holds a certificate from the Bureau of Meteorology to give weather reports for aviation purposes; or
 - (iii) an automatic weather station at an aerodrome that is approved by the Bureau of Meteorology as an automatic weather station for the aerodrome; or
 - (iv) an automatic broadcast service published in the AIP; or
 - (v) an individual who holds a pilot licence; or
 - (vi) a person appointed by an aerodrome operator to make runway visibility assessments under the Part 139 Manual of Standards; or
 - (vii) a person included in a class of persons specified in the AIP for this subparagraph; or
- (b) in a foreign country—a weather report made by a person or body that holds an authorisation (however described), granted by an authority of the country, to provide weather reports for aviation purposes.

aviation administration and enforcement rules means the rules required by regulation 149.290.

aviation administration function means:

- (a) exercising ASAO enforcement powers; or
- (b) a function prescribed by the Part 149 Manual of Standards.

aviation distress signal means any of the signals described in section 1.1, *Distress signals*, of Appendix 1 to Annex 2, *Rules of the Air*, to the Chicago Convention.

aviation English language proficiency assessment: see regulation 61.010.

aviation safety radio frequency means a radio frequency that is published in the AIP or NOTAMs and covered by any of the subparagraphs of paragraph 91.625(1)(a).

balloon means an unpowered, lighter-than-air aircraft.

balloon flight notification requirements: see subregulation 131.345(1).

balloon flight preparation (weather assessments) requirements: see subregulation 131.340(1).

balloon transport AOC: see subregulation 131.015(1).

balloon transport operation: see regulation 131.010.

balloon transport operator: see subregulation 131.015(2).

cabin crew member means a crew member who performs, in the interests of the safety of an aircraft's passengers, duties assigned by the operator or the pilot in command of the aircraft, but is not a flight crew member.

CAR means the *Civil Aviation Regulations 1988*.

CAR certificate of validation means a certificate issued under regulation 5.27 of CAR.

cargo means things other than persons carried, or to be carried, on an aircraft.

cargo transport operation:

- (a) means an operation of an aircraft that involves the carriage of cargo and crew only; but
- (b) does not include the following:
 - (i) an operation conducted for the carriage of the possessions of the operator or the pilot in command for the purpose of business or trade;
 - (ii) a medical transport operation.

carry-on baggage means baggage or personal effects taken into, or to be taken into, the cabin of an aircraft, for carriage on the aircraft, by:

- (a) a person (including a crew member of the aircraft) travelling on the aircraft; or
- (b) a member of the personnel of the operator of the aircraft on behalf of a person mentioned in paragraph (a).

CASR means the *Civil Aviation Safety Regulations 1998*.

category, in relation to the type certification of aircraft, means a grouping of aircraft based upon intended use and operating limitations (for example, transport, normal, utility, acrobatic, limited, restricted and provisional).

Source FARs section 1.1 modified.

certificate of airworthiness means a standard certificate of airworthiness or a special certificate of airworthiness.

certificate of registration means:

- (a) in relation to an aircraft registered under Division 47.C.1—a certificate issued under regulation 47.090; or
- (b) in relation to an aircraft registered under Division 47.C.2—a certificate issued under paragraph 47.098(2)(b).

certificate of release to service means:

- (a) for an aircraft—a document that complies with subregulation 42.760(1); and
- (b) for an aeronautical product—a document that complies with subregulation 42.810(1) or (2).

certificate of validation: see regulation 61.010.

certification basis means:

- (a) for an aircraft, aircraft engine or propeller for which there is a type certificate—the type certification basis for the aircraft, aircraft engine or propeller; and

- (b) for an aircraft, aircraft engine or propeller for which there is a foreign type certificate—the foreign type certification basis for the aircraft, aircraft engine or propeller.

certified aerodrome means an aerodrome in respect of which an aerodrome certificate is in force.

certified air/ground radio service: see subregulation 139.155(4).

certified true copy, of a document, means a copy of the document that one of the following persons has certified in writing to be a true copy of the document:

- (a) a person mentioned in Schedule 2 to the *Statutory Declarations Regulations 1993*;
- (b) a justice of the peace in a foreign country;
- (c) a notary public in a foreign country;
- (d) an employee of a national aviation authority;
- (e) a person to whom a national aviation authority has delegated a power or function.

charged with an offence: see clause 25 of Part 2 of this Dictionary.

checked baggage means baggage or personal effects checked in by a passenger with an operator, or with another person providing a check-in service for an operator, as baggage or personal effects intended for carriage on the aircraft on which the passenger is travelling.

checking means the assessment of proficiency of the personnel of an aircraft operator or the operator of a flight simulation training device that is conducted to ensure that the personnel are competent to carry out their responsibilities.

child means a person who has turned 2 but has not turned 13.

Civil Air Regulations means the Civil Air Regulations issued by the Administrator of the Federal Aviation Agency of the United States of America, as in force immediately before the commencement of the FARs.

class:

- (a) of aircraft, has the meaning given by regulation 61.020; and
- (b) of aeroplane for Part 64 (Ground operations personnel licensing), has the meaning given by regulation 64.010; and
- (c) in relation to medical certificates—means a class of medical certificate mentioned in regulation 67.145.

Class I product: see paragraph 21.321(2)(a).

Class I provisional certificate of airworthiness means a Class I provisional certificate of airworthiness issued under regulation 21.216.

Class I provisional type certificate means a Class I provisional type certificate issued under regulation 21.076.

Class II product: see paragraph 21.321(2)(b).

Class II provisional certificate of airworthiness means a Class II provisional certificate of airworthiness issued under regulation 21.216.

Class II provisional type certificate means a Class II provisional type certificate issued under regulation 21.076.

Class III product: see paragraph 21.321(2)(c).

Class D external load has the meaning given by the Part 138 Manual of Standards.

class of airspace:

- (a) means a class of airspace designated by Australia or a foreign country in accordance with Annex 11 to the Chicago Convention; and
- (b) in relation to Australian-administered airspace—includes a volume of airspace determined to be a class of airspace under paragraph 5(1)(d) of the *Airspace Regulations 2007*.

cloud ceiling has the same meaning as **ceiling** in Annex 2 to the Chicago Convention.

combination recorder means an item of equipment that combines the functions of a flight data recorder and a cockpit voice recorder.

commercial pilot (balloon) licence means a commercial pilot (balloon) licence issued under Part 5 of CAR.

compartment, of an aircraft, includes the space inside a non-compartmentalised fuselage.

configuration deviation list, for an aircraft, means a document that:

- (a) is prepared by the aircraft's type certificate holder or foreign type certificate holder; and
- (b) is approved by CASA or the national aviation authority that issued the foreign type certificate for the aircraft; and
- (c) lists each external part of the aircraft that is permitted to be missing from the aircraft, under conditions specified in the document, when a flight of the aircraft begins.

constable has the same meaning as in subsection 3(1) of the *Crimes Act 1914*.

contaminated: a runway is **contaminated** if more than 25% of the surface area required for a take-off or landing is covered by any of the following:

- (a) water or slush more than 3 mm deep;
- (b) loose snow more than 20 mm deep;
- (c) compacted snow or ice.

continuing airworthiness management organisation means a person who holds an approval under regulation 42.590 that is in force.

continuing airworthiness management service has the meaning given by subregulation 42.575(1).

Contracting State: see section 3 of the Act.

control area:

- (a) has the same meaning as in Annex 11 to the Chicago Convention; and
- (b) in relation to Australian-administered airspace—includes a volume of airspace determined to be a control area under paragraph 5(1)(c) of the *Airspace Regulations 2007*.

controlled aerodrome: an aerodrome is a **controlled aerodrome** at a particular time if, at that time, an air traffic control service is provided to aerodrome traffic.

controlled airspace means airspace of defined dimensions within which air traffic control service is provided in accordance with the airspace classification.

Note: The airspace classification is the classification of airspace as a class of airspace (for example, class A airspace).

control zone:

- (a) has the same meaning as in Annex 11 to the Chicago Convention; and
- (b) in relation to Australian-administered airspace—includes a volume of airspace determined to be a control zone under paragraph 5(1)(b) of the *Airspace Regulations 2007*.

convicted of an offence: see clause 35 of Part 2 of this Dictionary.

co-pilot, in relation to an aircraft, means a pilot on board the aircraft in a piloting capacity other than:

- (a) the pilot in command; or
- (b) a pilot who is on board the aircraft for the sole purpose of receiving flight training.

corporation, in Parts 119, 131 and 149, has the meaning given by regulation 11.015.

cost-sharing: a flight is a **cost-sharing** flight if:

- (a) the flight is conducted using an aircraft with a maximum seat configuration of not more than 6, including the pilot's seat; and
- (b) the pilot in command is not remunerated for the flight; and
- (c) the pilot in command pays an amount of the direct costs of the flight that is at least equal to the amount that would be paid by each person if the direct costs were evenly divided between all persons on board; and
- (d) the flight is not advertised to the general public.

Example 1: For paragraph (c), if the direct costs of a flight are \$3,000 and the flight has 5 persons on board, including the pilot, the pilot must pay at least \$600 towards the direct costs.

Example 2: For paragraph (d):

- (a) an advertisement in a daily national newspaper is an advertisement to the general public; and

- (b) an advertisement in a flying club newsletter is not an advertisement to the general public.

crew member: a person is a **crew member** of an aircraft if the person is carried on the aircraft and is:

- (a) a person:
 - (i) who is authorised by the operator of the aircraft to carry out a specified function during flight time relating to the operation, maintenance, use or safety of the aircraft, the safety of the aircraft's passengers or the care or security of any cargo which may affect the safety of the aircraft or its occupants; and
 - (ii) who has been trained to carry out that function; or
- (b) a person who is on board the aircraft for the purpose of:
 - (i) giving or receiving instruction in a function mentioned in subparagraph (a)(i); or
 - (ii) being tested for a qualification associated with a function mentioned in subparagraph (a)(i); or
- (c) a person authorised by CASA under these Regulations, or by the operator, to carry out an audit, check, examination, inspection or test of a person mentioned in paragraph (a) or (b).

crew station, for a crew member of an aircraft, means a position on the aircraft that is designed and equipped to enable the crew member to carry out the crew member's assigned duties on the aircraft.

critical fuelling point, for fuelling an aircraft, means any of the following:

- (a) a fuel tank filling point on the aircraft;
- (b) a fuel tank vent outlet on the aircraft;
- (c) the ground fuelling equipment that is used to fuel the aircraft.

critical part, for an aircraft, means a part that must be inspected, overhauled, or removed or retired from the aircraft within a period specified:

- (a) in the Airworthiness Limitations section of the Manufacturer's Maintenance Manual (as published from time to time by the aircraft's manufacturer) for the aircraft; or
- (b) in the Manufacturer's Instructions for Continued Airworthiness (as published by the manufacturer from time to time) for the aircraft.

cross-country flight has the meaning given by regulation 61.010.

cruise relief type rating means:

- (a) a cruise relief co-pilot type rating; or
- (b) a cruise relief flight engineer type rating.

cruising level has the same meaning as in Annex 2 to the Chicago Convention.

current, for an aviation English language proficiency assessment: see regulation 61.260.

DAME means designated aviation medical examiner.

danger area:

- (a) has the same meaning as in Annex 11 to the Chicago Convention; and
- (b) in relation to Australian territory—includes an area designated as a danger area by a declaration made under subregulation 6(1) of the *Airspace Regulations 2007*.

DAO means designated aviation ophthalmologist.

data product specification has the same meaning as in Annex 15 to the Chicago Convention.

data service activity means any of the following:

- (a) publishing aeronautical data;
- (b) publishing aeronautical information;
- (c) publishing an aeronautical chart;
- (d) supplying aeronautical data in a database for use in navigation equipment or systems.

data service provider means a person who holds a certificate under regulation 175.295.

data set has the same meaning as in Annex 15 to the Chicago Convention.

dealer's mark means a mark assigned to an aircraft manufacturer, distributor or dealer under regulation 47.175.

defined point after take-off, for a rotorcraft flying in performance class 2 or performance class 2 with exposure, means the point in the take-off and initial climb stage of the flight before which:

- (a) the rotorcraft may not be able to continue the flight safely with one engine inoperative; and
- (b) a forced landing may be required.

demonstration, for the emergency evacuation of an aircraft, means the emergency evacuation demonstration conducted by the aircraft's manufacturer for the purpose of the type certification of the aircraft.

demonstration additional number, of cabin crew members for an aircraft, means the number by which the number of cabin crew members used in the demonstration for the emergency evacuation of the aircraft is more than the greater of the following:

- (a) if the aircraft has a maximum operational passenger seat configuration of more than 19—one cabin crew member for each 50, or part of 50, passenger seats fitted for the demonstration;
- (b) one cabin crew member for each passenger compartment.

designated aviation medical examiner means:

- (a) a person appointed as a designated aviation medical examiner under Part 67; or

- (b) a person who holds, or is performing the duties of, a position specified in a declaration under subregulation 67.055(1); or
- (c) a person specified in a declaration under subregulation 67.055(2); or
- (d) a person appointed as a designated aviation medical examiner under Part 6 of CAR as in force at any time before 3 September 2003.

designated aviation ophthalmologist means:

- (a) a person appointed as a designated aviation ophthalmologist under Part 67; or
- (b) a person who holds, or is performing the duties of, a position specified in a declaration under subregulation 67.075(1); or
- (c) a person specified in a declaration under subregulation 67.075(2).

Dictionary means this Dictionary.

differences training: see regulation 61.010.

direct costs: the **direct costs** of a flight are the costs actually and necessarily incurred in connection with the flight without a view to making a profit.

Example 1: If the aircraft is hired for the flight, the **direct costs** of the flight include the following:

- (a) the cost of hiring the aircraft;
- (b) if they are not included in the cost of hiring the aircraft—the cost of the fuel and oil consumed by the aircraft for the flight and the airway and aerodrome fees (if any) for the flight.

Example 2: If the aircraft is not hired for the flight, the **direct costs** of the flight include the cost of the following:

- (a) the fuel and oil consumed by the aircraft for the flight;
- (b) the airway and aerodrome fees (if any) for the flight.

Note: The amount of the direct costs of a flight that is paid by the pilot in command is relevant to whether the flight is a cost-sharing flight.

dispensing operation: see subregulation 138.010(3).

dry: a runway is **dry** if the surface area required for a take-off or landing:

- (a) has no visible moisture; and
- (b) is not contaminated.

EASA: see *European Aviation Safety Agency*.

EDTO has the meaning given by the Part 121 Manual of Standards.

elevation has the same meaning as in Annex 4 to the Chicago Convention.

emergency evacuation procedures, for an aircraft, means procedures for the evacuation of the aircraft's passengers and crew from the aircraft in an emergency, and includes pre-evacuation, and post-evacuation, procedures.

emergency parachute: see regulation 105.010.

emergency service operation means an operation involving an aircraft to which all of the following apply:

- (a) the operation is conducted by, or at the request of, an authority of the Commonwealth, a State or a Territory;
- (b) the authority is prescribed by the Part 138 Manual of Standards for the purposes of this paragraph;
- (c) the operation is for:
 - (i) law enforcement purposes; or
 - (ii) the purpose of saving or protecting persons, property or the environment.

employed in private operations: an aircraft is ***employed in private operations*** if the aircraft is used to conduct an operation that is a private operation.

empty weight, for a hang glider, powered hang glider, paraglider or powered paraglider, means the weight of the hang glider, powered hang glider, paraglider or powered paraglider in its airborne configuration, including all fittings and equipment but excluding recovery or personnel parachutes.

engage in conduct means:

- (a) do an act; or
- (b) omit to perform an act.

ETSO: see paragraph 21.601(2)(aa).

EUROCAE ED-76 means the latest version of EUROCAE ED-76, Standards for Processing Aeronautical Data, issued by the European Organisation for Civil Aviation Equipment, as in force from time to time.

Note: EUROCAE ED-76 could in 2014 be viewed on the EUROCAE website (<http://www.eurocae.net>).

European Aviation Safety Agency or ***EASA*** means the European Aviation Safety Agency established by regulation (EC) No 1592/2002 of the European Parliament and the Council of the European Union.

examination means an examination by way of a test of theoretical knowledge or a practical test of knowledge and skill.

examiner has the meaning given by regulation 61.010.

ex-armed forces aircraft: see regulation 132.010.

excluded RPA: see regulation 101.237.

exhibition: see regulation 45.010.

experimental aircraft means an aircraft for which a special certificate of airworthiness is in force under regulation 21.195A.

experimental certificate means an experimental certificate issued under regulation 21.195A.

expiation notice, in relation to a psychoactive substance offence, means a notice requiring or permitting payment of a penalty as an alternative to prosecution.

export airworthiness approval means:

- (a) for a Class I product—an export certificate of airworthiness or an authorised release certificate; and
- (b) for a Class II or Class III product—an authorised release certificate.

export certificate of airworthiness, for a Class I product, means a certificate to the effect that the product meets the requirements mentioned in regulation 21.329.

exposition:

- (a) for an Australian air transport operator, means:
 - (i) the set of documents approved by CASA under regulation 119.075 in relation to the operator; and
 - (ii) if the set of documents is changed under regulation 119.085, 119.095 or 119.105, or in accordance with the process mentioned in regulation 119.100—the set of documents as changed; or
- (b) for an ASAO, means:
 - (i) the set of documents approved by CASA under regulation 149.080 in relation to the ASAO; or
 - (ii) if the set of documents is changed under regulation 149.115 or 149.120, or in accordance with the process mentioned in paragraph 149.340(i)—the set of documents as changed; or
- (c) for a balloon transport operator:
 - (i) the set of documents approved by CASA under regulation 131.085; or
 - (ii) if the set of documents is changed under regulation 131.095, 131.105 or 131.115—the set of documents as changed.

external load operation: see subregulation 138.010(2).

FAA means the Federal Aviation Administration of the United States of America.

FAA letter of TSO design approval: see paragraph 21.601(2)(ca).

FARs means the Federal Aviation Regulations in Chapter 1 (Federal Aviation Administration, Department of Transportation) of Title 14 of the Code of Federal Regulations as published by the Office of the Federal Register National Archives and Records Administration of the United States of America.

final approach and take-off area, for the operation of a rotorcraft at an aerodrome, means the area of the aerodrome:

- (a) from which a take-off is commenced; or
- (b) over which the final phase of approach to hover is completed.

fireproof, in connection with a manufacturer's data plate: see regulation 21.810.

flight base number, of cabin crew members for a flight of an aircraft, means the greater of the following:

- (a) if the aircraft has a maximum operational passenger seat configuration of more than 19—one cabin crew member for each 50, or part of 50, passenger seats fitted for the flight;
- (b) one cabin crew member for each passenger compartment.

flight crew endorsement:

- (a) means a flight crew endorsement within the meaning of Part 61; and
- (b) includes a certificate of validation of an overseas endorsement.

flight crew licence:

- (a) means a flight crew licence within the meaning of Part 61; and
- (b) includes a certificate of validation of an overseas flight crew licence.

flight crew member means a crew member who is a pilot or flight engineer assigned to carry out duties essential to the operation of an aircraft during flight time.

flight crew rating:

- (a) means a flight crew rating within the meaning of Part 61; and
- (b) includes a certificate of validation of an overseas rating.

flight dispatcher, for an Australian air transport operator, means a person designated by the operator to control and supervise flight operations, including supporting, briefing and assisting pilots in command in the safe conduct of flights.

Note: A flight dispatcher is also known as a flight operations officer.

flight engineer means the holder of a flight engineer licence.

flight examiner: see regulation 61.010.

flight information area means a volume of airspace determined to be a flight information area under subparagraph 5(1)(a)(i) of the *Airspace Regulations 2007*.

flight information service has the same meaning as in Annex 11 to the Chicago Convention.

flight instructor has the meaning given by regulation 61.010.

flight level: a reference to a ***flight level*** followed by a number, in relation to the flight of an aircraft, is a reference to the altitude at which the aircraft's altimeter, if it were adjusted to a reading on the subscale of 1013.2 hectopascals, would show an altitude in feet of 100 times that number.

Example: Flight level 250 is an altitude of 25 000 ft.

flight manual, for an aircraft: see clause 37 of Part 2 of this Dictionary.

flight notification requirements: see subregulation 91.240(1).

flight plan has the same meaning as in Annex 2 to the Chicago Convention.

flight preparation (alternate aerodromes) requirements: see subregulation 91.235(1).

flight preparation (Part 121 alternate aerodromes) requirements: see subregulation 121.170(1).

flight preparation (weather assessments) requirements: see subregulation 91.230(1).

flight radiotelephone operator licence means a flight radiotelephone operator licence issued under Part 5 of CAR.

flight review: see regulation 61.010.

flight service function means the function described in subregulation 65.130(2).

flight service licence means a licence by that name granted under Part 65.

flight simulation training device: see regulation 61.010.

flight simulator, for a specific type (or a specific make, model and series) of aircraft:

- (a) means a simulator that simulates the aircraft in ground and flight operations and comprises:
 - (i) a full size replica of the flight deck of the aircraft; and
 - (ii) a visual system providing an out of the flight deck view; and
 - (iii) a force cueing motion system; and
- (b) includes the necessary software and equipment, and the way that the equipment is interconnected.

flight technical log, for an aircraft, means the log required under regulation 42.220 for the aircraft.

flight test: see regulation 61.010.

flight time has the meaning given by regulation 61.010.

flight training: see regulation 61.010.

flight training area, for an aerodrome, means an area that is mentioned in a Part 141 operator's operations manual, or a Part 142 operator's exposition, as a flight training area for the aerodrome.

flight training device, for a specific type (or a specific make, model and series) of aircraft:

- (a) means a device that:
 - (i) simulates the aircraft in ground and flight operations to the extent of the systems installed in the device; and
 - (ii) comprises a full size replica of the instruments, equipment, panels and controls in an open flight deck area, or an enclosed flight deck, of the aircraft; and

- (iii) does not, in every respect, simulate the aircraft in ground and flight operations; and
- (b) includes the necessary software and equipment, and the way that the equipment is interconnected.

flight visibility has the same meaning as in Annex 2 to the Chicago Convention.

flying in formation: 2 or more aircraft are:

- (a) **flying in formation** if they:
 - (i) are operating as a single unit with regard to navigation, position reporting and control; and
 - (ii) are so close to each other that any change in height, heading or airspeed of any aircraft used for station-keeping results in a need for one or more of the other aircraft to manoeuvre to maintain station or avoid a collision; and
- (b) taken to be **flying in formation:**
 - (i) when the aircraft are changing station; and
 - (ii) during join-up or breakaway.

flying training means any training given during flight time in an aircraft for the purpose of increasing a person's skill in flying the aircraft.

foreign aircraft has the same meaning as foreign registered aircraft.

Note: However, a reference to **foreign aircraft** or **foreign registered aircraft** does not include a state aircraft of a foreign country: see subregulation 3(5) of CAR.

foreign air transport AOC means an AOC that authorises the operation of an aircraft for a foreign air transport operation.

foreign air transport operation:

- (a) means an air transport operation that is conducted by a foreign operator using any aircraft for:
 - (i) a flight into or out of Australian territory; or
 - (ii) a flight wholly within Australia that is undertaken as part of a flight into or out of Australian territory; but
- (b) does not include the following:
 - (i) the operation of an aeroplane or rotorcraft under a permission under section 25 (Non-scheduled flights by foreign registered aircraft) or section 27A (Permission for operation of foreign registered aircraft without AOC) of the Act;
 - (ii) an air transport operation authorised by a New Zealand AOC with ANZA privileges that is in force for Australia.

foreign air transport operator means a person who holds a foreign air transport AOC.

foreign certificate, for a foreign operator, means an air operator certificate issued by the national aviation authority of the foreign country in which the foreign operator has its principal place of business or place of permanent residence.

foreign operator means an operator that is not an Australian operator.

foreign supplemental type certificate: see regulation 21.114.

foreign type certificate: see regulation 21.041.

foreign type certification basis, for an aircraft, aircraft engine or propeller, means the airworthiness standards and any special conditions or other conditions with which the aircraft, aircraft engine or propeller must comply for the issue of a foreign type certificate.

free balloon:

- (a) in Part 101—means a balloon that is not tethered; and
- (b) otherwise—means a balloon that is intended for flight without being permanently tethered.

frequency confirmation system, for an aerodrome, means a ground radio system for the aerodrome that, on receipt of a transmission from an aircraft on the radio frequency for the aerodrome, sends a signal or message to the aircraft confirming that the transmission has been received.

fuelling includes refuelling and defuelling.

gas balloon means a balloon that sustains flight with lighter-than-air gas.

giant model aircraft: see regulation 101.024.

glider means an unpowered, heavier-than-air aircraft that derives its lift in flight chiefly from aerodynamic reactions on surfaces remaining fixed under given conditions of flight.

graded runway strip includes an area delineated by gable or cone markers.

grant, in relation to a civil aviation authorisation, includes grant by renewal.

gyroglider means a non-power-driven heavier-than-air aircraft supported in flight by the reaction of the air on 1 or more rotors that rotate freely on substantially vertical axes.

gyroplane means a power-driven, heavier than air aircraft supported in flight by the reaction of the air on 1 or more rotors which rotate freely on substantially vertical axes.

hang glider means a glider with some rigid structure:

- (a) that has an empty weight of 70 kg or less; and
- (b) the free flight of which does not depend on an engine.

heading has the same meaning as in Annex 2 to the Chicago Convention.

heavier-than-air aircraft is the generic term for aircraft that derive their lift in flight chiefly from aerodynamic forces.

heavy balloon: see regulation 101.145.

heavy package: see regulation 101.145.

height has the same meaning as in Annex 2 to the Chicago Convention.

helicopter means a heavier-than-air aircraft supported in flight by the reaction of the air on one or more normally power-driven rotors on substantially vertical axes.

helideck means an area intended for use wholly or partly for the arrival or departure of rotorcraft, on:

- (a) a ship; or
- (b) a floating or fixed structure on water.

highly volatile fuel means:

- (a) aviation gasoline; or
- (b) a hydrocarbon mixture that spans the gasoline and kerosene boiling ranges; or
- (c) a mixture of aviation gasoline and a hydrocarbon mixture mentioned in paragraph (b).

high power rocket: see regulation 101.425.

historic aircraft: see regulation 132.010.

holder, of an authorisation (within the meaning given by Part 11), means:

- (a) if the authorisation has not been transferred—the person to whom it was granted; or
- (b) if the authorisation has been transferred—the person to whom it was transferred or, if it has been transferred more than once, the person to whom it was most recently transferred.

hot air airship means a power driven lighter-than-air aircraft where the engine does not create any portion of lift.

hot fuelling, of an aircraft, means the fuelling of the aircraft with an engine running.

human factors principles means principles concerned with the minimisation of human error and its consequences by optimising the relationships within systems between people, activities and equipment.

ICAO Document 8126 means Document 8126-AN/872 (*Aeronautical Information Services Manual*) approved and published by decision of the Council of the International Civil Aviation Organization, as in force from time to time.

ICAO Document 8697 means Document 8697-AN/889 (*Aeronautical Chart Manual*) approved and published by decision of the Council of the International Civil Aviation Organization, as in force from time to time.

identification number of a production certificate or type certificate means the number, or group of characters, described in the certificate as being its number.

IFR (short for instrument flight rules) means the rules and procedures set out in Subdivision 91.D.4.3.

IFR flight means a flight conducted under the IFR.

IFR operation means an operation conducted under the IFR.

IMC (short for instrument meteorological conditions) means meteorological conditions other than VMC.

immediately reportable matter has the meaning given by subsection 3(1) of the *Transport Safety Investigation Act 2003*.

in an area, used of the operation of an aircraft: see clause 40 of Part 2 of this Dictionary.

incidental provisions, of an instrument, or part of an instrument, mentioned in these Regulations, means the provisions of the instrument, or part, that are not airworthiness standards.

infant means a person who has not turned 2.

in-house maintenance, for an aeronautical product (the **first aeronautical product**) to be fitted to an aircraft or another aeronautical product (the **second aeronautical product**), means maintenance carried out on the first aeronautical product by a Part 145 organisation that will fit the product to the aircraft or the second aeronautical product.

in-house release document, for an aeronautical product on which in-house maintenance has been carried out, means the document that:

- (a) is issued by the Part 145 organisation that carried out the in-house maintenance; and
- (b) includes a statement to the effect that, in respect of the in-house maintenance, the product is serviceable, within the meaning given by subregulation 42.015(1); and
- (c) includes information enabling the identification of the record mentioned in regulation 42.820 for the product.

inoperative: an item for a flight of an aircraft is **inoperative** if, due to a defect, the item, or a function of the item, does not:

- (a) accomplish its intended purpose; or
- (b) consistently function within the operating limits or tolerances mentioned in the approved design for the item or the flight manual for the aircraft.

instructor has the meaning given by regulation 61.010.

instrument approach operation means an approach and landing:

- (a) conducted using instruments for navigation guidance; and
- (b) based on an authorised instrument approach procedure.

instrument approach procedure means a series of predetermined manoeuvres by reference to flight instruments with specified protection from obstacles from the

initial approach fix or, where applicable, from the beginning of a defined arrival route to a point from which a landing can be completed and thereafter, if a landing is not completed, to a position at which holding or en-route obstacle clearance criteria apply.

instrument departure procedure, for an aircraft, means a series of predetermined manoeuvres by reference to flight instruments with specified protection from obstacles from take-off until the aircraft reaches:

- (a) the en-route lowest safe altitude; or
- (b) the minimum altitude at which the aircraft, on a minimum climb gradient of 3%, can intercept the planned flight route; or
- (c) in a case where the aircraft has taken off from an aerodrome for which there is a radar control service in operation—the minimum radar vector altitude.

instrument flight procedures means the visual and instrument procedures for use by aircraft operating under the IFR.

Integrated Aeronautical Information Package means a package, in hardcopy or electronic form, consisting of the following:

- (a) the AIP;
- (b) AIP Amendments;
- (c) AIP Supplements;
- (d) NOTAMS and pre-flight information bulletins;
- (e) aeronautical information circulars.

integrated training means an intensive course of training:

- (a) that is designed to ensure that a course participant receives ground theory training integrated with practical flight training; and
- (b) for which:
 - (i) the ground theory training and practical flight training are conducted by the same operator; or
 - (ii) the operator that conducts the practical flight training engages another person or organisation to conduct the ground theory training on behalf of the operator; and
- (c) that is conducted according to a syllabus that satisfies the knowledge and flight standards specified in the Part 61 Manual of Standards for the grant of a private or commercial pilot licence; and
- (d) that is designed to be completed within a condensed period of time.

intermediate category, for an aircraft, means the category of aircraft that satisfy the requirements for issue of a type certificate mentioned in regulation 21.026.

internal review decision, of an ASAO: see subregulation 149.605(5).

international operating agency means an international operating agency referred to in Article 77 of the Chicago Convention.

international registration plan means a plan for the registration by an international organisation of aircraft operated, or to be operated, by an international operating agency, being a plan approved by the Council by a determination made in pursuance of Article 77 of the Chicago Convention.

International Regulations means the *International Regulations for Preventing Collisions at Sea, 1972*, in the *Convention on the International Regulations for Preventing Collisions at Sea*, done at London on 20 October 1972, as amended and in force for Australia from time to time.

Note: The Convention is in Australian Treaty Series 1980 No. 5 ([1980] ATS 5) and could in 2019 be viewed in the Australian Treaties Library on the AustLII website (<http://www.austlii.edu.au>).

in the vicinity of a non-controlled aerodrome: see regulation 91.360.

joint registration plan means a plan for joint registration by Contracting States constituting an international operating agency of aircraft operated, or to be operated, by the agency, being a plan approved by the Council by a determination made in pursuance of Article 77 of the Chicago Convention.

journey log:

- (a) for a Part 121 operation—means the journey log required for the flight by regulation 121.105; or
- (b) for a Part 133 operation—means the journey log required for the flight by regulation 133.075; or
- (c) for a Part 135 operation—means the journey log required for the flight by regulation 135.085.

key personnel:

- (a) for an Australian air transport operator—means the people (however described) that hold, or carry out the responsibilities of, the following positions in the operator's organisation:
 - (i) the positions mentioned in paragraphs (a), (b) and (d) of the definition of **key personnel** in subsection 28(3) of the Act;
 - (ii) the safety manager; or
- (b) for an aerial work operator—means the people (however described) that hold, or carry out the responsibilities of, the following positions in the operator's organisation:
 - (i) chief executive officer;
 - (ii) head of operations;
 - (iii) if the operator is required by regulation 138.125 to have a training and checking system—head of training and checking;
 - (iv) if the operator is required by regulation 138.140 to have a safety management system—safety manager; or
- (c) for an ASAO—means the people (however described) who hold, or carry out the responsibilities of, the following positions in the ASAO's organisation:
 - (i) accountable manager;

- (ii) safety manager;
 - (iii) if the ASAO's approved functions include administering aircraft—the manager of the function;
 - (iv) any other position with the responsibilities prescribed by the Part 149 Manual of Standards; or
- (d) for a balloon transport operator—means the people (however described) that hold, or carry out the responsibilities of, the positions mentioned in paragraphs (a) and (b) of the definition of **key personnel** in subsection 28(3) of the Act.

kind, of an aircraft, means:

- (a) for an aircraft that is covered by an aircraft type rating—the aircraft type rating; and
- (b) for an aircraft that is not covered by an aircraft type rating—the type of aircraft.

kit-built aircraft means an aircraft described in paragraph 21.191(h).

land and hold short operation means an operation in which the pilot in command of an aircraft:

- (a) lands the aircraft on a runway; and
- (b) stops the aircraft before an intersection with another runway; and
- (c) does not proceed further until instructed to do so by air traffic control.

landing area has the same meaning as in Annex 2 to the Chicago Convention.

landing minima means the minimum values of the following that are used for the purpose of determining whether an aerodrome may be used for landing aircraft:

- (a) visibility, including runway visibility and runway visual range;
- (b) cloud ceiling height.

landing minima requirements for an aerodrome: see regulation 91.307.

landing weight, for a flight of an aircraft, means the total weight of the aircraft, including its load, at landing.

large RPA: see regulation 101.022.

letter of ATSO design approval: see paragraph 21.601(2)(c).

level, in relation to a flight of an aircraft, has the same meaning as in Annex 2 to the Chicago Convention.

licensed means licensed under CASR or CAR.

licensed aircraft maintenance engineer means an individual who holds an aircraft engineer licence that is in force.

life limit, for an aeronautical product that is fitted, or is to be fitted, to a limited category aircraft, has the meaning given by the Part 132 Manual of Standards.

light balloon: see regulation 101.145.

lighter-than-air aircraft is the generic term for aircraft that are supported chiefly by their buoyancy in the air.

light sport aircraft means an aircraft that:

- (a) has:
 - (i) if the aircraft is not intended for operation on water—a maximum take-off weight of 600 kilograms or less; or
 - (ii) if the aircraft is intended for operation on water—a maximum take-off weight of 650 kilograms or less; or
 - (iii) if the aircraft is a lighter-than-air aircraft—a maximum gross weight of 560 kilograms or less; and
- (b) if the aircraft is a powered aircraft that is not a glider—has a single, non-turbine engine fitted with a propeller; and
- (c) has a maximum stall speed in the landing configuration (V_{so}) of 45 knots calibrated air speed; and
- (d) if the aircraft is a glider—has a maximum never-exceed speed (V_{ne}) of 135 knots calibrated air speed; and
- (e) if the aircraft has a cabin—has an un-pressurised cabin; and
- (f) if the aircraft is designed to be equipped with seating—has a maximum seating capacity of 2 persons, including the pilot; and
- (g) if the aircraft is a manned free balloon that is not designed to be equipped with seating—can carry no more than 2 persons; and
- (h) has:
 - (i) in the case of an amphibian—repositionable landing gear; or
 - (ii) in the case of a glider—fixed landing gear or retractable landing gear; or
 - (iii) in any other case—fixed landing gear.

limited category, for an aircraft, means the category of aircraft that satisfy the requirements for issue of a special certificate of airworthiness mentioned in regulation 21.189.

limited category aircraft: see regulation 132.010.

limited category certificate: see regulation 132.010.

limited category organisation: see regulation 132.010.

lowest safe altitude, for a route or route segment of a flight of an aircraft, means the lowest altitude that will provide safe terrain clearance for the aircraft for the route or route segment calculated in accordance with a method specified in the Part 173 Manual of Standards, the operator's exposition or the operator's operations manual.

Note: The methods specified in the Part 173 Manual of Standards are also published in the AIP.

low-risk electronic device means:

- (a) a digital mobile telephone; or
- (b) a hand-held personal digital assistant; or
- (c) an electronic device:
 - (i) to which the *IEEE Standard for Information technology—Telecommunications and information exchange between systems—Local and metropolitan area network—Specific requirements Part 11: Wireless LAN Medium Access Control (MAC) and Physical Layer (PHY) Specifications* (as in force from time to time) applies; and
 - (ii) that transmits only in a way that meets that standard.

low-visibility approach means an approach using minima for a runway that are below the category I precision approach minima for the runway published in the AIP.

low-visibility operation means:

- (a) a low-visibility take-off; or
- (b) a low-visibility approach.

low-visibility take-off means a take-off with a runway visual range of less than 550 m.

major, for a modification or repair to a limited category aircraft: see regulation 132.020.

major change, for a type design: see regulation 21.093.

major defect means:

- (a) in relation to an aeronautical product that is not fitted to an aircraft—a defect of such a kind that the aeronautical product, if fitted to an aircraft, may affect the safety of the aircraft or cause the aircraft to become a danger to persons or property; and
- (b) in relation to an aircraft—a defect of such a kind that it may affect the safety of the aircraft or cause the aircraft to become a danger to persons or property; and
- (c) for an emergency parachute—see regulation 105.010; and
- (d) for a reserve parachute—see regulation 105.010.

manned free balloon means a free balloon that:

- (a) is equipped to carry one or more persons; and
- (b) is equipped with controls that enable the altitude of the balloon to be controlled.

markings, for an aircraft: see regulation 45.015.

master minimum equipment list: see regulation 91.925.

Materials Review Board means:

- (a) for a manufacturer manufacturing an aircraft, aircraft engine or propeller under a type certificate only—the Materials Review Board established under paragraph 21.125(1)(a); and

- (b) for a manufacturer manufacturing an aircraft, aircraft engine or propeller under a production certificate—the Materials Review Board established under regulation 21.145.

maximum certificated passenger seating capacity, for an aircraft, means the maximum passenger seating capacity permitted under the aircraft's type certificate, foreign type certificate, supplemental type certificate or foreign supplemental type certificate.

maximum landing weight, for an aircraft, means the maximum landing weight for the aircraft permitted by:

- (a) for an aircraft that is type certificated—the flight manual for the aircraft; or
- (b) for an aircraft that is not type certificated:
 - (i) if a document, published by the manufacturer of the aircraft setting out the operating limitations for the aircraft, specifies a weight—that document; or
 - (ii) if no weight is specified in the document mentioned in subparagraph (i), or if a different weight is specified in the certificate of airworthiness for the aircraft—the certificate of airworthiness for the aircraft.

maximum operational passenger seat configuration, for an aircraft, means the maximum passenger seat capacity of the aircraft, excluding crew stations:

- (a) approved by CASA for the operator of the aircraft:
 - (i) for an operator that is not an Australian air transport operator—under regulation 201.030; or
 - (ii) for an Australian air transport operator—as part of the approval of the operator's exposition under Part 119; and
- (b) specified in the operator's operations manual (if any).

maximum passenger seating capacity, for an aircraft, means the maximum number of seats for persons (excluding flight crew and cabin crew) in the aircraft that is:

- (a) approved by CASA; and
- (b) specified in the aircraft operator's operations manual.

maximum payload capacity, for an aircraft, means the maximum payload permitted under the aircraft's type certificate, foreign type certificate, supplemental type certificate or foreign supplemental type certificate.

maximum take-off weight, for an aircraft, means the maximum take-off weight for the aircraft permitted by:

- (a) for an aircraft that is type certificated—the flight manual for the aircraft; or
- (b) for an aircraft that is not type certificated:
 - (i) if a document, published by the manufacturer of the aircraft setting out the operating limitations for the aircraft, specifies a weight—that document; or

- (ii) if the certificate of airworthiness for the aircraft specifies a different weight to the weight specified in the document mentioned in subparagraph (i)—the certificate of airworthiness for the aircraft; or
- (iii) if no weight is specified in the document mentioned in subparagraph (i) or in the certificate of airworthiness for the aircraft and the aircraft is a Part 103 aircraft in relation to which a statement of acceptance for the aircraft has been issued by a Part 103 ASAO in accordance with regulation 103.030—the weight specified in the statement of acceptance.

medical certificate means:

- (a) a medical certificate issued under Subpart 67.C; or
- (b) for the holder of a certificate of validation of an overseas flight crew licence—the holder's overseas medical certificate.

medically significant condition has the meaning given by subregulation 67.010(1).

medical practitioner:

- (a) for Part 61 has the meaning given by regulation 61.010; and
- (b) for Part 67 has the meaning given by subregulation 67.010(1).

medical transport operating site, for a rotorcraft, has the meaning given by the Part 133 Manual of Standards.

medical transport operation: see clause 70 of Part 2 of this Dictionary.

medical transport specialist means:

- (a) a crew member for a flight who carries out a specified function during the flight relating to a medical transport operation, and who is not:
 - (i) a flight crew member for the flight; or
 - (ii) an air crew member for the flight; or
- (b) a crew member, for a flight, of a kind prescribed by the Part 119 Manual of Standards for the purposes of this paragraph.

medium balloon: see regulation 101.145.

medium RPA: see regulation 101.022.

meets the modified Austroads medical standards has the meaning given by regulation 67.262.

MEL: see regulation 91.925.

meteorological information means information:

- (a) that is any of the following kinds:
 - (i) meteorological reports;
 - (ii) meteorological analyses;
 - (iii) meteorological forecasts;
 - (iv) meteorological warnings;

- (v) meteorological advices;
- (vi) revisions or amendments of any of those kinds of information; and
- (b) which may be required for aviation purposes.

micro RPA: see regulation 101.022.

military aerodrome means an aerodrome controlled by a part of the Defence Force.

military aircraft means an aircraft of any part of the Defence Force (including an aircraft that is being constructed for any part of the Defence Force), other than an aircraft that is an Australian aircraft that is registered.

minimum equipment list: see regulation 91.925.

minor change, for a type design: see regulation 21.093.

MMEL: see regulation 91.925.

model, for an aircraft, aircraft engine or propeller, means a particular version of a type of aircraft, aircraft engine or propeller that is distinguished from another version of the same type by a change of sufficient effect on the weight, balance, structural strength, operational characteristics as would require a separate entry on a type certificate, identifying and approving the particular version as distinct from the identification and approval of other versions.

model aircraft: see regulation 101.023.

model rocket: see regulation 101.425.

modification/repair design approval means an approval granted under regulation 21.435 or 21.437.

movement area has the same meaning as in Annex 11 to the Chicago Convention.

multi-crew operation: see regulation 61.010.

multi-flight journey means a journey to a destination that involves more than one flight, if all of the flights are conducted by the same operator using the same aircraft.

national aviation authority, for a foreign country:

- (a) means the authority that is responsible for regulating civil aviation in the country; and
- (b) includes:
 - (i) the national airworthiness authority for the country; and
 - (ii) if EASA carries out functions on behalf of the country—EASA; and
 - (iii) for China, for matters relating to Hong Kong—the Civil Aviation Department of Hong Kong.

navigation specification has the meaning given by the Part 91 Manual of Standards.

navigation system, in relation to an aircraft, means a system by which the aircraft can be navigated.

night means the period between the end of evening civil twilight and the beginning of the following morning civil twilight.

non-command pilot's seat, of an aircraft, means the pilot seat not normally occupied by the pilot in command during a flight of the aircraft.

non-controlled aerodrome means an aerodrome at which an aerodrome control service is not operating.

non-precision approach runway has the same meaning as in Annex 14, Aerodromes, to the Chicago Convention.

non-scheduled air transport operation means an air transport operation that is not:

- (a) a scheduled air transport operation; or
- (b) a medical transport operation.

Note: A non-scheduled air transport operation includes an operation for the carriage, in accordance with fixed schedules to and from fixed terminals, of passengers or cargo, or passengers and cargo, in circumstances in which the accommodation in the aircraft is not available for use by persons generally.

non-technical skills means specific human competencies, including critical decision making, team communication, situational awareness and workload management, which may minimise human error in aviation.

normal cruising speed, for an aeroplane or rotorcraft, means the speed stated in the flight manual for the aeroplane or rotorcraft as a normal cruising speed in International Standard Atmosphere conditions with all engines operating.

NOTAM (short for Notice to Airmen) has the same meaning as in the *Air Services Regulations 2019*.

NOTAM authorised person, of an aeronautical data originator, means a person appointed by the originator as a NOTAM authorised person under regulation 175.445.

NOTAM Office means the office of AA responsible for the publication of NOTAMS.

NVIS flight means a flight conducted using a night vision imaging system.

obstacle limitation surface, of an aerodrome, means a surface associated with the aerodrome that is ascertained in accordance with the requirements prescribed by the Part 139 Manual of Standards for the purposes of this definition.

officer, of a corporation, in Part 149, has the same meaning as in regulation 142.035.

off-shore installation means an installation that is erected on, or floating in the sea above, the continental shelf for the purpose of extracting, or exploring for, petroleum or natural gas.

one-engine-inoperative cruising speed, for an aeroplane, means any speed stated in the aeroplane's flight manual as a cruising speed with one engine inoperative.

operated within the visual line of sight: see subregulation 101.073(3).

operational control, for a flight of an aircraft, means control over the initiation, continuation, diversion or ending of the flight in the interests of the safety of the aircraft and the regularity and efficiency of the flight.

operational flight plan:

- (a) for a Part 121 operation—means a plan that meets the requirements of regulation 121.175; or
- (b) for a Part 133 operation—means a plan that meets the requirements of regulation 133.135; or
- (c) for a Part 135 operation—means a plan that meets the requirements of regulation 135.145.

operational safety-critical personnel, for an Australian air transport operator, an aerial work operator or a balloon transport operator:

- (a) means personnel carrying out, or responsible for, safety-related work, including:
 - (i) personnel carrying out roles that have direct contact with the physical operation of aeroplanes, rotorcraft or Part 131 aircraft used in the operator's Australian air transport operations, aerial work operations or balloon transport operations; and
 - (ii) personnel carrying out roles that have operational contact with personnel who operate aeroplanes, rotorcraft or Part 131 aircraft used in those operations; and
 - (iii) personnel described as operational safety-critical personnel in the operator's exposition or operations manual; but
- (b) does not include personnel who are employed or engaged by the operator (whether by contract or other arrangement) and are engaged in:
 - (i) the provision of continuing airworthiness management services for aeroplanes, rotorcraft or Part 131 aircraft used in the operator's Australian air transport operations, aerial work operations or balloon transport operations; or
 - (ii) carrying out maintenance on an aeroplane, rotorcraft, Part 131 aircraft or aeronautical product on behalf of an approved maintenance organisation.

operations manual means:

- (a) for a limited category organisation—the manual mentioned in subregulation 262AN(2) of CAR for the organisation; or
- (b) for an aerial work operator:

- (i) the set of documents approved by CASA under regulation 138.045 in relation to the operator; or
- (ii) if the set of documents is changed under regulation 138.060, 138.064 or 138.068, or the process mentioned in regulation 138.066—the set of documents as changed.

operations specifications has the same meaning as in Chapter 1 of Part 1 of Annex 6, *Operation of Aircraft*, to the Chicago Convention.

operator, of an aircraft, means:

- (a) if the operation of the aircraft is authorised by an AOC, a Part 141 certificate or an aerial work certificate—the holder of the AOC or certificate; or
- (b) otherwise—the person, organisation or enterprise engaged in aircraft operations involving the aircraft.

operator proficiency check: see regulation 61.010.

organisation, in relation to an ASAO, means the organisation established by the ASAO to perform the approved functions of the ASAO.

other AIS applicable ICAO documents means each of the following documents as approved and published by decision of the Council of the International Civil Aviation Organization, as in force from time to time:

- (a) ICAO Document 4444-ATM/501 (*Procedures for Air Navigation Services—Air Traffic Management*), subject to the differences mentioned in Gen 1.7 of Part 1 of the AIP;
- (b) ICAO Document 7030 (*Regional Supplementary Procedures*);
- (c) ICAO Document 7910 (*Location Indicators*);
- (d) ICAO Document 8168 (PANS-OPS), subject to the differences mentioned in Gen 1.7 of Part 1 of the AIP;
- (e) ICAO Document 8400 (*ICAO Abbreviations and Codes*);
- (f) ICAO Document 9432 (*Manual of Radiotelephony*);
- (g) ICAO Document 9674 (*World Geodetic System*);
- (h) ICAO Document 9905-AN/471 (*Required Navigation Performance Authorisation Required (RNP AR) Procedure Design Manual*).

overhauled: see paragraph 21.321(2)(d).

overseas endorsement has the meaning given by regulation 61.010.

overseas flight crew licence has the meaning given by regulation 61.010.

overseas medical certificate has the meaning given by regulation 61.010.

overseas rating has the meaning given by regulation 61.010.

PANS-AIM means the Procedures for Air Navigation Services-Aeronautical Information Management approved and published by the Council of the

International Civil Aviation Organization, as in force from time to time, subject to the differences mentioned in Gen 1.7 of Part 1 of the AIP.

parachute has a meaning affected by regulation 105.010.

parachute operator: see regulation 105.010.

parachuting activity: see regulation 105.010.

paraglider means a glider:

- (a) with a wing that is inflated and maintains its profile in flight due to the ram-air pressure of the air through which it moves; and
- (b) that has an empty weight of 70 kg or less; and
- (c) the free flight of which does not depend on an engine.

parasail: see subregulation 200.005(2).

Part 21 Manual of Standards means the Manual of Standards issued by CASA under regulation 21.010D.

Part 42 Manual of Standards means the Manual of Standards issued by CASA under regulation 42.020.

Part 45 Manual of Standards means the Manual of Standards issued by CASA under regulation 45.025.

Part 47 Manual of Standards means the Manual of Standards issued by CASA under regulation 47.012.

Part 61 Manual of Standards means the Manual of Standards issued by CASA under regulation 61.035.

Part 91 Manual of Standards means the Manual of Standards issued by CASA under regulation 91.040.

Part 101 Manual of Standards means the Manual of Standards issued by CASA under regulation 101.028.

Part 103 activity: see regulation 103.010.

Part 103 aircraft: see subregulations 103.005(4), (5) and (6).

Part 103 ASAO: see regulation 103.010.

Part 103 Manual of Standards means the Manual of Standards issued by CASA under regulation 103.015.

Part 105 ASAO: see regulation 105.010.

Part 105 Manual of Standards means the Manual of Standards issued by CASA under regulation 105.015.

Part 119 Manual of Standards means the Manual of Standards issued by CASA under regulation 119.045.

Part 121 Manual of Standards means the Manual of Standards issued by CASA under regulation 121.015.

Part 121 operation means an operation mentioned in subregulation 121.005(1).

Part 121 proficiency check means a proficiency check that complies with regulation 121.580.

Part 131 aircraft: see subregulation 131.005(2).

Part 131 ASAO means an ASAO whose approved functions include administering a Part 131 recreational activity.

Part 131 Manual of Standards means the Manual of Standards issued by CASA under regulation 131.055.

Part 131 pilot authorisation means:

- (a) a commercial pilot (balloon) licence; or
- (b) a CAR certificate of validation; or
- (c) an authorisation from a Part 131 ASAO that authorises the holder to operate a Part 131 aircraft; or
- (d) a flight radiotelephone operator licence.

Part 131 recreational activity: see subregulation 131.025(1).

Part 132 Manual of Standards means the Manual of Standards issued by CASA under regulation 132.040.

Part 133 Manual of Standards means the Manual of Standards issued by CASA under regulation 133.020.

Part 133 operation means an operation mentioned in regulation 133.005.

Part 135 Manual of Standards means the Manual of Standards issued by CASA under regulation 135.025.

Part 135 operation means an operation mentioned in regulation 135.005.

Part 138 Manual of Standards means the Manual of Standards issued by CASA under regulation 138.020.

Part 139 Manual of Standards means the Manual of Standards issued by CASA under regulation 139.005.

Part 141 certificate: see regulation 141.015.

Part 141 operator: see subregulation 141.015(3).

Part 142 operator: see subregulation 142.015(4).

Part 145 organisation means a person who holds an approval under regulation 145.030 that is in force.

Part 149 Manual of Standards means the Manual of Standards issued by CASA under regulation 149.010.

Part 175 Manual of Standards means the Manual of Standards issued by CASA under regulation 175.025.

passenger, in relation to an aircraft, means a person:

- (a) who:
 - (i) intends to travel on a particular flight on the aircraft; or
 - (ii) is on board the aircraft for a flight; or
 - (iii) has disembarked from the aircraft following a flight; and
- (b) who is not a crew member of the aircraft for the flight.

passenger transport operation has the meaning given by clause 75 of Part 2 of the Dictionary.

passenger with reduced mobility means a person who is likely to require special conditions and assistance to find and use an exit on board an aircraft in an emergency because:

- (a) the person's mobility is impaired; or
- (b) the person has another impairment.

performance class means:

- (a) performance class 1; or
- (b) performance class 2; or
- (c) performance class 2 with exposure; or
- (d) performance class 3.

performance class 1, for a stage of flight of a rotorcraft, has the meaning given by the Part 133 Manual of Standards.

performance class 2, for a stage of flight of a rotorcraft, has the meaning given by the Part 133 Manual of Standards.

performance class 2 with exposure, for a stage of flight of a rotorcraft, has the meaning given by the Part 133 Manual of Standards.

performance class 3, for a stage of flight of a rotorcraft, has the meaning given by the Part 133 Manual of Standards.

permit index number, for an aircraft for which a limited category certificate has been issued: see regulation 132.010.

personnel:

- (a) for an Australian air transport operator, an aerial work operator or a balloon transport operator, includes any of the following persons who have duties or responsibilities that relate to the safe conduct of the operator's Australian air transport operations, aerial work operations or balloon transport operations:
 - (i) an employee of the operator;

- (ii) a person engaged by the operator (whether by contract or other arrangement) to provide services to the operator;
- (iii) an employee of a person mentioned in subparagraph (ii); or
- (b) for an ASAO, includes any of the following persons who have duties or responsibilities that relate to the safe performance of the ASAO's approved functions:
 - (i) an employee of the ASAO;
 - (ii) a person engaged by the ASAO (whether by contract or other arrangement) to provide services to the ASAO;
 - (iii) an employee of a person mentioned in subparagraph (ii);
 - (iv) a person appointed by the ASAO to perform an approved function on behalf of the ASAO.

pilot, used as a verb, has the meaning given by regulation 61.010.

pilot certificate means a certificate (however described) that:

- (a) is granted by a sport aviation body; and
- (b) authorises its holder to pilot an aircraft, other than a registered aircraft, in an aviation activity administered by the organisation.

pilot in command, in relation to a flight of an aircraft, means the pilot designated by the operator of the aircraft as being in command and charged with the safe conduct of the flight.

pilot in command under supervision has the meaning given by regulation 61.010.

pilot instructor: see regulation 61.010.

pilot licence: see regulation 61.010.

pilot-owner, of an aircraft, means an individual who:

- (a) owns the aircraft; and
- (b) is authorised, under Part 61, to fly the aircraft.

polar region means the area:

- (a) north of 78°N; or
- (b) south of 60°S.

populous area includes a city and a town.

power-assisted sailplane means a powered sailplane that has insufficient performance with the engine operating to achieve the applicable take-off and climb performance criteria for powered sailplanes specified by the airworthiness standards prescribed by regulation 22.001 of CASR.

powered aircraft means an aircraft that is propelled by an engine or engines.

powered hang glider means a hang glider with an engine attached that has, when the engine is not being operated, the characteristics of a hang glider.

powered-lift aircraft means a power-driven heavier-than-air aircraft that derives its lift in flight:

- (a) during vertical manoeuvring and low-speed flight—from:
 - (i) the reaction of air on one or more normally power-driven rotors on substantially vertical axes; or
 - (ii) engine thrust; and
- (b) otherwise—chiefly from aerodynamic reactions on surfaces remaining fixed under given conditions of flight.

powered parachute means a single-seat or two-seat power-driven aircraft with a ram-air parachute wing, to which all of the following apply:

- (a) the aircraft has a single non-turbine engine and a single propeller;
- (b) the aircraft has a maximum take-off weight not exceeding 600 kilograms;
- (c) the aircraft has, when the engine is not being operated, the characteristics of a parachute.

powered paraglider means a paraglider with an engine attached that has, when the engine is not being operated, the characteristics of a paraglider.

powered sailplane means a sailplane equipped with one or more engines that has, when the engine or engines are not being operated, the characteristics of a sailplane.

prescribed single-engine aeroplane: see regulation 135.240.

primary category, for an aircraft, means the category of aircraft that satisfy the requirements for issue of a type certificate mentioned in regulation 21.024.

private operation: an operation of an aircraft is a **private operation** if the operation is not one of the following:

- (a) an operation that is required to be conducted under the authority of an AOC under Part 119, 129 or 131 or regulation 206 of CAR;
- (b) an operation that is required to be conducted under the authority of an aerial work certificate under Part 138;
- (c) Part 141 flight training (within the meaning of Part 141);
- (d) a Part 142 activity (within the meaning of Part 142);
- (e) an adventure flight for a limited category aircraft;
- (f) a specialised balloon operation that is conducted for hire or reward;
- (g) an operation authorised by a New Zealand AOC with ANZA privileges that is in force for Australia;
- (h) an operation under a permission under subsection 25(2) or (3) (non-scheduled flights by foreign registered aircraft) or section 27A (permission for operation of foreign registered aircraft without AOC) of the Act.

production certificate means a production certificate issued under subregulation 21.134(1).

prohibited area:

- (a) has the same meaning as in Annex 11 to the Chicago Convention; and
- (b) in relation to Australian territory—includes an area designated as a prohibited area by a declaration made under subregulation 6(1) of the *Airspace Regulations 2007*.

protective breathing equipment means equipment that is designed to prevent a person from having to breathe in, and to protect the person's eyes from, toxic gases and fumes.

provisional certificate of airworthiness means a Class I or Class II provisional certificate of airworthiness.

provisional type certificate means a Class I or Class II provisional type certificate.

psychoactive substance: see clause 60 of Part 2 of this Dictionary.

psychoactive substance offence means an offence:

- (a) of which an element is the possession, use or excessive use of a psychoactive substance; or
- (b) of which the substance is importing, or trafficking in, a psychoactive substance; or
- (c) of which an element is being under the influence of a psychoactive substance; or
- (d) of which an element is the presence, or the presence at a concentration higher than a particular concentration, in the blood, breath or urine of a psychoactive substance or a metabolite of such a substance; or
- (e) the substance of which is refusal to provide a blood, breath or urine sample for analysis; or
- (f) of attempting to commit, inciting the commission of or conspiring to commit an offence referred to in paragraph (a), (b), (c), (d) or (e).

Note: ***Psychoactive substance*** includes alcohol but does not include coffee, tea, cocoa, chocolate or any other non-alcoholic drink containing caffeine, or caffeine-containing confectionery—see Part 2 of this Dictionary.

public gathering means an assembly of people at a place on the basis of a general public invitation to attend at that place, whether or not a charge is made for attendance.

published lowest safe altitude, for a route or route segment for a flight of an aircraft, means the lowest safe altitude for the route or route segment published in authorised aeronautical information.

qualified flight simulator means a flight simulator that is qualified under Part 60 of CASR.

qualified flight training device means a flight training device that is qualified under Part 60 of CASR.

radio navigation aid means a standard radio navigation aid of a kind mentioned in section 2.1.1 of Chapter 2 of Volume 1 of Annex 10 to the Chicago Convention.

radionavigation service means a radio navigation service within the meaning of Annex 10 to the Chicago Convention.

radio station licence means:

- (a) for an Australian aircraft—an apparatus licence or class licence issued under the *Radiocommunications Act 1992* for the radiocommunications equipment on board the aircraft; or
- (b) for a foreign registered aircraft—a document:
 - (i) that is equivalent to a document mentioned in paragraph (a); and
 - (ii) that is issued by the authority of the aircraft’s State of registry that issues radio licences.

recognised country: see regulation 21.010B.

rectification interval: see regulation 91.925.

recurrent training means the training of the personnel of an aircraft operator or the operator of a flight simulation training device that is conducted to ensure that the personnel are competent to carry out their responsibilities.

Regional Air Navigation Agreement means a Regional Air Navigation Agreement approved by decision of the Council of the International Civil Aviation Organisation.

registered, in relation to an Australian aircraft, means:

- (a) in the case of an aircraft to which Division 47.C.1 applies—registered under Division 47.C.1; or
- (b) in the case of an aircraft to which Division 47.C.2 applies—registered under Division 47.C.2.

Note: For the definition of **foreign registered aircraft**, see section 3 of the Act.

registered operator, of an aircraft, has the meaning given by regulation 47.100.

registered training organisation has the meaning given by section 3 of the *National Vocational Education and Training Regulator Act 2011*.

registration holder, of an aircraft, means the person whose name is entered in the Australian Civil Aircraft Register as:

- (a) in the case of an aircraft registered under Division 47.C.1—the aircraft’s owner; and
- (b) in the case of an aircraft that is an RPA registered under Division 47.C.2—the person who applied for the registration of the aircraft.

registration mark, of an aircraft, means the registration mark assigned to the aircraft under Subpart 47.G.

relevant airworthiness standards means:

- (a) for an aircraft that conforms to a type certificate issued, or taken to have been issued, under regulation 21.013A or 21.029—the airworthiness standards included in the type certification basis for the aircraft; or
- (b) for an aircraft for which a type acceptance certificate has been issued, or is taken to have been issued, under regulation 21.029A—the airworthiness standards that the aircraft had to meet for the issue of the foreign type certificate that was the basis for issuing the type acceptance certificate.

relevant approved design organisation, in relation to a design activity, within the meaning given by regulation 21.233, and an aircraft or aeronautical product of a particular kind, means an approved design organisation that is approved under Subpart 21.J to carry out that design activity in relation to aircraft or aeronautical products of that kind.

remote pilot licence means a licence granted under Division 101.F.3.

required, in relation to a flight crew member for a flight: see subregulation 91.605(2).

required navigational performance, for an area of airspace, or a route, means the navigational performance specified in the AIP for that area of airspace or route.

reserve parachute: see regulation 105.010.

reserve parachute assembly: see regulation 105.010.

restricted area:

- (a) has the same meaning as in Annex 11 to the Chicago Convention; and
- (b) in relation to Australian territory—includes an area designated as a restricted area by a declaration made under subregulation 6(1) of the *Airspace Regulations 2007*.

restricted category, for an aircraft, means the category of aircraft that satisfy the requirements for issue of a type certificate mentioned in regulation 21.025.

restricted person means:

- (a) a deportee (within the meaning of subsection 5(1) of the *Migration Act 1958*); or
- (b) a removee (within the meaning of subsection 5(1) of the *Migration Act 1958*); or
- (c) a person in custody; or
- (d) a passenger carried on an aircraft:
 - (i) who is on the aircraft because the passenger has been refused entry to a country; or
 - (ii) whose passport does not include a visa required for entry to the passenger's destination country.

rocket means a pilotless vehicle powered by reaction that carries all the components necessary to provide its jet.

rotorcraft means:

- (a) a helicopter; or
- (b) a gyroplane; or
- (c) a powered-lift aircraft.

route segment means a portion of a route.

RPA: see regulation 101.021.

RPAS (short for remote pilot aircraft system) means a set of configurable elements consisting of a remotely piloted aircraft, its associated remote pilot station (or stations), the required command and control links and any other system elements as may be required at any point during the operation of the aircraft.

RPL training course means training in the operation of RPA for the grant of a remote pilot licence that is conducted:

- (a) by a person who is certificated under regulation 101.335 and whose operations include conducting training; and
- (b) in accordance with any standards or requirements prescribed by the Part 101 Manual of Standards.

RTCA/DO-200A means the latest version of RTCA/DO-200A, Standards for Processing Aeronautical Data, issued by RTCA, Inc, as in force from time to time.

Note: RTCA/DO-200A could in 2014 be viewed on the RTCA's website (<http://www.rtca.org>).

runway strip means a defined area at an aerodrome, including the runway and stopway (if any) to which it relates, that is intended to:

- (a) reduce the risk of damage to aircraft running off the runway; and
- (b) protect aircraft flying over the area during take-off, landing or a missed approach.

runway visual range means the range, measured using an electronic instrument, over which the pilot of an aircraft on the centre line of a runway can see the runway surface markings or the lights delineating the runway or identifying its centre line.

RVSM airspace means any of the following:

- (a) the airspace, at or above flight level 290, identified in the AIP as airspace where a vertical separation minimum of 1,000 ft applies;
- (b) the airspace, at or above flight level 290, designated, or otherwise recognised, by the appropriate authority of a foreign country to be airspace where a vertical separation minimum of 1,000 ft applies;
- (c) airspace, at or above flight level 290, where a vertical separation of 1,000 ft applies under the terms of a Regional Air Navigation Agreement.

safety-critical aeronautical product, for a limited category aircraft: see regulation 132.025.

safety management system, for an Australian air transport operator, means the safety management system set out in the operator's exposition.

safety manager, of an ASAO, means the individual, appointed by the ASAO, who is responsible for the safety management system required by regulation 149.270.

sailplane means a glider:

- (a) that has an empty weight of more than 70 kg; and
- (b) the free flight of which does not depend on an engine.

scheduled air transport operation means an air transport operation, other than a medical transport operation, that is conducted:

- (a) in accordance with fixed schedules to and from fixed terminals over specific routes with or without intermediate stopping places between terminals; and
- (b) in circumstances in which the accommodation in the aircraft is available for use by persons generally.

seaplane includes an aeroplane with a floating hull.

search and rescue body means any of the following:

- (a) a State or Territory police service or the Australian Federal Police;
- (b) the Australian Defence Force;
- (c) the Australian Maritime Safety Authority.

significant change:

- (a) for an Australian air transport operator: see regulation 119.020; or
- (b) for a balloon transport operator: see regulation 131.030; or
- (c) for an aerial work operator: see regulation 138.012.

single-pilot operation has the meaning given by regulation 61.010.

small balloon: see regulation 101.145.

small RPA: see regulation 101.022.

solo, in relation to a flight of an aircraft, has the meaning given by regulation 61.010.

special certificate of airworthiness: see regulation 21.175.

special class, for aircraft: see subregulation 21.017(2).

special condition means a special condition imposed under subregulation 21.016(1).

special flight authorisation means an authorisation granted under regulation 91.970.

special flight permit means a special flight permit issued under regulation 21.200.

specialised balloon operation: see regulation 131.020.

specialised helicopter operation means a helicopter operation that involves the carriage of persons or cargo:

- (a) between the coast of Australia and an off-shore installation; or
- (b) between off-shore installations; or
- (c) to or from the helipad of:
 - (i) a hospital; or
 - (ii) a State or Territory service (however described) established to provide assistance in emergencies.

special purpose operation, for an aircraft in the limited category, means an operation mentioned in subregulation 21.189(3).

special VFR means:

- (a) for an aircraft other than a Part 131 aircraft—the visual flight rules prescribed by the Part 91 Manual of Standards; or
- (b) for a Part 131 aircraft—the visual flight rules prescribed by the Part 131 Manual of Standards.

specified aircraft performance category, for an aircraft, means the aircraft performance category prescribed for an aircraft's V_{AT} (as worked out in accordance with the aircraft's flight manual) by the Part 91 Manual of Standards.

specified IFR cruising level, for a track, means a cruising level prescribed by the Part 91 Manual of Standards for an IFR flight on the track.

specified VFR cruising level, for a track, means a cruising level prescribed by the Part 91 Manual of Standards for a VFR flight on the track.

sport aviation body means:

- (a) Australian Ballooning Federation Incorporated; or
- (b) Australian Parachute Federation Limited; or
- (c) Australian Sport Rotorcraft Association Incorporated; or
- (d) Recreational Aviation Australia Limited; or
- (e) The Gliding Federation of Australia Incorporated; or
- (f) Sports Aviation Federation of Australia Limited; or
- (fa) the Australian Skydiving Association Incorporated; or
- (fb) an ASAO; or
- (g) a body established in a Contracting State to administer sport aviation in that State.

stage, of flight of a rotorcraft, means any of the following:

- (a) take-off;
- (b) take-off and initial climb;
- (c) en route;
- (d) approach and landing, or baulked landing.

Note: The definition of *performance class* relates to a stage of flight of a rotorcraft. The definition of *stage* is used in these Regulations only in the context of a performance class.

standard certificate of airworthiness: see regulation 21.175.

standard part means a part that complies with a specification that:

- (a) is established, published and maintained by:
 - (i) an organisation that sets consensus standards for products; or
 - (ii) a government agency; and
- (b) includes:
 - (i) design, manufacturing, test and acceptance criteria; and
 - (ii) requirements for the uniform identification of the part.

Example: For subparagraph (a)(i), the Institute of Electrical and Electronics Engineers—see <http://www.ieee.org/portal/site>.

standard RPA operating conditions: see regulation 101.238.

standard visual signal means a light, hand or ground signal:

- (a) prescribed by the Part 91 Manual of Standards for the purposes of this paragraph; and
- (b) displayed, for the purposes of communicating with an aircraft, in accordance with the requirements, or in the circumstances, (if any) prescribed by the Part 91 Manual of Standards for the purposes of this paragraph.

State includes the Northern Territory.

State, of an operator, means the country in which the operator's principal place of business is located or, if the operator does not have a principal place of business, the country in which the operator's permanent residence is located.

State of Design has the meaning given by Annex 8 to the Chicago Convention.

State of registry, for a foreign registered aircraft, means the foreign country on whose register the aircraft is entered.

student pilot means:

- (a) for aircraft other than Part 131 aircraft—a person who is authorised to pilot an aircraft under regulation 61.112; or
- (b) for Part 131 aircraft—a person who:
 - (i) does not hold a commercial pilot (balloon) licence within the meaning of subregulation 5.01(1) of CAR; and
 - (ii) is receiving balloon flying training within the meaning of that subregulation.

suitable forced landing area:

- (a) for a Part 133 operation—see regulation 133.010; and
- (b) for a Part 135 operation—see regulation 135.015.

suitable person: a person is a ***suitable person*** to occupy an emergency exit row seat or a seat adjacent to an emergency exit if the person:

- (a) is reasonably fit, strong, and able to assist with the rapid evacuation of the aircraft in an emergency; and
- (b) would not, because of a condition or disability, including an inability to understand oral instructions, hinder:
 - (i) other passengers during an evacuation of the aircraft in an emergency;
or
 - (ii) the aircraft's crew in carrying out their duties in an emergency.

supplemental oxygen means oxygen that is provided to an occupant of an aircraft by purpose-designed equipment to supplement the oxygen available in the atmosphere inside the aircraft.

supplemental type certificate means a supplemental type certificate issued under regulation 21.113A.

synthetic training device means:

- (a) a flight simulator; or
- (b) a flight training device; or
- (c) a basic instrument flight trainer.

take-off decision point, for a take-off of a rotorcraft, means the point, mentioned in the rotorcraft's flight manual, from which, if an engine failure is recognised:

- (a) the take-off may be safely rejected; or
- (b) the take-off may be continued safely.

take-off minima means the minimum values of the following that are used to determine whether an aerodrome may be used for the take-off of aircraft:

- (a) visibility, including runway visibility and runway visual range;
- (b) cloud ceiling height.

take-off minima requirements for an aerodrome: see regulation 91.307.

take-off weight, for a flight of an aircraft, means the total weight of the aircraft, including its load, at the start of:

- (a) for an aeroplane—its take-off run; or
- (b) for a rotorcraft—its take-off manoeuvre.

tandem parachutist: see regulation 105.010.

task specialist: see subregulations 138.015(1) and (2).

task specialist operation: see subregulation 138.010(4).

TAWS-Class A has the meaning given by the Part 121 Manual of Standards.

TAWS-Class B has the meaning given by the Part 121 Manual of Standards.

terminal instrument flight procedure means an instrument approach procedure or instrument departure procedure.

Territory does not include the Northern Territory.

tethered, in relation to a lighter-than-air aircraft, means attached to the ground, or an object on the ground, by flexible restraints that limit movement.

tethered balloon: see regulation 101.105.

these Regulations includes CAR.

threshold, of a runway, means the beginning of that portion of a runway that is useable for landing.

time-in-service means:

- (a) for an aircraft—each period starting when the aircraft takes off for a flight and ending when the aircraft lands at the end of the flight; and
- (b) for an aircraft engine or propeller that is fitted to an aircraft—each period starting when the aircraft takes off for a flight and ending when the aircraft lands at the end of the flight.

touring motor glider means a powered sailplane that:

- (a) has an integrally mounted, non-retractable, engine and a non-retractable propeller; and
- (b) is capable of taking off and climbing under its own power according to the touring motor glider's flight manual.

tour of duty, for a flight crew member:

- (a) means a period from when the member begins any duties associated with his or her employment before making a flight or series of flights until the member is finally relieved of all such duties after the end of the flight or flights; and
- (b) includes a period during which the member is required by an operator to hold himself or herself available at an aerodrome for the performance of any such duties.

track means the projection on the earth's surface of the path of an aircraft, the direction of which at any point is usually expressed in degrees from North (true or magnetic).

traffic information has the same meaning as in Annex 11 to the Chicago Convention.

traffic pattern means the path over the ground of aircraft in flight in the vicinity of an aerodrome during the execution of take-offs and landings and their paths when manoeuvring on the manoeuvring area.

trainee parachutist: see regulation 105.010.

training endorsement: see regulation 61.010.

TSO: see paragraph 21.601(2)(ab).

type, for an aircraft, aircraft engine or propeller, means a design and make of aircraft, aircraft engine or propeller and, where appropriate, refers to a group of essentially similar aircraft, aircraft engines or propellers which, although possibly existing in different models, stem from a common basic design.

type acceptance certificate means a type acceptance certificate issued under regulation 21.029A.

type certificate: see regulation 21.041.

type certificated means issued with a type certificate or type acceptance certificate.

type certificate data sheet means a sheet attached to a type certificate for an aircraft, aircraft engine or propeller that sets out the limitations prescribed by the applicable airworthiness requirements for the aircraft, aircraft engine or propeller, and any other limitations and information necessary for type certification of the aircraft, aircraft engine or propeller.

type certification basis, for an aircraft, aircraft engine or propeller, means the airworthiness standards and any special conditions or other conditions with which the aircraft, aircraft engine or propeller must comply for the issue of a type certificate.

type design: see regulation 21.031.

unmanned free balloon means a free balloon that:

- (a) is not tethered; and
- (b) is not equipped to carry persons.

Note: There are 4 different kinds of unmanned free balloons: see regulation 101.145.

unpowered aircraft means an aircraft other than a powered aircraft.

variant: see regulation 61.010.

V_{AT} is short for velocity at threshold.

very light aeroplane means an aeroplane of a kind mentioned in clause CS-VLA 1 of EASA CS-VLA, as in force from time to time.

very small RPA: see regulation 101.022.

VFR (short for visual flight rules) means:

- (a) for Part 131 aircraft—the rules and procedures set out in Subdivision 131.D.4.2; or
- (b) for all other aircraft—the rules and procedures set out in Subdivision 91.D.4.2.

VFR flight means a flight conducted under the VFR.

VFR operation means an operation conducted under the VFR.

visibility means the ability, as determined by atmospheric conditions and expressed in units of distance, to see and identify prominent unlighted objects by day and prominent lighted objects by night.

VMC (short for visual meteorological conditions) means meteorological conditions that meet the VMC criteria.

VMC criteria:

- (a) for a class of aircraft (other than Part 131 aircraft) and a class of airspace (including flight visibility and distance from cloud)—means the criteria prescribed for the class of aircraft and class of airspace by the Part 91 Manual of Standards; and
- (b) for Part 131 aircraft and a class of airspace (including flight visibility and distance from cloud)—means the criteria prescribed for the aircraft and class of airspace by the Part 131 Manual of Standards.

V_{SO} means the stalling speed or the minimum steady flight speed in the landing configuration.

Source FARs section 1.2.

weight and balance documents, for a flight of an aircraft, are the documents that set out the aircraft's load for the flight and the distribution of the load during the flight.

weight and balance limits, for an aircraft, means the weight and balance limits set out in the aircraft flight manual instructions for the aircraft.

weight-shift-controlled aeroplane means an aeroplane where flight control is attained primarily by weight-shift.

wet: a runway is **wet** if the surface area required for a take-off or landing:

- (a) is not dry; and
- (b) is not contaminated.

Part 2—Interpretation of certain expressions not defined in Part 1

1 Parts and materials excluded from the definition of *aeronautical product*

- (1) For the definition of *aeronautical product* in section 3 of the Act, a part or material that is part of or used in an aircraft is excluded if:
 - (a) the part or material:
 - (i) is not mentioned in the approved design for the aircraft; and
 - (ii) is not approved in a manner mentioned in regulation 21.305 or 21.305A; or
 - (b) the part or material is mentioned in a legislative instrument issued under subclause (2).
- (2) For subsection 98(5A) of the Act, CASA may issue a legislative instrument that specifies that a part or material is excluded from the definition of *aeronautical product* in section 3 of the Act.

3 Definition of *air transport operation*

- (1) An *air transport operation* is a passenger transport operation, a cargo transport operation or a medical transport operation, that:
 - (a) is conducted for hire or reward; or
 - (b) is prescribed by an instrument issued under regulation 201.025.
- (2) Despite subclause (1), an *air transport operation* does not include an aerial work operation or a balloon transport operation.

5 When an aircraft is *airworthy*

Note: This clause is reserved for future use.

15 Reference to Annexes to Chicago Convention

In these Regulations, a reference to an Annex to the Chicago Convention is a reference to that Annex as in force from time to time.

18 Meaning of *authorised release certificate*

- (1) For the purposes of CAR:

authorised release certificate, for an aircraft component, means a document that complies with regulation 42WA of CAR.
- (2) For the purposes of CASR:

authorised release certificate, for an aeronautical product, means:

- (a) if maintenance has not been carried out on the product since its manufacture, and the manufacture of the product was permitted by or under Part 21—a document:
 - (i) issued by the manufacturer of the product; and
 - (ii) that includes a statement to the effect that the product is serviceable, within the meaning given by subregulation 42.015(1); or
- (b) if maintenance has not been carried out on the product since its manufacture, and the manufacture of the product was permitted by the law of a foreign country—a document of a kind specified in the Part 42 Manual of Standards as being equivalent to a document mentioned in paragraph (a); or
- (c) if maintenance has been carried out on the product under these Regulations—a certificate of release to service for the product in relation to the maintenance issued under Division 42.H.4 that is in the approved form; or
- (d) if maintenance has been carried out on the product under the law of a foreign country—a document of a kind specified in the Part 42 Manual of Standards as being equivalent to a document mentioned in paragraph (c).

Note 1: For paragraph (a), Part 21 permits the manufacture of aeronautical products in a number of ways, including under APMAs, ATSO authorisations, type certificates and production certificates.

Note 2: For paragraph (c):

- (a) a certificate of release to service for an aeronautical product in relation to maintenance carried out on an aeronautical product that is not in-house maintenance must be in the approved form: see subregulation 42.810(1); and
- (b) a certificate of release to service for an aeronautical product in relation to in-house maintenance carried out on an aeronautical product must either be in the approved form or be in the form of an in-house release document: see subregulation 42.810(2).

25 Extended meaning of *charged with* in relation to certain offences

- (1) In these Regulations:

charged with has, in addition to its ordinary meaning, the meaning given by subclause (2).

- (2) For the purposes of these Regulations, a person is taken to have been *charged with* a psychoactive substance offence if:
 - (a) a law provides for the issue, in relation to the offence, of an expiation notice; and
 - (b) such a notice is issued to the person in relation to the offence.

35 Extended meaning of *convicted*

- (1) In these Regulations:

convicted has, in addition to its ordinary meaning, the meaning given by subclauses (2), (3) and (4).

- (2) For the purposes of these Regulations, a person is taken to have been **convicted** of an alleged offence if:
 - (a) the person has not been found guilty of the offence but asks for the offence to be taken into account when being sentenced for another offence; or
 - (b) the person has been found guilty of the offence but discharged without conviction.
- (3) In addition, a person is taken to have been **convicted** of a psychoactive substance offence if:
 - (a) a law provides for the issue, in relation to the offence, of an expiation notice; and
 - (b) such a notice was issued to the person in relation to the offence; and
 - (c) the person paid the penalty required by the notice.
- (4) However, a conviction that is spent (within the meaning of Part VIIC of the *Crimes Act 1914*), or has been quashed, is not taken to be a conviction for the purposes of these Regulations.

36 References to particular kinds of flight crew licences, ratings and endorsements

A reference in these Regulations to a particular kind of flight crew licence, rating or endorsement:

- (a) means a flight crew licence, rating or endorsement of that kind that may be granted under Part 61 (Flight crew licensing); and
- (b) includes a certificate of validation of an overseas flight crew licence that is equivalent to that kind of flight crew licence, rating or endorsement.

Example 1: For paragraph (a), a reference to a commercial pilot licence is a reference to a commercial pilot licence granted under Part 61.

Example 2: For paragraph (a), a reference to an aeroplane low-level endorsement is a reference to an aeroplane low-level endorsement granted under Part 61.

Example 3: For paragraph (b), a reference to a commercial pilot licence includes a reference to a certification of validation of an overseas flight crew licence that is equivalent to a commercial pilot licence granted under Part 61.

37 References to *flight manual*

- (1) A reference in these Regulations to an aircraft's ***flight manual***:
 - (a) is a reference to:
 - (i) if the aircraft's type certification basis required the provision of an aircraft flight manual—that manual; or
 - (ii) if regulation 21.005 applies to the aircraft—the manual that must be given to the owner of the aircraft under that regulation; or
 - (iii) for an aircraft not mentioned in subparagraph (i) or (ii)—another document that contains the aircraft's operating limitations and other information required for safe operation of the aircraft; and
 - (b) includes each amendment to the flight manual that:

- (i) is approved by CASA, an authorised person or an approved design organisation under regulation 21.006A; or
 - (ia) is approved by a person mentioned in subclause (2); or
 - (ii) is made at the direction of CASA under Subpart 11.G; or
 - (iii) relates to a foreign type certificate in relation to which CASA has issued a type acceptance certificate or a foreign supplemental type certificate, and is approved by the national aviation authority that issued the foreign type or supplemental type certificate; and
- (c) includes each supplement to the flight manual that:
- (i) is approved by CASA, an authorised person or an approved design organisation under regulation 21.006A; or
 - (ia) is approved by a person mentioned in subclause (2); or
 - (ii) is made at the direction of CASA under Subpart 11.G; or
 - (iii) relates to a foreign type certificate in relation to which CASA has issued a type acceptance certificate or a foreign supplemental type certificate, and is approved by the national aviation authority that issued the foreign type or supplemental type certificate.

- (2) For subparagraphs (1)(b)(ia) and (1)(c)(ia), the persons are the following:
- (a) if there is an agreement (however described) between Australia and a Contracting State for the acceptance of approvals of changes to aircraft flight manuals—the national aviation authority of the Contracting State, or a person authorised to do so by the national aviation authority;
 - (b) if there is an agreement (however described) between CASA and the national aviation authority of a Contracting State for the acceptance of approvals of changes to aircraft flight manuals—the national aviation authority or a person authorised to do so by the national aviation authority.

40 References to operating an aircraft in an area

In these Regulations, a reference to operating an aircraft in an area is a reference to operating the aircraft in the airspace above the area.

45 References to EASA certification specifications

In these Regulations, a reference to EASA, followed by the letters CS, a hyphen and a number, letter or letters, is a reference to the certification specifications, including airworthiness codes and acceptable means of compliance, produced by EASA and identified by that number, letter or letters.

50 References to pilot-in-command

Note: This clause is reserved for future use.

60 Meaning of *psychoactive substance*

- (1) In these Regulations:

psychoactive substance has, subject to subclause (2), the meaning given by section 1.1 of Annex 1, *Personnel Licensing*, to the Chicago Convention.

Note: The definition in that Annex is:

Psychoactive substances. Alcohol, opioids, cannabinoids, sedatives and hypnotics, cocaine, other psychostimulants, hallucinogens, and volatile solvents, whereas coffee and tobacco are excluded.

(2) To avoid doubt, in these Regulations:

psychoactive substance:

(a) includes:

- (i) a therapeutic substance that is a psychoactive substance within the meaning given by Annex 1 to the Chicago Convention; and
- (ii) a therapeutic substance of which a psychoactive substance (within the meaning given by that Annex) is an ingredient; but

(b) does not include:

- (i) tea, cocoa, chocolate or any other non-alcoholic drink containing caffeine or guarana; or
- (ii) confectionery containing caffeine or guarana.

(3) In paragraph (a) of the definition of ***psychoactive substance*** in subclause (2):

therapeutic substance means a substance that is therapeutic goods, within the meaning given by the *Therapeutic Goods Act 1989*.

65 Recognised foreign training providers

Note: This clause is reserved for future use.

70 Definition of *medical transport operation*

(1) A ***medical transport operation*** is an operation:

- (a) the primary purpose of which is to transport one or more of the following:
 - (i) medical patients;
 - (ii) medical personnel;
 - (iii) blood, tissue or organs for transfusion, grafting or transplantation; or
- (b) of a kind prescribed by the Part 119 Manual of Standards for the purposes of this paragraph.

Note: Other medical supplies (including medical equipment and medicines) might also be transported on an aircraft for a medical transport operation.

(2) Despite subclause (1), an operation is not a ***medical transport operation*** if the operation is of a kind prescribed by the Part 119 Manual of Standards for the purposes of this subclause.

75 Definition of *passenger transport operation*

(1) A ***passenger transport operation*** is an operation of an aircraft that involves the carriage of passengers, whether or not cargo is also carried on the aircraft.

- (2) Despite subclause (1), an operation is not a *passenger transport operation* if the operation is:
- (a) an operation of an aircraft with a special certificate of airworthiness; or
 - (b) a cost-sharing flight; or
 - (c) a medical transport operation; or
 - (d) if the registered operator of an aircraft is an individual—an operation of the aircraft:
 - (i) that involves the carriage of that individual; and
 - (ii) does not also involve the carriage of other passengers; or
 - (e) if the registered operator of an aircraft is an individual—an operation of the aircraft:
 - (i) that involves the carriage of that individual; and
 - (ii) involves the carriage of other passengers; and
 - (iii) for which no payment or reward is made or given in relation to the carriage of the other passengers or cargo.

Part 3—Definitions for this Part, Parts 42, 66, 145 and 147 and Subparts 202.BA, 202.CG, 202.GE and 202.GG

1 General

In this Part, Parts 42, 66, 145 and 147, and Subparts 202.BA, 202.CG, 202.GE and 202.GG:

aircraft type training, for a rating, means the training for the rating delivered by a maintenance training organisation in accordance with a course plan for the training approved by CASA under regulation 147.030.

approval rating:

- (a) for a Subpart 42.F organisation—has the meaning given by subregulation 42.015(1); and
- (b) for a Part 145 organisation—has the meaning given by subregulation 145.010(1).

aviation industry standard means a document specified in the Part 42 Manual of Standards as an aviation industry standard.

base maintenance, for a Part 145 organisation, means maintenance on an aircraft that CASA has approved in the organisation's exposition as being base maintenance for the organisation.

CAR maintenance activities means the following activities conducted under Part 4A of CAR:

- (a) carrying out maintenance on a registered aircraft to which Part 42 does not apply, or on an aircraft component or aircraft material for an aircraft of that kind;
- (b) certifying the completion of maintenance carried out on an aircraft or aircraft component;
- (c) issuing a maintenance release for an aircraft;
- (d) endorsing a maintenance release for an aircraft;
- (e) issuing an authorised release certificate for an aircraft component.

CAR maintenance activities subcontractor, for an approved maintenance organisation: see clause 21.

carries out maintenance, in relation to an approved maintenance organisation, has the meaning given by subclause 5(5).

carrying out maintenance on an aeronautical product has the meaning given by subclause 5(2).

carrying out maintenance on an aircraft has a meaning affected by clause 5.

category A licence means a subcategory A1, A2, A3 or A4 aircraft engineer licence.

category B1 licence means a subcategory B1.1, B1.2, B1.3 or B1.4 aircraft engineer licence.

category B2 licence means a category B2 aircraft engineer licence.

category C licence means a category C aircraft engineer licence.

category training, for a category A, B1 or B2 licence, means training in the required units of competency for the licence or rating.

certification authorisation means an authorisation that an approved maintenance organisation grants to an individual in accordance with the Part 42 Manual of Standards or the Part 145 Manual of Standards to do either or both of the following on behalf of the organisation:

- (a) perform maintenance certifications;
- (b) issue certificates of release to service.

certifying employee, for particular maintenance, means an individual who holds a certification authorisation that is in force from an approved maintenance organisation for the maintenance.

employee, in relation to an approved maintenance organisation, includes:

- (a) a maintenance services subcontractor; and
- (b) a CAR maintenance activities subcontractor.

excluded State means a foreign country specified as an excluded State in the Part 66 Manual of Standards.

exempt public authority has the meaning given by section 9 of the *Corporations Act 2001*.

foreign company means:

- (a) a body corporate:
 - (i) that is incorporated in an external Territory, or outside Australia and the external Territories; and
 - (ii) that is not an exempt public authority; or
- (b) an unincorporated body that:
 - (i) is formed in an external Territory, or outside Australia and the external Territories; and
 - (ii) under the law of its place of formation, may sue or be sued, or may hold property in the name of its secretary or of an officer of the body duly appointed for that purpose; and
 - (iii) does not have its head office or principal place of business in Australia.

foreign licence means:

- (a) a licence that:
 - (i) is granted under a national aviation law of a foreign country, other than a foreign country that is an excluded State; and

- (ii) complies with Annex 1, *Personnel Licensing*, to the Chicago Convention; and
- (iii) deals with the provision of maintenance services; or
- (b) an authorisation that:
 - (i) is issued by a foreign company, other than a foreign company incorporated or formed in an excluded State; and
 - (ii) deals with the provision of maintenance services; or
- (c) a licence mentioned in paragraph (a) and an authorisation mentioned in paragraph (b) that together deal with the provision of maintenance services.

instructions for continuing airworthiness, for an aircraft or aeronautical product, has the meaning given by clause 10.

large aircraft means:

- (a) an aeroplane that:
 - (i) has a maximum take-off weight of more than 5 700 kg; and
 - (ii) is not of a type and model specified in the Part 42 Manual of Standards for subparagraph (b)(ii) of the definition of small aircraft; or
- (b) an aeroplane that:
 - (i) has a maximum take-off weight of not more than 5 700 kg; and
 - (ii) is of a type and model specified in the Part 42 Manual of Standards as a large aircraft; or
- (c) a helicopter that:
 - (i) has more than 1 engine; and
 - (ii) is not of a type and model specified in the Part 42 Manual of Standards for subparagraph (d)(ii) of the definition of small aircraft; or
- (d) a helicopter that:
 - (i) has only 1 engine; and
 - (ii) is of a type and model specified in the Part 42 Manual of Standards as a large aircraft.

line maintenance, for a Part 145 organisation, means maintenance on an aircraft that CASA has approved in the organisation's exposition as being line maintenance for the organisation.

maintenance certification means a certification performed under Division 42.H.2.

maintenance data has the meaning given by clause 15.

maintenance services means the following:

- (a) carrying out maintenance on an aircraft or an aeronautical product;
- (b) performing maintenance certification for maintenance carried out on an aircraft;

- (c) issuing a certificate of release to service for an aircraft or aeronautical product in relation to maintenance carried out on the aircraft or aeronautical product.

maintenance services subcontractor, for an approved maintenance organisation, has the meaning given by clause 20.

maintenance training means category training or aircraft type training.

maintenance training organisation means a person who holds an approval under regulation 147.030 that is in force.

Part 66 Manual of Standards means the Manual of Standards issued by CASA under regulation 66.015.

Part 145 Manual of Standards means the Manual of Standards issued by CASA under regulation 145.015.

Part 147 Manual of Standards means the Manual of Standards issued by CASA under regulation 147.015.

permitted aircraft type means an aircraft type, within the meaning given by regulation 66.010, specified in the Part 66 Manual of Standards as one for which an approved maintenance organisation may arrange for the manufacturer of the aircraft or the aircraft engine to provide training and assessment.

permitted training means:

- (a) training and assessment for an aircraft type, within the meaning given by regulation 66.010, aircraft system or subset of an aircraft system specified in the Part 66 Manual of Standards as one for which a Part 145 organisation may provide training and assessment; or
- (b) training and assessment for a permitted aircraft type.

provides has the meaning given by clause 25.

rating means an authorisation granted under regulation 66.080 or 66.095, being a permission:

- (a) to perform maintenance certification, under a category B1 or B2 licence, for maintenance carried out on a particular aircraft type; or
- (b) to issue a certificate of release to service, under a category B1, B2, or C licence, for an aircraft of a particular aircraft type in relation to maintenance carried out on the aircraft.

recognised State means a foreign country specified as a recognised State in the Part 66 Manual of Standards.

small aircraft means:

- (a) an aeroplane that:
 - (i) has a maximum take-off weight of not more than 5 700 kg; and
 - (ii) is not of a type and model specified in the Part 42 Manual of Standards for subparagraph (b)(ii) of the definition of large aircraft; or

- (b) an aeroplane that:
 - (i) has a maximum take-off weight of more than 5 700 kg; and
 - (ii) is of a type and model specified in the Part 42 Manual of Standards as a small aircraft; or
- (c) a helicopter that:
 - (i) has only 1 engine; and
 - (ii) is not of a type and model specified in the Part 42 Manual of Standards for subparagraph (d)(ii) of the definition of large aircraft; or
- (d) a helicopter that:
 - (i) has more than 1 engine; and
 - (ii) is of a type and model specified in the Part 42 Manual of Standards as a small aircraft.

specialist maintenance means:

- (a) for a Subpart 42.F organisation:
 - (i) maintenance specified in the Part 42 Manual of Standards as specialist maintenance; and
 - (ii) maintenance that CASA has approved in the organisation's exposition as being specialist maintenance for the organisation; and
- (b) for a Part 145 organisation:
 - (i) maintenance specified in the Part 145 Manual of Standards as specialist maintenance; and
 - (ii) maintenance that CASA has approved in the organisation's exposition as being specialist maintenance for the organisation.

supervising, in relation to maintenance being carried out, has the meaning given by clause 30.

type rated aircraft type, for an aircraft engineer licence, means an aircraft type, within the meaning given by regulation 66.010, specified in the Part 66 Manual of Standards as a type rated aircraft type for the licence.

unit of competency means a unit of the Australian Qualifications Framework Aeroskills Training Package, as in force from time to time.

5 Definitions relating to carrying out maintenance

Meaning of carrying out maintenance on an aircraft

- (1) A reference to carrying out maintenance on an aircraft includes:
 - (a) carrying out maintenance on an aeronautical product that is fitted to the aircraft at the time the maintenance is carried out; and
 - (b) carrying out maintenance on an aeronautical product that is not fitted to the aircraft at the time the maintenance is carried out, in the circumstances mentioned in subclause (3) or (4).

Meaning of carrying out maintenance on an aeronautical product

- (2) A reference to ***carrying out maintenance on an aeronautical product*** is a reference to carrying out maintenance on an aeronautical product that is not fitted to an aircraft at the time the maintenance is carried out, other than in the circumstances mentioned in subclause (3) or (4).
- (3) The circumstances are that:
 - (a) the aeronautical product (the ***removed product***) is removed from a location on the aircraft; and
 - (b) the removal of the removed product is permitted, by the maintenance data for maintenance to be carried out on the removed product, for the purpose of improving access for the carrying out of maintenance on that product; and
 - (c) the removed product is returned to the same location on the aircraft at the completion of the maintenance for which it was removed.
- (4) The circumstances are that:
 - (a) the aeronautical product (the ***removed product***) is removed from a location on the aircraft; and
 - (b) the removal of the removed product is for the purpose of carrying out maintenance that is necessary to rectify a defect in the removed product; and
 - (c) the maintenance data for the maintenance does not require the use of specified tools or equipment for carrying out the maintenance; and
 - (d) the removed product is returned to the same location on the aircraft at the completion of the maintenance; and
 - (e) the serviceability of the removed product can be tested, using an aircraft system, after the removed product is returned to the aircraft.

Carrying out of maintenance by approved maintenance organisations

- (5) An approved maintenance organisation ***carries out maintenance*** if the maintenance is carried out on the organisation's behalf by an individual.

10 Meaning of *instructions for continuing airworthiness*

- (1) ***Instructions for continuing airworthiness***, for an aircraft or aeronautical product, means written instructions, as in force from time to time:
 - (a) that specify requirements, procedures and standards for the continuing airworthiness of the aircraft or aeronautical product; and
 - (b) that are:
 - (i) issued by any of the persons mentioned in subclause (2); or
 - (ii) for an aircraft or aeronautical product for which there is a design for a modification or repair that is taken to have been approved under subregulation 21.465 or 21.470—included, or referred to, in the document that contains the design.
- (2) The persons are the following:

- (a) the holder of the type certificate, foreign type certificate, supplemental type certificate or foreign supplemental type certificate for the aircraft or aeronautical product;
- (b) the holder of any of the following for the design of a modification of, or a repair to, the aircraft or aeronautical product:
 - (i) a modification/repair design approval; or
 - (ii) an approval mentioned in regulation 21.475; or
 - (iii) an approval that continues in force under regulation 202.054, 202.055 or 202.056;
- (c) the manufacturer of the aircraft or aeronautical product.

15 Meaning of *maintenance data*

- (1) Subject to subclauses (2), (3) and (4), *maintenance data*, for maintenance to be carried out on an aircraft or aeronautical product, means procedures for carrying out the maintenance, as in force from time to time, that are mentioned in:
 - (a) the instructions for continuing airworthiness for the aircraft or aeronautical product; or
 - (b) if the instructions for continuing airworthiness do not include procedures for carrying out the maintenance—an aviation industry standard that applies to the maintenance.
- (2) Subject to subclauses (3) and (4), if, at a particular time:
 - (a) a Part 145 organisation is carrying out maintenance on an aircraft or aeronautical product; and
 - (b) the organisation has written a procedure for carrying out the maintenance;
 then, at that time, the procedure written by the organisation is the *maintenance data* for the maintenance for the organisation.
- (3) Subject to subclause (4), if, at a particular time:
 - (a) a continuing airworthiness management organisation is providing continuing airworthiness services for an aircraft; and
 - (b) the organisation has written a procedure for carrying out the maintenance on the aircraft or on an aeronautical product fitted to the aircraft;
 then, at that time, the procedure written by the organisation is the *maintenance data* for the maintenance for the aircraft or aeronautical product.
- (4) If, at a particular time, an airworthiness directive that applies to an aircraft or aeronautical product mentions a procedure for carrying out the maintenance, then, at that time, the procedure in the airworthiness directive is the *maintenance data* for the maintenance.

20 Meaning of *maintenance services subcontractor*

- (1) A person is a *maintenance services subcontractor* in relation to an approved maintenance organisation if the person is a party to a written contract with the organisation to provide maintenance services on behalf of the organisation.

- (2) An employee of a maintenance services subcontractor under subclause (1) is also a ***maintenance services subcontractor***.

21 Meaning of *CAR maintenance activities subcontractor*

- (1) A person is a ***CAR maintenance activities subcontractor*** in relation to an approved maintenance organisation if the person is a party to a written contract with the organisation to undertake CAR maintenance activities on behalf of the organisation.
- (2) An employee of a CAR maintenance activities subcontractor under subclause (1) is also a ***CAR maintenance activities subcontractor***.

25 Meaning of *provides*

An organisation ***provides*** any of the following services or training if its employees provide the service or training for or on behalf of the organisation:

- (a) maintenance services;
- (b) permitted training;
- (c) continuing airworthiness management services;
- (d) maintenance training.

30 Meaning of *supervising*

A person (the ***supervisor***) is ***supervising*** the carrying out of maintenance done by another person if the supervisor:

- (a) is physically present at the place that the maintenance is being carried out; and
- (b) is observing the maintenance being carried out to the extent necessary to enable the supervisor to form an opinion as to whether the maintenance is being carried out properly; and
- (c) is available to give advice to, and answer questions about the maintenance from, the person carrying it out.

Endnotes

Endnote 1—About the endnotes

The endnotes provide information about this compilation and the compiled law.

The following endnotes are included in every compilation:

Endnote 1—About the endnotes

Endnote 2—Abbreviation key

Endnote 3—Legislation history

Endnote 4—Amendment history

Abbreviation key—Endnote 2

The abbreviation key sets out abbreviations that may be used in the endnotes.

Legislation history and amendment history—Endnotes 3 and 4

Amending laws are annotated in the legislation history and amendment history.

The legislation history in endnote 3 provides information about each law that has amended (or will amend) the compiled law. The information includes commencement details for amending laws and details of any application, saving or transitional provisions that are not included in this compilation.

The amendment history in endnote 4 provides information about amendments at the provision (generally section or equivalent) level. It also includes information about any provision of the compiled law that has been repealed in accordance with a provision of the law.

Editorial changes

The *Legislation Act 2003* authorises First Parliamentary Counsel to make editorial and presentational changes to a compiled law in preparing a compilation of the law for registration. The changes must not change the effect of the law. Editorial changes take effect from the compilation registration date.

If the compilation includes editorial changes, the endnotes include a brief outline of the changes in general terms. Full details of any changes can be obtained from the Office of Parliamentary Counsel.

Misdescribed amendments

A misdescribed amendment is an amendment that does not accurately describe how an amendment is to be made. If, despite the misdescription, the amendment can be given effect as intended, then the misdescribed amendment can be incorporated through an editorial change made under section 15V of the *Legislation Act 2003*.

If a misdescribed amendment cannot be given effect as intended, the amendment is not incorporated and “(md not incorp)” is added to the amendment history.

Endnote 2—Abbreviation key

ad = added or inserted	o = order(s)
